400. Field Studies in Epidemiology. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

402. Advanced Data Analysis in Occupational and Environmental Epidemiology. (4) Lecture, two hours; laboratory, two hours. Preparation: one data management course. Requisites: courses 201A-201B, or 201A and 261. Development of strategies for analyzing data in occupational and environmental settings. Use of multivariate data analysis techniques typically used in occupational cohort studies, nested case-control studies, and ecologic studies in environmental epidemiology. S/U or letter grading.

410A. Management of Epidemiologic Data. (2) Lecture, two hours. Requisites: course 100, Biostatistics 100A. Overview of data management, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of surveillance methods to specific health-related outcomes. Letter grading.

414. Practical Epidemiologic Investigations. (2 to 4) Lecture, one to two hours; laboratory, one to two hours. Requisite: course 100 or 200. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. S/U or letter grading.

415. Epidemiology for Developing Countries. (4) Lecture, four hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings. Letter grading.

418. Rapid Epidemiologic Surveys in Developing Countries. (4) Lecture, four hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, analyzing use of microcomputers to develop and test the questionnaire, select the sample, process and analyze data, and prepare final report. Letter grading.

419. Applications in Musculoskeletal Epidemiology. (4) Lecture, two hours; laboratory, two hours. Requisites: course 100 or 200 (may be taken concurrently), Biostatistics 100A. Introduction to principles and practical issues of epidemiological data analysis for addressing musculoskeletal-related hypotheses. Use of data sets from relevant components of National Health Interview Survey and from musculoskeletal-related epidemiologic studies. Use of SAS programming language, with applications in both UNIX and Windows. Letter grading.

495. Teacher Preparation in Epidemiology. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate core course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Scope and Objectives

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural analysis perspective. The undergraduate
Program Requirements

Program

This is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Undergraduate Study

Ethnomusicology B.A.

Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a videotape of musical performance, following departmental guidelines.

Preparation for the Major

Required: Ethnomusicology 10A-10B-10C, 20A-20B-20C, and 12 units of performance organizations or private instruction in music (courses 91A-91Z or 92).

The Major

Ethnomusicology

Required: (1) Group A — Ethnomusicology 175 or 181, M180, 190; (2) group B — seven courses selected from 106A through M126, 128, 130 through 147, C156A through 170, 172A, 172B, 173, 174, C179, 199E, 199S; (3) group C — 12 units from courses 191A-191Z or 192.

Jazz Studies Concentration

Required: Ethnomusicology M110A, M111, 120A or 120B, M127, M129A-M129B-M129C, M180 or 181, M185B, 12 units of course 171, 12 units of course M177, Music History 150, and three elective courses from Ethnomusicology 106A, 106B, M108A, 108B, M110B, 113 through M126, 128, 130 through 170, 172A through 175, C179, M180, 181, 190, 199E, 199S.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of Ethnomusicology offers the Master of Arts (M.A.) degree in Ethnomusicology.

Admission

Applicants to the M.A. program must have completed a bachelor’s degree in music or a field related to ethnomusicology. Applicants whose degree is not in music are required to provide evidence of their musical aptitude and ability.

Applicants are required to submit, in addition to the regular Graduate Division requirements, (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper, and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audition or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received.

Dossiers are reviewed by the faculty to assess each applicant’s potential as a graduate student in this field at UCLA.

Admission Timetable

Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

January 15 — Supplementary application materials are due.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

By March 15 — Notice of acceptance or denial is sent.

Applicants on a waiting list for admission are notified as soon as a decision can be reached.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

Areas of Study

The Department of Ethnomusicology offers the M.A. degree in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

Course Requirements

Students are required to complete a minimum of nine courses, five of which must be at the graduate level. Only four units of Ethnomusicology 596, and four units of 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include Music 106B, 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 123A, 123B, 123C, 151A, 151B, 156, C175 (four units only), and Ethnomusicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, C156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, M180, 181. Ethnomusicology 598 serves to guide the preparation of the thesis and should normally be taken during the last quarters of residence.

Ethnomusicology. In addition to a five-course core (Ethnomusicology 200, 201A-201B, 281A, and 282), students must take two courses in one or more music culture areas (i.e., music of Japan, China), one course from the Department of Anthropology, and one elective from the department’s graduate or upper division offerings, selected courses in Western music, a related discipline, or particular area outside the department approved by the student’s mentor. Students who have not taken Ethnomusicology 20A-20B-20C or the equivalent before entering are required to audit these courses. Course 290 may be taken but cannot count toward M.A. course requirements. One quarter of Ethnomusicology 292F may be counted to satisfy one of the electives. Students must enroll in a minimum of two quarters of ethnomusicology performance organizations (Ethnomusicology 91A-91Z), which are not applied to their degree.

Specialization in Systematic Musicology: In addition to a six-course core (Ethnomusicology 200, 203, one course from 271, 273, 275, 283, or Musicology 269, and two terms of Ethnomusicology 279), students must take one course in a music culture area, two electives from the department’s graduate or upper division offerings, and selected courses in Western music, a related discipline, or particular area outside the department approved by their mentors.

Comprehensive Examination Plan

To choose the comprehensive examination plan option, students must first submit a research paper written during their master’s studies as evidence of their writing and scholarly abilities. For ethnomusicology, competence in the field is then tested with two written examinations: (1) theory and method in ethnomusicology and (2) a world music culture area or approved topic reflecting the course of study. For systematic musicology, competence is tested with a take-home examination on a topic to be determined by the student’s major adviser. A discussion of the general field of systematic musicology is included in the final oral examination. The examinations are administered by a three-member committee, no more than one of whom shall be outside the department. The comprehensive examination is normally completed within three years of beginning M.A. coursework. Any failed examinations may be retaken only once, during the next two quarters. The department requires a final oral examination under both the comprehensive and thesis plans.
Thesis Plan
For students who choose this plan, the thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the program committee in the student's area. The presentation must demonstrate significant style, organization, creativity, and depth of understanding of the subject.

A three-year limit from the beginning of the M.A. coursework is normally imposed for the completion of the thesis. Students who do not meet this deadline are required to take the comprehensive examination at the end of their third year in order to be considered for advancement to the Ph.D. program.

The thesis topic and composition of the master's committee are approved by the program committee in the student's area before nomination to the Graduate Division. The department requires a final oral examination under both thesis and comprehensive examination plans.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. degree in Ethnomusicology must normally have completed an M.A. degree in one of the following: ethnomusicology, systematic musicology, Western music, a non-Western music tradition, a related discipline, or area studies with a music specialization. Applicants who are accepted but whose qualifications do not meet the requirements for the department's M.A. degree are required to complete remedial coursework as recommended by the program committee before proceeding with doctoral work.

Applicants are required to submit, in addition to the regular Graduate Division requirements, (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper (the M.A. thesis, if it is available), and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audition or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received.

Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in that field at UCLA.

Admission Timetable
Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

By March 15 — Notice of acceptance or denial is sent.

Applicants on a waiting list for admission are notified as soon as a decision can be reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

Major Fields or Subdisciplines
The Department of Ethnomusicology offers the Ph.D. degree in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

Course Requirements
Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level.

Students may complete the residence requirement by electing courses recommended by their mentor from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

Ethnomusicology. In addition to a five-course core (Ethnomusicology 200, 201A-201B, 281A, and 282), 10 additional courses are required, including one music culture seminar, at least six of which must be at the 200 level or higher and must include three quarters of Ethnomusicology 290, and one course from 271, 273, 275, or 283. Students may count one quarter of Ethnomusicology 292F to satisfy one of their electives. The remainder may be selected from the graduate offerings in the department or selected courses in Western music, a related discipline, or particular area outside the department as guided by students' mentors. No more than two 500-series courses and two courses outside the program may be counted toward the degree.

Students who do not have an M.A. in Ethnomusicology from UCLA may be required, in consultation with their mentor, to take other relevant and necessary courses beyond the 10 specified.

Written and Oral Qualifying Examinations
When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. Staff from the Student Services Office acts as proctor for the tests. Normally, the five written examinations are spread over a two-week period but should be completed within three weeks. Examinations not passed may be repeated once in consultation with the guidance committee and after a stipulated period of time. An oral examination may be scheduled at the discretion of the departmental guidance committee.

Ethnomusicology. The written examinations for ethnomusicology students without a specialization consist of the following:

(1) General ethnomusicology, history, theory, and method. (Students who took the comprehensive examination option for the M.A. have already done this.)

(2) Concepts and terminologies in world music.

(3) Student’s principal musical area.

(4) One from organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.

(5) A second musical area or related discipline (e.g., anthropology).

Specialization in Systematic Musicology. The written examinations for students with a specialization in systematic musicology consist of the following:

(1) General systematic musicology, history, theory, and method.

(2) Concepts and terminologies in world music.

(3) History and analysis of Western music.

(4-5) Two areas to be selected from the following: organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.

After completion of the written and oral qualifying examinations, students may submit the dissertation topic and request for a doctoral committee for approval. The dissertation topic and the composition of the doctoral committee are approved by the program committee in the student's area before nomination to the Graduate Division. Following appointment of the doctoral committee, students take the University Oral Qualifying Examination.
**Ethnomusicology**

**Lower Division Courses**

1A-1B. Fundamentals of Sound and Music of the World. (2-4) Lecture, two hours; laboratory, one hour. Aesthetic makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques.

10A-10B-10C. World Music Theory and Musician- ship. (4-4-4) Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to Ethnomusicology and World Arts and Cultures majors. Course 10A is requisite to 10B, which is requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition.

15. American Life in Music. (4) Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

20A-20B-20C. Musical Cultures of the World. (4-4-4) Lecture, four hours; discussion, one hour. Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards. 20A, Europe and the Americas; 20B, Near East and Africa; 20C, South Asia, Southeast Asia, and the Far East.

91A-91Z. World Music Performance Organizations. (2 each) Activity, three hours. Group performances of traditional and modern musical music of world cultures. May be repeated for credit without limitation. P/NP or letter grading.

92. Private Instruction in Music. (2) Studio, one hour. Limited to Ethnomusicology majors. Private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

**Upper Division Courses**

M108A-108B. Music of Latin America. (4-4) Course M108A is not requisite to 108B. Survey of traditional and contemporary musical culture. M108A. Mexico, Central America, and the Caribbean Isles. (Formerly numbered 108A.) (Same as Chicana and Chicano Studies M108A.) Lecture, four hours; discussion, one hour; 108B. Latin South America. Lecture, three hours.

M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Women's Studies M109) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (4-4) (Same as Afro-American Studies M110A-M110B and Folklore M154A-M154B.) Lecture, four hours; discussion, one hour. Survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

M111. Ellingtonia. (4) (Same as Afro-American Studies M145.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Coolie Williams, and Mercer Ellington.

113. Music of Brazil. (4) Lecture, three hours. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents.

M115. Musical Aesthetics in Los Angeles. (4) (Same as Chicana and Chicano Studies M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural mosaic of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music, and the commercial music industry.

M116. Chicano/Latino Music in the U.S. (4) (Same as Chicana and Chicano Studies M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of the U.S.

118. Development of Rock. (4) History of rock from the 1950s to the 1970s. In-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis.

M119. Cultural History of Rap. (4) (Same as Afro-American Studies M107 and Folklore M110.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

120A-120B. Development of Jazz. (4-4) Lecture, four hours; discussion, one hour. Introduction to jazz; its historical background and its development in the U.S.

121. Cross-Cultural Perspectives in Jazz. (4) Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social features which form the basis for new jazz/ethnic music blends.

123. Music of Bebop. (4) Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present.

M124. Anglo-American Folk Song. (4) (Same as English M111B and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

M126. Folk Music of Western Europe. (4) (Same as Folklore M181.) Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with recorded examples from major cultural subdivisions of the region.

M127. Jazz Keyboard Harmony. (1) (Same as Music M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

128. Folk Music of Eastern Europe. (4) Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area.

130. Folk Music of the Mediterranean. (4) Lecture, three hours. Introduction to forms and styles of traditional music in the Mediterranean Basin, particularly, with focus on various musical networks and specific experiences of the Mediterranean, African American, American Indian, Asian, rock culture, Western art music, and the commercial music industry.

M131. Development of Latin Jazz. (4) (Same as Music M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as "Latin Jazz." P/NP or letter grading.

CM132. Celtic Folk Music. (4) (Same as Folklore CM132.) Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading.

136A-136B. Music of Africa. (4) Lecture, four hours; discussion, one hour. Investigation of historical aspects, social functions, musical instruments, and relationships of music to other arts forms in selected areas of Africa.

146. Folk Music of South Asia. (4) Lecture, three hours; laboratory, one hour. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence.

147. Survey of Classical Music in India. (4) Examination of melodic, metric, and form structures of Indian classical music in context of religious, sociocultural, and historical background of the country.

C150. Music and Politics in East Asia. (4) Requisite: course 20C. Limited to ethnomusicology majors. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C250.

C156A-C156B. Music in China. (4-4) Letter grading. C156A. (Formerly numbered 156A.) Lecture, four hours. Requisite: course 20C. Limited to ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C256A. C156B. Lecture, three hours; laboratory, two hours. Requisite: course C156A. Introduction to various notational systems. Analysis of representative styles.

158A-158B-158C. Studies in Chinese Instrumental Music. (4) Lecture, three hours; laboratory, one hour. 158A. Study of music; significant composers, theories, and philosophy of the Ch’in, including transcription and analysis. 158B. Study of literature, major sources, paleography, theory, and philosophy of the Po’s, including transcription and analysis. 158C. Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society.

C159. Music on China’s Periphery. (4) Lecture, four hours; outside study, eight hours. Designed for undergraduate ethnomusicology, music history, and world arts and cultures majors. Survey of music from China’s border regions and neighboring countries: technical musical characteristics and important contextual issues related to modern and traditional styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibet-Burmese man peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

160A. Survey of Music in Japan. (4) Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Bwa music, Koto music, Shamisen music, and music used in various theatrical forms.

160B. Studies in Japanese Court Music. (4) Lecture, two hours; laboratory, one hour. Preparation: minimal musical ability. In-depth study of Japanese court music, including historical background, with emphasis on understanding the instrumental techniques and notation of various instruments of the court orchestra.

170. Acoustics. (4) Lecture, four hours; discussion, one hour. Interrelation of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality, Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities.

171. Instruction in Advanced Jazz Performance. (2) Laboratory, one hour. Preparation: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units.

172A-172B. Cognitive Psychology of Music. (4-4) 172A. Lecture, four hours; discussion, one hour. Designed for nonmajors. Introduction to psychology of music; historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. 172B. Required course 172A. Study of psychological factors and problems in music from points of view of listener, performer, and composer.

175. Sociology of Music. (4) Designed for Ethnomusicology, music history, and music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusical inquiry, including study of popular music, ethnomusicology, and cultural politics of music. P/NP or letter grading.

M177. Jazz Combo. (2) Same as Music M177. Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

C179. Proseminar: Systematic Musicology. (4) Seminar, three hours. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C203.

181. Anthropology of Music. (4) Designed for Ethnomusicology, Music History, and Anthropology majors. Considers cultural dimensions of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure.

M186. Senior Recital or Research Project. (No credit) (Same as Music M186.) Preparation and performance of one-hour senior recital or jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

190. Study of Ethnomusicology. (4) (Formerly numbered C190A.) Lecture, three hours. Requisites: courses 10A-10B-10C, 20A-20B-20C. Designed for Ethnomusicology majors. Introduction to history of the field, basic fieldwork and analysis methods, and current issues in research.

192. Advanced Private Instruction in Music. (2) Studio, one hour. Preparation: two years of courses 91A through 91Z or 92. Limited to Ethnomusicology majors. Advanced private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

197. Special Topics in Ethnomusicology. (4) Lecture/seminar, three hours. Selected topics in ethnomusicology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

199E. Special Studies in Ethnomusicology. (2 to 4) Hours to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of eight units.

199S. Special Studies in Systematic Musicology. (2 to 4) Hours to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of eight units.

Graduate Courses

200. Research Methods and Bibliography. (6) Lecture, three hours. Designed for graduate students. Guided writing, utilizing specific bibliography, in ethnomusicology and systematic musicology.

201A-201B. Proseminars: Ethnomusicology. (4-4) (Formerly numbered C201A-C201B.) Lecture, three hours. Designed for graduate students. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present.

C203. Proseminar: Systematic Musicology. (4) Seminar, three hours. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C179.

208. Seminar: Latin American Music. (4) Seminar, three hours. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression.

CM232. Celtic Folk Music. (4) (Same as Folklore CM232.) Seminar, three hours. Requisites: courses 10A-10B-10C. Focus on music and performing arts in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrent participation in Celtic music ensemble (course 91N) required.

241. Music of Iran and Other Non-Arabic-Speaking Communities. (4) Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory: Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required.

248A-248B. Classical Music of India. (4) Lecture, three hours. Requisite: course 146 or 147. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required.

C250. Music and Politics in East Asia. (4) Requisite: course 20C. Limited to ethnomusicology majors. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course 150.

250A-250B. Music of Indonesia. (4-4) Lecture, three hours. Requisite: course 20C. During first term, emphasis on music and related performing arts of Java. Focus on music and performing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indonesian performance group (course 91B or 91H) required.

Scope and Objectives

The European Studies Program provides undergraduates with an opportunity to study Europe from the vantage points of several disciplines in the humanities and social sciences. Its primary goals are twofold: to enable students to cross the existing boundaries between and within the humanities and social sciences and to develop approaches to European society and culture consonant with the dramatic changes taking place in that region. Not only has the Cold War model of distinct eastern and western blocs lost the bulk of its explanatory power, but European culture, economy, and social structure have been transformed by immigration, unification, Americanization, and new developments in the intellectual and political realms.

The events of recent years make it clear that the University and its students require new academic approaches to the region. The demise of the Soviet Bloc, the increased ethnic conflict throughout the region, the migration of peoples within Europe and from other parts of the world, the challenges of a rapidly evolving global economic system, and the uncertainties inherent in the process of unification—all these developments call into question the intellectual configurations that have long dominated our...
thinking. Today the regions of Europe provide a laboratory for examining — and finding solutions for — everything from efforts to integrate people of color to changes in the family and the status of women. They challenge us to consider new philosophical, artistic, and literary approaches and require us to come to grips with the collapse of socialist command economies in the East and the exhaustion of once-successful welfare states in the West.

To enable students to consider these questions, the European Studies major offers an interdisciplinary program leading to the Bachelor of Arts degree. Students are required to (1) study a European language other than English, (2) develop a historical perspective on European issues, (3) examine European culture, society, politics, and economy, and (4) acquire basic analytical and theoretical skills. Central to this effort are a series of core seminars and a senior essay to encourage majors to delve into a research topic of their choice.

**Undergraduate Study**

**European Studies B.A.**

The curriculum is designed to serve the needs of students who wish to (1) approach the study of Europe from a structured, interdisciplinary perspective, (2) pursue graduate work in disciplines permitting the study of Europe, (3) orient their professional life toward European affairs in fields such as law, business, diplomacy, journalism, and human services, and (4) acquire valuable skills in foreign languages and writing that will assist them in their careers.

**Admission**

Interested students should meet with the program chair no later than the beginning of the sophomore year to discuss requirements and formulate their course of study. Students are expected to declare the major at the end of their sophomore year, following normal UCLA procedures, and must have a minimum grade-point average of 2.5 in all preparation courses. Transcripts and course plans demonstrating that they will have completed all lower division requirements by the end of their junior year must be presented.

**Foreign Language Requirement**

Students must prepare for the major by studying a European language other than English. This language — the declared foreign language — helps to focus the major and determine options for the period of study abroad. Students are expected to fulfill the specific requirements of their selected language department (French, Germanic Languages, Italian, Slavic Languages and Literatures, Spanish and Portuguese) for entrance into upper division courses. Students who wish to study Latin or Greek are also required to demonstrate proficiency in a modern language. In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement (Italian and Spanish have slightly different course numbers and requirements). Students must complete the lower division foreign language requirement by the end of the sophomore year.

**Preparation for the Major**

*Required: (1) Geography — demonstrated competency in geography by passing an examination given annually by the program; (2) humanities and the arts — one course from Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, or 22; one lower division introductory language department course in literature or civilization that focuses on the declared foreign language; one course from Art History 54, 57, Music History 2B, or 13; (3) social sciences — Economics 1 or 5; two courses from History 1A, 1B, 1C; two courses from Geography 3, 5, Political Science 10, 20, 30, 50, Sociology 1, 2, M18, Women’s Studies 10.*

By carefully selecting courses for the Preparation for the Major, students can fulfill their general education requirements in the social sciences, foreign language, quantitative reasoning, and humanities.

