253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures (2 units). Lecture, two hours; discussion, one hour. Prerequisites: course 100 or equivalent, Biostatistics 100A, consent of instructor. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries (2 units). (Same as Community Health Sciences M255.) Injuries have been leading killer of children in the U.S. for decades. Children face specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. S/U or letter grading.

260. Environmental Epidemiology (2 units). Lectures, one hour; discussion, one hour. Prerequisite: course 100 or 200. Methodological problems and approaches of epidemiology for assessing health impact of major types of environmental exposure.

261. Occupational Epidemiology. Lecture, two hours; discussion, two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments.

268. Introduction to Pharmacoepidemiology (2 units). Prerequisites: course 200, consent of instructor. Pharmacoepidemiology is application of epidemiologic knowledge to the assessment of specific risk factors, strategies to study the effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U grading.
270. Epidemiology and Health Policy (2 units). Prerequisites: courses 100 or 201A-201B, Biostatistics 100B or 110B, Health Services 100; consent of instructor. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators.

M276. Structure and Function of Nutrients Implicated in Chronic Disease. (Same as Community Health Sciences M267.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: one prior organic chemistry course. Basic nutrition concepts for public health and science majors.

280. Parasitic Diseases and Global Health. Prerequisite: consent of instructor. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and intervention strategies for their control.

290. Seminar: Epidemiology — Infectious and Tropical Disease (2 units). Review of research on specific diseases critical to health importance. May be repeated for credit. S/U or letter grading.

291. Seminar: Epidemiology — Methodology (2 units). Prerequisites: course 100 or 200, consent of instructor. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

400. Field Studies in Epidemiology (2 or 4 units). Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

401. Database Theory and Practical Applications in Injury Epidemiology (2 units). Requisite: course 201A. Exploration of theory and practical strategies for database construction and manipulation, selection, and use of desktop-computing database applications using a variety of examples from epidemiological research.

402. Advanced Data Analysis in Occupational and Environmental Epidemiology. Lecture, two hours; laboratory, two hours. Requisites: courses 201A-201B, or 201A and 261, one data management course. Development of strategies for analyzing data in occupational and environmental settings. Uses of multivariate data analysis techniques typically used in occupational cohort studies, nested case-control studies, and ecologic studies in environmental epidemiology. S/U or letter grading.

410A. Management of Epidemiologic Data (2 units). Prerequisites: courses 100A or equivalent, consent of instructor. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer.

411. Research Resources in Epidemiology (2 units). Lecture, one hour; discussion, one hour. Prerequisites: course 100 or 200, Biostatistics 100A. Critical review of current epidemiologic research and application to data management, with particular emphasis on databases in chronic infectious diseases. Introduction to personal computers and appropriate software for epidemiologic studies.

418. Rapid Epidemiologic Surveys in Developing Countries (2 to 4 units). Lecture, one to two hours; laboratory, one to two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Practical approaches to epidemiologic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

419. Data Management and Applied Epidemiologic Analysis Using SAS. Lecture, two hours; laboratory, two hours. Prerequisites: course 100 or 200 (may be taken concurrently), Biostatistics 100A. Practical issues in data management and epidemiologic analysis using SAS programming language. Use of data sets from national surveys and from epidemiologic studies to illustrate data management and analysis capabilities of SAS.

459. Doctoral Dissertation Research (2 to 8 units). Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.
The object of systematic musicology, a multi-disciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

Undergraduate Study

Bachelor of Arts Degree

Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a video-tape of musical performance, following departmental guidelines.

Preparation for the Major

The Major

Required: Ethnomusicology M180, 181, 190, six elective courses selected from 106A, 106B, 106C, M108A, 108B, M110A, M110B, 113 through 121, M126, 128, 130, 136A through 172B, 174, C179, 199E, 199S, and four upper division courses from other departments related to the area of concentration and selected in consultation with a faculty advisor.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

Applicants for the Master of Arts in Ethnomusicology must have completed a bachelor's degree in music or a field related to ethnomusicology. Applicants whose degree is not in music are required to provide evidence of their musical aptitude and ability. Applicants for either degree are required to submit, in addition to the regular Graduate Division requirements (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper, and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audition or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received. Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in this field at UCLA.

Admission Timetable

Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

January 15 — Supplementary application materials are due.

By March 15 — Notice of acceptance or denial is sent.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

Applicants on a waiting list for admission are notified as soon as a decision can be reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

Areas of Study

The Department of Ethnomusicology offers the degree of Master of Arts in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

Course Requirements

Students are required to complete a minimum of nine courses, five of which must be at the graduate level. Only four units of Ethnomusicology 596, and four units of 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include Music 106B, 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 123A, 123B, 123C, 151A, 151B, 156, C175 (four units only), and Ethnomusicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 157A, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Ethnomusicology 598 serves to guide the preparation of the thesis and should normally be taken during the last quarters of residence.

Ethnomusicology. In addition to a five-course core (Ethnomusicology 200, C201A-C201B, 281A, and 282), students must take two courses in one or more music culture areas (i.e., music of Japan, China), one course from the Department of Anthropology, and one elective from the department's graduate or upper division offerings, selected courses in Western music, a related discipline, or particular area outside the department as approved by the student's mentor. Students who have not taken Ethnomusicology 20A-20B-20C or the equivalent before entering are required to audit these courses. Course 290 may be taken but cannot count toward M.A. course requirements. One quarter of Ethnomusicology 292F may be counted to satisfy one of the electives. Students must enroll in a minimum of two quarters of ethnomusicology performance organizations, Ethnomusicology 91A-91Z, which are not applied to their degree.

Specialization in Systematic Musicology

In addition to a six-course core (Ethnomusicology 200, 201A, C203, one course from 271, 273, 275, 283, or Musicology 269, and two terms of Ethnomusicology 279), students must take one course in a music culture area, two electives from the department's graduate or upper division offerings, and selected courses in Western music, a related discipline, or particular area outside the department as approved by their mentors.

Comprehensive Examination Plan

To choose the comprehensive examination plan option, students must first submit a research paper written during their master's studies as evidence of their writing and scholarly abilities. For ethnomusicology: competence in the field is then tested with two written examinations: (1) theory and method in ethnomusicology and (2) a world music culture area or approved topic reflecting the student's course of study. For systematic musicology, competence is tested with a take-home examination on a topic to be determined by the student's major advisor. A discussion of the general field of systematic musicology is included in the final oral examination. The examinations are administered by a three-member committee, no more than one of whom shall be outside the department. The comprehensive examination is normally completed within three years of beginning M.A. coursework. Any failed examinations may be retaken only once, during the next two quarters. The department requires a final oral examination under both the comprehensive and thesis plans.

Thesis Plan

Students may elect either the thesis or comprehensive examination. The thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the program committee in the student's area. The presentation must demonstrate significant style, organization, creativity, and depth of understanding of the subject.

A three-year limit from the beginning of the M.A. coursework is normally imposed for the completion of the thesis. Students who do not meet this deadline are required to take the comprehensive examination at the end of their third year in order to be considered for advancement to the Ph.D. program. The thesis topic and the composition of the master's committee are approved by the pro-
program committee in the student's area before nomination to the Graduate Division. The department requires a final oral examination under both thesis and comprehensive examination plans.

**Doctoral Degree**

**Admission**

Applicants for the Ph.D. must normally have completed an M.A. or equivalent degree in one of the following: ethnomusicology, systematic musicology, Western music, a non-Western music tradition, a related discipline, or area studies with a music specialization. Applicants who are accepted but whose qualifications do not meet the requirements for the department's M.A. degree are required to complete remedial coursework as recommended by the program committee before proceeding with doctoral work.

Applicants are required to submit, in addition to the regular Graduate Division requirements (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper (the M.A. thesis, if it is available), and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audition or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received.

Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in that field at UCLA.

**Admission Timetable**

Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

January 15 — Supplementary application materials are due.

By March 15 — Notice of acceptance or denial is sent.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

Applicants on a waiting list for admission are notified as soon as a decision can be reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

**Major Fields or Subdisciplines**

The Department of Ethnomusicology offers the degree Doctor of Philosophy in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

**Course Requirements**

Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level.

Students may complete the residence requirement by electing courses recommended by their mentor from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

**Ethnomusicology.** In addition to a five-course core (Ethnomusicology 200, 201A, 201B, 281A, and 282), 10 additional courses are required, including one music culture seminar, at least six of which must be at the 200 level or higher and must include three quarters of Ethnomusicology 290, and one course from 271, 273, 275, or 283. Students may count one quarter of Ethnomusicology 292F to satisfy one of their electives. The remainder may be selected from the graduate offerings in the department or selected courses in Western music, a related discipline, or particular area outside the department as guided by students' mentors. No more than two 500-series courses and two courses outside the department may be counted toward the degree. Students must enroll in a minimum of three quarters of ethnomusicology performance organizations (Ethnomusicology 91A-912), which are not applied to their degree. Students are normally expected to conduct field research for one year.

**Specialization in Systematic Musicology.** In addition to a six-course core (Ethnomusicology 200, 201A, C203, two courses of 279, and one from Ethnomusicology 271, 273, 275, 283, or Musicology 269), nine other courses are required, including one music culture seminar, at least six of which must be at the 200 level or higher and must include three additional quarters of Ethnomusicology 279. The remainder may be selected from the graduate offerings in the department or selected courses in Western music, a related discipline, or particular area outside the department as guided by students' mentors. No more than two 500-series courses and two courses outside the program may be counted toward the degree.

Students who do not have an M.A. in Ethnomusicology from UCLA may be required, in consultation with their mentor, to take other relevant and necessary courses beyond the 10 specified.

**Written and Oral Qualifying Examinations**

When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. Staff from the Student Services Office acts as proctor for the tests. Normally, the five written examinations are spread over a two-week period but should be completed within three weeks. Examinations not passed may be repeated once in consultation with the guidance committee and after a stipulated period of time. An oral examination may be scheduled at the discretion of the departmental guidance committee.

**Ethnomusicology.** The written examinations for ethnomusicology students without a specialization consist of the following:

1. General ethnomusicology, history, theory, and method. (Students who took the comprehensive examination option for the M.A. have already done this.)

2. Concepts and terminologies in world music.

3. Student's principal musical area.

4. One from organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.

5. A second musical area or related discipline (e.g., anthropology).

**Specialization in Systematic Musicology.** The written examinations for students with a specialization in systematic musicology consist of the following:

1. General systematic musicology, history, theory, and method.

2. Concepts and terminologies in world music.

3. History and analysis of Western music.

4-5 (Two areas to be selected from the following: organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.

After completion of the written and oral qualifying examinations, students may submit the dissertation topic and request for a doctoral committee for approval. The dissertation topic and the composition of the doctoral committee are approved by the program committee in the student's area before nomination to the Graduate Division.

**Ethnomusicology**

**Lower Division Courses**

1A-1B. Fundamentals of Sound and Music of the World (2 units, 4 units). Lecture, two hours; laboratory, one hour. Acoustical makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques.

10A-10B-10C. World Music Theory and Musicianship. Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to ethnomusicology and world arts and cultures majors. Course 10A is requisite to 10B, which is requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition.

15. American Life in Music. Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

Upper Division Courses

106A-106B-106C. Music of the American Indians. American Indian music studied within broader context of styles, cultural values, and sources, including films, recordings, lectures, and limited group singing and dancing. California-Yuman, Great Basin, and Northwest Coast Areas; 106B. Athabascan, Pueblo, Plains, and Modern Pan-Indian Trends; 106C. Sociology of American Indian Music. 110A-108A. Music of Latin America. Lecture, three hours. Prerequisite: consent of instructor. Course 110A is not prerequisite to 108B. Survey of traditional and contemporary musical culture. 110A. Mexico, Central America, and the Caribbean Isles. (Formerly numbered 108A.) (Same as Chicana and Chicano Studies M108A); 108B. Latin South America. 110A-M110B. African American Musical Heritage. (Same as Afro-American Studies M110A-M110B and Folklore M154A-M154B). Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America. 111. Ellingtonia. (Same as Afro-American Studies M115.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington’s music, known as “big band” or “jazz” music, has served as the basis for various other musical forms. 112. Music of Brazil. Lecture, three hours. Prerequisite: consent of instructor. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present. M124. Anglo-American Folk Song. (Same as English 113B.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. M126. Folk Music of Western Europe. (Same as Folklore M161.) Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region. M127. Jazz Keyboard Harmony (1 unit). (Same as Music M127.) Laboratory, two hours. Study of jazz harmony, the development of basic jazz keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory. M128. Folk Music of Eastern Europe. Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. M129A-M129B-M129C. Jazz Theory and Improvisation (2 units each). (Same as Music M129A-M129B-M129C). Lecture, four hours. Elements of jazz theory and improvisation. M129A. Basic jazz harmony, construction, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. M129B. Prerequisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. M129C. Prerequisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions. M130. Folk Music of the Mediterranean. Lecture, three hours. Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in the Mediterranean basin, particularly features of contrast, similarity, and cross-cultural interaction. Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area. CM132. Celtic Folk Music. (Same as Folklore CM132). Prerequisite: consent of instructor. Survey and analysis of traditional and popular music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading. 136A-136B. Music of Africa. Prerequisite: consent of instructor. Investigation of historical aspects, social functions, musical instruments, and relationships of music to other art forms in selected areas of Africa. 146. Folk Music of South Asia. Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence. 147. Survey of Classical Music in India. Examination of modal, metric, and formal structures of Indian classical music in context of religious, sociocultural, and historical background of the country. 156A-156B. Music of China. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. 156A. History and theory of music of China, including survey of various provinces and their instrumental techniques. 156B. Prerequisite: course 156A. Introduction to various notational systems. Analysis of representative styles. 157. History of Chinese Opera. Prerequisite: consent of instructor. Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres. 158A-158B-158C. Studies in Chinese Instrumental Music. Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. 158A. Study of literature, major sources, paleography, theory, and philosophy of the Ch’ in, including transcription and analysis. 158B. Study of literature, major sources, paleography, theory, and philosophy of the P’ I Pa, including transcription and analysis. 158C. Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society. 160A. Survey of Music in Japan. Lecture, three hours. Prerequisite: consent of instructor. Survey of main genres of Japanese traditional music, including Gamaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms. 160B. Studies in Japanese Court Music. Lecture, two hours; laboratory, one hour. Prerequisite: course 160A. Study of Japanese music, including historical background, with emphasis on understanding the instrumental techniques and notation of various instruments of the court orchestra. 170. Acoustics. Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities. 171. Instruction in Advanced Jazz Performance (2 units). Laboratory, one hour. Prerequisite: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units. 172A-172B. Psychology of Music. 172A. Designed for nonmajors. Introduction to psychology of music, historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. 172B. Prerequisite: course 172A or consent of instructor. Study of psychological factors and problems in music from points of view of listener, performer, and composer. 173. Experimental Research in Music. Prerequisite: consent of instructor. Recommended for music majors in all specialties. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantitativational, and statistical approaches. 174. Aesthetics of Music. Lecture, three hours. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples. 175. Sociology of Music. Intended for ethnomusicology, musicology, and music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusicological inquiry, including study of ethnomusicology, musicology, and cultural politics of music. P/NP or letter grading.
M177. Jazz Combo (2 units). (Same as Music M177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

C179. Proseminar: Systematic Musicology. Semi- nar, three hours. Prerequisite: consent of instructor. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropol- ogy, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C203.

M180. Analysis of Traditional Music. (Same as Folklore M180.) Introduces students to theory and methods of music analysis, including musical styles and the relation of music to culture. Approaches music from both theoretical and practical viewpoints. Prerequisite: completion of sequence of one-hour senior recital of jazz repertoire or prepara- tion of a senior honors project (length to be approved by advisor). P/NP grading.

190. Study of Ethnomusicology. (Formerly numbered C190A.) Lecture, three hours. Requisites: courses 10A-10B-10C, 20A-20B-20C. Intended for ethnomusicology majors. Introduction to history and analysis of ethnomusicology, folk culture, and contemporary music. May be repeated for a maximum of eight units.

190S. Special Studies in Ethnomusicology (2 to 4 units). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and depart- ment chair. Individual study in ethnomusicology resulting in research project. May be repeated for a maximum of eight units.

199S. Special Studies in Systematic Musicology (2 to 4 units). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and depart- ment chair. Individual study in systematic musicology resulting in research project. May be repeated for a maximum of eight units.

Graduate Courses

200. Research Methods and Bibliography (6 units). Lecture, three hours. Prerequisite: graduate standing. Guided writing, utilizing specific bibliography, in ethnomusicology and systematic musicology.

201A-201B. Proseminars: Ethnomusicology. (Formerly numbered M201A-M201B.) Lecture, three hours. Designed for graduate students. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present.

C203. Proseminar: Systematic Musicology. Semi- nar, three hours. Prerequisite: consent of instructor. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, soci- ology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C179.

207. Seminar: North American Indian Music. Semi- nar, three hours. Prerequisite: course 106A or 106B or 106C or consent of instructor. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analy- sis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts.

208. Seminar: Latin American Music. Seminar, three hours. Prerequisite: consent of instructor. Review of bibliographic, methodological, and philo- sophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression.

228. Seminar: Balkan Music. Seminar, three hours. Prerequisite: course 128 or consent of instructor. Major issues in study of Balkan music, including spectral analysis, music instruments, dance music, rituals and customs, minorities, and ideology.

CM232. Celtic Folk Music. (Same as Folklore CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and per- formance, social value and ideology. Concurrently scheduled with course CM139. S/U or letter grading.

240. Music of Arabic-Speaking Near East. Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Investigative study of musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required.

241. Music of Iran and Other Non-Arabic-Speaking Communities. Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Comparative study of musical traditions of Iran and other related areas, including Tur- key, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisa- tion, and contemporary practice. Concurrent participa- tion in Near East performance ensemble (course 91N) required.

248A-248B. Classical Music of India. Lecture, three hours. Prerequisite: course 146 or 147 or con- sent of instructor. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on practical aspects of music theory: style, form, aural training, and development of techniques, and musical instruments. Concurrent par- ticipation in Indian performance group (course 91F) required.

250A-250B. Music of Indonesia. Lecture, three hours. Prerequisite: course 20C or consent of instruc- tor. During first term, emphasis on music and related performing arts of Java. Focus on music and perform- ing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indone- sian performance group (course 91B or 91H) re- quired.

252. Seminar: Music of Southeast Asia. Seminar, three hours. Prerequisite: course 20C or consent of instructor. Presentation of materials con- cerning musical performance traditions of Laos, Cam- bodia, Vietnam, Thailand, and Burma, both in main- land Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology.

271. Seminar: Acoustics of Music (6 units). Seminar, three hours. Prerequisite: course 170 or consent of instructor. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western instruments, tuning systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit.

273. Seminar: Psychology of Music (6 units). Sem- inar, three hours. Prerequisite: course 173 or consent of instructor. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit.

275. Seminar: Aesthetics of Music (6 units). Semi- nar, three hours. Prerequisite: course 176 or consent of instructor. Specific topics in Western and non-West- ern aesthetic thought, including value, meaning (semi- otics), historical development of theoretical perspec- tives and critical theory, and interpretation. May be repeated once for credit.

279. Seminar: Systematic Musicology. Seminar, three hours. Prerequisites: course 170, consent of instructor. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit.

281A-281B. Seminars: Field and Laboratory Meth- ods in Ethnomusicology (6 units each). Seminar, three hours; laboratory, two hours. Prerequisites: courses 20A-20B-20C. Fieldwork concepts and meth- ods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects.

282. Seminar: Analysis (6 units). Seminar, three hours. Prerequisite: consent of instructor. Study of music in historical and cultural backgrounds, including problems of transcription, methods of analysis, and issues relating to music theory and aesthetic, social, and cultural aspects of indigenous musical traditions of Africa. Emphasis on current issues. Concurrently scheduled with course CM180. S/U or letter grading.

283. Seminar: Study of Musical Instruments (Or- ganology) (6 units). Seminar, three hours. Prerequi- sites: courses 20A-20B-20C or consent of instructor. Musical instruments studied in terms of their struc- tures, performance contexts, cultural significance, and patterns of change.

284. Seminar: Anthropology of Music. Prerequi- sites: courses 20A-20B-20C. Analysis of current anthropo- logical paradigms and issues that have major impact on ethnomusicology.

285. Seminar: Comparative Music Theory (6 units). Seminar, three hours. Prerequisite: consent of instructor. Comparative study of classical music theory and practice of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music and place between cultural values and artistic practice in different civilizations.

M287. Seminar: Folk Music. (Same as Folklore M287.) Seminar, three hours. Prerequisite: consent of instructor.

290. Seminar: Ethnomusicology (6 units). Seminar, three hours. Prerequisites: courses 20A-20B-20C, 200, and 201A-201B, or consent of instructor. May be repeated for credit.

292A-292Z. Special Topics in Ethno- musicology. Prerequisites: graduate standing, con- sent of instructor. Designed to utilize special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a faculty member, responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
495. Introductory Practicum for Teaching Apprentices in Ethnomusicology and Systematic Musicology (2 units). Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Ethnomusicology and Systematic Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

596. Directed Individual Studies (2, 4, or 6 units). Only four units may be applied toward M.A. minimum course requirements.

598. Guidance of Ph.D. Dissertation (4, 8, or 12 units). May be repeated for credit. S/U grading.

**Scope and Objectives**

The European Studies Program provides undergraduates with an opportunity to study Europe from the vantage points of several disciplines in the humanities and social sciences. Its primary goals are twofold: to enable students to cross the existing boundaries between and within the humanities and social sciences and to develop approaches to European society and culture consonant with the dramatic changes taking place in that region. Not only has the Cold War model of distinct eastern and western blocs lost the bulk of its explanatory power, but European culture, economy, and social structure have been transformed by immigration, unification, Americanization, and new developments in the intellectual and political realms.

The events of recent years make it clear that the University and its students require new academic approaches to the region. The demise of the Soviet Bloc, the increased ethnic conflict throughout the region, the migration of peoples within Europe and from other parts of the world, the challenges of a rapidly evolving global economic system, and the uncertainties inherent in the process of unification—these developments call into question the intellectual configurations that have long dominated our thinking. Today the regions of Europe provide a laboratory for examining—and finding solutions for—everything from efforts to integrate people of color to changes in the family and the status of women. They challenge us to consider new philosophical, artistic, and literary approaches and require us to come to grips with the collapse of socialist command economies in the East and the exhaustion of once-successful welfare states in the West.

To enable students to consider these questions, the European studies major offers an interdisciplinary program leading to the Bachelor of Arts degree. Students are required to take (1) study a European language other than English, (2) develop a historical perspective on European issues, (3) examine European culture, society, politics, and economy, and (4) acquire basic analytical and theoretical skills. Central to this effort are a series of core seminars and a senior essay to encourage majors to delve into a research topic of their choice.

**Undergraduate Study**

**Bachelor of Arts Degree**

The curriculum is designed to serve the needs of students who wish to (1) approach the study of Europe from a structured, interdisciplinary perspective, (2) pursue graduate work in disciplines permitting the study of Europe, (3) orient their professional life toward European affairs in fields such as law, business, diplomacy, journalism, and human services, and (4) acquire valuable skills in foreign languages and writing that will assist them in their careers.

**Admission**

Interested students should meet with the program chair no later than the beginning of the sophomore year to discuss requirements and formulate their course of study. Students are expected to declare the major at the end of their sophomore year, following normal UCLA procedures, and must have a minimum grade-point average of 2.5 in all preparation courses. Transcripts and course plans demonstrating that they will have completed all lower division requirements by the end of their junior year must be presented.

**Foreign Language Requirement**

Students must prepare for the major by studying a European language other than English. This language—the declared foreign language—helps to focus the major and determine options for the period of study abroad. Students are expected to fulfill the specific requirements of their selected language department (French, Germanic Languages, Italian, Slavic Languages and Literatures, Spanish and Portuguese) for entrance into upper division courses. Students who wish to study Latin or Greek are also required to demonstrate proficiency in a modern language. In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement (Italian and Spanish have slightly different course numbers and requirements). Students must complete the lower division foreign language requirement by the end of the sophomore year.

**Preparation for the Major**

**Required:** (1) **Geography**—demonstrated competency in geography by passing an examination given annually by the program; (2) **humanities and the arts**—one course from Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, or 22; one lower division introductory language department course in literature or civilization that focuses on the declared foreign language; one course from History 54, 57, Musicology 2B, or 13; (3) **social sciences**—Economics 1 or 5; two courses from History 1A, 1B, 1C; two courses from Geography 3, 5, Political Science 10, 20, 30, 50, Sociology 1, 2, 18, Women’s Studies 10.

By carefully selecting courses for the Preparation for the Major, students can fulfill their general education requirements in the social sciences, foreign language, quantitative reasoning, and humanities.

**The Major**

**Required:** (1) At least one upper division course in the literature of the declared foreign language, with instruction and reading assignments in that language (see the list of approved courses below); (2) one course from History 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 128A, 128B, 128C, 129A, 129B, 129C, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, or 141C; (3) European Studies 101 and 199; (4) at least eight electives selected from the list of approved courses, with a minimum of three courses from humanities and three from social sciences. Electives must either continue the regional focus, introduce a theoretical and methodological perspective, or introduce a rationally conceived comparative point of view (sample programs are on file in the program office).

During their senior year students must write an extended paper offering original research on a topic of interest to them. Topics must be approved by a faculty adviser selected by the student and endorsed by the program’s executive committee.

Students must consult with the program chair to design their upper division coursework.
Study in Europe
The program expects students to spend at least one term — and preferably a full academic year — studying in the European country most relevant to their work. This is normally done under the auspices of the University of California Education Abroad Program; however, alternative arrangements can be made at UCLA if students have financial or personal considerations that may prevent them from going overseas. To obtain UCLA credit after returning to campus, students must have their foreign transcripts evaluated by the program faculty and staff.

European Studies

Upper Division Courses
101. Introduction to European Studies. Discussion, three hours; outside study, nine hours. Limited to and required of European studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural, economic relations, nationalism, immigration, and international relations.

102. Special Topics in European Studies. Discussion, three hours; outside study, nine hours. Limited to and required of senior European studies majors. Seminar on research methods for required senior thesis in European studies.

199. Seminar for Thesis Writers. Discussion, three hours; outside study, nine hours. Prerequisite: consent of instructor. Variable topics. May be repeated for credit.

Anthropology
130. Study of Culture

M121. British Folklore and Mythology
M122. Celtic Mythology
124. Finnish Folk Art and Technology
The undergraduate film and television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 84 quarter units (56 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For further information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622.

Preparation for the Major

Required: Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

Scope and Objectives

The purpose of the Film and Television Department is to develop in its students a scholarly, creative, and professional approach to the film and television arts. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

Bachelor of Arts Degree

The undergraduate film and television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 84 quarter units (56 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For further information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622.

Preparation for the Major

Required: Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).
Areas of Study
The program requires that students be conversant in both film and television, as they are tested on each in the comprehensive examination.

Course Requirements
A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism. Of the five courses, Film and Television 206C, 208B, and 217 are required core courses. In addition, Film and Television 200 is required of all students. All five of the graduate-level courses must be completed with a grade of B or better.

Only eight units of Film and Television 596A, 596B, 596C, and 598 may be applied toward the total course requirement for the degree, and none of these courses may be applied toward the minimum graduate course requirement.

Students who wish to write a thesis-length paper may petition the critical studies committee to do so; if approved, this would be done through a two-quarter thesis course.

Comprehensive Examination Plan
The written examination is taken at home over two full consecutive days and examines a broad range of knowledge in film and television. After completion, the committee grades the student either pass or fail. The student may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

Thesis Plan
None.

Master Of Fine Arts
Admission
Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required. Applicants with diverse backgrounds and undergraduate majors in areas other than film and television are encouraged. Applicants must state clearly the degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producer's program. Areas of specialization require three letters of recommendation.

Applicants intending to concentrate in film/television production must submit a description of a film or television project that may possibly be undertaken in graduate study. The description should be in proposal or treatment form, two to three pages in length. This material is nonreturnable.

Applicants intending to concentrate in writing must submit samples of creative writing such as screenplays, short stories, plays, or poems.

Applicants intending to concentrate in animation must submit a description of an animation project that may possibly be undertaken in graduate study, preferably in storyboard form. Other creative work may be submitted.

Applicants intending to concentrate in the producer's program may submit a portfolio of supporting material which shows evidence of creative background, or a substantial statement of purpose and resume.

M.F.A. Film and Television/M.A. African Area Studies
The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the Master of Arts in African Area Studies with the Master of Fine Arts in Film and Television, with a specialization in motion picture/television.

Areas of Study
Consult the department.

Course Requirements
A total of 18 courses is required for the degree, five of which must be at the graduate level. At least three courses must be in the 200 series in film history, aesthetics, or structure. Course requirements for each specialization are available in the Student Services Office, Department of Film and Television.

Only 16 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of Film and Television 596A and four units of 596B may be taken prior to advancement to candidacy. Film and Television 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

Comprehensive Examination Plan
The comprehensive plan is satisfied by students fulfilling projects appropriate to their specializations. No later than the beginning of the final quarter of residence, the student must file the appropriate documents for advancement to candidacy and receive approval for the advancement from the M.F.A. advisory committee.

Thesis Plan
None.

Doctoral Degree
Admission
Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Completion of an M.A. or M.F.A. degree equivalent to that offered by the UCLA Department of Film and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. The dossier submitted for admission must contain a letter describing reasons for wishing to earn the Ph.D., the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native language is not English (such as Test of English as a Foreign Language scores).

Major Fields or Subdisciplines
Students are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

Course Requirements
During the first six quarters, 13.5 courses must be taken. During the first year of residence, Film and Television 211B, 215, and 273 must be completed, while Film and Television 274 is required in the Fall and Spring Quarters of the second year in residence. Two independent study courses in the specific field of the dissertation must also be taken in the second year. In addition to this core sequence, Film and Television 496 is also required. Further, students must select nine graduate elective courses, at least six of which must be from film and television.

Each student must select courses from two areas of concentration, chosen to broaden their familiarity and competence in related subject areas. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film and the other arts, authors, genres, documentary, film history, American film, European film, non-Western film and television, television studies, media and society, film and television as a business enterprise, and film and television production. It is expected that the dissertation topic will emerge from one of the concentrations.

Written and Oral Qualifying Examinations
After completion of all language and course requirements, students are eligible to take and required to pass the Ph.D. written qualifying examination. This examination, which is given in the Spring Quarter only, is taken at home over four full consecutive days. After the student passes the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. Students are advanced to candidacy only on successful completion of this examination.
Film and Television

Upper Division Courses

106A. History of the American Motion Picture (6 units). Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

106B. History of the European Motion Picture (6 units). Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

106C. History of African, Asian, and Latin American Film (6 units). Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

107. Experimental Film (6 units). Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

108. History of Documentary Film (6 units). Lecture/screenings, eight hours; discussion, one hour. Philosophy of documentary approach in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.

110A. History of Broadcasting. Lecture/viewing, six hours; discussion, one hour. Critical survey of broadcast history here and abroad. Consideration of social responsibilities and educational implications of broadcasting.

110C. World Media Systems. Lecture/viewing, four hours; discussion, one hour. Prerequisite: course 110A or equivalent. Upper division standing, consent of instructor. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.

112. Film and Social Change (6 units). Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.

113. Film Authors (6 units). Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film director (or writer). May be repeated once for credit with consent of department and topic change.

114. Film Genres (6 units). Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

115. Stylistic Studies for the Moving Image: Theory and Practice. Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kinesthetics, sound, narrative, discourse, and performance.

116. Film Criticism. Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

M117. Chicanos in Film/Video (6 units). (Same as Chicana and Chicano Studies M114.) Lecture/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent "greaser" films, social problem films, the Western, and the gang film — which are major genres that account for films "about" "with" Mexican Americans produced between 1908 and 1980. Examination of recent Chico-produced films that subvert or "signify" on these Hollywood genres: The Tango of German Cortez, and Born in East L.A. Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

126. Acting for Film and Television. Laboratory, six hours. Prerequisite: consent of instructor. Projects in acting for television, video, and film. May be repeated twice for credit.

127. Problems and Ethical Issues in Film and Telecasting. (Formerly numbered 110B.) Lecture, three hours; laboratory, eight to 10 hours. Relevant and highly interactive lecture/discussion/workshop. Student production teams create multimedia presentations designed to provide meaningful information, raise consciousness, stimulate discussion, and provoke debate about today's powerful media messages (i.e., news, advertising, violence, sex, minority representation).

128. Media and Ethnicity. Prerequisite: consent of instructor. Utilizing the American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.

CM129. Contemporary Topics in Theater, Film, and Television (2 units). (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

130A. Screenwriting Fundamentals (2 units). Lecture, one hour. Corequisite for graduate students enrolled in course 130B. Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, E. H. G. Bell, and others. May be repeated for a maximum of 12 units.

130B. Screenwriting Fundamentals Workshop. Discussion, three hours; consent of instructor. Problems in film and television writing.

130C. Advanced Scene Writing Workshop. Discussion, three hours. Prerequisites: courses 130A, 130B. Limited to film and television majors. Conceptualization and writing of story, script outline, and first act for feature-length screenplay.

131. Nontheatrical Screenwriting for Film and Television (4 or 8 units). Discussion, three hours. Prerequisite: consent of instructor. Writing and editing of television, technical, educational, industrial, and propaganda scripts. May be repeated for a maximum of 12 units.

135. Advanced Screenwriting Workshop (8 units). Workshop, three hours. Prerequisites: courses 130A and/or consent of instructor. Course in film and television writing. Original screenplays to be developed. May be repeated twice for credit.

150. Cinematography. Lecture, three hours; laboratory, three hours. Limited to film and television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.

151. Film and Television Image Laboratory. Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Techniques of image manipulation, design, and art direction. May be repeated twice for credit (if repeated, students required to design and complete a short film).

152. Film and Television Sound Recording. Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

153. Motion Picture Lighting. Lecture, three hours; laboratory, three hours. Prerequisite: course 150. Limited to film and television majors. Introduction to principles and practices of film and television lighting. May be repeated for credit.

154. Film Editing. Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound.

163. Directing the Camera. Workshop, eight hours. Limited to film and television majors. Investigation of expressive and manipulative potential of the image within and beyond the narrative from a directorial perspective. Experiences with working methodologies which stimulate visual creativity and positioning the image as the fundamental element of cinematic expression.

164. Directing the Actor. Prerequisite: consent of instructor. Exercises in analysis of script and character for purpose of directing actors. Emphasis on eliciting best possible performance from the actor. May be repeated for credit.

165. Advanced Narrative Television Directing. Laboratory, six hours. Prerequisites: courses 130B, 185. Limited to film and television majors. Supervised exercises in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.

175A-175B. Undergraduate Film Production (6 units, 4 to 8 units). Prerequisite: consent of instructor. Limited to film and television majors. 175A. Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for a short 16mm non-synchronous film. 175B. Laboratory, eight hours. Completion of postproduction (editing, creation of nonsync sound tracks) for short film begun in course 175A.

175A-176B. Advanced Undergraduate Video Production (6 units, 4 to 8 units). Prerequisite: consent of instructor. Limited to film and television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing.

177. Film and Television Acting Workshop (2 units). Laboratory, four hours. Prerequisite: consent of instructor. Workshop providing opportunities for students to rehearse, perform, and evaluate their scenes under supervision of instructor. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit (to accommodate performer's circumstance).

178. Film and Television Production Laboratory (2 to 8 units). Supervised laboratory experience in various aspects of film and television production. May be repeated for a maximum of 12 units, but only eight units may be applied toward film and television majors.

181A. Animation Design in Film and Television. Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. History and use of creative arts used in animation to form effective communication on film.
Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

200. Bibliography and Methods of Research in Film and Television (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106B, graduate standing, consent of instructor. Examination and study of research methods, techniques, and resources related to film and television research. May be repeated once for credit.

206A. Seminar: American Film History (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. Study of central topics in American film history, twice for credit. May be repeated up to two times.

206B. Seminar: European Film History (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. Study of central topics in European film history, twice for credit. May be repeated up to two times.

206C. Seminar: American Film History (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. Study of central topics in American film history, twice for credit. May be repeated up to two times.

210. Seminar: Animation (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106B, graduate standing, consent of instructor. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minor film and video.

211B. Seminar: Historiography. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to film and television Ph.D. candidates. Examination of tiers of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought in the medium.

215. Seminar: Theory and Method. Discussion, three hours. Limited to film and television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, deconstruction, semiotics, psychoanalysis, sociology, etc.

217. Seminar: Television History. Discussion, four hours; viewing, to be arranged. Prerequisite: course 110A or equivalent. Examination of origins and development of American television. Topics include industry structure, economics, policy and regulation, and programming.

218. Culture, Media, and Society. Lecture, four hours; screenings, to be arranged. Prerequisite: consent of instructor. Emphasis on "discourse of the other."" Theatricalism of the other is concerned with theories of "difference" rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered others; place of the cinematic apparatus in this process and how academization of others is positioned vis-a-vis mainstream critical discourse.

219. Seminar: Film and Society (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of ways television forms affect and are affected by social behavior, belief, and value systems, and in relation to role of media in society. May be repeated once for credit.

220. Seminar: Television and Society. Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit.

221. Seminar: Film and Television History. Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Intensive examination of works of outstanding creators of film. May be repeated twice for credit.

222. Seminar: Film Genres (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

223. Seminar: Visual Perception. Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Aesthetic, psychological, and physiological principles of vision as they relate to ways in which man "sees" film and television, with emphasis on ways in which these are different from other visual experiences.

224. Computer Applications for Film Study. Survey of computer applications pertinent to film study, principally computer-videodisc systems and image capture technology.

CM229. Contemporary Topics in Theater, Film, and Television (2 units). (Same as Theater CM229.) Lecture, two hours; screening, to be arranged. Prerequisite: consent of instructor. Upper division or graduate standing in theater/film and television. Examination of creative process in the theater, film, and television, of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual case studies. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.
242. Digital Imagery and Visualization. Lecture, three hours; laboratory, three hours. Introductory hands-on exposure to techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and virtual codes. Students conceive and produce several digital image visualizations.

243. Moving Digital Image. Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects.

244. Interactive Multimedia Authoring. Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects.

245. Creative Authoring for World Wide Web. Lecture, three hours; laboratory, three hours. Exploration of creative aspects of the World Wide Web as medium. Emphasis on expression and_practical experience on the production/realization of Web projects and on the practical implementation of the Web. Laboratory projects and Web sites serve the same end. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences.

246. Issues in Network Culture (6 units). Discussion, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools.

247. Production Planning in Film and Television. Discussion, three hours; prerequisite: consent of instructor. Analysis of procedures and problems in preparing a script for film or television production, with emphasis on role of production manager in breaking down scripts, setting up shooting schedule, planning postproduction, and preparing budgets.

248. Advanced Digital Media Workshop. Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment.

249. Digital Editing. Lecture, four hours; discussion, one hour; laboratory, one hour. Comprehensive survey to introduce students to emerging digital technologies, resulting new media, and their artistic, economic, and social implications. Topics include digital editing, digital previsualization, multimedia, World Wide Web, interactive television, and virtual reality.

268. Seminar: Short Film. Seminar, two hours; discussion, two hours. Prerequisites: graduate standing, consent of instructor. Study of problems presented by conceptualization of form and structure of the short film, with classical and student examples.

270. Seminar: Film Criticism (6 units). Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit.

271. Seminar: Television Criticism. Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit.

273. Seminar: Contemporary Film and Television Criticism (6 units). Discussion, three hours; film and television screenings, four to six hours. Limit to film and television Ph.D. candidates. Study and practice of analytic and critical skills, with emphasis on contemporary film and television.

274. Seminar: Research Design. Discussion, three hours. Prerequisite: second-year standing in film and television Ph.D. program. Examination of general principles of research, study of major research projects and preparation of a prospectus for Ph.D. dissertation.

276. Seminar: Non-Western Films. Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

277. Seminar: Narrative Studies. Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of writings on theory of narrative structure and their significance for analysis of film forms.

289A-289B-289C. Current Business Practices in Film and Television. Prerequisites: course 247, graduate standing, consent of instructor. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

291A-291B-291C. Role of Management in Entertainment Industry. Prerequisites: course 247, graduate standing, consent of instructor. Study of distribution, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

292A-292B-292C. Network Television Management and Decision Making. Lecture, two hours; discussion, two hours. Prerequisites: course 247, graduate standing, consent of instructor. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only eight units may be taken for credit.

293. Seminar: Film and Television Curatorship. Discussion, three hours (additional hours as required). Prerequisites: graduate personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instructional programs at the University. May be repeated for credit. S/U grading.

400. Film Image Design Laboratory. Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conceptualization and design of nonfiction film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemistry, elements of electronic processes, and display of film and time of motion. May be repeated once for credit.

402A-402B. Advanced Fiction Workshops (8 units each). Laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 film and television graduate students. Production of a 10-minute fictional film or video project. Students budget, preplan, and complete photography on location and/or in studio by end of first term. In second term students must complete postproduction of their projects.

403A-403B-403C. Advanced Documentary Workshops (4 to 8 units each). Lecture/discussion/laboratory, 16 to 24 hours; fieldwork. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to film and television graduate students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

404A-404B. Advanced Abstract/Experimental Media Workshops (8 units each). Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

405. Television Production Workshop (8 units). Laboratory, eight hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

406. Experimental Video Workshop. Laboratory, six hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Introduction to independent and experimental video with examination of digital video, video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

407. Video Documentary Workshop (8 units). Laboratory, 12 hours; prerequisite: consent of instructor. Limited to film and television graduate students. Exploration of documentary video, including screening of a variety of international works and producing a short documentary project using single-camera field production techniques.

408A-408B. Video Editing. Discussion, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Individual instruction in electronic editing. 408A. On-Line Editing; 408B. Off-Line Editing.

409. Directing the Actor for the Camera Workshop. Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

410A-410B-410C. Film Production Workshops (8 units, 12 units, 8 units). Lecture/discussion/laboratory, 24 hours; fieldwork. Prerequisites: courses 405, 409, 410A-410B-410C, consent of instructor. Limited to film and television graduate students. Production workshop spanning three terms, designed to give hands-on practical experience in the development and production of a feature film. Focus on preproduction (the tools and a practicum of the medium) as each student writes/directs/edits a 10-minute film.

417. Lighting for Film and Television (6 units). Lecture, three hours; discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit.

418. Cinematography and Directing (12 units). Lecture, six hours; discussion, two hours; laboratory, 16 hours. Prerequisites: course 417, consent of instructor. Limited to film and television graduate students. Supervised filming of student projects in film and television environment. Topics include the sound stage and at exterior locations that explore the complexity of the process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects.
419. Advanced Cinematography. Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 417, 418, consent of instructor. Limited to film and television graduate students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.

423A. Direction of Actors for Film and Television. Lecture, four hours; workshop. Prerequisites: first film project, consent of instructor. Limited to film and television graduate students. Required of all production majors shooting a fiction thesis. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

423B. Advanced Direction of Actors for Film and Television. Studio workshop, six hours. Prerequisites: course 423A, consent of instructor. Limited to film and television graduate students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

431. Introduction to Film and Television Screenwriting. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: course 135, consent of instructor. Advanced problems in writing of original film and television screenplays. May be repeated twice for credit.

435. Advanced Writing for Short Film and Television. Discussion, three hours. Prerequisites: course 434, consent of instructor. Limited to film and television graduate students. Study of basic techniques in thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.

459A-459B. Directing for Film and Television. Lecture, three hours; laboratory, one hour. Prerequisites: courses 405, 410A-410B, 423A, 433, and/or consent of instructor. Limited to film and television graduate students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material, and television, documentary, and feature film directors. May be repeated for a maximum of 16 units.

468. Creative Location Film Production (8 units). Lecture, four hours; discussion, four hours; laboratory, to be arranged. Prerequisites: courses 247, 405, 410A-410B, 423A, 433, and/or consent of instructor. Limited to film and television graduate students. Hands-on problems in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.

475. Film I (8 units). Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques in thesis and video production, including completion of one or more projects.

487. Directed Individual Study: Postproduction Laboratory. Laboratory, eight hours. Prerequisites: graduate standing in M.F.A. production program, consent of instructor. Completion of projects in final stages of postproduction may not be repeated.

488A. Interactive Animation (4 to 8 units). Lecture, six hours; laboratory, to be arranged. Prerequisites: courses 488A, consent of instructor. Organization and integration of various creative arts used in animation and interactive media to form complete study of a selective interactive animation project. May be repeated for a maximum of 16 units.

488B. Advanced Interactive Animation (4 to 8 units). Lecture, six hours; laboratory, to be arranged. Prerequisites: course 488A, consent of instructor. Organization and integration of various creative arts used in animation and interactive animation to form complete project of a selected interactive topic. May be repeated for a maximum of 16 units.

489A. Computer Animation in Film and Video (4 to 8 units). Lecture, six hours; laboratory, four to eight hours; other, to be arranged. Prerequisites: courses 181A, 181C, a completed animated film, consent of instructor. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units.

489B. Production in Computer Animation (4 to 8 units). Lecture, six hours; laboratory, four to eight hours. Prerequisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.

501. Cooperative Program (2 to 8 units). Prerequisites: consent of graduate advisor and graduate dean, and having campus internship chair, and have completed all requirements for graduate degree. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Individual Studies: Research (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596B. Directed Individual Studies: Writing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examination (4 to 8 units). Lecture, five hours; laboratory, to be arranged. Prerequisite: consent of instructor. Preparation for Ph.D. Qualifying Examination.

Adjoint and Visiting Assistant Professors
Tim Tangerlini, Ph.D., Adjunct (Scandinavian)
Peter Tokofsky, Ph.D., Visiting (Germanic Languages)

Scope and Objectives
The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional lifestyles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, music, art, dance, religion, festival, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, students should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree
Admission
Two letters of recommendation from former instructors or other comparable references are required, as well as a writing sample (such as published work, course paper, or report on research/observations). Information on the verbal Graduate Record Examination (GRE) is desirable.

Areas of Study
Consult the department.

Course Requirements
All degree candidates, whether electing the thesis or comprehensive examination plan, must complete the following courses: Folklore and Mythology 200A, 200B, and at least one course from each of the following groups:

Group 1: One course in folk song, folk music, or folk dance (e.g., Folklore and Mythology 206, M243B, M258, or CM284).

Group 2: One course in the folklore and mythology of a specific culture or culture area.

Group 3: One course in folk tale, legend, or myth (e.g., Folklore and Mythology 215 or 216).

Group 4: One additional form/genre-based graduate course in folklore and mythology studies (e.g., Folklore and Mythology 213, M214, 217, 218, or C275).

Group 5: One graduate seminar in an area of folklore and mythology (e.g., Folklore and Mythology 228, M235, or 259).

Only eight units of course 596 may be applied toward the minimum course requirements.

Comprehensive Examination Plan
Students who plan to pursue a Ph.D. degree in Folklore and Mythology must elect this plan and complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, students are expected to demonstrate competence in a written examination requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies; (2) two forms of folklore and mythology; and (3) the folklore and mythology of a specific country, continent, or geographical area. If it is requested by the student or by the members of the M.A. committee, the student must also complete a final oral examination following the successful completion of the written comprehensive examination sequence.

Thesis Plan
If this plan is selected, the student must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies.

The thesis committee, composed of three or more faculty members chosen with the approval of the chair of the interdepartmental committee, is appointed no later than the quarter before expected completion of the requirements. No outside members are required.

Doctoral Degree
Admission
Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written and oral com-
Folklore and Mythology

Lower Division Courses

101. Introduction to Folklore. Survey of various forms of folklore and examination of their historical and social significance.

Course Requirements

Before attempting the qualifying examination, students must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) a major field of folklore and mythology; (2) at least five of the minimum number of nine courses required for the Ph.D. are to be selected from courses carrying folklore prefixes; (3) the number of graded Folklore and Mythology 596 courses that can be counted among the minimum of nine courses required for the Ph.D. is limited to two; (4) of the minimum number of nine courses required for the Ph.D., at least two are to be folklore seminars (e.g., Folklore and Mythology 228, M235, M258, M259, M270A, M270B).

Written and Oral Qualifying Examinations

After the required preparation, a written examination and the University Oral Qualifying Examination are completed covering (1) the student's specialization in folklore and mythology and (2) the student's related area of concentration. The examinations are administered by a committee appointed with the approval of the interdepartmental committee and include one or more members from the student's related discipline.

Upper Division Courses

105. Perspectives in American Folklore Research. Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies conducted with contrasted and integrated investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course CM205.

C106. Anglo-American Folk Song. (Same as English M111B and Ethnomusicology M124,) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and specific and musical values. May be concurrently scheduled with course C206.

C107. Folklore in Urban Environments. Lecture. Three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

108. Afro-American Folklore and Culture. Prerequisite: course 101 or consent of instructor. Study of traditional genres or forms of Afro-American folklore and their cultural functions.

M111. Literature of Myth and Oral Tradition. (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

M112. Survey of Medieval Celtic Literature. (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

113. The Arthurian Tradition. Prerequisite: consent of instructor. Survey of traditions related to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

118. Folk Art, Folklore, and Material Culture. Prerequisite: junior standing. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis.

M119. Fairy Tales in Literature and Society (5 units). (Same as German M119.) Lecture, three hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimm's tales. Study and interpretation of selected tales in English and translation into German, and interpretation in literature, film, advertising, and pedagogy.

M121. British Folklore and Mythology. (Same as English M111C.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

M122. Celtic Mythology. (Same as English M111D.) Lecture, three hours; discussion, one hour. Survey of early material, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

124. Finnish Folk Art and Technology. Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design.

M126. Baltic and Slavic Folklore and Mythology. (Same as Slavic M179.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

M127. Celtic Folklore. (Same as English M111F) Prerequisite: course 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

M128. Hungarian Folklore and Mythology. (Same as Hungarian M135.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research.

M129. Folklore and Mythology of the Ugric Peoples. (Same as Hungarian M136.) Survey of traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.).

130. North American Indian Folklore and Mythology Studies. Prerequisite: course 101 or consent of instructor. Examination of folkloristic and mythological data recorded from various North American Indian peoples within contexts of principal ideological frameworks which have been evolved historically for analysis of such data.

131. Folklore of India. Prerequisite: course 101 or consent of instructor. Survey of folklore of India, with special reference to concepts, transmission, and analysis of oral epics, ballads, legends, and beliefs.

CM132. Celtic Folk Music. (Same as Ethnomusicology CM132.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM322. P/NP or letter grading.

C136. Carnival and Festivity. Lecture, three hours; fieldwork, one hour; outside study, eight hours. History and ethnography of Carnival and related celebrations in Europe and the Americas. Topics include creolization of traditions; carnivalesque as a mode of bodily, political, and artistic behavior; carnival plays; politics of festival and street theater; representations of “Others.” Concurrently scheduled with course C236. P/NP or letter grading.

M140. Italian Novella from Boccaccio to Basile. (Same as Italian M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

M142. Introduction to Jewish Folklore. (Same as Jewish Studies M143.) Nature of Jewish folklore: narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

C145. Applied Folkloristics. Prerequisite: junior standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklore. Concurrently scheduled with course C245.

M149. Folk Literature of the Hispanic World. (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folklore in Europe and the Americas. P/NP or letter grading.

M150. Russian Folk Literature. (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

M154A-M154B. African American Musical Heritage. (Same as Afro-American Studies M110A-M110B and Ethnomusicology M110A-M110B.) Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

163. Folklore and Oral History. Prerequisite: junior standing. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionize history to reflect their point of view.

C165. Film and Folklore. Prerequisite: junior standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C265.
M170. Russian Folklore. (Same as Russian M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

172. Folklore in Ethnic Context. Prerequisite: course 15 or 101 or consent of instructor. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations.

C175. Food Customs and Symbolism. Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C275.

M180. Analysis of Traditional Music. (Same as Ethnomusicology M180.) Intended for ethnomusicology, musicology, and folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

M181. Folk Music of Western Europe. (Same as Ethnomusicology M126.) Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region.

M182. Japanese Folklore. (Same as Japanese M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems found in Japan.

183. Korean Folklore. Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture.

CM184. Dance and Folklore. (Same as World Arts and Cultures CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM204.

190. Selected Topics in Folklore and Mythology Studies. Prerequisite: course 15 or 101 or consent of instructor. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

199. Special Studies in Folklore (2 to 4 units). Prerequisite: senior standing, consent of instructor.

Graduate Courses

200A. Folklore Bibliography, Theory, and Research Methods. (Formerly numbered 200A, 200B.) Lecture, three hours; discussion, one hour. Prerequisite: graduate standing in folklore and mythology or consent of instructor. Basic course in theory, current trends, and bibliography for folklore graduate students, including research techniques in contemporary folkloristics.

200B. Folklore Collecting and Field Research. (Formerly numbered 200C.) Lecture, three hours; discussion, one hour. Prerequisite: course 200A or consent of instructor. Discussion/demonstration of theoretical concepts and practical techniques of data gathering and field research in folklore.

M202. Folklore Archiving. (Same as Library and Information Science M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data storage and log formats, and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

CM205. Perspectives in American Folklore Research. (Same as English M205.) Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of case studies, and folklore research techniques and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

C206. Anglo-American Folk Song Survey. Lecture, three hours. Prerequisite: course 200A and/or consent of instructor. Exploration of expressive and symbolic dimensions of common urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C105.

210. Afro-American Folklore and Culture. Prerequisite: graduate standing. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S.

213. Folk Belief and Custom. Prerequisites: course 101 and one course from 118, M121, M122, M126, M128, M149, M150, Anthropology 156. Gerani 134, 240A, 240B, 240C. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural customs, and legal antiquities.

214. Ethnography of Humor. (Formerly numbered M214.) Lecture, three hours. Designed for graduate folklore and mythology students. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

215. Popular Literature. Prerequisite: course 200A or consent of instructor. Study of categories of legendry and their relation to myth, custom, ritual, popular beliefs, and ballads.

216. Folktales. Prerequisite: course 200A or consent of instructor.

217. Folk Speech. Lecture, three hours. Study of ethnography of communication and its relevance to study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor.

218. Folk Art, Craft, and Aesthetics. Lecture, three hours. Prerequisite: course 200A. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of the 19th century to the present.

228. Seminar: Topics in Celtic Folklore and Mythology. Seminar, three hours. Prerequisites: course 200A, coursework in Celtic studies. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britons/Celtic versus Christian/Celtic; Celtic origin legends; literary and oral saints' legends; the Irish Fenian (Ossianic) tradition of ballads (laidhe/duain) and prose tales; "feisty" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism.

M230A-M230B. Folk Tradition in Italian Literature. (Same as Italian M230A-M230B.) Lecture, two hours. Prerequisites: course 200A or consent of instructor. Study of Italian folklore and mythology. May be repeated twice for credit.

CM232. Celtic Folk Music. (Same as Ethnomusicology CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grade.

C236. Carnival and Festivity. Lecture, three hours; fieldwork, one hour; outside study, eight hours. Historical and ethnography of Carnival and related celebrations in Europe and the Americas. Topics include creative reissues of traditions; carnivalesque as a mode of bodily, political, and artistic behavior; carnival plays; politics of festival and street theater; representations of “Others.” Concurrently scheduled with course C136. S/U or letter grade.

240. Introduction to Jewish Folk Literature. Prerequisites: upper division standing and consent of instructor, or graduate standing. Examination of both historic and generic methods used in study of Jewish folk literature.

M241. Folklore and Mythology of the Near East. (Same as Near Eastern Languages M241.) Prerequisite: course 101 or equivalent.

M243A. The Ballad. (Same as English M243A.) Prerequisite: consent of instructor. Study of English and Scottish popular ballads and their American derivate, with some attention to European analogues.

M243B. Problems in Ballad Scholarship. (Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

C245. Applied Folkloristics. Prerequisite: graduate standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklore. Concurrently scheduled with course C145.

248. Theory and Method in Latin American Folklore Studies. Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expression.

M249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Portuguese M249 and Spanish M248.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

251. Seminar: Finno-Ugric Folklore and Mythology. Advanced studies in folk traditions and mythologies of the Finno-Ugric speaking nations.

M257. South American Folklore and Mythology Studies. (Same as Anthropology M257.) Seminar: Anthropology 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

M258. Seminar: Folk Music. (Same as Ethnomusicology M258.) Seminar, three hours. Prerequisite: consent of instructor.

259. Seminar: Folklore. Prerequisite: course 200A or consent of instructor. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

260. Organizational Folklore, Culture, and Symbolism. Prerequisite: graduate standing. Folklore in organizational settings (stories, rituals, rites, metaphors, etc.) and role of folklore in organizational development as information source, diagnostic, and intervention to improve personnel practices, climate, and leadership.
598. M.A. Thesis Preparation (2 to 4 units). Prerequisite: consent of instructor. S/U grading.

C265. Film and Folklore. Prerequisite: graduate standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C165.

597A. Preparation for M.A. Comprehensive Examinations with USC. S/U grading.

Prerequisites: consent of graduate dean. Used to record enrollment of UCLA students, and host campus instructor, program chair, and other affinity identities. Emphasis on various topics and methodologies. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course CM175.

C275. Food Customs and Symbolism. Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C175.

CM284. Dance and Folklore. (Same as World Arts and Cultures CM284.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various dance idioms. Concurrently scheduled with course CM184.

M296A-M296B. Studies in Hispanic Folk Literature. (Same as Spanish M296A-M296B.) Lecture, two hours.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400A-400B-400C. Directed Professional Activities. Prerequisite: consent of program chair. Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

495. Teaching Folklore and Mythology. Lecture, three hours. Prerequisite: course 200A. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore and mythology courses at the college level, with opportunities for observation and apprentice teaching. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, program chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies in Folklore (2 to 6 units). Prerequisites: successful completion of M.A. comprehensive examination, consent of instructor. S/U grading.

597B. Preparation for Ph.D. Qualifying Examination (2 to 4 units). Prerequisites: graduate standing in folklore and mythology, consent of instructor. S/U grading.

598. M.A. Thesis Preparation (2 to 4 units).

Eric Gans, Ph.D., Graduate Studies Director
Andrea Loselle, Ph.D., Undergraduate Studies Director

Professors
Emily Apter, Ph.D.
Jean-Claude Carron, Docteur ès Lettres
Patrick Coleman, Ph.D.
Eric Gans, Ph.D.
Peter Haidu, Ph.D.
Stephen D. Werner, Ph.D.

Professors Emeriti
Marc Bensimon, Ph.D.
Hassan el Nouty, Docteur ès Lettres
Milan S. La Du, Ph.D.
L. Gardner Miller, Docteur ès Lettres
Oreste F. Pucciani, Ph.D.

Associate Professors
Shuhai Kao, Ph.D.
Sara Melzer, Ph.D.

Assistant Professors
Andrea Loselle, Ph.D.
Malina Stefanovska, Ph.D.

Lecturers
Nicole Dufresne, Ph.D.
Kimberly Jansma, Ph.D.

Scope and Objectives

The UCLA French Department is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and
possess a thorough background in French literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees.

Undergraduate Study

Bachelor of Arts Degrees

Preparation for the Majors

Required: French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students receiving a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of instructor. Students in Plan III must also take Linguistics 20.

The Major

Three plans are offered by the department:

Plan I: French Studies in Literature and Culture

Plan I leads to the Bachelor of Arts in French. Required: Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

Candidates for an instructional credential must take 13 upper division French Department courses, including French 105, in order to qualify for a waiver for the single subject instructional credential in French.

Plan II: Interdisciplinary French Studies

Plan II, with emphasis on French culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women’s studies, and linguistics. Required: Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French studies to be selected in or outside the department in consultation with the undergraduate adviser.

Plan III: French and Linguistics

Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. Required: Twelve upper division courses, including French 100, 101, 102; two courses from 103, 105, 107, 108A, 108B, 109; two courses from 114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students’ knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division classes in the French Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French Department. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a position from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take course 170 where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 20- to 25-page honors thesis (honors projects and the honors thesis are not to be confused). Course 170 counts toward the requirements for the French majors as outlined above.

Students may begin the honors program toward the end of their junior year or during their senior year. The honors projects and course 170 may be taken over two terms minimum. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

Instructional Credential in French

Students interested in obtaining a single subject instructional credential in French should consult a departmental counselor regarding requirements for a waiver from the French subject matter examination required by the California Commission on Teacher Credentialing. For additional information on courses leading to the credential, consult the Graduate School of Education and Information Studies, 1009 Moore Hall, (310) 828-8328.

French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better. Required Lower Division Courses: French 6 or equivalent and one course from 12, 14, or 15. Required Upper Division Courses: French 100 and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree

Admission

Applicants to the Master of Arts program in French must hold a Bachelor of Arts in French or the equivalent. The Graduate Record Examination (GRE) General Test, a sample of writ-
Areas of Study

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with franco-phone literature as an option).

Course Requirements

A total of 11 courses in French is required, including French 201 and 203 (which should be taken as early as possible), at least two courses in each of the three periods, and one additional course in the period not covered on the M.A. examination. For Plan I (thesis) candidates, this is the period of specialization which is not covered on the oral qualifying examination. At least eight of these courses must be at the graduate level. Four units of course 596 (or 598 for students in Plan I) may be substituted for one required century course on approval of the graduate adviser or thesis director.

Students are required to consult with the graduate adviser to ensure full historical coverage of French literature.

Comprehensive Examination Plan

Students must pass written examinations, four hours in length, in each of the two periods prepared and an oral examination in French, normally 30 minutes, covering the two periods of the written examination. The examinations are given in the Fall and Spring Quarters.

Each period examination contains at least one question requiring textual analysis.

Three results are possible: fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the M.A. examination committee on the basis of an overall appraisal of the student's record as well as of the results of the M.A. examination.

Students who either fail or pass without admission to the doctoral program are permitted to retake the examination once, at a date no more than a year after the first attempt.

Thesis Plan

Students may apply to the chair of the department for admission into Plan I (thesis plan) after completing at least six graduate-level courses (200 series), four of which must be literature courses in the French Department.

The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan. A brief statement of the proposed thesis topic is also required.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination, administered by the departmental masters' committee, on the two periods other than the proposed period of specialization (in which the thesis is written). This examination is normally taken during the fourth quarter (but no later than the sixth quarter) after admission. The thesis committee (normally consisting of three departmental faculty members) is appointed only after the student has passed this examination. If the student fails this examination, the examining committee determines whether the student may be permitted another attempt or be advised to take the comprehensive examination (Plan II). For the purpose of course requirements, the period of specialization for the thesis is considered the period not covered on the M.A. examination; course 598 may be counted as one of the four courses required in this period.

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 75 pages. A tentative outline of the proposed thesis must be approved in writing by the thesis committee before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Three results are possible: fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the M.A. thesis committee on the basis of an overall appraisal of the student's record as well as of the results of the M.A. thesis.

Students who either fail or pass without admission to the doctoral program are permitted to resubmit the thesis once, at a date no more than a year after the first attempt.

Doctoral Degree

Admission

For UCLA students applying to the Ph.D. program in French, completion of the master's degree in French with recommendation for admission to the doctoral program is required. Outside applicants must hold the M.A. degree in French or equivalent, submit three letters of recommendation and a sample of written work in French, and take the Graduate Record Examination (GRE) General Test.

Admitted students holding the M.A. or an equivalent degree from another institution must take an oral examen de passage in two periods of literary history (to be chosen in consultation with the graduate adviser) in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during the first year in residence. In case of failure it may be repeated once.

Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with franco-phone literature as an option).

Course Requirements

The following courses are required: (1) French 201 and 203, if not already covered at the M.A. level; (2) at least three additional seminars taken after obtaining the M.A. (a balance should be sought between theoretical and literary-historical relevance to the student's proposed period of specialization); (3) at least two graduate courses in other departments related to the area of specialization. In addition, students are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examination. Guidance committees are particularly careful to ensure that students admitted with the M.A. from other institutions cover thoroughly in coursework the period not examined in the examen de passage.

Written and Oral Qualifying Examinations

Two written examinations of three hours each, based on individual reading lists of approximately 15 works each, established by the examiner in consultation with the candidate are required: (1) on the historical area related to the proposed dissertation topic and (2) in areas of critical theory relevant to the proposed dissertation topic. These examinations are to be taken within a period of one week. At the discretion of the guidance committee, students may be permitted to retake a failed written examination once.

After passing the written examinations, the student is admitted to the University Oral Qualifying Examination. The oral should be taken during the same quarter as the written qualifying examinations. The student must provide the examiners with a 20- to 30-page prospectus of the proposed dissertation, including an outline and a bibliography. The examination, normally of two hours duration, bears on the written examinations and on the proposed dissertation subject.

French

Lower Division Courses

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary French, Lecture, five hours.
2. Elementary French for Graduate Students (3 units). Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.
3. Elementary French, Lecture, five hours. Enforced prerequisite: course 1 (C- or better).
2G. Elementary French for Graduate Students (3 units). Enforced requisite: course 1G. Preparation for GSFLT or other language examinations. A passing grade does not ensure partial fulfillment of language requirements. May be repeated. S/U grading.

3. Elementary French. Lecture, five hours. Enforced requisite: course 2C (or better).

4. Intermediate French. Lecture, five hours. Enforced requisite: course 3C (or better).

5. Intermediate French. Lecture, five hours. Enforced requisite: course 4C (or better).

10A-10D. French Conversation (2 units each). Discussion, three hours. Enforced requisite: course 3B (or better).

12. Introduction to Study of French Literature. Lecture, two hours; discussion, one hour. Enforced requisite: course 6. Principles of literary analysis as applied to selected texts in poetry, theater, and prose.

41. French Cinema and Culture. Lecture, three hours; film screenings, three hours. Introduction to French culture and literature through study of major films of cultural and literary significance. P/NP or letter grading.

63. Contemporary French Theater. Lecture, three hours. Introduction to contemporary French drama in translation. Topics to be announced each term. P/NP or letter grading.

64A-64B-64C. The French Novel in Translation. Lecture, three hours. Introduction to French novel masterpieces from variety of perspectives, including literary history, themes, and relations with other arts (film and music). Topics and titles to be announced each term. P/NP or letter grading.

### Upper Division Courses

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Credit is ordinarily not allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

100. Introduction to Written Expression. Lecture, three hours. Prerequisite: course 6 or equivalent. Development of writing techniques in French, with emphasis on revision of grammatical structures.

101. Intermediate Exposition. Lecture, three hours. Prerequisite: course 100 or equivalent. Development of narrative techniques in writing, with emphasis on editing for grammar and style.

102. Advanced Exposition. Lecture, three hours. Prerequisite: course 101 or equivalent. Development of analytic writing skills in French, with emphasis on rhetorical and technical argument.

103. Composition and Style. Lecture, three hours. Prerequisite: course 102 or equivalent. Designed to develop proficency in composition and style, with concentration on three linguistic skills of reading, writing, and translating.

105. Structure of French. Lecture, three hours. Prerequisite: course 15, consent of instructor. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation.

107. Advanced Oral Expression. Lecture, three hours. Prerequisite: course 100 or consent of instructor. Communicative strategies; techniques of oral exposition, argumentation, and analysis.

108A. Prerequisite: course 103 with a grade of B or consent of instructor. Introduction to translation of advanced texts of general interest, with work in theory of translation.

108B. Prerequisite: course 108A or consent of instructor. Practice in translation of literary documents and texts; comparative stylistics of translation.

108C. Prerequisite: course 108B or consent of instructor. Advanced work in areas of general and specialized interest.

109. French Business: Its Language and Culture. Lecture, three hours. Prerequisite: course 6 or equivalent. Study of language of economics and business in France as well as its specific practices and customs.

114A-114B-114C. Survey of French Literature. Lecture, three hours. Prerequisite: course 12 or consent of instructor. Survey of French literature from the medieval period through the 20th century.

114A. Medieval and Renaissance Literature. Masterpieces of medieval and Renaissance literature, including examples of epic (La Chanson de Roland), romance (Chrétiens de Troyes’ Yvain), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne).

114B. 17th and 18th Centuries. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fontaine, La Faye, Diderot, Voltaire, and Rousseau.

114C. 19th and 20th Centuries. Study of major literary movements and writers of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sarre, Robbe-Grillet, and Duras.

115A. Invention of Love in the 12th Century. Selections from the broad range of lyric poetry and narrative romance in the so-called ‘romance’ literature (served as the inspiration for the much later ‘romantic’ literature). Readings include works of the troubadors and trouvères, including works by Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne.

115B. Medieval Knight: Heroism and Its Social Problems. Readings in literature and medieval warfare and its ideals in relation to social structure of the time. Texts include La Chanson de Roland, Racol de Cambrai, La Mort le roi Arto, crusade history, and Georges DuBui’s Guerriers et paysans.

115C. Comic Structure and Social Class. Medieval comedy, to be studied in relation to class structures and their evolution in the Middle Ages, takes a number of forms. Often obscure in the fabliaux, it can turn parodic in the Roman de Renart, simultaneously satiric, fantastic, and religious in the bourgeois drama of Arras, and utterly charming in the unclassifiable Aucassin et Nicolette.

116A. La Pléiade and 16th-Century Poetry. Study of the linguistic and poetic ‘revolution’ brought about by Defence et illustration (1549), including texts by Marot, Svolve, Labbe, and Ronsard.

116B. The Novel and Other Early 16th-Century Prose. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin.

116C. Late French Humanism. Emphasis on Montaigne’s Essais, with other texts from the Religious Wars period.

117A-117B-117C. 17th Century. Lecture, three hours.

117A. Theater. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine.

117B. Prose. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucauld, La Bruyère, La Fayette, and La Fontaine.

117C. Culture and Society. Study of 17th-century political, social, religious, and courtly aspects, including libertine and salons milieux, la Françoise, and Versailles.

118A-118B-118C. 18th Century. Lecture, three hours.

118A. Satire. Readings include Montesquieu’s Lettres persanes, Diderot’s Ane De Rameau et Rêve de d’Alembert, and Voltaire’s Contes.

118B. The Novel. Readings include Prévost's Manon Lescaut, Diderot’s La Religieuse and Jacques le fataliste, excerpts from Rousseau’s Julie, and Laclos’ Les Liaisons dangereuses.

118C. Theater. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau.

119A-119B-119C. 19th Century. Lecture, three hours.

121A. Romanticism. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vicqy, Balzac, and Stendhal.

121B. Generation of 1848. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the Théâtre à thèse and Parianian poetry.

121C. Naturalism and Symbolism. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Beuque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarmé.

121D. Turn of the Century. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Bârres, Alain-Fournier, Jarry, Roussel, France, and Romain-Rolland.

120A-120D. 20th Century. Lecture, three hours.

120A. Early 20th-Century Writers. Readings of works by Claudel, Apollinaire, Valéry, Gide, and Proust.

120B. Literature from 1918 to 1945. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh.

120C. Post-World War II Literature. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras.

120D. Post-May 1968 Literature. Study of representative works from the ‘revolution’ of 1968 to the present.

121A-121B. Contemporary Francophone Literature. Lecture, three hours.

121A. French-African Literature. Study of literary works of French expression north and south of the Sahara from World War II to the present.

121B. Quebec Literature. Survey of modern Québécois literary works.

125. Evolution of French Comedy. Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the theater of the absurd.

130A-130B-130C. History of French Civilization and Institutions. Prerequisites: courses 6, 12.

130A. France from Prehistoric Times to the End of the Middle Ages. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

130B. From the Renaissance to the End of the “Ancien Régime.” Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.
130C. From the End of the “Ancien Régime” to 1918. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

132. Contemporary France. Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France.

140. Women’s Studies in French Literature. Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc.

141. Cinema and Literature in France. Lecture, three hours (additional hours may be required for viewing films and other laboratory activities). Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects.

142. Poetry and Music. Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the association of poetic texts to music, from the troubadours to modern times.

M143. Rhetoric of Rule. (Same as Communication Studies M117.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV’s and President Clinton’s attempts to manipulate their image in the media of their respective cultures.

Courses 150 through 156 may be repeated once for credit with consent of the advisor.

150. Studies in Medieval Literature.

156. Studies in Contemporary Literature of French Expression.

157. Studies in French Critical Theory and Philosophy. Lecture, three hours. Prerequisite: consent of instructor. Advanced study of major concepts in contemporary French thought, with attention to its influence on French literature and culture, and its application to literary and nonliterary texts.

158. Studies in History of Ideas. Lecture, three hours. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major advisor.

The following courses may not be taken for graduate credit but may be taken as the equivalent of out-of-department electives by undergraduate majors.

162. Modern French Thought in Translation. Lecture, three hours. Reading and discussion of contemporary works in translation.

164A-164B-164C. The French Novel in Translation. Lecture, three hours. Texts and authors to be studied announced in advance for each offering.

165. Topics in French Literature in Translation. Lecture, three hours. To be announced each term. May not be taken for major or graduate credit but may be considered as an out-of-department elective for purpose of satisfying major requirements.

170. Honors Program in French. Prerequisites: junior or senior standing in French with 3.5 GPA in major, completion of two honors projects, consent of department. Individual study on a topic leading to an honors thesis of approximately 20 to 25 pages to be written under guidance of a faculty member.

199. Special Studies in French. (2 to 8 units). Prerequisite: junior or senior standing, consent of instructor, consultation with undergraduate adviser. May be repeated once.

Graduate Courses

201. Literary Research and Composition. Lecture, three hours. Introduction to graduate-level literary research, including writing scholarly papers, compilation and presentation of bibliography, and practical work in computer use of data bank.

202. Historical and Philosophical Background to French Literary Criticism. Lecture, three hours.

203. Contemporary Theories. Lecture, three hours. Introductory study of representative texts from the works of major modern theoreticians, which may include works by Althusser, Barthes, Derrida, Foucault, Genette, Greimas, Kristeva, and Lacan.

205. Techniques of Literary Analysis. Lecture, three hours. Practice in close analysis of literary texts, including explication de texte.

214. Problems of Medieval Language and Literature. Lecture, three hours. Prerequisite to courses 215A through 215D and 250A through 250C. Introduction to Old French and the problems of medieval literature.

215A-215D. Medieval Literature. Lecture, three hours. Prerequisite: course 214.

215A. Lyric Types.

215B. Narrative Types.

215C. Theater — Comic and Religious.

215D. Discursive Texts.

216A-216B-216C. Renaissance. Lecture, three hours.

216A. Early Renaissance French Literature. Selected readings of works from first half of the 16th century, including those by Marot, Rabelais, Marguerite de Navarre, and Scève.

216B. Poetic "Revolution" of 1549. Readings of works by Ronsard and Du Bellay, with selections from other writers of the 1550s.

216C. Late Renaissance Literature. Selected readings of works by major writers of the period from 1560 to 1600, including d’Aubigné, Sponde, Chassignet, and Montaigne.

217A-217D. 17th Century. Lecture, three hours:

217A. Theater. Analysis of representative comedies and/or tragedies, including those by Corneille, Molière, and Racine.

217B. Prose. Readings of selected works by philosophers, moralists, and/or novelists, including Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine.

217C. Poetry. Selected readings of works by major poets, including Racan, Voiture, Saint-Amant, Racine, La Fontaine, and Boileau.

217D. Culture and Society. Study of political, social, religious, and courtly aspects, including libertine and salons milieux, la Fronde, and Versailles.

218A-218B-218C. 18th Century. Lecture, three hours.

218A. Topics in the Early Enlightenment. Selected readings from major works of the period from 1680 to 1747.

218B. Topics in the Enlightenment. Selected readings from major works of the period from 1748 to 1765.

218C. Topics in the Late Enlightenment. Selected readings from major works of the period from 1768 to 1791.

219A-219D. 19th Century. Lecture, three hours:

219A. Topics in Realism and Naturalism. Readings in literature of the Romantic period.

219B. Topics in Realism and Naturalism. Readings in realist and naturalist novel and theater.

219C. Topics in Symbolism. Readings in symbolist poetry and prose.

220A-220D. 20th Century. Lecture, three hours:

220A. Turn of the Century. Readings of works by post-symbolist writers, as well as Valéry, Gide, and Proust.

220B. Literature from 1918 to 1945. Readings of works by surrealists writers, as well as Céline, Malraux, and Anouilh.

220C. Post-World War II Literature. Readings of works by existentialist writers, as well as Robbe-Grillet, Beckett, and Ponge.

220D. Cinema and Literature. Comparative study of interrelations between cinematic and literary forms.

221A-221B-221C. French-African Literature. Lecture, three hours:

221B. French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence.

221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa. Readings and analysis of major works since independence.

222. Quebec Literature. Lecture, three hours. Study of selected poems, novels, and plays in their cultural context.

241. Introduction to Generative Anthropology. Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature.

Seminars 250A through 260B may be repeat- ed for credit.

250A. Major Medieval Texts. Seminar, three hours. Prerequisite: course 214. Intensive study of individual texts from multiple perspectives, such as La Chanson de Roland, a romance of Chrétiens de Troyes, Le Roman de la rose, or François Villon’s Grand Testament.

250B. Structures of Medieval Literature. Seminar, three hours. Prerequisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures.

250C. Problems in Medieval Literature. Seminar, three hours. Prerequisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism.

254A-254B. Studies in the 18th Century.

256A-256B. Studies in Contemporary Literature.

258A-258B. Studies in Literary Criticism.

259A-259B. Studies in Philosophy and Literature.

370. Teaching French in Secondary School. Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credential in French.
205. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching French at College Level. Lecture, three hours; discussion, one hour. Prerequisite: graduate standing. Theory and practice of language teaching. S/U grading.

596. Directed Individual Studies or Research (2 to 4 units). May be repeated for a maximum of 16 units. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 4 units). Prerequisite: consent of instructor. A maximum of four units may be applied toward M.A. degree requirements. S/U grading.

Scope and Objectives

Geography is concerned primarily with interpreting and explaining the occurrence, distribution, and interrelationships of the physical and social elements which can be seen in the landscape. The geographer concentrates on two essential questions: where are things located? and why are they located where they are? The answer to the former is largely descriptive, but the answer to the latter involves theory and analysis. The geographer's challenge is to provide continuing interpretation of the constantly changing physical and human landscapes on the Earth's surface.

The research and teaching interests of the faculty, are highly ranked nationally by the Conference Board of the Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into urban and regional development studies, spatial demography and social processes in the city, culture and environment in the modern world, physical geography, and biogeography.

Geography is an especially attractive major for liberal arts students. Its body of theory and its methodologies provide ideas and techniques applicable to a wide range of questions about our environment; it also provides both the regional and world perspectives required of responsible citizens.

The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/environmental studies. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts degree, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Undergraduate Study

Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

Preparation for the Major

Required: Geography 1, 2, 3, 4, 40. All courses must be taken for a letter grade.

The Major

Required: Ten upper division geography courses taken for a letter grade, which must include (1) five courses from one of the “Concentrations for the Major” listed below, (2) three additional courses in at least two different concentrations, (3) one regional course, and (4) one procedures course.

Major Concentrations

By the end of the junior year and no later than the beginning of the senior year, students are required to declare their specific concentration by filing a statement with the undergraduate adviser. The purpose of the concentration requirement is to expose students to systematic in-depth work within a specific area of geography. Completion of a concentration requires five upper division geography courses. Students must take a concentration's required course(s), if any, before declaring that concentration. They must select one of the following concentrations and meet its course requirements:

1. Urban and Regional Development Studies: Five courses from 135, 148, 150, 155, 157, 159A.
2. Spatial Demography and Social Processes in the City: Course 142 and four courses from 143, 144, 150, 156, 159B.
3. Culture and Environment in the Modern World: Five courses from 130, 133, 134, 135, 136, 140, 151, 159C.
4. Physical Geography: Courses 100/100A, 104, 105/105A, and two courses from 101, 103, 106, 107, 113, 159D.

Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.
Allied Fields

Students must develop some competence in an allied field. This requirement consists of at least two upper division courses selected from at least one of the following disciplines: Afro-American studies, anthropology, art history, Asian American studies, atmospheric sciences, biology, chemistry, Chicano and Chicano studies, communication studies, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, women's studies. Urban Planning 187 and M190 are also acceptable. Other disciplines require departmental consent.

Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

Bachelor of Arts in Geography/Environmental Studies

The major in geography/environmental studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

Preparation for the Major

Required: Geography 1, 2, 3, 4, 5, 40. All courses must be taken for a letter grade. Recommended: Biology 21, Chemistry and Biochemistry 2, 11A, Life Sciences 1, Mathematics 3A, 3B, Philosophy 6, Physics 3A or 10. Students considering graduate work are strongly advised to include Chemistry and Biochemistry 11A, 11B, Mathematics 31A, 31B, and 32A in their program.

Students are strongly advised to complete all requisites before beginning upper division work in the major.

The Major

Required: Twelve upper division geography courses taken for a letter grade which must be distributed as follows: (1) natural systems core — two courses from 100, 103, 104, 105, 106, 108, 112; (2) human systems core — two courses from 118, 133, 134, 140, 142, 148, 150; (3) environmental studies cluster — five courses from 107, 110, 114, 116, 120, 121, 123, 124, 125, 126, M128, 129, 131, 135, 136; (4) procedures — two courses (eight units) from 100A, 101A (two units), 105A (two units), 106A (two units), 160, 163, 167 (six units), 168, 169, 170, 171, M178; and (5) regions — one course from 122, 135, 136, 156, 180, 181, 192A, 192B, 183, 185, 186, 187, 188, 189, or 190.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Geography/environmental studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

At least two upper division courses should be taken as electives in other social sciences departments (Anthropology, Economics, History, Political Science, Sociology), the Urban Planning Department (School of Public Policy and Social Research), or the School of Public Health. The courses should be complementary and/or supplementary to the major as students have constructed it.

Foreign Language/Mathematics Requirement

Every geography/environmental studies major is required to pass five quarter courses in foreign language (no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

Honors Program

Honors in the geography/environmental studies major may be obtained through procedures described under Geography 199HA-199HB.

Computing Specialization

Majors in geography and geography/environmental studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, 171. Students graduate with a bachelor's degree in their major and a specialization in computing.

Master's Degree

Admission

Application to the Master of Arts program in Geography may be made for admission to any quarter. An official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation must be submitted. Normally applicants should have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years in the major, (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

In addition, a faculty member must be willing to serve as interim adviser.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Areas of Study

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography. At the M.A. level students emphasize at least one of these specialized areas. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students, in consultation with knowledgeable faculty members, are expected to refine and deepen their research interests further, within, across, and beyond these organized research and teaching areas.

Course Requirements

Students must complete at least six courses in addition to the three required core courses (Geography 298A, 298B, 298C), for a minimum of 36 units. The core courses must be completed within two years and with a grade of B or better in each. For students entering with a geography major, they should be completed in the first year. Two 100-level courses and four units of a 500-level course may be applied toward the minimum coursework requirement. The course program must have the approval of the faculty mentor.

Two 500-series courses may be applied toward the minimum course requirement for the M.A. degree but not toward the minimum graduate course requirement.

Individual Study Courses. The following rules pertain to individual study courses (Geography 199, 596, 597, 598, 599):

(1) Before enrolling in one of these courses, students must consult with the responsible faculty member and work out a program of study and consultation.

(2) All 500-series courses can be taken on an S/U basis only.

(3) Students may enroll in Geography 597, 598, or 599 as often as required.
Teaching Courses. Geography 375 and Geography 495 cannot be applied to the minimum of nine courses for the M.A.

Comprehensive Examination Plan
None.

Thesis Plan
Students must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation should proceed under the supervision of the student's M.A. committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study. The entire thesis project must be carried out in close consultation with all members of the thesis committee.

Doctoral Degree Admission
Application may be made for admission to any quarter. Applicants must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation. Normally applicants should have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years and in the major, or a 3.5 GPA in graduate courses for students entering with an M.A., (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. Applicants must provide clear evidence of ability to conduct substantive research and to articulate ideas clearly in writing. In addition, a faculty member must be willing to serve as interim adviser. Under rare circumstances, students may proceed directly toward the Ph.D. degree without taking a master's degree. Students must have completed one year in the M.A. program, have three department faculty members review their dossiers and unanimously recommend such a course of action, and pass a four-hour qualifying examination set and evaluated by three faculty members competent in their area of specialization. The pass must be unanimous and receive the approval of at least two thirds of the voting faculty in a formal faculty meeting.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Major Fields or Subdisciplines
Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography. The written qualifying examinations for the Ph.D. include one examination in three of these fields selected by the student in consultation with an adviser. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students are expected to refine and deepen their research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

Course Requirements
Students must successfully complete, within two years and with a grade of B or better in each, the required core courses (Geography 298A, 298B, and 298C) if these have not already been taken at the M.A. level. Students entering with a geography degree should complete them in the first year. At least three graduate geography courses in addition to the M.A. coursework (excluding Geography 298A, 298B, 298C, 375, 495, and the 500 series) are required as are three upper division or graduate courses in one or two fields (outside of geography) allied to the student's major research area or subdisciplinary specialization, subject to approval of the guidance committee. The allied field requirement must be met before taking the oral qualifying examination. Each quarter, the program of coursework must be approved by the guidance committee and the graduate adviser.

Individual Study Courses. The following rules pertain to individual study courses (Geography 199, 597, 597, 598, 599).

(1) Before enrolling in one of these courses, students must consult with the responsible faculty member and work out a program of study and consultation.

(2) All 500-series courses can be taken on an S/U basis only.

(3) Students may enroll in Geography 597, 598, or 599 as often as required.

Teaching Courses. Geography 375 and Geography 495 cannot be applied to the minimum course requirements for three courses for the Ph.D.

Written and Oral Qualifying Examinations
The written qualifying examination, consisting of five written examinations and administered by the guidance committee, must be taken no later than the sixth quarter of the Ph.D. program (exceptions may be made in the case of students entering from disciplines outside of geography). Three papers pertain to three substantive fields of geographical inquiry in which the student is specializing; one general paper addresses the major issues, developments, and debates in the field at large; and one paper involves a field problem. The examination may be taken over a period of no more than two weeks. In case of failure, the student may make one more attempt, but no sooner than three months nor longer than one year from the first examination.

Preparation of the dissertation proposal follows successful completion of the written qualifying examination. The dissertation proposal should specify the research question, describing in some detail the problem to be studied, its scientific background, and outline of the subject matter, the proposed methods of research, the degree of originality involved, and a timetable for completion of the degree. It is to be written in consultation with the official doctoral committee. Committee members should receive the dissertation proposal at least one month before the oral examination. The proposal must be approved unanimously by the committee before the oral examination can take place.

The University Oral Qualifying Examination, conducted by the official doctoral committee, focuses on the dissertation proposal. After successfully completing the oral examination, the student is eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

Geography

Lower Division Courses

Contact the department office to learn of additional offerings, seminar topics, and specific instructors.

1. Physical Environment. Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.

2. Biogeography. Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Study of Earth's biosphere, with particular reference to evolution and disturbance of plants, animals, and soils. P/NP or letter grading.

3. Cultural Geography. Lecture, three hours; discussion, 90 minutes. Breadth examination of basic cultural variables in human occupancy of Earth's surface. Ecological, spatial, and historical approaches.

4. Introduction to Economic Geography. Lecture, three hours; laboratory, one hour. Introduction to basic concepts and applied models of spatial and economic geography. Emphasis on the role of economic systems in human behavior. Discussion of practical exercises on analysis of economic processes in the Los Angeles urban environment.

5. People and the Earth's Ecosystems. Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems.

40. Geographical Statistics. Lecture, three hours; laboratory, 90 minutes; outside study, seven and one-half hours. Satisfies statistics requirement for geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. P/NP or letter grading.
Upper Division Courses

100. Principles of Geomorphology. Lecture, three hours; reading period, one hour. Prerequisite: course 1 or consent of instructor. Recommended: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations.

100A. Principles of Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

101. Coastal Geomorphology. Lecture, three hours; reading period, one hour. Prerequisite: course 1 or consent of instructor. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydraulic processes, sediments, transport, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seascapes, and coral reefs, together with coastal zone management. P/NP or letter grading.

101A. Coastal Geomorphology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediments, transport, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seascapes, and coral reefs, together with coastal zone management. P/NP or letter grading.

103. Paleoclimatology and Ice-Age Environments. Lecture, three hours; discussion, one hour. Prerequisite: course 1 or consent of instructor. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

104. Climatology. Lecture, three hours; reading period, one hour. Prerequisite: course 100, junior/senior. Exploration of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

105. Hydrology. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Corequisite: course 105A. Recommended: courses 40, 104, or equivalent. Role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. P/NP or letter grading.

105A. Hydrology: Field and Laboratory (2 units). Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems; hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in laboratory and measure/scale measurements in the field.

106. Soils. Lecture, three hours; reading period, one hour. Prerequisite: course 1 or equivalent and Chemistry 11A, or consent of instructor. Corequisite: course 106A. Study of origins, evolution, properties, and utilization of soils with special emphasis on world's major soil groups.

107. Soil and Water Conservation. Lecture, three hours; discussion, one hour. Prerequisite: course 101. Recommended: course 105 or 106 or Civil Engineering 150 or equivalent. Limited to juniors/seniors. Systematic study of processes of and hazards posed by erosion, conversion, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

108. World Vegetation. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Examination of debate about environmental change and agriculture and how to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading.

110. Population and Natural Resources. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Examination of debate about environmental change and agriculture and how to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading.

112. Analytical Animal Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, or Life Sciences 11, 40. Limited to juniors/seniors. Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading.

113. Clastic Sedimentation Processes in Geomorphology. Lecture, three hours. Prerequisites: courses 101, 107, or equivalent. Study of clastic sedimentation transport and deposition processes in geomorphology. Topics include basic fluid mechanics and sediment transport; tectonic framework of sedimentation; general overview of depositional environments; and more detailed discussion of selected environments.

114. Ideas of Nature and Environmental Values. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. History of ideas of nature and the environment. Relationship of those ideas to contemporary ethical and political concerns about the environment and the place of humans within it. P/NP or letter grading.

115. Environmentalism: Past, Present, and Future (4 to 6 units). (Same as Urban Planning CM189.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas. Introduction to environmentalism as the reordering of our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and bimurally as an undergraduate upper division course and field studies program. P/NP or letter grading.

116. Origins and Histories of Crop Plants. Lecture, three hours; reading period, one hour. Prerequisite: course 2 or equivalent. Limited to juniors/seniors. Origins and patterns of domestication and diffusion of useful plants from antiquity to the present, based on detailed case histories of selected species. P/NP or letter grading.

118. Medical Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 5 or consent of instructor. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of health care.

120. Conservation of Resources: North America. Prerequisites: courses 1 and 2, or equivalent, or upper division standing. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada.

122. Wildlife Conservation in Eastern Africa. Lecture, three hours; reading period, one hour. Prerequisite: course 101 or equivalent. Study of origins, evolution, properties, and management of endangered species and communities. P/NP or letter grading.

125. Health and the Global Environment. Lecture, three hours; reading period, one hour. Impact of the environment and lifestyle on individual health examined from a geographical perspective, with examples from both developing and developed countries. P/NP or letter grading.

126. Geography of Extinction. Lecture, three hours; reading period, one hour. Prerequisites: course 5, upper division standing. Geographic and taxonomic survey and analysis of fossil records of the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading.

M127. Soils, Plants, and Society. (Same as Biology M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or equivalent, or consent of instructor. General treatment of soil development and morphology, and maintenance and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on field trip to explain developmental phenomena.

129. Seminar: Environmental Studies. Seminar, three hours; reading period, two hours. Prerequisites: one course in human systems core, three environmental studies cluster courses, senior standing. Qualitative/quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others). P/NP or letter grading.

130. Geographical Discovery and Exploration. Lecture, three hours; reading period, one hour. Prerequisites: completed English 1A or 1B, or English 3. Lecture: survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present.

131. Environmental Change. Lecture, three hours; reading period, one hour. Designed for juniors or seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

132. Cultural Geography of the Modern World. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Evolutionary and structural approach to sociocultural geography of the modern world system, with particular emphasis on structure and functioning of the semi-periphery and periphery. P/NP or letter grading.

134. Space, Place, and Nature in Western Thought. Lecture, three hours. Limited to juniors or seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading.

136. Technology, Nature, and the American Landscape. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Survey of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading.

140. Political Geography. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Spatiality of political activity, spatial constitution of political power as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

142. Population Geography. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relations and selected case studies. P/NP or letter grading.

143. Geography of Health Care. Lecture, three hours. Examination of geography of health care delivery and planning, focusing on factors which influence accessibility and effectiveness of health services by consumers. Spatial aspects of organization of health care influence who gets care where. P/NP or letter grading.

144. Ethnicity in the American City. Lecture, three hours; reading period, two hours. Recommended (but not prerequisite). Course 142. Limited to juniors or seniors. Designed to encourage and facilitate critical thinking about social aspects of ethnic minorities in contemporary America, with focus specifically on non-white ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective in changing ethnic distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading.

148. Economic Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 4 or upper division standing. Geographical aspects of economic production, growth, and development of the space-economy. Land-use processes. Location of industry. Regional development. P/NP or letter grading.

M149. Transportation Geography. (Same as Urban Planning M149.) Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Analysis of development, functions, spatial patterns, and geographic problems of American cities. P/NP or letter grading.

151. Historical Geography of Cities. Prerequisites: courses 3 and 4, or equivalent, or upper division standing. Study of diffusion and growth of cities in Western civilization. Development of city systems and evolution of urban internal spatial structure.

152. Cities of Europe. Lecture, three hours; reading period, one hour. Designed for juniors or seniors. Urbanization in Europe systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities as Rome, Paris, and Berlin. P/NP or letter grading.

155. Industrial Location and Regional Development. Lecture, three hours. Prerequisite: course 4 or Economics 1 or 2 or 5 or 11 or upper division standing. Reexamination of industrial location theory in light of contemporary theories of industrial organization and local labor markets. Consideration of empirical patterns of industrialization and regional growth, with special reference to Frostbelt/Sunbelt shifts and offshore relocation. P/NP or letter grading.

156. Metropolitan Los Angeles. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

157. Models of Regional Growth and Change. Lecture, three hours; reading period, one hour. Prerequisite: course 4. Recommended: course 40. Examination of empirical and theoretical issues of regional growth and change, spatial models of growth, and demand-based models of regional development.

159A-159E. Problems in Geography. Discussion, three hours; reading period, one hour. Prerequisites: completion of three courses in a concentration, senior standing. Seminar course in which students conduct original research projects developed from courses within a concentration. P/NP or letter grading.

160. Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, eight hours. Prerequisite: one course from 100, 101, 103, or 105, or consent of instructor. Limited to city geography and environmental studies majors, with enrollment priority to seniors, then to juniors. Students must preenroll in department prior to term. Examination of field and laboratory procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of landforms, constituent materials, and relevant processes. P/NP or letter grading.

163. Field Analysis in Biogeography. Fieldwork, eight hours. Prerequisites: courses 2, 5, 106, and 112, or consent of instructor. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

166. Images of Earth: The World from Above. Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through the ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced the course of events. P/NP or letter grading.

167. Cartography. (6 units.) Lecture, two hours; laboratory, six hours; outside study, three hours. Prerequisites: three courses from 1 through 5. Limited to juniors or seniors. Survey of the field of cartography. Theoretical and construction of maps, map projection procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

168. Introduction to Geographic Information Systems. (Formerly numbered 170.) Lecture, two hours; laboratory, two hours; outside study, two hours. Designed for juniors or seniors. Introduction to basic geographic information systems (GIS) concepts and spatial analysis. Data structures, topology, and attribute information. Laboratory exercises use database query, manipulation, and spatial analysis to address "real world" problems. P/NP or letter grading.

169. The Earth from Above. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 3, or 4, or consent of instructor or upper division standing. Interface between cartography and remote sensing. Means by which synthetic imagery from maps and satellite photos, different landscapes analyzed and explained. P/NP or letter grading.

170. Advanced Geographic Information Systems. (Not the same as course 170 prior to Spring Quarter 1997.) Lecture, three hours; discussion, one hour. Prerequisite: course 168. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

171. Quantitative Analysis. Lecture, three hours; laboratory, one hour. Prerequisite: course 40 or equivalent. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

M178. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M152.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiocarbon damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.

Regions

180. North America. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Delimitation and analysis of principal geographic regions of the U.S. and Canada. P/NP or letter grading.

181. Mexico, Central America, Caribbean. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Mexico and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading.

182A. Spanish South America. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of the individual Spanish-speaking countries. P/NP or letter grading.

182B. Brazil. Lecture, three hours; reading period, one hour. Limited to juniors or seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portugal and Brazil. P/NP or letter grading.
183. Europe. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Europe. P/NP or letter grading.

184. Russia. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Russia and former Soviet lands. P/NP or letter grading.

185. South and Southeast Asia. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

186. Contemporary China. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People’s Republic of China. Dynamics that have led to China’s major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. P/NP or letter grading.

187. Middle and Southern Africa. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Analysis of geographic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

188. Northern Africa. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Analysis of economic, social, and political geography of the area including Mediterranean Africa, Sahara, Sudanic belt, and eastern Horn. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

189. Middle and Southern Africa. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in terms of physical features, human settlement, economic production, and political patterns. P/NP or letter grading.

190. Australasia. Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in terms of physical features, human settlement, economic production, and political patterns. P/NP or letter grading.

191. California. Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on the people of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

Special Studies

199. Special Studies (2 to 8 units). Hours to be arranged. Prerequisites: junior standing with a B average in the major or senior standing, consent of instructor.

199HA-199HB. Honors in Geography I, II. Hours to be arranged. Prerequisites: 3.25 GPA overall, at least five upper division geography courses with a 3.5 GPA.

199IA. Independent study course taught by team of two faculty members. Regional synthesis with varying emphasis on the people of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

199B. Independent study course taught by team of two faculty members. Regional synthesis with varying emphasis on the people of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

199C. Independent study course taught by team of two faculty members. Regional synthesis with varying emphasis on the people of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

200. History and Paradigms of Geomorphology. Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100, two courses from 101, 102, 103, 105, 106, 107. Analysis of geometric theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

201. Coastal Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of selected topics pertaining to geographic processes and responses observable in the coastal zone. May be repeated for credit.

202. Fluvial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

203. Glacial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

204A-204B-204C. Advanced Climatology. Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, and acquaintance with FORTRAN IV, or consent of instructor. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and agricultural economists.

205. Seminar: Climatology. Discussion, three hours; reading period, one hour. Prerequisites: courses 204A-204B-204C or equivalent, consent of instructor. Selected topics. May be repeated for credit.

208. Advanced Biogeography: Plants. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108 and 110 or 116, or equivalent, or consent of instructor. Intensive review and analysis of physical and cultural factors influencing plant distributions.

212. Advanced Biogeography: Animals. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 112 or 117 or equivalent or consent of instructor. Intensive review and analysis of biophysical and cultural factors influencing animal distributions.

213. Seminar: Biogeography. Discussion, three hours; reading period, two hours. Prerequisites: course 208 or 209 or equivalent, or consent of instructor. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. Discussion, three hours; reading period, two hours; fieldwork, three hours. Prerequisite: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. Analysis of the changing physical environment of the Quaternary period. May be repeated for credit.

217. Quaternary Studies: Ecological Aspects. Discussion, three hours; reading period, two hours. Prerequisites: courses 202 or 204A-204B-204C or 213, or consent of instructor. Further study of Quaternary period, may be repeated for credit.

218. Advanced Medical Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 118 or consent of instructor. In-depth study of selected topics in medical geography and intensive review of recent research.

223. Seminar: Humid Tropics. Seminar, three hours; reading period, two hours. Prerequisite: graduate standing. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

227. Water Quality Management. Discussion, three hours; reading period, one hour. Prerequisites: graduate standing, consent of instructor. Discussion of basic technical, regional planning, and public policy issues in water quality management.

M229. Resource-Based Development Issues: First World and Third World Issues and Processes. (Formerly numbered 229.) Same as Urban Planning M267A. Discussion, three hours. Recommended (but not requisite): Urban Planning 267B. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

Human Geography

230. Political Ecology. Seminar, three hours; reading period, one hour. Prerequisites: graduate standing or consent of instructor. Exploration of theoretical constructs and approaches to analyses of development and the environment associated with political ecology. Examination of relations between poverty, ecological degradation, and global restructuring. Case studies of changing production organization and ecology of land-use patterns within different and emergent economic and political contexts. S/U or letter grading.

231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. Discussion, three hours; reading period, three hours. Prerequisite: graduate standing or consent of instructor. Deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

232. Advanced Cultural Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

233. Seminar: Cultural Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 232 or 236 or equivalent, consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit.

234. Environment and Subsistence in Indigenous Cultures. Seminar, three hours; reading period, one hour. Prerequisite: consent of instructor. Some major themes in American historical geography.
237. Seminar: Historical Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 230; consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography: Geopolitics. Lecture, two hours; discussion, one hour; reading period, one hour. Study of geographical theory and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

241. Seminar: Political Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit.

242. Advanced Population Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 142 or equivalent or consent of instructor. Study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.

248. Location and Space Economy. Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.

249. Seminar: Economic Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 248 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit.

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.

251. Seminar: Urban Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

252. Location and Social Structure within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Study of links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. S/U or letter grading.

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. Description and modeling of national, regional, and intra-urban migration.

Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 200, 201, 202, 203, 215. Examination of advanced field and laboratory procedures used in contemporary geomorphological research, with emphasis on scientific design, instrumentation, and data evaluation.

261. Advanced Field Analysis: Cultural Geography (8 units). Fieldwork, a week from 8 to 5. Prerequisites: one or more courses from 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environmental modification.

262. Advanced Field Analysis: Biogeography (8 units). Fieldwork, 10 hours. Prerequisite: consent of instructor. Techniques of measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

265. Geographical Bibliography. Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. Survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students.

267. Advanced Cartography. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer mapping, scribing, color separation, and reproduction of maps.

268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing. Discussion, one hour; laboratory, three hours. Recommended preparation: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presentation in publication-style format.

269. Remote Sensing of Environment. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural context.

M270A-M270B-M270C. Seminars: Climate Dynamics (2 to 4 units each). (Same as Atmospheric and Ocean Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Seminar, two hours. Prerequisites: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marginal ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

M272. Spatial Statistics. (Same as Urban Planning M215.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

273. Seminar: Model Building for Spatial Analysis. Discussion, three hours. Prerequisite: consent of instructor. Discussions of philosophy and methodology of model building, with emphasis on problems unique to models of spatial structure. Individual research topics. May be repeated for credit.

M278. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M216.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit.

Regions

Courses 280 through 291 may be repeated for credit (lecture, two hours; discussion, two hours).

280. North America. Prerequisite: course 180 or consent of instructor.

281. Middle America. Prerequisites: course 181, consent of instructor.

282. South America. Prerequisites: course 182A or 182B, consent of instructor.

283. Europe. Prerequisites: course 183, consent of instructor.

284. Soviet Union. Prerequisites: course 184, consent of instructor.

285. South and Southeast Asia. Prerequisites: course 185, consent of instructor.

286. Geography of Contemporary China. Seminar, three hours; reading period, two hours. Prerequisites: graduate standing or consent of instructor. S/U or letter grading.

287. Middle East. Prerequisites: course 187, consent of instructor.

288. Northern Africa. Prerequisites: course 188, consent of instructor.

289. Middle and Southern Africa. Prerequisites: course 189, consent of instructor.

290. Australasia. Prerequisites: course 190, consent of instructor.

291. Arid Lands. Prerequisites: courses 104, 106, 118, 120, 148, or equivalent, consent of instructor. Investigation of physical and cultural complexes of the world’s arid regions. Salient factors include climate, landforms, water, soils, natural vegetation, and various aspects of human occupation, including future possibilities for human utilization.

292. Advanced Regional Geography: Selected Regions. Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. Lecture series devoted to a specific topic or at discretion of instructor. May be repeated for credit.

Seminar

295. Seminar: Geographic Thought. Discussion, three hours; reading period, two hours. Prerequisite: consent of instructor. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry.

298A. Historical Issues in Geographical Inquiry. Lecture, three hours. Prerequisite: consent of instructor. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry.

298B. History of Modern Geography. Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Evolution of the field of geography in the 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as a modern academic discipline.

298C. Statistical Methods for Geographic Research. Lecture, three hours; laboratory, two hours. Prerequisite: course 171 or equivalent. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Geography (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units). Prerequisite: consent of instructor. Independent study.
Three plans are offered by the department:

### Plan A: Language and Literature
Plan A is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German are prepared for a wide range of graduate studies and activities in related fields.

#### Preparation for the Major
German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college-level German language courses should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

### Plan B: German Studies/German Studies with European Studies Emphasis
Plan B is comprised of lower division courses in the German language and upper division courses in Germanic languages, linguistics, literature, folklore, and one allied field such as history, musicology, or philosophy. If the allied field is in art history or political science, where not enough courses with a German focus are offered, the emphasis is on European studies. While the majority of courses are in language and literature, students majoring in Plan B are prepared for a wide range of graduate studies, including the allied field, with emphasis on interdisciplinary studies.

#### Preparation for the Major
German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college-level German language courses should enroll in German 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

### Plan C: Germanic Languages
Plan C is intended for students primarily interested in Germanic languages and linguistics and is designed for those who wish to pursue graduate work in Germanic, general, applied, or Indo-European linguistics. Students who wish to pursue graduate work in Germanic languages would be expected to pursue one of these three plans.

#### Preparation for the Major
German 1, 2, 3, 4, 5, 6, Linguistics 20, and five terms of a second Germanic language or three terms of a second Germanic language and two or three terms of a third. Relevant languages include any Germanic language (two terms of Hungarian may be applied by petition to the undergraduate adviser). Students who have completed two semesters of college-level Germanic languages courses must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

### Scope and Objectives
The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. This broad range of studies offers training in specialized fields, in addition to providing strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish.

Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in Germanic Languages and in Scandinavian and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Afrikaans, Dutch, Hungarian, Old Norse studies, and Yiddish.

### Bachelor of Arts in German
Three plans are offered by the department:

- **Plan A: Language and Literature**
- **Plan B: German Studies/German Studies with European Studies Emphasis**
- **Plan C: Germanic Languages**
Master's Degree

Admission
A bachelor's degree in German, Germanic linguistics, or Linguistics with a minor in German and a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required for admission to the Master of Art degree in Germanic Languages. Applicants with deficiencies in undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. Three letters of recommendation are required. Graduate Record Examination (GRE) scores are required from applicants from the U.S. and other English-speaking countries.

Areas of Study
There are four M.A. plans that differ with respect to course requirements and comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D. Plan C is for students with main interests in German studies who plan to terminate their studies with the M.A. Plan D is for students whose main interests are in Germanic linguistics who plan to proceed toward the Ph.D.

Course Requirements
Plan A requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). In addition, German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses is applicable in satisfaction of these requirements.

Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Plan C requires a minimum of nine upper division and graduate courses (at least six must be graduate courses), with six in the major field (German) and three in a related field such as history, musicology, philosophy, or political science. All related field courses must be in the 200 series. One major field and one related field seminar must be included.

Plan D requires a minimum of nine upper division and graduate courses beyond the language requirements, of which at least six courses must be graduate level (200 or 500 series) and of which up to four courses may be from other departments in a relevant area (e.g., linguistics, applied linguistics, Indo-European linguistics, Romance linguistics), German 217, C238, and one seminar must be included. Half of the coursework should be in synchronic linguistics and half in diachronic linguistics. All coursework must be approved in advance by the graduate adviser.

Comprehensive Examination Plan
Examinations are offered each quarter, beginning with the written part during the fifth week of each quarter. Under exceptional circumstances, the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each quarter. The members of the committee administer the written and oral examinations. For Plans A and B there are three examinations with the following structures:

One four-hour written examination. Three areas of study are required. A two-hour examination is required for the primary area. Two additional areas of study are chosen from those listed below. A one-hour examination is required for each of the two areas.

For Plan A, students must choose history and structure of Germanic languages as one area of study. Students who choose German literature after 1600 are advised to choose the German literature before 1600 and history and structure of Germanic languages as well. Students who choose only the areas of history and structure of Germanic languages and German literature after 1600 must take German 202A and 202B.

(1) German literature before 1600
(2) History and structure of Germanic languages
(3) German literature after 1600
(4) Dutch and Afrikaans
(5) Old Norse studies
(6) Yiddish
(7) Folklore
(8) Hungarian

Bibliography Question. On the Monday following the completion of the written examinations, a bibliography take-home question is given out that is based on the primary concentration. The question is to be completed and returned no later than the following Monday. A one-hour oral examination. A one-hour oral examination follows in the week in which the bibliography question is returned.

For Plan C, students submit two essays of approximately 10,000 words in the major field of German Studies, and 7,500 words in the extra-
departmental related field, written under the guidance of a three-member faculty commit-
tee, one of whose members must be from an-
other department. After satisfactorily complet-
ing the essays, students must pass a one-hour oral examination that has a comprehensive component as well as testing the student in the fields represented by both essays.

For Plan D, the M.A. examination consists of three written examinations of two hours each, followed by a one-hour oral examination. Stu-
dents are examined in the following areas: one examination on the history of Germanic lan-
guages, theory, and historical linguistics; one examination on the structure of Germanic lan-
guages, theory, and synchronic linguistics; one examination on languages and dialects. Stu-
dents may select one modern language, one philological language, and a third language of their choice. This examination includes translation and parsing. To continue toward the Ph.D., the student must receive a pass with the rec-
ommendation to continue.

After the written examinations have been taken, the M.A. committee decides whether the student may proceed to the oral examination. If the student fails the oral examination, the M.A. committee decides whether the entire exami-
nation must be repeated or only the oral por-
tion. The examination may be repeated only once without petition.

If the student applies for the M.A. under Plan B (to proceed toward the Ph.D.) and is awarded a terminal M.A., the examinations may be re-
peated if the student chooses not to have the M.A. degree officially awarded before the reex-
amination.

Thesis Plan
In lieu of the written examination requirement for Plans A, B, and D, students may submit a thesis to the department. Students in Plan B who elect to submit a thesis must, however, complete a two-hour oral examination in the ar-
ea of their thesis as well as in two other areas of concentration in order to be approved for fur-
ther doctoral study. Students in Plan D who elect the thesis option are required to take one

The following additional rules apply to the the-
thesis option:

(1) The thesis committee must consist of three members, one of whom serves as direc-
tor. The student selects the director, and the other two members are appointed by the chair in consultation with the student.

(2) No committee member from outside the department is required, except in the case of Plan C. For this plan, one member must be from the related field.

(3) The thesis committee should be estab-
lished no later than the end of the fourth quar-
ter of the candidate’s graduate studies. At that
time, the thesis committee must approve the

plan for the thesis in writing and submit a copy to the graduate adviser.

(4) No 598 course is required, although stu-
dents may take one such course in preparation for the degree.

(5) Candidates who fail the examination may repeat it once without petitioning the depart-
ment. The examination must be repeated no later than one quarter following the quarter in
which the first examination was failed.

(6) The Schedule of Classes specifies the date for filing of the final draft of a thesis with
the student’s committee and the date on which revisied and completed theses may be filed with
the University. The examinations must be taken prior to date on which revised and com-
pleted theses may be filed with the University.

Doctoral Degree
Admission
An M.A. degree in German or a German lan-
guage from an accredited U.S. institution or equivalent (e.g., Staatsexamen in German) is required. In case of significant deficiencies in
prior training, the graduate advisers make ap-
propriate study or course recommendations. All deficiencies must be removed prior to appli-
cation for admission to candidacy for the qual-
yfying examinations. Applicants with an M.A. in
fields other than German (e.g., in Comparative Literature or in Linguistics) are required to pass
the written part of the M.A. comprehensive ex-
amination within three quarters after admission
to the department. Three letters of recommen-
dation are also required.

Major Fields or Subdisciplines
Not applicable.

Course Requirements
Students must have completed eight graduate

Course Requirements (at least four in the Department of

Germanic Languages) beyond the M.A. de-

gree, three of which must be seminars. If stu-
dents have already taken a seminar in prepa-
ration for their M.A. degree, only two of these
eight courses must be seminars.

Written and Oral Qualifying Examinations
Students must (1) pass the graduate reading

examination in French; (2) pass a departmental reading examination either in a modern

Scandinavian language or in Dutch-Flemish, Afrikaans, Latin, or in Yiddish (or an approved substitute language); (3) successfully complete three seminars; (4) pass the qualifying exami-
nations. Written examination may be repeated in case of failure. The faculty must decide whether students who fail the examination twice may be permitted another repeat.

The written examinations may be taken any

time after admission to the doctoral program

and fulfillment of all prerequisite requirements. The written qualifying examinations consist of

six hours of total examination time. Students in

literature are expected to cover six different ar-
eas: one author, one genre, one period, one

theoretical or historical problem, and two spe-
cial topics of their choosing. Students in lin-
guistics complete a three-hour examination in

five target languages, and a second three-hour examination in linguistic theory. Students in

Old Norse are examined for two hours in lan-
guage, two hours in theoretical problems of in-
terpretation, and two hours on issues concern-

ing social and historical context.

After the student has completed the written ex-
aminations successfully, the chair of the guid-
ance committee schedules the University Oral

Qualifying Examination to be administered by

the doctoral committee as soon as possible af-
ter completion of the written examinations.

German

Lower Division Courses
No credit is allowed for completing a less ad-

Advanced course after successful completion of

an advanced course in grammar and/or com-

position. Students with demonstrated prepara-

Crime may be permitted to transfer to a more ad-

course with consent of the instructor.

1. Elementary German. Lecture, five hours; labora-

ory, one hour; outside study, five hours minimum.

P/NP or letter grading.

1G. Elementary German for graduate students.

Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

2. Elementary German. Lecture, five hours; labora-

ory, one hour; outside study, five hours minimum.

Enforced requisite: course 1. P/NP or letter grading.

2G. Elementary German for Graduate Students.

Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

3. Elementary German. Lecture, five hours; labora-

ory, one hour; outside study, five hours minimum.

Enforced requisite: course 2. P/NP or letter grading.

4. Intermediate German. Lecture, five hours; labora-

ory, one hour; outside study, five hours minimum.

Enforced requisite: course 3. P/NP or letter grading.

5. Intermediate German. Lecture, four hours; labora-

ory, one hour; outside study, four hours. Enforced

requisite: course 4. P/NP or letter grading.

6. Intermediate German. Lecture, four hours; labora-

ory, one hour; outside study, four hours minimum.

Enforced requisite: course 5. P/NP or letter grading.

8. Elementary German: Intensive (12 units). Lec-

ture, 15 hours; laboratory, five hours; outside study, 16 hours. Intensive basic course in German equiva-

Mtelligence to courses 1, 2, and 3. P/NP or letter grading.

10. Intermediate German: Intensive (12 units). Lec-

ture, 20 hours; laboratory, four hours. Enforced

requisite: course 3. Intensive intermediate course in

German equivalent to courses 4, 5, and 6. P/NP or

letter grading.

12. German Conversation (2 units). Enforced requi-

site: course 1. Use of German language teaching

films; students have opportunity to practice spoken

German in small groups.

requisite: course 3. Students have opportunity to

practice spoken German in small groups.

50A-50B. Masterworks of German Literature in Translation. Lecture, three hours. May not be ap-

plied toward completion of the major in German:
50A. Medieval Period through Classicism. Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimm, Melville, and Goethe.

50B. Romanticism to the Present. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontaine, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf.

51. Masterworks of German or East Central European Literatures in English Translation. Lecture, three hours. Study and analysis of masterworks of German or East Central European literatures (Dutch and Afrikaans, Hungarian, Old Norse, or Yiddish). Examination of one particular literature per term.

88. Lower Division Seminar. Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

Upper Division Courses
Requisite for all upper division courses (except 100A, 100B, 105C, 119A through 119H, 121A, 121B, 121C) is course 6 or equivalent or consent of instructor.

Courses in the German 119 literature series may not be applied toward completion of the major in German.

Courses Open to Majors and Nonmajors
No credit is given to graduate students in German.

100A. German Civilization and Culture before 1700. Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

100B. Modern German Civilization and Culture from 1700 to 1919. Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

100C. German Civilization and Culture in the 20th Century. Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and institutions from 1919 to the present, emphasizing developments in literature, arts, and architecture. P/NP or letter grading.

101A. Introduction to German Poetry. Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolism, and metrics. Course should be taken at beginning of literary studies.

101B. Introduction to German Drama. Analysis of selected examples of drama (e.g., tragedy, comedy, one-act plays, lyric theater, etc.), including systematic introduction to dramatic forms, techniques, and theories. Texts selected from modern literature as well as from other periods. Course should be taken at beginning of literary studies.

102. Business German. Lecture, three hours. Pre-requisite: course 6 or equivalent. Introduction to business terminology and correspondence. Topics include economic and political developments and principles of business in German-speaking countries.

103. German Translation. Prerequisite: course 108B with a grade of B or better or consent of instructors. German/English and English/German translation of literary texts, newspaper and magazine articles, business documents, and letters.

104. Introduction to German Enlightenment, Sturm und Drang, and Classicism. Lecture, three hours. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of German literature.

105. Introduction to German Literature from Romanticism to Realism. Lecture, three hours. Reading and analysis of selected works from Romanticism to realism.

107. Introduction to Contemporary Literature. Analysis of selected works of the period from 1945 to the present time.

108A-108B. Conversation and Composition on Contemporary German Culture and Society I, II. Lecture, three hours. Prerequisite: course 6 or equivalent. Course 108A or equivalent is prerequisite to 108B. Advanced language courses, with focus on speaking and writing proficiency through themes connected with contemporary German culture and society.

Courses Not Open for Credit to Majors or Graduate Students in German

119A. German Literature in the Age of Chivalry, in English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including courtly love lyrics, Arthurian epics, and heroic epics. May not be applied toward completion of the major in German.

119B. Weimar Classicism and Its Influence, in English Translation. Lecture, three hours. Study and analysis of works in English translation from the classic age of German literature and concentrating on major works of Lessing, Goethe, and Schiller and their reflection in the modern period. May not be applied toward completion of the major in German.

119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation related to German literature and criticism.

119D. Romantic Heritage in German Literature, in English Translation. Lecture, three hours. Study and analysis of literary works in English translation that reflect German Romantic imagination from the end of the 18th century into the 20th century. May not be applied toward completion of the major in German.

119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation. Lecture, three hours. Selected works in English translation of German authors, poets, and thinkers from the late 19th through the 20th century, such as Nietzsche, Thomas Mann, Kafka, Brecht, Grass, and Christa Wolf. Topics vary from term to term. May not be applied toward completion of the major in German. May be repeated for credit.

119F. From Dream to Nightmare: The German-Jewish Experience, in English Translation. Lecture, three hours. Study and analysis of works in English translation reflecting the process of German-Jewish assimilation and disenfranchisement, including authors such as Mendelesohn, Heine, Schnitzler, Kafka, Feuchtwanger, Anne Frank, Sachs, Celan, and Becker.

119G. Eastern Central European Prose. (Same as Comparative Literature M112 and Slavic M124.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

119H. Postwar Central European Prose. (Same as Comparative Literature M112 and Slavic M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

119I. Fairy Tales in Literature and Society (5 units). (Same as Folklore M119.) Lecture, four hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimm’s tales. Study and interpretation of selected tales in English and their transformations and appropriation in literature, film, advertising, and pedagogy.

119K. Tristan, Isolde, and History of Heterosexuality. (Same as Women's Studies M119.) Lecture, three hours; outside study, nine hours. Tristan and Isolde are among the most famous and enduring of European literary lovers, and following their tradition from Middle Ages to the present provides opportunity to consider a host of issues—from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

Courses Open for Credit to Majors, Nonmajors, and Graduate Students in German

121A. Special Problems in Literature. Lecture or seminar, three hours. Prerequisite: upper division standing. Varying topics of current importance and immediate relevance to the study of literature. Designed to introduce students to contemporary trends in literary study and predominantly concerned with topics related to German literature and criticism.

121B. German Film in Cultural Context: Early German Film. Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of German film from the Weimar to Adenauer eras. Viewing and discussion of films by Lang, Murnau, Sternberg, Wiene, Staudte, etc., with respect to their cultural, sociopolitical, and cinematicographic codes.

121C. German Film in Cultural Context: New German Film. Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of new German film as it evolved in the late 1960s. Viewing and discussion of films by Fassbinder, Herzog, Schlöndorff, Sanders-Brahms, Wenders, and other German-speaking filmmakers, with respect to their cultural, sociopolitical, and cinematicographic codes.

121D. Selected Topics in German Culture and Civilization. Lecture, three hours. Required of all German majors who are candidates of standard instructional credential in secondary teaching.
121. Women in German Literature. Lecture, three hours. Prerequisite: upper division standing or consent of instructor (except Faust) from Goethe’s early period to his maturity or of instructor. Introduc-

to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliography and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in analysis of sources, compilation and pre-

suggestions of literary forms such as heroic, epic, and narrative poetry, drama, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hoffmannsthal, and Rilke.

210B. Expressionism and Neorealism. Analysis of

tories such as Schicksalstragödie, bourgeois drama, sociopolitical drama, historical drama, and trivial drama, sociopolitical drama, historical drama, and

211A. Contemporary Novel. Study of selected nov-

211B. Contemporary Lyric and Drama. Study of selected dramas and poems in the period from 1945 to

to the standard literary German language. Selected readings from works of authors such as Sebastian Brant, Martin Luther, Hans Sachs, and Johann Fichart.

250. Baroque Literature. Definition of the term baroque; development of modern baroque scholar-

206A. Enlightenment and Sentimentalism. Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including

120. Renaissance and Reformation Literature. Lecture, three hours. Prerequisites: courses 100A and 100B or 100C and 107, or consent of instructor. Analysis of a wide range of German literature from 1450 to the present.

120A. Theories of Literary Criticism. Lecture, three hours. Analysis and discussion of foundations of liter-

120B. The Courtly Epic. Lecture, three hours. Interpretation of Goethe’s Faust. Parts I and II, together with general consideration of other treatments of the Faust theme in European literature.

134. German Folklore. Survey of various genres of German folklore.

137. Current Topics in Germanic Linguistics. Lecture, three hours. Prerequisite or corequisite: course 108A. Recommended: course 129. In-depth look at one topic within the field of Germanic linguistics. Top-

138. Linguistic Theory and Grammatical Description. Lecture, three hours. Prerequisites: course 129 and Linguistics 20, or consent of instructor. Crucial problems in structure of Dutch and Ger-

C138. Linguistic Theory and Grammatical Description. Lecture, three hours. Prerequisites: course 129 and Linguistics 20, or consent of instructor. Crucial problems in structure of Dutch and German, considered from such theoretical frameworks as sign grammar, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238.

199. Special Studies (2 to 4 units). Requisite: con-

200A. Readings in Literary Criticism. Lecture, three hours. Analysis of a wide range of literary criticism, including systematic study of motif, topos, plot, space and time, semantics, stylistics, rhetoric, metrics, imagery (emblem, metaphor, allegory, symbol), structural elements (flashback, anticipation, interior monologue), narrator and reader response, humor and irony, hermeneutics.

200B. Readings in Middle High German Literature. Extensive reading of literary monuments of the medieval period in Germany. Introduction to cultural and literary history of the Middle Ages.

203A. The Courtly Epic. Lecture, three hours. Interpretation of the medieval period in Germany. Introduction to cultural and literary history of the Middle Ages.

203B. The Courtly Lyric. Analysis of medieval songs of courtly performers, beginning with Der von Kürenberg and ending with Johannes von Heidlaub. Study of sociocultural context in which the songs were produced and performed, and introduction to methods of interpretation and analysis.

203C. The Heroic Epic. Survey of German heroic literature beginning and ending with such works as Nibelungenlied, Kudrun, and the Dietrich epics. Methods of analysis and interpreta-

204. Renaissance and Reformation Literature. Literature of the 15th and 16th centuries, including intro-

205A. Theories of Literary Criticism. Lecture, three hours. Analysis and discussion of foundations of liter-

206. Sturm and Drang. Study of representative authors of the Sturm und Drang period, such as Her-

207B. Classicism: Schiller. Selected topics from critical and dramatic works of Schiller in the period from 1773 to 1805, such as Über Anmut und Würde, Dichtung und Wahrheit, Die natürliche Tochter, Pandora, and poetry selections.

207C. Classicism: Goethe. Selected topics from works of Goethe in the period from 1786 to 1832, such as Iphigenie auf Tauris, Torquato Tasso, Wilhelm Meisters Lehrjahre, Die natürliche Tochter, Pandora, and poetry selections.

209A. 19th-Century Lyric. Development of Ger-

210C. 20th-Century Novel to 1945. Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and others. Analysis of novels by such authors as Iphigenie auf Tauris, Torquato Tasso, Wilhelm Meisters Lehrjahre, Die natürliche Tochter, Pandora, and poetry selections.

210D. 20th-Century Drama. Reading and analysis of selected plays by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as Schicksalstragödie, bourgeoisie drama, sociopolitical drama, historical drama, Viennese Volkstheater.

210E. 19th-Century Narrative Prose. Analysis of German prose works in the Classicism to natural-

211A. Contemporary Novel. Study of selected nov-

211B. Contemporary Lyric and Drama. Study of selected dramas and poems in the period from 1945 to

217. History of the German Language. Historical survey of development of the standard literary Ger-

230. Survey of Germanic Philology. Systematic survey of major problems in the field of Germanic linguistics. Origins and history of the Germanic languages and their classification; problems in evolution of nominal and verbal morphology of the various dia-

231. Modern German. Systematic survey of major problems in the field of Germanic linguistics. Origins and history of the Germanic languages and their classification; problems in evolution of nominal and verbal morphology of the various dia-

232. Germanic Languages

232. Old High German. Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

233. Old Saxon. Introduction to study of earliest documents in Old Low German. Readings in the Halland and study of the Old Saxon Genesis.

C238. Linguistic Theory and Grammatical Description. Lecture, three hours. Prerequisites: course 129 and Linguistics 20, or consent of instructor. Crucial problems in structure of Dutch and German, considered from such theoretical frameworks as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C138. Graduate students meet as a group one additional hour each week and write research papers of greater length and depth.

240A. Theories, Methods, and History of Germanic Folklore. History of Germanic folklore studied in context of European cultural history. Evolution of theories and methods of the discipline as developed by Herder, the Grimms, Boie, Meier, Naumann, Bauinger, and others.

240B. Folk Song and Ballad. Analysis of poetic and musical aspects of German folk songs and ballads. Study of thematic and formal characteristics of legends, folktales, jests, proverbs, and riddles. Role of popular narrative in its sociocultural context in German history and survey of methods of analysis of narratives, texts, and contexts.

245B. Germanic Antiquities. Survey of prehistoric and early history of Germanic civilization from the Bronze Age to the end of the migrations on basis of archaeological, historic, and philological evidence. Uses of methods of comparative ethnography, religion, and myth to interpret evidence.

251. Seminar: Syntax and Phonology of German. Topics selected from the field of contemporary German syntax and phonology according to needs and preparation of students enrolled (e.g., dialectal, historical, and theoretical). Prerequisite: course 105A or equivalent, plus one of the following: 129, 164A, 166A, 169A, 231, 232, 240A, 240B, 245B, or 261B. May be repeated for credit. S/U grading.

252. Seminar: Historical and Comparative Germanic Linguistics. Topics selected from the field of historical Germanic phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic language and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax). Prerequisite: course 251 or consent of instructor. May be repeated for credit. S/U grading.

253. Seminar: Medieval Literature. Selected topics in medieval literature, with emphasis on problems in literary history and applicability of various types of analysis to medieval texts.

254. Seminar: Renaissance and Reformation. Selected topics in literature or historical problems, such as a particular genre, author, or theme. Studies on textual analysis or pertinent research to apply methods of literary history to literature of the 15th and 16th centuries.

255. Seminar: Baroque Literature. Selected problems of Baroque German baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by criticism of research and application of methods of literary analysis pertinent to literature of this age.

256. Seminar: Enlightenment and Sturm und Drang. Selected topics in 18th-century literature, such as a particular author, movement and money as modes of family structure and family life, image of women and women’s literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-century literature. Textual analysis and review of current research.

257. Seminar: Age of Goethe. Selected topics in German literature between 1775 and 1832, such as Schiller’s theoretical writings, Goethe’s Faust II, Goethe’s Wandering and West-Ostlicher Divan, Goethe’s Faust II and Hegel’s Phänomenologie des Geistes, the French Revolution and German classicism. Textual analysis and review of current research.

258. Seminar: Romanticism. Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works.

261. Seminar: Contemporary Literature. Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in context of literary, cultural, and political trends.

262. Seminar: Germanic Folklore. Detailed research on individual aspects of Germanic folklore. Topic selected generally is from course in the German 240 series that preceded the seminar. Emphasis on problems of theoretical importance.

263. Seminar: Theories of Literature. Specialization in literary theories, such as Rezeptionsästhetik, Neo-Marxist Criticism, New Criticism, psychoanalytic criticism or sociology of literature, structuralism, semiotics, and hermeneutics.

370. Teaching German in Secondary Schools. Lecture, three hours; discussion periods. Prerequisite: graduate standing or consent of instructor. Required of all candidates for general secondary instructional credential in German.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A. Preparation for College Teaching of German (2 units). Study of problems and methods in teaching German on college level, with emphasis on teaching and testing the listening, speaking, reading, and writing skills. May not be applied toward M.A. course requirements. S/U grading.

495B. College Teaching of German: Special Problems (2 units). Prerequisite: course 495A or consent of instructor. Study of contemporary issues in German language pedagogy, with emphasis on textbook evaluation and proficiency-oriented instruction. May not be applied toward M.A. course requirements. S/U grading.

596. Directed Individual Study or Research. To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with instructor (see department for I.D. number). S/U grading.

Afrikaans

Upper Division Courses

105B. Intermediate Afrikaans. Lecture/language laboratory. Prerequisite: course 105A or equivalent. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources.

114. Afrikaans Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors such as Brits, Joubert, Krige, Leroux, Marais, and Rabie and selected poets such as Breitenbach, Eybers, Lion Cachet, W.E.G. Louw, Van Wyk Louw, and Opperman.

135. Introduction to Afrikaans Literature. Discussion, three hours. Prerequisite: course 105B or equivalent. Analysis of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brits, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breitenbach.

199. Special Studies in Afrikaans (2 to 4 units). Prerequisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

596. Directed Individual Study or Research in Afrikaans. To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with instructor (see department for I.D. number). S/U grading.

Dutch

Upper Division Courses

100. Modern Dutch Culture and Society. Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including ‘Pillarization’ — verzelfding), the two World Wars, housing policy, mass media, and rise of a multiracial society.
103A-103B. Elementary Dutch. Lecture/language laboratory. Course 103A or equivalent is prerequisite to 103B. Standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. 

103C. Intermediate Dutch. Lecture/language labo-

ratory. Prerequisite: course 103B or equivalent. Grammatical exercises, conversation, and analysis of simple texts. 

104A-104B. Accelerated Dutch (6 units each). Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A-103B, 103C in two terms rather than three. 

113. Modern Dutch and Flemish Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors of the Nether-

lands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaijen, and Vroman. 

120. Introduction to Dutch Studies. Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contempo-

rary Dutch literature, contemporary Dutch literature, criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistiek. 

131. Introduction to Modern Dutch Literature, Dis-

cussion, three hours. Prerequisite: course 103B or 120 or equivalent. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-19th to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist Beweging van Tachtig and the post-War Beweging van Vlijt. 

199. Special Studies in Dutch (2 to 4 units). Requi-
site: consent of instructor. Independent studies course for students who desire more intensive or spe-
cialized investigation of material covered in a regular course and who present such a course as a requisite. 

Graduate Courses 

596. Directed Individual Study or Research in Dutch. To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsor-
ing instructor—see department for I.D. number). May be repeated once. S/U grading. 

597. Preparation for Ph.D. Qualifying Examina-
tions. To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading. 

Hungarian 

Upper Division Courses 

101A. Elementary Hungarian. Introduction to gram-

mar and reading exercises, with emphasis on the spoken language. 

101B. Intermediate Hungarian. Prerequisite: course 101A or equivalent. Grammatical exercises, conver-
sation, and reading of texts. 

101C. Elementary Hungarian. Prerequisite: course 101B or equivalent. Conversation and readings in literary texts. 

101D. Advanced Hungarian. Prerequisites: courses 101A, 101B, 101C, or equivalent. Grammar, conver-
sation, vocabulary building. 

101E. Advanced Hungarian. Prerequisites: courses 101A through 101D or equivalent. Conversation, read-
ing, and discussion of literary texts. 

101F. Advanced Hungarian. Prerequisites: courses 101A through 101E or equivalent. Conversation and review of Hungarian grammar from a typological point of view. 

120A-120B. Readings in Hungarian. Prerequisite: course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. 

120C. Readings in Hungarian Literature. Prerequi-

sites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Discussion conducted in Hungarian. 

121A-121B. Survey of Hungarian Literature in Trans-

lation. Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. 

130. Hungarian Civilization and Study. Course of Hungarian civilization and institutions from earliest times to the present. Study of Hungarian culture as represented in its arts (literature, fine arts, music). 

M135. Hungarian Folklore and Mythology. (Same as Folklore M128.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. 

Old Norse Studies 

Lower Division Course 

40. The Heroic Journey in Northern Myth, Legend, 

and Epic. Comparison of the journeys of heroes. Readings in mythology, legend, folklore, and epic, including Nibelungenlied, Volsunga saga, Eddas, and Beowulf. Culture and its poetic backgrounds to the texts. All readings in English. 

Upper Division Courses 

C139. The Saga. Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Ice-

landic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C268. 

C140. Viking Civilization and Literature. Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including read-
ings in Old Norse sagas and Eddas. Concurrently scheduled with course C241. 

151. Elementary Old Norse. Introduction to gram-

mar and pronunciation of Old Norse. Selected read-
ings from the sagas and Prose Eddas. 

152. Intermediate Old Norse. Prerequisite: course 151 or equivalent. Continued grammar, pronunci-
ation, and readings from the Eddas and sagas of Icelanders, Norwegian kings, and legendary heroes. 

153. Modern Icelandic. Prerequisite: course 152 or equivalent. Grammar, readings, and conversation. 

199. Special Studies in Old Norse (2 or 4 units). Requi-
site: consent of instructor. Independent studies course for students who desire more intensive or spe-
cialized investigation of material covered in a regular course and who present such a course as a requisite. 

Graduate Courses 

221. Advanced Old Norse Prose. Prerequisite: course 152 or equivalent. Readings of major saga 

texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandina-

via history. 

222. Advanced Old Norse Poetry. Prerequisite: course 152 or equivalent. Readings of mythological and heroic poems from Poetic Edda. Secondary sources used where appropriate. 

C241. Viking Civilization and Literature. Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including read-
ings in Old Norse sagas and Eddas. Concurrently scheduled with course C140. Graduate students do addi-
tional readings and write more extensive research papers. 

C245A. Germanic and Scandinavian Mythology. Seminar, three hours. Study of Northern myth and religion through close reading of Eddic texts and sec-

ondary sources. 

C256. The Saga. Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Ice-

landic sagas. Consideration of the history and society that produced these narratives. Concurrently sched-

uled with course C139. Graduate students do addi-
tional readings and write more extensive research papers. 

C272. Old Norse Literature and Society. Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do addi-
tional readings and write more extensive re-

search papers. 

596. Directed Individual Study or Research. To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor—see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading. 

597. Preparation for Ph.D. Qualifying Examina-
tions. To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading. 

Yiddish 

Upper Division Courses 

101A. Elementary Yiddish. Introduction to gram-

mar and reading exercises, with emphasis on the spoken language. 

101B. Elementary Yiddish. Prerequisite: course 101A or equivalent. 

101C. Elementary Yiddish. Prerequisite: course 101B or equivalent. 

102A-102B. Accelerated Elementary Yiddish (6 units each). Lecture, five hours; laboratory, one hour. Covers material in courses 101A, 101B, 101C in two terms rather than three. P/NP or letter grading. 

104. Advanced Yiddish. Lecture, three hours. Pre-

requisite: course 101C or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation. 

121A. 20th-Century Yiddish Poetry in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yid-

dish poetry and drama. 

121B. 20th-Century Yiddish Prose and Drama in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-

century Yiddish prose. 

121C. Special Topics in Yiddish Literature in English Translation. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century lit-

erature.
131A. Modern Yiddish Poetry. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry.

131B. Modern Yiddish Prose and Drama. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama.

131C. Special Topics in Yiddish Literature. Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature.

199. Special Studies in Yiddish (2 to 4 units). Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

Scope and Objectives

This explosive expansion of the older population in this country and the world — the "Age Revolution" — insures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families age.

Undergraduate Study

Gerontology Minor

To enter the gerontology minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses: Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M150, Molecular, Cell, and Developmental Biology C149, Women's Studies 185H.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Upper Division Courses

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (Same as Social Welfare M104C.) Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity.

M104D. Public Policy and Aging. (Same as Social Welfare M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

M119O. Psychology of Aging. (Same as Psychology M119O.) Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

M140. Introduction to Study of Aging. (Same as Psychology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

M150. Sociology of Aging. (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

Health Services

School of Public Health

UCLA

31-269 Center for the Health Sciences

Thomas H. Rice, Ph.D., Chair

Stuart O. Schweitzer, Ph.D., Vice Chair

Professors

Emily K. Abel, Ph.D. (Health Services)
Larry Butcher, Ph.D. (Psychology)
Steven G. Clarke, Ph.D. (Chemistry and Biochemistry)
Rita B. Effros, Ph.D., in Residence (Pathology and Laboratory Medicine)
Robert M. Emerson, Ph.D. (Sociology)
James L. Lubben, D.S.W. (Social Welfare)
Donald G. MacKay, Ph.D. (Psychology)
Melvin Pollner, Ph.D. (Sociology)
Arnold B. Scheibel, M.D. (Neurobiology, Psychiatry and Biobehavioral Sciences)
Fernando M. Torres-Gil, Ph.D. (Social Welfare)
F. Eugene Yates, M.D. (Medicine)

Professors Emeriti

James Birren, Ph.D. (Medicine)
David H. Solomon, M.D. (Medicine)

Associate Professor

Steven P. Wallace, Ph.D. (Community Health Sciences)

Assistant Professors

Raymond S. Kington, M.D. (Medicine)
Kathleen McGarry, Ph.D. (Economics)

Lecturers

Melanie Gironda, Ph.D. (Social Welfare)
Judith Richlin-Klonsky, Ph.D. (Sociology)

Adjunct Assistant Professors

JoAnn Damron-Rodriguez, Ph.D. (Social Welfare)
Valentine Villa, Ph.D. (Social Welfare)
Scope and Objectives

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

See the Master of Public Health (M.P.H.) Admission section under Public Health Schoolwide Programs. Admission requirements for the Master of Science in Health Services are the same as for the M.P.H.