**The Major**

*Required: (1) At least one upper division course in the literature of the declared foreign language, with instruction and reading assignments in that language (see the list of approved courses below); (2) one course from History 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 128A, 128B, 128C, 129A, 129B, 129C, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, or 141C; (3) European Studies 101 and 199; (4) at least eight electives selected from the list of approved courses, with a minimum of three courses from humanities and three from social sciences. Electives must either continue the regional focus, introduce a theoretical and methodological perspective, or introduce a rationally conceived comparative point of view (sample programs are on file in the program office). During their senior year students must write an extended paper offering original research on a topic of interest to them. Topics must be approved by a faculty adviser selected by the student and endorsed by the program’s executive committee.* Students must consult with the program chair to design their upper division coursework.

**Study in Europe**

The program expects students to spend at least one term — and preferably a full academic year — studying in the European country most relevant to their work. This is normally done under the auspices of the University of California Education Abroad Program; however, alternative arrangements can be made at UCLA if students have financial or personal considerations that may prevent them from going overseas. To obtain UCLA credit after returning to campus, students must have their foreign transcripts evaluated by the program faculty and staff.

**European Studies**

**Upper Division Courses**

101. Introduction to European Studies, (4) (Formerly numbered M101.) Discussion, three hours; outside study, nine hours. Limited to and required of European Studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural life, economic relations, nationalism, and international relations.

102. Special Topics in European Studies, (4) Discussion, three hours; outside study, nine hours. Variable topics. May be repeated for credit.

**Course List**

All courses are not offered every academic year. Students should contact the individual departments or the European Studies staff for information about the availability of specific courses.

**Anthropology**

130. Study of Culture

132. Technology and Environment

133Q. Symbolic Systems

133R. Aesthetic Systems

M140. Language in Culture

150. Study of Social Systems

M154Q. Gender Systems: Global

156. Comparative Religion

159. Warfare and Conflict

182. History of Anthropology

183. History of Archaeology

**Art History**

M102A. Minoan Art and Archaeology

M102B. Mycenaean Art and Architecture

M102C. Archaic Greek Art and Archaeology

M102D. Classical Greek Art and Archaeology

M102E. Hellenistic Greek Art and Archaeology

James H. Harra, M.D., Kaiser-Sunset
Denise K.C. Sur, M.D., Santa Monica-UCLA
Richard P. Usatine, M.D., Predoctoral Program

**Scope and Objectives**

The Department of Family Medicine seeks to provide all students with a basic introduction to family-centered care in both the inpatient and ambulatory settings. During the basic clerkship, students develop (1) an appreciation of the breadth and scope of family medicine, (2) a basic knowledge in the broad content areas of family medicine, and (3) fundamental clinical skills appropriate to family medicine. The overall goal is to provide students with the opportunity to gain an understanding and appreciation of the central role of the primary care physician in the health care system, and to offer advanced clinical training for those students interested in pursuing careers in family medicine. Further, the basic curriculum includes an overview of health care issues facing underserved and immigrant populations in urban America, as well as an introduction to health services research in family medicine.

Family medicine faculty members are active both in leadership roles in the training curriculum and in teaching in the preclinical years for all students. All first-year students are assigned to work with a family medicine preceptor once a month on a longitudinal basis for the entire year as part of the training program. In the third and fourth (clinical) years, required and elective opportunities exist. All students take a required four-week clerkship in the third year, which is offered at over 10 teaching sites.

For further details on the Department of Family Medicine and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Undergraduate Study

Film and Television B.A.

The undergraduate Film and Television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 90 quarter units (60 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit two letters of recommendation and a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For further information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622.

Preparation for the Major

Required: Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

The Major

Required: Film and Television 115, 130A, 130B, 150, 154, 163, 185, 192; one critical studies elective (not previously taken as prerequisite for the major) from 106B, 106C, 107, 108, 112, 113, 114; and a senior concentration (at least 20 units) in one of the following areas: (1) film production — courses 175A, 175B, 178; (2) television and video production — courses 165, 176A, 176B, 186 or 187B, 199; (3) screenwriting — courses 130C, 135, 199; (4) animation — courses 181A, 181B, 181C; (5) critical studies — courses 106A, 106B, 106C, 107, 108, 110C, 112, 113, 114, 116, 127, 199.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other’s projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the Schedule of Classes for courses limited to majors only.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees

The Film and Television Department offers the Master of Arts (M.A.) degree in Film and Television and the Master of Fine Arts (M.F.A.) degree and participates in an articulated degree program with African Area Studies.

Master of Arts

Admission

Students are admitted to the M.A. program in Film and Television in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Additional admission requirements are noted under each specific degree program description.

Applicants must submit a sample of scholarly or critical writing, a statement of purpose, three letters of recommendation, and other information such as a résumé, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native tongue is not English (such as TOEFL scores) that may be required to establish the quality of their work in the specialization.

Areas of Study

The program requires that students be conversant in both film and television, as they are tested on each in the comprehensive examination.

Course Requirements

A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism. Of the five courses, Film and Television 206C, 208B, and 217 are required core courses. In addition, Film and Television 200 is required of all students. All five of the graduate-level courses must be completed with grades of B or better.

Only eight units of Film and Television 596A, 596B, 596C, and 598 may be applied toward the total course requirement for the degree, and none of these courses may be applied toward the minimum graduate course requirement.

Scope and Objectives

The purpose of the Film and Television Department is to develop in its students a scholarly, creative, and professional approach to the film and television arts. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.
Students who wish to write a thesis-length paper may petition the critical studies committee to do so; if approved, this would be done through a two-quarter thesis course.

**Comprehensive Examination Plan**

The written examination is taken at home over two full consecutive days and examines a broad range of knowledge in film and television. After completion, the committee grades students either pass or fail. Students may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

**Thesis Plan**

None.

**Master of Fine Arts**

**Admission**

Students are admitted to the M.F.A. program in Film and Television in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required. Applicants must state clearly the degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producer’s program. All areas of specialization require three letters of recommendation.

Applicants intending to concentrate in film/television production must submit a description of a film or television project that may possibly be undertaken in graduate study. The description should be in proposal or treatment form, two to three pages in length. This material is nonreturnable.

Applicants intending to concentrate in writing must submit samples of creative writing such as screenplays, short stories, plays, or poems.

Applicants intending to concentrate in animation must submit a description of an animation project that may possibly be undertaken in graduate study, preferably in storyboard form. Other creative work may be submitted.

Applicants intending to concentrate in the producer’s program may submit a portfolio of supporting material which shows evidence of creative background, or a substantial statement of purpose and resume.

**M.A. African Area Studies/M.F.A. Film and Television**

The African Area Studies Program and the Department of Film and Television have an articulated degree program that allows students to combine study for the M.A. in African Area Studies with the M.F.A. in Film and Television, with a specialization in motion picture/television. Students must be accepted by both the Film and Television Department and the Program in African Area Studies before admission is offered.

**Areas of Study**

Consult the department.

**Course Requirements**

A total of 18 courses is required for the degree, five of which must be at the graduate level. At least three departmental courses must be taken outside each student’s specific program: two of these must be approved critical studies seminars and the third must be from one of the other M.F.A. areas. Course requirements for each specialization are available in the Student Services Office, Department of Film and Television.

Only 16 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of Film and Television 596A and four units of 596B may be taken prior to advancement to candidacy. Film and Television 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

**Comprehensive Examination Plan**

The comprehensive plan is satisfied by fulfilling projects appropriate to the specializations. No later than the beginning of the final quarter of residence, students must file the appropriate documents for advancement to candidacy and receive approval for the advancement from the M.F.A. advisory committee.

**Thesis Plan**

None.

**Doctoral Degree**

**Admission**

Students are admitted to the program leading to the Ph.D. degree in Film and Television in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Completion of an M.A. or M.F.A. degree equivalent to that offered by the UCLA Department of Film and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. The dossier submitted for admission must contain a letter describing reasons for wishing to earn the Ph.D., the master’s thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native language is not English (such as Test of English as a Foreign Language scores).

**Major Fields or SubDisciplines**

Students are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

**Course Requirements**

Each student must take a minimum of 13.5 courses during the first six quarters of residence. Three required Ph.D. core courses must be completed during the first year of residence: Film and Television 211B, 215, and 273. In their second year, students must take Film and Television 274 which is required in both the fourth and sixth quarters, and an independent study in the area of their dissertation in the fifth quarter. In addition to this core sequence, Film and Television 496 which counts as the .5 course, is required (normally in the first quarter of residence). Students also select seven additional graduate seminars, at least five of which must be approved critical studies seminars.

Students must create three areas of concentration. One is in the specific field of their dissertation, including Film and Television 271 and the dissertation-related independent study; students may include a fourth course in this concentration which is a critical studies seminar related to their dissertation. The other two areas are to be composed of three seminars each chosen to indicate focused competence in two areas of expertise. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film history, American film, European film, non-Western film/television, television studies, media and society, authors, genres, film and the other arts, film and television as a business enterprise, film/television production, and new media.

**Written and Oral Qualifying Examinations**

After completion of all language and course requirements, students are eligible to take and required to pass the Ph.D. written qualifying examination. This examination, which is given in the Spring Quarter only, is taken at home over four full consecutive days. After students pass the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. Students are advanced to candidacy only on successful completion of this examination.
Film and Television

Upper Division Courses

105A. History of the American Motion Picture. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

105B. History of the European Motion Picture. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

105C. History of African, Asian, and Latin American Film. (6) Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of film in Africa and the non-European cultures of Asia and Latin America. May be repeated once for credit with consent of department and topic change.

107. Experimental Film. (6) Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

108. History of Documentary Film. (6) Lecture/screenings, eight hours; discussion, one hour. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.

110A. History of Broadcasting. (4) Lecture/viewing, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting.

110C. World Media Systems. (4) Lecture/viewing, four hours; discussion, one hour. Focus on the development and impact of media in contemporary globalized societies. Consideration of social, political, and cultural issues raised by the interplay of media systems around the world.

112. Film and Social Change. (6) Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.

113. Film Author. (6) Lecture/screenings, eight hours; discussion, one hour. Corequisite for graduate students enrolled in course 181A. Examination of the work of individual filmmakers as a force in social development.

114. Film Genres. (6) Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

115. Stylistic Studies for the Moving Image: Theory and Practice. (4) Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kinesthetics, sound, narrative, discourse, and performance.

116. Film Criticism. (4) Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.
192. Film and Television Internship. (4 to 8) Field experience, to be arranged. Limited to senior Film and Television majors. Internship at film and television industry organizations. May be taken for a maximum of eight units.

193A. Film Curatorship. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

193B. Television Curatorship. (4) Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

199. Special Studies in Film and Television. (2 to 8) Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of eight units.

### Graduate Courses

200. Bibliography and Methods of Research in Film and Television. (6) This course, three hours; laboratory, four to six hours. Designed for graduate students. Examination of central topics in American film history. May be repeated twice for credit.

206C. Seminar: American Film History. (6) Discussion, three hours; film screenings, four to six hours. Requisite: course 106A. Designed for graduate students. Study of central topics in American film history. May be repeated twice for credit.

207. Seminar: Experimental Film. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

208A. Seminar: Film Structure. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

208B. Seminar: Classical Film Theory. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Study of principal topics and lines of inquiry that characterize theoretical writings of ArnoArneheim, Eisenstein, Bazin, Mitry, etc. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

209A. Seminar: Documentary Film. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Nonfictional film and its relation to contemporary culture. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

209B. Seminar: Fictional Film. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Fiction as fiction and its relation to contemporary culture. May be repeated once for credit.

209D. Seminar: Animated Film. (6) Discussion, three hours; laboratory, three hours. Designed for graduate students. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

211A. Seminar: Historiography. (4) Discussion, three hours. Limited to Film and Television M.A. candidates. Beginning examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

211B. Seminar: Historiography. (4) Discussion, three hours. Limited to Film and Television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

215. Seminar: Theory and Method. (4) Discussion, three hours. Limited to Film and Television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiotics, psychoanalysis, sociology, etc. Requisite: course 206B. Designed for graduate students. Study of definition and methods of film theory through contemporary writings. May be repeated once for credit.

219. Seminar: Film and Society. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Study of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

220. Seminar: Television and Society. (4) Discussion, three hours. Designed for graduate students. Study of ways television affects and is affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit.

221. Seminar: Film Authors. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

222. Seminar: Film Genres. (6) Discussion, three hours; film screenings, four to six hours. Designed for graduate students. Study of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

223. Seminar: Visual Perception. (4) Discussion, three hours (additional hours as required). Designed for graduate students. Aesthetic, psychological, and physiological principles of vision as they relate to ways in which man sees film and television, with emphasis on ways in which these are different from other visual experiences.

224. Computer Applications for Film Study. (4) Survey of computer applications relevant to film study, principally computer-videodisc systems and image capture technology.

CM229. Contemporary Topics in Theater, Film, and Television. (2) (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

242. Digital Imagery and Visualization. (4) Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still image and animation, aesthetics and aesthetics of digital image, in context of examining dynamics of digital constructions and visual codes. Students conceive and produce several digital image visualizations.

243. Moving Digital Image. (4) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects.

244. Interactive Multimedia Authoring. (4) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects.

246. Issues in Electronic Culture. (6) Discussion, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools.

247. Production Planning in Film and Television. (4) Discussion, three hours. Analysis of processes and problems in preparing a script for film or television production, with emphasis on role of production manager in breaking down scripts, setting up shooting schedule, planning postproduction, and preparing budgets.

248. Advanced Digital Media Workshop. (4) Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment.

249. Digital Revolution. (4) Lecture, four hours; discussion, one hour; laboratory, one hour. Comprehensive survey to introduce students to emerging digital technologies, resulting new media, and their artistic, economic, and social implications. Topics include digital editing, digital previsualization, multimedia, World Wide Web, interactive television, and virtual reality.

268. Seminar: Short Film. (4) Seminar, two hours; discussion, two hours. Designed for graduate students. Study of problems presented by conceptual, narrative, and economic criteria for decision making in production and decision making. Course may be repeated once for credit.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Film Image Design Laboratory. (4) Lecture, two hours; laboratory, three hours. Students produce written proposals for graduate film and television students. Study and practice of an- alytic and critical response, with emphasis on contemporary film and television.

401A-401B-410C. Film Production Workshop. (8-12-8) Laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A-410B-410C. Limited to 10 graduate film and television students per section. Production of a 10-minute fictional film or video project. Students budget, preplan, and complete photography on location and/or in studio by end of first term. In second term students must complete postproduction of their projects.

403A-403B-403C. Advanced Documentary Workshops. (4 to 8 each) Lecture/discussion/laboratory, 16 to 24 hours; discussion, one hour; laboratory, six hours. Limited to graduate film and television students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

404A-404B. Advanced Abstract/Experimental Media Workshops. (6-8) Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A-410B-410C. Limited to 10 graduate film and television students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

405. Television Production Workshop. (8) Laboratory, eight hours; other, to be arranged. Limited to graduate film and television students. Basics of television production and direction, focusing on studio multipurpose sets, writing and using the remote camera. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

406. Experimental Video Workshop. (4) Laboratory, six hours; other, to be arranged. Limited to graduate film and television students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

407. Video Documentary Workshop. (8) Laboratory, 12 hours. Limited to graduate film and television students. Exploration of documentary video, including screening a variety of international works and producing a short documentary project using single-camera field production techniques.
435. Advanced Writing for Short Film and Television Screenplays. (4) Discussion, three hours. Requisites: courses 402A-402B or 403A-403B or 404A-404B. Limited to graduate film and television students. Required of students planning fiction projects. Final screenwriting course in which students write their thesis project (no longer than 30 minutes in length).

437. Nontheatrical Writing for Film and Television. (4) Discussion, three hours. Limited to graduate film and television students. Advanced problems in the field of documentary and special feature programming, with emphasis on research and production. May be repeated for a maximum of 16 units.

451. Advanced Design for Film and Television. (4) Laboratory, to be arranged. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises.

452B. Music Recording and Workshop. (4) Lecture, four hours; laboratory, eight hours. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.

452C. Film and Television Sound Rerecording. (4) Lecture, three hours; laboratory, three hours. Limited to graduate film and television students. Recording of sprocketed and unsprocketed media in postproduction process.

452A. Film and Television Sound Recording. (4) Lecture, three hours; laboratory, four hours. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises.

459A-459B. Directing for Film and Television. (4) Lecture, three hours. Limited to graduate film and television students. Analysis and exploration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

468. Advanced Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production. (2 to 16) Preparation for thesis production, four to eight hours. Limited to M.F.A. production program students. Preparation: possession of a proposed thesis project prior to advancement to candidacy. Should be taken term before student plans to advance to candidacy.

476. Video I. (8) Lecture, six hours; laboratory, to be arranged. Preparation: coursework in film production, including preparation and production of a short film. Limited to graduate students.

477. Video II. (8) Discussion, three hours; laboratory, to be arranged. Design for graduate students. Study of basic techniques of film production, including preproduction planning and production of a group short film.

478. Video III. (8) Discussion, three hours; laboratory, to be arranged. Design for graduate students. Study of basic techniques of television and video production, including completion of one or more projects.

482A-482B. Advanced Animation Workshops. (4 or 8 each) Lecture, three hours; laboratory, to be arranged. Requisites: courses 181A, 181B, 181C. Advanced to integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

484A-484B. Advanced Film Editing. (4-4) Lecture, three hours; laboratory, to be arranged. Preparation: submission of a rough cut and/or copy of screenplay. Limited to film and television thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.

499. Directed Individual Studies: Writing. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

501. Cooperative Program. (2 to 8) Preparation: consent of graduate adviser and graduate dean. Assist in or direct a film or a television project. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

506. Directed Individual Studies: Acting. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

594A. Directed Individual Studies: Research. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596A. Directed Individual Studies: Writing. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596B. Directed Individual Studies: Designing. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production. (2 to 12) Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Film and Television. (2 to 12) Hours to be arranged. May be taken for a maximum of 12 units. S/U grading.

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional lifestyles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, music, art, dance, religion, festival, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, students should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

The Folklore and Mythology Program offers the Master of Arts (M.A.) degree in Folklore and Mythology.

Admission

Two letters of recommendation from former instructors or other comparable references are required for admission to the M.A. program, as well as a writing sample (such as published work, course paper, or report on research/observations). Information on the verbal Graduate Record Examination (GRE) is desirable.

Areas of Study

Consult the department.

Course Requirements

All degree candidates, whether electing the thesis or comprehensive examination plan, must complete the following courses: Folklore and Mythology 228, M235, M258, at least two must be folklore seminars (e.g., Folklore and Mythology 200A, 200B, and at least one course from each of the following groups:

Group 1: One course in folk song, folk music, or folk dance (e.g., Folklore and Mythology 215 or 216).

Group 2: One course in the folklore and mythology of a specific culture or culture area.

Group 3: One course in folklore studies (e.g., Folklore and Mythology 213, 214, 217, 218, or C275).

Group 4: One additional course in folk music and field studies (e.g., Folklore and Mythology 200A, 200B, and at least one course from each of the following groups:

Group 5: One graduate seminar in an area of folklore and mythology (e.g., Folklore and Mythology 228, M235, or M259).

Only eight units of course 596 may be applied toward the minimum course requirements.

Comprehensive Examination Plan

Students who plan to pursue a Ph.D. degree in Folklore and Mythology must elect this plan and complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, students are expected to demonstrate competence in a written examination requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies; (2) two forms of folklore and mythology; and (3) the folklore and mythology of a specific country, continent, or geographical area. If it is requested by the student or by the members of the M.A. committee, the student must also complete a final oral examination following the successful completion of the written comprehensive examination sequence.

Thesis Plan

If this plan is selected, students must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies.

The thesis committee, composed of three or more faculty members chosen with the approval of the chair of the interdepartmental committee, is appointed no later than the quarter before expected completion of the requirements. No outside members are required.

Doctoral Degree

Admission

Requirements for admission to the program leading to the Ph.D. degree in Folklore and Mythology include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written and oral comprehensive examinations. A writing sample (such as published work, course paper, or report on research/observations) is required of all applicants. Applicants are admitted to the doctoral program on the recommendation of the interdepartmental committee (provisional admission may be secured in order to complete the admission requirements).