Areas of Study

Consult the graduate adviser.

Course Requirements

Students must complete at least one year of graduate residence at the University of California and 17 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Health Services 597 may not be applied toward the degree requirements.

Mandatory core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived if a similar course has been taken elsewhere and the student can pass the waiver examination.

Required department core courses include Health Services 200A-200B-200C, 237A-237B, 237C, and 422. Students are strongly encouraged to take the following courses or equivalents: Biostatistics 200A, 200B, and Epidemiology 201A-201B. Elective courses should be selected from the 200 or 500 series in consultation with an adviser.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master’s degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

If the comprehensive examination/report plan is approved, a guidance committee of three faculty members is appointed. The comprehensive examination consists of an extensive written research report in the major area of study. It must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before the student files for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree

Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE); (2) at least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses; (3) a positive recommendation by the Health Services Department; (4) approval by the doctoral admissions committee and the department chair; (5) completion of the M.S. in Health Services or an appropriately related field is preferred. Screening examinations may be required by the department.

Major Fields or Subdisciplines

Consult the graduate adviser.

Course Requirements

In addition to the requirements for an M.S. in Health Services, major field course requirements include Health Services 249H and Biostatistics 200A-200B, as well as Epidemiology 201A-201B. A cognate is required with at least 12 units (three courses) from a department that grants a Ph.D. degree. Cognate courses must be at the graduate level and should be core theory and research courses for the discipline chosen. Acceptable cognate areas would be from one of the following disciplinary areas: economics, epidemiology, history, management, political science, psychology, and sociology.

Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When the student is ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in Health Services; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

The doctoral committee administers the oral qualifying examination after the student has successfully completed the written examination.

After passing the University Oral Qualifying Examination, the student may be advanced to candidacy and commence work on a dissertation in the principal field of study. The doctoral committee guides the student’s progress toward completion of the dissertation.
Health Services

Lower Division Course

88. Lower Division Seminar: Special Topics in Health Services. Seminar, three hours; outside study, nine hours. Prerequisite: satisfactory completion of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in health services approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

100. Health Services Organization. Lecture, four hours; discussion, one hour. Prerequisite: four units of social sciences, Structure and function of American health care system; issues and forces shaping its future.

M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems. (Formerly numbered 110.) (Same as American Studies M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery including health disparities. Only four units may be taken each term.

131. Structure and Function of Health Care Facilites. Lecture, two hours; discussion, two hours. Prerequisites or corequisites: course 100, consent of instructor. Introduction to structure, organization, and function of health care facilities. 

132. Financial and Managerial Accounting for Health Services Organizations. Prerequisites: course 100 or equivalent, consent of instructor. Introduction to financial and managerial accounting and its application to the health care industry.

133. Introduction to Health Economics. Prerequisite: consent of instructor. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital costs functions, and costs and benefits of health programs.

134. Introduction to Comprehensive Health Planning. Lecture, four hours; fieldwork, four hours. Prerequisite: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant trends. 

136. Introduction to Health Services Research. Prerequisites: Biostatistics 100A or equivalent, consent of instructor. Review of the field of health services research. Uses of quantitative methods and applications of conceptual/theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to study of workings of health services.

199. Special Studies (2 to 4 units). Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

200A-200B-200C. Health Systems Organization and Financing. Lecture, four hours; discussion, two hours. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. 200A-200B. Prerequisite: health services major. 200C. Prerequisites: courses 200A-200B, and health services major or consent of instructor.

M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units). (Same as Economics M204L-M204M-M204N.) Seminar, three hours. Prerequisites: course 236 or equivalent, Economics 201A-201B-201C or equivalent, or consent of instructor. Topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading.

214. Measurements of Effectiveness and Outcomes of Health Care. Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, and Biostatistics 100A or equivalent, or consent of instructor. Historical perspective for development of health status measures and their utilization in assessment of outcomes and effectiveness in medical care. Review of current methods in context of current research and practice.

220. Seminar: Cost Containment. Seminar, three hours. Through lectures and discussion of journal articles, analysis of success and failure of alternative methods of controlling U.S. health care costs. Examination of how other countries have controlled their costs.

231. History of Public Health. Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health providers, health care institutions, health care reform movements, public health activities, childbirth, and AIDS.

232. Governmental Health Services and Trends. Prerequisites: course 100, two additional upper division social or behavioral sciences courses, consent of instructor. Systematic analysis of interface between organized programs of public health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions.

233. Health Policy Analysis. (Formerly numbered 233.) (Same as Community Health Sciences M252.) Lecture, three hours. Prerequisite: course 100 or equivalent. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy.

234. Health Services Organization and Management Theory. Prerequisites: courses 100 or equivalent, 131, two upper division social sciences courses or equivalent, consent of instructor. Examination of contemporary organization and management theory systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health services organizations.

235. Law, Social Change, and Health Policy. Prerequisites: course 100, two upper division political science or sociology courses or equivalent, consent of instructor. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs.

236. Microeconomic Theory of the Health Sector. Lecture, four hours; discussion, two hours. Prerequisites or corequisites: Biostatistics 100A or equivalent and intermediate microeconomics. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition.

237A-237B. Special Topics in Health Services Research Methodology. Lecture, one hour; discussion, three hours. Prerequisites: Biostatistics 100A, 100B, consent of instructor. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critical of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data.

237C. Issues in Health Services Methodologies. Prerequisites: courses 237A-237B, doctoral student standing. Intended to assist students in understanding the research process for a study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings.

238. Politics of Health Care. Prerequisite: course 100 or equivalent. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies.

239. Aging and Long-Term Care. Prerequisites: courses 100, 238, Community Health Sciences 270, or equivalent, consent of instructor. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including population at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems.

240. Health Care Issues in International Perspective. Prerequisites: two health administration courses, two upper division social sciences courses, or equivalent, consent of instructor. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries.

M241. Women, Health, and Aging: Policy Issues (2 or 4 units). (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

M242. Determinants of Health. (Same as Community Health Sciences M232.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups.

244. Seminar: Health Services and Policy Evaluation. Prerequisites: Biostatistics 100A, 100B, basic courses in program evaluation and health services organization, or equivalent, doctoral standing, consent of instructor. Seminar in alternative evaluation research theories and methods to health services organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; definition of evaluation criteria; and their utilization in evaluation; utilization of findings; and meta-evaluation. S/U or letter grading.

245. Society's Response to Aging. Prerequisites: two health services courses, two upper division social sciences courses, or equivalent, consent of instructor. Examination of central issues of health care delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health status, demand for care, health care financing, long-term care, and continuum of care for the aged.

246. Seminar: Special Populations — Health Service Policy Issues. Prerequisites: courses 200A-200B-200C, 232, 238, or equivalent, consent of instructor. Limited to doctoral students or M.S. and M.P.H. students with advanced degrees. Doctoral-level seminar which focuses on health services for selected priority populations, including scientific, organizational, economic, ethical, and political evidence as a basis for policy decision. Different populations may be selected for attention each year.

247. Research Topics in Health Economics. Prerequisites: courses 200A, 236, 446 or equivalent, consent of instructor. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health programs.
248. Small Area Planning for Resources for Personal Health Service. Lecture, three hours; laboratory, two hours; prerequisites: courses 100, 134, or equivalent, consent of instructor. General planning theory and health planning theory, methods, and experience with planning for personal health care resources for small geographic areas. Determining needs and estimating required utilization levels and health care resources. Survey of elements of different disciplines used in area-wide health planning. Laboratory projects are designed to implement studies of health planning theory and methods.

249A-249Z. Special Topics in Health Services (2 to 4 units each). Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced before the term may be repeated for credit with topic change.

249D. Principles of Organization Leadership: Applications in Public Health and Welfare. Lecture, three hours; discussion, two hours. Prerequisites: courses 100, 134, or equivalent. Theory and practice of leadership in public health and welfare organizations. Emphasis on values, ethical issues related to conflict of interest, and leadership in the current health care system that affect its composition.

249G. Medical Technology — Development, Diffusion, Assessment, and Health Services. Prerequisites: courses 200A-200B-200C, 236, or equivalent, one upper division policy analysis course. Doctoral-level seminar focusing on public policies that pertain to advancement of medical science and development of new technologies and promotion and regulation of their use.

249H. Current Research Issues. Discussion, two hours. Prerequisite: doctoral student standing. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

249L. Research Methodology. Lecture, one hour; discussion, three hours. Prerequisites: courses 237A-237B, doctoral student standing. Theory-driven model building and specification, operationalization, data definition and documentation, data screening and transformation techniques, use of indexes and scales, and data reduction methods. Some hands-on measurement and analysis work. Research projects with term-paper analysis required. Course builds on concepts and research methods learned in courses 237A-237B, 237C.

249M. Mental Health Services. (Formerly numbered 246L) (Same as Psychology M261). Lecture, three hours. Prerequisites: courses 200A-200B-200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects.

249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes. Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, Biostatistics 100A, 100B, or equivalent. Students will critically evaluate selected papers dealing with core topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. S/U or letter grading.

249L. Ethical Issues in Public Health. Prerequisites: courses 200A-200B-200C. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation.

250. Evolution of Health Professions in the 20th Century. Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of “helping” professions. Review of forces responsible for these changes and description of processes by which lay persons are entering helping professions. Introduction to major subgroups of helping professions. Review of major social forces external to health care system that affect its composition.

252H. Politics of Health Policy. (Same as Community Health Sciences M411.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200A-200B or Community Health Sciences 210. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors.

400. Field Studies in Health Services (2 or 4 units). Prerequisites: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum required for M.P.H. degree.

M411. Issues in Cancer Prevention and Control. (Same as Community Health Sciences M411.) Designed for seniors, juniors, and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and theoretical approaches to cancer control. Discussion/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes.

422. Practices of Evaluation in Health Services: Theory and Methodology. Lecture, three hours. Prerequisites: courses 200A-200B-200C or equivalent or consent of instructor. Introduction to health services evaluation. Examination and performance of specific evaluation procedures. Conducting of health services investigations, reporting results and methodologies.

425. Law and Epidemiology. Prerequisite: course 235 or Epidemiology 100 or consent of instructor. Examination, generally, of relationship between law and epidemiology, including use of epidemiology to regulate exposure to risk.

431. Managerial Processes in Health Service Organizations. Lecture, one hour; laboratory, three hours. Prerequisites: course 234, consent of instructor. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health service organizations are stressed as applications are presented.

432. Integrative Seminar: Health Services Management. Prerequisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty.

433. Health Service Organization Policy and Strategy. Lecture, three hours; discussion, one hour. Prerequisites: courses 131, 234, 400 (at least six units), or equivalent, consent of instructor. Conceptual, analytical, and technical aspects of policy and strategy formulation in health service organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation.

434. Employer/Employee Health Management. Lecture, two hours; discussion, two hours. Prerequisites: course 100, a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems, or equivalent, consent of instructor. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others.

435. Management Science for Health Planning and Administration. Lecture, three hours; laboratory, two hours. Prerequisites: Biostatistics 100A and either Biostatistics 403 or Management 404, or equivalent, consent of instructor. Introduction to management science analyses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory, queuing, sequencing, scheduling, and forecasting. Use of microcomputers.

436. Financial Management of Health Service Organizations. Prerequisites: courses 131, 132, 234, or equivalent, consent of instructor. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management.

437. Legal Environment of Health Services Management (2 units). Lecture, four hours. Prerequisite: course 131. General survey of legal aspects of health services management, including governance, agency, informed consent, medical malpractice, contracts, negligence, and case law related to health facility operations.

438. Issues and Problems of Local Health Administration. Lecture, three hours. Prerequisites: course 100 or equivalent, Epidemiology 100, one additional health services course or equivalent, consent of instructor. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions.

439. Dental Care Administration. Lecture, three to four hours. Prerequisites or corequisites: Biostatistics 100A, Epidemiology 100, or equivalent. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to diseas, national health program strategies, and evaluation mechanisms.

440A. Health Information Systems: Organization and Management. Lecture, two hours; laboratory, three hours. Prerequisites: courses 200A-200B-200C or equivalent, consent of instructor. Principles of and systems related to organization and management of a health facility’s health information system.

440B. Health Information Systems: Organization and Management. Lecture, two hours; laboratory, three hours. Prerequisites: course 440A or equivalent, consent of instructor. Health and administrative responsibilities among clinical sites and marketing, information systems, and clinical decision support systems, and planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to allocation, inventory control, and planning for medical and health services.
441. Ambulatory Care in the U.S. Seminar, three hours. Prerequisites: courses 132, 200A-200B-200C, and Management 403, or equivalent, or consent of instructor. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements.

442. Managed Health Care: Quality and Cost, Lecture, three hours. Prerequisite: consent of instructor. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PPOs, as well as discussion of managed care as a solution.

443A. Biological and Social Bases of Prevention, Lecture, two hours; discussion, two hours. Prerequisites: courses 100 or 200A-200B-200C, Biostatistics 100A, Epidemiology 100, graduate standing, consent of instructor. Current status, potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues.

443D. Advanced Hospital Financial Management Simulation. Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisites: courses 100, 132, 436, or equivalent, consent of instructor. Practical aspects of hospital management decisions in a changing environment examined through computer simulation, with particular attention to economic projections, demand patterns, investment programs, and health care regulations.

443E. Advanced Hospital Financial Management Seminar, Prerequisites: courses 100, 131, 132, 436, or equivalent, consent of instructor. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area.

445. Strategic Planning and Marketing in Health Care, Lecture, three hours; discussion, one hour. Prerequisites: courses 200A-200B-200C, Biostatistics 100A, 100B, or equivalent, consent of instructor. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which students must prepare in advance, fieldwork, and microcomputer exercises.

446. Financing Health Care, Prerequisites: course 100. Economic analysis, health insurance, and health care delivery systems. Trends in health service use; expenditures, national health insurance, and international comparisons of health financing.

447. State Health Policy Issues, Seminar, three hours. Prerequisite: course 238. Focus on health policy development and implementation at state government levels, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships.

447D. Management of Health Maintenance Organizations, Lecture, three hours. Prerequisites: courses 100, 134, or equivalent, consent of instructor. Alternatives to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to national health policy.

447E. Health Insurance Principles and Programs, Prerequisites: courses 100, 232, one additional health services course, or equivalent, consent of instructor. Examination of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments.

448. Health Policy Issues for Dental Professionals (2 units), (Same as Dentistry M442.) Prerequisites: course 100 or equivalent, Biostatistics 100A or equivalent, Epidemiology 100, consent of instructor. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

448D. Case Studies in Dental Practice (2 units), (Same as Dentistry M433A.) Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

449A-M449B. Child Health, Programs, and Policies, (Same as Community Health Sciences M436A-M436B. Prerequisites: course 100. Course M449A is a prerequisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations.

450. Financial Theory of Health Services Organizations, Requires: courses 200A-200B-200C. Study of health care financial management, including variables of cost of funds, availability of physicians to provide the necessary patients, efficiency of operations, and legal constraints.

495. Teacher Preparation in Health Services (2 units), Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master’s degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master’s degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

597. Preparation for Master’s Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master’s Thesis Research (2 to 8 units). Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.
Associate Professors
Stephen Aron, Ph.D.
Peter Baldwin, Ph.D.
Kathryn Bernhardt, Ph.D.
Ruth Bloch, Ph.D.
Robert G. Frank, Ph.D.
Robert A. Hill, M.Sc.
Valerie J. Matsumoto, Ph.D.
Melissa Meyer, Ph.D.
Michael G. Morony, Ph.D.
José Moya, Ph.D.
David N. Myers, Ph.D.
Kathryn Norberg, Ph.D.
Miriam Silverberg, Ph.D.
Brenda Stevenson, Ph.D.
Sharon Travek, Ph.D.
Albion M. Urdank, Ph.D.
William H. Worger, Ph.D.
Mary A. Yeager, Ph.D.

Assistant Professors
Joel Braslow, Ph.D.
Laura Edwards, Ph.D.
Stephen Frank, Ph.D.
James L. Gelvin, Ph.D.
Vinay Lal, Ph.D.
Muriel McClendon, Ph.D.
Claudia Rapp, D.Phil.
Jan Reiff, Ph.D.
Geoffrey Robinson, Ph.D.
Michael Salman, Ph.D.
William Summerhill, Ph.D.
Jessica Wang, Ph.D.
Henry Yu, Ph.D.

Lecturers
Albert Hoxie, M.A., Emeritus
Larry Lauerhass, Ph.D., Emeritus

Adjunct Professors
Russell Jacoby, Ph.D.
Robert C. Ritchie, Ph.D.

Adjunct Associate Professors
S. Scott Bartchy, Ph.D.
Darryl Holter, Ph.D.
Yuji Ichioka, Ph.D.

Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers—law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees.

There is also a joint master's program with the Graduate School of Education and Information Studies. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Undergraduate Study

Bachelor of Arts Degree

The History Department's undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major).

Preparation for the Premajor and Major

Required for the Premajor: Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and 99.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor's office in 6248 Bunche Hall. Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

Required for the Major: Three additional lower division history courses.

The Major

Required: At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 197.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History

The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the Preparation for the Major as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 13A-13B-13C credit on the history preparation. The excess units may be applied only toward the degree.

Honors Program

The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

The proposal, research, analysis, and writing of the paper take place over three terms through History 199HA, 199HB, and 199HC. Course 199HA is taken in Spring Quarter of the junior year, followed by courses 199HB and 199HC in Fall and Winter Quarters of the senior year. Contact the undergraduate adviser for more information.

Instructional Credential in History

For information on the single subject instructional credential in history, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

Graduate Study

The following constitutes introductory information concerning the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degrees

Admission

For admission to the Master of Arts program in History, applicants should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or university, and have maintained at least a B+ average in upper division work. For the European field, demonstrated proficiency in at least one foreign language (usually French or German) is expected. Prospective students are strongly urged to have proficiency already in two foreign languages. Three letters of recommendation and the scores of the General Test of the Graduate Record Examination (GRE) must be submitted to the department. For applicants who do not meet the grade-point average requirements, admission is granted in exceptional cases where the letters of recommendation, GRE scores, or other factors indicate unusual promise. Applicants may also be admitted with subject deficiencies but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree program. Applicants who have had a year or more of graduate study at other institutions should have attained a grade-point average of 3.5 or better (on a 4.0 scale) if they wish to work toward the Ph.D. degree. Admission to the department depends on the
number of openings in the field in which the applicant expects to specialize. Applications must be submitted before December 1; notification is made on or before May 1. Students are expected to begin graduate work in the Fall Quarter; deferred admissions are not granted.

The department has no separate application form; it uses the Application for Graduate Admission form distributed by the Graduate Admissions Office. In addition, all applicants must submit the UCLA Department of History Applicant Profile Sheet. All materials, including three letters of recommendation, submitted to the history department must be in one envelope. Departmental information may be obtained by writing to the department.

There is no screening examination. Nonhistory majors may be required to take specified courses depending on background and field of specialization. Students are expected to work in the field for which they are admitted. A change of fields after admission requires approval of the relevant admissions committee.

The Guide to Graduate Study in History which explains in detail the requirements and procedures of the history graduate program is distributed to all new graduate students at the orientation meeting which takes place during registration week. The guide lists all faculty, their major publications, and descriptions of courses offered during the year. Information on the program and the faculty is on the World Wide Web.

M.A. History/M.L.I.S.

The history/library and information science master's degree is a concurrent degree program with the Department of History and the Department of Library and Information Science (Graduate School of Education and Information Studies). Applicants wishing to receive the Master of Arts (M.A.) in History and the Master of Library and Information Science (M.L.I.S.) in three years may apply for this program. Applications for admission are reviewed by committees in the Department of History and the Department of Library and Information Science. Further information may be obtained by writing to the Department of History or the Department of Library and Information Science, Graduate School of Education and Information Studies.

Areas of Study

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1450 to present (also includes British history, Jewish and Russian history); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) China; (8) Japan; (9) Latin America; (10) U.S.; (11) history of science; (12) special fields (students in the history of religions or history of Christianity are normally examined in one of the above fields, but with the approval of the faculty in these fields may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).

Course Requirements

The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be counted toward this requirement, and only one in the 500 series may be applied. For students in U.S. history, a minimum of seven of the nine courses must be at the 200 level, including at least two two-quarter seminars and History 245. Students in European history must include History 225 and two two-quarter seminars. Africanists must take History 275.

Only one 500-series course may be included toward both the total course requirement and the minimum six graduate (200 series) course requirement. This could be either four units of course 596 or four units of 597.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Individual fields specify the fulfillment of the examination requirement by (1) a three-hour written examination designed to assess the candidate's ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of the candidate's program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The U.S. field requires a comprehensive examination in the form of a two two-quarter research papers to be submitted at the end of six quarters of full-time study. (This requirement does not apply to students entering the program with an M.A. in U.S. history.)

The European field requires a comprehensive examination in the form of two completed two-term research seminars, together with two completed research papers with the grade of B or better within the period of six quarters of graduate study, and a satisfactory pass in the doctoral written qualifying exam administered during the sixth quarter. The African field requires a three-hour comprehensive examination which is given in May of each year.

The medieval M.A. examination is given in May of each year. First-year graduate students are encouraged to take it at that time, and second-year graduate students must take it. Students who already hold an M.A. degree from another institution (or have comparable academic experience) are expected to take this examination in May of their first year at UCLA. The amount of preparation needed varies according to the student's background. Normally, the best preparation for the examination is to audit, or preferably to take for credit, several of the lecture courses on Western medieval history offered within the department. The questions are broad and general in character, reflecting the extensive familiarity gained through survey courses far more than the intensive knowledge acquired through seminars. The purpose of this examination is diagnostic: to ascertain that while studying languages and mastering research skills, the student is also making progress in learning the larger outlines of medieval history.

Students in medieval history working with Professor Krekic may satisfy the M.A. examination requirement by the other departmental examination option, namely, the submission of three papers as described in the general regulations.

In order to file for a master's degree, all students must file an Advancement to Candidacy form within the first two weeks of the quarter in which they expect to receive their degree. The comprehensive requirement is graded pass to continue, pass subject to reevaluation, terminal pass, or fail. In cases where the M.A. is awarded with pass subject to reevaluation, the field M.A. committee conducts a special reevaluation of the candidate's progress after no more than three additional quarters of study.

Thesis Plan

None.

Doctoral Degree

Admission

The admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the History faculty in the field in which they intend to work. Applicants may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to the Ph.D. program, the following evaluation procedures determine whether a student may continue to the Ph.D. degree.

For students entering the graduate program with a B.A. degree, an evaluation comparable to the M.A. comprehensive examination must occur within the period of six quarters.

For students entering with a master's degree from another department, evaluation must be completed by the end of three quarters of study in the History Department in order to determine whether or not they are permitted to continue toward the Ph.D. This evaluation is conducted in the same manner as described under the M.A. program.

Students must present to the graduate guidance and curriculum committee a field approval form signed by the faculty member who has agreed to support their work for the Ph.D. according to the following schedule: by the end of the seventh quarter or earlier for those entering with only a B.A. and by the end of the third quarter or earlier for those entering with an M.A. from another department. Students who do not meet the time limits for proceeding to the Ph.D. are subject to dismissal.

The Guide to Graduate Study in History which explains the requirements and procedures of
the history graduate program in detail is avail-
able in September to all new graduate students
who have filed a Statement of Intent to Regis-
ter. The guide lists all faculty with their major
publications and descriptions of courses of-
fered during the year.

For academic counseling, students choose a
faculty sponsor who chairs the doctoral com-
mittee and guides them in their Ph.D. program.
A faculty adviser is assigned to all entering
graduate students for the first quarter only.

There is a graduate guidance and curriculum
committee consisting of five faculty members and
one graduate student, appointed by the
chair of the department, which reviews and
makes recommendations regarding all doctoral
programs and any petitions requesting varia-
tions from the program as described in this cat-
alog. The vice chair for graduate affairs is an ex
officio member of this committee and channels
all petitions and programs for review to the
committee. The student’s chair is normally con-
sulted about petitions and variances.

An annual review of all graduate students is
made each Spring Quarter by the graduate
guidance and curriculum committee. Letters
are written to those students with program or
grade-point deficiencies or other academic
problems.

Students are encouraged to consult the gradu-
ate adviser, a full-time staff member, about re-
quirements and procedures for progress to-
ward the Ph.D. degree.

Major Fields or Subdisciplines
Ancient Greece; ancient Rome; medieval con-
titutional and legal; medieval social and eco-
nomic; medieval ecclesiastical and religious;
medieval intellectual and cultural (specialists in
medieval history may offer no more than two of
these fields in medieval history); Byzantine;
Russia since 800; East Central and Southeast
Europe since 1450; England prior to 1485; Brit-
ain since 1450; the British Empire; ancient
Near East; the Near East, 500 to 1500; the Near
East since 1500; Armenian; survey of Af-
rican history; topics in African history (prefera-
ably on a regional basis); history of science
since 1450; Europe, Renaissance/Reforma-
tion; Europe, Renaissance to the French Revo-
lution; Germany since 1450; France since
1450; Italy since 1450; Spain and Portugal
since 1450; Europe since 1740; European so-
cioeconomic history; European intellectual and
-cultural history; psychohistory; China 900 to
1800; China since 1800; early modern Japan;
modern Japan; South Asia; Southeast Asia;
Latin America, 1492 to 1830; Latin America
since 1759; history of religions; Jewish history;
history of Christianity; comparative history;
U.S.: (1) mastery of the general field of U.S.
history sufficient to teach a college-level survey
course and (2) a specialized field chosen from
the following: Afro-American, American diplo-
matic, American West, American Indian, Asian
Americans, California, History of the South,
Civil War and Reconstruction, Colonial, cul-
tural, economic, immigration, intellectual, Jef-
nersonian and Jacksonian American (1800 to
1850), labor, Mexican-American, social, the
new nation (1763 to 1800), 20th century, ur-
ban, women's history. Both the general and a
specialized field must be offered by specialists
in United States history and only two fields in
United States history are permitted. Either field
1 or 2 or both may be chosen as minor fields
for the Ph.D.

The history of Christianity may be offered as
a major or minor field for the doctorate in history.
Students may offer this field with emphasis on
a particular aspect such as the early church,
protestantism, or orthodox Christianity, al-
though by definition they are required to be fa-
miliar with the historical New Testament.
Where possible, the field is defined as chrono-
ologically and geographically coterminal with an
existing departmental field. Emphasis in ei-
ther American Christianity or medieval Latin
Christianity counts as an American or medieval
field.

To offer a field in the history of Christianity, the
student must prepare a written statement de-
fining in detail the parameters of the field and
must submit the statement to the graduate
guidance and curriculum committee for ap-
proval. Before submission the statement must
be endorsed by and bear the signatures of the
examining faculty member and the chair of the
student's Ph.D. committee.

Comparative history Ph.D. students may
choose comparative history as one of their four
fields. This means choosing one topic across
three existing Ph.D. fields. The topic should be
chosen with the help of the student's Ph.D. ad-
visers; among possible topics are labor history,
women's history, history of religions, economic
history, and many others. The geographical/
temporal fields covered may correspond to
some or all of the student's other three Ph.D.
fields. The comparative field is more intensive
and involves genuine comparisons. It is highly
recommended (and comparative chairs may
require) that those majoring in a Western field
choose one non-Western field and vice versa.
Two or three professors may, if needed, super-
vise a comparative program, and may help ex-
amine the candidate either on the orals or by
written examination.

Candidates in the history of science program
must select three of the above fields and either
the history of medicine or an allied field. They
must also demonstrate a detailed knowledge of
the substance and historical development of a
particular science or a type of engineering or
technology as a subfield common to the histori-
ical fields.

Course Requirements
Candidates for the Ph.D. must meet the special
requirements for admission to the doctoral pro-
gram listed above and the general require-
ments set forth under the Graduate Division.
Additionally, the following requirements must
be fulfilled: (1) a command of good English,
spoken and written; (2) the ability to read at
least two foreign languages (except in the U.S.
field where only one foreign language is re-
quired); (3) an acquaintance with general his-
tory; and (4) completion of at least one con-
tinuing two- or three-quarter seminar which
must include completion of a substantial re-
search paper.

All students must write a dissertation prospec-
tus (written for credit as History 596 or 597)
which is expected to contain (1) a full state-
ment of the dissertation topic; (2) a histori-
ographical discussion of the literature bearing
on the topic; (3) a statement of the methodol-
gy to be employed; and (4) a survey of the sources
sufficient to demonstrate the viability of the
topic. The prospectus must be submitted
in writing to and be approved by the disserta-
tion adviser prior to the oral part of the qualify-
ing examinations. After approval, copies are
given to each member of the examining com-
mittee.

The following coursework is required in specific
fields: (1) U.S. history — History 245 (History
246A-246B-246C are strongly recommended
for all first-year students); (2) European history
— History 225; (3) African history — History
275 (unless exempted by petition); (4) medi-
evial history — Latin 130 or 131, Latin 243, and
History 219A-219B (may substitute a graded
History 596 in paleography for 219A-219B with
permission of faculty).

Faculty serving on doctoral committees may
require such courses as they deem necessary for
preparation for qualifying examinations. Courses taken to fulfill M.A. degree require-
ments may also be used to satisfy Ph.D. re-
quirements.

Written and Oral Qualifying
Examinations
In the written and oral qualifying examinations
students are expected to show not only a mas-
tery of their special subject, but also an ex-
tensive knowledge covering the wider field of his-
torical knowledge and an ability to correlate
historical data and to explain their significance.
These examinations are designed to test not
merely factual knowledge, but also power of
historical analysis and synthesis, critical ability,
and capacity for reflective thinking. Knowledge
of the history of any area includes a solid un-
derstanding of its historiography and bibliogra-
phy, its geography, and its political, cultural,
economic, and other historical aspects.

In the oral examination, students are examined
in four fields, one of which may be an approved
field in anthropology, economics, geography,
language and literature, philosophy, political
science, or other allied subjects. This allied
field must be comparable in size and scope to
the history fields listed above. Students should
select the fields in consultation with their ad-
viser and must receive the department's ap-
proval of all four fields no less than six months
before the written qualifying examination is
taken. In the case of the European field, stu-
dents must choose their four fields by the quar-
ter after they have successfully passed the doctoral written qualifying examination (i.e., normally by the seventh quarter of residency). To obtain this approval, students should supply the graduate guidance and curriculum committee with the name of the faculty member who has agreed to serve as the sponsor of the doctoral work and with the details of the proposed program. A full-time graduate student must begin the written qualifying examinations no later than the end of the ninth quarter of graduate work.

The written qualifying examination includes the major field only except in the European field which requires a written examination in three fields. In the case of the U.S. and European history, each field administers a written qualifying examination as outlined below. The oral examination covers all four fields (except for the African field) and is normally held after the written examination. In most fields, the oral examination will be held shortly after the written examination or, at the discretion of the doctoral committee, as late as six months after the written examination. For the U.S. and European fields, see below. Both the written and oral examinations are to be considered by the committee as a whole in arriving at a judgment of the student’s performance except in the European field. The written qualifying examination is normally prepared and administered by the chair of the doctoral committee before the oral qualifying examination, except for the U.S. and European fields (see below). All students in the European field take the doctoral written qualifying examination during the sixth quarter in residence.

In the U.S. field students must take the doctoral written qualifying examination after 12 months in residence. Prior to taking the written qualifying examination, students must have secured the agreement of a qualified member of the department in the U.S. field to serve as chair of the doctoral committee. The written examination (not to exceed eight hours, except in the case of the European field) is administered once a year at the beginning of the Fall Quarter. Those failing the examination may retake it on petition the following Spring Quarter. The examination may be retaken only once. The examination committee consists of three faculty members who in the previous year taught History 246A-246B-246C. If any of these faculty members are unavailable, preference is given, in replacing such members, to faculty members who have taught History 246A-246B-246C in recent years. The written examination is intended to test a comprehensive broad understanding of American history both before and after the independence of the U.S. All facets of history (political, social, diplomatic, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods, is consequently essential. Knowledge of the scholarly literature and of the principial historiographical controversies arising out of it are tested along with the student’s interpretive capabilities. Passing of the examination implies that the student is qualified, in the judgment of the U.S. field, to teach courses in U.S. history at the college level. Questions related to the planning of such courses may appear on the examination.

All students in the European field take the doctoral written qualifying examination during the sixth quarter in residence. The European written examination is administered once a year late in the Spring Quarter. Those failing the examination may retake it on petition in the following Spring Quarter. The examination may be retaken only once. The entire European faculty in residence during the Spring Quarter administers the examination. The examination is divided into the following sections: Europe, Renaissance and Reformation, Europe, Reformation to French Revolution; Europe since 1740; European Social and Economic History since 1450; European Intellectual and Cultural History since 1450; Russia since 800; Jewish History; East Central and Southeast Europe since 1450; Germany since 1450; Italy since 1450; Spain and Portugal since 1450 (not currently offered), European History of Science since 1450. Students choose three sections in which they are examined. The entire examination lasts one and one-half days. Students entering with a B.A. who fail the doctoral examination will be allowed to complete the M.A. program as outlined. Prior to taking the written qualifying examination, a student must have secured the agreement of a qualified member of the department in the European field to serve as chair of the doctoral committee. The examination is intended to test a comprehensive, broad understanding of European history, both of the modern and early modern periods. Different facets of history (political, social, intellectual, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods is, consequently, essential. Knowledge of the scholarly literature and of the principal historiographical controversies arising out of it is tested, along with interpretive capabilities. Questions relating to the planning of college-level history courses may appear on the examination. Before taking the written examination, the student must have passed at least one language examination.

At the oral qualifying examination, the student must submit four fields selected to enhance the scope and quality of the dissertation. During the period subsequent to the written examination, a student may select a comparative field, or a field outside Europe or the department. The oral examination concerns the dissertation prospectus and the substantive elements of the four fields as they relate to the prospectus. The oral examination normally takes place at the end of nine quarters of residence but must be taken by the end of the twelfth quarter. The second language examination must be passed before taking the oral examination. Should a student fail the oral examination, he or she must retake it at a time set by the committee within six months. Any variance from time limits must be approved by the European field before going to the graduate guidance and curriculum committee for final approval.

The four fields of the University Oral Qualifying Examination must be related to the dissertation and are selected to enhance the scope and quality of the dissertation. The oral examination concerns the dissertation prospectus and the substantive elements of the four fields as they relate to the prospectus. The written examination, if failed, must be retaken at the next administration of the examination if the student wishes to continue; if the student fails the oral examination, it must be retaken at a time specified by the doctoral committee, but not to exceed six months. Any variance from these time limits must be approved by the U.S. field before going to the graduate guidance and curriculum committee for final approval. After passing the oral qualifying examination, students are advanced to candidacy and may begin work on their dissertations.

### History

#### Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. Lecture, two hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. 1A. Ancient Civilizations from Prehistory to ca. A.D. 843; 1B. Circa A.D. 843 to ca. 1715; 1C. Circa 1715 to the Present.

1AH-1BH-1CH. Introduction to Western Civilization (Honors). Lecture, two hours; discussion, two hours. Honors sequence parallel to courses 1A-1B-1C.

2A. Power, Ethics, and Technological Change. (Formerly numbered 98.) Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, corporate power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historiographic case studies include Three Mile Island, Chernobyl, the DC-10, and Challenger Disaster. P/NP or letter grading.

2B. Social Knowledge and Social Power. Lecture, three hours; discussion, two hours. Historical introduction to social thought and the social sciences since the 18th century. Consideration of the great social thinkers, including Smith, Mill, Comte, Marx, and Freud. Examination of practical and political uses of social science by addressing such topics as psychology and mental testing, anthropology and race, cost-benefit analysis, measurement and creation of norms, definition of sex and gender, and cultural construction of expertise and objectivity. P/NP or letter grading.

3A-3B-3C. Introduction to History of Science. Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements.

3A. Scientific Revolution. Survey of the beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of the natural world, rise of experimental science, and origins of scientific societies.
3B. Physical Sciences since the Enlightenment. Broad survey of development of ideas in classical and modern physical science since Newton. Theories of matter; but more specifically chemistry, thermodynamics, electro-magnetic theory of light, energy conservation, relativity, and quantum mechanics.

3C. Biological Sciences, 1800 to 1955. Survey of development of biological sciences from the period of Bichat and Müller to discovery of the double helix.

3CH. Introduction to History of Science (Honors). Honors course parallel to course 3C. P/NP or letter grading.

3D. Themes in History of Medicine. Lecture, three hours. Not open to freshmen. Limited to 30 students. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emergence of surgery, epidemics, and impact of medical technology; and treatment of insanity, and use of medical technology.

4. Introduction to History of Religions. Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greece and early Christian theories to modern world history with its recoveries of the religions of India, China, ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries.

5A-5B. Survey of British History. Lecture, three hours; discussion, two hours. Designed for students wanting general orientation to British history and those in English literature and prelaw. Survey of history of England and (after the union between England and Scotland) Great Britain. 5A. Middle Ages to the Glorious Revolution in 1688; 5B. 1688 to the 20th Century.

5AH. Survey of British History (Honors). Lecture, three hours; discussion, two hours; outside study, 10 hours. Honors course parallel to course 5A. P/NP or letter grading.

5B. Cultural History of British Empire. Lecture, three hours; discussion, two hours; outside study, 10 hours. Honors course parallel to course 5B. P/NP or letter grading.

6. Cultural History of the United States. Lecture, three hours; discussion, two hours. Exploration of early modern world through "eyewitness" accounts, with focus on both humanistic and social science aspects of historical change, specifically addressing social, political, economic, and cultural spheres of activity important in world affairs before American and French Revolutions. P/NP or letter grading.

20. World History: Government and Society in Ancient Greece. Lecture, three hours; discussion, two hours. Examination of primary civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of society, nature of kingship, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/NP or letter grading.

21. World History, 1200 to 1800. Lecture, three hours; discussion, two hours; outside study, seven hours. Exploration of early modern world through "eyewitness" accounts, with focus on both humanistic and social science aspects of historical change, specifically addressing social, political, economic, and cultural spheres of activity important in world affairs before American and French Revolutions. P/NP or letter grading.

22. Contemporary World History, 1870 to the Present. Lecture, three hours; discussion, two hours. Broad thematic survey of world history since the mid-19th century. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women's rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

M70. Survey of Medieval Greek Culture. (Same as Classics M70.) Lecture, three hours. Classical roots of Byzantium, the Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

9CH. History of Japan (Honors). Honors course parallel to course 9C.

9D. History of the Near and Middle East. Introduction to history of the Muslim world from advent of Islam to the present day.

10A-10B. Introduction to Civilizations of Africa. Lecture, three hours; discussion, two hours. Intended for students with general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

10BH. Introduction to Civilizations of Africa (Honors). Lecture, three hours; discussion, two hours. Honors course parallel to course 10B.

11A-11B. History of China. Lecture, three hours; discussion, two hours. 11A. To 1000. Survey of early history of China — genealogy of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires. 11B. 1000 to 1950. Survey of later history of China — evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in the contemporary era.

11AH-11BH. History of China (Honors). Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A-11B.

88E. History of Religions. Lecture, three hours; discussion, one hour. Examination of all major religions, ancient and modern, and some of the great religious discoveries. Correspondence of religion and society.

88H. Science/Tehnology; Theory of History; U.S.; Russia/Eastern Europe; Near East; Japan; Southeast Asia; History of Religions; Science/Technology; History of Religions; Theory of History; Jewish History; Religious History; Armenians and the Caucasus; Middle East; Southeast Asia; Psychology.

97H. Three Trials. Discussion, three hours. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial.

99. Introduction to Historical Practice. (Formerly numbered 101.) Seminar, three hours. Discussion classes of no more than 15 students. Introduction to study of history, with emphasis on historical theory and research methods. P/NP or letter grading.

Upper Division Courses

Requisite for all upper division courses is upper division standing or consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures. Consult the quarterly Schedule of Classes to determine the offerings for each term.

100A. History and Historians. Study of historiography, including principles of historical interpretation. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures. Consult the quarterly Schedule of Classes to determine the offerings for each term.

100B. History and Contemporary Theory. Survey of major sources and trends of contemporary theory, from Saussure's linguistics to recent feminist theories, in texts that inform much of the most recent historiographical directions and debate.

102. Explorations in Psychoanalysis and History. Assessment of recent writings in the field of psychohistory.

M103A-M103B. Historical Archaeology. (Formerly numbered M103.) (Same as Anthropology M115A-M115B.) Lecture, three hours. P/NP or letter grading. M103A. World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of the discipline both in the Old World and the Americas. M103B. American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications.

M104A-M104B. Ancient Egyptian Civilization. (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. M104A. Chronological discussion of Prehistory, the Old and Middle Kingdom. M104B. The New Kingdom and the Late period until 332 B.C.

118. Topics in Ancient History. Introduction to topics in Greek and Roman history, including Roman law, ancient Greek and Roman slavery, world of Cae- sar Augustus, Greek democracy, and Alexander the Great. May be repeated for credit. P/NP or letter grading.

119. The Christian Church, 100 to 1517. Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. P/NP or letter grading.

120. The Christian Religion, 100 to 1350. Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders.

121A-121B. Medieval Europe. Basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. 121A. 400 to 1000; 121B. 1000 to 1500.

121C. Medieval Civilization: Mediterranean Heartlands. Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

122. Power and Imagination in Byzantium. (Same as Classics M122.) Lecture, three hours. Pre-requisites: courses M70 or 123A-123B. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticalism of the emperor, iconoclasm, intellectual free- dom, attempts at reform.

124A-124B. East-Central Europe. 124A. The 19th Century. 1780 to 1914. Emphasis on the characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and conse- quences of its partial failure in the economy, politics, and culture. 124B. Short 20th Century, 1914 to 1990. Analysis and interpretation of stormy history of crisis zone of Europe where wars, revolts and revolu- tions, different types of extremisms led to a historical detour; 70 years of departure from Western values and last an effort to turn back to them.

125A-125F. History of Modern Europe. P/NP or letter grading.

125A. Renaissance and Reformations, 1450 to 1660. Reorganization of power, new forms of representa- tion, and discourses about rule and obedience in Europe from the mid-15th through 16th century; pop- ular culture; peasant society; refashioning of religion and power; localization.

125B. Baroque Culture and Absolutist Politics, 1600 to 1715. Changing nature of state and social domina- tion; reorganization of military violence; strategies of population discipline; absolutism and baroque cul- ture; new forms of bureaucratic intervention; repre- sentation of the family, sexuality, and the body; witch persecutions.

125C. Old Regime and Revolutionary Era, 1715 to 1815. Enlightened absolutism and reform, challenge of new political and economic ideas, crisis of the Old Regime, impact of French Revolution and Napoleonic empire.

125D. Bourgeois Century, 1815 to 1914. Restora- tion politics, Industrial Revolution, uprisings of 1848, unification of Germany and Italy, imperialism, rise of socialism, population growth, changes in social structure, origins of World War I.

125E. Era of Total War, 1914 to 1945. World War I, interwar period, and World War II. Social, cultural, politi- cal, and economic aspects, with focus on strain between model of parliamentary democracy and dynamics of mass politics (e.g., Bolshevik Revolution, Italian Fascism, national socialism, and Spanish Civil War).

125F. World War II and Its Aftermath, 1939 to the Present. World War II, origins and persistence of the Cold War, reconstruction in the West, de-Stalinization, decolonization, crisis of the welfare state, background and course of the 1989 revolutions, current political configuration.

126A-126F. Cultural and Intellectual History of Modern Europe. (Formerly numbered 126A-126E.) Climates of taste and climates of opinion. Educa- tional, moral, and religious attitudes; art, thought, and manners of the time in historical context. P/NP or letter grading.

126A. 15th Century. Renaissance culture and intellectual history of Europe. Central themes include comparative history of ideas, theory and prac- tice of art and architecture, civic and religious human- ism, religious experience, and new cultural genres of history and philological scholarship. 126B, 16th Centu- ry. (Formerly numbered 126A.) 126C, 17th Century. (Formerly numbered 126B.) 126D. 18th Century. (Formerly numbered 126C.) 126E, 19th Century. (Formerly numbered 126D.) 126F. 20th Century. (Formerly numbered 126E.)

128A-128B-128C. History of France. 128A. France, 1500 to 1715. Social history of 16th- and 17th-century France; the growth of monarchy, war of religion, peasant uprisings, popular culture, Catholic resurgence, Louis XIV and achievements in arts and literature. 128B. France, 1715 to 1871, “Ancien Régime” and the time of revolutions. Critical discussion leading to the French Revolution, collapse of the state, Napoleonic reconstruction of society through the monarchies and revolutions of the 19th century. 128C. Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics.

129A. Baroque and Enlightenment Germany. (Formerly numbered 129A-129B.) Development of state institutions, culture, and society in Central Europe from end of Thirty Years’ War to end of Napoleonic Wars. Consideration of absolutism as a political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

129B. Nationalism and Modernization in 19th-Century Germany. (Formerly numbered 129C.) Problems of class society and state formation, emancipation, and revolution; continuing growth of national consciousness, emergence of a “bourgeois public sphere,” dynamics of gender in civil society and political life, post-Napoleonic tensions between reform and reaction, 1848, and national unification. P/NP or letter grading.

129C. 20th-Century Germany. (Formerly numbered 129D.) Transitions that Germany has faced during this century: two world wars, shift from monarchy to republic to national socialism to a “divided nation,” and finally “reunification.” Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

130A-130B-130C. Europe in the Age of Revolution, 1750 to 1850:

130B. Crisis of the Old Regime and the Revolution. The revolution in France, 1787 to 1799. Spread of revolution to other parts of Europe and varying responses. Impact of war on revolutionary France after 1792 and spread of revolution by military force and by political contagion in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in France and outside.

130C. Napoleonic Europe and the Restoration. Napoleon’s ascendency in France from 1799: internal effects. Restructuring of Europe under Napoleon and nationalist reactions. Industrial and political change in Britain: Anglo-French rivalry to 1815. The restoration: what could be restored and what could not. Rising nationalist reactions. Industrial and political change in Europe, and finally “reunification.” Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

131. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendency of Stalin. The Marxist-Leninist model of society and economy, foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability? 131D. Culture and Society in Imperial Russia. Recommended (but not prerequisite): course 131B or Russian 99A or 119. Thematic examination of culture and society in Russia during era of state-sponsored Westernization, transformation of the imperial economy, peasantry, and village life from serfdom to postman- cipation era, urban society, working-class life and thought, women, clergy, religion, popular culture, accommodation, and resistance.

132A-132B. History of Italy. 132A. 1559 to 1848. Counter-Reformation and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. 132B. 1848 to the Present. Political, economic, social, diplomatic, and ideological developments.

133A-133B. Social History of Spain and Portugal. 133A. Age of Silver in Spain and Portugal, 1479 to 1789. Development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history; gold routes, slave trade, history of women, and develop- ment of different types of collective violence. 133B. Rebellion and Revolution in Modern Spain and Portu- gal, 1789 to the Present. Spanish position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

134A. Southeastern Europe, 500 to 1500. Political, economic, and cultural survey of the independent Bal- kan states in the Middle Ages.

134B. Southeastern Europe, 1500 to 1918. The Balkans under Ottoman rule, movements of national liberation, and formation of nation states.

136. Topics in European History. (Formerly num- bered 136A-136Z.) Integrated introduction to impor- tant aspects of European history and political develop- ment on a specific topic within a broad framework. May be repeated for credit. P/NP or letter grading.

136J. History of Prostitution in Europe. Use of prostitution as an instrument to explore the position of women in European history from ancient Greece to the present. Examination of changes in government policy, shifts in organization of the sex trade, differing representations of prostitutes in art and literature, and role of venerable disease in shaping attitudes toward mercy.

137A-137B-137C. History of Women in Europe. 137A. Prehistory to 1450. History of women in ancient Greece, Rome, and the Middle Ages. Topics include women in Greek mythology and life, Roman Empire, Christianity, convents, courtly love. 137B. 1348 to 1814. History of women from the Renaissance to the end of the French Revolution. Topics include women of Renaissance Italy, women in the Protestant and Catholic Reformations, witchcraft, and the Enlighten- ment and French Revolution. 137C. 1814 to the Present. Topics include Victorian women; purity movements; suffrage and role of women in World War I, Russian Revolution, and the Nazi State; “second” feminism.

138A-138B. Topics in Medieval English History. Topics include town and country, community and family, and institutional history in a period of great change. Examination of the evolving concepts of role of govern- ment and responses to that alteration.

138C. American South, 1977 to the Present. Analy- sis of political, economic, social, intellectual, and cul- tural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights.

139. Renaissance England. Culture and society. Emphasis on literary culture (Elizabethans, Jacob- beans, Caroline), with readings and lectures on dif- ferent aspects of Renaissance England as required for serious understanding of the culture.

141A-141B-141C. History of Britain. Analysis of British economy, society, and politology, focusing on dynamics of both stability and change. P/NP or letter grading. 141A. Tudor-Stuart Times, 1465 to 1715. Political, socioeconomic, religious, and cultural history of Britain under the Tudors and Stuarts. Topics include politics and government, establishment of overseas colonies, 17th-century political upheavals and their impact on political and socioeconomic structures. 141B. Making of Modern Britain, 1717 to 1867. Social, economic, political, and cultural history of Britain from Hanoverian revolution in politics to advent of mass democracy in mid-Victo- rian era. Themes include social change under pres- sure of industrialization, emergence of first British Empire, loss of America, shifts in religious and social position. 141C. Modern Britain since 1832.

142A-142B. British Empire since 1783. Political and economic development of the British Empire, including revolution of 1783 and the American Revolution, industrial development, imperialism, and potentialities for social change discussed.

143. History of Canada. Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

144. History of Australasia. History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

145A. Colonial America, 1600 to 1763. Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on inter- action of three converging cultures: Western Euro- pean, West African, and American Indian.

145B. Revolutionary America, 1760 to 1800. Inquiry into origins and consequences of the Ameri- can Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy. P/NP or letter grading.

146A-146B. U.S., 1800 to 1850. 146A. Jeffersonian America: Jeffersonian Republican ascendency and Era of Good Feelings, 1800 to 1828; disintegration of Federalist opposition; testing of American nationality in the second war with Britain; beginnings of transpor- tation and industrial regime; growth of political parti- ansis in an increasingly egalitarian age. 146B. Jacksonian America and Beyond. “Jacksonian Revolution” and its aftermath, 1829 to 1850; problem of national power vis-a-vis state sovereignty; rapid social change through industrialization and urbaniza- tion; reform impulse; anti-slavery movements; territo- rial expansion as focus for sectional rivalry.

147A. U.S., Civil War and Reconstruction. Rise of sectionalism, slavery, and Reconstruction; formation of the Confederate States; war years; political and social reconstruction.

147B. U.S., 1875 to 1900. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of govern- ment and responses to that alteration.

147C. American South, 1877 to the Present. Analy- sis of political, economic, social, intellectual, and cul- tural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights.

148C. U.S. since 1945. History of political, social, and diplomatic developments that have shaped the U.S. since 1945.
149A-149B. American Economic History. 149A. 1790 to 1910. Roles of economic forces, institutions, individuals in promoting or opposing effective change in the American economy, 1790 to 1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. 149B. 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and world economy, 1910 to the present.

150A-150B. Intellectual History of the U.S. Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought.

150C. History of Religion in the U.S. Consideration of the religious dimension of people’s experience in the U.S. Examination of a number of religious traditions which have been important in this country, with emphasis on relationships among developments in religion to other aspects of American culture.

151A-151B. Constitutional History of the U.S. 151A. Origins and Development of Constitutionalism in the U.S. Focus on framing of the Federal Constitution in 1787 and its subsequent interpretation. Judicial review, significance of the Marshall Court, and effects of slavery and the Civil War on the Constitution. 151B. Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within its prescribed limits.

152B. American Diplomatic History (Honors). Lecture, three hours; discussion, one hour. Role of the U.S. in the 20th-century world.

154A-154B. U.S. Urban History. 154A, 154B. U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broader patterns of society as well as to their own special historical experiences. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. 154B. Topics in U.S. Urban History. Prerequisite: course 154A. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations.

154C-154D. History of Architecture and Urban Planning, 1600 to the Present. Aspects of American life experienced through architecture, urban planning, and allied arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users culturally, socially, and politically, and to which it has reflected their values and ways of living. 154C. 1600 to 1890. 154D. 1890 to the Present.

155A-155B. American Working Class Movements. Major episodes in social, trade union, and cultural his- tory of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor poli- tics. 155A-155B. American Social History, 1750 to 1900. Historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women’s work, urbanization and industrialization, immigration and nativism, and movements for social reform. 155A. 1750 to 1860; 155B. 1860 to 1910.

156C-156D. Social History of American Women. Survey of major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social collectivities. Emphasis on historical and cultural context, and eth- nic comparisons. 156C. Colonial and Early National, 1600 to 1820; 156D. Victorian and Industrial, 1820 to 1920; 156E. 20th Century, 1900 to 1975.

156F-156G. History of the American Family. Perspective on the contemporary American family through study of its development over the course of four centuries. Topics include Western European ori- gins, sex roles, child-rearing, sexuality, work patterns. Emphasis on class, racial, ethnic, and regional vari- ations. 156F. 1600 to 1870; 156G. 1870 to 1990.

156H. Medicine and Society in 19th-Century America. Therapeutics, theories of disease, and medical science scrutinized with the understanding that they are not just facts shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?

157A-157B. North American Indian History. History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. 157A. Precon- tact to 1830; 157B. 1830 to the Present.

158A. Comparative Slavery Systems. (Same as Afro-American Studies M158A.) Examination of the slavery experience from various New World slave soci- eties, with emphasis on outlining similarities and differ- ences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

158B-158C. Introduction to Afro-American His- tory. (Same as Afro-American Studies M158B- M158C.) Survey of the African-American experience, with emphasis on the three great transitions of Afro- American life: transition from Africa to New World sla- very, transition from slavery to freedom, and transition from rural to urban milieus.

158D. Afro-American Urban History. Examination of Afro-American urban development from 1840-1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which are associated with those cities.

159A. History of the Chicano Peoples. (Same as Chicana and Chicano Studies M159A.) Lecture survey course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 19th century. This course focuses on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and poli- tical issues affecting the community. Within a framework of domination and resistance, discus- sion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of signifi- cance occurring both in the U.S. and Mexico. Lec- tures, special presentations, readings assignments, written exams, library and/or field research, and submission of a paper.

159B. History of the Chicano Peoples. (Same as Chicana and Chicano Studies M159B.) Survey lec- ture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated under- standing of change over time in the Mexican commu- nity by inquiry into major formative historical and poli- tical issues affecting the community. Within a framework of domination and resistance, discus- sion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of signifi- cance occurring both in the U.S. and Mexico. Lec- tures, special presentations, reading assignments, written exams, library and/or field research, and submission of a paper.

160A-160B. U.S. and Comparative Immigration History. (Formerly numbered 160.) Use of overlap- ping diaspora models which integrates North Atlantic (Europe), South Atlantic (Afro-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to the present. Special focus on Southern California in course 160B. P/NP or letter grading.

162. American West. Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.

163. History of California. Economic, social, intel- lectual, and political development of California from earliest times to the present. P/NP or letter grading.

164. History of Los Angeles. Social, economic, cul- tural, and political development of Los Angeles and its environs from time of first contact with the Mexican. Emphasis on the diverse peoples of the area, chang- ing physical environment, various interpretations of the city, and Los Angeles’ place among American urban centers.

165A. Early Latin America. Advanced survey of Latin American history from conquest to indepen- dence, with emphasis on society, culture, and ethnic aspects.

165C. Indians of Colonial Mexico. Survey of social and cultural history of the Indians of Mexico, espe- cially central Mexico, from time of the European con- quest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.

166. Latin America in the 19th Century. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.

167A-167D. Latin America in the 20th Century. Experiments in national development analyzed to relate the timing of social changes to economic, politi- cal, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of per- sonalists (leaders) (emphasized in course 167B), defini- tion of the national polity (emphasized in course 167C), and “rightist” and “leftist” models of develop- ment (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are stud- ied according to the chronological contribution to the theme emphasized. 167A. Haiti, Uruguay, Costa Rica, Cuba, Chile. 167B. Bolivia, Dominican Repub- lic, Peru. 167C. Argentina, Brazil, Panama, Colombia, Ecuador, Paraguay, Venezuela, Guatemala, Panama, 167D. Brazil, Guatemala, Peru, Nicaragua.

168. History of Latin American International Rela- tions. Analyzes the history of relations between the Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.
169. Latin American Elitelore. Prerequisite: course 167A, 167B, 167C, or 171. Elitelore (defined as oral or noninstitutionalized knowledge) involves leaders’ conceptual and perceptual life history views) in contrast to folklore (followers’ traditional or popular views). Elitelore genres include oral history, literature, and cinema.

170A. Latin American Cultural History, Intellec- tual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin American thought to self-interrogation. Music, films, and slides supplement discussions.

170B. Classic Travel Accounts of Latin America since 1735. Recommended for prospective researchers before they select their region of study. Introduction to “enlightened traveler” accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupa- tions, dress, food, architecture, and transportation in the 20 countries of the area.

170C. Issues in Latin America History. Examination of major issues in history of Latin America. P/NP or letter grading.

171. Mexican Revolution since 1910. Examination of concept of “permanent crisis” to describe and explain the structure of “permanent revolution” under “one-party” governments. Analysis of unresolved colo- nial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

172. History of Argentina. History of economic, political, social, and cultural developments that have shaped Argentina from colonial times to the present. Emphasis on 19th-century development of an agro- export economy and 20th-century formation of a mass society.

173. Modern Brazil. Selected topics in political, eco- nomic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and comple- ment lectures.

174. Brazilian Intellectual History, General intellec- tual development of Brazil, with emphasis on those in- prospective movements in which Brazilians attempted to interpret themselves, their nation, and their civiliza- tion.

M175A-175Z. Topics in African History, (Formerly numbered 175A-175Z.) Prerequisite: one prior course in African history at UCLA or consent of instructor. Examination of topics in which unresolved colo- nial application rather than proceeding on a strictly chronological or regional basis:

M175A. Prehistoric Africa — Technological and Cul- tural Traditions. (Formerly numbered 175A.) (Same as Anthropology M11.) Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

M175B. Africa and the Slave Trade. Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, or Inca Ocean worlds. Abolition and the African diaspora.

175C. Africa in the Age of Imperialism. Topics include penetration of precapitalist social formations by cap- ital, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context.

175E. Africa from 1945 to the Present. History of Africa south of the Sahara from end of World War II to the present. Last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation moves- ments, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, experiments in development, apartheid South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957.

176A. History of West Africa. 176A. West Africa from Earliest Times to 1800; 176B. West Africa since 1800.

176B. Social and Economic History of West Africa since 1600. Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, reli- gious condition, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting eco- nomic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s.

178A. History of Eastern Africa. 178A. Cul- tural diversity of Eastern African societies, growth of more complex political systems, and impact of inter- national trade to the later 19th century. 178B. Eco- nomic, social, and political history of Eastern Africa since imposition of colonial rule, with emphasis on underdevelopment and protest.

179A. History of Southern Africa. Attention to social and economic as well as political aspects. P/NP or letter grading. The Origins of the South African peoples and their interactions to 1870. 179B. Since 1870. Interac- tions between inhabitants of southern Africa since 1870.

183A. Culture and Power in Late Imperial China. (Fall Quarter, 1994.) Recommended (but not prerequisite): courses 11A, 11B, or equivalent. Analysis of relations of power and cultural expressions of dominance and resistance in late imperial China (1000 to 1700), with emphasis on interplay of economic forces, ideas, and social and political institutions. Examination of institutions of state, family, school, and city; idioms of folk, elite, democracy, political, legal, and medical discourses of body, personhood, and social identity; love, sexuality, and private life. P/NP or letter grading.

183B. Society and Economy in China since 1500. Recommended (but not prerequisite): course 11B or equivalent. Social-economic change and involu- tion of the late imperial period in comparative per- spective; Western impact and Chinese development and underdevelopment; change and continuity in rev- olutionary China.

183C. History of Women in China, A.D. 1000 to the Present. Topics include women and the family, women in Confucian ideology, women in literary cul- ture, feminist movement, and women and the com- munist revolution. P/NP or letter grading.

184. 20th-Century China. Recommended (but not prerequisite): course 11B or equivalent. Political events in context of perceived changes seen in context of social-economic trends; human agency, structural change, and historical conjectures in the 20th cen- tury.

186. Shinto, Buddhism, and Japanese Folk Reli- gion. Social dimension of various “ways,” great and little: Shinto’s connection with cultural nationalism, Buddhism’s medieval “Return” to Korea in relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and militarism.

188A. Early History of India. Introduction to civiliza- tion and institutions of the Indus Valley culture and history of the South Asian subcontinent from earliest times to founding of the Mughal Empire.

188B-188C. History of British India I, II, 188B. Examination of expansion of British rule, theories and practice of governance, constitution of India as an “oriental despotism,” epistemological projects of the state, and other modes by which the British achieved the conquest of knowledge. 188C. Political economy of imperialism and Britain’s “civilizing mission.” Encounter, especially in terms of race and gender, between the colonized and colonizers and to ques- tions of resistance and nationalism.

189B. Indian Identity in the U.S. and the Dias- aspora. (Not the same as course 189B prior to Fall Quarter 1996.) What is “Indian” about Indians abroad; overseas Indian communities; race, gender, class, and ethnicity in creation of Indian identities; transfor- mations of Hinduism and Islam; popular culture forms; bhangra rap, multicultural films. P/NP or letter grading.

189C. Special Topics in Contemporary Indian His- tory, Treatment of major issues in history of contempo- rary India. P/NP or letter grading.

190A-190B. History of Southeast Asia, 190A. Early History of Southeast Asia, Political and cul- tural history of the peoples of Southeast Asia from earliest times to about 1815. 190B. Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in period of contact and conquest through independence; growth of nationalism, and process of decolonization.

190C. Philippine History, Social, cultural, and politi- cal history of Philippine societies from the Spanish conquest through independence. Emphasis on ques- tions of identity under colonialism, understanding the Revolutions of 1896 and 1898, and politics of Philip- pine nationalist discourse. Readings include introduc- tion to major issues in Philippine historiography and literature. P/NP or letter grading.

M191C-M191D. Focal Themes in Jewish History. (Same as Jewish Studies M191C-M191D.) Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through time.

191G. European Jewry from 1881 to the Present. Survey of major social, economic, and political factors that shaped the development of Europe's Jewish community from the outbreak of the First World War to the present. Emphasis on the diverse Jewish communities of interwar Europe, fate of Jews under the Nazis, and character of the postwar Jewish community. P/N or letter grading.

197A-197Z. Undergraduate Seminars. Seminar, three hours. (Enrollment limited; to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of offerings each term are available in undergraduate counsel's office (6248 Bunche Hall). May be repeated once for credit. When concurrently scheduled with courses 201A-201U or M203A-M203B, undergraduates must obtain consent of instructor to enroll.

199. Special Studies in History. Intensive directed research program. Eight units may be applied toward major requirements.

199A. Directed Study for Honors. Discussion, three hours. Limited to history honors program majors. Must be taken in Spring Quarter of junior year. Seminar on historical research and writing; student meetings with honors advisor to define research and preparation for the project. Extensive reading and research in field of proposed honors thesis.

199HB. Directed Study for Honors. Prerequisite: course 199HA. Must be taken in Fall Quarter of senior year. Independent study and research on honors project under supervision of honors advisor, with presentation of research and thesis outline to the thesis adviser and second reader at end of quarter. Both must approve continuation of honors thesis project. In Progress grading (credit to be given only on completion of course 199HC). Only students approved for course 199HC receive credit for this course.

199HC. Directed Study for Honors. Discussion, three hours. Prerequisite: course 199HB. Must be taken in Winter Quarter of senior year. Preparation of final version of honors thesis and presentation of portions of work-in-progress to other students engaged in honors projects. Completed thesis must be submitted to thesis committee by last day of class in Winter Quarter.

199I. Independent Studies for Internships. Prerequisite: maintenance of 3.0 grade-point average in the major. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 199 or 199A. Normally, only four units of internship with History Department are allowed P/N grading.

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and to appropriate language qualifications. For multiliterm courses, credit and grades are given only on completion of the full seminar sequence, with In Progress grading until the last term unless otherwise noted. Topics courses and seminars may be repeated.

M200V. Advanced Historiography: Afro-American. (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

M200W. Advanced Historiography: American Indian Peoples. (Same as American Indian Studies M200A.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

200Y. Advanced Historiography: Application of Economics to History. Discussion, three hours.

200Z. Advanced Historiography: Chicano. Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new meth- odological and theoretical approaches in the field.

201A-201U. Topics in History. Seminar, three hours. Topic titles are same as for courses 200A-200U. Gradu- ate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor.

202A-202B. Seminars: Comparative Modern Eco- nomic History. Discussion, three hours. Prerequisite: graduate standing. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress grading.

M203A-M203B. Social Theory and Comparative History. (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sen- sitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

M203C. Topics in Cultural History. (Same as Sociology M296C.) Discussion, three hours. Introduc- tion to social, linguistic, semiotic, or other new interpre- tive theories and practices developed in other fields and applied to historical material.

204A-204B. Seminars: Near and Middle Eastern History. Seminar, three hours. Methodology, socio- economic and political change in the Arab world.

205A-205B. Seminars: Medieval Middle Eastern History. Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

C212. Methods in Armenian Oral History. Seminar, three hours. Prerequisite: proficiency in Armenian language. Lectures and laboratory in methods of tak- ing, processing, and utilizing depositions and other oral sources for the study of history; offering project assignment in the field. May be concurrently sched- uled with course C112D.

214. Problems in World History. 400 to 1800. Seminar, three hours. Three-hour training course for graduate students to develop a field of world history and to pre- pare department teaching assistants to teach sec- tions for the general education sequence in world his- tory by helping them to prepare courses and daily workings of world societies to date.

216A-216B. Seminars: Byzantine History. Seminar, three hours.

217. Sources and Handbooks of Medieval History. Seminar, three hours. Prerequisite: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

218. Medieval Latin Literary History. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. Examination of aspects of medieval history through study of paleography, medieval libraries, and transmission of ancient medieval and Renaissance literature with emphasis on dating and localization as well as on proficiency in reading.

219A-219B. Paleography I, II. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading.

220A-220B. Seminars: Church and Monarchy in the Middle Ages. Seminar, three hours. Textual studies of selected problems in constitutional, legal, and intellectual history of the Latin church and of Western European monarchies, with special attention to the German monarchy, from the 11th to the 14th century.

221A-221B. Seminars: Medieval History. Seminar, three hours.

222A-222B. Seminars: Medieval Intellectual History and History of Science. Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.

225. Colloquium for Entering Graduate Students in Modern European History. Seminar, three hours. Normally limited to and required of all Modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

227A-227B. Seminars: Reformation. Seminar, three hours.

229A-229B. Seminars: Early Modern European History. Seminar, three hours.

231A-231B. Seminars: Modern European Intellectual and Cultural History. Seminar, three hours.

233A-233B. Seminars: Russian/Soviet History. Seminar, three hours.

234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. Seminar, three hours.

235A-235B. Economic History of Europe, 1780 to 1870. Lecture, three hours. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy.

M236A. Proseminar: Political Psychology. (Same as Political Science M261A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and the decision-making process.

236B-236C. Seminars: Psychohistory. Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research.

238A-239B. Seminars: English History — Middle Ages. Seminar, three hours.

240A-240B. Seminars: English History — Modern History. Seminar, three hours.

241A-241B. Seminars: German History. Seminar, three to four hours. Prerequisite: graduate standing. In Progress grading.

242. Colloquium: European History (2 units). Designed for graduate students. Forum for critical discussion of work of students and invited scholars. Presentation of student dissertation prospectuses during their third or fourth year in residence. SU grading for students presenting papers.

244A-244B. Seminars: British Empire History. Seminar, three hours.

245. Colloquium: U.S. History. Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

246A-246B-246C. Introduction to U.S. History. Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. 246A. Colonial Period: 1790 to 1900. 246B. 20th Century. 246C. In Progress grading.

249A-249B. Seminars: Jacksonian America. Seminar, three hours.

252A-252B. Seminars: Recent U.S. History to 1930. Seminar, three hours.

253A-253B. Seminars: Recent U.S. History since 1930. Seminar, three hours.

254A-254B. Seminars: U.S. Social and/or Intellectual History. Seminar, three hours.

256A-256B. Seminars: American Diplomatic History. Seminar, three hours.

258A. Colloquium: U.S. History / 343. Seminar, three hours.

258B-258C. Seminars: Working Class History. Seminar, three hours.

259A-259B. Seminars: Social History of Women in the U.S. Seminar, three hours.

M260C. Native American Revitalization Movements. (Same as Anthropology M238.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

M260D. Native American Historical Demography. (Same as Anthropology M287.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence.

261A-261B. Seminars: Afro-American History. Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white.

262A-262B. Seminars: Chinese History. Seminar, three hours.

263A-263B. Seminars: History of the American West. Seminar, three hours.

M264. History of American Education. (Same as Education M212.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

M265. Latin American Research Resources. (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research resources.

266A-266B. Seminars: Colonial Latin American History. Seminar, three hours.

267A-267B. Seminars: Latin American History, 19th and 20th Centuries. Seminar, three hours.

M268A-M268B. Seminars: Recent Latin American History. (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading.

275. Introduction to Professional Study of African History. Seminar, three hours. Required of all entering graduate students in African history. Strongly recommended for students with a history concentration in African Area Studies M.A. program. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching.

276. African Archaeology: Field Techniques (2 units). Seminar, three hours. Prerequisites: any introductory course in archaeology and preferably an African history course. Field course on an African excavation to provide basic skills-reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with introduction to ethnographic survey and oral data collection.

277. African Archaeology: Data Analysis (2 units). Seminar, three hours. Prerequisite or corequisite: course 276. Field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of actual archaeological and/or ethnographic collection.

278A-278B. Seminars: African History. Seminar, three hours.

M281. China — Seminar: Classical Historiography and Readings in Classical Studies. (Same as Chinese M201.) Discussion, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents.

282A-282B. Seminars: Chinese History. Seminar, three hours.

288A-288B. Seminars: South Asia. Seminar, three hours.

289A-289B. Seminars: Southeast Asia. Seminar, three hours.

291A-291B. Seminars: Jewish History. Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period.

293A-293B. Seminars: History of Religions. Seminar, three hours.

295. Theories of Scientific Change. Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Lakatos, Holton, Buchdahl, Feyereisen, and others.

297A-297B. Seminars: History of Science. Seminar, three hours.

M298. Interdisciplinary Studies in the 17th and 18th Centuries. (Same as English M298.) Topics vary according to participating faculty.
M299. Interdisciplinary American Studies (6 units). (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Writing Workshop for Graduate Students (2 units). Prerequisite: consent of instructor. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.

405. Teaching History. Prerequisite: graduate standing. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

505. Directed Studies (1 to 8 units). Prerequisites: graduate standing, consent of instructor. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

559. Ph.D. Research and Writing (1 to 8 units). Prerequisite: advancement to Ph.D. candidacy.

Donald A. Preziosi, Ph.D., Chair

Professors

Donald A. Preziosi, Ph.D. (Art History)  
Ronald J. Mellor, Ph.D. (History)  
Debora L. Silverman, Ph.D. (History)  
Anthony Vidler, Dipl.Arch. (Art History)

Associate Professor

Irene A. Bierman, Ph.D. (Art History)

**Scope and Objectives**

The interdisciplinary major in history/art history allows students to study the relationship between art history and the history of society, politics, and culture.

**Undergraduate Study**

**Bachelor of Arts Degree**

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.

No course for the major may be taken on a P/NP grading basis.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the history/art history counselor at (310) 825-3480.

**Preparation for the Major**

**Required:** History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

**The Major**

**Required:** History 99, 100A, or 100B; 197 or 199; and courses as indicated in the following groups:

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 127, 197, 199 to meet this requirement.

**Honors Program**

The honors program is designed for history/art history majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior history/art history majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and (3) complete Art History 195A-195B with a grade of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and (3) complete Art History 195A-195B with a grade of A.

**HONORS COLLEGIUM**

Box 951414  
Los Angeles, CA 90095-1414  
(310) 825-1553  
http://www.college.ucla.edu/up/

**Scope and Objectives**

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen and continuing students who have satisfied the Subject A/English 2 requirement may enroll in specially designed Honors Collegium courses with an interdisciplinary emphasis. The collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. And it seeks to promote scholarly exchange across the major disciplines in the University.
Undergraduate Study

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of guest lecturers, and by additional specialists in their fields. Many courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly interdisciplinary seminars, and the curriculum varies each year. Refer to the Schedule of Classes for current course listings. An Honors Collegium brochure, which gives detailed course descriptions, is available from the program office.

**Associate Professors**

Ali Behdad, Ph.D. (English, Comparative Literature)  
Lucia Re, Ph.D. (Italian, Comparative Literature)  
Lyman Page, Ph.D. (Modern European Languages and Literatures)

**Assistant Professor**

Shu-mei Shih, Ph.D. (Chinese, Comparative Literature)

**Scope and Objectives**

The following courses are made up of selected masterpieces of world literature and satisfy the humanities general education requirement in the College of Letters and Science. See Comparative Literature earlier in this section of the catalog for the upper division and graduate course offerings.

**Humanities**

**Lower Division Courses**

1A. World Literature: Antiquity to Early Middle Ages. Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Iliad or Odyssey, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as Gilgamesh or Tristan and Isolde.

1B. World Literature: Late Middle Ages to the 17th Century. Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's Canterbury Tales, Dante's Divine Comedy, Boccaccio's Decameron, Cervantes' Don Quixote, Shakespeare, Calderón, Molière, and Racine.

1C. World Literature: Age of Enlightenment to the 20th Century. Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens.

1D. Great Books from the World at Large. Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Eastern Mediterranean literature. P/NP or letter grading.

2A. Survey of Literature: Antiquity to Early Middle Ages (5 units). Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Iliad, Gilgamesh, Greek tragedies, Aeneid, Petronius, St. Augustine, or Tristan and Isolde. P/NP or letter grading.

2B. Survey of Literature: Late Middle Ages to the 17th Century (5 units). Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's Divine Comedy, Cervantes' Don Quixote, Shakespeare, Calderón, Molière, and Racine. P/NP or letter grading.

2C. Survey of Literature: Age of Enlightenment to the 20th Century (5 units). Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens. P/NP or letter grading.

2D. Survey of Literature: Great Books from the World at Large. Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

Hanns-Peter Schmidt, Ph.D. (Near Eastern Languages and Cultures)  
Terence H. Wilbur, Ph.D. (Germanic Languages)

**Associate Professor**

Brent H. Vine, Ph.D. (Classics)

**Assistant Professor**

Christopher M. Stevens, Ph.D. (Germanic Languages)

**Scope and Objectives**

The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.
Doctoral Degree

Admission

In order to be admitted to graduate status, applicants must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required. Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program.

Admission to the program itself constitutes admission to the doctoral program; there is no master’s degree offered. Should deficiencies exist in prerequisites to specific work at the graduate level, applicants may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines

The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

Course Requirements

The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including the introductory courses Indo-European Studies M150 and 210), mythology (e.g., Classics 168), and archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

Linguistics. An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different sub-branches, and additional units in courses offered by the Linguistics Department (e.g., phonetics, structural linguistics) and related departments. These additional units should be chosen in consultation with the advisor.

Indo-Iranian or Other Specialized Language Area. An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different sub-branches, and additional units in the area of specialization, to be chosen in consultation with the advisor.

European and Related Archaeology. A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthro- pology, and related fields, to be chosen in consultation with your advisor.

Written and Oral Qualifying Examinations

When the required course work is completed and prior to advancement to candidacy, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and di- agnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe the student’s grasp of the entire field. Should the student fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination.

Indo-European Studies

Upper Division Courses

131. European Archaeology: Proto-Civilizations of Europe. Survey of European cultures from beginning of the food-producing economy in the 7th millennium B.C. to beginning of the Bronze Age in the 3rd millennium B.C.

132. European Archaeology: Bronze Age. Prerequisite: course 131 or consent of instructor. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

M150. Introduction to Indo-European Linguistics. (Same as Linguistics M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

199. Special Studies (2 to 8 units).

Graduate Courses

250A-250B. European Archaeology. Prerequisite: consent of instructor. Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

596. Directed Individual Studies (2 to 8 units).

597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Zvi Shiller, Ph.D. (Mechanical and Aerospace Engineering)  

**Scope and Objectives**

The Integrated Manufacturing Engineering (IME) Program is an interdepartmental program based in the Mechanical and Aerospace Engineering Department. The main purpose is to educate future manufacturing engineers. The curriculum is centered around an integrated approach to product development, while clean environment, agility, and cost-effectiveness are emphasized. Instruction is computer-aided, and teaching/learning laboratories are used to provide students with hands-on experience in advanced manufacturing technologies such as rapid prototyping, robotics, automated material handling, new manufacturing processes, and production planning and scheduling. Team teaching is employed to offer a balanced understanding of principles and methods required.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

**Master’s Degree**

**Admission**

The Master of Engineering in Integrated Manufacturing Engineering is an interdepartmental program among the Departments of Electrical Engineering, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Engineering program in Integrated Manufacturing are required to take the General Test of the Graduate Record Examination (GRE). Applicants may be admitted to the program through any one of the three departments listed above.

More information may be obtained by contacting the program coordinator at 38-137 Engineering IV, (310) 206-1840.

**Areas of Study**

Consult the department.

**Course Requirements**

A total of 12 courses are required, including six 400-level core courses (Electrical Engineering 475C, Materials Science and Engineering 474A, 475A, Mechanical and Aerospace Engineering 474B, 474C, 475B), three electives (to be chosen in consultation with the student's faculty adviser), and three seminar courses (three quarters of Mechanical and Aerospace Engineering 476, the Integrated Manufacturing seminar series), which total 39 units.

**Comprehensive Examination Plan**

Group Project. Each student must participate in a group project through enrollment in Mechanical and Aerospace Engineering 478 for a total of 11 units. The group size is approximately three students.

**Thesis Plan**

None.

**Scope and Objectives**

The undergraduate international development studies major aims to provide a liberal education in relation to the critical issues, experiences, and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international
development in academia, public or private agencies, or nonprofit organizations.

**Undergraduate Study**

**Bachelor of Arts Degree**

**Preparation for the Major**

No specific courses are required as preparation for the major, but students should have some beginning experience in the social sciences at the college level and be in good academic standing.

**The Major**

*Required:* Fifty-six units of upper division courses (including International Development Studies 100A-M100B and Economics 110 or 111), taken for a letter grade, and the foreign language requirement. (For the quantitative methods requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the faculty adviser. The major consists of six parts (courses marked with an asterisk have requisites):

1. International Development Studies 100A-M100B.
2. Economics *110 or *111.
6. Twenty-four quarter units in one modern foreign language or the equivalent in transfer units. Students may also take a proficiency examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to program faculty).

**Honsors Program**

Majors who have completed International Development Studies 100A-M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 195A-195B-195C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

**International Development Studies**

**Upper Division Courses**

100A-M100B. Introduction to Development Studies. (Formerly numbered Development Studies 100A-M100B.) Seminar, three hours. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. 100A. Economic Development and Culture Change. (Formerly numbered M100A.) Prerequisites: Anthropology 9, some beginning experience in social sciences at college level. 100B. Political Economy of Development. (Same as Political Science M197G and Sociology M180.) Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

195A-195B-195C. Directed Studies for Honors. (Formerly numbered Development Studies 195A-195B-195C.) Prerequisites: courses 100A-M100B, 3.5 GPA in courses offered for the major, formal application to honors program, consent of instructor. 195A. Research, discussion, and planning of honors thesis. 195B-195C. Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

**International Relations**

**College of Letters and Science**

**UCLA**

4256 Bunche Hall

Box 951472

Los Angeles, CA 90095-1472

(310) 825-3862

http://www.sscnet.ucla.edu/polisci/

**Scope and Objectives**

The undergraduate specialization in international relations can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in international relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers in business, law, journalism, or library service with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

**Undergraduate Study**

**International Relations Specialization**

**Preparation for the Specialization**

*Required:* Political Science 20, 50, and two courses from 10, 30, 40; Anthropology 9 or 60; Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A-1B-1C or any three courses from 5A, 5B, 8A, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B; Sociology 1 or 31.

**Upper Division Requirements**

The political science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I or III.

Other required social sciences courses include one course from Anthropology 161, M162P, 165, 167, 171, 173Q, 174P, 174Q, 175R, 175T, 175U, 177, Sociology 182, 183, 186, 187, 188, 189, 190; two courses from Economics 110, 111, 112, 180, 181A, 181B, 182, 190, 191, 192; one course from Geography 110, 121, 125, M128, 133, 140, 181, 182A, 182B, 183,

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under African Languages, East Asian Languages and Cultures, Germanic Languages, Italian, Near Eastern Languages and Cultures, and Portuguese. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

Area Focus
Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia.

For further information, contact the political science undergraduate counselor in the program office.

Scope and Objectives
The undergraduate major in this discipline is called Near Eastern studies. For details, see the program by that name later in this section.

The designation of the interdepartmental degree program in Islamic studies is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an “idealized” and a “functional” or “practical” Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gradnet.ucla.edu.

Master’s Degree
Admission
In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or in a related field with an emphasis on the Near East is required. The application deadline is March 1. Applicants are normally expected to have completed the equivalent of Arabic 102A-102B-102C, Iranian 102A-102B-102C, or Turkic Languages 101A-101B-101C at the time of application. In addition, applicants should have completed the equivalent of two years of Near Eastern history (classical and modern); some coursework in Islamic culture and institutions may be applied toward the history requirement. Should there be any deficiencies in these prerequisites, the requirements must be satisfied by taking the appropriate courses without credit toward the advanced degree.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is necessary.

A score of 560 on the Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English and who have not attended English-speaking universities.

No special application form is required in addition to the UCLA Application for Graduate Admission.

M.A. Islamic Studies/M.P.H.
The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

Areas of Study
Anthropology, Arabic, economics, geography, history, Islamic art history and architecture, music, Persian, political science, sociology, and Turkish.

Course Requirements
A minimum of nine courses is required, five of which must be at the graduate level. Students must take no fewer than four courses on the appropriate level in one Near Eastern language of their choice. Additionally, students must take no fewer than five relevant upper division and graduate-level courses selected from two of the major fields and subdisciplines listed above. The omission of history as one of the fields is approved only in exceptional cases. Eight units of 500-series courses may be applied toward the minimum graduate course requirement and toward the total course requirement, provided the courses are not in the same discipline.

Comprehensive Examination Plan
Four written examinations in the following areas must be passed: (1) any Near Eastern language; (2) the literature of the chosen language; (3) the history of the Near East; and (4) one of the other nonlanguage major fields or subdisciplines listed above. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the Interdepart-
Thesis Plan
None.

Doctoral Degree

Admission
Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Students entering the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are expected to show proficiency in a second Near Eastern language, one of which must be Arabic. Students who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applications. No special application form is required in addition to the UCLA Application for Graduate Admission.

Major Fields or Subdisciplines
Anthropology, Arabic, art history, economics, geography, history, music, Persian, political science, Turkish.

Course Requirements
For students entering directly into the Ph.D. program, course requirements are the same for the M.A. Beyond this, advanced courses in two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree program, are taken.

Written and Oral Qualifying Examinations
Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one of the other nonlanguage major fields or subdisciplines listed above. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, and propositions are not permitted as alternatives to the written qualifying examinations.

Course List

Anthropology
130. Study of Culture
150. Study of Social Systems
M154P. Gender Systems: North American
M154Q. Gender Systems: Global
156. Comparative Religion
161. Development Anthropology
167. Urban Anthropology
215. Field Training in Archaeology
230P. Ethnology
230Q. Theories of Culture
232Q. Myth and Ritual
273. Cultures of the Middle East

Arabic (Near Eastern Languages)
102A-102B-102C. Intermediate Literary Arabic
111A-111B-111C. Elementary Spoken Egyptian Arabic
112A-112B-112C. Advanced Spoken Egyptian Arabic
113A-113B-113C. Elementary Spoken Levantine Arabic
114A-114B-114C. Spoken Moroccan Arabic
120. Islamic Texts
130. Classical Arabic Texts
132. Philosophical and Kalam Texts
141. Modern Arabic Literature
150. Introduction to Arabic Literature and Culture
199. Special Studies in Arabic
220. Seminar: Islamic Texts
230. Medieval Literary Texts
240. Seminar: Arab Historians and Geographers
250. Seminar: Arabic Literature
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Archaeology
259. Fieldwork in Archaeology
596. Individual Studies for Graduate Students
597. Preparation for Ph.D. Qualifying Examinations

Armenian (Near Eastern Languages)
130A-130B. Elementary Classical Armenian
131A-131B. Intermediate Classical Armenian
132A-132B. Advanced Classical Armenian
210. History of the Armenian Language
220. Armenian Literature of the Golden Age (A.D. 5th Century)

Art History
104A. Western Islamic Art
104B. Eastern Islamic Art
C104C. Problems in Islamic Art
105E. Byzantine Art
213. Advanced Studies in Islamic Art
C214. Problems in Islamic Art

Berber (Near Eastern Languages)
101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
199. Special Studies in Berber Languages

Classics
M170. Power and Imagination in Byzantium

Etnomusicology
147. Survey of Classical Music in India
240. Music of Arabic-Speaking Near East
241. Music of Iran and Other Non-Arabic-Speaking Communities
248A-248B. Classical Music of India

French
121A. Contemporary Francophone Literature: French-African Literature
257A-257B. Studies in French-African Literature

Geography
187. Middle East
188. Northern Africa
287. Middle East
288. Northern Africa

Greek (Classics)
231A-231B-231C. Seminars: Later Greek and Byzantine Literature

Hebrew (Near Eastern Languages)
230. Seminar: Medieval Hebrew Literature
231. Texts in Judeo-Arabic

History
106A-106B-106C. Survey of the Middle East from 500 to the Present
107A-107B. Islamic Civilization
108A-108B. History of the Arabs
109A-109B. History of North Africa from the Moslem Conquest
110A-110B. Iranian History
111A-111B. History of the Turks
114. Topics in Middle Eastern History
123A-123B. Byzantine History
188B-188C. History of British India I, II
190A-190B. History of Southeast Asia
204A-204B. Seminars: Near and Middle Eastern History
205A-205B. Seminars: Medieval Middle Eastern History
206A-206B. Seminars: Social History of the Middle East
209A-209B. Seminars: Ottoman and Modern Turkish History
216A-216B. Seminars: Byzantine History
596. Directed Studies
597. Directed Studies for Graduate Examinations
599. Ph.D. Research and Writing

Iranian (Near Eastern Languages)
102A-102B-102C. Intermediate Persian
103A-103B-103C. Advanced Persian
140. Contemporary Persian Belles Lettres
141. Contemporary Persian Analytical Prose
150A-150B. Survey of Persian Literature in English
169. Civilization of Pre-Islamic Iran
170. Religion in Ancient Iran
190A-190B. Introduction to Modern Iranian Studies
199. Special Studies in Iranian
220A-220B. Classical Persian Texts
221. Rumi, Mystic Poet of Islam
250. Seminar: Classical Persian Literature
251. Seminar: Contemporary Persian Literature
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Islamics (Near Eastern Languages)
110. Introduction to Islam
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Linguistics
220. Linguistic Areas
225. Linguistic Structures

Near Eastern Languages
200. Bibliography and Method of Near Eastern Languages and Literatures
210. Survey of Afro-Asiatic Languages
M241. Folklore and Mythology of the Near East
290. Seminar: Paleography
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Philosophy
104. Topics in Islamic Philosophy
Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

Undergraduate Study

Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B.

The Major

Required: Twelve upper division Italian courses, including one course from 102A, 102B, 102C; one course from 113 through 116B; one course from 118 through 122; 190; and eight courses (at least 32 units) from 103A through 197 selected in consultation with the undergraduate adviser. One course from another humanities or social sciences department, selected in consultation with the undergraduate adviser, is also required. Recommended courses include Art History 106A, 106B, 106C, Comparative Literature C161, C167, History 125A, 125E, 125F, 132A, 132B, Humanities 1A through 1D.

 Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

Study in Italy

Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advantage of summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on Casa Italiana, contact the department or the Summer Sessions Office, 1147 Murphy Hall.

Honors Program

 Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requisites: Italian 102A-102B-102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A−. Applications should be made during the last term of the junior year.

Bachelor of Arts in Italian and Special Fields

Students with particular interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

 Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

Anthropology Field

Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and one elective from 33, 34, 60, 60P.

The Major

 Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; five courses from Anthropology 110, 111, 112, M115A, M115B, C115R, 118A, 118B, 130, 132, 133Q, 135A, 135B, 135C, 135S, 135T, 138, 139, 139L, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

Art History Field

Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Art History 50 or 51, 54, 57.

The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser: six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, 109A, 109C, 110A, 110B,
110D, 110F. 127 selected in consultation with the undergraduate adviser.

**Classics Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40 or 41, and Greek 1, 2, 3 and/or Latin 1, 2, 3, or equivalent.

**The Major**

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197 (except 195), and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

**Design Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Design 21, 22, 23, 32B, and one course from 32C, 35A, 35B.

**The Major**

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; three courses from Design 101 through 197 selected in consultation with the undergraduate adviser.

**English Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; English 3, 4, 10A, 10B, 10C.

**The Major**

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; four courses from English 100, 101 through 119, 121, 140A through M197A selected in consultation with the undergraduate adviser.

**Film and Television Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, 46.

**The Major**

Italian 102A or 102B or 102C, 195, and six courses from 103A through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

**French Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, French 1, 2, 3, 4, 5, 6, 12 or 14.

**The Major**

Italian 102A or 102B or 102C, 195, and three courses from 103A through 197 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115A through 142 selected in consultation with the undergraduate adviser.

**History Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; one course from History 1A, 1B, 1C, 88B through 88E, 88Q, 88U.

**The Major**

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; six courses from History 100A through 102, 119 through 121D, 125A through 127B, 132A, 132B, 135A through 137C selected in consultation with the undergraduate adviser.

**Linguistics Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

**The Major**

Italian 102A or 102B or 102C, 195, and one course from 103A through 197 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

**Musicology Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, Musicology 1A-1B or 1A-2A, 12A-26B-26C. *Recommended: Music 20A, 20B, 20C.*

**The Major**

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; five courses from Musicology 126A through C127F, 135A, 135B, 135C, 156 selected in consultation with the undergraduate adviser.

**Philosophy Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

**The Major**

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 189 selected in consultation with the undergraduate adviser.

**Political Science Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B, Political Science 10, 20.

**The Major**

Italian 102A or 102B or 102C, 195, and four courses from 113 through 122, M158, 190 selected in consultation with the undergraduate adviser; six courses from Political Science 111A through 113, 115 through 119Z, 137A, 137B, 139A through 139Z, 153A, 155, 167A selected in consultation with the undergraduate adviser.

**Portuguese Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

**The Major**

Italian 102A or 102B or 102C, 195, and four courses from 113 through 122, M158, 190 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 197 selected in consultation with the undergraduate adviser.

**Spanish Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

**The Major**

Italian 102A or 102B or 102C, 195, and three courses from 103A through 197 selected in consultation with the undergraduate adviser; one course from Spanish 120A, 120B and three courses from 122 through M161 selected in consultation with the undergraduate adviser.

**Theater Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B.

**The Major**

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 (122 is recommended) selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, 111B, 111C, Classics 143, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

**Women’s Studies Field**

**Preparation for the Major**

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Women’s Studies 10.
undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnnet.ucla.edu.

Master's Degree
Admission
Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

Areas of Study
The Master of Arts degree is available with specializations in Italian literature and Italian language.

Course Requirements

**Italian Literature Specialization.** (1) For the comprehensive examination plan, 12 courses are required, including Italian 205A, 205B, and 222A. The other nine courses must be distributed in three main literary periods: Middle Ages, Renaissance, modern (at least two courses in each period). Three of these may be upper division undergraduate courses if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended. (2) For the thesis plan, 12 courses are required, including Italian 205A, 205B, and 222A. At least nine courses must be in the 200 series.

**Italian Language Specialization.** Prerequisites: a general grasp of linguistics equivalent to Linguistics 20 and 110, and a broad familiarity with Italian literary and cultural history. (1) For the comprehensive examination plan, 12 courses are required, including Italian 222A-222B-222C and Linguistics 202 or equivalent. At least nine courses must be in the 200 series. (2) For the thesis plan, 12 courses are required, including Italian 222A-222B-222C and Linguistics 202 or equivalent. At least nine courses must be in the 200 series. No 500-series courses may be applied toward the M.A. course requirements.

Comprehensive Examination Plan
In general, the department favors the comprehensive examination plan, which consists of a minimum five-hour written examination to be given before the final examination period in the Fall and Spring Quarters. Alternatively, a student may petition to substitute a master's thesis in lieu of the examination, although this option is not encouraged. The examination tests the student's general competency and does not have major and minor fields of emphasis. After the written examination, an oral examination must be taken. In case of failure, the student may be reexamined once, subject to approval by the examination committee and the chair of the department.

**Thesis Plan**
This plan is recommended for research-oriented students of exceptional merit. Students who have completed the first year of graduate work with at least a 3.7 grade-point average may be nominated by one of the faculty members of the department for application to the thesis plan. If the nomination is accepted by the faculty, a three-member thesis committee is submitted to the Graduate Division for appointment.

At this point the student must have completed Italian 205A, 205B and at least two other graduate courses in Italian. On acceptance, the guidance committee helps the student choose six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the sixth quarter of graduate work. After completion of the thesis, an oral examination must be passed testing knowledge in the field of the thesis and general competence in Italian literature.

Doctoral Degree
Admission
Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian.

Prerequisite for entering the department's doctoral program is an M.A. in Italian Literature from UCLA or its equivalent from another university in the U.S. Students who have a master's degree in Italian Literature or its equivalent from another institution are required to pass Part I of the Ph.D. qualifying examinations by the end of the third quarter in residence. Students should expect to take Part II of the examinations after approximately six quarters.

Students holding the M.A. from UCLA normally take Part II of the qualifying examinations at the end of the sixth quarter in residence.

Major Fields or Subdisciplines
Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern areas comprise the major fields, while two centuries of Italian literature from any of the areas mentioned above make up the minor fields.

A major in a literary genre or a minor outside the department may be chosen, provided that it relates to the student's major field of specialization. This field must have the approval of the entire department.

Course Requirements
In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. Students also must take such courses as their guidance committee prescribes for the qualifying examinations (such as courses 596 or 597). All courses from Italian 201 on, except for 205A and 205B, may be applied toward the Ph.D. degree.

Written and Oral Qualifying Examinations
The comprehensive examination for the M.A. in Italian at UCLA corresponds to Part I of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (Part II), which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: an eight-hour examination in the student's major field and a six-hour examination in the minor field. Additionally, a two-hour University Oral Qualifying Examination is required. A summary of requirements entitled Regulations for the Ph.D. Examination is available in the department. In case of failure, the student may be reexamined on unanimous approval of the guidance committee, at least one academic quarter of additional residence.

Italian
Lower Division Courses
Enrollment in the Italian open language laboratory is required of all students in Italian 1, 2, 2A, and 3.

1. Elementary Italian — Beginning. Lecture, five hours; live laboratory, one hour.
2. Elementary Italian — Accelerated (8 units). Lecture, 10 hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.
3. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.
4. Elementary Italian — Continued. Lecture, five hours; live laboratory. One hour. Enforced requisites: course 1A or 2. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.
5. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

3A. Intermediate Italian — Accelerated (8 units). Lecture, six hours; laboratory, two hours. Enforced requisite: course 2A or 3. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

3B. Intermediate Italian. Lecture, five hours; laboratory, one hour. Enforced requisite: course 3.

3C. Intermediate Italian. Lecture, five hours; laboratory, one hour. Enforced requisite: course 4.

7. Elementary Italian Conversation. Lecture, five hours (first six-week summer session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary.

8A-8B-8C. Italian Conversation (3 units each). Discussion, three hours; outside study, six hours. Intended for students who have taken three to six terms of language instruction and have developed considerable skill in Italian. Designed to further improve students' spoken proficiency through constant exposure and practice of the language. Each course may be repeated once for credit.

42A-42B. Italy through the Ages, in English. Lecture, three hours; discussion, one hour; outside study, eight hours. P/NP or letter grading. 42A. Holy Roman Empire to Saqq of Rome. Survey of Italy's unique contribution to Western civilization in history, literature, painting, and politics from time of Charlemagne to High Renaissance. 42B. Late Renaissance to Postmodern Period. Baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, Communism, terrorism, neorealist cinema, and "moral revolution" of the 1980s and 1990s.

46. Italian Cinema and Culture. Lecture, two hours; discussion, one hour; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1900s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation's filmmakers and writers.

50A-50B. Masterpieces of Italian Literature in English. Lecture, three hours; outside study, nine hours. P/NP or letter grading. 50A. Middle Ages and Renaissance. Philosophical, religious, and sociopolitical issues examined in authors such as St. Francis, Guinizzelli, Cavalcanti, Dante, Boccaccio, Petrarch, Poliziano, Lorenzo de' Medici, Machiavelli, Castiglione, and Ariosto. 50B. Baroque Period to the Present. Close reading of major works selected from such writers as Tasso, Bruno, Campanella, Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, and Pirandello.

Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

100. Composition and Style. (Formerly numbered 130.) Lecture, three hours; outside study, nine hours. Requisite: course 25. Development of writing techniques and proficiency in composition and style, with emphasis on editing for grammar and style. P/NP or letter grading.

102A-102B-102C. Italian Cultural Experience, in English. Lecture, three hours; outside study, nine hours. Study of cultural development of Italy. P/NP or letter grading. 102A. Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio, Giotto, rise of Italian merchant class. 102B. Renaissance discovery of human genius; crucial period between Machiavelli and Galileo, leading Italy and Europe to scientific revolution. 102C. Birth of Italian nation from wars of independence to foundation of modern republic, delineated through narrative and cinema in historical context.

103A-103B-103C. Introduction to Italian Literature and Literary Analysis. (Formerly numbered 200A-200B-200C.) Lecture, three hours; outside study, nine hours. Requisite: course 100. Italian literature from 1150 to the present, with emphasis on methods of interpreting literary form and meaning in poetry, drama, epic, and novel. P/NP or letter grading.

103A. Knights, Saints, and Lovers. Beginning with generation dominated by St. Francis, love poets of court of Frederick II to three classic writers of Italian literature: Dante, Petrarch, and Boccaccio. Renaissance discovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Casiglione.

103C. Romance, Politics, and Disillusionment. Great poetry and dialogues of Giacomo Leopardi; patriotic literature accompanying rise of modern Italian state; futurism, surrealism, neorealism, and postmodernism. Authors may include Foscolo, Manzoni, Verga, Pirandello, Calvino, and Dario Fo.

110. Dante, in English. (Formerly numbered 110A-110B.) Lecture, three hours; outside study, nine hours. Close study of one of world's greatest literary geniuses, particularly of his masterpiece, Divine Comedy; the archetypal medieval journey through the afterworld. P/NP or letter grading.

113. Dante's La Divina Commedia. (Formerly numbered 113A-113B.) Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of medieval philosophy, religion, and politics in La Divina Commedia, greatest literary achievement of the age. P/NP or letter grading.

114A-114B. Middle Ages. Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. 114A. Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, Petrarca, Boccaccio, Ariosto). Caught between courtly and religious codes. 114B. Medieval Humor, Moralism, and Society. Novelty of Boccaccio's witty and comic masterpiece, Decameron, analyzed within context of moral and social codes of culture of the time.

116A-116B. Italian Renaissance. Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. 116A. Renewal of Art and Thought. Study of cultural and psychological changes and representatives in the arts and humanistic thought (i.e., Manteagnia, Botticelli, Pico, Valla, and Ficino). 116B. Power and Imagination in the Renaissance. Study of artistic work of Leonardo, Raphael, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in world molded by powerful political forces, such as the Roman Papacy and Medici, Gonzaga, and D'Este courts.

118. Age of Enlightenment. Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of philosophical and political prose, satiric poetry, and drama, revealing birth of modern spirit through writings of Voltaire, Metastasio, Parini, and Allieri. P/NP or letter grading.

119. Italian Ottocento. Lecture, three hours; outside study, nine hours. Study of the Ottocento, the rich period of Italian history and culture from Romanticism to decadentism when philosophical and political issues affected not only the mind but also the heart. Emergence of unique brand of individualism through poetry and prose writings of Foscolo, Leopardi, Manzoni, Niewerth, and Verga. P/NP or letter grading.

120. Literature in the 20th Century. Lecture, three hours; outside study, nine hours. Requisite: course 100. Analysis of novel, poetry, and drama of the 20th century, in connection with modern thought and culture. Authors may include D'Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.

121. Literature and Film. Lecture, three hours; discussion, one hour; outside study, eight hours. Comparative study of specific literary works and their translation into film and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.

122. Italian Theater. Lecture, three hours; discussion, one hour; outside study, eight hours. Study of dramatic works from the Renaissance to the present and their theatrical presentation. P/NP or letter grading.

131. Reading and Reciting. Lecture, three hours. Prerequisite: consent of instructor based on sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

140. Modern Fiction in Translation. Lecture, three hours; outside study, nine hours. Select issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco's The Name of the Rose, Pasolini's The Maggiori, Pirandello's The Late Mattia Pascal, and Calvino's The Cosmicomics. P/NP or letter grading.

150. Italian Women in Italian Culture. (Same as Women's Studies M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

190. History of the Italian Language. Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

195. Special Fields Research. Limited to senior Italian and special fields majors. Unscheduled tutorial in which paper (to be written in either Italian or English) which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge. P/NP or letter grading.

197. Variable Topics in Italian Studies. Discussion, three hours; outside study, nine hours. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental undergraduate courses.

199. Special Studies (2 to 4 units). Prerequisite: consent of instructor. Course of independent studies for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.
Graduate Courses

201. Bibliography and Methods of Research. Lecture, three hours; outside study, 18 hours. History, theory, and practice of criticism. S/U or letter grading. 205A. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. 205B. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

210. Studies in Early Italian Literature. (Formerly numbered 210A-210B-210C.) Lecture, three hours; outside study, 18 hours. Topics include origins of Italian language and study of early texts, Scuola Siciliana and early poetry of Central and Northern Italy, and Dolce Stil Novo. S/U or letter grading.

214A-214F. Studies in Medieval Literature. (Formerly numbered 214A-214G.) Lecture, three hours; outside study, 18 hours. S/U or letter grading.

214A. La Divina Commedia.
214B. Dante's Other Works.
214C. Petrarca's Canzoniere.
214D. Boccaccio's Decameron.
214E. Boccaccio's Other Works.
214F. Variable Topics. Variable-content seminar on themes and issues of medieval literature, with coverage of authors such as St. Francis of Assisi or Jacopone de Todi.

215A. Machiavelli and Renaissance Political Thought.
215B. Ariosto and Renaissance Epic.
215C. Tasso.
215D. Renaissance Theater.

216E. Variable Topics. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto.

217. Studies in 17th-Century Literature. (Formerly numbered 217A-217B-217C.) Lecture, three hours; outside study, 18 hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Batista Marino, and baroque poetry. S/U or letter grading.

218A-218D. Studies in 18th-Century Literature. (Formerly numbered 218A-218E.) Lecture, three hours; outside study, 18 hours. S/U or letter grading.

218A. Vico.
218B. Affieri.
218C. Goldoni.
218D. Variable Topics. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico.

219A. Foosolo.
219B. Leopardi.
219C. Manzoni.
219D. Variable Topics. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaseo, or Nievo.

220. Studies in Turn-of-the-Century Literature. (Formerly numbered 220A-220B-220C.) Lecture, three hours; outside study, 18 hours. Topics include Verga and Verismo poetry, prose, and theater of D'Annunzio, and poetry of Carducci and Pascoli. S/U or letter grading.

221A-221E. Studies in 20th-Century Literature. Lecture, three hours; outside study, 18 hours. S/U or letter grading.

221A. Variable Topics. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D'Annunzio, Verga, Marinetti, and Pirandello.

221B. Contemporary Poetry. Analysis of legacy of the two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s.

221C. 20th-Century Narrative to World War II. Assessment of turn-of-the-century narrative pattern (Gabriele D'Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernini, Marinetti, etc.

221D. 20th-Century Narrative since World War II. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the neo-avant-garde.

221E. Pirandello and Contemporary Theater. Thor- ough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Strehler, Roncone, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance.

222A-222B-222C. Studies in History of Italian Language. (Formerly numbered 222A-222B-222C.) Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. S/U or letter grading.

222A. History of the Italian Language. Historical sur- vey of development of the language from medieval times to unification of the country (1861). Questions della lingua, general acceptance of Florentine speech, and its evolution into the national language.

222B. Structure of Modern Italian. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects.

222C. Italian Dialectology. Historical differentiation of Italian dialects considered in its areal dimension. Spe- cific geolinguistic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more verti- cally defined.

250A-250D. Seminars: Dante. Seminar, three hours.
251. Seminar: Petrarch. Seminar, three hours.
252. Seminar: Boccaccio. Seminar, three hours.
253A-253B-253C. Seminars: Chivalric Poetry in Italy. Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso.

254. Seminar: Machiavelli. Seminar, three hours.
255A-255B. Seminars: Baroque. Seminar, three hours.
256A-256B. Seminars: 18th Century. Seminar, three hours.
257A-257B. Seminars: Romanticism. Seminar, three hours.
258A-258B. Seminars: Contemporary Italian Liter- ature. Seminar, three hours.

M260A. Alternative Perspectives in Italian Cul- ture: Studies of Folk Tradition in Italian Literature. (Same as Folklore M260.) Lecture, three hours; outside study, 18 hours. Open to undergraduates with consent of instructor. The encompassing diversity ani- mating Italian society articulated through class, gen- der, and ethnonlinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, curses and curses, secular and ritual drama).

260B. Women in Italian Culture. Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

260C. Studies in Italian Cinema. Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. Italian cinema compared with other Euro- pean countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

296. Variable Topics in Italian Studies. Lecture, three hours; discussion, one hour. Prerequisite: grad- uate standing or consent of instructor. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

370. Problems and Methods in Teaching Italian. Lecture, two hours.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervi- sion of a regular faculty member responsible for cur- riculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495D. Teaching Italian at College Level (2 to 4 units each). Prerequisite: consent of instructor.

495A. Techniques in Teaching Italian Literature; 495B. Techniques in Teaching Italian Culture; 495C. Techniques in Teaching Italian Conversation; 495D. Techniques in Teaching Italian Film.

596. Directed Individual Studies (2 to 12 units). May be repeated twice for credit. S/U grading.

599. Ph.D. Research and Writing (2 to 12 units). May be repeated. S/U grading.

Scope and Objectives

The labor and workplace studies undergraduate specialization is intended to coordinate and enrich offerings on the workplace’s connections to the social, political, and economic forces that surround it. Students become acquainted with institutions of the labor market such as public policies, employment practices, and unions. Faculty members from various disciplines are actively engaged in research on some aspect of employee relations, employee organizations, or workplace concerns in the U.S. or other countries. Administration of the program is coordinated through the Institute of Industrial Relations.

Undergraduate Study

Labor and Workplace Studies Specialization

The labor and workplace studies specialization must be taken in conjunction with a major in the social sciences or in psychology. Students with other majors may be admitted by petition.

Upper Division Requirements

Required: Management 150; Political Science 142C or History 155B; three other courses selected from Chicana and Chicano Studies 120, Economics 103C, 150, 151, 152, 181B, 183, Geography 155, History 155A, 155B, Political Science 142C, 169, Psychology M137E, Sociology M163, 171, 173, Women’s Studies M163, 170. All students take a one-term specialization seminar designed for the exchange of disciplinary perspectives and directed research toward the end of the program.

Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (310-794-0385) or Professor Daniel J.B. Mitchell (310-825-2505).

Core II: Social Sciences

Preparation
Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18 or Statistics 50.

Core Area
Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) Core Concentration: Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods: One course from theory and methods.

(3) Internal Breadth: Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth
From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

Approved Undergraduate Courses
Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

(1) Anthropology and Sociology

Anthropology

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.grad.ucla.edu.

**Master’s Degree**

**Admission**
In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission to the Master of Arts program. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

1. Three academic letters of recommendation, unless the applicant has been away from school for some time, in which case one of the letters may be from an employer.
2. A minimum of a 3.0 or B average in the junior/senior years of college.
3. A statement of purpose discussing the applicant’s background in Latin American studies, proposed program of study, and future career plans.
4. A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).
Comprehensive Examination Plan

A minimum of nine courses is required, to be distributed among three fields or disciplines on a 3-3-3 basis or among two fields on a 4-4 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

The examination requirement is fulfilled by the submission of three research papers written for at least two of the three fields included as part of the student’s program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The papers are evaluated by a three-member faculty committee representing the degree candidate’s three fields or both fields if the candidate is doing only two fields. Two positive votes among the three-member faculty examination committee constitutes a pass on the results. The committee evaluates the papers in the following terms: honor pass (a unanimous vote), pass, pass subject to revision of one or more of the research papers, or fail (majority vote). If two of the three members of the committee so request, an oral examination based on the papers may be required. When papers are passed subject to revision, one member of the committee is assigned the responsibility of working with the student on the revision, and determining when the paper has been satisfactorily revised. No reexaminations are permitted. The degree is awarded on a recommendation of the faculty committee. Copies of the papers are filed in the Academic Programs Office of the Latin American Center.

Thesis Plan

A minimum of 10 courses is required, to be distributed on a 4-3-3 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

Although students are generally expected to follow the M.A. comprehensive examination plan, in special cases they may be allowed to follow the M.A. thesis plan. The student must develop a carefully prepared proposal to be approved by the academic coordinator in consultation with the student’s faculty committee chair. To be approved, the proposal must provide sound justification for the thesis plan, including provisions for funding any field research.

Once the thesis plan option has been approved, the student chooses a three-member faculty thesis committee consisting of one professor from each of three disciplines, one of whom has already agreed to serve as chair. The thesis committee works closely with the student in the development, writing, and revision of the thesis and is responsible for reading, evaluating, and approving the drafts and final version of the thesis, ensuring thereby that it meets the University standards of scholarship. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the quarter before graduation, the student must file for advancement to candidacy with the Graduate Division.

Latin American Studies

Lower Division Course

99. Introduction to Latin American Problems. Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses

197. Interdisciplinary Topics in Latin American Studies. Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

199. Special Studies in Latin American Studies (4 or 8 units). Prerequisite: upper division standing. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

Graduate Courses

M200. Latin American Research Resources. (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research specialization as basis for enhanced research results.

205. Latin Americanist Scholarship. Lecture, three hours. Prerequisite: consent of instructor. Panoramic introduction to methods and issues in various disciplines that study Latin American, with guest lecturers from various fields. (Latin American Studies core course.)

M250A. Indians of South America. (Same as Anthropology M272.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

250B. Interdisciplinary Seminar: Latin American Studies. Seminar, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in University’s cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

M268A-M268B. Seminars: Recent Latin American History. (Same as History M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. Ordinarily taken only during term in which student is being examined. S/U grading.

598. Research for and Preparation of M.A. Thesis. Only four units may be applied toward the minimum graduate course requirement. S/U grading.
Course List

Approved Graduate Courses
Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Refer to the Latin American studies undergraduate section for the lists of approved undergraduate courses.

Fine Arts
Art History
*201. Topics in Historiography of Art History
C218A. Pre-Columbian Art of Mexico
C218B. Pre-Columbian Art of the Maya
C218C. Pre-Columbian Art of the Andes
219B. Pre-Columbian Art
220. Oceanic, Pre-Columbian, African, and Native North American Art
C254. Latin American Art in the 20th Century
596. Directed Individual Study or Research

Ethnomusicology
201A. Proseminar: Ethnomusicology
208. Seminar: Latin American Music
*290. Seminar: Ethnomusicology
596. Directed Individual Studies

Film and Television
*298A-298B. Special Studies in Film and Television

Theater
*210. Topics in World Theater and Drama

World Arts and Cultures
*280A-280B. Advanced Studies in Dance Ethnology

Languages
Indigenous Languages of the Americas (Linguistics)
*18A-18B-18C. Elementary Quechua

Portuguese (Spanish and Portuguese)
*1. Elementary Portuguese
2. Elementary Portuguese
3. Intermediate Portuguese
25. Advanced Portuguese
102A-102B. Intensive Portuguese
*105. Advanced Composition and Style

Spanish (Spanish and Portuguese)
*1. Elementary Spanish
*1G. Reading Course for Graduate Students
2. Elementary Spanish
2G. Reading Course for Graduate Students
3. Elementary Spanish
4. Intermediate Spanish
5. Intermediate Spanish
25. Advanced Spanish and Composition
*105. Spanish Composition

Linguistics
Anthropology
204. Core Seminar: Linguistic Anthropology

Linguistics
*210A. Field Methods I
*210B. Field Methods II
*220. Linguistic Areas
*225. Linguistic Structures
M246C. Topics in Linguistic Anthropology

Portuguese (Spanish and Portuguese)
*202. Synchronic Morphology and Phonology
*204A-204B. Generative Grammar
*M205A-M205B. Development of Portuguese and Spanish Languages
Spanish (Spanish and Portuguese)
*202A. Phonology
*202B. Morphology
*204A-204B. Generative Syntax and Semantics
*M205A-M205B. Development of Portuguese and Spanish Languages
*209. Dialectology

Frances M. Kamm, Ph.D.
Scope and Objectives

The School of Law, one of two academic units at UCLA which operate on a semester system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Professional Study

Juris Doctor Degree

Admission

Students beginning their professional work are admitted only for the Fall Semester. They must have received a bachelor’s degree from a university or college of approved standing before beginning work in the school and are required to take the Law School Admission Test (LSAT).

The school seeks to admit students of outstanding intellectual ability who bring a wide range of backgrounds, experiences, and perspectives to the classroom and the legal profession. The faculty has concluded that the quality of the education of students is affected in significant ways by the presence of vital diverse viewpoints; students of all backgrounds select UCLA in significant part because of the school’s outstanding achievement in creating a highly diverse educational environment.

In evaluating applicants the school places substantial weight on traditional measures of academic ability, namely grades and LSAT scores, and recognizes that other factors and attributes contribute greatly to people’s ability to succeed as law students and lawyers. When assessing academic promise and achievement, an applicant’s entire file is considered, including letters of recommendation, whether economic, physical, or other challenges have been overcome, scholarly achievements such as graduate study, awards, or publications, and the rigor of the undergraduate educational program.

In addition, the school considers attributes that may contribute to assembling a diverse class, placing special emphasis on socioeconomic disadvantage. Also evaluated are work experience and career achievement, community or public service, career goals (with particular attention to the likelihood of applicants representing underrepresented communities), evidence of and potential for leadership, language ability, unusual life experiences, and any other factors (except those deemed inadmissible by the Regents or by other applicable law) that indicate applicants may significantly diversify the student body or make a distinctive contribution to the school or the legal profession.

UCLA has as one of its central purposes the training of attorneys who attain high levels of professional excellence and integrity and who exercise civic responsibility in myriad ways over long careers.

Detailed information about the academic programs offered by the School of Law, course titles and descriptions, fees, and the semester-system calendar by which it operates are available in the Announcement of the UCLA School of Law or from the School of Law website given at the beginning of this listing.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University.

Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing of courses is not permitted.

Attendance and Grades

The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. In conjunction with these courses students also receive training in the use of legal bibliography and in effective legal writing and oral advocacy.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study. All of the courses in the second- and third-year curriculum are elective with the exception of the legal profession requirement, which is a requisite for graduation.

Concurrent Degree Programs

The School of Law offers three concurrent degree programs which allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously. Students may also design a tailored program from other disciplines in UCLA’s curriculum or from another high-quality institution, but must arrange this in consultation with this school and the other program selected.

M.B.A./J.D.

The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is desired. Examples of such areas include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

M.A. Urban Planning/J.D.

The School of Law and the Department of Urban Planning in the School of Public Policy and Social Research offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursuing both degrees in either area and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the School of Public Policy and Social Research, and the Graduate Division.

Education Program/J.D.

The School of Law and the Department of Education offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on
its completion. This program currently is not accepting applicants.

**M.A. American Indian Studies/J.D.**
The School of Law and the American Indian Studies Program offer a concurrent plan of study over four years leading to both a J.D. and an M.A. This integrated program is designed to produce law graduates with a rich understanding of tribal cultures that expands their knowledge, facilitates their practice in the field of Indian law, and enhances their service to Indian nations. Legal study includes relevant tribal, U.S., and international law. Courses in American Indian studies address the diverse histories, world views, values, languages, and practices of North American tribes.

Students interested in the program must apply and be admitted to the School of Law, the American Indian Studies Program, and the Graduate Division.

**Master of Laws Degree**
The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact Professor Joel Handler, LL.M. Program, School of Law, 1242 Law, UCLA, Los Angeles, CA 90024-1476, for further information.

**Law**

**Lower Division Course**

88. Lower Division Seminar: Special Topics in Law. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in law approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

**Scope and Objectives**

Although lesbian, gay, and bisexual studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to “cure” the homosexual.

For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato’s Symposium looked back to Achilles and Patroclus; women-loving-women of the nineteenth century remembered Sappho; an inmate of a New York prison interviewed in the early 1920s was able to recite a long list of famous lesbians and gay men.

After the birth of the modern gay liberation movement in 1969, this underground knowledge came out of the closet and found a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities. This challenge led to a dramatic increase in research on same-sex desire, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming—partly by assimilation, partly by contestation—the previously hostile learned tradition.

This originally rather disparate work gradually coalesced into lesbian, gay, and bisexual studies, which, over the last decade, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, and bisexual studies is usually on minority sexualities, it is impossible to study minority sexualities in any meaningful way without raising questions about sexuality in general. And questions about sexuality cannot be responsibly answered without considering gender, class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, and bisexual studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, and bisexual studies is the site of some of the most exciting work being done today on the relation of culture and sexuality.

First offered in Fall Quarter 1997, UCLA’s minor in lesbian, gay, and bisexual studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course in each of the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality. They should be acquainted with some of the many different ways sexuality has been organized in the past and is organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual diversity of the world in which they live and of the complex ways in which sexuality intersects with other categories of identity and practice.

**Undergraduate Study**

**Lesbian, Gay, and Bisexual Studies Minor**

To enter the lesbian, gay, and bisexual studies minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Course**: Lesbian, Gay, and Bisexual Studies M14.

**Required Upper Division Courses**: Lesbian, Gay, and Bisexual Studies 196 and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, and bisexual issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
Lesbian, Gay, and Bisexual Studies

Lower Division Course
M14. Introduction to Lesbian, Gay, and Bisexual Studies. (Same as Women’s Studies M14.) Lecture, three hours; discussion, one hour. Introduction to study of lesbians and gay men as social groups; examination of sexual orientation as a category for investigation; interdisciplinary approaches to theories and research on commonalities and diversity of gay, lesbian, and bisexual experience, including race/ethnicity. P/NP or letter grading.

Upper Division Courses
M115. Topics in Study of Sexual and Gender Orientation. (Same as Women’s Studies M115.) Lecture/discussion, three hours. Requisite: course M14 or Women’s Studies M10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit.

M133. Chicana Lesbian Literature. (Same as Chicana and Chicano Studies M133 and Women’s Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of familia in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.

M134. Cultural Construction of Gender and Sexuality: Homosexualities. (Same as Anthropology M134.) Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

196. Senior Internship Seminar in Lesbian, Gay, and Bisexual Studies. Seminar, three hours. Requisites: course M14, completion of four additional courses toward the minor. Limited to seniors. Internship in a lesbian, gay, or bisexual community organization coupled with a weekly seminar. Consideration of theoretical and political issues involved in such work and relation of those issues to ideas explored in minor courses already taken.

197. Selected Topics in Lesbian, Gay, and Bisexual Studies. Study of selected topics in lesbian, gay, and bisexual studies. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor.

199. Special Studies in Lesbian, Gay, and Bisexual Studies (2 to 4 units). Requisites: course M14, two additional courses toward the minor, consent of instructor and program director. Directed program of independent study or research on a specific topic within lesbian, gay, and bisexual studies.

Professors
Marcia J. Bates, Ph.D.
Christine L. Borgman, Ph.D.
Beverly P. Lynch, Ph.D.
Mary Niles Maack, D.L.S.

Library and Information Science / 365

Professors Emeriti
Page Ackerman, B.A., B.S.L.S.
Harold Borko, Ph.D.
Robert M. Hayes, Ph.D.
Seymour Lubetzky, M.A., LL.D.
Lawrence Clark Powell, Ph.D., Litt.D., L.H.D., H.H.D.
Russell Shank, D.L.S.
Elaine Swenonius, M.L.S.
Diana M. Thomas, Ph.D.
Raymund F. Wood, Ph.D.

Associate Professors
Michèle V. Clonan, Ph.D.
Leah Lievrouw, Ph.D.
John V. Richardson, Ph.D.
Virginia A. Walter, Ph.D.

Assistant Professors
Clara Chu, Ph.D.
Anne Gilliland-Swetland, Ph.D.
Gregory H. Leazer, D.L.S.

Lecturers
Dorothy J. Anderson, Ph.D.
Ruby Bell-Garn, M.L.S.
Robert Bellanti, M.L.S.
Stuart Biegel, J.D.
Alison Bunting, M.L.S.
Anita Sundaram Coleman, Ph.D.
Rita Costello, M.L.S.
Leon Ferder, Ph.D.
Rita Giellis-Swetland, M.A., M.L.S.
Esther Grassian, M.L.S.
Bethany Johnson, M.L.S.
Joan Kaplowitz, Ph.D.
Laurie Laufer, Ph.D., Emeritus
Anthony Maddox, Ph.D.
Susan McClamery, J.D., M.L.S.
Ann O’Brien, Ph.D.
Mary I. Purucker, M.L.S.
Myra Saunders, M.L.S.

Adjunct Professor
Zorana Ercegovac, Ph.D.

Scope and Objectives
The Department of Library and Information Science has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Applicants may write to the Department of Library and Information Science, 1009 Moore Hall, UCLA, Los Angeles, CA 90024-1521, for the department’s announcement and application materials.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degrees
Admission
Students are admitted to the Master of Library and Information Science (M.L.I.S.) program in
Fall Quarter only. In addition to Graduate Division requirements and application procedures, the school requires:

(1) A statement of purpose.

(2) An official report of a score on the Graduate Record Examination (GRE) taken within the past five years. Applicants to the M.L.I.S. degree program who hold graduate degrees from accredited institutions in the U.S. may request a waiver of the GRE. Waivers are considered only after the committee on M.L.I.S. and certificate admissions has reviewed applicants' official transcripts. An official report of a score on the Test of Written English (TWE) and the Test of English as a Foreign Language (TOEFL) are required for students whose native language is not English.

(3) Three letters of recommendation.

(4) Satisfaction of the following entrance requirements: (a) a college-level course in statistics (three semester units or four quarter units) within the last five years with a minimum grade of C. The course must have covered descriptive and inferential statistics. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in statistics administered by the department; (b) a college-level course in computer programming (three semester units or four quarter units) within the last five years with a minimum grade of C. Most standard languages such as BASIC, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as INMAGIC, dBASE, or PARADOX. At least one third of the course grade should be based on programming assignments. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in computer programming administered by the department.

Entrance requirements should be completed before beginning the M.L.I.S. program. However, one requirement may be satisfied in the Fall Quarter of the student's first year.

While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The admissions committee may request a report of an interview by the chair of the department or by a person designated by the chair as qualified to conduct an interview. Interviews are rarely conducted, and only for the purpose of clarifying a candidate's academic background and career objectives.

Cooperative Degree Programs
To participate in a cooperative program, the student must make application to and be admitted by both the department and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

M.L.I.S./M.A. History
The M.L.I.S./M.A. History is a concurrent degree program of the Department of Library and Information Science and the Department of History. The student can obtain two degrees: the M.L.I.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from both this department and the History Department.

M.L.I.S./M.A. Latin American Studies
The M.L.I.S./M.A. Latin American Studies is an articulated degree program of the Department of Library and Information Science and the Latin American Studies Program. The student can obtain two degrees: the M.L.I.S. and the M.A. in Latin American Studies.

M.L.I.S./M.B.A.
The M.L.I.S./M.B.A. is a concurrent degree program jointly sponsored by the Department of Library and Information Science and the Anderson Graduate School of Management. This specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields.

Areas of Study
Consult the department.

Course Requirements
Full-time students are normally required to enroll in three courses per quarter in order to complete the program in six quarters. Part-time enrollment may be permitted.

Eighteen courses (72 units) are required for graduation from the M.L.I.S. program. Students take 20 units of core courses, four units of coursework in research methods, and 48 units of electives. Coursework must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

Basic Professional Competence. The requirement is met by completing five core courses (Library and Information Science 200, 201, 203, 220, 441) and at least one graduate-level research methodology course (such as Library and Information Science 205, 240, 241, 260, 261, or 290). Only in unusual cases does librarianship coursework taken elsewhere satisfy the basic competency requirements.

Specialized Competence. Completion of a course of study is required as evidence of knowledge of a field of specialization in information policy and management, information access, information systems, or information organization. The field of specialization and the specialized course program must be approved by a faculty adviser. The specialized competence requirement is ordinarily met by the completion of 12 additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged. Students may petition to have prior coursework applied to their specializations.

During the second year, the student may apply for an internship of one to three quarters either on campus or off campus at an approved library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement for students under the comprehensive examination plan; only four units may be applied toward the minimum graduate course requirements. In order to enroll in any S/U graded course, including 500-series courses, the student must be in good academic standing.

Students who choose the thesis option are allowed to apply 12 units of 500-series course work toward the requirements for the degree.

Comprehensive Examination Plan
The comprehensive examination consists of two components: a basic component and a specialization component.

Basic Component. A formal written examination covering basic professional competencies is required. The purpose of the comprehensive examination is to demonstrate understanding of library and information science as a totality. The examination does not cover the basic professional competencies individually but deals with the field in a unified form. The student may sit for the written examination after completion of three quarters of academic residency provided that (1) all outstanding entrance requirements are satisfied, (2) the student has completed the five core courses and the required research methods course at the end of the quarter in which the examination is taken, (3) nine courses toward the degree (not including entrance requirements) have been completed by the end of the quarter in which the examination is taken, and (4) the student is in good academic standing.

Specialization Component. A major paper produced in an elective course, normally in the student's area of specialization, is required. A grade of B or better must be earned in this course. The same course may not be used to satisfy both the paper and the research methods requirement.

Thesis Plan
Students under the thesis plan must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

Students indicate their interest in this plan by the end of Spring Quarter of the first year. If the thesis option (Plan I) is approved, a thesis committee of at least three faculty members is established. Most students complete 12 units of related coursework under the direction of the committee. The committee approves the subject and plan of the thesis, provides guidance in research, and approves the completed manuscript. Approval must be unanimous.
among committee members. After acceptance of the thesis, there is an oral examination on the thesis.

There is no written examination under the thesis plan.

Post-M.L.I.S. Certificate of Specialization

Admission
The Post-M.L.I.S. Certificate of Specialization is designed for holders of the M.L.S. or M.L.I.S. degree who either (1) want to redirect their careers and need the structure of a nine-course program and specialization paper to accomplish that, (2) want to update knowledge and skills across the discipline and require the structure of a nine-course program and specialization paper to accomplish those goals, or (3) recently graduated from a less comprehensive M.L.I.S. or M.L.S. degree program than that offered by UCLA and did not have the opportunity to specialize.

Applicants should hold a master’s degree from a program accredited by the American Library Association. The committee may offer admission to (1) applicants holding the master’s degree in library science from foreign countries who have completed at least one quarter in a graduate program in library science in a country where English is the language of instruction, and (2) applicants who attended unaccredited programs if documentation supports admission but for the lack of a degree from an accredited program.

Meeting the specified requirements for a field of specialization does not automatically assure admission to the program. Part-time enrollment is encouraged to provide flexibility for the working information professional. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.

Areas of Study
The program meets the need for specialized training in various areas of information policy, information access, information systems, libraries and other information institutions, and information organization, as well as research competence. Further specialization within these fields is possible.

Course Requirements
The course program may begin in any quarter of the academic year. If a student is admitted for a preliminary quarter to complete prerequisite courses, that quarter is not counted in the minimum residence requirements.

A minimum of nine courses (100, 200, 400, and 500 series) must be completed in the Department of Library and Information Science and other departments of the University. A research paper, bibliographical study, or literature survey appropriate for publication in a professional or scholarly journal or as a separate paper must be completed by the final quarter of study, usually in connection with enrollment in course 596. The specialization paper or project is required even if the student has an advanced academic degree in which a thesis or dissertation was required, and the paper or project must be approved by the faculty advisor.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Doctoral Degree

Admission
Students are admitted in Fall Quarter only. They may enter with the M.L.S. or M.L.I.S. degree, other advanced degree, or directly out of the B.A. degree. If the prior graduate degree does not include coursework equivalent to the core identified for the M.L.I.S. program, the applicant must complete the core after admission.

In addition to Graduate Division requirements and application procedures, the department requires satisfaction of the following entrance requirements:

1. A statistics requirement, satisfied by completing a college-level course with a minimum grade of C.
2. A computer programming requirement, met either by completing a college-level course with a minimum grade of C or by passing a proficiency examination administered by the department (most standard languages such as BASIC, C, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as dBASE, INMAGIC, or PARADOX).
3. A statement of purpose which identifies the applicant’s proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program.
4. Graduate Record Examination (GRE) scores taken within the last five years. There is no minimum score for the GRE, but high scores are regarded favorably. Admitted students typically score over 1,100.
5. In cases where the Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE) are required, the department expects a minimum score of 550 on the TOEFL and 4.0 on the TWE. Only in exceptional cases are applicants recommended for provisional admission who do not meet the minimum scores; in such cases, strong evidence of competency in English (such as a high verbal GRE score) must be provided.
6. Evidence of research and writing such as published work, master’s thesis, or two research papers written in English.
7. Three letters of recommendation.
8. Favorable consideration may be given to applicants who have made distinguished contributions to the profession while working as a practicing professional, for instance in publications and/or work with professional societies.
9. A personal interview is required. The committee seeks evidence of an appreciation of research and knowledge of potential research topics. The committee is particularly interested in the applicant’s commitment to a career in library and information science education and research, signs of originality and inquisitive-ness, and good communication skills.

Major Fields or Subdisciplines
Students are expected to specialize in a subfield in one of three major areas: information storage and retrieval systems; information seeking and use; policies and issues in library and information science.

The department strictly limits the specific subfields which are accepted for doctoral work.

Course Requirements
A minimum of 18 to 21 courses, depending on the student’s previous experience and coursework, is required in the Ph.D. program.

Core Courses. The six required core courses are Library and Information Science 200, 201, 203, 220, 441, and a basic course in research methods (e.g., Library and Information Science 290 or Education 210A). Courses taken in a previously completed American Library Association-accredited M.L.S. or M.L.I.S. program may be applied to this requirement, up to the entire six.

Specialization Courses. Three to six specialization courses are required. At least one course relevant to each of the three broad doctoral examination areas must be completed. The number of courses required is determined after examination of the student’s transcripts.

Methods Courses. Three methods courses are required. A minimum of two first tier and one second tier research methods courses offered by the Department of Education is required. If Library and Information Science 290 is taken to satisfy the core, it cannot count toward the fulfillment of this first tier requirement.

Doctoral Seminars. Three doctoral seminars are required. Having completed the core, students are required to take a doctoral seminar in each area of the written qualifying examination (Library and Information Science 273, 274, 275).

Advanced Doctoral Courses. Additional advanced courses are taken related to the student’s dissertation interests. These may include advanced methodology courses, independent studies, or cognate courses in other fields.

Written and Oral Qualifying Examinations
The student is required to pass written qualifying examinations in each of the three areas of study listed above, including coverage of the historical as well as technical aspects in at
Graduate Courses

Upper division undergraduate students must obtain consent of the instructor to enroll in 200-series courses and consent of the chair to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Department of Library and Information Science must obtain consent of the instructor prior to enrolling.

The following courses are offered infrequently: 230, 241, 246, 284, 287, 466, 486.

200. Information in Society. Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, gathered, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. S/U grading.

201. Information Structures. Lecture, three hours; discussion, one hour. Required core course. Introduction to various systems and tools used to organize material and promote use. Problem-oriented approach, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management.

M202. Folklife Archiving. (Same as Folklore M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

203. Design of Library and Information Services. Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs.

205. Historical Methodology of Library and Information Science. Prerequisite: course 200. Introduction to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in the field. Critical analysis of selected histories of various areas. Course 200, Seminar in Information Studies. Required.

207. International Issues and Comparative Research in Library and Information Science. History and development of international organizations and programs in library and information science. Identification of key issues in international exchange of information. Introduction to comparative method as procedure for study and research.

208. Development of Cultural Information Sources Using Digital Multimedia. Lecture, two hours; laboratory, two hours. Exploration of digital information resources, including digital libraries, World Wide Web home pages, and CD-ROMs, as well as user, policy, presentation, motivation, and evaluation considerations.

210. Seminar: Descriptive and Bibliographical Cataloging. Prerequisites: courses 410, 411, or equivalent. Specialized studies in selected areas of descriptive and bibliographical cataloging (e.g., purposes, principles, instructional development, potentials of automation). May be repeated once.

211. Seminar: Subject Control of Library Materials. Prerequisites: courses 410, 411, or equivalent. Study of selected problems in design and use of verbal subject headings and classification systems. Manual and mechanized systems. May be repeated once.

220. Information Access. Prerequisites: courses 200, 201. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources.

221. Bibliography of Science and Engineering. Prerequisite: course 220. Patterns of communication and flow of information among scientists and engineers. Scientific and technical literature; with emphasis on on-line sources, special types of publications, research material, reference and bibliographical aids to the natural sciences and engineering.

223. Literature of the Social Sciences. Prerequisite: course 220. Seminar on literature of the social sciences, including review of classics in the various fields, monumental source collections, periodicals, bibliographies, catalogs, indexes, abstracts, bibliographic and nonbibliographic databases. Tends to scholarly and popular writing. Interdisciplinary nature of the literature.

224. Literature of the Humanities and Fine Arts. Prerequisite: course 220. Seminar on literature of the humanities and fine arts, including review of classics in the various fields, comparisons of editions, periodicals, bibliographical apparatus, and reviewing media. Trends in scholarly and popular writing.

M228. Latin American Research Resources. (Same as History M265 and Latin American Studies M200.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

225. General Reference Work. Prerequisite: course 220. General reference materials (not specific to subject access), with advanced work in reference process and in cognitive and behavioral aspects of inquirers and expert reference functions.

M229B. African Bibliographic and Research Methods. (Same as African Area Studies M229B.) Problems and techniques of research methodologies related to African studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

M229C. Introduction to Slavic Bibliography (2 units). (Same as Slavic M229.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

240. Principles of Information Systems Analysis and Design. Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization.
241. Measurement and Evaluation of Information Systems and Services. Prerequisite: one research methodology course or equivalent. Study of human-computer interaction, decision support systems, and the design of information systems and services to meet user needs. Focus on the evaluation of systems and services through user studies, surveys, and interviews. Examination of the role of the librarian and information specialist in the design of systems and services to meet user needs. Prerequisite: one research methodology course or equivalent.

242. Information Retrieval Systems. Prerequisites: courses 201, 220. Survey of methods of file organization, retrieval techniques, and search strategies employed to evaluate effectiveness of document collections. Reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description. Recommended for students in any discipline interested in design or implementation of information systems.

243. Human/Computer Interaction. Prerequisites: one programming course and one introductory statistics course. Survey of social, behavioral, design, and evaluation issues in human-computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions.

244. Social Aspects of Information-Oriented Society. Analysis of social evolution of information-oriented societies. Historical factors and current trends explored through discussion of selected international and domestic issues. Implications for information policy.

247. User-Centered Design of Information Retrieval Systems. Lecture, two hours; discussion, two hours. Prerequisites: courses 201 and 220, or consent of instructor. User-centered design methodology as applied to information retrieval systems. Emphasis on the user in the development of information retrieval systems.

250. Seminar: Special Topics in Information Science. Prerequisites: courses 200, 201, and at least one from 242, 243, 247, 280, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services.

253. Contemporary Children's Literature. Reading interests and correlative types of literature surveyed through discussion of selected international and domestic issues. Implications for the information-seeking process. Emphasis on search strategies and access methods to use of thesaurus and other vocabularies.

249. Seminar: Special Topics in Information Science. Prerequisites: courses 200, 201, and at least one from 242, 243, 247, 280, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services.

250. Seminar: Special Topics in Information Science. Prerequisites: courses 200, 201, and at least one from 242, 243, 247, 280, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services.

253. Contemporary Children's Literature. Reading interests and correlative types of literature surveyed through discussion of selected international and domestic issues. Implications for the information-seeking process. Emphasis on search strategies and access methods to use of thesaurus and other vocabularies.

260. Historical Bibliography. Prerequisites: courses 200 and 402, or consent of instructor. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social and cultural context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including anti-Quaker, Anglo-American, and histoire du livre approaches.

271. Seminar: Freedom and Information Policy Issues. Investigation of concept of intellectual freedom, information policy issues, civil liberties and civil rights, censorship, and other restraints on access to information. Prerequisite: one of the following: 241, 242, 243, 247, 250, 253, 260, or consent of instructor.

272. Research Seminar: Library and Information Science. Prerequisite: doctoral standing or consent of instructor. Emphasis on recent contributions to the field of information science and methodology. May be repeated for credit. S/U grading.

273. Doctoral Seminar: Information Storage and Retrieval Systems. Prerequisite: doctoral standing or consent of instructor. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use.