Major Fields or Subdisciplines

Students must develop a competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Course Requirements

Before attempting the qualifying examination, students must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in a major field of folklore and mythology. At least five of the minimum number of nine courses required for the Ph.D. must be selected from courses carrying folklore prefixes. The number of graded Folklore and Mythology 596 courses that can be counted among the minimum of nine courses required for the Ph.D. is limited to two; at least five of the minimum number of nine courses required for the Ph.D., at least two must be folklore seminars (e.g., Folklore and Mythology 228, M235, M258, 259, M270A, M270B).

Written and Oral Qualifying Examinations

After the required preparation, a written examination and the University Oral Qualifying Examination are completed covering (1) the student’s specialization in folklore and mythology and (2) the related area of concentration. The examinations are administered by a committee appointed with the approval of the interdepartmental committee and include one or more members from the student’s related discipline.
Folklore and Mythology

Lower Division Courses

101. Introduction to Folklore. (4) Lecture. Three hours. Study of traditional genres or forms of African-American folklore and their cultural functions.

C107. Folklore in Urban Environments. (4) Lecture, three hours. Requisite: course 101. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion.

C109. African Folk Music. (4) (Same as English M111B and Ethnomusicology M124.) Survey of African-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course C206.

CM111. Literature of Myth and Oral Tradition. (4) (Same as English M111A.) Preparation: satisfaction of Subject A requirement. Study of myth, dramatic or performance of ritual and its expression in religious art. Lectures, readings, and video material focus on performance of ritual and its expression in religious art.

C122. Celtic Mythology. (4) (Same as English M111D.) Lecture, three hours; discussion, one hour. Study of traditional Irish, Scottish, and Welsh mythology and for those interested in Indo-European mythologies.

CM127. Celtic Folklore. (4) (Same as English M111F.) Requisite: course 101. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

C130. North American Indian Folklore and Mythology Studies. (4) Requisite: course 101. Examination of a wide range of cultures in the Americas, from the paleoindian to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of native cultures.

C136. Festivals and Festive Events. (4) Lecture, three hours; fieldwork, one hour; outside study, eight hours. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and carnivalesque and politics of celebration. Concurrently scheduled with course C256. P/NP or letter grading.

C156. Fairy Tales in Literature and Society. (5) (Same as German M122.) Lecture, four hours; outside study, 11 hours. History and reception of folklore and folktale in Europe, with particular attention to ideology and influence of Grimm's tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy.

C159. Folk Art, Folklife, and Material Culture. (4) Designed for juniors/seniors. General course dealing with Celtic literature from earliest times to the 14th century.

113. The Arthurian Tradition. (4) Survey of traditions related to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

118. Folk Art, Folklife, and Material Culture. (4) Designed for juniors/seniors. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis.

M119. Fairy Tales in Literature and Society. (5) (Same as German M122.) Lecture, four hours; outside study, 11 hours. History and reception of folklore and folktale in Europe, with particular attention to ideology and influence of Grimm's tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy.

M121. British Folklore and Mythology. (4) (Same as English M111C.) Preparation: satisfaction of Subject A requirement. Designed for juniors/seniors. Survey of English folklore and folk art, with attention to their history, function, and regional differences.

M122. Celtic Mythology. (4) (Same as English M111D.) Lecture, three hours; discussion, one hour. Study of traditional Irish, Scottish, and Welsh mythology and for those interested in Indo-European mythologies.

M127. Celtic Folklore. (4) (Same as English M111F.) Requisite: course 101. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

M130. North American Indian Folklore and Mythology Studies. (4) Requisite: course 101. Examination of a wide range of cultures in the Americas, from the paleoindian to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of native cultures.

M136. Festivals and Festive Events. (4) Lecture, three hours; fieldwork, one hour; outside study, eight hours. Study of traditional calendrical, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and carnivalesque and politics of celebration. Concurrently scheduled with course C256. P/NP or letter grading.

M140. Italian Novella from Boccaccio to Basile. (4) (Same as Italian M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures.

M140. Italian Novella from Boccaccio to Basile. (4) (Same as Italian M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures.

M142. Introduction to Jewish Folklore. (4) (Same as Jewish Studies M142.) Nature of Jewish folklore: narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

M145. Applied Folkloristics. (4) Designed for juniors/seniors. Introduction to methods and issues in applied folklore and its study, such as such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklore. Concurrently scheduled with course C245.

M149. Folk Literature of the Hispanic World. (4) (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

M150. Russian Folk Literature. (4) (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

M154A/M154B. African American Musical Heritage. (4-4) (Same as Afro-American Studies M110A-M110B and Ethnomusicology M110A-M110B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

161. Beliefs and Tales of the Supernatural. (4) Lecture, five hours. History of beliefs and legends reporting on encounters with creatures of the supernormal world, such as giants, dwarfs, ghosts, wild men, UFOs. Study of firsthand encounters with such beings and analysis of resulting narratives and contexts of their narration. Analysis of social, psychological, and physical states that contribute to such experiences. P/NP or letter grading.

163. Folklore and Oral History. (4) Designed for juniors/seniors. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionize history to reflect their point of view.

C165. Film and Folklore. (4) Designed for juniors/seniors. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C265.

M170. Russian Folklore. (4) (Same as Russian M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

Folklore in Ethnic Context. (4) Requisite: course 15 or 101. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations.

C175. Food Customs and Symbolism. (4) Designed for juniors/seniors. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharthing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C275.

M180. Analysis of Traditional Music. (4) (Same as Ethnomusicology M180.) Designed for Ethnomusicology Music History, and Folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

M181. Folk Music of Western Europe. (4) (Same as Ethnomusicology M126.) Introduction to forms and styles of traditional music in Western Europe. Historical and ethnologica perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region.

CM182. Japanese Folklore. (4) (Formerly numbered M182.) (Same as Japanese CM182.) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM282. Letter grading.

M183. Korean Folklore. (4) (Formerly numbered M183.) (Same as Korean M183.) Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture. P/NP or letter grading.
CM184. Dance and Folklore. (4) Same as World Arts and Cultures CM184. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and American-African dance idioms. Concurrently scheduled with course CM284.

190. Selected Topics in Folklore and Mythology Studies. (4) Requisite: course 15 or 101. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

199. Special Studies in Folklore. (2 to 4) Limited to seniors.

Graduate Courses

200A. Folklore Bibliography, Theory, and Research Methods. (4) Lecture, three hours; discussion, one hour. Designed for graduate folklore and mythology students. Basic course in theory, current trends, and bibliography for folklore graduate students, including research techniques in contemporary folkloristics.

200B. Fieldwork. (4) Lecture, three hours. Requisite: course 200A. Discussion/demonstration of theoretical concepts and practical techniques of data gathering and field research in folklore.

CM205. Perspectives in American Folklore Research. (4) Same as English M205. Lecture, three hours. Requisite: course 101. Examination of American folklore studies compared and contrasted with investigations in other cultures, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course C105.

C206. Anglo-American Folk Song. (4) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM109.

C207. Folklore in Urban Environments. (4) Lecture, three hours. Requisite: course 200A. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, and their American derivatives shape their experiences through a dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107.

208. Afro-American Folklore and Culture. (4) Designed for graduate students. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S.

213. Folk Belief and Custom. (4) Preparation: one course from 118, M121, M122, 124, M126, M128, M149, M150, Anthropology 156, German 120. Requisite: course 101. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural cycles, and common legal antiquities.

214. Ethnography of Humor. (4) Formerly numbered M214. Lecture, three hours. Designed for graduate folklore and mythology students. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

216. Folktales. (4) Requisite: course 200A.

217. Folk Speech. (4) Lecture, three hours. Study of ethnography of communication and its relevance to study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor.

218. Folk Art, Craft, and Aesthetics. (4) Lecture, three hours. Requisite: course 200A. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of the 19th century to the present.

228. Seminar: Topics in Celtic Folklore and Mythology. (4) Seminar, three hours. Preparation coursework in Celtic studies. Requisite: course 200A. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britain/Ireland; comparative Celtic mythology; Celtic origin legends; literary and oral saints’ legends; the Irish Fenian (Ossianic) tradition of ballads (lochdhe/duain) and prose tales; “fairy” beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism.

CM232. Celtic Folk Music. (4) Same as Ethnomusicology CM232. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times, instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grading.

C236. Festivals and Festive Events. (4) Lecture, three hours; fieldwork, one hour; outside study, eight hours. Study of traditional, religious, and local festivals and related events in their cultural and historical contexts, with emphasis on American festival occasions and their Old World antecedents. Topics include carnival and the carnivalesque and politics of celebration. Concurrently scheduled with course C136. S/U or letter grading.

240. Introduction to Jewish Folk Literature. (4) Designed for juniors/seniors and graduate students. Examination of both historic and generic methods used in study of Jewish folk literature.

M242A. The Ballad. (4) Same as English M242A. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues. May be repeated for credit.

M243B. Problems in Ballad Scholarship. (4) Same as English M243B. Requisite: course M243A. Intensive investigation of a problem or problems in study of the popular ballad. May be repeated for credit.

C245. Applied Folkloristics. (4) Designed for graduate students. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklore. Concurrently scheduled with course C145.

248. Theory and Method in Latin American Folklore Studies. (4) Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expressions.

M249. Folk Literature of the Spanish and Portuguese Worlds. (4) Same as Portuguese M249 and Spanish M249. Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

251. Seminar: Finno-Ugric Folklore and Mythology. (4) Advanced studies in folk traditions and mythologies of the Finno-Ugric-speaking nations.

M258. Seminar: Folk Music. (4) Same as Ethnomusicology M258. Seminar, three hours.

259. Seminar: Folklore. (4) Requisite: course 200A. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

260. Organizational Folklore, Culture, and Symbolism. (4) Designed for graduate students. Folklore in organizational settings (stories, rituals, rites, metaphors, etc.) and role of folklore in organization development as information source, diagnostic, and intervention to improve personnel practices, climate, and leadership.

M261. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4) Same as Italian M260A. Lecture, three hours; outside study, 18 hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

C265. Film and Folklore. (4) Designed for graduate students. Introduction to folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C165.

M270A-M270B. Seminars: Japanese Ritual Arts. (4-4) Same as Japanese M270A-M270B. Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

C275. Food Customs and Symbolism. (4) Designed for graduate students. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C175.

CM282. Japanese Folklore. (4) Same as Japanese CM282. Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Japanese is not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM182. Letter grading.

C284. Dance and Folklore. (4) Same as World Arts and Cultures CM284. Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184.

M286A-M286B. Studies in Hispanic Folk Literature. (4-4) Same as Spanish M286A-M286B. Lecture, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

375. Teaching Apprentice Practicum (1 to 4 units). (4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
FOREIGN LITERATURE IN TRANSLATION

Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.
112. Jewish Writing and Thought in German Culture from 1755 to the Present
116. Special Topics in Modern Literature and Culture

Irish (Near Eastern Languages)
150A-150B. Survey of Persian Literature in English

Italian
42A-42B. Italy through the Ages in English
46. Italian Cinema and Culture
50A-50B. Masterpieces of Italian Literature in English
102A-102B. Italian Cultural Experience in English
110. Dante in English
121. Literature and Film
122. Italian Theater
M140. Italian Novella from Boccaccio to Basile
150. Modern Fiction in Translation
M158. Women in Italian Culture
M230A-M230B. Folk Tradition in Italian Literature

Japanese (East Asian Languages)
150. Japanese Literature in Translation: Classical
151. Japanese Literature in Translation: Modern
154. Postwar Japanese Culture through Literature

Jewish Studies (Near Eastern Languages)
M150A-150B. Hebrew Literature in English
151A-151B. Modern Jewish Literature in English

Korean (East Asian Languages)
150. Korean Literature in Translation: Classical
151. Korean Literature in Translation: Modern

Old Norse Studies (Germanic Languages)
40. The Heroic Journey in Northern Myth, Legend, and Epic
C139. The Saga
C140. Viking Civilization and Literature

Polish (Slavic Languages)
152A-152B-152C. Survey of Polish Literature

Romanian (Slavic Languages)
152. Survey of Romanian Literature

Portuguese (Spanish and Portuguese)
40A-40B. Portuguese, Brazilian, and African Literature in Translation
46. Brazilian Culture and Civilization

Russian (Slavic Languages)
25. The Russian Novel in Translation
118. Russian Literature to Middle Ages and Enlightenment
119. Golden Age and the Great Realists
120. Literature and Revolution
124C-124T. Studies in Russian Literature
125. The Russian Novel in Its European Setting

Scandinavian
50. Introduction to Scandinavian Literature
141. Backgrounds of Scandinavian Literature
142. Scandinavian Literature of the 19th Century
143. Scandinavian Literature of the 20th Century
C144. Henrik Ibsen on the World Stage
C145. Getting Married: Strindberg and Battle of the Sexes
C146. Kierkegaard and Foundations of Existentialism
C147. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll
C180. Literature and Scandinavian Society
C182. Theory of the Scandinavian Novel
184. Hans Christian Andersen
CM186. Voices of Women in Scandinavian Literature
187. Scandinavian Film: Bergman and Others

Serbian/Croatian (Slavic Languages)
154. South Slavic Literature

Slavic (Slavic Languages)
126. Postwar Central European Prose

Spanish (Spanish and Portuguese)
60A-60B-60C. Hispanic Literatures in Translation

Ukrainian (Slavic Languages)
152. Ukrainian Literature

Yiddish (English)
121A. 20th-Century Yiddish Poetry in English Translation
121B. 20th-Century Yiddish Prose and Drama in English Translation

Jean-Claude Carron, Docteur ées Lettres
Patrick Coleman, Ph.D.
Françoise Lionnet, Ph.D.
Eric Gans, Ph.D.
Peter Haidu, Ph.D.
Stephen D. Werner, Ph.D.

Associate Professors
Andrea Loselle, Ph.D.
Sara Melzer, Ph.D.
Malina Stefanovska, Ph.D.

Lecturers
Nicole Dufresne, Ph.D.
Kimberly Jansma, Ph.D.

Scope and Objectives
The UCLA French Department is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees.

Undergraduate Study

Undergraduate Courses

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in French grammar and/or composition.

French B.A./French and Linguistics B.A.

Preparation for the Majors

Required: French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of instructor. Students in Plan III must also take Linguistics 20.

The Majors

Three plans are offered by the department:

Plan I: French Studies in Literature and Culture

Plan I leads to the Bachelor of Arts in French. Required: Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

Candidates for an instructional credential must take 13 upper division French Department courses, including French 105, in order to qualify for a waiver for the single subject instructional credential in French.

French / 318
Plan II: Interdisciplinary French Studies  
Plan II, with emphasis on French culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. Required: Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French studies to be selected in consultation with the undergraduate adviser.

Plan III: French and Linguistics  
Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. Required: Twelve upper division courses, including French 100, 101, 102; two courses from 105, 107, 108A, 108B, 109; two courses from 114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students' knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 162 through 165, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take course 170 where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 20- to 25-page honors thesis (honors projects and the honors thesis are not to be confused). Course 170 counts toward the requirements for the French majors as outlined above.

Students may begin the honors program toward the end of their junior year or during their senior year. The honors projects and course 170 may be taken over two terms minimum. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

Instructional Credential in French

Students interested in obtaining a single subject instructional credential in French should consult a departmental counselor regarding requirements for a waiver from the French subject matter examination required by the California Commission on Teacher Credentialing. For additional information on courses leading to the credential, consult the Department of Education, 1009 Moore Hall, (310) 828-8328.

French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (eight units): French 6 or equivalent and one course from 12, 14, or 15.

Required Upper Division Courses (20 units): French 100 or 101, and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of French offers the Master of Arts (M.A.) degree in French.

Admission

Applicants to the M.A. program must hold a B.A. in French or the equivalent. The Graduate Record Examination (GRE) General Test, a sample of written work in French, and three letters of recommendation are also required and should be sent to the department.

Areas of Study

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with francophone literature as an option).

Course Requirements

A total of 11 courses in French is required, including French 201 and 203 (which should be taken as early as possible), at least two courses in each of the three periods, and one additional course in the period not covered on the M.A. examination. For Plan I (thesis) candidates, this is the period of specialization which is not covered on the oral qualifying examination. At least eight of these courses must be at the graduate level. Four units of course 596 (or 598 for students in Plan I) may be substituted for one required century course on approval of the graduate adviser or thesis director.

Students are required to consult with the graduate adviser to ensure full historical coverage of French literature.

Comprehensive Examination Plan

Students must pass written examinations, four hours in length, in each of the two periods prepared and an oral examination in French, normally 30 minutes, covering the two periods of the written examination. The examinations are given in the Fall and Spring Quarters.

The Department of French: The UCLA French Department is located at 1024 Green Street, Santa Monica, CA 90405, (310) 849-4420. The office is open Monday through Friday from 8:00 a.m. to 5:00 p.m. All course information, including course syllabi, is available on the UCLA Graduate Division website at http://www.gdnet.ucla.edu. Students are sub-
Students who either fail or pass without admission to the doctoral program are permitted to resubmit the thesis once, at a date no more than a year after the first attempt.

**Doctoral Degree Admission**

For UCLA students applying to the program leading to the Ph.D. degree in French, completion of the M.A. degree in French with recommendation for admission to the doctoral program is required. Outside applicants must hold the M.A. degree in French or equivalent, submit three letters of recommendation and a sample of written work in French, and take the Graduate Record Examination (GRE) General Test.

**Major Fields or Subdisciplines**

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with francophone literature as an option).

**Course Requirements**

The following courses are required: (1) French 201 and 203, if not already covered at the M.A. level; (2) at least five seminars, including at least three taken after obtaining the M.A. (a balance should be sought between theoretical and literary-historical relevance to the proposed period of specialization); (3) at least two graduate courses in other departments related to the area of specialization. Admitted students holding the M.A. or an equivalent degree from another institution must consult the guidance advisor for possible additional course requirements.

For the purpose of course requirements, the period of specialization for the thesis is considered the period not covered on the M.A. examination; course 598 may be counted as one of the four courses required in this period.

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 75 pages. A tentative outline of the proposed thesis must be approved in writing by the thesis committee before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Three results are possible: fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the M.A. thesis committee on the basis of an overall appraisal of the student's record as well as of the results of the M.A. examination.

Students who either fail or pass without admission to the doctoral program are permitted to retake the examination once, at a date no more than a year after the first attempt.

**Written and Oral Qualifying Examinations**

Two written examinations of three hours each, based on individual reading lists of approximately 15 works each, established by the examiner in consultation with the candidate are required: (1) on the historical area related to the proposed dissertation topic and (2) in areas of critical theory relevant to the proposed dissertation topic. These examinations must be taken within a period of one week. At the discretion of the guidance committee, students may be permitted to retake a failed written examination once.

After passing the written examinations, students are admitted to the University Oral Qualifying Examination, which should be taken during the same quarter as the written qualifying examinations. Students must provide the examiners with a 20- to 30-page prospectus of the proposed dissertation, including an outline and a bibliography. The examination, normally of two hours duration, bears on the written examinations and on the proposed dissertation subject.

**French**

**Lower Division Courses**

1. Elementary French. (4) Lecture, five hours. Pre-requisite: course 1 (C– or better).

2. Intermediate French. (4) Lecture, five hours. Pre-requisite: course 2 (C– or better).

3. Elementary French. (4) Lecture, five hours. Pre-requisite: course 3 (C– or better).

5. Intermediate French. (4) Lecture, five hours. Pre-requisite: course 5 (C– or better).

6. Intermediate French. (4) Lecture, five hours. Pre-requisite: course 6 (C– or better).

7. French Cinema and Culture. (4) Lecture, three hours. Introduction to contemporary French film, perhaps with emphasis on specific national movements, directors, screenwriters, etc., and the roles of film in French society.

8. Intensive First-Year French. (12) Lecture, 15 hours. All-in-French intensive language program equivalent to first year of college French and designed to develop basic language skills. Offered in summer only. P/NP or letter grading.

9. Intensive Second-Year French. (8) Lecture, 10 hours; media laboratory, three hours. Enforced prerequisite: course 3. Intensive course equivalent to first two terms of intermediate French and designed to improve proficiency in reading, writing, and speaking. Offered in summer only. P/NP or letter grading.

10A-10D. French Conversation (2 each) Discussion, three hours. Enforced requisite: course 3 (B or better).

12. Introduction to Study of French Literature. (4) Lecture, two hours; discussion, one hour. Enforced requisite: course 6. Principles of literary analysis as applied to selected texts in poetry, theater, and prose.