274. Doctoral Seminar: Policies and Issues in Library and Information Science. Prerequisite: doctoral standing or consent of instructor. Examination of social and ethical issues in the development of library and information science and management of information organizations and resources.

275. Doctoral Seminar: Information Seeking and Use. Prerequisite: doctoral standing or consent of instructor. Examination of behavior and cognitive aspects of information seeking, its psychological needs, and needs of information and information technologies, and aspects of question negotiation.

280. Information-Seeking Behavior. Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Also includes analysis of human information processing, information flow among social and occupational groups, and research on information needs.

281. Information Resources for Business. Prerequisite: course 220 or consent of instructor. Introduction to information needs of the business world. Business guides, encyclopedias, directories, yearbooks, and other resources. Prerequisite: courses 220 or consent of instructor.

282. Management of Digital Records. Lecture, three hours. Introduction to long-term management of digitized information and special information systems arising from the management of digital information. Prerequisite: one research methodology course. Prerequisite: one research methodology course.

283. Legal Research and Bibliography. (Formerly numbered 228.) Introduction to source materials of the law, with emphasis on primary authority, but covering as well secondary authority, and indexes and finding aids used to gain access to legal information.

284. Seminar: Legal Informatics. (Formerly numbered 487C.) Information problems of legal professionals, including information organization and management. T opics include electronic recordkeeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development.

285. Scholarly Communication and Bibliometrics. (Formerly numbered 487A.) Prerequisite: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media.

286. Seminar: Information Access. Prerequisites: course 220, one from 221, 223, 224, 226, 281, 283, 410, or consent of instructor. Examination of the information processing and new information technologies. Prerequisite: one research methodology course.

287. Doctoral Seminar: Information Storage and Retrieval Systems. Prerequisite: doctoral standing or consent of instructor. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use.

289. Information Services in Culturally Diverse Communities. Issues in provision of information services in a multilingual and multicultural society. Under-standing role of information institutions in promoting cultural diversity and preserving ethnic heritage.

290. Research Methodology. Prerequisite: consent of instructor. Role of research in bibliography, librarianship, and information science. Identification and description of research methods. Historical, statistical, analytical, and descriptive techniques.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant. Handbook for library instruction. Integrated into apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

402. Fundamentals of Bibliography. Prerequisite: course 200. Organization, control, and elements of bibliographical apparatus, new techniques and tools, theory, methods, and trends in bibliographical research in relationship to librarianship. Development and fundamentals of several branches of bibliography: enumerative (or systematic), physical (analytical or critical, descriptive).

405. Automation of Library Processes. Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, network and online services (such as bibliographic utilities, regional networks, and online services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Development for information processing and new information technologies.

412. Cataloging and Classification of Nonbook Materials. Prerequisites: courses 410, 411. Problems in cataloging and classification of selected non-book materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections.

414. Indexing and Thesaurus Construction. (Formerly numbered 413, 414.) Principles of design and management of index and thesaurus materials. Overview of thesaurus usage and design. Prerequisite: course 285. Overview of thesaurus use in manual and on-line environments. Basic professional techniques for indexing a variety of types of materials and for preparing information management and subject headings.

425. Computer-Based Information Resources (Online Searching). Prerequisite: course 220 or consent of instructor. Emphasis on use of reference and resource databases and different vendor systems. File structure and hardware requirements. Analyses of information needs and investigation of databases addressing those needs.

426. User Education/Bibliographic Instruction: Theory and Technique. History, theory, methods, and methodologies of user education and bibliographic instruction in academic and public libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources.

441. Management Theory and Practice for Information Professionals. Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information professionals work.

442. Library Personnel Administration. Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting.

446. Library Services and Literature for Youth. Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of the teenager.

461. College, University, and Research Libraries. Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars.

465. Library Services and Programs for Children. Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service.

471. Health and Life Sciences Libraries. Prerequisite: course 441. Organization, administration, services, and problems of health and life sciences libraries; relationships with institutions of which they are a part and with the community.

473. Government Information. Introduction to nature and scope of government information promulgated by the federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach.

485. American Archives and Manuscripts. Prerequisite: consent of instructor. Identification, description, subject analysis, and organization of records contained in archives and manuscript collections. Administration. User requirements. Problems of acquisition, legal title, literary property, preservation, accessibility, and use.

486. Issues and Problems in Preservation of Library Materials. Introduction to fields of library conservation and preservation, with emphasis on preservation administration.

488. Seminar: Advanced Issues in Archival Science. Seminar, three hours. Prerequisite: course 485. In-depth examination of theoretical issues and contemporary problems facing the archival profession. Topics revolve each term and include development and role of archival appraisal, management of audiovisual materials, and management of medical, scientific, and technological documentation.

491. Interpersonal Communication Issues in Library Systems. Examination of interpersonal communication patterns in library management and staff relations, in resource sharing, and in providing information services. Emphasis on relationships within an organizational environment and on effective communication styles in decision making, managing conflict, and implementing change. S/U grading.

497. Fieldwork in Libraries or Information Organizations (4 or 8 units). Supervised field experience in approved library or information organization. Concentration must be on managerial or other professional problems of the site. Students spend full time in the field for most of the period. S/U grading.

498. Internship. Prerequisite: consent of internship coordinator. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

Life Sciences

Scope and Objectives

Students who wish to study life sciences have a choice of six majors, all of which lead to a Bachelor of Science degree: biology, microbiology and molecular genetics, molecular cell, and developmental biology, neuroscience, physiological science, and psychobiology. This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses which forms the foundation for any study of life sciences and which is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the life sciences core curriculum, see the website at http://www.lifesci.ucla.edu/lcore.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the six majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The biology and psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C- or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology for majors preferably equivalent to Life Sciences 1 and 2; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

Life Sciences

Lower Division Courses

1. Evolution, Ecology, and Biodiversity. Lecture, three hours; demonstration, two hours; outside study, seven hours. Not open for credit to students with credit for former Biology 5 or 6. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships.

2. Cells, Tissues, and Organs. Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems, providing cellular framework for courses 3, 4, and Chemistry 153A.

3. Introduction to Molecular Biology. Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Enforced requisites: course 2, and Chemistry 10C, or 11B and 132A (132A may be taken concurrently). Not open for credit to students with credit for former Biology 9 or 100A. Introduction to basic principles of biochemistry and molecular biology.
3H. Introduction to Molecular Biology (Honors). Lecture, two and one-half hours; discussion, 90 minutes; multiple section, two and one-half hours. Enforced prerequisites: course 2, and Chemistry 10C, or 11B and 132A (132A may be taken concurrently). Honors course parallel to course 3, but at a more advanced level.

4. Genetics. Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Enforced prerequisite: course 3. Not open for credit to students with credit for former Biology 108. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations.

Ian Maddiesen, Ph.D.

**Scope and Objectives**

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

**Undergraduate Study**

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

**Bachelor of Arts in Linguistics**

The B.A. degree program is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

**Preparation for the Major**

*Required:* Linguistics 20; two of the following: Philosophy 31, Psychology 10, one cultural anthropolog course; completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

**The Major**

*Required:* A minimum of 13 upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics 104, 114, M115, 125, 127, C130, C135, 140, M146, M150, 165A (or 200A for qualified students), 165B (or 200B for qualified students), 170, 175, M176A, C180, C185A, C185B, 195, 196A, 196B, 199 (if four units), African Languages M190, Anthropology 143, English 121, 122, Philosophy 127A, 127B, 172, Psychology 122, 123, or upper division courses in a foreign language beyond the sixth term. Not all of these elective courses are necessarily given every year; consult an adviser regarding electives to be offered in a given year.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

**Bachelor of Arts in Linguistics and Anthropology**

**Preparation for the Major**

*Required:* Linguistics 20, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages (at least three terms must be in a lan-
Bachelor of Arts in Linguistics and Computer Science

Preparation for the Major

Required: Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language or the third term in each of two foreign languages. Admission to the major is contingent on passing the following courses with grades of C or better and a grade-point average of 3.3 or better: Linguistics 20, Philosophy 31, Program in Computing 10A, 10B, 10C. Mathematics 31A and 31B must also be passed with grades of C or better. Mathematics 61 is recommended.

Bachelor of Arts in Linguistics and East Asian Languages and Cultures

Preparation for the Major

Required: Completion of the sixth term in either Chinese or Japanese; Linguistics 20, Philosophy 31; one cultural anthropology course; either Chinese 50 or Japanese 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Linguistics 103, 110, 120A, 120B, 165A or 165B or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A-100B-100C, 120, CM122, 130B; for the modern Japanese track: Japanese 100A-100B-100C, 120, CM122, 130B; for the classical Chinese track: Chinese 110A-110B-110C, four courses from 140A, 140B, 140C, 165, 170, 195; for the modern Chinese track: Chinese 100A-100B-100C, 101A, 101B, 130A, 130B.

Bachelor of Arts in Linguistics and English

Preparation for the Major

Required: Linguistics 20, English 3, 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, English 121, 122, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Bachelor of Arts in Linguistics and French

Preparation for the Major

Required: Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Fifteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, French 100, 101, 102, 103, 105, 107, and two elective upper division French literature courses.

Bachelor of Arts in Linguistics and Italian

Preparation for the Major

Required: Linguistics 20, Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third term in one other foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

The Major

Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

Bachelor of Arts in Linguistics and Philosophy

Preparation for the Major

Required: Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major

Required: Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 165B (or 200B with a grade of A in 120B and consent of instructor), three upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

Bachelor of Arts in Linguistics and Psychology

Preparation for the Major

Required: Linguistics 20, Psychology 10, 41, 42, completion of the sixth term in one foreign language and the third term in a second foreign language. Program in Computing 10A is strongly recommended.

The Major

Required: Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 130, two upper division electives in linguistics, Psychology 110, 120, 121, 123, 130, and an elective to be selected from 112A, 112B, 112C, 115, 116, 124B, 135B, Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and Psychology 115 are strongly recommended.

Bachelor of Arts in Linguistics and Scandinavian Languages

Preparation for the Major

Required: Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, two courses from Scandinavian 105, 110, 115 (or one of these courses twice), 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.
Bachelor of Arts in Linguistics and Spanish

Preparation for the Major

Required: Linguistics 20, Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two additional upper division courses in linguistics (preferably C130 and 170), Spanish 100A-100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

Bachelor of Arts in African Languages

Preparation for the Major

Required: Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major

Required: A minimum of 13 upper division courses, including three courses in an African language; African Languages M190, Linguistics 103; two courses from Film and Television 106C, Folklore M155, French 121A, Theater 102E, or one or more special four-unit African Languages 199 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology 136A, 136B, Geography 189, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Political Science 151A, 151B, 151C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. Students graduate with a bachelor’s degree in their major and a specialization in computing.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree

Admission

Students are normally admitted to begin residence in the Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and immediate and long-range goals in the field. Three scholars under whom the applicants have studied should submit letters to the department about the applicant’s qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted. There is no minimum score requirement. A copy of some research paper or other piece of writing in linguistics or a closely related field should also be submitted.

While not required for admission, Linguistics 103, 110, 120A, 120B, 165A, 165B are prerequisites to graduate courses in the corresponding areas. At the time of admission, the applicant is notified which, if any, of the above courses must be taken or audited. However, any question of whether courses taken elsewhere are equivalent to the above courses must be discussed with the adviser.

Prospective students may request an information brochure from the administrative assistant in the department.

Areas of Study

Consult the department.

Course Requirements

The Master of Arts degree requires the completion, with a B average or better, of nine graduate courses in linguistics. All students are required to take Linguistics 200A, 200B, 201, 202, and 206. The remaining four courses must be chosen from Linguistics 203 through 218. All first-year graduate students must take courses 411A-411B, and all second-year students must take course 444.

The following undergraduate courses or the equivalent are prerequisites to graduate courses in the corresponding areas: Linguistics 103, 110, 120A, 120B, 165A, 165B. Course 103, or an examination in practical phonetics, must be passed with a grade of B or better as a prerequisite to Linguistics 210A, a required course for the Ph.D. that may be taken at the pre-M.A. level. A proficiency examination in elementary logic, which may be waived on the basis of appropriate coursework, is prerequisite to course 206.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

Comprehensive Examination Plan

After completing the required courses and the foreign language examination, the student must pass a comprehensive examination administered by a committee of the faculty. The committee, consisting of four members, is appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Thesis Plan

After completing the required courses and the foreign language examination, if this plan is selected, the student submits a thesis based on original research to a thesis committee for approval. If the student proceeds to the Ph.D., this plan must be adopted.

For students wishing to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the quarter.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the quarter during which the student expects to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

Doctoral Degree

Admission

General admission requirements are the same as those listed for the M.A. If earlier graduate work was done at UCLA, admission into the Ph.D. program is considered on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty’s evaluation of the quality of the M.A. thesis and of overall work and promise.

If the applicant has already received an M.A. in Linguistics from another department or institution, all the requirements expected of an M.A. candidate, including the coursework, must be fulfilled unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) a master’s thesis written at another institution or department may be submitted or (2) a thesis was not written elsewhere, a paper equal in depth and scope to a thesis may be submitted.

In either case an evaluation committee is appointed. This committee makes a recommen-
Major Fields or Subdisciplines

Students may specialize in syntax, semantics, phonology, phonetics, language change, typology, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Course Requirements

Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and eight units in an area distinct from that of the student's major area of concentration. The 36 units may not include courses 275 (colloquium), any 300- or 400-level course, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, some of the results of the student's research must be presented at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

Written and Oral Qualifying Examinations

In order to be advanced to candidacy, the student is required to prepare two substantive research papers in different areas or fields of linguistics. These papers are to be submitted to and approved by the guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy to the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination includes all the background necessary to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. The student is expected to take the examination and be advanced to candidacy no later than six quarters after being admitted to the doctoral program.

Linguistics

Lower Division Courses

1. Introduction to Study of Language. Summary, for general undergraduates, of what is known about human language: unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

2. Language in the U.S. Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arriving languages) and social and political aspects of American language use.

3. Structure of English Words. Lecture, three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.

20. Introduction to Linguistics. Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

88. Lower Division Seminar. Seminar, three hours. Limited to freshmen. Variable topics; consult Schedules of Classes, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit.

99. Special Studies in Linguistics (2 to 4 units). Supervised research or training. May be repeated for credit. P/NP or letter grading.

Upper Division Courses

103. Introduction to General Phonetics. Lecture, three hours; laboratory, two hours. Prerequisite: one prior linguistics course or course 20 concurrently. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extension practice in perception and production of such phenomena.

104. Experimental Phonetics. Lecture, four hours; discussion, one hour. Prerequisite: course 103. Survey of principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena.

110. Introduction to Historical Linguistics. Prerequisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.

114. American Indian Linguistics. Strongly recommended (but not prerequisite): course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

115. Survey of African Languages. (Same as African Languages M190.) Prerequisite: course 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

120A. Phonology I. Prerequisites: courses 20, 103. Introduction to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets.

120B. Syntax I. Prerequisite: course 20. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistic formalization.

125. Semantics. Lecture, four hours; discussion, one hour. Prerequisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

127. Syntactic Typology and Universals. Prerequisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time, and backgrounding (subordination). Data from a range of languages presented and analyzed.

C130. Language Development. (Formerly numbered 130.) Lecture, four hours; discussion, one hour. Prerequisites: courses 20, 120A, and 120B, or consent of instructor. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C235.

132. Introduction to Psycholinguistics. Prerequisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferring, speech error models of sentence production, and computation of syntactic structure during production.

C135. Neurolinguistics. Lecture, four hours; discussion, one hour. Prerequisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and pathological hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235.

140. Linguistics in Relation to Language Teaching. Prerequisites: courses 120A, 120B. Aspects of linguistics in relation to teaching of language, with particular focus on special problems entailed in teaching non-European languages.

M146. Language in Culture. (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology.

M150. Introduction to Indo-European Linguistics. (Same as Indo-European Studies M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

160. Field Methods (6 units). Discussion, four hours; individual or group sessions, one to two hours. Prerequisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

165A. Phonology II. Prerequisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar.

165B. Syntax II. Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics.

170. Language and Society: Introduction to Sociolinguistics. Prerequisite: course 20 or consent of instructor. Study of patterned variation of language and society; social dialects and social styles in language; problems of multilingual societies.
M176A. Structure of Japanese I. (Same as Japapane CM122.) Lecture, three hours. Prerequisites: Japapane 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly-dio-
syncratic characteristics of Japanese syntax and se-
relatons in light of word-order typology and universal
M176B. Structure of Japanese II. (Same as Japapane CM123.) Lecture, three hours. Prerequisites: two
years of Japanese, or one year of Japanese and some
knowledge of linguistics. Discussion of major syntac-
tic, semantic, and pragmatic characteristics of Japanese in
light of a grammar of the language, with brief introduction
to formation, typological features, and phonological
M178. Contrastive Analysis of Japanese and Korean. (Same as Korean CM127 or Phonetics CM127.) Lecture, three hours. Prerequisites: two
years of Japanese or Korean, or one introductory lin-
guistics course. Critical reading and discussion of se-
lected current research papers in syntax, pragmatics,
discourse, and sociolinguistics from perspective of
contrastive study of Japanese and Korean. May be
repeated for credit with consent of instructor.
C180. Mathematical Linguistics I. Prerequisites: courses 120B, 180, and prior knowledge of
C180B. Natural Language Processing II. Prerequi-
tive: course C185A/C209A or consent of instructor.
Extensions of basic language processing techniques
to natural language processing. Recent models of
syntactic, semantic, and discourse analysis, with
particular attention to their linguistic sophistication
and psychological plausibility. Concurrently scheduled
with course C209B.
195. Senior Essay. Prerequisite: consent of instructor.
Limited to senior linguistics majors. Extended piece
of writing is undertaken on a linguistic topic selected by
the student to be completed under supervision of a
faculty member. Consult professor in charge to enroll.
196A. Honors Essay. Prerequisites: 3.5 GPA, course
165A/200A or 165B/200B (may be taken concurrently).
Recommended (but not required): completion of both
courses 165A and 165B (or 200A and 200B) before or
during term in which course 196A is taken. Draft of
extended piece of writing on a linguistic topic selected by
the student is prepared under supervision of a fac-
culty member. Consult professor in charge to enroll. In
Progress, designed to be given only on completion of
course 196B). 196B. Honors Essay (2 units). Prerequisite: course
196A. Piece of writing drafted in course 196A is pre-
sented in seminar, and put into final form under supervision of a faculty member. Consult pro-
fessor in charge to enroll.
197. Special Topics in Linguistics. Prerequisite: course 1 or 20 or consent of instructor. Variable topics
selected from any undergraduate linguistics courses
and seminars. May be repeated for credit with topic
change.
199. Special Studies in Linguistics (2 to 4 units). Prerequisites: courses 120A, 120B, consent of in-
structor. May be repeated for credit.
Graduate Courses
200A. Phonological Theory I. Prerequisite: gradu-
an in course 120B or equivalent course in phonology. Course
200A and 201 form two-course survey of current re-
search in phonological theory. Interaction of phonol-
gy with morphology and syntax, syllable structure,
stress.
200B. Syntactic Theory I. Prerequisite: graduate standing in linguistics or grade of A in course 120B or
equivalent course in syntax. In-depth introduction
to selected topics in theory of constituent structure
and syntax of predicates, arguments, and grammaticai
relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon,
grammatical features, and function-changing rules, head-comple-
ment relations.
201. Phonological Theory II. Prerequisite: course
200A. Continuation of course 200A. Second course in
survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, un-
derspecification, prosodic morphology.
202. Language Change. Prerequisites: courses 110, 200A, 200B. Survey of current theories and research
problems in language change.
203. Phonetic Theory. Prerequisite: course 120A. Preliminaries to speech analysis. Functional anatomy
of vocal organs; fundamental principles of acoustics and
of acoustic theory of speech production; issues in
perception of speech; nature and design of feature
systems for phonetic and phonological analysis.
204. Experimental Phonetics. Prerequisite: course
103 or equivalent. Use of laboratory equipment to
investigate articulatory, acoustic, and perceptual
properties of speech. Topics include experimental de-
sign and statistics; theoretical basis of acoustic struc-
ture of speech sounds; computer-based speech pro-
cessing, analysis, and modeling; perceptual and
acoustic evaluation of synthetic speech.
205. Morphological Theory. Prerequisites: courses
200A, 200B. Survey of current theories and research
problems in theory of morphology: morphological structure; derivational and inflectional morphology; re-
lationship of morphology to phonology, syntax, and the
word.
206. Syntactic Theory II. Prerequisite: course 200B or
consent of instructor. In-depth introduction to se-
lected topics in theory of movement processes and
topics selected from following areas: WH-movement
and related rules, subcategorization and other constraints
on movement; ECP and related conditions on distri-
bution of empty categories; responsive pronoun con-
structions; parametric variation in movement con-
structions; LF WH-movement, filters, reconstruction;
paratactic gaps, barriers theory; control theory; null sub-
ject parameter.
207. Formal Semantics. Prerequisite: course C180/C208 or equivalent. Survey of current approaches to
model-theoretic semantics and its relation to current
linguistic theory. Approaches include generalized
categorial grammars, Montague grammar, Boolean-
based systems, generalized quantifier theory, logical
form.
208. Mathematical Linguistics I. Prerequisites: courses 120A, 120B, 165B/200B (may be taken con-
currently). Prior mathematics knowledge not as-
sumed. Introduction to selected topics in set theory, logic, formal grammar, automata theory, with elemen-
tary applications to linguistics. Topics vary each term. Concurrently scheduled with course C180. Graduate students expected to complete additional problem sets.
C209A. Natural Language Processing I. Prerequi-
ts: courses 120B, C180, Program in Computing
108. Recommended: course 165B or 200B, Program
in Computing 50. Survey of natural language,
processing, including basic syntactic pars-
ing strategies, with brief glimpses of semantic repre-
sentation, reasoning, and response generation. Con-
currently scheduled with course C209B.
C209B. Natural Language Processing II. Prerequi-
ts: course C185A/C209A or consent of instructor.
Extensions of basic language processing techniques
to natural language processing. Recent models of
syntactic, semantic, and discourse analysis, with
particular attention to their linguistic sophistication
and psychological plausibility. Concurrently scheduled
with course C185B.
210A. Field Methods I (6 units). Prerequisites: courses
200A, 200B, grade of B or better in course 103 or
in examination on practical phonetics. Analysis of a
language unknown to members of class from data elic-
ted from a native speaker of the language. Term pa-
ters to be relatively full descriptive sketches of the lan-
guage. May be repeated for credit with topic change.
210B. Field Methods II (6 units). Prerequisite: course
210A in preceding term. Because different languages are investigated each term, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, con-
tinuation must be in same section. May be repeated for credit with topic change.
212. Learnability Theory. Prerequisite: course
C180/C208 or consent of instructor. Survey of some of
most significant results on capabilities of learners,
given precise assumptions about their memory, time,
and computational power, and precise assumptions about
information provided by the environment.
213A. Grammatical Development. (Formerly num-
bered 213.) Prerequisites: courses 200A, 200B. Rec-
ommended: course C130/C233. Survey of theoretical perspectives and contemporary empirical research in
development of syntax and other components of
grammar, with particular emphasis on acquisition the-
ory, linguistic theory, and issues of learnability.
213B. Brain Bases for Language. Prerequisites: courses
200A, 200B. Recommended: course C135/
235. Survey of theoretical perspectives and contem-
porary empirical research in neurologial and cogni-
tive basis for language, language development, and
language breakdown.
214. Survey of Current Syntactic Theories. Prerequi-
site: course 206. Survey of several current syn-
tactic theories, compared and contrasted with
the theory discussed in course 206, from point of view of
theories' relative descriptive and explanatory power.
215. Syntactic Typology. Prerequisite: course 200B. Current results in word-order universals; genetic
classification of the world's languages; cross-lang-
guage properties of specific construction types,
including relative clauses, passives, positive and nega-
tive occurrence of several grammatical systems: agreement systems, deixis systems, and languages.
216. Mathematical Linguistics II. Prerequisite: course
C180/C208 or consent of instructor. Applica-
tions of automata and formal language theory to nat-
ural language. Choice: whether natural languages are
finite state, context free, context sensitive;
categorial grammar, indexed grammar, ID/LP grammar, tree adjoining grammar, feature systems, languages
as models of first-order theories.
220. Linguistic Areas. Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 205B/205B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Ab- original North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

225. Linguistic Structures. Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 165B/200B. Phonological and grammatical structures in the selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

230. History of Linguistics. Prerequisites: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

C233. Language Development. Lecture, four hours; discussion, one hour. Prerequisites: courses 20, 120A, and 120B, or consent of instructor. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language development and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphosyntax, and word structure. S/U grading (credit to be given only on completion of course 233).

C235. Neurolinguistics. Prerequisites: courses 1 or 20, and 130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C135. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth.

M246C. Topics in Linguistic Anthropology. (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Seminar numbers 251 through 254 may be taken for either two or four units. If a seminar is taken for four units, a paper is required. Seminars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.

251. Topics in Phonetics and Phonology I: Proseminar (2 or 4 units). Lecture, four hours; discussion, one hour. Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. S/U grading (credit to be given only on completion of course 251).

252. Topics in Syntax and Semantics I: Proseminar (2 or 4 units). Lecture, four hours; discussion, three hours. Prerequisite: course 202. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. S/U grading (credit to be given only on completion of course 252).

253. Topics in Language Variation I: Proseminar (2 or 4 units). Prerequisite: course 202A. Course 202A, 206, 207, 214, 215, or 216 may be required. Specialized topics in language variation. May be repeated for credit. S/U grading (credit to be given only on completion of course 253).

254. Topics in Linguistics I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisite: courses 202A, 203, 204, or 205 may be required. Individual topics in syntax and semantics. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

256A. Topics in Phonetics and Phonology II: Proseminar. Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. S/U grading.

257A. Topics in Syntax and Semantics II: Proseminar. Prerequisite: course 202A. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. S/U grading.

258A. Topics in Language Variation II: Proseminar. Prerequisite: course 202A. Course 201, 203, or 204 may be required. Specialized topics in language variation. May be repeated for credit. S/U grading.

259A. Topics in Linguistics II: Proseminar. Prerequisite: course 202A. Course 201, 202, 203, 204, 205, 206, 207, 208, 209A, 209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual topics in syntax and semantics. May be repeated for credit. S/U grading.

260A. Seminar: Linguistics 260A. Specialized topics in language variation. May be repeated for credit.

260B. Seminar: Linguistics 260B. Specialized topics in language variation. May be repeated for credit.

262A. Seminar: Linguistics 262A. Specialized topics in language variation. May be repeated for credit.

262A-262B-262C. Seminars: Syntax and Semantics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be taken toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminars: Language Variation (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be taken toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminars: Special Topics in Linguistic Theory (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

275. Linguistics Colloquium. Prerequisite: completion of M.A. requirements. Specialized topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium (No credit). Prerequisites: graduate standing. Students are encouraged to present original research to the colloquium, but S/U grading will be assigned for course 276, but taken without credit by students not presenting a colloquium. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: graduate standing. Preparation: apprentice personnel employment as a teaching assistant, associated fellow, Teaching apprentice under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

411A-411B. Research Orientation (2 units each). Prerequisite: graduate standing. Sequence of lec- tures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

422. Practicum: Phonetic Data Analysis (2 units). Prerequisite: graduate standing. Teaching assistant for examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

444. M.A. Thesis Preparation Seminar. Seminar presentations, two hours. Student presentations of pro- posed topics for M.A. theses, with discussion and criti- cism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

495. College Teaching of Linguistics (2 units). Prerequisite: graduate standing. Required of all new teaching assistants, seminars, workshops, and appren- tice teaching. Topics on practical aspects of teaching, including curricu- lum development, teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree re- quirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrange- ments with USC. S/U grading.

596A. Directed Studies (1 to 8 units). Prerequisite: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis (1 to 8 units). Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individ- ually. May be repeated for credit. S/U grading.
African Languages

Lower Division Courses

1A-1B-1C. Elementary Swahili. Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania.

2A-2B-2C. Intermediate Swahili. Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C.

7A-7B-7C. Elementary Zulu. Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Major language of South Africa, mutually intelligible with other members of this group.

8A-8B-8C. Intermediate Zulu. Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C.

11A-11B-11C. Elementary Yoruba. Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of Western Nigeria.

12A-12B-12C. Intermediate Yoruba. Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C.

17. Intensive Elementary Zulu (12 units). Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A-7B-7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

18. Intensive Intermediate Zulu (12 units). Lecture, 20 hours (eight weeks). Prerequisite: course 7C or 17. Intensive instruction (equivalent to courses 8A-8B-8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

26. Intensive Intermediate Yoruba (12 units). Lecture, 20 hours (eight weeks). Prerequisite: course 11C or 25. Intensive instruction (equivalent to courses 12A-12B-12C) in Yoruba, major language of Western Nigeria.

31A-31B-31C. Elementary Bambara. Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Malinka (Malinke), Dyula, and other mutually intelligible dialects.

32A-32B-32C. Intermediate Bambara. Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C.

35. Intensive Elementary Bambara (12 units). Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 31A-31B-31C) in Bambara, major language of Mali and contiguous areas.

36. Intensive Intermediate Bambara (12 units). Lecture, 20 hours (eight weeks). Prerequisite: course 31C or 35. Intensive instruction (equivalent to courses 32A-32B-32C) in Bambara, major language of Mali and contiguous areas.

41A-41B-41C. Elementary Hausa. Lecture, 5 hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of Northern Nigeria and adjacent areas.

42A-42B-42C. Intermediate Hausa. Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C.

45. Intensive Elementary Hausa (12 units). Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 41A-41B-41C) in Hausa, major language of Northern Nigeria and adjacent areas.

46. Intensive Intermediate Hausa (12 units). Lecture, 20 hours (eight weeks). Prerequisite: course 41C or 45. Intensive instruction (equivalent to courses 42A-42B-42C) in Hausa, major language of Northern Nigeria and adjacent areas.

51A-51B-51C. Elementary Amharic. Lecture, five hours. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

61A-61B-61C. Elementary Wolof. Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegal.

62A-62B-62C. Intermediate Wolof. Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

9. Elementary and Intermediate Studies in African Languages (1 to 5 units). Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa.

Upper Division Courses

103A-103B-103C. Advanced Swahili. Prerequisite: course 2C. Course 103A is prerequisite to 103B, which is prerequisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili.

109A-109B-109C. Advanced Wolof. Lecture, five hours; outside study, seven hours. Prerequisite: course 8C. Course 109A is prerequisite to 109B, which is prerequisite to 109C. Readings in Wolof literature and the contemporary press. Discussions mainly in Wolof.

123A-123B-123C. Advanced Yoruba. Prerequisite: course 12C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

133A-133B-133C. Advanced Bambara. Prerequisite: course 32C. Course 133A is prerequisite to 133B, which is prerequisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara.

143A-143B-143C. Advanced Hausa. Prerequisite: course 42C. Course 143A is prerequisite to 143B, which is prerequisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa.

153A-153B-153C. Advanced Amharic. Lecture, five hours (15 hours for intensive course). Prerequisite: course 52C. Course 153A is prerequisite to 153B, which is prerequisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

M190. Survey of African Languages. (Same as Linguistics M115.) Prerequisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

199. Special Studies in African Languages (1 to 6 units). Prerequisite: consent of instructor. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

Graduate Courses

202A-202B-202C. Comparative Bantu. Prerequisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu.

596. Directed Studies (1 to 8 units). Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Indigenous Languages of the Americas

Lower Division Courses

18A-18B-18C. Elementary Quechua. Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

Upper Division Courses

119A-119B-119C. Advanced Quechua. Prerequisite: course 18C. Course 119A is prerequisite to 119B, which is prerequisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua.

Graduate Course

596. Directed Studies in Quechua (1 to 8 units). Prerequisites: courses 119A-119B-119C or consent of instructor. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Scope and Objectives
The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers. The school offers an undergraduate minor in accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

Undergraduate Study

Accounting Minor
Admission is competitive and based on a 3.0 grade-point average in the lower division preparation courses. Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the minor. Transfer credit for any of the courses is subject to department approval and is considered only for requisite coursework. Decisions on admission to the minor are made by the Anderson School. The prerequisite grade-point average and completion of the preparation courses do not guarantee admission to the program.

Required Lower Division Courses: Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); Management 1A-1B; Mathematics 3A, 3B (higher-level courses and/or Advanced Placement Test credit may be substituted).

Required Upper Division Courses: Management 120A, 120B, 122, 127A, and three courses from 108, 123, 124, 127B, 128.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degrees
The John E. Anderson Graduate School of Management offers the Master of Science (M.S.) degree and the Master of Business Administration (M.B.A.) degree, as well as cooperative M.B.A. degree with other programs. In addition, the school offers the Executive M.B.A. Program and the M.B.A. for the Fully Employed (FEMBA).

Master of Business Administration Degree
Admission
Although no specific undergraduate major is required for entrance, applicants should complete elementary algebra and differential calculus before entering the M.B.A. program. Applicants are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to Educational Testing Service, Box 966-R, Princeton, NJ 08541, (609) 921-9000. International applicants who do not hold degrees from universities or colleges where English is the primary language are required to take the Test of English as a Foreign Language (TOEFL). Inquiries can be addressed to (609) 771-7100.

The M.B.A. program application, which includes the application for admission to graduate status, is required. Admission is for the Fall Quarter only. Completed applications, with full documentation, must be filed directly with the Anderson School Office of Admissions by April 4. Early application is strongly advised.

Consideration is given to the academic record, score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and several written essays and letters of recommendation. Preference is given to those who have had full-time management-related work experience since completing the bachelor's degree. Those few applicants admitted directly from a baccalaureate program may choose to work for up to three years before entering graduate school. No other admission deferrals are granted.

Applications and information about the M.B.A. program are available from the M.B.A. Program Admissions Office, The Anderson School, B201 Gold Hall, Box 951481, Los Angeles, CA 90095-1481.

Cooperative Degrees
M.B.A./J.D.
The School of Law and the Anderson School offer a concurrent degree program which enables students to prepare for a career where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public ser-
vice, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Application should be made to both schools simultaneously.

**M.B.A./M.S. Computer Science**

The Anderson School and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Application materials should be requested separately from both schools.

**M.B.A./M.L.I.S.**

Jointly sponsored by the Department of Library and Information Science (Graduate School of Education and Information Studies) and the Anderson School, this three-year concurrent degree program is designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields. Application materials should be requested separately from both schools.

**M.B.A./M.P.H.**

The Anderson School and the School of Public Health offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges. Application materials should be requested separately from both schools.

**M.B.A./M.A. Latin American Studies**

The Anderson School and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Application materials should be requested separately from both schools.

**M.B.A./M.A. Urban Planning**

The Anderson School and the Department of Urban Planning (School of Public Policy and Social Research) offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Application materials should be requested separately from both schools.

**M.B.A./M.S.N.**

The Anderson School and the School of Nursing offer a three-year concurrent degree program designed for students who seek careers in hospital and nursing administration. By providing knowledge of both management and clinical care issues, the program prepares individuals for management positions in an increasingly complex environment. Application materials should be requested separately from both schools.

**Areas of Study**

Accounting; business economics; decision sciences; entertainment management; entrepreneurial studies; finance; human resources and organizational behavior; information systems; international business and comparative management; marketing; operations and technology management; strategy and organization; public/not-for-profit management; real estate.

**Course Requirements**

The three required elements of the M.B.A. program are the management core, the advanced electives, and the management field study. The management core courses teach the fundamental techniques and disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for one or more fields (typically two) of management work. The management field study allows an opportunity to apply knowledge gained in the program to strategic issues in real organizations.

**Management Core.** The management core consists of eight courses on subjects basic to the practice of management. These courses include one course on the management of human resources in organizations (Management 409) and seven courses in technical and functional fields (Management 402, 403, 405, 408, 410, 411, and 420).

**Management Field Study.** The two-term management field study project (courses 444A-444B) consists of teams of three to five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves in lieu of a comprehensive examination for members of the team. The field study is judged by standards applicable to professional management consulting.

**Advanced Electives.** These courses are chosen by students to focus on one or more fields of specialization within the broad realm of management. Eleven of these electives must be selected from management curriculum area or interdisciplinary studies courses. Management 404, 406, 407, and 412, formerly part of the management core, may be taken as advanced electives. Three electives may be selected from any University department, subject only to general University regulations. These free electives normally must be taken while enrolled in the program. They may support or complement the remainder of the program of study. A maximum of two four-unit Management 596 courses (independent studies) and one four-unit Management 454 course (internship) may be applied toward the 96-unit requirement. These courses count as free electives.

**Comprehensive Examination Plan**

Consult the department.

**Thesis Plan**

None.

**Executive M.B.A. Program**

**Admission**

Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to study advanced management in a high quality educational environment while continuing to work full time in their professional roles. The program is limited to 60 participants with superior academic records and a minimum of eight to 10 years of work experience with five years at the management level.

**Areas of Study**

The emphasis is on general management training; increased competence in management specialties; management of international businesses; organizational and interpersonal skills; and sophisticated understanding of the integration of businesses and their environments.

**Course Requirements**

A total of 66 units of coursework toward the degree must be completed in residence in the Executive M.B.A. program at UCLA. Completion of the intensive 24-month course of study leads to a regular M.B.A. degree. First year required courses for Fall: Management 461, 463, 473, and 474; Winter: Management 462, 464, and 468; Spring: Management 465, 467, 472 and 478. In the second year, the following courses are required: Fall: Management 466A, and 477; Winter: Management 466B, 470A, 470B, 476, or 478; Spring: Management 469, 470C, 470D, and 475. Four units of 596 course work is applicable toward the degree course requirements.

Classes are held at the Anderson School on alternating weekends, all day Friday and Saturday, with three five-day, off-campus residential sessions at the beginning of the first year and at the middle and end of the second year. The final residential session is the culmination of an international field study and is held abroad. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, UCLA,
Areas of Study
Consult the department.

Course Requirements
Students in the FEMBA program choose one of two possible formats, with classes meeting either one afternoon per week (from 1:30 to 5 p.m.) and Saturday mornings (from 8:30 a.m. to noon) or all day Saturday (8:30 a.m. to noon and 1:30 to 5 p.m.). A regular M.B.A. degree is awarded on completion of 84 units which are typically completed in three years. These required units are a combination of specified core courses and advanced electives in finance, marketing, or general management.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Master of Science
Admission
All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who do not hold a degree from an English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Three letters of recommendation must be submitted with the completed application. Program information and application materials may be obtained from the M.S./Ph.D. Programs Office, UCLA, 407 Collins Hall, Box 951481, Los Angeles, CA 90095-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 10.

Areas of Study
Decision sciences.

Course Requirements
A student entering the M.S. program is assumed to have taken calculus through differentiation and integration of several variables, two courses in probability and statistics, two quarters of computer programming, and a managerial core of courses in financial accounting, managerial economics, and managerial finance (Management 403, 405, 408). These courses can be waived on the basis of previous coursework.

The specialization consists of the following five-course methodological core: Management 203A, 210A, 210B, 210C, 216A. The specialization also includes three elective courses that typically are supportive of the thesis, along with four units of Management 598. The elective courses may be methodological in nature or may relate to management science aspects of a functional field such as operations management, information systems, or finance. Courses from other departments may also be selected.

Comprehensive Examination Plan
None.

Thesis Plan
The thesis must be finished within one year after all required coursework is completed. A student lacking a strong prerequisite background nominates a thesis committee by the fifth quarter of study and presents a proposal for committee approval at the beginning of the sixth quarter.

Doctoral Degree
Admission
Information regarding admission is the same as that listed under the M.S. degree.

Major Fields or Subdisciplines
Accounting; business economics; decision sciences; finance; human resources and organization behavior; information systems; international business and comparative management studies; marketing; operations and technology management; policy and organization.

Course Requirements
Research Preparation Requirement. The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. Students are required to take five research courses which are not part of the major field area classes taught in the Anderson School. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than the Spring Quarter of the third year of study.

Breadth Requirement. The breadth requirement consists of eight courses which are clearly outside the major field area. Students should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field of research and teaching proficiency. Three of these courses may be waived by prior coursework from a previously earned master's degree. They must be completed before taking the oral qualifying examination.

There is no formal major field course requirement. In consultation with a major field adviser, a course of study is designed which prepares the student to pass the major field examination.

Written and Oral Qualifying Examinations
Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of the Spring Quarter of the third year of study.

Students are required to present the substance of their dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, the student is advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

Management

Lower Division Courses

88. Lower Division Seminar: Special Topics in Management. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.
Upper Division Courses

107. Business Communications. Process and discipline of effective presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/N or letter grading.

122. Cost Accounting. Prerequisites: course 12B, Economics 40, or equivalent. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

123. Auditing. Lecture, three hours. Requisite: course 120B. Comprehensive study of procedures used in verification of financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/N or letter grading.

125. Special Applications in Accounting. Requisite: course 120B. Recommended: course 122. Designed for seniors. Use of "Strategic Management," a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line marginal analysis, debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/N or letter grading.

127A. Tax Principles and Policy. (Formerly numbered 127.) Requisite: course 1B. Study of fundamental income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/N or letter grading.

127B. Corporate and Partnership Taxation. Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/N or letter grading.

130A. Basic Managerial Finance. Lecture, three hours. Prerequisites: course 120A or 120B, Economics 40 or equivalent. Study of financial decision making by business firms, with emphasis on applications of economic and financial theories. Initial emphasis on financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/N or letter grading.

130B. Advanced Managerial Finance. Lecture, three hours. Prerequisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and lease contracts. Management of financial risk using options, futures, and forward contracts. Study of merger and acquisition processes and reorganization under bankruptcy laws. P/N or letter grading.

133. Investment Principles and Policies. Lecture, three hours. Prerequisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

150. Elements of Industrial Relations. Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

175. Elements of Real Estate and Urban Land Economics. Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, developing, managing, marketing, and using urban property.

182. Leadership Principles and Practice. Knowledge and skills leading to effectiveness in interpersonal situations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

190. Management Theory and Policy. Lecture, three hours. Prerequisite: course 130A. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Understanding issues in areas of planning, organizing, staffing, directing, and controlling. P/N or letter grading.

197. Special Topics in Management. Topics of special interest to undergraduate students. Specific subjects may vary each semester, depending on particular interest of instructors or students. May be repeated for credit.

199. Special Studies in Management. Lecture, three hours. Prerequisite: consent of instructor. Designed for seniors. Study of topics of interest to students in particular areas of management. Laboratory.

Graduate Courses

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, students must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

200. Advanced Microeconomics. Seminar, three hours. Prerequisites: course 405 or consent of instructor. Study of the behavior of individual economic agents and the determination of equilibrium prices and quantities. Comparative analysis of price and quantity systems, and the political process.

201B. Econometrics and Business Forecasting. Lecture, three hours. Prerequisite: consent of instructor. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and selected results. Practical applications extensively developed in student projects.

202A. Regulation. Lecture, three hours. Prerequisite: course 405 or consent of instructor. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process.

202B. Analysis of Competitive Strategy. Discussion, three hours. Prerequisites: courses 402 and 405, or consent of instructor. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

202C. Empirical Studies in Industrial Organization. Prerequisite: course 202B. Investigation of factors influencing size of industries, their size distribution, and conditions of entry and exit. Implications of such industry characteristics, derived for decisions having to do with firm output, prices, advertising, and research and development.

203A. Economics of Decision. Prerequisites: rudiments of economic theory, calculus, probability, and statistics. Basics of single-person decision theory from a normative viewpoint. Expected utility theory with objective and subjective probability. Departures from expected utility behavior. Introduction to multi-person decision theory.

203B. Economics of Information. Discussion, three hours. Prerequisites: rudiments of economic theory of the firm, calculus, probability, and statistics; course 203A or consent of instructor. Optimal decision and information rules. Amount, cost, and value of information. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment.

205A. International Business Economics. Prerequisites: courses 405 and 406, or consent of instructor. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and inter-national monetary problems, studied for their influence on organization and operation of the international corporation.

205B. Comparative Market Structure and Competition. Prerequisite: course 205A or consent of instructor. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.
205C. Business Forecasting for Foreign Economies. Prerequisite: course 201A or consent of instructor. An introduction to forecasting techniques. Applications to business activity, population, industrial structure, productivity, and Gross Domestic Product and its components for selected countries. S/U or letter grading.

207. Resource Administration of Nonmarket Activities. Seminar, three hours. Prerequisite: course 405 or consent of instructor. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in the behavior of organizations. Application of microeconomics, particularly utility maximization.

208. Public Services and Private Functions. Prerequisites: courses 405 and 406, or consent of instructor. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

209. Selected Topics in Business Economics. Lectures, two hours. Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

210A. Mathematical Programming. Discussion, three hours. Prerequisite: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of problems. May be repeated for credit.

210B. Applied Stochastic Processes. Discussion, three hours. Prerequisite: Mathematics M150A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation and characterization and computation of optimal policies, often via dynamic programming; applications to inventory, queuing maintenance, reliability, and replacement problems.

210C. Network Flows and Integer Programming. Prerequisite: linear programming. Theory and techniques of discrete and network-related mathematical programming models in management science. Application to various allocation, coordination, operating, and planning problems. Emphasis on fundamentals, efficient computational methods, and keys to successful practical applications.

211A. Nonlinear Mathematical Programming. Prerequisite: course 210A, Mathematics 32A, or equivalent. Theoretical and computational aspects of optimization and applications of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; use of current computer codes and computational experience.

211B. Large-Scale Mathematical Programming. Prerequisite: course 210A or equivalent. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints.

212A. Decision Sciences Models I. Requisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations, management information systems, and project management. S/U or letter grading.

212B. Decision Sciences Models II. Requisites: course 212A, Mathematics 32A. Broad survey of non-linear, stochastic, probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

212C. Decision Sciences Models III. Requisites: courses 212A, 212B. In-depth reviews of actual decision sciences applications. Emphasis on professional skills needed for successful practical applications. S/U or letter grading.

213A. Intermediate Probability and Statistics. Prerequisite: course 402 or equivalent. Introduction to probability and statistics. Simple and multiple linear regression and correlation, fixed, random, and mixed models analysis of variance models and nonparametric statistics, all as they apply to management studies.

213B. Statistical Methods in Management. Prerequisite: course 213A or consent of instructor. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminate analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

214B. Behavioral Science Models. Prerequisite: consent of instructor. Formulation, analysis, and interpretation of mathematical models in behavioral sciences. Emphasis on statistical techniques including individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems.

215D. Time-Series Analysis. Prerequisite: course 213B or consent of instructor. Univariate Box/Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models. Granger causality, multiple time-series analyses. Discussion of current computer applications in modeling and forecasting.

216A. Simulation of Operational Systems. Discussion, three hours. Prerequisite: background in FORTAN, TRAN, FL/1, P/LC, or other batch computing language available on campus and in basic statistics (course 402 or equivalent) and modeling (course 407 or equivalent). Computer simulation methodology, including design, validation, operating procedures, and analysis of results of simulation experiments. Applications of simulation to management problems.

217A. Decision Analysis. Lecture, three hours. Prerequisite: course 402 or equivalent. Framework for integrating optimization and decision-making under uncertainty. Topics include decision trees, value of information, subjective probability, attitude toward risk, sensitivity analysis, and multicriteria decision making. Applications to business problems, including new product development, litigation, treasure hunting, and bidding. S/U or letter grading.

217B. Game Theory. Prerequisite: course 213A or equivalent. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and non-zero-sum games, two-person and many-person games, state of the art, philosophical and computational limitations, relations with individual and group decision making.

218A. Selected Topics in Decision Sciences (1 to 4 units). Newly developing topics and viewpoints. Topics include reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit. S/U or letter grading.

218C. Selected Topics in Business Statistics (1 to 4 units). Prerequisite: consent of instructor. Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors announced in advance. May be repeated for credit.

218X-218Y-218Z. Current Issues in Decision Sciences. Prerequisite: course 403. Active participation in discussion, three hours. Current issues and research on a variety of topics in general area of decision sciences. May be repeated for credit. In Progress and S/U grading.

220B. Intermediate Financial Accounting II. Prerequisite: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, limited liability corporations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

223. Auditing. Prerequisite: course 403. Theory and practice underlying auditors' examination and reporting on financial statements, including professional ethics, internal control, and selection and application of auditing procedures, with emphasis on generally accepted auditing standards.

225. Financial Management. Prerequisite: course 403 or 404. Comparative analysis of corporate financial policies and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development.

227A. Taxation Principles and Policy. Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy.

227B. Taxation and Business Planning. Discussion, three hours. Prerequisites: courses 220A or 220B, 230, 402. Issues of accounting information evaluation, restructuring, and emphasis on uses of financial statements by decision makers external to the firm (e.g., investors, creditors). Topics include load decisions, bankruptcy prediction, and interpreting earnings.

229A. Special Topics in Accounting. Lecture, three hours. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

229B. Empirical Research in Accounting. Lecture, three hours. Prerequisites: training in econometrics and doctoral standing, or consent of instructor. Introductory to empirical research in accounting literature, focusing on role that accounting information plays in formation of capital market prices.

229X-229Y-229Z. Accounting Workshops (1 unit, 1 unit, 2 units). Discussion, two hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting literature, emphasizing through discussion of papers during colloquium. May be repeated for credit. S/U grading.

229B. Intermediate Financial Accounting II. Prerequisite: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, limited liability corporations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

229C. Advanced Financial Accounting. Prerequisites: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, limited liability corporations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

229D. Financial Management. Prerequisite: course 403 or 404. Comparative analysis of corporate financial policies and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development.

229E. Taxation Principles and Policy. Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy.

229F. Taxation and Business Planning. Discussion, three hours. Prerequisite: course 403. Study of tax issues arising in formation, operation, and termination of a corporation. Specific emphasis on structuring shareholders' transactions involving dividends, redemptions, liquidations, acquisitions, and capital structure.

229G. Evaluating Financial Statement Information. Lecture, three hours. Prerequisites: courses 220A or 220B, 402. Issues of accounting information evaluation, restructuring, and emphasis on uses of financial statements by decision makers external to the firm (e.g., investors, creditors). Topics include load decisions, bankruptcy prediction, and interpreting earnings.

229H. Special Topics in Accounting. Lecture, three hours. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

229I. Empirical Research in Accounting. Lecture, three hours. Prerequisites: training in econometrics and doctoral standing, or consent of instructor. Introductory to empirical research in accounting literature, focusing on role that accounting information plays in formation of capital market prices.

229J. Accounting Workshops (1 unit, 1 unit, 2 units). Discussion, two hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting literature, emphasizing through discussion of papers during colloquium. May be repeated for credit. S/U grading.
230. Theory of Finance. Lecture, three hours. Pre- requisite: course 408. Primary focus on valuation of corporate securities under uncertainty. Capital asset pricing model presented rigor- ously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on current problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

231A. Profit Sector Financial Policy. Prerequisite: course 230. Identifies and analyzes financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion.

231B. Nonprofit Sector Financial Policy. Discussion, three hours. Prerequisite: course 408. Identifying and solving financial problems for all types of non- profit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organi- zations. Use of cases.

231D. Takeovers, Restructuring, and Corporate Governance. Lecture, three hours. Prerequisite: course 230. Process by which corporate control trans- actions take place; role of market for corporate control in leading to economic restructuring and shifts in re- source allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by manage- ment. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of the firm. S/U or letter grading.

231E. Managing Finance and Financing the Emerging Enterprise. Prerequisites: courses 230, 403, 408, second-year standing. Emphasis on financial, control, and investment decision-making processes in rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropria- te to securing organizations’ money require- ments.

232A. Security Analysis and Investment Manage- ment. Lecture, three hours. Prerequisite: course 230. Topics include security valuation, application of portfo- lio theory to investment decisions, performance evalu- ation, and some major portfolio manage- ment strategies. S/U or letter grading.

232B. Fixed-Income Markets. Lecture, three hours. Prerequisites: courses 230, 233A, demonstrable train- ing in statistical techniques. Analysis of fixed-income markets; institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitiza- tion. S/U or letter grading.

232D. Option Markets. Prerequisite: course 230. Or- ganization and role of organized derivative markets, including listed and OTC options and futures: arbi- trage and hedging relationships, valuation of deriva- tive trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writ- ing a term paper analyzing their strategies. S/U or let- ter grading.

233A. Money and Capital Markets. Prerequisite: course 230. Application of interest theory and flow funds analysis, with emphasis on capital markets, money markets, and financial instruments. Study of flows of funds from credit markets. Analysis of costs of capital in individual industries.

233C. Speculative Markets. Prerequisite: course 230. Study of theory and evidence of capital market effi- ciency, including stock market, bond market, commod- ity futures market, options market, money markets, and foreign exchange markets.

234A. International Financial Markets. Lecture, three hours. Prerequisites: courses 205A, 230. Con- ceptions of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on un- derlying economic principles, although where rele- vant, international developments helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

234B. Financial Management of Multinational Cor- porations. Lecture, three hours. Prerequisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other finan- cial officer within the company. Topics include measur- ing foreign exchange risk, managing that risk with both contractual and operating strategies, foreign invest- ment decisions, capital budgeting and cost of capital in an international perspective, political risk, working cap- ital management, and performance evaluation and con- trol.

236. Special Topics in Finance. Prerequisites: course 230, consent of instructor. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

239A. Theory of Exchanges under Uncertainty. Prerequi- site: course 230, consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to exchange and allocative efficiency. Pri- marily intended for Ph.D. students, but well-prepared master’s students may find course useful in their career preparation.

239B. Theory of Investment under Uncertainty. Prerequi- sites: courses 230 and 239A, or consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to exchange and allocative efficiency. Pri- marily intended for Ph.D. students, but well-prepared master’s students may find course useful in their ca- reer preparation.

239C. Empirical Research in Finance. Discussion, three hours. Prerequisites: course 230, training in econometrics, consent of instructor. In-depth study of empirical research in the field of finance, statistical methodology and methodology of research literature. S/U or letter grading.

239X-239Y. Financial Workshops (1 unit, 1 unit, 2 units). Discussion, 90 minutes. Prerequisite: doctoral standing. Designed to develop ability to criti- cally evaluate financial research. Papers presented in colloquium format in first week. Active participation and intellectual interchange encour- aged through discussion of papers in sessions prior to workshops, as well as during colloquium. May be re- peated for credit. S/U grading.

240A. The Operating Manager. Definition and anal- ysis of problems of production planning, inventory man- agement, quality control, system design, and im- plementations from a manager’s perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new method- ologies and techniques.

240B. Operations Planning, Scheduling, and Control. Prerequisite: course 407 or consent of instruc- tor. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and auto- mated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

240D. Operations Strategy and Policy. Discussion, three hours. Definition and scope of operations strat- egy and its relation to corporate strategy, importance of productivity and its amplification in global competi- tion, positioning the system to match market require- ments, capacity decisions, product and process tech- nology, work force and job design, strategic implications of operating decisions, suppliers and vertical integration. Case studies involving strategic issues in manufacturing and nonmanufacturing situa- tions.

240E. Managing Entrepreneurial Operations. Lec- ture, three hours. Prerequisite: second-year standing or consent of instructor. Exploration of operating is- sues involved in managing entrepreneurial enter- prises. Integrative course, building on methodologies, principles, and concepts provided in prerequisite func- tional and strategic core courses. Use of extensive readings and case studies to develop skills and philo- sophical basis for applying managerial concepts to entrepreneurial operation.

240F. Supply Chain Management. Lecture, three hours. Prerequisite: course 410. Business environment today is characterized by globalized operations, in- tense competition, rapid turnover in technology, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many indus- tries competition has moved from the firm level to the supply chain level. Provides understanding of strate- gic, tactical, and operational issues in supply chain management. S/U or letter grading.

241A. Managing Technology for Competitive Ad- vantage. Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological inno- vation on operations managers at both strategic and operational levels. Course is integrative in nature.

241B. Project Management. Prerequisite: course 407 or equivalent. Management of development proj- ects. Decision-making environment, economic analy- sis, network analysis, scheduling, and control of de- velopment projects. Sequential and aggregate development decisions.

242A. Models for Operations Planning, Schedul- ing, and Control. Prerequisite: doctoral standing or consent of instructor. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed op- erations scheduling and control.

242B. Models for Operations Systems Design. Prerequisite: doctoral standing. Survey of research lit- erature on models for design of manufacturing and service systems, including long-range forecasting, operational economies, capacity, location, facilities, processes/technology, work, and work structures.

243B. Inventory Theory. Prerequisite: course 210B or consent of instructor. General discussion of inventory models, emphasizing development of the form of optimal policies and efficient computerization methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

243C. Scheduling Models for Intermittent Systems. Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research on coordination of computer models, and man/machine interaction.

243X-243Y-243Z. Operations and Technology Management Seminars (1 unit, 1 unit, 2 units). Discussion, 90 minutes to three hours. Prerequisite: doctoral standing. Required of all students in operations and technology management concentrations during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

244X-244Y-244Z. Research in Operations and Technology Management (1 unit, 1 unit, 2 units). Prerequisite: doctoral standing. Normally taken in first and second years of doctoral study. Survey of research literature in operations and technology management concentration during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit with topic change.

245. Special Topics in Operations and Technology Management. Lecture, three hours. Studies of advanced or specialized interest in operations management. Emphasis on recent developments and application of specialized knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.

246A. Strategy/Policy Analysis and Formulation in Public and Private Nonprofit Sectors. Prerequisite: completion of management analysis requirement for M.B.A. program. Application of several techniques for strategy/ policy analysis and formulation. Specific topics include forecasting/scenario writing, multiple objective decision making, cost analysis, risk/benefit analysis, and social experimentation. Limitations of methodology examined and concepts illustrated through current applications and case studies.

246B. Budgeting and Resource Allocations in Public Sector. Prerequisite: courses 403 and 408, or consent of instructor. Resource allocation objectives/techniques used in federal, state, and local government. Budget analysis as a planning device, vehicle for allocation decision making, financial control mechanism, crucial for political choice. Provides some insight into staff functions performed by those responsible for resource allocation.

246C. Management in Public and Private Nonprofit Sectors. Prerequisite: graduate standing. Examination and analysis of managerial systems in the three sectors of U.S. society: unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

247A. Environment of the Art World. Prerequisite: consent of instructor. Consideration and analysis of political, social, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

247B. Role of Management in Artistic Decision Making. Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment, and arts, and artistic value systems of arts organizations.

247C. Legal Environment of Arts Management. Prerequisite: consent of instructor. Exploration of way in which arts, role of the law vis-à-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unresolved problems and issues in areas of interaction.

248A. Strategic Management in the Entertainment Industry. Discussion, three hours. Prerequisites: courses 403, 405, 406, 408, and 420, or consent of instructor. Examination of the theoretical and practical aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; the distribution of ancillary markets (pay TV, videocassettes, syndication).

249. Special Topics in Public and Private Nonprofit Management. Prerequisite: consent of instructor. Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit management. Topics vary each term. May be repeated for credit with topic change.

249B. Special Topics in Arts Management. Prerequisite: consent of instructor. Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

M250A. Labor Relations: Process and Law. (Formerly numbered 250A.) Lecture, three hours. Prerequisite: graduate standing. Consideration, at advanced level, of collective bargaining process: labor market for agreements; control of contract, law of labor-management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

M250B. Human Resource Management: Process and Law. Prerequisite: course M250A. Systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer/employee relations.

250C. Behavioral Foundations of Human Resource Management. Prerequisite: course 250B or consent of instructor. Topics include development and training, human resource accounting; behavioral foundations of participating management: motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

251. Managing Human Resources. Management of people in organizations, intended for managers as well as personnel specialists. Examination of manpower and strategic issues in organizations. Focus is on managing human resources in terms of the roles or systems that perform specialized human resource functions; and (3) issues facing top management which involves management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

252. Systems of Employee/Management Participation. Prerequisite: consent of instructor. Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

253. Employee Discipline, Discharge, and Grievance/Appeal Settlement. Prerequisite: graduate standing. Analysis of conflict in the employment relation. Study of theoretical issues: trend. (Same as Policy Studies M239.) Lecture, three hours. Prerequisite: consent of instructor. Examination of the theoretical and practical aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; the distribution of ancillary markets (pay TV, videocassettes, syndication).

M255. Comparative Industrial Relations. (Formerly numbered 255.) (Same as Policy Studies M231.) Lecture, three hours. Prerequisite: course 409 or elementary knowledge of labor economics. At national levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutional, philosophical, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

256. Seminar: Human Resource Management and Industrial Relations. Discussion, three hours. Prerequisites: courses M250A, 250B, 250C. Capstone seminar for students interested in human resource management and industrial relations. Visiting lecturers emphasize recent developments in the field; students prepare seminar papers.

257. Human Resource Management in Creative and Nonprofit Sectors. Prerequisite: graduate standing. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

258. Selected Topics in Industrial Relations (1 to 4 units). Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in industrial relations. Emphasis on current contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit with topic change.

259A. Individuals and Groups in Human Systems. Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, and small group studies. Variety of methods represented, including clinical and cross-cultural approaches. S/U or letter grading.

259B. Advanced Studies in Human Resource Management. Lecture, three hours. Prerequisite: doctoral standing. Doctoral-level survey of research literature assessing how management uses the human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including management as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

M259C. Labor Markets and Public Policy. (Formerly numbered 259C.) Lecture, three hours. Graduate-level survey of research literature on environmental institutions that impinge on work organizations—chiefly labor markets, labor unions, and public policy. Current research in economics, industrial relations, political science, and sociology, with emphasis on international and comparative dimensions of topics covered. S/U or letter grading.

260A. Advanced Marketing Management. Prerequisite: course 411 or consent of instructor. Decision-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

260B. Marketing Strategy and Planning. Lecture, three hours. Prerequisite: course 411 or consent of instructor. Development of a framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing process.
261A. Management in the Distribution Channel. Lecture, three hours. Prerequisite: course 411 or consent of instructor. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

262. Price Policies. Lecture, three hours. Prerequisite: courses 408, 411. Consideration of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

263A. Consumer Behavior. Prerequisite: course 411 or consent of instructor. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, social groups, demographic variables, social class, and culture on formation of consumers’ attitudes, consumptions, and purchasing behavior. Analysis of consumer decision-making processes and buying behavior.

264A. Marketing Research: Design and Evaluation. Lecture, three hours. Prerequisite: course 411 or consent of instructor. Intended for prospective users of research results rather than for specialists in research. Marketing research: gathering, analyzing, and interpreting marketing data. Prerequisite: course 264A or consent of instructor. Analysis of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

265B. Advertising and Marketing Communications. Lecture, three hours. Prerequisite: course 411 or consent of instructor. Description of advertising, promotion, and marketing communications. Marketing communications: the role of advertising, sales promotion, public relations, and direct marketing in the promotion mix. The development of advertising campaigns, the role of marketing communications in brand building, and the relationship between advertising and sales force.

266B. Advertising and Marketing Communications. Lecture, three hours. Prerequisite: course 411 or consent of instructor. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

269A. Theory in Marketing. Prerequisite: consent of instructor. Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

269B. Research in Marketing Management. Discussion, three hours. Prerequisite: consent of instructor. Intended for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, marketing channels, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

269C. Quantitative Research in Marketing. Prerequisite: consent of instructor. Intended for Ph.D. students. Examination of state-of-the-art research in marketing science, with increased sensitivity to limitations of current research. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

269D. Behavioral Research in Marketing. Prerequisite: consent of instructor. Advanced topics in marketing research. Topics include choice models, demand analysis, and market share forecasting. Emphasis on interdisciplinary applications of marketing research.

269E. Special Research Topics in Marketing. Prerequisite: doctoral standing. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

269X-269Z. Workshops: Marketing (1 unit, 1 unit, 2 units). Prerequisite: doctoral standing. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

270B. Decision Support Systems. Lecture, three hours. Prerequisite: course 404. Systems for support of individual and group decision making and collaboration. Expert systems and knowledge-based systems.

270C. Application Frontiers in Information Systems. Lecture, three hours. Prerequisite: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce. Assessment of results of research and development. Prerequisite: consent of instructor. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

271C. Emergent Technologies in Information Systems. Discussion, three hours. Prerequisite: course 404. Special topics in new and emergent technologies in information systems and emerging trends such as multimedia, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

272A. Information Systems Development. Discussion, three hours. Methods and tools for information systems design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Classic and alternative approaches, such as rapid prototyping, system integration. Automated support. S/U or letter grading.

274A. Special Topics in Information Systems. Discussion, three hours. Designed for doctoral students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

278A. Urban Real Estate Financing and Investing. Discussion, three hours. Prerequisite: consent of instructor. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and demographic trends to evaluate real estate investment opportunities in case studies and short cases to illustrate development of investment strategies.

278B. Securities. Lecture, one unit, one unit, two units. Prerequisite: second-year graduate standing or consent of instructor. Designed for students who wish to pursue a particular topic in financial, economic, and demographic trends to evaluate real estate investment opportunities in case studies and short cases to illustrate development of investment strategies.

279A. Special Studies in Urban Land Economics. Limited to master’s or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit. S/U or letter grading.

279B. Selected Topics in Urban Land Economics. Discussion, laboratory, and fieldwork. Prerequisite: second-year graduate standing or consent of instructor. Designed for students who wish to pursue a particular topic in urban economics, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.
280A. Studies, Research Philosophies, and Methodology in Human Systems. Discussion, three hours. Prerequisite: standing or consent of instructor. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for methodologies, including research design, field measurement, field case studies, and approaches, and a range of analytic and descriptive procedures in data collection, emphasizing in human systems, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

280B. Personal and Professional Development. (Formerly numbered 280C.) Discussion, three hours. Prerequisite: standing or consent of instructor. Development of personal and professional skills in setting, case work, group experiences, and field observations. Consideration of team motivation, and productivity in organizations. May be repeated for credit. S/U or letter grading.

280C. Research Design in Human Systems Studies. (Formerly numbered 280D.) Discussion, three hours. Prerequisite: course 281A or 281B or consent of instructor. Planning and implementation of research studies in human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and doctoral dissertations. May be repeated for credit. S/U or letter grading.

281A. Sociotechnical Systems. Prerequisite: graduate standing. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations. May be repeated for credit. S/U or letter grading.

281B. People in Organizations. Prerequisite: graduate standing. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

282. Task Group Processes. Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/social/behavioral environments. Imparting practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

284A. Organization Design. Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on socio-technical and differentiation/integration models. S/U or letter grading.

284B. Organization Development. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

285A. Leadership, Motivation, and Power. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Theoretical and practical approaches to influence, leadership, and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from a managerial point of view. Use of experience-based learning and understanding of human behavior and decision making in one's own influence styles. S/U or letter grading.

285B. Managerial Interpersonal Communication. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Interpersonal and personality factors affecting management communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication style and to recognize the value of nonverbal, verbal, and other interpersonal elements. May be repeated for credit. S/U or letter grading.

287. Groups and Their Facilitation. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including “sensitizing” basic groups, group counseling, sensitivity groups, and consciousness raising approaches to group facilitation. Techniques of group decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

288A. Selected Topics in Behavioral Science. (Formerly numbered 288B.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current topics in behavioral science, including theories and applications of such topics as cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288B. Selected Topics in Behavioral Science. (Formerly numbered 288C.) Discussion, three hours. Prerequisite: graduation or consent of instructor. Current topics in behavioral science, including theories and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288C. Selected Topics in Human Systems Studies and Organizational Behavior. (Formerly numbered 288D.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current topics in the behavioral sciences and organizational behavior, including such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288D. Current Issues in Human Systems Change and Development through Consulting. Discussion, three hours. Prerequisite: consent of instructor. Current topics in cultural and organizational change management through consulting interventions. In-depth treatment of consultant entry and exit, diagnosis, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

288E. Behavioral and Organizational Sciences Colloquium (Proseminar). (Formerly numbered 288X-288Y-288Z.) Discussion, three hours. Prerequisite: consent of instructor. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrating themes from the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

289. Organization Theory. Prerequisite: course 242 or consent of instructor. Analysis of theory and practice of organizational behavior in a comprehensive view of study of the literature, case analyses, and seminar discussion. Individual and organizational projects.

291. Planning and Control. Prerequisite: course 423 or consent of instructor. Analysis of theory and practice of organizational management of organizing through study of the literature, case analyses, and seminar discussion. Individual projects.

292A. Research and Development Policy. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of forecasting technological futures.

292B. Models of Organization Behavior. Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organization behavior; understanding of individual and systems models, usually in mathematical or stochastic form and, where appropriate, using materials from field studies to develop empirical tests. These models may be used to discover implications for systems changes recommended in sociotechnical field study.

292C. Comprehensive Planning in Public Sector. Prerequisite: consent of instructor. Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological changes.

293A. Political Environment of American Business. Lecture, three hours. Prerequisite: consent of instructor. Evaluation of certain criticisms made by both inside and outside the American political system. Designed to provide clearer understanding of prominent features of American politics, especially as they influence business enterprise.

293B. Morality of Capitalism. (Same as Political Science M211.) Lecture, three hours. Prerequisite: consent of instructor. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

293C. Ethical Considerations in Business. Lecture, three hours. Prerequisite: consent of instructor. Examination of range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

294A. Strategy Formulation and Implementation. Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involved in managing total enterprises. Students are confronted with complex company situations to develop ideas essential to overall managerial direction.

294B. Environmental Management. Prerequisite: consent of instructor. Examination of ways in which business, government, labor, and consumer organizational managers might respond to external environmental problems. Methods studied for developing and evaluating alternative managerial solutions which permit organizations to assist in improving current and future environmental quality.

295A. Entrepreneurship and Venture Initiation. Prerequisite: consent of instructor. Exploration of entrepreneurship particularly concerned with formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

295B. Small Business Management. Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characterizing operating problems of small firms, with an inventory of appropriate methods or techniques for their solution.

295C. Corporate Entrepreneurship. Prerequisite: consent of instructor. Inquiry into nature of entrepreneur and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, modes of new product or process developments, and effective new venture management in a corporate context.
296A. International Business Management. Discussion, three hours. Identification, analysis, and resolution of managerial problems in context of international business. Prerequisite: consent of instructor. May be repeated for credit.

296B. International Comparative Management Research. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in management. Emphasis on current research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

297A. Comparative and International Management. Comparative study of practice of management in selected foreign countries, as affected by their social environment and development of management theory. S/U or letter grading.

297B. International Business Policy. Prerequisites: course 205A, consent of instructor. Analysis of key managerial problems encountered in a multinational enterprise. Focus on comparative and theoretical issues acquired in other courses in international business and comparative management. Applied to a series of complex cases and simulations of international business operations.

297C. International Business Law. Prerequisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

297D. International Business Negotiations. Prerequisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

297E. Business and Economics in Emerging Markets. Lecture, three hours. Prerequisite: course 205A or 405. Analysis of changing economic, political, demographic, and sociocultural conditions in developing countries as they affect the business environment. Prerequisites: courses 205A, 405. Analysis of economic systems in emerging market-oriented countries and the formation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

298A. Special Topics in Management Theory. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298B. Special Topics in International and Comparative Management. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298C. Special Topics in Sociotechnical Systems. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298D. Special Topics in Management (1 to 4 units). Lecture, three hours. Prerequisite: graduate standing. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

298X-298Y. Management Strategy and Policy Workshops (1 unit, 1 unit, 2 units). Discussion, three hours. Prerequisite: doctoral standing. Designed to help students to critically examine how developments in world economy affect particular industry environments.

299R. Research Methods in Management. Prerequisite: doctoral standing. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and function of Ph.D. Office. Students must enroll in the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: consent of instructor. An opportunity related to a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses are acceptable toward the M.B.A., M.S., and Ph.D. degrees within the limitations and conditions prescribed by the curricula of the John E. Anderson Graduate School of Management.

400. Mathematics for Management. Prerequisite: graduate standing. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with emphasis on model building and decision making in business firms. S/U grading.

402. Data Analysis, Statistics, and Decision Making. Prerequisite: graduate standing. In-depth introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems.

403. Financial Accounting. Lecture, three hours. Prerequisite: graduate standing. Introduction to fundamental accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of “the language of business”—accounting.

404. Information Systems. Lecture, three hours. Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.

405. Managerial Economics. Lecture, four hours; discussion, one hour (optional). Prerequisite: graduate standing. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on competition, market power, and externalities.

406. Global Economy. Prerequisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in the world economy affect strategies, risk management, growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments.

407. Managerial Model Building. Lecture, three hours. Prerequisites: courses 402, 403, 405. Survey of uses of formal modeling approaches in managerial decision making. Focuses on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public sector.

408. Managerial Finance. Lecture, three hours. Prerequisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which will lead to effective allocation and use of organization’s resources.

409. Managing Human Resources in Organizations. Lecture, three hours. Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizations, as they influence the managerial process and development of prospective general managers.

410. Operations and Technology Management. Lecture, three hours. Prerequisites: courses 402, 403, 405, 408, 411. Principles and decision analyses related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, factors design, and design of control systems for production operations.

411. Elements of Marketing. Prerequisites: courses 402, 403, 405. Principles of market-driven managerial decision making; consumer behavior, and company analysis, market segmentation, definition of target markets, and product positioning. Management of marketing function; product and pricing decisions, channels of distribution, marketing communications. S/U or letter grading.

412. Management of Organizations. Lecture, three hours. Prerequisite: completion of first-year core program. Integrative approach to theory and practice of management of complex systems, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such as structures and systems.

421A. Management Communications I (1 unit). Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.
421B. Management Communications II (1 unit). Lecture, 30 minutes; laboratory, one hour. Strategies and techniques of effective preparation and presentation of group writing assignments in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.

422. Analysis and Communications. Discussion, three hours. Prerequisite: graduate standing. Study and practice of oral and written management communica-
tions. Includes relevant analysis, persuasion, revising and editing, presentation of technical infor-
mation, and uses of computer technology. Organized around writing and speaking exercises. Personal at-
tention to students' written communications and oral presentations.

423. Advanced Management Theory. Advanced study of management theory in formally organized en-
terprises through significant readings; discussion of ad-
vanced approaches and techniques developed from applying theory; use of theory to integrate methods and findings of quantitative and behavioral sciences; lec-
tures on sophisticated application of management the-
ory in practice.

444A-444B. Management Field Study. Must be taken in two consecutive terms in second year (or its equiv-
alent for part-time students). Supervised study of an organization, including assessment of client/consul-
tant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable rec-
ommendations. S/U or letter grading.

450. Fieldwork in Behavioral Science Development (4 or 8 units). Prerequisites: course 287, consent of instructor. Supervised practical field-
work in all phases of laboratory education for manage-
ment development, such as sensitivity training labora-
tories, creativity and personal growth laboratories, simulated managerial behavior laboratories, etc.

451. Fieldwork in Organizational Development (2 to 12 units). Prerequisite: course 284B or 450 or con-
sent of instructor. Supervised practical fieldwork in or-
ganizational development consultation in interper-
sonal, group, intergroup, total organization, and interorganizational settings.

452. Fieldwork in Technical Assistance for Minority Business Enterprise (1 to 4 units). Prerequisite: completion of first year of master's program or consent of instructor. Supervised field experience in business con-
sulting and other forms of technical assistance for busi-
ness firms existing in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

453. Fieldwork in Arts Management (4 to 12 units). Prerequisite: consent of instructor. Supervised field ex-
perience and practical work in all phases of an arts organization (pictorial, performing, or community), con-
centrating on its managerial problems and its relation-
ship to the community and society in general.

454. Fieldwork in Organizations. Prerequisites: completion of two terms of M.B.A. program, consent of supervising faculty and director of M.B.A. program. Supervised practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal class-
work. May not be repeated for credit.

457. Fieldwork in Investment Management. Dis-
cussion, three hours. Prerequisite: consent of instruc-
tor. Use of academic theories learned in a practical experience by managing a portfolio started with do-
ned funds. May not be repeated for credit. Studies situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and orga-
nizational issues. S/U or letter grading.

The following individual study or research courses (501 through 599) may be used, within limitations and conditions prescribed by the school, to satisfy minimum higher degree re-
quirements.

501. Cooperative Program (2 to 8 units). Prerequi-
site: consent of UCLA AOGM graduate adviser and assistant director. Permission of the instructor, depart-
ment chair, and graduate dean. Used to record enroll-
m ent of UCLA students in courses taken under coop-
 erative arrangements with USC. S/U grading.

596. Research in Management (1 to 8 units). (For-
merly numbered as M.B.A. 496.) Prerequisite: consent of mas-
ter's program director or Ph.D. program director by special petition. Directed individual study or research. May be repeated. S/U or letter grading.

597. Preparation for Qualifying Examinations (4 or 12 units). Prerequisite: consent of master's program di-
rector or Ph.D. program director by special petition. Preparation for master's comprehensive examination or Ph.D. qualifying examinations.

598. Thesis Research in Management (4 or 12 units). Prerequisite: consent of Ph.D. pro-
gram director by special petition. Research for and preparation of Ph.D. dissertation.

Executive M.B.A. Program

Admission to the Executive M.B.A. Program is requisite for enrollment in the following courses:

461. Managerial Problem Solving (2 units). Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual's diagnostic and decision-
making skills. Use of readings, cases, decision simu-
lations, and discussions to explore areas of charting job and career progress, working with others, and shaping the work process.

462. Economic Analysis for Managers. Policy ori-
ented problems in antitrust, tax securities, and envi-
ronmental regulations. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environ-
mental regulations, and a business firm's optimal re-
sponse to regulatory measures.

463. Data Analysis and Management Decisions under Uncertainty. Survey of statistical model build-
ing, with emphasis on managerial interpretation of statistical summary of data. Classical statistics cov-
ered as a basis for support to courses in finance and marketing that follow. Fundamental ap-
proaches to decision making under uncertainty.

464. Managerial Accounting. Familiarizes the man-
ger with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for in-
ternal planning and control.

465. Quantitative Methods for Managers. Survey of modeling approaches to managerial planning and de-
cisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been de-
veloped.

466A-466B. Financial Policy for Managers (4 units, 2 units). Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment deci-
sions, for financial institutions, and for international fi-
nancial management. Focus on learning sound theo-
retical tools and applying them in casework.

467. Management Issues in Information Systems (2 units). Grows from the systems approach to the corpo-
rati on and how they change ways of doing busi-
ness. Examples from airlines, health, computer, com-
munications, distribution, and publishing industries. Strategic, organizational, and societal implications.

468. Economic Forecasting (2 units). Macroece-
onomic theory and its application to business forecast-
ing. Major economic indicators and their historical de-
scription. Analysis of the U.S. economy; theoretical tools that business economists use to analyze impacts of mone-
tary and fiscal policy; macroeconometric techniques applicable to business forecasting.

500. Management of Human Resources. Introduc-
tion to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examin-
ing the major concepts of research related to each of these topic areas, as well as some practical problems for managers posed by each.

507A. Introduction to Action Research and Policy Analysis (2 units). Provides methods of organiza-
tional and strategic analysis to determine relationship of the organization with its environment.

510. Strategic Overview (2 units). Preparation of a strategic overview of a selected international com-
pany entailing collection and analysis of primary and secondary data, including (but not limited to) inter-
views of corporate executives, corporate financial and market ing data, industry reports, and customer and competitor interviews and/or surveys.

570C. Action Research and Policy Analysis (2 units). Further research and analysis of one of the strategic issues facing the selected company and identified in the stra-
tegic overview (course 470B).

570D. Seminar: Policy Analysis (2 units). Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate person-
nel.

472. Marketing Strategy and Policy. Strategic mar-
keting decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

473A. Managerial and Organizational Processes (2 units). Formally meets four hours, five to six hours every other week for 13 weeks. Macroanalytic issues, including intergroup relations, design and functioning of organizations, and relationships of or-
ganizations to their environment. S/U or letter grad-
ing.

473B. Customer Information Strategy (2 units). Lecture, four hours every other week for 13 weeks. Development of a customer orientation as a neces-
sity for success in the highly competitive global mar-
ketplace, including principles of customer orientation, information as a strategic asset, customer equity, market forecasting, measuring effects of marketing investments, and customer response-based strategy. S/U or letter grading.

474. Operations and Technology Management: Systems, Strategies, and Policies. Lecture, three hours. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive plan-
ing, inventories, scheduling of resources, distribution systems, and system location. Comprehensive oper-
ating problems.

475. International Managerial Policies and Strate-
gies. Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multi-
national enterprises. Application of concepts of international economic analysis and exploration of interna-
tional corporate strategies.

476. Competitive Strategy and Business Policy. Study of general management of a corpo-
rate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial set-
tings and implications of changing environments on business strategy.

477. The Manager and Business/Society Relation-
ships. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and so-
cial responsibility.

Adjunct Professor
John J. Gilman, Ph.D.

Adjunct Associate Professor
Marek A. Przystupa, Ph.D.

Scope and Objectives
At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optical selection of engineering materials. Such materials must fulfill simultaneously dimensional, property, quality control, and economic requirements.

The department also has a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's materials engineering major. A joint major field, chemistry/materials science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science).

The graduate program allows for specialization in one of the following fields: ceramics and ceramic processing, electronic and optical materials, and structural materials.

Undergraduate Study
Bachelor of Science in Materials Engineering

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

The Major
Course requirements are as follows (180 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 105D.

(2) Materials Science and Engineering 88, 110, 110L, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L; Mechanical and Aerospace Engineering 191A or 192A.

(3) Three elective courses from Chemical Engineering C114, Civil and Environmental Engineering 130, 130F, 135A, Electrical Engineering 121A, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 123 (two units), 143A, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C.

(4) Four courses, including at least two upper division, from Electrical Engineering 131A or Mathematics M170A or Mechanical and Aerospace Engineering 193 or Statistics M152A, Materials Science and Engineering 197, Physics 8D, 8E. By petition, other courses from engineering, intermediate or advanced foreign language, mathematics, physical or life sciences, and scientific or technical writing may be substituted.

(5) Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15A and 15B or Electrical Engineering 5C or Mechanical and Aerospace Engineering 20; Materials Science and Engineering 90L or two courses from Physics 8AL, 8BL, 8CL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C.

(6) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Electronic Materials Option
Course requirements are as follows (192 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Electrical Engineering 10, 101, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, and Civil and Environmental Engineering 108 or Mechanical and Aerospace Engineering 105D.

(2) Materials Science and Engineering 88, 110, 110L, 121, 122, 130, 131, 131L, 190; Electrical Engineering 121A, 121B, 122AL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical and Aerospace Engineering 191A or 192A.

(3) Three elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 131A, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 172L.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Materials Science and Engineering 90L or two courses from Physics 8AL, 8BL, 8CL, 8DL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; four courses from Physics 8A, 8B, 8C, 8D, 8E.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.
Master's Degree

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Materials Science and Engineering are required to take the General Test of the Graduate Record Examination (GRE). A bachelor's degree in materials science, metallurgy, or ceramics is required. Students having a bachelor's degree in chemistry, physics, or other engineering disciplines are admitted if an introductory materials course has been taken or remedial work comparable to an introductory course is performed.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult Program Requirements for UCLA Graduate Degrees.

Application forms, including a departmental supplement to the application, may be obtained by writing to 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Areas of Study
There are three main areas in the M.S. program: ceramics and ceramic processing; electronic and optical materials; and structural materials. Students may specialize in any one of the three areas, although most students are more interested in a broader education and select a variety of courses. Basically, students select courses which serve their interests best in regard to thesis research and job prospects.

Course Requirements

Thesis Plan. Nine courses are required, of which six must be graduate courses. These courses are to be selected from the following lists, although suitable substitutions can be made from other engineering disciplines or from chemistry and physics with the approval of the departmental graduate adviser. Two of the six graduate courses may be Materials Science and Engineering 598 (thesis research). The remaining three courses in the total course requirement may be upper division courses.

Comprehensive Examination Plan. Nine courses are to be selected from the following lists with the same provisions listed under the thesis plan. Three of the nine courses may be upper division courses.

Electronic and optical materials: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 221, 222, 223, 244, 298.

Ceramics and ceramic processing: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 243A, 243C, 244, 250A, 250B, 298.

Structural materials: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 243A, 243C, 244, 250A, 250B, 298.

As long as a majority of the courses taken are offered by the department, substitutions may be made with the consent of the departmental graduate adviser.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Comprehensive Examination Plan
Consult the graduate adviser for details. If the comprehensive examination is failed, the student may be reexamined once with the consent of the graduate adviser.

Thesis Plan
None.

Doctoral Degree

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Materials Science and Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Application forms, including a departmental supplement to the application, may be obtained by writing to 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Major Fields or Subdisciplines
Ceramics and ceramic processing; electronic and optical materials; structural materials.

Course Requirements
There is no formal course requirement for the Ph.D. degree, and one may substitute coursework by examinations. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree in Materials Science and Engineering is built around one major field and one minor field. The major field has a scope corresponding to a body of knowledge contained in nine courses, at least six of which are graduate courses, plus the current literature in the area of specialization. The major fields named above are described in a Ph.D. major field syllabus, each of which can be obtained in the department office. The minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B- or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor field is chosen to support the major field and is usually a subset of the major field.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations
After mastering of the body of knowledge defined in the three fields, the student takes a written preliminary examination in the major field. When this examination is passed and all coursework is completed, the student proceeds to take an oral preliminary examination which encompasses the major and minor fields. Both preliminary examinations should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice.

After passing both preliminary examinations, the student is ready to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member who is not affiliated with the student's major department.
Lower Division Courses

14. Science of Engineering Materials. Lecture, three hours; demonstration, one hour; recitation, one hour. Prerequisites: Chemistry 11A, 11B/11BL, Physics 8A, 8B. Physics 8C may be taken concurrently. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and macrostructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering.

88. Freshman Seminar: New Materials (2 units). Seminar, two hours; outside study, four hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics.

90L. Physical Measurement in Materials Engineering (2 units). Laboratory, four hours; outside study, two hours. Prerequisite: course 14. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques.

Upper Division Courses

110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Materials). Lecture, three hours; laboratory, two hours. Prerequisite: course 14. Modern methods of materials characterization: fundamentals of crystallography, properties of X rays, X-ray diffraction; powder method; Laue method; determination of crystal structures; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures.

110L. Introduction to Materials Characterization A Laboratory (2 units). Laboratory, two hours; outside study, four hours. Prerequisite: course 14. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, X-ray diffraction, crystal structure determination, and special projects.

111. Introduction to Materials Characterization B (Electron Microscopy). Lecture, three hours; laboratory, two hours. Prerequisites: courses 14, 110. Characterization of microstructure and microscopy of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments.

120. Physics of Materials. Lecture, four hours; outside study, eight hours. Prerequisites: courses 14, 110. Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, and dielectric properties.

121. Materials Science of Semiconductors. Prerequisite: course 120. Electrical and optical properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications.

122. Principles of Electronic Materials Processing. Prerequisite: course 14 or equivalent. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics.

123. Electronic Packaging and Interconnection (2 units). Lecture, two hours; outside study, six hours. Various electronic packaging methods and interconnection technologies. Design, fabrication, and testing of complex microelectronic components, interconnections, and assemblies.

130. Phase Relations in Solids. Requisites: course 14, Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions.

131. Diffusion and Diffusion-Controlled Reactions. Prerequisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Analysis of data. Comparison of results with theory.

143A. Mechanical Behavior of Materials. Prerequisite: course 14 or equivalent. Recommended: Civil Engineering 108. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications.

150. Introduction to Polymers. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives, fiber forming polymers, polymer processing technology, plasticization.

160. Introduction to Ceramics and Glasses. Lecture, four hours; outside study, eight hours. Prerequisites: courses 14, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering.

161. Processing of Ceramics and Glasses. Lecture, four hours; discussion, one hour. Prerequisite: course 160. Study of processes used in fabrication of ceramics and glasses for structural applications, optical, and electronic properties of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties in relations. Ceramic fracture analysis and design with ceramics.

161L. Laboratory in Ceramics (2 units). Laboratory, four hours. Prerequisite: course 160 or equivalent. Recommended corequisites: course 161. Processing of commercial ceramics and glasses: properties of specific materials through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Ceramic and glass forming and fabrication. Determination of chemical and physical properties.

162. Electronic Ceramics. Prerequisites: course 14, Electrical Engineering 100, or equivalent. Utilization of ceramics in microelectronics; thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optical devices; optical wave guide applications and designs.

191L. Computer Methods and Instrumentation in Materials Science (2 units). Prerequisites: major division standing in materials science and engineering, KNOWLEDGE of BASIC or C or assembly language. Interface and control techniques, real-time data acquisition and processing, computer-aided testing.

197. Seminar: Technical Writing for Materials Engineers (2 units). Seminar, two hours; outside study, four hours. Corequisite: course 132 or 190 or 598 or 599 or consent of instructor. Types of technical documents and basic document patterns. Document planning, paragraph and sentence structures. Illustration and references. Reports, theses, and proposals. Oral presentation.

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

Graduate Courses

200. Principles of Materials Science I. (Formerly numbered 204G.) Lecture, four hours; outside study, eight hours. Prerequisite: course 120 or equivalent. Lattice dynamics and thermal properties of solids, classical and quantized free electron theory, electrons in a periodic potential, transport in semiconductors, dielectric and magnetic properties of solids.

221. Science of Electronic Materials. Lecture, four hours; outside study, eight hours. Prerequisite: course 120 or equivalent. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization.

222. Growth and Processing of Electronic Materials. Lecture, four hours; outside study, eight hours. Prerequisites: courses 120, 130, 131, or equivalent. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation,oxidation.
Scope and Objectives

Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.
Bachelor of Science in Mathematics

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, and two additional courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Philosophy 31, 32, Physics 6B, 6C, 8B, 8C, 8D, 8E. Each course must be passed with a minimum grade of C –, and students must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 110A-110B, 115A, 131A-131B, 132, one course from 120A, 121, 123, and at least five additional courses from 106 through 199 and Statistics M152A through 154B. The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Applied Mathematics

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Chemistry and Biochemistry 20A, 20B, Physics 8B, 8D, 8E. Each course must be passed with a minimum grade of C –, and students must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 115A, 131A, either 131B or 132, 142; two term-sequences from two of the following categories: numerical analysis — courses 151A-151B, probability and statistics — courses M170A and 170B or Statistics M152A and 152B or 154A-154B, differential equations — courses 135A-135B; four additional courses from 110A through 199 and Statistics M152A through 154B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics of Computation

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Chemistry and Biochemistry 20A, 20B, Physics 8B, 8D, 8E. Each course must be passed with a minimum grade of C –, and students must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A-151B, and six additional courses from 110A through 199 and Statistics M152A through 154B; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial analysis, medical and life sciences plan, or operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as biochemistry, biology, chemistry, economics, geography, and physics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C –, and students must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M152A through 154B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students will not be admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

Actuarial Plan

Preparation for the Major

Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2 (or 100), 11. Economics 100 may not be applied as one of the upper division courses for the major.

The Major

Medical and Life Sciences Plan

Preparation for the Major

The Major

Seven Mathematics Department courses, including Mathematics 115A, 151A, 151B, M170A, 170B, and two additional courses from 110A through 199 and Statistics 152B through 154B; six outside courses, including Physiological Science 111A-111B-111C or M180A-M180B-M180C, and three additional courses from Biomathematics 110, Computer Science M196B, Physiological Science 100, and C135 or Neuroscience 103 (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken).

Operations Research Plan

Preparation for the Major

Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1 and 2 (or 100), 11, Management 1A, Program in Computing 10A.

The Major

Bachelor of Science in General Mathematics

The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, Chemistry and Biochemistry 20A, 20B, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C –, and students must have a minimum overall GPA of 2.0 for the courses.
The Major

Required: Mathematics 110A or 117, 115A, 123, M170A or Statistics M152A or 154A, one course from 131A through 136, one course from 142 through 167, and six additional courses from 106 through 199, 370A, 370B, and Statistics 152B through 154B.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

Honors Program

Students majoring in mathematics, applied mathematics, and mathematics of computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

Computing Specialization

Majors in mathematics, applied mathematics, mathematics/applied science, or general mathematics may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, with a minimum grade of C – in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 149 through 159. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor’s degree in their major and a specialization in computing.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdn.net.ucla.edu.

Master’s Degrees

The department of Mathematics offers the Master of Arts in Mathematics and the Master of Arts in Teaching.

Master of Arts

Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master’s degree program, applicants must have earned in these upper division mathematics courses a cumulative grade-point average of at least 3.2.

Applicants must take the Graduate Record Examination (GRE) General Test and the Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

Areas of Study

The Master of Arts degree in mathematics may be earned under the comprehensive examination plan in the basic (pure mathematics) program, in an interdisciplinary program in applied mathematics, or in statistics.

Course Requirements

Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics, respectively. All courses must be passed with the grade of B – or better.

Students may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided a B – or better is received in these courses (not the grade of S).

Comprehensive Examination Plan

Students must pass two written qualifying examinations at the M.A. level within seven quarters of full-time study. By option, the following examinations are required.

Pure Option: One examination in algebra and one examination in either real analysis or complex analysis.

Applied Option: One examination in real analysis or complex analysis and one examination in numerical analysis or applied differential equations.

Statistics Option: Two examinations out of probability, theoretical statistics, or applied statistics.

These examinations are offered during the Fall Quarter and toward the end of the Spring Quarter and are three-hour tests. Students may retake them any number of times until the examinations have been passed.

Thesis Plan

None.

Master of Arts in Teaching

Admission

The Master of Arts in Teaching (M.A.T.) program serves the needs of present and prospective mathematics teachers in high school and junior college. Consult the department for admission requirements.

Areas of Study

Consult the department.

Course Requirements

Eleven courses are required as follows:

Core Courses. Students must take Mathematics 201A-201B-201C and 202A-202B. Normally students also take one quarter of Mathematics 596 while fulfilling the essay requirement described below.

Credentialed Requirements. Students planning to teach in secondary schools who do not already have valid credentials for such teaching should enroll in the single subject instructional credential program in the Department of Education (Graduate School of Education and Information Studies). Of the courses required by this program, students receive M.A.T. credit only for the following courses: Education 100A-100B, 112, 312, 330A, and 330B. Actual receipt of the credential is not a degree requirement. Interested students should check with the Department of Education for a full and up-to-date description of credential requirements and should submit a Department of Education application for admission to the credential program.

Additional Courses. Besides the six core courses described above, a seventh upper division or graduate course in mathematics is required. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 111C, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, one course of a predominantly mathematical nature taken in another department may be presented for department credit.

Students may not receive degree credit for Mathematics 104, 370A, or 370B. In addition, students may not receive degree credit for more than two quarters of Mathematics 596 or for more than two quarters of any 300-series courses.
Essay Requirement. A master’s essay on some subject in mathematics related to the student’s prospective teaching is required. This is written by the student, under the direction of a faculty member, while enrolled in Mathematics 596.

Comprehensive Examination Plan
In the M.A.T. program, one examination in mathematical subject matter is taken, as is one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

Thesis Plan
None.

Doctoral Degree Admission
Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For direct admission to the doctoral program, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

Major Fields or Subdisciplines
The Ph.D. degree in Mathematics may be earned under the pure, applied, or statistics option. Many possible choices of fields exist within these programs, and students are urged to read the booklet, Graduate Studies in Mathematics at UCLA, where the specialties of the faculty and the active research areas in the department are described in some detail.

Course Requirements
Under the pure mathematics and statistics options, students must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

Written and Oral Qualifying Examinations
Students must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three quarters of full-time study. Three examinations must be passed within six quarters of full-time study. Students in the applied option have the opportunity to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By option, the following examinations are required.

Pure Option: One examination in algebra and one examination in real analysis. Either one or both of these required examinations may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes.

Applied Option: One examination in real analysis and one examination in either numerical analysis or applied differential equations.

Statistics Option: One examination in real analysis and probability at the M.A. level and one examination in theoretical and applied statistics at the Ph.D. level.

Students should consult an adviser in the area in which they plan to do research for advice on which qualifying examinations should be taken to work in that area.

After passing the four written qualifying examinations, the student may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

Mathematics

Lower Division Courses

2. Finite Mathematics. Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Finite mathematics consisting of matrices, Gaussian/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains. P/NP or letter grading.

3A. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 (C – or better). Not open for credit to students with credit in another calculus sequence. Techniques and applications of differential calculus. Introduction to the integral. P/NP or letter grading.

3B. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Requisite: course 3A (C – or better). Techniques and applications of integral calculus, logarithmic and exponential functions, introduction to differential equations. P/NP or letter grading.

3C. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Requisite: course 3B (C – or better). Functions of several variables, vectors, partial differentiation, and vector-valued functions. P/NP or letter grading.

31A. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 (C – or better). Differential calculus and applications; introduction to integration.

31B. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Requisite: course 31A (C – or better). Transcendental functions; methods and applications of integration.

31BH. Calculus and Analytic Geometry (Honors). Lecture, three hours; discussion, one hour. Honors course parallel to course 31B.

31E. Calculus for Economics Students. Lecture, three hours; discussion, one hour. Requisite: course 31A (C – or better). Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus with applications to economics. Partial differentiation, implicit functions, and logarithmetic functions, extrema, optimization, constrained extrema, first-order linear differential equations with constant coefficients. P/NP or letter grading.

32A. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Requisite: course 31B (C – or better). Introduction to differential calculus of several variables.

32AH-32BH. Calculus of Several Variables (Honors). Lecture, three hours; discussion, one hour. Requisite: course 31B (B or better). Honors sequence parallel to courses 32A, 32B.

32AL. Calculus Computer Laboratory (1 unit). Corequisite: course 32A. Prior knowledge of computers is required. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

32B. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Requisite: course 32A (C – or better). Introduction to integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

32BL. Calculus Computer Laboratory (1 unit). Corequisite: course 32AL. Corequisite: course 32B. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

33A. Matrices and Differential Equations. Lecture, three hours; discussion, one hour. Requisite: course 32A (C – or better). Introduction to matrix theory, differential equations, and systems of differential equations.

33AH-33BH. Matrices, Differential Equations, and Infinite Series (Honors). Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 33A, 33B, P/NP or letter grading.

33B. Infinite Series. Lecture, three hours; discussion, one hour. Requisite: course 33A (C – or better). Infinite sequences and series; applications.

38A-38B. Fundamentals of Mathematics for Elementary Teachers. Nonmajors. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. P/NP or letter grading. 38A. Lecture, three hours; discussion, one hour. Counting numbers and other subsystems of real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures. 38B. Lecture, three hours; discussion, one hour; laboratory. Requisite: course 38A. Continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.
61. Introduction to Discrete Structures. Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, Program in Computing 10A or 3. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebra.

**Upper Division Courses**

Mathematics 113, 115A, 117, 131A, 132, 142, 151A, 164, 167, and Statistics 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

**General and Teacher Training**

104. Fundamental Concepts of Geometry. Lecture, three hours discussion, one hour. Requisites: courses 38A, 38B. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

106. History of Mathematics. Requisite: course 3A or 3A. Roots of modern mathematics in ancient Babylonia and Greece, development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus, selected topics in modern mathematics. P/NP or letter grading.

**Algebra, Number Theory, and Logic**

110A-110B. Algebra. Lecture, three hours; discussion, one hour. Requisite: course 115A. 110A. Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. 110B. Groups, structure of finite groups.

110AH-110BH. Algebra (Honors). (Formerly numbered 110AH-110BH-110CH.) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A, 110B, and 110C. Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. 110C. Algebra. Lecture, three hours; discussion, one hour. Requisites: courses 110A-110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

111. Theory of Numbers. (Formerly numbered 111A-111B-111C.) Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

112. Introduction to Set Theory. (Formerly numbered M112A.) (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 31B or Philosophy 32. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

113. Combinatorics. Lecture, three hours; discussion, one hour. Requisites: courses 32B, 32B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

114A-114B. Logic and Computability. (Formerly numbered 114A-114B-114C.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; Herbrand expansions. Effectively computable, Turing computable, and recursive functions; thesis of Church-Turing universality; uncomputability results. Recursive and recursively enumerable sets; recursive enumerability of valid sentences. Formal number theory; definability of recursive functions; incompleteness and undecidability; theorems of Godel, Tarski, Church. P/NP or letter grading.

115A-115B. Linear Algebra. Lecture, three hours; discussion, one hour. P/NP or letter grading. 115A. Requisite: course 33A. Abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigentheory. 115B. Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetrical skew and orthogonal linear transformations, polar decompositions.

115AH. Linear Algebra (Honors). Lecture, three hours; discussion, one hour. Honors course parallel to course 115A.

117. Algebra for Applications. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences, fields, applications of finite fields; polynomials; permutations, introduction to groups.

**Geometry and Topology**

121. Introduction to Topology. Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

123. Foundations of Geometry. Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincare model, independence of parallel postulate.

**Analysis**

131A-131B. Analysis. Lecture, three hours; discussion, one hour. Requisite: course 115A. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity. 131B. Requisites: courses 33B, 115A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

131AH-131BH. Analysis (Honors). Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A-131B.

131C. Topics in Analysis. Lecture, three hours; discussion, one hour. Requisites: courses 131A-131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

132. Complex Analysis for Applications. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy-Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

135A-135B. Ordinary Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B, 115A. Systems of differential equations, linear systems with constant coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions.

136. Partial Differential Equations. Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables, eigenfunction expansions; selected topics, as method of characteristics for nonlinear equations.

**Applied Mathematics**

142. Mathematical Modeling. Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physics, chemistry, biology, and economics, and traffic dynamics.

143. Analytic Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass; related topics in applied mathematics.

146. Methods of Applied Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 32B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

149. Mathematics of Computer Graphics. Lecture, three hours; discussion, one hour. Prerequisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

202A-202B. Mathematical Models and Applications. Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operational research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

Number Theory

205A-205B-205C. Number Theory. Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

Algebra

210A-210B-210C. Algebra. Prerequisites: courses 110A-110B, 110C. Students with credit for courses 110B and/or 110C cannot receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Ga- lois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. Prerequisite: course 210A or consent of instructor. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. Prerequisite: course 210A or consent of instructor. Modules over a ring, homomor- phisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. Prerequisite: course 210A or consent of instructor. Topics include represent- ation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Introduction to Algebraic Geometry. Prerequisite: course 210A or consent of instructor. Basic definitions and first properties of algebraic varieties in affine and projective space; irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

215A-215B. Commutative Algebra. Prerequisite: course 210A or consent of instructor. Topics from com- mutative ring theory, including techniques of localiza- tion, primary ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, mod- ules, projective modules, Serre conjecture, regular lo- cal rings.

216. Further Topics in Algebraic Geometry. Pre- requisites: courses 214A-214B or consent of instructor. Closer examination of areas of current research in algebraic geometry. Variable content may include al- gebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

Mathematics / 399

Logic and Foundations

220A-220B-220C. Mathematical Logic and Set Theory. Lecture, three hours. Prerequisite: course M112. Model theory: compactness theorem; Lowenheim/ Skolem theorems; definable sets, preservation theorems; interpolation theorems. Recursion func- tion theory: thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: complete- ness and incompleteness theorems; general purpose and undecidable theories; quantifier elimination. Set the- ory: Zermelo-Fraenkel and von Neumann/Gödel axi- ons; cardinal and ordinal numbers; continuum hy- pothesis; constructible sets; independence results and forcing, S/U or letter grading.

222A-222B. Lattice Theory and Algebraic Systems. Lecture, three hours. Prerequisite: course 210A or con- sent of instructor. Partially ordered sets, lattices, distrib- utivity, modularity, completeness, interaction with com- binatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congru- ence laws, equational bases, applications to lattices.

233A. Model Theory. Prerequisites: courses 220A- 220B-220C. Topics include decidability of unsolv- ability, recursively enumerable sets, undecidable the- ories, inductive definitions, admissible sets and ordi- nals, and recursion in higher types.

Geometry and Topology

225A. Differentiable Manifolds. Lecture, three hours. Prerequisites: courses 121 and 131A-131B, or consent of instructor. Smooth manifolds and maps, basic exam- ples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, ten- sors, differential forms and exterior derivative, Stokes theorem on manifolds.

225C. Further Topics in Geometry and Topology. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Topics may include coho- mology rings (singular, de Rham), dual theories, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

226A-226B-226C. Differential Geometry. Lecture, three hours. Prerequisite: course 225A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; complete- ness, submanifolds, constant curvature. Geodesics; conjugate points; first and second fundamental forms; Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler man- ifolds, symmetric spaces.

227A-227B. Algebraic Topology. Lecture, three hours. Prerequisite: course 225B or consent of in- structor. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

233. Partial Differential Equations on Manifolds. Lecture, three hours. Prerequisites: courses 226A and 251A, or consent of instructor. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atyiah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green’s function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang-Mills equation, Monge-Ampere equation.

234. Topics in Differential Geometry. Lecture, three hours. Prerequisites: courses 226A-226B or consent of instructor. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

235. Topics in Manifold Theory. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links), Topics vary from year to year. May be repeated for credit by petition.

237. Topics in Algebraic Topology. Lecture, three hours. Prerequisites: courses 227A and 227B or consent of instructor. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

238A-238B. Dynamical Systems. Lecture, three hours. Recommended preparation: first-year analysis courses. Topics include qualitative theory of differential equations, bifurcations, homoclinic, and heteroclinic phenomena; differential equations, including hyperbolic theory and quasiperiodic dynamics; ergodic theory; low-dimensional dynamics. S/U or letter grading.

Analysis and Differential Equations

250C. Advanced Topics in Ordinary Differential Equations. Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

251B-251C. Topics in Partial Differential Equations. Prerequisite: consent of instructor. In-depth introduction to topics of current interest in partial differential equations or their applications.

253A-253B. Several Complex Variables. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The problem, Cousin problems, domains of holomorphy, complex manifolds.

254A-254B. Topics in Real Analysis. Prerequisites: courses 250A-250B, 245A-245B. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

Functional Analysis

255B-255C. Topics in Functional Analysis. Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semi-groups of operators, linear topological vector spaces, and other related areas.

Applied Mathematics

260. Introduction to Applied Mathematics. Prerequisite: course 142 or consent of instructor. Constructions, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

265A. Game Theory. (Formerly numbered 261.) (Same as Economics M214B and Political Science M208A.) Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Basic concepts of game theory and their applications, including equilibrium concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

268A. Topics in Applied Analysis. Prerequisite: course 246A or consent of instructor. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

265A-265B. Real Analysis for Applications. Prerequisites: courses 131A-131B or consent of instructor. Not open for credit to students with credit for courses 245A-245B-245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation, L^1 and L^2 spaces. Fourier series. General measure and integration, Fukn and Radon/Nikodym theorem, representation of functionals, Fourier integrals.

266D-266E. Applied Differential Equations. Prerequisites: courses 266A, 266B-266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to problems of mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

268A. Applied Functional Analysis. Lecture, three hours. Prerequisites: courses 110A-110B, 112A-112B, 131A-131B, and 132, or consent of instructor. Topics may include Hilbert spaces, distributions, Fourier transforms, L^1 space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint operators, translation and wave operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

268B-268C. Topics in Applied Functional Analysis. Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.
270A. Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

270B-270C. Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problems.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation and curvature. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

272B. Mathematical Aspects of Fluid Mechanics. Lecture, three hours. Prerequisite: course 272A or consent of instructor. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressed waves, shock waves, turbulence theory (overview).

272D. Rotating Fluids and Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite: consent of instructor. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem, Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up, shallow water theory, wind-driven ocean circulation. Effects of rotation on turbulence, Benard convection, Baroclinic instability, Eady model. S/U or letter grading.

274B-274C. Perturbation Methods. Lecture, three hours. Prerequisite: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKBJ theory. Problems with several time scales: Poincaré method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

275A-275B. Probability Theory. Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorems, conditioning, ergodic theory, martingale theory.

275C. Stochastic Processes. Lecture, three hours. Prerequisite: course 275C or consent of instructor. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

275D. Stochastic Calculus. Lecture, three hours. Prerequisite: course 275D or consent of instructor. Stochastic integration, stochastic differential equations, Ito formula and its applications. S/U or letter grading.

275E. Stochastic Particle Systems. Lecture, three hours. Prerequisite: course 275C or consent of instructor. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading.

276A. Multivariate Analysis. Lecture, three hours. Prerequisite: course 276B or consent of instructor. Distributions in several dimensions, partial and multiple regression, analysis of variance, correlation, regression, inference. Wishart distribution, Hotelling T<sup>2</sup>. Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis.

276B. Nonparametric and Robust Statistics. Lecture, three hours. Prerequisite: course 276B or consent of instructor. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation.

278C. Decision Theory. Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics.

M279A-M279B. Linear Statistical Models. (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Preparation: one upper division theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. S/U or letter grading.

M280. Statistical Computing. (Same as Biomathematics M280 and Biostatistics M280.) Lecture, three hours. Prerequisites: course 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs; computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

Special Studies

285A-285N. Seminars. (Formerly numbered 285A-285L.) Lecture, three hours. Prerequisite: consent of instructor. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading.

285A. History and Development of Mathematics.

285B. Number Theory.

285C. Algebra.

285D. Logic.

285E. Geometry.

285F. Topology.

285G. Analysis.

285H. Differential Equations.

285I. Functional Analysis.

285K. Probability.

285L. Statistics.

285M. Dynamical Systems.

290. Seminar: Current Literature. Intended for Ph.D. candidates. Readings and presentations of papers in mathematical literature under supervision of a staff member.

296A. History and Development of Mathematics.

296B. Number Theory.

296C. Algebra.

296D. Logic.

296E. Geometry.

296F. Topology.

296G. Analysis.
296H. Differential Equations.
296J. Applied Mathematics.
296K. Probability.
296L. Statistics.
296M. Mathematics.
296N. Dynamical Systems.
370A-370B. Teaching Mathematics. (Formerly numbered 370.) Lecture, three hours; discussion, one hour. Prerequisites: course 33B, upper division standing. Course 370A is prerequisite to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from a problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice-ship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Mathematics (2 units). Discussion, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new doctoral students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (eight units) may be applied toward M.A. degree unless departmental consent is obtained.

599. Research in Mathematics (2 to 12 units). Prerequisite: advancement to doctoral candidacy. Study and research for Ph.D. dissertation. May be repeated for credit.

Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses C-), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 15, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

Lower Division Courses

1. Introduction to Computers and Computing. Lecture, three hours; discussion, one hour. Prerequisites: computer assignments, five hours. Fundamentals of computers and computing; editors, spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/NP or letter grading.

2. Introductory FORTRAN Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A receive only two units of credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced program in computing courses should take course 10A rather than this course.

3. Introductory Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended requisite for students with no prior computing experience: course 1. Students with credit for course 3 receive only two units of credit for this course. No prior experience assumed. Basic principles of programming, using C++; algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

4. Intermediate Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Abstract data types and their implementation using the C++ class mechanism; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications: object-oriented programming and software reuse; recursion; algorithms for sorting and searching.

5. Advanced Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. More advanced algorithms and data structures techniques; additional emphasis on algorithmic efficiency; advanced features of C++; such as inheritance and virtual functions; graph algorithms.

6. Introduction to LISP and Symbolic Computation (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

7. Programming for Internet in Java Language (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Introduction to Java computer language. Class and interface hierarchies; graphics components and graphical user interfaces; streams; multitreading; event and exception handling. Issues in class design and design of interactive Web pages. P/NP or letter grading.

97. Special Topics in Programming. Lecture, three hours; discussion, one hour. Enforced requisite: course 10A. Variable topics in programming not covered in regular courses. May be repeated for credit with topic change. P/NP or letter grading.

Upper Division Courses

110. Introduction to Concurrent Computation (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10C or equivalent familiarity with programming in C or C++ language. Introduction to programming of concurrent (parallel) computers. Shared and distributed memory parallel architectures; currently available concurrent machines; parallel algorithms and development of concurrent programs; estimation of algorithmic performance; selected advanced topics.

197. Advanced Topics in Programming. Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Courses

285C. Computational Algebra.
285D. Logic and Theory of Computation.
285K. Randomness and Computation.
285L. Computational Statistics.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Statistics

Lower Division Course

50. Elementary Statistics. Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

Upper Division Courses

Students planning to pursue advanced degrees in statistics should enroll in the M152A, 152B-152C sequence. The 154A-154B sequence is less comprehensive than the 152 series. In particular, probability topics do not receive the same level of coverage. Courses 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.
M152A. Probability Theory. (Same as Mathematics M170A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33B. Not open to students with credit for courses 154A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, P/NP or letter grading.

152B. Statistics. Lecture, three hours; discussion, one hour. Not open to students with credit for courses 154A-154B. P/NP or letter grading. 152B. Prerequisite: course M152A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. 152C. Prerequisite: course 152B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

M153A-M153B. Introduction to Computational Statistics. (Same as Biomathematics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Requisites: course 152B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. M153A. BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. M153B. Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression. 154A-154B. Statistics. Lecture, three hours; discussion, one hour. Not open to students with credit for courses M152A and 152B. P/NP or letter grading. 154A. Requisites: Mathematics 32B, 33B. Not open to students with credit for course M152A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, expectation, estimation, central limit theorem, confidence intervals, testing, 154B. Requisite: course 154A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

Kirby A. Baker, Ph.D. (Mathematics)
Robert F. Brown, Ph.D. (Mathematics)
Bryan C. Ellickson, Ph.D. (Economics)
Jonathan D. Rogawski, Ph.D. (Mathematics)
William R. Zame, Ph.D. (Economics)

Scope and Objectives
In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated. Mathematically competent economists, with bachelor’s degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require strong undergraduate preparation in mathematics for admission.

The B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and the parts of economics that emphasize the use of mathematics and statistics.

Undergraduate Study
Bachelor of Science Degree Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

The Major
Required: Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 164, M170A or Statistics M152A or 154A, Statistics 152B or 154B, and one additional course from 110A through 199 and Statistics M153A, M153B; six economics courses, including Economics 101, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 141 through 148. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the six courses from the Economics Department.

Honors Program
Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the prerequisites for the major courses with an overall GPA of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110B or 131B, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 195H, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Computing Specialization
Students may select a specialization in computing by (1) satisfying all the requirements for a bachelor’s degree in the major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, with a minimum grade of C– in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 149 through 159. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office). Students graduate with a bachelor’s degree in mathematics/economics and a specialization in computing.

Scope and Objectives

The Mechanical and Aerospace Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curriculum in aerospace engineering and mechanical engineering are offered on both the undergraduate and graduate levels. The Gorman Report ranked UCLA’s mechanical engineering program tenth in the nation for undergraduate programs. The aerospace program is the only accredited aerospace program in the University of California system.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, helicopter dynamics and aeromechanics, and dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aerelasticity of helicopters and jet engine blades, computational transonic aerelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize mechanical systems — design and control; power systems and thermal design; manufacturing processes; or fluids engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering and in Aerospace Engineering. An M.S. in Manufacturing Engineering is also offered.

Undergraduate Study

Bachelor of Science in Aerospace Engineering

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields. Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

The Major

Course requirements are as follows (190 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, 105A, 105D, 157, 192A.

(3) Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical and Aerospace Engineering 131A/131AL, 132A, 133A/133AL (thermodynamics, heat, and mass transfer); 153A (aerodynamics, propulsion, and control); 161A (unless taken as part of the core), 161B, 161C, 161D (space technology, 156B, 166C, 168, 193, 130F (structural and solid mechanics); Mechanical and Aerospace Engineering 162A, 162C, M192F (design and mechanisms); Materials Science and Engineering 143A.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Bachelor of Science in Mechanical Engineering

The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with an option in mechanical systems — design and control; power systems and thermal design; manufacturing processes and fluids engineering.

The Major

Course requirements are as follows (192 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100 (also 110L — see item 2 below), Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(3) Twenty technical elective units, of which at least four should be laboratory units, to be selected from one of the subject areas listed below; no more than eight units may be taken from any one of subgroups a, b, c:

Fluids Engineering

(a) Mechanical and Aerospace Engineering 157A.

(b) Electrical Engineering 103, Mechanical and Aerospace Engineering 150A, 150B, 153A, 192B, 192C.

(c) Mechanical and Aerospace Engineering 136, 150P, 161A, 161B.

Manufacturing Processes

(b) Materials Science and Engineering 143A, Mechanical and Aerospace Engineering 163A, 164.

(c) Civil and Environmental Engineering 175, Mechanical and Aerospace Engineering 155, 174, 194.
Mechanical Systems — Design and Control
(a) Civil and Environmental Engineering 130F, 137L, Mechanical and Aerospace Engineering 162C, 163C, 172, 194.
(c) Materials Science and Engineering 143A, Mechanical and Aerospace Engineering 163A, 168.

Power Systems and Thermal Design
(a) Mechanical and Aerospace Engineering 131AL, 133AL.
(b) Electrical Engineering 103, Mechanical and Aerospace Engineering 132A, 135, 150A, 192B, 192C.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

(6) Four free technical elective units selected from upper division courses offered by the department; students are strongly encouraged to consult their adviser.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Aerospace Engineering

Mechanical Engineering

Master’s Degrees
Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Aerospace Engineering and to the Master of Science program in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult Program Requirements for UCLA Graduate Degrees.

Admission forms, including a departmental supplement to the application, may be obtained by writing to 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Areas of Study
Applied dynamics systems control; dynamics; fluid mechanics; heat and mass transfer; structural and solid mechanics; and microelectromechanical systems (mechanical engineering only).

Course Requirements
At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. The courses should be chosen so that the breadth requirements and the requirements at the graduate level are met. The breadth requirements are only applicable to students who do not have a B.S. degree from an ABET-accredited aerospace or mechanical engineering program.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Aerospace Engineering

Breadth Requirements. Students are required to take at least three courses from the following four categories: (1) Mechanical and Aerospace Engineering 162A or 169A or 171A; (2) 150A or 150B; (3) 131A or 133A; (4) 156A or 156B.

Graduate-Level Requirement. Students are required to take at least one course from the following: Mechanical and Aerospace Engineering 231A, 231B, 231C, 250A, 255A, 256A, M256B, M269A, or 271A. The remaining courses can be taken to gain depth in one or more of the several specialty areas covering the existing major fields in the department.

Comprehensive Examination Plan
The comprehensive examination, which is offered every quarter, is required to be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. The student may, in consultation with the adviser and the major field chair, choose to take the first part of the Ph.D. preliminary written examination as the comprehensive examination. In case of failure, the student may be reexamined once with the consent of the graduate adviser.

Thesis Plan
The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Doctoral Degrees
Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Aerospace Engineering and to the Ph.D. program in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants to the Ph.D. program normally should have completed the requirements for the master’s degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.
Major Fields or Subdisciplines
Applied dynamics systems control; dynamics; fluid mechanics; heat and mass transfer; structural and solid mechanics; manufacturing and design (mechanical engineering only); and microelectromechanical systems (mechanical engineering only).

Course Requirements
There is no formal course requirement for the Ph.D. degree. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around major and minor fields. The syllabus for each major field can be obtained from the department. Each minor field embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B – or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are usually chosen to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations
After mastering the body of knowledge defined in the major field, the student takes a written preliminary examination covering this knowledge. This examination should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice. After passing the preliminary examination, the student may take the University Oral Qualifying Examination. The nature and content of the qualifying examination are at the discretion of the doctoral committee but include a review of the prospectus of the dissertation. The examination may include a broad inquiry into the student's preparation for research.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

Manufacturing Engineering

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Manufacturing Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult Program Requirements for UCLA Graduate Degrees.

Admission forms, including a departmental supplement to the application, may be obtained by writing to 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Areas of Study
Consult the department.

Course Requirements
At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. Choices may be made from the following major areas:

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Upper Division Courses. Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 163A, 163C, 168, 174, 192D, 193, 194, 195; Materials Science and Engineering 147B.

Graduate Courses. Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 263A, 263C, 263D, 280, 293, 294, 295A, 296A, 296B, 297.

Additional Courses. The remaining courses may be taken from other major fields of study in the department or from the following: Mathematics 120A, 120B; Computer Science 241A, 241B; Architecture and Urban Design 226B, M227B, 227D; Management 240A, 240B, 240C, 240D, 241A, 241B, 242A, 242B, 243A, 243B, 243C.

Comprehensive Examination Plan
The comprehensive examination, which is offered every quarter, is required to be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. In case of failure, students may be reexamined once with the consent of the graduate adviser.

Thesis Plan
The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Mechanical and Aerospace Engineering

Lower Division Courses
20. FORTRAN Programming with Numerical Methods Applications. Lecture, three hours; laboratory, two hours; outside study, seven hours. Prerequisites: Mathematics 31A, 31B. Introduction to programming with FORTRAN. Applications to numerical methods used in engineering.

94. Introduction to Computer-Aided Design and Drafting. Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects.

Upper Division Courses
102. Mechanics of Particles and Rigid Bodies. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 33A, Physics 8A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications.

103. Elementary Fluid Mechanics. Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 32B, 33A, Physics 8B. Introduction to elementary fluid mechanics dealing with application of principles of mechanics to flow of compressible and incompressible fluids.

M105A. Introduction to Engineering Thermodynamics. (Same as Chemical Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, Physics 8B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems.

105D. Transport Phenomena. Lecture, four hours; recitation, one hour; outside study, seven hours. Prerequisites: course 103, Mathematics 32B, 33A, Physics 8B. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control.

131A. Thermodynamics and Heat Transfer Laboratory. Laboratory, eight hours; outside study, four hours. Recommended: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena.

132A. Mass Transfer. Lecture, four hours; recitation, one hour; outside study, ten hours. Requirements: courses 131A, 157. Principles of mass transfer by diffusion. Mass transfer by convection in laminar and turbulent flows. Simultaneous heat and mass transfer. Applications in including evaporation of liquids and volatile fuels, evaporation and condensation, ablation and transpiration cooling, gas absorption and catalysis.

133A. Engineering Thermodynamics. Lecture, four hours; outside study, eight hours. Requirements: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive flows. Airplane and gas turbine engines. Applications in engineering systems.

133AL. Power Conversion Thermodynamics Laboratory. Laboratory, eight hours; outside study, four hours. Requirements: courses 133A, 157. Experimental study of power conversion and heat transfer systems using steam and gas engines, refrigeration cycles, and heat exchangers. Experiments include studies of thermodynamic operating characteristics of an actual Brayton cycle, Rankine cycle, compressor refrigeration unit, and absorption refrigeration unit.

134. Design and Operation of Thermal Hydraulic Power Systems. Lecture, three hours; laboratory, three hours; outside study, six hours. Requirements: courses 133A, 133AL, 157. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems.

135. Fundamentals of Nuclear Power. Prerequisite: junior standing. Introduction to nuclear engineering; nuclear physics, neutron cross sections, nuclear fission and fusion; elementary analysis and design of reactors. Criticality, one-group neutron diffusion theory, heat removal, and heterogeneous effects.

136. Thermal Hydraulic Design of Nuclear and Other Power Systems. Lecture, four hours; recitation, two hours; outside study, six hours. Requirements: senior standing. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, small plant design, steady state and transient operation.

137. Introduction to Fusion Engineering and Reactor Design. Prerequisite: course 135 or consent of Instructor. Fusion reactions, fuel cycle, and operating conditions. Magnetic and inertial confinement, including tokamaks, magnetic mirrors, laser fusion, and selected concepts. Concepts for and subsystems of fusion reactors. Design of reactors and key subsystems. Application of fusion reactors for electricity, fissionable fuel, and/or chemical fuel production.

150B. Aerodynamics. Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory and practical applications to thin airfoils (C1, C2), and wings (lift, induced drag). Gas dynamics, oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow.

150P. Jet Propulsion Systems. Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisites: courses 150A, 150B. Jet propulsion requirements for typical space missions, thermodynamics of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics.

153A. Engineering Acoustics. Prerequisite: upper division standing and instructor permission. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aid.

154A. Preliminary Design of Aircraft. Prerequisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Time assignment consists of preliminary design of a low-speed aircraft.

154S. Flight Mechanics, Stability, and Control of Aircraft. Prerequisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives.

155. Intermediate Dynamics. Lecture, four hours; outside study, eight hours. Requirements: course 102. Advanced concepts of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles, central force motion; kinematics and dynamics of a rigid body. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthogonality relations.

157. Basic Mechanical Engineering Laboratory. Laboratory, eight hours; outside study, four hours. Requirements: courses 103, M105A, 105D, Civil Engineering 108, Electrical Engineering 106. Methods of measurement of basic quantities and performance of basic experiment on heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis.

157A. Fluid Mechanics and Aerodynamics Laboratory. Laboratory, eight hours; outside study, four hours. Requirements: courses 150A, 150B, 157. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field.

161A. Introduction to Astronautics. Lecture, four hours; outside study, eight hours. Requirements: course 11. Space environment, trajectory behavior, planetary navigation, spacecraft control, and orbital mechanics.

161B. Introduction to Space Technology. Lecture, four hours; outside study, eight hours. Recommended (but not required): courses 102, 150D, 150P, 161A. Propulsion requirements for typical space missions, thermochromy of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability, Electric propulsion. Multistage rocket, separation dynamics. Satellite structures and materials, loads and vibrations. Thermal control of spacecraft.

161C. Spacecraft Design. Lecture, four hours; outside study, eight hours. Requirements: course 161B. Conceptual design of preliminary design, by students, of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, lifetime, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole.

161D. Space Technology Hardware Design. Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by SEAS professional machine shop and tested by the students. New project each year.

162B. Mechanical Product Design. Lecture, two hours; laboratory, four hours; outside study, six hours. Requirements: courses 94, 158A, 162A, 193, Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project.

162C. Electromechanical System Design Laboratory. Lecture, one hour; laboratory, eight hours; outside study, three hours. Requirements: course 162B. Laboratory design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. The assembled machinery is instrumented and monitored for operational characteristics.

162M. Senior Mechanical Engineering Design. Lecture, one hour; laboratory, six hours; outside study, five hours. Requirements: courses 131A, 133A, 162B, 169A, 171A. Must be taken in last two academic terms of students’ programs. Analytical design and testing of mechanical components. Design of mechanical systems. Final report of engineering specifications and drawings to be presented by design teams.

163A. Introduction to Computer-Controlled Machines. Prerequisite: course 171A (may be taken concurrently). Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electro-mechanical systems. Motion and command generation, servo-control design, and computer/machine interfacing.

163C. Robotics and Motion Control Laboratory. Laboratory, eight hours; outside study, four hours. Prerequisite: course 171A or consent of instructor. Hands-on experience with control systems, robotic devices and articulated machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multiaxial coordination, programming of hours. Final project required.

166A. Analysis of Flight Structures. Prerequisite: Civil Engineering 108. Introduction to two-dimen- sional, elastic, stress-strain equations, rigid-body and fa- tigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; ele- ments of plate theory; buckling of columns.

166C. Design of Composite Structures. Prerequi- site: course 156A or 166A. History of composites, stress-strain relations for composite materials, bend- ing and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric lami- nates, micromechanics of composites.

169. Introduction to Finite Element Technology. Lecture, four hours; outside study, four hours. Requisite: course 20, Civil Engi- neering 108, Mathematics 33A. Recommended: courses 91B, 94, 100A. Introduction to finite element method (FEM) and its matrix formulation of computer implementation of FEM concepts; practical use of FEM codes. Preprocessing and postprocess- ing techniques; graphics display capabilities; geometric and adjunctional modeling of systems; links with computer-aided design. Recent trends in FEM technology; design optimization. Term projects using FEM codes.

171B. Introduction to Control Theory and Dynamic Systems Control I. Prerequisite: course 191A or 192A or Electrical Engineering 102 or equivalent. Introduction to feedback principles, control systems design, stability, modeling of phys- ical systems in engineering and other fields; transform methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design.

172. Control System Design Laboratory. Labora- tory, eight hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Suc- cessful controller design requires students to formu- late performance measures for control problem, experimentally identify mechanical system, and de- velop uncertainty descriptions for design models.

174. Probability and Its Applications to Risk, Reli- ability, and Quality Control. Lecture, four hours; outside study, eight hours. Introduction to probability theory: random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress- strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling.

191A. Computer Numerical Control and Integral Transformers. Lecture, four hours; outside study, eight hours. Prerequi- site: course 192A. Complex variables, analytic func- tions, conformal mapping, contour integrals, singularities. Conformal representation by means of ortho- normal functions; Galerkin method. Use of Green’s function and transform methods.

192D. Introduction to Random Processes. Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): course 174 or equivalent. Ele- ments of probability, time, series, probability density function (PDF), averages, characteristics function; joint PDF, correlation function, and energy density function; Gaussian distributions, white noise process; random walk, strong and weak; spectral density function. M192F. Numerical Optimization Methods for Engi- neering Design. (Same as Civil Engineering M140.) Lecture, four hours; outside study, eight hours. Requi- site: course 20 or Civil Engineering 15A and 15B, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design; one-dimensional minimization, unconstrained minimization, linearly con- strained minimization, general nonlinear problems, approximation concepts, duality. Optimization prob- lem statements. Advantages and limitations of numer- ical optimization. Applications.

194. Introduction to CAD/CAM Systems: Design and Implementation. Laboratory, eight hours; out- side study, four hours. Requisites: courses 20, 94. Hands-on experience with CAD/CAM systems design and implementation, with special emphasis on the theory of parametric curves and surfaces and their computer-interactive graphics implementation.

195. Computer Numerical Control and Applica- tions. Laboratory, eight hours; outside study, four hours. Prerequisite: upper division standing. Funda- ments of numerical control (NC) technology. Pro- gramming of computer numerical control (CNC) ma- chines in NC codes and APT language and with CAD/ CAM systems. NC postprocessors and distributed nu- merical control. Operation of CNC lathe and milling machines. Programming and machining of complex engineering parts.

199. Special Studies (2 to 8 units). Prerequisites: consent of instructor. Independent study: investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

Graduate Courses

231D. Application of Numerical Methods to Trans- port Phenomena. Prerequisite: course 132A or con- sent of instructor. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields.

231F. Advanced Heat Transfer. Prerequisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in trans- port phenomena; phenomenological theories of turbu- lent heat and mass transport.

232B. Advanced Mass Transfer. Prerequisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbu- lent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration, cooling combustion.

235A. Nuclear Reactor Theory. Prerequisites: courses 135, 192. Underlying physics and mathemat- ics of nuclear fission and fusion processes. Nuclear fission, reactor kinetics, slowing down and thermaliza- tion, multigroup methods, introduction to transport theory.
236A. Nuclear Materials Engineering. Prerequisites: course 135 and Materials Science 143A, or consent of instructor. Fundamentals of structure and properties of nuclear fuel; fuel properties, fuel cycle and fuel materials; fission-fusion hybrid systems, and nuclear reactor design. May be repeated for credit. S/U grading.

237C. Fusion Reactor Technology and Design. Prerequisites: courses 135, 137. Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, neutronics, fuel cycles, integrated neutron shielding, magnets, system design and optimization.

239B. Seminar: Current Topics in Transport Phenomena (2 to 4 units). (Formerly numbered 239BA-239BZ.) Seminar, two to four hours; outside study, four to eight hours. Prerequisite: course 237A. Concepts of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number: wakes, boundary layers, instability, transition, and turbulent shear flows.

250C. Compressible Flows. Prerequisites: courses 150A, 150B, or equivalent. Introduction to the dynamics of compressible flows from a compressible Eulerian point of view. Pressure effects on compressible flow. Subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized Euler and point thick body theories). Perturbations applied to subsonic to hypersonic speeds.

250D. Computational Aerodynamics. Lecture, eight hours. Prerequisites: courses 150A, 150B or equivalent, 192B. Introduction to useful methods for computation of aerodynamic flow fields. Coverage of potential, Euler, and Navier-Stokes equations for subsonic to hypersonic speeds.

250E. Spectral Methods in Fluid Dynamics. Lecture, four hours; outside study, eight hours. Prerequisites: courses 192A, 192B, 192C, 250A, 250B. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on techniques of solving unsteady three-dimensional Navier/Stokes equations. Topics include: truncation of functions, discrete Fourier transforms, etc.

251A. Stratified and Rotating Fluids. Prerequisite: course 150A or equivalent or consent of instructor. Fundamentals of dynamical evolution of layers or rotation, illustrated by examples with environmental, geophysical, or technical importance. Linear and finite amplitude wave motion. Flow past bodies; blocking phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents.

252A. Stability of Fluid Motion. Prerequisite: course 150A or equivalent or consent of instructor. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary linear motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence.

252B. Statistical Theory of Turbulence. Prerequisite: course 150A or consent of instructor. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, random functions, discrete Fourier transforms, etc.

253A. Advanced Engineering Acoustics. Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids.

254A. Special Topics in Aerodynamics. Prerequisites: courses 150A, 150B, 192A, 192B, and 192C, or equivalent, or consent of instructor. Special topics of current interest. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics.

254B. Helicopter Dynamics and Aeromechanics. Lecture, four hours; outside study, hours. Prerequisites: courses 150A, 166A, 169A. Recommended: course 150B. Overview of helicopter dynamics and aeromechanics. Topics include rotor configurations and control systems, rotor aerodynamics and performance, blade flapping dynamics, helicopter rotor aerelasticity, coupled rotor/fuselage dynamics, and control of aeromechanical problems.

255A. Advanced Dynamics. Prerequisites: courses 155 and 169A, or consent of instructor. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; process of and rotation of spinning bodies.

255B. Mathematical Methods in Dynamics. Prerequisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Lyapunov direct method; the Hamiltonian as a Lyapunov function; autonomous systems; averaging; methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems.

256A. Mechanics of Deformable Solids. Prerequisite: course 164B and 166A, or consent of instructor. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations; general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems.

256B. Elasticity. (Same as Civil Engineering M230.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 256A, 256B. Classical rate-dependent plasticity theory; yield functions, flow rules and thermodynamic principles of rate-dependent plasticity. Persyn and Duvant/Lions types of viscoplasticity. Thermoelasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementation.

256F. Analytical Fracture Mechanics. Prerequisites: course 156A, 156B, or 166A, and Materials Science 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells.

257A. Elastodynamics. (Same as Earth and Space Sciences M216.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 256A, 256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE) and mechanical engineering.

258. Experimental Techniques in Fluid Mechanics and Thermal Science. Prerequisite: consent of instructor. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods.
259A. Seminar: Advanced Topics in Fluid Mechanics. Prerequisite: consent of instructor. Advanced study of the mechanics of the atmosphere and oceans, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers).

259B. Seminar: Advanced Topics in Solid Mechanics. Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids.

260. Current Topics in Mechanical Engineering (2 to 4 units). (Formerly numbered 260AA-260ZZ.) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U or letter grading.

262. Mechanics of Intelligent Material Systems. Lecture, four hours; outside study, eight hours. Prerequisite: course 156B or equivalent. Recommended: course 166C. Constitutive relations for electro-magneto-thermo-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and biomorph.

263A. Electromechanics of Computer-Controlled Machines. Lecture, four hours; other, eight hours. Prerequisite: course 171A. Recommended: courses 163A, 163B, 163C. Analysis and modeling of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromechanical and piezoelectric actuators and control systems with mechanical flexibilities.

263B. Spacecraft Dynamics. Lecture, four hours; outside study, eight hours. Prerequisite: course 255A. Recommended: course 255B. Modeling, dynamics, and stability of spacecraft; spinning and dual-spin spacecraft dynamics; spinup through resonance, spinning rocket dynamics; environmental torques in spacecraft dynamics; spinup through resonance, and stability of spacecraft; spinning and dual-spin spacecraft dynamics.

264. Mechanics and Trajectory Planning of Industrial Robots. Lecture, four hours; other, eight hours. Prerequisite: course 163A or consent of instructor. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student projects.

265. Advanced Robotics. Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): courses 155, 163C, 171A, 263C. Motion planning and control of autonomous dynamic systems. Nonlinear joint control experiments in joint control and multi-axes coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, modeling, planning of manipulators in space, obstacle avoidance.

267A. Optimum Structural Design. (Same as Civil Engineering M240.) Prerequisite: course 261A or Civil Engineering 235A. Synthesis of structural systems; analysis of system problems; techniques for synthesis and optimization; application to aerospace and civil structures.

268B. Failure of Structural Systems. Lecture, four hours; outside study, eight hours. Prerequisite: Civil Engineering 153B. Exploration of a current area of research in depth.

269B. Advanced Dynamics of Structures. Prerequisite: course 269A. Analysis of linear and nonlinear response of structures to dynamic loads. Stresses and deflections in structures. Structural damping and self-induced vibration.

269D. Aeroelastic Effects in Structures. Prerequisite: course 269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow induced instability and response of structural systems.

270A. Linear Systems. Lecture, four hours; outside study, eight hours. Prerequisite: course 171A or consent of instructor. State-space representation of continuous and discrete-time control systems, linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; stability of linear systems; controllability and observability; control and observer canonical forms; stabilization and pole-placement by feedback; realization theory.

270B. Linear Optimal Control. (Formerly numbered 271A.) Lecture, four hours; outside study, eight hours. Prerequisite: course 270A or Electrical Engineering 240A or equivalent. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control; algebraic and differential Riccati equations; implications of controllability, observability, and detectability solutions.

270C. Optimal Control Theory. (Formerly numbered 271B.) Lecture, four hours; outside study, eight hours. Prerequisite: course 270B or equivalent. Necessary and sufficient conditions for optimality. Variational methods. Pontryagin maximum principle, and dynamic programming.

271A. Stochastic Processes in Dynamical Systems. Lecture, four hours; outside study, eight hours. Prerequisites: courses 171A and 174, or consent of instructor. Probability space, random variables, stochastic processes, Brownian motion, Markov processes, stochastic integrals and differential equations, power spectral density, and Kolmogorov equations.

271B. Stochastic Estimation. Lecture, four hours; outside study, eight hours. Prerequisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators.

271C. Stochastic Optimal Control. Lecture, four hours; outside study, eight hours. Prerequisite: course 271B. Stochastic dynamic programming, certainty equivalence principle, separation theorem, information statistics; linear-quadratic-Gaussian problem, linear-exponential-Gaussian problem. Relationship between stochastic control and robust control.

271D. Seminar: Special Topics in Dynamic Systems Control. Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, Markov chains, adaptive filtering, industrial and aerospace applications, etc.

274. Methods of Probabilistic Safety Assessment. Lecture, four hours; outside study, eight hours. Prerequisites: course 174 or consent of instructor. Methods for evaluation of risk from systems failures. Emphasis on advanced statistical methods for data analysis; models of dependent failures; elicitation and use of expert opinions; human reliability models; propagation of uncertainties in physical models, and modeling of nuclear power plants, waste repositories, and space systems.