13. Writing Assignments. (2) Lecture, five hours. Enforced prerequisite: course 5 (C– or better).

14. Introduction to French Civilization, in English. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Study of contemporary French institutions and issues in political, cultural, and socioeconomic realms. Structure of French society and recent developments. P/NP or letter grading.

41. French Cinema and Culture. (4) Lecture, three hours; film screenings, three hours. Introduction to French culture and literature through study of major films of cultural and literary significance. P/NP or letter grading.

63. Contemporary French Theater. (4) Lecture, three hours. Introduction to contemporary French drama in translation. Topics to be announced each term. P/NP or letter grading.

64A-64B-64C. The French Novel in Translation. (4-4-4) Lecture, three hours. Introduction to French novel masterpieces from variety of perspectives, including literary history, themes, and relations with other arts (film and music). Topics and titles to be announced each term. P/NP or letter grading.

**Upper Division Courses**

108A-108B. Advanced Practical Translation (4-4) (Formerly numbered 108A-108B-108C.) Lecture, three hours. P/NP or letter grading:

108B. Lecture, three hours. Requisite: course 102 or 108A. Translation of literary and sociocultural texts, including editorials, polemical issues, film subtitles. Comparative stylistics of translation. P/NP or letter grading.

110. French Business: Its Language and Culture. (4) Lecture, three hours. P/NP or letter grading:

110-112. Advanced Practical Translation (4-4) (Formerly numbered 108A-108B-108C.) Lecture, three hours. P/NP or letter grading:

111A. La Piéride and 16th-Century Poetry. Study of the linguistic and poetic "revolution" brought about by Defrance et l'illustration (1548), including texts by Marot, Solvay, Labbé, Du Bellay, and Ronsard.

111B. The Novel and Other 16th-Century Prose. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin.

111C. Late French Humanism. Emphasis on Montaigne's Essais, with other texts from the Religious Wars period.

117A-I17B-I17C. 17th Century. (4-4-4) Lecture, three hours:

117A. Theater. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine.

117B. Prose. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine.

117C. Culture and Society. Study of 17th-century political, social, religious, and courtly aspects, including libertine and salons milieux, la Fronde, and Versailles.

118A-I18B-I18C. 18th Century. (4-4-4) Lecture, three hours:

118A. Satire. Readings include Montesquieu's Lettres persanes, Diderot's Neveu de Rameau and Rêve de d'Allemont, and Voltaire's Contes.

118B. The Novel. Readings include Prévost's Manon Lescaut, Diderot's La Religieuse and Jacques le fataliste, excerpts from Rousseau's Julie, and La Vélu Les Liaisons dangereuses.

118C. Theater. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau.

119A-I19B. 19th Century. (4-4-4) Lecture, three hours:

119A. Romanticism. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vigny, Balzac, and Stendhal.

119B. Generation of 1848. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the théâtre à thèse and Parnassian poetry.

119C. Naturalism and Symbolism. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Becque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarme.

119D. Turn of the Century. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Barthes, Alain-Fournier, Jarry, Roussel, France, and Romains-Rolland.

120A-I20B-I20C. 20th Century. (4-4-4) (Formerly numbered 120A-I20D.) Lecture, three hours. P/NP or letter grading:

120B. Literature from 1918 to 1945. Lecture, three hours. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh. P/NP or letter grading.

120C. Post-World War II Literature. Lecture, three hours. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras. P/NP or letter grading.

121A-I21B. Contemporary Francophone Literature (4-4-4) Lecture, three hours:

121A. French-African Literature. Survey of literary works of French expression north and south of the Sahara from World War I to the present.

121B. Quebec Literature. (Formerly numbered 121B.) Survey of modern Quebecois literary works. Concurrently scheduled with course C222. P/NP or letter grading.

125. Evolution of French Comedy. (4) Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the theater of the absurd.

130A-130B-130C. History of French Civilization and Institutions. (4-4-4) Requisites: courses 6, 12:

130A. France from Prehistoric Times to the End of the Middle Ages. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

130B. From the Renaissance to the End of the "Ancien Régime." Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

130C. From the End of the "Ancien Régime" to 1918. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

132. Contemporary France. (4) Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France.

M140. Women's Studies in French Literature. (4) (Formerly numbered 140.) (Same as Women's Studies M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/NP or letter grading.

141. Cinema and Literature in France. (4) Lecture, three hours. Additional hours may be required for viewing films and other laboratory activities. Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects.

142. Poetry and Music. (4) Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the setting of poetic texts to music, from the troubadours to modern times.

143. Rhetoric of Rule. (4) (Same as Communication Studies M117.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

150. Studies in Medieval Literature. (4) May be repeated once for credit with consent of major adviser.

151. Studies in 16th-Century Literature. (4) May be repeated once for credit with consent of major adviser.

152. Studies in 17th-Century Literature. (4) May be repeated once for credit with consent of major adviser.

153. Studies in 18th-Century Literature. (4) May be repeated once for credit with consent of major adviser.

154. Studies in 19th-Century Literature. (4) May be repeated once for credit with consent of major adviser.

155. Studies in 20th-Century Literature. (4) May be repeated once for credit with consent of major adviser.

156. Studies in Contemporary Literature of French Expression. (4) May be repeated once for credit with consent of major adviser.

157. Studies in French Critical Theory and Philosophy. (4) Lecture, three hours. Advanced study of major concepts in contemporary French thought, with attention to its influence on French literature and culture, and its application to literary and nonliterary texts.

158. Studies in History of Ideas. (4) Lecture, three hours. May be repeated once for credit with consent of major adviser.

159. Studies in French Thought in Translation. (4) Lecture, three hours. Reading and discussion of contemporary texts in translation.

164A-164B-164C. The French Novel in Translation. (4) Lecture, three hours. Texts and authors to be announced in advance for each offering.

165. Topics in French Literature in Translation. (4) Lecture, three hours. To be announced each term. May not be taken for major or graduate credit but may be considered as an out-of-department elective for purpose of satisfying major requirements.
Graduate Courses

201. Literary Research and Composition. (4) Lecture, three hours. Introduction to graduate-level literary research, including reading scholarly papers, compilation and presentation of bibliography, and practical work in computer use of data bank.

202. Historical and Philosophical Background to French Literary Criticism. (4) Lecture, three hours.

203. Contemporary Theories. (4) Lecture, three hours. Introductory study of representative texts from the work of major modern theoreticians, which may include works by Althusser, Barthes, Derrida, Foucault, Genette, Greimas, Kristeva, and Lacan.

205. Techniques of Literary Analysis. (4) Lecture, three hours. Practice in close analysis of literary texts, including explanation and interpretation of major works.

220. 20th Century. (4) (Formerly numbered 220A-220D). Lecture, three hours. Overview, both historical and analytical, of 20th-century French literature set in context of several key critical topics that interrogate canonical interpretation. Letter grading.

221B. French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence.

221C. French-African Literature of Berbero-Sudanean and Arabo-Islamic Africa. Readings and analysis of major works since independence.

C222. Contemporary Francophone Literature: Québec Literature. (Formerly numbered 222.) Lecture, three hours. Survey of modern Québécois literary works. Concurrently scheduled with course C121B.

241. Introduction to Generative Anthropology. (4) Lecture, three hours. Discussion of principles of generative anthropology and their application to study of literary texts and related cultural phenomena.

242. Introduction to Study of Narrative. (4) Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature.

250A. Major Medieval Texts. (4) Seminar, three hours. Requisite: course 214. Intensive study of individual texts from multiple perspectives, such as La Chanson de Roland, a romance of Chrétien de Troyes, Le Roman de la rose, or François Villon’s Grand Testament. May be repeated for credit.

250B. Structures of Medieval Literature. (4) Seminar, three hours. Requisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures. May be repeated for credit.

250C. Problems in Medieval Literature. (4) Seminar, three hours. Requisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism. May be repeated for credit.

251A-251B. Studies in the Renaissance. (4-4) May be repeated for credit.

253A-253B. Studies in the 17th Century. (4-4) May be repeated for credit.

254A-254B. Studies in the 18th Century. (4-4) May be repeated for credit.

255A-255B. Studies in the 19th Century. (4-4) May be repeated for credit.

256A-256B. Studies in Contemporary Literature. (4-4) May be repeated for credit.

257A-257B. Studies in French-African Literature. (4-4) May be repeated for credit.

258A-258B. Studies in Literary Criticism. (4-4) May be repeated for credit.

259A-259B. Studies in Philosophy and Literature. (4-4) May be repeated for credit.

260A-260B. Studies in History of Ideas. (4-4) May be repeated for credit.

275A-275B. Studies in the 20th Century. (4-4) May be repeated for credit.

276A-276B. Studies in the 21st Century. (4-4) May be repeated for credit.}

General Education Clusters

Scope and Objectives

General education clusters, available to entering freshmen only, are an option for satisfying general education requirements. The clusters span three quarters and are interdisciplinary team-taught courses designed to introduce students to multiple areas of knowledge. They focus on a common topic and are organized in such a way that students can explore how different disciplines converge and diverge in their approach to a particular problem.

General education clusters are taught by some of the University’s most distinguished faculty and are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. During Fall and Winter Quarters, instruction in the clusters consists of lecture courses taught in concert with discussion sections. In Spring Quarter students enroll in one of a number of small satellite seminars whose topics are related to the cluster theme.

On completion of the entire yearlong cluster, students satisfy the equivalent of four general education courses.

For the current cluster course offerings and general education credit, refer to http://www.college.ucla.edu/ge/clusters.htm.
20A-20B-20C. Interracial Dynamics in American Culture, Society, and Literature. (5-5-5) Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Letter grading. 20A-20B. Lecture, three hours; discussion, two hours. Examination of nature and meaning of race in American society through study of history, literature, and the law. Consideration of construction of race as a social and cultural category among two or more groups and exploration of ways in which race has shaped understanding of American citizenship. 20C. Special Topics. Seminar, three hours. Consideration of how experiences, debates, and issues of race are represented and understood in historical, legal, cinematic, and literary contexts.

21A-21B-21C. History of Modern Thought. (5-5-5) Course 21A is enforced requisite to 21B, which is enforced requisite to 21C. Letter grading. 21A-21B. Lecture, three hours; discussion, two hours. Introduction to key issues in humanities and social sciences through close reading of prominent social theories of past four centuries. Consideration in historical context of writers from Rousseau and Wollstonecraft to Foucault and Beauvoir and from perspectives of academic specialties for which their work is fundamental. 21C. Special Topics. Seminar, three hours. Examination of cross-section of classical and modern social theories and debates that shape them.

70A-70B-70C. Evolution of Cosmos and Life. (5-5-5) Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. 70A-70B. Lecture, three hours; discussion, two hours. Use of concept of evolution, as it applies to biological organisms, Earth, solar system, and the universe itself, to introduce students to both the life and physical sciences. Examination of evolution of the universe, galaxy, solar system, and Earth in course 70A; focus on evolution of life in course 70B. 70C. Special Topics. Seminar, three hours. Examination in depth of various issues of evolution. Topics may range from creation of California's physical landscape to debate between evolution and creationism.

John A. Agnew, Ph.D., Chair
Glen M. MacDonald, Ph.D., Vice Chair

### Professors

John A. Agnew, Ph.D.
William A.V. Clark, Ph.D.
Michael R. Curry, Ph.D.
J. Nicholas Entrikin, Ph.D.
Glen M. MacDonald, Ph.D.
Antony R. Orme, Ph.D.
Allen J. Scott, Ph.D.
Stanley W. Trimble, Ph.D.
Hartmut S. Walter, Ph.D.

### Professors Emeriti

Charles F. Bennett, Ph.D.
C. Rainer Berger, Ph.D.
Henry J. Bruman, Ph.D.
Gary S. Dunbar, Ph.D.
Gerry A. Haie, Ph.D.
Huey L. Kostanick, Ph.D.
Clifford H. MacFadden, Ph.D.
Tom L. McKnight, Ph.D.
Howard J. Nelson, Ph.D.
Jonathan D. Sawyer, Ph.D.
Melissa Savage, Ph.D.
Werner H. Terjung, Ph.D.
Benjamin E. Thomas, Ph.D.
Norman J.W. Thrower, Ph.D.

### Associate Professors

Judith A. Carney, Ph.D.
J. Mark Ellis, Ph.D.
Chi-Fun Cindy Fan, Ph.D.
David L. Rigby, Ph.D.

### Assistant Professors

Joshua S.S. Muldavin, Ph.D.
Marilyn N. Raphael, Ph.D.
Laurence C. Smith, Ph.D.

## Scope and Objectives

Geography is concerned primarily with interpreting and explaining the occurrence, distribution, and interrelationships of the physical and social elements which can be seen in the landscape. The geographer concentrates on two essential questions: where are things located? and why are they located where they are? The answer to the former is largely descriptive, but the answer to the latter involves theory and analysis. The geographer's challenge is to provide continuing interpretation of the constantly changing physical and human landscapes on the Earth's surface.

The research and teaching interests of the faculty are highly ranked nationally by the Conference Board of the Associated Research Councils, cover major areas of geographical knowledge, and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into urban and regional development studies, spatial demography and social processes in the city, culture and environment in the modern world, physical geography, and biogeography.

Geography is an especially attractive major for liberal arts students. Its body of theory and its methodologies provide ideas and techniques applicable to a wide range of questions about our environment; it also provides both the regional and world perspectives required of responsible citizens.

The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in Geography and (2) the major in Geography/Environmental Studies. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts degree, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

### Undergraduate Study

#### Geography B.A.

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

### Preparation for the Major

**Required:** Geography 1, 2, 3, 4, M40. All courses must be taken for a letter grade.

**The Major**

**Required:** Ten upper division geography courses taken for a letter grade, which must include (1) five courses from one of the Concentrations for the Major listed below, (2) three additional courses in at least two different concentrations, (3) one regions course from Geography 122, 133, 136, 137, 152, 156, 158, 161, 180, 182A, 183, 184, 185, 186, 187, 190, 191, and (4) one procedures course (four units) from 100A (two units), 105A (two units), 163, 167 (six units), 168, 169, 170, 171.

### Major Concentrations

By the end of the junior year and no later than the beginning of the senior year, students are required to declare their specific concentration by filing a statement with the undergraduate adviser. The purpose of the concentration requirement is to expose students to systematic in-depth work within a specific area of geography. Completion of a concentration requires five upper division geography courses. Students must take a concentration's required course(s), if any, before declaring that concentration. They must select one of the following concentrations and meet its course requirements:

1. **Urban and Regional Development Studies:** Five courses from M128, 135, 148, 150, 152, 155, 157, 159A.

2. **Spatial Demography and Social Processes in the City:** Course 142 and four courses from 143, 144, 146, 150, 156, 159B.

3. **Culture and Environment in the Modern World:** Five courses from 133, 134, 135, 136, 138, 140, 152, 159C.

4. **Physical Geography:** Courses 100/100A, 104, 105/105A, and two courses from 101, 103, 107, 159D.

5. **Biogeography:** Five courses from 108, 111, 112, 116, 118, 122, 123, 159E, 163.

### Foreign Language/Mathematics Requirement

Every Geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the de-
department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

**Allied Fields**

Students must develop some competence in an allied field. This requirement consists of at least two upper division courses selected from at least one of the following disciplines: Afro-American studies, anthropology, art history, Asian American studies, atmospheric sciences, biology, chemistry, Chicana and Chicano studies, communication studies, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, women's studies. Urban Planning 187 and M190 are also acceptable. Other disciplines require departmental consent.

**Honors Program**

Honors in the Geography major may be obtained through procedures described under Geography 199HA-199HB.

**Geography/Environmental Studies B.A.**

The major in Geography/Environmental Studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as implications of global change on local and regional human systems.

**Preparation for the Major**

**Required:** Geography 1, 2, 3, 4, 5, M40. All courses must be taken for a letter grade. **Recommended:** Chemistry and Biochemistry 2 or 20A, Life Sciences 1, Mathematics 3A, 3B, Organismic Biology, Ecology, and Evolution 21, Philosophy 6, Physics 3A or 10. Students considering graduate work are strongly advised to include Chemistry and Biochemistry 20A, 20B, Mathematics 31A, 31B, and 32A in their program.

Students are strongly advised to complete all requisites before beginning upper division work in the major.

**The Major**

**Required:** Twelve upper division geography courses taken for a letter grade which must be distributed as follows: (1) **natural systems core** — two courses from 100, 103, 104, 105, 108, 112; (2) **human systems core** — two courses from 118, 133, 134, 140, 142, 148, 150; (3) **environmental studies cluster** — five courses from 107, 110, 116, 120, 121, 122, 123, 124, 125, 126, M128, 129, 131, 135, 136, 137; (4) **procedures** — two courses (eight units) from 100A (two units), 105A (two units), 163, 167 (six units), 168, 169, 170, 171; and (5) **regions** — one course from 122, 135, 136, 137, 152, 156, 180, 181, 182A, 183, 184, 185, 186, 187, 190, 191.

Geography/Environmental Studies majors are required to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

At least two upper division courses should be taken as electives in other social sciences departments (Anthropology, Economics, History, Political Science, Sociology), the Urban Planning Department (School of Public Policy and Social Research), or the School of Public Health. The courses should be complementary and/or supplementary to the major as students have constructed it.

**Foreign Language/Mathematics Requirement**

Every Geography/Environmental Studies major is required to pass five lower division courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

**Honors Program**

Honors in the Geography/Environmental Studies major may be obtained through procedures described under Geography 199HA-199HB.

**Computing Specialization**

Majors in Geography and Geography/Environmental Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, 171. Students graduate with a bachelor's degree in their major and a specialization in Computing.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master's Degree**

The Department of Geography offers the Master of Arts (M.A.) degree in Geography.

**Admission**

Application to the M.A. program may be made for admission to any quarter. An official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation must be submitted. Normally applicants should have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years in the major, (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

In addition, a faculty member must be willing to serve as interim adviser.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

**Areas of Study**

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography. At the M.A. level, students emphasize at least one of these specialized areas. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students, in consultation with knowledgeable faculty members, are expected to refine and deepen their research interests further, within, across, and beyond these organized research and teaching areas.

**Course Requirements**

Students must complete at least six courses in addition to the three required core courses (Geography 298A, 298B, 298C), for a minimum of 36 units. The core courses must be completed within two years and with a grade of B or better in each. For students entering with a geography major, the courses be completed in the first year. Two 100-level courses and four units of a 500-level course may be applied toward the minimum coursework requirement. The course program must have the approval of the faculty mentor.

Two 500-series courses may be applied toward the minimum course requirement for the M.A. degree but not toward the minimum graduate course requirement.
Courses for the M.A. cannot be applied to the minimum of nine courses for the M.A.

Student must complete a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation should proceed under the supervision of the M.A. committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study. The entire thesis project must be carried out in close consultation with all members of the thesis committee.

Doctoral Degree

Admission

Application to the program leading to the Ph.D. degree in Geography may be made for admission to any quarter. Applicants must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation. Normally applicants should have completed the undergraduate major in geography or in a related field, and received a B.A. or B.S. degree, attained at least a 3.3 grade-point average in courses taken in the junior and senior years and in the major, and a 3.5 GPA in graduate courses for students entering with an M.A. (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. Applicants must provide clear evidence of ability to conduct substantive research and to articulate ideas clearly in writing. In addition, a faculty member must be willing to serve as interim advisor. Under rare circumstances, students may proceed directly toward the Ph.D. degree without taking a master's degree. Students must have completed one year in the M.A. program, have three department faculty members review their dossiers and unanimously recommend such a course of action, and pass a four-hour qualifying examination set and evaluated by three faculty members competent in their area of specialization. The pass must be unanimous and receive the approval of at least two thirds of the voting faculty in a formal faculty meeting. The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Major Fields or Subdisciplines

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and urban geography. The written qualifying examinations for the Ph.D. include one examination in three of these fields selected by the student in consultation with an adviser. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students are expected to refine and deepen their research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

Course Requirements

Students must successfully complete, within two years and with a grade of B or better in each, the required core courses (Geography 298A, 298B, and 298C) if these have not already been taken at the M.A. level. Students entering with a geography degree should complete them in the first year. At least three graduate geography courses in addition to the M.A. coursework (excluding Geography 298A, 298B, 298C, 375, 495, and the 500 series) are required as are three upper division or graduate courses in one or two fields (outside of geography) allied to the student's major research area or subdisciplinary specialization, subject to approval of the guidance committee. The allied field requirement must be met before taking the oral qualifying examination. Each quarter, the program of coursework must be approved by the guidance committee and the graduate adviser.

Individual Study Courses

The following rules pertain to individual study courses (Geography 199, 596, 597, 598, 599):

(1) Before enrolling in one of these courses, students must consult with the responsible faculty member and work out a program of study and consultation.

(2) All 500-series courses must be taken on an S/U basis only.

(3) Students may enroll in Geography 597, 598, or 599 as often as required.

Teaching Courses: Geography 375 and 495 cannot be applied to the minimum course requirements for the Ph.D.

Written and Oral Qualifying Examinations

The written qualifying examination, consisting of five written papers and administered by the guidance committee, must be taken no later than the sixth quarter of the Ph.D. program (exceptions may be made in the case of students entering from disciplines outside of geography). Three papers pertain to three substantive fields of geographical inquiry in which the student is specializing; one general paper addresses the major issues, developments, and debates in the field at large; and one paper involves a field problem. The examination may be taken over a period of no more than two weeks. In case of failure, students may make one more attempt, but no sooner than three months nor longer than one year from the first examination.

Preparation of the dissertation proposal follows successful completion of the written qualifying examination. The dissertation proposal should specify the research question, describing in some detail the problem to be studied, its scientific background, and outline of the subject matter, the proposed methods of research, the degree of originality involved, and a timetable for completion of the degree. It is to be written in consultation with the official doctoral committee. Committee members should receive the dissertation proposal at least one month before the oral examination. The proposal must be approved unanimously by the committee before the oral examination can take place.

The University Oral Qualifying Examination, conducted by the official doctoral committee, focuses on the dissertation proposal. After successfully completing the oral examination, the student is eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

Geography

Lower Division Courses

1. Physical Environment. (4) Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.

2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World. (4) Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Study of Earth's biosphere, with particular reference to evolution and disturbance of plants, animals, and soils. P/NP or letter grading.

3. Cultural Geography. (4) Lecture, three hours; discussion, 90 minutes. Broad examination of basic cultural variables in human occupation of Earth's surface. Ecological, spatial, and historical approaches.

4. Globalization: Regional Development and World Economy. (4) Lecture, three hours; laboratory, one hour. Emergence of global economy and examination of its main characteristics, with focus on economic geography in attempting to understand spatial variation in distribution of all forms of human productive activity at different spatial scales. Students to have understanding of basic features of contemporary global space-economy and have a sense of its historical evolution at end of course. P/NP or letter grading.
105A. Hydrology: Field and Laboratory. (2) Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems. P/NP or letter grading.

M40. Introduction to Statistical Methods. (4) (Formerly numbered 40.) (Same as Statistics M12.) Lecture, three hours; laboratory, 90 minutes; outside study, seven and one-half hours. Satisfies General Education requirement for Geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Geography. (4 each) Discussion, three hours; reading period, one hour. Seminars designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term. P/NP or letter grading.

Upper Division Courses

100. Principles of Geomorphology. (4) Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 100A. Study of processes that shape the Earth's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations. P/NP or letter grading.

101A. Principles of Geomorphology: Field and Laboratory. (2) Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

101. Coastal Geomorphology. (4) Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and coral reefs, together with coastal zone management. P/NP or letter grading.

101A. Coastal Geomorphology: Field and Laboratory. (2) Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and coral reefs, together with coastal zone management. P/NP or letter grading.

103. Paleoclimatology and Ice-Age Environments. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

104. Climatology. (4) Lecture, three hours; reading period, one hour. Requisite: course 1. Study of processes that shape the Earth's climates, with emphasis on the microclimates of relevance to ecosystems and issues pertinent to environment and people. Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading.

134. Space, Place, and Nature in Western Thought. (4) Lecture, three hours. Designed for juniors/seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of space, knowledge, and inquiry. P/NP or letter grading.

137. Historical Geography of American Environment. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 1, 2. Designed for juniors/seniors. Study of systematic changes of natural environment in the U.S. over historical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and landforms, and human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

138. Place, Identity, and Networked World. (4) Lecture, three hours; reading period, one hour. Communications technologies, such as personal computers and Internet, seem to be connected to dramatic changes in identities of people, groups, and places. Exploration of those changes and their implications for social institutions and human values and practices. P/NP or letter grading.

139. Political Geography. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Spatiality of political activity, spatial constitution of political power, control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

140. Population Geography. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. P/NP or letter grading.

141. Geography of Health Care. (4) Lecture, three hours. Examination of geography of health care delivery and planning, focusing on factors which influence accessibility and utilization of health services by consumers. Spatial aspects of organization of health care and how stakeholders get their care where. P/NP or letter grading.

142. Ethnicity in the American City. (4) Lecture, three hours; reading period, two hours. Recommended preparation: course 142. Designed for juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America, with focus specifically on nonwhite ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading.

143. Gender, Race, and Geography of Employment in American Cities. (4) Lecture, three hours; reading period, two hours. Designed for juniors/seniors. Geography of employment of men and women of different racial and ethnic backgrounds in American cities. Examination of interrelationships between space and division of labor, and spatial restructuring on employment of women and minorities. P/NP or letter grading.

147. Cities of Europe. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe. Growth of city systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

148. Economic Geography. (4) Lecture, two hours; laboratory, one hour; outside study, one hour. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observing System satellites to land-use change, oceanography, meteorology, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

149. Images of Earth: The World from Above. (4) Lecture, two hours; laboratory, one hour. Introduction to scientific dating methods such as radiocarbon dating, radiodamage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.

Regions

150. Urban Geography. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

151. Models of Regional Growth and Change. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

152. Metropolitan Los Angeles. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

156. Metropolitan Los Angeles. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

157. Models of Regional Growth and Change. (4) Lecture, three hours; reading period, one hour. Prepar- ation: completion of three courses in a concentra- tion. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading.

158. Urban and Regional Development Studies. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

159A-159E. Problems in Geography. (4 each) Discussion, three hours; reading period, one hour. Preparation: completion of three courses in a concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading.

160. Images of Earth: The World from Above. (4) Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through the ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced the course of events. P/NP or letter grading.

161. Cartography. (6) Lecture, two hours; laboratory, six hours; outside study, three hours. Preparation: three courses from 1 through 5. Designed for juniors/seniors. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

162. Introduction to Geographic Information Systems. (4) Formerly numbered 170.) Lecture, two hours; laboratory, two hours; outside study, two hours. Designed for juniors/seniors. Introduction to basic geographic information systems (GIS) concepts and spatial analysis. Data structures, topology, and attribute information. Laboratory exercises using database query, manipulation, and spatial analysis to address "real world" problems. P/NP or letter grading.

163. Satellite Remote Sensing and Imaging Geographic Information Systems. (4) Lecture, two hours; laboratory, one hour; outside study, one hour. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observing System satellites to land-use change, oceanography, meteorology, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

164. Introduction to Geographic Information Systems. (4) (Not the same as course 170 prior to Spring Quarter 1997.) Lecture, three hours; discussion, one hour. Requisite: course 168. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

165. Quantitative Analysis. (4) Lecture, three hours; laboratory, one hour. Requisite: course 40. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

166. Field Analysis in Biogeography. (4) Fieldwork, eight hours. Requisites: courses 2, 5, 108, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

167. Cartography. (6) Lecture, two hours; laboratory, six hours; outside study, three hours. Preparation: three courses from 1 through 5. Designed for juniors/seniors. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

168. Field Analysis in Biogeography. (4) Fieldwork, eight hours. Requisites: courses 2, 5, 108, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.
185. South and Southeast Asia. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

186. Contemporary China. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People’s Republic of China. Dynamics that have led to China’s major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. P/NP or letter grading.

187. Middle East. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

190. Australasia. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Regional synthesis of physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. P/NP or letter grading.

191. California. (4) Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

Special Studies

199. Special Studies. (2 to 8) Hours to be arranged. Limited to juniors with a B average in the major or seniors.

199HA-199HB. Honors in Geography I, II. (4-4) Hours to be arranged. Preparation: 3.25 grade-point average overall, at least five upper division geography courses with a 3.5 grade-point average. 199HA. Independent study course taught by team of two faculty members who assist student with bibliographic research and/or field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199HA entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199HB. If that work is determined to be of A quality, student is allowed to continue in honors program. 199HB. Devoted to writing of substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If paper is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

199L. Independent Studies for Internships. (2 to 4) Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by placement for which student is doing internships. May not be applied toward major requirements. P/NP grading.

Graduate Courses

Environment

200. History and Paradigms of Geomorphology. (4) Lecture, two hours; discussion, one hour; reading period, eight hours. Preparation: two courses from 101, 103, 105, 107. Requisite: course 100. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

201. Coastal Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

202. Fluvial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

203. Glacial Geomorphology Seminar. (4) Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

204A-204B-204C. Advanced Climatology. (4) Lecture, three hours; laboratory, one hour. Preparation: first year of calculus and acquaintance with FORTRAN IV. Requisite: course 104. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

205. Seminar: Climatology. (4) Discussion, three hours; reading period, one hour. Requisites: courses 204A-204B-204C. Selected topics. May be repeated for credit.

208. Advanced Biogeography: Plants. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisites: courses 108, and 110 or 116. Intensive review and analysis of physical and cultural factors influencing plant distributions.

212. Advanced Biogeography: Animals. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 112 or 117. Intensive review and analysis of biophysical and cultural factors influencing animal distributions.

213. Seminar: Biogeography. (4) Discussion, three hours; reading period, two hours. Requisite: courses 208 or 212. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. (4) Discussion, three hours; reading period, two hours; fieldwork, three hours. Preparation: at least one course from 200 through 205 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit.

217. Quaternary Studies: Ecological Aspects. (4) Discussion, three hours; reading period, two hours. Requisites: courses 202 or 204A-204B-204C or 208 or 212 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit.

218. Advanced Medical Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 118. In-depth study of selected topics in medical geography and intensive review of recent research.

223. Seminar: Humid Topics. (4) Seminar, three hours; reading period, two hours. Designed for graduate students. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

M229. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes. (4) (Formerly numbered 229.) (Same as Urban Planning M267A.) Discussion, three hours. Recommended preparation: Urban Planning 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

Human Geography

230. Political Ecology. (4) Seminar, three hours; reading period, three hours. Designed for graduate students. Exploration of theoretical constructs and approaches to analyses of development and the environment associated with political ecology. Examination of relations between poverty, ecological degradation, and global restructuring. Case studies of changing production organization and ecology of land-use patterns within different and emergent economic and political contexts. S/U or letter grading.

231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. (4) Discussion, three hours; reading period, three hours. Designed for graduate students. Deconstruction of off-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

232. Advanced Cultural Geography. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 133. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

233. Seminar: Cultural Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 232 or 236. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit.

234. Environment and Subsistence in Indigenous Cultures. (4) Seminar, three hours. Discussion on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year.

237. Seminar: Historical Geography. (4) Discussion, three hours; reading period, one hour. Requisite: course 236. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography: Geopolitics. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

241. Seminar: Political Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 240. Related research projects growing out of course 240. May be repeated for credit.

244. Topics in Spatial Demography. (4) Discussion, three hours; reading period, two hours. Selected topics in migration and mobility, especially the nature of housing choice and neighborhood change. May be repeated for credit. S/U or letter grading.

248. Location and Space Economy. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.
249. Seminar: Economic Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 248. Related research projects growing out of course 248. May be repeated for credit.
250. Urban Systems. (4) Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.
251. Seminar: Urban Geography. (4) Discussion, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit.
254. Migration and Residential Mobility. (4) Lecture, two hours; discussion, one hour; reading period, one hour. Description and modeling of national, regional, and intra-urban migration.

Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. (4) Laboratory/workshop, 10 hours. Preparation: two courses from 200, 201, 202, 203, 215. Designed for graduate students. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.
262. Advanced Field Analysis: Biogeography. (8) Fieldwork, 10 hours. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.
268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing. (4) Discussion, one hour; laboratory, three hours. Recommended requisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presentation in publication-style format.
269. Remote Sensing of Environment. (4) Laboratory, three hours; independent study, two hours. Requisite: course 167. Study of aerial photographs and other remote sensing images as tools for geophysical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex.
273. Climate Dynamics. (2 to 4 each) Same as Atmospheric Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C. Seminar, two hours. Advanced course in Afrikaans, Dutch, Old Norse and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
495. Teaching College Geography. (2) Seminar, one hour; laboratory, three hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.
596. Directed Individual Study or Research. (2 to 8) May be repeated for credit. S/U grading.
597. Preparation for Ph.D. Qualifying Examinations. (2 to 8) Independent study. May be repeated for credit. S/U grading.

James Schultz, Ph.D., Acting Chair

Professors
Ehrhard Bahr, Ph.D. (German)
Jesse L. Byock, Ph.D. (Old Norse)
Robert S. Kirsner, Ph.D. (Dutch, Afrikaans)
Kathleen L. Konar, Ph.D. (German)
Wolfgang Nehring, Ph.D. (German)
James Schultz, Ph.D. (German)
Hans Wagener, Ph.D. (German)

Professors Emeriti
Franz H. Bäuml, Ph.D.
Marianna D. Binbaum, Ph.D.
Carl W. Hagge, Ph.D.
Victor A. Oswald, Jr., Ph.D.
Donald J. Ward, Ph.D.
Terence H. Wilbur, Ph.D.

Associate Professor
Jill Anne Kowalk, Ph.D. (German)

Assistant Professor
Christopher M. Stevens, Ph.D. (Germanic Linguistics and Philology)

Lecturer
Jutta Landa, Ph.D. (German)

Scope and Objectives

The Department of Germanic Languages offers an extraordinary array of courses in languages, literatures, and cultures. This broad range of studies offers training in specialized fields such as film, linguistics, folklore, and critical theory. Courses prepare students for a variety of careers, including law, business, international relations, academic professions, and publishing.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. Refer to the Scandinavian Section later in this catalog for information about the degrees in Scandinavian studies.

At all levels of study various specializations are possible. Language, literature, and culture studies are available in Afrikaans, Dutch, Old Norse, and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.

Undergraduate Study

Grammar/Composition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Afrikaans, Dutch, German, and Old Norse grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

German B.A.

Preparation for the Major

Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult the language program supervisor.

The Major

Three plans are offered by the department:

Plan A: Literature and Culture

Plan A is designed for students who are interested in studying German language and thought by selecting courses in literature, film, folklore, and contemporary culture studies.
Required: German 130A-130B and 11 upper division German courses, at least three of which must be at the 150 level or above. Two of the 11 courses may be upper division courses in other departments. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Students may take up to two courses from the 120 series or below in satisfaction of major requirements. Two additional courses from the 120 series or below may be selected if students elect not to take courses in other departments. All courses must be taken for a letter grade.

Plan B: German Studies
Plan B is designed for students whose interests are primarily interdisciplinary in nature. Departmental majors receive credit not only for upper division courses in German literature, film, folklore, and contemporary culture, but for courses in related fields such as history, political science, philosophy, music, and others.

Required: German 130A-130B, seven upper division German courses (at least two of which must be at the 150 level or above), and four upper division courses in a related field or fields selected in consultation with the undergraduate adviser. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Only two such contract courses may be applied toward the major. All courses must be taken for a letter grade.

Plan C: Germanic Languages/Linguistics
Plan C is intended for students interested in the study of languages and linguistics and allows students to study more than one Germanic language

Required: German 130A-130B, 150, 170, C172, and eight additional upper division courses as follows: three courses in one other Germanic language (Hungarian taught in the Slavic Languages and Literatures Department or Scandinavian languages taught in the Scandinavian Section may be applied by petition to the undergraduate adviser), three linguistics courses from outside the department (i.e., anthropology, applied linguistics, linguistics, sociology) selected in consultation with the undergraduate adviser, and two electives from department offerings (excluding German 100A, 100B, 100C, and courses taught in English translation). All courses must be taken for a letter grade.

Honors Program
To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

Instructional Credential in German
Students desiring the general secondary instructional credential in German should consult the Department of Education, 1009 Moore Hall (310-825-8328), and the Department of Germanic Languages.

German Minor
To enter the German minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (eight units): German 5 and 6 or equivalent.

Required Upper Division Courses (20 units): Any five German courses (excluding German literature in translation).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Germanic Languages Minor
To enter the Germanic Languages minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units): Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in translation), Hungarian, Old Norse, Scandinavian languages, Yiddish.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree
The Department of Germanic Languages offers the Master of Arts (M.A.) degree Germanic Languages.

Admission
A bachelor's degree in German, Germanic linguistics, or linguistics with a minor in German and a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required for admission to the M.A. program. Applicants with deficiencies in undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. Three letters of recommendation are required. Graduate Record Examination (GRE) scores are required from applicants from the U.S. and other English-speaking countries.

Areas of Study
There are four M.A. plans that differ with respect to course requirements and comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D. Plan C is for students with main interests in Germanic languages of which up to four courses may be from other departments in a relevant area (e.g., linguistics, applied linguistics, Indo-European linguistics, Romance linguistics). German 217, C238, and one seminar must be included. Half of the coursework must be in synchronic linguistics and half in diachronic linguistics. All coursework must be approved in advance by the graduate adviser.

Course Requirements
Plan A requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). In addition, German 134, 150 (or equivalent) are required. Undergraduate credit for these courses is applicable in satisfaction of these requirements.

Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Plan C requires a minimum of nine upper division and graduate courses (at least six must be graduate courses), with six in the major field (German) and three in a related field such as history, musicology, philosophy, or political science. All related field courses must be in the 200 series. One major field and one related field seminar must be included.

Plan D requires a minimum of nine upper division and graduate courses beyond the language requirements, of which at least six courses must be graduate level (200 or 500 series) and of which up to four courses may be from other departments in a relevant area (e.g., linguistics, applied linguistics, Indo-European linguistics, Romance linguistics). German 217, C238, and one seminar must be included. Half of the coursework should be in synchronic linguistics and half in diachronic linguistics. All coursework must be approved in advance by the graduate adviser.

German 596, 597, and 598 are graded S/U. Course 596 may be taken only twice during graduate study (M.A. and Ph.D. programs). Course 597 may be taken once before the M.A. degree; course 598 may be taken once. A maximum of two 500-series courses may be applied to the course requirements. However, if course 596 is taken twice before the M.A., it may not be applied to the eight graduate
courses required after completion of the M.A. Graduate students are expected to attend and participate in departmental lectures and colloquia.

Comprehensive Examination Plan
Examinations are offered each quarter, beginning with the written part during the fifth week of each quarter. Under exceptional circumstances, the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each quarter. The members of the committee administer the written and oral examinations. For Plans A and B there are three examinations with the following structures:

**One four-hour written examination.** Three areas of study are required. A two-hour examination is required for the primary area. Two additional areas of study are chosen from those listed below. A one-hour examination is required for each of the two areas.

For Plan A, students must choose history and structure of Germanic languages as one area of study. Students who choose German literature after 1600 are advised to choose the German literature before 1600 and history and structure of Germanic languages area as well. Students who choose only the areas of history and structure of Germanic languages and German literature after 1600 must take German 202A and 202B.

1. German literature before 1600
2. History and structure of Germanic languages
3. German literature after 1600
4. Dutch and Afrikaans
5. Old Norse studies
6. Yiddish
7. Folklore
8. Hungarian

**Bibliography Question.** On the Monday following the completion of the written examinations, a bibliography take-home question is given out that is based on the primary concentration. The question is to be completed and returned no later than the following Monday.

**One-hour oral examination.** A one-hour oral examination follows in the week in which the bibliography question is returned.

For Plan C, students submit two essays of approximately 10,000 words in the major field of German studies and 7,500 words in the extra-departmental related field, written under the guidance of a three-member faculty committee, one of whose members must be from another department. After satisfactorily completing the essays, members of the committee decide whether or not the candidate has passed.

For Plan D, the M.A. examination consists of three written examinations of two hours each, followed by a one-hour oral examination. Students are examined in the following areas: one examination on the history of Germanic languages, theory, and historical linguistics; one examination on the structure of Germanic languages, theory, and synchronic linguistics; one examination on languages and dialects. Students may select one modern language, one philological language, and a third language of their choice. The examination includes translation and parsing. To continue toward the Ph.D., students must receive a pass with the recommendation to continue.

After the written examinations have been taken, the M.A. committee decides whether students may proceed to the oral examination. If students fail the oral examination, the M.A. committee decides whether the entire examination must be repeated or only the oral portion. The Examination may be repeated only once without petition.