280. Microelectromechanical Systems (MEMS). Lecture, four hours; outside study, eight hours. Prerequisite: Materials Science and Engineering 124. Introduction to micro- and nanotechnology: general features of microelectromechanical systems, MEMS; fundamentals of integrated circuit (IC) and microfabrication processes; surface micromachining; polysilicon and other thin film materials; growth of thin films by chemical vapor deposition; etching and deposition techniques; mechanical behavior of thin film-based structures; applications of micromachining and micromechanics; micromachining of MEMS structures, etc.

281. Microelectronics. Lecture, four hours; outside study, eight hours. Prerequisite: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices.

282. Experimental Mechanics for Microelectromechanical Systems (MEMS). Lecture, four hours; outside study, eight hours. Prerequisite: course 280 or Electrical Engineering 250A. Silicon micromachining, micromachining processes, mechanical issues of MEMS structures, and mechanical behavior (e.g., strength/ fracture/fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties.

284. Sensors, Actuators, and Signal Processing. Lecture, four hours; outside study, eight hours. Prerequisite: course 280 or Electrical Engineering 250A. Silicon micromachining, nonlinear control design, control of MEMS transducers. Applications of unique properties of micro transducers for distributed and real-time control of engineering problems. Associated signal processing requirements for these applications.

287. Advanced Microelectromechanical Systems (MEMS). Lecture, four hours; outside study, eight hours. Prerequisite: course 280 or Electrical Engineering 250A. Silicon micromachining, nonlinear control design, control of MEMS transducers. Applications of unique properties of micro transducers for distributed and real-time control of engineering problems. Associated signal processing requirements for these applications.

294. Advanced CAD/CAM Systems. Lecture, four hours; outside study, eight hours. Prerequisite: course 194 or consent of instructor. CAD/CAM systems design, with special emphasis on computational geometry, path to trajectory conversion, command generation, controller and interpolator design, and current research topics in CAD/CAM systems.

296A. Damage and Failure of Materials in Mechanical Design. Lecture, four hours; outside study, eight hours. Prerequisites: course 196A, Materials Science 143A. Role of failure prevention in mechanical design and case studies. Mechanics and physics of material imperfections: voids, dislocations, cracks, and inclusions. Statistical and deterministic design methods. Plastic, fatigue, and creep damage.

296B. Thermochemical Processing of Materials. Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 193. Thermodynamics, heat and mass transfer, principles of material processing: phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces and heat sources, natural convection, nucleation and growth of microstructure, etc. Applications with chemical vapor deposition, infiltration, etc.

297. Composites Manufacturing. Lecture, four hours; outside study, eight hours. Prerequisites: course 166C and Materials Science 151, or consent of instructor. Matrix materials, fibers, fiber preforms, elements of composite design, autoclave/compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, metal and ceramic matrix composites, quality assurance.

298. Seminar: Engineering (2 to 4 units). Designed for graduate mechanical and aerospace engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: appointment as teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

474B. Concurrent Engineering. Lecture, four hours; outside study, eight hours. Prerequisite: Materials Science 474A. Product design, CAD/CAM, engineering analysis integration, project management.

474C. Total Quality Engineering. Lecture, four hours; outside study, eight hours. Prerequisite: course 474B. Total quality management, statistics, probability, off-line quality control, on-line quality control, quality inspection.

475B. Automation. Lecture, four hours; outside study, eight hours. Prerequisite: Materials Science 475A. Automatic control of single devices and processes for manufacturing automation. Integrated automation design. Introduction to control, digital control, and rule-based systems. Sensors and actuators used in manufacturing processes. Robotics and multiprocess machine tools. Integration of computer-controlled systems and control hardware.

476. Integrated Manufacturing Engineering (IME) Seminar Series (1 unit). Prerequisite: consent of instructor. Lectures by engineers in executive positions to provide management perspectives in manufactur- ing enterprises. Current manufacturing techniques and integrated product development efforts by industry experts. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Designed for graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Designed for graduate mechanical and aerospace engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Designed for graduate mechanical and aerospace engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Designed for graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Designed for graduate mechanical and aerospace engineering students. Usually taken after student has been advanced to candidacy. S/U grading.

Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught information acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Medical

Upper Division Courses

M190A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (Same as Psychiatry M192A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where home- less are provided with health care. P/NP or letter grading.

M190B. Field Studies Seminar: Health Outreach Issues and Interventions (2 or 4 units). (Same as Psychiatry M192B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Prerequisite: course M190A. Dynamics of multidisciplinary approaches to prevent health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

Adjunct Professor
Lawrence M. Souza, Ph.D. (Biotechnology)

Scope and Objectives

The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises, and academic positions.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

The department does not accept students whose sole objective is a master's degree.

Areas of Study

See below under Doctoral Degree.

Course Requirements

The department does not have specific requirements for the master's degree, as it rarely confers the degree. However, nine courses, at least five of which must be graduate-level courses, and the successful completion of both the written and oral qualifying examinations are necessary to be considered for a terminal master's degree by the graduate affairs committee. Eight units of 500-series courses may be applied toward the total course requirement of which four units may be applied to the graduate-level course requirement.

Comprehensive Examination Plan

Students must pass both the doctoral written and oral qualifying examinations.

Thesis Plan

None.

Doctoral Degree

Admission

In addition to the University minimum requirements, the following are required:

1. A bachelor's degree with a major in either the biological or physical sciences.

2. At least a B+ in chemistry, physics, and mathematics; at least a B average in biology (upper division and prior graduate study).

3. Three letters of recommendation.

4. Graduate Record Examination (GRE) General Test and Subject Test in either Biology or Biological Chemistry.

5. Statement of purpose.

For departmental brochures and/or application forms, write to Students Affairs Office, Microbiology and Immunology, UCLA Box 951747, Los Angeles, CA 90024-1747, (310) 206-5148. New Ph.D. students may also be admitted through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

The student is expected to be competent in both microbiology and immunology. However, thesis work must be done in one of the following divisions: immunology, medical microbiology, or virology.

Course Requirements

1. Microbiology and Immunology M229 and Biological Chemistry CM253 (to be completed during the first year of study).

2. Course 596 is required. Students are required to complete at least two laboratory rotations during the first year of study.

3. Two of the following three courses are also required: Microbiology and Immunology 208, M227, M261.

4. Additional course requirements are determined by a student's chosen major field and preceptor.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The department written examination is to be taken at the end of the first year of study and no later than the Winter Quarter of the second year. The examination is in the form of a “mini” grant proposal and focuses on one or a few specific questions asked by the student's current research project. The examination is graded on a pass/fail/revise and resubmit basis. Students who do not pass the exam on the first attempt must pass it within three months of the original submission date.

Oral Qualifying Examination. The University Oral Qualifying Examination is to be taken
within three years (nine quarters) of entrance into the program. Advancement to candidacy is awarded on successful completion of this examination. If inadequacies are encountered, students may be required to repeat the examination. The examination consists of three parts.

Research Proposal. Students must prepare a written research proposal and present the proposal orally to their dissertation committee. The topic of the proposal must be in an area different from that of the thesis project. The topic should be within the fields of interest in the department (i.e., immunology, bacteriology, virology, molecular biology, mycology, and parasitology). The proposal must utilize an approach different from that employed in the student's own research. That is, students should not apply their own methodology to another system. The proposal should follow a standard grant format but not necessarily a National Institutes of Health (NIH) grant format. This is decided between the student and the student's preceptor.

Student Research. Students should be able to discuss their own research plans and results to date.

General Scientific Background. Students are also examined on general knowledge of microbiology and immunology.

Once students have completed the dissertation, they are required to present an overview of their dissertation work in an open seminar at which their committee is present.

Microbiology and Immunology

Upper Division Courses

CM133. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrent with course CM233. S/U or letter grading.

M185A. Immunology (5 units). (Same as Microbiology M185A and Molecular, Cell, and Developmental Biology M185A.) Seminar. Three hours: discussion, 90 minutes; outside study, 11.5 hours. Required: Requisites: Life Sciences 3, 4. Recommended requisites or corequisites: Chemistry 150L, Molecular Biology and Developmental Biology 100 or 139 or 140. Not open for credit to students with credit for course M261 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunohemistry; cellular and molecular aspects of humoral and cellular immune reactions.

199. Directed Individual Research Studies in Microbiology and Immunology (2 to 8 units). Prerequisites: senior standing, consent of instructor (based on written research proposal). Individual research projects carried out under direction of a professor.

Graduate Courses

Undergraduates may enroll in some graduate courses with consent of instructor.

201. Microbiology and Immunology (8 units). Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

202A. Fundamentals of Immunology (2 units). Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunohemistry; cellular and molecular aspects of humoral and cell-mediated immune functions.

202B. Medical Bacteriology (2 units). Prerequisite: consent of instructor. Characteristics of bacteria rickettsiae and chlamydiae associated with diseases of humans; host/parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity.

202C. Medical Virology (2 units). Prerequisite: consent of instructor. Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses.

202D. Medical Mycology and Parasitology (2 units). Prerequisite: consent of instructor. Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of morphology, biology, host/parasite relationship, public health problems, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals.

M208. Molecular Biology of Animal Viruses. (Formerly numbered 208.) (Same as Molecular, Cell, and Developmental Biology CM208.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with a background in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host.

M215. Interdepartmental Course: Tropical Medicine (2 units). (Same as Medicine M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

M223. Membrane Research Seminar (2 units). (Same as Microbiology M223.) Prerequisite: consent of instructor. Critical discussion of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

M227. Molecular Genetics of Bacteria and Phage. (Same as Chemistry M227, Molecular, Cell, and Developmental Biology CM227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Prerequisite: Chemical Biology CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

M229. Cellular Biology of Host/Pathogen Interactions (6 units). (Same as Microbiology M229 and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, four hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

CM232, Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry CM232, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

M234. Ethics and Accountability in Biomedical Research (2 units). (Same as Microbiology M234.) Designed for graduate students. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which challenges posed by unique or certain societal values may conflict. S/U grading.

M241. Use of the Computer in Biology (2 units). (Same as Molecular, Cell, and Developmental Biology M201.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

M246. Computer Analysis of Genetic Organization. (Same as Microbiology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisite: Life Sciences 4 or Microbiology CM159. Lectures and laboratory instruction in contemporary computer applications for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computer systems.

M250. Cell and Molecular Biology. Lectures and student seminar presentations. Review of selected current topics in cellular and molecular biology. Topics include recent experimental results on organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading.

M252. Seminar: Microbial Pathogenesis (2 units). (Same as Microbiology M252.) Prerequisite: consent of instructor. Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology and molecular genetics prepare for careers in biomedical research, medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host-parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. Students interested in a doctoral program with a fundamentally disease-oriented approach to microbiology should see the Microbiology and Immunology Department description.

M256. Seminar: Viral Oncology (2 units). (Same as Pathology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

M260. Immunology Forum (2 units). (Same as Microbiology M260.) Prerequisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, graduate students, and graduate students from diverse departments. S/U grading.

M261. Molecular and Cellular Immunology (6 units). (Same as Microbiology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units). (Same as Microbiology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

M262B. Immunology of AIDS (2 units). (Same as Epidemiology M214 and Microbiology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: courses 202A, 202B, 202C, 202D, M258B. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

M262D. Selected Topics in Immunology (2 units). (Same as Microbiology M262D.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunity, with emphasis on molecular mechanisms.

270. Immunology in Disease (2 units). Lecture, one hour; discussion, one hour. Prerequisite: basic immunology. Introduction to role of immune processes in disease for students with prior knowledge of basic immunology. Topics include immunodeficiency, immediate hypersensitivity reactions, autoimmune disease, and immune complex-mediated diseases, together with transplantation immunology, tumor immunology (role of immunity in infection). Students prepare a 20- to 30-minute presentation on a selected topic.

271. Immunology Overview (2 units). Lecture, two hours; discussion, one hour. Designed for graduate students. Identification of major components of immune system, their modes of active maturation and regulation, cytokine signaling systems, principal effector mechanisms, and immune contributions to autoimmunity and hypersensitivity.

274. Interactions of Immune System and Nervous System (2 units). Lecture, one hour; discussion, one hour. Prerequisites: graduate or postdoctoral standing in immunology, behavioral sciences, or neurosciences. Consent of instructor. Limited to 10 students. Study of existing knowledge of interactions between central and peripheral nervous system and immune system. Review of research on central nervous system effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

275. Biology of HIV. (Same as Epidemiology M228.) Lecture, three hours. Prerequisites: Biostatistics 100A and Epidemiology 100 or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory.

285. Intermediate Immunology. (Formerly numbered M285B.) (Same as Microbiology CM285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Prerequisites: course M185A, Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A.

293. Major Concepts in Oncology. (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology. Topics include cancers of the brain, radiation therapy, and chemotherapy. S/U or letter grading.

294. Molecular Basis of Cancer. (Same as Pathology M294.) Lecture, three hours; discussion, one hour. Prerequisites: course M229, Biological Chemistry CM253, CMG67, Neurobiology M209A. Fundamental biological, genetic, and molecular processes involved in genes and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

596. Directed Individual Study or Research (2 to 8 units). Laboratory, to be arranged. Prerequisite: consent of graduate adviser. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 6 units).

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.
Undergraduate Study

Bachelor of Science Degree

Preparation for the Major

Life Sciences Core Curriculum

Required (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

In order to be admitted as microbiology and molecular genetics majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology for majors equivalent to Life Sciences 1, 2, and 3; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

Students intending to major in microbiology and molecular genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

The Major

Required: Microbiology and Molecular Genetics 101, 101L, 102, 102L, C106, C159, M185A; Chemistry and Biochemistry 153A, 153C, 153L; four additional upper division courses from the departmental list or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA in the major. A maximum of four units of Microbiology and Molecular Genetics 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Honors Program

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty adviser from the Department of Microbiology and Molecular Genetics. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H, culminating in a thesis. If the thesis is accepted by the honors committee, students are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Spring Quarter for the elective program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

Applicants for the Master of Arts program in Microbiology and Molecular Genetics must obtain faculty sponsorship before submitting an application and, in addition to the other application materials (see Ph.D. application procedures), must submit a five-page research proposal describing the thesis problem. Information and the proposal format are available from the graduate adviser's office.

The department accepts relatively few students whose objective is a master's degree and does not encourage application.

Areas of Study

Consult department.

Course Requirements

A total of nine courses is required for the M.A. degree. A total of five courses must be at the graduate level. Required courses are specified on an individual basis by the initial advisory committee (three faculty members) which generally becomes the thesis committee.

There is no limit to the number of times Microbiology and Molecular Genetics 598 may be repeated. It is graded S/U only and can be taken for two to 12 units per quarter. A maximum of two courses (eight units) in the 500 series may apply to the nine-course (36 units) M.A. degree, with only one course (four units) applying toward the five-course (20 units) graduate course requirement.

Comprehensive Examination Plan

None.

Thesis Plan

The thesis committee is established shortly after admission to the program. A committee member outside the department is not required but highly recommended. The department offers only a thesis plan for the master's degree.

Doctoral Degree

Admission

Admission to the Ph.D. program in Microbiology and Molecular Genetics is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

Under special circumstances, new Ph.D. students may be admitted directly. The following criteria apply for new Ph.D. students admitted directly to the program.

Applicants must have completed an undergraduate major in microbiology or a related field with superior scholastic achievement and should have preparation in calculus, physics, biology, genetics, physical, organic and biochemistry, and microbiology. In certain cases, on recommendation of the graduate adviser and the departmental admissions committee, background deficiencies may be remedied concurrently with graduate studies. The Graduate Record Examination (GRE) General Test is required for admission, and the Subject Test in Biochemistry, Cell and Molecular Biology, Chemistry, or Biology is recommended. Three letters of recommendation from individuals who can provide direct knowledge of both the applicant's academic record and potential for superior achievement in independent research are required. The GRE scores and letters should be submitted directly to the department. The department generally accepts students in Fall Quarter only. Under exceptional circumstances the Graduate Admissions Committee may agree to admit a student in Winter or Spring Quarter. Completion of a master's degree is not normally required.

Major Fields and Subdisciplines

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogene sis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research in all of these fields. The objective of the department is to provide depth and training in independent study and research for graduate students.

Course Requirements

Formal Lecture/Laboratory Courses. (1) Biochemistry: Chemistry and Biochemistry CM253 (six units; offered only in Fall Quarter; to be completed during the first year); (2) Cell Biology: Chemistry and Biochemistry M267 or Neurobiology M209A or Microbiology and Molecular Genetics M229.

A total of eight additional units of 200-level coursework to be selected from at least two of the following four subject areas is required. These courses may be selected to remedy background deficiencies or to deepen knowledge of a particular subject area. Acceptable courses include the following:

1. General microbiology: Microbiology and Molecular Genetics C211, C212.
2. Host/parasite interactions and virology: Microbiology and Molecular Genetics C204C, C206, Microbiology and Immunology 208, 210.
3. Immunology: Microbiology and Molecular Genetics M185A or CM285B, or M261.
Microbiology and Molecular Genetics

Lower Division Courses

6. Introduction to Microbiology. Lecture, three hours. Not open for credit to students with credit for course 101, Life Sciences 2, former Biology 5, or equivalent. Designed for nonmajors. Introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs.

7. Developments in Biotechnology. Lecture, three hours; demonstration, one hour; outside study, eight hours. Recommended (but not requisite): course 6 or Biology 2 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

10. Applied Medical Microbiology (5 units). Lecture, three hours; laboratory, five hours; outside study, eight hours. Enforced requisite: Life Sciences 2. Recommended corequisite: course 101L. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology.

101L. Bacteriology Laboratory (3 units). Discussion, one hour; laboratory, six hours. Prerequisites: Chemistry 153A, Life Sciences 3. Recommended: Life Sciences 4. Recommended corequisite: course 101 (or 101 with a grade of C or better if previously taken). General laboratory techniques and theory in microbiology and molecular genetics, including isolation and identification of bacterial species from nature, transformation of Escherichia coli, Ames test, analysis of auxotrophic mutants.

102. Introductory Virology. Lecture, three hours. Prerequisites: Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended corequisite: course 102L. Biological properties of viral and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts.

102L. Virology Laboratory (2 units). Laboratory, four hours. Prerequisites: Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended corequisite: course 102. General laboratory techniques and theory in virology, including complementation, recombination, transduction, experiments in animal virology using tissue culture.

C106. Molecular and Genetic Basis of Bacterial Infections. Lecture, three hours; discussion, one hour. Prerequisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206.

C111. Biology of Prokaryotic Cell. Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211.

CM133. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of biotechnological concepts, regulatory and ethical aspects of biotechnology. Prerequisites: consent of instructor. Concurrently scheduled with course CM233.

CM156. Human Genetics. (Same as Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 3, 4, Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lecture and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

C159. Advanced Molecular Genetics (5 units). (Formerly numbered C119) Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 153A and Life Sciences 4, or consent of instructor. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course CM259.

CM165. Bioprocess Technology. (Same as Chemical Engineering CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Prerequisites: course 101, Chemical Engineering C115, and Chemistry 156, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265.
M185A. Immunology (5 units). (Same as Microbiology and Immunology M185A and Molecular, Cell, and Developmental Biology M185A.) Lecture, three hours; discussion, one hour. Requisite: consent of instructor. Students must have 3.0 GPA in the premajor and major, or consent of instructor. Reading and discussion of papers dealing with current questions in the fields of medical and human genetics, population genetics, epigenetics, and eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

223. Seminar: Microbial Cellular Genetics (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

224. Seminar: Microbial Cell Biology (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

235. Advanced Molecular Genetics (5 units). (Formerly numbered M235.) Lecture, three hours; discussion, one hour. Prerequisites: consent of instructor. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers and critical evaluation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course CM159. Independent research project required of graduate students.

M246. Computer Analysis of Genetic Organization. (Same as Microbiology and Immunology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, five hours. Prerequisites: C212 or consent of instructor. Schedule with course C159 or Life Sciences 4. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. Prior course work in computer science necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

M248. Molecular Genetics (5 units). (Same as Biological Chemistry CM248 and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Prerequisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transport, signal transduction, developmental genetics, neurogenetics, and immunogenetics.

250. Seminar: Microbial Metabolism (2 units). Prerequisite: consent of instructor. Discussion and student presentations of recent work in areas of general and molecular physiology of bacterial metabolism.

252. Seminar: Microbial Pathogenesis (2 units). (Same as Microbiology and Immunology M252.) Prerequisite: consent of instructor. Students must present current literature. May be repeated for credit. S/U or letter grading.

254. Pre-mRNA Processing in Cellulose Metabolism and Differentiation (2 units). Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Reading and discussion of papers dealing with eukaryotic and prokaryotic control of gene expression. From detailed RNA chemistry and autoregulatory reactions to more recently discovered and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

255. Seminar: Microbial Cell Biology (2 units). Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.
M261. Molecular and Cellular Immunology (6 units). (Same as Microbiology and Immunology M261 and Molecular, Cellular, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Prerequisites: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units). (Same as Microbiology and Immunology M262A.) Review of recent literature in immunobiology, cancer immunology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor-specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

M262B. Immunology of AIDS (2 units). (Same as Epidemiology M214 and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: course M258B, Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

M262D. Selected Topics in Immunology (2 units). (Same as Microbiology and Immunology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

M263. Molecular and Cellular Immunology Seminar (2 units). (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

CM265. Bioprocess Technology. (Same as Chemical Engineering CM265.) Lecture, two hours; laboratory, eight hours; outside study two hours. Prerequisites: course 101, Chemical Engineering C115, and Chemistry 156, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM1615.

270. Seminar: Molecular Virology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.

280. Seminar: Molecular and Cellular Endocrinology (2 units). Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading.

CM285. Intermediate Immunology. (Formerly numbered CM285B.) (Same as Microbiology and Immunology M285 and Molecular, Cellular, and Developmental Biology CM285.) Lecture, two hours; discussion, one hour. Prerequisites: course M185A, Molecular, Cellular, and Developmental Biology C180. Recommended corequisite: Chemistry 138B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

290. Seminar: Molecular Genetics (2 units). Seminar, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U grading.

296A-296Z. Seminars: Research Topics in Microbiology, Molecular Genetics (1 to 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in microbiology and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296A. Eukaryotic Transcription Control.

296B. Regulation of Pre-mRNA Splicing.

296D. Escherichia coli Physiological Research.

296E. Archaeabacterial Research.

296F. Molecular Biology of Microbial Diversity.

296G. Structure and Function of Membrane Transport Proteins.

296H. Genetics of Common Diseases.

296J. Microbial Pathogenesis.

296K. Advanced Topics in Immunology.

296L. Molecular Biology of Bacterial Growth.

296M. Immune Regulation and Autoimmune Disease.

296N. RNA and Protein Structure and Function.

296Q. Cell Growth and Signal Transduction.

296P. Bacterial Toxins and Human Cytokines.

296Q. Mechanisms of Hematopoietic Development.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation of personnel for employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Microbiology in Higher Education (2 units). Lecture/discussion/laboratory. Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

506. Directed Individual Research (2 to 12 units).

508. Research for M.A. Thesis (2 to 12 units).

598. Research for Ph.D. Dissertation (2 to 12 units).

Hong Wu, Ph.D.

Scope and Objectives
The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Starting with the biochemistry of drugs, departmental investigators study gene expression and its regulation, signal transduction processes, cell-to-cell communication, and integrated organ functions using techniques of structural chemistry and biology, molecular and cell biology, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Biological Imaging and the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are closely affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their
first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student’s interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Note: There is no degree program in pharmacy at UCLA.

Master’s Degree

Admission

The Master of Science (M.S.) degree in Pharmacology is offered only under special circumstances: for example, to candidates who already have a doctoral degree in another field and wish to obtain additional training in pharmacology or to those doctoral students who are already in the program and who for some reason cannot continue for the Ph.D. To obtain the M.S. degree, the student must formally request approval by the graduate training committee. If approved, a guidance committee, proposed by the student and approved by the graduate training committee, reviews the thesis. None of the research conducted for the M.S. thesis may be applied to a Ph.D. degree later.

Areas of Study

Consult the department.

Course Requirements

The M.S. degree requires satisfactory completion of the required courses as listed under doctoral course requirements below, excluding three quarters of Molecular and Medical Pharmacology 200.

Comprehensive Examination Plan

None.

Thesis Plan

The M.S. degree requires satisfactory completion of a thesis.

Doctoral Degree

Admission

In addition to meeting University requirements for graduate admission, applicants must have received a bachelor’s degree in a biological or physical science or in the premedical curricu-

lum. Prerequisite courses include basic biology, basic chemistry, organic chemistry, and biochemistry, including laboratory. Quantitative analysis and physical chemistry are recommended.

In suitable cases, students who have course deficiencies may be admitted to graduate status, but any deficiencies have to be removed within a specified time. Graduate Record Examination (GRE) scores and three letters of recommendation are required.

Applicants may write to the department for a departmental brochure and/or application form.

Students may also enter the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

The Department of Molecular and Medical Pharmacology offers two M.D./Ph.D. programs concurrently with the UCLA School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the medical school in order to qualify. The second is the Specialty Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

Major Fields or Subdisciplines

Cardiovascular pharmacology; chemical pharmacology; medical pharmacology; immuno-pharmacology; neuroendocrine pharmacology; neuropharmacology; psychopharmacology; nuclear medicine (positron emission tomography); pharmacokinetics.

Course Requirements

Required: Molecular and Medical Pharmacology 200 (three quarters), 211A-211B, 212A-212B, 234A-234B, 237A-237B, 241, 251 (must be taken every quarter); and two electives chosen from Molecular and Medical Pharmacology M255, Biological Chemistry CM253, CM267 or Neurobiology M209A, Physiology 201A-201B/M203A-M203B, or a course in biostatistics.

These requirements are waived for students who have passed equivalent courses with grades of B or better within the past 36 months. Students are required to maintain a grade-point average of 3.0 in all coursework and to achieve grades of B or better in all molecular and medical pharmacology courses. One grade of less than B in a required molecular and medical pharmacology course results in probationary status; the course must be repeated with a grade of B or better; two grades of less than B result in recommendation to the graduate dean for dismissal. A single grade below B in any of the other required courses results in probationary status as well. Any student with two grades less than B in any of the non-molecular and medical pharmacology courses is considered by the graduate training committee for dismissal. A total of three grades below B in any of the required courses results in recommendation to the graduate dean for dismissal.

All required coursework should be completed by the end of the sixth quarter.

The department provides a system of laboratory rotations (Molecular and Medical Pharmacology 200) in order to familiarize students with a variety of pharmacological research areas and techniques. During the first year in the department, students participate in projects of the laboratories of their choosing. Students also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of their own research areas.

Students must submit a report on their activities at the end of each quarter of Molecular and Medical Pharmacology 200 to research advisers. The report should include the nature of the project, how the student participated, the results obtained, and a critical evaluation of the project. A copy of this report and an evaluation form by the research adviser is submitted to the graduate training committee. A report on the student and the final grade is also submitted to the committee by the research adviser.

For students entering through UCLA ACCESS, required courses include Molecular and Medical Pharmacology 237A, 241, 251 (each term after entering a pharmacology laboratory for dissertation research), Biological Chemistry CM253, and CM267 or Neurobiology M209A. Recommended electives include Molecular and Medical Pharmacology 211A, 211B, 212A, 212B, 234A, 234B, 237B, M255, Physiology 201A-201B/M203A-M203B, and one biostatistics course. Students may use course 200 or courses in other departments for the three required laboratory research rotations.

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals.

Written and Oral Qualifying Examinations

After completing all required courses, students take a departmental comprehensive examination consisting of a written part and an oral part. The examination panel then recommends continuation toward the Ph.D. degree, further remedial study, or termination. This examination tests for a rational, analytical approach to problem solving and for ability to integrate material learned in different courses. Students are required to know basic principles of pharmacology and the status of topics of current interest in pharmacology.

After passing the departmental comprehensive examination, the student must take the University Oral Qualifying Examination within 24 months. This examination is administered by the doctoral guidance committee. The examination concentrates on the background litera-
ture, experimental methods, and implications of the field of interest and dissertation project.

If any one of the above required examinations is failed, the student may be reexamined at a later date determined by the guidance committee.

Molecular and Medical Pharmacology

Upper Division Courses

110A-110B. Drugs: Mechanisms, Uses, and Misuse. (Formerly numbered 110.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Prerequisites: Chemistry 15, Life Sciences 2, 3. Course 110A is requisite to 110B. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse.

M115. Introduction to Pharmacology and Therapeutics (2 units). (Same as Nursing M115.) Prerequisite: consent of instructor. Systematic review of major drug groups used therapeutically, the most commonly used members in each group, differences among them, and their mechanisms of action.

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor and department chair. Special studies in areas not currently included in other required assignments or laboratory work or both, designed for proper training of students.

Graduate Courses

200. Introduction to Laboratory Research (2 to 4 units). Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

202. Medical Pharmacology (2 units). Lecture, zero to two hours; discussion, zero to two hours. Prerequisites: courses 211A-211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutic problems by reference to pharmacokinetics, mechanisms of action, and disposition of drugs.

211A-211B. Principles of Pharmacology (4 units, 2 units each). Lecture, three to eight hours; discussion, zero to nine hours. Prerequisites: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapy. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific base for their rational use in medicine.

M221. Cellular and Molecular Neurochemistry. (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and cation channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

234A-234B-234C. Experimental Methods in Pharmacology (2 units each). Prerequisite: consent of instructor. Survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds.

237A-237B-237C. Research Frontiers in Cellular and Molecular Pharmacology. Prerequisites: course 241, consent of instructor. Detailed examination of mechanisms of drug action at organismal, tissue, cellular, and molecular levels, emphasizing receptors, receptor/effector coupling, neurotransmitters, autonomic and central nervous system pharmacology.

M248. Introduction to Biological Imaging. (Same as Biomedical Physics M248.) Lecture, three hours; laboratory, one hour. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories.

251. Seminar: Pharmacology (2 units). Seminars presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

M255. Biological Catalysis. (Same as Biological Chemistry M255, Chemistry CM255, and Molecular, Cell, and Developmental Biology CM252.) Prerequisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molec.

M258. Pathologic Changes in Toxicology. (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxic and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

280. Seminar: Current Topics in Molecular and Medical Pharmacology. (2 units). Limited to pharmacology majors, ACCESS program students, and interdepartmental Molecular Biology Ph.D. program students. Students conduct or participate in discussions on assigned topics. S/U or letter grading.

596. Directed Individual Research in Pharmacol

99. Research for and Preparation of Ph.D. Dissertat

Scope and Objectives

The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The M.A. and Ph.D. degrees provide opportunities for advanced concentrated study and require independent and innovative research that ultimately results in publishable thesis and dissertation materials.

Undergraduate Study

Bachelor of Science Degree

The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

Preparation for the Major

Life Sciences Core Curriculum

Required (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

In order to be admitted as molecular, cell, and developmental biology majors, transfer students who have 80 or more units must have completed one year of general biology for majors, preferably equivalent to Life Sciences 1, 2, and 3; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

The Major

Required: Chemistry and Biochemistry 153A, 153B; Molecular, Cell, and Developmental Biology 100 or C109 or M140, 104, 138 or C141, and 144; a minimum of three core courses from Molecular, Cell, and Developmental Biology CM156, CM160, CM169, M170, 171, 174A through 174F, M175A, 176, CM178, C180 or M185A, CM185B; 12 elective units selected from the following: any molecular, cell, and developmental biology course listed above not used to satisfy the core requirement, Biology 110, 121, 146, 162, 166, Chemistry and Biochemistry 153C, Microbiology and Molecular Genetics 101, 102, C159, Molecular, Cell, and Developmental Biology 142, C150, C172, M175B, M175C, 176, C177, 189; four units of upper division laboratory experience selected from Biology M158, 162, 166, Molecular, Cell, and Developmental Biology 155, 190A through 190D, 199.

Additional Requirements

(1) A maximum of eight units of Molecular, Cell, and Developmental Biology 190 or 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. MCDB majors must earn a C – or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.
Master’s Degree

Admission
The department does not accept students whose sole objective is the master’s degree.

Areas of Study
See under Doctoral Degree.

Course Requirements
The program consists of at least nine courses in graduate standing, of which at least five must be graduate-level (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement unless these courses are not offered for a grade.

Specific course requirements are established for each student by the guidance committee.

Comprehensive Examination Plan
The departmental written qualifying examination, or its equivalent as determined by the graduate adviser, serves as the comprehensive examination for the M.A. degree.

Thesis Plan
A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master’s thesis committee of three faculty members. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

Doctoral Degree

Admission
The Department of Molecular, Cell, and Developmental Biology does not admit students directly into its Ph.D. program. Students interested in molecular, cell, and developmental biology programs and faculty are recruited and admitted through UCLA ACCESS, in which all requirements for the bachelor’s degree in one of the areas of study are met. Students admitted through UCLA ACCESS, in which all requirements for the bachelor’s degree in molecular, cell, and developmental biology are met, who have the necessary background for graduate study in molecular, cell, and developmental biology, may be admitted directly into its Ph.D. program. Students interested in molecular, cell, and developmental biology programs and faculty are recruited and admitted through UCLA ACCESS, in which all requirements for the bachelor’s degree in molecular, cell, and developmental biology are met, who have the necessary background for graduate study in molecular, cell, and developmental biology, may be admitted directly into its Ph.D. program.

Applications and additional information may be obtained from the UCLA ACCESS Office, 172 MBI, UCLA, Los Angeles, CA 90024-1570.

Major Fields or Subdisciplines
Fields of emphasis reflect the research foci of the faculty. These include cell biology, molecular biology, genetics and developmental biology, in both plants and animals; and immunology and neurobiology in animals.

Course Requirements
In addition to any remedial coursework specified by the graduate adviser, all Ph.D. students are required to take (and pass with a grade of B or better) a minimum of four graduate-level courses approved by the department. This is a minimum requirement. Students may elect, in consultation with their thesis adviser, to take additional graduate courses or seminars in a particular area of specialization. Consult the department for course requirements.

Computer Literacy Course and Certification. All students who cannot demonstrate competency with computers must take a five-week, two-unit computer literacy course. Students must meet with the instructor during the week before classes begin in the fall of their second year to determine whether they must take all, part, or none of the course. The instructor must sign a statement for each beginning student certifying that the student has basic computer skills.

All molecular, cell, and developmental biology graduate students are required to take the teaching assistant training course (Biology 495), and are expected to teach a minimum of three quarters during their graduate careers. Students indicate to the Graduate Office which quarter they are available to be a teaching assistant. If they fail to volunteer, and fall behind in the normal schedule of a teaching assistant, the graduate adviser may assign them to a course arbitrarily.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The written qualifying examination must be passed before taking the doctoral oral examination. The written qualifying examination requirement is satisfied through written papers generated in connection with selected courses, including seminar courses. Such papers are separate from the formal course requirements for these courses, and do not form part of the course grade. It is the responsibility of the student to arrange with the instructor at the beginning of a course to submit such a paper at the end of the course. (The department’s version of the written qualifying examination is used by most Ph.D. programs in the molecular life sciences, and the graduate courses taken by molecular life sciences students all offer the written qualifying examination paper option.) These papers are in the form of a mini research proposal and are graded as pass, rewrite, or fail. If a rewrite is required, specific criticism is supplied by those grading the paper. A minimum of three such papers, with a grade of pass, is required; a minimum of two of these must be written in connection with courses or seminars taught by Molecular, Cell, and Developmental Biology faculty. A copy of each paper, with graders’ comments, becomes part of the student’s file.

Oral Qualifying Examination. The doctoral Oral Qualifying Examination, ordinarily taken by the end of the second year in residence, is composed of two sections: presentation of an independent research proposal, and testing of general knowledge of advanced biology. The examinations are administered by the doctoral committee and conform to the standard requirements of the Graduate Division. Detailed instructions and suggestions are given in the Graduate Student Handbook (Appendix 1).

Molecular, Cell, and Developmental Biology

Lower Division Courses
40. AIDS and Other Sexually Transmitted Diseases. Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.
70. Genetic Engineering and Society. Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4 or former Biology 9 or 108. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.
80. The Green World: Plant Biology for Now and the Future. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable “clean” energy, reclamation of deforested and nutritionally depleted soils, and “biological factories” to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.
88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective. Seminar, three hours. Limited to freshmen who have not completed Life Sciences 3 or former Biology 9; designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that uses gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.
88D. Lower Division Seminar: Genetics and Society. Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritances in order to understand scientific methods and social teaching.
88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications. Seminar, three hours; outside study, nine hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific/medical basis of underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.
Upper Division Courses

100. Introduction to Cell Biology. (Formerly numbered Biology 100B.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 10A, 10B, and 108B or 11A or 11B, Life Sciences 1 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles.

104. Cell and Molecular Biology Laboratory (6 units). Lecture, 90 minutes; discussion, one hour; laboratory, eight hours; outside study, seven and one-half hours. Requisite: CM133. Introduction to methods in molecular biology. Topics include purification, manipulation and analysis of DNA, RNA, and protein. Emphasis on computer sequence analysis and use of public databases. CM133. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry CM133, Chemical Engineering CM133, Chemistry CM132, Microbiology CM133, and Microbiology and Immunology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and regulatory approval for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA production, biotechnology, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233.

138. Developmental Biology. Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Cellular and molecular basis of animal embryology. CM139. Molecular Cell Biology (6 units). Requisites: Chemistry 153A. Life Sciences 3. Not open for credit to students with credit for course 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course CM260.

140. Cell Biology: Cell Cycle (5 units). (Same as Biological Chemistry M140.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 10A, 10B, 108B, or 11, Life Sciences 11B, or 11B or 11, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles.

141. Molecular Basis of Plant Differentiation and Development. (Formerly numbered Biology C141.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239.

144. Molecular Biology. Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for Chemistry 153B or former Biology 100A. Structure of genes and chromosomes; prokaryotic and eukaryotic replication and transcription; repair and recombination; RNA processing. C149. Biology of Aging. Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Overview of expanding field of aging biology — major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; methods of retarding aging process. Concurrently scheduled with course CM249.

150. Plant Chemical and Molecular Communications. (Formerly numbered 150.) Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Overview of expanding field of aging biology — major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; methods of retarding aging process. Concurrently scheduled with course CM249.

151. Human Genetics. (Same as Microbiology CM151.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogentic, biochemistry, genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM250.

155. Molecular Genetic Methods. Lecture, two hours; discussion, one hour; laboratory, six hours; outside study, three hours. Requisite: course 104. In tended for and limited to molecular, cell, and developmental biology majors for priority pass and first pass. Gene mapping and detection and analysis of gene variants by means of inheritance patterns.

156. Human Genetics. (Same as Microbiology CM156.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogentic, biochemistry, genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM250.

157. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Requisites: course 138, Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Survey of methods and applications of genetic engineering and molecular biology. DNA research as applied to both basic scientific research and the biotechnology industry.

159. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry CM159.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153A. Cell cycle; DNA replication and repair; structure and cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM252.

160. Biological Catalysis. (Same as Chemistry CM160.) Requisites: courses 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and antigens. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM252.

169. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153A. Cell cycle; DNA replication and repair; structure and cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM252.

170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (Same as Chemistry CM170.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Chemistry 153A, 153B, S. Life Sciences 3. Strongly recommended: course 153C or M140. Introduction to basic principles of photosynthesis, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information encoding and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of nervous system.

172. Molecular Genetics of Bacteria and Phage. Lecture, three hours; discussion, one hour. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course CM207.

174A. Molecular Evolution. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data.

174C. Eukaryotic DNA Replication and Cell Cycle Control. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Eukaryotic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins.

174D. Molecular Biology of Extracellular Matrix. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Requisites: courses 100 or C139 or M140, 144. Life Sciences 4. Requisites: courses 100 or C139 or M140, 144. Life Sciences 4. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation.

174F. Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasitic development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines.
Graduate Courses

M201. Use of the Computer in Biology (2 units). (Prerequisites: Microbiology M202A, Computer Science C201A, and Chemistry M241.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. Concurrently scheduled with course M202A.

CM207. Molecular Genetics of Bacteria and Phage. (Same as Microbiology M226, Microbiology M227, and Microbiology and Immunology M227.) Lecture, three hours; outside study, 11.5 hours. Requisites: Life Sciences 3. Recommended corequisites: Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course C172.

CM220. Molecular Cell Biology (5 units). (Same as Neurobiology M209A and Physiology M209B.) Not open for credit to students with credit for course 100 or 140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course C172.

CM22A. Molecular Evolution. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Contrasting evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequence data. Original research proposal required.

CM22B. Molecular Biology of Cell Nucleus. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Exploration of nuclear architecture and function and regulation of cellular metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Original research proposal required.

CM22C. Eukaryotic DNA Replication and Cell Cycle Control. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins. Original research proposal required.

CM22F. Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasitic development, antigens, and tissue infections. RNA editing, prospects for parasite vaccines. Original research proposal required.

CM223. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry CM267 and Chemistry M267.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM155G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes during cellular transformation. Concurrently scheduled with course CM169.

M226A-M226B. Principles of Microbial Pathogenesis. (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: Microbiology and Immunology 202A, 202B, and 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand microbial interaction and its effects. M226A. Bacterial and Mycotic Infections; M226B. Parasitic and Viral Infections.
228. Prokaryotic and Eukaryotic Gene Systems (2 units). Presentations concerning current experimen-
tal approaches in study of DNA replication, organiza-
tion, transcription, and translation.

M229. Cellular Biology of Host/Pathogen Interac-
tions (6 units). (Same as Microbiology M229 and Mi-
crobiology and Immunology M229.) Lecture, four
hours; discussion, 90 minutes. Prerequisite: Biological
Chemistry CM253. Molecular and cellular biology of
pathogens, eukaryotic host cells, and interaction be-
tween pathogens and hosts.

M230B. Structural Molecular Biology. (Same as
Chemistry M230B.) Laboratory, 10 hours. Corequisite:
course M230B. Methods in structural molecular biology,
including experiments utilizing single crystal X-ray dif-
fraction, low angle X-ray diffraction, electron dif-
fraction, optical diffraction, optical filtering, three-
dimensional reconstruction from electron micrographs,
and model building. S/U or letter grading.

CM233. Principles, Practices, and Policies in Bio-
technology (2 units). (Formerly numbered M233.)
(Same as Biological Chemistry CM233, Biomedical
Physics CM233, Chemical Engineering CM233,
Chemistry CM233, Microbiology CM233, and Micro-
biology and Immunology CM233.) Lecture, three
hours. Designed for graduate students. Life and phys-
ical sciences majors and students in the School of
Law and Anderson Graduate School of Management may
find course useful in their career preparation.
Presentation of technologies, regulatory practices,
and policies required for product development and re-
view of current opportunities for new technology de-
velopment. Topics include fermentation processes,
pilot and large-scale bioprocess technologies,
scaleup strategies, industrial recombinant DNA pro-
cesses, hybridomas, protein engineering, peptide mi-
metics and rational drug design, medical and
microscopic imaging, and intellectual property issues.
Concurrently scheduled with course CM133. S/U or
letter grading.

M234. Genetic Control of Development. (Formerly
numbered Biology 234.) (Same as Biological Chem-
istry M234.) Topics at forefront of molecular develop-
mental biology, including problems in oogenesis and
early embryogenesis, pattern formation, axis deter-
mination, nervous system development, cellular mor-
phogenesis, and cell-cell and cell-matrix interactions.
Concurrently scheduled with course CM133. S/U or
letter grading.

M237. Introduction to Cellular Physiology and
Biophysics (6 units). (Same as Physiological Sci-
cence M212 and Physiology M212.) Lecture, five
hours. Prerequisite: Physiological Science 111A or
Physiology M209A. Development of fundamental
physiological and biophysical concepts associated
with all membranes, membrane channels and trans-
porters, membrane potential, membrane excitability,
electrical signal transmission and transduction, and
muscle contraction and their application to study of
basic cellular processes. Emphasis in laboratory on
development of programming languages, spreadsheets,
and graphics for modeling and analysis of cellular processes.

C239. Molecular Basis of Plant Differentiation and
Development. Lecture, three hours; discussion, one
hour. Requisites: Life Sciences 1, 3, 4. In-depth study of
basic processes of growth differentiation and de-
velopment in plants and molecular mechanisms un-
derlying these processes. Discussion of a variety of
plant systems, with focus on developing critical un-
derstanding of current experimental basis of research
in this field. Concurrently scheduled with course
C141. Preparation and presentation of term paper, in
addition to other coursework, required of graduate
students.

242. Topics in Neurobiology. Lecture, three hours.
Requisite: course 171. Selected current problems in
neurobiology discussed in depth, with emphasis on
analysis of original papers. May be repeated for
credit.

M246. Computer Analysis of Genetic Organiza-
tion. (Same as Microbiology M246 and Microbiology
and Immunology M246.) Lecture, two hours; labora-
tory, 90 minutes. Prerequisite: Life Sciences 4 or Microbi-
ology C159. Lectures and laboratory instruction in
contemporary procedures for analysis of nucleic acid
and protein sequence data with the computer. No
prior computer experience required of student.
Course includes both general and specialized facility with
IBM PC and Digital VAX computers.

CM248. Molecular Genetics (6 units). (Formerly
numbered Biology CM248 and Biological Chemistry
CM248 and Microbiology M248.) Lecture, five
hours. Requisite: Biological Chemistry CM153G or
Chemistry CM153G. Basic concepts in modern genetics,
with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic
 techniques for addressing fundamental questions in
cellular biology. Topics include mutagenesis, re-
pair, recombination, genetic code, development of
developmental genetics, neurogenetics, and immu-
ogenetics. Concurrently scheduled with course
CM178.

CM249. Biology of Aging. (Same as Pathology
M262.) Lecture, three hours; discussion, one hour.
Designed for graduate students. Overview of expand-
ing field of aging biology — major theories (and
myths) of aging: analysis of aging at level of organs,
tissues, individual cells, proteins, and genes; experi-
mental models of aging; diseases of aging; methods
of retarding aging process. Concurrently scheduled
with course C149.

C250. Plant Chemical and Molecular Communica-
tion. Lecture, three hours; discussion, one hour.
Prerequisite: course 180. Designed for graduate
students. Introductory course in chemical ecology and
how natural compounds affect the interactions among
organisms; synopsis of principles of plant defense
mechanisms and responses to microbial in-
fec tions. Concurrently scheduled with course
CM150.

CM252. Biological Catalysis. (Same as Biological
Chemistry M255, Chemistry CM255, and Pharmacol-
ogy M255.) Requisites: course 100 or C139 or M140,
Chemistry 110A, 153A, 153B, Life Sciences 3. Reac-
tion mechanisms in molecular biology; experimental
approaches for study of enzymes, including kinetics,
isotopic labeling, stereochemistry, chemical modifica-
tion, and spectroscopy; design of pharmacologically
active antiviral and drug targets. Drug metabo-
lism and interactions addressed on a mechanistic
level. Concurrently scheduled with course CM160.
Graduate students required to write research paper
and present oral report.

254. Seminar: Plant Morphogenesis (2 units).

255. RNA Editing. Lecture, two hours; discussion,
one hour. Knowledge of molecular biology and mo-
 lecular genetics required. Discussion of diverse set of
novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of
editing in trypanosome mitochondria, C to U substitution
editing in apo B mRNA and plant mitochondria, C in-
sertion editing in Physarum mitochondria, etc. Dis-
cussion of mechanism, function, and evolution of
these phenomena.

CM256. Human Genetics. (Same as Microbiology
CM256.) Lecture, three hours; discussion, one hour.
Requisites: Life Sciences 3, 4. Strongly recom-
 mended: course 100 or C139 or M140. Application of
 genetic principles in human populations, with empha-
sis on cytogenetics, biochemical genetics, population
 genetics, and family studies. Lectures and readings
in the literature, with focus on current analysis in the
 fields of medical and human genetics and methodolo-
gies appropriate to answer such questions. Concur-
rently scheduled with course CM156. Independent
research project required of graduate students.

257A. Gene Manipulation: Genetic Engineering.
(Formerly numbered Biology 257A.) Lecture, three
hours; discussion, two hours. Requisite: course 138.
Survey of methods and applications of recombinant
DNA research as applied to both basic scientific re-
search and the biotechnology industry.

257B. Gene Manipulation: Advanced Course (2
units). Lecture, 90 minutes; discussion, one hour.
Requisite: course 157 or 257A. Additional topics in
methods and applications of recombinant DNA re-
search as applied to both basic scientific research
and the biotechnology industry. S/U or letter grading.

CM261. Molecular and Cellular Immunology (6
units). (Formerly numbered Biology and Immunology
M261.) Lecture, four and one-half hours; dis-
cussion, two hours. Requisite: course 157 or
CM253. Comprehensive course for graduate stu-
dents and selected undergraduates covering funda-
mentals and recent advances in molecular and
 cellular immunology. Lectures supplemented with dis-
cussion section focusing on reading and analysis of
primary research articles. Concurrently scheduled
with course C180, Oral presentation required of grad-
uate students. S/U or letter grading.

M266A-M266B-M266C. Seminars: Molecular Em-
byrology (2 units each). (Same as Biological Chem-
istry M266A-M266B-M266C.) Advanced course in
devolutional genetics and biochemistry, with em-
phasis on developmental biology. Intended mostly for
students actively working or highly interested in embryol-
ogy. S/U grading.

276. Seminar: Molecular Genetics (2 units). Topics
vary each term.

277. Seminar: Genetics (2 units).

278. Seminar: Molecular Genetics of Develop-
ment (2 units). Designed for graduate students. Top-
ics vary from year to year, with focus on establish-
ment of position and pattern during embryogenesis
by interaction of signal transduction systems and trans-
scription factors. S/U or letter grading.

CM279. Molecular Biology of Animal Viruses. (Same as Microbiology and Immunology M208.) Lec-
ture, three hours. Preparation: courses in general bio-
chemistry and general microbiology, including vi-
rology. Recommended for advanced undergraduate students with a major in public health, biology, or
microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal
viruses, including viral structure, virus cell interaction,
virus replication, and viral oncogenesis. Special em-
phasis on understanding the molecular mechanism
involved in control and regulation of replication, tran-
scription, and translation of viral genome and its com-
plex interaction with host. Concurrently scheduled
with course C177.

281. Seminar: Molecular Biology (2 units).

282. Seminar: Topics in Cell Biology (2 units). Dis-
cussion of various topics on biology of eukaryotic
cells. Topics vary from year to year and include bioen-
egenetics, motility, organelle DNA, membrane structure
and function, oncofetal transformation, nuclear orga-
nization and function.

284. Seminar: Structural Macromolecules (2
units). Seminar, one hour; discussion, three hours.
Presentation and discussion of current topics in ex-
tracellular structures and cellular - their synthesis,
structure, and roles in cell and develop-
mental biology.
CM285. Intermediate Immunology. (Formerly numbered Biology CM285.) (Same as Microbiology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Requi- sites: courses C180, M185A. Recommended coreq- uisite: Chemistry 153B. In-depth exploration of topics introduced in courses M185A. Concurrently scheduled with course CM185B.

286. Seminar: Plant Development (2 units). Semi- nar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one ad- vanced undergraduate or graduate plant develop- ment or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

289. Current Topics in Plant Molecular Biology (2 units). (Formerly numbered Biology 289.) Discuss- ion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

296. Advanced Topics in Molecular, Cellular, and Developmental Biology (2 units). (Formerly numbered Biology 296A.) Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297. Advances in Molecular Analysis of Plant De- velopment and Plant/Microbe Interactions (2 units). Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe inter- actions. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice- ship under active guidance and supervision of a regular faculty member responsible for curricu- lum and instruction at the University. May be re- peated for credit. S/U grading.

597. Preparation for M.A. Comprehensive Exam- ination or Ph.D. Qualifying Examination (2 to 12 units). May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

Marion Kuszyk, Visiting
Evan Wilson, Adjunct
Peter Yates, Adjunct

Scope and Objectives
Students interested in a concentration in music history and literature should consider the ma- jor in musicology offered through the College of Letters and Science; those interested in a con- centration in world music should consider the major in ethnomusicology offered through the School of the Arts and Architecture.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced pro- gram of practical, theoretical, and historical studies, with related performance and aca- demic studies in non-Western music. The ma- jor, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group perfor- mance. Given in the context of a liberal educa- tion, this provides a foundation for an academic or professional career and affords valuable cul- tural background.

At the graduate level, specialized studies lead- ing to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; speci- alized studies leading to the degrees of Mas- ter of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

Undergraduate Study
Bachelor of Arts Degree

Admission
All applicants for admission and change of ma- jor are required to pass an audition in their principal performing medium.

Preparation for the Major
Required: Music 20A, 20B, 20C; 12 units from 60A through 65; two years (12 units) of perform- ance organizations (courses C90A through 90N) for a letter grade; and Musicology 26A- 26B-26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N. Students must participate in a minimum of two different organi- zations over the course of their stay at UCLA. In addition, they are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language re- quirement.

The Major
Required: A minimum of 48 units in upper divi- sion, including Music 120A, 120B, 120C, Musicology 126A-126B-126C, and six courses se- lected from one of the specializations listed be- low.

Music Education: Music 100A-100B-100C, 116, 117, eight units from 115A through 115E. Students are encouraged to take additional coursework from 112A, 112B, 116A, 118B, 199, Ethnomusicology 170, 172B, 174 as their schedules allow. They are required to enroll in the type of performance organizations (courses C90A through 90N; 90M may be used in Fall Quarter only) that they plan to teach. In addi- tion, if they intend to teach instrumental music, they are encouraged to select three terms of choral organizations (courses C90A, 90B, 90C, 90J, or 90K); if they intend to teach general mu- sic, they are encouraged to elect three terms of
ethnomusicology performance organizations (Ethnomusicology 91A-91Z).

Performance: Twelve units in performance instruction courses 160A through 165 (including junior and senior recital requirements), four units of chamber ensembles (Music C175), four units of elective courses from 101, 106B, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 199, Musicology C127A through C127F, C130, 133, 134, 135A, 135B, 135C, 139, Ethnomusicology M108A, 108B, 120A, 120B, 121, 170, and one upper division elective course in music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, C90F, C90G, C90M (Fall Quarter only), or C90N; students taking vocal lessons must select from C90A, C90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N.

Theory: Music 120C and six courses selected in consultation with a faculty adviser.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degrees

Admission
Applicants for the Master of Arts or the Master of Music must have completed a Bachelor of Arts degree, or its equivalent, in Music. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the M.A. in music are required to (1) take a departmental assessment examination; (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music; (3) submit three letters of recommendation from former instructors and/or professionals with whom applicants have worked; and (4) submit written examples of work. For composition, musical scores of at least three compositions must be submitted.

No application can be considered until the examination has been taken and all of the above materials have been received.

Applicants applying for the M.M. are required to (1) submit a statement of purpose which also includes a description of their background of study and (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked and perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required.

No new applicants are being accepted into the Master of Fine Arts degree. Those currently active in the program will be allowed to finish within a reasonable amount of time.

Admission Timetable
Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Assessment examination/audition is administered.

March 1 — Late applications are accepted until March 15 for the M.A. and Ph.D. only.

May 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due for late applications.

Early April — Assessment examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

Assessment Examination. The assessment examination for the M.A. is administered at Schoenberg Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by each area to assess the applicant's potential as a graduate student in that field at UCLA.

Areas of Study
The Music Department offers the degrees of Master of Arts in the field of composition and Master of Music in all classical solo instruments, voice, and conducting. Degrees in historical musicology, ethnomusicology, and systematic musicology are offered through other departments. As noted above, the Master of Fine Arts degree in performance practices is being phased out.

Course Requirements
Master of Arts
Students are required to complete a minimum of nine courses, five of which must be at the 200 level. Only four units of Music 596A, 596C, or 596D and four units of Music 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include Music 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 156, C175 (four units only), Ethnomusicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Course 598 serves to guide the preparation of the thesis and should normally be taken during the last quarters of residence.

Required courses are Music 251A, 266A-266B; one course from Music 251B through 251D; Music 252A, 252B, 252C in sequence, with the option of substituting 596A for 252C; and two electives with the recommendation of the graduate adviser. In addition to the thesis, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

Master of Music
Students are required to complete a minimum of 68 units, 16 of which must be at the 200 level, 42 units at the 400 level, and six units at the 500 level. Sixty-four of these units are specified below. The remaining elective must be from 200-, 400-, or 500-series courses. Music 595A serves to guide the preparation of the master's recital and should normally be taken during the last quarter of residence. The department provides a maximum of six quarters of enrolled private instruction in performance. If students do not complete the degree within that period and wish to continue instruction, they must do so at their own expense on a noncredit basis.

The course requirements are as follows:

Instrumental/Vocal Performance. A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level performance instruction; three quarters of 400-level performance organizations; two quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595A; and one additional course (selected with advisement) from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

Conducting. A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level conducting instruction; three quarters of 400-level performance organizations; two quarters of 400-level chamber en-
Master of Fine Arts

Students are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596C, or 596D and eight units of Music 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years. The degree is normally completed in three years.

Course requirements are as follows: Musicology 200A; two quarters of Music 261A through 261F; six quarters of 400-level performance instruction; two quarters (eight units) of Music 598; and seven electives. If students are in the conducting specialty, they declare either a choral or instrumental specialization. Six quarters of Music 475 are required in the area of specialization and at least two in the other area. (On a two-year program, the ratio would be four to one.) Recommended electives include Music C175 (four units only), Ethnomusicology 170, 176, 596A, 596C, 596D, and additional courses from the 200 and 400 series. Course 598 serves to guide the preparation of the final project and should normally be taken during the last two terms of residence.

Performance Requirements. Each year students must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Except for the first-year recital, students are to write the program notes for the annual performance project. These must be submitted with the program to the graduate adviser in performance practices at least one month before the concert date. If students are in the conducting specialty, they present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

Comprehensive Examination Plan

Master of Arts

None.

Master of Music

After the student has completed the core seminars and three quarters of performance/conducting instruction, and after verification from the graduate adviser that these requirements have been met, a master’s committee for the final year is formed. The committee consists of the student’s master teacher and two other Music Department faculty in related areas of instruction. Two of the three committee members must be full-time Senate faculty. The committee oversees the preparation of the recital, the accompanying program notes, and the new music forum, and adjudicates the recital itself.

Qualifying Examinations. Written (about three hours) and oral (about two hours) qualifying examinations are administered by the master’s committee. The examination covers the material in the core courses as well as a general knowledge of music history, with an equally strong emphasis on historical and contemporary styles. The examinations are administered each year at the end of Fall and Spring Quarters. Students may take the examinations twice if necessary; a second failure results in a recommendation for dismissal.

Master’s Recital. Students present a final master’s recital with accompanying program notes. During the final year of residence and after completion of the major coursework, students perform for their committee and present the program notes for their approval. The committee decides whether the student qualifies for advancement to candidacy and the presentation of the master’s recital. No recital takes place until the notes have been approved by the committee. An audio tape of the recital is archived in the Music Library.

Master of Fine Arts

Final Project. A final project is to be completed during the last year of residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Students in conducting present an on-campus program, or a substantial portion thereof, with one of the department’s performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. Students decide the topic for the final project in consultation with their committee chair, who is responsible for supervising the work. Pieces drawn from or related to the study are to be included in the final recital. Both the paper and the recital are evaluated by the committee.

A completed draft of the scholarly paper must be submitted to the committee members by the first day of classes of the quarter in which the final recital has been scheduled. If this requirement is not met, the recital is postponed until the next regular academic quarter in which this requirement can be met.

Students must provide concise, well-written program notes and include a brief biography. These should be submitted to the graduate adviser in performance practices for approval at least one month prior to the final recital. Publicity information for the final recital must be submitted to the graduate adviser at the beginning of the previous quarter.

The final version of the scholarly paper, with the accompanying recital program, must be submitted in the format of a thesis. (Students should contact the theses and dissertations adviser, 390 Powell Library, for information and the Schoenberg Hall Student Services Office for information specific to the M.F.A. program.) The final paper, signed by all M.F.A. committee members, must be submitted in duplicate (two thesis-quality photocopies or the original and one photocopy) to the Student Services Office by the last day of classes in the quarter in which the student is to graduate.

The language requirement and a majority of the coursework must be completed before submitting the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted at the beginning of the Fall Quarter of the last year of residence. It is approved by the graduate committee for performance.

Thesis Plan

Master of Arts

The thesis is a work proposed by the student and approved by the composition and theory faculty. The thesis topic and composition of the committee are approved by the faculty before nomination to the Graduate Division.

Master of Music

None.

Master of Fine Arts

None.

Doctoral Degrees

Admission

Applicants to the Doctor or Philosophy (Ph.D.) program must have completed a Master of Arts degree in Music (or the equivalent degree). The degree normally will have been taken in the same field of concentration as the proposed doctorate. If applicants wish to obtain a doctorate in a field other than that of the M.A., additional coursework, as prescribed by the area, must be completed. Applicants are required to (1) take a departmental assessment examination; (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of work. For composition, musical scores of at least three compositions are required. Applicants should submit their M.A. thesis or composition, if possible.

Applicants to the Doctor of Musical Arts (D.M.A.) program are required to (1) submit a statement of purpose which also includes a description of the their background of study; (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked (for the D.M.A. the Music Department is especially interested to hear from persons who can speak to the applicant’s academic potential); and (3) perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required. No application can be considered until the assessment examination or audition has been
taken and all of the required materials have been received.

Admission Timetable
Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/ fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Examination/audition is administered.

March 1 — Late applications are accepted until March 1 for the M.A. and Ph.D. only.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due.

Early April — Examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

Assessment Examination. The assessment examination for the Ph.D. is administered at Schoeneng Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant’s packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by area to assess the applicant’s potential as a graduate student in that field at UCLA.

Placement Examination. The placement examination for the Ph.D. is administered at Schoeneng Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant’s packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by area to assess the applicant’s potential as a graduate student in that field at UCLA.

Major Fields or Subdisciplines
The Music Department offers the degrees of Doctor of Philosophy in the field of composition; Doctor of Philosophy in the field of composition with a cognate in ethnomusicology; and Doctor of Musical Arts in all classical solo instruments, voice, and conducting. Degrees in historical musicology, ethnomusicology, and systematic musicology are offered through other departments.

Course Requirements

Doctor of Philosophy
Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level. If students are in the program in composition with the cognate in ethnomusicology and have had no prior coursework in ethnomusicology, they are required to take Ethnomusicology 20A-20B-20C. They are also encouraged to participate in the ethnomusicology performance organizations (Ethnomusicology 91A through 91Z).

Students may complete the residence requirement by electing courses recommended by the graduate adviser from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

Required courses for the Ph.D. are Musicology 200A; Music 251A, 266A-266B; one course from 251B through 251D; and six quarters of Music 252A, 252B, 252C in sequence, with the option of substituting Music 596A for 252C. Students who have received the M.A. in composition from UCLA normally take a minimum of three quarters of Music 252 in the Ph.D. program.

Students who have received the M.A. in composition elsewhere normally take two full cycles of Music 252A, 252B, 252C in sequence, with the option of substituting Music 596A for either or both 252Cs. In addition to the dissertation, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

Cognate in Ethnomusicology. Students may substitute Ethnomusicology C201A for Musicology 200A and Ethnomusicology 282 or 283 for Music 251B through 251D. Students are required to take two courses from Ethnomusicology 207, M211, 237, 240, 241, 248A, 248B, 250A, 250B.

Doctor of Musical Arts
Students are required to complete a minimum of 102 units, 28 of which must be at the 200 level, 60 units at the 400 level, and 10 units at the 500 level. Ninety-eight of these units are specified below. The elective must be from 200-, 300-, or 500-series courses. Course 599 serves to guide the preparation of the doctoral paper and should normally be taken during the final year of residence. Students who received the M.M. at UCLA are expected to complete at least 32 additional units beyond the M.M. requirements, subject to the specific requirements of their area of specialization. The department provides a maximum of nine quarters of enrolled private instruction in performance. Students who were admitted to the program with a master’s degree from another institution may petition for up to a year of private lessons (18 units) and 12 units of academic courses to be applied to D.M.A. requirements.

The requirements for the D.M.A. are given below.

Instrumental/Vocal Performance. A core of Music 202, 203, 204; three courses from Music 261A through 261F; 271; eight quarters of 400-level performance instruction; three quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595B; one quarter of Music 599; the appropriate course from Music 469, 471, 473, 474; one additional course from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

Conducting. A core of Music 202, 203, 204; three courses from Music 261A through 261F, 271; eight quarters of 400-level conducting instruction; three quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595B; one quarter of Music 599; one course from Music 469, 471, 473, 474, 476, 477; one additional course from Music 261A through 261F; C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

Written and Oral Qualifying Examinations

Doctor of Philosophy
When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the six written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. On successful completion of the written examinations, a departmental oral qualifying examination is scheduled.

The written examinations consist of the following:

1. Composition of a short homophonic and short polyphonic piece (within a 24-hour period, optionally either on or off campus).

2. General history of music (three hours).

3. Analysis of form and style (three hours).

4. Two or more from the following (four hours total): acoustics, aesthetics, psychology of music, ethnomusicology, or music theory from the medieval period to the present with an optional emphasis on theoretical writings before or after 1700.

5. Twentieth-century music (three hours).

Students with a cognate in ethnomusicology may substitute an ethnomusicology area for item 2, and in lieu of items 3 and 4 may choose any three of the following (two hours each): acoustics, aesthetics, music theory, form and
analysis, general history of music, or organol-
ogy. On completion of the written and oral qualifying
examinations and the second language, the student may submit the dissertation topic and request for a doctoral committee, for approval. The dissertation topic and the composition of the doctoral committee are approved by the fac-
culty before nomination to the Graduate Division.
For students with a cognate in ethnomusicol-
yogy, the composition (item 1) should reflect the ethnomusicological area interests of the student and draw from a variety of traditional, clas-
sical, Western, and/or non-Western sources; a public reading of this composition is required. The monograph should deal with a cross-cul-
tural 20th-century work.

Doctor of Musical Arts

Two preliminary recitals are required. The stu-
dent’s first-year lecture-recital is adjudicated by a committee of three Music Department faculty includ-
ing the student’s teacher. At least two of the three committee members must be full-time Senate faculty members. On successful com-
pletion of this recital, a member of the composi-
tion faculty joins with the student’s teacher to guide the new music forum project.

Two sets of qualifying examinations are re-
quired. The first covers material in the three-
quarter core sequence of Music 202, 203, 204, one of the performance practice seminars, and the appropriate pedagogy course. This exami-
nation must be passed before approval can be
granted for the second-year recital. The second
examination is the defense of the final recital
repertoire and thesis topic with the doctoral committee (University Oral Qualifying Examina-
tion).

After passing the first examination, students may propose their second-year entrepreneurial recital. This recital is an individual project in public performance outside the UCLA campus. All scheduling, publicity, program notes, and
ticketing must be arranged by the student without
assistance from the supervising instructor. After that recital has been passed and the for-

eign language requirement has been met, the student may submit the request for a doctoral
committee.

A minimum of three months before the final
doctoral recital (which is a full professional re-
cital of approximately 90 minutes duration), stu-
dents take the second examination, the Univer-
sity Oral Qualifying Examination. This consists of
the student’s performance of a major portion of
the works on the program (including the new music forum premiere work) and includes a de-
fense of the recital repertoire, the dissertation

Music

Lower Division Courses

1A-1B. Fundamentals of Music. Lecture, three
hours; discussion, two hours. Designed for nonmusic majors. 1A. Introduction to elements of modern music: music symbols, meter and time signatures, notation, scales, intervals, and chord structure. 1B. Prerequisite:
course 1A. Diatonic harmony; four-part writing, includ-
ing inversions, seventh chords, submediant, and
modulation; organization of melody and accompani-
ament; simple analysis; sight-singing and ear training.
3A-3B. Preparatory Theory for Music Majors (2
units each). Lecture, two hours; discussion, one hour. Limited to music majors. Course 3A is not open for
credit to students with credit for course 1A; course
3B is not open for credit to students with credit for
course 1B. Course for music majors in music funda-
mentals, including musicianship, theory, and terminol-
y.
4A-4B-4C. Basic Musicianship (2 units each).
Laboratory, three hours. Class instruction in elementary
ear training and keyboard skills.
8G. Graduate Piano Sight-Reading (2 units).
Limited to graduate students. Designed to help enter-
grade students remedy entrance deficiencies, to be
cleared by examination. May be repeated. S/U
grading.
10. Computer-Assisted Sight-Singing Laboratory
(2 units). Lecture, two hours; laboratory, one hour.
Prerequisite: course 1A. Individualized, self-instruc-
tional approach for development of sight-singing skills
through use of a music computer; keyboard instru-
ment, and linear program learning.
12A-12B. Counterpoint (2 units each). Lecture,
four hours. 12A. Preparation: music theory placement
examinations. 18th-century modal counterpoint in two
parts, including writing of motets. 12B. Prerequisites:
courses 20A, 20B, 20C. 18th-century tonal
counterpoint in two parts, including writing of inven-
tions.
15. Art of Listening. Lecture, three hours; laboratory,
one hour. Acquisition of listening skills through direct
interaction with live performers, performers, and
composers. Relationship of listening to theoretical,
analytical, historical, and cultural frameworks. Music
as aesthetic experience and cultural practice.
20A. Music Theory I. Lecture, two hours; discussion,
six hours. Preparation: passing score on depart-
mental examination. Theory: species counterpoint
through five species; description of triads and inver-
sions in all keys; secondary dominants; inversion,
with emphasis on music after 1700. May be repeated
for credit with limitation. P/NP or letter grading.
20B. Music Theory II. Lecture, four hours; discus-
sion, four hours. Prerequisite: course 20A (C or bet-
ter). Theory: diatonic harmony through secondary
dominants and diminished sevenths; modulations to
dominant and relative keys; writing of four-part cho-
rals; style composition in baroque dance forms;
introduction to figured bass notation. Musicianship:
harmonic dictation, including secondary dominants
and diminished sevenths, but not modulations; more
advanced two-part dictation; chromatic one-part dic-
tation; more advanced sight-singing; keyboard (three-
part open score in homophonic textures, introduction
to tenor clef).
20C. Music Theory III. Lecture, four hours; discus-
sion, four hours. Prerequisite: course 20B (C or bet-
ter). Theory: chromatic harmony including develop-
ment of tonality, 1800 to 1850; appropriate analysis
and style composition. Musicianship: advanced sight-
singing; two-part contrapuntal dictation; keyboard
harmony (harmonic sequences in major and minor
keys); reading in open score of four homophonic
parts in four clefs.

23. Composition Workshop (2 units). Prerequi-
sites: courses 20A, 20B, 20C. Introductory composi-
tion course which provides compositional experi-
ence at a basic level. May be repeated once for
credit.

60A-65. Undergraduate Instruction in Performance
(2 units each). Limited to music majors (all lower divi-
sion majors, and upper division majors not in perfor-
mance specialization). Individual instruction of one
hour per week. Students must perform in a practicum
once during academic year. Grades are assigned by
applied instructor in Fall and Winter Quarters and by
jury examination in Spring Quarter. May be repeated
for credit.
60A. Violin; 60B. Viola; 60C. Cello; 60D. String
Bass; 60E. Harp; 60F. Classical Guitar; 60G. Viola
da gamba; 60H. Lute; 61A. Flute; 61B. Oboe; 61C.
Clarinet; 61D. Bassoon; 61E. Saxophone; 62A. Trumpet;
62B. French Horn; 62C. Trombone; 62D. Tuba; 63.
Percussion, 64A. Piano; 64B. Organ; 64C. Harpsi-
chord; 65. Voice.
C90A. UCLA Chorale (2 units). (Formerly numbered
90A.) Activity, four hours. Preparation: audition.
Select mixed ensemble of 50 to 60 voices performing
choral music appropriate for a concert choral ensem-le, with emphasis on music after 1700. May be
repeated for credit without limitation. May be concur-
taneously scheduled with course C480. P/NP or letter
grading.
C90B. CollegiateChorus (2 units). Nonaudition
mixed chorus of 50 to 150 voices performing medium-
and concert-length choral works from baroque to the
present. Collegiate Chorus performs only as part of
“Choral Union,” a large chorus made up of all of the
choral ensembles. May be repeated for credit with
limitation. P/NP or letter grading.
C90D. Opera Workshop (2 units). Activity, six hours.
Preparation: audition. Rehearsal and performance of
scenes and complete operas, as well as repertoire,
stage movement, and foreign language dicti-

C90E. Symphony Orchestra (2 units). (Formerly
numbered 90E.) Activity, four hours. Preparation:
audition. Group performance of symphonic literature,
as well as orchestral accompaniment for operatic and
major choral works. May be repeated for credit with-
out limitation. May be concurrently scheduled with
course C481. P/NP or letter grading.
C90F. Symphonic Band (2 units). Preparation: audi-
tion. Group performance of chamber choral music
scored for band. May be repeated for credit without
limitation. P/NP or letter grading.
C90G. Wind Ensemble (2 units). (Formerly num-
bered 90G.) Activity, four hours. Preparation: audition.
Group performance of concert literature for wind
ensemble. May be repeated for credit without limita-
tion. May be concurrently scheduled with course
C482. P/NP or letter grading.
C90H. Collegium Musicum (2 units). Activity, three
hours. Preparation: audition. Group performance of
vocal and instrumental music of medieval, Rena-
sance, and baroque eras on period instruments. May
be repeated for credit without limitation. P/NP or
letter grading.
C90J. Men’sGleeClub (2 units). Activity, three hours.
Preparation: audition. Select male chorus of 40 to 45
voices performing male choral music of all periods,
with emphasis on popular and folk arrangements.
May be repeated for credit without limitation. P/NP or
letter grading.
C90K. Women’s Chorus (2 units). Activity, three hours.
Preparation: audition. Select female chorus of 45 to 55
voices performing treble choral music of all periods,
with emphasis on music after 1750. May be repeated
for credit without limitation. P/NP or letter grading.
Upper Division Courses

100A-100B-100C. Music in American Education. Lecture, four hours; laboratory, one hour. Prerequisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C, Musicology 26A-26B-26C. Critical study and analysis of philosophy, history, organization, curriculum, and instrumentation of music programs for elementary and secondary schools in American education. Each course may be taken independently for credit. 100A. General Music; 100B. Choral Music; 100C. Instrumental Music.

101. Advanced Keyboard Harmony and Score Reading. Prerequisite: course 120B or consent of instructor. Intensive individual work in keyboard harmony and reading of chamber and orchestral scores. May be repeated for credit.

102. Instrumentation. Lecture, three hours. Prerequisite: course 120B with a grade of C (2.0) or better. Not open for credit to students with credit for course 106A. Intended for music majors in specializations other than composition. Ranges and characteristics of instruments, exercises in scoring.

105. Introduction to Composition. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Intended for music majors in specializations other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

106A. Orchestration I. Discussion, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Intended for music majors in specializations other than composition. Ranges and characteristics of instruments, exercises in scoring.

106B. Orchestration II. Discussion, three hours. Prerequisite: course 106A. Scoring and analysis for ensembles and full orchestra.

109A-109B-109C. Composition for Motion Pictures and Television (2 units each). Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C, and Musicology 26A-26B-26C, or consent of instructor. Emphasis on practical problems in scoring for small and large ensembles at various educational levels. 112A. Band Scoring; 112B. Choral Scoring.

113A-113B. Music Literature for Children. Lecture, three hours; laboratory, one hour. Prerequisites: course 1A and Musicology 2A, or consent of instructor. Course 113A is not prerequisite to 113B. Designed for nonmusic majors, particularly education students. Study of music literature applicable to elementary school programs. 113A. Emphasis on listening analysis, movement, and improvisation. 113B. Emphasis on class performance — music reading, singing, and folk instruments.

115A-115E. Study of Instrumental and Vocal Techniques (1 unit each). Laboratory, three hours. Prerequisites or corequisites: course 20A. Applied studies in performance practice of various music literature, with emphasis on techniques and individual problems. Each course may be repeated once for credit. 115A. Strings; 115B. Woodwinds; 115C. Brass; 115D. Percussion; 115E. Voice.

116. Introduction to Conducting (2 units). Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

117. Study and Conducting of Instrumental and Choral Literature (2 units). Lecture, three hours. Prerequisite: course 116 or consent of instructor. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature (2 units each). Lecture, one hour; laboratory, two hours. Prerequisites: courses 116 and 117, or consent of instructor. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. 118A. Choral; 118B. Instrumental.

119. Creative Process: Developing Imagination and Expression. Discussion, three hours. Prerequisites: courses 106A and 106B, or consent of instructor. In-depth philosophical and technical discussions as to nature of creativity, as well as compositional exercises intended to develop imagination and an enriched musical vocabulary of students.

120A. Music Theory IV. Lecture, four hours; discussion, four hours. Prerequisites: course 20C with a grade of C (2.0) or better, passing score on departmental first-year harmony examination. Discussion of contrapuntal principles, including choral prelude; two-part invention; exposition and first modulation of a three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: advanced harmonic dictation; advanced extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

120B. Music Theory V. Lecture, four hours; discussion, four hours. Prerequisites: course 120A with a grade of C (2.0) or better, consent of instructor. Theory: advanced harmonic chromatic development including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental final examination.

120C. Music Theory VI. Lecture, four hours; discussion, four hours. Prerequisites: course 120B with a grade of C (2.0) or better, consent of instructor. 20th-century harmonic language, including nonfunctional harmony, polytonality, free atonality, serialism, and minimalism.

121. Special Topics in 20th-Century Music. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. In-depth study of certain aspects of 20th-century music. Preparation of a term paper. May be repeated once for credit.

122. Speculative Music Theory. Discussion, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C, and 120D, or consent of instructor. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

123A-123B-123C. Composition. Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Designed for students specializing in composition. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

152. Jazz Keyboard Harmony (1 unit). (Same as Ethnomusicology 152.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

152A-152B-152C. Jazz Theory and Improvisation (2 units each). (Same as Ethnomusicology 152A-152B-152C.) Lecture, four hours. Elements of jazz theory and improvisation. 152A. Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. 152B. Requisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. 152C. Requisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions.

136A-136B-136C. Historical Survey of Music Theater. Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/N or letter grading.

155. Audio Technology for Musicians. Lecture, two hours; laboratory, three hours. Prerequisites: courses 20A, 20B, 20C, consent of instructor. Theory and practice of sound engineering in relation to concert and studio recording techniques.

158. New Orleans Jazz. Lecture, three hours; discussion, two hours. May be taken twice for credit. Designed for students specializing in composition. Vocal and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation.

160A-165. Undergraduate Instruction in Performance for the Performance Specialist (2 units each). Limited to upper division music majors who have been accepted by audition into performance specialization. Each unit consists of individual instruction for one academic quarter from an instructor designated for students specializing in composition. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

M127. Jazz Keyboard Harmony (1 unit). (Same as Ethnomusicology 127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.
C175. Chamber Ensembles (2 units). Prerequisite: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C176. P/NP or letter grading.

C176. Electronic Music Composition. Lecture, three hours; studio, three hours. Prerequisites: course 156, advanced placement in general music preparation, basic knowledge of a notation/programming language, more than five minutes in duration. May be concurrently scheduled with course C226. P/NP or letter grading.

C177. Jazz Combo (2 units). (Same as Ethnomusicology 177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for credit. May be concurrently scheduled with course C176. P/NP or letter grading.

C185. Historical and Philosophical Foundations of Music Education. Lecture, three hours. Prerequisite: completion of undergraduate music education specialization or consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225. P/NP or letter grading.

C186. Senior Recital or Research Paper (2 units). (Same as Ethnomusicology 186.) Preparation and performance of one-hour senior recital of jazz repertoire or preparation or preparation of a senior paper (topic and length to be approved by assigned advisor). P/NP grading.

199. Special Studies in Music (2 or 4 units). Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in music resulting in research project. May be repeated for a maximum of eight units.

202. Analysis for Performers. Lecture, three hours. Prerequisite: graduate standing. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles.

203. Musical Terminology. Lecture, three hours. Prerequisite: graduate standing in music. Survey of musical terminology designed to clarify the performance and intonation of vocal and instrumental music in the European tradition. Coverage of terms in Italian, French, and German.

204. Music Bibliography for Performers. Lecture, three hours. Prerequisite: graduate standing in music performance. Survey of general bibliographic techniques in music, with emphasis on materials for the performing musician.

C222. Speculative Music Theory. Discussion, three hours. Prerequisite: graduate standing in music. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated for credit. May be concurrently scheduled with course C122.

C225. Historical and Philosophical Foundations of Music Education. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C185. Additional assignments, as well as evidence of greater depth of study, required of graduate students.

C226. Electronic Music Composition. Lecture, three hours; studio, three hours. Prerequisites: course 156, graduate standing, advanced experience and accomplishment in music composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176.

251A-251D. Seminars: Special Topics in Composition and Theory. Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. 251A. Orchestration; 251B, Specific Media; 251C, Specific Styles; 251D, Compositional Analysis.

252A-252B-252C. Seminars: Composition (6 units each). Seminar, three hours. Prerequisites: course 151A, 251A, 251B. In prerequisite to 252C, which is prerequisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit.

251A-261F. Problems in Performance Practices. Seminar, three hours. Prerequisites: courses 151A-151B or consent of instructor. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. 261A. Medieval; 261B. Renaissance; 261C. Baroque; 261D. Classical; 261E. Romantic; 261F. Contemporary.

266A-266B. Seminars: Music of the 20th Century. Seminar, three hours. Prerequisite: graduate standing in music or consent of instructor. Discussion and analysis of major works of the 20th century, with emphasis on study of groups of works written at the same time in history. 266A. 1900 to 1949; 266B. 1950 to the Present.

C267. Selected Topics in Keyboard Literature. Lecture, three hours. Prerequisite: Corequisite: course 464A or 464B or 464C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

270A-270G. Seminars: Music Education (6 units each). Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. 270A. History; 270B. Non-Western Musics; 270C. Curriculum Innovations; 270D. Tests and Measurements; 270E. Choral Literature; 270F. Instrumental Literature; 270G. General Topics.

271. Music and Electronic Technology. Lecture, four hours; media laboratory, one hour. Prerequisite: graduate standing in music performance. Survey of music and its place in emerging digital world of the arts, including training in arranging and multimedia production.

370. Music in General Education (2 units). Prerequisite: graduate standing in Graduate School of Education and Information Studies teacher training program (admission to the graduate education program is a prerequisite). 370C, 370D. Computer in education; 370A, 100B, 112, 312, 315A, 315B, and supervised teaching). Critical discussions related to supervised teaching in progress. May be repeated for credit.

371. The Marching Band in Secondary Education (2 units). Prerequisite: consent of instructor. Study of contemporary marching band as a component of the marching technique and its place in the educational system. The musical current approaches, practices, and problems associated with the marching band, as well as historical perceptive. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.

401. New Music Forum (2 units). Tutorial/laboratory. Prerequisite: one year of graduate study in music at UCLA. Interactive course in preparation and performance of a premiere work especially composed for a graduate student performer or performers by a graduate composer at UCLA.

460A-465. Graduate Instruction in Performance (6 units each). Limited to M.F.A. students. Individual instruction of one hour per week, with performance laboratory at discretion of instructor. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. 460A. Violin; 460B. Viola; 460C. Cello; 460D. String Bass; 460E. Harp; 460F. Classical Guitar; 460G. Viola da gamba; 460K. Lute; 461A. Flute; 461B. Oboe; 461C. Clarinet; 461D. Bassoon; 461E. Saxophone; 462A. Trumpet; 462B. French Horn; 462C. Trombone; 462D. Tuba; 463. Percussion; 464A. Piano; 464B. Organ; 464C. Harpsichord; 465. Voice.

469. Piano Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on piano. Study of teaching techniques for piano, including group instruction, including discussions of how to teach physical skills, musicianship, and interpretation, plus study of ideas and teachings of noted pedagogues of the past and present. Further emphasis on practical teaching experience in class.

470. Opera Studio for Graduate Students. Laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Performance techniques and repertoire for graduate students in opera.

471. Vocal Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency in voice. Study of teaching techniques for voice, including thorough investigation of the vocal mechanism and its use, plus study of noted teachers of the past and present. Further emphasis on practical teaching experience in class.

472. Master Class in Opera (6 units). Laboratory, three hours. Prerequisite: graduate standing in music, advanced proficiency on a brass instrument. Study of teaching techniques for brass instruments, with main emphasis on instruments represented in class, including how to teach physical and musical aspects of playing. Study of various methods and theories of teaching, with emphasis on practical teaching experience in class.

473. String Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a string instrument. Study of teaching techniques for string instruments, with main emphasis on instruments represented in class, including how to teach physical and musical aspects of playing. Study of various methods and theories of teaching, with emphasis on practical teaching experience in class.

474. Woodwind Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a woodwind instrument. Study of teaching techniques for woodwind instruments, with main emphasis on instruments represented in class, including how to teach physical and musical aspects of playing. Study of various methods and theories of teaching, with emphasis on practical teaching experience in class.

475. Master Class in Conducting (6 units). Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit.

476. Brass Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a brass instrument. Study of teaching techniques for brass instruments, with main emphasis on instruments represented in class, including how to teach physical and musical aspects of playing. Study of successful brass performers and teachers, with emphasis on practical teaching experience in class.
477. Percussion Pedagogy. Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music; advanced proficiency in percussion. Study of various methods of teaching the vast array of standard percussion instruments, including both classical and “popular” techniques. Study of successful percussion performers/teachers, with emphasis on practical teaching experience in class.

C480. UCLA Chorale (2 units). Activity, four hours. Prerequisites: audition, enrollment in M.M. or D.M.A. program. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A.

C481. Symphony Orchestra (2 units). Activity, four hours. Prerequisite: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. S/U or letter grading.

C482. Wind Ensemble (2 units). Activity, four hours. Prerequisites: audition, enrollment in M.M. or D.M.A. program. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C90G.

C485. Chamber Ensembles (2 units). Prerequisite: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. S/U or letter grading.

495. Introductory Practicum for Teaching Apprentices in Music (2 units). Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

595A. Preparation of Master’s Recital (6 units). Tutorial, three hours. Prerequisite: graduate standing in master’s program in performance. Intensive study and preparation of final master’s recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

596A. Directed Individual Studies in Orchestration and Composition (2, 4, or 6 units). Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

596C. Directed Individual Studies in Music Education (2, 4, or 6 units). Only four units may be applied toward M.A. or M.F.A. course requirements.

596D. Directed Individual Studies in Performance Practices (2 to 12 units). Prerequisite: graduate standing. Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

597. Preparation for Master’s Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units). S/U grading.

598. Guidance of M.A. Thesis or M.F.A. Final Project (4, 8, or 12 units). M.A. candidates may apply four units toward degree requirements; M.F.A. candidates may apply eight units toward degree requirements. May be repeated for credit. S/U grading.

599. Guidance of Ph.D. Dissertation (4, 8, or 12 units). May be repeated for credit. S/U grading.

Harris S. Saunders, Ph.D.

Scope and Objectives

The Department of Musicology provides students with a broad understanding of the history and literature of the music of Europe and the Americas and of its place in the development of Western culture. Courses cover virtually every period, style, and genre as well as particular areas of popular music and jazz which have influenced or been influenced by Western art music. Musicology appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The graduate program provides students with a strong foundation that enables them to pursue careers in teaching and research.

The undergraduate program prepares students for graduate programs in music and related fields and provides them with sufficient background to teach in secondary schools after obtaining the necessary credentials in education. With its focused requirement of study in an area outside music, the program also offers training within the broader context of the humanities.

Depending on their particular interests and career goals, students may select courses in the arts, literature, history and society, philosophy, and religion; these may be concentrated within such fields as Afro-American, American Indian, Asian American, Chicana and Chicano, and women’s studies. If students wish to participate in performance at UCLA, they are encouraged to do so.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for all qualified students.

Undergraduate Study

Bachelor of Arts Degree

Admission

All applicants for admission and change of major must demonstrate proficiency in vocal or instrumental performance at the intermediate level. This requirement may be satisfied by completing a required requisite course with a grade of B or better or by passing an individual audition with a departmental faculty committee.

Junior transfer students are required to pass an audition with the departmental faculty admissions committee before they can be admitted to the program.

Preparation for the Major

The Major

Required: Musicology 126A-126B-126C, four courses from C127A through C127F, 130, 156, 188A through 188F; two courses (each in a different geographical or cultural area) from Ethnomusicology 106A, 106B, 106C, M108A, M108B, M110A, M110B, 136A, 136B, 146, 147, 156A, 156B, 157, 160A, 160B; four courses in one area of concentration (arts, literature, history and society, or philosophy and religion) within which students may focus on a more specialized field such as Afro-American, American Indian, Asian American, Chicana and Chicano, and women’s studies. A list of approved courses is available in the department office.

Music History Minor

The music history minor provides undergraduates with an overview of music history, starting with required courses that offer beginning students a general historical survey from antiquity through the 20th century. Upper division courses have been selected to provide study of more specific areas of interest, with various
electives that offer a variety of perspectives on music history.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition at the Student Services Office, 1845 Schoenberg Hall Annex. The ability to read music, although helpful, is not required for admission. For further information, contact Alfred Bradley at (310) 825-4768.

**Required Lower Division Courses:** Musicology 1A and two courses from 2A, 2B, 5, 7, 13.

**Required Upper Division Courses:** Five courses, including (1) one from Musicology C127A, C127B, C127C, (2) one from C127D, C127E, C127F, and (3) three from 130 through 189. A recommended course plan for item 3 is one course from 130, 131, 136, 139, 150, 156, 189, one course from 133, 134, 188A through 188F, and one course from 135A, 135B, 135C. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at [http://www.gdnet.ucla.edu](http://www.gdnet.ucla.edu).

**Master’s Degree**

Admission

Applicants for the Master of Arts in Musicology must have completed a Bachelor of Arts degree, or its equivalent, in Music or Music History. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the M.A. are required to (1) take a departmental assessment examination (details are automatically sent after the application has been received); (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of their work such as a paper on an appropriate subject. No application can be considered until the examination has been taken and all of the above materials have been received.

**Admission Timetable**

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Assessment examination is administered. Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

March 1 — Late applications are accepted until March 1; however, due to mail transit time, late foreign applications from outside the U.S. cannot be accepted.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due.

Early April — Assessment examination is administered.

May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.

**Assessment Examination.** The assessment examination is administered at Schoenberg Hall on the UCLA campus twice a year at the end of January and early April. Those applying from outside the Southern California area who find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Further information is sent after the application has been received.

The assessment examination is approximately two and one-half hours in length and consists of three parts: (1) harmonic and formal analysis, (2) an essay on each of two historical subjects, one before and one after 1750, and (3) keyboard harmony, score reading, sight singing, piano sight reading, and performance. Part 3 is taken on entrance, during the week before classes start in Fall Quarter. Students with weakness in any of Part 3 must enroll in the musicology practicum during their first year of study.

The assessment examination and dossier are reviewed, along with those of other applicants, by the musicology faculty to assess each applicant’s potential as a graduate student in that field at UCLA.

**Areas of Study**

The Musicology Department offers the degree of Master of Arts in the field of historical musicology. Degrees in composition, performance, and ethnomusicology are offered through other departments.

**Course Requirements**

Students are required to complete a minimum of nine courses at the 200 level.

The requirements are Musicology 200A, 200B, 200C; three seminars chosen from 260A through 260F, and 262; and a choice of three electives (up to two outside the department). The musicology electives include Musicology 201A through 201F, 210, 211, 250A-250B, and other 200-level courses.

**Comprehensive Examination**

Students take the comprehensive examination after completing their course requirements, which is normally by the end of their fifth quarter. All other degree requirements, including language proficiencies, must be satisfied before this examination can be taken. The examination is scheduled by the faculty during the Spring Quarter; all second-year students take it together. However, transfer students entering with a master's degree are expected to take this examination at the end of their first year, before proceeding on to their Ph.D. coursework. In anticipation of the examination, students are asked to designate three fields in which they are to be examined. Two of these fields must be historical: one before 1700 (medieval, Renaissance, or 17th century) and one after 1700 (18th century, 19th century, or 20th century). The third field may be a genre, methodology, or other topic that is recognized as a scholarly specialization among musicologists: e.g., Latin American music, opera, popular music, feminist musicology, ethnomusicology, criticism, African-American music. These examinations are designed to test factual knowledge, power of historical analysis and synthesis, and capacity for critical and reflective thinking.

The faculty, after taking into account the fields designated by the student and the suggestions of the student and the adviser, approve the appointment of three of its members to serve as the examining committee. Two weeks before the examination, students submit three samples of their best written work which demonstrate their research, writing, thinking and analytical skills (typically three seminar papers) prepared for at least two musicology faculty members. The samples do not need to match up with the designated areas of examination. The committee’s review of these papers constitutes the first stage of the examination. The second stage is the written examination which is taken together by the cohort of students but is designed differently for each. The members of the examining committee (in consultation with each other to avoid duplication) formulate three essay topics related to the designated fields. Each student receives these topics at the time of the examination and is given up to four hours to address them. The comprehensive examination is concluded by a two-hour oral examination covering the three designated fields and the written work that has been submitted. On the basis of the student’s overall performance, the committee awards a grade of High Pass (pass to continue in the Ph.D. program), Pass (terminal pass), Fail, or Pass Subject to Reevaluation. In this last instance, the student is permitted to repeat the deficient portions of
the examination in the following Winter Quarter, after additional coursework or study is completed. More than one such attempt may be granted at the discretion of the faculty.

Thesis Plan
None.

Doctoral Degree
Admission
Applicants for the Ph.D. program in Musicology must have completed a Master of Arts degree (or the equivalent) in Music. The degree normally is in musicology or music history. Otherwise additional coursework, as prescribed by the department, must be completed.

Applicants for the Ph.D. are required to (1) take a departmental assessment examination (details are sent after the application has been received); (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of work such as a paper on an appropriate subject. Applicants applying to the Ph.D. program should submit their M.A. thesis, if possible. No application can be considered until the examination has been taken and all of the above materials have been received.

Major Fields or Subdisciplines
The Musicology Department offers the degree of Doctor of Philosophy in the field of historical musicology. Degrees in composition, performance, and ethnomusicology and systematic musicology are offered through other departments.

Course Requirements
Students are required to take a minimum of six courses beyond the M.A., including three seminars from Musicology 260A through 260F and 262, and three electives in areas they wish to pursue. Students whose M.A. is not from UCLA may be required, in consultation with the graduate adviser, to take other relevant and necessary courses beyond the six specified.

Written and Oral Qualifying Examinations
Soon after completion of the doctoral coursework, normally at the end of the third year, students take the Special Field Examination, which includes both written and oral components. By this time, the student must have decided upon an area of specialization and secured the agreement of a qualified faculty member to serve as the dissertation adviser. Taking into account the field designated and the suggestions of the student and the adviser, the faculty approves the appointment of three of its members to serve as the examining committee. Three months before the examination, the student submits to the committee members a reading and repertoire list related to the area of specialization. Typically, this consists of a bibliography in the general area of the dissertation research and a list of relevant musical works, together totaling no more than 50 items. The members of the examining committee (in consultation with one another to avoid duplication) each formulate one or more questions relating to the topic, repertoire, and methods thus staked out by the student. The student is allowed one week to address these topics in writing, using any desired research materials. After the completed written examination has been distributed to the examiners, a two-hour oral examination is scheduled. At this time, the committee may discuss the results of the written examination with the student and ask further questions related to the area of the dissertation research. If a majority of the committee determines that the written and oral examinations have been passed, the student begins preparation for the second stage, the University Oral Qualifying Examination. If the committee determines that the written and oral examinations have not been passed, the student may retake the Special Field Examination after six months of further preparation. More than one such attempt may be granted at the discretion of the faculty.

The University Oral Qualifying Examination is a defense of the dissertation prospectus. All other requirements, including language proficiency, must be satisfied before this examination can be scheduled. At least two weeks before the examination, the student must submit the prospectus to the members of the examination committee, who may be but need not be the same as those on the first committee. The prospectus must be a substantially researched overview of the proposed dissertation that demonstrates that the student is fully prepared to undertake the dissertation project. Students are encouraged to consult with the members of their committee before the examination, which concentrates on the feasibility and significance of the project and the student's preparation for it. If the defense is unsatisfactory, the candidate may repeat the examination once, at the discretion of the faculty. After passing this examination, the student is advanced to candidacy and begins to write the dissertation. Candidates are encouraged to enroll in or audit seminars in their field whenever they are offered. If enrolled, candidates may satisfy all course requirements through work connected with the dissertation.

5. History of Rock and Roll. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to the present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes.

6. Opera. Introduction to the Literature of Music. Lecture, four hours; laboratory, one hour. Limited to undergraduate students. Course 2A is not prerequisite to 2B. Designed for nonmusic majors. 2A. Technical and formal principles of music literature through the mid-18th century. 2B. Music literature from the mid-18th century to the present.

7. Music of the U.S. Prerequisite: consent of instructor. Survey of art music in the U.S. from colonial times to the present.

11. American Popular Song. Survey of American popular song from the 18th century to the present, with emphasis on relationship of popular song to important currents in American life and culture.

13. The Bach. Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Johann Sebastian Bach.

14. Beethoven. Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Ludwig van Beethoven.

135A-135B. History of Opera. Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. 135A. Opera of Baroque and Classical Periods; 135B. Opera of Romantic Period; 135C. Opera of the 20th Century.

Upper Division Courses
101. Introduction to Musicology. (Formerly numbered 1A.) Prerequisites: courses 26A-26B-26C. Introduction to principles, problems, and methods of music history and criticism through examination of selected issues.

126A-126B-126C. History and Analysis of Music II. Lecture, four hours; laboratory, one hour. Prerequisites: courses 26A-26B-26C, Music 20A, 20B, and 20C, or consent of instructor. Course 126A is prerequisite to 126B, which is prerequisite to 126C. History and literature of music from 1750 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition.

C127A-C127F. Selected Topics in History of Music. Discussion, three hours. Prerequisites to all courses: courses 1A-1B, 26A-26B-26C, Music 20A, 20B, and 20C, or consent of instructor. Course 126A is prerequisite to 126B, 126D is prerequisite to 126E, and 126C is prerequisite to 126F. Designed as seminars for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. May be concurrently scheduled with courses C227A-C227F. C127A, Middle Ages; C127B, Renaissance; C127C, Baroque; C127D, Classic; C127E, Romantic; C127F, 20th Century.

130. Music of the U.S. Prerequisite: consent of instructor. Survey of art music in the U.S. from colonial times to the present.

133A. History of the Baroque Period. Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. History and works of Johann Sebastian Bach.

133B. History of the Classical Period. Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. History and works of Wolfgang Amadeus Mozart.

133C. History of the Romantic Period. Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. History and works of Ludwig van Beethoven.

135A-135B-135C. History of Opera. Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. 135A. Opera of Baroque and Classical Periods; 135B. Opera of Romantic Period; 135C. Opera of the 20th Century.
136. Music and Gender. Analysis of gender ideolo-
gies in several musical cultures; representations of
gender, the body, and sexuality by both male and fe-
male musicians; contributions of women to Western
art and popular musics; methods in feminist and gay/
lesbian theory and criticism.

139. History and Literature of Church Music. Pre-
requisite: consent of instructor. Study of forms and lit-
ergyles of Western church music.

150. History of Jazz. Designed for musicology, mu-
ic, ethnomusicology majors, and other students
with some background in musical performance and the-
ory. History and analysis of variety of jazz styles, from
late 19th-century forerunners to the present, with em-
phasis on social meanings of musical practices.

156. Studies in Musical Genres. Prerequisite: con-
sent of instructor. Survey of musical genres, with
emphasis on analysis of structural organization.

188A-188B. The Master Composer. Lecture, three
hours; laboratory, one hour. Prerequisite: consent of
instructor. Survey of works of an outstanding composer
in Western art music, considered within context of his
age. 188A. Middle Ages; 188B. Renaissance; 188C.
Baroque; 188D. Classic; 188E. Romantic; 188F. 20th
Century.

189. The Symphony. Lecture, three hours; labora-
tory, one hour. Prerequisite: undergraduate standing.
Survey of symphonic literature from Haydn through the
20th century.

199. Special Studies in Musicology (2 or 4 units).
Prerequisites: senior standing, 3.0 GPA, consent of
instructor and department chair. Individual studies in
musicology resulting in a research project. May be
repeated for a maximum of eight units.

Graduate Courses

200A. Research Methods and Bibliography (6
units). Lecture, three hours. Prerequisite: graduate
standing in musicology. Survey of general biblio-
graphic material in music.

200B. Historiography (6 units). Seminar, three
hours. Prerequisite: graduate standing in musicology, ethnomusicology, or music, or consent of instructor.
Critical examination of principles and procedures which inform historical study of music, with emphasis
on impact of recent cultural theory.

200C. Contemporary Music Criticism (6 units).
Seminar, three hours. Prerequisite: graduate standing
in musicology, ethnomusicology, or music, or consent of
instructor. Introduction to recent developments in
the field of musicology, focusing on problems of how
music operates as a cultural practice and how musi-
cal meanings can most effectively be analyzed and
written about.

201A-201F. Current Research Problems in His-
torical Musicology (6 units each). Discussion, three
hours. Prerequisite: graduate standing in musicology.
Investigation at graduate level of central questions and
problems in history of Western music designed to
give beginning graduate students a unified back-
ground for remainder of their studies and to employ
their developing skills in research and bibliography. 201A. Medieval; 201B. Renaissance; 201C. Ba-
roque; 201D. Classic; 201E. Romantic; 201F. 20th
Century.

202. Selected Topics in History of Western Music
(4 or 6 units). Lecture, three hours. Prerequisite: course 200A or consent of instructor. Designed for
graduate students in areas other than musicology
who are preparing for qualifying examinations. Syste-
tematic review of major stylistic trends in history of
Western music from medieval times to the present
through formal analysis and readings in contem-
porary and modern theoretical writings. May be
repeated for a maximum of 12 units.

210. Medieval Notation (6 units). Lecture, three
hours. Prerequisite: consent of instructor. Vocal and
instrumental notation. Paleography of the period.

211. Renaissance Notation (6 units). Lecture, three
hours. Prerequisite: consent of instructor. Vocal and
instrumental notation. Paleography of the period.

C227A-C227F. Selected Topics in History of
Music. Discussion, three hours. Prerequisite: gradu-
ate standing. Special aspects of music of each period
studied in depth. Each course may be repeated once
for credit. May be concurrently scheduled with courses C217A-C217F. Additional assignments, as
well as a greater depth of study, required of graduate
students. 227A. Early Music; 227B. Renaissance;
227C. Baroque; 227D. Classic; 227E. Romantic;
227F. 20th Century.

250A-250B. Seminars: History of Music Theory
(6 units each). Seminar, three hours. Prerequisite:
course 200A. Course 250A is not prerequisite to
250B. 250A. Investigative of principal theoretical writ-
ings concerning music from antiquity through Zarlino.
250B. Investigation of principal theoretical writings
concerning music from Rameau to the present.

256. Seminar: Musical Form (6 units). Seminar,
three hours. Prerequisites: courses 126A-126B-
126C. Analysis of structural organizations in music.
Specific topics vary from year to year.

257. Seminar: Music of the U.S. and Canada. Dis-
cussion, three hours. Prerequisite: course 130.
Examination of principal figures and trends in North
American music since the 18th century. Topics vary
from year to year.

260A-260F. Seminars: Historical Musicology
(6 units each). Seminar, three hours. Prerequisites:
courses 200A, 201A-201B-201C, and 210 or 211
(whichever is taken concurrently). Specific topics
vary from year to year. May be repeated for credit.
260A. Medieval; 260B. Renaissance; 260C. Baroque;
260D. Classic; 260E. Romantic; 260F. 20th Century.

Lecture, three hours. Prerequisites: graduate standing,
consent of instructor. Investigation of primary source
readings in performance practices as related to the
period; analytical reports and practical applica-
tions in class demonstrations. May be repeated for
credit.

262. Contemporary Popular Music Studies. Sem-
inar, three hours. Prerequisite: graduate standing or
consent of instructor. Critical exploration of methodol-
dies of interdisciplinary field of popular music stud-
ies. Analysis of how music, lyrics, and visual images
produce meanings within contexts shaped by mass
mediation, capitalism, and political realties of gender,
class, and race.

Discussion, three hours. Investigation of origins and
development of principal families of instruments used
in European music since the Middle Ages. Topics vary
from year to year.

375. Teaching Apprentice Practicum (1 to 4 units).
Preparation: apprentice personnel employment as a
teaching assistant, associate, or fellow. Teaching
apprenticeship under active guidance and supervi-
sion of a regular faculty member responsible for cur-
culum and instruction at the University. May be
repeated for credit. S/U grading.

495. Introductory Practicum for Teaching Appren-
tees in Musicology (2 units). Eight weekly two-hour
sessions, plus intensive training session during Fall
Quarter registration week. Prerequisite: appointment
as teaching apprentice in Music or Musicology
Department. Required of all new teaching appren-
tices. Special course dealing with problems and prac-
tices of teaching music at college level. May not be
applied toward degree requirements. S/U grading.

596. Directed Individual Studies in Musicology
(2, 4, or 6 units). Prerequisites: graduate standing,
consent of instructor. S/U grading.

597. Preparation for M.A. Comprehensive Exami-
nation or Ph.D. Qualifying Examinations (2 or 4
units). Prerequisites: graduate standing, completion of all M.A. or Ph.D. course and language require-
ments. S/U grading.

598. Guidance of M.A. Thesis (4, 8, or 12
units). Prerequisites: graduate standing, advance-
ment to Ph.D. candidacy. May be repeated for credit.
S/U grading.

Antonio Loprieno, Dr.phil.habil., Chair

Professors
Andras Bodrohgely, Ph.D. (Turkic, Islamic)
Elizabeth Carter, Ph.D. (Near Eastern Archaeology)
Lev Hakak, Ph.D. (Hebrew)
Antonio Loprieno, Dr.phil.habil. (Egyptology)
Ismail Poonawala, Ph.D. (Arabic)
Yona Sabar, Ph.D. (Hebrew)

Professors Emeriti
Hossein Ziai, Ph.D. (Iranian and Islamic Studies)

Assistant Professors
Michael D. Cooperson, Ph.D. (Arabic)
Robert K. Englund, Ph.D. (Asyriology)
Daniel C. Polz, Ph.D. (Egyptian Archaeology and
History)

Lecturers
Nancy Ezer, Ph.D. (Hebrew)
Michael Fishbein, Ph.D. (Arabic)
Leithead Hagigi, M.A. (Iranian)
Ralph Jaaclcl, Ph.D. (Turkic)
Thomas Ritter, Dr.phil. (Egyptology)

Scope and Objectives
The mission of the department is the discovery,
terpretation, dissemination, and preservation of
human values created over a period of five
or more thousand years in an area which was
the cradle of all civilization.

The department offers instruction in the major
languages and ancient languages of the Near East:
Akkadian, ancient Egyptian, Arabic, Arme-
ian, Berber, Coptic, Hebrew, Persian, and
Turkic. To meet increasing demands for a
knowledge of this area and its past and present,
it treats each language in a wide perspective —
as a means of communication, as a vehicle of a
cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, Iranian studies, and Jewish studies. Master's and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the prerequisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria/Palestine, and (4) biblical studies.

Preparation for the Major

Requisites for options 1 and 2 are German 1 and 2; requisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the requisite levels.

The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: option 1 — Semitics 140A-140B, 141, 142; option 2 — Ancient Near East 120A-120B-120C, 121A; option 3 — Semitics 130 and three terms of Hebrew 120. The remaining 10 courses for all three options are to be selected from the following: three literature courses from Ancient Near East 150A, 150B, 150C, Jewish Studies M150A; three courses in history and religion from Ancient Near East M104A, M104B, M105, 130, 170, History M191A, 193D, M203A, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 101A, 101B; one course in research methodology (such as Anthropology C115R, M116Q, or Linguistics 120A, 120B, or English 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three terms of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, M105, 130, 150A, 150B, 160A, 160B, Art History 101A, 101B, 105A, Classics 168, Greek 131, History 193D, 194B, Iranian 169, 170, Latin 120.

Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental specialization in business and administration to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

Preparation for the Major

Required: Arabic 1A-1B-1C, 102A-102B-102C, 150.

The Major

Bachelor of Arts in Hebrew

Preparation for the Major

Required: Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 103A-103B-103C, three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

Bachelor of Arts in Iranian Studies

Students majoring in Iranian studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

Preparation for the Major

Required: Iranian 1A-1B-1C or equivalent, 150A-150B.

The Major

Bachelor of Arts in Jewish Studies

Preparation for the Major

Required: Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, 120 or 125, Jewish Studies M150A-150B, 151A-151B, 199, and four other upper division courses. At least two of the four must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining two may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

Near Eastern Languages and Cultures Minor

The Near Eastern languages and cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed a total of seven upper division courses in the department, and file a petition in 255 Kinsey Hall, (310) 825-4165.

Required Upper Division Courses: Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.
Master’s Degree

Admission
In addition to the regular University requirements, a bachelor’s degree or its equivalent in the language area chosen for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required of applicants to the Master of Arts program. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE score of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

Areas of Study
Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

Course Requirements
A minimum of nine upper division and graduate courses is required, of which at least six must be at the graduate level. Students are required to take one quarter of Near Eastern Languages 200.

In general, students choosing either the language, literature, or archaeology option are required to study two Near Eastern languages, one of which is considered the major language. Students in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, students may choose as their major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), or Old Persian. For the second language, any of the above or Hittite or Sumerian may be chosen.

Students in Hebrew choose Hebrew and another Semitic language. In Turkic, either two Turkic languages or Turkish and a second culturally related language may be chosen. In Arabic, Armenian and Iranian (modern), a major language and a second culturally related language are chosen.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, Persian, Sanskrit, and Old and Middle Iranian are studied.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
In general, students are required to take written final comprehensive examinations in their major and minor languages, as well as the history and literature of their major field. Further details can be found in the departmental Guide to Graduate Studies, available in the department.

Thesis Plan
None.

Doctoral Degree

Admission
In addition to the regular University requirements, an M.A. or equivalent in the applicant’s field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE score of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

The M.A. program need not have been completed at UCLA.

Major Fields or Subdisciplines
Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

Course Requirements
Students who choose a language emphasis for the Ph.D. are required to add a third Near Eastern language to the two that are required for the M.A.

Students are required to achieve high competence in two of their languages and to familiarize themselves with the cultural backgrounds of each of the languages chosen. For language options, see the M.A. requirements section. Students are also expected to take the equivalent of one year of general linguistics. Those studying Semitics or Old Iranian study three languages.

If the literature option is chosen, the student is required to achieve high competence in two Near Eastern languages and their literatures. For language options, see the M.A. requirements section. Students are required to familiarize themselves, through appropriate coursework, with the history of the cultural area, and the methods of literary research and the history of literary criticism.

If the archaeology emphasis is in the ancient Near Eastern civilizations specialization is chosen, students are required to achieve high competence in two ancient Near Eastern languages and must be well-versed both in the history of the cultural area and in archaeological methodologies. For language options, see the M.A. requirements section.

Further details about the choice of languages and examination requirements may be found in the departmental Guide to Graduate Study, available in the department.

Written and Oral Qualifying Examinations
Qualifying examinations must be passed before the formation of a doctoral committee.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates in ancient Near Eastern civilizations are examined in two ancient languages and in the history and archaeology of the major areas of the ancient Near East.

Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Lower Division Courses
10. Jerusalem: The Holy City. Lecture, three hours. Survey of history of Jerusalem over 3,000 years as a symbolic focus for three faiths: Judaism, Christianity, and Islam.

Upper Division Courses
M104A-M104B. Ancient Egyptian Civilization. (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. M104A. Chronological discussion of Prehistory; the Old and Middle Kingdom; M104B. The New Kingdom and the Late period until 332 B.C.

M105. History of Ancient Mesopotamia and Syria. (Same as History M105.) Lecture, three hours. Political and cultural development of the “Fertile Crescent,” including Palestine, from the Neolithic to the Achaemenid period.

120A-120B-120C. Elementary Ancient Egyptian. Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Grammar and texts.

121A-121B-121C. Intermediate Ancient Egyptian. Lecture, three hours. Prerequisites: courses 120A-120B-120C. Readings in ancient Egyptian literature.

123A-123B. Coptic. Lecture, three hours. Prerequisite: consent of instructor. Introduction to Coptic grammar and reading of Coptic texts.

124. Middle Egyptian Technical Literature. Prerequisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included.

130. Ancient Egyptian Religion. Lecture, three hours. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religious-political institutions such as divine kingship and pious foundations. 140A-140B-140C. Elementary Sumerian. (Formerly numbered 140A-140B.) Lecture, three hours; outside study, nine hours. Prerequisites: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

145. Sumerian Literary Texts. Lecture, three hours. Prerequisites: courses 140A-140B or consent of instructor. Reading and interpretation of selected Sumerian literary texts.
Graduate Courses

210. Late Egyptian. Lecture, three hours. Prerequisite: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit.

211A-211B. Egyptian Texts of the Greco-Roman Period. Lecture, three hours. Prerequisite: course 121C. Introduction to demotic grammar and orthography. Reading of texts from various genres. May be repeated for credit.

240A-240B-240C. Seminars: Sumerian Language and Literature. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic and literary analysis. May be repeated for credit.

250. Seminar: Ancient Mesopotamia. (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

250X. Seminar: Ancient Mesopotamia (1 unit). Prerequisite: consent of instructor. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading.

260. Seminar: Ancient Near Eastern Archaeology. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

261. Practical Field Archaeology (2 to 8 units). Fieldwork, two hours. Prerequisite: consent of instructor. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated.

262. Seminar: Object Archaeology. Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeramanek Collection of Los Angeles County Museum of Art.

263. Seminar: Egyptian Monuments. Prerequisite: consent of instructor. Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated.

265. Depositional History and Stratigraphic Analysis. (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists.

296. Directed Individual Study (2 to 8 units). May be repeated for credit.

297. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

299. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Arabic

Lower Division Courses

1A-1B-1C. Elementary Literary Arabic. Lecture, six hours. Basic grammar and syntax.

Upper Division Courses

102A-102B-102C. Intermediate Literary Arabic. Lecture, four hours; discussion, one hour. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; readings of excerpts from literary texts; composition.

103A-103B-103C. Advanced Arabic. Prerequisites: courses 102A-102B-102C or consent of instructor. Review of grammar, composition, conversation, and readings from classical and modern literary texts.

111A-111B-111C. Elementary Spoken Egyptian Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Basic grammar and syntax of Egyptian colloquial Arabic.

112A-112B-112C. Advanced Spoken Egyptian Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

113A-113B-113C. Elementary Spoken Levantine Arabic. Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. General introduction to spoken Arabic of Syria, Lebanon, and Palestine. Grammar and syntax, with emphasis on language of everyday conversation.

114A-114B-114C. Spoken Moroccan Arabic. Lecture, three hours; laboratory, one hour. Introduction to spoken Arabic dialects; morphology, syntax. Emphasis on developing oral skills.

120. Islamic Texts. Prerequisite: course 103C or consent of instructor. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit.

130. Classical Arabic Texts. Prerequisite: course 103C or consent of instructor. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit.

132. Philosophical and Kalam Texts. Lecture, three hours. Prerequisite: courses 120 or consent of instructor. Readings in medieval and Kalam texts. May be repeated for credit.

141. Modern Arabic Literature. Prerequisite: course 103C or consent of instructor. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit.

150. Introduction to Arabic Literature and Culture. (F, W, S.) (Same as 497.) Lecture, three hours. Readings in English; knowledge of Arabic not required. Culture of Arabic-speaking peoples through their literature. Texts range from pre-Islamic poetry to contemporary novels, along with works in history and anthropology, to place these writings in their social context. P/NP or letter grading.

151. Survey of Modern Arabic Literature in English. Lecture, three hours. Readings of selected texts covering basic literary trends from middle of the last century to the present.

180. Linguistic Analysis of Arabic. Prerequisite: course 102C or consent of instructor. Linguistic description of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phonology, morphology, and syntax and to linguists' approaches to specific problems posed by Arabic grammar and dialectology.

199. Special Studies in Arabic (2 to 8 units). Prerequisite: consent of instructor.
205. Seminar: Arabic Literature. Seminar, two hours. Prerequisite: consent of instructor. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units.

206. Seminar: Modern Arabic Literature. Seminar, three hours. Prerequisite: course 141 or consent of instructor. Studies of specific problems and trends in Arabic prose and/or poetry in the 20th century. May be repeated for credit.

207. Directed Individual Study (2 to 8 units). May be repeated for credit.

208. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

209. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Related Courses

History
106A-106B-106C. Survey of the Middle East from 500 to the Present.

204A-204B. Seminars: Near and Middle Eastern History.

Armenian

Upper Division Courses

103. Advanced Modern Armenian. Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent. Readings in advanced modern Armenian texts. May be repeated twice for credit.

131A-131B. Intermediate Classical Armenian. Lecture, three hours. Prerequisites: courses 130A-130B or equivalent. Readings in classical Armenian texts.

150A-150B. Survey of Armenian Literature in English. Lecture, three hours. Knowledge of Armenian not required. Each course may be taken independently for credit.

160A-160B. Armenian Literature of the 19th and 20th Centuries. Lecture, three hours. Prerequisites: courses 150A-150B or equivalent. Reading of texts and discussion of various genres of modern Armenian literature within context of modern Armenian cultural renaissance.

199. Special Studies in Armenian Language and Literature (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

207. Armenian Intellectual History. Lecture, three hours. Intellectual and cultural trends reflected in Armenian literature, historiography, religious and philosophical thought.

220. Armenian Literature of the Golden Age (A.D. 5th Century). Lecture, three hours. Prerequisites: courses 131A-131B or equivalent. Readings of texts and discussion of literary genres; original works and those translated from Greek and Syriac.

250A-250B. Seminars: Armenian Literature. Seminar, three hours. Prerequisite: consent of instructor. Selected topics from various periods of Armenian literature. May be repeated for credit.

290. Seminar: Armenian Paleography. Seminar, three hours. Prerequisite: consent of instructor. Discussion of a variety of Armenian scripts and training in use of manuscripts.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Related Courses

History
112A-112B-112C. Armenian History. Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent. Readings in Armenian history. May be repeated for credit.

113. The Caucasus under Russian and Soviet Rule. Prerequisite: Consent of instructor.

205S. Topics in History: Armenia and the Caucasus.

211A-211B. Seminars: Armenian History.

Indo-European Studies

M150. Introduction to Indo-European Linguistics.

Berber

Upper Division Courses

101A-101B-101C. Elementary Berber. Lecture, three hours; laboratory, two hours. Development of oral proficiency and analysis of basic grammatical structure.

102A-102B-102C. Advanced Berber. Prerequisites: courses 101A-101B-101C or consent of instructor. Advanced study of Berber. Regional and stylistic variation in folk literature.

130. The Berbers. Examination of main features of Berber societies and cultures, with particular attention to social structures and institutions on one hand, and to customs, values, and beliefs on the other. Presentation of broad framework within which study of particular aspects of Berber cultures may be pursued.

199. Special Studies in Berber Languages (2 to 8 units). Prerequisite: consent of instructor. Studies based on requirements of individual students.

Linguistics
225M. Linguistic Structures: Berber.

Hebrew

Lower Division Courses

1A-1B-1C. Elementary Hebrew. Lecture, three hours; laboratory, two hours. Structural principles of grammar. Students who have prior knowledge of reading and some vocabulary are advised to take courses 10A-10B-10C. Students with credit for course 10A cannot receive credit for 1A; those with credit for course 10B cannot receive credit for 1B and/or 1C.

10A-10B-10C. Accelerated Elementary Hebrew. Lecture, five hours. Open to students who wish to cover equivalent of two years of college Hebrew in one academic year. Designed for students who have previously studied rudiments of Hebrew. Students with credit for course 1A cannot receive credit for 10A; those with credit for course 1B and/or 1C cannot receive credit for 10B.

20A-20B. Introduction to Biblical Hebrew. Lecture, three hours. Prerequisites: courses 10A-1B-1C or equivalent. Amplification of grammar; reading of texts from modern literature.

20A-102B-102C. Intermediate Hebrew. Lecture, three hours. Prerequisites: courses 10A-10B-102C or equivalent. Introduction to modern Hebrew literary texts.

120. Biblical Texts. Prerequisite: course 10B.

125. Hebrew Bible with Medieval Commentaries. Lecture, three hours. Prerequisite: course 10C.

130. Rabbinic Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor.

135. Medieval Hebrew Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Readings in medieval and Hebrew prose and poetry. May be repeated for a maximum of 16 units.

140. Modern Hebrew Poetry and Prose. Lecture, three hours. Prerequisites: courses 103A-103B-103C, consent of instructor. Study of major Hebrew writers of the late 19th and 20th centuries: prose — Mendele, Ahad Ha’am, Agnon, Yizhar; poetry — Bialik, Tchernichovsky, Greenberg, Shlonsky, Alterman, Amihai. May be repeated for credit.

150. Hebrew Essay. Lecture, three hours. Prerequisites: courses 103A-103B-103C, consent of instructor. Hebrew essay from its rise in Europe in the late 18th century to contemporary Israeli essay. Study of literary, political, philosophical, and scholarly essay. May be repeated for credit.

170. Dead Sea Scrolls and Biblical Studies. Lecture, three hours; outside study, nine hours. Prerequisites: courses 102A-102B-102C, 120, or equivalent. Introduction to history of the Dead Sea Sect, their literature, and its impact on biblical studies, with focus on interpretation in the Qumran texts.

190A-190B. Survey of Hebrew Grammar. Lecture, three hours. Prerequisites: courses 102A-102B-102C or consent of instructor. Descriptive and comparative study of Hebrew grammar; phonology and morphology. Topics include development of Hebrew language from biblical times to the present day, its relation to Arabic and other Semitic languages, methods of language expansion in Israel, traditional pronunciations of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic).

199. Special Studies in Hebrew (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. History of the Hebrew Language. Prerequisites: courses 103A-103B-103C or consent of instructor. Development of Hebrew language in its various stages: biblical, Mishnaic, medieval, modern, and Israelite; differences in vocabulary, morphology, syntax, and influence of other languages; problems of language expansion in Israeli Hebrew.
220. Studies in Hebrew Biblical Literature. Lecture, three hours. Critical study of Hebrew text in relation to major versions; philological, comparative, literary, and historical study of various biblical books. May be repeated for credit.

230. Seminar: Medieval Hebrew Literature. Seminar, three hours. May be repeated for credit.

231. Texts in Judeo-Arabic. Prerequisite: reading knowledge of Hebrew and Arabic. Reading of philo-
sophic texts in Judeo-Arabic.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Iranian

Lower Division Courses

1A-1B-1C. Elementary Persian. Lecture, four hours; laboratory, two hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian.

10A-10B-10C. Persian Conversation (2 units each). Lecture, three hours. Systematic and structured Per-
sian conversations.

20A-20B-20C. Accelerated Elementary Persian (6 units each). Lecture, four hours; discussion two hours; laboratory, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose com-
positions. P/NP or letter grading.

Upper Division Courses

102A-102B-102C. Intermediate Persian. Lecture, three hours; laboratory, three hours. Prerequisite: course 101C or 102B, which is requisite to 102C.

103A-103B-103C. Advanced Persian. Lecture, three hours. Prerequisite: course 102C. Students who su-
cessfully complete courses 20A-20B-20C with grades of A may be permitted to enroll. Each course may be taken independently for credit.

103A. Introduction to Classical Persian Poetry. 103B. Introduction to Clas-
sical Persian Prose; 103C. Introduction to Contempo-
yr Persian Poetry and Prose.

111A-111B-111C. Elementary Kurdish. Lecture, three hours; laboratory, two hours. Prerequisite: con-
sent of instructor. A proficiency-based course in basic grammar of literary Kurdish (Soran). Graded read-
ings, translation, composition (level one), conversa-
tion (levels one and two).

120. Comparative Study of Six Major Persian Poets. Lecture, two hours; discussion, one hour. Prerequisite: knowledge of Persian (lectures in Persian, readings in English and Persian). Comparative study of six major Persian poets from the 10th to 14th century who shaped the history of Persian literature and delineated chief distinguishing characteristics of Persian thought and culture. P/NP or letter grading.

140. Contemporary Persian Belles Lettres. Lecture, three hours. Prerequisite: course 103A. Study of major Persian poets and prose writers of the 20th century: Rumi, Sa'adi, Hafiz, Mirza Golestan, Farokhkhiz, Khosrov.

141. Contemporary Persian Analytical Prose. Lecture, three hours. Prerequisites: courses 102A-102B-
102C or equivalent, consent of instructor. Study of selected modern Persian analytical and expository prose texts, with emphasis on specific social, literary and historical contexts.

142. Persian Popular Ethics. Prerequisites: courses 102A-102B-102C or consent of instructor. Study of Persian popular works on moral ethics which have helped shape social normative social, cultural, and political values in Islamic civilization. P/NP or letter grading.

150A-150B. Survey of Persian Literature in English. Lecture, three hours. Knowledge of Per-
sian not required. Each course may be taken inde-
pendently for credit.

169. Civilization of Pre-Islamic Iran. Survey of Ira-
nian culture from the beginning through Sasanian period.

170. Religion in Ancient Iran. History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichea-
ism, Mazdakism.

180A-180B. Iranian Civilization. Lecture, three hours; discussion, one hour. Cultural and social his-
ory of the Iranian world, with emphasis on legacy of Persian language and literature. Letter (majors) or P/NP or letter (nonmajors) grading.

190A-190B. Introduction to Modern Iranian Stud-
ies. Lecture, three hours. Prerequisites: courses 1A-
1B-1C or equivalent. Survey of Iranian languages. Comparative and historical grammar.

199. Special Studies in Iranian (2 to 8 units). Pre-
requisite: consent of instructor.

Graduate Courses

220A-220B. Classical Persian Texts. Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Study of selected classical Per-
sian texts. Each course may be taken independently for credit.

221. Rumi, Mystic Poet of Islam. Seminar, three hours. Prerequisites: course 220A or 220B or equiva-
 lent, consent of instructor. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

222A-M222B. Vedic. (Same as Indic M222A-
M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to Indic 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

230A-230B. Old Iranian. Prerequisite: consent of instructor. Studies in grammars and texts of Old Per-
sian and Avestan. Comparative considerations. Only course 230B may be repeated for credit.

231A-231B. Middle Iranian. Prerequisite: consent of instructor. Studies in grammars and texts of Mid-
dle Iranian languages as best serve students' needs (e.g., Pahlavi, Sogdian, Sakian). Only course 231B may be repeated for credit.

250. Seminar: Classical Persian Literature. Semi-
inar, three hours. Prerequisites: courses 103A-103B-
103C and 199, or consent of instructor. May be repeated twice for credit.

251. Seminar: Contemporary Persian Literature. Seminar, three hours. Prerequisites: course 140 or equivalent, consent of instructor. Studies in specific problems and trends in Persian poetry and prose in the 20th century. May be repeated twice for credit.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Jewish Studies

Lower Division Course

10. Social, Cultural, and Religious Institutions of Judaism. Lecture, three hours; discussion, one hour. Judaism's basic beliefs, institutions, and prac-
tices. Topics include development of biblical and rab-
binic Judaism; concepts of god, sin, repentance, prayer, and the messiah; history of Talmud and syna-
gogue; evolution of folk beliefs and year-cycle and life-cycle practices.

Upper Division Courses

M111E. Ethnic Groups and Their Bibliographies: Jewish History and Culture. (Same as Library and Information Science M111E.) Basic reference sources on specific topics on Judaica, ranging from bib-
lical studies to the Holocaust to Jewish life in the U.S.
130. Modern Jewish Religious Movements and Their Ideologies. Lecture, three hours. Introduction to and overview of Jewish religious movements and evolution of their ideologies in the Western world from time of the Enlightenment to the present.

140A-140B. American Jewish History. Lecture, three hours. Examination of social and cultural history of American Jews from their inception in the New World to the present, with emphasis on integration of successive immigrants and development of institutions. P/NP or letter grading. 140A. 1654 to 1914; 140B. 1914 to the Present.

141. Modern Anti-Semitism. Lecture, three hours. Examination of modern anti-Semitism from the 18th century to the present; comparison of modern racist ideologies with premodern theories; case studies (e.g., Dreyfus affair, Beiliss Trial, Holocaust); Jewish reactions to these phenomena.

142. History and Institutions of State of Israel. Lecture, three hours. Study of social and cultural development of State of Israel from its pre-state institutions to the present, with emphasis on major trends, personalities, and ideologies, and state's position in wider framework of modern Jewish history.

M143. Introduction to Jewish Folklore. (Same as Folklore 42.) Lecture, two hours. Jewish folklore: narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

M150A-150B. Hebrew Literature in English. Lecture, three hours. Course may be taken independently for credit. 151A. Diaspora Literature. Study of literary responses of Jews to modernity, its challenges and threats. Readings in texts originally written in Hebrew or translated from Hebrew. Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. 151B. Israeli Literature. Study of translations from Hebrew literature written in Israel and reflecting cardinal facets of Israeli life, society, security problems, identity of the state, role of individual. Analysis of formal aspects of each work.

155. Literature of the Cabala. Lecture, three hours. Cabalistic movements as a broad sense (i.e., Jewish esoteric literature from the rabbinic to modern period). Topics include precabalistic esoteric texts, the early cabala, the Zohar, Lurianic cabala, nature of mysticism, the question of whether there was a Jewish mysticism.

157. The Holocaust in Literature. (Same as Comparative Literature M165.) Lecture, three hours. Requisite: History 191E, 191F, or 191G. Investigation of how the Holocaust informs a variety of literary and cinematic works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

190. Undergraduate: Jewish Studies. Examination of a single topic in depth with object of encouraging and guiding students' research in area of Jewish studies. Literary, cultural, and historical subjects included.

M191A-M191D. Focal Themes in Jewish History. (Same as History M191C-M191D.) Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

M192A-M192B. Jewish Intellectual History. (Same as History M192A-M192B.) M192A. Medieval Period. Exploration of three intellectual worlds that competed for hegemony in the medieval Jewish world — rabbinic Judaism, medieval rationalism as embodied in philosophy, and cabala. M192B. Modern Period. Exploration of some of most important currents and figures in Jewish intellectual history from the 18th century to the present.

197A-197Z. Variable Topics in Jewish Studies. Lecture or seminar, three hours. Variable topics; consent of instructor. Required for M.A. degree. P/NP or letter grading. 197A. 20th-Century Jewish Thought. May not be repeated for credit. 197B. Jewish Feminist Theology.

199. Special Studies in Jewish Studies (2 to 8 units). Limited to Jewish studies majors.

Near Eastern Languages

Lower Division Courses

50A-50B-50C. Introduction to Near Eastern Languages and Literatures. Lecture, three hours. Three- term sequence designed both as an introduction for undergraduates and as a requisite to various majors within department, Art and archaeology, languages and literatures, cultural history. Each course may be taken independently for credit. 50A. Ancient Near East; 50B. Medieval Near East; 50C. Modern Near East.

Graduate Courses

200. Bibliography and Method of Near Eastern Languages and Literatures. Lecture, two hours. Prerequisite: consent of instructor. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

210. Survey of Afro-Asiatic Languages. Lecture, three hours. Prerequisite: consent of instructor. Survey of languages and literatures, cultural history. Each course may be taken independently for credit. 50A. Ancient Near East; 50B. Medieval Near East; 50C. Modern Near East.

Seminars

210A. Ancient Aramaic. Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of surviving inscriptions and papyri. May be repeated for credit.

215B. Syriac. Lecture, two hours. Prerequisite: Hebrew 102A-102B-102C or consent of instructor. Study of Syriac language and literature. Only course 220B may be repeated for credit.

225. Phoenician. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Phoenician language and inscriptions. May be repeated for credit.

230. Seminar: Northwestern Semitic Languages and Literatures. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

240. Seminar: Akkadian Language. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

240L. Seminar: Semitic (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

241. Seminar: Akkadian Literature. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

241X. Seminar: Akkadian Literature (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

280A-280B-280C. Seminars: Comparative Semitics. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

297. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

299. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Semitics

Upper Division Courses

130. Biblical Aramaic. Lecture, three hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Grammar of biblical Aramaic and reading of texts.

140A-140B. Elementary Akkadian. Lecture, three hours. Prerequisite: consent of instructor. Selected readings from Akkadian myths and epics, with introduction to traditional history of the works and their literary structures.

199. Special Studies in Semitics (2 to 8 units). Prerequisite: consent of instructor.

Graduate Courses

210. Ancient Aramaic. Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of surviving inscriptions and papyri. May be repeated for credit.

215B. Syriac. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Syriac language and literature. Only course 220B may be repeated for credit.

225. Phoenician. Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Phoenician language and inscriptions. May be repeated for credit.

230. Seminar: Northwestern Semitic Languages and Literatures. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

240. Seminar: Akkadian Language. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

240L. Seminar: Semitic (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

241. Seminar: Akkadian Literature. Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

241X. Seminar: Akkadian Literature (1 unit). Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

280A-280B-280C. Seminars: Comparative Semitics. Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

297. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

299. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.
Graduate Courses

210A-210B-210C. Introduction to Ottoman. Lecture, three hours. Prerequisite: consent of instructor. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

211. Ottoman Diplomatics. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research.

225A-225B-225C. Old Turkic: Turk and Uyghur. Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uyghur documents: inscriptions, Manichean and Buddhist literary works.

230A-230B-230C. Historical and Comparative Survey of Turkic Languages. Lecture, three hours. Prerequisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis.

235A-235B. Middle Turkic: Karakhanid, Khazar, Bactrian, and Old Anatolian. Lecture, three hours. Prerequisites: course 180, consent of instructor. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

240A-240B-240C. Advanced Ottoman. Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent or consent of instructor. Emphasis on different genres of Ottoman writing (bilinear letters as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

250A-250B-250C. Islamic Texts in Chagatay. Lecture, three hours. Prerequisites: courses 220A-220B-220C or consent of instructor. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

280A-280B. Seminars: Modern Turkish Literature. Seminar, two hours. Prerequisites: course 102B or equivalent, consent of instructor. Specific issues and trends in development of Turkish literature from mid-19th century to the present.

290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri. Seminar, two hours. Prerequisites: courses 210A-210B-210C and/or 220A-220B-220C, consent of instructor. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

596. Directed Individual Study (2 to 8 units). May be repeated for credit.

597. Examination Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 8 units). Prerequisite: consent of department or instructor. S/U grading.

Adjoint Professor
Sondra Hale, Ph.D. (Anthropology)

Scope and Objectives
The graduate major in this discipline is called Islamic studies. For details, see the program by that name earlier in this section.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this geographic area from the ancient to the modern period, (2) those who plan to live and work in the Near East whose careers can be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.
Undergraduate Study

Bachelor of Arts Degree

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. Students must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or the equivalent in the language of their choice. Students may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Political Science 6, Psychology 18, or Statistics 50, plus one course from Geography 171, Political Science 102, Psychology 142, or Sociology 112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Art History 104A, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major

Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Ancient Near East M104A, M104B, Anthropology 110, Art History M102A, M102B, 104B, 104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 20B, 130, Geography 187, 188, Political Science 132A, 132B, 157, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Irene A. Bierman at the program address.

Carlos A.E. Lemmi, Ph.D., Adjunct

Anselmo R. Pineda, M.D., Ph.D.

Adjunct Assistant Professor

Robert B. Trelease, Ph.D.

Scope and Objectives

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. The great majority of students graduating with a doctoral degree in anatomy and cell biology can look forward to an academic career in medical and dental schools or research institutes and, in accord with this, the department strives to produce graduates soundly qualified both for teaching at this level and for the conduct of productive research in neurobiology and cell biology. Program information is available through the departmental website.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree

Admission

The Department of Neurobiology offers the Ph.D. degree in Anatomy and Cell Biology, and students may obtain the Master of Science degree; however, the department normally does not admit candidates for the M.S. degree only.

Areas of Study

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements

A minimum of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Neurobiology 597 or 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from Neurobiology 104, M202, M203A, M203B, M209A, and M209B; one departmental seminar; other courses essential to the student’s program; courses in the minor field (for those under the comprehensive plan). If Neurobiology 104 is selected, Neurobiology 254 must be taken concurrently, making a nine-unit requirement.

Comprehensive Examination Plan

Under the written comprehensive examination plan, students must demonstrate a grasp of the general principles of the required coursework, as well as an understanding of some related field relevant to their objectives.

Thesis Plan

For the thesis plan, a committee of an adviser and two departmental members approves the thesis proposal after all coursework is completed. All members participate in criticism and approval of the eventual thesis, but there is no oral defense.

Doctoral Degree

Admission

Applicants must have a bachelor’s degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, general and organic chemistry, biochemistry, and college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, molecular biology, and statistics are highly recommended.

Doctoral applicant admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

Major Fields or Subdisciplines

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements

(1) Students are required to take for credit the following courses or course combinations: Neurobiology M202, M209A (or Biological Chemistry M267 or Microbiology and Immunology
M229), 209B, Biological Chemistry CM253, and an elective that is sanctioned by UCLA ACCESS.

(2) Participation in at least three seminar courses, one of which should be in the Department of Neurobiology.

(3) Completion of some elective courses as are essential for research interest.

(4) Rotation through three research laboratories in the first year, one term each, with course S96 credit (four units).

Since the Department of Neurobiology graduate degree program is a full participant in UCLA ACCESS, the student is referred to that program for further course requirements.

Written and Oral Qualifying Examinations

The written qualifying examination is intended to evaluate students' knowledge of the research field and ability to formulate a practicable and significant research program.

The student submits by the end of the Spring Quarter of the second year a research proposal in the format of an individual National Institutes of Health (NIH) grant application. The research proposal reflects, as closely as possible in each individual's case, the plan for the dissertation research. A student whose research goals are well focused and formulated may also assemble a doctoral committee at this time, and that committee reviews and grades the proposal. If the student has not settled on a research focus at this point, the written research proposal encompasses as closely as possible a topic within the student's area of research interest. In this instance, an appropriate faculty committee is assembled to review and grade the proposal on a pass/fail basis. In either case, a research proposal that meets with approval of the appropriate committee constitutes the written qualifying examination.

Bona fide written dissertation proposals which satisfy the requirements for the written qualifying examination can be followed closely by the University Oral Qualifying Examination, which consists of an oral defense of the proposal accompanied by a 30- to 60-minute presentation with appropriately prepared visual aids. Research proposals that are less focused on the dissertation research, but which satisfy the requirements of the written qualifying examination, can be followed by a University Oral Qualifying Examination after plans for the dissertation research are formulated. The University Oral Qualifying Examination is heard and graded on a pass/fail basis by the student's doctoral committee. The examination is scheduled by the student and major professor at a time that allows all of the members of the committee to attend. There is no specified time allotment for the examination. However, it is anticipated that one-half day should be adequate in the majority of cases. In the event that the committee reaches the conclusion that a failing grade is necessary, either because the research plan is faulty or the student is inadequately prepared to defend the plan, one additional opportunity is given to modify the proposal and pass the examination. The first University Oral Qualifying Examination should be taken no later than two and one-half years into the program and any reexamination no later than three years.

The Department of Neurobiology may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

Neurobiology Lower Division Course

88. Lower Division Seminar: Special Topics in Neurobiology. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

104. Histology and Cell Biology (6 units). Formerly numbered Anatomy 104.) Lecture, four hours; laboratory, six hours. Prerequisite: dental student standing or consent of chair. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Neuronal system included.

105. Functional Neuroanatomy. Formerly numbered Anatomy 105.) Lecture/laboratory, three two-hour sessions. Prerequisite: dental student standing or consent of instructor. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system.

109. Individual Special Studies (2 to 8 units). Formerly numbered Anatomy 199.) Prerequisite: consent of instructor. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. S/U or letter grading.

Graduate Courses

201. Microscopic Anatomy and Cell Biology (7 units). Formerly numbered Anatomy 201.) Lecture/laboratory, two to three three-hour sessions (16-week semester). Prerequisite: medical student standing or consent of instructor. Microscopic study of structure and function of tissues and cells, with special reference to the human body.

202. Neuromanatomy: Structure and Function of Nervous System. Formerly numbered Anatomy 202.) (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Prerequisite: Biology 166 or Molecular, Cell, and Developmental Biology 171. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

203A-203B. Basic Neurology. Formerly numbered Anatomy M203A-M203B.) (Same as Physiology M203A-M203B.) Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine’s second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

204. Cellular and Molecular Developmental Neurobiology. Formerly numbered Anatomy M204.) (Same as Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, and Molecular, Cell, and Developmental Biology 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

209A. Molecular Cell Biology (6 units). Formerly numbered Anatomy M209A.) (Same as Molecular, Cell, and Developmental Biology CM220 and Physiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduate students. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

209B. Cell and Tissue Neurobiology. Formerly numbered Anatomy 209B.) (Same as Neuroscience M244.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct research. Preparation for current knowledge on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and membranes.

211. Cellular Basis of Learned Behavior (2 units). Formerly numbered Anatomy 211.) Lecture/discussion, one two-hour session; laboratory, to be arranged. Prerequisites: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory.

221. Cellular and Molecular Neurochemistry. Formerly numbered Anatomy M221.) (Same as Biological Chemistry M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics – metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neuromodulators. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling, S/U or letter grading.

227. Cellular, Molecular, and Functional Aspects of Reproductive System. Formerly numbered 227.) (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical, histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

229. Oral Embryology and Histology. Formerly numbered Anatomy M229.) (Same as Oral Biology M229.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.
M234. Seminar: Developmental Neuroendocrine-immunology (2 units). (Formerly numbered Anatomy 234.) (Same as Medicine M235 and Neuroscience M246.) Prerequisite: consent of instructor. Emphasis on mechanisms and structures that underlie the interaction between the immune system and the nervous system. Examination of current literature on the role of neuropeptides and cytokines in the regulation of immune response.

M235. Neuroactive Peptides: Molecular Biology to Function (2 units). (Formerly numbered Anatomy M235.) Prerequisite: consent of instructor. Examination of current knowledge about neuropeptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current research on neuropeptides. S/U grading.

251. Problems in Developmental and Comparative Immunology (2 units). (Formerly numbered Anatomy 251.) Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence.

254. Structure and Function of Cells and Tissues (2 units). (Formerly numbered Anatomy 254.) Lecture, one hour; discussion, one hour. Prerequisites or corequisites: course 104, consent of instructor. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

M255. Seminar: Neuro- and Behavioral Endocrinology (2 units). (Formerly numbered Anatomy M255A-M255D.) Lecture, one hour; discussion, one hour. Topics include hormone biochemistry, pharmacology, and endocrine-metabolic interactions. S/U grading.

M261. Neuronal Circuit Analysis (2 units). (Formerly numbered Anatomy M261.) Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Seminar with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

390A-390B. Peer Review System (2 units each). (Formerly numbered Anatomy 390A-390B.) Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Introduction to peer review system for evaluation of research proposals. After completion of grant review process, each student presents abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

495A-495F. Preparation for Teaching in Anatomical Sciences (2 to 4 units each). (Formerly numbered Anatomy 495A-495F) Prerequisites: graduate standing, consent of chair and instructor. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject index. S/U grading.

501. Cooperative Program (2 to 8 units). (Formerly numbered Anatomy 501.) Prerequisite: consent of instructor. Enrollment in UCLA graduate anatomy department, and student's academic program. Review of current literature emphasizing early development and evolution of immune competence. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). (Formerly numbered Anatomy 596.)

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). (Formerly numbered Anatomy 597.)

598. Thesis Research for M.S. Candidates (2 to 12 units). (Formerly numbered Anatomy 598.)

599. Dissertation Research for Ph.D. Candidates (2 to 12 units). (Formerly numbered Anatomy 599.)

### Medical History Division

**Professor**

Ynez V. O'Neill, Ph.D., in Residence

**Associate Professor**

Robert G. Frank, Jr., Ph.D., Division Chief

### Upper Division Courses

**107A-107B. Historical Development of Medical Sciences.** (Formerly numbered Anatomy/Medical History 107A-107B.) Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. 107A. Contributions of medicine and medical personalities from earliest times through 1650. 107B. Subject in the period from 1650 through the 19th century. Lectured classes, class discussion, and required readings from selected texts. P/NP or letter grading.

**M108A-M108B. History of Biological Sciences.** (Formerly numbered Anatomy/Medical History M108A-M108B.) (Same as History M195F-M195G.) Lecture, three hours. M108A. Biological Sciences from Ancient Times to the Early 19th Century; M108B. Biological Sciences from the Early 19th Century to the Mid-20th Century. 120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions. (Formerly numbered Anatomy/Medical History 120.) Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

**135. Popular Beliefs and Medicine.** (Formerly numbered Anatomy/Medical History 135.) Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

### Graduate Courses

**240A-240B. History of Medical Sciences (2 units each).** (Formerly numbered Anatomy/Medical History 240A-240B.) Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present.

**246. Survey of History of Neuroscience: Its Impact on Psychology and Medicine (2 to 4 units).** (Formerly numbered Anatomy/Medical History 246.) Lecture, discussion, two hours. Development of experimental neuroscience from ancient concepts of nervous system through medieval, Renaissance, and Enlightenment eras to mid-20th century. Emphasis on landmarks in history of human brain and behavior demonstrating multidisciplinary approaches to contemporary social contexts.

**250. History of Medical Psychology (2 units).** (Formerly numbered Anatomy/Medical History 250.) Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

**596. Directed Individual Studies in Medical History (2 to 12 units).** (Formerly numbered Anatomy/ Medical History 596.) Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

### Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

Undergraduate Study

Bachelor of Science Degree

Preparation for the Major

Life Sciences Core Curriculum

Required (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.5 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, students are encouraged to select courses that complement the major; Psychology 10 is recommended as a social sciences elective. They are also encouraged to take a statistics course (e.g., Psychology 41, Statistics 50, or approved lower or upper division equivalent).

Transfer Students

In order to be admitted as neuroscience majors, transfer students with 80 or more units should complete the following courses prior to admission to UCLA: one year of general biology with laboratory; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

The Major

The following courses are required for the neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 2: Three four-unit area electives as follows:

Area 2B: One systems and integrative neuroscience course from Biology 166, 167, M173, Computer Science M196B, Neuroscience M102, M119N, M130, M132, M174, 197B, Psychology 121B, 125, 138, 142, 143, 144, 145, Psychology 119F.

Area 2C: One molecular, cell, and developmental neuroscience course from Biology 153, M158, Chemistry and Biochemistry 132C, 153C, Molecular, Cell, and Developmental Biology 100 or C139, 138, CM156, C174A through C174F (two units each), M185A, CM185B,
Neuroscience 151, 197C, Physiological Science 147.

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms in the same laboratory; one term applies toward Group 3 and one toward Group 4) or 199HA and 199HB (both terms in the same laboratory; one term applies toward Group 3 and one toward Group 4).

Group 4: Three additional elective courses from the Group 2 or 3 list or Neuroscience 191.

Molecular, Cell, and Developmental Biology 171 or Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted.

No more than eight courses may be from any one department. A maximum of eight units of Neuroscience 191, 199, or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Honors Program

The honors program provides exceptional neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office, 73-364 Brain Research Institute. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Neuroscience

See the Neuroscience interdepartmental graduate program for the graduate course offerings.

Lower Division Courses

88A-88Z. Lower Division Seminars. Seminar, three hours. Limited to freshmen/sophomores. Seminars on current topics in neuroscience.

Upper Division Courses

M101A-M101B-M101C. Neuroscience: From Molecules to Mind (5 units each). (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

M101A. Cellular and Systems Neuroscience. Requi-
sites: Chemistry 132A, Life Sciences 2, Physics 6B or 6C. Not open for credit to students with credit for Psychological Science M191, and Psychology M171U. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M101A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M101A. Cellu-
lar neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory sys-
tems and motor system; how assemblies of neurons process complex information and control movement.

M101B. Molecular and Developmental Neuroscience. Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M171A) or Mo-
olecular, Cell, and Developmental Biology 171 or Phys-
iological Science 111A or Psychology 115. Life Sciences 3, 4. Molecular biology of channels and re-
ceptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of su-
pramolecular mechanisms: synaptic transmission, ax-
onal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in development.

M101C. Behavioral and Cognitive Neuroscience. Requisite: course M101B (or Molecular, Cell, and Developmental Biology M175B or Psychological Science M180B or Psychology M171B) or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. Neural mecha-
nisms underlying motivation, learning, and cogni-
tion.

101L. Neuroscience Laboratory. Lecture, one hour; laboratory, three hours. Requisites: courses M101A-M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuro-
sceince. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experi-
ence with important methodologies and experimental approaches in neuroscience.

M102. Introduction to Functional Anatomy of Central Nervous System. (Formerly numbered M132.) (Same as Psychology M117K.) Lecture, two hours; laboratory, two hours. Requisite: Life Sci-
ences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cogni-
tive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

103. Neuroscience for Physicists, Mathemati-
cians, and Engineers. Lecture, three hours. Intro-
duction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

M119L. Human Neuropsychology. (Same as Psych-

M119N. The Visual System. (Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Bi-
ology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

M130. Biological Bases of Psychiatric Disor-
ers. (Same as Molecular, Cell, and Developmental Biology M191, Physiological Science M181, Psychi-
atri M191, and Psychology M191.) Requisites: course M101A or Molecular, Cell, and Developmental Bi-
ology 171 or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disor-
ders, obsessive-compulsive disorder, eating disor-
ders. Provides basic understanding of brain dysfunc-
tions that contribute to disorders and rationales for pharmacological treatments.

151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disorders (Formerly numbered 197.) Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to under-
stand more about role of genes in normal develop-
ment of brain and in disease. Required student partic-
ipation in discussions.

M174. Biomedical Systems/Biocybernetics Re-
search Laboratory. (Same as Computer Science CM174.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: Computer Sci-
ence M196B. Special laboratory techniques and ex-
perience in biocybernetics research. Laboratory in-
stitutions, computer use, design, and use of simulation in research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Com-
prehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls.

191. Proseminar: Neuroscience. (Formerly num-

194. Independent Study of Neuroscience Litera-
ture (2 units). Library research, six hours minimum. Requisite: course M101B. Directed independent li-
brary research with a faculty member. Written pro-
posal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

196H. Honors in Neuroscience. Lecture, one hour; discussion, two hours. Preparation: one statistics course (Psychology 41, Statistics 50, etc.). Neuro-
sceince honors program standing. Instruction in prin-
ciples of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual re-
search. May not be applied toward elective require-
ments for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA/199HB.

197A-197B-197C. Special Topics in Neuro-
sceince. (Formerly numbered 197A-197Z.) Lecture, three hours. Requisites: courses M101A-M101B-
M101C. Topics on one or more aspects of neuro-
sceince. May be applied toward group 2 in only one area (2A, 2B, 2C), depending on topic. Consult Schedule of Classes for applicability.

199. Independent Research in Neuroscience. Lab-
oratory, 12 hours minimum. Requisites: course M101A, senior standing or junior standing with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

199HA. Honors Thesis in Neuroscience. Lab-
oratory, 12 hours minimum. Requisites: course M101A, neuroscience honors program standing. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on comple-
tion of course 199HB).
Course List

Biology
129. Animal Behavior
132. Field Behavioral Ecology
153. Cellular Physiology: Functional Histology
M158. Cell Biology
168. Animal Physiology
167. Regulatory Physiology
M173. Anatomy and Physiology of Sense Organs

Chemistry and Biochemistry
132C. Organic Chemistry
153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation

Computer Science
M196B. Modeling and Simulation of Biological Systems

Molecular, Cell, and Developmental Biology
109. Introduction to Cell Biology
138. Developmental Biology
C139. Molecular Cell Biology
CM156. Human Genetics
C174A-C174F. Advanced Topics in Cell and Molecular Biology
M185A. Immunology
CM185B. Intermediate Immunology

Physiological Science
111B. Foundations in Physiological Science
C125. Comparative Endocrinology: Molecular to Behavioral
138. Neuromuscular Physiology and Adaptation
C143. Neuroromotor Control of Posture and Movement
C144. Neural Control of Physiological Systems
C145. Neural Mechanisms Controlling Movement
147. Neurobiology of Learning and Memory

Psychology
110. Fundamentals of Learning
112A. Basic Processes of Motivated Behavior
118. Comparative Psychobiology
119A. Neuropsychopharmacology
119B. Human Neurophysiology
119D. Behavioral Pharmacology
119E. Stress and Bodily Disease
119F. Neuron Circuitry and Behavior
119G. Psychobiology of Pain and Pain Inhibition
M119J. Ethology: Physiology of Behavior and Learning in Animals
119M. Physiological Psychology of Learning
120. Cognitive Psychology
124A. Sensation and Perception
186A. Cognitive Science Laboratory: Introduction to Theory and Simulation
186B. Cognitive Science Laboratory: Neural Networks

**Scope and Objectives**

The goal of the interdepartmental graduate Neuroscience Program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organization of nervous systems; intercellular and intracellular communication, including the cellular and molecular basis of neurotransmitter production and reception; development, including the molecular and cellular basis of trophic interactions; behavior; cognition; and the neurobiological and molecular bases of neurological and neuropsychiatric disorders.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

**Master’s Degree**

None.

**Doctoral Degree**

Admission Successful applicants must satisfy the University minimum requirements. In addition, Graduating Record Examination (GRE) or Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus and at least one year each of general chemistry, organic chemistry, physics, and basic biology. Three letters of recommendation are required.

**Major Fields or Subdisciplines**

Molecular, cellular, systems, behavioral, clinical neuroscience.

**Course Requirements**

Each first-year student takes a five-course sequence (Neuroscience M201, M202, M203, M204, M205) and participates in at least two laboratory rotations. Each student also attends a “Meet the Professors” presentation series and enrolls in a three-quarter seminar series, Neuroscience 210A-210B-210C.

Each second-year student takes at least one quarter of biomathematics (either Biomathematics 170A, 170B, or Psychology 250A), as well as three courses from a menu of advanced neuroscience courses. In the second or third year, each student takes an additional three quarters of the seminar series Neuroscience 211A-211B-211C.

**Written and Oral Qualifying Examinations**

A written qualifying examination is required following completion of the core requirements, generally by the end of the second year. The objective of this examination is to test basic knowledge and ability to relate knowledge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

After passing the written qualifying examination, each student, in consultation with the advisor, chooses the doctoral committee to administer the University Oral Qualifying Examination.

**Neuroscience**

**Graduate Courses**

**M201. Neuroanatomy: Structure and Function of Nervous System.** (Same as Neurobiology M202.) Lecture, three hours; laboratory, three hours. Prerequisites: Biology 166 or Molecular, Cell, and Developmental Biology 171. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

**M202. Cellular Neurophysiology.** (Same as Physiology Science M202.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 166 or Molecular, Cell, and Developmental Biology 171, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

**M203. Molecular Neurobiology.** (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurobiology for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Neurobiology M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: courses M201, M202, and M203, or Biomedical Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptic structural and functional changes, plasticity, regeneration, and aging.

**M205. Behavioral and Systems Neuroscience.** (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: courses M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**211A-211B-211C. Evaluation of Research Literature in Neuroscience (2 units each).** Prerequisites: courses M201, M202, M203, M204, and M205, or consent of instructor. Advanced critical analysis of current research in neuroscience. S/U grading.

**215. Seminar: Neuroscience (2 units).** Topics of current importance presented for discussion. S/U grading.

**M230. Molecular and Cellular Mechanisms of Neuromuscular and Neuromotor Function.** (Same as Physiology Science M210, and Physiology M215.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Prerequisite: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M233. Mechanisms and Relief of Pain (2 units).** (Same as Oral Biology M204.) Advanced treatment of neurobiological, neurochemical, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmaceutical basis for treatment of pain disorders.

**M240. Cellular and Molecular Neurochemistry.** (Same as Biological Chemistry M221, Neurobiology M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry, Contemporary neurochemistry topic—metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters, Inborn errors and molecular genetics, molecular imaging, aging, and regeneration, Receptor/effector coupling. S/U or letter grading.

**M244. Cell and Tissue Neurobiology.** (Same as Neurobiology M209B.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Examination of normal structure of neurons, glia, and meninges.

**M246. Neuroactive Peptides: Molecular Biology to Function (2 units).** (Same as Medicine M235 and Neurobiology M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**M247. Neural Control of Cardiopulmonary Function.** (Same as Physiological Science M247.) Lecture, two hours; discussion, three hours. Prerequisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor output, and (3) responses to changes in behavioral state orafferent signals. Emphasis on critical reading of literature.

**254. Interdisciplinary Research Seminar (2 units).** Lectures and discussions on many interdisciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecturer; new information in depth from students in fields closely related to subject discussed. S/U grading.
M255. Functional Organization of Behavior (2 units). (Same as Psychiatry M255.) Prerequisite: consent of instructor. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

257. Structure and Function of Limbic System (2 units). Prerequisite: consent of instructor. Current knowledge of mammalian limbic system presented by surveying historical material. Physiology, anatomy, behavior, and system function. S/U or letter grading.

M258. Functional Neuropsychology. (Same as Psychiatry M258.) Lecture, three hours. Preparation: basic neuroscience background. Designed for graduate students. Introduction to architecture and connections of primate brain, effects of focal lesions on cognition, physiological signs of synaptic activation underlying cognition (including ERPs, unit-activity, and metabolic measures), and functional neural models for cognition. S/U or letter grading.

M259. Neurobiology of Sleep (3 units). (Same as Psychiatry M249 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

M260. Neuromuscular Factors in Movement Regulation. (Same as Physiological Science M260.) Prerequisite: Physiological Science 138 or consent of instructor. Introduction of neural and muscular factors in regulation of muscle fiber properties and importance of this regulation in neural strategies of movement regulation. S/U or letter grading.

M261. Neuronal Circuit Analysis (2 units). (Same as Neurobiology M261.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

M262. Neural Systems for Motor Control. (Same as Physiological Science M240.) Prerequisite: Physiological Science C143 or consent of instructor. Advanced topics on neural and muscular factors for control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

M263. Neuronal Mechanisms Controlling Rhythmic Movements. (Same as Physiological Science M263.) Prerequisite: Physiological Science C145 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

M265A-M265B-M265C. Seminars: Neural Control of Movement (2 to 4 units each). (Same as Physiological Science M294A-M294B-M294C.) Prerequisite: course M247 or M262 or M263 or consent of instructor. Selected topics on neural mechanisms of movement behavior. Students required to present two-hour seminar.

M266A-M266B-M266C. Seminars: Cellular Neurosciences (2 to 4 units each). (Same as Physiological Science M252A-M252B-M252C.) Prerequisite: consent of instructor. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

271. Neurobiology of Disease (2 units). Analysis of clinical neurological and psychiatric disorders from perspective of basic neuroscience.

M272. Neuroimaging and Brain Mapping. (Same as Physiological Science M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Prerequisites: courses M201, M202. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

M273. Neural Basis of Memory. (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurochemical data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

274. Computational Neuroscience. Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neural, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

275. Advanced Techniques in Neuroscience (2 units). Lecture, one hour; laboratory, one hour. Prerequisites: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neuroscience research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.

495. Methods in Neuroscience Public Education (2 units). Seminar, one hour; fieldwork, six hours. Designed for upper division undergraduates and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor.

599. Dissertation Research for Ph.D. Candidates (4 to 12 units). Designed for students requiring special instruction or time to work on dissertation.

Adeline M. Nyamathi, R.N., Ph.D., F.A.A.N., Associate Dean for Academic Affairs
Geraldine V. Padilla, Ph.D., Associate Dean for Research

Professors
Betsy L. Chase, R.N., D.N.Sc., F.A.A.N.
Marie J. Cowan, R.N., Ph.D., F.A.A.N., Dean

Scope and Objectives
The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the Announcement of the UCLA School of Nursing by writing to the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

History and Accreditation
In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for
the development of an undergraduate basic program in nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

Undergraduate Study

**Bachelor of Science Degree**

*Note: Admission to the undergraduate program is suspended for the 1997-98 academic year.*

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers. Credit by examination is available to qualified students on review of previous education.

**Admission**

The School of Nursing strives to attain a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on scholarship, diverse life experiences, and disadvantage. Students must have completed a minimum of 84 quarter units, with grades of C or better in requisite courses and an overall grade-point average of 2.8 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of potential in nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In addition to the regular UC Application for Undergraduate Admission and Scholarships which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

Students can find a discussion of the prenursing curriculum and prehealth advising in Preparing for a Professional School in the College of Letters and Science section of this catalog.

**Degree Requirements**

The Bachelor of Science degree is granted on fulfillment of the following requirements:

1. Students must complete 44 required courses (191 quarter units; unit value of courses ranges from two to eight units) of college work and satisfy the general University requirements.

2. Of the required 44 courses, at least 20 courses must be in general education, including the courses listed under the Prenursing Curriculum in the College of Letters and Science section.

3. Students must complete at least 24 courses (107 quarter units) of upper division coursework toward the degree, including Nursing 101, 104A, 104B, 105, 109, M115, 120A through 120E, 120G, 184, 190C, 190F, 192, 193, 195, four electives, Biostatistics 100A, Epidemiology 100.

4. Students must maintain an overall grade-point average of C (2.0) or better in all courses taken in the School of Nursing.

5. Students must complete all required nursing courses in the school and receive grades of C or better in the following courses: Nursing 101, 105, 109, M115, 120A through 120E, 120G, 190C, 190F.

6. Students must be enrolled in the School of Nursing during their final three terms in residence; the last nine courses must be completed while so enrolled.

**Study Lists**

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

**Honors**

**Dean’s Honors**

Dean’s Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible students must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

**Honors at Graduation**

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: summa cum laude, an overall average of 3.821; magna cum laude, 3.719; cum laude, 3.549. To be eligible students must have completed at least 98 University of California units for a letter grade. See the quarterly Schedule of Classes for the most current calculations of Latin honors.

**School of Nursing Faculty Award**

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor’s and the master’s program with the highest grade-point average in all nursing courses. See the quarterly Schedule of Classes for the most current calculations of Latin honors.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdent.uc.edu.

**Master’s Degree**

**Admission**

The following is required of applicants to the Master of Science in Nursing program:

1. Either graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division, or graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. If admitted under the latter, applicants may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

2. Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

3. An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A must be completed before entering the school.

4. An upper division nursing research course, taken at a National League for Nursing-accredited institution and equivalent to Nursing 193, must be completed before entering the school.

5. An upper division physical assessment course, taken at a National League for Nursing-accredited institution and equivalent to Nursing 192, must be completed before entering the
school (not required of students selecting the nursing administration specialty).

(6) Professional and/or academic competence in nursing attested through three letters of re-
commendation.

(7) A satisfactory scholarship record.

(8) Since written and verbal communication skills are basic to the practice of nursing, it is essen-
tial that applicants read, write, and speak English well. International applicants from a coun-
try in which English is not the first lan-
guage and medium of instruction, whether a li-
censed registered nurse in the U.S. or not, are re-
quired to pass the Test of English as a For-

guage (TOEFL) with a score of 550 or higher.

(9) All international applicants who are not li-
censed registered nurses in the U.S. prior to con-
sideration for admission, are required to pass the Commission on Graduates of Foreign 

Nursing Schools (CGFNS) examination.

Prospective students interested in the Master of Science in Nursing program must file two appli-
cations: (1) Application for Graduate Admis-
sion and (2) Application for Admission to the 

School of Nursing. Both applications may be 
obtained from the Student Affairs Office. The 
application deadline for priority consideration is 
December 15; February 1 is the final deadline.

M.B.A./M.S.N. Concurrent Degree Program

The School of Nursing and the John E. Ande-

son Graduate School of Management offer a con-
current degree program designed for stu-
dents interested in employment in all sectors of 
the health care delivery system, including hos-
pitals, corporate health care headquarters, 
home health care agencies, and long-term care 
facilities, as well as policy-making bodies and 
consulting firms. Applicants must request appli-
cation materials from both the M.B.A. Admis-
sion Office, John E. Anderson Graduate 

School of Management, and the School of 
Nursing Student Affairs Office.

Areas of Study

The School of Nursing offers graduate studies in the following areas:

(1) Acute care.

(2) Administration: nursing administration.

(3) Chronic care: gerontology/chronic care, on-
cology.

(4) Primary care: family, nurse-midwifery, occu-
pational health, pediatric.

Students in the acute, family, gerontology/ 
chronic care, and oncology nurse practitioner 
specialties may choose the neuropsychiatric 
subspecialty. All students may choose to add 
preparation in consultation, education, or man-
egement to their clinical requirement.

Course Requirements

A minimum of three core courses (eight to nine 
units) and additional coursework in the 100, 
200, and 400 series are required for each area
of clinical specialization. A total of four units of 
500-series courses may be applied toward the 
total course requirement for the degree.

A minimum grade-point average of 3.0 is re-
quired. Grades of B are required in graduate 
clinical nursing courses in order to advance to 
the next clinical course in a series. A minimum 
of three quarters of full-time enrollment (eight 
units per quarter) is required for academic resi-
dence.

Core Requirements

Core Courses. Nursing 204, 220, and 264 (stu-
dents in nurse-midwifery take Nursing 236). Ad-
ditional core courses for all options except nurs-
ing administration: Nursing 200A, 200B, 225, 
230 (Nursing 200A, 200B, and 230 are not re-
quired for nurse-midwifery).

Clinical Specialty Theory Courses. Nursing 
Course requirements vary for each specialty area; not all courses are required in each speci-
ality.

Advanced Practice Theory Courses. Nursing 
238A, 238B, 238C, 239A, 239B, 239C.

Clinical Practicum/Residency Courses. Nurs-
ing 418A through 418D, 437A through 437F, 
438A through 438D, 439A through 439D.

Specialty Requirements

Additional course requirements vary according to specialty area selected:

Acute Care Specialty. The goal of the acute care specialty is to prepare nurses to assume 
an advanced practice role as a clinical nurse 
specialist or a nurse practitioner in acute care 
nursing. At least two years of prior experience 
in acute care nursing are highly recommended.

Graduates are expected to function as acute 
care clinicians, educators, consultants, or re-
searchers and to become leaders in a variety of 
inpatient and outpatient health care settings.
Required courses include Nursing 200A, 200B, 
204, 216F, 217F, 220, 230, 239A, 239B, 239C, 
264, 439A, 439B, 439C, and four units of theory 
elective. Additional required courses for the 
acute care nurse practitioner include Nursing 
225, 439D.

Family Specialty. The family specialty prepares 
family nurse practitioners to provide primary 
health care for individuals throughout the life 
span. The focus is on collaborative, interdiscipli-

nary practice to assure comprehensive quality 
health care and health maintenance in outpa-
tient, work site, home health, nursing home, 
and hospital settings. Emphasis is on the as-
sessment, treatment, and evaluation of the cli-
ent's responses to actual or potential health 
problems which may be chronic or acute and 
include primary prevention and health promo-
tion. Required courses include Nursing 200A, 
200B, 204, 210F, 211F, 220, 225, 230, 239A, 
239B, 239C, 254, 439A, 439B, 439C, 439D, 
and four units of theory elective. An elective ex-
perience in the clinical nurse specialist role is 
also available.

Gerontology/Chronic Care Specialty. The ger-
ontology/chronic care specialty prepares ad-
vanced practice nurses to meet the increased 
demands for leadership in health care for older 
persons, particularly those challenged by 
chronic illness. Emphasis is on the comprehen-

sive assessment, treatment, and evaluation of 
the client and family. Advanced knowledge and 
skills in pathophysiology and psychosocial con-
cepts guide theory-based practice, with the 
goal of optimizing functional status. Interdiscipli-
nary collaboration and care management are 
emphasized. Required courses include Nursing 
200A, 200B, 204, 220, 225, 230, 232F, 233F, 
239A, 239B, 239C, 264, 439A, 439B, 439C, 
439D, and four units of theory elective. An elec-
tive experience in the clinical nurse specialist 
role is also available.

Neuropsychiatric Subspecialty. The neuropsy-
chiatric subspecialty prepares nurses to as-
mune an advanced practice role as a nurse 
practitioner in community and inpatient set-
tings. The focus is on the primary care of 
adults with chronic cognitive, addictive, and 
af
dective dysfunctions. Students select both a 
specialty (acute care, family, gerontology/ 
chronic care or oncology nurse practitioner) 
and the neuropsychiatric nurse practitioner 
subspecialty. Graduates are expected to func-
tion as clinicians, educators, case managers 
or researchers and to become leaders in a va-

riety of health care settings. Required courses 
include those listed under the acute, family, 

gerontology/chronic care or oncology nurse 
practitioner specialties and Nursing 241F, 
242F.

Nurse-Midwifery Specialty. The nurse-mid-

wifery specialty prepares certified nurse-mid-
wives to provide care to women, newborns, and 

their families. The focus is on independent and 
collaborative practice to assure comprehensive 
quality health care and health maintenance 
throughout the childbearing, interconceptional, 
perimenopausal, and newborn periods. Care is 
provided in outpatient, home, and inpatient set-
tings. Emphasis is on the assessment, diagnos-
sis, treatment, and evaluation of the client's re-
sponses to actual or potential health problems 
and includes primary prevention. Required 
courses include Nursing 204, 220, 225, 234, 
437B, 437C, 437D, 437E, 437F.

Nursing Administration Specialty. The nursing 
administration specialty focuses on organiza-
tional theory, health services and financial man-
gement, and the practice of nursing adminis-
tration within acute, ambulatory care, and/or 
community-based settings. Students gain the 
basic knowledge and skills required of nursing 
administrators in a volatile health care environ-
ment. Nursing content develops the knowledge 
of advanced management practice needed to 
plan and evaluate nursing services. Health ser-

vices and financial management content pro-

454 / Nursing
vides a framework for organizing, directing, and coordinating health care resources.

The program requires both theory and management practicums, including a 10-week administrative residency. Stipends for the residency program may be provided by the institutions in which the residency is completed. Individualized plans for practicums are available. Coursework includes courses taken in the School of Nursing, School of Public Health, and the John E. Anderson Graduate School of Management. Required courses include Nursing 204, 218A, 218B, 219A, 219B, 220, 264, 418A, 418B, 418C, 418D, and a minimum of 16 units of theory electives including a course in organizational theory and human resource management.

**Occupational Health Specialty.** The occupational health specialty integrates principles of occupational health assessment and care with primary ambulatory care of the adult. Practitioners evaluate the individual as seen within the work setting as well as within the family group. Primary focus and emphasis are on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers. Requirements are met through a combination of courses and experiences specific to the delivery of occupational health care services. Required courses include Nursing 200A, 200B, 204, 210F, 211F, 213, 220, 225, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, 439D, Environmental Health Sciences 250, 251, and Epidemiology 100 or equivalent. An elective experience in the clinical nurse specialist role is also available.

**Oncology Specialty.** The oncology nursing specialty is designed to train advanced practice nurses to provide leadership in the field of oncology nursing. This option includes a focus on nursing care of critically and chronically ill people with cancer and their families in a variety of settings and across the health-illness continuum (prevention, diagnosis, treatment, rehabilitation, palliative care). The student is given intensive individualized preparation in either the role of nurse practitioner or clinical nurse specialist. Required courses include Nursing 200A, 200B, 204, 214F, 215F, 220, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, and four units of theory elective. Additional courses for the oncology nurse practitioner include Nursing 225, 439D.

**Pediatric Specialty.** This specialty prepares pediatric nurse practitioners to assume leadership roles in the health care of children. Emphasis is on the assessment, diagnosis, treatment, and evaluation of children’s actual or potential health problems. Content stresses care for acute and chronic illnesses as well as primary prevention. Required courses include Nursing 200A, 200B, 204, 212, 220, 223, 225, 230, 238A, 238B, 238C, 264, 438A, 438B, 438C, 438D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

### Comprehensive Examination Plan

The comprehensive examination is given in written form during the Spring Quarter. Students are eligible to take the examination once they are advanced to candidacy and may repeat the examination twice. Retakes only are offered during Summer and Winter quarters. Students must complete all requirements for the degree within one calendar year after advancement to candidacy.

### Thesis Plan

None.

### Doctoral Degree

#### Admission

Priority for admission to the Doctor of Philosophy (Ph.D.) program is given to graduates of accredited master’s degree programs in nursing. Those admitted to doctoral study with a bachelor’s degree in nursing and a master’s degree in a non-nursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master’s advanced practice programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted with a bachelor’s degree in nursing are required to complete a program of master’s courses in nursing at UCLA as a prerequisite to entry into doctoral courses.

Applicants to the Doctor of Philosophy degree must provide evidence of the following:

1. A master’s degree in nursing; a Bachelor of Science degree in Nursing and a master’s degree in a non-nursing field; or a Bachelor of Science degree in Nursing. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and the Graduate Division. Students who are accepted with deficiencies are required to complete appropriate master’s courses.

2. A scholarship record satisfactory to the Graduate Division and to the School of Nursing is required, with a minimum grade-point average of 3.5.

3. A combined verbal, quantitative, and analytical score of 1,500 on the Graduate Record Examination (GRE) within the past five years. Exceptions to this score may be considered when there is compelling evidence in other areas.

4. An upper division statistics course with content equivalent to Biostatistics 100A, 100D, or Biomathematics 170A.

5. A graduate-level nursing research course with content equivalent to Nursing 205.

6. A four-unit graduate-level nursing theory development course.

7. A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) is required of applicants from countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission).

8. A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination, which must be submitted by international applicants who are not licensed as a registered nurse in the U.S., prior to consideration for admission.

9. Status as a licensed registered nurse; evidence of current licensure as a registered nurse in the State of California is mandatory.

10. Four letters of reference affirming the applicant’s potential for scholarly, investigative, and creative endeavors in nursing.

11. Examples of scholarly papers and/or creative works.

12. A statement of educational objectives, specific focus of research, and program and career goals.

13. Curriculum vitae.

Prospective students interested in the Doctor of Philosophy program must file two applications:

1. Application for Graduate Admission and (2) Application for Admission to the School of Nursing. Both applications may be obtained from the UCLA School of Nursing. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

#### Major Fields or Subdisciplines

In the doctoral program, students focus their study in one of two areas: biobehavioral research or health systems research.

Students who choose biobehavioral research focus on studies that describe, explain, and predict biologic and behavioral factors which relate to health promotion and disease prevention. Students who choose health systems research focus on studies that examine the function, structure, process, and outcome of a range of multidisciplinary health delivery systems such as hospitals, nursing homes, and community-based organizations. Both research areas incorporate human diversity and the influence of the psychosocial and physical environments.

#### Course Requirements

**Core Requirements.** The following courses are required of all students in the Doctor of Philosophy program.

1. Nursing science: Nursing 202, 206A-206B.
2. Nursing research: Nursing 207, 208, 299A, 299B-299C, 299D.
3. One statistics sequence: Biostatistics 251, or Psychology 252A and 253, or Sociology 210A-210B, or equivalent, subject to approval of the faculty adviser and doctoral program committee chair.

**Cognate Requirements.** Twenty-four units of courses in the major area of study (biobehavioral, health systems). A minimum of four units and a maximum of 12 units are taken in nurs-
108. Human Sexuality. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Lectures, discussions, and case presentations considering human sexuality. Joy and pleasures, pitfalls and problems. Interdisciplinary approach encompassing anatomic, psychologic, and social aspects of heterosexual and homosexual relationships, including development of gender identity, intercourse, pregnancy, abortion, contraception, and venereal disease.

190A. Advanced Child and Family Nursing (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the child and its family. Theoretical content integrates concepts related to management of pediatric client care in acute and ambulatory settings. Application of theoretical concepts of growth and development of the child and family.

190B. Advanced Maternity Nursing (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the childbearing family. Theoretical content further refines theories, concepts, and nursing skills related to the childbearing family. Application of theoretical concepts of reproduction to nursing care of the family.

190C. Critical Care Nursing across Life Span (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the critical care setting. Theoretical content includes pathophysiology, pharmacology, advanced nursing skills, and treatment modalities in selected clinical situations. Application of theoretical content related to nursing care of the acutely ill medical and surgical pediatric or adult patient in emergent and critical phases of illness.

190D. Perioperative Nursing (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing care of the patient undergoing surgical intervention. Application of theoretical content related to nursing care of the perioperative patient.

190E. Advanced Psychiatric/Mental Health Nursing (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the operating room setting. Theoretical content further refines theories, concepts, and practice of perioperative nursing. Application of theoretical content related to nursing care of the patient undergoing surgical intervention.

190F. Community Health Nursing (7 units). Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in community health nursing settings: home health, public health, occupational health, and schools. Theoretical content focuses on the community as a context for understanding the relationships between health status of individuals and groups with the psychophysical environment.

192. Physical Assessment. Lecture, three hours; laboratory, three hours. Prerequisites: courses 101, 105, 109. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and the required text are mandatory.

193. Introduction to Research. Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collecting instrument, planning a data analysis, protection of human rights, reading research reports, and writing a research proposal.
195. Nursing Management (3 units). Lecture, two hours; field study, three hours. Corequisite: one course in nursing research. Application of basic knowledge of management theory to applied nursing practice. Acquisition of basic knowledge of management theory and skills as practiced in a health care setting.

196. Issues in Providing Health Care to Culturally Diverse Populations. Lecture, three hours; discussion, one hour. Prerequisite for non-nursing students: consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings.

199. Special Studies in Nursing (2 to 16 units). Prerequisites: senior standing and/or consent of instructor. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

Graduate Courses

201. Health-Related Quality of Life (2 units). Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. 202. Philosophical Foundations of Science of Nursing. Prerequisite: doctoral standing or consent of instructor. Designed to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice.

203. History of Nursing Thought (2 units). (Not the same as course 203 prior to Winter Quarter 1995.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: one statistics course. Research process and critique of research, with emphasis on qualitative research designs. Consideration of strengths and weaknesses of selected survey, quasi-experimental and true experimental designs, theoretical frameworks, identification and control of variables, measurement instruments, sampling methods, data analysis, and interpretation of results.

205. Advanced Research Methods. (Not the same as course 205A prior to Fall Quarter 1994.) Prerequisites: courses 193, 204, or equivalent, one statistics course. Research process and development of research proposals, including quantitative and qualitative approach to designs. Students encouraged to develop research proposal for clinical or basic research project. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

206A-206B. Nursing Theory Development. Lecture/seminar, three hours. Requisites: course 202 or philosophy of science course (may be taken concurrently), four units of nursing theory. Focus on major issues in development of nursing knowledge, including content and methods of developing nursing theory. In Progress grading.

207. Research in Nursing: Measurement of Clinical Variables. Lecture, two hours; discussion, two hours. Requisites: courses 204, 205. Analysis of methods of measurement of physiological and psychosocial variables relevant to clinical nursing research, with emphasis on purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of reliability, validity, sensitivity of measurement instruments.

208. Research in Nursing: Measurement of Outcomes. Discussion, three hours; field application, six to eight weeks. Prerequisites: courses 204A, 207. Measurement theories, including topics related to scaling and tool development as they apply to outcomes. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project.

209. Human Diversity in Health and Illness (2 units). (Not the same as course 209A prior to Winter Quarter 1995.) Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual basis and methods in clinical practice, research, teaching, and administration.

210. Theoretical Foundations of Family Nursing (2 units). (Not the same as course 210 prior to Fall Quarter 1994.) Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problems of ambulatory populations.

210F. Theoretical Foundations of Family Nursing. Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problems of ambulatory populations.

211. Theoretical Foundations of Family Nursing (2 units). (Not the same as course 211 prior to Fall Quarter 1994.) Prerequisite: course 210. Continuation of course 210.

211F. Theoretical Foundations of Family Nursing. Lecture, three hours; selected field experiences. Prerequisite: course 210F. Continuation of course 210F.

212. Health-Related Family Theory (2 units). (Not the same as course 212 prior to Winter Quarter 1995.) Lecture, three hours; field study, three hours (six weeks). Current environmental and system theories and concepts in occupational health, presented within a nursing framework. Analysis of elements of worksite health programs and discussion of nursing's leadership role in ensuring a safe and healthful workplace.

213. Theoretical Foundations of Occupational Health Nursing. Lecture, three hours; field study, three hours (six weeks). Current environmental and system theories and concepts in occupational health, presented within a nursing framework. Analysis of elements of worksite health programs and discussion of nursing's leadership role in ensuring a safe and healthful workplace.

214. Human Responses to Cancer (2 units). (Not the same as course 214 prior to Fall Quarter 1994.) Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment.

214F. Human Responses to Cancer. Lecture, three hours; selected field experiences. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment.

215. Human Responses to Cancer (2 units). (Not the same as course 215 prior to Fall Quarter 1994.) Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers.

215F. Human Responses to Cancer. Lecture, three hours; selected field experiences. Prerequisite: course 214F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers.

216F. Human Responses to Critical Illness. Lecture, three hours; discussion, one hour. Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses.

217. Human Responses to Critical Illness (2 units). (Not the same as course 217 prior to Fall Quarter 1994.) Prerequisite: course 216. Builds on pathophysiological concepts and nursing management of critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses.

217F. Human Responses to Critical Illness. Lecture, three hours; discussion, one hour. Prerequisite: course 216F. Builds on pathophysiological concepts and nursing management of critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses.

218A. Nursing Administration Theory. Prerequisite: one organizational theory course. Application of organizational, communication, leadership, and management theories in health care systems, including content related to organizational structure, health care delivery models, and research design and methodologies.

218B. Nursing Administration Theory. Prerequisites: course 218A, one human resource management course, one finance course. Synthesis of organizational and management theories in relation to health economics and finance, quality of care, resource management, informatics, law, policy, and ethics.

218C. Nursing Administration Theory. Prerequisite: course 218B or consent of instructor. Theories related to organizational development and change, political action, marketing, and public relations and the media, including ethics of decision making and local, national, and international markets.

219A. Essentials of Accounting and Budgeting in Health Care Organizations. (Not the same as course 219 prior to Winter Quarter 1995.) Prerequisites: graduate standing or consent of instructor. Highly desirable: functional competency in use of an electronic spreadsheet (e.g., LOTUS or EXCEL). Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on application of theory and concepts, followed by practical applications within a variety of health care settings.
219B. Operations Planning and Control for Nursing Administrators. Prerequisites: course 219A or consent of department. Use of spreadsheet/database/graphics software (e.g., LOTUS or EXCEL). Exposure to concepts, issues, and analytic techniques of C-B-A/C-E-A, CQI monitoring, decision making, forecasting, productivity determinations, and program planning and evaluation for nurse administrators. Emphasis on practical application of methods and techniques within health care arena.

220. Theories of Instruction and Learning in Nursing (2 units). (Not the same as course 220A prior to Fall Quarter 1995.) Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia.

222. Immunosuppression and Patient Care (2 units). Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on physiologic and pathophysiologic mechanisms of immunosuppression as a basis for informed use in patient education and clinical decisions, and supportive treatments and modifiers.

223. Childhood Development: Research and Application to Nursing (2 units). (Not the same as course 223 prior to Fall Quarter 1994.) Evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood.

244. Health-Related Problems of Vulnerable Populations (2 units). Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S.

225. Pharmacology for Advanced Practice Nurses. (Not the same as course 225 prior to Fall Quarter 1994.) Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions.

229. Biologic/Psychologic Interface in Health and Illness (2 units). Interaction of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of age, gender, and culture. Current research on role of certified nurse/midwife. Organizational, administrative, legal, and ethical issues as required by certifying agencies.

237A. Primary Care of Women: Antepartum Management (3 units). Prerequisite: course 234. Presen- tation of current theory and relevant research on assessment and management of women during pregnancy, with emphasis on systematic evaluation of current nursing conceptual models in independent and collaborative care of these families. Review of management of normal pregnancy and health and social complications.

237B. Primary Care of Women: Postpartum and Newborn Management (2 units). Prerequisite: course 234. Presentation of critical analysis of research and relevant research on assessment and management of women during postpartum period and infants during first month of life. Emphasis on systematic evaluation of current nursing conceptual models in independent and collaborative care of these women and their newborns.

237C. Primary Care of Women: Intrapartum Management. Prerequisite: course 234. Critical analysis of theory, research, and knowledge related to primary and independent/collaborative care of intrapartum families. Management of spontaneous and assisted deliveries, labor, and pain relief, promotion of normal processes and management of complications.

237E. Primary Care of Women: Family Planning and Gynecology Management. Prerequisite: course 234 or consent of instructor. Presentation of critical analysis and application of family planning and gynecologic theory, knowledge, and research. Emphasis on assessment and primary care strategies with reference to social, legal, and ethical issues in nurse-midwifery management of women.

238A. Theoretical Foundations of Nursing of Children: Assessment and Health Guidance. Requi- site: course 200B. Theory and research emphasis on developing a theoretical model of health status of children and families to promote child wellness and diagnosis common child- hood illnesses.

238C. Theoretical Foundations of Nursing of Children: Complex Health Problems. Prerequisite: course 238B. Advanced science base for assessment, diagnosis, and ambulatory management of complex chronic and acute childhood illnesses. The- ory and research emphasis on developing a theoretical model of complex disease entities; evaluation of alternative therapies in research literature also emphasized.

239A. Biobehavioral Foundations of Acuity and Chronicity in Illness. Requisites: courses 200A- 200B. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to respiratory, cardiovascular, gynecological, and genitourinary organ systems. First of three-course sequence in diagnosis and management of commonly occurring medical and nursing care problems managed by nurse practitioners in variety of clinical settings.

239B. Biobehavioral Foundations of Acuity and Chronicity in Illness. Requisite: course 239A. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to ocular, neu- rologic, endocrine, gastrointestinal, immunologic, hematologic, and dermatologic organ systems. Second of three-course sequence in diagnosis and management of commonly occurring medical and nursing care problems managed by nurse practitioners in variety of clinical settings.

241. Biobehavioral Foundations of Neuropsychiatric Assessment (2 units). Lecture, three hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

241F. Biobehavioral Foundations of Neuropsychiatric Assessment. Lecture, three hours; field experi- ences, one hour. Requisite: course 241A. 200A- 200B. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

242. Biobehavioral Foundations of Neuropsychiatric Nursing Care (2 units). Lecture, three hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of re- search underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. Lecture, three hours; field expe- riences, one hour. Requisite: courses 242A and behav- ioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.
264. Professional Issues in Nursing (3 units). (Not the same as course 264 prior to Fall Quarter 1994.)
Prerequisite: consent of instructor. Courses M283A or M283B. Concepts of collegial practice, interprofessional and intraprofessional relationships, legal issues, and socioeconomic aspects of health care delivery.

(Same as Anthropology M240C; Community Health Sciences M244, and Psychiatry M273C.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, illness, and health. Use of the medical practice setting as a context for analysis of selected topics in medical anthropology. Emphasis on written critical analysis and class discussion provided.

M290A-M290B-M290C. Child Abuse and Neglect (2 units, Zhunis, 1 unit). (Same as Community Health Sciences M290A, M290B, M290C, and Social Welfare M290D-M290F-M290G.) Course M290A is prerequisite to M290B, which is prerequisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Community Health Sciences, Psychiatry, Pediatrics, Medical Imaging, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M299A. Nursing Research Seminar, Seminar, three hours. Prerequisites: courses 206A-206B, 207, 208, one cognate area course. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights faculty expertise in research, culminating in communication and dissemination of their research. S/U grading.

M299B-299C. Nursing Research Seminars (1 to 4 units each). Seminar, one hour; discussion, one to four hours. Prerequisites: courses 206A-206B, 207, 208, or another cognate such as Social Welfare M290D-M290F-M290G. Seminar to assist students throughout execution of their dissertations, beginning with identification of a researchable problem and culminating in communication and dissemination of their research. S/U grading.

M299D. Nursing Research Seminar (1 to 4 units). Seminar, one hour; discussion, one to four hours. Prerequisites: courses 206A-206B, 207, 208, or another cognate such as Social Welfare M290D-M290F-M290G. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

M299M. Teaching Apprentice Practicum (1 to 4 units). Preparation and application of personnel in the roles of teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M410A. Nursing Care of Children with Developmental Disabilities. (Same as Psychiatry M472A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood years. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

M410B. Nursing Care of Children with Developmental Disabilities. (Same as Psychiatry M472B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of philosophically and conceptually complex issues affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

M410C. Nursing Care of Children with Developmental Disabilities. (Same as Psychiatry M472C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M410B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse.

M418A. Nursing Administration Practicum (2 units). Practicum, six hours. Corequisite: course 218A. Analysis, evaluation, and application of organizational theory within leadership and management roles in organizations involved with health care. Provides a practice setting to apply theory, particularly content of course 218A, under supervision of a skilled preceptor.

M418B. Nursing Administration Practicum (2 units). Practicum, six hours. Corequisite: course 218B. Synthesis and application of previous learning and organizational theories in development of organizational strategies in relation to health economics and finance, quality patient care, resource management, informatics, law, policy, and ethics. Provides a practice setting to apply theory, particularly content of course 218B, under supervision of a skilled preceptor.

M418C. Nursing Administration Practicum (2 units). Practicum, six hours. Corequisite: course 218C. Participation in and evaluation of processes of project management, organizational development and change, political influence outside the organization, maximizing diverse relationships and relationships with physicians, administrators, and boards, marketing, dealing with the media, and ethics of organizational decision making. Provides a practice setting to apply theory, particularly content of course 218C, under supervision of a skilled preceptor.

M418D. Nursing Administration Residency (10 units). Seminar, two hours; practicum, 32 hours. Prerequisite: course 418C. Students assume leadership role in planning, managing, and evaluating an administrative project, and demonstrate expertise in application and evaluation of organizational theories in multiple roles. Students also plan for future continuous personal and professional growth.

M437A. Primary Care of Women: Antepartum Clinical Management. Clinical, 11 hours; clinical conference, one hour. Corequisite: course 237A. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on contemporary concepts of pregnancy, and early detection of common risk conditions that may complicate prenatal period.

M437B. Primary Care of Women: Postpartum and Newborn Clinical Management (3 units). Clinical, examination, clinical conference, 11 hours; six weeks. Corequisite: course 237B. Application of knowledge to management of postpartum women and newborns, with emphasis on interventions to assist with breastfeeding and counseling about interconceptional family planning and prevention of complications in new-born's transition to extrauterine life.

M437C. Primary Care of Women: Intrapartum Clinical Management. Clinical, 12 hours. Corequisite: course 257C. Intrapartum management for clients through screening, assessment, diagnosis, and care that promotes health and prevents complications. Supervised experience in episiotomies and emergency situations provided.

M437D. Primary Care of Women: Intrapartum Clinical Management. Clinical, 11 hours; clinical conference, one hour. Prerequisite: course 437C. Synthesis of knowledge, concepts, and skills related to the assessment and management of intrapartal family. Special emphasis on utilization and interpretation of ultrasonography in low-risk labor and delivery and refinement of delivery skills.

M437E. Primary Care of Women: Family Planning and Gynecology Clinical Management. Clinical, 11 hours; clinical conference, one hour. Corequisite: course 437E. Primary care for gynecology, family planning, sexually transmitted diseases, and premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling in clinical experiences, case studies, and skills laboratories.

M437F. Primary Care of Women: Nurse-Midwifery Integration (8 units). Clinical, 24 hours (10 weeks) or 18 hours (8 weeks). Prerequisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the childbearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant).

M438A. Advanced Practice Nursing in Care of Children: Wellness Care (2 units). Clinical practicum, six hours. Prerequisite: course 238A. Development of expanded skills in comprehensive assessment, planning, intervention, and evaluation of care for children and families to promote child wellness. Application of theory and research in provision of wellness care throughout childhood years.

M438B. Advanced Practice Nursing in Care of Children: Management of Common Illnesses. Clinical practicum, 12 hours. Prerequisite: course 238B. Development of expanded skills in comprehensive assessment and management of common childhood illnesses and problems; students continue to gain skills in promoting child wellness. Application of theory and research in care of common illnesses throughout childhood years.

M438C. Advanced Practice Nursing in Care of Children: Management of Complex Health Problems. Clinical practicum, 12 hours. Prerequisite: course 238C. Development of expanded skills in assessment and ambulatory management of complex acute and chronic childhood illnesses. Application of theory and research in provision of care for complex acute and chronic illnesses through childhood years.

M438D. Pediatric Primary Care: Residency (9 units). Clinical practicum, 27 hours. Prerequisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Resident courses focus on the theoretical, clinical, and early detection of common risk conditions that may complicate prenatal period.

M438F. Pediatric Primary Care: Residency (9 units). Clinical practicum, 27 hours. Prerequisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Resident courses focus on the theoretical, clinical, and early detection of common risk conditions that may complicate prenatal period.

M439B. Advanced Practice Nursing: Clinical Practicum. Clinical practicum, 12 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures.

M439C. Advanced Practice Nursing: Clinical Practicum. Clinical practicum, 12 hours. Corequisite: course 239B. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-assOCIated symptoms. Special emphasis on acute and chronic problems in ambulatory and home settings. Includes review and analysis of current theories and practices.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of instructor. Opportunity for individual graduate students in nursing to pursue special studies or research interests. May be repeated for credit, but only four units may be applied toward graduate degree requirements. S/U grading.

597. Individual Study for Comprehensive Examination (4 to 8 units). May be repeated once for credit, but only four units may be applied toward M.S.N. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units). Individualized faculty supervision of doctoral dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward doctoral degree requirements. S/U grading.

**Chairs**
Alan H. DeCherney, M.D., **Executive Chair**
Teichro Fukushima, M.D., **Acting Vice Chair, King' Drew**
Howard L. Judd, M.D., **Vice Chair, Olive View-UCLA**
Lawrence Platt, M.D., **Vice Chair, Cedars-Sinai**
Michael G. Ross, M.D., **Vice Chair, Harbor-UCLA**

**Scope and Objectives**

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women’s health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Shewin J. Isenberg, M.D. (Grace and Walter Lantz Endowed Professor), Vice Chair, Harbor-UCLA
Arthur L. Rosenbaum, M.D., Vice Chair

**Scope and Objectives**

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular diseases.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Carol A. Bibb, Ph.D., D.D.S.
Christine L. Quinn, D.D.S., M.S.

**Adjunct Assistant Professor**
Diana Messadi, D.D.S., Ph.D.

**Scope and Objectives**

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.
Master's Degree

Admission
In addition to meeting the general admission requirements set by the Graduate Division, applicants to the Master of Science program must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./M.S. or advanced certificate training/M.S. by making simultaneous application for graduate study in Oral Biology and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Areas of Study
Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and development, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements
A total of 36 units is required to satisfy the degree requirements. Eight core courses (Oral Biology 201A-201B-201C, 202, 206, 260, 275, and Biomathematics 170A) are required. These should be taken during the first year of graduate study.

Additional elective courses (a minimum of five units), either at the upper division or graduate level, essential to the research area must be taken.

Eight units of courses 596 and 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
None.

Thesis Plan
The thesis is intended to demonstrate the student's ability to design and carry out a research project, and analyze and present the resulting data. Results are expected to be of publishable scientific quality. The subject of the thesis must be approved by the graduate advisor and research mentor. At the end of the first year of study, the student should prepare and send a proposal of the research project to the graduate adviser.

Doctoral Degree

Admission
In addition to meeting the general admission requirements set by the Graduate Division, applicants must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./Ph.D. or advanced residency training/Ph.D. by making simultaneous application for graduate study in Oral Biology and for admission to the School of Dentistry and to the residency programs. A separate application must be submitted to Graduate Admissions. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Major Fields or Subdisciplines
Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and development, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements
In the first two years Oral Biology 201A-201B-201C, 206, 275 and Biomathematics 170A are required. Two laboratory rotations (Oral Biology 596) and the seminar (Oral Biology 260) are also required.

In the second year, students are expected to choose an area of emphasis and continue to take additional required and elective courses (a minimum of four to five courses). A menu of the second-year curriculum in each area of emphasis is available in the program office.

Written and Oral Qualifying Examinations
By the beginning of the second year of study, the student is responsible, with the advice and consent of the graduate adviser, for organizing the guidance committee. Faculty members constituting the guidance committee include the student's research mentor and two others from the student's areas of emphasis. The guidance committee is responsible for approving the course of the student's doctoral study and conducting a review of the student's progress. The members of the guidance committee plus one more faculty member serve on the doctoral committee: three members must be from the section of Oral Biology in Dentistry and one member must be from a department outside the School of Dentistry.

After the completion of the core course requirements, a broad essay-type examination in the major areas of oral biology and cell biology is given by the graduate training committee.

Based on the result of the written qualifying examination as well as performances in coursework, recommendations are made to the student to (1) continue with the Ph.D. program requirements, (2) schedule a retake of the written qualifying examination, (3) be directed to the M.S. program, or (4) be terminated. Permission to retake the examination is granted by the graduate training committee no more than two times.

After satisfactory completion of the written qualifying examination, it is expected that the University Oral Qualifying Examination be completed, preferably by the end of the summer of the second year.

The examination consists of a proposal that outlines the dissertation research, providing a review of the literature, a statement of the aims of the research, and a description of the planned research activities. Discussion of the written proposal followed by a question and answer period on general topics related to oral biology is performed.

The guidance committee's decision to advance the student to candidacy, to allow for repeating the examination, or to disqualify from the program is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework, and the research ability as judged by an abstract of the research submitted with the proposal and the research mentor's written assessment.

Oral Biology Graduate Courses

201A-201B-201C. Advanced Oral Biology (3 units, 2 units, 3 units):

201A. Ontogenesis. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to the development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of oralficial and dental structures of humans.

201B. Homeostatis in Oral Systems. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonspecific salivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face.

201C. Pathobiology. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbiologically mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc.

202. Principles and Methods of Research. Discussion, two hours. Prerequisite: consent of instructor. Examination and discussion of various approaches to research methodology, from formation of hypotheses to experimental testing and analysis and interpretation of data. Library work to be studied from standpoint of obtaining background information and writing a paper. Hypotheses based on class members' interests to be critiqued and elaborated into research proposals. Research faculty to speak informally on their individual approaches to scientific investigation.
for the Orthopaedic Surgery

Scope and Objectives

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic

ORGANIZATIONAL STUDIES

Interdepartmental Program

College of Letters and Science

UCLA

4256 Bunche Hall
Box 951472
Los Angeles, CA 90095-1472

(310) 825-3862
http://www.sscnet.ucla.edu/polisci/

Eric H. Monkonen, Ph.D., Chair

Professors

Bryan C. Elickson, Ph.D. (Economics)

Oscar Grusky, Ph.D. (Sociology)

Eric H. Monkonen, Ph.D. (History)

Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in organizational studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

Undergraduate Study

Organizational Studies Specialization

Students may elect to combine the organizational studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in organizational studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

Preparation for the Specialization

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or 18 and 104 or equivalent.

Upper Division Requirements

Required: Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.
management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritides are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

**Orthopaedic Surgery**

**Upper Division Course**

102. Gross Anatomy of the Human Body (8 units). (Formerly numbered Anatomy 102.) Lecture, three hours; laboratory, nine hours. Prerequisites: dental or graduate student standing, consent of instructor: Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

**Graduate Courses**

205A-205B. Gross and Developmental Anatomy for Medical Students (5 units each). (Formerly numbered Anatomy 205A-205B.) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Prerequisites: medical student standing, consent of instructor for nonanatomy majors. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. 205A. Limbs, Thorax, and Abdomen (first eight weeks); 205B. Pelvis, Head, and Neck.

207. Gross and Developmental Anatomy for Graduate Students (12 units). (Formerly numbered Anatomy 207.) Lecture/laboratory, three four-hour sessions (16-week semester). Prerequisite: consent of instructor: Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck.

**Scope and Objectives**

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnets.ucla.edu.

**Master's Degree**

Admission

Students are only accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the department also awards a Master of Science degree in Experimental Pathology in cases where a student was unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

**Areas of Study**

Consult the department.

**Course Requirements**

Students must complete the core courses and the six elective units required of all experimental pathology graduate students. The minimum number of units required is 36, and the minimum number of graduate units required is 35. The maximum number of units permitted in the 500 series is eight units, and the maximum number of 500-series units that may be applied toward the graduate course requirement is four units.

Students must take the written qualifying examination. An M.S. student must answer at least two thirds of the questions on this examination and pass with a minimum grade of B. Students have the same amount of time as Ph.D. students to complete the examination.

Students must execute an original scholarly research project. This project must be approved by a committee of three faculty. Students then must write up the project as a thesis which requires approval of the same committee. The student and the faculty adviser must select two other faculty members for the committee. Members of the committee must be in the department.

**Comprehensive Examination Plan**

Consult the department.

**Thesis Plan**

Consult the department.

**Doctoral Degree**

Admission

Admission to the program is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences. Information may be obtained from UCLA ACCESS, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.
**Pathology and Laboratory Medicine**

**Upper Division Course**

199. Special Studies (2 to 6 units). Supervised laboratory research, 10 hours minimum. Prerequisite: consent of instructor. Students select instructor. Supervised laboratory research project under instructor supervision. P/NP or letter grading.

**Graduate Courses**

200A. Dental Pathology (3 units). Lecture, 90 minutes; laboratory, three hours. Prerequisite: consent of instructor. Fundamentals of disease processes, using as examples selected lesions or diseases of major organ systems.

200B. Oral Pathology (3 units). Lecture, weekly seminars. Prerequisite: consent of instructor. Oral histology and pathology of pathologic changes that may occur in oral cavity, with emphasis on periodontal diseases, odontogenic pathology, and staging of head and neck cancer.

205. Advanced Topical Seminar in Pathology. (2 units). Lecture, two hours; discussion, six hours; laboratory, one hour. Prerequisites: consent of instructor. Advanced seminar in clinical aspects of specific diseases or areas of interest, with emphasis on differential diagnosis.

215. Interdepartmental Course: Tropical Medicine (2 units). (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotica. Syllabus supplements topics covered in classroom. S/U grading.

216A. Pathological Anatomy and Physiology (6 units). Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Prerequisites: graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology.

218B-218C. Pathophysiology of Disease (6 units each). Prerequisites: course 200A, graduate standing; completion of satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

230. Topics in Vertebrate Neurobiology (2 units). Introduction to cell biology of vertebrate central nervous system, with special reference to its development, structure, and function. Prerequisites: consent of instructor. Weekly seminars presented by experts working at forefront of field. S/U grading.

232. General Pathology Seminar (3 units). Seminar, two hours; discussion, one hour. Corequisite: course 231A. Designed to provide students with in-depth understanding of topics in course 231A. Reading and discussion of current publications pertaining to general pathology, with emphasis on cell injury/cell death and inflammation/fibrosis.

234A-234F. Molecular and Cellular Foundations of Disease (2 units each). Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: graduate standing, background in biochemistry, molecular biology, and genetics. Investigation of the disease process. Two topics (four weeks each) offered per term; topics include genetic and metabolic disorders, infectious diseases, oncology, immunology, and nutritional diseases.

235. Cell Biology of Disease (2 units). Lecture, 90 minutes; discussion, 120 minutes; laboratory, six hours. Prerequisites: courses 234A-234F. Prerequisite: consent of instructor. Designed to prepare students for Ph.D. entry level courses in molecular biology, with an emphasis on the molecular mechanisms of disease.

237. Cellular and Molecular Pathology. (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Prerequisites: one course each in molecular biology, cell biology, and biochemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

245. Environmental Pathology. Prerequisites: graduate standing, consent of instructor. Designed to explore interrelationships of man with his total environment. Presentation of series of special topics to discuss effect on man of changes in compositions of air, water, soil, and other materials. S/U grading.

250A-250B-250C. Pathology Graduate Student Seminar (2 units each). Limited to and required of all students in experimental pathology. Review and discussion of current literature and research in special topics of experimental pathology.

254. Seminar: Experimental Neuropathology (1 unit). Prerequisite: consent of instructor. Weekly seminars presented by experts working at forefront of research on diseases of nervous system. New experimental approaches and laboratory model systems for studying diseases such as Alzheimer's and Huntington's diseases, epilepsy, neuroblastoma, and multiple sclerosis. S/U grading.

255. Mapping the Human Genome (3 units). Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of implications of disease genes. S/U or letter grading.

256. Seminar: Viral Oncology (2 units). Prerequisite: completion of course 254. Designed to provide students with experience in learning normal histology of tissues which have been major targets of the disease and the range of genetic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

262. Biology of Aging. (Previously numbered 262.) (Same as Molecular, Cell, and Developmental Biology CM262.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students. Overview of expanding field of aging biology—major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; diseases of aging; methods of retarding aging process.

596. Directed Individual Study or Research (4 to 12 units). Individual research with members of the staff of or other departments, the latter for purpose of supplementing programs available in department. S/U grading.

Stephen A. Feig, M.D., Executive Vice Chair
Robert B. Ettinger, M.D., Vice Chair, Clinical Affairs,
UCLA Medical Center
E. Richard Stiehm, M.D., Vice Chair, Academic Affairs,
UCLA Medical Center
Frederick James, M.D., Chair, King/Drew
Rosemary D. Leake, M.D., Chair, Harbor-UCLA
Mohammed Malekzadeh, M.D., Interim Chair, Olive
View-UCLA
David L. Rimoin, M.D., Ph.D., Chair, Cedars-Sinai

Scope and Objectives

The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of medical education, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken at any of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Pediatrics

Lower Division Course

88. Lower Division Seminar: Special Topics in Pediatrics, Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Richard Popkin, Ph.D.

Adjunct Assistant Professor
David C. Wilson, Ph.D.

Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

“Philosopher,” translated from the Greek, literally means “lover of wisdom.” The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Undergraduate Study

Bachelor of Arts Degree

Preparation for the Major

Required: Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

The Major

Required: Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group. Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (eight units) in philosophy with an average GPA of 3.5.

Philosophy Minor

To enter the philosophy minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses: Philosophy 7 or 21, and 22 or 31.

Required Upper Division Courses: Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.
All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdn.et.ucla.edu.

**Master’s Degree**

Admission

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see Doctoral Degree below.

Areas of Study

Consult the department.

Course Requirements

For the Master of Arts, students must complete with grades of B or better at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the philosophy series numbered between 200A and 290. The total course requirement must include Philosophy 200A-200B-200C and one designated course in logic. Consult the Manual for Graduate Students in Philosophy for the list of designated courses.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

**Comprehensive Examination Plan**

Students seeking the M.A. must pass the master’s comprehensive examination, which consists of three different examinations. One is scheduled after each of the three first-year seminars. Consult the Manual for Graduate Students in Philosophy for further information about this examination. In case of failure, the examination may be repeated.

The examination is passed or failed as a whole, which does not necessarily require passing of all three parts.

**Thesis Plan**

None.

**Doctoral Degree**

Admission

Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application should be sent directly to Graduate Admissions/Student and Academic Affairs. The departmental application, three letters of recommendation (on the official forms), official scores on the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), official scores from the Test of English as a Foreign Language (TOEFL) for applicants whose first language is other than English, and two official transcripts from each institution attended should be sent to the graduate counselor in the Philosophy Department. Departmental information and application can be obtained by writing to the department.

**Major Fields or Subdisciplines**

Consult the Department.

**Course Requirements**

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

- **Logic.** Two upper division or graduate courses in logic, one of which must be completed by the end of the first year, unless a preparatory course is needed: Philosophy 135A, plus one other designated course in either the Philosophy or Mathematics Department. Consult the Manual for Graduate Students in Philosophy for the list of designated courses.

- **History of Philosophy.** One graduate course in history of philosophy, plus enough graduate or undergraduate courses (taken here or elsewhere) to make up an equivalent of Philosophy 100A, 100B, 100C. Specifically, each student must have studied (or now study) Plato, Aristotle, some important medieval philosopher, Descartes, some British empiricist, and Kant.

- **Ethics and Value Theory.** One graduate-level course.

- **Metaphysics and Epistemology.** One graduate-level course.

- **Special Area Requirement.** Two designated graduate courses in one of two areas: metaphysics and epistemology or ethics. Consult the Manual for Graduate Students in Philosophy for further details.

- **Electives.** As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally no substitutions for these courses are allowed, but students who have done graduate coursework elsewhere as graduate students may be permitted to substitute previous graduate coursework in exceptional cases.

**Written and Oral Qualifying Examinations**

The department does not require any written examination to be passed by students as a condition of advancement to candidacy. It does, however, require each student to take all three parts of the master’s comprehensive examination by the end of the student’s first year (according to the description and schedule given above) to give the department evidence of proficiencies and deficiencies.

For advancement to candidacy, students must pass a preliminary oral qualifying examination as described below.

In the second and third years, students must satisfy two special area requirements: one in metaphysics and epistemology and one in ethics. Students must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a “proposition” in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in the second year, and the proposition requirement covering the remaining area should be completed in the third year. Consult the Manual for Graduate Students in Philosophy for further details.

In the third year, students begin a new series of individual studies courses (Philosophy 596) in consultation with the dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is chosen and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether the student is able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of the student’s preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

**Philosophy**

**Lower Division Courses**

1. **Beginnings of Western Philosophy.** Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy; beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

2. **Introduction to Philosophy of Religion.** Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

3. **Philosophical Analysis of Contemporary Moral Issues.** Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

4. **Philosophy in Literature.** Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.
6. Introduction to Political Philosophy. Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include: What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? Philosophy or letter grading.

7. Introduction to Philosophy of Mind. Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge.

8. Introduction to Philosophy of Science. Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at nontechnical level of episodes from history of science.

9. Principles of Critical Reasoning. Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what constitutes acceptable or inadmissible inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

21. Skepticism and Rationality. Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc.

31. Logic, First Course. Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language.

97. Freshman Seminar. Variable topics; consult Schedule of Classes or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

Upper Division Courses

100A. History of Greek Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustinus, Aquinas, and Descartes.

100C. History of Modern Philosophy, 1650 to 1800. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course. Strongly recommended: course 100B. Core courses numbered 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers on the problem of existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

Group I: History of Philosophy

M101A. Plato — Earlier Dialogues. (Formerly numbered 101A.) (Same as Classics M146A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected topics in early and middle dialogues of Plato.

M101B. Plato — Later Dialogues. (Formerly numbered 101B.) (Same as Classics M146B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course M101A. Study of selected topics in middle and later dialogues of Plato.

M102. Aristotle. (Formerly numbered 102.) (Same as Classics M147.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected works of Aristotle.

M103A. Ancient Greek and Roman Philosophy. (Same as Classics M145A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

M103B. Later Ancient Greek Philosophy. (Same as Classics M145B.) Lecture, three hours; outside study, nine hours. Prerequisite: one course from 1, 100A, M101B, M102, or M103A, or consent of instructor. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

104. Topics in Islamic Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

105. Medieval Philosophy from Augustine to Maivanides. Prerequisite: one philosophy course or consent of instructor. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

106. Later Medieval Philosophy. Prerequisite: one philosophy course or consent of instructor. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

107. Topics in Medieval Philosophy. Prerequisite: one philosophy course. Recommended: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

C108. Hobbes. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the Leviathan, with attention given to relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

C109. Descartes. Prerequisites: course 21 or two philosophy courses or consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between metaphysics and ethics. May be concurrently scheduled with course C209.

C110. Spinoza. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C111. Leibniz. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C112. Locke and Berkeley. Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

C114. Hume. Prerequisite: one philosophy course or consent of instructor. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

115. Kant. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

116. 19th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in 19th-century thought.

117. Late 19th- and Early 20th-Century Philosophy. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

118. Kierkegaard. Prerequisite: one philosophy course or consent of instructor. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

C119. Topics in Modern Philosophy. Prerequisite: one philosophy course or consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

Group II: Logic, Semantics, and Philosophy of Science

124. Philosophy of Science: Historical. (Formerly numbered 126A.) Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.
125. Philosophy of Science: Contemporary. (Formerly numbered 126B.) Lecture, three hours; discussion, one hour. Prerequisite: course 133. Topics in logic and semantics, alternative theories of descriptions, many-valued logics, deviant logics.

126. Philosophy of Science: Social Sciences. (Formerly numbered 126C.) Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Discussion of topics in philosophy of science and social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

127A. Philosophy of Language. Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

127B. Philosophy of Language. Prerequisite: course 31 or consent of instructor. Course 127A is not prerequisite to 127B, but at more advanced and technical level. May be repeated for credit with consent of instructor.

128A. Philosophy of Mathematics. Prerequisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poncaré, early Weyl).

128B. Philosophy of Mathematics. Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.

129. Philosophy of Psychology. Lecture, three hours; discussion, one hour. Prerequisites: four one-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; psychology and physiology.

130. Philosophy of Science and Time. Lecture, three hours; discussion, one hour. Prerequisites: four one-unit psychology course, one philosophy course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relativist views of space and time, philosophical impact of relativity theory.

131. Science and Metaphysics. Prerequisites: two philosophy courses or consent of instructor. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality versus fiction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

132. Philosophy of Biology. Prerequisite: one philosophy course or consent of instructor. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

133. Topics in Logic and Semantics. Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

M134. Introduction to Set Theory. (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Prerequisite: course 32 or Mathematics 31B. Axiomatic set theory: axiomatic systems, consistent and independent sets of axioms, existence of various mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

135A. Metaphysics of Sentential Logic. Lecture, three hours; discussion, one hour. Prerequisite: course 32 or equivalent. Introduction to metaphysics of classical sentential logic. Emphasis on fundamental metatheoretical techniques, rigorous definitions of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

135B. Metaphysics of Predicate Logic. Lecture, three hours; discussion, one hour. Prerequisite: course 135A or equivalent. Classical first-order logic, its scope, and limits. Gödel completeness theorem as major positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.

136. Modal Logic. Prerequisite: course 135A. First course in two-term sequence (also see course 176). Topics include modal systems, definability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott incompleteness, incompleteness in tense and modal logic, quantificational extensions.

Group III: Ethics and Value Theory

150. Society and Morals. Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-151B. History of Ethics. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Course 151A is not prerequisite to 151B, which is not prerequisite to 151C. 151A. Selected Classics in Ancient Ethical Theories: Plato, Aristotle; 151B. Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; 151C. Selected Classics of Medieval Ethics.

153A. Topics in Ethical Theory: Normative Ethics. Prerequisite: course 22 or consent of instructor. Study of selected topics in normative ethical theory. Topics may include virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

153B. Topics in Ethical Theory: Metaethics. Prerequisite: course 22 or consent of instructor. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

154. Topics in Value Theory: Rationality and Action. Prerequisite: course 6 or 7 or 22 or consent of instructor. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

155. Medical Ethics. Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and population.

156. Topics in Political Philosophy. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: two philosophy courses or consent of instructor. Recommended: course 6 or 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor.

157A-157B. History of Political Philosophy. Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. May be repeated with consent of instructor. 157A. Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B. Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

166. Philosophy of Law. Prerequisite: one philosophy course or consent of instructor. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. Lecture, three hours; discussion, one hour. Prerequisites: two relevant philosophy courses or consent of instructor. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. Prerequisites: two relevant philosophy or linguistics courses or consent of instructor. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

M173. Metaphor and Literal Speech. (Same as Teaching English as a Second Language M189.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinarity perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphorical capacity. P/NP or letter grading.

175. Topics in Philosophy of Religion. Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

176. Metaphysics of Modality. Prerequisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of model theory of modal logic. What are "possible worlds"? What is the "accessibility relation"? Is modal logic a logic or a theory? Is its logic or metaphysical necessity? Are the two notions really distinct? How is metaphysically involved is (quantified) modal logic? What is its relationship to doctrines of (1) "Haeckelism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

177A. Existentialism. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Maritain, and Camus. Possible topics include meta-physical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.
May be repeated for credit with consent of instructor. students: Women's Studies 110D; for other students: Lecture, three hours. Prerequisite for women's studies majors: Women's Studies 10; for other students: Lecture, three hours. Prerequisite: two philosophy courses or consent of instructor. Introduction to phenomeno-
logical method of approaching philosophical prob-
lems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Oriental Philosophy: Buddhism. Lecture, three hours. Prerequisite: course 21 or consent of instructor. Study of major philosophical questions, nature of world, of mind, and of universals; and answers provided by alternative sys-
tems (e.g., pantheism, dualism).

182. Philosophy of Action. Prerequisite: two phil-
osophy courses or consent of instructor. Study of various concepts employed in contemporary human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

188. Philosophy of Perception. Prerequisite: two philosophy courses or consent of instructor. Critical study of main philosophical theories of perception and arguments that support or criticize them.

192. Philosophical Analysis. Lecture, three hours. Prerequisite: consent of instructor. Study of major philosophical questions, such as the nature of reality, the existence of God, the nature of consciousness, the nature of truth, the nature of valid reasoning, and the nature of language.

193. Christ and Philosophy. Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradi-
tion, with philosophical analysis and assessment of their views on morality and religious life.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. Prerequisite: consent of instructor. Study of life of Socrates and his students.

202. Aristotle. Prerequisite: consent of instructor. Study of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

203. Seminar: History of Ancient Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

206. Topics in Medieval Philosophy. Prerequisite: consent of instructor. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

207. Seminar: History of Medieval and Renaiss-
ance Philosophy. Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

208. Hobbes. Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy. May be concur-
rently scheduled with course C108.

209. Descartes. Prerequisite: consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphys-
ics. May be concurrently scheduled with course C109.

210. Spinoza. Prerequisite: consent of instructor. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for gradua-

211. Leibniz. Prerequisite: consent of instructor. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for gradu-

212. Locke and Berkeley. Prerequisite: one philos-
ophy course or consent of instructor. Study of philos-
ophies of Locke and Berkeley, with emphasis in seminars on one or the other. Limited to 30 stu-
dents when concurrently scheduled with course C112. S/U or letter grading.

214. Hume. Prerequisite: consent of instructor. Se-
lected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concur-
rently scheduled with course C114.

215. Kant. Prerequisite: consent of instructor. Inten-
sive study of selected writings of Immanuel Kant.

216. 19th-Century Philosophy. Prerequisite: con-
sent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

219. Topics in Modern Philosophy. Prerequisite: consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be re-
peated for credit with consent of instructor. Concurrently scheduled with course C119.

220. Seminar: Topics in History of Philosophy. Seminar two hours. Prerequisite: consent of instruc-
tor. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. Prerequisite: Mathemat-
ics M112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Or-
dinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Form-
alization of set theory: Zermelo/Fraenkel; von Neu-
mann/Gödel theory. May be repeated for credit with consent of instructor.

221B. History of Set Theory. Prerequisite: consent of instructor. Development of concept of set and axi-
omatic set theory by examining selected writings of Frege, Cantor, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy as substitutes for predic-
ativcity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

222A-222B-222C. Gödel Theory. Prerequisites: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski defin-
tion of truth. 222B. Continuation of course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. 222C. Prerequisites: course 222B. Gödel number and Gödel theory. Final course in Gödel theory series.

224. Philosophy of Physics. Prerequisite: consent of instructor. Selected philosophical topics related to physical theories, depending on interests and back-
ground of participants, including space and time; ob-
ervation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

225. Probability and Inductive Logic. Prerequisites: course M134, or Mathematics M112A and 112B, or consent of instructor. Topics may include interpretations of probability, Bayesian and non-Bayesian confirma-
tion theory, and paradoxes of confirmation, coherence, and conditioning.

226. Topics in Mathematical Logic. Prerequisite: consent of instructor. Content varies from term to term. May be repeated for credit with consent of in-
structor.

227. Philosophy of Social Science. Prerequisite: consent of instructor. Examination of epistemological problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explana-
tion in social sciences, determinism and spontaneity in history, interpretation of cultures rad-
ically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.
230. Seminar: Logic. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

231. Seminar: Intensional Logic. Prerequisite: consent of instructor. Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor.

232. Philosophy of Science. Prerequisite: consent of instructor. Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

233. Seminar: Philosophy of Physics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. Prerequisites: courses 242 or 256A-B or 257 and any two philosophy courses or consent of instructor. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

245. Seminar: History of Ethics. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

246. Seminar: Ethical Theory. Prerequisite: consent of instructor. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

247. Seminar: Political Theory. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

250. Seminar: Problems in Moral Philosophy. Prerequisite: consent of instructor. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

255. Seminar: Aesthetic Theory. Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

M256. Topics in Legal Philosophy. (Same as Law M217) Lecture, three hours. Prerequisite: consent of instructor. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

M257. Seminar: Philosophy of Law. (Same as Law M524) Seminar, three hours. Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. Discussion, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

275. Human Action. Prerequisites: two upper division philosophy courses or consent of instructor. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

280. 20th-Century Continental Philosophy. Prerequisite: consent of instructor. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

281. Seminar: Philosophy of Mind. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

282. Seminar: Metaphysics. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

283. Seminar: Theory of Knowledge. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

284. Seminar: Philosophy of Perception. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

285. Philosophy of Psychoanalysis. Prerequisite: consent of instructor. Examination of theories such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, meta-psychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.

286. Philosophy of Psychology. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; psychology and philosophy.

287. Seminar: Philosophy of Language. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

289. Seminar: Philosophy of Religion. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

290. Workshop: Philosophy of Language. Seminar, two hours. Prerequisite: consent of instructor. On-going discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

299. Seminar: Philosophical Research. Seminar, three hours. Prerequisite: advancement to candidacy or consent of instructor. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts. May be repeated for credit with consent of instructor. S/U grading.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Philosophy (2 to 4 units). Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies (2 to 8 units). (Formerly numbered 596A-596B) Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

599. Research for Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

Scope and Objectives

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton’s discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein’s general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions which existed when the universe’s expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe’s matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet undiscovered exotic particles which are predicted by the most advanced theories of elementary particle physics.

By recently consolidating the former Department of Physics and the Department of Astronomy into the new joint Department of Physics and Astronomy, faculty members and students at UCLA are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.

Undergraduate Study

The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

Bachelor of Science in Astrophysics

Preparation for the Major

Required: Astronomy 81, 82, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. Recommended: Astronomy 3H, Chemistry and Biochemistry 11A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

The Major

Honors Program

Senior majors in astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, their grade-point average must remain at 3.4 or better, and their work in course 199 must reflect original research and be accepted by the departmental honors committee.

Bachelor of Science in Physics

The physics major should be taken if students intend to continue toward the Ph.D. in Physics.

Preparation for the Major

Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series; (3) there must be at least five upper division courses in the plan; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale be thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

Junior transfer students should preferably have completed (1) a two-year calculus/analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. Each mathematics and physics course must be passed with a grade of C or better.

Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

Bachelor of Arts in General Physics

The general physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office.

The Major

Required: Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.
Astronomy

Master's Degrees
The department offers the Master of Science degree, the Master of Arts in Teaching, and the Ph.D. degree in Astronomy; however, the department is admitting students to the Master of Arts in Teaching program at this time.

Course Requirements
Eleven courses are required for the master's degree, of which at least 10 must be at the graduate level in physics and astronomy. At least one of the courses must consist of a quarter of work on the second-year research project. Courses taken in the 300 or 500 series may not apply toward the total course requirements of the graduate course requirement.

Comprehensive Examination Plan
The comprehensive examination consists of satisfactory completion of the second-year research project, culminating in a written report of the methods used and results obtained, and the oral portion of the comprehensive examination at the master's level. The oral portion is described in more detail under the description of the written and oral qualifying examinations for the doctorate.

Thesis Plan
None.

Master of Arts in Teaching
Admission
The department is not admitting students to the program at this time.

Areas of Study
It is not required to designate an area of specialization for the M.A.T. degree.

Course Requirements
Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy (excluding Astronomy 200), mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan
The comprehensive examination plan is the same as for the M.S. degree.

Thesis Plan
None.

Doctoral Degree
Admission
The basic requirement for admission to the Ph.D. program in Astronomy is a bachelor's degree in physics or astronomy. Students in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

Areas of Study
Contact the department.

Course Requirements
The required courses for the Ph.D. degree are Astronomy 270 through 276, Physics 210A, 210B, 221A. During the Fall and Winter Quarters of the second year, students must enroll in Astronomy 277A-277B. In addition, Astronomy 278 must be taken at least once per year for the first two years. Students must take the nine core courses in astronomy and physics offered during the first five quarters of residence and achieve a grade-point average of at least B, averaged over all astronomy and physics graduate courses taken during this time. Exceptions or substitutions can be made by petition only and must be arranged in advance or, for students transferring from another institution, during or before the first quarter of residence.

Research Project
Students must satisfactorily complete the two-quarter second-year research project, culminating in a written report of the methods and the results of the research performed. Before undertaking the second-year research project, students must identify a faculty adviser who is willing to oversee their work on the project.

Written and Oral Qualifying Examinations
Inasmuch as the primary goal of the graduate program in astronomy is to train students to do research at the Ph.D. level, the purpose of the master's comprehensive/doctoral qualifying examination is (1) to assess students' general knowledge of astronomy and physics at the graduate level and (2) to assess students' capacity to perform fundamental research, and thus to become successful research scientists. The structure of the comprehensive examination is designed accordingly.

The master's comprehensive/doctoral qualifying examination and the requirements leading up to it are administered by a graduate evaluation committee, appointed by the vice chair, and consisting of three members. The graduate evaluation committee evaluates all second-year students every Spring Quarter.

All second-year students are assessed by the graduate evaluation committee for their performance on the qualifying examination on the basis of the following:

1. A collective assessment of the written report on the second-year research project, which constitutes the written qualifying examination.

2. Performance on the oral portion of the comprehensive examination, administered by the comprehensive examination committee at the beginning of the Spring Quarter of the student's second year. During this oral portion of the comprehensive examination, students present the results of their second-year research project and are expected to be able to respond to questions and to solve basic problems from all core areas of astrophysics in which they have had the opportunity to take the course following the normal schedule of classes.

The graduate evaluation committee notifies students of their assessment of their performance on the examination by June 30. The examination is based primarily on the combination of the oral examination plus the written re-
port on the second-year research project. In addition, the committee reviews the instructors’ written narratives and the file of the student's final examinations in all graduate courses taken in order to place the student's performance on the oral examination into a maximally broad context. The potential outcomes of the assessment are

(1) Pass — with immediate eligibility to proceed to the University Oral Qualifying Examination.

(2) No pass — with the possibility of reassessment in the following year on the basis of a specific written list of requirements supplied by the graduate evaluation committee. (This option is meant to be used sparingly for students with a single, identifiable and presumably correctable weakness, but who are otherwise above the passing threshold.) The no-pass option can only be used once for any particular student.

(3) Terminal master's pass — allowing the student only to finish any outstanding course requirements for the master's degree, if any.

(4) Fail — resulting in immediate termination of the student's affiliation with the department.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of this examination is to discuss and evaluate the student's proposed dissertation problem; but at the discretion of the committee, questions may be asked with regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of this examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

**Physics**

**Master's Degrees**

The department offers the Master of Science, the Master of Arts in Teaching, and the Ph.D. degrees in Physics.

**Master of Science**

Applicants to the Master of Science program in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

**Areas of Study**

It is not required to designate an area of specialization for a terminal master's degree.

**Course Requirements**

The University requires a total of nine courses for the M.S. degree. To satisfy the minimum requirement of six graduate courses in physics specified by the department, it is recommended that five of the minimum requirement of six be the five fundamental core courses: Physics 210A, 210B, 215A, 221A, 221B, since the comprehensive examination is based on the content of these courses. Students must also take, and pass with a letter grade of B or better, one of the following breadth courses: Physics 220, 221C, 231A. The remaining three courses of the minimum nine courses required for the M.S. degree may be satisfied through upper division or graduate courses in physics or a related field, which are acceptable to the Physics and Astronomy Department for credit toward the M.S. degree, with the restriction that no more than two may be chosen from Physics 596 and/or seminar courses. Physics 597 and 598 may not be applied.

**Comprehensive Examination Plan**

A passing grade on the written comprehensive examination is required. If students fail to pass the examination at the master's level, they may take it a second time the next quarter it is given. For more detailed information, see Written and Oral Qualifying Examinations in the following Doctoral Degree section.

**Thesis Plan**

Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements can usually be made for students to write a master's thesis, provided they have a particularly interesting subject and provided a professor is willing to undertake the guidance of their project. In this case, students must petition the committee of graduate advisers for permission to pursue the thesis plan. If the petition is approved, the comprehensive examination is waived.

**Master of Arts in Teaching**

Admission

For information about the Master of Arts in Teaching (M.A.T.) program, direct inquiries to the Director of the Master of Arts in Teaching Program, Department of Physics and Astronomy, 3-164 Knudsen Hall, UCLA, Los Angeles, CA 90024-1547.

**Areas of Study**

It is not required to designate an area of specialization for the M.A.T. degree.

**Course Requirements**

This degree leads to qualification for instructional credentials at the secondary school or junior college level. The University requires a total of 12.5 courses for the M.A.T. degree. The program consists of at least five graduate physics courses, four of which are chosen from Physics 210A, 210B, 215A, 221A, 221B, and five professional (300 series) courses.

Courses required are (1) the five graduate physics courses and (2) the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12 (Education 100A-100B, 112, 312, 315A-315B, 330B, 330C, Community Health Sciences 187, and Physics 370, which is a special physics teaching laboratory).

Courses in the 500 series are not applicable toward the M.A.T. degree. Students are required to see the adviser at the beginning of each quarter through the completion of the degree.

**Comprehensive Examination Plan**

A passing grade on the written comprehensive examination is required. Students who fail to qualify at the master's level of achievement may repeat the examination a second time.

**Thesis Plan**

None.

**Doctoral Degree**

Admission

Applicants must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

**Major Fields or Subdisciplines**

Doctoral degrees are based on original work, generally in one of the following fields of specialization: accelerator physics; elementary particles; intermediate energy and nuclear physics; low-temperature/acoustics; plasma and astrophysics; condensed matter, including solid-state; and spectroscopy.

Arrangements can also be made for a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, and geophysics. The details of each program should be established in consultation with the graduate affairs officer.
Course Requirements

By the end of the first year of graduate study students are expected to acquire a mastery of the core graduate physics material represented by Physics 210A and 210B (electromagnetic theory), 215A (statistical physics), and 221A and 221B (quantum mechanics). Detailed syllabi for these courses are available in the graduate counselor’s office. Since the material in these core courses represents the body of knowledge tested on the written comprehensive examination, usually all or most of these five courses are the student’s main course load in the first year of graduate study.

No later than the fourth quarter of residence, students are expected, in consultation with their adviser, to have begun taking a series of courses, seminars, and tutorials to prepare them for original research in a given area of specialization. Information produced by various area committees on preferred course sequences and programs is available to students and to their advisers. No later than the sixth quarter of residence, students are expected to begin taking a sequence of Physics 596 (Directed Individual Studies) courses with a faculty member in their chosen field of specialization. The purpose of these 596 courses is to prepare the student for original Ph.D. dissertation research and to enable the student to obtain a Ph.D. research sponsor. It is the responsibility of the faculty member with whom the 596 courses are taken to provide the student with a frank, on-going evaluation of progress toward these goals. By the second quarter of this 596 sequence, students are expected to make a substantive oral presentation describing the results of a problem in the 596 program before an audience which includes the faculty member(s) with whom they are taking 596 and three other faculty members. It is the responsibility of the faculty member to specify the content of the presentation. The function of the three additional faculty members is to serve as a departmental resource in the event that difficulties arise during the presentation. This presentation is intended both to allow the faculty member to assess the student’s ability to carry out research and to provide a forum to discuss the student’s research goals.

No later than the end of the eighth quarter of residence, students are expected to make a formal arrangement with a faculty member who agrees to serve as the Ph.D. research sponsor. This agreement, which includes a general statement on the direction of the Ph.D. dissertation research, is communicated to the graduate affairs officer. If by the end of the eighth quarter of residence the student has not obtained a Ph.D. research sponsor, this situation is referred by the graduate affairs officer to the Committee of Graduate Advisers. The committee then makes a decision on whether the student should continue in the graduate program based on discussions with the student, the student’s 596 advisers, and other concerned parties.

All students must fulfill a breadth requirement by passing one of the following with a B or better: Physics 220, 221C, or 231A. In addition, students who have not taken Physics 132 or its equivalent in undergraduate status must do so at the beginning of the graduate program. These core and breadth requirements should be completed by the fifth quarter in residence.

Written and Oral Qualifying Examinations

A written comprehensive examination is required of all graduate students. This examination is administered by a departmental comprehensive examination committee and is graded as follows: (1) pass at the Ph.D. level of achievement; (2) pass at the master’s level of achievement; (3) fail.

This written comprehensive examination consists of two three-hour sections given on consecutive days, and its scope is defined by the graduate physics material in the five core courses (Physics 210A, 210B, 215A, 221A, and 221B).

This written comprehensive examination is offered twice a year, in the week before the beginning of classes in the Fall Quarter and in the period between the Winter and Spring Quarters.

Students entering the graduate program in the Fall Quarter are expected to take the written comprehensive examination before their fourth quarter of residence.

Students who fail this examination at the desired level and want to repeat it must take it the next time it is offered.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student’s dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of this examination is to discuss and evaluate the student’s proposed dissertation problem, but at the discretion of the committee, questions may be asked in regard to other material in the student’s field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of this examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

Astronomy

Lower Division Courses

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A-2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 8 series and two terms of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

2A-2B. Introduction to the Physical Universe. Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. 2A. Planets and Stars; 2B. Galaxies and Cosmology. Enforced requisite: course 2A (C or better).

3. Astronomy: Nature of the Universe. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.
Upper Division Courses

117. Radiation and Fluids in Astrophysics. Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astrophysics or physics, or consent of instructor. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the origin and evolution of the universe. Stellar evolution from the simple to complex. Course material treated in some depth, but with little or no formal mathematics.

127. Stellar Atmospheres, Interiors, and Evolution. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Recommended: courses 115, 117. Physical conditions in stellar interiors, energy production in stars. Stellar evolution from star formation through normal stages observed to white dwarfs, neutron stars, and black holes. Nuclear processes: variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres.

140. Stellar Systems and Cosmology. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Lecture covers statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images.

199. Special Studies (2 or 4 units). Prerequisites: senior standing in astrophysics or physics (with an equivalent and junior standing in astrophysics or physics, or consent of instructor). Lecture, two hours; laboratory, four hours. The following courses may be repeated for credit. S/U grading.

270. Fundamentals I: Fluids and Dynamics. Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, winds, and accretion. Jeans, Kelvin-Helmholtz, and Rayleigh/Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction.

274. Galaxies. (Formerly numbered 219A.) Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei.

275. Cosmology. (Formerly numbered 219B.) Lecture, three hours. Prerequisite: course 274. Thermal and physical history of the universe. Interaction of matter and cosmic microwave background radiation. Study of inhomogeneities in the universe from inflationary epoch to the current large-scale structure.

277A-277B. Astronomy Research (2 units each). Prerequisite: second-year graduate standing in astronomy. Two-term research project planned in conjunction with a faculty advisor on any suitable research field in astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

278. Special Topics in Astronomy (2 or 4 units). Informal course with lecture/seminar format, focusing on one of a set of specific topics in astronomy. S/U (two-unit course) or letter (four-unit course) grading.

M285. Origin and Evolution of Solar System. (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

M297. Research Tutorial: Astroparticle Physics (2 or 4 units). Informal course with lecture/seminar format, focusing on one of a set of specific topics in astrophysics. S/U (two-unit course) or letter (four-unit course) grading.

301. Research Tutorial: Stellar Structure and Evolution (2 or 4 units). Informal course with lecture/seminar format, focusing on one of a set of specific topics in astrophysics. S/U (two-unit course) or letter (four-unit course) grading.
Physics

**Lower Division Courses**

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take either Physics 10 or 3A if only one course is to be taken, or 3A and 3B as a two-course sequence.

Physics 1Q is intended for entering freshman physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a requisite for admission to this sequence.

Physics 8A, 8B, 8C, 8D, 8E form a sequence of courses in general physics for majors in physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one or more of courses 8A through 8E by taking the final examination with a class at the end of any term. These serve as placement examinations. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 10 is a one-term, nonlaboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

1Q. Contemporary Physics (2 units). Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

3A. General Physics: Mechanics of Solids and Fluids. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum; Kepler laws; dynamics of systems of particles; fluid mechanics.

3B. General Physics: Heat, Sound, Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: courses 8B, 8C (corequisite), Mathematics 32A, 32B (corequisite). Electrons in solid and atomic physics.

3C. General Physics: Light, Relativity, and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3B. Light, optical instruments. Introduction to relativity; Electron and atom. Matter waves. Nuclear and particle physics.

6A. Physics for Life Sciences Majors: Mechanics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: courses 3A, 3B, 3C (may be taken concurrently).

6B. Physics for Life Sciences Majors: Electricity and Magnetism. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A.

6C. Physics for Life Sciences Majors: Light and Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6B.

8A. Physics for Scientists and Engineers: Mechanics. Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 8AL (corequisite), Mathematics 31A, 31B (corequisite). Recommended: high school physics and chemistry; Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation.

8AH. Physics for Scientists and Engineers: Mechanics (Honors). Lecture, four hours; discussion, one hour. Enforced requisite: Mathematics 31A. Introduction to classical mechanics for engineering and physical sciences students.

8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit). Laboratory, two hours. Enforced requisite: course 8A. Experiments performed on falling bodies, acceleration on an air track, conservation of energy, and rotational kinematics. State-of-the-art computer data acquisition and analysis, with introduction to error analysis.

8BH. Physics for Scientists and Engineers (Honors). Lecture/demonstration, three hours; discussion, one hour. Enforced requisite: course 8A (or 8B, or better), Mathematics 31B, 32A (corequisite). Same material as course 8B but in greater depth.

8BL. Physics Laboratory for Scientists and Engineers: Waves, Sound, Heat (1 unit). Laboratory, two hours. Enforced requisite: course 8B. Experiments performed on harmonic oscillations, standing waves, acoustics, and thermodynamics. Development of error and analysis, including distributions and least-squares fitting procedures.

8CH. Physics for Scientists and Engineers (Honors). Lecture/demonstration, four hours; discussion, one hour. Enforced requisite: course 8BH (or 8B, A or better), Mathematics 32A, 32B (corequisite). Same material as course 8C but in greater depth.

8CL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit). Laboratory, two hours. Enforced requisite: course 8C. Experiments performed on effects of electric and magnetic fields, resistance, capacitance, time-varying circuits. Use of equipment such as voltmeters, oscilloscopes.

8DH. Physics for Scientists and Engineers (Honors). Lecture/demonstration, three hours; discussion, one hour. Enforced requisite: course 8CH (or 8C, A or better), Mathematics 32B, 33A (corequisite). Same material as course 8D but in greater depth.

8DL. Physics Laboratory for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity (1 unit). Laboratory, two hours. Enforced requisite: course 8D. Experiments performed on reflection, refraction, polarization, diffraction, and interference with light and microwaves. Equipment includes laser, traveling microscope.

8E. Physics for Scientists and Engineers: Modern Physics. Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: course 8D, Mathematics 33A, 33B (corequisite). Wave-particle duality, quantum theory. Schrödinger equation, hydrogen atom, exclusion principle.

10. Physics. Lecture/demonstration, three hours; quiz/discussion, one hour. Not open for credit to students with credit for course 8A or equivalent. One-term college course in mechanics. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas placed in cultural and historical perspective.

88. Lower Division Seminar: Current Topics in Physics (2 units). Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

M88. Limits of Biological Design through Physical Principles. (Same as Molecular, Cell, and Developmental Biology M888H.) Seminar, three hours. Enforced requisites: courses 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D, Chemistry 10A and 10B, or 11A and 11B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 3A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc. studied quantitatively using elementary mathematics and physical principles.
Upper Division Courses

M122. Introduction to Plasma Electronics. (Same as Electrical Engineering M185.) Lecture, three hours; outside study, nine hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introduction to course on electronics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources.

124. Nuclear Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions.

126. Elementary Particle Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators.

131. Mathematical Methods of Physics. Lecture, three hours; discussion, one hour. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals.

132. Mathematical Methods of Physics. Lecture, three hours; discussion, one hour. Prerequisite: course 131. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy's theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms.

140. Introduction to Solid-State Physics. Prerequisite: course 115B or equivalent. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; drifftion of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands.

160. Numerical Analysis Techniques and Particle Simulations. Lecture, three hours; computer terminals, six hours. Prerequisites: courses 105A, 105B, 110A, 110B, minimum knowledge of computer programming (FORTRAN). Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems.

180A. Nuclear Physics Laboratory. 180B. Physical Optics and Spectroscopy Laboratory. 180C. Solid-State Laboratory. 180D. Acoustics Laboratory. 180E. Plasma Physics Laboratory. 180F. Elementary Particle Laboratory.

223. Advanced Classical Mechanics. Prerequisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

Graduate Courses

210A. Modern Physics Research Areas (2 units). Review of modern physics research areas, with emphasis on those actively pursued at UCLA, S/U grading.

213B. Advanced Atomic Structure. Nj symbols, continuous groups, fractional parentage coefficients, n electron systems.

215A. Statistical Physics. Thermodynamics and statistical mechanics with applications.

220. Classical Mechanics. Lecture, three hours. Hamilton-Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

221A-221B-221C. Quantum Mechanics. Lecture, three hours. 221A. Fundamentals of quantum mechanics, operators and state vectors, equations of motion. 221B. Prerequisite: course 221A. Rotations and other symmetry operations, perturbation theory. 221C. Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.
225A-225B. Advanced Nuclear Physics. Prerequisites: courses 221A-221B. Normally preceded by course 222A. Advanced structure of complex nuclei, nuclear models, scattering and reactions.

226A-226B-226C. Elementary Particle Physics (6 units each). Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent and 230A-230B (may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking, SU(2)xU(1) electroweak interactions of leptons, quarks, Ws, Zs, and quark theory of hadrons and quantum chromodynamics.

226D. Beyond the Standard Model. Lecture, three hours. Prerequisites: courses 226A-226B-226C or equivalent or consent of instructor. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.

230A-230B-230C. Relativistic Quantum Theory (6 units each). Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent or consent of instructor. Modern field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons, and quark model. S/U grading.

231A. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231B. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

231C. Methods of Mathematical Physics. Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations, numerical methods.

232A-232B. Relativity. Special and general theories, with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity.

235. Group Theory and Quantum Mechanics. Prerequisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.

241A. Solid-State Physics. Prerequisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.

241B. Solid-State Physics. Prerequisite: course 241A. Transport theory with applications, electron-electron interactions.

241C. Solid-State Physics. Prerequisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

250. Introduction to Acceleration of Charged Particles. Lecture, three hours. Prerequisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrons and storager rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical acceleration lasing.

261. Seminar: Special Problems in Theoretical Physics.

266. Seminar: Advanced Physical Acoustics.

269A. Seminar: Nuclear Physics (2 to 4 units).

269B. Seminar: Elementary Particle Physics (2 to 4 units).

280E. Advanced Plasma Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: courses M122, M160E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

290. Research Tutorial: Plasma Physics (2 or 4 units). Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

291. Research Tutorial: Elementary Particle Theory (2 or 4 units). Prerequisites: courses 226A, 230A-230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics (2 or 4 units). Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

293. Research Tutorial: Current Topics in Physics (2 units). Lecture, one hour; Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics (2 or 4 units). Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

295. Research Tutorial: Solid Earth Physics (2 or 4 units). Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

296. Research Topics in Physics (2 units). Formerly numbered 296A-296Z). Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

297. Research Tutorial: Astroparticle Physics (2 or 4 units). (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

298. Research Tutorial: Experimental Elementary Particle Physics (2 or 4 units). Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

299. Research Tutorial: Nuclear Physics (2 or 4 units). Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

300. Teaching Physics. Prerequisite: consent of instructor. Study of physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of Master of Arts in Teaching (M.A.T.) program but open to other interested students.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Physics (2 units). Lecture/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies (2 to 12 units). May be repeated for credit. S/U grading.

597. Preparation for Master’s Comprehensive Examination or Ph.D. Qualifying Examinations. May be repeated twice for credit. S/U grading.

598. Master’s Thesis Research and Writing. May be repeated twice for credit.

599. Ph.D. Research and Writing (8 or 12 units). May be repeated for a maximum of 18 units. S/U grading.

V. Reggie Edgerton, Ph.D., Vice Chair

Professors

Arthur P. Arnold, Ph.D. (Neurobiology)
Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to organs. Many physiological science majors, transfer students with 80 or more units must meet the following courses prior to admission to UCLA: Life Sciences 1, 2, 3, or equivalent, one year of general chemistry with laboratory, and at least two of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two organic chemistry courses with laboratory. The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to organs. Many physiological science majors, transfer students with 80 or more units must meet the following courses prior to admission to UCLA: Life Sciences 1, 2, 3, or equivalent, one year of general chemistry with laboratory, and at least two of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two organic chemistry courses with laboratory.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Physiological Science 27, 111A (or M180A-M180B), 111B-111C, 111L. Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 190 or 199 may be applied toward the elective requirement. Courses 193, 195, 196A-196B, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Hons Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GP A in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

Applicants for graduate study in the Master of Science program are expected to have completed an undergraduate degree in biological or physical sciences. In general, at the time of admission students should have completed a year of coursework in each of the following: calculus, physics, biology, inorganic chemistry, and organic biochemistry. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation; (b) field of emphasis, specific study interests, and type of research sought; (c) expectations, goals, degree objective; (d) one or more departmental faculty members whose research area parallels the study interest. The Graduate Record Examination (GRE) is required as part of the admission file. A brochure of faculty names and research interests is available from the department. Applicants are encouraged to communicate directly with the faculty, and personal interviews are encouraged.

Areas of Study

Consult the department.

Course Requirements

The M.S. degree requires nine courses, including a second-level statistics or research design course. A minimum of six of the nine courses must be graduate-level (200) courses, toward which two 596 courses may be applied. Coursework is selected by the student and the student's advisory committee, with approval by the graduate affairs committee. All coursework must be completed by the end of the second year. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times a master's student may enroll in course 597 or 598.

Comprehensive Examination Plan

If this plan is elected, the student must achieve a passing mark on a comprehensive examination. Breadth of knowledge is demonstrated by passing a written comprehensive examination administered at the end of the Fall and Spring Quarters. Preparation for the examination varies with background; students follow a curriculum during the master's program that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in Physiological Science or other departments. The examination consists of three sections in the context of general physiological problems: (1)
molecular biology or neurochemistry; (2) cell biology or cellular neurophysiology; and (3) systems physiology or systems neuroscience. The examination is scored (1) passed at the master's level of achievement; (2) passed at the Ph.D. level of achievement, which permits the student to continue into the Ph.D. program; or (3) failed at the master's level of achievement, and therefore also at the Ph.D. level of achievement. Students failing the examination at either the master's or Ph.D. levels of achievement are required to retake the examination at the next offering. Students wishing to continue into the Ph.D. program who fail the examination at the Ph.D. level on the second attempt will be awarded a terminal Master of Science degree.

**Thesis Plan**

If the thesis plan is elected, the student must report the results of an original research investigation. Under the guidance of the thesis committee, the student must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, the student may submit either a thesis manuscript or a manuscript suitable for publication.

**Doctoral Degree**

**Admission**

Doctoral students are expected to have completed the same admission requirements as outlined for the M.S. degree. In addition to the above, students may also be admitted to the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

**Major Fields or Subdisciplines**

Consult the department.

**Course Requirements**

Nine courses, at minimum, are specified for the doctoral degree. Two 596 courses may be applied toward the degree requirements.

Courses are selected by the student and the student's advisory committee and approved by the graduate affairs committee.

**Written and Oral Qualifying Examinations**

Breadth of knowledge is demonstrated by passing a written preliminary examination administered at the end of Fall Quarter of the second year. Preparation for the examination varies with background, and students follow a curriculum during the first year of study that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in Physiological Science or other departmental curriculums. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry, (2) cell biology or cellular neurophysiology, and (3) systems physiology or systems neuroscience. The examination is scored passed at the Ph.D. level of achievement, passed at the master's level of achievement (students are required to pass a second examination at the Ph.D. level within the following six months), or failed (students are required to leave the program). Alternatively, students receiving a master's level of achievement score may leave the doctoral program and complete the M.S. degree.

After successfully passing the departmental written qualifying examination, and before advancement to candidacy, a University Oral Qualifying Examination is conducted by the doctoral committee. This examination must be passed by the end of the third year of study. Students present a written research proposal of their intended dissertation project to their advisory committee and one member of the graduate affairs committee at least two weeks prior to the examination. Students are expected to have formulated a research plan, have demonstrated appropriate research capability, and be knowledgeable of relevant research literature. Students may petition the graduate affairs committee for extension of this deadline. If a student does not pass, the examination may be rescheduled once at the discretion of the doctoral committee.

**Physiological Science**

**Lower Division Courses**

3. **Introduction to Human Physiology.** Lecture, three hours. Not open to physiological science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

5. **Issues in Human Physiology: Diet and Exercise.** Lecture, three hours. Not open to physiological science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

6. **The Human Machine: Physiological Processes.** Not open to physiological science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

13. **Introduction to Human Anatomy (6 units).** Lecture, four hours; laboratory, four hours. Not open to physiological science majors. Structural survey of human body, including skeletal, muscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens.

27. **Systems Anatomy (5 units).** Lecture, four hours; laboratory, three hours; outside study, 10 to 15 hours. Enforced prerequisite: Life Sciences 2. Introduction to systems anatomy focused primarily on human anatomy, with some emphasis on comparable anatomy systems in other vertebrates. Lecture and laboratory materials devoted to introduction of skeletal, cardiovascular, respiratory, reproductive, and renal systems, as well as neuroanatomy.

90. **Introduction to Physiological Science (2 units).** Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

**Upper Division Courses**

C100. **Experimental Statistics.** (Formerly numbered 100.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas and an introduction to computer methods used to analyze physiological data. Concurrently scheduled with course CM200. P/NP or letter grading.

111A-111B-111C. **Foundations in Physiological Science (6 units each).** Lecture, four hours; laboratory, two hours. 111A. Prerequisites: course 27, Chemistry 132A, Life Sciences 1, 2, 3, 4, Physics 6B. Introduction to principles of neurophysiology; cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. 111B, Prerequisites: course 111A or M180A. Chemistry 132B, Biology 11. Principles of cardiovascular, and pulmonary physiology. 111C. Prerequisites: course 111A or M180A, Chemistry 153A. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

111L. **Physiological Science Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisites: courses 111A-111B-111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM225.

126. **Biological Clocks.** (Formerly numbered 198.) Lecture, three hours; discussion, one hour. Prerequisite: course 111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM235.

133. **Exercise Physiology (5 units).** Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111C. Physiological responses and adaptations to acute and chronic exercise.

C135. **Dynamical Systems Modeling of Physiological Processes (5 units).** Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

136. **Exercise and Cardiovascular Function (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111B. Regulation of normal and pathologic cardiovascular function in cardiovascular and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches.

138. **Neuromuscular Physiology and Adaptation.** Prerequisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system.
142. Sensorimotor Physiology (5 units). Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111A or 180A. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices.

143. Neuromotor Control of Posture and Movement (5 units). Lecture, four hours; outside study, 11 hours. Prerequisite: course 111B or 180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C243.

144. Neural Control of Physiological Systems (5 units). Lecture, four hours; outside study, 11 hours. Prerequisite: course 111A or 180A. Examination of central nervous system organization required for control of locomotion, mastication, and swallowing. Concurrently scheduled with course C245.

145. Neurobiology of Learning and Memory (5 units). Lecture, research dissemination; one hour; outside study, 10 hours. Prerequisite: course 111A or 180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

146. Advanced Neurophysiology (5 units). Lecture, four hours; outside study, 11 hours. Prerequisite: course 111A or 180A. Advanced treatment of selected topics in cellular neurophysiology.

150. Musculoskeletal Anatomy, Physiology, and Biomechanics (4 units). Lecture, two hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C252.

153. Dissection Anatomy. Lecture, two hours; laboratory, six hours. Prerequisite: course 111B, departmental approval. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

155. Development and Structure of Musculoskeletal System. Prerequisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological properties of the intact system.

M158. Cell Biology (6 units). (Same as Biology M158.) Lecture, three hours; laboratory, six hours. Prerequisites: Chemistry 10A and 10B/10BL, or 11A, 11B/11BL, and 11CL; or 20A, 20B, 20L, 30, and 30L. Life Science of eukaryotic cells with emphasis on correlation of structure and function at the molecular, organellar, and cellular levels.

M173. Anatomy and Physiology of Sense Organs. (Same as Biology M173.) Lecture, three hours; discussion, one hour. Requisites: courses 111A (or Molecular, Cell, and Developmental Biology M175A-M175B). Structure and function of sense organs; acquisition of quantitative and comparative approaches to provide insight into evolution of sense organs in both invertebrates and vertebrates.

M180A-M180B-M180C. Neuroscience: From Molecules to Mind (5 units each). Lecture, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour; letter grading: M180A. Cellular and Systems Neuroscience. Requisites: Chemistry 132A, Life Sciences 2, Physics 6B or 8C. Not open for credit to students with credit for Physiology 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M180A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M180A. Cellular and Systems Neuroscience focuses on neuron structure, function, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

M180B. Molecular and Developmental Neurosciences. Requisites: course 111A (or Molecular, Cell, and Developmental Biology 171 or Psychology 115) or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent ion channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

M180C. Behavioral and Cognitive Neuroscience. Requisite: course 111A (or Molecular, Cell, and Developmental Biology 171 or Psychology 115) or M180B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Psychology M117B). Neural mechanisms underlying motivation, learning, and cognition.

M161. Biological Bases of Psychiatric Disorders. (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Psychiatry M191, and Psychology M117J.) Requisite: course 111A or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101B or Psychology M117J. Understanding brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

190A. Honors Thesis. (Formerly numbered 199HA.) Requisites: courses 111A-111B. Intended for physiological science honors program students. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive written and oral research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 190B).

190B. Honors Thesis. (Formerly numbered 199HB.) Requisite: course 190A. Continued reading and research that culminate in final honors thesis. Only four units of course 190/199 may be applied toward elective requirements for the major.

190C. Advanced Studies for Honors Thesis. (Formerly numbered 199HC.) Requisite: course 190B. Additional course to provide individual research opportunities for departmental honors students.

191A-191Z. Variable Topics in Physiological Science. (Formerly numbered 199AH-199ZH.) Requisite: course 190A. Course is repeated for credit with topic change.

193. Field Studies in Physiological Science. Lecture, one hour; fieldwork, six to eight hours. Prerequisites: senior standing, departmental application. Supervised field studies in one career related to physiological science. May not be repeated for credit and may not be applied toward elective requirements for the major. P/NP grading.

195. Research in Physiological Science (2 units). Lecture, one hour; discussion, one hour. Corequisite: course 199 or 199H or participant in Student Research Program. Instruction in principles of scientific method, writing, and ethics; critique of current journal articles and research projects. Students present individual research proposal with background literature. P/NP grading.

196A-196B. Laboratory Practicum in Physiological Science (2 units each). Laboratory, four hours; outside study, eight hours. Prerequisites or corequisites: course 153, departmental application. Supervised practice and training for advanced students who serve as graduate assistants in basic anatomical research in preparation of laboratory materials and innovative experiments. May be repeated for credit but may not be applied toward elective requirements for the major.

197A-197Z. Variable Topics in Physiological Science. Prerequisite: upper division standing. Variable topics courses which cover specific subjects of special interest. May be repeated for credit with topic change.

199. Special Studies in Physiological Science (2 or 4 units). Prerequisites: physiological science major with advanced junior standing and 3.0 GPA in the major or senior standing, courses 111A-111B, consent of instructor and undergraduate affairs chair. Directed independent research with a faculty member. Course application must be submitted to undergraduate affairs chair during first week of classes. Only four units of course 199/199H may be applied toward elective requirements for the major.

Graduate Courses

CM200. Experimental Statistics. (Same as Biostatistics M220.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas; bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course C100, S/U or letter grading.

CM202. Cellular Neurophysiology. (Same as Neuroscience M202.) Lecture, three hours; discussion, one hour. Prerequisites: courses 111A or 180A or Physics 6B, Biology 166 or Molecular, Cell, and Developmental Biology 171. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

M205. Behavioral and Systems Neuroscience. (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of the behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cellular and physiological properties of fundamental mechanisms that mediate behaviorally defined functions.

206. Metabolism of Organ Systems Affected by Exercise. Prerequisite: Chemistry 132B/132BL. Key regulatory mechanisms of metabolism involved in exercise and adaptation.
M210. Molecular and Cellular Mechanisms of Neural Integration (5 units). (Same as Neuroscience M262.) Lecture, four hours; discussion, two hours. Prerequisite: consent of instructor. Examination of the nervous system in control of respiration, circulation, and other functions associated with regular exercise training.

M247. Neural Control of Cardiopulmonary Function. (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Prerequisites: courses 111A and 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section may be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

M245. Neural Mechanisms Controlling Movement (5 units). Lecture, four hours; outside study: 2 hours. Prerequisites: course 111B or M180B. Role of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrency required with course C145.

C243. Neuromotor Control of Posture and Movement (5 units). Lecture, four hours; outside study: 11 hours. Prerequisite: course 142. Examination of theories of neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

C244. Neural Control of Physiological Systems (5 units). Lecture, two hours; outside study: 8 hours. Prerequisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section may be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

C245. Neural Mechanisms Controlling Movement (5 units). Lecture, four hours; outside study: 11 hours. Prerequisites: course 244 or course M202. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrency required with course C145.

M247. Neural Control of Cardiopulmonary Function. (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Prerequisites: courses 111A, 111B or 112 or M180A, M180B or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS regulation, including underlying 1 generation of respiration rhythm, sympathetic and parasympathetic tone, 2 determination of patterns of motor outflow, and 3 responses to changes in behavioral state or aftereffect signals. Emphasis on critical reading of literature.

C250A. Muscle Dynamics. Lecture, two hours; discussion, one hour. Prerequisites: M225. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling.

C252. Musculoskeletal Anatomy, Physiology, and Biomechanics (5 units). Lecture, three hours; outside study: 12 hours. Prerequisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Controversial tissues, normal physiologist, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C152.

M260. Neuromuscular Factors in Movement Regulation. (Same as Neuroscience M260.) Prerequisite: course 138 or consent of instructor. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of motor regulation. S/U or letter grading.

M263. Neuromotor Control of Posture and Movement (5 units). Lecture, four hours; outside study: 11 hours. Prerequisite: course 142. Examination of theories of neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

M272. Neuroimaging and Brain Mapping. (Same as Neuroscience M272 and Psychology M213.) Lecture, three hours; outside study: 11 hours. Prerequisites: courses 111B and Psychology M201. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain registry, brain function, and their relationship discussed with regard to imaging.

M290. Seminar: Comparative Physiology (2 units). (Same as Biology M290.) Seminar, two and one-half hours. Prerequisite: course 202. Topics selected from specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroendocrinology, and behavioral physiology. S/U or letter grading.

291A-291B-291C. Seminars: Cardiovascular Function and Adaptation (2 to 4 units each). Prerequisite: consent of instructor. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

292. Evolution and Development of Auditory System (2 or 4 units). Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system. Concurrently scheduled with course C245. May not be applied toward degree requirements. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation (2 to 4 units each). Prerequisites: courses 138 and M260, or consent of instructor. Topics selected on musculoskeletal determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

M295A-M295B-M295C. Seminars: Neural Control of Movement (2 to 4 units each). (Same as Neuroscience M255A-M255B-M255C.) Prerequisite: course M240 or M247 or M260. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

M295A-M295B-M295C. Seminars: Neural Control of Movement (2 to 4 units each). (Same as Neuroscience M255A-M255B-M255C.) Prerequisite: course M240 or M247 or M260. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice paid under active faculty supervision of a regular faculty member responsible for curriculm and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Physiological Science (2 units). Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation, and use of teaching aids. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate advisor and dean. Open to both campus and self-supporting, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
Physiology / 483

Areas of Study
See below under Doctoral Degree.

Course Requirements
Nine courses, of which at least five must be graduate courses, are required for the master's degree. A maximum of eight units of 500 series courses may be applied to the total course requirements; only four units may be applied to the graduate course requirement.

Comprehensive Examination Plan
Consult department.

Thesis Plan
Consult the department.

Doctoral Degree
Admission
All candidates for admission to graduate status in the Department of Physiology are expected to pursue the Ph.D. degree; the department does not admit candidates for the M.S. degree. In special cases, a terminal master's degree may be awarded on completion of suitable coursework and the completion of a comprehensive examination or submission of an acceptable thesis. Ph.D. students must conform to the general admission requirements established by the Graduate Division and have received a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, completed coursework should include courses in mathematics through calculus and differential equations, college physics, chemistry (including organic chemistry and biochemistry), and biology (courses in cell biology and molecular biology are highly recommended). In general, candidates seeking admission to the Physiology Department should apply through the ACCESS program.

In special cases, at the discretion of the department, if an applicant lacks preparation in one of the above-mentioned courses but has a strong background in areas pertinent to physiology, the student may be admitted to graduate status provided that deficiencies are made up. (It is recommended that the deficiencies be corrected prior to matriculation.)

Applicants must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in the applicant's undergraduate major; MCAT scores are accepted in lieu of the GRE; (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research; and (4) an essay describing academic background, work experience, motivation for research, and career goals. Selected applicants are asked to have an interview with members of the graduate program committee (composed of faculty and a graduate student representative) or a designated interviewer. The graduate program committee then, in a written evaluation, advises the de-
partamental committee on instruction of its recommended admits. Final decisions of admittance to the graduate program reside with the committee on instruction which examines the recommendations for academic excellence, promise in scientific career goals consistent with the scientific expertise of the faculty, and the existence of financial support for the admit during the first and subsequent years of training.

An application packet and ACCESS brochure are available from UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6150. Additional information can be obtained from the Graduate Student Office - Department of Physiology, UCLA School of Medicine, Box 951751, Los Angeles, CA 90095-1751. Applicants should submit applications by December 15.

**Major Fields or Subdisciplines**

The major fields in which graduate students may pursue research include (1) cellular physiology and biophysics; (2) molecular physiology; and (3) integrative physiology. The subdisciplines of these areas include cellular and molecular electrophysiology; membrane transport; cellular signal transduction; channel and transporter structure and function; muscle physiology; fundamental neurophysiology; neuromuscular physiology; and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

**Course Requirements**

The following courses are required during the first two years: Biological Chemistry CM253; Physiology M204 or Neuroscience M205 or Physiology M210; Physiology M209A (Biological Chemistry CM267 or Microbiology and Immunology M229) may be substituted with permission of the graduate adviser), M212, M213.

In addition, during the first two years, a total of 12 units must be completed in techniques or special topics courses (e.g., Physiology 220 through 298) or comparable courses in cell biology, neuroscience, molecular biology, chemistry, or biology) as governed by research interest. The specific courses are determined in consultation with the mentor and the Instruction Committee.

Three laboratory rotations must be taken during the first year. Two quarters of teaching assistantships are required during the second year of the program. The remaining time is to be devoted to developing and pursuing dissertation research (Physiology 597 and 599).

**Written and Oral Qualifying Examinations**

The written examination is taken during the summer following the completion of the second year. The purpose of the examination is to assess ability to read and critically evaluate research papers in the chosen division of physiology (e.g., molecular, cellular, or integrative physiology). About three to four weeks prior to the examination, students are given three reading lists (generated by professors selected by the graduate program committee), each containing five to 10 articles (including review articles and short reports such as those found in Science and Nature) on three different topics. During the written examination, students are asked one or more essay questions in the area of two of the reading lists. For the third area, students are given an actual short article that is missing its discussion section; students are asked to write a discussion for that paper. The examination is closed book and is taken on two consecutive half days. The examination is number coded and read by selected faculty. A pass/fail grade is assigned by the graduate program committee.

The University Oral Qualifying Examination is designed to establish that students can independently identify significant research questions, put them in context of existing knowledge in physiology, design appropriate and realistic protocols for testing hypotheses, and assure that the dissertation project is both appropriate and feasible. The examination takes place by the end of the Fall Quarter of the third year (end of seventh quarter) and is based on a written proposal circulated to members of the doctoral committee at least seven days prior to the examination. This proposal should pose an original research question outside the immediate area of dissertation research, should provide enough background (with references) to put the question in context of previous work, and should propose the experimental design that would be used to test the hypotheses in the proposal. The proposal must have the form of a mini-research grant application of about 20 pages, double spaced. Students must have independently generated the hypotheses to be tested and the experimental design for the testing of the hypotheses. Although students may consult faculty members or other students for information as to the execution of certain protocols, such as for references, the creative and critical aspects of the proposal must be the student's own work. The examination is an oral presentation of this proposal with concurrent questioning by the committee. The written proposal contains a brief two- to four-page summary of the proposed dissertation which is also discussed at the oral examination with the goal of clarifying its suitability as a Ph.D. project.

**Midstream Oral Presentation**

In addition to the oral qualifying examination, there is a midstream oral presentation (to occur eight to 12 months after the oral qualifying examination) in which progress on the research project is reviewed by the thesis committee. The purpose of this presentation is to inform the committee of research progress, to gain approval of significant changes in research direction that may have occurred, and to provide any additional help or guidance from the committee to assure that the dissertation is completed in an appropriate and timely fashion. The presentation is mandatory but is not an examination. The dissertation research adviser is expected to write a summary of any comments made by the doctoral committee at this time for inclusion in the student's folder.

**Grades and Reexamination**

Both the written and University Oral Qualifying Examinations are graded pass or fail. In the event that the committee for either examination concludes that a failing grade is necessary, the examining committee may decide to grant one additional opportunity to pass the examination at a time to be determined by the committee. The interval between the first and second examination, however, should not exceed two months, except in special circumstances. The same faculty committee administers and grades the second examination.

**Physiology**

**Lower Division Course**

88. Lower Division Seminar: Special Topics in Physiology. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics semester which examines specific issues or problems and ways that professionals in physiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

**Upper Division Courses**

100. Elements of Human Physiology (6 units). Prerequisite: dental student standing or consent of instructor. Primarily for first-year dental students. Major organic body functions. With special supplementations, a suitable introduction to the field for graduate students for whom the 201A-201B course sequence is too extensive.

199. Special Studies (1 to 8 units). Prerequisite: consent of instructor. Special studies in physiology, including either reading assignments or laboratory work or both, designed for proper training of students.

**Graduate Courses**

201A-201B. Organ System Physiology (6 units each). Lecture, six hours; laboratory, three and one-half hours. Prerequisite: medical student standing or enrollment in qualified graduate program, consent of instructor. Recommended corequisites: courses M203A-M203B. Runs throughout School of Medicine's second semester. Lectures, laboratories, and conferences. Properties of biological membranes. Contractility of muscle, epithelial transport, cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in same academic year. In Progress grading.

M203A-M203B. Basic Neurology. (Same as Neurobiology M203A-M203B). Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine's second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.
M204. Cellular and Molecular Developmental Neurobiology. (Same as Neurobiology M204, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular- and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M209A. Molecular Cell Biology (6 units). (Same as Molecular Cell and Developmental Biology CM220 and Neurobiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function, and replication.

M210. Molecular and Cellular Mechanisms of Neural Integration (5 units). (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Prerequisite: course M209A or Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptor-mediated cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

M212. Introduction to Cellular Physiology and Biophysics (6 units). (Same as Molecular, Cell, and Developmental Biology M237 and Physiological Science M212.) Lecture, five hours. Prerequisite: course M209A or Psychology 111A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

M213. Principles of Integrative Physiology (6 units). (Same as Physiological Science M213.) Lecture, four hours; discussion, two hours. Prerequisite: graduate or professional division undergraduates; consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

220. Methods in Cell Physiology (6 units). Prerequisite: consent of instructor. Linear circuit analysis, including admittance, transient admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in laboratories and with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential elements, and A/D and D/A conversion, with introduction to sampling theory.

221. Cell Physiology: Excitation (6 units). Prerequisite: course 220 or consent of instructor. In-depth coverage of general properties of excitable cells, linear cell properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

222. Cell Physiology: Cellular Interaction. Prerequisite: consent of instructor. Simple and complex cellular interactions in nervous system. Study of synaptic transmission and to higher-level cell-cell interactions, culminating in examination of mechanisms of central nervous system functions.

M223. Membrane Molecular Biology. (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Prerequisite: Biological Chemistry CM253 or consent of instructor. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

224. Transport Systems in Cell Membranes. Prerequisite: consent of instructor. Properties of pumps and carriers in cell membranes and ion (Na, K, Ca) transport across plasma membranes of single cells and epithelia.

M225. Comparative Endocrinology: Molecular to Behavioral. (Same as Physiological Science CM225.) Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

227. Biochemistry and Mechanics of Muscle (2 to 6 units). Prerequisite: consent of instructor. Detailed study of biochemistry, energetics, and contractile mechanisms in muscle.

M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars (2 units each). (Same as Neurobiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor(s). Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

296. Current Topics in Physiology (2 to 4 units). (Formerly numbered 250A-250B-250C.) Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. S/U or letter grading.

297. Directed Individual Study or Research (2 to 12 units). Prerequisite: consent of instructor.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor.

598. Thesis Research for M.S. Candidates (2 to 12 units). Prerequisite: consent of instructor.

599. Dissertation Research for Ph.D. Candidates (2 to 12 units). Prerequisite: consent of instructor.

Scope and Objectives
The Department of Policy Studies is an interdisciplinary unit composed of faculty members from around the campus, as well as faculty unique to the department. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include social insurance and welfare programs, unemployment and training, drug policy and crime, economic development, environmental quality, education, and health care. The department plays a major role in two schoolwide programs: the Master of Public Policy (M.P.P.) degree and the undergraduate minor in public policy.

The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, and political processes. The undergraduate minor familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on both programs, see Public Policy and Social Research Schoolwide Programs later in this section of the catalog.

Policy Studies

Lower Division Courses

10A. Introduction to Public Policy. Lecture, three hours; outside study, nine hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor’s own research, visitors, small student projects, or field trips.

10B. Applied Policy Analysis. Lecture, three hours; outside study, nine hours. Enforced prerequisite: course 10A. Applications of public policy analysis to actual policy interventions and issues along various dimensions: local, national, international, and historical. Guest speakers from regulatory agencies or interest groups affected by such agencies may be included.
Upper Division Courses

101. Drug Abuse Control Policy. Lecture, three hours; outside study, nine hours. Introduction to and development of main ideas and themes that enter into analysis and execution of policies directed at control of substance abuse and its side effects; illustrations and instantiation of main techniques and concepts of policy and management analysis.

102. Rational Self-Interest: Concepts and Paradoxes. Lecture, three hours; outside study, nine hours. Development of central concepts of rational-choice model and examination of theories and evidence about systematic ways in which actual behavior deviates from that model. Exploration of various reasons groups of rationally self-seeking individuals might fail to act as rationally self-seeking groups and discussion of policy implications of individual and collective departures from rational action.

103. Ethics, Morality, and Public Life: Contemporary Controversies. Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop normative or prescriptive methodologies to analyze such questions, but to enhance their critical thinking skills.

104. Culture and Political Structure of Los Angeles. Lecture, three hours; outside study, nine hours. Exploration of two pieces of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. Who are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is “mainstream” today? How does political structure help or impede the notion of a united city?

120. Race, Inequality, and Public Policy. Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning policy responses to social problems in urban America.

141. Employment and Labor Policy: Survey. Lecture, three hours; outside study, nine hours. Required: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. Pro and con philosophical analysis of reasons for government regulation. Analysis of current data on labor unions, the workplace, labor standards in (1) historical context (economic, political, and labor-market trends), (2) current issues in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation.

142. Labor Markets and Public Policy. Lecture, three hours; outside study, nine hours. Preparation: one microeconomics course. Required: course 10A. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, employment, and minority and female labor-market experience.

144. Comparative Industrial Relations. Lecture, three hours; outside study, nine hours. Required: course 10A. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resources of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutional ideologies of labor management, and government, and interaction of their power relationships; substance and manner of determination of “Web of rules” governing rights and obligations of the parties; and resolution of conflicts.

145. Labor Policies in the U.S.: Historical Perspective. Lecture, three hours; outside study, nine hours. Required: course 10A. Insight into evolution of labor policy in the U.S. from 19th century to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupational health, and health and safety. Emphasis on international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) motivation and action of major players (business, labor, government), and (3) changes in patterns of government involvement in public policy.

148. Business and Public Policy. Lecture, three hours; outside study, nine hours. Required: course 10A. Introduction to key concept of interaction at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, nature of business/government relationship, business and political activity, and major government policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (energy, environment, risk, liability, corporate governance); and corporate social responsibility, business ethics, and green business. Discussion of topics in their historical and political context, with comparison between economic regulation in the U.S. and other countries.

197. Research Seminar: Policy Studies. Seminar, three hours; outside study, nine hours. Required: courses 10A, 10B. Required of students in policy studies minor. Production of research paper that examines in depth a particular issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation.

Graduate Courses

202. American Political Institutions and Processes. Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional system and American bureaucracy in its political setting. Examination of political aspects of policy analysis and program evaluation, with attention to market-like solutions to policy problems and budgeting.

203. Statistical Methods for Public Policy. Lecture, three hours; outside study, nine hours. First course in two-term sequence. Review of basic statistical principles. Topics include descriptive statistics for sample data, notions of probability, expected value of expectations, useful discrete and continuous univariate distributions, bivariate distributions, marginal and conditional probability, covariance and correlation, statistical independence, random sampling, estimators, unbiasedness and efficiency, statistical inference, ANOVA, etc.

204. Economic Analysis of Public Policy. Lecture, three hours; outside study, nine hours. Required: course 201 or equivalent prior coursework in economic experience in using microeconomic theory to analyze and make decisions in public sector. Emphasis on specific policy economic tools. Introduction to public finance institutions. Topics include valuing public benefits and costs, investment theory and decision criteria, trends in public revenue and expenditure, methods of infrastructure finance, political economics of public service distribution among and within cities.

205. Bureaucracy and Public Management. Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies.

206. Policy Formulation and Implementation. Lecture, three hours; outside study, nine hours. Analysis of how policy is formed and implemented. How policies are formulated, by whom, how political agendas are set, how to specify relationships between politicians, bureaucrats, lobbyists, and media and impact of public participation in process of bargaining and negotiation; how to evaluate policies after they have been adopted and implemented. Use of case studies.

207. Political Economy. Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business/government relations. Analysis of domestic policy options nations are pursuing to economic globalization, such as protectionism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAFTA and nongovernmental organizations, to address global environmental crisis, etc.

208. Policy Research and Analysis. Lecture, three hours; outside study, nine hours. Required: course 203. Second course in two-term sequence. Quantitative tools of public policy research. Survey research, data analysis, data acquisition and analysis, conceptualization, and written analysis and presentation.

209. Seminar in Policy Studies. Seminar, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional system and American bureaucracy in its political setting. Examination of political aspects of policy analysis and program evaluation, with attention to market-like solutions to policy problems and budgeting.

211. Public Policy and Policy Analysis and Their Families. (Same as Social Welfare M290P) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy, exploration of current proposals, and issues. S/U or letter grading.

212. Child Welfare Policy. (Same as Social Welfare M296I.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of infrastructure to support needs of children and families. S/U or letter grading.

213. Mental Health Policy. (Same as Social Welfare M290K) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

214. Poverty, the Poor, and Welfare Reform. (Same as Social Welfare M290L) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

486 / Policy Studies
Course Descriptions

M215. Health Policy. (Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M216. Public Policy for Children and Youth. (Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M220. Transportation and Land Use. (Same as Urban Planning M228.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M222. Transportation Economics, Finance, and Policy. (Same as Urban Planning M229.) Lecture, three hours. Overview of transportation finance and economic concepts of efficiency and equity in transport finance; historical evolution of highway and transit finance; current issues in highway finance: private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; travel fare and subsidy policies, contracting and privatization of transportation services.

M223. Transportation and Environmental Issues. (Same as Urban Planning M230.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

M230. Labor Markets and Public Policy. (Same as Management M255C.) Lecture, three hours. Graduate-level survey of research literature on labor market phenomena; chiefly labor markets, labor unions, and public policy. Current research in economics, industrial relations, political science, and sociology, with emphasis on international and comparative dimensions of topics covered. S/U or letter grading.

M231. Comparative Industrial Relations. (Same as Management M255D.) Lecture, three hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutions, philosophies, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of “web of rules” governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

M240. Urban and Regional Economic Development I. (Same as Urban Planning M236A.) Lecture, three hours. Introduction to industrial change and effect on urban and regional development theory and policy. Major topics include role of industrialization in economic development, explanations of regional industrial growth and decline, rise and fall of Fordism and its regional patterns, new forms of industrialization with particular emphasis on flexible production, and debates regarding political economy of industrialization.