If students apply for the M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A., the examinations may be repeated if they choose not to have the M.A. degree officially awarded before the reexamination.

Thesis Plan
In lieu of the written examination requirement for Plans A, B, and D, students may submit a thesis to the department. Students in Plan B who elect to submit a thesis must, however, complete a two-hour oral examination in the area of their thesis as well as in two other areas of concentration in order to be approved for further doctoral study. Students in Plan D who elect the thesis option are required to take one two-hour written examination in addition to the thesis.

The following additional rules apply to the thesis option:

1. The thesis committee must consist of three members, one of whom serves as director. The student selects the director, and the other two members are appointed by the chair in consultation with the student.
2. No committee member from outside the department is required, except in the case of Plan C. For this plan, one member must be from the related field.
3. The thesis committee should be established no later than the end of the fourth quarter of the candidate’s graduate studies. At that time, the thesis committee must approve the plan for the thesis in writing and submit a copy to the graduate adviser.
4. No 598 course is required, although students may take one such course in preparation for the degree.
5. Candidates who fail the examination may repeat it once without petitioning the department. The examination must be repeated no later than one quarter following the quarter in which the first examination was failed.
6. The **Schedule of Classes** specifies the date for filing of the final draft of a thesis with the student's committee and the date on which revised and completed theses may be filed with the University. The examinations must be taken prior to the date on which revised and completed theses may be filed with the University.

Doctoral Degree

Admission

The department requires an M.A. degree in German or a Germanic language from an accredited U.S. institution for admission to the program leading to the Ph.D. degree in Germanic Languages. Also acceptable are European degrees such as German or Austrian Staatsexam, a German or Austrian Magister, or a Swiss Lizenziat. A German Zwischenprüf is not acceptable. In the case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to taking the qualifying examinations. Applicants with an M.A. in fields other than German (for example, in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination in German or Scandinavian, as applicable, within three quarters after admission to the department. Three letters of recommendation are required.

Major Fields or Subdisciplines

Not applicable.

Course Requirements

Students must have completed eight graduate courses (at least four in the Department of Germanic Languages) beyond the M.A. degree, three of which must be seminars. If students have already taken a seminar in preparation for their M.A. degree, only two of these eight courses must be seminars.

Written and Oral Qualifying Examinations

Students must (1) pass the graduate reading examination in French; (2) pass a departmental reading examination either in a modern Scandinavian language or in Dutch-Flemish, Afrikaans, Latin, or Yiddish (or an approved substitute language); (3) successfully complete three seminars; (4) pass the qualifying examinations. Written examinations may be repeated in case of failure. The faculty must decide whether students who fail the examination twice may be permitted another repeat.

The written examinations may be taken any time after admission to the doctoral program and fulfillment of all requisite requirements. The written qualifying examinations consist of 11 hours of total examination time. Students in literature are expected to cover six different areas: one author, one genre, one period, one theoretical or historical problem, and two special topics of their choosing. Students in linguistics complete a three-hour examination in five target languages and a second three-hour examination in linguistic theory. Students in
Old Norse are examined for two hours in language, two hours in theoretical problems of interpretation, and two hours on issues concerning social and historical context. Students in Scandinavian complete a three-hour examination in their major Scandinavian literature, and a second three-hour examination in the other two Scandinavian literatures.

After the student has completed the written examinations successfully, the chair of the guiding committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

German

Lower Division Courses

1. Elementary German. (4) Lecture, five hours; laboratory, one hour; outside study, five hours minimum. P/NP or letter grading.

2. Intermediate German. (4) Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

3. German for Graduate Students. (4) Reading and translation, three hours. Requisite: course 2G.

4. German Civilization and Culture before 1700. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

5. Modern German Civilization and Culture from 1700 to 1919. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

6. Modern German Civilization and Culture in the 20th Century. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and institutions from 1919 to the present. Study of German culture and society today. May not be repeated for credit. Letter grading.

7. Modern German Film in Cultural Context: Early German Film. (4) Formerly numbered 121B. Lecture, two hours; discussion, one hour; outside study, nine hours. Lectures and texts in English. Additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist cinema to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

8. Modern German Film in Cultural Context: New German Film. (4) Formerly numbered 121C. Lecture, two hours; discussion, one hour; outside study, nine hours. Lectures and texts in English. Additional readings in German for majors. Survey of German film from 1945 to 1990. Analysis of ideological and stylistic development of film from film noir cinema to films of Werner Herzog, Fassbinder, and Margarethe von Trotta. Film discussions enhanced by interactive media. Letter grading.

9. The Faust Tradition from the Renaissance to the Modern Age. (4) Formerly numbered 119D. Lecture, three hours; outside study, nine hours. Readings and discussions of the Faust theme in European literature and intellectual history, including chapbook of Doktor Faustus, Marlowe’s and Goethe’s dramas, and Thomas Mann’s and Bulgakov’s novels. Letter grading.

10. Love and Sex in German Literary Tradition. (4) Formerly numbered 119D. Lecture, three hours; outside study, nine hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

11. Nietzsche and Critique of Western Culture. (4) Formerly numbered 119E. Lecture, two hours; discussion, one hour; outside study, nine hours. Readings that focus on Nietzsche’s critique of Christianity, modernity, humanism, and psychological relation between culture and life. Letter grading.

12. Jewish Writing and Thought in German Culture from 1755 to the Present. (4) Formerly numbered 119F. Lecture, three hours; outside study, nine hours. Analysis of works that represent process of Jewish assimilation, disenfranchisement, and extermination, including authors such as Mendelssohn, Heine, Kafka, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.

Upper Division Courses

100A. German Civilization and Culture before 1700. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

100B. Modern German Civilization and Culture from 1700 to 1919. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

100C. German Civilization and Culture in the 20th Century. (4) Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and institutions from 1919 to the present, emphasizing developments in literature, arts, and architecture. P/NP or letter grading.

102A. German Film in Cultural Context: Early German Film. (4) Formerly numbered 121B. Lecture, two hours; discussion, one hour; outside study, nine hours. Lectures and texts in English. Additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

102B. German Film in Cultural Context: New German Film. (4) Formerly numbered 121C. Lecture, two hours; discussion, one hour; outside study, nine hours. Lectures and texts in English. Additional readings in German for majors. Survey of German film from 1945 to 1990. Analysis of ideological and stylistic development of film from film noir cinema to films of Werner Herzog, Fassbinder, and Margarethe von Trotta. Film discussions enhanced by interactive media. Letter grading.

106. The Faust Tradition from the Renaissance to the Modern Age. (4) Formerly numbered 119D. Lecture, three hours; outside study, nine hours. Readings and discussions of the Faust theme in European literature and intellectual history, including chapbook of Doktor Faustus, Marlowe’s and Goethe’s dramas, and Thomas Mann’s and Bulgakov’s novels. Letter grading.

110. Love and Sex in German Literary Tradition. (4) Formerly numbered 119D. Lecture, three hours; outside study, nine hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

112. Jewish Writing and Thought in German Culture from 1755 to the Present. (4) Formerly numbered 119F. Lecture, three hours; outside study, nine hours. Analysis of works that represent process of Jewish assimilation, disenfranchisement, and extermination, including authors such as Mendelssohn, Heine, Kafka, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.

116. Special Topics in Modern Literature and Culture. (4) Formerly numbered 119E. Lecture, three hours; outside study, nine hours. Content varies with instructor and may include works by authors such as Thomas Mann, Rilke, Kafka, Brecht, Christa Wolf, and others. May be repeated for credit. Letter grading.

118. Feminist Issues in German Literature and Culture. (4) Formerly numbered 121E. Lecture, three hours; outside study, nine hours. Analysis of major issues in German feminism today (e.g., status, creative work, and reception of women writers in various periods such as Romanticism, Fascism, and/or divided/unified Germanies). Letter grading.

M119K. Tristan, Isolde, and History of Heterosexuality. (4) Same as Women’s Studies M119. Lecture, three hours; outside study, nine hours. Tristan and Isolde are among the most famous and enduring of European literary lovers, and following their introduction to the Western reader from Middle Ages to the present provides opportunity to consider a host of issues — from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

120. German Folklore. (4) Formerly numbered 134. Lecture, three hours; outside study, nine hours. Survey of various folklore genres in cultural context, including legends, proverbs, and cultural enactments such as carnival. Letter grading.

M122. Fairy Tales in Literature and Society. (5) Formerly numbered M119. Lecture, four hours; outside study, 11 hours. History and reception of folkore collections in Europe, with particular attention to ideology and influence of Grimms’ tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. Letter grading.

130A-130B. Conversation and Composition on Contemporary German Culture and Society I, II (4-4) Formerly numbered 108A-108B. Lecture, three hours; outside study, nine hours. Requisite: course 6. Course 130A is requisite to 130B. Structured around themes as they emerge in contemporary German texts ranging from news magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. Letter grading.

132. Business German. (4) Formerly numbered 102J. Lecture, three hours; outside study, nine hours. Study of various business-related topics, including topics such as marketing, management, and writing skills of interpretation, analysis, and criticism. Readings may include selections from literature, business, and current affairs. Business German course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and criticism. Students create their own interactive media presentations. Letter grading.

134. Advanced German Language through Cultural History and Current Affairs. (4) Formerly numbered 128. Lecture, three hours; outside study, nine hours. Requisites: courses 130A-130B. Advanced German language course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and criticism. Readings may include selections from literature, business, and current affairs. Students create their own interactive media presentations. Letter grading.

136. Theory and Practice of Translation. (4) Formerly numbered 103. Lecture, three hours; outside study, nine hours. Requisite: course 130B with a grade of B or better. German/English and English/German translation of literary texts, popular press articles, and business documents, with attention to issues of style. Letter grading.
140A. Introduction to German Poetry. (4) (Formerly numbered 101A.) Lecture, three hours; outside study, nine hours. Close reading of representative examples of German lyric poetry from early as well as recent literary periods, including systematic consideration of poetic conventions and forms, diction, imagery, symbolism, and metrics. Letter grading.

140B. Introduction to German Drama. (4) (Formerly numbered 101B.) Lecture, three hours; outside study, nine hours. Analysis of selected dramatic genres (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, historical drama, etc.), including systematic review of dramatic forms, techniques, and theories. Texts selected from both contemporary and earlier periods. Letter grading.

140C. Introduction to German Narrative Prose. (4) (Formerly numbered 101C.) Lecture, three hours; outside study, nine hours. Analysis of narrative prose genres (e.g., short story, novella, fairy tales, etc.), including systematic review of narrative forms, techniques, and styles. Texts selected from both contemporary and earlier periods. Letter grading.

142. Introduction to 18th-Century Studies. (4) (Formerly numbered 104.) Lecture, three hours; outside study, nine hours. Topics in Enlightenment literature and German literature. Works by Goethe, Lessing, Schiller, Kant, Mozart, and others. Letter grading.

144. Introduction to 19th-Century Studies. (4) (Formerly numbered 105.) Lecture, three hours; outside study, nine hours. Presentation of major texts from Romanticism to realism. Works by Kleist, Büchner, Heine, Fontane, and others. Letter grading.

146. Introduction to Modern Literature. (4) (Formerly numbered 107.) Lecture, three hours; outside study, nine hours. Analysis of selected modern works written between 1890 and 1945, including texts by authors such as Thomas Mann, Kafka, Rilke, Brecht, and others. Letter grading.

148. Introduction to Contemporary Literature. (4) (Formerly numbered 107.) Lecture, three hours; outside study, nine hours. Analysis and discussion of German, Austrian, Swiss, and ex-GDR literatures from 1945 to the present. Examination of writers such as Heinrich Böll, Günther Grass, Friedrich Dürrenmatt, Elfriede Jelinek, and Christa Wolf with a view to their specific political and cultural context. Letter grading.

150. Language and Linguistics. (4) (Formerly numbered 122.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. Reading and analysis of major works from the Middle Ages to the baroque. Letter grading.

154. Goethe. (4) (Formerly numbered 123.) Lecture, three hours; outside study, nine hours. Requisite: course 140A. Readings and analysis of major works by Goethe, Lessing, Schiller, Novalis, E.T.A. Hoffmann, and Eichendorff. Letter grading.

156. Goethe’s Faust. (4) (Formerly numbered 132.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. Detailed interpretation of Goethe’s major work, Parts I and II, together with general consideration of other treatments of the Faust theme in European literature. Letter grading.

158. Romanticism. (4) (Formerly numbered 124.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. Reading and analysis of major works by German Romantics, including Friedrich Schlegel, Novalis, E.T.A. Hoffmann, and Eichendorff. Letter grading.

160. Advanced Study of Modern Literature. (4) (Formerly numbered 126.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. Naturalism, Expressionism, and other early 20th-century literary movements and works. Letter grading.

162. Advanced Study of Contemporary Literature and Culture. (4) (Formerly numbered 127.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. Literature after 1945 in German-speaking countries, including issues such as national borders, ethnic identity, gender relations, and commercialization of culture. Letter grading.

170. Current Topics in Germanic Linguistics. (4) (Formerly numbered 137.) Lecture, three hours; outside study, nine hours. Requisite: course 130A. In-depth investigation of one topic in field of Germanic linguistics, such as phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. Letter grading.

C172. Linguistic Theory and Grammatical Description. (4) (Formerly numbered C138.) Lecture, three hours; outside study, nine hours. Requisite: course 150 or Linguistics 20. Problems in structure of modern standard German, its phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. Letter grading.

199. Special Studies. (2 to 4) To be arranged with faculty member who directs the course (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

201A. Bibliography, Research Methods, and Scholarly Writing. (4) Lecture, three hours. Introduction to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers.

201C. Theories of Literary Criticism. (4) Lecture, three hours. Analysis and discussion of foundations of literary criticism and current theories such as hermeneutics, positivism, psychoanalytical criticism, social historical approaches, intellectual history (Geistesgeschichte), New Criticism, Marxist Criticism, Russian and Czech Formalism, structuralism, and semiotics.

202A. Middle High German. (4) Introduction to grammar, syntax, and vocabulary of the Middle High German language. Exercises in reading Middle High German literary works, combined with study of sociocultural contexts in which works of the medieval period were produced and performed.

202B. Readings in Middle High German Literature. (4) Intensive reading of literary monuments of the medieval period in Germany. Introduction to cultural and literary history of the Middle Ages.

205. Baroque Literature. (4) Definition of the term baroque; development of modern baroque scholarship; influence of foreign models; analysis of sample theoretical writings (prosodies) and of representative poems, dramas, novels, and prose satires of the 17th century.

206A. Enlightenment and Sentimentalism. (4) Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including authors such as Leibniz, Thomasius, Wolff, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brokes, Anacreontic poets, Gessner, Kloppstock, Mendelssohn, and Wieland.

208. Studies in German Drama. (4) Study of representative authors of the Sturm und Drang period, such as Herder, Forster, Gerstenberg, Leisewitz, Klinger, Wagner, R.M. Lens, Moritz, Heine, Schubart, and the young Goethe and Schiller.

207A. Classicism: Goethe. (4) Selected topics from works of Goethe in the period from 1786 to 1832, such as Iphigenie auf Tauris, Torquato Tasso, Wilhelm Meisters Lehrjahre, Die natürliche Tochter, Pandora, and poetry selections.

207B. Classicism: Schiller. (4) Selected topics from critical and dramatic works of Schiller in the period from 1793 to 1805, such as Über Annmut und Würde, Über das Erhabene, Wallenstein, Maria Stuart, Jungfrau von Orleans, and Wilhelm Tell.

208. Romanticism. (4) Analysis of selected works of the Romantic period by authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Anthim, the brothers Grimm, “Bonaventura,” E.T.A. Hoffmann, Eichendorff, and others. Course may be genre or topic oriented.

209A. 19th-Century Lyric. (4) Development of German lyric poetry from the classic/Romantic period to symbolism. Discussion of forms, attitudes, tendencies. Analyses may include poetry by Romantic authors, as well as Heine, Platen, the political poets of Vormärz, Droste-Hülshoff, Keller, Storm, C.F. Meyer, Niebel 106; Lecture, and others. Letter grading.

209B. 19th-Century Drama. (4) Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as Schicksalstragödie, bourgeois trivial drama, sociopolitical drama, historical drama, Viennese Volkstheater.

209C. 19th-Century Narrative Prose. (4) Analysis of German prose works from Romanticism to naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include Heine, Büchner, Droste-Hülshoff, Stifter, Greif, C.F. Meyer, Fontane, and the early naturalists.

210A. Naturalism and Symbolism. (4) Sociological background and theoretical writings concerning naturalism and symbolism. Analysis of representative poems, dramas, and shorter narratives by authors such as Hofz, G. Hauptmann, George, Hofmannsthal, and Rilke.

210B. Expressionism and Neorealism. (4) Historical and sociological background in the period from 1910 to 1933. Literary magazines, theoretical writings, poetry of expressionism and Dadaism, expressionist dramas, and shorter narratives. Definition and representative works of neorealism.

210C. 20th-Century Novel to 1945. (4) Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and Rilke.

211A. Contemporary Novel. (4) Study of selected novels in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Böll, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in context of literary, cultural, and political trends.

211B. Contemporary Lyric and Drama. (4) Study of selected dramas and poems in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Dürrenmatt, Frisch, Handke, Celan, and Brecht, analyzed and placed in context of literary, cultural, and political trends.
Germanic Languages / 334

217. History of the German Language. (4) Historical survey of development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, medieval period, Romance, baroque period, and Enlightenment until its final codification at the end of the 19th century.

230. Survey of Germanic Philology. (4) Systematic survey of major problems in the field of Germanic linguistics: origin and historical diffusion of Germanic dialects and their classification; problems in evolution of nominal and verbal morphology of the various dialects; problems in phonological evolution of the various dialects.

232. Old High German. (4) Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

C238. Linguistic Theory and Grammatical Description. (4) Lecture; three hours; outside study, nine hours. Requisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-orientated linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C172. Graduate students meet as a group one additional hour each week and write research papers of greater depth. Letter grade only.

251. Seminar: Syntax and Phonology of German. (4) Topics selected from the field of contemporary German syntax and phonology according to needs and preparation of students enrolled (e.g., Diachronie, phonology, generative syntax, Val-cn theories, Texttheory).

252. Seminar: Historical and Comparative Germanic Linguistics. (4) Topics selected from the field of historical Germanic phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax).

253. Seminar: Medieval Literature. (4) Selected topics in medieval literature, with emphasis on problems in literary analysis and applicability of various types of analysis to medieval texts.

255. Seminar: Baroque Literature. (4) Selected problems of German baroque literature, such as a particular genre, author, or theme. Textual analysis. Letter grade only.

256. Seminar: Enlightenment and Sturm und Drang. (4) Selected topics in 18th-century literature, such as utopian literature, love and money as motifs, family structure and family life, image of women and women’s literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-century literature. Textual analysis and review of current research.

257. Seminar: Age of Goethe. (4) Selected topics in German literature between 1775 and 1832, such as Schiller’s theoretical writings, Goethe’s Faust II, Goethe’s Wandering and West-Ostliche Divan, Goethe’s Faust II and Hegel’s Phänomenologie des Geistes, the French Revolution and German classicism. Textual analysis and review of current research.

261. Seminar: Contemporary Literature. (4) Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in context of literary, cultural, and political trends.

262. Seminar: Germanic Folklore. (4) Detailed research on individual aspects of Germanic folklore. Topic selected generally is from course in the German 240 series that preceded the seminar. Emphasis on problems of theory and method.

263. Seminar: Theories of Literature. (4) Specialization in literary theories, such as Rezeptionsästhetik, Neo-Marxist Criticism, New Criticism, psychoanalytic criticism or sociology of literature, structuralism, and hermeneutics.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice: active supervision and participation in selected courses. Internship is designed to meet the needs of the student and the course. May not be applied toward M.A. course requirements. S/U grading.

495A. Preparation for College Teaching of German. (2) Study of problems and methods in teaching German on college level, with emphasis on teaching and testing the teaching, speaking, reading, and writing skills. May not be applied toward M.A. course requirements. S/U grading.

495B. College Teaching of German: Special Problems. (2) Requisite: course 495A. Study of contemporary issues in German language pedagogy, with emphasis on textbook evaluation and proficiency-oriented instruction. May not be applied toward M.A. course requirements. S/U grading.

4956. Directed Individual Study or Research. (4) To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor). S/U grading.