M241. Introduction to Regional Planning: Evolution of Regional Planning Theories. (Same as Urban Planning M232A.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

M269. Health Policy Seminar. (Same as Health Services M249E.) Requisite: Biostatistics 100A, 100B, Health Services 200A-200B-200C. Public policy concerning payment for medical care services and characteristics of the market for those services: demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs.

290. Special Topics in Public Policy. Discussion, two to three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. S/U grading.

298A-298B. Seminars: Applied Policy Analysis. Seminar, three hours; outside study, nine hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and field placement (unless waived). Two-term seminar in which students prepare major public policy projects and papers which are case studies of policy evaluation and implementation and are equivalent to professional master’s theses. Papers build on prior core courses, fieldwork experience, and policy cluster courses. In Progress and S/U grading.

John Zaller, Ph.D.

Professors Emeriti
Hans B. Baerwald, Ph.D.
Irving Bernstein, Ph.D.
David T. Cattell, Ph.D.
Winston W. Crouch, Ph.D.
Matti Dogan, Docteur ès Lettres
Ernest A. Engelbert, M.P.A., Ph.D.
David G. Farrelly, Ph.D.
Leonard Freedman, Ph.D.
Robert C. Fried, Ph.D.
Edward Gonzalez, Ph.D.
Douglas S. Hobbs, Ph.D.
Marvin Hoffenberg, M.A.
Michael D. Intriligator, Ph.D.
Roman Kolkowicz, Ph.D.
Andrzej Korbonski, Ph.D.
Dwaine Marvick, Ph.D.
Charles R. Nixon, Ph.D.
David C. Rapoport, Ph.D.
Foster H. Sherwood, Ph.D., LL.D.
Richard L. Sklar, Ph.D.
Leo M. Snowiss, Ph.D.
David A. Wilson, Ph.D.
Ciro Zoppi, Ph.D.

Associate Professors
Richard D. Anderson, Jr., Ph.D.
Barbara Geddes, Ph.D.
Deborah W. Larson, Ph.D.
Sussanne Lohmann, Ph.D.
Raymond A. Rocco, Ph.D.
James Tong, Ph.D.

Assistant Professors
Kathleen Bawn, Ph.D.
Scott C. James, Ph.D.
John B. Londregan, Ph.D.
Mohan N. Penuel, Ph.D.
Michael F. Thies, Ph.D.
Daniel S. Treisman, Ph.D.
Brian Walker, Ph.D.

Scope and Objectives

The undergraduate program in political science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline
while enabling them to acquire additional skills for advancing their professional careers.

**Undergraduate Study**

**Bachelor of Arts Degree**

**Prepolitical Science Major**

All students intending to major in political science must enroll as prepolitical science majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

**Preparation for the Major**

**Required:** Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are requisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or one of the following statistics courses: Anthropology 80, Economics 40, Geography 40, Psychology 41, Social Sciences 40, Sociology 18, Statistics 50.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

**The Major**

**Required:** Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

1. A **concentration** in one field by completing the lower division course and at least four upper division courses in that field.
2. A **distribution** of the lower division course and two upper division courses in each of two other fields (four upper division courses).
3. Two additional elective courses in political science to comprise the total of 10.

**Field Concentration Requirements**

The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

1. **Political Theory:** Political Science 10 and any four courses in Field I.
2. **International Relations:** Course 20 and any four upper division courses in Field II.
3. **American Politics:** Course 40 and any four courses in Field III.
4. **Comparative Politics:** Courses 50, 168, and any three additional courses in Field IV. Courses 115 and 118 may also be applied toward concentration in this field.

Courses 119, 139, 149, and 169 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Political science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units (effective Fall Quarter 1997) for graduation. Additional upper division units must be taken to reach to 60-unit total.

**Undergraduate Seminars**

Each term the department offers a series of seminars (Political Science C197A-C197D) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

**Honors Program**

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before they enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) three upper division courses in one or two of the social sciences other than political science.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnnet.ucla.edu.

**Master’s Degree**

**Admission**

The department admits only those students whose degree objective is the Ph.D. degree. A Master of Arts degree may be earned as part of the process of completing requirements for the Ph.D.

**Areas of Study**

Consult the department.

**Comprehensive Examination Plan**

Consult the department.

**Thesis Plan**

Consult the department.

**Doctoral Degree**

**Admission**

In addition to University minimum requirements, the department requires three letters of recommendation, scores of the General Test of the Graduate Record Examination (GRE), and a sample of applicants’ analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise. Applicants may write for departmental brochures to the Graduate Studies Office. The department does not have an application form in addition to the UCLA Application for Graduate Admission. The deadline for receipt of all application materials is December 15 of the year preceding the Fall Quarter in which students plan to register.

**Major Fields or Subdisciplines**

Five fields of study are offered to graduate students in the department: political theory; international relations; American politics; comparative politics; and formal theory and quantitative methods.

**Course Requirements**

Students must take Political Science 200A and 200AL (statistics), four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses. Fields decide which courses meet major and minor field requirements.

Of these 16 required courses, students must take at least seven during their first year of graduate study and 12 by the end of their second year.

With the approval of the graduate adviser and the dean of the Graduate Division, graduate
courses in political science taken elsewhere may be applied toward departmental course requirements. The maximum number of such courses is six if students come to UCLA with a master’s degree in political science and choose to forego another master's degree from UCLA. In all other cases, the maximum is four for courses taken at another UC campus and two for courses taken outside the UC system.

Written and Oral Qualifying Examinations

Research Paper Requirement. Students must submit two research papers, one by the beginning of the seventh term of graduate study and one by the beginning of the ninth term of graduate study. These papers may also have been used to meet course requirements. Each paper is assigned to two or more faculty graders by the Graduate Studies Committee. Papers can be graded qualified, not qualified, or qualified with distinction. If a paper is graded not qualified, students may submit a revised version or another paper, once only. Resubmitted first papers are due two weeks before the end of the ninth quarter. Resubmitted second papers are due two weeks before the end of the tenth quarter. For the Ph.D., students must receive at least a qualified grade on both papers. Papers are evaluated for knowledge of subject, originality of ideas, and craftsmanship of research. They are also evaluated for conciseness; good papers may vary in length but are not expected to exceed 30 pages. They need not be publishable, but in their structure and format and in their coverage of topics and tasks are expected to resemble papers published in peer-reviewed journals of their fields. The committee evaluating the papers assumes that students have not devoted all their research time to two papers but have selected for submission, or for revision and submission, the best two from a portfolio of several seminar papers.

By the tenth quarter of graduate study, students must present a research design for their dissertation in a seminar or colloquium. It need not be the version students submit for the University Oral Qualifying Examination.

Students may take that examination after they have completed their course and paper requirements and written a dissertation proposal accepted by their research adviser. But students must take it no later than their twelfth quarter of graduate study, and the examination committee may have the proposal at least two weeks before the examination.

The examination committee judges the feasibility and worth of the project and the student’s ability to undertake it. The committee also may recommend changes in the research design.

Political Science

Lower Division Courses

6. Introduction to Quantitative Research. Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

10. Introduction to Political Theory. Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

20. World Politics. Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

30. Introduction to Political Economy. Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading.

40. Introduction to American Politics. Lecture, three hours; discussion, one hour; outside study, eight hours. Basic institutions and processes of democratic politics. Treatment of themes such as the constitution, political parties, Americanization, representation, participation, and leadership. Writing, oral presentation, and political campaigns are topics in the American case. P/NP or letter grading.

50. Introduction to Comparative Politics. Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and processes of political change in selected countries. P/NP or letter grading.

88A-88D. Lower Division Seminars. Formerly numbered 88A-88F. Seminar, three hours. Limited to freshmen/sophomores. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C- or better in previous attempts. P/NP or letter grading. 88A. Political Theory. 88B. International Relations. 88C. Politics. 88D. Comparative Politics.

Upper Division Courses

Requisite for all upper division courses: upper division standing or consent of instructor.

102. Statistical Analysis of Political Data. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Statistical techniques and topics illustrated with applications to a variety of political data.

104A-104B. Introduction to Survey Research. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Courses in fundamentals of survey research as a method. 104A. Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem. 104B. Prerequisite: course 104A. Conducting a survey, development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

M105. Economic Models of Public Choice. (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course, and junior/senior standing, or consent of instructor. Analysis of models of decision making in governmental and collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

M106. Economic Models of Political Conflict and Conflict Resolution. (Same as Economics M136.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course or, and junior/senior standing, or consent of instructor. Instruction in the use of computer, biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments, Motivating the onset and termination of conflict. Conduct of war: strategy and tactics.

Field I: Political Theory

111A-111B-111C. History of Political Thought. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Exposition and critical analysis of major political philosophers and schools. 111A. Ancient and Medieval Political Thought from Thucydides to Machiavelli. 111B. Early Modern Political Theory from Hobbes to Bentham. 111C. Late Modern and Contemporary Political Theory from Hegel to the Present.

112A. Democratic Theory. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

113. Problems in 20th-Century Political Theory. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study and interpretation of theologians who have focused their analyses on social and political problems of the 20th century.

114A-114B. American Political Thought. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. 114A. Exposition and critical analysis of American political thinkers from the Puritan period to 1865. 114B. Prerequisite: course 114A or consent of instructor. Exposition and critical analysis of American political thinkers from 1865 to the present.

115. Theories of Political Change. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical examination of theories of political change, relation of political change to economic and social systems and relevance of such theories for experience of both Western and non-Western societies. May be applied toward either Field I or IV.

116. Marxism. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical analysis of origins, nature, and development of Marxist political theory.

117. Jurisprudence. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. May be applied toward either Field I or III.

118. Political Violence. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'état, assassination, and terrorism. May be applied toward either Field II or IV.
119A-119Z. Special Studies in Political Theory. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 10, one additional course in Field I, consent of instructor. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in Schedule of Classes for preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Field II: International Relations

120. Foreign Relations of the U.S. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study of formation of American foreign policy, with special emphasis on contemporary problems.

121. Studies in Formulation of American Foreign Policy. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study of formation of American foreign policy with respect to individual cases. Consult Schedule of Classes for topics for the subsequent term.

122. World Order. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of problems of the international system seen as a community capable of cooperation and development.

123A-123B. International Law. ( Formerly numbered 175A-175B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. Study of nature and place of international law in conduct of international relations. May be offered in consecutive semesters. If offered consecutively, course 123A is prerequisite to 123B, and students may take 123A alone for four units credit. If offered simultaneously, student must take both courses for eight units. Maximum of four units may be applied toward Field II.

124. International Political Economy. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of political aspects of international economic issues.

125. Arms Control and International Security. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

126. Peace and War. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Theory and research on causes of war and conditions of peace.

127A-127B. Atlantic Area in World Politics. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. 127B. U.S. and Europe. Prerequisite: course 127A or consent of instructor. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S./Soviet relations.

128A. U.S./Soviet Relations. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Survey of relations between the U.S. and former Soviet Union from revolutions of 1917 to collapse of the U.S.S.R. in 1991.}

128B. International Relations of Post-Communist Russia. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 128A or consent of instructor. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia's relations with NATO, the former communist states of Eastern Europe, China, and the Commonwealth of Independent States.

129. Comparative Foreign Economic Policy. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: one hour (optional); outside study, eight or nine hours. Interactions of international and domestic factors in political and economic evolution of Latin America.

131. Latin American International Relations. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Major problems of Latin American international relations and organization in recent decades.

132A-132B. International Relations of the Middle East. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Contemporaneous regional issues and conflicts, with particular attention to Arab-Israeli conflict, and Persian Gulf area. 132B. Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945.

133. International Relations of Sub-Saharan Africa. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers.

134. Foreign Policy Decision Making and Tools of Statecraft. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 120 or consent of instructor. Contrasts purposive and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

135. International Relations of China. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-à-vis the U.S. and Soviet Union.

136. International Relations of Japan. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

137A-137B. International Relations Theory. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. 137A. Examination of various theoretical approaches to international relations. P/NP or letter grading. 137B. Alternative approaches to analysis of international politics and their application to historical and contemporary cases.

139A-139Z. Special Studies in International Relations. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field II, or course 20 and one course in Field II, and consent of instructor. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

M139A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M139A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

Field III: American Politics

140A-140B-140C. National Institutions. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. 140A. Congress. (Formerly numbered 143.) Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. 140B. The Presidency. (Formerly numbered 144.) Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, Congress, public opinion, interest groups, and party systems on the presidency and national policy-making. 140C. Supreme Court. (Formerly numbered 70.) Introduction to American constitutional development and role of Supreme Court in interpreter of the U.S. Constitution. Ranking of Supreme Court cases as well as various historical and current commentaries.

M141A-M141D. Electoral Politics. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Political Psychology. (Formerly numbered M140.) (Same as Psychology M138.) Prerequisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

141B. Public Opinion and Voting Behavior. (Formerly numbered 141.) Prerequisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relations of political attitudes to the vote decision, and influence of public opinion on public policy formulation.

141C. Political Behavior Analysis. (Formerly numbered 146.) Prerequisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses.

M141D. Mass Media and Elections. (Formerly numbered M141.) (Same as Communications Studies M141.) Prerequisite: course 40. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

142A-142B-142C. Political Parties and Interest Groups. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. 142A. Political Parties. (Formerly numbered 145.) Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political influence of and policy formulation practices. 142B. Politics of Interest Groups. (Formerly numbered 142.) Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and goals of such groups to goals and functions of various types of groups and to strategy and tactics of influence. 142C. Government and Labor. (Formerly numbered 147.) Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.
143A-143B. Subnational Government. (Formerly numbered 183A-183B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. 143A. American State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with an emphasis on the Connecticut idea. 143B. Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

M144A-M144B. Ethnic Politics. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40, and one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor:

M144A. Chicano/Latino Politics. (Formerly numbered M147A.) Same as Chicana and Chicano Studies M147A. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

M144B. African American Politics. (Formerly numbered M147B.) Same as Afro-American Studies M144. Course M144A is not prerequisite to M144B. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

145A-145D. Public Law and Judicial Process. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40.

145A. Anglo-American Legal System. (Formerly numbered 170.) Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

145B. Constitutional Law — Separation of Powers. (Formerly numbered 172A.) Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

145C. Constitutional Law — Civil Liberties. (Formerly numbered 172B.) Protections of civil and political rights and liberties under the constitution.

145D. Judicial Oversight of the Bureaucracy. (Formerly numbered 185B.) Legal controls of administration action, substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

146A-146F. Organization Theory, Public Policy, and Administration. ( Formerly numbered 146A-146E.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours.

146A. Public Administration and Policy. (Formerly numbered 80.) Requisite: course 40. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

146C. Governing the Bureaucracy in the U.S. (Formerly numbered 186.) Requisite: course 40. Designed for juniors/seniors. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats).

146D. Theories of Organization and Decision Making. (Formerly numbered 180.) Requisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

146E. National Policy Development and Implementation. (Formerly numbered 182A-182D.) Requisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including national, federal, state, and local agencies as well as private organizations. Special sections offered on particular policy areas, with topics announced in preceding term.

146F. Politics, Ethics, and Business. Requisite: course 40. Examination of ethical issues, arguments, and institutions that impose constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

149. Special Topics in American Government and Politics. (Formerly numbered 149A-149Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40 and two courses in Field III, or consent of instructor. Intensive examination of one or more special problems appropriate to American politics. Selections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

Field IV: Comparative Politics

151A-151B-151C. African Politics. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. 151A. Government and Politics of Africa. (Formerly numbered 166A, 166C.) Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution.

151B. Political Economy of Africa. (Formerly numbered 166B.) Comparative study of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and changing toward a more appropriate economic strategy in recent times.

151C. Special Topics in African Politics. (Formerly numbered 166D.) Consult Schedule of Classes for topics to be offered in a specific term.

152A-152B-152C. Government and Politics of West European Countries. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading. 152A. Britain. (Formerly numbered 152.) 152B. France. (Formerly numbered 152.) 152C. Germany. (Formerly numbered 154.)

153A-153B. Comparative Government and Politics of Western Europe. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. 153A. West European Government and Politics. (Formerly numbered 153.) Comparison of constitutional and political structure of Western European states, with particular attention to contemporary problems.

153B. Game-Theoretic Approach to West European Politics. (Formerly numbered 153A.) Course 153A is not prerequisite to 153B. Uses of elementary game theory to investigate post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries: United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S.

154A-154B. Government and Politics in Latin America. (Formerly numbered 163B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of governmental and political development, organization, and practices of Latin America and the Caribbean, especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats).

155. Advanced Pluralist Democracies. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Main features and characteristics of government and politics in the newly democratized countries, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

156A-156D. Government and Politics of Post-Communist States. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. P/NP or letter grading.

156A. Russia. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union.

156B. Eastern Europe. (Formerly numbered 157.) Survey of institutions and political processes in selected post-Communist states of Eastern Europe.

156C. Post-Soviet States. (Formerly numbered 158.) Survey of institutions and political processes in selected former Soviet republics other than Russia.

156D. Political Economy of Post-Communist Reform. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform.

157. Government and Politics in the Middle East. (Formerly numbered 164.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of government in the Arab States, Turkey, Israel, and Iran. P/NP or letter grading.

159A-159B. Government and Politics of China. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. 159A. Chinese Revolution and Age of Mao Zedong. (Formerly numbered 159.) Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

160. Government and Politics of Japan. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Structure and operation of contemporary Japa-
nese political system, with special attention to do-
meric political forces and problems.

167A. Ideology and Development in World Politics. (Formerly numbered 167.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Com-
parative study of major modes of political and eco-
nomic development in the world today. Relations be-
tween industrial and nonindustrial societies in light of
current debate about imperialism.

167B. Comparative Development and Administra-
tion. (Formerly numbered 168.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Analysis of burea-
ocratic structures and function in the U.S., other in-
ustrialized, and less developed countries, pri-
arily at national level. Special attention to meth-
ods of comparative analysis and utility of various
methods. P/NP or letter grading.

168. Comparative Political Analysis. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV. Required of all students concentrating in Field IV. Ma-
jor approaches to study of comparative politics. Con-
cepts and methodology of comparative analysis.

169. Special Studies in Comparative Politics. (For-
merly numbered 169A-169Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: two courses in Field IV. Intensive examination of one or more special
problems appropriate to comparative politics. Sec-
tions offered on regular basis, with topics announced in
preceding term in Washington, D.C. Focus on
standards, 3.25 GPA in upper division political science
requisites: political science major, upper division
numbered C197A-C197F. Seminar, three hours. Pre-
requisite: admission to CAPP Program. Seminar for
undergraduates in Center for American Politics and
Public Policy's program in Washington, DC. Focus
development and execution of original empirical re-
search based on experiences from Washington, DC-
based field placements. Study of variety of qualitative
methods (observation, interviewing, etc.), with compari-
son to quantitative analysis. Examination of features of
solid and significant research; intensive writing.

199. Readings in Political Science (2 to 4 units). Prerequisites: upper division standing, 3.0 overall GPA, consent of instructor and department chair. In-
dividual studies. May not be applied toward concen-
tration or distribution requirement. May be repeated for a maximum of 16 units.

Graduate Courses

Formal Theory and Quantitative Methods

200A. Statistical Methods I. Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and testing (same as Psychology M256.) Lecture, three hours. Required. \( \text{P/NP or letter grading.} \)

200B. Statistical Methods II. Lecture, three hours. Prerequisites: courses 200A/200AL. Recommended: knowledge of elementary calculus. Applications of multiple strategies for developing models. \( \text{S/U or letter grading.} \)

200C. Statistical Models. Lecture, three hours. Prerequisites: courses 200A/200AL. 200B, knowledge
edge of elementary calculus. Statistical models of
causal processes. Topics include simultaneous equa-
tions models, discrete choice models, time-series
models. \( \text{S/U or letter grading.} \)

200E. Advanced Regression Analysis. (Same as Psychology M256E.) Lecture, three hours. Prerequi-
site: consent of instructor. Diagnostics, robust regres-
sion, cross validation, resampling, outliers, missing
data, geometry of regression, validity of assumptions,
categorical dependent variables, transformation of
variables. Access to Macintosh computer very help-
ful.

210A. Introduction to Formal Political Analysis. Seminar, three hours. Survey of formal political the-
ory to enhance literacy and provide analytical tools
without presupposing mathematical background.
Model building, collective goods, unanimity and the
social contract, voting rules, paradoxes and impos-
sibility theorems, stability, individual liberty and de-
centralization, strategic manipulation representation,
vote trading.

210B. Theory of Collective Choice. Seminar, three hours. Recommended (but not prerequisite) for po-
litical science students; course 210A. Open to any stu-
dent of politics, economics, philosophy, or mathemat-
ics with ability for deductive reasoning. Introduction to
abstract, deductive study of voting systems and other
collective-choice problems. Methodology applied to
politics and political economy, concept of rationality,
and agenda control, choice-set or solution concepts.

202. Mathematics for Political Science. Lecture, three hours. Prerequisite: working knowledge of high
school algebra. Review of major topics and methods useful in political science. Topics include differential
and integral calculus, differential equations, optimization, and linear algebra.

M197G. Introduction to Development Studies: Po-

tical Economy of Development. (Same as Intern-
ational Development and Sociology M180.) Seminar, three hours. Analysis of determi-
nants of underdevelopment, with focus on impact of
colonialism, foreign investment, and trade, and on po-

tical economy.

197W. CAPP Washington Research Seminar (8 units). Seminar, three hours; laboratory, 24 hours. Pre-
requisite: admission to CAPP Program. Seminar for
undergraduates in Center for American Politics and
Public Policy's program in Washington, DC. Focus
on development and execution of original empirical re-
search based on experiences from Washington, DC-
based field placements. Study of variety of qualitative
methods (observation, interviewing, etc.), with compari-
son to quantitative analysis. Examination of features of
solid and significant research; intensive writing.

203A. Economic Theory and Methods for Political
Science I. Discussion, three hours. Prerequisite: knowledge of elementary calculus. Introduction to

techiques of economic analysis and survey of major
topics in formal political economy. Investigation of
models of regulation, trade protection, collective bar-
gaining, and economic growth as time permits.

203B. Economic Theory and Methods for Political
Science II. Discussion, three hours. Prerequisite:
course 203A. Continuing survey of microeconomic
techiques used in formal political science, with fo-
cus on market failures and the importance of informa-
tion choice in nonmarket situations. Specific topics in-
clude externalities, public goods and allocation
mechanisms, collective action, spatial models, struc-
ture-induced equilibrium, and information asymme-
tries.

204. Game Theory in Politics. Seminar, three hours. Survey of game theory, with emphasis on utilizing
mathematical models to understand political and eco-
nomic phenomena. Applications concern political
participation, public goods, legislatures, industrial
regulation, bureaucracies, interest groups, and par-
ty competition. Designed to help students be-
come informed consumers of game-theoretical litera-
ture in political science.

208A. Game Theory. (Same as Economics M214B
and Mathematics M261.) Lecture, three hours. Pre-
requisite: graduate standing in mathematics or con-
sent of instructor. Bargaining theory, the core, the
value, other solution concepts. Applications to oligop-
opoly, general exchange and production economies,
and allocation of joint costs. S/U or letter grading.

210B. Topics in Applied Game Theory. (Same as Economics M215.) Lecture, three hours. Prerequisites:
calculus or introductory probability, and graduate
standing in economics or consent of instructor. Sur-
voy and applications of major solution concepts to
models of bargaining, oligopoly, cost allocation,
and voting power. S/U or letter grading.

208D. Multivariate Analysis with Latent Variables. (Same as Psychology M257.) Lecture, three hours. Pre-
requisite: consent of instructor. Introduction to models and methods for analysis of data hypothe-
sized to be generated by unmeasured latent vari-
able, including latent variable analogues of traditional methods in multivariate analysis. Causal
modeling: theory testing via analysis of moment
structures. Measurement models such as confirma-
tive, higher-order, and structured-means factor ana-
lytic models. Structural equation models, including
path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical

208E. Bayesian Econometrics. (Same as Eco-

omics M236A.) Lecture, three hours. Prerequisites:
Economics 231A, 231B. Subjective probability, intro-
duction to decision theory, Bayesian analysis of re-
gression, sensitivity analysis, specification of models, criticism. S/U or letter grading.

209. Special Topics in Formal Theory and Quantifi-
cative Methods. Seminar, three hours.

Political Theory

210A-210B. Introduction to Political Theory. Le-
ture, three hours. Exploration of major texts and is-
ues in political theory, 210A. Classical and Medieval
Formulations from Plato through Aquinas; 210B,
Early Modern Period from Machiavelli through the
Enlightenment.

211. Morality of Capitalism. (Same as Manage-
ment M293B.) Lecture, three hours. Prerequisite: con-
sent of instructor. Examination of major philosophical
writings that defend or criticize capitalism on basis of
principles of right conduct and just social arrangements
(i.e., on moral grounds).

212. Seminar: Political Theory. Discussion, three hours.
213. The Bible as Political Theory. Seminar, three hours. Examination of the Bible as a political document. Particular attention to its concept of national sovereignty and its role in political thought (e.g., covenant, charisma, history, law, states of nature, human nature, and the state).

C217. Selected Texts in Political Theory. Discussion, three hours. Examination of major works in political theory, with particular attention to the development of a classroom in Western political thought (i.e., covenant, charisma, history, law, states of nature, human nature, and the state).

C218. Selected Topics in Political Theory. Discussion, three hours. Critical examination of a major problem in political theory. May be concurrently scheduled with course C197A.

219. Workshop: Political Theory. Discussion, three hours.

International Relations

220. International Relations Theory. Discussion, three hours. Approaches to explaining strategic interaction, including rational choice, game theory, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including rational choice, game theory, and negotiation. May be concurrently scheduled with course C197B.

C221. Advanced International Relations Theory. Discussion, three hours. Introduction to contemporary approaches to explaining strategic interaction, including rational choice, game theory, and negotiation. May be concurrently scheduled with course C197B.

C222. Seminar: Strategic Interaction. Seminar, three hours. A strategic move influences the other person's decision by affecting his expectations of how we will behave. May be concurrently scheduled with course C197B.

C223. Politics and Strategies of Modern War. Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. May be concurrently scheduled with course C197B.

225. American Foreign Policy. Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and political levels. Application to selected cases in American foreign policy.

C226. The Making of American Foreign Policy. Seminar, three hours. Intensive analysis of policy formulation process and substance of selected contemporaneous policy problems. May be concurrently scheduled with course C197B.

C227. Foreign Policy Process. Discussion, three hours. Prerequisites: courses 120 and 220, or consent of instructor. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

230. Contending Perspectives on International Political Economy. Discussion, three hours. Survey of various theoretical approaches to international political economy.

231. International Political Economy I. Seminar, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies.

232. International Political Economy II. Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models. At the level of economic models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

233A-233B-233C. Political Economy Workshops (0 units, 0 units, 12 units). Discussion, two weeks. Open only to graduate students who have successfully completed field examinations. Workshop for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. May be concurrently scheduled with course C197A.

C239. Selected Topics in International Relations. Discussion, three hours. May be concurrently scheduled with course C197B.

Comparative Politics

240. Comparative Politics. (Formerly numbered 240A-240B.) Discussion, three hours. Approaches to study of comparative politics and problems of comparative political analysis.

C241. African Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C242. Chinese and East Asian Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C243. Japanese and Western Pacific Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C244. Latin American Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C245. Middle Eastern Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C246A. Western European Politics. (Formerly numbered C250A.) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C246B. Political Development of Modern Europe. (Formerly numbered 250B.) Seminar, three hours; discussion, one hour (optional). Principal phases of political development from high feudalism to the present, together with the influences of specific environments.

C247. Politics of the Soviet Union and Post-Soviet Region. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C247A. Evolution of Soviet and Russian Politics. Seminar, three hours; discussion, one hour (optional). Discussion seminar surveying political evolution of the Soviet Union and its transformation.

C247B. Domestic Context of Russian Foreign Policy. Seminar, three hours; discussion, one hour (optional). Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. May be concurrently scheduled with course C197B.

C246. South Asian Politics. Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

251. Political Economy of Structural Adjustment. Discussion, three hours. Some familiarity with economic models helpful. Principal arguments for structural adjustment and consideration of political issues that arise from this process.

252. Parties and Party Systems. (Formerly numbered 252A.) Seminar, three hours; discussion, one hour (optional). Theories and practices of political parties, party systems, and elections in comparative perspective.

253. Political Change in Communist Systems. Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence.

254A-254B. Institutions and Comparative Politics. Seminar, three hours; discussion, one hour (optional). Comparative Institutional Analysis. Use of advances of rational choice theory and new institutionalism to compare and analyze major institutional structures, including presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, cadre vs. mass parties, and pluralism vs. proportional electoral systems.

254B. Political Institutions, Delegation, and Policy-Making. Analysis of political foundations of policy-making. Characterization of democratic institutions as a series of delegations, from voters to elected officials, within parties and legislatures, and from elected politicians to unelected bureaucrats. Examination of implications of different institutional designs for how those delegations are made and controlled.

255. Seminar: Political Change. Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

256. External Sources of Domestic Politics. Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions.

257. Labor and Working-Class Politics. Discussion, three hours. Questions and topics on comparative labor and working-class politics.

American Politics

260A. Survey Course in American Politics: Political Parties and the Electoral Process. Discussion, three hours.

260B. Survey Course in American Politics: American Political Institutions. Discussion, three hours.

M261A. Proseminar: Political Psychology. (Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

M261B. Mass Attitudes and Political Behavior. Discussion, three hours. Prerequisite: course 141B or 260A or consent of instructor. Analysis of development and change of political attitudes in mass publics and their relationship to political behavior and violence. May be concurrently scheduled with course C197C.

M261C. Political Communication. Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of “media effects” research, reporting and advertising as determinants of election outcomes, adversarial versus nonadversarial, and analyses of media bias.

M261D. Seminar: Political Psychology. (Same as Psychology M228B.) Discussion, three hours. Prerequisite: course M261A or Psychology 220A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and elite political attitudes.
M261E. Critical Problems in Political Psychology. (Same as Psychology M228C) Discussion, three hours.

C262. Political Parties. Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

C264. Politics and Society. Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

265. Politics and Economy. Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and the state.

266. Group Theories of Politics. Discussion, three hours. Critical appraisal of "group theory" approaches to study of political decision making, with special attention to empirical research problems and findings.

268. Seminar: Political and Electoral Problems. Seminar, three hours. Prerequisites: two graduate courses in politics.

269. Seminar: Political Behavior. Seminar, three hours. Application of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

270. Legislative Behavior. Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

271. Executive Politics and the Presidency. Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

272. Political Environment of the Federal Executive. Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations.

273. American Political Development. Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture.

279. Seminar: Public Law. Discussion, three hours. May be concurrently scheduled with course C197C.

280. Organization Theory Approaches to Organizational Analysis. Discussion, three hours. Analysis of several major conceptual alternatives for study of organizations, with emphasis on public administrative organizations. Topics include structural/functional and systemic approaches to organization, rational-choice models, and social psychological analyses. Each alternative critically evaluated for its strengths and weaknesses as guide to understanding organizational analysis. May be concurrently scheduled with course C197C.

C281. Public Policy Studies. Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and processes, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

C283. Seminar: Public Organization and Policy. Seminar, three hours. May be concurrently scheduled with course C197C.

284. Seminar: Bureaucracy and Organization. Discussion, three hours. Prerequisite: consent of instructor. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive.

Special Studies

With consent, credit may be applied toward any field.

290. Modern Political Economy. Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macromodels, forms of political participation, the state, government regulation, growth of government, bureaucratic politics, public policy, inflation.

M291A-M291B. Social Theory and Comparative History. (Same as History M203A-M203B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

293. Terrorism. Discussion, three hours. Analysis of the concept, relationship of terrorism to other forms of violence, history of the phenomena, various forms, and costs.

294. Religion, Revolution, and Violence. Discussion, three hours. Critical examination of various accounts of religion as a revolutionary and conservative force. Special attention to millenarianism and revolution and to the revealed religions, Christianity, Judaism, and Islam.

295. Comparative Fundamentalism. Discussion, three hours. Study of political meaning of the fundamentalist phenomena in various religions, especially Christianity, Judaism, and Islam.

375. Teaching Apprentice Practicum (1 to 4 units). Preparations: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instructional policy. May be repeated for credit. S/U grading.

485. Teaching Political Science. Workshop in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USCs. S/U grading.

596. Directed Individual Study or Research (2 to 4 units). May be applied only three times toward minimum course requirement in first two years. May be repeated. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). May be repeated. S/U grading.

Assistant Professors

Thomas Belin, Ph.D., in Residence
Susan Y. Bookheimer, Ph.D., in Residence
Kyle B. Boone, Ph.D., in Residence
Joel T. Braslowsky, M.D., in Residence
Ellen M. Carpenter, Ph.D., in Residence
Susana Cohen-Cory, Ph.D., in Residence
Ian A. Cook, M.D., in Residence
Izhak Fried, M.D., Ph.D., in Residence
Thomas A. Grieder, M.D., Ph.D., in Residence
Charles H. Hinkin, Ph.D., in Residence
Jennifer G. Levitt, M.D., in Residence
Nigel Maidment, Ph.D., in Residence
Karen A. Miotto, M.D., in Residence
Stanley F. Nelson, M.D., in Residence
John Picciolentini, Ph.D., in Residence
Charles L. Raison, M.D., in Residence
Uma Rao, M.D., in Residence
Sanjaya Saxena, M.D., in Residence
Barbara A. Speciale, M.D.
Michael W. Smith, M.D., in Residence
J. Randolph Swartz, M.D., in Residence
M. Albert Thomas, Ph.D., in Residence
James A. Waschek, Ph.D., in Residence
Donna Ames Wershing, M.D., in Residence
Roger P. Woods, M.D., in Residence
Cui-Wei Xie, Ph.D., in Residence
Bonnie Zima, M.D., in Residence

Professors of Clinical Psychiatry

John R. Elpers, M.D., in Residence
Marvin Kario, M.D., in Residence
Andrew T. Russell, M.D., in Residence
William C. Wershing, M.D., in Residence

Associate Professors of Clinical Psychiatry

Vivien K. Burt, M.D., Ph.D.
Charles S. Grub, M.D.
James E. Spar, M.D., in Residence

Lecturers

Veronica D. Abney, M.S.W.
James C. Allen, M.A.
Linda A. Andron, M.S.W.
Bassili A. Bassil, M.S.W.
Joan Blum, M.A., M.F.C.C.
David J. Fisher, Ph.D.
Marcy Gitlin, L.C.S.W., in Residence
Laurel Brodsley, R.N., Ph.D., M.P.H.
Angela Farrell, M.S.W.
David J. Fischer, Ph.D.
Mary Gitlin, L.C.S.W.
Laurie Goodman, M.P.H.
Joan Gordon, L.C.S.W.
Susan Henderson, L.C.S.W.
Joan E. Johnson, L.C.S.W.
Kathryn Kress, L.C.S.W.
William L. Lane, M.D., in Residence
Robert Marask, M.D., in Residence
Janice Roper, R.N., Ph.D.
Narayan Singh, L.C.S.W.
Richard Thor, L.C.S.W.
Ruth Wathe, L.C.S.W.

Adjunct, Visiting, and Clinical Professors

Jambur V. Ananth, M.D., Adjunct
Christiane A.M. Baxtate, Ph.D., Adjunct
Cyril Barrett, M.D., in Residence
Lewis R. Baxter, M.D., Adjunct
Stephen Berman, M.S.W., A.C.S.W., Clinical
Annette M. Brooks, Ph.D., Adjunct
Warren S. Brown, Ph.D., Adjunct

Psychiatry and Biobehavioral Sciences / 495
Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students (courses for medical students are listed in the Announcement of the UCLA School of Medicine and the School of Medicine Handbook of Clinical Courses).

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs. Additional information is available from the department office.

Developmental Disabilities Immersion Program

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Field Studies Development (80 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, 68-251 NIHP (310-825-0122).

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Psychiatry and Biobehavioral Sciences

Lower Division Course

88. Lower Division Seminar: Special Topics in Psychiatry and Biobehavioral Sciences. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics which examine specific issues or problems and ways that professionals in psychiatry and biobehavioral sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M316D.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

M180A. Contemporary Problems in Mental Retardation. (Same as Psychology M180A.) Prerequisites: Psychology 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and search techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

M180B. Contemporary Issues in Mental Retardation. (Same as Psychology M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychosocial issues in mental retardation relating to literature on ongoing field experiences through lectures, discussions, media, and six student papers.

185. Social Psychology of Urban Student Education (6 units). Lecture, 90 minutes; discussion, 90 minutes; fieldwork, six to eight hours. Designed for juniors/seniors. Students interested in study of urban youth and their education acquire comprehensive and first-hand knowledge of factors affecting these students’ achievement. Field study component requires students to intern with youth in schools and after-school programs. P/NP or letter grading.

190. Ethology: Physiology of Behavior and Learning in Animals. (Same as Psychology M119J.) Prerequisites: Psychology 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective.

M191. Biological Bases of Psychiatric Disorders. (Formerly numbered 191.) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Psychological Science M181, and Psychology M117J.) Prerequisite: Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Psychological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive-compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M192A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (Same as Medicine M190A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

M192B. Field Studies Seminar: Health Outreach Issues and Interventions (2 or 4 units). (Same as Medicine M190B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Prerequisites: course M192A. Dynamics of multidisciplinary approaches to prevent health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

199. Special Studies in Psychiatry (2 to 4 units). Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C-202 NIHP.

199HA-199HB-199HC. Special Studies in Psychiatry. Research, 12 hours. Prerequisites: honors student standing, consent of instructor and department based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). In Progress grading.

Graduate Courses

M203. Molecular Neurobiology. (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

M204. Cellular and Molecular Developmental Neurobiology. (Same as Neuroscience M204, Neurobiology M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neurobiology M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.
207A-207B-207C. Hypnosis Seminars (2 units each). Prerequisite: psychology intern, psychiatry resident, or consent of instructor. Seminar on hypnotic phenomena, including functional and affective phenomena of the brain, effects of general anesthesia and local brain impairment on behavior, and introduction to use of neuropsychological test instruments.

M210. Seminar: Psychocultural Studies. (Same as Anthropology M234.) Seminar, three hours. Required to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychopathology. S/U grading.

M213. The Individual in Culture. (Formerly numbered M213A-M213B.) (Same as Anthropology M235.) Seminar, three hours. Prerequisite: graduate standing.

M214. Cross-Cultural Studies of Socialization and Children. (Same as Anthropology M236P) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

M215. Culture, Adaptation, and Intervention. (Same as Anthropology M235S.) Prerequisite: graduate standing. Role of ecological, social, and cultural influences on family adaptation, child competence, and interventions, including theory, empirical research, and applied policy topics. Review and critique of current research in this field.

M221. Cellular and Molecular Neurochemistry. (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M224, and Pharmacology M221L.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemical topics; specialization, and co-occurrence of brain functions. Emphasis on genetic and environmental determinants of brain function. S/U grading.

M222. Transcultural Psychiatry. (Same as Anthropology M234P.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatry, and questions of "sick" societies. May be repeated for credit.

223A-223B-223C. MMIPI Seminars and Case Conferences (2 units each). Prerequisite: psychology intern, psychiatry resident, or consent of instructor. Seminar on interpretation of Minnesota Multiphasic Personality Inventory (MMPI) — theory, principles, and research into personality types.

M231. Hispanic Mental Health Issues and Treatment (2 units). (Formerly numbered 231.) (Same as Social Welfare M230EC.) Mental health issues and needs of Hispanics. Emphasis on treatment of Hispanic clients, emphasis on cross-cultural perspectives on change, and on developing and implementing techniques for overcoming cultural barriers. S/U grading.

M232. Causal Inference. (Same as Biostatistics M235.) Lecture, three hours; discussion, one hour. Prerequisite: Biostatistics 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman, Kaplan-Meier and other survival analyses, Cox regression, and discrete event models. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed.

M234. Affective Disorders (2 or 4 units). (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, mania, bipolar disorder). Diagnosis, pharmacology, epidemiology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236G.) Seminar, three hours. General topics related to naturalistic observation in natural settings, with emphasis on field training and practice in observation behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

236A-236B-236C. Psychology Interns Seminars (1 unit each). Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

237. Seminar: Behavioral Neuroimmunology (1 unit). Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

M238. Survey Research Techniques in Psychocultural Studies. (Formerly numbered 238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative research design. S/U grading.

M240. Assessment and Treatment of African American Families. (Same as Afro-American Studies M240.) Seminar, three hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructor and invited guests; discussions of supervised evaluation and case management with an African American child and family.

M251. Mental Health Services. (Same as Health Services M249JL.) Lecture, three hours. Prerequisites: consent of instructor. Survey of mental health services for the community. Focus on mental health needs of Hispanics through seminars and videotapes. M240. Assessment and Treatment of African American Families. (Same as Afro-American Studies M240.) Seminar, three hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructor and invited guests; discussions of supervised evaluation and case management with an African American child and family.

256. Basic Clinical Child Psychopathology (1 unit). Prerequisite: consent of instructor. Seminar for graduate students. Focus on development of clinical topics including interviewing of patients and children, and issues related to supervision. S/U grading.

257A-257B-257C. Psychopathology of Childhood. (Same as Social Welfare M253.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional’s reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

258. Functional Organization of Behavior (2 units). (Same as Neuroscience M255.) Prerequisite: consent of instructor. Changes in neuronal properties suggesting changes in clinical symptoms. Differences in neuronal properties in healthy people and patients with schizophrenia. S/U grading.

266A-266B-266C. Childhood Psychopathology Research Seminars (2 units each). Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood disturbances.

243A-243B-243C. Mental Retardation and Chronic Medical Illness Interdisciplinary Core Curriculum (1 unit each). Lecture, 90 minutes. Prerequisite: consent of instructor. Survey of medical and psychosocial aspects of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special education. Emphasis in interdisciplinary framework as generic information independent of discipline. S/U grading.

M245. Psychological Aspects of Mental Retardation. (Same as Psychology M245.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern trends, and future development in input from other disciplines (ethics, law, religion, welfare systems).

M249. Neurobiology of Sleep (3 units). (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biocontrol of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and age-related aspects. Focus on the role of relevant clinical phenomena. S/U or letter grading.

253. Seminar: Child Development (1 unit). Prerequisite: consent of instructor. Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

254. Supporting Families of Children with Special Needs (2 units). (Formerly numbered 254.) (Same as Social Welfare M203D.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional’s reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

255. Functional Organization of Behavior (2 units). (Same as Neuroscience M255.) Prerequisite: consent of instructor. Changes in neuronal properties suggesting changes in clinical symptoms. Differences in neuronal properties in healthy people and patients with schizophrenia. S/U grading.
259. Legal and Ethical Issues with Vulnerable Populations (3 units). Lecture, 90 minutes; laboratory, 3 hours. Examination of the legal and ethical issues in working with vulnerable populations (e.g., children, elderly, developmentally disabled, people who are mentally ill, disabled, or handicapped). Focus on the legal and ethical framework within which all human services workers operate. Consideration of pertinent laws and principles of professional ethics. Credit is given only for the unit level credited. Laboratory credit includes hours of site hours, consults, seminars, and rounds.  Credit is given only for the unit level credited. Laboratory credit includes hours of site hours, consults, seminars, and rounds.

260. The Chronically Medically Ill Child and Family. Lecture, three hours; seminar, one hour. Examination of the biopsychosocial issues in caring for children with chronic illness and their families. Discussion of the impact of illness and treatment on the family system; the role of the family in caring for the child; and the stressors and resources experienced by the family. Credit is given only for the unit level credited. Laboratory credit includes hours of site hours, consults, seminars, and rounds.

262A-262B-262C. Clinical Fieldwork in Developmental Disability and Chronic Illness (1 to 4 units each). Prerequisites or corequisites: courses 243A-243B-243C, consent of instructor. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

264. Biofeedback, Relaxation, and Stress Management in Behavioral Medicine. Seminar, three hours. Introduction to concepts and techniques of biofeedback, relaxation, stress management, and their applications, with emphasis on somatic disorders; hypertension and cardiovascular disorders, headache and other pain problems, neurological disorders, neuromuscular conditions, and cancer. Consideration of research and clinical issues.

M266. Advanced Magnetic Resonance Imaging (2 units). (Same as Biomedical Physics M266.) Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction includes illustrative case discussions and example images. S/U grading.

M270. Neural Basis of Memory. (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurochemical data integrated into models for how behavioral phenomena are represented by activity in a network of neurons across the brain. Emphasis on cognitive neuroscience, hippocampal and declarative memory, and frontal lobes and primary memory. S/U grading.

M272. Psychological Anthropology. (Same as Anthropology M272Q.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconscious processes as they relate to culture. Topics vary from term to term. May be repeated for credit.

M273. Advanced Seminar: Medical Anthropology. (Same as Anthropology M273Q, Community Health Sciences M244, and Nursing M272.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

275A-275B. Sociobiology Seminar (2 units each). Prerequisite: consent of instructor. Review of sociological theory as it applies to animal bonding behavior; kin-selection theory, reciprocal altruism theory, mate selection theory, and bond strategy theory. Bonds viewed primarily from biological rather than psychological perspective. In Progress grading.

276. Neurocognitive Plasticity in Adults (3 units). Critical examination at multiple levels of brain function changes with aging—from structural changes at cellular, neurochemical, and synaptological levels, to neurochemical, motor, mnemonic, and intellectual abilities at other. Evaluation of behavioral, pharmacological, and transplantation techniques to enhance or restore function.

M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care (2 or 4 units). (Same as Psychology M284.) Seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

M279A. Seminar: Human Behavioral Ecology. (Same as Anthropology M229A and Education M281A.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictability models of human behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality in comparison with other economic and ecological models in anthropology. S/U grading.

M279B. Reproduction, Families, and Parenting. (Same as Anthropology M229B and Education M281B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied perspectives. Representation and debate of theories, questions, and methods from social and biological sciences. S/U grading.

M279C. Seminar: Selected Topics in Human Ethology. (Same as Anthropology M229C and Education M281C.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins. S/U grading.

M280. Politics of Reproduction. (Same as Anthropology M269P.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Study of diverse cultures and how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

281. Behavioral Therapy in an Educational Setting. Lecture, six to 10 hours. Prerequisite: consent of instructor. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

M282. Anthropology of Human Body. (Same as Anthropology M253T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

M285. Functional Neuroimaging: Techniques and Applications (3 units). (Same as Biomedical Physics M285B.) Seminar, two hours. In-depth examination of activation imaging, including PET and fMRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technological issues, how to design activation imaging paradigms, and how to evaluate functional imaging issues in anatomy and neuropsychology. S/U grading.

M286A-M286B-M286C. Statistics in Psychiatric and Biobehavioral Research (2 units each). (Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Prerequisites: consent of instructor. Design and analysis of clinical trials. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

M289. Intervention to Reduce HIV and Its Consequences. (Same as Community Health Sciences M299.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations.

295A. Neurobiology and psychopharmacology of drug abuse, as well as epidemiology and prevention. Discussion of pros and cons of various treatment modalities for drug dependence.

295B. Drug use patterns and treatment issues in specific populations such as women, adolescents, the homeless, the multiply diagnosed, as well as different ethnic populations. Examination of the relationship between drug abuse, sexuality, and HIV/AIDS.

295C. Theoretical perspectives on drug use and abuse as well as policy and ethical aspects of drug abuse research. Research design and analysis issues pertinent to drug abuse research.

298. Current Topics in Biobehavioral Sciences (1 to 4 units). Prerequisite: consent of instructor. Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevance of proposed topic. S/U grading.

402. Journal Club (1 unit). Seminar, two hours; outside study, two hours. Prerequisite: consent of instructor. Presentation of participants’ current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

403. Individual Case Supervision (1 to 4 units). Prerequisite: consent of instructor and department chair (based on written proposal to be structured by instructor and student). Consideration of additional information and proposal forms available in Office of Education, C8-2022 NP/18). One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

414. Emergency Treatment Attending Rounds (1 unit). Prerequisites: assignment to Emergency Treatment Unit, consent of instructor. Cases seen in emergency room during preceding night, reviewed by a consultant and emergency treatment staff. Exploration of assessment techniques, methods of intervention, and alternate modes of treatment.

416. Treatment Planning Meetings (1 unit). Prerequisite: consent of instructor. Treatment and management problems posed by inpatient psychiatry. Discussion of clinical psychopharmacology, treatment plans, and interdisciplinary skills. Emphasis on formulating accurate diagnostic assessments and planning effective treatment programs utilizing therapeutic methods of the milieu (therapeutic techniques, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

M424. Functional Magnetic Resonance Imaging Journal Club (1 unit). (Formerly numbered 424.) (Same as Biomedical Physics M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

M269A-M269B-M269C. Statistics in Psychiatric and Biobehavioral Research (2 units each). (Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Prerequisites: consent of instructor. Design and analysis of clinical trials. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.
429. Child Outpatient Team (1 unit). Prerequisite: consent of instructor. Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

449. Parent Training Intervention Workshop (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: consent of instructor. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent/child problems. Lectures, case presentations, and workshops on various skills necessary.

462. School Intervention by Child Psychiatrists. Seminar two hours. Prerequisite: consent of instructor. Knowledge of children in schools through (1) field experience, (2) a didactic program, (3) group supervision. Each trainee selects a local elementary or junior high school as site of field experience in consultation. Supervision focuses on assessing needs of the school and initiating the consultation. Seminars consider theories of consultation, systems theory as applied to schools, organization of school systems, and some professional roles represented in the school (e.g., teachers, counselors, principals, etc.), and their special problems. In Progress grading.

471. Grand Rounds (No credit). Prerequisite: second-year resident in Child Service, child psychiatry fellow, or consent of instructor. Each month one second-year child psychiatry fellow presents a major clinical problem. Seminar chairman discusses the case. The presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

M472A. Nursing Care of Children with Developmental Disabilities. (Same as Nursing M410A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood and their effects on the child and family. Content based on normative developmental models with consideration for socioeconomic factors. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

M472B. Nursing Care of Children with Developmental Disabilities. (Same as Nursing M410B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

M472C. Nursing Care of Children with Developmental Disabilities. (Same as Nursing M410C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse.

478. Clinical Genetics Rounds (No credit). Prerequisites: medical graduate, consent of instructor. Weekly clinical rounds on patients seen in the wards during preceding week. House staff and others involved in clinical work may attend. Usually in-depth discussion of medical and genetic aspects of one or more disorders presented.

479. Genetics Clinic Presentation (No credit). Prerequisite: consent of instructor. Weekly clinic teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

480. Analysis of Human Chromosome Studies (1 unit). Prerequisite: consent of instructor. Chromosome karyotypes prepared in cytogenetics laboratory during preceding week. Presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

481. Chromatography Review (No credit). Prerequisites: premedical course or biochemistry, consent of instructor. Weekly session with presentation of amino acid chromatography carried out during preceding week. Interpretation of abnormal chromatograms together with technical aspects of tests used.

482. Cognitive Behavior Therapy Practicum: Child Anxiety and Depressive Disorders (3 units). Seminar, two hours. Training in cognitive/behavioral assessment and treatment of children and adolescents with anxiety and depressive disorders. Didactic and experiential training, including direct patient care, clinical supervision, and participation in weekly team meetings.

485. Medical Genetics Seminar (No credit). Prerequisite: consent of instructor. Weekly lecture series intended for those interested in genetics or in specific topic to be presented. Speakers are selected for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from audience encouraged.

596P. Individual Studies in Psychiatry (2 to 12 units). Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study to be structured by instructor and student. Credit base of initial enrollment. Additional information and course proposal forms available in Office of Academic Personnel, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.

Scope and Objectives

Psychology is a subject of considerable interest to most people—we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior—both normal and abnormal—in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology—in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed—while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience—either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and a B.S. degree in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in areas such as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study

Bachelor of Arts in Psychology

The psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the prepsychology major. They are then identified as prepsychology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the psychology major. The following required courses must be taken for a letter grade (a C− or better in each course and a 2.3 overall grade-point average in the preparation courses) before students reach 110 total units (transfer students must complete all remaining preparation courses by the end of the first year of enrollment); Anthropology 7 or 10 or 12 or 15; Biology 2 or Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 10A or 11A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 2 or two terms of calculus; Physics 10 or 3A or 6A or 8A/8AL; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the prepsychology major one term before the term in which they plan to enroll. Students cannot take Psychology 42 until they have passed one of the statistics courses with a grade of C− or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: introductory psychology, physical anthropology, finite mathematics (or seven and one-half quarter units of calculus), statistics, biology with laboratory, introductory physics with laboratory, introductory chemistry (or one year of high school chemistry with a C or better), and introductory philosophy.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Core courses: Psychology 110, 115 (or M117A and M117C), 120, 130 or one course from 133A through 135I; (2) one laboratory/fieldwork course from 111, 115, 116, 121, 131, 136A, 136B, 136C, 171A, 174, 186A, 186B; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division psychology electives.

All upper division courses must be taken for a letter grade. For all entering freshmen and transfer students, a C− or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

Bachelor of Science in Cognitive Science

The cognitive science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.
Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the pre-cognitive science major. They are then identified as pre-cognitive science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the cognitive science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses): Biology 2 or Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 10A or 11A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 31A, 31B; Philosophy 7, 8, or 9; Physics 10 or 3A or 6A or 8A/8AL; Program in Computing 10A, 10B, 15; Psychology 10, 42, 85; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the pre-cognitive science major one term before the term in which they plan to enroll. Students cannot take Psychology 42 until they have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: two courses in calculus/analytical geometry, introductory psychology, statistics, biology with laboratory, introductory physics with laboratory, one philosophy course (critical reasoning, philosophy of science, or philosophy of the mind), introductory chemistry (or one year of high school chemistry with a C or better), and one course in computer programming in C-.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Psychology 115 (or M117A and M117C), 120, and one course from 124A through 124F; (2) one course from 186A or 186B and one course from 121, 186A, 186B, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through M119N, 190C (only if content is approved by the Undergraduate Advising Office before elective credit may be granted), Communication Studies 156,

Computer Science 111 through M196B, Ethnomusicology 172A, Linguistics 103 through C185B, Mathematics 110A through 171, Philosophy 124 through 136, Statistics M152A through M153B; (4) two terms of Psychology 188A or 188B (may be fulfilled by taking any two courses from 188A, 188B, or 190C, provided content is approved by the Undergraduate Advising Office).

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division cognitive science electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 188A and 188B, each course must be taken for a letter grade.

Bachelor of Science in Psychobiology

The psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the psychobiology major. They are then identified as psychobiology major until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the psychobiology major.

Life Sciences Core Curriculum

Required (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, or 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

Also required are Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the psychobiology major one term before the term in which they plan to enroll. Students cannot take Psychology 42 until they have passed one of the statistics courses with a grade of C – or better.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

In order to be admitted as psychobiology majors, transfer students with 90 or more units should have completed the following courses prior to admission to UCLA: one year of general biology with laboratory; one year of general chemistry with laboratory for majors; one year of calculus; and one year of calculus-based physics, one year of organic chemistry, introductory psychology, and statistics.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Biology 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A and M117C), 116, 120; (2) one course from Psychology 127, 130, 133A through 133I, 135; (3) 16 units of graded elective courses from the following list: Biology 107, 112, 113A, 114 (no more than one from this group), Psychology M117A, M117B, M117C, M117J, M117K, 119A through M119N, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Biology 102, C104, 105, 106, 110, 111, C115, 117, C119, 120, 121, 122, 124 (only four units may be applied toward the major), 131 (only four units may be applied toward the major), 135, 146, 153, M158, 164, 166, 167, 168, 179, Chemistry and Biochemistry 153A, 153L, Molecular and Medical Pharmacology 110A, 110B, Molecular, Cell, and Developmental Biology 104, 138, C139, C149, CM156, 157, 171, M185A, Psychological Science 142, C144, 147, M173.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychobiology. These experiences can be enriching and help bring undergraduates closer to understanding research and its appli-
cations in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188A, 188B, 192, 193, 194A, 194B, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

Honors

Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. All such courses offer credit toward the departmental honors program. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

Honors Program
Psychology, cognitive science, and psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 190A-190B-190C) in which thesis projects are presented and discussed. Honors students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience. To earn a concentration, majors in psychology, cognitive science, and psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from Field Studies Development, 80 Powell Library. The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the psychology major), 130 or one course from 133A through 133I (also satisfies a core requirement for the psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a departmental certificate of completion at graduation; they must notify the department during the term they plan to graduate to receive the certificate. The concentration does not appear on the diploma or transcript. If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A-M181B does not apply toward the major.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or Field Studies Development (80 Powell Library).

Computing Specialization
Majors in psychology, psychobiology, and cognitive science may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15 (recommended), 30, 60, and (3) completing Psychology 85 and at least two courses from 121, M142, 150, 151, 186A, 186B (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

Applied Developmental Psychology Minor
The applied developmental psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduates how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including cognitive science, psychobiology, and psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1611 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

Required Lower Division Course: Psychology 10.

Required Upper Division Courses: Psychology 133X and 133Y (to be taken concurrently with the two-term internship described below) and four additional courses, of which at least three must be upper division, from Education 91A through 91D, 112, 125A, 125B, Linguistics C130, C135, Psychology 130, 131, 132, 133A through 133I, M176, 197 (content must be approved by the Undergraduate Advising Office), 199 (content must be approved by the Undergraduate Advising Office), Sociology 136, 174. One of the four additional courses must include either Psychology 130, one course in the 133 series, or 197 (content must be approved by the Undergraduate Advising Office).

Internship Requirement: Students work as interns for two academic terms at an approved daycare center/school and enroll concurrently in Psychology 133X and 133Y. The internship provides hands-on experience working with young children as teacher's aids and opportunities for observing children. By completing an additional one-term internship, students may receive requirements to be fully qualified daycare center teachers under Title 22, California Department of Social Services; for more information, contact the director of the Infant Development Program at (310) 825-2896. All minor courses, except for the internship courses, must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied to-
ward both the students’ majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

Cognitive Science Minor
The cognitive science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than cognitive science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

Required Lower Division Courses: Psychology 85 and one course from 15, 42, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Required Upper Division Courses: Students must select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) biological basis of cognition cluster—three courses from Linguistics C135, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), M117K, 119B, 119F, M119L, M119N; (2) computation and modeling cluster—three courses from Bioinformatics 108, Computer Science 161, 163, Psychology 150, 151, 186A, 186B (at least one course must be from Computer Science 161); (3) human cognition cluster—Psychology 121 and two courses from 112C, 120, 124A through 124F, 133B, 133BH, 133C, 133E; (4) mind and language cluster—three courses from Linguistics 120A, 120B, 125, C130, 132, C135, C185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 122, 123, 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students’ majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

Infant Development Program
The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 133X, 133Y, and 193. The program is located in Franz Hall and provides child care for about 15 infants ranging in age from three months to three years.

Clinic for the Behavioral Treatment of Children
The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

Psychology Clinic
The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to clients, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of clinical research projects.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree

Admission
The Department of Psychology does not admit candidates for the Master of Arts degree only, although students may be awarded the M.A. en route to the Ph.D.

Areas of Study
Consult the department.

Course Requirements
Requirements for the M.A. are nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be completed), and at least three of the four required core courses (refer to the section on doctoral course requirements for further details). One 596 course (four units) may be applied as an elective. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared before the M.A. is awarded.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Doctoral Degree

Admission
A departmental brochure describing the graduate program in psychology is available at the department.

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants should mail the following documents directly to the Psychology Department by December 15 for clinical area applicants and January 2 for applicants to other areas to be considered for admission the following Fall Quarter.

(1) The University’s Application for Graduate Admission, available in 3453 Franz Hall.

(2) Three letters of recommendation.

(3) One official transcript from each college attended.

(4) Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).

(5) The Test of English as a Foreign Language (TOEFL), required of all international applicants whose native language is not English. Interviews (in person or by phone) are required for clinical area finalists.

Students entering the graduate program must demonstrate adequate breadth of preparation in psychology and related disciplines. Students
are expected to have had courses equivalent to the following: (1) Psychology 41; (2) two courses selected from Psychology 110, 115, and 120; and (3) two courses selected from Psychology 127, 130, 135. In addition, it is recommended that students have the following college-level coursework: one course in biology or zoology, one course in mathematics (such as calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses.

These recommended courses may be waived by the student’s adviser. Students who have completed any of the undergraduate majors offered by the UCLA Department of Psychology have satisfied the undergraduate preparation requirements. Students who have not had training in the areas cited above may either take the missing courses or have their area evaluated. Continuation in the Ph.D. program is contingent on satisfactorily completing the specified requirements by the end of the fourth quarter in residence.

**Major Fields or Subdisciplines**

The graduate program in psychology leads to the Ph.D. degree. Students are required to obtain a thorough background in research methodology and psychological theory. Major specialization is available in the following areas of psychology: behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, learning and behavior, measurement and psychometrics, or social psychology. Students admitted in either the behavioral neuroscience or cognitive areas may take the program in cognitive neuroscience. The course requirements serve as a combined major and minor. Students must select a primary area in accordance with the student’s adviser. Students who have satisfied the undergraduate preparation requirements serve as a combined major and minor.

**Course Requirements**

**General Core Requirements**

All students, regardless of area, must fulfill the requirements listed below. A course may not be used to fulfill requirements in more than one major or minor area unless no other course options are designated. The core program includes four courses, plus Psychology 250A, 250B, 251A-251B, and 251C, if an additional quarter is needed to complete the course. Courses 250A and 250B must be completed in the first two quarters; 251A-251B-251C must be completed by the end of the fourth quarter. The additional four core courses must be completed within the first six quarters in residence. If the core courses have not been completed by the end of the fifth quarter, the balance of courses must be completed during the sixth quarter, even if the preferred courses are not offered at that time.

By the end of the second year, students must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course chosen from Psychology 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258, 259, 287.

During the third year, students must enroll in a minimum of three graduate-level courses, plus one quarter of course 596. At least one quarter of 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

**Major Area Course Requirements**

Each area requires certain courses of students majoring in that area. Requirements are as follows:

**Behavioral Neuroscience.** Neuroscience M201 and either option 1 — Neuroscience M202 and M204 or option 2 — Psychology M117A. Students interested in molecular biology take option 1 and minor in neuroscience. In addition, all majors take eight units from the Psychology 205 series, three quarters of Psychology 212, and two approved behavioral neuroscience seminars.

**Clinical.** Psychology 270A-270B-270C, 271A-271B-271C, and two clinical courses from Psychology 272A through 298. A minimum of one of these courses must be numbered above 272A. Note that the 298 courses must be approved by the clinical area.

**Cognitive.** Psychology 260A-260B plus four courses, including at least two from Psychology 259, 261 through 266, and at least one from Psychology 268A through 268E or 269.

**Cognitive Neuroscience.** The following core course requirements satisfy both major and minor area requirements: Neuroscience 201, Psychology M117A or Neuroscience M202, Psychology 212, Psychology 260A, 260B, eight units of Psychology 205, Psychology 207A, 207B, or 207C. Four additional courses in the cognitive area, which must include at least one core course and one seminar.

**Developmental.** Psychology 240A-240B; two courses from Psychology 242A through 242F, 243B, 244, 299.

**Learning and Behavior.** Psychology 200A, 200B, plus two courses from 204B through 204E, 210, 290, 293.

**Social.** Psychology 220A, 220B, 220C, and three social seminars taught by three different faculty members. In addition, Psychology 226A is required in the first year, and 226B-226C are required in the first, second, and third years of the program.

**Minor Area Course Requirements**

Students must select one minor area. Courses taken to satisfy a student’s minor area requirements cannot be chosen from among those that could satisfy that student’s major area requirements. The minor is normally satisfied by taking three to four specified courses as indicated below. Other options are also available; see departmental bulletins for further details. The following is standardized departmental coursework for minors.

**Behavioral Neuroscience.** Four units from the Psychology 205 series, plus two of the following: four additional units from Psychology 205A through M205Z, 207A, 207B, 207C, or 291. In addition, students may select Neuroscience M201 and M205.

**Cognitive.** Three of the following courses, two of which must be numbered from 259 through 266: Psychology 259, 261, 262, 263, 265, 266, 268A through 268E, 269.

**Developmental.** Psychology 240A or 240B, plus two of the following: Psychology 242A through 242F, 243A, 243B, 244, M246, 299.

**Experimental Psychopathology.** Four courses approved by the clinical area.

**Learning and Behavior.** (1) Comparative option — Psychology 210, plus two of the following: Biology 120, C219, 274, Psychology 204E, Anthropology 128A, 128B; (2) Learning option — Psychology 200A, 200B, plus one of the following: Psychology 204B, 204C, 204D, 204E, 293.

**Political Psychology.** See departmental bulletin for details.

**Social.** Psychology 220A and 220B, or 220A and 220C, plus one of the following: Psychology 221, 222A, 222B, 223, 225, 227, M228A, M228B, 231, M239.

**Practicum and Internship Requirements for Clinical Students**

(1) At least 400 hours of approved supervised practicum (Psychology 401) are required, of which 150 hours must involve direct clinical service and 75 hours must be formal schedule supervision. These hours are
usually completed during the second through fourth years.

(2) The equivalent of one-year’s full-time supervised internship (Psychology 451) in an acceptable setting approved by the faculty is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship requirements.

In cases in which a graduate student has

(1) completed all academic requirements
(2) passed the final oral examination
(3) received doctoral committee approval to file the dissertation
(4) provided evidence of satisfactory completion of at least nine months of an internship approved by the faculty
(5) obtained approval from the clinical area chair

the student may, under these circumstances, file the dissertation and be awarded the Ph.D. degree with the clear understanding that the remaining months of internship that are required by the American Psychological Association will be completed as outlined in the internship contract. Documentation of subsequent internship completion is provided by the Director of Clinical Training.

Written and Oral Qualifying Examination

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth the student’s knowledge of the major field. The second section is an individualized examination which examines in depth the student’s knowledge of the area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before the oral qualifying examination can be taken.

Contact the department for the specific examination requirements of the various areas of specialization.

Psychology

Lower Division Courses

10. Introductory Psychology. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research.

41. Psychological Statistics. Lecture, five hours. Requisites: course 10, and Mathematics 2 or two terms of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

42. Research Methods in Psychology (6 units). Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and (41 or Statistics 50, C– or better). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues.

85. Introduction to Cognitive Science. Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

88A. Stress, Adaptation, and Coping. Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states: Estimation of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

97. Variable Topics in Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area.

111. Learning Laboratory. Lecture, two hours; laboratory, three hours. Requisites: courses 41, 42, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals.

112A. Basic Processes of Motivated Behavior. Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 41, 110, junior standing. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals.

112B. Psychobiology of Fear and Anxiety. Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 41, 110, junior standing. Recommended: course 115. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. Emphasis on overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research.

112C. Principles of Skill Acquisition. Lecture, three hours. Prerequisites: courses 110 or 120 (recommended), and psychology major standing or consent of instructor. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning.

113. Behavior and Alcohol Laboratory. Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Students conduct an experiment studying effects of alcohol on learning and complex perceptual-motor tasks paid volunteers. Examination of set and setting and role of individual differences in relation to current theories of alcohol use and abuse.

113H. Behavior and Alcohol Laboratory (Honors). Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Honors course parallel to course 113.

114. Alcoholism. Prerequisite: upper division standing. Theories and research on impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

115. Principles of Behavioral Neuroscience. Lecture, three hours; discussion, one hour. Requisites for majors: course 41, Biology 2; for nonmajors: Life Sciences 1, 2, 3. Designed for junior/seniors. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

116. Behavioral Neuroscience Laboratory. Lecture, one hour; laboratory, three hours. Prerequisites: courses 114, 42, 115 (may be taken concurrently), and psychology or psychology major standing. Laboratory experience with various topics in behavioral neuroscience.

M117A. Cellular and Systems Neuroscience. Requisites: Chemistry 132A, Life Sciences 2, Physics B8 or B8C. Not open for credit with credit for Physiological Science 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M117A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M117A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

M117B. Molecular and Developmental Neuroscience. Requisites: course 115 (or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A) or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage-dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches to developmental neurobiology.

M117C. Behavioral and Cognitive Neuroscience. Prerequisite: course 115 (or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A) or M117B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Physiological Science M180B). Neural mechanisms underlying motivation, learning, and cognition.
M117J. Biological Bases of Psychiatric Disorders. (Same as Molecular, Cell, and Developmental Biology M190.) Lecture, three hours; laboratory, two hours. Prerequisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

119A. Neurophysiopharmacology. Lecture, three hours. Prerequisites: course 115, junior standing. Analysis, synthesis, and application of pharmacological principles to include interaction of drugs with neurochemically significant substances in the brain.

119AH. Neuropsychopharmacology (Honors). Lecture, three hours. Prerequisite: consent of instructor. Honors course parallel to course 119A.

119B. Human Neurophysiology. Lecture, three hours. Prerequisites: course 115, junior standing. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neural function.

119D. Behavioral Pharmacology. Prerequisites: course 115, junior standing. Experimental and theoretical treatment of drug-behavior relationships; pharmacological aspects of learning, motivation; experimental studies of addiction.

119E. Stress and Bodily Disease. Lecture, three hours. Prerequisites: course 115, junior standing. Psychobiological processes as they pertain to development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.

119F. Neuron Circuitry and Behavior. Prerequisites: course 115, Molecular, Cell, and Developmental Biology 171. Designed for juniors/seniors. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits.

119G. Psychobiology of Pain and Pain Inhibition. Lecture, three hours. Prerequisites: course 115 and senior standing, or consent of instructor. Lectures and discussions on neural mechanisms of pain and problem of chronic pain disease.

119H. Psychophysiology of Motivation. Lecture, three hours. Prerequisites: course 115, junior standing. Basic psychophysiology, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

M119J. Ethology: Physiology of Behavior and Learning in Animals. (Same as Psychiatry M190.) Prerequisites: course 115, junior standing. Basic course in animal behavior, emphasizing neuroethological approaches to the study of behavior. Emphasis on how the nervous system regulates learning and changes occurring at end stages of life. Some alteration of behavior and effects of altered behavior on development. P/NP or letter grading.

119L. Human Neuropsychology. (Formerly numbered 119L.) Lecture, three hours. Prerequisites: courses 115 (or M117A and M117C), 120. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

119M. Psychological Learning. Lecture, two hours; discussion, one hour. Prerequisites: courses 115 and junior standing, or consent of instructor. Introduction to classical and current literature on mechanisms of learning, considering both cell-biological mechanisms and brain circuitry.

M119N. The Visual System. (Formerly numbered 119N.) (Same as Neuroscience M119N.) Lecture, three hours. Prerequisites: research in or Psychobiology, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual system, from retinal input to visual cortex, through lectures, extensive reading, and discussions.

119O. Psychology of Aging. (Same as Gerontology M119C.) Prerequisite: course 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

120. Cognitive Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Survey of cognitive psychology; how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking.

121. Laboratory in Cognitive Psychology. Prerequisites: courses 10, 41, 42, 120 (may be taken concurrently). Psychology or cognitive science major standing. Laboratory methods and phenomena from research on human perception, memory, and cognition.

122. Language and Communication. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41. Introduction to psycholinguistics of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

123. Psycholinguistics. Prerequisite: junior standing. Current theory and research in psycholinguistics; survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

124A. Sensation and Perception. Lecture, three hours; prerequisites: courses 10, 41, 120, junior standing. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches.

124AH. Sensation and Perception (Honors). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 124A.

124B. Visual Information Processing. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, and 120, or consent of instructor. Exploration of issues in visual information processing, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects.

124C. Human Memory. Lecture, two hours; discussion, one hour. Prerequisites: course 120, junior standing. Analysis of recent research on static processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

124D. Principles of Human Performance. Prerequisite: psychology major standing or consent of instructor. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automatic, sensory involvement in action such as vision and kinesthesis, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial, occupational, transportation, musical performances, vehicle control, and sport.

124E. Language and Cognition. Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 120, and junior standing, or consent of instructor. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition.

124F. Thinking. Lecture, three hours. Prerequisite: course 120. Analysis of experimental studies of human categorization, reasonings, decision making, problem solving, creativity, and related topics.

124FH. Thinking (Honors). Lecture, three hours. Honors course parallel to course 124F: P/NP or letter grading.

127. Abnormal Psychology. Lecture, three hours. Prerequisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

127A. Abnormal Psychology (Honors). Lecture, three hours. Prerequisite: consent of instructor. Overview of characteristics of major forms of psychopathology; theories and research on causes of disorder, types of treatment, social and legal issues, and second thoughts.

128A. Personality Measurement. Lecture, three hours. Prerequisites: courses 10, 41. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions.

129B. Introduction to Psychoanalysis. Lecture, three hours. Prerequisites: courses 10, 41. Development of Freud's ideas from 1895 to 1922, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of development in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects.

129C. Culture and Mental Health. Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, and 120. Analysis of recent research on race and ethnicity in mental illness. Focus on cultural phenomena particular to African Americans, Latinos/Chicanos, Asian Americans, and American Indians.
129D. Personality. Lecture, three hours. Prerequisite: course 10. Not open to students with credit for former course 129. Fall Quarter. 199D. Overview of major topics in the field of personality, including personality theory, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

129E. Human Sexuality. Lecture, three hours. Prerequisite: senior psychology major standing. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights the importance of understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

129F. Clinical Psychology of Childhood and Adolescence. Lecture, two hours; discussion, one hour. Prerequisite: course 127. Survey of child and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/N or letter grading.

130. Developmental Psychology. Lecture, three hours; discussion, one hour. Prerequisite: courses 10, 41, 42, and 130 or one course from 133A through 133I. Survey of topics in higher education. Social, emotional, and cognitive development from birth to adolescence.

131. Research in Developmental Psychology. Discussion, one hour; laboratory, three hours; outside study, eight hours. Prerequisites: courses 10, 41, 42, and 130 or one course from 133A through 133I. Designed for psychology and cognitive science majors. Forms of scientific writing; ethics of research, especially with minors; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analyses and data presentation options.

132. Learning Disabilities in Perspective. Lecture, three hours. Prerequisite: upper division standing. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical nature of classroom, psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

133A. Adolescent Development. Lecture, three hours. Prerequisites: courses 10, 41. Examination of cognitive, social, physical, and physiological development of the adolescent and the older adolescent. P/N or letter grading.

133B. Cognitive Development. Lecture, three hours. Prerequisites: courses 10, 41. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language.

133BH. Seminar: Cognitive Development (Honors). Seminar, three hours. Prerequisite: consent of instructor. Honors course parallel to course 133B.

133C. Language Development. Lecture, three hours. Prerequisites: courses 10, 41. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/N or letter grading.

133D. Social and Personality Development. Lecture, three hours. Prerequisites: courses 10, 41. Theory and research on socialization and personality development during childhood. Topics include parent-child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations, P/N or letter grading.

133E. Perceptual Development. Lecture, three hours. Prerequisites: courses 10, 41. Topics include origins and development of human perceptual abilities, origin of sex-specific differences in perceptual abilities, and development of human perceptual abilities. P/N or letter grading.

133F. Psychology and Education. (Formerly numbered 133.) Lecture, three hours. Prerequisites: courses 10, 41. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychological research on reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged. P/N or letter grading.

133G. Culture and Human Development. Lecture, three hours. Prerequisites: courses 10, 41. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/N or letter grading.

133I. Applied Developmental Psychology. Lecture, three hours. Prerequisites: courses 10, 41. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, safety, legal, and public policy issues, child-rearing practices. P/N or letter grading.

133Y. Advanced Applied Developmental Psychology. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 10. Intended for applied developmental psychology minors. Issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing day-care curricula. P/N grading.

133Z. Advanced Applied Developmental Psychology (Honors). Lecture, three hours; discussion, three hours. Prerequisites: courses 10, 41, 42, 135X. Intended for applied developmental psychology minors. Advanced issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing day-care curricula. P/N grading.

135. Social Psychology. Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, 42. Junior standing. Interpersonal relationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena.

136A. Social Psychology Laboratory. Lecture, one hour; laboratory, one hour. Prerequisites: courses 41, 42, 135 (may be taken concurrently), psychology major standing. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires.

136B. Nonexperimental Methods in Social Psychology. Lecture, two hours; laboratory, two hours. Prerequisites: courses 41, 42. Designed for psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires.

136C. Survey Methods in Psychology. Lecture, two hours; laboratory, three hours. Prerequisites: courses 41 (or Statistics 50), 42, psychology major standing. Survey research methods. Research in psychology with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories.

137A. Sport Psychology (Honors). Lecture, three hours. Prerequisite: consent of instructor. Honors course parallel to course 137A.

137B. Attitude Formation and Change. Lecture, three hours. Prerequisites: courses 10, 41, 135. Structure and functions of attitudes, their measurement, how they are formed, and how they are changed.

137C. Close Relationships. Lecture, three hours. Prerequisites: courses 10, 41, 135. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles.

137D. Introduction to Health Psychology. Prerequisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

M137E. Work Behavior of Women and Men. (Same as Women’s Studies M137E.) Prerequisite: course 10 or Women's Studies 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and independence of work and family roles.

137L. Interpersonal Influence and Social Power. Lecture, three hours. Prerequisite: course 135. Theories and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence, the power holder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

M137J. Psychology of Language and Gender. (Same as Communication Studies M124 and Women's Studies M137J.) Lecture, three hours. Prerequisites: course 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicography and usage; sex bias in language, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; “women’s” and “men’s” language in various racial/ethnic/class/sex/gender preference groups; and conversational interaction.

M138. Electoral Politics: Political Psychology. (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (optional); outside study, four hours. Prerequisite: course 135. Theories of psychological processes underlying political decision-making. Examination of political psychology, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.
140. Introduction to Study of Aging. (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Discussion and laboratory for seniors/junior-seniors. Perspectives on major features of human aging: biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NC or CR/GR grading.

142. Advanced Statistical Methods in Psychology. (Formerly numbered M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: course 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression.

144. Psychological Tests and Evaluation. Prerequisite: course 41. Further study of principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation.

150. Mathematical Models in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Mathematics 3C or 31B, Computer Science 10C or 10F, or consent of instructor. Review of theoretical models and experimental evidence for these models in various areas of psychological research: mathematical computer models of learning, perception, cognition, and personality.

151. Computer Applications in Psychology. Lecture, two hours; discussion, two hours. Prerequisites: Computer Science 10C or 10F, consent of instructor. Topics include hardware and software computer problems in design, control, and analysis of experimental data; programming in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

153. Death, Suicide, and Trauma. (Same as Sociology M153.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological and cultural traditions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major.)

156. Psychology of Gender. (Same as Women's Studies M156.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and psychological differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

158. Environmental Psychology. Lecture, three hours. Prerequisites: courses 10, 41. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions common to all environments, both physical and social environments, measurement of information of rate of situations, and personal variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework.

170A. Behavior Modification. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Applied behavior therapy; study of application of principles derived from learning theory; as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug addiction, etc. Lectures, discussions, and demonstrations.

170B. Fieldwork in Behavior Modification. Discussion, two hours; fieldwork, six hours. Prerequisites: course 110 with a grade of A or 170A, consent of instructor. Fieldwork related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

171A. Advanced Fieldwork in Behavior Modification. Lecture, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 170B, psychology major standing, consent of instructor. Advanced fieldwork in applied behavior therapy, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

171B. Practicum: Design and Implementation of Behavioral Interventions. Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 171A, consent of instructor. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

171T. The Afro-American Woman in the U.S. (Same as Afro-American Studies M171T and Women's Studies M172T.) Limited to juniors/seniors. Impact of social, psychological, and political forces which influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological and cultural traditions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major.)

173. Advanced Abnormal Psychology. Lecture, three hours. Prerequisites: courses 10, 41, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety, stress and the schizophrenia, or mood disorders.

174. Interpersonal Process Analysis. Lecture, two hours; laboratory, three hours. Prerequisites: courses 41, 42, 127, psychology major standing. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtroom, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged).

175. Community Psychology. Prerequisites: junior or senior psychology major standing, consent of instructor. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

175H. Community Psychology (Honors). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 175.

176. Communication and Conflict in Couples and Families. (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 41A, 108A, 127, consent of instructor. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

177. Counseling Relationships. Prerequisites: courses 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Conceptual and empirical development of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention. Topics include sociology, conflict, aspiration level, achievement strivings, and causal attributions.

178H. Human Motivation (Honors). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 178.

179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective. Lecture, three hours. Prerequisites: course 10, junior or senior standing. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS).

179B. Biomedical and Psychosocial Aspects of AIDS/Reproductive Health. Lecture, three hours. Prerequisites: course 137D or 179A or Health Services 100, junior or senior standing. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, psychological and social aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

M180A. Contemporary Problems in Mental Retardation. (Same as Psychiatry M180A.) Prerequisites: courses 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

M180B. Contemporary Issues in Mental Retardation. (Same as Psychiatry M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Innovative issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

186A. Cognitive Science Laboratory: Introduction to Theory and Simulation. Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 15, and junior departmental major standing or consent of instructor. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, search, production systems, connectionist networks, and mathematical models. Lectures and discussions intertwined with computer simulations written in common LISP.

186B. Cognitive Science Laboratory: Neural Networks. Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 10A, 10B (or PASCAL), and junior departmental major standing or consent of instructor. Recommended: knowledge of calculus. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.
187A. Psychology and Law. (Formerly numbered 187.) Lecture, two hours; discussion, two hours. Pre- requisite: junior standing. Study of new topics on legal psychology, including eyewitness identification, crime reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

187AH. Psychology and Law (Honors). (Formerly numbered 187H.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Honors course parallel to 187A.

187B. Advanced Psychology and Law. Lecture, three hours; discussion, two hours. Prerequisite: course 187A, junior standing. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

188A. Research in Cognitive Science. Seminar, two hours; laboratory, six hours. Preparation: cognitive science major standing, department consent. Practical applications of cognitive science through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

188B. PSYCHOLOGY AND COGNITIVE SCIENCE. (Formerly numbered 188B) Seminar, two hours; fieldwork, six hours. Preparation: cognitive science major standing, department consent. Practical applications of cognitive science through fieldwork. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

189. Ergonomics and Human Factors. Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 120, junior standing. Examination of human capabilities and limitations in design of human/machine systems such as vehicles, workspaces, and computer software. Emphasis on safety and efficiency. Topics include sources of error, information processing, manual control, training, and personnel selection.

189H. Ergonomics and Human Factors (Honors). Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: consent of instructor. Honors course parallel to course 189. P/NP or letter grading.

190A-190B-190C. Honors Seminar. Lecture, two hours. Prerequisite: honors program standing. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research. Professional presentation and communication may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Advising Office, course 190C may be applied toward elective course requirement for any Psychology Department major. P/NP grading.

192. Practicum in Teaching Psychology. Prerequisites: junior or senior psychology, cognitive science, or psychobiology major standing, consent of department. Training and supervised practicum for advanced undergraduates in teaching psychology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

193. Fieldwork in Psychology. Seminar, two hours; fieldwork (approved community setting), six hours. Prerequisites: sophomore psychology, prepsychobiology, or cognitive science major standing, consent of department. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194A. Research in Psychology. (Formerly numbered 194A.) Seminar, one hour; internship (approved research setting), seven hours. Prerequisites: sopho- more psychology, prepsychobiology, or cognitive science, or psychobiology major standing, consent of depart- ment. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194B-194C. Ongoing Research in Psychology. (Formerly numbered 194B.) Seminar, one hour; intern- ship (approved research setting), five hours. Prerequisites: sophomore psychology, prepsychobiology, cognitive science, or psychobiology major standing, consent of department. Minimum of two terms required. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. In Progress and P/NP grading.

197. Current Issues in Psychology. Lecture, three hours. Prerequisite: junior or senior major standing (some sections may require consent of instructor). Study of selected current topics of psychological interest. Consult Schedule of Classes for topics and instructors. Only one graded course may be applied as an elective toward psychology major. If content is approved in advance by Undergraduate Advising Office, psychology and cognitive science majors may petition to use course to satisfy an elective requirement. May be repeated for credit with consent of department.

199. Directed Individual Research and Studies. Prerequisites: senior or senior psychology, psychobiology, or cognitive science major standing (juniors must have at least 3.0 GPA in the major), consent of instructor and vice chair for Undergraduate Affairs (based on written proposal outlining course of study). Consult Undergrad- uate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one four-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by Undergraduate Office, four units of course 199 may be applied toward elective course requirement for psychology major and toward Psychology 188 requirement for cognitive sci- ence major.

Graduate Courses

200A. Animal Learning and Behavior. Basic princi- ples and characteristics of learning and behavior, in- cluding Pavlovian conditioning, instrumental learning, and species-specific behavior.

200B. Human Learning and Behavior. Lecture, three hours. Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of socially significant problems.

201. Current Issues in Learning and Behavior (1 unit). Discussion, 90 minutes. Prerequisite: graduate standing. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading.

204B. Theories of Learning. Discussion, three hours. Prerequisite: course 204A or equivalent. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenom- ena.

204C. Applied Learning. Lecture, three hours. Pre- requisite: graduate standing in psychology, consent of instructor. Lectures and discussion on current research regarding the use of learning and behavioral methods to clinical problems, and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

205. Fear and Anxiety. Lecture, three hours. Prereq- uisite: graduate training. Presentation of theoreti- cal and empirical advances, from biological and behavioral perspectives, in the area of fear and anxi- ety. Integration of animal and human research.

204E. Primitive Motivational Processes. Lecture, three hours. Prerequisite: graduate standing. Analy- sis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, forag- ing, and reproduction. Same approach also applied to phenomena such as acquired motivation, rein- forcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior.

205F. Animal Cognition and Cellular Basis of Learning. Discussion, three hours. Prerequisite: graduate standing. Discussion of experimental litera- ture on spatial and temporal learning, learning of rel- ative reinforcement (the reward (theoretical and experimental data), and classical conditioning, all treated from a computational/represen- tational, perspective, with emphasis on implica- tions for cellular bases of learning and memory. S/U or letter grading.

205A. Behavioral Neuroendocrinology (2 units). Lecture, three hours. Prerequisite: graduate standing. Mechanisms of hormone action on the brain that in- fluence behavior, including permanent actions in de- velopment and transient actions in adulthood. Using a comparative approach, topics include sexual differ- entiation, long-term effects of stress, seasonal and other changes in adulthood and aging.

205B. Human Neurophysiology (2 units). Lecture, three hours. Prerequisite: graduate standing. Exami- nation of higher cognitive processes in terms of neu- ronal mechanisms that underlie them. Topics include cortical modularity, coordination of somatosensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracerebral systems.

205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function (2 units). Lecture, three hours. Prerequisite: graduate standing. De- tailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neuro- hormones, and neuropeptides). Overview of disease agents. Discussion of their roles in normal brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on cur- rent and past thinking about Alzheimer's disease, Parkinsonism, Huntington's disease, and Down's syndrome dementia.

205D. Clinical Psychopharmacology (2 units). Lecture, three hours. Prerequisite: graduate standing. General principles of brain neurotransmitters, in- cluding synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug adminis- tration and pharmacokinetics. Major classes of psy- choaffective drugs, animal models, and "atypical" compounds.

205E. Psychology of Emotion and Stress (2 units). Lecture, three hours. Prerequisite: graduate standing. Overview of literature on role of the brain and autonomic and endocrine systems in emotion and stress-related responses. Some emphasis on in- volvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases.

205F. Psychology of Learning (2 units). Lecture, three hours. Prerequisite: graduate standing. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular ap- proaches. Theories of how neural circuitry might be organized to make learning possible.
205G. Pain (2 units). Lecture, three hours. Prerequisite: graduate standing. Consideration of pain from both biocultural and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity.

205L. Motor Coordination (2 units). Lecture, three hours. Prerequisite: graduate standing. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: effector force, oscillator coupling, potentiation, and depression. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording.

205J. Homeostasis Drive, Hunger, and Thirst (2 units). Lecture, three hours. Prerequisite: graduate standing. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of thirst on basis of depletion of body fluid compartments. Consideration of hunger, focusing on two theories — “Glucostatic” and “Energetastic.”

205K. Vision Neurobiology (2 units). Lecture, three hours. Prerequisite: graduate standing. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance.

205L. Cognitive Neuroscience (2 units). Lecture, three hours; Prerequisite: graduate standing. Overview of neural basis of cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization.

205M. Neuropsychology of Perception (2 units). Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing topics including binoculars and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. S/U or letter grading.

205Z. Behavioral and Systems Neuroscience. (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamental of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cellular physiology, and molecular mechanisms that mediate behaviorally defined functions.

207A-207B-207C. Seminars: Physiological Psychology. Prerequisite: course 115 or equivalent.

210. Comparative Psychobiology. Prerequisites: course 115 or equivalent, consent of instructor. Survey of determinants of species-specific behavior, including genetic influences and learning.

212. Evaluation of Research Literature in Physiological Psychology (1 unit). Discussion, 90 minutes. Prerequisite: consent of instructor. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

213. Neuroscience and Brain Mapping. (Same as Neuroscience M272 and Physiological Science M272.) Lecture, three hours; outside study, nine hours. Prerequisites: Neuroscience M201, M202. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and clinical applications, brain function, and their relationship discussed with regard to imaging.

220A. Social Psychology. Lecture, three hours. Prerequisite: graduate standing in psychology. Intensive consideration of concepts, theories, and major problems in social psychology.

220B. Research Methods in Social Psychology. Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Research design and methodology issues in experimental and nonexperimental social research.

220C. Advanced Social Psychology. Lecture, three hours. Prerequisite: course 220A or 220D. Review of contemporary issues in social psychological research and theory.

220D. Introduction to Social Psychology. Lecture, three hours. Prerequisite: graduate standing. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

221. Seminar: Attitude Formation and Change. Discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

222A. Interpersonal Relations. Discussion, three hours. Prerequisite: course 220A or consent of instructor. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

222B. Interpersonal Influence and Social Power. Seminar, three hours. Prerequisite: advanced social psychology course (psychological or sociological) or consent of instructor. Review of theory and research on interpersonal influence, with applications to various social relationships such as supervi- sory/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political offices, etc.

223. Seminar: Social Survey Research. Seminar, three hours. Prerequisite: course 220B or consent of instructor. Contemporary issues and topics in social survey research methodology.

223B. Seminar: Critical Problems in Social Psychology. Lecture, discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. May be repeated for credit with consent of instructor.

226A-226B-226C. Current Literature in Social Psychology (2 units each). Discussion, 90 minutes. Prerequisite for courses 226A-226B: consent of instructor for nonsocial psychology students. Course 226A is limited to first-year social psychology students. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.

247. Health Psychology. Lecture, three hours; discussion, one hour. Prerequisite: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

228A, 228B. Seminar: Political Psychology. (Same as History M236A and Political Science M261A.) Discussion, three hours. Introduction to political psychology. Prerequisite: psychology, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

228B. Seminar: Political Psychology. (Same as Political Science M261D.) Discussion, three hours. Prerequisite: course 220A or Political Science M261C or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

228C. Critical Problems in Political Psychology. (Same as Political Science M261E.) Discussion, three hours.

229. Social Cognition. Lecture, one hour; discussion, two hours. Prerequisite: consent of instructor with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

231. Psychology of Gender. Seminar, three hours. Prerequisite: one prior course on gender/women’s studies or consent of instructor. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

232. Human Sexuality. Lecture, three hours. Prerequisite: graduate standing. Designed to teach students how to carry out research on human sexual behavior. Conten- tions include theory (e.g., psychosocial develop- ment, physiological and endocrinological implica- tions, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

233. Seminar: Environmental Psychology. Prerequisites: courses 225, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relationships. Use of human emotional responses to environ- ments as intervening variable of specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to ex- plain within-individual difference in response to same environment over time or between-individual differ- ences to same situation. Review of literature relating information rate from environments to arousal and preference for those environments.

234. Social Psychological Aspects of Competitive Youth Sport. Prerequisite: consent of instructor. Review of research concerning social psychological aspects of competitive sport. Youth Sport is presented as a major achievement domain for young participants. Topics include sources and conse- quences of competitive stress, significant adult influ- ences and interactions, predictors of performance, determinants of participation, and dropping out, and socialization through sport.

238. Survey Research Techniques in Psychocul- tural Studies. (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techni- ques conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural prob- lems.

250A. Personality, Motivation, and Attraction. (Same as Education M215.) Current research in theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Per- ceived causes of outcomes in achievement and affilia- tive domains.

240A-240B. Developmental Psychology. Lecture, three hours. Prerequisites: one undergraduate develop- mental psychology course, graduate standing. Con- sideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

241. Current Developments in Developmental Psychology (1 unit). Discussion, 90 minutes. Prerequisite: graduate standing in developmental psychology. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to inter- ests of other presentations by graduate students.

242A-242F. Seminars: Developmental Psychology. Seminar, three hours. Prerequisites: courses 240A- 240B or equivalent, consent of instructor. Each course may be taken independently and may be repeated for credit.

242A. Perceptual Development.
242B. Cognitive Development.

242C. Socialization.

M242D. Social Development and Education. (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

242F. Development of Language and Communication.

243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology. Seminar, three hours. Prerequisite: courses 240A-240B or equivalent, consent of instructor. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress grading.

244. Critical Problems in Developmental Psychology. Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

M245. Personality Development and Education. (Same as Education M217C.) Review of research and theory of childhood and adolescent areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of basis of social behaviors in personality theory and development.

M246. Psychological Aspects of Mental Retardation. (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

249. Evaluation Research. Prerequisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

250A. Advanced Psychological Statistics. Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

250B. Advanced Psychological Statistics. Advanced experimental design and planning of investigations.

251A-251B-251C. Research Methods. Limited to psychology graduate students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 251A only).

252A. Multivariate Analysis. Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to multivariate analysis of data having multiple dependent variables. Topics include continuous multivariate distributions, multiple regression, multivariate analysis of variance, discriminant analysis, canonical correlation, principal component analysis. Applications from clinical, cognitive, physiological, and social psychology, Computer methods.

252B. Discrete Multivariate Analysis. Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, independence graphs, and other stochastic processes, queueing theory, contingency tables, log-linear models, and ordered categorical variables. Applications from various areas of psychology.

254A. Psychological Scaling. Lecture, three hours. Prerequisite: graduate standing. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.

254B. Cluster Analysis. Lecture, three hours. Prerequisite: graduate standing. Quantitative methods for classification and description of phenomena underlying major clustering methods. Use of methods in exploratory data analysis.

M256. Advanced Regression Analysis. (Same as Political Science M200E.) Seminar, three hours. Prerequisite: consent of instructor. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

M257. Multivariate Analysis with Latent Variables. (Same as Political Science M200B.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unsolved latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory and via analysis of moment structures and restoring algorithms. Inference, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

258. Special Problems in Psychological Statistics. Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Special problems in psychological statistics and data analysis.

259. Quantitative Methods in Cognitive Psychology. Prerequisites: courses 250A and 250B, or consent of instructor. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

260A-260B-260C. Proseminars: Cognitive Psychology (1 unit each). Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

261. Perception. Lecture, three hours. Prerequisite: consent of instructor. Controversy and study in perception of the object. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? Location of human perceptual systems? How do they process system information?

262. Human Learning and Memory. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory.

263. Psycholinguistics. Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in information in psycholinguistics, coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

266. Cognitive Science. Lecture, three hours. Prerequisite: consent of instructor. Major issues in cognitive science. Representation of cognitive structures and processes in science. Courses include perception, learning and memory, problem solving, and reasoning.

268A-268E. Seminars: Human Information Processing. Seminar, three hours. Topics vary with interests of director. Each course may be taken independently and may be repeated for credit: 268A. Perception; 268B. Human Learning and Memory; 268C. Judgment and Decision Processes; 268D. Language and Cognition; 268E. Human Performance.

269. Seminar: Cognitive Psychology. Seminar, three hours. Prerequisite: consent of instructor. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

271D. Clinical Research Laboratory (2 units). Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Limited to graduate students in clinical psychology. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.

271E-271F. Clinical Research Laboratories (2 units each). Prerequisites: course 271D. Graduate standing in clinical psychology. Required of first-year clinical psychology students. S/U grading. 271E. Brief overview of research design issues in clinical psychology and practical issues in students' own research activities. 271F. Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.

272C. Clinical Interventions for Psychological Problems of Children.

272D. Family Therapy and Family Dynamics.

272E. Special Problems.

272F. Behavior Modification with Adults. Prerequisites: courses 271A-271B-271C or consent of instructor. Course in series of clinical intervention and assessment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.

276. Clinical Approaches to Children with Learning and Related Behavior Problems. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Problem experiences to illustrate course content and provide opportunities to improve research and clinical competence.

277A-277B. Advanced Clinical Assessment, Laboratory, two half-hours per week. This course is designed to enable a student to increase his knowledge and skill in the procedures of psychological assessment used in clinical practice. The 12-week laboratory will be arranged through Psychology Clinic. Prerequisite: graduate standing in clinical psychology. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy.

279. Seminar: Research in Psychopathology. Two, one-hour seminars. Abstracts of original research papers in psychopathology are discussed. Prerequisite: graduate standing. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

283. Psychopathology. Survey of dominant psychological attributes of particular forms of psychopathology, including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

284. Seminar: Clinical Psychology and Communication. Three hours. Prerequisite: consent of instructor. Cognitive-behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

286. Issues and Concepts of Clinical Psychology. Open to graduate students other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases.

287. Critical Problems in Clinical Research Methodology. Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research.

290. History of Psychology. Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues.

291. Principles of Behavioral Pharmacology. Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological.

292. Biobehavioral Mechanisms of Stress and Disease. Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Behavioral physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Use of and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement.

293. Behavioral and Psychophysiological Problems of Alcoholism. Prerequisite: consent of instructor. Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning alcoholism and treatment. Experimental approaches.

294. Seminar: Neuroendocrine Homeostasis. Two, one-hour seminars. Prerequisite: consent of instructor. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Problem experiences to illustrate course content and provide opportunities to improve research and clinical competence.

295. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M226J, Education M222A, and Psychiatry M223J.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research. Prerequisite: consent of instructor. Students expected to integrate observational work into their current research interests.

296. Neurobiology of Sleep (3 units). An interdisciplinary approach to understanding the sleep process. Prerequisites: M259 and Psychology M249B. Readings are drawn from the biological and behavioral literature. Prerequisite: consent of instructor. Critical evaluation of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

297. Issues in Social Development of the Minority Child. Seminar, three hours. Prerequisite: graduate standing, consent of instructor. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.

298. Special Problems in Psychology. Content depends on interests of participating instructor. May be repeated for credit.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, association with a Teaching appren- ticeship under active guidance and supervision of a regular faculty member responsible for curricu- lum and instruction at the University. May be repeated for credit. S/U grading.

401. Fieldwork in Clinical Psychology (1 to 12 units). Prerequisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee). Remaining meetings center on student presentations of current and proposed research activity. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. Prerequisites: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research activity under way, consent of instructor and clinical steering committee. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

410D-410E-410F. Clinical Assessment Supervision. Discussion, two hours; other, one hour. Prereq- uisite: third-year graduate standing in clinical psychology or consent of instructor. Study and prac- tice of knowledge, concepts, and theories on teaching and supervision of psychological assessment.

420A-420B. Health Psychology Practicum (2 units each). Prerequisite: graduate standing. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field.

421. Research in Social Psychology (2 units). Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

423. Social Survey Research Practicum. Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

425. Health Psychology Lecture Series (2 units). Clinicians and researchers in health psychology from Los Angeles area present their research programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

451. Internship in Clinical Psychology (6 to 12 units). Prerequisite: course 401. Limited to students who have successfully completed departmental qualifying examinations. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology (2 to 4 units).

495. Presentation of Psychological Materials. Supervisor: graduate standing. Students present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean. Host campus teacher, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Psychology (2 to 12 units). One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

597. Individual Studies (2 to 12 units). Intended primarily for preparing for Ph.D. qualifying examination. May be required by some area committees as a prerequisite for taking examinations. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.
PUBLIC HEALTH SCHOOLWIDE PROGRAMS
School of Public Health

UCLA
16-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5516
http://www.ph.ucla.edu/sao/

Scope and Objectives

The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

Certain degrees within the School of Public Health are not offered by the individual departments or the School of the University. The Master of Public Health; the Doctor of Public Health; the concurrent M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and the concurrent M.A./M.P.H. with Islamic Studies; and two articulated M.A./M.P.H. degrees with African Area Studies and Latin American Studies.

For information on the Master of Science and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, or Health Services, or the Master of Science and Ph.D. degrees in Public Health within the Department of Community Health Sciences, see the listings for those departments. For information on the interdepartmental D.Env. degree program housed in the Department of Environmental Health Sciences, see the listing for Environmental Science and Engineering.

Master of Science in Preventive Medicine and Public Health is not admitting new students at this time.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degrees

Master of Public Health

The Master of Public Health (M.P.H.) is a professional degree in the field of public health. Students are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Admission

For admission to the Master of Public Health program, both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission must be completed. Three letters of recommendation, two from former professors and one from an employer (if no employer, three former professors), test scores, and transcripts are required before an application is considered complete. Application forms and the Announcement of the UCLA School of Public Health may be obtained by writing to the Student Affairs Office, School of Public Health, UCLA, Los Angeles, CA 90024-1772. It is the student's responsibility to ensure that the application file is complete.

The preferred date for receipt of applications for the following Fall Quarter is December 15. Applications received after this date have reduced opportunities for admission and financial aid.

Applicants must meet the University minimum of an acceptable bachelor's degree with a B average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered. In addition, applicants must be accepted by and accommodated in the department of the School of Public Health in which they wish to study. Applicants who need help in deciding on a department should speak either to the department administrators or to the staff in the Student Affairs Office.

Applicants to the School of Public Health must perform satisfactorily on a recent Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). The Epidemiology Department requires GRE scores. MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program. Applicants at the master's level require a minimum combined (verbal and quantitative) GRE score of 1,100. The analytical section is not required. The Biostatistics Department has different criteria for evaluating performance on aptitude tests for its master's and doctoral degrees. Those applying to the biostatistics program should contact that department. No screening examination is required for admission; however, specified courses are required by the Departments of Biostatistics and Environmental Health Sciences. Applicants whose undergraduate coursework has been deficient in breadth of fundamental training have to take specified undergraduate courses after admission.

The prior program of study for applicants to the Master of Public Health degree should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and other courses that constitute an adequate preparation for the proposed area of specialization.

Applicants whose prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for the proposed area of specialization must include courses in those sciences in their graduate programs; these may not be applied toward the minimum requirements for the degree.

Interdivisional International Health. The school offers several options for foreign or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations and cross-cultural settings.

Applicants who are interested must specify the department (and program in Community Health Sciences Department) most relevant to their skills area on their application, clearly indicating their international interests. Once admitted, students are given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally-oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the area of population and family health in the community health sciences.

Biostatistics

Students concentrating in biostatistics should have completed at least one year of calculus. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.
**Environmental Health Sciences**

Students concentrating in environmental health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

**Health Services**

Applicants interested in the joint M.P.H./M.B.A. program in the Health Services Department must take the GMAT, not the GRE.

Applicants to the one-year health services organization program in the Health Services Department must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program. Satisfactory performance on the GRE is required, and a personal interview is recommended.

**M.P.H. Program for Health Professionals**

Health and allied professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by the faculty of the School of Public Health, and all five departments in the school have the option of offering a specialization in their area. Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years' professional experience or its full-time equivalent in a health care setting.

The first year of study is devoted to the specific core requirements in the area of specialization and to the required M.P.H. core courses in Biostatistics, Community Health Sciences, Epidemiology, Health Services, and Environmental Health Sciences. The second year of study entails completing required and elective courses in the student's specialty area, a master's project, and a report on that project. The master's project, which includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem. For further information, contact the department of interest.

**Areas of Study**

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

**Biostatistics**

Required department courses include Biostatistics 100A, 100B, and 100C (in exceptional circumstances, Biostatistics 110A, 110B, and 115 may be substituted); Biostatistics 402A, 402B (402B satisfies the field training requirement); Biostatistics 403, 406; and two courses from Biostatistics 200A through 200C, M210 through 219, 230 through M236 or 404 through 419 (except 406). Epidemiology 201A-201B are recommended. Elective courses should be selected in public health, biomathematics, or mathematics.

**Community Health Sciences**

Students select one of the following areas of concentration: health education/promotion, international family health, public health nutrition, public health policy, or sociocultural aspects of health. All students are required to complete Community Health Sciences 210, 211A-211B, and 400. It is expected that Community Health Sciences 210 and 211A-211B be completed during the student's first three quarters in residence. Normally two years or six quarters are needed to complete the 60 units of coursework required. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year (48 units), but only after formal consideration and approval by the department's faculty.

**Health Education/Promotion.** Community Health Sciences 271, 282, 482, and 487 are required. In addition, two to three elective courses from the list of specialty areas are selected in consultation with the student's adviser. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with the faculty advisor, from within the school or in other schools/colleges at UCLA.

**International Family Health.** For health professionals (physicians, nurses, and nutritionists) who intend to work or have worked in developing areas and nonhealth professionals with work experience in international health, community development, or related work. Community Health Sciences 200, 434A, and 441 are required. In consultation with the adviser, additional elective courses are selected from Community Health Sciences 132, M140, 231, 233, M236, 246, 280, 294, 430A, 443, 447, 448 and relevant courses in other departments in the school or other schools/colleges at UCLA.

**Public Health Nutrition.** The public health nutrition specialization is for dietitians and nutritionists who have an R.D., are R.D.-eligible, or have an equivalent licensure/credential from another country; persons concurrently enrolled in internship leading to R.D. eligibility; physicians and dentists; and other health professionals on a case-by-case basis depending on completed graduate and undergraduate coursework. Community Health Sciences 231 and 443 are required. In consultation with the adviser, elective courses are selected from Community Health Sciences 212, 218, M432, 436A, 436B, 444, and relevant courses in other departments in the school and currently under development in the Community Health Sciences Department.

**Public Health Policy.** The public health policy specialization provides education in the policy process and policy analysis applied to health promotion and disease prevention. In addition to department requirements, Community Health Sciences M252, M287, and 482 are required; the internship requirement may be reduced for students with extensive prior experience. In consultation with the adviser, the student must also select two courses from Community Health Sciences 214, 230, M236, 237, M274, 291, M432, and 436A-436B, and relevant courses from within the school or in other departments/schools at UCLA.

**Sociocultural Aspects of Health.** For students interested in the relation between location in the social system and health outcomes. In consultation with the adviser, students must also select four courses from Community Health Sciences 230, 235, 237, 238, M240, M244, M245A, M245B, M245C, 246, 272, 273, M275, 278, 281, 284, 285, 290, 291, 431, M432, 433, 474, and relevant graduate and professional courses from within the school or in other schools/departments at UCLA.

**Environmental Health Sciences**

Required courses include Biostatistics 100B; Environmental Health Sciences 201, 210, 230, 240, 250, 401 (or 410A and 410B), and M411. Each departmental required course may be waived if a similar college-level course has been taken elsewhere and the student can pass the waiver examination. Elective courses should be selected in the chosen area of specialization.

Units from the courses listed above sum to approximately 52. At least five of these courses must be graduate courses (200, 400, and 500 series). Thus, approximately 20 units are to be completed by specialty courses and electives for a two-year program, assuming a minimum of 12 units per quarter. It should be noted that the department core, supplemented by Environmental Health Sciences 470, satisfies the requirement for taking the registered sanitarian's examination.

**Epidemiology**

Students with no prior clinical doctorate degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 220, 400 and 12 elective units, at least four of which must be selected from one of the following courses featuring computer use and applications, or a relevant course decided upon after consultation with the adviser: Biostatistics 403, Epidemiology 410A, 410B, 414, 415, 418 and 261. The eight remaining units must be selected from either the computer use and applications courses or the following list of general electives: Epidemiology 202A, 202B, 203, 204,
Cooperative Master's Degrees

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A. African Area Studies/M.P.H.

The School of Public Health and the African Area Studies Program have an articulated degree program whereby students can work sequentially for the Master of Arts degree in African Area Studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Student Affairs Office, UCLA School of Public Health.

M.A. Islamic Studies/M.P.H.

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

M.A. Latin American Studies/M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

M.A./M.P.H.

The Department of Health Services and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges.

Students should request application materials from both the M.B.A. Admissions Office, Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses (44 units), at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses are required for the degree.

Required school core courses include Biostatistics 100A or 110A; Community Health Sciences 100 (210 for community health sciences majors); Environmental Health Sciences 100 or 101; Epidemiology 100 (200, 201A-201B for epidemiology majors); and Health Services 100 (200A-200B-200C for health services majors). Each core course may be waived if the student has taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the core courses, at least three courses (two or four units) outside the student’s area of specialization are strongly recommended.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master’s degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

Students must pass a comprehensive examination in their department. Students may be reexamined once. The aim of the examination, as a culminating experience, is to assess the student’s ability to select theories, methods, and techniques from across the content matter of a field, integrate and synthesize knowledge, and apply it to the solution of public health problems.

Thesis Plan

None.

Doctoral Degree

Admission

In addition to the University minimum requirements, for admission to the Doctor of Public Health (Dr.P.H.) degree program, the school requires:

(1) Satisfactory performance on the Graduate Record Examination (GRE). Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. Applicants to the Department of Community Health Sciences, at the discretion of the department, may
substitute equivalent scores on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT).

(2) Completion of the M.P.H. or a master's degree in an appropriately related field. If the master's degree is in a field other than public health, applicants must have taken the equivalent of the core mandatory M.P.H. courses or include them in the course of study after admission.

(3) At least a 3.0 junior-senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses.

(4) A positive recommendation by a department in the School of Public Health. Applicants to the Department of Community Health Sciences must have acceptance by an initial doctoral adviser in the department.

(5) Approval by the doctoral admissions committee and the associate dean for Student Affairs. Screening examinations may be required by each department.

(6) A writing sample is required by the Department of Community Health Sciences.

(7) The Department of Community Health Sciences requires at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

It is recommended that applicants to the Department of Community Health Sciences contact one or more members of the faculty whom they are considering as advisors in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

Major fields or Subdisciplines

Major fields and subdisciplines and typical course plans, in addition to courses required for the master's degree, are listed below.

Biostatistics

A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of the first year in the program, if not taken prior to entering. Courses covered by this and other examinations are determined in consultation with an advisor and the department faculty. The following courses, if not already taken, should be included: Biostatistics 115, 200A, 200B-200C, M250A-M250B; any three additional graduate-level courses in biostatistics selected with consent of the advisor; three courses in the 400 series selected with consent of the advisor; Statistics M152A, 152B. All registered doctoral students enroll in Biostatics 402B for one term each year. This may be used as the additional area of concentration referenced below.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Biostatistics are required for breadth. The department also requires an additional area of concentration which may be either inside or outside the school. Electives, selected in consultation with the advisor, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

Community Health Sciences

There are five areas of specialization or examination within the department: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health.

Environmental Health Sciences

Recommended courses are determined in consultation with the advisor. Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Environmental Health Sciences are required for breadth. The major requires an additional area of concentration which may be either inside or outside the school.

Epidemiology

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management, and/or policy; and laboratory and clinical studies in medical, health, or biological sciences.

Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Epidemiology are required for breadth. (Students may petition to include up to two 100-level courses.) The major requires an additional area of concentration which may be either inside or outside the school (e.g., biostatistics, biology, microbiology and immunology, neuroscience).

Health Services

The Dr.P.H. in Health Services is intended to prepare students for leadership positions in health services administration. In contrast to the Ph.D., the orientation is professional rather than academic and comprehensive rather than specialized.

The prerequisites are an M.P.H. degree or its equivalent, and full-time work experience in some aspect of public health is highly recommended. The candidate is then enrolled in the Dr.P.H. which may (with full-time study) be completed in three years.

In the first two doctoral years, the formal coursework is intended to acquaint students with the full scope of public health knowledge. Students are normally expected to complete 72 units or 18 full courses beyond the M.P.H. degree to develop mastery in the following areas: (1) basic tools of social analysis; (2) health and disease in populations; (3) promotion of health and prevention of disease; and (4) health systems and their management. The specific course program depends on the applicant's previous coursework and experience.

Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Health Services.

The third doctoral year includes a residency in a public or private health services organization, seminar courses (eight units) devoted to principles and strategies of health services leadership, and the preparation of a problem-solving dissertation related to the applicant's residency experience.

After completion of the second doctoral year, the candidate must pass a qualifying examination. Normally, one reexamination after failure is allowed. After the third doctoral year, a final oral examination based on the dissertation is required of all candidates.

Course Requirements

Course requirements in the major field depend on the department/program and the field chosen. Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments outside the major department.

The major department requires an additional area of concentration which may be either inside or outside the school. In departments allowing it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

Community Health Sciences

If the student does not have a master’s degree in public health, the school’s core courses for the Masters in Public Health (M.P.H) degree are required: Biostatistics 100A, Epidemiology 100, Health Services 100, and Environmental Health Sciences 100; and the department’s core courses, Community Health Sciences 210, 211A, and 211B. Additionally, all students are required to take the following courses if they have not already taken them or their equivalents during the course of their master’s studies: Community Health Sciences 212, Biostatistics 100A, 100B, and 406. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to the coursework specified above, the student must take a minimum of 48 units in residence in the doctoral program. Twenty of the 48 units required must be taken within the Department of Community Health Sciences. Only four units of individual studies (Commu-
rity Health Sciences 596) may be counted toward the 48-unit minimum requirement. Students must take a minimum of two courses (eight units) in research methodology (i.e., data acquisition) and two courses (eight units) in statistics (i.e., data analysis). These courses may be taken inside or outside of the School of Public Health. Students are required to attend the Doctoral Round Table (Community Health Sciences 242 or Community Health Sciences 286) continuously from the first year of residency until the student has been advanced to candidacy. The Doctoral Round Table does not fulfill any of the 48 units required for the doctorate.

Students must complete a minor which is expected to be in another department within the School of Public Health. Six graduate-level courses (24 units) are required, four units of which must be taken from within one department. Students must consult with their advisors before declaring a minor.

Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass written examinations in the major prepared and administered by the guidance committee or by the faculty of the department. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after the student has made a tentative decision on a dissertation topic.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in Public Health; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

The doctoral committee administers the University Oral Qualifying Examination after the written examinations have been successfully completed.

Community Health Sciences

Before advancement to candidacy, all coursework must have been completed, and the student must have passed two written examinations and an oral qualifying examination in the major field. The first written examination is taken by all students. The other is tailored to the specific interests of the individual student. Both written examinations may be repeated only once. Additionally, the student must complete the requirements for the minor field.

The first examination provides an assessment of the student's breadth of substantive knowledge, theory, and methods that are common to the disciplines that comprise Community Health Sciences. Students are expected to demonstrate a coherent and well-synthesized command of this material. This examination is administered by the departmental doctoral committee in the Fall Quarter of each year. The second examination is in one of the areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Students are expected to demonstrate in-depth knowledge in the area, and to be able to apply this knowledge and knowledge derived from the minor to problems or practice and policy. The examination is based on a reading list generated by the student in consultation with the student's guidance committee, which also administers the examination. It is administered after the first examination at a time that has been agreed upon mutually by the students and the guidance committee.

After the student has passed the written qualifying examinations and completed the minor requirements, and at least one month prior to taking the University Oral Qualifying Examination, a doctoral committee is nominated. The student first selects the committee chair, who also serves as the student's adviser. The student and chair then work together to nominate the remaining committee members. The doctoral committee consists of at least four faculty members including the chair, who hold professorial appointments at UCLA. Two of the faculty must be tenured. Two of the four must hold appointments in Community Health Sciences; one must be an outside member who holds no appointment in the school of Public Health; one of the four must be from the minor field. Eligible faculty include those in the tenure-eligible series, the in-residence series, acting or emeritus in these series; in addition, one of the four committee members, who may also cochair if appropriate, may hold an appointment in the adjunct or clinical professorial series. The composition of the committee must be approved by the department chair. The doctoral committee guides the student's progress toward completion of the dissertation.

The student is advanced to candidacy and commences work on a dissertation by passing the University Oral Qualifying Examination, which is administered by the doctoral committee. Only the student and the committee members attend this examination; all committee members must be present. The examination may be repeated once if a majority of the committee so recommends.

Public Policy and Social Research Schoolwide Programs

Scope and Objectives

The School of Public Policy and Social Research offers both graduate and undergraduate programs in public policy.

Undergraduate Study

Public Policy Minor

The public policy minor provides undergraduates with a systematic overview of public policy questions, deals with these questions in theoretical and conceptual ways, and exposes students to practical issues of public policy through the examination of specific policy issues and real-world policy questions.

To enter the minor, students must have an overall grade-point average of 2.0 or better, enroll in Policy Studies 10A, and file a petition at the School of Public Policy and Social Research Office of Academic Services, 3371 Public Policy Building. For further information, contact Eric H. Monkkonen at (310) 206-4613.

Required Lower Division Core Courses: Policy Studies 10A, 10B. Highly recommended: one statistics course.

Required Upper Division Courses: (1) Three courses from one of the following clusters: labor and work cluster — Policy Studies 141, 142, 144, 145, 148; social welfare cluster — Social Welfare 100A, 100B, 101, 102, 104A through 104E, 105; urban policy and planning cluster — Urban Planning 191, 192, 193 (may be repeated for credit with topic change), 197; (2) one elective course offered by the School of Public Policy and Social Research not used to satisfy the core or cluster requirement; (3) research seminar (Policy Studies 197); fieldwork experience taken for credit may be substituted for the research seminar by petition.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.
**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

**Master’s Degree**

**Admission**

Applicants to the Master of Public Policy (M.P.P.) program are evaluated on their overall record. The final decision is based on a subjective assessment of the applicant's potential to meet the scholarship requirements of the program and to succeed as a policy professional.

A grade-point average of 3.0 or better in the junior and senior years is required and preference is given to applicants with a 3.5 or above. Additional consideration is given to the strength of the applicant's undergraduate program and its standards. The quantitative nature of the core curriculum requires that attention be given to quantitative and analytical abilities. An elementary statistics course is strongly recommended.

Scores on the Graduate Record Examination (GRE) General Test are used in combination with the GPA to help predict academic performance in the M.P.P. program. Scores above 550 in each area are usually essential to gain admittance to the program, although possible reasons for lower scores are considered. Especially high GRE scores may help alleviate concerns about a troublesome academic record, but a high GRE score alone is insufficient reason for admission. Under certain conditions, the admissions committee may agree to consider scores on the GMAT or the LSAT in lieu of GRE scores.

The statement of purpose is evaluated to determine the applicant's genuine academic interest in and commitment to a career in public policy, as well as the applicant's general ability to write coherent and convincing prose. The statement can also help determine the match between the applicant's interests and the school's offerings and to assess written communication skills.

Applicants with at least two years of work experience in policy-making or implementation are preferred. Internships and volunteer work in a policy setting are also viewed positively.

Three letters of recommendation are required from supervisors in policy-related work or instructors in undergraduate courses. Recommenders should be individuals who know the applicant well and who can comment specifically on the potential for a career as a policy professional rather than someone of high status in a firm or school who hardly knows the applicant.

A score of at least 600 on the Test of English as a Foreign Language is required for applicants whose native language is not English.

Applications and program information can be obtained on written request to the School of Public Policy and Social Research.

**Areas of Study**

In the second year, students select either two two-course concentrations or one four-course concentration from the following: social welfare, transportation and urban development, employment and labor, regional development and policy.

Concentrations in the following additional areas are also being developed and are available based on need and student/faculty interest: environmental policy, health policy, communications policy, international policy and economic development.

Students also have the option with faculty approval of designing their own concentrations from other courses offered in the School of Public Policy and Social Research or in other schools or departments.

**Course Requirements**

Students take three four-unit courses per quarter for a total of 72 units, including nine core courses, four concentration courses, two electives, and a two-quarter seminar in applied policy analysis. A field internship is also required, generally between the first and second years.

All students are required to take the core curriculum, which provides a broadly based foundation in social/policy analysis together with relevant quantitative, analytical, managerial, and organizational methods. The first eight of the core courses are normally taken in the first year.

**Comprehensive Examination Plan**

This requirement is met by completion of an extended policy paper during the two-quarter policy seminar, which builds on the core courses, internship experience, and the concentration courses. The final policy paper presented by the student must be certified as complete by both the relevant seminar leader and the student's adviser.

**Thesis Plan**

None.

---

**Radiation Oncology**

School of Medicine

UCLA B265 UCLA Medical Plaza 200
Box 956951
Los Angeles, CA 90095-6951
(310) 794-1252

Chairs

H. Rodney Withers, M.D., D.Sc., Chair
Guy J.F. Juillard, M.D., Vice Chair, Clinical Affairs
William McBride, D.Sc., Vice Chair, Division of Experimental Radiation Oncology
James B. Smathers, Ph.D., Vice Chair, Physics

**Scope and Objectives**

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, Wadsworth VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and Wadsworth VA.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy is to preserve function and/or cosmetics while eliminating the cancer. Other activities include total body irradiation before bone marrow transplantation and stereotactic radiosurgery and radiation therapy for benign (A-V malformations, meningiomas) and malignant intracranial lesions. Research interests include clinical trials, growth kinetics, radiation modifiers, molecular biology, immunology, and basic and applied physics. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of varying radiations is essential.

The educational programs serve medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.
The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging, including thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, nuclear medicine, computed tomography, and interventional radiology, are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through self-study of radiologic film files. A two-week core clerkship is offered once every four weeks to third- and fourth-year medical students. There are no on-call responsibilities. Greater depth of experience is provided by the four weeks of elective clerkship offered to fourth-year medical students which emphasizes training in the subspecialties selected by students from the list above.

For further details on the Department of Radiological Sciences and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Scope and Objectives

The UCLA major in the study of religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Coherence and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

Undergraduate Study

Bachelor of Arts Degree

Preparation for the Major

Required: History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

The Major

Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three 199 courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.
In order to qualify for admission, students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Bartsch at the program address.

Study of Religion

Upper Division Courses

100. Undergraduate Seminar: Study of Religion. Prerequisite: consent of instructor. Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

110. Religion and Violence. Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimate violence. Materials include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S.

Course List

Courses marked with an asterisk have readings in foreign languages. See departmental course listings for requisites.

Group I: Methods

Anthropology
156. Comparative Religion

History
193A. History of Religions: Myth
193E. Special Topics in History of Religions

Philosophy
175. Topics in Philosophy of Religion

Study of Religion
100. Undergraduate Seminar: Study of Religion
110. Religion and Violence

Theater
101A. History of World Theater and Drama: Ritual and Religious Drama

Group II: Nonliterate and Ancient Religious Traditions

AND LITERATURE
Scope and Objectives

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

The UCLA Bachelor of Arts degree in French, Italian, Portuguese, or Spanish, or equivalent, is required. Applicants to the Master of Arts program are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to the proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required. Applicants admitted from elsewhere with preparation considered deficient in view of the intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first quarter in the program, new students must consult the program chair concerning the formation of their guidance committee. If students know only the language of their majors, they should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

Areas of Study

Consult the department.

Course Requirements

Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in the major language, with specialization either in linguistics or in literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either linguistics or in literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of the student’s major field of study. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree. Up to eight units of Romance Linguistics and Literature 596 may be applied toward the M.A. degree. Courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan

The comprehensive examination is administered by three members of the guidance committee, appointed by the program chair. The written examination, consisting of one four-hour examination in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each quarter in the second week prior to final examinations. If the examination or any part thereof is failed, the failed portions may be taken once when the examination is next regularly offered. Only those students who attain a high pass grade on the master’s examination are automatically admitted to the Ph.D. program.

Thesis Plan

The program favors the comprehensive examination plan, but under special circumstances M.A. theses for exceptionally well-qualified students are approved. Students may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is the student’s responsibility to choose an appropriate topic and find a professor to direct the thesis. After completion of the thesis, the student must pass a two-hour oral examination testing knowledge of the field of the thesis and general competence. Only those students who attain a high pass on the examination are automatically eligible for admission to the Ph.D. program.

Doctoral Degree

Admission

The UCLA Master of Arts in Romance Linguistics and Literature or the UCLA Master of Arts in French, Italian, Portuguese, or Spanish, or equivalent is required. A strong academic record (normally a grade-point average of 3.4 or better), three letters of recommendation and the Graduate Record Examination (GRE) General Test (normally a combined verbal/quantitative score of 1,100 or better) are required.

Formal application is required of all candidates. Applicants who have completed the UCLA M.A. degree in Romance Linguistics and Literature with distinction (high pass) are automatically eligible for admission to the Ph.D. program; those who received middle pass are reviewed like candidates from other institutions; those who received low pass are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to pass (with grades of B or better) three graduate courses approved by the chair.

Following formal admission, students form a guidance committee in consultation with the chair. Students then meet as soon as possible with their guidance committee to work out a program of courses and set a tentative date for the qualifying examinations. The guidance committee has final authority to prescribe the course of study. Until students have met with this committee and placed themselves under its direction, they are not officially in the Ph.D. program.

Major Fields or Subdisciplines

The program recognizes two fields of specialization: linguistics or literature. Linguistics. (1) the present-day grammar of the Romance language of major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

Literature. One of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century.

The first minor may be one of the preceding fields not chosen for the major. The second minor may be the same field or a new field in another Romance language, or some other re-
lated field in the major language or in Romance linguistics.

Course Requirements
In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses; first minor — three courses; second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master’s degree (or equivalent), at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

Written and Oral Qualifying Examinations
The qualifying examinations, given by the doctoral committee during the Fall, Winter, and Spring Quarters, consist of: (1) a three-hour written examination in the major field; (2) a two-hour examination in the first minor; (3) a one-hour examination in the second minor; and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time the prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

Romance Linguistics and Literature

Graduate Courses
204A-204B. Romance Syntax: French (1 to 4 units each), Lecture, three hours. Prerequisites: Linguistics 120B, 205, consent of instructor. Course 204A is prerequisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system: WH-movement and Complementizer system; clitic constructions, causatives, inversion phenomena; quantifier distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

211. Comparative Romance Syntax. Lecture, three hours. Prerequisite: French 210A or Portuguese 204A or Spanish 204A or consent of instructor. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying syntactic variation.

255. Topics in Romance Syntax (1 to 4 units). Prerequisite: consent of instructor. Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of instructor and program chair. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

597. Preparation for Graduate Examinations (4 to 12 units). Prerequisite: consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Course List
In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their requisites:

Introductory Courses
Italian
201. Bibliography and Methods of Research
Spanish
M200. Research Resources

Linguistics Courses
Grammatical Theory: Linguistics
201. Phonological Theory II
206. Syntactic Theory II

Development of the Romance Languages
Hispano-Romance: Spanish
M205A-M205B. Development of Portuguese and Spanish Languages

Indo-European: Indo-European Studies
210. Indo-European Linguistics: Advanced Course
280A-280B. Seminars: Indo-European Linguistics

Italic Dialects: Latin
242. Italic Dialects and Latin Historical Grammar

Italo-Romance: Italian
222A. History of the Italian Language

Latin History: Latin
240. History of the Latin Language

Medieval Latin: Latin
231A-231B. Seminars: Medieval Latin

Northern Gallo-Romance: French
210A. Phonology and Morphology from Vulgar Latin to French Classicism
210B. Syntax and Semantics from Vulgar Latin to French Classicism

Paleography: History
219A-219B. Paleography I, II

Romance Dialectology: Italian
222C. Italian Dialectology

Spanish
209. Dialectology

Romance Linguistics: Linguistics
225G. Linguistic Structures

Vulgar Latin: Latin
232. Vulgar Latin

Studies in the History of the Romance Languages
Gallo-Romance: French
214. Problematics of Medieval Language and Literature
Hispano-Romance: Spanish
M251A-M251B. Studies in Galician-Portuguese and Old Spanish

Italo-Romance: Italian
210. Studies in Early Italian Literature
222A-222B-222C. Studies in History of Italian Language

Synchronic Linguistics
Advanced Grammar: French
201. Literary Research and Composition

Literature Courses
History of Ideas: French
260A-260B. Studies in History of Ideas

Literary Criticism: French
202. Historical and Philosophical Background to French Literary Criticism
203. Contemporary Theories
258A-258B. Studies in Literary Criticism

Italian
205A-205B. Studies in Criticism

Spanish
M201A-M201B. Literary Theory and Criticism

Literary History: History
218. Medieval Latin Literary History

Philosophy and Literature: French
259A-259B. Studies in Philosophy and Literature

Early Romance Literature
Petrarca: Italian
214C. Studies in Medieval Literature: Petrarca’s Canoniere

251. Seminar: Petrarch

Studies in Early Romance Literature: French
215A-215D. Medieval Literature
250A. Major Medieval Texts
250B. Structures of Medieval Literature
250C. Problems in Medieval Literature

Italian
210. Studies in Early Italian Literature
214A-214F. Studies in Medieval Literature
215A-215B. Studies in 15th-Century Literature
250A-250D. Seminars: Dante
252. Seminar: Boccaccio

Portuguese
C224. Early Portuguese Literature

Spanish
222. Medieval Epic and Narrative Poetry
223. Medieval Prose
262A-262B. Studies in Medieval Spanish Literature
Modern Romance Literature

Genre Studies: Portuguese
252. Studies in Early Portuguese Literature
253. Studies in Modern Portuguese Literature
254. Studies in Early Brazilian Literature
255. Studies in Modern Brazilian Literature

Studies in the 19th Century: French
218A-218B-218C. 18th Century
254A-254B. Studies in the 18th Century

Italian
218A-218D. Studies in 18th-Century Literature
256A-256B. Seminars: 18th Century

Portuguese
C227. 19th-Century Portuguese Literature
C232. 19th-Century Brazilian Literature and Culture

Spanish
229. Romanticism
230. Realism and Naturalism
271A-271B. Studies in 19th-Century Spanish Literature
277A-277B. Studies in Colonial Spanish-American Literature

Studies in the 19th Century: French
219A-219D. 19th Century
255A-255B. Studies in the 19th Century

Italian
219A-219D. Studies in 19th-Century Literature
257A-257B. Seminars: Romanticism

Portuguese
C229. Post-Romanticism and Naturalism in Portuguese Literature

Spanish
232. Spanish Prose Literature from 1898 to the Civil War
233. Spanish Prose Literature after the Civil War
234. Spanish Drama and Poetry from 1898 to the Civil War
235. Spanish Drama and Poetry after the Civil War
240. Major Currents in Modern Spanish-American Literature
245A-245B. Contemporary Spanish-American Poetry
244A-244B. Contemporary Spanish-American Novel
245. Contemporary Spanish-American Essay

272A-272B. Studies in 20th-Century Spanish Literature

280A-280B. Studies in Contemporary Spanish-American Literature

Renaissance and Baroque Literature

Cervantes: Spanish
227. Cervantes

Studies in Renaissance and Baroque Literature:
216A-216B-216C. Renaissance
217A-217D. 17th Century
251A-251B. Studies in the Renaissance
252A-252B. Studies in the Baroque
253A-253B. Studies in the 17th Century

Italian
216A-216E. Studies in the Renaissance
217. Studies in 17th-Century Literature
253A-253B-253C. Seminars: Chivalry Poetry in Italy
255A-255B. Seminars: Baroque

Portuguese
C225. Camões and the Portuguese Renaissance
C226. Baroque and Neoclassical Portuguese Literature
C231. Colonial Brazilian Literature and Culture

Spanish
224. Poetry of the Golden Age
225. Drama of the Golden Age
226. Prose of the Golden Age
237. Literature of the Spanish Conquest
246A-246B. Studies in Golden Age Spanish Literature

ROTC PROGRAMS

College of Letters and Science

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officers’ Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows students to qualify for an officer’s commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of the major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which teach management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of $150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2885, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/ Marine) scholarship is desired. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

AEROSPACE STUDIES

UCLA
210 Men’s Gym
Box 951611
Los Angeles, CA 90095-1611
(310) 825-1742
http://www.sscnet.ucla.edu/afrotc/

David L. Terrell, M.S., Lieutenant Colonel, Chair
Professor
David L. Terrell, M.S., Lieutenant Colonel
Adjunct Assistant Professors
Kimel A. Kimble, M.A.S., Captain
Diana L. Wilcoxson, M.B.A., Captain

Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Undergraduate Study

Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC...
participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year. Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrcrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program
The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A-140B-140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the six-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid $150 per month during the academic year. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Aerospace Studies
Lower Division Courses

Freshman-Year Courses
Z. Leadership Laboratory (No credit). Laboratory, three hours. Mandatory for and restricted to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of an organized cadet corps. As integral part of aerospace studies curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. P/NP grading.

1A-1B-1C. The Air Force Today (2 units each). Lecture, one hour. Survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officers' Training Corps. Topics include mission and organization of the Air Force, officerhood and professionalism, military customs and courtesies, Air Force offices, opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

Sophomore-Year Courses
20A-20B-20C. The Air Force Way (2 units each). Lecture, one hour. Survey course designed to facilitate transition from Air Force GMC cadet to Air Force POC candidate. Topics include Air Force heritage, Air Force leaders, Quality Air Force, introduction to ethics, values, and leadership, group leadership problems, and continuing application of communication skills. P/NP or letter grading.

Upper Division Courses
130A-130B-130C. Air Force Leadership and Management. Lecture, three hours. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Use of case studies to examine Air Force leadership and management concepts as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

140A-140B-140C. Preparation for Active Duty. Lecture, three hours. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis on refining communication skills. P/NP or letter grading.

199. Special Studies in Aerospace Studies (2 or 4 units). Prerequisite: consent of instructor. Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading.

Rita J. Salley, M.S., Lieutenant Colonel, Chair Professor
Rita J. Salley, M.S., Lieutenant Colonel
Adjunct Assistant Professors
Jonathan Beard, B.S., Captain
Charles Kimball, B.A., Captain

Scope and Objectives
Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other basic skills required of motivated, effective leaders.

Undergraduate Study
The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 14 units of coursework and a six-week summer camp.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of $150 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army’s 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students’ preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC Scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

Four-Year Program
Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

Two-Year Program
The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Basic Camp, membership in the Army Reserve or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service.

Commissioning
Successful completion of the Advanced Course program and a bachelor’s degree may
lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

Military Science

Lower Division Courses

Z. Leadership Laboratory (No credit). Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers.

10. Introduction to Leadership (2 units). Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes.

11. U.S. Defense Establishment I (2 units). Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading.

14. Principles of Land Navigation Applicable in Maneuver (2 units). Lecture, one hour; discussion, one hour. Limited to undergraduates. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

18. Modern Guerrilla Warfare (2 units). Lecture, one hour; discussion, one hour. Limited to undergraduates. Study of individual differences, group dynamics, formal organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms.

24. Theory of Warfare (2 units). Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

Upper Division Courses

110. U.S. Military History (3 units). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society.

112. Psychology of Leadership II (3 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader.

113. Theory of Learning Applied to Teaching (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Study of instructional processes, lesson content planning procedures, techniques of applicatory education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading.

123. Military Legal Systems (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution.

125. Decision Making (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Designation of present students who become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes.

126. Military Professionalism and Ethics (2 units). Lecture, 30 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model.

199. Supervised Independent Studies (1 to 3 units). Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.

Scope and Objectives

The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers' Training Corps (NROTC), scholarship students receive full tuition, fees, books, and $150 per month subsistence pay. Non-scholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a reserve commission on completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy Scholarships are currently available to students pursuing any major offered by the University, as long as they complete basic technical requirements. In addition to University requirements, midshipmen must complete 28 units of naval science courses, a physical fitness test, and three summer cruises, each about four to eight weeks long. The department also conducts a sail training program for all midshipmen. All naval science courses, from ship systems and management to naval operations and amphibious warfare, are open to students who are not in the program but have an interest in the Navy and related fields, such as engineering, navigation and naval operations, history, and management.

Undergraduate Study

Scholarship Program

The majority of naval science students attend the University on Naval Scholarships which are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, books, and uniforms, students receive subsistence pay of $150 per month. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

College Program (Nonscholarship)

Three- and four-year College Program students are selected by the department chair at the beginning of each academic year from applicants of the freshman and sophomore classes. These students must compete for advanced standing prior to their junior year. A two-year program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, subsistence pay of $150 per month in their junior and senior years. Nonscholarship students serve on active duty for a minimum of three years following graduation and commissioning. College Program students may be recommended for
scholarship benefits based on superior academic performance and participation in NROTC.

**Marine Corps Option**

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

**Commissioning**

Students must meet UCLA degree requirements in their selected fields and complete the naval science courses below. In addition, scholarship students must include in their programs one year of approved calculus, one year of approved calculus-based physics, one year of approved freshman English, one term of American military history, and one term of computer science. Nonscholarship students must include in their programs one year of college algebra or higher mathematics, physical science, and English, and one term of computer science. Of these requirements, Marine Corps option students are only obligated to fulfill the American military history/national security policy requirement.

**Naval Science Minor**

The naval science minor is designed for students completing a major in a departmental program who wish to augment that major. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

**Required Lower Division Courses:** Naval Science 1B, 20A, 20B.

**Required Upper Division Courses:** Naval Science 101A, 101B, 102B, 103, 104.

All minor courses must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

**Naval Science**

**Freshman-Year Courses**

1A. Introduction to Naval Science (2 units). Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard damage control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

1B. Seapower and Maritime Affairs (2 units). Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

20A. Naval Science I. Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

**Sophomore-Year Courses**

1B. Naval Ship Systems I. Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

102B. Naval Leadership and Management I. Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer’s role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

**Junior-Year Courses**

Courses 103 and 104 are to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A and 101B.

101B. Navigation II. Prerequisite: course 101A. Study of rules of the road, ship handling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. naval craft.

103. Evolution of Warfare. Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

**Senior-Year Courses**

20A. Naval Ship Systems II. Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

102C. Leadership and Ethics (2 units). Prerequisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation.

104. Expeditionary Military Operations. Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

199. Supervised Independent Studies (1 to 4 units). Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

**Scope and Objectives**

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

**Undergraduate Study**

**Bachelor of Arts in Scandinavian Languages**

**Preparation for the Major**

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.
Scandinavian Section / 527

The Major
Required: Twelve upper division Scandinavian courses, including 105 or 110 or 115, 141, 142, 143. As an option, three upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Scandinavian Minor
To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

Required Courses: Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree
Admission
In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an undergraduate major in Scandinavian languages or equivalent. Applicants who have deficiencies in the undergraduate major must complete it by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division. The Scandinavian Section welcomes applications for all three quarters (Fall, Winter, Spring).

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the Ph.D. in Germanic Languages. For a brochure describing the program and requirements, write to the department.

Areas of Study
There are no specific major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Course Requirements
A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three courses on the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever the student has completed the course requirements and feels prepared to be examined on both the coursework and the reading list. The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

Thesis Plan
None.

Scandinavian
Lower Division Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, or Danish may not enroll in any language course (including courses 105, 110, 115) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student’s linguistic background and the reason for wanting to take the language course in question.

1. Elementary Swedish.
50. Introduction to Scandinavian Literature. Lecture, three hours; discussion, one hour; outside study, eight hours. Intended for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folklore through modern novel, poem, play, short story, and film, read in English and critically discussed. P/NP or letter grading.

Upper Division Courses
105. Advanced Swedish. Discussion, three hours. Prerequisite: course 5 or equivalent. Readings, composition, and conversation in Swedish. May be repeated once for credit. P/NP or letter grading.
110. Advanced Norwegian. Discussion, three hours. Prerequisite: course 15. Readings, composition, and conversation in Norwegian. May be repeated once for credit. P/NP or letter grading.
115. Advanced Danish. Discussion, three hours. Prerequisite: course 25. Readings, composition, and conversation in Danish. May be repeated once for credit. P/NP or letter grading.
141. Backgrounds of Scandinavian Literature. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods. P/NP or letter grading.
142. Scandinavian Literature of the 19th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works from Romantic, realist, and post-Romantic literature of Scandinavia in the 19th century. P/NP or letter grading.
143. Scandinavian Literature of the 20th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works of modern Scandinavian literature from beginning of the century to the present. P/NP or letter grading.
C144. Henrik Ibsen on the World Stage. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. P/NP or letter grading.
C145. Getting Married: Strindberg and Battle of the Sexes. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C252. P/NP or letter grading.
C146. Kierkegaard and Foundations of Existen-
tialism. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works by Soren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C253. P/NP or letter grading.

C147. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers of nature and modern idyll. May be concurrently scheduled with course C254. P/NP or letter grading.

C180. Literature and Scandinavian Society. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Discussion of selected aspects of Scandinavian society based on readings of contemporary liter- ature and social and/or sociological material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C262. P/NP or letter grading.

181. Contemporary Swedish Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish au-
thors.

C182. Theory of the Scandinavian Novel. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonma-
jors: knowledge of a Scandinavian language not required. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-cen-
tury evolution. Discussion in the application of contempo-
rary critical theories to the novels. May be concurrently scheduled with course C264. P/NP or letter grading.

184. Hans Christian Andersen. Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and illustrator, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

C185. Seminar: Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate ad-
viser. May be concurrently scheduled with course C265.

C186. Voices of Women in Scandinavian Litera-
ture. Discussion, three hours. Prerequisite for Scan-
dinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian lan-
guage not required. Readings and discussion of writ-
gings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and com-
parative contexts. May be concurrently scheduled with course C266. P/NP or letter grading.

187. Scandinavian Film: Bergman and Others. (Formerly numbered 60.) Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Intended for students in general and for those preparing for more advanced studies in Scandinavian literature and cul-
ture. Viewing and discussion of films by Ingmar Berg-
man and other Scandinavians. P/NP or letter grading.

190. Honors Course in Scandinavian. Prerequi-
sites: senior standing with a minimum 3.0 GPA in the major, consent of honors committee. Intensive study of a selected special topic in Scandinavian. Discus-
sions, oral and written reports.

199. Special Studies in Scandinavian (2 or 4 units). Prerequisites: senior or graduate standing, con-
sent of instructor. To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see section for I.D. number). Independent studies designed for graduates or senior undergraduate who desire greater depth of specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

C251. Henrik Ibsen on the World Stage. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Graduate students may meet as a group one addi-
tional hour each week and write research papers of greater length and depth. S/U or letter grading.

C252. Getting Married: Strindberg and Battle of the Sexes. Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. August Strindberg's portrayals of marital conflict reflected and shaped literary repre-
sentation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C145. Graduate students may meet as a group one addi-
tional hour each week and write research papers of greater length and depth. S/U or letter grading.

C254. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. Intensive study of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C146. S/U or letter grading.

C255. Kierkegaard and Foundations of Existen-
tialism. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language or consent of instructor. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-cen-
tury evolution. Discussion of the application of contempo-
rary critical theories to the novels. May be concurrently scheduled with course C146. S/U or letter grading.

C263. Literature and Scandinavian Society. Dis-
cussion, three hours. Prerequisite: graduate standing or consent of instructor. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be con-
currently scheduled with course C180. Graduate stu-
dents may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

C264. Theory of the Scandinavian Novel. Dis-
cussion, three hours. Prerequisites: advanced knowl-
edge of a Scandinavian language, consent of instructor. Analysis of predominant structures of the Scandinavian novel from its 18th-century begin-
nings through its rise in the 19th century and its 20th-
century evolution. Discussion of application of con-
temporary critical theories to the novels. May be con-
currently scheduled with course C182. Graduate stu-
dents may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C265. Seminar: Scandinavian Literature. Dis-
cussion, three hours. Prerequisites: advanced knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate ad-
viser. May be concurrently scheduled with course C266.

C266. Voices of Women in Scandinavian Litera-
ture. Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. Intensive study of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C275. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: graduate standing in Scandina-
vian. To be arranged with faculty member who directs the study or research. Twelve units may be applied to-
toward total course requirement, but only four units may be applied toward minimum graduate course require-
ment. May be repeated twice. S/U or letter grading.

C276. Preparation for Comprehensive Exam-
nation or Ph.D. Qualifying Examination (3 to 8 units). To be arranged with faculty member who di-
 rects the study or research. May be repeated once. May not be counted toward M.A. minimum course re-
quirements. S/U grading.

C599. Research for and Preparation of Ph.D. Dis-
sertation. To be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

Assistant Professors

Irina Gutkin, Ph.D. (Russian Literature)

Associate Professor

Peter Hodgson, Ph.D. (Russian Literature)

Assistant Professors

Irina Gutkin, Ph.D. (Russian Literature)

Roman Koropec, Ph.D. (Polish and Ukrainian Literature)
Scope and Objectives

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature and culture or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in the Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

Undergraduate Study

The department offers three majors: (1) Russian language and literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic languages and literatures, and (3) Russian studies. The equivalent of a major in Slavic or Russian language and literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Slavic or Russian language and literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Bachelor of Arts in Russian Language and Literature

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major

Required: Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A-101B-101C and 102A-102B-102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

Students also must concentrate in either literature or linguistics. For the literature concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year), and two courses from 124A through 12A, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150 are required. For the linguistics concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124A through 12A, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

Bachelor of Arts in Slavic Languages and Literatures

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), courses 118, 119, 120 (all three may be taken in the sophomore year); one-three-course sequence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbo-Croatian 103A-103B-103C, 103D-103E-103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbo-Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 134, 140A through 140D, M150; two courses from Czech 155A, 155B, Polish 152A, 152B, Serbo-Croatian 154A, 154B, Slavic M125, M126.

Bachelor of Arts in Russian Studies

Preparation for the Major

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major

Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian M170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

Russian Language and Literature Minor

To enter the Russian language and literature minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses: Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

Required Upper Division Courses: Five Russian language or literature courses, including at least two from Russian 118, 119, 120.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree

Admission

In addition to the University minimum requirements, the department requires the following from applicants to the Master of Arts program in Slavic Languages and Literatures: the equivalent of a UCLA B.A. in Russian Language and Literature, Slavic Languages and Literatures, or Russian Studies, or three years of Russian language and a variety of Russian history, literature, and linguistics courses.

All applicants must submit three letters of recommendation from persons capable of judging their academic potential and a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

A departmental brochure describing the curriculum in some detail (graduate and undergraduate) is available from the department.
Areas of Study
Candidates for the M.A. degree choose a specialization in either literature or linguistics, with Russian as the principal language and literature.

Course Requirements
A minimum of 36 units is required of students in literature and 40 units for students in linguistics.

Slavic 201, Russian 204, 212A, 220A are required of all M.A. students.

Literature students must also take Russian 211A, 211B, 212B, 213, 219.

Linguistics students must also take Slavic 202; Russian 220B; one course from Russian 211A, 211B, 212B, 213; three courses from Russian 241, 242, 265; Russian 243, 263, 264; and Russian 210, Slavic 241A, 241B.

Courses in the 500 series may not be applied toward the M.A. course requirements.

Comprehensive Examination Plan
Applications for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken and are accepted only if students have passed the Russian Language Proficiency Examination. M.A. examinations are offered at the end of each quarter. After students have declared their intention to take the examination in a given quarter, a committee consisting of three members is appointed by the chair. The examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The oral part may be conducted partly in Russian.

The student's combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on re-taking examinations graded pass and a one-year limit on examinations graded fail.

Thesis Plan
None.

Doctoral Degree
Admission
Applicants are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. examination with a grade of high pass; (2) passing the reading examination in both French and German; and (3) demonstrating proficiency in modern Slavic languages other than Russian as follows: applicants to the literature area must complete one year of the language of their second Slavic literature; applicants to the linguistics area must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group).

Equivalent language proficiency may be demonstrated through written and oral examinations rather than coursework.

Applicants who do not have an M.A. in Slavic Languages and Literatures from UCLA must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

Students with M.A. degrees from other institutions who are admitted to the program must take the UCLA M.A. comprehensive examination as a screening examination within three terms following matriculation. This determines whether they are allowed to continue for the Ph.D. Students may retake the examination once in order to attempt to achieve the high pass grade.

Major Fields or Subdisciplines
Candidates for the Ph.D. degree choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature. By special arrangement doctoral students may specialize in a language or literature other than Russian.

Course Requirements
Before the formation of a doctoral committee, students must be officially admitted to the doctoral program and have taken the following required courses.

Students whose specialization is linguistics must take Slavic 221, 222, 223, and three other advanced linguistics courses or seminars. Recommended preparation for linguists includes Linguistics 103, 110, 120A, 120B, M150.

Students whose specialization is literature must take two courses from Slavic 230A-230B-230C, and four advanced literature courses or seminars. Students are also advised to acquire a sound general knowledge of modern Western European literature.

Written and Oral Qualifying Examinations
Qualifying Paper. Students are required to submit to the faculty a qualifying paper that demonstrates their ability to conduct serious and original research. The paper must be received and approved by the faculty adviser (usually the prospective examination and dissertation committee chair) no later than one quarter preceding the quarter in which students expect to take the qualifying examinations.

Written Examinations. All students are expected to have a sound general knowledge of both Slavic philology and Russian literary history. Students in linguistics take two three-hour written examinations, usually one on the structure of modern Russian and the other on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language.

Students in literature must take a series of written examinations on Russian literature and one on a Slavic literature other than Russian. For the examination on Russian literature, students choose six fields and make up an appropriate reading list for each with members of their doctoral committee. A field may cover an author, genre, theme, literary movement, school of theory, etc. Each of four periods — early Russian literature, the 18th century, the 19th century, and the 20th century — must be represented by a field; the other two fields may cross period boundaries. The examination in a Slavic literature other than Russian tests students' knowledge of the history of the literature and familiarity with representative works. Each examination is one hour in length; the seven examinations are taken over the course of a single week.

Oral Examination. Students who receive a grade of pass on the written examinations are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background and which typically includes discussion of the dissertation topic.

After considering students’ overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles students to write a dissertation. At the committee's discretion, students may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two quarters (or one quarter and a summer) after passing the qualifying examinations, students must submit a prospectus and commence writing the dissertation.

Students are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

Slavic
Lower Division Courses
88. Seminar: Literature and Culture. Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Consult Schedule of Classes or department for topics to be offered in a specific term.

99. Introduction to Slavic Civilization. Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

Upper Division Courses
M125. Interwar Central European Prose. (Same as Comparative Literature M162 and German M119G.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.
M126. Postwar Central European Prose. (Same as Comparative Literature M166 and German M119H.) Lecture, three hours. Analysis of selected novels, stories, plays and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

177. Baltic Languages and Cultures (2 units). General survey of peoples speaking Old Prussian, Lithuanian, and Latvian; their linguistic, historical, and ethnic affiliations.

178. Baltic and Slavic Folklore and Mythology. (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. Proseminar. Presentation/discussion, three hours. Prerequisite: graduate standing. Introduction to research tools and techniques, as well as broad exposure to metalinguages of linguistics and literary criticism.

Linguistics

201. Introduction to Old Church Slavic. Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to grammar; readings.

211. Slavic Gender Linguistics. Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

223. Introduction to South Slavic Languages. Lecture, three hours. Prerequisite: course 202. Recommended: Serbo-Croatian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

224. Introduction to Ukrainian and Belorussian. Lecture, three hours. Prerequisite: course 202. Introduction to history and structure of Ukrainian and Belorussian.

M229. Introduction to Slavic Bibliography (2 units). (Same as Library and Information Science M229C.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and translation systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

241A-241B. Advanced Old Church Slavic. Lecture, three hours. Prerequisite: course 201. 241A. Advanced Readings in Canonical Texts; 241B. East, West, and South Slavic Recensions of Church Slavic.

261. Introduction to Baltic Linguistics. Lecture, three hours. Prerequisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

262A-262B. West Slavic Linguistics. Lecture, three hours. Prerequisite: course 222. 262A. Lekhiti; 262B. Czechoslovakian.

263A-263B. South Slavic Linguistics. Lecture, three hours. Prerequisite: course 223. 263A. Serbo-Croatian, Slovene; 263B. Bulgarian, Macedonian.

281. Seminar: Slavic Linguistics. Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar: Structural Analysis. Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

Literature

290. Seminar: Comparative Slavic Literature. Seminar, three hours. Prerequisites: courses 230A-230B-230C. Recommended: reading knowledge of one Slavic language in addition to Russian. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and graduate adviser.

295. Seminar: Literary Analysis. Seminar, three hours. Recommended (but not prerequisite): reading knowledge of one Slavic language in addition to Russian. Selected topics from various Slavic literatures or Slavic and Western literatures, with emphasis on analytic methods. May be repeated for credit with consent of instructor and graduate adviser.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Slavic Languages at College Level. Lecture, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

586. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor and graduate adviser.

599. Research for Ph.D. Dissertation (2 to 12 units).

Bulgarian

Lower Division Course

99. Introduction to Bulgarian Civilization. Lecture, three hours. Introductory survey of social and cultural institutions of the Bulgarian people and their historical background.

Upper Division Courses

103A-103B-103C. Elementary Bulgarian (5 units each). Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Bulgarian language. P/NP or letter grading.

154. Survey of Bulgarian Literature. Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

Czech

Upper Division Courses

102A-102B-102C. Elementary Czech (5 units each). Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Czech language. P/NP or letter grading.

102D-102E-102F. Advanced Czech. Recitation, three hours. Prerequisite: course 102C.

155A-155B. Czech Literature. Lecture, three hours. Lectures and readings in English. 155A. Survey of Czech literature from the Middle Ages to the Present; 155B. Selected Topics.

Polish

Upper Division Courses

102A-102B-102C. Elementary Polish (5 units each). Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Polish language. P/NP or letter grading.

102D-102E-102F. Advanced Polish. Recitation, three hours. Prerequisite: course 102C.

152A-152B-152C. Survey of Polish Literature. Lecture, three hours. Lectures and readings in English. 152A. From the Middle Ages to Neoclassicism; 152B. Romanticism; Mocking, and Writing “as if.” Readings in modern Polish literature and culture.

Graduate Course

280. Seminar: Polish Literature. Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Russian

Language

1. Elementary Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

2. Elementary Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

3. Elementary Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

4. Intermediate Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

5. Intermediate Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

6. Intermediate Russian (5 units). Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

10. Intensive Elementary Russian (12 units). Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.
11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian (2 units each). Basic courses in the Russian language. Three units per term recommended. Each two-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/N or letter grading.

15A-15B. Accelerated Russian (6 units, 7 units). Recitation, five hours; laboratory, two hours; outside study, 15 hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/N or letter grading.

20. Intensive Intermediate Russian (12 units). Prerequisite: course 10 or one year of elementary Russian. Intermediate instruction in reading, writing, and speaking Russian equivalent to courses 4, 5, and 6.

101A-101B-101C. Advanced Russian (5 units each). Recitation, five hours; outside study, 10 hours minimum. Prerequisite: course 6. Advanced grammar, reading, and conversation. P/N or letter grading.

102A-102B-102C. Advanced Composition and Conversation: Reading of Contemporary Texts. Lecture, three hours. Prerequisite: course 101C or consent of instructor. Advanced conversation and composition, using a multimedia approach (contemporary Russian prose, Soviet television and films).

103. Russian for Native Speakers. Discussion, three hours. Preparation: knowledge of Russian at advanced level. Improvement of oral and written language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. Russian conversation, readings from fictional and nonfictional texts; discussion of films. Final project required. P/N or letter grading.

106. Reading of Advanced Literary Texts. (Formerly numbered 106A-106B.) Lecture, three hours. Prerequisite: course 101C. Emphasis on integrating concepts about the structure of Russian into reading and analysis of difficult texts.

107. Russian for Social Scientists (2 units). Prerequisite: three years of Russian or consent of instructor. Reading of texts relevant to social scientists: viewing of films. Suggested for credit.

Linguistics

123. Historical Commentary on Modern Russian. Lecture, three hours. Prerequisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

Literature and Civilization

25. The Russian Novel in Translation. Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, focusing on problems of perception and misperception arising when literature is translated into cinema, and one national cultural view through the eyes of another. P/N or letter grading.

99A. Introduction to Russian Civilization. Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and their historical background.

119. Russian Literature of Middle Ages and Enlightenment. Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of Russian literature from its origins through the Enlightenment, with focus on influence of church, state, and society in evolution of a national literature.

119. Golden Age and the Great Realists. Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of 19th-century Russian literature (Pushkin, Gogol, Tolstoy). Dostoevsky, Chekhov in its cultural, political, and social contexts.

120. Literature and Revolution. Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present.

124A-124D. Studies in Russian Literature. (Formerly numbered 124A-124F.) Lecture, three hours. Lectures and readings in English. Following are writers alternately discussed: 124A, Gogol; 124B, Turgenev; 124D, Dostoevsky; 124E, Tolstoy; 124F, Chekhov; 124G, Nabokov. Nabokov as writer (the European stories and novel The Gift; originally written in Russian, and the American novels Lolita, Pnin, and Pale Fire, originally written in English) and as critic (with excerpts from his criticism and from works by Pushkin, Gogol, and Lermontov), translator (Eugene Onegin), and memoirist (Speak, Memory).

125. The Russian Novel in Its European Setting. Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Emphasis on 19th- and 20th-century novelists.

126. Survey of Russian Drama. Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Major Russian plays from the 18th to 20th century.

127. Women in Russian Literature. Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers.

130A-130B-130C. Russian Poetry. Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. 130A. Introduction to Analysis of Russian Poetry. Role of biography, cultural subtexts, rhetoric, and form in interpreting poetic texts. 130B. Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. 130C. Russian Poetry in the 20th Century. Major poetic schools from early Modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

M150. Russian Folk Literature. (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

M170. Russian Folklore. (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

193. Seminar: Russian Literature. Seminar, three hours. Prerequisite: course 6 or consent of instructor. Conducted in Russian. Reading, analysis of text structure and style, translation exercises, composition.

Linguistics

203. Practicum in Russian (2 units). Prerequisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

210. Readings in Old Russian Texts. Lecture, three hours. Prerequisites: Slavic 210 or consent of instructor. Readings in premodern Russian texts. May be repeated for credit.

241. Topics in Russian Phonology. Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

242. Topics in Russian Morphology. Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

243. Topics in Historical Russian Grammar. Lecture, three hours. Prerequisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

261. Discourse Grammar of Russian. Analysis of phenomena of Contemporary Standard Russian controlled by discourse/pragmatic factors at all levels of linguistic structure from phonology to intersentential syntax. S/U or letter grading.

262. Russian Dialectology. Lecture, three hours. Prerequisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

265. Topics in Russian Syntax. Lecture, three hours. Prerequisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

266. Russian Lexicology. Lecture, three hours. Examination of formal and semantic structure of Russian lexicon.
Literature and Civilization

211A. Literature of Medieval Rus'. Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to the end of the 17th century.

212A-212B. 19th-Century Russian Literature. Lecture, three hours:

212A. The Golden Age. Required for M.A. (literature). Survey of major literary movements and schools following demise of neoclassicism: sentimen-
tal, school, early and late Romanticism, and beginnings of natural school. Discussion of representa-
tive works of Karamzin, Zhukovsky, Batyushkov, Pushkin, Baratynsky, Lermontov, Gogol.

212B. Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psycho-
logical realism, beginning with early works of Turge-
nev, Goncharov, and Dostoevsky, moving to major novelists of Tolstoy, Dostoevsky, and Saltykov-
Shchedrin, and concluding with works of the presym-
bolist period, especially the short stories of Chekhov.

215. Contemporary Russian Literature. Lecture, three hours. Prerequisite: course 213. Close readings in selected texts of poetry and prose, metropoli-
itan and emigre, of recent vintage. May be re-
peated for credit. S/U or letter grading.

219. Movements and Genres in Russian Literature. Lecture, three hours. Required for M.A. (litera-
ture). Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective.

227. Linguistic Approaches to Russian Poetry. Lecture, three hours. Prerequisite: graduate stand-
ning. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit.

251. Topics in Literature of Medieval Rus'. Lecture, three hours. Prerequisite: course 211A. Detailed dis-
cussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

270. Russian Poetics. Lecture, three hours. Introduc-
tion to technical study of Russian poetics and verifi-
cation, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

290. Seminar: Russian Poetry. Seminar, three hours. Recommended (but not prerequisite): course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of in-
structor and graduate adviser.

291A. Seminar: Literature of Medieval Rus'. Semi-
inar, three hours. Prerequisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar: 18th-Century Russian Literature. Seminar, three hours. Prerequisite course 211B. Se-
lected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292. Seminar: 19th-Century Russian Literature. Seminar, three hours. Prerequisites: courses 212A-
212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar: 20th-Century Russian Literature. Seminar, three hours. Prerequisite: course 213. Se-
lected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

294. Seminar: Russian Literary Criticism. Seminar, three hours. Prerequisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criti-
cism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

296. Seminar: History of Russian Culture. Discus-
sion, three hours. Reading and discussion on se-
lected topics in history of Russian culture.

Serbo-Croatian

Upper Division Courses

103A-103B-103C. Elementary Serbo-Croatian (5 units each). Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Serbo-Croatian language. P/NP or letter grading.

103D-103E-103F. Advanced Serbo-Croatian. Recita-
tion, three hours. Prerequisite: course 103C.

113A-113B-113C. Advanced Reading and Compo-
sition. Recitation, three hours. Prerequisite: course 103F or consent of instructor. Reading and translation of difficult texts; advanced composition.

154A-154B. Yugoslav Literature. Lecture, three hours. Lectures and readings in English. 154A. Sur-
vey of Yugoslav literature from the Middle Ages to the Present. 154B. Selected Topics.

Slovak

Graduate Course

222. Structure of Slovak. Lecture, three hours. Pre-
requisite: Slavic 202. Recommended: Slavic 222. In-
troduction to phonological and morphological structure of the Slovak language, especially as con-
trasted with Czech.

Ukrainian

Upper Division Courses

101A-101B-101C. Elementary Ukrainian (5 units each). Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Ukrainian language. P/NP or letter grading.

152. Ukrainian Literature. Lecture, three hours. Le-
tures and readings in English. Survey of writers, liter-
ary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tytchyna.

Non-Slavic Languages of Eastern Europe

Lithuanian

Upper Division Courses

101A-101B-101C. Elementary Lithuanian. Recita-
tion, five hours. Basic courses in the Lithuanian lan-
guage.

Romanian

Lower Division Course

99. Introduction to Romanian Civilization. Lecture, three hours. Introductory survey of social and cultural institutions of the Romanian people and their histori-
cal background.

Upper Division Courses

101A-101B-101C. Elementary Romanian (5 units each). Recitation, five hours; outside study, 10 hours. Basic courses in the Romanian language. P/NP or letter grading.

101D-101E-101F. Advanced Romanian (5 units each). Recitation, five hours; outside study, 10 hours. Prerequisite: course 101C. Course 101D is requisite to 101E, which is requisite to 101F. Differences between oral and written discourse, expansion of students' general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings.

152. Survey of Romanian Literature. Lecture, three hours. Lectures and readings in English. Survey of Ro-
manian literature from the Middle Ages to the present.

Graduate Course

201. Romanian as a Romance Language. Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

Scope and Objectives

There is no major in social sciences; however, several undergraduate courses are offered for interested students.

Social Sciences

Lower Division Courses

20. Racial Minorities in the U.S. Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicanos, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psychosocial dimensions of racism, social movements, and minorities in California.

30. Law and Society (3 units). Lecture, three hours; discussion, one hour. Multidisciplinary examination of legal institutions, processes, and norms.

40. Introductory Statistics. In a series of case studies from science and decision making, use of probability and statistics to quantify uncertainty and figure out how to make sensible choices in the face of it. Topics include how to design experiments and conduct surveys to reduce uncertainty, how to analyze data, and how to validly assess causality. Discussion-style learning blended with interactive sessions on personal computers, making numerical and graphical summaries that both measure uncertainty and help figure out what to do about it. P/NP or letter grading.

88. Introduction to Social Sciences. Seminar, three hours. Introduction to methods, concepts, and practices of social scientific scholarship. Organized around broad, interdisciplinary themes in anthropological, economic, geographical, historical, political, scientific, psychological, and sociological fields. Emphasis on social science disciplines as a whole. P/NP or letter grading.

Upper Division Course

100. History and Politics of Affirmative Action. Lecture, three hours; discussion, one hour. Selected themes in sociology, political, and education to explore questions surrounding diversity, affirmative action, and discrimination. P/NP or letter grading.

Mary Brent Wehrli, M.S.W.

Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student’s interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Policy and Social Research, the program affords students instructional opportunities in the other affiliated departments — Policy Studies and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degree
Admission

In addition to University graduate admission requirements, the Master of Social Welfare (M.S.W.) program requires a minimum of seven courses in the liberal arts, including three in the sociobehavioral sciences, or a combination of liberal arts and social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. An elementary statistics course with a grade of B or better and one course with human biology content are also required.

The program is highly competitive and a minimum grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, exceptional applicants who have a grade-point average below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the department applies the following criteria in the selection of candidates: personal suitability for professional education and a potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.
The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. In addition, international students whose native language is not English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). The department may request that specified examinations are taken to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Although a personal interview is not normally required as part of the application procedure, whenever possible a meeting with a member of the faculty is arranged for the applicant. Admission to the department requires simultaneous application to (1) the Department of Social Welfare and (2) the Graduate Division. Both applications and the program brochure can be obtained on written request to the Department of Social Welfare Admissions.

Areas of Study
Social work practice in organizations, communities, and policy settings (SWCOPS), and social work practice with individuals, families, and groups (SWIFG) are offered as social work methods concentrations. Specializations (subdisciplines) are available in gerontology, child welfare, school and youth services, health services, and mental health services.

Course Requirements
A total of 76 units in courses in the department is required, including three courses in the sequence of social welfare policy and services, three courses in the human behavior and social environment sequence, six courses in methods of social work practice, four courses in social welfare research, plus six quarters of field practicum. Appropriate substitutions or waivers may be requested. With the consent of the chair, students may take courses in other graduate schools or programs of the University in fulfillment of the degree requirements.

With the consent of the instructor and chair, tutorial studies of comparable material in the 500 series may be substituted for either required or elective courses. A maximum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

While no University-approved specific thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. An option to the second-year required substantive social welfare research course is the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem. This research option requires approval of the departmental chair and faculty research adviser.

Comprehensive Examination Plan
All M.S.W. candidates must pass an oral comprehensive examination in the Spring Quarter of the second year of study. The examination covers the entire range of the student's program of study.

Thesis Plan
None.

Doctoral Degree
Admission
Admission requirements include meeting the general admission requirements of the Graduate Division and an Master of Social Work (M.S.W.) degree from an accredited school of social work with a superior academic record. Students who possess a master's degree in social science and professional experience in a related field may also be admitted under one of the following plans:

1. Applicants who wish to obtain an M.S.W. are required to complete the first-year M.S.W. program. Students can be exempted from some second-year M.S.W. requirements via examinations on the basis of preparation received in doctoral courses. This plan is also available to applicants with a B.A. degree who possess an outstanding academic record.

2. Applicants who do not wish to obtain an M.S.W. may be required to take certain M.S.W. courses as prerequisites to doctoral courses.

The Graduate Record Examination (GRE) General Test is required. International applicants are required to take the Test of English as a Foreign Language (TOEFL). The program may request that additional examinations be taken to assist in the assessment of candidacy for admission.

Official transcripts from every school attended since high school are required. Three letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify communication skills, applicants may submit any of the following: published articles, master's thesis, unpublished papers, or term papers written in graduate courses.

Admission criteria include quality of performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express oneself clearly in writing, success in professional employment and other pertinent experiences, results of the GRE, and other qualifications indicating eligibility for advanced study and research. Enrollment in the doctoral program is limited, and it may not be possible to accept all applicants who meet the formal qualifications for admission.

Prospective students must apply separately to the Department of Social Welfare and to the Graduate Division. Both applications and the school brochure are available on written request to the Department of Social Welfare doctoral program.

Major Fields or Subdisciplines
The program trains research-oriented scholars to advance the field of social welfare through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas: (1) specialization in a substantive area of social welfare, (2) integration of social and behavioral science knowledge into social welfare, and (3) research methods. Programs of study are planned in relation to the special and individual needs and interests of students.

Course Requirements
There is a minimum core of required courses which includes two seminars on practice theory and research; two seminars on social welfare policy; and two graduate-level courses in statistics. In addition, students are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the department related to their specialization in social welfare; (2) three courses in advanced research methods; and (3) three quarters of research internship.

Every effort is made to individualize the curriculum around students' area of interest and plans for the dissertation. In order to achieve this goal, a variety of patterns is utilized, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University.

Written and Oral Qualifying Examinations
The qualifying examinations consist of two parts:

1. An examination in social welfare policy and practice, reviewing current theory and research. The examination is given at the end of the third quarter of the first year.

2. A series of two major papers demonstrating students' knowledge and analytical skills in (a) application of social and behavioral science knowledge of social work and (b) utilization of research methods to a problem area. Each paper must be evaluated by a two-member committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is prerequisite for pursuing the dissertation. If students fail one or more components, they may be permitted to retake the examination only on recommendation by the department's doctoral program committee.

Advancement to doctoral candidacy follows successful completion of both the qualifying examination and subsequently the University Oral Qualifying Examination, which covers the
dissertation proposal and related areas. It is administered by a doctoral committee which consists of three members from the Department of Social Welfare and at least one faculty member from another department of the University.

Social Welfare

Upper Division Courses

100A. Introduction to Social Welfare: Policies and Programs. Prerequisite: consent of instructor. Origin and development of major U.S. welfare programs and policies guiding them, with emphasis on analysis of policy development/issues related to provision of social welfare services. Study of historical and current responses of the profession to major social problems.

100B. Social Welfare Policy: Overview. Prerequisite: course 100A. Review of existing policy regarding major social welfare issues (Formerly numbered 104C) Examinations of the field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of different impact of major policies.

101. Social Welfare in a Multicultural Society. (Formerly numbered 105.) Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups.

102. Social Welfare Organizations and Community Systems. Recommended prerequisites: courses 100A, 100B. Detailed demonstration of implementation of policy via the functioning of human service organizations. Examination of organizational structures/functions. Exploration of characteristics and organization of the community and forces that influence its development and change.

103. Introduction to Direct Practice with Individuals, Families, and Groups. Prerequisites: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via the casework process. Students practice these skills in written, role-play, small group, and video or audio exercises. P/NP or letter grading.

104A. Filipino American Community and Family. Prerequisites: consent of instructor. Exploration of interaction of Filipino American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Filipino American families and communities. P/NP or letter grading.

104B. Japanese American Redress. Prerequisite: consent of instructor. Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology. Consult the department for curriculum updates.

104C. Diversity in Aging: Roles of Gender and Ethnicity. (Formerly numbered 104C.) (Same as Gerontology M104C.) Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity.

104D. Public Policy and Aging. (Formerly numbered 104D.) (Same as Gerontology M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of development and implementation of current aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

104E. Social Aspects of Aging. (Formerly numbered 104E.) (Same as Gerontology M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

104F. Japanese American Community and Family. Exploration of interaction of Japanese American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

105. Social Welfare Policy in Modern America: Historical Perspectives. Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as "the welfare state"; examination of origins of the U.S. welfare state, its development, and its role in society helps make it distinctive as compared to welfare states in other nations.

106. Research Seminar and Field Observation: Social Welfare. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: consent of instructor. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation experience (module) from a number of field settings, P/NP or letter grading.

107. Field Practicum: Social Welfare. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: course 106, consent of instructor. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under the supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

140. Introduction to Study of Aging. (Formerly numbered 140.) (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

Graduate Courses

Consult the department for curriculum updates.

201A-201B. Dynamics of Human Behavior (3 units each). Biopsychosocial factors associated with individual and group behavior and development as applicable in social welfare agencies. Examination of development and change of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development.

202A-202B. Dynamics of Human Behavior (2 units each). Prerequisites: courses 201A-201B. Deviations and pathologies affecting physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

203A-203B-203C. Integrative Seminars (2 units each). Prerequisite: consent of instructor. Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

205A. Cross-Cultural Awareness (2 units). Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U grading.

205B. Group Conflict and Change (2 units). Study of phenomena of group conflict and change as they apply to the social welfare field. Examination of groups, communities, and social institutions; relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena.

206. Research Seminar and Field Observation: Social Welfare. Discussion, three hours; research contributions in understanding of these phenomena.

221A. Foundations of Social Welfare Policy. (Formerly numbered 221A.) (Same as Policy Studies M221A.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

221B. Social Welfare Policy and Services II (2 units). Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of the welfare system and its organizational analysis. Special attention to organizational analysis of social welfare services.

222. Seminar: Social Work Profession (2 units). Examination of role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

225A-225B. Social Welfare Policy. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor.

225A. Formulation and Analysis. Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for evaluating social policies, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

225B. Implementation and Evaluation. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision of services. Roles of social services in the economic, political, and social environment. S/U grading.

230A-230B-230C. Theory of Direct Social Work Practice I, II, III (2 units each). Concepts required for understanding social work practice. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.
231A-231B-231C. Advanced Theory of Direct Social Work Practice IV, V, VI. Lecture, three hours; outside study, nine hours. Corequisite: required social work practice. Advanced level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

240A-240B-240C. Community Administration, Policy, and Practice (4 units). Corequisite: required social work practice. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. S/U or letter grading.

M241D. Social Advocacy and Domestic Violence. (Same as Law M359.) Lecture, three hours; fieldwork, six hours. Use of domestic violence as a case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change the systems.

245A-245B. Development of Social Work Practice Theory. Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor.

245A. Epistemology of Practice. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interaction.

245B. Models of Social Work Practice Research. Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

258. Critical Problems in Social Welfare (2 units). Prerequisites: doctoral standing and/or consent of instructor. Current problems in the field of social welfare. Specific attention in developing on research and educational interests and needs of class. May be repeated for credit. S/U grading.

280. Social Welfare Research (3 units). Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

281A-281B-281C. Advanced Social Welfare Research (2 units each). Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress grading.

286A-286B-286C. Survey of Research Methods. Prerequisites: doctoral standing and/or consent of instructor. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observational and experimental data analysis.

290A-290B-290C. Seminars: Social Work. Lecture, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

M290D. Women, Health, and Aging: Policy Issues (2 or 4 units). (Same as Health Services M241.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

M290E-M290F-M290G. Child Abuse and Neglect (2 units, 2 units, 1 unit). (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Medicine M217H-M217I-M217J, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Course M290E is prerequisite to M290F, which is prerequisite to M290G. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M290I. Children with Special Health Care Needs: Systems Perspective. (Same as Community Health Sciences M420.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families.

M290J. Child Welfare Policy. (Same as Policy Studies M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

M290K. Mental Health Policy. (Same as Policy Studies M212.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they provide. S/U or letter grading.

M290L. Poverty, the Poor, and Welfare Reform. (Same as Policy Studies M212.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M290N. Public Policy for Children and Youth. (Same as Policy Studies M216.) Lecture, three hours. Public policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M290P. Public Policy for the Elderly and Their Families. (Same as Policy Studies M211.) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

401A-401B-401C. Practicum: Social Work (3 units each). Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

402A-402B-402C. Advanced Practicum: Social Work (2 units). Laboratory, 24 hours. Prerequisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

566A. Special Study and Research in Social Welfare (2 to 8 units). Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

596B. Special Study and Research for Ph.D. Candidates (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

597A. Preparation for M.S.W. Comprehensive Examination (2 to 8 units). Prerequisite: consent of instructor.

597B. Preparation for Ph.D. Qualifying Examinations (2 to 8 units). Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

David Halle, Ph.D.
John C. Heritage, Ph.D.
Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a survey conducted by the Conference Board of the Associated Research Councils.

Sociology has a particular appeal to those students whose interests are broad and un-specialized. At both the undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in sociology is to enhance students' capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Undergraduate Study

Bachelor of Arts Degree

Preparation for the Major

Required: One course from Sociology 1, 2, 3, 4, 5, 31; one course from Mathematics 2, 3A, 31A; Sociology 18 (or Statistics 50, Psychology 41, or Economics 40).

All courses required for the major in sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

The Major

Required: Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 104H, 105, 106, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. Students must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, students must complete Mathematics 2, 3A, or 31A, and an honors section of Sociology 1 and 18.

Prior to taking other upper division sociology courses, students must complete an honors section of Sociology 101 and 102 (Honors College 61 may be substituted for course 102).

Also required are three undergraduate seminars from the Sociology 197 series; any two additional upper division sociology courses; courses 104H and 199HA-199HB-199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 254A Haines Hall. Students should apply in the last term of their junior year.

Computing Specialization

Majors in sociology may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 112, 113. Students graduate with a bachelor's degree in sociology and a specialization in computing.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degree

Admission

The graduate program of the Department of Sociology takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily only accepts students who are seeking the Ph.D. degree (a master's degree is earned as part of the process of completing the requirements for the Ph.D.).

In addition to the minimum University requirements (an acceptable bachelor's degree and a B average in all upper division and graduate work), the Sociology Department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences; (2) transcripts from all colleges where applicants have studied (the department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics); (3) a statement of purpose, not to exceed three typewritten double-spaced pages, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these; (4) copies of one or two term papers or research reports written by the applicant; (5) an official statement of
scores on the Graduate Record Examination (GRE); and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department. Applicants need not be uniformly high on all indicators of potential. The admissions committee, which generally consists of at least five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the committee considers several items, including samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal GRE scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply.

The deadline for receipt of applications is December 1. Application forms and more detailed information are available on request from the graduate affairs assistant in the department.

Areas of Study
See Major Fields or Subdisciplines in the Doctoral Degree section.

Course Requirements
In addition to the departmental requirements, area programs and some subareas within area programs have their own course requirements for affiliated students. Students who intend to affiliate with an area would do well to satisfy some of its requirements in the first two years.

Before the Master's Paper Review
Departmental Requirements. For departmental requirements, all students are required to take nine courses (36 units).

(1) Sociology 202A-202B. These courses, an examination of the interrelations of theory, method, and substance in exemplary sociological works, must be taken in the first year.

(2) A two-semester graduate-level methodology sequence of which there are several alternatives such as the survey methods course or the demographic methods course. The methodology series is presently numbered from 211A-C, 216B, 217C, 218A-218B, C244A-C244B. Students are required to take one methods sequence before the master's paper review and one methods sequence after the review. In choosing a methodology sequence, students should note some of the Ph.D. area programs and subprograms require particular methodology sequences. If students have equivalent methodological training elsewhere, they should file a petition (along with pertinent evidence and an advisor's recommendation) with the executive committee for exemption from the methodology requirement.

Students who want to take a course outside the department because they feel it would be beneficial to their master's paper or area of interest may petition to take one course outside of sociology. The petition must be approved by the chair or graduate director.

Area Program Prerequisites. In addition to departmental requirements, students must take the following prerequisites to area program coursework:

Communities and Institutions. Sociology 209A-209B or 210A-210B.

Ethnomethodological, Phenomenological, and Observational Sociologies. No courses required.

Macrosociology. Sociology 209A-209B or 210A-210B.

Quantitative Sociology. Sociology 209A-209B or 210A-210B.

Social Psychology. Sociology 209A-209B or 210A-210B. Admission may be granted without these courses if students are changing their area of interest. In this case, 209A-209B or 210A-210B must be completed in the first year after entry to the area program.

Because four of the five area programs require satisfactory completion of Sociology 209A-209B or 210A-210B, students ordinarily take these courses in the first two years, and are strongly urged to do so in the first year. Furthermore, a background in statistics is often necessary to do the master's paper.

Comprehensive Examination Plan
No later than in the sixth quarter of residence students must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate general competence in sociological theory, methodology, and selected substantive areas.

As early in the graduate career as possible, students select two faculty members who consent to serve as their master's committee. Faculty serving should represent a broad range of professional interests. Formation of the master's committee may be postponed beyond the beginning of the fourth quarter of residence in graduate work. For more specific guidelines, deadlines, and procedures regarding the master's review, contact the graduate affairs assistant.

In consultation with and on the advice of this committee, students develop a paper, probably initially written for a course, demonstrating intellectual attainment. For example, the paper may show that the student (1) has an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with the student's capacity to do Ph.D.-level work.

When the master's committee feels these requirements have been met, they nominate the student for faculty review by submitting the paper to the graduate curriculum and advisement committee. That committee appoints a two-person evaluation panel which reports its assessment to the graduate curriculum and advisement committee as a whole. They consider the panel's reports as well as those of the master's committee and present an evaluation and recommendation to the full faculty. The graduate curriculum and advisement committee may recommend any of the following options:

(1) The paper is passed. The M.A. is granted and the student is permitted to proceed to the Ph.D.

(2) The paper is passed conditionally. The M.A. is granted and the student is permitted to proceed to the Ph.D. on completion of specified revisions of the paper.

(3) A terminal M.A. degree is granted.

(4) The paper is not acceptable. The student may resubmit at a later time or be asked to withdraw.

The graduate curriculum and advisement committee's recommendation and the analysis on which it is based is made available to the student, the master's committee, and the faculty no later than one week prior to the faculty review. The faculty at its review may ratify the recommendation of the graduate curriculum and advisement committee or alter it, including the option of making recommendation to the dean of the Graduate Division to terminate graduate status.

Thesis Plan
None.

Doctoral Degree Admission
In the quarter following acceptance of the master's paper, usually at the beginning of the third year, students must affiliate with one of the department's five area programs in order to pursue more specialized, advanced study and research toward the Ph.D.

Students who enter graduate studies at UCLA with a Master of Arts degree in Sociology from another institution normally come up for a master's paper review in the first quarter of residence at UCLA, and under no circumstances later than the third quarter of residence. In this review, the department determines whether or not the student may proceed directly to preparation for the field examinations, if additional courses need to be taken for breadth purposes, if the submitted paper needs additional work or if an additional paper needs to be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. the-
sis written at another university, students should submit for the master's paper review a transcript from the university at which the M.A. degree was earned so that this department can determine whether the requirements ordinarily constraining students in the first years of this program have been met.

Major Fields or Subdisciplines
The five area programs represent the special strengths of the department in research and graduate instruction.

Communities and Institutions. Includes social demography, work and occupations, deviance and social control, criminal justice, methods of historical and ethnographic research, community organization, immigrant and minority communities, medical sociology, gender relations.

Ethnomethodological, Phenomenological, and Observational Sociologies. Includes ethnomethodological/methodological, ethnographic, phenomenological, or observational stances toward a range of subject matters, including studies of work especially in the sciences and professions, sociology of knowledge, sociology of law, deviance, social control, conversational and other forms of ordinary interaction, and historical studies of everyday interaction and consciousness.

Macrosociology. Includes political sociology, economy and society, historical and comparative sociology, macrosociological theory, and comparative stratification.

Quantitative Sociology. Includes methods of applied and evaluation research, survey research methods, formal and social demography, social stratification, advanced social statistics, and mathematical sociology.

Social Psychology. Includes attitudes and social structure, collective behavior, socialization, social interaction and small group behavior, and organizational social psychology.

The area programs have both a formal and informal aspect. Each area program has course requirements, including an area seminar or colloquium specifically for affiliated students, and areas also oversee field examinations for affiliated students. On the other hand, the area programs are intellectual and social communities of faculty and students sharing a commitment to certain topics and methods of research. While the area program system seeks to provide students with special training in theory and research, it is not intended to prevent or discourage students from pursuing topics that cut across established area programs or from working closely with faculty members whose primary affiliations lie in different area programs.

Course Requirements

After the Master's Paper Review

Departmental Requirements. For departmental requirements, all students are required to take two courses (eight units) of an additional methodology sequence (from Sociology 211A through 216B, 217B-217C, 218A-218B, C244A-C244B), which must be completed before the awarding of the Ph.D. degree. Some areas specify allowable methodology sequences.

Area Course Requirements. Students should contact the graduate affairs assistant or area directors for more specific details of the programs.

Communities and Institutions. (1) Two of the following: Sociology 229A, 229B, 234, 235, 241, 261; (2) two methods — one from Sociology 211A-211B, 212A-212B, 213A-213B, 215A-215B, 216A-216B, or 217B-217C; (3) at least two of the following courses devoted to substantive area: Sociology 230, 234, 236, M249A, M249B, 259, M262, 263, 265, M275, 276, 282, 291; (4) Sociology 290A-290B-290C.

Ethnomethodological, Phenomenological, and Observational Sociologies. (1) Sociology 222; (2) two quarters of one of the following method sequences and at least one quarter of a second: 214A-214B, 217B-217C, 218A-218B, or C244A-C244B; (3) at least two of the following: Sociology 217A, 223, 229A, 229B, 243, 251, 258, 264, 266, 267, 281, 284 (a third methods sequence may also be taken to satisfy this requirement); (4) Sociology 293A-293B-293C.

Macrosociology. (1) Sociology 211A-211B; (2) Sociology 228A-228B; (3) Sociology 294A-294B-294C; (4) three additional graduate courses covering theoretical, substantive, or methodological topics.

Quantitative Sociology. The quantitative sociology area requires Sociology 295A-295B-295C and requirements from the specialty chosen. Quantitative sociology specialties are advanced social statistics, applied sociology and evaluation research, demography, mathematical sociology, and quantitative social stratification. Each specialty requires up to six courses, several of which are two-quarter courses. Other courses are recommended; consult a departmental adviser.

Advanced Social Statistics: (1) Sociology 216A-216B; (2) Sociology 219A-219B.

Demography: (1) Sociology 213A-213B; (2) Sociology 226A-226B; (3) two electives in calculus and matrices.

Mathematical Sociology: (1) Preparation in calculus, matrices, and differential equations; (2) Sociology 281; (3) Sociology 596 — two or more specialized courses to be arranged with advisers; (4) two or more substantive sociology courses relevant to the areas in which mathematical modeling is carried out.

Quantitative Social Stratification: (1) Sociology 216A-216B; (2) Sociology 239A-239B; (3) Sociology 263; (4) two electives.

Social Psychology. (1) Completion of an undergraduate program equivalent to two UCLA basic undergraduate social psychology courses and at least two courses in psychology, chosen from the fields of learning, language and communication, personality, social psychology, and abnormal psychology; (2) Sociology 224A-224B; (3) a second methods sequence in addition to the one required for the M.A., at least one of which must be from the following: Sociology 215A-215B, 216A-216B, or 217B-217C; (4) Sociology 289A-289B-289C.

Courses in the 500 series (Sociology 595, 596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and dissertation research. While these courses may be taken to maintain enrollment, they do not count toward the course requirements.

Written and Oral Qualifying Examinations

Two specialized field examinations are administered and evaluated according to guidelines specified by the area programs. Consult the department for details regarding field examinations.

If the performance on the field examinations is satisfactory and the foreign language requirement has been fulfilled, students may nominate a doctoral committee and proceed to take the University Oral Qualifying Examination. This examination may range over general sociology, students' specific fields, and students' dissertation plans. It is given by the doctoral committee no later than six months after the completion of the written examination. A two-page abstract of the dissertation proposal must be submitted to the graduate affairs assistant for distribution to the entire faculty of the Sociology Department within two weeks of the oral examination.

In addition to the two-page abstract, a full-length dissertation proposal is required at the time of the preliminary oral examination. A dissertation proposal approved by the committee must be filed with the department reasonably soon after the preliminary oral. In the event of a major revision in the topic or methodology of the dissertation, a revised prospectus approved by the committee is required and is filed in the same manner as the original prospectus. Minor changes in the methodology and hypotheses which normally takes place as students carry out the dissertation research do not call for a revised prospectus.

When both the written and oral qualifying examinations have been successfully completed, students are advanced to candidacy by the Graduate Division. A candidacy fee appears on students' billing statements four to eight weeks after they have been advanced to candidacy.

Sociology

Lower Division Courses

1. Introductory Sociology. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation.
2. Changing Society and Making History. Lecture, three hours; discussion, one hour. Leading question is how do we make sense of, and participate in, social change and history? Students will be introduced to basic economic, political, and sociological concepts and theories relevant to understanding social change. Three hours of lecture and discussion. Prerequisite: experience in reading and writing required. Credit cannot be applied toward the major.

3. Sociology of Everyday Life. Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Experiences and participants will be engaged in critical reflection on the nature of their everyday lives.

4. Jobs and Careers: Sociological Approach. Lecture, three hours; discussion, one hour. Application of sociological theory to understanding the labor market and career opportunities. Emphasis on understanding the relationship between career decisions and personal development and opportunities. Three hours of lecture and discussion. Prerequisite: experience in reading and writing required. Credit cannot be applied toward the major.

5. Social Organization of Black Communities. (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, and implications for policy and social action. Prerequisite: experience in reading and writing required. Credit cannot be applied toward the major.

6. Field Research Methods. Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on relationship between fieldwork role and substantive findings. Three hours of lecture and discussion. Prerequisite: experience in reading and writing required. Credit cannot be applied toward the major.

7. Urban Poverty and Public Policy in the U.S. (Field Component). (Formerly numbered M107.) Prerequisite: course 144. Corequisite: one course from Geography 150 or 150A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

8. Introduction to Mathematical Sociology. Prerequisite: Upper Division students only. Prerequisites: course 2 (may be taken concurrently) and (Mathematics 2 or 3A). Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals.

9. Demographic Seminar Seminar, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult Schedule of Classes or "Department Announcements" for topics and instructors.

11. Contemporary Sociological Theory. Prerequisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

12. Marxist Sociology. Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward the major.

13. Introduction to Sociological Research Methods. Note: Not for credit with credit for course 104H. Systematic treatment and semigrammatical skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

14. Sociology of Social Problems. (Honors) Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly research for students who intend to write an undergraduate thesis.

15. Research Methods in Policy Analysis and Evaluation. Prerequisite: course 144 or consent of instructor. Recommended: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management.

16. Field Research Methods (6 units). Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on relationship between fieldwork role and substantive findings.

17. Urban Poverty and Public Policy in the U.S. (Field Component). (Formerly numbered M107.) Prerequisite: course 144. Corequisite: one course from Geography 150 or 150A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

18. Introduction to Sociological Thought and Methods (Honors). Prerequisites: course 15 and (Mathematics 2 or 3A). Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals.

19. Data Analysis for Social Scientists. Lecture, three hours; laboratory, one hour. Introduction to statistical analysis of datasets. Emphasis on computer-constructed data analysis. Three hours of lecture and discussion. Prerequisites: course 1 (may be taken concurrently) and Mathematics 2 or 3A. Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals.

20. Family and Social Institutions. Lecture, three hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on relationship between fieldwork role and substantive findings.

21. Sociology of Social Problems. (Honors) Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly research for students who intend to write an undergraduate thesis.

22. Study of Norms. Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required.

23. Mind and Society. Lecture, two and one-half hours; discussion, one hour. Prerequisite: course 1 or equivalent. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.

24. Sociology of Emotions. Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions.

25. Sociology of Time. Lecture, three hours; discussion, one hour. Prerequisites: one course in theory or understanding of social change. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; "cyclical" and "linear" time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination.

26. Social Psychology: Sociological Approaches. Survey of contribution of sociologists to theory and research in social psychology, including theories of social control: conformity and deviation; reference groups; and interaction processes.

27. Collective Behavior. Prerequisites: courses 1, 18, or equivalent, upper division standing. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization.

28. Culture and Personality. Prerequisites: courses 1, 18, or equivalent, upper division standing. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior.

29. Group Processes. Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical perspectives; implications of various research techniques.

30. Process and Socialization in the Family. Prerequisites: courses 1, 18, or equivalent, upper division standing. Examination of processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

31. Psychoanalytic Sociology. Prerequisites: courses 1, 101 or 102. Recommended: one course in theory (course 101 or 102) and in social psychology. Fieldwork may be required. Designed to review models of integration between psychoanalysis and sociology. Application of this analytical perspective to selected substantive areas and social processes, including but not limited to group development, delinquency, deviance, socialization, identity and self formation, role taking and role making.
143. Human Health and Society. Lecture, three hours; discussion, one hour. Prerequisite: course 1. Exploration of long-run historical trends in relationship between human health and social organization, drawing on historical, anthropological, demographic, and sociological concepts, theories, and data.

144. Urban Poverty and Public Policy in the U.S. (Formerly numbered M152.) Lecture, three hours; discussion, one hour. Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty.

145. Sociology of Deviant Behavior. Examination of leading sociological approaches to study of deviant and criminal behavior; survey of major types of deviation in American society.

146. Sociology of Disputes and Troubles. Lecture, three hours; discussion, one hour. Theoretical implications of everyday disputes and troubles in contemporary society: origins, progression, and outcomes of informal disputes; disputing in intimate family, community, public place, and workplace settings; forms, dynamics and consequences of third-party intervention.

147A. Sociology of Crime. Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behavior.

147B. Sociology of Criminal Justice. Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, parole and prisons.

149. Social Organization of Psychiatric Treatment. Strongly recommended (but not prerequisite): course 148. Review of current research and theory on psychiatric treatment processes and treatment organizations, including mental hospitals and community mental health organizations.

150. Sociology of Aging. (Formerly numbered 150.) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social roles; caregiving relations and institutions; professions concerned with the aged and aging.

151. Comparative Immigration. Lecture, three hours; discussion, one hour; outside study, eight hours. Survey of immigration experience of Europeans, Asians, and Hispanics to the U.S. since the mid-19th century. Overview of immigration experience on ethno-racial groups that migrated voluntarily to this country, with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

152. Comparative Acculturation and Assimilation. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course 151. Comparison of acculturation and assimilation of European, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

153. Chinese Immigration. (Formerly numbered 153.) (Same as Asian American Studies M154.) Lecture, two hours; discussion, one hour. Survey of sociological studies of migration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

154. Race and Ethnicity: International Perspectives. Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S.

155. Latinos in the U.S. (Formerly numbered 155.) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family education, and work issues. P/NP or letter grading.

156. Ethnic and Status Groups. Characteristics of "visible" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. Development of social structural dynamics and consequences of third-party intervention.

157. Social Stratification. Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strat and status systems, mobility, consequences of stratification, and problems of methodology.

158. Urban Sociology. Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world.

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelations and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.

160. Intergroup Conflict and Prejudice. Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special emphasis on alternative sociological and psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change.

161. Comparative American Indian Societies. (Formerly numbered 161.) (Same as American Indian Studies M161.) Lecture, three hours. Requisite: course 1 or American Indian Studies 10. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

162. Sociology of Gender. (Same as Women’s Studies M162.) Lecture, three hours; discussion, one hour. Requisite: course 1 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender; causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

163. Gender and Work. (Same as Women's Studies M163.) Lecture, two hours; discussion, one hour. Requisite: course 1 or Women’s Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on gender issues and consequences of job segregation by gender and wage inequality.

165. Organizations and Society. Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society.

166. Law and Society. Specific topics may include law in preindustrial and industrialized societies, legalization of contemporary social relations, participants’ expectations of legal protection, social justice, social movements toward equal justice, roles of lawyers and judges, social impact of court decisions.

167. Medical Sociology. Prerequisite: course 1 or consent of instructor. Focus on sociological theories of medical institutions and other social organizations, as well as laws and current theories that are involved in receipt and delivery of health services.

171. Occupations and Professions. Description and analysis of representative occupations and professions, with emphasis on the contemporary U.S.

172. Entrepreneurship. Lecture, three hours; discussion, one hour. Prerequisite: course 1. Description and analysis of entrepreneurship, with special reference to historical origins, ideology, international comparisons, and historical study of Jewish communities, with particular emphasis on North America and Israel. Interrelations and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required.

176. Sociology of Mass Communication. (Same as Communication Studies M147.) Requisite: course 1. Studies of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

180. Introduction to Development Studies: Political Economy of Development. (Same as International Development Studies M100B and Political Science M197G.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

182. Political Sociology. Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social change.

183. Comparative and Historical Sociology. Prerequisite: course 1. Survey of central themes of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from a variety of theoretical perspectives.

185. American Society. Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.
186. Latin American Societies. Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.

187. Population and Society in the Middle East. Prerequisites: upper division standing, consent of instructor. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.

188. Comparative East Asian Societies before World War II. Lecture, two hours; discussion, one hour. Describes major features of sociocultural life of Japan, China, Korea, and Vietnam, with special attention to changes in and relationships between culture, state, and society in process of change.

189. Japanese Society. Lecture, two and one-half hours, discussion, two hours. Prerequisite: course 1 or consent of instructor. Analysis of structural-characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.

190. Capitalism, Socialism, and Alternative Social Systems. Lecture, three hours, discussion, one hour. Prerequisite: junior or senior standing. Topical overview of capitalist and socialist social relations, with particular attention to the development, functioning, and transformation of major Latin American societies, emphasizing their relationship to one another and the rest of the world.

191. Independent Studies for Internships (2 to 4 units). Prerequisite: consent of instructor. Independent studies course to be supervised jointly by Field Studies Office and faculty advisor. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only four units of internship are allowed. P/NP grading.

Graduate Courses

202A-202B. Theory and Research in Sociology: Exemplary Studies, Classical and Contemporary. Lecture, two hours; discussion, two hours. Prerequisite: course 18 or equivalent. Readings in major sociological and theoretical issues in the development of sociology. Topics to be chosen from among various schools and periods of significant sociological development.

203A. Social Survey Practicum. Lecture, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Training in practical aspects of sociological research.

203B. Social Survey Research Seminar. Seminar, one hour; discussion, one hour; laboratory, two hours. Prerequisite: graduate standing or consent of instructor. Development of individual survey research projects under faculty supervision.

209C. Mathematics for Social Statistics. Lecture, three hours; computer exercises. Prerequisites: graduate standing, consent of instructor. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

210A-210B. Intermediate Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisite: graduate standing, consent of instructor. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

211A-211B. Comparative and Historical Methods. In Progress grading. Prerequisite: courses 210A or equivalent. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of social structural change; major sociological and theoretical issues in the development of sociology. In Progress grading.

213A-213B. Techniques of Demographic and Ecological Analysis. Prerequisite: course 210A or equivalent. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of social structural change; major sociological and theoretical issues in the development of sociology. In Progress grading.

214A-214B. Naturalistic Methods for Recorded Data. Prerequisite: consent of instructor. Special features of sociological methods for analyzing sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

215A-215B. Experimental Sociology. Prerequisites: courses 210A or equivalent, consent of instructor. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

216A-216B. Survey Research Methods. Course in methodology and techniques: formulation of research problem; study design; hypotheses; sampling; measurement; questionnaire and schedule construction; interviewing and data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel, and other complex survey designs. Students participate in survey research project. In Progress grading.

217A. Analyzing Ethnographies. Seminar, three hours. Prerequisite: consent of instructor. Analysis of ethnographic monographs.

218A-218B. Ethnomethodological Methods. Prerequisite: consent of instructor. Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

219A-219B. Advanced Statistical Methods I, II. Lecture, three hours; discussion, two hours. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and log-linear regression, event-history analysis, general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis.

220. Role Theory. Prerequisites: graduate standing, consent of instructor. Review of theories and research dealing with social roles, with special emphasis on roles in social interaction and in formation of the social self.
221. Social Ecology. Prerequisites: courses 18, 116, or equivalent, and graduate standing, or consent of instructor. Examination of various approaches to both microecology and macroecology, including classical and neoclassical sociological, social area analysis, socio-cultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans.

222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies. Lecture, three hours; prerequisite standing as consent of instructor. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the person's role and problem of definitions, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first part; guest presentations by affiliated faculty in second part.

223. Phenomenological and Interactionist Perspectives on Selected Topics. Lecture, three hours. Comparison of phenomenological and symbolic interactionist perspectives by examining a particular body of work or work within a particular issue. Topics vary: attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between theoretical traditions, including relevance to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies.

224A-224B. Problems in Social Psychology. Prerequisites: consent of instructor. Basic course for graduate students intending to specialize in social psychology. 224A. Major theoretical contributions to the field. 224B. Current work being done in department in several subfields.

225A-225B. Demographic Perspectives on Relationship of Family and Economic Systems. Prerequisites: courses 210A-210B or consent of instructor. Examination of relationship of family and economic systems at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationships of family and economic systems.

225A. Lectures and readings. 225B. Individual research projects involving term paper and classroom reports of results.

227. Sociology of Knowledge. Prerequisite: graduate standing or consent of instructor. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

228A-228B. Critical Issues in Macrosociology. Lecture, two hours; discussion, one hour. Prerequisite: course 227, consent of instructor. Examination of key sociological questions and issues concerning social inequalities, power, and politics in modern societies.

229B. Social Control Institutions. Lecture, three hours. Course 229A is not prerequisite to 229B. Current research and theory in formal social control processes and institutions, including police, courts, schools, and nonvoluntary treatment programs, among others.

230. Nations and Nationalism. Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading.

231. Race and Ethnicity: International Perspectives. Lecture, one hour; discussion, two hours. Prerequisites: graduate standing or consent of instructor. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S., with emphasis on theoretical and methodological issues.

232. Survey Data Acquisition. Lecture, three hours. Prerequisites: courses 210A-210B. Traditional topics on survey research practice in study design, instrument design, sampling, interviewing, and data management. Parallel coverage of research literature on various sources of nonsampling response bias that influence survey results. Ongoing survey that employs Computer-Assisted Telephone Interviewing is available as a resource for course.

233. Foundations of Political Sociology. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and exemplary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structures, social movements, and political institutions.

234. Sociology of Community Organization. Prerequisites: graduate standing, consent of instructor. Survey of recent and classical research and literature dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis.

235. Theories of Ethnicity. Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Examination of diversity of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralist, primordialist, and rational choice perspectives.

236. Immigration. Lecture, three hours. Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary frameworks. S/U or letter grading.

237. Seminar: Theory and Research in Comparative Social Analysis (2 units). Prerequisite: graduate standing. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. Three hours. Prerequisite: graduate standing or consent of instructor. May be repeated for credit. S/U or letter grading.

238. Seminar on Selected Topics in Culture and Society. Seminar, three hours. Prerequisite: graduate standing. Seminar on selected topics on culture and society. Consult Schedule of Classes for topics and instructors. May be repeated for credit. S/U or letter grading.

250. Methodological Problems. 251. Topics in the Problem of Social Order. 252. Quantitative Methods in Sociology. 254. Human Capital, Social Capital, and Cultural Capital. Lecture, three hours. Designed for graduate students in intellectual history of these concepts, points of difference and similarity among the concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions.

254A-255B. Selected Issues in Sociological Theory. Seminar. Prerequisite: consent of instructor. Course 255A is not ordinarily prerequisite to 255B. Examination of selected issues and problems in classical or contemporary sociological theory and in history of development of sociological theory.

256. Demography.
257. Demography of Marriage Formation and Dissolution. Discussion, three hours. Prerequisites: coursework in social statistics. Examination and critical evaluation of marriage formation and dissolution, with a focus on demographic literature.

C258. Talk and Social Institutions. (Formerly numbered 258.) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

259. Social Structure and Economic Change: Historical and Comparative Perspectives. Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Review and critique of major analytical traditions in economy and society.

261. Vietnamese Women. M263. Social Stratification. Discussion, three hours. Prerequisite: graduate standing. Examination of distinctive features of personal identity and social status through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life.

265. Problem of the Third World. 266. Selected Problems in Analysis of Communication. Prerequisites: courses C244A-C244B or consent of instructor. Variable topics/format course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

267. Selected Problems in Communication. 268. Selected Problems in Psychoanalytic Sociology. Discussion, three hours. Recommended (but not prerequisite): at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

M275. Contemporary Issues of the American Indian. (Same as American Indian Studies M200G and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

276. Selected Topics in Sociology of East Asia. Prerequisites: graduate standing, consent of instructor. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society; male/female relations, Confucianism, and class structure; and (3) China and Japan: two models of development.

277. Japanese Society: Selected Topics. Lecture, two and one-half hours. Prerequisite: graduate standing. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison and evaluations of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, kinship, social movements, and modernization. S/U or letter grading.

278. Sociology of Latin America. Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development.

279. Seminar: Applied Social Research. Seminar, two hours; discussion, one hour. Opportunities for application research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

280. Seminar: Evaluation Research. Prerequisite: graduate standing. Discussion, technical and practical aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

281. Selected Problems in Mathematical Sociology. Prerequisite: consent of instructor. Exploration of some mathematical models of sociological processes. Possible topics include social networks, social mobility, kinship relations, organizations, social interaction.

282. Organizations and the Professions. 283. Applied Sociology. Discussion, two hours. Prerequisite: graduate standing. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

284. Topics in Mental Health and Illness. Prerequisite: course 149 or consent, graduate standing.

285A-285Z. Special Topics in Sociology. Seminar, three hours. Prerequisite: graduate standing. Seminar on selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

286. Event History Analysis. Lecture, three hours. Prerequisites: courses 209A-209B and 209C, or 210A-210B, or equivalent, or consent of instructor. Logit models for discrete-time event history models; application of event history models based on use of log-linear analysis; proportional hazards, nonproportional hazards, and stratified models based on Cox partial likelihood method; and accelerated failure-time regression models. S/U or letter grading.

287. Topics in Chinese Society. Discussion, three hours. Preparation: at least two upper division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change. Also course 149A, 149B, 149C, S/U or letter grading.

288A-288B-288C. Mental Health Services for Persons with AIDS. Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

289A-289B-289C. Social Psychology Seminars (2 units each). Seminar, discussion, one hour. Prerequisite: graduate standing. Required of students in social psychology area program, but open to all graduate students in good standing. Forums for presentation of research in social psychology designed to develop ability to understand, critically evaluate, and present research in fields relevant to study of social psychology. May be repeated for credit. S/U grading.

290A-290B-290C. Communities and Institutions Seminars (2 units each). Seminar, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in communities and institutions area program, but open to all graduate students in good standing in department. Seminars for presentation of advanced work in communities and institutions designed to contribute to theoretical and methodological comprehension of work in this area program and to critically evaluate avenues for further research advancements. May be repeated for credit. In Progress and S/U grading.

291. Moral Solidarity in Communities. Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrast more and less solidarity types, with special reference to utopian communities and developmental processes.

293A-293B-293C. Colloquia: Ethnomethodological, Phenomenological, and Observational Sociologies (2 units each). Prerequisites: courses CM124A-CM124B or 217B-217C or 218A-218B and 222, or consent of instructor. Participants present ongoing work and read and discuss exemplary past work of common interest. Continuing colloquia in which participation is expected of faculty and graduate students affiliated with ethnomethodological, phenomenological, and observational sociologies area program (students taking a minor examination may be exempt on request). S/U grading.

295A-295B-295C. Seminars: Quantitative Sociology (2 units each). Ongoing seminars in quantitative sociology area program. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned or conducted or recently completed, including didactic presentations on important developments in the area. Students required to make a presentation each term they are enrolled in the program.

M296A-M296B. Social Theory and Comparative History. (Same as History M203A-M203B and Political Science M219A-M219B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and social history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently or concurrently.

M296C. Theories in Cultural History. (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material.

297A-297B-297C. Colloquia: Macrosociology (2 units each). Weekly forums for presentation of advanced work in macrosociology by graduate students and faculty, as well as visitors from other campuses. Intended to contribute to theoretical and methodological understanding of work in area of macrosociology. S/U grading.

298A-298B-298C. Workshops in Culture and Society (2 units each). Discussion, 90 minutes every other week. Interdisciplinary workshops for graduate students and faculty pursuing research and research topics related to interplay of culture and society, whether social, literary, or philosophical in nature. In Progress and S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice in the supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.
Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the California State Instrumental Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

Undergraduate Study

Bachelor of Arts in Spanish and in Spanish and Linguistics

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates and location.

Preparation for the Major

Required: Spanish 25 or 25A or equivalent as determined by the placement test; courses M35, M42, or M44, or equivalent as determined by the undergraduate adviser. These courses must be passed with an average grade of C or better prior to beginning upper division work in either major.

The Major

Plan A: Spanish Language and Hispanic Literature

Required: (1) Nine core courses, including Spanish 100A-100B, 119A, 119B, 120A through 120D (must be taken in sequence), and 127, all (except course 127) of which must be taken during the junior year (transfer students should consult the department counselor for sequencing) and (2) five upper division Spanish elective courses, selected in consultation with an adviser, in which several areas of study are possible (e.g., language and linguistics as preparation for teaching Spanish at the secondary level; literature of Spain; literature of Latin America; Chicano literature; or any combination which might also include literature and film, or women in Spanish and Latin American literature).

Plan B: Spanish and Linguistics

Required: Completion of six terms of study in one language other than Spanish and English or three terms in each of two other languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A-100B, 105, 115, M115A-M115B, Linguistics 103, 110, 120A, 120B, 165A or 165B, and four upper division Spanish electives.

Honors Program

The honors program is open to Spanish majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project which they pursue under the faculty member's guidance through Spanish 170. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

Bachelor of Arts in Portuguese

Preparation for the Major

Required: Portuguese 3, M35, M42 or M44, 46, or equivalent.

The Major

Portuguese Language and Literature

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B or 130A-130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.
Portuguese and Linguistics Concentration
Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A-M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors
Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/ Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

Study in a Portuguese-Speaking Country
Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Bachelor of Arts in Spanish and Portuguese

Preparation for the Major
Required: Spanish 25, Portuguese 25, M35, M42 or M44, 46, or equivalent.

The Major
Required: Six upper division courses in language and linguistics, including Spanish 100A-100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: group A (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; group B (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; group C (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master's Degrees

Spanish
Admission
Admission to the Master of Arts program in Spanish is based on a careful review of the applicant’s academic record by the graduate admissions committee. Minimum requirements are the B.A. in Spanish from UCLA or another recognized university and a satisfactory score on the Graduate Record Examination (GRE) General Test. If the graduate admissions committee deems that some area of the applicant’s preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

Areas of Study
The department offers four plans of study for the M.A. degree in Spanish: Plan A, Linguistics; Plan B, Literature; Plan C, Linguistics and Literature; and Plan D, Spanish and Portuguese.

Course Requirements
Eleven graduate courses offered by the department are required for the M.A.; at least one must be a seminar taken only after the appropriate pre-seminar. Spanish 596 may be taken only once; courses 597 and 598 do not count toward the degree. Four courses are chosen for the major field, with two courses for each of the minor fields.

Plan A: Linguistics. Students choose one major field and one minor field from the following areas of specialization: phonology and morphology, syntax, diachronic or synchronic language variation. Five courses are chosen for the major field, three courses for the minor field, and either Spanish M201A-M201B or two linguistic courses from the area not chosen for the student's major and minor fields. Also required is one graduate course in literature offered by the department.

Plan B: Literature. Spanish M201A-M201B, one course from 202A through 209, and eight elective graduate courses are required. Four courses are chosen for the major field, three for the minor field, and one additional course from an area outside the major and minor fields. Students choose one major field and one minor field from the following areas of specialization:

1. Spanish literature from its beginning to 1700.
2. Spanish literature from 1700 to the present.
3. Spanish-American literature from its beginning to 1900.
4. Spanish-American literature from 1900 to the present.

Plan C: Linguistics and Literature. Required courses are Spanish M201A-M201B and nine elective graduate courses, four in literature and five in linguistics. The four courses in literature are chosen from two of the Plan B areas of specialization, two from each area. Of the five courses in linguistics, one must be in phonology and morphology, one in syntax, and one in diachronic or synchronic language variation.

Plan D: Spanish and Portuguese. Under this option, the department recognizes two areas of specialization: literature and linguistics.

1. Literature: Spanish M201A-M201B plus nine elective courses (at least eight of them graduate) are the minimum requirement. Four of the nine must be in appropriate areas of Spanish, four in Portuguese. The remaining course may be in the major field or may be selected as a supplementary course in an area supportive of the major and fields of specialization and must be chosen in consultation with the graduate adviser.

2. Linguistics: Eleven courses (at least 10 of them graduate) are the minimum requirement. Four must be in appropriate areas in Spanish, four in Portuguese. The remaining three courses may constitute a minor or supplementary courses in an area supportive of the two major fields of specialization and must be chosen in consultation with graduate adviser. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan
Plan A. A list of essential reading is given to each student on entry to Plan A. One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the guidance committee, must incorporate both the prescribed reading and reading undertaken independently to complement coursework. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

Plan B. One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student’s guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30
works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in the lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

**Plan C.** One quarter before students propose to take their M.A. examination, they must present to their guidance committee a reading list that must adequately represent both their readings for individual literature courses and readings undertaken independently to complement coursework. The reading list for literature should comprise approximately 13 authors and 24 works. The reading list must be approved by the guidance committee, which has the right to prescribe authors and works not included in the list, and forms the basis of the literature section of the M.A. examination. The guidance committee establishes the reading list for linguistics. The examination consists of (1) a three-hour examination in linguistics and (2) a three-hour examination in literature.

**Plan D.** One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student's guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30 works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in these lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

**Thesis Plan**
In lieu of taking the comprehensive examination, a student in any one of the four plans may seek permission to present a thesis for the M.A. degree. The student must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

**Portuguese Admission**
Admission to the Master of Arts program in Portuguese is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the UCLA B.A. in Portuguese or its equivalent and a satisfactory score in the Graduate Record Examination (GRE) General Test; three letters of recommendation may also be sought. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

**Areas of Study**
The program allows two options:
Plan A: Portuguese. Students must select one major field and one minor field from the following areas of specialization: Brazilian literature; Portuguese literature; Portuguese linguistics.

Plan B: Portuguese and Spanish. Under this option, the department recognizes two areas of specialization: literature and linguistics.

(1) Literature: major field of specialization: Brazilian or Portuguese literature; minor field of specialization: Spanish or Spanish-American literature.

(2) Linguistics: major field of specialization: Portuguese linguistics; minor field of specialization: Spanish linguistics.

**Course Requirements**
Option A. Eleven graduate courses are required, at least one of which must be a seminar. Students must select at least five courses in the major field and three in the minor field. In addition, three courses, at least two of which must be at the graduate level, must be selected, with the approval of the graduate adviser, either as part of the major field, as a second minor field, or as supplementary courses supportive of the major. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

Option B. (1) Literature: Portuguese M201A-M201B plus nine elective courses (at least eight of them at the graduate level) are the minimum requirement. Four of the nine must be in appropriate areas of Portuguese, four in Spanish. The remaining course may be in Portuguese or may be selected as a supplementary course in an area supportive of the major fields of specialization and must be chosen in consultation with the graduate adviser. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

(2) Linguistics: Eleven courses (at least 10 of them graduate) are the minimum requirement. Four must be in appropriate areas in Portuguese, four in Spanish. The remaining three courses may constitute a minor or supplementary courses in an area supportive of the two major fields of specialization and must be chosen in consultation with the graduate adviser. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

**Comprehensive Examination Plan**
Plan A. One quarter before the proposed date of the M.A. examination, the student must present to the guidance committee a reading list that adequately represents both the readings completed for individual literature courses and the readings undertaken independently to supplement coursework. The student's reading list for a major field in literature should comprise approximately 15 authors and 30 works; the reading list for a minor field in literature should comprise approximately six authors and 15 works. The reading list for linguistics is established by the guidance committee. The reading lists form the bases of the examination. Students selecting a second minor field from outside the department must submit two research papers from courses in that field in lieu of a third examination. Research papers from courses taken outside the department must be submitted prior to the comprehensive examination.

The examination consists of (1) a three-hour examination in the major field and (2) a 90-minute written examination in the minor field.

Plan B. One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student's guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30 works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in these lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

**Thesis Plan**
In lieu of taking the comprehensive examination, a student may seek permission to present a thesis for the M.A. degree. The student must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

**Doctoral Degree Admission**
The UCLA M.A. in Spanish or in Portuguese, or equivalent, is required for admission to the Ph.D. program in Hispanic Languages and Literatures. Three letters of recommendation are also required from professors familiar with the applicant's work as a graduate student, which address the applicant's capacity for research-oriented doctoral studies and possible entry into the profession. The Graduate Record Examination (GRE) General Test is also required. A combined score of 1,000 is preferred, and the verbal score is considered more important than the quantitative.

Applicants holding the M.A. in Spanish or in Portuguese from UCLA are in one of three categories and are so notified on receipt of the degree. The categories are (1) low pass (termi-
nal M.A., not eligible for admission into the Ph.D. program; (2) mid pass (may continue toward the Ph.D. on a provisional basis); and (3) high pass (automatically eligible to enter the Ph.D. program).

Major Fields or Subdisciplines
Spanish linguistics; Portuguese linguistics; diachronic Hispanic linguistics and philology; medieval Spanish literature; Renaissance and Golden Age Spanish literature; 18th- and 19th-century Spanish literature; 20th-century Spanish-American literature; colonial and 19th-century Spanish-American literature; early Portuguese literature; modern Portuguese literature; Brazilian literature; Spanish and Luso-Brazilian folklore.

Course Requirements
After the B.A., a minimum of 20 graduate courses is required. The two-quarter sequence, Spanish or Portuguese M201A-M201B, may be required if students have not previously taken it or similar courses elsewhere. In the major field, students normally take a minimum of six graduate courses, of which at least two are seminars. In each of the minor fields, students normally take a minimum of four graduate courses, of which at least one must be a seminar. Seminars may be taken for credit no more than twice, with the approval of the appropriate guidance committee, if the content of the course is substantially different.

Written and Oral Qualifying Examinations
The qualifying examinations consist of (1) a four-hour written examination on the major field; a two-hour written examination on each of the minor fields. These examinations take place during the fifth and sixth weeks of the Fall, Winter, and Spring Quarters; (2) a two-hour University Oral Qualifying examination. The examinations are normally taken no later than nine quarters after receiving the B.A. and six quarters after receiving the M.A. Only students who pass the qualifying examination are advanced to candidacy for the Ph.D.

Spanish

Lower Division Courses
Spanish 1 through 3 use Garner, Rusch, and Domínguez’ Claro que sí. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates.

1. Elementary Spanish. Discussion, five hours; laboratory, one hour.
1G. Reading Course for Graduate Students. Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.
2. Elementary Spanish. Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.
2G. Reading Course for Graduate Students. Lecture, three hours. Enforced requisite: course 1G. May not be applied toward degree requirements. S/U grading.
3. Elementary Spanish. Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.
4. Intermediate Spanish. Discussion, five hours; laboratory, one hour. Enforced requisite: course 3.
5. Intermediate Spanish. Discussion, five hours; laboratory, one hour. Enforced requisite: course 4.
6. Intermediate Spanish. Discussion, five hours. Enforced requisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A – or better may enroll directly in course 25.
6A. Intermediate Spanish for Spanish Speakers. Preparation: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of syntax of Spanish.
6A-8B. Spanish Conversation (2 units each). Discussion, three hours. Course 8A is open to students with credit for course 4 or equivalent. Students who have completed course 3 with a grade of B or better may be admitted.
6A-9B. Advanced Conversation (2 units each). Discussion, three hours. Enforced requisite: course 8B.
25. Advanced Spanish and Composition. Lecture, three hours. Enforced requisite: course 5. Emphasis on writing grammatically correct, lexically sophisticated, and rhetorically competent expository prose. Course 25 or 25A is requisite to all upper division courses in Spanish.
M35. Spanish, Portuguese, and Nature of Language. (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.
M42. Civilization of Spain and Portugal. (Same as Portuguese M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.
M44. Civilization of Spanish America and Brazil. (Same as Portuguese M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.
60A-60B-60C. Hispanic Literatures in Translation. Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. 60A. Spanish Literature; 60B. Spanish-American Literature; 60C. Don Quijote.
61A-61B-61C. Hispanic Literatures in Spanish. Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. 61A. Spanish Literature; 61B. Spanish-American Literature; 61C. Don Quijote.
62A-62B-62C. Hispanic Literatures and Film. Lecture, three hours; film screenings, two to three hours. Analysis of moral, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. 62A. Spain; 62B. Spain; 62C. The Chicano Experience.
88A-88Z. Lower Division Seminars. Discussion, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture.
88A. Reaching 2001 (Fantasy of Reality and Reality of Fantasy). Introduction to some specific literary strategies employed by writers of the Hispanic world and analysis of formal characteristics that define categories such as surrealism, magical realism, the fantastic, and realism.

Upper Division Courses
Requisite to all upper division courses is Spanish 25 or equivalent as determined by the placement test.

100A-100B. Introduction to Study of Spanish Grammar. Lecture, three hours. Prerequisite: course M35. 100A. Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. 100B. Syntax. Study of syntactical systems of Spanish.

105. Spanish Composition. Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

115. Applied Linguistics. Lecture, three hours. Prerequisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

118A-118B. History of Portuguese and Spanish. Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. 118A. Phonology; 118B. Morphology and Syntax.

119A. Introduction to Study of Literature: Prose. Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

119B. Introduction to Study of Literature: Poetry and Drama. (Formerly numbered 119B, 119C.) Lecture, three hours. Introduction to study of literary devices, figures of speech, versification, and distinctive stylistic features in the poetry and drama of Spain and Spanish America.

120A-120D. Literature in the Hispanic World (5 units each). Lecture, four hours; discussion, one hour. Required of Spanish majors; must be taken in sequence. Historical/cultural survey of Hispanic literature from its beginning in medieval Iberia to contemporaneous writing in Spain, Latin America, and the U.S. Relationship between fundamental unity and astonishing geographic and cultural diversity. Particular attention to relation between literature and multicultural societies in which it is produced, as well as to individual texts which define or create new artistic possibilities.

122. Medieval Literature: Prose. Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works.

123. Medieval Literature: Poetry. Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works.

125. Golden Age: Don Quijote. Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of the novel in Don Quijote. With particular emphasis on the characters and development of the Chicano literary corpus. Most required reading is in Spanish. Bilingual and English works are included and discussed.

126. The Enlightenment and Romanticism in Spain. Lecture, three hours. Recommended (but not prerequisite): course 120A. Study, through representative works, of the Golden Age poetry and drama.

127. Golden Age: Don Quijote. Lecture, three hours. Recommended (but not prerequisite): course 120A. Development of the novel in the Golden Age, with particular emphasis on the characters and development of the Chicano literary corpus. Most required reading is in Spanish. Bilingual and English works are included and discussed.

130. Post-Romanticism, Realism, and Naturalism in Spain. Lecture, three hours. Recommended (but not prerequisite): course 120B. Study, through representative works, of the Golden Age poetry and drama. 1800-1880.

132. 20th-Century Spanish Prose. Lecture, three hours. Recommended (but not prerequisite): course 120C. Study of several representative works of Spanish prose literature since 1898.

133. 20th-Century Spanish Poetry and Drama. Lecture, three hours. Recommended (but not prerequisite): course 120C. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

140. Modernismo. Lecture, three hours. Recommended (but not prerequisite): course 120B. Study, through representative works, of principal characteristics of modernismo in Spanish-American literature.

145A-M145B. Introduction to Chicano Literature. (Formerly numbered M145.) (Same as Chicana and Chicano Studies M145A-M145B.) Lecture, three hours. Required: course 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of works written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed.

146. Chicano Narrative. (Same as Chicana and Chicano Studies M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on ways in which narrative forms are formed by and address specific social/historical problems.

149. Folk Literature of the Hispanic World. (Same as Folklore M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

151A-151B. Women in Hispanic Literature. Discussion, three hours. Recommended (but not prerequisite): courses 120A-120B-120C. Study of works by and about women, with emphasis on portrayal of women, women’s roles, and myths of womanhood in the Hispanic socio-ideological context. 151A. Spain; 151B. Latin America.

151M. Film and Literature of the Spanish-Speaking World. (Same as Comparative Literature M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

170. Senior Honors Tutorial. (Formerly numbered 170A, 170B, 170C.) Preparation: completion of required upper division major core courses with a 3.5 grade-point average. Directed individual research and writing of honors thesis.

197. Undergraduate Seminar. Seminar, three hours. Prerequisites: upper division Spanish major, consent of instructor. Limited to 15 students. Variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in a specific term.

197A. Studies in Hispanic Culture and Civilization. Lecture, three hours. Required of students preparing for a California State Instructional Credential in Spanish. Advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

199. Special Studies (2 to 4 units). Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

201A-M201B. Literary Theory and Criticism. (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading.

202A. Phonology. Lecture, three hours. Study of the sound structure of Spanish and main phonological processes that map underlying representations into surface representations. Bearing on phonological theory on study of meter.

202B. Morphology. Lecture, three hours. Study of derivational and inflectional word formation processes and their interaction with syntactic structure.

205A-M205B. Development of Portuguese and Spanish Languages. (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

209. Dialectology. Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Contribution of cultural and historical features, including indigenous languages, to their formation.

221. Medieval Lyric Poetry. Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to the 1500. Readings of and lectures on Spanish lyric poetry from the beginning to the 1500.

222. Medieval Epic and Narrative Poetry. Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to the 1500. Readings of and lectures on Spanish epic and narrative poetry from the beginning to the 1500.

223. Medieval Prose. Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to the 1500. Readings of and lectures on Spanish prose from the beginning to the 1500.

224. Poetry of the Golden Age. Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700. Readings of and lectures on Spanish poetry from 1500 to 1700.

225. Drama of the Golden Age. Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings.

227. Cervantes. Lecture, three hours. Readings of and lectures on works of Miguel de Cervantes.

228. The Enlightenment. Lecture, three hours. Readings of and lectures on representative works of the period.

229. Romanticism. Lecture, three hours. Readings of and lectures on representative works of the period. Readings of and lectures on representative works of the period.

230. Realism and Naturalism. Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898.

231. Major Currents in Modern Spanish Literature. Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

232. Spanish Prose Literature from 1898 to the Civil War. Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

233. Spanish Prose Literature after the Civil War. Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

234. Spanish Drama and Poetry from 1898 to the Civil War. Lecture, three hours. Readings of and lectures on representative plays and poems.

235. Spanish Drama and Poetry after the Civil War. Lecture, three hours. Readings of and lectures on representative plays and poems.

237. Literature of the Spanish Conquest. Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.

241A-241B. Contemporary Spanish-American Short Story. Lecture, three hours. Study of important short story writers from modernism to the present.

243A-243B. Contemporary Spanish-American Poetry. Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

244A-244B. Contemporary Spanish-American Novel. Lecture, three hours. Study of important novelists from modernism to the present.

247. Chicano Literature. Lecture, three hours. Study of major movements and authors of Mexican American literature.

M249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented by (1) ballad and poetry, (2) narrative and drama, (3) speech.

Seminar courses (M251A through 290) may be taken for a maximum of eight units each with consent of the appropriate guidance committee and with topic change.

M251A-M251B. Studies in Galician-Portuguese and Old Spanish. (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galician-Portuguese and Old Spanish.

257. Studies in Dialectology. Discussion, two hours.

262A-262B. Studies in Medieval Spanish Literature. Discussion, two hours.

264A-264B. Studies in Golden Age Spanish Literature. Discussion, two hours.

265. Cervantes. Discussion, two hours.

270A-270B. Studies in 18th-Century Spanish Literature. Discussion, two hours.

272A-272B. Studies in 20th-Century Spanish Literature. Discussion, two hours.

277A-277B. Studies in Colonial Spanish-American Literature. Discussion, two hours.

280A-280B. Studies in Contemporary Spanish-American Literature. Discussion, two hours.

281. Studies in Chicano Literature. Discussion, two hours.

M286A-M286B. Studies in Hispanic Folk Literature. (Same as Folklore M286A-M286B.) Lecture, two hours.

290. Special Topics. Lecture, two hours. Variable topics; consult Schedule of Classes or department counselor for topics to be offered in a specific term.

310. Teaching Spanish in Elementary School. Lecture, three hours.

373. Teaching Composition (2 units). Prerequisites: graduate standing, consent of instructor. Seminar on teaching writing in Spanish language courses. Introduction to composition instruction and practice in integrating writing into curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Spanish at College Level. Prerequisite: graduate standing in department. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than four units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations (4 to 12 units). Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Portuguese

Lower Division Courses

No credit is allowed for completing a less advanced course after completion of a more advanced course in grammar and/or composition.

1. Elementary Portuguese. Discussion, five hours; laboratory, one hour.

2. Elementary Portuguese. Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

M35. Spanish, Portuguese, and Nature of Language. (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

M42. Civilization of Spain and Portugal. (Same as Spanish M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

M44. Civilization of Spanish America and Brazil. (Same as Spanish M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

46. Brazilian Culture and Civilization. Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

Upper Division Courses

Requisite to all upper division courses is Portuguese 25 or consent of instructor.

100A. Phonology and Morphology. Lecture, three hours. Analysis of phonetic, phonemic, and morphological systems of Portuguese.

100B. Syntax. Lecture, three hours. Review of patterns of the Portuguese language.

102A-102B. Intensive Portuguese. Prerequisite: foreign language experience (other than Portuguese) or consent of instructor. Development of speaking and reading skills equal to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

103. Language and Popular Culture. (Formerly numbered 101A.) Lecture, three hours. Requisite: course 102B. Development of reading, speaking, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity.

105. Advanced Composition and Style. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

M118A-M118B. History of Portuguese and Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

C126. Baroque and Neoclassical Portuguese Literature. Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

C127. 19th-Century Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C227. P/NP or letter grading.

C128. Post-Romanticism and Naturalism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C228.
C219. 20th-Century Portuguese Literature. Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C252. P/NP or letter grading.

C348. Brazilian Modernism. (Not the same as course C234 prior to Fall Quarter 1995.) Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C234. P/NP or letter grading.

C352. 20th-Century Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/NP or letter grading.

C354. Brazilian Film and Literature. Lecture, three hours. Concurrently offered in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

197. Undergraduate Seminar. Seminar, three hours. Variable topics course with readings, discussions, and papers. Consult Schedule of Classes or department counselor for topic to be offered in a specific term.

199. Special Studies (2 to 4 units). Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading.

202. Synchronic Morphology and Phonology. Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

204A-204B. Generative Grammar. Lecture, three hours. Prerequisite: consent of instructor. Course 204A or consent of instructor is prerequisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiotics, and phonology on style, metaphor, and meter.

M205A-M205B. Development of Portuguese and Spanish Languages. (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

C226. Baroque and Neoclassical Portuguese Literature. Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

C227. 19th-Century Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C127. S/U or letter grading.

C228. Post-Romanticism and Naturalism in Portuguese Literature. Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

C229. 20th-Century Portuguese Literature. Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/U or letter grading.

C231. Colonial Brazilian Literature and Culture. Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

C232. 19th-Century Brazilian Literature and Culture. Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C132. S/U or letter grading.

C233. Machado de Assis. (Not the same as course C234 prior to Fall Quarter 1995.) Lecture, three hours. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C234. P/NP or letter grading.

C234. Brazilian Modernism. (Not the same as course C235 prior to Fall Quarter 1995.) Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C234. S/U or letter grading.

C235. 20th-Century Brazilian Literature. Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.

C249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Folklore M240 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

M251A-M251B. Studies in Galego-Portuguese and Old Spanish. (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galego-Portuguese and Old Spanish.

252. Studies in Early Portuguese Literature. Discussion, two hours.

253. Studies in Modern Portuguese Literature. Discussion, two hours.

254. Studies in Early Brazilian Literature. Discussion, two hours.

255. Studies in Modern Brazilian Literature. Discussion, two hours.

290. Special Topics. Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Consult Schedule of classes or department counselor for topics to be offered in a specific term. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (4 to 8 units). Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations (4 to 12 units). Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Neil M. Malamuth, Ph.D., Chair
Professor

Neil M. Malamuth, Ph.D. (Communication Studies)

Professors Emeriti

Donald E. Hargis, Ph.D.
Charles W. Lomas, Ph.D.
Ralph Richardson, Ph.D.

Associate Professor

Paul I. Rosenthal, Ph.D. (Communication Studies)

Lecturers

Dee Bridgewater, Ph.D.
Stephen A. Doyle, M.A.
Maude S. Gregory, M.A., Senior
Thomas E. Miller, M.A.
Sonya H. Packer, M.A.

Scope and Objectives

There is no major in speech; however, several undergraduate courses are offered for interested students.

Speech

Lower Division Courses

1. Principles of Oral Communication. Preparation: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

2. Public Speaking and Discussion. Enforced prereq: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

Upper Division Courses

190A-190B. Forensics (2 units each). Prerequisite: consent of instructor. May be repeated once for credit.

191. Analysis and Briefing (2 units). Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit.

197. Proseminar: Rhetoric. Prerequisite: senior standing or consent of instructor. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

199. Special Studies (2 to 4 units). Prerequisites: senior standing, consent of instructor.

STUDY OF RELIGION

Chairs

E. Carmack Holmes, M.D. (William P. Longmire, Jr., Professor of Surgery), Executive Chair
James B. Atkinson, M.D., Vice Chair for Clinical Affairs
Achilles Demetrion, M.D., Vice Chair, Cedars-Sinai
Edward H. Livingston, M.D., Vice Chair, Wadsworth VA
Howard A. Reiber, M.D., Vice Chair, Sepulveda VA
Bruce E. Stable, M.D., Vice Chair, Harbor-UCLA
Jesse E. Thompson, Jr., M.D., Vice Chair, Olive View-UCLA

Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in one 12-week core clerkship in clinical surgery and are assigned to rotations at a combination of UCLA, Harbor-UCLA, West Los Angeles VA, and Olive View-UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff, in addition to the initial surgery clerkship orientation.

During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Surgery

Upper Division Course

199. Special Studies (2 to 8 units). Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

Scope and Objectives

The M.A. program in Applied Linguistics and Teaching English as a Second Language (TESL) is intended primarily for individuals who wish to pursue a career in applied linguistics research. It is designed to provide both breadth of knowledge in several areas of applied linguistics and the specialized knowledge and skills needed to plan and conduct research in one area.

The program is a two-year course of graduate study leading to a Master of Arts degree. The orientation of the program is toward research, and a thesis is required. The first year is designed to provide students with a fundamental understanding of the principles, issues, problems, and approaches to research in each of three areas within the discipline: second language acquisition, assessment, and discourse analysis. It is expected that during the first year students identify one of these areas for specialization and begin consulting with a faculty member about areas of possible thesis research. During the second year students are expected to complete advanced courses in their selected area of specialization and to complete their thesis research.

In addition, the Department of Teaching English as a Second Language and Applied Linguistics and the Department of Linguistics offer an interdisciplinary degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. (Also see Applied Linguistics earlier in this section of the catalog.)

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Applied Linguistics and Teaching English as a Second Language

Master’s Degree

Admission

Students normally apply for the Master of Arts in Applied Linguistics and Teaching English as Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, U.S. citizens
and students from other countries must have the equivalent of an American bachelor’s degree. Applicants must also have taken the equivalent of Linguistics 120A and Linguistics 120B (or make them up as deficiency courses).

After admission, students must maintain a grade point average of at least B (3.0). A GPA of 3.25 (B+) is a prerequisite for entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Students are requested to submit letters of recommendation directly to the graduate adviser, Department of Teaching English as a Second Language and Applied Linguistics, UCLA, 3300 Rolfe Hall, Box 951531, Los Angeles, CA 90095-1531. Since admission is limited to approximately 20 students per year, it is important that completed applications and supporting papers be submitted by December 15.

The admissions committee screens all applications using the following criteria: grade point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) examination for international applicants whose native language is not English, a relevant research paper, letters of recommendation, and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study Applied Linguistics at UCLA; (2) area of Applied Linguistics the applicant may want to specialize and do research, reasons for this interest, qualifications and professional experience relevant to doing research in this area; and (3) knowledge of other languages, dialects or cultures.

International students who hold a bachelor’s degree or higher from a university in a country where the official language is English and in which English is the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the Test of English as Foreign Language (TOEFL) and the UCLA English as a Second Language Placement (ESLPE). All other applicants must take the TOEFL prior to arrival at UCLA, submitting the score as part of the application process. These students must also take the ESLPE upon arrival at UCLA. Depending on the results of this examination, students may be required to take English as a Second Language courses to improve their command of academic English.

Areas of Study
Three areas of specialization in Applied Linguistics and Teaching English as a Second Language are available: second language acquisition, assessment, and discourse analysis.

Second Language Acquisition
Research in this area focuses predominantly on second language processes, which include research on (1) interlanguage systems; (2) underlying cognitive mechanisms that account for these systems; (3) the social, affective, and neurobiological factors that influence second language development, and; (4) the effect of instruction on the process. Additional areas of inquiry include the relationship between first and second language acquisition, the effect of first language transfer, the interface between various linguistic theories and second language acquisition, and the comparisons between native and nonnative linguistic systems and how speakers use them in natural discourse.

Language Assessment
Language assessment is an area of Applied Linguistics that is concerned with the empirical investigation of theoretical questions on the one hand, and with providing useful tools for assessment on the other. Language testing research has as its goals the formulation and empirical investigation of theories of language use in its widest sense. Specialization in the area of language assessment enables students to acquire an understanding of the conceptual foundations for language testing, the goals of language testing research and language test development, and current issues and problems in language testing. Students receive training in the development of language tests, the analysis of test results, and the interpretation and use of test results, enabling them to design and conduct research into theoretical questions in language testing.

Discourse Analysis
Discourse Analysis is a broad area of research concerned with how language users produce and interpret language in context. Discourse analysts study the linguistic structure of speech acts, conversational sequences, speech activities, oral and literate registers, and stance marking, among other constructions, and seek to relate these constructions to social and cultural norms, preferences, and expectations. The field articulates how lexicogrammar and discourse systematically vary across social situations and at the same time help to define those situations. Analysis is conducted primarily through databases or corpus-based research, supplemented by other methods as appropriate (e.g., observation, elicitation, introspection). Analysts attend to the form, meaning, and function of language whether they begin with discourse-level segments and work down to forms or begin with forms and work up to the discourse-level.

Discourse analysis may be carried out as an end in itself or as a tool contributing to research in language acquisition or language assessment.

Course Requirements
A total of 10 courses is required for the M.A. degree, including a minimum of seven 200-series courses. Nine of these courses are applied toward the University’s nine-course minimum for the master’s degree. A total of eight units of 500-series courses may be applied toward the 10 courses required by the department for the M.A.; however, only four of those units may be used to fulfill the University’s nine-course minimum requirement for the degree. In addition, those students lacking a significant foreign language background are required to complete two additional foreign language electives.

Prerequisites: Introductory course in phonetics, phonology, and syntax equivalent to courses taught at UCLA (Linguistics 103, 120A, 120B). A minimum of two quarters of a foreign language.

First-Year Curriculum
The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Teaching English as a Second Language and Applied Linguistics 204, 206, one additional course.

Winter Quarter: Teaching English as a Second Language and Applied Linguistics 201, two additional courses.

Spring Quarter: Teaching English as a Second Language and Applied Linguistics 202, two additional courses.

Five foundation courses (Applied Linguistics 200, 202, 204, 206, 210) are required. Choice of additional coursework in the first year is flexible and is to be determined in conjunction with the faculty mentor and graduate adviser. Those students lacking the prerequisite linguistics courses and foreign language background are expected to take these courses within their first two quarters.

Students wishing to obtain a certificate in Teaching English as a Second Language or desire advanced language education training in order to serve as teaching assistants might choose to take certain professional development electives. Students coming to the program from fields other than linguistics may need to take additional courses in the nature of language and language analysis, in order to better prepare themselves for advanced study in one of the three areas of specialization offered in this program. Exceptions to the above requirements are made only after consultation with the faculty mentor and graduate adviser.

Second-Year Curriculum
The typical course of study for the second year of the M.A. program is as follows:

Fall Quarter: Teaching English as a Second Language and Applied Linguistics 200, two guided electives.

Winter Quarter: Teaching English as a Second Language and Applied Linguistics 598, two guided electives.
Spring Quarter: Teaching English as a Second Language and Applied Linguistics 400, 598.

During the second year, students complete their specialization and elective course requirements and work on their theses. The four elective courses are to be chosen in consultation with the student's faculty advisor/mentor from courses in the department. Two of these electives must be 200-series courses in the student's area of specialization, beyond the foundation courses. In order to enhance an interdisciplinary perspective, students are also encouraged to take relevant electives in other departments, such as anthropology, education, linguistics, neuroscience, psychology, and sociology.

At the beginning of the fourth quarter, each student must enroll in Teaching English as a Second Language and Applied Linguistics 200. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair. Once students complete the thesis proposal, they enroll in Teaching English as a Second Language and Applied Linguistics 598, which is conducted as an independent tutorial with the master's thesis committee chair as mentor until the thesis is completed, typically the end of the second year. Students may only apply course 598 once towards the 10-course requirement.

Teaching English as a Second Language and Applied Linguistics 400 is a seminar in which Applied Linguistics and Teaching English as a Second Language M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 10 courses required for the M.A. degree.

Teaching English as a Second Language Certificate

Successful completion of the following courses, by graduate students enrolled in degree programs, qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Teaching Credential: Linguistics 20; Teaching English as a Second Language and Applied Linguistics 202 or 220 or 230 or 231; 210; C211/C106 or C212/C107 or C217/C109; C213/C103 or Linguistics 103; C216/C122; 218; and two quarters of a foreign language.

Comprehensive Examination

None.

Thesis Plan

The culmination of the mentoring relationship during the M.A. degree is the master's thesis, which is based on research that each student plans and conducts under the supervision of a faculty mentor. The master's thesis is a substantial research report, which could provide the basis for a journal article. During the fourth quarter, each student must enroll in Teaching English as a Second Language and Applied Linguistics 598. In this course, the student prepares a thesis proposal and forms, in collaboration with a faculty mentor, a thesis committee, which consists of three members of the Academic Senate, at least two of whom must be from the department. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair.

Teaching English as a Second Language

Master's Degree

Admission

Students normally apply for the M.A. in Teaching English as a Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required of students entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Applicants are requested to submit the letters of recommendation directly to the graduate adviser in the department. Since admission is limited to approximately 25 students per year, it is important that completed applications and supporting papers be submitted by January 8.

The admissions committee screens all applications, using the following criteria: grade-point average (must be 3.0 or better); Graduate Record Examination (GRE) scores; Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English; a relevant research paper; letters of recommendation; and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study Teaching English as a Second Language at UCLA; (2) special qualifications as a researcher or a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

Areas of Study

Consult the department.

Course Requirements

Prerequisite: Linguistics 20 or its equivalent.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Teaching English as a Second Language and Applied Linguistics 210, 265, foreign language requirement or elective (course depends on language requirement plan).

Winter Quarter: Teaching English as a Second Language and Applied Linguistics C216 or C122, 220 or 229 or 231, foreign language requirement or elective (course depends on language requirement plan).

Spring Quarter: Teaching English as a Second Language and Applied Linguistics C211 or C106, or C212 or C107, or C217 or C109, or 218, Linguistics 103 or Teaching English as a Second Language and Applied Linguistics C213 or C103.

Exceptions to the above requirements are made only after consultation with the graduate adviser.

Of the nine courses required in the first year, at least seven must be in Teaching English as a Second Language and Applied Linguistics, English, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Instructional Credential.

Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Teaching English as a Second Language and Applied Linguistics C216 or C122, 220 or 229 or 231, 265, and Linguistics 103 or Teaching English as a Second Language and Applied Linguistics C103 or C213) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses to be completed in consultation with the graduate adviser during the second year.

Once the thesis proposal in course 598 is completed, the student continues to enroll in this course until the thesis is completed, typically the end of the second year. Only one 598 course may be applied toward the 14-course requirement.

A total of eight units of 500-series courses may be applied toward the 14 courses required for the degree; however, only four units may be used to fulfill the Graduate Division minimum requirement of five graduate-level courses.

Teaching English as a Second Language and Applied Linguistics 400 is a seminar in which M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 14 courses required for the M.A. degree.

The electives taken during the second year should be selected, in consultation with the
Teaching English as a Second Language and Applied Linguistics

Upper Division Courses

100. Discourse and Society. Lecture, four hours; discussion, two hours. Important contemporary perspectives for study of language in its social and cultural matrix. Topics include conversational organization, narrative, repair and grammatical organization, language in cultural settings, language socialization, and language impairment and institutional discourse. Focus on analysis of audio and video recordings of talk in a variety of natural settings. P/NP or letter grading.

101. Introduction to Language Learning and Language Teaching. Lecture, two hours; discussion, two hours. Prerequisite: Linguistics 1 or consent of instructor. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

103. Phonetics for Language Education. (Formerly numbered 103.) Prerequisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C212. P/NP or letter grading.

104. Writing for Language Education. (Formerly numbered 104.) Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C212. P/NP or letter grading.

107. Reading in Language Education. (Formerly numbered 107.) Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C212. P/NP or letter grading.

109. Literature in Language Education. (Formerly numbered 109.) Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C217. P/NP or letter grading.

212. Structure of Present-Day English. (Formerly numbered 122.) Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216.

218. Metaphor andLiteral Speech. (Formerly numbered 189.) Same as Philosophy M173. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neural or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

Graduate Courses

All graduate courses are open to qualified graduate students from other departments with consent of department.

202. Foundations of Language Acquisition. Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition and second language acquisition. Linguistic nature of learners' interlanguage systems and underlying cognitive mechanisms posited to explain them, as well as various social, affective, and neurobiological factors which affect ultimate success of learner.

211. Writing for Language Education. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C106. Additional assignments required of graduate students. S/U or letter grading.

212. Reading in Language Education. Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C107. Additional assignments required of graduate students. S/U or letter grading.

214. Materials Development for Language Education. (Formerly numbered 220.) Preparation: at least two years of second language instruction experience. Requisite: course 210. Planning and preparation of an original set of language teaching materials geared to needs of a specified group of learners. Revisions of first drafts and evaluation of one's own work and that of others' peers. Introduction to process of publishing language teaching materials.

215. Media for Language Education. (Formerly numbered 221.) Requisite: course 210. Rationale and pedagogical application for using media equipment and materials in the second language classroom. Training in standard classroom media equipment and materials preparation and production techniques, focusing on application to second language instruction.

216. Structure of Present-Day English. Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C122. Additional assignments required of graduate students. S/U or letter grading.

217. Literature in Language Education. Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C109. Additional assignments required of graduate students. S/U or letter grading.

218. Language Teaching Practicum. Requisites: courses 210, 216. Theoretical and practical concerns regarding second language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language and methodology. Project required if taken for letter grade. S/U or letter grading.

219. Current Issues in Language Education. (Formerly numbered 229.) Requisite: course 210. Specialized topics in language education of interest to graduate students. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

220. Language Acquisition. (Formerly numbered 241.) Requisite: course 202. Designed for advanced graduate students (beginning Ph.D. and second-year M.A.). Hands-on project-oriented survey of research on acquisition of both first and second languages from a crosslinguistic and interdisciplinary perspective.

229. Current Issues in Language Acquisition. (Not the same as course 222 prior to Fall Quarter 1997.) Requisite: course 206. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

223. Topics in Psycholinguistics. (Formerly numbered 260.) Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

224. Language Socialization. (Formerly numbered 285.) Requisite: course 206. Exploration of process of socialization through language and socialization to change. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and incorporating results. May be repeated for credit. S/U or letter grading.

250. Advanced Seminar: Language Assessment. Requisite: courses 204, 241. Designed to cover application of a technical issue such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

258. Assessment Laboratory. Collaborative course-work, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and incorporating results. May be repeated for credit. S/U or letter grading.

222. Discourse-Centered Language Learning. (Not the same as course 222 prior to Fall Quarter 1997.) Requisite: course 206. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

223. Topics in Psycholinguistics. (Formerly numbered 260.) Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

224. Language Socialization. (Formerly numbered 285.) Requisite: course 206. Exploration of process of socialization through language and socialization to change. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and incorporating results. May be repeated for credit. S/U or letter grading.

230. Advanced Seminar: Interlanguage Analysis. (Formerly numbered 251.) Requisite: course 220. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects.

231. Crosslinguistic Topics in Language Acquisition. (Formerly numbered 271.) Requisite: course 220. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., crosslinguistically valid) mechanisms of language acquisition. Prerequisite: course 206.

242. Experimental Design and Statistics for Applied Linguistics. (Formerly numbered 209.) Requisite: course 204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in the field. Emphasis on hands-on approach to statistical and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical methodological trends in the field. Project required. S/U or letter grading.

249. Current Issues in Language Assessment. (Formerly numbered 232.) Requisite: course 204. Designed to explore current issues in language assessment from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field. May be repeated for credit with topic change. S/U or letter grading.

250. Advanced Seminar: Language Assessment. Requisite: courses 204, 241. Designed to cover application of a technical issue such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

258. Assessment Laboratory. Collaborative course-work, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting and reporting results. May be repeated for credit. S/U or letter grading.

260. Discourse Analysis. (Formerly numbered 283.) Requisite: course 206. Survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

265. Topics in Functional Grammar. (Formerly numbered 249.) Requisite: course 201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in the field, such as voice, nominal reference, and word order. May be repeated topic change.

266. Crosslinguistic Research Laboratory. (Formerly numbered 266.) Advanced procedures in data analysis in crosslinguistic research, including critical reading of relevant publications. Students must work toward a specific product, such as a thesis, dissertation proposal, qualifying paper, dissertation research paper, or grant proposal. May be repeated for credit. S/U or letter grading.

269. Current Issues in Discourse Analysis. (Formerly numbered 283.) Requisite: course 206. Specialized topics in discourse analysis of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical and practical concern in the field. May be repeated for credit with topic change.

270A. Ethnographic Methods in Discourse Analysis I. (Same as Anthropology M249A) Corequisite: course M207A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

270Q. Ethnographic Technologies Laboratory I. (Same as Anthropology M249Q) Corequisite: course M207A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

272. Grammar and Discourse. (Formerly numbered 272.) (Same as Anthropology M246A) Requisite: course 201. Survey of grammar-discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

273. Grammar and Discourse Practicum. (Formerly numbered 273.) (Same as Anthropology M246B) Requisite: course 202. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking, honorifics, and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

274. Advanced Seminar: Contextual Analysis of English Structure. (Formerly numbered 252.) Requisite: course 201. Examination of selected words and/or structures in oral and written texts to determine when and why they occur. Beginning with frequency and distribution of the form(s), exploration of meaning and function of the form(s).

278. Discourse Laboratory. (Formerly numbered 288.) Requisites: courses 206, 260, two other discours analysis courses. Designed for applied linguistics doctoral students. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. May be repeated for credit. S/U or letter grading.

291. Current Issues in Applied Linguistics. Specialized topics in applied linguistics of current relevance in two or more of the following areas: language acquisition, second language acquisition, discourse analysis, and discourse analysis/functional grammar, and of interest to students in applied linguistics and TESL. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.
375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. TESL Colloquium. Prerequisite: consent of TESL M.A. advisor. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

495. Training and Supervision of Teaching Assistants (2 units). Lecture, two or more hours. Corequisite: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangement. S/C. S/U grading.

596. Directed Individual Study. Prerequisite: graduate standing. Independent study in an area related to English as a second language. May not be repeated for credit.

596. M.A. Research and Thesis Preparation (4 to 6 units). Prerequisite: graduate standing. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four units) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

**English as a Second Language (ESL)**

UCLA 3300B Rolfe Hall Box 951531 Los Angeles, CA 90095-1531 (310) 825-4378

**Lower Division Courses**

The following courses are only for students whose native language is not English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see Subject A in the Undergraduate Study section of this catalog).

Depending on the results of this examination, students may either be exempt from any special ESL requirement or may be required to take one or more courses. They are placed into the ESL track at a particular level and must enroll in one ESL course each term, beginning in their first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better (C – or a Passed grade is not acceptable). The required sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If students do not achieve a minimum score on the placement examination, they may be required to spend a term studying elementary English exclusively, through UCLA Extension, before re-taking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C – or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the ESLPE.

32. Oral Communication Skills: Stress and Intonation. Lecture, four hours; outside study, eight hours. Prerequisite: course 33A or 33B or 33C or 35 or proficiency demonstrated on English as a Second Language Placement Examination. Focus on academic speaking skills, including stress patterns, intonation, and rate. Prepares students to effectively communicate with native English-speaking audiences.

33A. Advanced Oral Communication Skills for ESL Students. Lecture, five hours: laboratory, two hours. Prerequisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on speaking in English in academic settings, including preparation for exams, giving presentations, and active participation in classroom discussions.

33B. Intermediate English as a Second Language. Lecture, four hours; laboratory, two hours. Prerequisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on improving speaking skills, including pronunciation, fluency, and oral presentation preparation.

33C. Advanced English as a Second Language. Lecture, five hours. Prerequisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on developing advanced speaking skills, including oral presentations, discussions, and academic debates.

33D. Intermediate Composition for ESL Students. Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on improving writing skills, including paragraph construction, essay writing, and academic discourse.

35. Developmental Composition for ESL Students. Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on improving writing skills, including paragraph construction, essay writing, and academic discourse.

36. Intermediate Composition for ESL Students. Lecture, four hours; outside study, eight hours. Prerequisite: course 35 or proficiency demonstrated on English as a Second Language Placement Examination. Focus on major rhetorical techniques found in academic writing. Special attention to individual research, grammatical structures, and style. P/NP (undergraduates), S/U (graduates), or letter grading.

**Upper Division Courses**

103. Pronunciation for ESL Students. Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on improving pronunciation, including articulation, intonation, and stress patterns.

110. Introduction to Literature for ESL Students. Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on the reading and analysis of a variety of literary texts, including poetry, fiction, and non-fiction.

119. Special Studies in English as a Second Language. Lecture. Prerequisite: consent of instructor and academic coordinator of English as a Second Language Program. Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in English as a second language beyond those covered in current courses. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.
South and Southeast Asian Languages

Lower Division Courses

40A-40B-40C. Introductory Hindi. (Formerly numbered Teaching English as a Second Language 98B-98E-98F.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 40A is enforced requisite to 40B, which is enforced requisite to 40C. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension.

41A-41B-41C. Intermediate Hindi. Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 40C. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

50A-50B-50C. Introductory Vietnamese. Discussion, five hours; laboratory, one hour; outside study, six hours. Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension.

51A-51B-51C. Intermediate Vietnamese. (Formerly numbered Teaching English as a Second Language 98G-98H-98I.) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 50C. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

60A-60B-60C. Introductory Thai. (Formerly numbered Teaching English as a Second Language 98G-98B-98C.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension.

61A-61B-61C. Intermediate Thai. Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 60C. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

70A-70B-70C. Introductory Tagalog. (Formerly numbered Linguistics 98A-98B-98C.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Coverage of basic Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension.

71A-71B-71C. Intermediate Tagalog. Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 70C. Course 71A is enforced requisite to 71B, which is enforced requisite to 71C. Reinforcement of basic Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

Upper Division Course

199. Special Studies in South and Southeast Asian Languages. Requisites: consent of instructor and academic coordinator of South and Southeast Asian Languages Program. Independent studies course for junior/senior undergraduate and graduate students who desire more advanced or specialized treatment of one language offered in the program beyond introductory and intermediate courses currently offered. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

THEATER

School of Theater, Film, and Television

UCLA
103 East Melnitz Building
Box 951622
Los Angeles, CA 90095-1622

Ndbusi Nwafor, Ph.D., Visiting
Andre Paradis, Visiting
Jean Louis Roddey, Visiting
Leslie Rose, Visiting

Scope and Objectives

UCLA’s theater program offers comprehensive training for the profession, as well as serious study of theater’s 2,000-year history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, or the comprehensive study of theater, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

Undergraduate Study

Bachelor of Arts Degree

The Bachelor of Arts degree provides a liberal education and preprofessional training in a program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — performance, playwriting, directing, design, technical theater, and the history and criticism of theater and drama. The program is designed to ensure that students graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

The comprehensive program provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore each of the principal areas of theater practice — acting, directing, design, playwriting, and production — to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced courses in playwriting, directing, and theater history and drama, leading to a culminating research or creative experience in the senior project.

The acting program includes specialized and advanced courses that prepare students for careers in performance. Lower division
courses introduce improvisation, sense memory, actions, objectives, and character work. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, and performance for film and video. Performance is accentuated in the senior year which culminates in a senior production project combining research of character and play with performance.

The design and production program introduces design principles and investigates the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Three design concentrations are available at the upper division level—scenic and lighting design, scenic and costume design, and lighting and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each concentration examines design principles and practice specific to each field, leading to assignment as a member of a production design team and the preparation and realization of designs for a production. The senior project includes a design portfolio project which culminates in the preparation of complete designs and drawings for a production and the assembly of a design portfolio and résumé.

Admission
All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of the application the department notifies students of the screening process, which includes submission of a written personal essay, letters of recommendation, and an interview and/or audition. Information on the scheduling of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, directing, design and technical theater, playwriting, and history and criticism.

All entering students are admitted to the comprehensive program and may audition and/or interview for courses in the acting and design programs as continuing students.

Preparation for the Major
Required: Theater 11, 13, 14A-14B-14C, 15, 50. Students in the comprehensive and design programs must also take course 12.

The Major
Required: A total of 58 upper division units, including Theater 101A-101B-101C and 150, and a specialization (42 units) from one of the following: (1) acting program — courses 115A-115B-115C, 116A-116B-116C, 124A, 124B, 125A, 125B, 126A-126B-126C, 127A-127B-127C, 180; (2) comprehensive program — courses 106, 180, and 34 elective units; (3) design and production program — course 159, six units of design skills courses, and one of the following emphasis sequences: (a) 151A-151B, C151C, 152A-152B, C152C, (b) 151A-151B, C151C, 153A-153B, C153C, (c) 152A-152B, C152C, 154A-154B, C154C.

Through certain of these required courses, students are responsible for completing specific production assignments related to production activity of the theater curriculum.

Graduate Study
The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Gradute Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master of Arts
Admission
The Master of Arts degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree and who do not wish to continue in the doctoral program.

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA Application for Graduate Admissions, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable and are the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Requirements include the results of the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information such as résumé, portfolio, script, production book, and interview that may be required to establish the quality of applicants’ work in the specialization. Consult the Student Services Office.

Areas of Study
The program leads to a general graduate degree, though there are opportunities, through electives and thesis or research paper topic, to stress a particular interest such as acting, design, directing, dramatic writing, or theater history and criticism.

Course Requirements
Students are required to complete a minimum of 10.5 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study and research leading to the successful completion of either the thesis or comprehensive examination plan.

The required courses are Theater 245A and C272 (a two-unit course to be taken three times). After consultation with an adviser, students select seven other courses, including one graduate course in theater history (Theater 205A, 205B, or 205C), one graduate course in theater production theory (Theater 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take Theater 205A-205B-205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

Comprehensive Examination Plan
Students must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during the final quarter of residency, at which time the student should have advanced to candidacy.

Thesis Plan
Before beginning work on the thesis, students must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the Ph.D. critical studies committee. A thesis committee is then formed when students are within one quarter of completing the coursework, at which time they are eligible to advance to candidacy. The adviser and the committee must have a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If the thesis fails to pass the committee, the student may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.
Master of Fine Arts

The department is not admitting students at this time to the M.F.A. producers and sound design programs.

Admission

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA Application for Graduate Admissions, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Evidence of creative ability and professional intent is required. When submitting the application, applicants must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

Acting. Submit a résumé and audition for the acting committee or its representative.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). Submit a résumé and evidence of ability appropriate to the area of emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. An interview and presentation of the portfolio is required.

Directing. Submit a résumé and evidence of production work, which may include copies of prompt books, photographs, reviews and critical commentaries, and an essay outlining a directorial approach to a selected play. If the review committee requests an interview, applicants are notified of city location and dates at which time a full portfolio may be presented. Interviews are conducted at various locations around the country in February.

Playwriting. Submit a résumé and two examples of creative writing which may include dramatic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

Producer's Program. Submit a résumé, examples of related coursework, and a statement outlining areas of specific interest and intent. An interview may be required by the department.

In addition, all applicants must submit three letters of recommendation. The Graduate Record Examination (GRE) is not required. Consult the Student Services Office.

Areas of Study

The areas of specialization for the M.F.A. program are as specified above under the Admission section.

Course Requirements

Acting. A total of 23.5 courses (94 units) is required for the degree; of these, 20.5 courses (82 units) must be graduate-level (200 and 400 series) courses. Only 12 units of 596 courses may be applied toward the total number of units for the degree and the minimum graduate course requirement.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). A total of 26 courses (104 units) is required for the degree; of these, 23.5 courses (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 10 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Directing. A total of 26.5 courses (106 units) is required for the degree; of these, 23.5 (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 12 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Students are required to enroll in a minimum of 12 units per quarter. Required courses are scheduled to permit completion within a three-year period.

Specific course requirements for each program are available in the Student Services Office.

Comprehensive Examination Plan

The plan is satisfied by fulfilling a series of creative projects appropriate to students' specializations. On completion of the final creative project or in the last quarter of residence, whichever is last, students must file for advancement to candidacy. The committee then reviews and evaluates students' records. Student participation in the final review is at the discretion of the committee.

If students fail the review and evaluation of their creative work by the examining committee, they may, with the approval of the department chair, be reexamined.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, criticism, (2) the imagination and quality of scholarly writing and academic achievements, (3) grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, and fellowships. Additionally, candidates should demonstrate awareness and experience in one of the major fields of theater.

Applicants may be admitted with an M.F.A., M.A., or B.A. degree. The dossier for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Services Office.

Major Fields or Subdisciplines

The Ph.D. student in theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

Course Requirements

During the first six quarters (two academic years), students must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Theater 216A, 216B, 216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic. A screening examination is administered during the first week of the Fall Quarter based on a reading list supplied at the time of application. Results of this examination may require the completion of background courses.

Written and Oral Qualifying Examinations

At the end of the student's second quarter in residence, a preliminary oral examination is administered by a representative committee of the faculty. The committee specifies the area of review, tests background preparation and progress to date, and determines general fitness to continue in the doctoral program. After completing all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, the student is required to pass a
written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the commit-tee, the student may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year fol-lowing the quarter in which it was first taken. After the written examination is passed, a doc-toral committee is formed to administer the University Oral Qualifying Examination. The student is advanced to candidacy only on suc-cessful completion of this examination.

Theater

Lower Division Courses

11. Contemporary Theater Issues. Lecture, three hours. Investigation of theater in contemporary Amer-i can culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and readings from contemporary plays.

12. Introduction to Performance. Lecture, two hours; studio, four hours. Investigation of phenome-non of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills.

13. Play Reading and Analysis. Lecture, three hours. Provides a base for subsequent study in the-ater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater’s subdivisions, including acting, direct-ing, design, playwriting, and critical study.

14A-14B-14C. Introduction to Design. Lecture, three hours; studio, six hours. Exploration of visual in-terpretation of drama. Study of styles and techniques of design, collaborative role of the designer, princi-ples of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study.

15. Introduction to Directing. Lecture, two hours; studio, four hours. Prerequisite: course 11. Investigation of role of the director in theatrical production and the-ories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production.

28A-28F. Acting, Voice, and Movement Work-shops I (2 units each). Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

50. Theater Production and Performance (2 units). Studio, six hours. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, or member of a crew. May be repeated for a maximum of eight units.

Upper Division Courses

101A-101B-101C. History of World Theater and Drama. Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of the-a-ter as a social institution. 101A. Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collec-tive ritual, Greek festival drama, and clodder drama of different cultures. 101B. Rise of Secular Drama. Study of Renaissance, Revolution, and drama in Europe, Asia, Africa, and the New World. 101C. Emergence of Realism and 20th-Century Re-sponses. Study of realism and subsequent depar-tures from realism in theater and drama.

102A. Theater of Japan. Lecture, three hours. Ex-ploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Ka-buki performance traditions.

102B. Theater of Southeast Asia. Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society.

102C. Cross-Cultural Currents in Theater. Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historic materials and dramatic texts to investigate cultural, aesthetic, ethical, and social im-plications of borrowing from other cultures.

102E. Theater of Non-European World. Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of tradi-tional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Af-rica. Analogous forms from European theater in cluded for comparative purposes.

103A. African American Theater History: Slav-ery to Mid-1800s. (Same as Afro-American Studies M103A.) Lecture, three hours. Prerequisite: upper di-vision standing. Exploration of events of history and literature of theater as developed and per-formed by African American artists in America from slavery to the mid-1800s.

103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (Same as Afro-American Studies M103B.) Lecture, three hours. Prerequisite: upper division standing. Exploration of events of history and literature of theater as developed and per-formed by African American artists in America from the minstrel stage to the rise of the American musical.

103C. Origins and Evolution of Chicano Theater. (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano the-a-ter from its beginning in legends and rituals of an-cient Mexico to work of Luis Valdez (late 1960s).

103D. Contemporary Chicano Theater: Begin-ning of Chicano Theater Movement. (Same as Chi-cana and Chicano Studies M103D and World Arts and Cultures/M103J.) Analysis and discussion of his-torical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

103E. African American Theater History: The Depression to the Present. (Same as Afro-Amer-i-can Studies M103E.) Lecture, three hours. Prerequi-site: upper division standing. Exploration of events of history and literature of theater as devel-oped and performed by African American artists in America from the Depression to the present.

103F. Native American Theater. Prerequisite: con-sent of instructor. Study of American Indian theater as an evolving art form.

M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (Same as Chicana and Chicano Studies M103H and World Arts and Cultures/M103H.) Prerequisite: course M103D. Examination and dis-cussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

104A-104B-104C. History of American Theater. Lecture, three hours. Study of history of influence of dif-ferent cultures, traditions, and technologies on develop-ment of theater as a social institution in America. 104A. Revolutionary War to Civil War; 104B. Civil War to WWI; 104C. WWI to the Present.

105. Main Currents in Theater. Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modernist and postmodernist plays and the dramatic arts.

107. Drama of Diversity. Lecture, three hours. Inves-tigation of diversity in American society as manifested in dramatic works and theatrical presentations.

108. Special Topics in History and Criticism. Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dra-matic works and theatrical presentations.

111A. Selected Topics on History of European The-ater from Primitive Times to 1640. Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Greeks to 1640. May be repeated twice for credit.

111B. Selected Topics on History of European Theater from 1640 to 1900. Lecture, three hours. Inves-tigation in depth of a selected area of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

111C. Selected Topics on History of European The-a-ter from 1900 to the Present. Lecture, three hours. Investigation in depth of a selected area of study in theater history from the baroque to the present. May be repeated twice for credit.

115A-115B-115C. Acting, Voice, and Movement I (6 units, 6 units, 5 units). (Formerly numbered 21A-21B, 115.) Studio, 14 to 17 hours. Prerequisite: con-sent of instructor. Study of beginning acting tech-nique: improvisation, games, and scene memory with examination of action and objective exercises, outline of Stanislavsky system, and development of voice and movement skills.

116A-116B-116C. Acting, Voice, and Movement II (6 units, 6 units, 5 units). Studio, 14 to 17 hours. Prerequisite: consent of instructor. Development of acting skills through scene study, use of self, and per-sonalization. Examination of characterization exer-cises and their application to contemporary American scenes. Development of speech, voice, and move-ment skills.

118A. Creative Dramatics. Lecture/lab. Stud-ies of principles and procedures of improvisational ap-proach to drama as done with children from nursery school to junior high.

118B. Advanced Creative Dramatics (2 to 4 units). Lecture, four hours; other, to be arranged. Prerequi-site: consent of instructor. Practical application of cre-a-tive drama process. Exploration of interrelationships of the arts to traditional disciplines of learning. May be repeated once for credit.

118C. Interactive Theater. Laboratory. Active, prob-lem-solving process of theater exercises and games designed to examine racial stereotypes, sexual ra-ces, gender, disease, drug addiction, and other issues that divide members of the campus community, as well as issues which divide the campus from the Los Angeles community. Selected to increase social and political awareness of problems and ideas fundamental to in-tellectual development, exercises and games nurture skills and attitudes useful in facilitating discussions between actors and audience participants. Use of techniques of sensory awareness, movement, panto-mime, improvisation, and characterization.
119A. Theater for the Child Audience: Theory and Criticism. Lecture/laboratory. Principles of produc-
tion and performance for the child audience.

119B. Theater for the Child Audience: Perform-
ance. Lecture, two hours; laboratory, four hours. Prereq-
quisites: audition and consent of instructor prior to 
first class meeting. Designed to provide opportunity for 
students to work together as an ensemble, creating 
through improvisation a theater presentation for a 
young audience. Emphasis on testing theoretical 
concepts through ensemble work, rehearsal, pretest-
ing, and evaluation of an original production for possi-
bile presentation outside the classroom.

120A-120B. Acting for Camera (2 units each). 
Studio, six hours. Prerequisite: consent of instructor. De-
velopment of performance techniques for camera and 
interpretation of comedy and drama for television, 
film, and emerging technologies. Study and practice in 
single- and multiple-camera productions.

121. Acting Workshop (2 units). Laboratory, to be ar-
 ranged. Prerequisites: course 20, consent of instructor. Courses 160, 163A, 163B, and 163C may be taken 
concurrently. Workshop which provides students with 
opportunity to rehearse, perform, and criticize scenes. 
May be repeated once for credit.

122. Makeup for the Stage (2 units). Prerequisite: 
consent of instructor. Art of makeup and its relation to 
the production as a whole. History, aesthetics, materi-
als, and procedures of makeup.

123. Intermediate Acting for the Stage. Lecture/lab-
oratory, with assignments. Prerequisites: course 20, consent of instructor. Study and practice of art of acting through perfecting of 
and application of those techniques to act-
ing problems.

124A. Advanced Voice (2 units). Studio/laboratory, 
three to four hours. Prerequisites: courses 126A-126B-
126C. Development of voice techniques for the stage, 
including work in relaxation, limbering, breathing, artic-
ulators, and resonators.

124B. Advanced Speech (2 units). Studio/labora-
ory, three to four hours. Prerequisite: course 124A. De-
signed to acquaint students with International 
Phonetic Alphabet and its uses and to exercise stu-
dents’ skills in pronunciation, enunciation, and devel-
one of diction versatility.

125A. Advanced Movement (2 units). Studio/labora-
ory, three hours. Physical awareness for the actor, con-
centrating on warming up the body, relaxation, control, 
stairs, and stage movement.

125B. Advanced Movement and Combat (2 units). Studio/laboratory, three to four hours. Prerequisite: 
course 125A. Advanced and contemporary approach to 
classical and modern movement for the stage ac-
tor.

126A-126B-126C. Acting, Voice, Movement III. 
Studio, nine hours. Prerequisites: courses 21A-21B. 
Study of characterization, including introduction to 
Shakespeare. Approach to verse, scansion, use of 
embolism in classic texts. Personalization within 
heightened reality. Further work in voice, speech, and 
movement.

127A-127B-127C. Advanced Acting (2 units each). 
Studio, six hours. Prerequisites: courses 126A-126B-
126C. Comedy workshop, stand-up comedy, perfor-
mal art pieces. Audition and cold reading work-
shop. Solving individual acting projects.

130A. Beginning Playwriting. Lecture, three hours; 
discussion, one hour. Prerequisite: consent of in-
structor. Required of theater majors. Designed to 
stimulate students’ creative faculties through prepara-
tion and completion of a one-act play. Students’ criti-
cal faculties stimulated by key analysis and scene exercises in discussion section.

130B. Fundamentals of Playwriting II. Lecture, 
three hours plus conference. Prerequisites: course 130A, consent of instructor. Study in original material for 
theater playwriting. Development. De-
signed to give further insight into critical and creating 
poetics and the techniques of short and full-length plays and guidance in 
completing one of a one-act and full-length plays. May be 
repeated twice for credit.

130C. Writing for American Musical Theater. 
Lecture/laboratory, three hours. Prerequisite: consent of instructor. Study of practice and techniques used in 
writing a libretto for musical theater: opening num-
ers, romance, subplots, and comedy. May be 
repeated once for credit.

132. Manuscript Evaluation for Theater. Lecture, 
three hours. Prerequisites: course 130A, consent of instruc-
tor. Principles and practices in evaluation of man-
uscripts for theater. May be repeated once for credit.

C133A-C133B-C133C. Script Development Work-
shops. Laboratory, three hours. Prerequisite for play-
wrights and directors: consent of instructor. Guided 
preparation of a script for production, focusing on 
Collaborative process between playwright and direc-
tor, scene work, staged readings, casting, rehearsal, 
and production. Emphasis on communication, artistic growth, and professional process. Course C133A 
may be repeated once for credit. Concurrently sched-
uled with courses C433A-C433B-C433C.

136. Advanced Acting for the Stage. Lecture/lab-
oratory. Prerequisites: course 122, consent of instruc-
tor. Study of complex problems in voice, movement, and 
acting through a progression to more advanced acting problems. May be 
repeated twice for credit. Consecutive enrollment 
with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 
12 units.

137A-137B-137C. Continuum Study in Acting for 
the Stage. Studio, six hours. Prerequisite: course 123. 
Technique of characterization and performance in ad-
vanced and complex acting styles. May be repeated 
one for credit.

138. Special Problems in Performance Techniques. 
Lecture/laboratory. Prerequisite: consent of instruc-
tor. Study of complex problems in voice, movement, and 
acting. May be repeated twice for credit.

140A. Scenic Techniques for the Stage. Lecture, 
three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Intensive study of stage 
scenery techniques—tools, hardware, and ma-
terials; and their relationship to the art of theatrical 
scenic design through analysis of scenic design his-
tory, overall production concepts, and design styles.

141A. Lighting Techniques for the Stage. Lecture, 
three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. 
Intensive study of theater lighting, with emphasis on 
relationship of lighting instruments and control equip-
ment to lighting design. Courses 141A, 140A, and 
142A may be taken in any sequence, but not concur-
rently.

142B. Advanced Costuming for the Stage. Lecture, 
three hours; laboratory, four hours. Prerequisites: course 142A, consent of instructor. Special problems in 
providing costumes for the theater. Study of equipment and techniques utilized in recording and 
reproduction of sound for the theater.

143. Costume Design for the Theater. Lecture/la-
boratory. Prerequisite: consent of instructor. Design of 
costumes for theatrical presentations. Study of use of 
silhouette, fabrics, color, and decoration as related to 
theatrical characterizations. May be repeated once 
for credit.

147A. Drafting (2 units). Studio, four hours. Devel-
opment of visual communication skills through draft-
ing. Exploration of drafting for scenic and lighting designs. May be repeated once for credit.

147B. Rendering (2 units). Studio, four hours. Intro-
duction to the concept and practice of rendering for 
scenic, costume, and lighting de-
sign for theater, film, and television. May be repeated 
one for credit.

148. Special Courses in Design and Technical Theater. Lecture, three hours; consent of 
instructor. Group study of selected subjects in de-
sign and technical theater. May be repeated twice for 
credit.

150. Theater Production and Performance (2 
units). Studio, six hours. Prerequisite: course 50. 
Laboratory experience in various aspects of theater 
production, including performance in a project or pro-
duction, stage management, member of a crew, or 
assignment as a designer or assistant on a produc-
tion. May be repeated for a maximum of eight units.

151A-151B. Scenic Design. Lecture/studio. Prereq-
usites: courses 14A-14B-14C. Introduction to princi-
plies of design and practice of the design of scenery for 
theater, film, and television. Emphasis on skill in 
design, text analysis, metaphor, and conceptual-
ization. Investigation of design research process, com-
position, and style leading to visual presentation of the 
design.

151C. Production Design for Film and TVei-

tion. Lecture/studio. Prerequisite: consent of instruc-
tor. Study of role of art director. Production design for 
single- and multiple-camera production and set deco-
ration. Concurrently scheduled with course C451C.

152A-152B. Lighting Design. Lecture/studio. Prereq-
usites: courses 14A-14B-14C. Investigation of principles and techniques of lighting design for the-
etter and television. Study of lighting, with emphasis on 
imagination, text analysis, metaphor, and concep-
tualization. Investigation of composition and control of 
light and color in relation to the actor.

152C. Lighting Design for Television. Lecture/ 
studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in 
television for single- and multiple-camera production. 
Concurrently scheduled with course C452C.

153A-153B. Costume Design. Lecture/studio. Pre-
requisites: courses 14A-14B-14C. Formerly number-
ed 142A.) Imagination as impetus for design, text 
analysis, metaphor, and conceptualization. In-
vestigation of design research process and character 
analysis leading to visual presentation of the design.

153B. Study of costume design for period produc-
tions, development of conceptual designs, and cos-
tume design for music theater.

153C. Costume Design for Film and Television. 
Lecture/studio. Prerequisites: courses 14A-14B-14C. 
Study of current professional costume design and 
wardrobe practices in film and television, including ef-
fact of different media and genres. Concurrently 
scheduled with course C453C.
154A-154B. Sound Design. Lecture/studio. Prerequisites: courses 14A-14B-14C. 154A. Study of recording, mixing, and playback of sound effects, voice, and music in the theater. 154B. Introduction to use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for sound. Concurrently scheduled with course C454C.

154C. Sound for Film and Television. Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, re-recording, mixing, and synchronous processes for film and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C456A.

154B. Lighting Design Technology. Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design for theater, film, and television. Performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C454B.

159. Design Portfolio Project. Lecture/studio. Prerequisites: courses 14A-14B-14C. Preparation of comprehensive design projects, including all aspects of design, from concept generation to final presentation of the design. Projects prepared under guidance of a faculty adviser.