4957. Preparation for Ph.D. Qualifying Examinations. (4) To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor). May not be applied toward M.A. course requirements. S/U grading.

Graduate Courses

596. Directed Individual Study or Research in Afrikaans. (4) To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor). May be repeated once. S/U grading.

Dutch

Upper Division Courses

105B. Intermediate Afrikaans. (4) Lecture/language laboratory. Requisite: course 105A. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources.

114. Afrikaans Literature in Translation. (4) Lecture, three hours. Readings and analysis of works by selected authors such as Brink, Joubert, Krieger, Loew, Marais, and Rabie and selected poets such as Breytenbach, Eybers, Lion Cachet, W.E.G. Louw, Van Wyk Louw, and Opperman.

135. Introduction to Afrikaans Literature. (4) Discussion of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Louw and Brink, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach.

199. Special Studies in Afrikaans. (2 to 4) Independent study course for students who desire a more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Upper Division Courses

100. Modern Dutch Culture and Society. (4) Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, and Dutch government (including ‘Pillarization’ — verzelfstandiging), the two World Wars, housing policy, mass media, and rise of a multicultural society.

103A-103B. Elementary Dutch. (4) Lecture/language laboratory. Course 103A is requisite to 103B. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing.

104A-104B. Accelerated Dutch (6-6) Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A-103B, 103C in two terms rather than three.

113. Modern Dutch and Flemish Literature in Translation. (4) Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Giselt, Couperus, Man, Mulisch, Nijhoff, and Revent and selected poets such as Kampert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Olst, and Vroman.
120. Introduction to Dutch Studies. (4) Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistik.

131. Introduction to Modern Dutch Literature. (4) Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist Beweging van Tachtig and the post-War Beweging van Vlijt.

199. Special Studies in Dutch. (2 to 4) Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

596. Directed Individual Study or Research in Dutch. (4) To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. (4) To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

Old Norse Studies

Lower Division Course

40. The Heroic Journey in Northern Myth, Legend, and Epic. (4) Comparison of the journeys of heroes. Readings in mythology, legend, folklore, and epic, including Nibelungenlied, Volsunga saga, Eddas, and Beowulf. Cultural and historic backgrounds to the texts. All readings in English.

Upper Division Courses

C139. The Saga. (4) Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C268.

C140. Viking Civilization and Literature. (4) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Eddas. Concurrently scheduled with course C241.

C145. Old Norse Literature and Society. (4) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C140. Graduate students do additional readings and write more extensive research papers.

C272. Old Norse Literature and Society. (4) Seminar, three hours. History, society, and culture of early Scandinavians. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do additional readings and write more extensive research papers.

596. Directed Individual Study or Research. (4) To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. (4) To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

Graduate Courses

221. Advanced Old Norse Prose. (4) Requisite: course 152. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history.

C241. Viking Civilization and Literature. (4) Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and Eddas. Concurrently scheduled with course C140. Graduate students do additional readings and write more extensive research papers.

C245. Germanic and Scandinavian Mythology. (4) Seminar, three hours. Study of Northern mythology and religion through close reading of Eddic texts and secondary sources.

C268. The Saga. (4) Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C139. Graduate students do additional readings and write more extensive research papers.

C272. Old Norse Literature and Society. (4) Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do additional readings and write more extensive research papers.

Scope and Objectives

The explosive expansion of the older population in this country and the world — the “Age Revolution” — insures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families age.

Undergraduate Study

Gerontology Minor

To enter the Gerontology minor, students must have an overall grade-point average of 2.0 or better.

Required Upper Division Courses (28 units): Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M150, Psychology 124G, 193 (only eight units may be applied toward the minor; fieldwork placements must be approved by the chair of the minor). Women’s Studies 185 (only when the special topic is women, health, and aging).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Gerontology

Upper Division Courses

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Social Welfare M104C and Women’s Studies M104C) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Same as Social Welfare M104D) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

---

Gerontology Minor

Interdepartmental Program College of Letters and Science

UCLA 8631 Franz Hall Box 951583 Los Angeles, CA 90095-1563 (310) 206-0312 e-mail: gerontology@psych.ucla.edu http://www.psych.ucla.edu/Undergrad/gerontology_minor.htm

Larry L. Butcher, Ph.D., Director

Professors

Emily K. Abel, Ph.D. (Health Services)

Larry L. Butcher, Ph.D. (Psychology)

Steven G. Clarke, Ph.D. (Chemistry and Biochemistry)

Rita B. Effros, Ph.D. (In Residence (Pathology and Laboratory Medicine)

Robert M. Emrison, Ph.D. (Sociology)

James L. Eubank, D.S.W. (Social Welfare)

Donald G. MacKay, Ph.D. (Psychology)

Melvin Pollner, Ph.D. (Sociology)

Arnold B. Schobel, M.D. (Neurobiology, Psychiatry and Biobehavioral Sciences)

Fernando M. Torres-Gil, Ph.D. (Social Welfare)

F. Eugene Yates, M.D. (Medicine)
M104E. Social Aspects of Aging. (4) (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

M1190. Psychology of Aging. (4) (Same as Psychology M1190.) Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement; others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

M140. Introduction to Study of Aging. (4) (Same as Psychology M140 and Social Welfare M140.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

M141. Women, Health, and Aging: Policy Issues. (4) (Same as Health Services CM141 and Women’s Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

M150. Sociology of Aging. (4) (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

**Scope and Objectives**

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Department of Health Services offers the Master of Science (M.S.) degree in Health Services. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

**Admission**

Admission requirements for the M.S. program in Health Services are the same as for the M.P.H. See the M.P.H. admission section under Public Health Schoolwide Programs.

**Areas of Study**

Consult the graduate adviser.

**Course Requirements**

Students must complete Health Services 200A-200B, 237A-237B, 237C, and M422. Biostatistics 100A, 100B, and Epidemiology 100. Students must complete 16 full courses (64 units) and at least one year of graduate residence at the University of California. A minimum of five courses must be in the 200 or 500 series. Only four units of either Health Services 596 or 598 may be applied to the degree. Health Services 597 may not be applied toward the degree requirements. Students are strongly encouraged to take the following courses or equivalents: Biostatistics 200A-200B, and Epidemiology 201A-201B. Elective courses should be selected in consultation with an adviser. Electives may be chosen from offerings in the department of Health Services or other departments in the School of Public Health.

Students with a prior doctoral-level degree (M.D., Ph.D., J.D., D.D.S., or equivalent), and relevant experience, must complete 12 full courses (48 units). The four courses (16 units) not required for these students are identified through a waiver petition when the student advances to candidacy.
Only courses in which a grade of C— or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan
If the comprehensive examination/report plan is approved, a guidance committee of three faculty members is appointed. The comprehensive examination consists of an extensive written research report in the major area of study. It must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Thesis Plan
If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before students file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree

Admission
In addition to the University minimum requirements, the department requires for the Ph.D. degree in Health Services (1) satisfactory performance on the Graduate Record Examination (GRE); (2) at least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses; (3) a positive recommendation by the Health Services Department; (4) approval by the doctoral admissions committee and the department chair; (5) completion of the M.S. in Health Services or an appropriately related field is preferred. Screening examinations may be required by the department.

Major Fields or Subdisciplines
Consult the graduate adviser.

Course Requirements
In addition to the requirements for an M.S. in Health Services, major field course requirements include Health Services 249H and Biostatistics 200A and 200B. A cognate is required with at least 12 units (three courses) from a department that grants a Ph.D. degree. Cognate courses must be at the graduate level and should be core theory and research courses for the discipline chosen. Acceptable cognate areas would be from one of the following disciplinary areas: economics, epidemiology, history, management, political science, psychology, and sociology.

Written and Oral Qualifying Examinations
Before advancement to candidacy, students must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed when students are ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in the Department of Health Services; at least one must hold an appointment in another department at UCLA.

The doctoral committee administers the oral qualifying examination after students have successfully completed the written examination. After passing the University Oral Qualifying Examination, students may be advanced to candidacy and commence work on a dissertation in the principal field of study. The doctoral committee guides the student’s progress toward completion of the dissertation.

Health Services

Lower Division Course
88. Lower Division Seminar: Special Topics in Health Services. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject Requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in health services approach study of them. Preclude other course for the discipline chosen. Acceptable cognate courses must be at the graduate level and should be core theory and research projects with guidance of a professional school faculty member. Letter grading.

Upper Division Courses
100. Health Services Organization. (4) Lecture, four hours; discussion, one hour. Preparation: four units of social sciences, structure and function of American health care system; issues and forces shaping its future. P/NP or letter grading.

M110. Ethnic, Cultural, and Gender Issues in America’s Health Care Systems. (4) (Formerly numbered 110.) (Same as Asian American Studies M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

131. Structure and Function of Health Care Facilities. (4) Lecture, two hours; discussion, two hours. Requisite or corequisite: course 100. Introduction to structure, organization, and function of health care facilities. P/NP or letter grading.

132. Financial and Managerial Accounting for Health Services Organizations. (4) Lecture, four hours. Preparation: course 100. Introduction to financial and managerial accounting and its application to the health services industry. P/NP or letter grading.

133. Introduction to Health Economics. (4) Lecture, four hours. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital cost functions, and costs and benefits of health programs. P/NP or letter grading.

134. Introduction to Comprehensive Health Planning. (4) Lecture, four hours; fieldwork, four hours. Preparation: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature. P/NP or letter grading.

136. Introduction to Health Services Research. (4) Lecture, four hours. Requisite: Biostatistics 100A. Review of the field of health services research. Uses of quantitative methods and applications of conceptual/ theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to studies of workings of health services. P/NP or letter grading.

CM141. Women, Health, and Aging: Policy Issues. (4) (Same as Gerontology M141 and Women’s Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM241. Letter grading.

199. Special Studies. (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term. P/NP or letter grading.

Graduate Courses
200A-200B. Health Systems Organization and Financing. (4 units each). (Formerly numbered 200A-200B-200C.) Lecture, four hours; discussion, two hours. Limited to graduate health services students. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. S/U or letter grading.

M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units). (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Requisites: course M226, Economics 201A-201B-201C. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress and S/U or letter grading.

221. Tobacco: Prevention, Use, and Public Policy. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors and graduate students. Study of tobacco use and its health consequences, including interplay of historical, biological, sociocultural, political, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in the U.S., and international trends in tobacco use. Letter grading.

232. Governmental Health Services and Trends. (4) Lecture, four hours. Preparation: two upper division social or behavioral sciences courses. Requisite: course 100. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care delivery systems in health care and quality control functions. S/U or letter grading.

M233. Health Policy Analysis. (4) (Same as Community Health Sciences M252.) Lecture, three hours. Requisites: courses 100 or 200A, M236, M207. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Letter grading.

234A, Social Change, and Health Service Policy. (4) (Formerly numbered 236.) (Same as Policy Studies M258.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

237A-237B. Special Topics in Health Services Research Methodology (4 units each). Lecture, one hour; discussion, three hours. Requisites: Biostatistics 100A, 100B. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critique of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data. Letter grading.

237C. Issues in Health Services Methodologies. (4) Lecture, four hours. Requisites: courses 237A-237B. Designed for doctoral students. Intended to assist students in understanding the research process and its application in study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings. Letter grading.

239. Aging and Long-Term Care. (4) Lecture, four hours. Requisites: courses 100, 238, Community Health Sciences 270A-270B. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Letter grading.

240. Health Care Issues in International Perspective. (4) Lecture, four hours. Preparation: two health administration courses, two upper division social sciences courses. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries. S/U or letter grading.

CM241. Women, Health, and Aging: Policy Issues. (4) (Formerly numbered M241.) (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM141. Letter grading.

M242. Determinants of Health. (4) (Same as Community Health Sciences M232.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

244. Seminar: Health Services and Policy Evaluation. (4) Seminar, four hours. Preparation: basic courses in program evaluation and health services organization. Requisites: Biostatistics 100A, 100B. Designed for doctoral students. Seminar applying alternative evaluation research theories and methods to health service organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; political and organizational context of evaluation; utilization of findings; and meta-evaluation. S/U or letter grading.

245. Society's Response to Aging. (4) Lecture, four hours. Preparation: two health services courses, two upper division social sciences courses. Examination of current delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health status, demand for care, health care financing, long-term care, and continuum of care for the aged. S/U or letter grading.

246. Seminar: Special Populations — Health Services Policy Issues. (4) Seminar, four hours. Requisites: courses 200A-200B, 232, 238. Limited to doctoral students or M.S. and M.P.H. students with advanced degrees. Doctoral-level seminar which focuses on health services for selected priority population groups, integrating scientific, organizational, economic, ethical, and political evidence as a basis for public policy. Different populations may be selected for attention each year. Letter grading.

249A-249Z. Special Topics in Health Services. (2 to 4 each) Hours to be arranged. Requisites for each offering announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change.

249D. Principles of Organization Leadership: Applications in Public Health and Welfare. (4) Lecture, three hours; discussion, three hours. Designed for graduate students. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theoretical and empirical investigations of leadership qualities. Letter grading.

M249E. Health Care Policy and Finance. (4) (Formerly numbered 249E.) (Same as Policy Studies M269.) Seminar, four hours. Requisites: courses 200A-200B, M236, Biostatistics 100A, 100B. Public policy concerning payment for medical care services and characteristics of the market for those services; demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs. Letter grading.

249F. Quality Assessment and Assurance. (4) Seminar, four hours. Preparation: one health services or epidemiology course. Requisites: course 100, Biostatistics 100A. Epidemiology 100. Fundamental issues in quality assessment, quality assurance, and measurement of health status. S/U or letter grading.

249H. Current Research Issues. (2 to 4) Discussion, two hours. Designed for doctoral students. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

M249L. Mental Health Services. (4) (Formerly numbered 249L.) (Same as Psychiatry M251.) Lecture, three hours. Requisites: courses 200A-200B, M242, Biostatistics 100A, 100B. Designed for graduate students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes. (4) Lecture, three hours. Requisites: courses 200A-200B, M242, Biostatistics 100A, 100B. Designed for graduate students. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. Letter grading.

M249L. Ethical Issues in Public Health. (4) (Formerly numbered 249L.) (Same as Community Health Sciences M249L.) Lecture, four hours. Requisites: courses 200A-200B-200C. Seminar, four hours. Preparation: one health services or public health course. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

250. Evolution of Health Professions in the 20th Century. (4) Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of “helping” professions. Review of forces responsible for these changes and description of processes by which lay persons are educated/socialized into major subgroups of health professions. Review of major social forces external to health care system that affect its composition. Letter grading.

251. Process Improvement and Information Systems in Health Care Organizations. (4) Lecture, four hours. Requisites: course 100, Biostatistics 100A. Introduction to concepts of health care quality measurement, process improvement, and information systems, as well as organizational aspects of implementing them. Letter grading.
M252. Medicare Reform. (4) (Same as Policy Studies M267.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

M287. Politics of Health Policy. (4) (Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Requisites: courses 200A-200B, 234, M236, Biostatistics 100A, Management 403. Conceptual, analytical, and strategic formulation in health services organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation. Letter grading.

432. Behavioral Sciences in Organizational Management. (4) Lecture, two hours; discussion, two hours. Preparation: a combination of three graduate courses in health services course. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area. Letter grading.

437. Management Science for Health Planning and Administration. (4) Lecture, three hours; laboratory, two hours. Requisites: Biostatistics 100A and either Biostatistics 403 or Management 404. Introduction to use of quantitative analyses to support managerial decisions in health-related services for others. S/U or letter grading.

435. Management Science for Health Planning and Administration. (4) Lecture, four hours. Requisites: Biostatistics 100A and either Biostatistics 403 or Management 404. Introduction to quantitative and decision analyses. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Letter grading.

438. Issues and Problems of Local Health Administration. (4) Lecture, three hours; laboratory, three hours. Preparation: one health services course. Requisite: course 100, Epidemiology 100. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraints, quality improvement, interagency relationships and partnerships, and public and political participation. Letter grading.

439. Dental Care Administration. (4) Lecture, two hours; laboratory, three hours. Requisite: course 100A, Epidemiology 100. In-depth examination of specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms. Letter grading.

440B. Health Information Systems: Organization and Management. (4) Lecture, two hours; laboratory, three hours. Requisite: course 440A. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services. S/U or letter grading.

441. Ambulatory Care in the U.S.. (4) Seminar, three hours. Requisites: courses 132, 200A-200B, Management 403. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements. Letter grading.

442A. Managed Health Care: Quality and Cost. (4) Lecture, three hours. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PCPs, as well as discussion of managed care as a solution. Letter grading.

442B. Managed Care Practices. (4) Lecture, four hours. Requisite: course 442A. Introduction to practices and methodologies required of those participating in managed care sector. Attention to pros and cons and advantages and disadvantages of various aspects of managed care. Topics include revenue maximization and cost control, negotiating and contractational relationships among the parties to deliver care, and quality and performance measurement. Letter grading.

443A. Biological and Social Bases of Prevention. (4) Lecture, four hours. Requisites: courses 100 or 200A-200B, Biostatistics 100A, Epidemiology 100. Designed for graduate students. Development, current status, and potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues. Letter grading.

443D. Advanced Hospital Financial Management Seminar. (4) Seminar, one hour; discussion, one hour; laboratory, two hours. Requisites: courses 100, 132, 436. Practical aspects of hospital management decisions in a changing environment examined through cases. Letter grading.

444. Applied Methodology in Health Planning. (4) Lecture, three hours; fieldwork, four hours. Requisites: course 200A-200B. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Letter grading.

445. Strategic Planning and Marketing in Health Care. (4) Lecture, three hours. Requisites: courses 200A-200B, Biostatistics 100A, 100B. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Letter grading.

446. Financing Health Care. (4) Lecture, four hours. Requisites: course 100, Economics 1. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance, and international comparisons of health financing. S/U or letter grading.

447. State Health Policy Issues. (4) Seminar, three hours. Requisite: course 238. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships. S/U or letter grading.

447D. Management of Health Maintenance Organizations. (4) Lecture, three hours. Requisites: courses 100, 134. Alternative approaches to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to national health policy. S/U or letter grading.

M448. Health Policy Issues for Dental Professionals. (2) (Same as Dentistry M422.) Lecture, two hours. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

M448D. Case Studies in Dental Practice. (2) (Same as Dentistry M433A.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

M449A-M449B. Child Health, Programs, and Policies (4-4). (Same as Community Health Sciences M436A-M436B.) Lecture, four hours. Requisites: courses 200A-200B. Study of health care financial management, including variables of cost of funds, availability of physicians to provide the necessary patients, efficiency of operations, and legal constraints. Letter grading.

495. Teacher Preparation in Health Services. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**History**

*Scope and Objectives*

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, History is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Education and Information Studies. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, col-
lege, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

**Undergraduate Study**

**History B.A.**

The History Department's undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major).

**Preparation for the Premajor and Major**

*Required for the Premajor:* Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and 99.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor’s office in 6248 Bunche Hall. Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

*Required for the Major:* Three additional lower division history courses.

**The Major**

*Required:* At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 197.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

**Advanced Placement Credit in History**

The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the Preparation for the Major as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 13A-13B-13C credit on the history preparation. The excess units may be applied only toward the degree.

**Honors Program**

The honors program is designed for History majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

The proposal, research, analysis, and writing of the paper take place over three terms through History 199HA, 199HB, and 199HC. Course 199HA is taken in Spring Quarter of the junior year, followed by courses 199HB and 199HC in Fall and Winter Quarters of the senior year. Contact the undergraduate adviser for more information.

**Instructional Credential in History**

For information on the single subject instructional credential in history, consult the Department, 1009 Moore Hall, (310) 825-8328.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master's Degrees**

The Department of History offers the Master of Arts (M.A.) degree in History and participates in a concurrent degree program with the Department of Information Studies.

**Admission**

For admission to the M.A. program, applicants should normally have completed the undergraduate major or its equivalent, have received a B.A. degree or its equivalent from an accredited college or university, and have maintained at least a B+ average in upper division work. For the European field, demonstrated proficiency in at least one foreign language (usually French or German) is expected. Prospective students are strongly urged to have proficiency in two foreign languages. Three letters of recommendation and the scores on the General Test of the Graduate Record Examination (GRE) must be submitted to the department. For applicants who do not meet the grade-point average requirements, admission is granted in exceptional cases where the letters of recommendation, GRE scores, or other factors indicate unusual promise. Applicants may also be admitted with subject deficiencies but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree program. Applicants who have had a year or more of graduate study at other institutions should have attained a grade-point average of 3.5 or better (on a 4.0 scale) if they wish to work toward the Ph.D. degree. Admission to the department depends on the number of openings in the field in which the applicant expects to specialize. Applications must be submitted before December 1; notification is made on or before May 1. Students are expected to begin graduate work in the Fall Quarter; deferred admissions are not granted.