160. Fundamentals of Play Direction (5 units). Lecture (two to four hours); studio (two hours). Prerequisite: consent of instructor. Required of theater majors. Course 121 may be taken concurrently. Basic theories of play direction and their application through preparation of plays for public performance.

161A-161B-161C. Directing for the Stage. (Formerly numbered 161A, 161B, 161C.) Lecture/studio. Prerequisite: course 15, consent of instructor.

163A. Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions. Concurrently scheduled with course C458B.

163B. Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director/actor communication. Students direct scenes under laboratory conditions in alternative stage configurations.

163C. Concluding project for directorial study. Prerequisites: courses 163A-163B-163C, consent of instructor. Completion of course 163C satisfies course 180 requirement. Application of stage-directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C458D.

171A. Advanced Theater Laboratory (1 to 4 units). Hours to be arranged. Prerequisite: consent of instructor. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of four units.

171B. Advanced Theater Laboratory (1 to 4 units). Hours to be arranged. Prerequisite: consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

172. Technical Theater Laboratory (2 units). Hours to be arranged. Prerequisite: consent of instructor. Required of theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of eight units, but no assignment may exceed 16 units. Concurrently scheduled with courses C272 and C472.

173A. Design Assignment: Assistant Designer (2 units). Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

173B. Production Design Assignment: Designer (2 units). Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

174A. Stage Management Techniques (2 units). Studio, six hours. Prerequisites: courses 14A-14B-14C. Professional duties of stage manager. Problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run. May be repeated once for credit.

174C. Project in Stage Management. Studio, 12 hours. Prerequisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as an assistant stage manager in preproduction, rehearsal, and performance phases of a production. May be repeated once for credit.

180. Senior Project. Lecture/studio, three hours. Prerequisites: courses 101A-101B-101C. Preparation of a conceptual or creative project to provide a culminating experience in the production of a creative or research work.

C190A. Role of Producer in Professional Theater (2 units). Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C294A.

C190B. Role of Management in Educational and Community Theater (2 units). Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C294B.

191. The Touring Company (2 to 12 units). Lecture, 20 hours; laboratory, 22 hours. Prerequisite: consent of instructor. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

192. Motion Picture, Television, and Theater Internship (2 to 8 units). Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to senior Department of Theater majors. Internship at various studios or theaters, with part-time compensation or full-time participation. Prerequisites: three hours. Requires the study of dramatic and theatrical arts. May be taken for a maximum of eight units.

199. Special Studies in Theater Arts (2 to 8 units). Hours to be arranged. Prerequisite: senior standing. 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

202A. Seminar: Western Classical Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Examination of theatrical production and dramatic form in the Greek and Roman worlds. May be repeated for credit.

202B. Seminar: Medieval Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.
202C. Seminar: Renaissance and Baroque Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar: Bourgeois and Romantic Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar: Modern Consciousness in Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of prototypes of modern experience as encountered in the work of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar: Modern Realism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theater’s response to science and technology, politics, and revolution. May be repeated twice for credit.

202G. Seminar: Modern Theatricalism. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

202M. Seminar: American Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

202P. Seminar: Traditions of African Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of traditional theater forms (such as the Yoruba, Ashanti, and Ibibio traditions) and of the impact of Western arts and thought on Africa. May be repeated twice for credit.

202R. Seminar: East Asian Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical analyses. May be repeated twice for credit.

202S. Seminar: South Asian Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of traditional theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical analyses. May be repeated twice for credit.

207A. Seminar: Renaissance and Baroque Theater. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in history of theater and drama, production, and architecture. May be repeated four times for credit.

216A. Critical and Historical Methods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in critical theories of theatrical form and structure. May be repeated twice for credit.

216B. Critical Methods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for theater. May be repeated twice for credit.

216C. Critical Methods. Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in contemporary theories of dramatic form and structure. May be repeated twice for credit.

216D. Seminar: Bourgeois and Romantic Theater. Lecture, three hours; studio, two hours. Prerequisites: graduate standing, consent of instructor. Examination of interest in selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

220. Graduate Forum (1 unit). Seminar, two hours bimonthly or five times per term. Prerequisite: graduate standing in theater. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. 5U grading.

CM229. Contemporary Topics in Theater, Film, and Television (2 units). (Same as Film and Television CM229.) Lecture, two hours; screenings, two hours. Prerequisites: graduate standing, consent of instructor. Examination of selected topics in film and television, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

230A-230B-230C. Writing for the Contemporary Theater (4 units each). Lecture, three hours; studio, two hours. Prerequisites: graduate standing, consent of instructor. Development of skills in writing for contemporary theater. May be repeated twice for credit.

232. Manuscript Analysis. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

241. Research in Technical Theater. Prerequisites: graduate standing, consent of instructor. Research in technical processes and equipment in theater.

242A. History of Architecture. Lecture, four hours. Prerequisites: graduate standing, consent of instructor. In-depth study of history of costume, architecture, interiors, furnishings, and their relationships to early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

242B-242C. History of Costume and Stage Ornamentation. Prerequisites: graduate standing, consent of instructor. In-depth study of history of costume, architecture, interiors, furnishings, and their relationships to early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

244A. Advanced Theater Laboratory (2 or 4 units). Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

244B. Advanced Theater Laboratory (2 or 4 units). Laboratory to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

245A. Production Management. Lecture, three hours. Prerequisite: consent of instructor. Study in production management for the theater. Examination of professional duties of production manager, including preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment.

245B. Production Management. Lecture, three hours. Prerequisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment.

245C. Projects in Production Management. Studio/laboratory. Prerequisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting.

246A-246B-246C. History of Costume. Lecture/studio. Prerequisite: graduate standing. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures.

247. Collaborative Project in Design and Production (3 to 4 units). Studio, four hours. Prerequisites: graduate standing, consent of instructor. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

248A-248B-248C. History of Style and Ornamentation. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of set design. 248A. History of Style. Lecture, four hours; studio, two hours. Prerequisites: consent of instructor. Study in design, planning, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

250. Directing I. Lecture, four hours; studio, 24 hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of set design. 250A. History of Style. Lecture, four hours; studio, 24 hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of set design. 250B. Directing I. Lecture, four hours; studio, 24 hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of set design.
263. Production Project in Direction for the Stage (2 to 6 units). Discussion, one hour; studio, 12 to 24 hours. Prerequisites: standing as an instructor. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

C263D. Directing Project for the Stage. Lecture, four hours; studio, 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

265. Modern Theories of Production. Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theatrical event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and the arts. May be repeated for a total of no more than 12 units.

266. Theatrical Conceptualization. Examination of process of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic texts. Exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspects of theatrical production.

C272. Production and Performance Laboratory (2 units). Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Credits cannot be applied to production requirements of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses C172 and C472.

290A. Role of Management in Artistic Decision Making in the Theater. Prerequisite: consent of instructor. Analysis of social, artistic, and economic roles of the arts as reflected in programing policies in the theater. Examination of social goals pursued in establishing relationships between the arts and their environment.

C294A. Artistic Control of Theatrical Production by Professional Producer (2 units). Prerequisites: graduate standing, consent of instructor. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C190A. Additional research and writing required of graduate students.

C294B. Organization and Operation of Community Theater (2 units). Prerequisites: graduate standing, consent of instructor. Study of artistic, social, and economic criteria in administration of educational and community theater, with research in history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

C298A-298B. Special Studies in Theater Arts (2 to 4 units each). Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in theater arts, organized on topic basis. May be repeated for credit.

375. Teaching Apprentice Practicum (1 to 4 units). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

420A-420B-420C. Advanced Acting I (4 to 8 units, 4 units, 4 units). Studio, six to 18 hours. Prerequisites: development of an internal technique, beginning with an analysis of one’s personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene.

420B. Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and work the character being played.

420C. Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal; use of action and objective with the external.

421A-421B-421C. Advanced Acting II (4 or 8 units each). Studio/laboratory, six to 18 hours. Prerequisites: development of a line, rhythm, timing, and public cabaret. Emphasis on communication, artistic growth, and professional progress. Course C433A may be repeated once for credit. Concurrently scheduled with courses C133A-C153A-C153B.

435AF-435AW-435AS. Problems in Advanced Writing for the Stage (0 units, 0 units, 2 units). Prerequisites: consent of instructor. Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of six units. In Progress and S/U grading.

441A-441B-441C. Lighting Design. Lecture/studio. Prerequisite: consent of instructor.

441A. Study and practice in lighting the actor, emphasis on visual and character analysis from lighting designer’s perspective, conceptual development with the director, emphasis on light and staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit.

441B. Study of use of light on color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multisicnic productions, lighting patterns, and moving scenery. May be repeated once for credit.

441C. Investigation of lighting design in production, musical theater, opera, touring, and repertory situations. Study of analysis of script and color for lighting designer. May be repeated once for credit.

441D. Scenic Projection and Media Techniques. Lecture/laboratory. Prerequisites: consent of instructor. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.

442A-442B-442C. Costume Design. Lecture/studio. Prerequisites: consent of instructor. Advanced study and practice in costume design for theater. Imaginative presentation of design, use of metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit.

443. Problems in Design (2 or 4 units). Lecture/laboratory, four hours (additional hours as required). Prerequisite: course 410A. May be repeated once for credit.

444A-444B-444C. Sound Design. Lecture/studio. Prerequisite: consent of instructor.

444A. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for theater sound design. May be repeated once for credit.

444B. Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of design, and execution of recording techniques to realize the design. May be repeated once for credit.
C44C. Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of mixes and sound reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit.

C451C. Production Design for Film and Television. Lecture/studio. Prerequisite: consent of instructor. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C151C.

C452C. Lighting Design for Television. Lecture/studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C152C.

C453C. Costume Design for Film and Television. Lecture/studio. Prerequisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effects of lighting and set design on design choices. Concurrently scheduled with course C153C.

C454C. Sound for Film and Television. Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, re-recording, mixing, and post-production sound for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill. Concurrently scheduled with courses C155A-C155G.

C455A-C455G. Graphic Representation of Design (2 units each). Studio, four hours. Prerequisite: course 147A or 147B. Concurrently scheduled with courses C155A-C155G.

C455A. Perspective Drawing. Introduction to the use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form, light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.

C455B. Watercolor Rendering. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabric, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.

C455C. Marker Rendering. Study and practice of marker rendering techniques as a means of communicating scenic and costume designs.

C455D. Model Making. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill.

C455E. Life Drawing. Study and practice in drawing of human form.

C455F. Costume Rendering. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics.

C455G. Scene Painting Techniques. Study of scenic painting techniques and materials and their utilization of color design and elevations. May be repeated once for credit.

C456A. Introduction to Computer-Assisted Drafting (2 units). Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C156A.

C456B. Introduction to Computer-Assisted Design (2 units). Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including creation of scenic and costume libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C156B.

C456C. Introduction to Computer-Assisted Rendering (2 units). Studio, four hours. Prerequisite: course 147A or 147B. Study of computer design for theater and television investigations for three-dimensional computer drawing; wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C156C.

C458A. Scene Design Technology. Lecture/studio. Prerequisites: consent of instructor. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C158A.

C459A-459B. Directing for Theater, Film, and Television. Lecture, three hours. Prerequisite: consent of instructor. Limited to graduate students in Department of Theater. Analysis and exploration, with specific emphasis on the role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of four units.

460B-460C. Problems in Advanced Direction for the Stage. Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Discussion and critique of work in progress. 460B. Preparation and presentation of a published play under rehearsal conditions. 460C. Preparation and presentation of a full-length original play under rehearsal conditions.

462. Production Project in Direction for the Stage (4 or 8 units). Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress.

463. Production Project in Direction for the Stage (8 or 12 units). Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a play under fully produced theater conditions.

467. Production and Performance Laboratory (2 to 8 units). Laboratory, to be arranged. Prerequisite: M.F.A. candidate, consent of instructor. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172A and C172B.

474. Problems in Theater Design (2 or 4 units). Discussion, three hours; laboratory, 12 hours to be arranged. Prerequisites: graduate standing, consent of instructor. Study and practice in preparation and performance of dramatic works for public performance as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or costume designer. May be repeated for a maximum of 16 units.

495A. Practicum in Teaching Theater. Lecture/lab, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of and practice in teaching theater at college and university level.

495B. Practicum in Theater Production (2 or 4 units). Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Demonstration of competence in theater production through successful completion of a major production and assignment. May be repeated for a maximum of 12 units.

496. Practice of Teaching Theater (2 units). Discussion. Required once of all teaching assistants or associates in department. Open to graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

498. Professional Internship in Theater, Film, and Television (4, 8, or 12 units). Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC, S/U grading.

596A. Directed Individual Studies: Research (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596B. Directed Individual Studies: Writing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production (2 to 12 units). Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Theater Arts (2 to 8 units). May be repeated for a maximum of 12 units.

598. M.A. Thesis in Theater Arts (2 to 8 units). Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

599. Ph.D. Dissertation in Theater Arts (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.
Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, an M.D. in the School of Medicine, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. A number of student organizations provide an interesting program of extracurricular activities.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

Master’s Degrees

The Department of Urban Planning offers the Master of Arts degree in Urban Planning and participates in concurrent degree programs.

Master of Arts

Admission

The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date. Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the Department of Urban Planning, School of Public Policy and Social Research, 3250 Public Policy Building, 90024-1656.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are also encouraged to submit Graduate Record Examination (GRE) scores especially if they are applying for fellowships. The Test of English as a Foreign Language (TOEFL) is required for those whose native language is not English, unless at least two years of university-level coursework at an English-language institution has been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. For master’s applicants, work samples such as reports, research papers, and slides are optional. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Concurrent Degrees

J.D./M.A. Urban Planning

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for those planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

In order to be considered for the concurrent degree program, applicants must apply and be admitted to both the School of Law and the Department of Urban Planning. During the first year, students follow the required law curriculum and must attain at least a 70 average to continue in the concurrent degree program. The second year is spent in the urban planning program, taking 36 units toward the M.A. degree. During the third and fourth years, students take 36 additional quarter units to complete the planning degree and the necessary coursework to complete the law degree. Of the 72 quarter units toward planning, three courses must be taken from the multiple-listed courses offered by both law and planning (Law M285, M286, M287, M290, and M526) which may be applied toward both the J.D. and the M.A. degrees. Students may also petition to substitute other policy-oriented law courses for one or more of the multiple-listed courses.
Students who decide not to complete either the J.D. or M.A. must complete all the regular requirements for the program they wish to pursue.

For additional information, contact the graduate adviser in the Department of Urban Planning.

M.A./M.A. Urban Planning

The M.A./M.A. program is a three-year concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Department of Urban Planning. The program is designed for individuals who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students interested in the M.B.A./M.A. program should contact the M.B.A. Program Office, Anderson Graduate School of Management, regarding admission requirements and application procedures.

A total of 36 courses (144 units) is required: from 18 to 24 courses in the Anderson Graduate School of Management and from 12 to 18 courses in the Department of Urban Planning. All core and concentration requirements for each program must be met, but where the two programs’ core courses are substantially the same, students may choose from either program's offerings. A maximum of six courses count toward unit requirements for both degrees. Students complete all first-year M.B.A. requirements during the first year of residence; the second and third years of study are divided between both programs.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

M.A. Latin American Studies/M.A. Urban Planning

The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Applicants apply through the Department of Urban Planning. Graduate Record Examinations (GRE) scores are required.

A total of 25 courses (100 units) is required for the concurrent degree program: eighteen courses for the M.A. in Urban Planning and nine courses for the M.A. in Latin American Studies. Two courses, selected from a list of urban planning courses approved by the Latin American Studies Program, may be applied toward both degrees. All requirements for each program must be met, and the degrees may be awarded simultaneously.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

Areas of Study

Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

Regional and International Development. This concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economics.

Social Policy and Analysis. The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

Environmental Analysis and Policy. The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.

The Built Environment. This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, students can choose one of two specializations: community planning and development or physical development and public policy.

Additional Areas of Concentration. In special circumstances, students may devise their own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the department chair. Further details may be obtained from the graduate adviser.

Course Requirements

Students must complete a minimum of 72 units (18 courses). Students usually take 12 units per quarter, completing the program in two years.

A minimum of 13 courses must be graduate courses (all 200-series courses except for up to four courses or 16 units of 500-series courses) in urban planning or a related field. Two courses or eight units of course 496 may be applied as electives.

Core Course Requirements. The core areas comprise knowledge common to all areas of planning, regardless of one’s specific focus. Seven core courses are required: Urban Planning 220A (Quantitative Analysis in Urban Planning I) waiver by examination, 220B (Quantitative Analysis in Urban Planning II), 207 (Public Resource Allocation), 222 (History and Theory of Planning), two courses on urbanization covering urban problems and processes chosen from a menu of options, and 211 (Law and the Quality of Urban Life) or a course from the School of Law may be substituted. Urban Planning courses 207, 220A, and 222, which are offered in the Fall Quarter, include required workshops on writing, verbal and graphic presentation.

Upon entering the program, students must pass proficiency examinations in basic mathematics and microeconomics before enrolling in Urban Planning 220A and 207 respectively. Copies of sample examinations are mailed to applicants accepted into the program. An undergraduate course in college algebra or pre-calculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination. Students are strongly encouraged to prepare for the examinations before beginning the program so that they can take Urban Planning 207 and 220A during their first year of study. If students do not pass either or both examinations, they are advised to take Mathematics A or 1 and/or Economics 1, 11, or 100 at UCLA during their first year of study. (These courses do not count toward the master's degree.) Proficiency examinations need to be passed at the start of the second year in order to enroll in required courses 220A and/or 207, which are only offered in the Fall Quarter.

Area Course Requirement. Students must choose an area of concentration and select at least five courses, two of which are generally specified, from a list of courses prepared for that area. One of the required core courses on urbanization may be used to fulfill an area of concentration requirement.
Students may seek waivers for requirements that have been met through coursework prior to entering the M.A. program.

Comprehensive Examination Plan
A student must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

Plan A (Client-Oriented Project). A client-oriented project is recommended if students are more interested in practical application of what they have learned than in scholarly research. The time span of the final project approximates that of the thesis. Academic credit for project involvement is given through required course 205 (Research Seminar for Client Project), and through course 597 for faculty supervised independent research. Guidance of the project rests with a committee of at least one faculty advisor, a project consultant, and a representative of the client. The project proposal should be ready for committee review by the end of the seventh week of Fall Quarter of the second year of study. The project must be successfully completed when it is approved by the faculty committee and delivered to the client.

As an alternative under Plan A, students may take Urban Planning 217A-217B (group comprehensive project sequence), for eight units of credit, offered each year during the Winter and Spring quarters to fulfill the comprehensive examination requirement. The faculty members in charge of this course sequence, one supervising, one consulting, plus a representative of the client, must accept responsibility for the comprehensive examination committee. Students must notify the graduate counselor that they have selected this option and (in the event that more than one section is offered) they must indicate in which section of Urban Planning 217A-217B they will enroll, by the end of the Fall Quarter of the second year of study.

Plan B (Two-Week Examination). Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. Each area-of-concentration faculty coordinator appoints a committee of three faculty members to cover this examination. Students may be requested to do additional work on the examination after it has been reviewed by the committee. No course credit is received for the two-week examination. Students who choose this option must notify the graduate counselor by the end of the second week of classes. The thesis committee consists of three members to be selected by the end of Fall Quarter of the second year. Students enrolled in required course Urban Planning 205 (Research Seminar for Master’s Thesis) for four units of academic credit for thesis preparation, and for four units of course 598 for faculty supervised independent research.

The thesis project (598) must receive a grade of S to be of passing quality.

Doctoral Degree
Admission
The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date. Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the department.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are required to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for those whose native language is not English, unless at least two years of university-level coursework at an English-language institution has been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considereed for admission. Work samples, preferably research papers and/or a copy of the master’s thesis, are required of doctoral applicants. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Students admitted to the Ph.D. program in Urban Planning must have a master’s degree in planning or a closely related field. Students in the M.A. degree program in Urban Planning at UCLA should inform the graduate adviser before December 15 of their second year if they wish to be considered for the Ph.D. program for the following Fall Quarter.

A minimum grade-point average of 3.5 is required in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Applicants are required to submit two statements of purpose. The first should address how past experiences have shaped the applicant’s interest in planning, the applicant’s personal career plans, and how a Ph.D. in planning will contribute to those plans. The second statement should describe the applicant’s intended area of concentration, specific areas of interest in planning, including research interests and current plans for the dissertation.

Before acceptance into the program, two faculty members must agree to assume responsibility for guiding students in their studies.

Major Fields or Subdisciplines
Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

Regional and International Development. This concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economics.

Social Policy and Analysis. The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

Environmental Analysis and Policy. The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.
Course Requirements
A high level of competence in an area of concentration and in planning theory and history, as measured by coursework and doctoral examinations, is required. In addition, a student must satisfy a requirement in research methods outside of coursework and is required to take Urban Planning 208 to aid in the preparation of dissertation research and writing.

Planning Theory and History Requirement. Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge is to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice. Students are expected to acquire an understanding of both and become familiar with the several styles and forms of planning and the major debates in the field.

Two advanced courses are required of all doctoral students during the first year and must be passed with grades of A – or better: Urban Planning 210B and an advanced seminar (Urban Planning 210C). Students may waive the two courses by taking a six-hour comprehensive written examination. Students who do not pass the examination must either take the courses the next time they are offered or repeat the examination (once only) after a period of no less than six months.

Students who receive less than an A – in the courses may either repeat the courses once in the following year or sit for a waiver examination once in the failed subjects (history in the case of course 210B; theory in the case of 210C).

Area of Concentration. The area of concentration is defined as a subject in which a student is prepared to teach two or three courses and conduct advanced research. The area should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic. To prepare for an individualized area of concentration examination which tests competence in an area of planned study, students must submit for approval a plan of study to their advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Winter Quarter of the first year. The plan must include (1) a short description of the area selected for study; (2) an indication of their major focus of research; (3) a short bibliography; and (4) a list of suggested courses and research papers through which they propose to prepare for the area examination. The list of courses must include a minimum of three from outside the department and three methods courses (see Research Methods Requirement). Once approved, the plan is filed with the graduate adviser. The normal time for completion of the area of concentration requirement is two academic years. The actual timing for the examination is set by agreement between the student and the advisory committee. Students may submit revised plans when necessary after consultation with their advisers and the coordinator of doctoral studies.

Research Methods Requirement. To fulfill the research methods requirement, a student must complete a sequence of three methods courses beyond the introductory level with grades of B or better. All doctoral students must first demonstrate competence in statistical methods at the master’s level (Urban Planning 220B or equivalent) either by completing Urban Planning 220B with a grade of B+ or better or by submitting a waiver petition with appropriate documentation.

In addition, as part of their plan of study, all students must take a preapproved set of three advanced courses in research methods. These courses, which students should begin taking in the first year in the Ph.D. program, must be closely related to the area of concentration and must be completed with grades of B+ or better. A list of recommended courses is included in the Ph.D. handbook. Students may waive a portion of this requirement on the basis of prior work by submitting a petition with the appropriate documentation to their committee and the coordinator of graduate studies.

Written and Oral Qualifying Examinations
For details on the written qualifying examinations, see Planning Theory and History Requirement and Area of Concentration in the Course Requirements section above.

After successful completion of the planning theory and history, area of concentration, and research methods requirements, students may nominate their doctoral committee. The committee (see graduate adviser for details) consists of four members, three of whom may be chosen from the advisory committee and one of whom must come from outside of the department.

The doctoral committee administers the University Oral Qualifying Examination. At this examination the student defends the dissertation proposal. To assist in the development of the proposal, the student is required to complete Urban Planning 208.

The University Oral Qualifying Examination should be taken by the end of the third year of doctoral study.

Urban Planning
Lower Division Course
88. Lower Division Seminar: Special Topics in Urban Planning. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in urban planning approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

CM149. Transportation Geography. (Formerly numbered Architecture and Urban Planning M149.) (Same as Geography M149.) Prerequisite: consent of instructor. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transportation.

179. Variable Topics in Urban Planning (2 to 8 units). (Formerly numbered Architecture and Urban Planning 179.) Lecture, three hours. Variable topics course in selected subjects in social policy and public services, urban and regional development, natural environment and resources, and the built environment. May be repeated for credit.

C184. Looking at Los Angeles. Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C284.

C187. Planning and Designing Our Cities. (Formerly numbered Architecture and Urban Planning 187.) Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students' own projects create a framework for expanding understanding of urban planning and design process.

CM189. Environmentalism: Past, Present, and Future (4 to 6 units). (Formerly numbered Architecture and Urban Planning CM189.) (Same as Geography M115.) Discussion, three hours; optional field study five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in re-shaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course C285. P/NP or letter grading.
M190. Human Environment: Introduction to Archi-
tecture and Urban Planning. (Formerly numbered Archi-
tecture and Urban Design 180.) Lecture, three hours; 
outside study, nine hours. Kinds of problems that 
 arose in creating and maintaining an environment 
 for urban activities, and approaches and methods of 
 architecture and urban planning in helping to cope 
 with such problems. Complexities involved in giving 
 expression to human needs and desires in provision 
 of shelter, recreation, transportation, and limitations 
 and limitations of technology and building forms, and 
 to issues involved in relating the human-made to 
 the natural environment. Students encouraged to 
 comprehend major urban issues both as citizens and as 
 potential technical experts.

191. Urban Structure and Dynamics. Survey of urban 
 history and evolution in the U.S., urban social theory, 
current growth trends, system of cities, urban econ-
omic and economic restructuring, traditional and alter-
native location theories, urban transportation, and 
 residential location and segregation. P/NP or letter 
grading.

192. Urban Policy and Planning. Examination of cur-
rent urban issues and policy debates, such as 
normative theories of good urban form, met-
ropolitan organization and governance, economic de-
velopment and growth management, edge cities, 
spatial misallocation of poverty, racial 
ethnic inequality, gender and urban structure, sus-
tainability, and future of cities. P/NP or letter 
grading.

193. Special Topics in Urban Policy and Re-
search. Examination of a particular planning/policy 
subfield (e.g., economic development, environmental 
planning, housing and community development, in-
ternational planning and development, land use, or 
 urban design) in some depth. Specific topic areas 
 rotate depending on instructor. P/NP or letter 
grading.

197. Planning for Minority Communities. (Formerly 
numbered Architecture and Urban Planning 197.) 
Lecture, three hours. Introduction to inner-city policy 
 issues on three separate levels: (1) each student de-
velops a comprehensive inner-city urban program us-
ing materials from Alternatives Inner-City Future 
Exercise, (2) each student is expected to identify 
value assumptions and theories of social justice im-
plicit or explicit in alternative intervention programs, 
and (3) each student is expected to participate in class 
discussions that emphasize minority issues which 
 affect urban planning.

199. Special Studies (2 to 8 units). (Formerly num-
bered Architecture and Urban Planning 199.) Prereq-
usite: consent of instructor. Independent research or 
 investigation on a selected topic to be arranged with a 
faculty member. May be repeated for credit.

Graduate Courses

M202A. Public Control of Land Development (3 to 
6 units). (Formerly numbered Architecture and Urban 
Planning M202A.) (Same as Law M286.) Lecture, 
three hours. Analysis of legal and constitutional con-
straints on land-use planning and development; ad-
ministrative and environmental regulatory processes, 
 including relationship between law and planning, for-
mulating land-use legislation, zoning, subdivision 
 controls, eminent domain, taxation, urban develop-
ment, environmental law, and negotiation. Theory 
and doctrine applied to case studies; research project/ 
 paper and/or examination required.

M202B. Governance: State, Regional, and Local 
(3 to 6 units). (Formerly numbered Architecture and 
 Urban Planning M202B.) (Same as Law M285.) 
Lecture, three hours. Analysis of structure and function of 
 local, regional, and state government in historical and institution-
 al context; organization, finance, intergov-
 ernmental relations, role of judiciary, public services, 
lawmaking, citizen participation through initiatives 
 and referenda, and government tort liability.

M202C. Seminar: Urban Affairs (3 to 6 units). (For-
 mery numbered Architecture and Urban Planning M202C.) 
 (Same as Law M526.) Seminar, two hours; two 
 field trips. Critical examination of housing law and 
 policy, including current federal and state 
 housing subsidies; remedies of housing con-
sumers; impacts of market discrimination against 
 children, racial minorities, and women; and local gov-
ernmental laws influencing cost and supply, such as 
 antiprotection and rent control legislation. Catalytic 
 role of organizations, and community development in ex-
 pansion of housing supply also considered.

205. Seminar: Master's Thesis/Comprehensive Ex-
amination. (Formerly numbered Architecture and Ur-
ban Planning 205.) Discussion, three hours. De-
signs for second-year students in M.A. program. 
Preparation for student thesis research and client 
 projects. Through discussion of each other's work, 
 participants learn how to design and implement a re-
 search/consultant project. Administrative issues and com-
 mon implementation problems. S/U grading.

206A. Urban Data Analysis: Demographic Appli-
cations. (Formerly numbered Architecture and Ur-
ban Planning 206A.) Lecture, three hours; laboratory, 
one hour. Prerequisites: one-quarter-study statistics 
course, familiarity with one of the packaged 
 statistics programs. Development of basic demographic 
 methods of analysis in a policy context, providing 
 parallel development of computer tools and applica-
tions. Topics include data sources and errors, mortal-
 ity, fertility, age structure, and their effects on 
 planning policy.

206B. Urban Data Analysis: Planning Models. (For-
 merly numbered Architecture and Urban Planning 206B.) 
Lecture, three hours; laboratory, one hour. Pre-
 requisite: course 206A or equivalent. Advanced 
course in urban data analysis which builds on course 
 206A. Examination of relationship between demo-
 graphic and other socioeconomic processes, with em-
 phasis on planning models. Topics include internal 
 and international trade, transportation, dem-
 onstration, and economic activity forecasting.

207. Public Resource Allocation. (Formerly num-
bered Architecture and Urban Planning 207.) Lec-
ture, three hours. Prerequisite: passing score on 
 microeconomics examination given first day of class. 
 Practical use of economics in analyzing public re-
 source allocation problems. Topics include review of 
 marginal analysis, difference between equity and effi-
ciency, public good problem, environ-
 mental pricing, public service pricing, and conflicts 
 between individual and collective rationality.

208. Seminar: Advanced Research Methods. (For-
 merly numbered Architecture and Urban Planning 208.) 
 Seminar, three hours. prerequisites: doctoral 
 standing, consent of instructor. Required of Ph.D. stu-
dents in or following second year. Process of develop-
 ing dissertation proposal; introduction to alternative 
cceptions of science (or rigorous scholarship) now 
apparent in various social science paradigms. S/U 
grading.

209. Special Topics in Planning Theory (2 to 
8 units). (Formerly numbered Architecture and Urban 
Planning 209.) Seminar, three hours. Topics in plan-
ing theory selected by faculty. May be repeated for 
credit.

210A. Introduction to Planning Theory. (Formerly 
numbered Architecture and Urban Planning 210A.) 
Lecture, three hours. Historical introduction to major 
ideas and theories of planning which have influenced 
its development from the early 19th century to the 
present.

210B. Comparative History of Planning Practice. 
(Formerly numbered Architecture and Urban Planning 
210B.) Lecture, three hours. Limited to Ph.D. and ad-
vanced M.A. students. History of city planning, its crit-
ics, and professional urban planning practice in the 19th 
and 20th centuries. Comparison of evolution of the field 
in several countries, especially English-speaking coun-
tries.

210C. Colloquium in Planning Theory. (Formerly 
numbered Architecture and Urban Planning 210C.) 
Lecture, one hour; discussion, two hours. Prerequi-
site: numbered Architecture and Urban Planning 
210A. Limited to advanced M.A. students. Intro-
duction to some central theoretical issues of 
contemporary planning.

211. Law and the Quality of Urban Life. (Formerly 
numbered Architecture and Urban Planning 211.) 
Lecture, three hours. Introduction to law as an urban 
system, directed primarily toward those interested 
in intersection of law and policy: broad array of urban is-
sues examined, as is law's role as a partial cause and 
cure of urban problems. Examination of law as a 
 changing process rather than a collection of princi-
 ples, so that students develop facility to interact with 
 law and lawyers in a positive and forceful manner.

214. Ethics in Planning. (Formerly numbered Archi-
tecture and Urban Planning 214.) Examination of eth-
cological dimensions of planning at many levels, 
 including issues of bribery and corruption, aspects of client/ 
 sponsor and employer/employee relationships, collec-
tion, use, and release of information, and ethical as-
psects of administrative discretion. Ethical aspects of 
 planning methods, concept of environmental ethics, 
 and a examination of code of ethics pertinent to 
 planning profession.

215. Spatial Statistics. (Formerly numbered Archi-
tecture and Urban Planning M215.) (Same as Geog-
raphy M272.) Lecture, two hours; discussion, one hour; 
laboratory, one hour. Prerequisite: consent of instruc-
tor. Specific techniques useful in analysis of 
 spatial data and modeling of spatial distributions.

216. Introduction to Nonprofit Development. (For-
 merly numbered Architecture and Urban Planning 
219.) Lecture, three hours. Overview of basic con-
 cepts and skills utilized in nonprofit development init-
 iatives, especially by community-based organizations. 
 Focus on nonprofit provision of subsidized housing, 
 emphasizing way professionals "broker" debt and eq-
 uity funding from private, governmental, and philan-
thropic sources. Use of client projects and negotiation 
exercises.

217A-217B. Comprehensive Planning Project. (For-
 merly numbered Architecture and Urban Planning 
217A-217B.) Prerequisite: second-year standing. 
 Comprehensive project brings together students of 
 varying backgrounds and interests in joint solution of 
 an urban planning problem. Each project spans two 
terms. Successful completion of project meets re-
 quirements of Comprehensive Examination Plan A of 
 master's program.

218. Graphics and Urban Information. (Formerly 
numbered Architecture and Urban Planning 218.) 
Lecture, two hours; studio, one hour. Presentation of 
 basic graphic methods and tools for conceptualiza-
tion, analysis, and documentation of the built environ-
ment. Development of fundamental skills of graphic 
 ideation and communication.

219. Special Topics in the Built Environment (2 to 8 
 units). (Formerly numbered Architecture and Urban 
Planning 219.) Seminar, three hours. Topics in the 
 built environment selected by the faculty. May be 
 repeated for credit.

220A. Quantitative Analysis in Urban Planning I. 
(Formerly numbered Architecture and Urban Planning 
220A.) Lecture, three hours. passing score on 
basic mathematics proficiency examination 
given first day of class. Introduction to mathematical 
and statistical concepts and methods with applications 
in urban planning. Review of basic mathematical con-
 cepts fundamental to planning methods; linear 
and nonlinear functions focusing on growth curves 
and mathematics of finance. Data measurement and dis-
 play; descriptive statistics, introduction to use of 
 computer as a tool in analysis of planning-re-
 lated data.
220B. Quantitative Analysis in Urban Planning II. (Formerly numbered Architecture and Urban Planning 220B.) Lecture. Questions of population, economic development, sample design, interviewing, data processing, and analysis. Presentation of survey to plan- ners or public agencies.

221. Evaluation Methods. (Formerly numbered Archi- tecture and Urban Planning 221.) Three hours. Prerequisites: course 220A or equivalent. Examination of methods used to evaluate efficiency and effectiveness of government programs and investment projects. Theoretical and practical aspects of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounted, sensitivity analysis, target efficiency, fiscal audits, and evaluation design.

222. Introduction to Histories and Theories of Urban Planning. (Formerly numbered Architecture and Urban Planning 222.) Lecture, 90 minutes; discussion, 90 minutes. Seminar, 90 minutes; discussion, 90 minutes. Recommended (but not prerequisite): course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Fair is held at the end of Fall Quarter to place students in field set- tings. See course 253 with permission of course 490 or 496 to meet fieldwork requirement.

229. Special Topics in Planning Methods (2 to 8 units). (Formerly numbered Architecture and Urban Planning 229.) Seminar on topics in planning meth- ology selected by faculty. May be repeated for credit.

231. Urban Housing and Community Develop- ment (3 to 6 units). (Formerly numbered Architecture and Urban Planning 231.) Lecture, 90 minutes; discussion, 90 minutes; one hour of field work. Topics include multi-disciplinary and multi-site analysis of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required.

232A. Introduction to Regional Planning: Evolu- tion of Regional Planning Practices. (Formerly numbered 232A.) (Same as Policy Studies M241.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relationships between re- gional planning and developments within Western so- cial and political philosophy. Major concerns include regions and regionalism, territorial community, and social production of space.

232B. Spatial Planning: Regional and Interna- tional Development. (Formerly numbered Architect- ture and Urban Planning 232B.) Examination of theory and practice of spatial planning at regional, national, and international scales, including evalua- tion of regional growth strategies, national settlement policy, growth center concepts, and normative-ideo- logical issues involved in international development planning. Generally taken in first year.

233. Political Economy of Urbanization. (Formerly numbered Architecture and Urban Planning 233.) Introduc- tion to basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include historical geography of urbanization, development and transfor- mation of urban spatial structure, suburbanization and urbanization and the raison d'être of the metropolis, problems of industrialization, and the inter- relationship of the global economy and transnational capital, ways that housing markets should but sometimes do not work in developed and developing economies. Urbanization and development policy, the impact of interna- tional capital flows and economic growth, fiscal crisis, and role of urban social movements.

234. Regional Development, Urbanization, and Industrial Policy. (Same as Policy Studies M242.) Lecture, two hours; discussion, one hour. Survey of theories of regional development, with special reference to “new eco- nomic geography” and its relevance for formulation of local economic development policies.

235A-235B. Urbanization and Rural Development in Third World Countries. (Formerly numbered Archi- tecture and Urban Planning 235A-235B.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite for course 235A: course 229 or consent of instructor; for course 235B: course 235A or consent of instructor. Survey of theories of regional development, with special reference to “new economic geography” and its relevance for formulation of local economic development policies.

235C. Research Seminar: Alternative Develop- ment. (Formerly numbered Architecture and Urban Planning 235C.) Discussion, three hours. Prerequisites: courses 235A-235B or M267A and 267B. S/U grading. Exploration of regional urban and rural development, with major emphasis on appropriate economic growth, gender equality, and environmental sustainability; guest lectures and student presenta- tions.

236A. Urban and Regional Economic Develop- ment I. (Formerly numbered 236A.) (Same as Policy Studies M240.) Lecture, three hours. Introduction to industrial change and effect on urban and regional development theory and policy. Major topics include: role of industrialization in economic development, ex- planations of regional industrial growth and decline, crisis, and role of Fordism and its regional patterns, new forms of industrialization with particular emphasis on flexible production, and debates regarding political economy of industrialization.

236B. Urban and Regional Economic Develop- ment II. (Formerly numbered Architecture and Urban Planning 236B.) Seminar, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. Advanced seminar in urban and regional economic development, involving case study analy- sis, fieldwork, and individual student projects.

238. Advanced Seminar: Urban and Regional De- velopment. (Formerly numbered Architecture and Ur- ban Planning 238.) Seminar, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. Advanced seminar in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

239. Special Topics in Urban and Regional Devel- opment Policy (2 to 8 units). (Formerly numbered Archi- tecture and Urban Planning 239.) Seminar, three hours. Topics and titles selected by faculty. May be repeated for credit.

244. Housing Markets. (Formerly numbered Archi- tecture and Urban Planning 244.) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed and developing economies. The impact of interna- tional capital flows and economic growth, urban and rural development policy, the impact of interna- tional capital flows and economic growth, fiscal crisis, and role of urban social movements.

245. Urban Public Finance. (Formerly numbered Archi- tecture and Urban Planning 245.) Lecture, three hours. Prerequisites: courses 207 and 220A, or consent of instructor. Theories and practice of urban public finance, with emphasis on land use, municipal bonds, and public services, tax increment financing for urban rede- velopment, and municipal bond market.

246. Housing in Social and Economic Development Policy. (Formerly numbered Architecture and Urban Planning 246.) Seminar, three hours. Position of housing in national and regional development strate- gies, with focus on policies for Third World nations. Topics include nature of Third World urban development, market re- sponses, evolution of housing policy, theory of inter- vention, alternative policies for increasing housing supply. Numerous case studies.

247. Race, Gender, Culture, and Cities. (Formerly numbered Architecture and Urban Planning 247.) Discus- sion, three hours. Exploration of multicultural con- text of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communi- ties and their policy implications. Topics relate the new diversity and gender with global restructuring, new urban economy, and policies of workplace, hous- ing, schools, and government.

248. Special Topics in Social Policy and Analysis (2 to 8 units). (Formerly numbered Architecture and Urban Planning 248.) Seminar, three hours. Topics in social policy and analysis selected by faculty. May be repeated for credit.

249. Introduction to Social Policy. (Formerly num- bered Architecture and Urban Planning 250.) Lecture, three hours. Analysis of demographic changes, his- tory, needs, and ideological debates which affect de- velopment of social policy in the U.S., compared with Western Europe.

251. Planning for Multiple Publics. (Formerly num- bered Architecture and Urban Planning 251.) Lecture, three hours. Exploration of planning needs of various social groups in urban social and political processes. Examination of literature and research studies to determine appropri- ate mechanisms for planning for multiple publics. Analy- sis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and method- ological problems of planning for multiple publics. Generally taken in first year.

254. Survey Methods in Planning. (Formerly num- bered Architecture in Planning “Survey” Lecture, three hours. Prerequisite: course 220B or equivalent. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning; questionnaire development, sample design, interviewing, data pro- cessing, and analysis. Presentation of survey to plan- ners or public agencies.
256. Social Impact Analysis. (Formerly numbered Architecture and Urban Planning 256.) Lecture, three hours. Exploration of how to assess and determine social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences.

M259. Advanced Real Estate Development for Planners and Architects. (Formerly numbered 219.) (Same as Architecture and Urban Design M259.) Discussion, three hours. Prerequisite: course 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

260A. Political Economy and the Environment. (Formerly numbered Architecture and Urban Planning 260A.) Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on functioning of market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

260B. Politics, Institutions, and the Environment. (Formerly numbered Architecture and Urban Planning 260B.) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in environmental policy, including its historical movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

261. Land-Use Control: Economic and Structural Perspectives. (Formerly numbered Architecture and Urban Planning 261.) Lecture, two hours; discussion, one hour. Prerequisites: courses 260A and 260B, or consent of instructor. Comparison of regulatory methods of land-use control to command or planning methods. Basics of land use as a commodity in first part; land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions. Land-use regulations (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

M262A. Toxics Reduction: Science, Engineering, and Policy Issues. (Formerly numbered Architecture and Urban Planning M262A.) (Same as Chemical Engineering M290U and Environmental Health Sciences M294.) Lecture, three hours. Prerequisites: courses 260A and 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxicity reduction and current state of government and industry activities in this area.

262B. Urban Environmental Problems: Water Resources. (Formerly numbered Architecture and Urban Planning 262B.) Lecture, three hours. Water is life and wealth in California, which has world’s most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and controversies over resource planning.

M262C. Pollution Prevention (2 units). (Formerly numbered Architecture and Urban Planning M262C.) (Same as Environmental Health Sciences M239.) Seminar course; graduate students only. Exploration of potential for toxics reduction and current state of technical knowledge in this area. S/U grading.

263. Natural Resource Conservation. (Formerly numbered Architecture and Urban Planning 263.) Discussion, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Exploration, through reading, discussion, and student presentations, of methods of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wildlife).

M264. Environmental Law (3 to 6 units). (Formerly numbered Architecture and Urban Planning M264.) (Same as Law M290.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on law and public Act as a means of illustrating policy underlying the field.

C265. Environmentalism: Past, Present, and Future (4 to 6 units). (Formerly numbered Architecture and Urban Planning C265.) Discussion, three hours; optional studio, five hours. Examination of historical, political, and theoretical developments of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

266. City and Countryside in the Third World. (Formerly numbered Architecture and Urban Planning 266.) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural communities in the Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and institutional effects. Gives students important background for courses M276A, M276B, and many of the other planning courses addressed in this World Issues.

M267A. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes. (Formerly numbered 267A.) (Same as Geography M229.) Discussion, three hours. Recommended (but not requisite): course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corpora- tions, and local population; and environmental and social impact of its development.

267B. Rural Development Issues. (Formerly numbered Architecture and Urban Planning 267B.) Lecture, three hours. (Formerly numbered 291A.) Lecture, three hours. Prerequisite: course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasants, development and rural women, agricultural ecology, and basic land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

269. Special Topics in Environmental Analysis and Policy (2 to 8 units). (Formerly numbered Architecture and Urban Planning 269.) Seminar, three hours. Prerequisites: topics in environmental analysis and policy selected by faculty. May be repeated for credit.

270. Homelessness: Housing and Social Service Issues. (Formerly numbered Architecture and Urban Planning 270.) Lecture, discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

M272. Real Estate Development for Planners and Architects. (Formerly numbered Architecture and Urban Planning 272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions, which are interactively modified to meet economic feasibility tests.

273. Site Planning. (Formerly numbered Architecture and Urban Planning 273.) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban and small town sites.

274. Introduction to Physical Planning. (Formerly numbered Architecture and Urban Planning 274.) Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts.

275. Inner-City Housing Policies: Old and New Approaches. (Formerly numbered Architecture and Urban Planning 275.) Lecture, 90 minutes; discussion, 90 minutes. Study of federal and local housing policy as it affects inner cities, with emphasis on New York and Los Angeles. Examination of research on housing conditions and community development policies, with particular emphasis on alternatives such as resident-controlled housing; analysis of rehabilitation policies; review of new concepts and current legislative proposals.

276. Planning Workshop (4 to 8 units). (Formerly numbered Architecture and Urban Planning 276.) Lecture, one hour; discussion, one hour; laboratory, four hours. Prerequisite: course 266. Lecture, discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

278. Qualitative Research Methods for Planners and Designers. (Formerly numbered Architecture and Urban Planning 278.) Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, participant observation, questionnaire construction, interview techniques. Projects include students’ own research.

279. Seminar: Public Space. Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them.

281A. Introduction to History of the Built Environment in the U.S. (Formerly numbered Architecture and Urban Planning 281A.) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind development of built environments.
281B. Advanced Seminar: History of the Built Environment. (Formerly numbered Architecture and Urban Planning 281B.) Discussion, three hours. Prerequisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

283. History of the American Household and American Home. (Formerly numbered Architecture and Urban Planning 283.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

C284. Looking at Los Angeles. (Formerly numbered 284.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently course C184.

285. Great Planning Debates: Gender. (Formerly numbered Architecture and Urban Planning 285.) Seminar, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and public policy.

M286. Transportation and Land Use. (Formerly numbered 286.) (Same as Policy Studies M220.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

287. Travel Behavior Analysis. Lecture, three hours. Prerequisites or corequisites: courses 207, 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split, traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis.

288. Transportation System Operations and Performance. Lecture, three hours. Transportation system supply analysis, highway capacity analysis, traffic flow theory, measuring congestion, level of service, queuing, traffic impact analysis, travel demand management, parking management and pricing, high-occupancy vehicle treatments of highways, transit operations, transit performance, ridesharing, paratransit, specialized transportation for elderly and disabled people, and the Americans with Disabilities Act.

M289. Transportation Economics, Finance, and Policy. (Formerly numbered 289.) (Same as Policy Studies M222.) Lecture, three hours. Overview of transportation planning and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

M290. Transportation and Environmental Issues. (Formerly numbered 290D.) (Same as Policy Studies M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues; chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

298. Special Topics in Emerging Planning Issues (2 to 4 units). Discussion, two to three hours. Topics in newly emerging planning issues such as role of cutting edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). (Formerly numbered Architecture and Urban Planning 375.) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M404. Joint Planning/Architecture Studio. (Formerly numbered Architecture and Urban Planning 404.) Seminar, one hour; discussion, one hour; studio, four hours. Prerequisite: consent of instructor. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Altomar, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

494. Supervised Independent Teaching (2 to 8 units). (Formerly numbered Architecture and Urban Planning 494.) Supervised individual teaching experience. May be repeated for credit. S/U grading.

496. Field Projects (2 to 8 units). (Formerly numbered 496F.) May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). (Formerly numbered Architecture and Urban Planning 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Research in Planning (2 to 8 units). (Formerly numbered 596F.) May be repeated for credit.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). (Formerly numbered 597P.) May be repeated for credit. S/U grading.

598. Preparation for M.A. Thesis in Urban Planning (2 to 8 units). (Formerly numbered 598P) May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research in Planning (2 to 8 units). (Formerly numbered 599P) May be repeated for credit. S/U grading.

**Scope and Objectives**

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in urban studies brings together students in urban studies and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

**Undergraduate Study**

**Urban Studies Specialization**

Students may elect to combine the urban studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in urban studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

**Preparation for the Specialization Required:** At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Political Science 40; Psychology 10; Sociology 1, 18, 104 or equivalent.

**Upper Division Requirements**

**Required:** Nine upper division courses, including (1) at least three courses outside the major department selected from Anthropology 167, Economics 120, Geography 150, Psychology 168, Sociology 158; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 130, 133; Geography 150, 151, 156; History 154A through 154D; Political Science 143A, 143B, 1675; Psychology 127, 135; Sociology 132, 156, 160; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) in-

Chairs
Jean B. deKernion, M.D. (Fran and Ray Stark
Foundation Professor of Urology), Chair
Robert B. Smith, M.D., M.P.H., Vice Chair

Director
Mark S. Litwin, M.D., M.P.H., Director of Medical
Student Education

Scope and Objectives

The fundamental goal of the Department of
Urology is to teach medical students the gen-
eral principles of diagnosis and management in
diseases of the genitourinary tract. Urology
encompasses a wide scope of human illness,
including conditions that are congenital and ac-
quired, pediatric and adult, male and female,
malignant and benign. The department func-
tions to acquaint students with the skills neces-
sary to manage these conditions in the initial
stages and over the long term.

Instruction spans all years of the under-
graduate medical school curriculum but is con-
centrated during the clinical rotations. Students
spend two weeks on the urology service during
the third year and may return for an additional
four-week elective rotation during the fourth
year. The clinical experience includes time
spent in the operating room, the faculty clinics,
on ward rounds, and in didactic conferences
that cover general urology, urological subspe-
cialties, uropathology, and uroradiology. Uro-
ology teaching settings include the UCLA, Har-
bor-UCLA, Olive View-UCLA, and West Los
Angeles VA Medical Centers.

For further details on the Department of Uro-
logy and a listing of the courses offered, see the
Announcement of the UCLA School of Medicine.

Scope and Objectives

The Women’s Studies Program, established in
1975, is an interdisciplinary academic program
spanning departments, disciplines, and ideol-
ogies and offering two options for study: an un-
dergraduate major and a minor. Students
wishing to focus their studies on multidisci-
plinary perspectives in order to create a coher-
ent and comprehensive analysis of women and
gender may elect the major. Those wishing to
enhance study in a traditional discipline may
elect the women’s studies minor in addition to
a major in their chosen discipline.

The program offers the singular opportunity to
study the full range of human experience and
arrangements of social organization from the
perspectives of those whose participation has
been traditionally distorted, omitted, ne-
eglected, or denied — women in their racial,
class, sexual, and cultural diversity. Students
develop critical reasoning and analytical skills,
research and communication skills, a deep ap-
preciation for complexities of power, asymme-
tries in gender relations across time, class, and
cultures, and conceptual tools for social
change. Emphasis on multidisciplinary and
multiethnic approaches assures a broader ex-
posure to the humanities and social sciences
than is commonly available within disciplinary
confines. A background in women’s studies of-
fers unique contextual validation for today’s
woman and prepares students for a wide range
of career and life choices, as well as for ad-
vanced study in traditional disciplines and the
professions.

The field of women’s studies has exploded over
the past 30 years. It has developed a theoretical
base, body of knowledge, and perspective which
cannot be attained as a by-product of studying
other fields. Where the study of women has been
neglected or omitted, the field develops new
knowledge through research and fills in gaps in
the existing curriculum. Further, women’s stud-
ies generates new perspectives on existing
knowledge of women and gender, offers a cri-
tique of accepted beliefs and ideas, intellectually
challenges existing structures of knowledge,
and introduces new conceptual paradigms.

The core faculty members who teach women’s
studies courses come from various UCLA de-
partments and professional schools. Many

Sondra Hale, Ph.D. (Anthropology)

Adjunct Associate Professor
Jacqueline D. Goodchilds, Ph.D. (Psychology)
professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and a student representative sets program policies and curricula. The program sponsors a Student Association and assists other student groups with extra-curricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women.

While no formal graduate program exists at UCLA at this time, graduate students are invited to use the program’s resources, attend lectures and events, and participate in the feminist research seminar sponsored by the center.

**Undergraduate Study**

**Bachelor of Arts Degree**

The interdisciplinary major in women’s studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

**Admission**

To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University’s diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women’s studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

All courses applied toward the major must be taken for a letter grade, and students must have a GPA of 2.0 or better in women’s studies courses to receive credit for completing the program. Courses in which they receive a grade of C – or lower may not be applied toward the major.

**Preparation for the Major**

*Required:* Women’s Studies 10. Students must also complete departmental lower division prerequisites, as applicable, for upper division women’s studies courses in the disciplines.

**The Major**

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two discipline-specific or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

*Required:* At least 13 upper division courses as follows:

1. Three core courses, including Women's Studies 110A or 110B, 130 or one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the program, and 197 (departmental 197 courses may not be applied).

2. A distribution of at least four courses, each from a different department or discipline, selected from the approved list of women’s studies courses.

3. Six additional concentration courses from one or two of the disciplines in which the core concentration courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women’s health, or lesbian studies. If two fields are selected, the six courses may be in any ratio.

Four units of Women's Studies 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women’s Studies 199HA-199HB.

**Honors Program**

The honors program is open to advanced junior and senior women's studies majors with a 3.0 grade-point average in women’s studies courses and a minimum 3.0 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program chair for approval. Students wishing to undertake honors in the major are advised to complete Women’s Studies 197 by Spring Quarter of the junior year.

To be eligible for honors at graduation, students must successfully complete course 197 and two successive terms of independent studies (courses 199HA-199HB) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the program office.

**Women's Studies Minor**

The women’s studies minor augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the women’s studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 240 Kinsey Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

**Required Lower Division Course:** Women's Studies 10.

**Required Upper Division Courses:** Women's Studies 110A or 110B, 120 or 197, and five elective courses from the approved list of women’s studies courses issued each term by the program. At least three elective courses must be taken in departments other than the major department. No more than four units of any 199 course may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Women's Studies Lower Division Courses**

**Core Courses**

110A. Feminist Theories in Social Sciences. Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists’ attempts to describe, explain, and critique social institutions, consider historical impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, education, economics, family, religion, sexuality, etc. Applications of theories to research questions and methodologies.

110B. Feminist Theories in the Humanities. Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies.

M110D. Philosophical Analysis of Issues in Feminist Theory. (Same as Philosophy M192.) Lecture, three hours. Prerequisite for women's studies majors: course 10; for other students: one philosophy course or consent of instructor. Exploration in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.
197. Senior Research Seminar. Seminar, three hours. Prerequisites: courses 10, and 110A or 110B. Designed for advanced junior/senior women's studies majors or minors. In-depth study of a major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress.

Supporting Courses

105. Topics in Women and Medicine. Lecture/discussion, three hours. Consideration of images of women in medicine, women as recipients of health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a women's health specialty and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

M106. Imaginary Women. (Same as Honors Col- legium M106.) Prerequisite: upper division standing. Study of four female cultural archetypes — absorbing wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical renditions in literature in European and American cultures. P/NP or letter grading.

M107A. American Women Writers. (Same as En- glish M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

M107B. British Women Writers. (Same as English M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

M107C. Special Topics in Women and Literature. (Same as English M107C.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

M112. Special Topics in Women and the Arts. (Same as World Arts and Cultures M112.) Lecture, three hours; outside study, nine hours. Prerequisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practices in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

M115. Topics in Studies of Sexual and Gender Ori- entation. (Formerly numbered 115.) (Same as Les- bian, Gay, and Bisexual Studies M115.) Lecture/discussion, three hours. Prerequisite: course 10 or M14. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; vari- able topics may include cultural representations, his- torical and political change, life and health experiences, and by women on gender theories; mul- tiethnic and cross-cultural emphases. May be repeated for credit.

M116. Sexuality and the City: Queer Los Angeles. (Formerly numbered 116.) (Same as Lesbian, Gay, and Bisexual Studies M116.) Lecture, three hours. Prerequisite: course M14. Investigation of history, culture, and political economy of lesbian, gay, and bisexual Los Angeles. Lecture, three hours; outside study, nine hours. Tristian and Isolde are among the more famous and enduring of Euro- pean literature, and their tragic instructions from the Middle Ages to the present provides opportunity to consider a host of issues — from questions of genre to those of knish, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

120. Internship in Women's Studies. Seminar, three hours; internship, eight hours. Prerequisites: courses 10, 110A or 110B, at least two other upper division women's studies courses. Field studies course com- bining seminar with field placement. Practical experi- ence in working on women's issues and connecting these experiences to methodological and theoretical themes explored in course 110A or 110B.

M123. International Political Economy of Work and Gender. (Same as Economics M158.) Lecture, three hours; outside study, nine hours. Prerequisite: Economics 13, 103, or 101; and courses 110A or 110B.

128. Roots of Patriarchy: Ancient Goddesses and Heroines. (Formerly numbered CED 128.) Lecture, three hours. Examination of ancient goddesses and heroines in ancient Near Eastern, Celtic, Scandinavian, and Indic, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society.

130. Women of Color in the U.S. Lecture/discussion, three hours. Prerequisite: course 10. Exploration of ex- periences of African American, Asian American, Chi- cana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Con- temporary and/or historical and/or theoretical perspec- tives on racism and its relation to feminism as defined by women of color.

M132A. Chicana Feminism. (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Prerequisite: course 10 or consent of instructor. Exam- ination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chica- nas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.

M132B. Contemporary Issues among Chicanas. (Same as Chicana and Chicano Studies M115.) Prerequisite: course 10 or consent of instructor. Overview of concerns facing Chicana women in the U.S., including is- sues on family, immigration, reproduction, employ- ment conditions. Comparative analysis with other Latinas.

M133. Chicana Lesbian Literature. (Same as Chi- cana and Chicano Studies M133 and Lesbian, Gay, and Bisexual Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its rela- tionship to Chicana identity, representation of lesbian- ism in Chicana literature, meaning of familia in Chi- cana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicana studies.

134. Gender, Science, and Theory. (Formerly num- bered 110C.) Prerequisite: course 10. Examination of differing theoretical perspectives on relation between ideologies of gender and conceptualization and prac- tice of science, and the evidence and method of relations among gender, race, class, and sexual orientation and production of scientific knowl- edge. Applications of theoretical critiques to research design, practice, and interpretation.

135. Women in Physics and Mathematics. Exami- nation of lives and scientific contributions of five women of the 20th century — Lise Meitner, discover- er of nuclear fission; Emmy Noether, mathemati- cian; Maria Goeppert Mayer, discoverer of nuclear shell model; Dorothy Crowfoot Hodgkin, X-ray crys- tallographer and organic chemist; and Chien-Shiung Wu, nuclear physicist. P/NP or letter grading.

M137E. Work Behavior of Women and Men. (Same as Psychology M137E.) Prerequisite: course 10 or Psy- chology 10 or senior standing. Examination of work behavior of women and men. Topics include attitud- enents of career choice, job findings, leadership, perfor- mance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and fam- ily roles.

M137J. Psychology of Language and Gender. (Same as Communication Studies M124 and Psy- chology M137J.) Lecture, three hours. Prerequisites: Psychology 10 or equivalent, junior standing. Exami- nation of current topics at intersection of gender and language. Topics include sex differentiation in lan- guage cross-culturally; sex bias in lexic and usage; sex differences in syntax, phonology, and nonverbal behavior; development of sex-differented language in children; "women’s" and "men’s" lan- guage in various racial/ethnic/class/sexual preference groups; and conversational interaction.

139. Women and Art in Twentieth-Century U.S. (Formerly numbered CED 139.) Lecture/discussion, three hours. Prerequisite: course 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention by gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism.

M148. Women in Higher Education. (Same as Edu- cation M148.) Limited to juniors and seniors. Education and career development of women in higher educa- tion. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career develop- ment, affirmative action, and other recent legislation.

M154Q. Gender Systems: Global. (Formerly num- bered M154Q.) (Same as Anthropology M154Q.) Lec- ture, three hours. Prerequisite: course 10. Designed for upper division social sciences majors. Comparative study of gender systems globally from an anthro- pological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

M155Q. Women and Social Movements. (Formerly numbered M160.) (Same as Anthropology M155Q.) Lec- ture, discussion, three hours. Recommended (but not requisite): prior women's studies or anthropology courses. Comparative study of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in revolution and transfor- mations and the centrality of gender interests. P/NP or letter grading.

M158. Women in Italian Culture. (Same as Italian M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, liter- ature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.
M162. Sociology of Gender. (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 10 or Sociology 1 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (Formerly numbered M164.) (Same as Sociology M163.) Lecture, three hours. Prerequisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

M165. Psychology of Gender. (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

170. Jurisprudence of Sexual Equality. Prerequisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9 or consent of instructor. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique.

M172. The Afro-American Woman in the U.S. (Same as Afro-American Studies M172 and Psychology M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

M173. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (Formerly numbered M103.) (Same as Afro-American Studies M173.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

185A-185Z. Special Topics in Women's Studies. Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in an area within women's studies.

199. Special Studies in Women's Studies. Prerequisites: at least two upper division women's studies courses, minimum 3.0 GPA, consent of instructor and program director. Directed program of independent readings and/or research on a specific topic within women's studies. No more than four units may be applied toward women's studies major or minor.

199HA-199HB. Directed Studies for Honors. Prerequisites: course 197, 3.0 GPA overall, 3.0 GPA in major. Limited to women's studies honors majors. Two- to four-semester sequence to research and write honors thesis under direction of faculty sponsor. In Progress grading.

Scope and Objectives

The mission of the Department of World Arts and Cultures (WAC) centers on the creation, critical analysis, and contextualization of arts practice throughout the world, with particular reference to the diverse populations of the U.S. The program reflects an approach that advocates the inclusion and integration of performance practice, studies in cultural and performance theory, and the real-world application of both forms of knowledge. It offers an environ-
ment for interdisciplinary inquiry that responds to the challenges facing our pluralistic society. Within this context, both practical and theoretical studies in dance and interdisciplinary artistic and expressive performance practices are major emphases.

The undergraduate program offers concentrations in dance and cultural studies, as well as the more flexible integrated and honors options. The graduate program offers a Master of Arts in Dance, a Master of Arts in Dance/Movement Therapy, and a Master of Fine Arts in Dance. Students are encouraged to explore relationships among the different curricular emphases, including ethnology, history and criticism, movement studies, education, and therapy, as a means to tailor a particular course of study to their professional goals.

Students in world arts and cultures at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Students from this unique department have gone on to pursue advanced degrees and/or careers in dance- and humanities-based fields, arts management or practice, education, cultural policy, community outreach, architecture and urban planning, law, public service, and many others, limited only by their imaginations.

Undergraduate Study

Bachelor of Arts Degree

The world arts and cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. Courses may be taken in three different categories — performance, theoretical, and applied. Performance courses include the study of movement, art making, and aesthetic expression. Theoretical courses consider critical analysis, history, and theory as means for the contextualization of creative products and processes. Applied courses address the utilization of artistic practices in alternative formats and real-world situations. Courses from each of these categories are configured into the following concentrations, one of which students declare by the end of their sophomore year.

The dance concentration offers courses in a wide range of idioms from throughout the world, including studies in modern dance and ballet. Opportunities for performance, production, and movement studies, as well as dance history, kinesiology, and performance criticism and philosophy, are further options in this concentration. Multimedia forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The cultural studies concentration allows students to select from a range of courses offered within the department, as well as in anthropological, art history, ethnomusicology, folklore and mythology, film, music, and theater. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women’s studies).

The integrated studies concentration offers an opportunity for students to select an equal number of units from each of the three categories of course listings — performance, theoretical, and applied. Opportunities for hands-on experience through internships, apprenticeships, and field studies, as well as the opportunity to develop skills in media technology, are emphasized in this concentration.

The honors concentration is intended for exceptional students who have a minimum UCLA 3.5 grade-point average. Students can select their own program of study in close consultation with faculty. They develop a rationale outlining the objectives of their study, a self-assessment of their needs for the future, a proposed list of courses, some indication of their senior project, and a title for the course of study. This proposal is submitted to the student affairs officer and the faculty at the end of the sophomore year. After approval, students are assigned a faculty adviser for their junior and senior years. This structure allows them to focus on personal educational objectives.

Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple, Student Affairs Officer, at (310) 825-8537.

Admission

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on a questionnaire, transcripts, two letters of recommendation, and a personal essay. These materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Freshmen interested in the dance concentration must submit a videotape. Transfer applicants interested in the dance concentration must participate in a January audition.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take world arts and cultures courses during the term in which they apply to the program. They must have a minimum 3.0 overall grade-point average and no more than 120 quarter units. Students interested in the dance concentration must participate in the January transfer student audition.

The Major

The major includes a core of 32 units introducing the diverse forms of artistic practice, one of four concentrations (see above) consisting of 48 units, and an eight-unit senior project.

The following courses are required:

1. A core of nine courses (32 units): World Arts and Cultures 12, 20, 80A-80B, 80C, 134, 140A or 140B, Design 182, and Anthropology 9 or 33.

2. A concentration of 48 units (see specific course listings below) as follows:

   - **Dance Concentration:** 32 units from group A, eight units from group B, eight units from group C
   - **Cultural Studies Concentration:** eight units from group A, 32 units from group B, eight units from group C
   - **Integrated Studies Concentration:** 16 units from group A, 16 units from group B, 16 units from group C

**Honors Concentration:** 48 units of coursework to be approved by the department faculty; a minimum 3.5 UCLA grade-point average is required. Proposals are to be submitted to the department faculty at the end of the sophomore year.

**Group A: Performance Courses**

**Group B: Theoretical Courses**

**Group C: Applied Courses**

(3) World Arts and Cultures 190A-190B (eight units total). These courses are the culmination of the major and have three possible areas of focus — performance, applied research, or cultural studies research — as follows: (a) the performance project is a creative project leading to the production and public performance of original or traditional work; (b) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; (c) the cultural studies focus involves students in independent ethnographic research in some aspect of the arts. The subject of study can be found in, but is not restricted to, the Los Angeles community. Field study includes the use of video, slides, and sound recordings.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available in the program office and accessible from the Graduate Division homepage at http://www.gdnet.ucla.edu.

**Master's Degrees**

The Department of World Arts and Cultures offers the following master's degrees: Master of Arts degree in Dance, Master of Arts degree in Dance/Movement Therapy, and Master of Fine Arts degree in Dance.

**Admission**

For the Master of Arts in Dance or Dance/Movement Therapy, a baccalaureate degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as dance studios or dance performance. Prospective students may contact the UCLA Department of World Arts and Cultures for a brochure which gives additional information on the overall graduate program and specific curriculum for the stated area of specialization.

In addition to the application for admission, the department has its own screening procedure: three letters of recommendation, an audition, and a personal interview. The audition evaluates applicants' creative potential and technical proficiency with consideration toward applicants' primary focus.

Admission to the dance/movement therapy program requires one undergraduate course in abnormal psychology in addition to the requirements listed above.

M.F.A. applicants must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works; auditioners in performance present three selections already in their repertory. Applicants are required to prepare a statement (no more than one page) describing the works shown.

**Areas of Study**

The M.A. degree in Dance is designed for students preparing to continue professionally as researchers and teachers. The M.A. program in Dance/Movement Therapy is approved by the American Dance Therapy Association (ADTA). The M.F.A. degree is designed for students preparing to continue professionally as choreographers and/or performers.

Unique interests in areas such as dance ethnology, education, history, philosophy and criticism, dance kinesiology, dance production, dance and media, computer-aided dance studies, and music for dance may be pursued on advisement.

**Course Requirements**

Course requirements, beyond the basic requirements previously outlined, vary for each program and are determined under the direction of faculty advisers.

*M.A. in Dance.* Thirty-six units, including nine courses (or more depending on the specialization chosen), distributed as follows: (1) World Arts and Cultures 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) three courses (16 units) in or outside the department at the upper division or graduate level. These may not be courses taken to fulfill prerequisites or studio technique courses. Eight units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement. Specific concentrations within the M.A. may be designed under the direction of faculty advisers.

*M.A. in Dance/Movement Therapy.* A total of 66 units distributed as follows: (1) World Arts and Cultures 230; (2) 46 units in the department at the graduate level (200 series); (3) 16 units in or outside the department at the upper division or graduate level. These may not be technique courses nor courses taken to fulfill prerequisites. A total of 18 units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

These course requirements are to be partially fulfilled by World Arts and Cultures 225A-225B; C260A-C260B-C260C; C261A, C261B-C261C; 262A-262B-262C; 460A-460B-460C; 596A, 596R.

While an undergraduate course in abnormal psychology is a prerequisite for the M.A., other courses in psychology (developmental, personality, and group dynamics) are highly recommended.

The program in dance/movement therapy requires an intensive experience in a therapeutic setting during the second year. This internship provides an orientation to the hospital clinical setting and experience as a movement therapist.

*M.F.A. in Dance.* A total of 72 units distributed as follows: (1) 20 units of choreographic/performance training, including at least 12 units from World Arts and Cultures 211A through 211D and at least eight units from 192 and/or 490; (2) 12 units of studio technique courses at the 400 level; (3) 12 units of production courses from 142, 145, 221, C227, 240B, 240C, 240D; (4) eight units of movement studies from 122, 225A, 225B; (5) eight units of cultural/critical studies from 181A, 181B, 181C, 181D, 182, 183, 230, 232, C233, 234, 235, 236, 240A, 280A, 280B, CM284, C287; (6) eight units of education, internship, field studies, and practicum studies from 151A, 151B, 153, 191, 251A, 251B, 251C, C261A, 261B, 261C, 262A, 262B, 262C, 400, 441, 452, 498; (7) four units of elective coursework. Only four units of 500-level courses may be applied toward the degree. Students must enroll in a studio technique class every quarter except during an internship or the final concert/production. The required 72 units for the degree must include a minimum of 32 units of coursework at the graduate (200 and 400) level. The four units of coursework at the 500 level may be applied toward the overall unit total. Required courses are individually designed through advisement with the faculty academic adviser.

Students are expected to choose choreography or performance as their M.F.A. focus.

**Comprehensive Examination Plan**

During the first year students in dance or dance/movement therapy who decide to take the comprehensive examination option write a proposal stating why this option is most suitable to their M.A. program. There are specific steps to the proposal presentation and approval process. Guidelines may be obtained from the department.

After completing coursework, passing the presentation, and nominating the comprehensive examination committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to complete their comprehensive examination.

Examining committee members grade each question (1) pass with honors, (2) pass, (3) pass minus, or (4) fail. In order to pass, each question must be graded pass or better by two out of three committee members. If the questions are failed, the examination may be re-taken once only during the next scheduled examination period.

For M.F.A. students, the preliminary examination consists of a written proposal submitted to a faculty panel and a presentation of proposed works. The written proposal includes funda-
mental concepts, objectives for the concert material, and production plans.

After passing the preliminary examination, a three-member M.F.A. comprehensive examina-
tion committee is selected to advise stu-
dents in developing the final concert material.
Obtain specific guidelines for nominating the
comprehensive examination committee from
the department. The student may advance to
candidacy when the coursework toward the
degree is completed and the presentation is
passed. Students are allowed one year after
advancement to candidacy to complete their
M.F.A. comprehensive examination. Choreog-
raphers and performers prepare a major con-
cert in the third year, or a series of concerts in
the second and third years. An oral defense of
the concert material is held with the M.F.A.
comprehensive examination committee and
production staff.

A written production book with visual materials and a concept paper are prepared after the
performance. Obtain specific guidelines from
the department.

Thesis Plan

During the first year M.A. students in dance or
dance/movement therapy who decide to take
the thesis option discuss potential thesis topics
with faculty members. They prepare a written
proposal which is presented to a faculty panel.
After the thesis proposal is approved by the
faculty panel, a three-member thesis commit-
tee is formed. There are specific steps to
the proposal presentation and approval process.
These guidelines may be obtained from the
department.

After completing coursework, passing the pre-
sentation, and selecting the thesis committee,
students may file the advancement to candi-
dacy petition. Students are allowed one year after advancement to candidacy to file the
thesis.

World Arts and Cultures

Lower Division Courses

1A-1B. Fundamentals of Modern Dance (2 units
each). Laboratory, four hours. Designed for nondance majors. Courses should be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists’ works. Each course may be repeated once. P/NP or letter grading.

1C. Fundamentals of Modern Dance (2 units). Lab-
oratory, four hours. Study of dance technique and
improvisation. Critical viewing, reading, and discussion of modern dance artists’ works. May be repeated twice. P/NP or letter grading.

5. Creative Process: Developing Imagination and
Craft (2 units). Lecture, one hour; laboratory, three
hours. Introduction to creative exploration in move-
ment through improvisational and compositional exer-
cises that access and develop the imagination, find
relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once. P/NP or letter grading.

6. Fundamentals of Ballet (2 units). (Formerly num-
bered Dance 6.) Laboratory, four hours. Study of ballet
techniques and principles, including dance terminol-
y. May be repeated twice; only two units may be
applied toward the major. P/NP or letter grading.

7A-7B-7C. Beginning Ballet (2 units each). (For-
merly numbered Dance 7A-7B-7C.) Laboratory, four
hours. Limited to world arts and cultures majors.
Study of beginning ballet techniques and principles,
including dance terminology. Only two units may be
applied toward the major. P/NP or letter grading.

10. Introduction to Dance (2 units). (Formerly num-
bered Dance 10.) Lecture, one hour; laboratory, one hour. Study of basic musical concepts
through movement, with introductory survey of major
world music/dance systems. P/NP or letter grading.

23L. Laboratory in Conditioning for Dancers (2
units). (Formerly numbered Dance 23L.) Laboratory,
four hours. Specific conditioning principles applied to
strengthening, stretching, and endurance training.
Personalized attention enables students to increase
their ability to dance more efficiently and to prevent dance injuries. May be repeated twice. P/NP grading.

25. Introduction to Dance/Movement Notation (2
units). (Formerly numbered Dance 25.) Lecture,
two hours; laboratory, one hour. Beginning skills in ob-
serving, analyzing, reconstructing, and recording
dance/movement based on principles of the labano-
tation and labananalysis systems.

40. Introduction to Dance Theater (2 units). (For-
merly numbered Dance 40.) Lecture, two hours;
labora-

tory, two hours. Introduction to practical, and
aesthetic perspectives on theater space, as well as
basic aspects of scene, lighting, costume, and sound
design technology for dance production.

48. Laboratory in Dance Production (1 unit). (For-
merly numbered Dance 48.) Laboratory, two hours.
Realization of concepts of lighting, sound, costume,
scene design, and stage practices in departmental
dance productions. Must be repeated once in an-
other year. P/NP grading.

50. World Arts Forum (1 unit). Lecture, 90 minutes.
Introduction to various arts resources on campus.
Presentations by curators, artistic directors, perform-
ers, scholars, national leaders in the arts, interna-
tional guests. Specific presentations vary from term to
term. May be repeated for a maximum of four units.
P/NP grading.

70. Survey of Dancing in Selected Cultures (2
units). (Formerly numbered Dance 70.) Studio, three
hours. Introduction to dances and their movement
characteristics in Western and non-Western cultures.

71B. Dance of Indonesia (2 units). (Formerly num-
bered Dance 71B.) Studio, three hours. Dance expe-
rience not required. Technique and repertory from the
court dance tradition (e.g., Java, Bali, Sundan). P/NP or
letter grading.

71C. Dance of Japan (2 units). (Formerly numbered
Dance 71C.) Studio, three hours. Dance experience
dance and repertory from court traditions (e.g., Gagaku).

71D. Dance of India (2 units). (Formerly numbered
Dance 71D.) Studio, three hours. Dance experience
dance and repertory from the court traditions (e.g., Bharata
Natyam).

71E. Dance of Korea (2 units). (Formerly numbered
Dance 71E.) Studio, three hours. Dance experience
dance and repertory from the court traditions (e.g., Ghana,
Guinea, Nigeria).

73B. Dance of Mexico (2 units). (Formerly num-
bered Dance 73B.) Studio, three hours. Dance expe-
rience not required. Introduction to forms and styles
in dances of several ethnographic regions. May be
repeated twice. P/NP or letter grading.

74C. Dance of Spain (2 units). (Formerly numbered
Dance 74C.) Studio, three hours. Dance experience
not required. Technique and repertory of dances from
selected ethnographic regions.

74D. Dance of Anglo- and Celtic-American Tradi-
tion (2 units). (Formerly numbered Dance 74D.) Lab-
oratory, four hours. Introduction to technique and
repertory of vernacular dance traditions of the British
Isles and their derivatives in North America. P/NP or
letter grading.

76B. Dance of Israel (2 units). (Formerly numbered
Dance 76B.) Studio, three hours. Dance experience
not required. Technique and repertory from selected
ethnographic regions.

79. Dance of a Selected Culture (2 units). (For-
merly numbered Dance 79.) Laboratory, four hours.
Introduction to selected dance forms from a culture
area or historical period or of a particular dance
genre. P/NP or letter grading.

80A-80B. Movement as Cultural Behavior (2 units
each). (Formerly numbered Dance 80A-80B.) Studio,
three hours. Limited to world arts and cultures ma-
jors. Studio/laboratory examination of individual and
 cultural factors which affect expressive movement in
 cultures. Emphasis on integrating kinesthetic and
movement awareness of self and others through
cultural perspective.

80C. Fundamentals of Movement. Lecture, three
hours; laboratory, two hours. Introduction to dance/
movement principles and concepts, with primary em-
phasis on developing skills for understanding and
analysis of art of movement. Techniques from Laban
movement analysis work to be used to increase body
instrument’s effectiveness as a source of knowledge.

Upper Division Courses

101A-101B-101C. Intermediate Modern Dance
Technique (2 units each). (Formerly numbered
Dance 101A-101B-101C.) Lecture, two hours; labora-

tory, two hours. Technique levels II and III. Emphasis on
increasing technical skill. Each course may be repeated
once.

C102A-C102B-C102C. Advanced Modern Dance
Technique (2 units each). (Formerly numbered
Dance C102A-C102B-C102C.) Laboratory, four and
one-half hours. Prerequisites: courses C402A-C402B.
Consent of instructor. Technique levels IV and V. Studies
in advanced modern dance technique, with emphasis on
performing skills. Each course may be repeated for a
maximum of six units. Concurrently scheduled with
courses C402A-C402B-C402C. P/NP or letter grading.

103. Improvisation in Dance (2 units). (Formerly
numbered Dance 103.) Studio, four hours. Designed
for world arts and cultures majors. Development of
aesthetic perspective through use of imagery, sound,
and other art. Concentration and projection. May be
repeated twice.

M103D. Contemporary Chicano Theater: Beginning
of Chicano Theater Movement. (Same as Chicana
and Chicano Studies M103D and Theater M103D.)
Analysis and discussion of historical and political
events from 1965 to 1980, as well as theatrical tradi-
tions which led to emergence of Chicano theater.

M103H. Contemporary Chicano Theater; Chicano
Theater since 1980. (Same as Chicana and Chicano
Studies M103H and Theater M103H.) Requisite:
course M103D. Analysis and discussion of Chicano
theater since 1980, including discussion of Chicano
playwrights, magic realism, Chicano comedy, and
Chicano performance art.

582 / World Arts and Cultures
105. Form and Motion in Choreography (2 units). (Formerly numbered 114.) Lecture, one hour; laboratory, three hours. Requisite: course 5. Study of processes derived from a Western theatrical tradition by which movement is generated with specific consideration toward shaping/forming of movement materials. May be repeated twice for credit. P/NP or letter grading.

106A-106B-106C. Intermediate Ballet (2 units each). (Formerly numbered Dance 106A-106B-106C.) Laboratory, four hours. Prerequisites: courses 7A-7B or consent of instructor. Study of techniques and principles of ballet, including partnering, combinations, and repertory. Each course may be repeated once. P/NP or letter grading.

C107A-C107B-C107C. Advanced Ballet (2 units each). (Formerly numbered Dance C107A-C107B-C107C.) Laboratory, four and one-half hours. Prerequisite: course 106C or consent of instructor. Advanced technique in ballet, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C407A-C407B-C407C. P/NP or letter grading.

110. Field Studies in World Arts and Cultures (2 to 4 units). (Formerly numbered 120.) Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be repeated once for credit. P/NP or letter grading.

M112. Selected Topics in Women and the Arts. (Same as Women’s Studies M112.) Lecture, three hours; outside study, nine hours. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and accountabilities, especially for women’s and gender studies majors. P/NP or letter grading.

115. Topics in Choreography (3 units). Lecture, two hours; laboratory, four hours. Requisite: course 5 or 103 or 105. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topic through lectures, readings, and discussions. Topics may include contemporary issues and concerns such as dance, essence, and abstraction; home, history, and memory; and interculturalism; construct identities. May be repeated for a maximum of 12 hours. P/NP or letter grading.

C120. Music as Dance Accompaniment. (Formerly numbered Dance C120.) Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer/composer relationship. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C220.

122. Movement Theories: Variable Topics (2 units). (Formerly numbered Dance 122.) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and feedback for class exercises designed by students stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

123A. Anatomy for the Dancer. (Formerly numbered Dance 123A.) Prerequisite: course 123B. Study of biological and physical principles of human movement as related to dance. Prevention and care of dance injuries.

123C. Projects in Dance Kinesiology. (Formerly numbered Dance 123C.) Prerequisite: course 123B. In-depth study of selected topics introduced in courses 123A and 123B.

125. Principles of Movement Analysis: Labanotation. Analysis. (Formerly numbered Dance 125C.) Lecture, two hours; laboratory, two hours. Prerequisite: course 25. Emphasis on experiential understanding of movement through study of motion factors and elementary concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form.

126. Principles of Movement Analysis: Labanotation. (Formerly numbered Dance 126C.) Lecture, two hours; laboratory, two hours. Prerequisite: course 26. Study of principles of Labanotation. Emphasis on structural and analytical concepts. May be taken for a maximum of four units. May be repeated twice for credit. P/NP or letter grading.

C127. Production Techniques for Dance/Video. (Formerly numbered Dance C127.) Lecture, one hour; laboratory, three hours. Experimental dance/video workshop concentrating on effective technical and aesthetic skills of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and sensitivity to each other’s concerns. Concurrently scheduled with course C227.

130. Selected Topics in World Arts and Cultures. Lecture, three hours. Prerequisite: junior standing. Selected topics dealing with arts and cultures through disciplines of anthropology, art history, dance, folklore, and mythology, music, and theater, and additional multidisciplinary cross-cultural areas. Consult Schedule of Classes for topics to be offered in a specific term. May be repeated twice for credit. P/NP or letter grading.

132A-C132B. Philosophical Bases and Trends in Dance (4 units, 2 units). (Formerly numbered Dance 132A-C132B.) Prerequisites: courses 132A or equivalent experience, consent of instructor. Critical analysis of dance as a creative experience and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with C231B.

C133. Baroque Dance: Analysis and Re-creation. (Formerly numbered Dance 133.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in dance notation of the Baroque era. Study of cultural context, aesthetics, style, music. Social and theatrical dance forms. Concurrently scheduled with course 133B.

134. History of Dance in Culture and Performance. (Formerly numbered Dance 134A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

135. Dance in the U.S. Lecture, two hours; discussion, one hour; laboratory, one hour. Limited to juniors/seniors. Study of dance expression in the U.S., including concert modern dance and ballet, popular idioms, and video dance. Special attention to influences from Africa, Asia, Africa, and Europe. P/NP or letter grading.

140A. Art as Social Action. Limited to juniors/seniors. Discussion of what constitutes an artist’s social responsibility and in what ways art is qualified to engage in social action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

140B. Art as Moral Action. Prerequisite: junior standing. One’s ability to distinguish between right and wrong action is culturally intimated, nurtured, and developed. Study of concepts of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

140C. Seminar: Intercultural and Interdisciplinary Performance. Prerequisite: junior standing. Recent discussions of multiculturalism have demanded a broader base of cultural literacy for society in general and for artists in particular. Moving beyond an emphasis on typifying and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.

141. Lighting Design for Dance Theater. (Formerly numbered Dance 141.) Lecture, four hours; laboratory, two hours. Prerequisite: course 11F or consent of instructor. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed.

141A. The City as a Work of Art. Lecture, three hours. Limited to juniors/seniors. Interdisciplinary approach that focuses on the interplay of social, artistic, and historical visions to indicate the complex physical, emotional, technological, and spiritual dynamics that create and sustain urban life, with emphasis on artist’s role in shaping the spaces which affect people’s lives. Discussion of relevance of urban planning to modern dance, music, po- etry, dance, and visual arts, as well as architecture and city planning. P/NP or letter grading.

142. Advanced Studies in Dance Theater Lighting (2 or 4 units). (Formerly numbered Dance 142.) Lecture, four hours; laboratory, four or more hours. Prerequisite: course 141 or consent of instructor. Analysis of diverse dance theater lighting problems at advanced level and individual development of creative and aesthetic solutions. May be taken for a maximum of four units.

144. Costume and Scenic Design Conception for Dance Theater. (Formerly numbered Dance 144.) Prerequisite: course 11F or consent of instructor. Study of theory of conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication.

145. Advanced Dance Costuming. (Formerly numbered Dance 145.) Lecture, three hours; laboratory, six hours; outside study, 12 hours. Study of dance costume construction as it relates to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratory include design projects currently in production.

148. Advanced Laboratory in Dance Production (1 unit). (Formerly numbered Dance 148.) Laboratory, two hours. Prerequisites or corequisites: courses 141 and 144, or consent of instructor. Further development and application of concepts of lighting, sound, costume, scenic design, and stage practices in departmental dance productions. May be repeated once. P/NP grading.

149. Dance Performance Practicum (1 unit). (Formerly numbered Dance 149.) Laboratory, four hours. Dancing in selected choreography or repertoire in performance. May be repeated for credit. P/NP grading.

150. Viewing Native American Culture. Lecture, three hours; outside study, nine hours. Exploration of artistic, political, folk, and religious images of American Indians as demonstrated in literature, art, anthropology, film, and folklore and contrasted with historic and contemporary views held by Native Americans and the non-Native American. P/NP or letter grading.

151A. Foundations of Dance Education. (Formerly numbered Dance 151.) Lecture, two hours; laboratory, three hours. Designed for world arts and cultures majors. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included.
151B. Dance as Culture in Education. (Formerly numbered Dance 152.) Lecture; two hours; laboratory, two hours. Prerequisite: course 70 or consent of instructor. Theoretical and practical aspects of teaching ethnic dance, especially in higher education.

M152. Asian American Aesthetics. (Same as Asian American Studies M119.) Lecture; four hours; outside study, eight hours; seniors/juniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expression of Asian American aesthetics, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

153. Creative Dance for Children. (Formerly numbered Dance 153; 153A.) Lecture; one hour; laboratory, one hour. Designed for world arts and cultures majors. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression.

C160A-C160B-C160C. Group Dynamics and Process (2 units each). (Formerly numbered Dance C160A-C160B-C160C.) Lecture; one hour; laboratory, three hours. Prerequisite: consent of instructor. Exploration of theory and group dynamics within the context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C260A-C260B-C260C. P/NP or letter grading.

C161A. Ritual and Transformation. Lecture; two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of transformative functions served by various rituals of passage and healing. Class discussion to be informed by Western and non-Western points of view and by therapeutic and ethnomethodological models. Concurrently scheduled with course C261A.

M162P. Destruction and Survival of Indigenous Societies. (Same as Anthropology M162P) Lecture; three hours. Prerequisite: Anthropology 9 or upper division standing or consent of instructor. Clarification of concept and function of destruction and survival; analysis directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnic and genocide for their relevance and validity. P/NP or letter grading.

M166. Beyond the Mexican Mural: Muralism and Community Development. (Same as Chicana and Chicano Studies M166.) Studio course to explore murals as a method of community education, development, and empowerment, using Los Angeles resources as "mural capital of the world." Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, work with community participants, and install a portable mural which is placed in a community site to be determined by the class. P/NP or letter grading.

M176. Whose Monument Where: Course on Public Art. (Same as Chicana and Chicano Studies M176.) Lecture; three hours; outside research. Recommended corequisite: course M166. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" in the 1990s, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

C171B. Dance of Indonesia (2 units). (Formerly numbered Dance C171B.) Studio; three hours. Prerequisite: consent of instructor. Technique and repertoire of a selected dance tradition in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B.

C171C. Dance of Japan (2 units). (Formerly numbered Dance C171C.) Studio; three hours. Prerequisite: course 170C. Technique and repertoire of a selected traditional dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471C.

C171D. Dance of India (2 units). (Formerly numbered Dance C171D.) Studio; three hours. Prerequisite: course 171D. Technique and repertoire of a selected dance tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471D.

C171E. Dance of Korea (2 units). (Formerly numbered Dance C171E.) Studio; three hours. Prerequisite: course 171E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471E.

C172B. Dance of West Africa (2 units). (Formerly numbered Dance C172B.) Studio; three hours. Prerequisite: course 172B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C472B.

C173B. Dance of Mexico (2 units). (Formerly numbered Dance C173B.) Studio; three hours. Prerequisite: course 173B. Dance forms of selected ethnovestiges. May be repeated once. Concurrently scheduled with course C473B.

C174C. Dance of Spain (2 units). (Formerly numbered Dance C174C.) Studio; three hours. Prerequisite: course 174C. Technique and repertoire of a selected region. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474C.

174D. Dance of Anglo- and Celtic-American Tradition (2 units). (Formerly numbered Dance 174D.) Laboratory, four hours. Prerequisite: course 174D or consent of instructor. Technique and repertory of vernacular dance traditions of the British Isles and their derivatives in North America. May be repeated for credit. P/NP or letter grading.

C176B. Dance of Israel (2 units). (Formerly numbered Dance C176B.) Studio; three hours. Prerequisite: course 176B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C476B.

C179. Dance of a Selected Culture (2 units). (Formerly numbered Dance C179.) Laboratory, four hours. Prerequisite: consent of instructor. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C479. P/NP or letter grading.

C180A-C180B. Studies in Dance Ethnography. (Formerly numbered Dance C180A-C180B.) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C279A-C279B. P/NP, or letter grading.

C180A. Dance Event Ethnographies; C180B. Field Research. Prerequisite: course C180A.

181A. Dance Cultures of Asia. (Formerly numbered Dance 181A.) Introduction to dance cultures of Asia. How theories and practices of dance are influenced by historical and social factors and by ideological and aesthetic systems. Lectures illustrated with demonstrations, films, and slides.

181B. Dance in Southeast Asia. (Formerly numbered Dance 181B.) Prerequisite: course 181A or consent of instructor. Survey of selected ritual, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides.

181C. Dance in East Asia. (Formerly numbered Dance 181C.) Prerequisite: course 181A or consent of instructor. Survey of selected dance forms from China, Korea, and Japan and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides.

181D. Dance in South Asia. (Formerly numbered Dance 181D.) Prerequisite: course 181A or consent of instructor. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides.

182. Dance in Africa and the African Diaspora. (Formerly numbered Dance 182.) Survey of dance in sub-Saharan cultures and their new world transformations, with consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various African and African American cultures and genres.

183. Dance in Latino American Cultures. (Formerly numbered Dance 183.) Survey of dance in Latin America, with consideration of role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Latin American cultures and dance genres.

CM184. Dance and Folklore. (Formerly numbered Dance CM184.) (Same as Folklore CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identified through participation in various Mexican-American dance idioms. Concurrently scheduled with course CM284.

C187. Dance in Native American Cultures. (Formerly numbered Dance C187.) Studio course to explore various aspects of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course CM287.

190A-190B. World Arts and Cultures Senior Colloquium. Limited to senior world arts and cultures majors. Comparative and integrative studies in world arts and cultures, with application of concepts and content from the six disciplines of the major. Lecture/lecture seminar format with World Arts and Cultures faculty outside term; topics include arts in a societal context, ethnicity and the individual, and problems and approaches to fieldwork. Faculty-directed individual projects during second term. Fieldwork on some aspect of various arts/expressive behaviors found in ethnic communities of Los Angeles. In Progress grading.

191. Repertory Dance Tour (2 or 4 units). (Formerly numbered Dance 191.) Lecture, two hours; rehearsal or performance, four to six hours. Designed for world arts and cultures majors. Creation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertoire. May be repeated once.

192. Projects in Dance (2 to 4 units). (Formerly numbered Dance 192.) Laboratory, four to six hours (one or two hours may be individualized consulta- tion). Individualized major projects in choreography, performance, production, media. May be repeated for credit. P/NP or letter grading.

196. Senior Project (2 or 4 units). (Formerly numbered Dance 196.) Seminar, two hours; discussion, two hours, or laboratory, to be arranged. Prerequisite: course 100C, senior standing. Advanced project reflecting student's area of concentration. May be taken for a maximum of four units.

C197. Selected Topics in Dance (2 to 4 units). (Formerly numbered Dance C197.) Lecture; discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with course C297.

199. Special Studies in World Arts and Cultures (2 to 8 units). Prerequisites: junior standing, 3.0 GPA in major, consent of instructor. Individual studies for world arts and cultures majors. May be taken for a maximum of eight units.
Graduate Courses

211A-211F. Advanced Choreography. (Formerly numbered Dance C221-225.) Lecture, two hours; laboratory, two hours. Prerequisite: course 210 or consent of instructor. Study of how to choreograph movement for dance. Focus on complex movement patterns and theoretical understanding of role of movement in analysis to increase movement observation skills and describing human movement. Use of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

221. Music for Dance. (Formerly numbered Dance C221.) Prerequisite: course C120. Theory of aesthetic and functional relationship of music to dance.

223. Principles of Dance Kinesiology. (Formerly numbered Dance C223.) Prerequisite: consent of instructor. Scientific basis for movement for dance. Study of anatomical, kinesiological, and physical principles and demands of dance.

225A-225B. Theories of Movement: Labananalysis. (Formerly numbered Dance C225A-225B.) Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

226. Advanced Studies in Notation (2 units). (Formerly numbered Dance C226.) Prerequisite: course 126. Selected problems in directing from noted repertoires; principles of teaching, comparative notation systems, writing projects.

227. Production Techniques for Dance/Video. (Formerly numbered Dance C227.) Lecture, one hour; laboratory, three hours. Experiential dance/video workshop concentrating on effective techniques of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and common understanding for other's concerns. Concurrently scheduled with course C127. Graduate students expected to complete written papers related to reading and viewing assignments and final video project.

230. Research Methods and Bibliography in Dance. (Formerly numbered Dance 230.) Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities.

231A. Basic Issues in Dance and Dance Theory. (Formerly numbered Dance C231A.) Prerequisite: course 100C. Issues common to specialization areas in the field of dance, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc.

231B. Philosophical Bases and Trends in Dance (2 units). (Formerly numbered Dance C231B.) Prerequisite: course 231A. Study of present-day concepts and their relationship to other art forms and cultures. Concurrently scheduled with course C132B.

232. Aesthetics of Dance. (Formerly numbered Dance 232.) Analysis of aesthetic concepts and critical methods used in writing about dance.

233. Baroque Dance: Analysis and Re-creation. (Formerly numbered Dance C233.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in Feuillet notation. Study of cultural context, aesthetics, style, music. Social and theoretical dance forms. Concurrently scheduled with course C133.

234. Renaissance Dance: Analysis and Re-creation. (Formerly numbered Dance C234.) Lecture, two hours; studio, two hours. Prerequisites: courses 134A-134B or consent of instructor. Analysis and re-creation of study of 15th- and 16th-century dance styles from Domenico di Piacenza through Cesare Negri.

240A. Production Arts Seminar. (Formerly numbered Dance 240A.) Seminar, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Examination and research of dance and performer/audience relationships in various historic periods and cultural contexts. Impact of different methodologies, contemporary and historical, on dance performance and visual enhancements.

240B. Production Arts Seminar. (Formerly numbered Dance 240B.) Seminar, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Study of elements of design. Development of a vocabulary for analysis of dance movement and choreography. Communication among collaborating artists. Conceptualizing and producing the design and sound score for a dance production.

240C. Production Arts Seminar. (Formerly numbered Dance 240C.) Seminar, four hours; laboratory, to be arranged. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. S/U or letter grading.

241A-241B. Production Studies (2 units). (Formerly numbered Dance 241D.) Seminar, three hours. Prerequisite: consent of instructor. Corequisites: courses 441, 490. Topics from current problems of students presenting works in progress. Concurrently scheduled with courses C180A-C180B. S/U or letter grading.

251A-251D. Advanced Studies in Dance Education. (Formerly numbered Dance 251A-251D.) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. S/U or letter grading.

251B. Theories and Methods. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies.

251C. Curriculum Development in Varied Dance Settings. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process.

251D. Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail.

261A. Ritual and Transformation. (Formerly numbered Dance 261A.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of transformative functions served by cultural and personal rituals of passage and healing. Class discussion to be informed by Western and non-Western points of view and by therapeutic and ethnographic models. Concurrently scheduled with course C161A.

261B. Self and Culture. (Not the same as course 261B prior to Fall Quarter 1997.) Lecture, two hours; laboratory, two hours. Prerequisite: course 261A. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts.

261C. Dance/Movement Therapy: Dance as Healing and Therapy. (Formerly numbered Dance 261C.) Lecture, two hours; laboratory, two hours. Prerequisites: courses C261A, 261B. Historical overview of various theoretical approaches and corresponding methodologies encompassed by dance/movement therapy, a contemporary creative arts therapy field which encompasses healing and therapeutic aspects of dance.

262A-262B-262C. Seminars: Dance/Movement Therapy. (Formerly numbered Dance 262A-262B-262C.) Seminar, two hours; laboratory, two hours. Prerequisites: courses C261A, 261B-261C. Year-long sequential dance/movement therapy seminars adopting a psychodynamic/somatic-developmental approach to clinical community work with ethnically diverse populations.

279A-C279B. Studies in Dance Ethnography. (Formerly numbered Dance C279A-C279B.) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C180A-C180B. S/U or letter grading.

279B. Field Research. Prerequisite: course C279A.

280A-280B. Advanced Studies in Dance Ethnology. (Formerly numbered Dance C280A-C280B.) Lecture, two hours; laboratory, two hours. Study of field of dance ethnology and in related fields of anthropology, folklore, performance studies, and sociology.

280B. Advanced studies in methodologies and theories to develop dance-focused ethnographic research.

CM28A. Dance and Folklore. (Formerly numbered Dance CM28A.) (Same as Folklore CM28A.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184.

287. Dance in Native American Cultures. (Formerly numbered Dance C287.) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C187.

287. Selected Topics in Dance (2 to 4 units). (Formerly numbered Dance C287.) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with courses C197, S/U or letter grading.
375. Teaching Apprentice Practicum (1 to 4 units). (Formerly numbered Dance 375.) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Directed Professional Activities (2 to 8 units). (Formerly numbered Dance 400.) Prerequisite: consent of graduate adviser. Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

C402A-C402B-C402C. Advanced Modern Dance Technique (2 units each). (Formerly numbered Dance C402A-C402B-C402C.) Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C102A-C102B-C102C. S/U or letter grading.

C407A-C407B-C407C. Advanced Ballet (2 units each). (Formerly numbered Dance C407A-C407B-C407C) Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C107A-C107B-C107C. S/U or letter grading.

441. Dance Production Practicum (2 to 4 units). (Formerly numbered Dance 441.) Laboratory, four to eight hours (one or two hours may be individualized consultation). Prerequisite: consent of instructor. Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of eight units. S/U grading.

451. Teaching Assistant Seminar (2 units). (Formerly numbered Dance 451.) Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

452. Directed Field Study in Dance Education (2 to 8 units). (Formerly numbered Dance 452.) Seminar, one hour; field study, two hours minimum. Prerequisite: consent of instructor. Directed field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading.

C471B. Dance of Indonesia (2 units). (Formerly numbered Dance C471B.) Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sundanese). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B.

C471C. Dance of Japan (2 units). (Formerly numbered Dance C471C.) Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected dance tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C.

C471D. Dance of India (2 units). (Formerly numbered Dance C471D.) Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected dance tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D.

C471E. Dance of Korea (2 units). (Formerly numbered Dance C471E.) Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected dance tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

C472B. Dance of West Africa (2 units). (Formerly numbered Dance C472B.) Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

C473B. Dance of Mexico (2 units). (Formerly numbered Dance C473B.) Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnic regions. May be repeated once. Concurrently scheduled with course C173B.

C474C. Dance of Spain (2 units). (Formerly numbered Dance C474C.) Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

C476B. Dance of Israel (2 units). (Formerly numbered Dance C476B.) Studio, three hours. Prerequisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

C479. Dance of a Selected Culture (2 units). (Formerly numbered Dance C479.) Laboratory, four hours. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C179. S/U or letter grading.

480. Seminar: Research Topics (2 units). (Formerly numbered Dance 480.) Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

490. Projects in Choreography and Performance (2 to 8 units). (Formerly numbered Dance 490.) Tutorial, one three-hour rehearsal per unit per week minimum. Prerequisite: course 240C or consent of instructor. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units.

498. Professional Internship in Dance (4, 8, or 12 units). (Formerly numbered Dance 498.) Full- or part-time supervised fieldwork. Prerequisites: advanced standing in M.F.A. program, consent of instructor. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties.

596A. Directed Individual Study or Research (2 to 8 units). (Formerly numbered Dance 596A.)

596R. Directed Study or Research in a Hospital or Clinic (2 to 8 units). (Formerly numbered Dance 596R.) S/U grading.

597. Preparation for Master’s Comprehensive Examination (2 to 8 units). (Formerly numbered Dance 597.) Preparation for M.A. or M.F.A. comprehensive examination. S/U grading.

Appendix A

Regulations and Policies

Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University’s student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Los Angeles, CA 90024-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TDD (310) 206-6083.

Inquiries regarding Americans with Disabilities Act (ADA) or 504 Compliance may be directed to Dr. Douglas Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1405, voice (310) 825-2242, TTY (310) 206-3349.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the University of California Policies Applying to Campus Activities, Organizations, and Students (available in 1206 Murphy Hall) for further information and procedures.

*Source: A national survey of a representative group of colleges conducted by the National Association of Colleges and Employers, representing the 80 percent range of offers for April 1997 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

Student Conduct: Violation of University Policies

Students are subject to disciplinary action for several types of misconduct or attempted misconduct while on University property or in connection with official University functions, including but not limited to cheating, multiple submission (i.e., the resubmission of any work which has been previously submitted for credit in identical or similar form in one course to fulfill any of the requirements of another course without the prior consent of the current instructor), fabrication, plagiarism, or facilitating academic dishonesty; fabricating information or knowingly furnishing false information or reporting a false emergency to the University or to University officials in the performance of their duties; forgery, alteration, or misuse of any University document, record, key, electronic device, or identification; theft of, conversion of, damage to, or destruction of any property of the University or property of others while on University premises; or possession of any property of the University or others stolen while on University premises; theft or other abuse of computing facilities or computer time, including but not limited to unauthorized entry into a file to use, read, or change the contents or any other purpose; unauthorized transfer of a file; unauthorized use of another individual’s identification or password; use of computing facilities to interfere with the work of another student, faculty member, or University official; use of computing facilities to interfere with a University computing system; unauthorized entry to, possession of, receipt of, duplication of, or use of the University’s name, insignia, or seal; unauthorized entry to, possession of, receipt of, or use of University properties, equipment, resources, or services; violation of policies, regulations, or rules governing University-owned or operated housing facilities or leased housing facilities located on University property; physical abuse, including but not limited to rape, sexual assault, sexual offenses, and other physical assault; threats of violence or conduct that threatens the health or safety of any person; sexual harassment; stalking behavior in which an individual willfully, maliciously, and repeatedly engages in a knowing course of conduct directed at a specific person which reasonably and seriously alarms, torments, or terrorizes the person, and which serves as the basis of the infliction of pain; the use of “fighting words” when they constitute harassment; hazing or any method of initiation or preinitiation into a campus organization or any activity engaged in by the organization or members of the organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any student or other person; obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities; disorderly or lewd conduct; participation in a disturbance of the peace or unlawful assembly; failure to identify oneself to, or comply with directions of, University officials or other public officials acting in the performance of their duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties; unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances identified in Federal and State Laws or Regulations; manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations; possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices except as expressly permitted by law; possession, use, or manufacture of a firearm or other weapon specified in campus regulations; violation of the conditions contained in the terms of a disciplinary action; violation of the conditions contained in a written Notice of Emergency Suspension or violation of
emergency regulations or procedures during a declared state of emergency; and violations of other University policies or campus rules and regulations.

Further information on these infractions and on the procedures concerning student discipline are contained in the University of California Policies Applying to Campus Activities, Organizations, and Students; Universitywide Student Conduct Harassment Policy; UCLA Student Conduct Code of Procedures; and UCLA Activity Guidelines. Copies of these documents are available in the Office of the Dean of Students (1206 Murphy Hall), Center for Student Programming (105 Kerckhoff Hall), and Student Psychological Services (A3-062 CHS). Also see the Office of the Dean of Students website at http://www.saonet.ucla.edu/dos/.

In addition, the Office of the Dean of Students publishes “Official Notices” in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

Rape and Other Forms of Sexual Assault

UCLA does not tolerate sexual assault in any form, including acquaintance or date rape. Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated, the campus pursues disciplinary actions which may include sanctions up to and including dismissal from the University.

A student charged with sexual assault can be prosecuted under California criminal statutes and disciplined under the campus student conduct policies and regulations. Even if the criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

Definitions

A student who individually, or in concert with others, participates in any of the following misconduct while on University property or in connection with official University functions is subject to University discipline (refer to the University of California Policies Applying to Campus Activities, Organizations, and Students which is available from the Office of the Dean of Students, 1206 Murphy Hall, and on the website at http://www.saonet.ucla.edu/dos/). The following language describes specific conduct which, at UCLA, may subject a student to University discipline:

Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person.

Rape

For the purposes of this policy, rape refers to “rape” as defined by the California Penal Code (as it may be amended from time to time). The acts summarized below are among the behaviors prohibited by the California Penal Code:

1. Sexual intercourse against a person’s will accomplished by force or threats of bodily injury.
2. Sexual intercourse against a person’s will where the person has reasonable fear that she (or he) or another will be injured if she (or he) does not submit to the intercourse.
3. Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, due to alcohol or drugs, and this condition was known, or reasonably should have been known by the accused.
4. Sexual intercourse where the person is incapable of resisting because he or she, at the time, is unconscious or asleep, and this is known to the accused.

Other Forms of Sexual Assault

The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); rape by foreign object (forced penetration by a foreign object, including a finger); and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations where the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs and this condition was known, or reasonably should have been known by the accused.

Note: For the purpose of this policy, students should understand that
1. Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant.
2. Intoxication of the assailant shall not diminish the assailant’s responsibility for sexual assault.

If a Person Has Been Raped or Sexually Assaulted

Those who believe that they are the victims of rape or other forms of sexual assault should
1. Immediately call the police department. If possible, call the UCLA Police Department at (310) 825-1491 or 911.
2. Get medical attention. Campus police will provide transportation to the Santa Monica Hospital Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge.

Utilize campus and community support services:
1. Contact a Rape Services Consultant (RSC) at the Women’s Resource Center. RSCs have expertise in working with victims of rape or sexual assault. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist UCLA faculty, staff, and students regardless of where or when the assault occurred. For assistance, contact the Women’s Resource Center at (310) 206-8240 or go to 2 Dodd Hall and ask to speak to an RSC.
2. Contact the Rape Treatment Center at Santa Monica Hospital (310-319-4000) for free emergency medical treatment and counseling services.

Campus Discipline Process When the Assailant Is a Student

Those who believe that they are the victims of rape or other forms of sexual assault by a student on University properties or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall.

Cases referred to the Office of the Dean of Students will be treated under the hearing procedures set forth in the UCLA Student Conduct Code of Procedures. Where the allegation is of rape or other forms of sexual assault, and the case is referred to the Student Conduct Committee, the following additional procedures shall apply:

1. The complainant shall be entitled, for support, to have up to two persons of the complainant’s choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person’s attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify before the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.
2. The complainant shall have the right to be present during the entire hearing, notwithstanding the fact that the complainant is to be called as a witness.
3. Evidence of the complainant’s past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant’s sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the panel before the complainant testifies.
4. The hearing shall be closed to spectators.
Harassment

Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

Definition

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

(1) Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;

(2) Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; OR

(3) Such conduct has the purpose or effect of unreasonably interfering with an individual’s performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration will be given to the record of the incident as a whole and to the totality of the circumstances, including the nature of the sexual advances and the context in which the alleged incidents occurred (University of California Policies Applying to Campus Activities, Organizations, and Students, Section 160.00).

Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender’s supervisor and/or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant’s status at the University at the time of the alleged incident:

(1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627 (for faculty, staff, and students)

(2) Women’s Resource Center, 2 Dodd Hall, (310) 825-3945 (for faculty, staff, and students)

(3) Office of Residential Life, Residential Life Building, (310) 825-3401 (for students)

(4) Office of International Students and Scholars, Tom Bradley International Center on the west side of campus, (310) 825-1681 (for international students)

(5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985 (for students)

(6) Office of Vice Chancellor — Academic Personnel, 2147 Murphy Hall, (310) 206-9345 (for faculty, including non-Senate academic appointees and student academic appointees when acting in the capacity of their non-Senate appointments)

(7) Campus Human Resources/Employee and Labor Relations Division, 200 UCLA Wilshire Center, (310) 794-0859 (for campus staff employees and students when acting in the capacity of their staff appointments)

(8) Medical Center Human Resources Office, 924 Westwood Boulevard (Bank of America Building), Suite 200, (310) 794-0500 (for Medical Center staff employees and students when acting in the capacity of their staff appointments)

(9) UCLA Extension Dean’s Office, 770 UCLA Extension (UNEX), (310) 825-5603 (for UCLA Extension faculty, staff employees, and students)

Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person’s sense of worth and interferes with one’s ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The University of California Policies Applying to Campus Activities, Organizations, and Students (hereafter referred to as Policies) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the Policies.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the Policies.

Further, under specific circumstances described in the Universitywide Student Conduct Harassment Policy, students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this Policy are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

(1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627

(2) Women’s Resource Center, 2 Dodd Hall, (310) 825-3945

(3) Office of Residential Life, Residential Life Building, (310) 825-3401

(4) Office of International Students and Scholars, Tom Bradley International Center on the west side of campus, (310) 825-1681

(5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985

(6) Office of Fraternity and Sorority Relations, 118 Men’s Gym, (310) 825-6322

Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the Universitywide Student Conduct Harassment Policy, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this Policy and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.
Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the UCLA Faculty Handbook (copies are available in the Academic Personnel Office, 3109 Murphy Hall). Part II A outlines faculty obligations to students and reads as follows:

Teaching and Students

Ethical Principles: “As a teacher, the professor encourages the free pursuit of learning in students; holds before them the best scholarly standards of the discipline; demonstrates respect for the student as an individual and adheres to the proper role as intellectual guide and counselor; makes every reasonable effort to foster honest academic conduct and to assure that the evaluation of students reflects their true merit; respects the confidential nature of the relationship between professor and student; avoids any exploitation of students for private advantage and acknowledges significant assistance from them; and protects their academic freedom.” (from 1966 AAUP statement)

Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (d) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds, or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

(3) Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

(4) Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

Charges of Violation

If a student has reason to believe that a faculty member has violated the code, the student may consult with a member of the Academic Senate Grievance and Disciplinary Procedures Committee (3125 Murphy Hall, 310-825-3852) for help in deciding on appropriate action. If the student believes that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with a member of the Academic Senate Grievance and Disciplinary Procedures Committee, file such a charge in person if the student continues to feel it is warranted.

Residence for Tuition Purposes

Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year duration period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents or students were not enrolled in a regular session at any University of California campus prior to fall 1993, they are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse or their parents.

Requirements for Financial Independence

Students are considered “financially independent” if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, or a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the two tax years immediately preceding the term for which they are requesting resident classification, and they can demonstrate self-sufficiency for those years and the current year. Note: Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

Establishing Intent to Become a California Resident

Indications of students’ intent to make California their permanent residence can include the following: registering to vote and voting in California elections; designating California as their permanent address on all school and employment records, including military records if they are in the military service; obtaining a California driver’s license or, if they do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence; establishing a California residence in which they keep their personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.
General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent's right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa which precludes them from establishing domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

(1) Divorced or Separated Parents. Students may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

(2) Parent of Minor Moves from California. Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) they remained in California after their parent(s) departed, (b) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (c) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) Two-Year Care and Control. Students may be entitled to resident status if they are U.S. citizens or eligible aliens and they have lived continuously with an adult who is not their parent for at least two years prior to the residence determination date. The adult with whom they are living must have been responsible for their care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

(1) Member of the Military. If students are members of the U.S. military stationed in California on active duty, unless they are assigned for educational purposes to a state-supported institution of higher education, they may be exempt from the nonresident tuition fees until they have lived in California long enough to become a resident. They must provide the residence deputy on campus with a statement from their commanding officer or personal officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

(2) Spouse or Other Dependents of Military Personnel. Students are exempt from payment of the nonresident tuition fee if they are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until they have lived in California long enough to become a resident. Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

(3) Child or Spouse of Faculty Member. To the extent funds are available, if students are unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

(4) Child or Spouse of University Employee. Students may be entitled to resident classification if they are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Their parent's or spouse's employment status with the University must be ascertained each term.

(5) Child of Deceased Public Law Enforcement or Fire Suppression Employee. Students may be entitled to a waiver of the nonresident tuition fee if they are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

(6) Dependent Child of a California Resident. If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Temporary Absences

If persons are nonresident students who are in the process of establishing a residence for tuition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.

If persons are students who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:

(1) Continue to use a California permanent address in all records — educational, employment, military, etc.

(2) Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.

(3) Retain a California voter's registration and vote by absentee ballot.

(4) Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

Petition for Resident Classification

Students MUST PETITION IN PERSON at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which they intend to be classified as residents.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.
Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447) or to the Legal Analyst — Residence Matters, 300 Lakeside Drive, 7th Floor, Oakland, CA 94612-3565. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 45 days of notification of the residence deputy’s final decision.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar’s Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress requirements listed below, they should contact the Financial Aid Office immediately for further advising.

Undergraduate Students

Qualitative Standard

The qualitative standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of regular sessions. It may differ from the college/school requirement. All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in each of their first two academic years at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 84 units by the end of the ninth term, 120 units by the end of the twelfth term, 156 units by the end of the fifteenth term, and 180 units by the end of the seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of units for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 84 transfer units would have only eight terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 48 units if they attended UCLA for six terms). They would then have only 11 terms of financial aid eligibility.

Nonstandard Enrollment

Part-time students’ progress is measured by a modified schedule, and aid is similarly modified. Summer enrollment counts as a term of enrollment for the following year if students apply the units earned toward graduation. Accommodation is made for students enrolled in a joint degree program.

Successful Completion

To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in a course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

Withdrawal and Cancellation

Withdrawal from a term in which students receive financial aid applies as a term attended and works to their disadvantage on the units-per-term schedule. Cancellation of registration (prior to the first day of classes), however, does not apply as a term attended. Refund and payback of aid received is based on published schedules and the date students officially withdraw or cancel.

Disqualification and Reinstatement

The Financial Aid Office monitors satisfactory progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

If students have not met the requirements shown on the schedule, their financial aid is discontinued until the deficiencies are satisfied. They may use Summer Sessions or completion of extra units during regular academic terms to make up deficiencies.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.

Appeal Process

Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected their ability to meet the requirements. The committee evaluates the request based on the rationale and evidence provided.

Graduate Students

Qualitative Standard

The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

Quantitative Standard

Students must successfully complete at least 12 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 12 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

Disqualification and Appeal Process

If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

Period of Eligibility

The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determin-
Grading Regulations

Assigning a Grade

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise cheating, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing disciplinary action, reports back to the instructor of the course involved, the nature of the plagiarism or cheating.

In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be considered as plagiarism or cheating.

Grade Complaints

A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see “Faculty Code of Conduct” earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

Correction of Grades

All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change, or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

Policy on Alternate Examination Dates

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved.

1. In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

2. Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 1172 Career Center, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

3. Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

Undergraduate Final Examinations

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

Disclosure of Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act, the California Education Code, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right (1) to inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) to have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) to inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) to seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) to file complaints with the U.S. De-
partment of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, address (local/mailing, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletic teams), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailing, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this "public information" released and published may so indicate on the Decline to Release form available from Academic Record Services, 1134 Murphy Hall. Students who do not wish certain items of their parents or next of kin are made available to the UCLA University Relations Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for University Relations Information Restriction form available from Enrollment and Degree Services, 1113 Murphy Hall.

**UCLA Retention/Graduation Rates and Time to Degree**

Retention and graduation rates at UCLA are at all-time high levels for the campus and among the highest rates observed at public universities anywhere in the country. One-year retention rates for complete undergraduate cohorts have been above 90 percent for more than a decade and continue to rise. Over 94 percent of new freshmen and 92 percent of new transfers who entered UCLA from Fall Quarter 1993 to Fall Quarter 1995 were still enrolled at UCLA one year later.

Graduation rates have also increased steadily. Four-year, five-year, and six-year graduation rates for complete cohorts of entering fall freshmen have averaged 37, 72, and 78 percent respectively over the past three years, up from 26, 64, and 72 percent respectively for freshmen entering in Fall Quarter 1985. More than 80 percent of all 1987 fall freshmen have graduated from UCLA; final graduation rates of better than 80 percent are projected for all freshmen cohorts entering since that date. Two-, three-, and four-year graduation rates for complete cohorts of entering fall transfers have averaged 34, 70, and 78 percent respectively over the past three years, up from 19, 60, and 73 percent respectively for transfers entering in Fall Quarter 1985. More than 80 percent of all 1990 fall transfers have now graduated from UCLA; final graduation rates of better than 80 percent are likely to be observed for all transfer cohorts arriving since that date. Graduation rates listed above refer exclusively to degrees awarded by UCLA. Students in entering cohorts who transfer to and graduate from another UC campus or university are not included.

Time to degree for undergraduates at UCLA has declined significantly during the 1990s. During the past three years (1993-94 to 1995-96), more than 10,000 baccalaureate degrees were awarded to students who entered UCLA directly from high school. The average number of quarters registered at UCLA was 13.27, declining from an average of 13.74 quarters registered for similar graduates in 1989-90. Among the recent graduates, 46 percent were registered for six quarters or less (i.e., two years or less), 62 percent were registered for seven quarters or less, 73 percent were registered for eight quarters or less, and 91 percent were registered for 15 quarters or less (i.e., three years or less).

**Campus Security Information**

**UCLA Police Department**

The UCLA Police Department (310-825-1491; http://www.ucpd.ucla.edu), located at Westwood Plaza and Circle Drive South, has 59 sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles all criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

**Incident Reporting**

UCLA police officers have primary jurisdiction over the UCLA campus and the Center for the Health Sciences. The City of Los Angeles Police Department does not handle calls for service on campus. All requests for police service should be made to the UCLA Police Department (Circle Drive South and Westwood Plaza). All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. The University endorses a policy that strongly encourages victims to report all incidents to the department anytime of the day or night. Crimes occurring off campus should be reported immediately to the law enforcement agency with proper jurisdiction over that area.

Police, fire, or medical EMERGENCIES can be reported by dialing 911 from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.
Community Service Officers

The UCLA Police Department employs approximately 200 student community service officers (CSOs) who are the “eyes and ears” (trained observers) of the department and act as non-intervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department’s Communications Center and provide a direct link to police, fire, or medical aid. The CSO Division provides over 20 different services in response to 911 calls to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night.

Additionally, the department employs unarmed security personnel to assist in crime prevention efforts in the Center for the Health Sciences and UCLA Medical Plaza. These guards provide on-site security and assistance for all who use the facilities.

Crime Prevention

The UCLA Police Department has established a Community-Oriented Policing (COP) Program. One component of that program — crime prevention — provides the best measure of protection. Therefore, the department supports a proactive Crime Prevention Unit that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Brochures and literature on crime prevention and personal safety are available. Throughout the year, the crime prevention officer and the student housing offices present personal safety workshops and many other crime awareness programs. The Women’s Resource Center (WRC) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. The WRC reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. The WRC works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity which pose a potential threat to the campus are brought immediately to the attention of the community through Campus Alert Bulletins. With the combined efforts of the Crime Prevention Unit, the Women’s Resource Center, and the CSOs, incidents of sexual assault on campus have been reduced.

Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs which are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Student Psychological Services (310-825-7985) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used in connection with any academic determination or as a basis for disciplinary proceedings.
Policies

UCLA has been designated drug free, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Police Department and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, Crime Alert Bulletins are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple commonsense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities come under the jurisdiction of their local police department. The department does not compile statistical data on criminal activity that occurs in such facilities, including off-campus housing facilities not operated by the University. Information related to specific locations should be requested from the law enforcement agency with proper jurisdiction over those areas.

Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent find it easy to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Police Department. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

Appendix B

University Administrative Officers

Terms of Regents appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Kathryn T. McClymond) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

Regents Ex Officio

Governor of California
Pete Wilson
Lieutenant Governor of California
Gray Davis
Speaker of the Assembly
Cruz M. Bustamante
State Superintendent of Public Instruction
Delaine Eastin
President of the Alumni Association of the University of California
Judith Willick Levin
President of the Alumni Association of the University of California
Charles J. Soderquist
President of the University
Richard C. Atkinson

Appointed Regents

William T. Bagley (2002)
Roy T. Brophy (1998)
Frank W. Clark, Jr. (2000)
Ward Connerly (2005)
John G. Davies (2004)
Tirso del Junco (2000)
Alice J. Gonzales (1998)
S. Sue Johnson (2002)

Meredith J. Khachigian (2001)
Howard H. Leach (2001)
David S. Lee (2006)
Velma Montoya (2005)
Gerald L. Parsky (2008)
Peter Preuss (2008)
Tom Sayles (2006)
Kathryn T. McClymond, Student Regent (1998)

Faculty Representatives to the Board of Regents

Duncan Mellichamp
Sandra Weiss

Officers of The Regents

President of The Regents
Richard C. Atkinson
Chair of The Regents
Tirso del Junco
Vice Chair of The Regents
Meredith J. Khachigian
General Counsel
James E. Holst
Secretary
Leigh Trivette
Treasurer
Patricia A. Small

Office of the President

President of the University
Richard C. Atkinson
Provost and Senior Vice President — Academic Affairs
C. Judson King
Senior Vice President — Business and Finance
V. Wayne Kennedy
Vice President — Agriculture and Natural Resources
W.R. Gomes
Vice President — Clinical Services Development
William H. Gurtner
Vice President — Health Affairs
Cornelius L. Hopper, M.D.
Vice President — University and External Relations
Bruce B. Darling

Officers Emeriti

President Emeritus of the University and Professor Emeritus of Education
David P. Gardner
President Emeritus of the University and Professor Emeritus of Business Administration
Clark Kerr
President Emeritus of the University and Professor Emeritus of Political Science
J.W. Peltason
President Emeritus of the University and Professor Emeritus of Physics
David S. Saxon
Chancellors of the Campuses

Chancellor at Berkeley
Robert M. Berdahl

Chancellor at Davis
Larry N. Vanderhoef

Chancellor at Irvine
Laurel L. Wilkening

Chancellor at Los Angeles
Albert Carnesale

Chancellor at Riverside
Raymond L. Orbach

Chancellor at San Diego
Robert C. Dynes

Chancellor at San Francisco
Haile T. Debas, Interim

Chancellor at Santa Barbara
Henry T. Yang

Chancellor at Santa Cruz
M.R.C. Greenwood

University Professors

J. Michael Bishop, University Professor Emeritus, San Francisco, Department of Microbiology and Immunology

E. Margaret Burbridge, University Professor Emerita, San Diego, Department of Physics

Marvin L. Cohen, University Professor, Berkeley, Department of Physics

Donald J. Cram, University Professor Emeritus, Los Angeles, Department of Chemistry and Biochemistry

Gerard Debreu, University Professor Emeritus, Berkeley, Departments of Economics and Mathematics

Robert B. Edgerton, University Professor, Los Angeles, Departments of Anthropology and Psychiatry and Biobehavioral Sciences

Sandra M. Faber, University Professor, Santa Cruz, Department of Astronomy

Richard Karp, University Professor Emeritus, Berkeley, Departments of Electrical Engineering and Computer Sciences, Industrial Engineering and Operations Research, and Mathematics

Murray Krieger, University Professor Emeritus, Irvine, Department of English and Comparative Literature

Yuan T. Lee, University Professor Emeritus, Berkeley, Department of Chemistry

Glenn T. Seaborg, University Professor Emeritus, Berkeley, Lawrence Berkeley Laboratory

S. Jonathan Singer, University Professor Emeritus, San Diego, Department of Biology

Neil J. Smelser, University Professor Emeritus, Berkeley, Department of Sociology

Edward Teller, University Professor Emeritus, Livermore, Lawrence Livermore Laboratory

Charles H. Townes, University Professor Emeritus, Berkeley, Department of Physics

Sherwood L. Washburn, University Professor Emeritus, Berkeley, Lawrence Berkeley Laboratory

John R. Whinnery, University Professor Emeritus, Berkeley, Department of Electrical Engineering and Computer Sciences

Hayden White, University Professor Emeritus, Santa Cruz, Board of Studies in History of Consciousness

UCLA Administrative Officers

Chancellor
Albert Carnesale, Ph.D.

Executive Vice Chancellor
Charles F. Kenne1l, Ph.D.

Administrative Vice Chancellor
Peter W. Blackman, J. D.

Vice Chancellor — Academic Affairs and Dean of Graduate Division
Claudia Mitchell-Kernan, Ph.D.

Vice Chancellor — Academic Personnel
Norman Abrams, J.D.

Vice Chancellor — Legal Affairs
Joseph D. Mandel, LL.B.

Vice Chancellor — Research Programs
C. Kumar N. Patel, Ph.D.

Vice Chancellor — Student Affairs
Winston C. Doby, Ed.D.

Chief of Staff
Gloria K. Stypinski

Director of UCLA Medical Center
Michael Karpf, M.D.

University Librarian
Gloria S. Werner, M.L.

Dean of International Studies and Overseas Programs
John N. Hawkins, Ph.D.

Dean of UCLA Extension and Continuing Education
Robert Lapiner, Ph.D.

Deans of UCLA Colleges and Schools

School of the Arts and Architecture
Daniel Neuman, Ph.D.

School of Dentistry

Graduate School of Education and Information Studies
Theodore R. Mitchell, Ph.D.

School of Engineering and Applied Science
A.R. Frank Wazzan, Ph.D.

School of Law
Susan W. Prager, J.D.

College of Letters and Science
Provost
Brian P. Copenhaver, Ph.D.

Division of Humanities
Pauline R. Yu, Ph.D.

Division of Life Sciences
Frederick A. Eiserling, Ph.D.

Division of Physical Sciences
Roberto Peccei, Ph.D.

Division of Social Sciences
Scott L. Waugh, Ph.D.

John E. Anderson Graduate School of Management
William P. Pierskalla, Ph.D.

School of Medicine
Gerald S. Levey, M.D.

School of Nursing
Marie J. Cowan, R.N., Ph.D.

School of Public Health
Abdelmonem A. Afifi, Ph.D.

School of Public Policy and Social Research
Barbara J. Nelson, Ph.D.

School of Theater, Film, and Television
Gilbert Cates, M.A.
Appendix C

Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University’s three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or “chairs,” which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 126 endowed chairs which have been approved by the Office of the President of the University of California, as follows. (Asterisks indicate new chairs which have been approved by the Office of the President since publication of the 1995-97 UCLA General Catalog.)

School of the Arts and Architecture
S. Charles Lee Chair in Architecture and Urban Design
Harvey S. Perloff Chair
UCLA Art Council Professorship of Art
*Presidental Chair in Music and Interactive Arts

Graduate School of Education and Information Studies
Allan Murray Cartter Chair in Higher Education
George F. Kneller Chair in Education and Philosophy

School of Engineering and Applied Science
L.M.K. Boelter Chair in Engineering
Norman E. Friedmann Chair in Knowledge Sciences
Hughes Aircraft Company Chair in Electrical Engineering
Hughes Aircraft Company Chair in Manufacturing Engineering
Levi James Knight, Jr., Chair in Engineering
Nippon Sheet Glass Company Chair in Materials Science
Northrop Chair in Electrical Engineering/Electromagnetics
Ralph M. Parsons Chair in Chemical Engineering
*Ben Rich Lockheed Martin Chair in Aeronautics
Rockwell International Chair in Engineering
TRW Chair in Electrical Engineering

School of Law
Harry Graham Balter Chair in Law
Connell Professorship of Law
Richard C. Maxwell Chair in Law
Arjay and Frances Fearing Miller Chair in Law
David G. and Dallas P. Price Chair in Law Security Pacific Bank Chair
William D. Warren Chair in Law

College of Letters and Science
Maurice Amado Chair in Sephardic Studies
Armenian Educational Foundation Chair in Modern Armenian History
Henry J. Bruman Chair in German History
Ralph Bunche Chair in International Studies
Edward W. Carter Chair in Netherlandish Art
James S. Coleman Chair in International Development Studies
Courtaulds Chair in Chemistry
Mr. and Mrs. C.N. Flint Professorship of Philosophy
Gloria and Paul Griffin Chair in Philosophy
Armand Hammer Chair in Leonardo Studies
Marvin Hoffenberg Chair in American Politics and Public Policy
Franklin D. Murphy Chair in Italian Renaissance Studies
Narekatsi Chair in Armenian Studies
*1939” Club Chair
President’s Chair in Developmental Immunology
Hans Reichenbach Chair in Scientific Philosophy
David S. Saxon Presidential Chair in Physics
Louis B. Slichter Chair in Geophysics and Planetary Physics
Charles Speroni Chair in Italian Literature and Culture
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
UCLA Foundation Chair
Eugen Weber Chair in Modern European History
*Alexander von Humboldt Endowed Chair in Geography
Saul Winston Chair in Organic Chemistry

John E. Anderson Graduate School of Management
Allstate Chair in Insurance and Finance
Andersen Worldwide Chair in Management
John E. Anderson Chair in Management
Marion Anderson Chair in Management
California Chair in Real Estate and Land Economics
Edward W. Carter Chair in Business Administration
*William M. Cockrum Professorship in Entrepreneurial Finance
James A. Collins Chair in Management
Warren C. Cordner Chair in Money and Financial Markets
Ernst and Young Chair in Accounting
Henry Ford II Chair in International Management

Goldyne and Irwin Hearsh Chair in Money and Banking
IBM Chair in Computers and Information Systems
Joseph Jacobs Chair in Entrepreneurial Studies
*Neil Jacoby Chair in Management
Kommerstad Chair in Financial Markets
Harry and Elsa Kunin Chair in Business and Society
William E. Leonhard Chair in Management
Chauncey J. Medberry Chair in Management
*Howard Noble Chair in Management
Paine Chair in Management
*George Robbins Chair in Management
Sanford and Betty Sigoloff Chair in Corporate Renewal
Times Mirror Chair in Management Strategy and Policy
*Ho-Su Wu Chair in Management

School of Medicine
William S. Adams, M.D., Chair in Medicine
Louis D. Beaumont Chair in Surgery
Bowyer Professorship of Medical Oncology
Judson Braun Chair in Biological Psychiatry
Joseph Campbell Chair in Child Psychiatry
Iris Cantor Chair in Breast Imaging
Edward W. Carter Chair in Internal Medicine
Castera Chair in Cardiology
Tony Coelho Chair in Neurology
Crump Chair in Medical Engineering
M. Philip Davis Chair in Microbiology and Immunology
Dumont-UCLA Chair in Transplantation Surgery
Max Factor Family Foundation Chair in Nephrology
Charles Kenneth Feldman Chair in Ophthalmology
Dolly Green Chair in Ophthalmology
Maud Cady Guthman Chair in Cardiology
Chizuko Kawata Chair in Cardiology
George F. Kneller Chair in Family Medicine
Grace and Walter Lantz Endowed Chair
Eleanor I. Leslie Chair in Neuroscience
William P. Longmire, Jr., Chair in Surgery
Markham Chair in Neurology
Della Martin Chair in Psychiatry
Sherman M. Mellinkoff Distinguished Professor in Medicine Endowed Chair
James H. Nicholson Chair in Pediatric Cardiology
Samuel J. Pearlman, M.D., and Della Z. Pearlman Chair in Head and Neck Surgery
Thomas P. and Katherine K. Pike Chair in Alcohol Studies
Elizabeth R. and Thomas E. Plott Chair in Gerontology
Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to five Academic Senate faculty members. The highly prized awards are presented at the annual UCLA Alumni Association Awards Ceremony, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 are to be named the Luckman Distinguished Teaching Awards.

1961
John F. Barron (Economics)
Hector E. Hall (Physiology)
Kenneth N. Trueblood (Chemistry and Biochemistry)

1962
Charles W. Hoffman (Germanic Languages)
Thomas P. Jenkin (Political Science)
Ken Nobe (Chemical Engineering)

1963
Carl W. Hagge (Germanic Languages)
Wendell P. Jones (Education)
Robert H. Sorgenfrey (Mathematics)
Saul Winstein (Chemistry and Biochemistry)

1964
Mostafa A. El-Sayed (Chemistry and Biochemistry)
Leon Howard (English)
Moshe F. Rubinstein (Civil and Environmental Engineering)

1965
E.A. Carlson (Biology)
W.R. Hitchcock (History)
Allen Purdum (Psychology)
William R. Romig (Microbiology and Molecular Genetics)

1966
George A. Bartholomew (Biology)
William P. Gerberding (Political Science)
Hans Meyerhoff (Philosophy)
Joseph E. Spencer (Geography)

1967
Basil Gordon (Mathematics)
J.A.C. Grant (Political Science)
William Matthews (English)
David S. Saxon (Physics and Astronomy)
E.K.L. Upton (Physics and Astronomy)

1968
Edward W. Graham (Chemistry and Biochemistry)
W. James Popham (Education)
Sydney C. Rittenberg (Microbiology and Molecular Genetics)
Robert P. Stockwell (Linguistics)
Fred N. White (Physiology)

1969
Robert J. Finkelstein (Physics and Astronomy)
Douglas S. Hobbs (Political Science)
J.E. Phillips (English)
Raymond M. Redhelfer (Mathematics)
Margret I. Sellers (Microbiology and Immunology)

1970
Ehrhard Bahr (Germanic Languages)
Joseph Cascareno (Biology)
B. Lamar Johnson (Education)
Daniel Kivelson (Chemistry and Biochemistry)
Richard D. Lehan (English)

1971
Vernon E. Denny (Chemical Engineering)
Peter N. Ladehoff (Linguistics)
Arthur D. Schwabe (Medicine)
Duane E. Smith (Political Science)
Andreas Tietze (Near Eastern Languages and Cultures)

1972
Barbara K. Keogh (Education)
James N. Miller (Microbiology and Immunology)
David S. Rodes (English)
Ned A. Shearer (Speech)
Charles A. West (Chemistry and Biochemistry)

1973
Kirby A. Baker (Mathematics)
David Evans (Chemistry and Biochemistry)
Albert Hoxie (History)
Nhan Levan (Electrical Engineering)
Judith L. Smith (Physiological Science)

1974
Robert B. Edgerton (Anthropology, Psychiatry and Biobehavioral Sciences)
David S. Eisenberg (Chemistry and Biochemistry)
Victoria A. Fromkin (Linguistics)
Robert C. Neerhout (Pediatrics)
Andrea L. Rich (Speech)

1975
Alma M. Hawkins (World Arts and Cultures)
Morris Holland (Psychology)
Paul M. Schachter (Linguistics)
Stanley A. Wolpert (History)
Richard W. Young (Neurobiology)

1976
Marianne Celce-Murcia (Teaching English as a Second Language and Applied Linguistics)
Jesse J. Dukeminier (Law)
George R. Guffey (English)
Marilyn L. Kourilsky (Education)
Chand R. Viswanathan (Electrical Engineering)
Non-Academic Senate Recipients

In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 are to be named the Luckman Distinguished Teaching Awards.
1985
L. Geoffrey Cowan (Communication Studies)
Mary Elizabeth Perry (History)
Linda Diane Venis (English)

1986
David Cohen (Mathematics)
Johanna Harris-Heggie (Music)
Paul Von Blum (Interdisciplinary)

1987
Carol D. Berkowitz (Pediatrics)
Jeffrey I. Cole (Communication Studies)
Cheryl Giuliano (Writing Programs)

1988
Jeanne Gunner (Writing Programs)
Art Huffman (Physics and Astronomy)
David G. Kay (Computer Science)

1989
S. Scott Bartchy (History)
Bonnie Lisle (Writing Programs)
Kenneth R. Pfeiffer (Civil Engineering, Psychology)

1990
Lisa Gerrard (Writing Programs)
Andres Durstenfeld (Biology)
Dorothy Phillips (Physiological Science)

1991
Marde S. Gregory (Speech)
Betty A. Luceigh (Chemistry and Biochemistry)
Cheryl Pfoff (Writing Programs)

1992
Janet Goodwin (Teaching English as a Second Language and Applied Linguistics)
Janette Lewis (Writing Programs)
Yihua Wang (East Asian Languages and Cultures)

1993
Stephen Dickey (English)
Sondra Hale (Anthropology)
Jutta Landa (Germanic Languages)

1994
Steven K. Derian (Law)
Linda Jensen (Teaching English as a Second Language and Applied Linguistics)
Shelby Popham (Writing Programs)

1995
Nicholas Collaros (French)
Kristine S. Knaplund (Law)
Christopher Mott (English)

1996
Scott Bowman (Political Science)
Timothy Tangherlini (Scandinavian Section)
G. Jennifer Wilson (Honors and Undergraduate Programs)

1997
William McDonald (Film and Television)
Stuart Slavin (Pediatrics)
Sung-Ock Sohn (East Asian Languages and Cultures)