The department has no separate application form; it uses the Application for Graduate Admission distributed by Graduate Admissions Student and Academic Affairs. In addition, all applicants must submit the UCLA Department of History Applicant Profile Sheet. All materials, including three letters of recommendation, submitted to the history department must be in one envelope. Departmental information may be obtained by writing to the department.

There is no screening examination. Non-history majors may be required to take specified courses depending on background and field of specialization. Students are expected to work in the field for which they are admitted. A change of fields after admission requires approval of the relevant admissions committee.

The Guide to Graduate Study in History, which explains in detail the requirements and procedures of the history graduate program, is distributed to all new graduate students at the orientation meeting which takes place during registration week. The guide lists all faculty, their major publications, and descriptions of courses offered during the year. Information on the program and the faculty is at http://www.sscnet.ucla.edu/history/.

**M.L.I.S./M.A. History**

The history/library and information science master's degree is a concurrent degree program of the Department of History and the Department of Information Studies (Graduate School of Education and Information Studies). Applicants wishing to receive the M.A. in History and the Master of Library and Information Science (M.L.I.S.) in three years may apply for this program. Applications for admission are reviewed by committees in both departments. Further information may be obtained by writing to the Department of History or the Department of Information Studies, Graduate School of Education and Information Studies.

**Areas of Study**

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1450 to present (also includes British, Jewish, and Russian history); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) China; (8) Japan; (9) Latin America; (10) U.S.; (11) history of science; (12) special fields (students in the history of religions or history of Christianity are normally examined in one of the above fields but, with the approval of the faculty in those fields, may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).
Course Requirements
The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be counted toward this requirement, and only one in the 500 series may be applied. For students in U.S. history, a minimum of seven of the nine courses must be at the 200 level, including at least two two-quarter seminars and History 245. Students in European history must include History 225 and two two-quarter seminars. Africanists must take History 275A-275B-275C.

Only one 500-series course may be included toward both the total course requirement and the minimum six graduate (200 series) course requirement. This could be either four units of course 596 or four units of 597.

Comprehensive Examination Plan
The department follows the comprehensive examination plan. Individual fields specify the fulfillment of the examination requirement by (1) a three-hour written examination designed to assess the candidate’s ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of the candidate’s program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The U.S. field requires a comprehensive examination in the form of two two-quarter research papers to be submitted at the end of six quarters of full-time study. (This requirement does not apply to students entering the program with an M.A. in U.S. history.) The European field requires a comprehensive examination in the form of two completed two-term research seminars, together with two completed research papers with grades of B or better within the period of six quarters of graduate study, and a satisfactory pass in the doctoral written qualifying examination administered during the sixth quarter. The African field requires a three-hour comprehensive examination which is given in May of each year.

The medieval M.A. examination is given in May of each year. First-year graduate students are encouraged to take it at that time, and second-year graduate students must take it. Students who already hold an M.A. degree from another institution (or have comparable academic experience) are expected to take this examination in May of their first year at UCLA. The amount of preparation needed varies according to the student’s background. Normally, the best preparation for the examination is to audit, or preferably to take for credit, several of the lecture courses on Western medieval history offered within the department. The questions are broad and general in character, reflecting the extensive familiarities gained through survey courses far more than the intensive knowledge acquired through seminars. The purpose of this examination is diagnostic: to ascertain that while studying languages and mastering research skills, students are also making progress in learning the larger outlines of medieval history.

Students in medieval history working with Professor Krekic may satisfy the M.A. examination requirement by the other departmental examination option, namely, the submission of three papers as described in the general regulations.

In order to file for a master’s degree, all students must file an Advancement to Candidacy form within the first two weeks of the quarter in which they expect to receive their degree. The comprehensive requirement is graded pass to continue, pass subject to reevaluation, terminal pass, or fail. In cases where the M.A. is awarded with pass subject to reevaluation, the field M.A. committee conducts a special reevaluation of the candidate’s progress after no more than three additional quarters of study.

Thesis Plan
None.

Doctoral Degree
Admission
Admission requirements for the program leading to the Ph.D. degree in History are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the History department faculty in the field in which they intend to work. Applicants may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to the Ph.D. program, the following evaluation procedures determine whether students may continue to the Ph.D. degree.

For students entering the graduate program with a B.A. degree, an evaluation comparable to the M.A. comprehensive examination must occur within the period of six quarters.

For students entering with a master's degree from another department, evaluation must be completed by the end of three quarters of study in the History Department in order to determine whether or not they are permitted to continue toward the Ph.D. This evaluation is conducted in the same manner as described under the M.A. program.

Students must present to the graduate guidance and curriculum committee a field approval form signed by the faculty member who has agreed to support their work for the Ph.D. according to the following schedule: by the end of the seventh quarter or earlier for those entering with only a B.A. and by the end of the third quarter or earlier for those entering with an M.A. from another department. Students who do not meet the time limits for proceeding to the Ph.D. are subject to dismissal.

The Guide to Graduate Study in History, which explains the requirements and procedures of the history graduate program in detail, is available in September to all new graduate students who have filed a Statement of Intent to Regis-
ban, women's history. Both the general and a specialized field must be offered by specialists in U.S. history and only two fields in U.S. history are permitted. Either field 1 or 2 or both may be chosen as minor fields for the Ph.D.

The history of Christianity may be offered as a major or minor field for the doctorate in history. Students may offer this field with emphasis on a particular aspect such as the early church, protestantism, or orthodox Christianity, although by definition they are required to be familiar with the historical New Testament. Where possible, the field is defined as chronologically and geographically coterminous with an existing departmental field. Emphasis in either American Christianity or medieval Latin Christianity counts as an American or medieval field.

To offer a field in the history of Christianity, students must prepare a written statement defining in detail the parameters of the field and must submit the statement to the graduate guidance and curriculum committee for approval. Before submission the statement must be endorsed by and bear the signatures of the examining faculty member and the chair of the Ph.D. committee.

Comparative history Ph.D. students may choose comparative history as one of their four fields. This means choosing one topic across three existing Ph.D. fields. The topic should be chosen with the help of the student's Ph.D. advisors; among possible topics are labor history, women's history, history of religions, economic history, and many others. The geographical/temporal fields covered may correspond to some or all of the student's other three Ph.D. fields. The comparative field is more intensive and involves genuine comparisons. It is highly recommended (and comparative chairs may require) that those majoring in a Western field choose one non-Western field and vice versa. Two or three professors may, if needed, supervise a comparative program, and may help examine the candidate either on the orals or by written examination.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field. They must also demonstrate a detailed knowledge of the substance and historical development of a particular science or a type of engineering or technology as a subfield common to the historical fields.

Course Requirements
Candidates for the Ph.D. must meet the special requirements for admission to the doctoral program listed above and the general requirements set forth under the Graduate Division. Additionally, the following requirements must be fulfilled: (1) a command of good English, spoken and written; (2) the ability to read at least two foreign languages (except in the U.S. field where only one foreign language is required); (3) an acquaintance with general history; and (4) completion of at least one continuing two- or three-quarter seminar which must include completion of a substantial research paper.

All students must write a dissertation prospectus (written for credit as History 596 or 597) which is expected to contain (1) a full statement of the dissertation topic; (2) a historiographical discussion of the literature bearing on the topic; (3) a statement of the methodology to be employed; and (4) a survey of the sources sufficient to demonstrate the viability of the topic. The prospectus must be submitted in writing to and be approved by the dissertation adviser prior to the oral part of the qualifying examinations. After approval, copies are given to each member of the examining committee.

The following coursework is required in specific fields: (1) U.S. history — History 245 (History 246A-246B-246C are strongly recommended for all first-year students); (2) European history — History 225; (3) African history — History 275A-275B-275C (unless exempted by petition); (4) medieval history — Latin 130 or 131; Latin 243, and History 219A-219B (a graded History 596 in paleography may be substituted for 219A-219B with permission of faculty).

Faculty serving on doctoral committees may require such courses as they deem necessary as preparation for qualifying examinations. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Written and Oral Qualifying Examinations
In the written and oral qualifying examinations students are expected to show not only a mastery of their special subject, but also an extensive knowledge covering the wider field of historical knowledge and an ability to correlate historical data and to explain their significance. The examinations are designed to test not merely factual knowledge, but also power of historical analysis and synthesis, critical ability, and capacity for reflective thinking. Knowledge of the history of any area includes a solid understanding of its historiography and bibliography, its geography, and its political, cultural, economic, and other historical aspects.

In the oral examination, students are examined in four fields, one of which may be an approved field in anthropology, economics, geography, language and literature, philosophy, political science, or other allied subjects. The allied field must be comparable in size and scope to the history fields listed above. Students should select the fields in consultation with their adviser and must receive the department's approval of all four fields no less than six months before the written qualifying examination is taken. In the case of the European field, students must choose their four fields by the quarter after they have successfully passed the doctoral written qualifying examination (i.e., normally by the seventh quarter of residency). To obtain approval, students should supply the Graduate Guidance and Curriculum Committee with the name of the faculty member who has agreed to serve as the sponsor of the doctoral work and with the details of the proposed program. A full-time graduate student must begin the written qualifying examinations no later than the end of the ninth quarter of graduate work.

The written qualifying examination includes the major field only, except in the European field which requires a written examination in three fields. In the case of U.S. and European history, each field administers a written qualifying examination as outlined below. The oral examination covers all four fields (except for the African field) and is normally held after the written examination. In most fields, the oral examination is held shortly after the written examination or, at the discretion of the doctoral committee, at least as six months after the written examination. For the U.S. and European fields, see below. Both the written and oral examinations are to be considered by the committee as a whole in arriving at a judgment of the student's performance, except in the European field. The written qualifying examination is normally prepared and administered by the chair of the committee and read by the entire committee before the oral qualifying examination, except for the U.S. and European fields (see below). All students in the European field take the doctoral written qualifying examination during the sixth quarter in residence.

In the U.S. field students must take the doctoral written qualifying examination after 12 months in residence. Prior to taking the examination, students must have secured the agreement of a qualified member of the department in the U.S. field to serve as chair of the doctoral committee. The written examination (not to exceed eight hours) is administered once a year at the beginning of the Fall Quarter. Those failing the examination may retake it on petition the following Spring Quarter. The examination may be retaken only once. The examination committee consists of three faculty members who in the previous year taught History 246A-246B-246C. If any of these faculty members are unavailable, preference is given, in replacing such members, to faculty members who have taught History 246A-246B-246C in recent years. The written examination is intended to test a comprehensive broad understanding of American history both before and after the independence of the U.S. All facets of history (political, social, diplomatic, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods, is consequently essential. Knowledge of the scholarly literature and of the principal historiographical controversies arising out of it are tested along with the student's interpretive capabilities. Passing of the examination implies that the student is qualified, in the judgment of the U.S. field, to teach courses in U.S. history at the college level. Questions related to the planning of such courses may appear on the examination.

All students in the European field take the doctoral written qualifying examination during the sixth quarter in residence. The European writ-
ten examination is administered once a year late in the Spring Quarter. Those failing the ex-
mamination may re-take it on petition in the fol-
lowing Spring Quarter. The examination may
be re-taken only once. The entire European fac-
ulty in residence during the Spring Quarter ad-
ministers the examination. The examination is
divided into the following sections: Europe, Re-
naissance/Reformation; Europe, Reformation
to French Revolution; Europe since 1740; Eu-
ropean social and economic history since 1450;
European intellectual and cultural History
since 1450; Russia since 800; Jewish History;
East Central and Southeast Europe since 1450;
Germany since 1450; Italy since 1450;
Spain and Portugal since 1450 (not currently
offered), European history of science since 1450.
Students choose three sections in which
they are examined. The entire examination
lasts one and one-half days. Students entering
with a B.A. who fail the doctoral examination
are allowed to complete the M.A. program as
outlined. Prior to taking the written qualifying
examination, a student must have secured the
agreement of a qualified member of the de-
partment in the European field to serve as
chair of the doctoral committee. The examina-
tion is intended to test a comprehensive broad
understanding of European history, both of the
modern and early modern periods. Different
facets of history (political, social, intellectual,
etc.) are included. An ability to synthesize fac-
tual information, sometimes across long chro-
nomological periods is, consequently, essential.
Knowledge of the scholarly literature and of the
principal historiographical controversies arising
out of it is tested, along with interpretive capa-
bilities. Questions related to the planning of
college-level history courses may appear on
the examination. Before taking the written ex-
amination, students must have passed at least
one language examination.

At the oral qualifying examination, students
must submit four fields selected to enhance the
scope and quality of the dissertation. During
the period subsequent to the written examina-
tion, students may select a comparative field, or
a field outside Europe or the department.
The oral examination concerns the dissertation
prospectus and the substantive elements of the
four fields as they relate to the prospectus. The written
examination, if failed, must be re-taken at the
next administration of the examination if stu-
dents wish to continue; if students fail the oral
examination, it must be re-taken at a time spec-
ified by the doctoral committee, but not to ex-
ceed six months. Any variance from these time
limits must be approved by the U.S. field before
going to the Graduate Guidance and Curricu-
lim Committee for final approval. After passing
the oral qualifying examination, students are
advanced to candidacy and may begin work on
their dissertations.

History

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. (4-
4-4) Lecture, two hours; discussion, two hours.
Broad, historical study of major elements in Western
heritage from the world of the Greeks to that of the
20th century. Designed to further beginning students'
general education, introduce them to ideas, attitudes,
and institutions basic to Western civilization, and
ac-
quire them, through reading and critical discussion,
with representative contemporary documents and
writings of enduring interest. 1A, Ancient Civilizations
from Prehistory to Circa A.D. 843; 1B, Circa A.D. 843
to Circa 1715; 1C, Circa 1715 to the Present.
1AH-1BH-1CH. Introduction to Western Civiliza-
tion (Honors). (4-4-4) Lecture, two hours; dis-
cussion, two hours. Honors sequence parallel to courses
1A-1B-1C.

2A. Power, Ethics, and Technological Change. (4)
(Formerly numbered 98.) Lecture, three hours; dis-
cussion, two hours. Examination of historical and the-
oretical relationships between ethical behavior, cor-
porate power, and technological change. Topics in-
clude engineering practice and business profits,
gender and engineering cultures, product liability and
consumer safety, and engineering and computer eth-
ics. Historical case studies include Three Mile Island,
Chernobyl, the DC-10, and Challenger Disaster. P/N
or letter grading.

2B. Social Knowledge and Social Power. (4) 
Lecture, three hours; discussion, two hours.
Historical in-
roduction to social thought and the social sciences
since the 18th century. Consideration of the great so-
cial thinkers, including Smith, Mill, Comte, Marx,
and Freud. Examination of practical and political uses
of social science by addressing such topics as psychol-
ogy and mental testing, anthropology and race, cost-
benefit analysis, measurement and creation of
norms, definition of sex and gender, and cultural con-
struction of expertise and objectivity. P/N or letter
grading.

3A-3B-3C. Introduction to History of Science. 
(4-4-4) Lecture, three hours; discussion, two hours.
History majors may not apply these courses on science
general education requirements:

3A. Scientific Revolution. Survey of the begin-
ings of physical sciences involving transformation from
Aris-
totelian to Newtonian cosmology, mechanization of
the natural world, rise of experimental science, and
origin of scientific societies.

3B. Physical Sciences since the Enlightenment.
Broad survey of development of ideas in classical and
modern physical science since Newton. Theories of
matter, but more specifically chemistry, thermody-
namics, electromagnetic theory of light, energy con-
ser-
vation, relativity, and quantum mechanics.

3C. Biological Sciences, 1800 to 1955. Survey of de-
velopment of biological sciences from the period of
Bichat and Mülle to discovery of the double helix.

3CH. Introduction to History of Science (Honors).
(4) Honors course parallel to course 3C. P/N or let-
ter grading.

3D. Themes in History of Medicine. (4) Lecture,
three hours. Not open to freshmen. Limited to 30 stu-
dents. Examination, through illustrated lectures and
focused discussion of primary sources, of five impor-
tant themes in development of modern medicine: na-
ture of diagnosis, emergence of surgery, epidemics,
conception and treatment of insanity, and use of med-
ical technology.

4. Introduction to History of Religions. (4) 
Lecture, three hours; discussion, two hours. Discussion
of various systems, ideas, and fashions of thought
that have dominated Western approaches to religions
of the world since antiquity. Survey of development
from classical Greek and early Christian theories to
modern history with its discoveries of the religions of
India, China, ancient Near East, etc., and the problem
of the encounter of various religions in the 19th and
20th centuries.

8A. Colonial Latin America. (4) Lecture, three hours;
discussion, two hours. General introduction to Latin
American history from contact period to indepen-
dence (1490s to 1820s), with emphasis on conver-
gence of Native American, European, and African
cultures in Latin America; issues of ethnicity and gen-
der; development of colonial institutions and societ-
ies; and emergence of local and national identities.
Readings focus on writings of Latin American men
and women from the period studied. P/N or letter
grading.

8AH. Colonial Latin America (Honors). (4) 
Lecture, three hours; discussion, two hours. Honors
course parallel to course 8A. P/N or letter grading.

8B. Political Economy of Latin American Underde-
velopment, 1750 to 1930. (4) Lecture, three hours.
Interaction of precapitalist and modern modes of so-
cial organization in Latin American history, particular-
ly during the “long” 19th century, by focusing on rela-
tionship between economic change, social and cultur-
al structures, and politics in the region. P/N or letter
grading.

8BH. Political Economy of Latin American Underde-
velopment, 1750 to 1930 (Honors). (4) Lecture,
three hours; discussion, two hours. Historical and con-
temporary perspective of role of ordinary people
in Latin American society. Each lecture/film session
centers on a major Latin American movie illustrative
of a theme in social history.

8CH. Latin American Social History (Honors). 
(4) Lecture, three hours; discussion, two hours. Honors
course parallel to course 8C.

9A-9D. Introduction to Asian Civilizations. (4-4-
4-4) Lecture, three hours; discussion, two hours. History
majors may not apply these courses on science
general education requirements:

9A. History of India. Introductory survey for begin-
ning students of major cultural, social, and political ideas,
traditions, and institutions of Indian civilization.

9C. History of Japan. Survey of Japanese history
from earliest recorded time to the present, with em-
phasis on development of Japan as a cultural daugh-
ter of China. Attention to manner in which Chinese
culture was Japanese and aspects of Japanese civil-
ization which became unique. Creation of the modern
state in the last century and impact of Western civil-
ization on Japanese culture.

9CH. History of Japan (Honors). Honors course par-
allel to course 9C.

9D. History of the Near and Middle East. Introduction
to history of the Muslim world from advent of Islam to
the present day.

10A-10B. Introduction to Civilizations of Africa. 
(4-4) Lecture, three hours; discussion, two hours.
Survey of history of Africa from 1800 to the present,
with particular attention to 19th-century historical
background, era of colonial rule, and regaining of Af-
can independence in postcolonial era. P/N or letter
grading.

10BH. Introduction to Civilizations of Africa (Hon-
ors). (4) Lecture, three hours; discussion, two hours.
Honors course parallel to course 10B.
Upper Division Courses

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures. Consult the quarterly Schedule of Classes to determine the offerings for each term.

100. History and Historians. (Formerly numbered 100A.) Lecture. Designed for juniors/seniors. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians. P/NP or letter grading.

102. Explorations in Psychoanalysis and History. (4) Designed for juniors/seniors. Art of psychological and historical interpretation, with emphasis on development of recent writings in the field of psychohistory.

103. Ancient Mesopotamia and Syria. (Same as Anthropology M115A-M115B.) Lecture, three hours. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. M103B. Chronological discussion of Prehistory, the Old and Middle Kingdom. M104B. The New Kingdom and the Late period until 332 B.C.

108A-108B. History of the Arabs. (4-4) Course 108A is requisite to 108B. Designed for juniors/seniors. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present.

109C. History of Islamic Iberia. (4) Designed for juniors/seniors. Survey of political, social, economic, religious, artistic, and literary history of an Islamic culture in Western Europe, with special attention to ethnic and religious pluralism in modern society and transmission of science and philosophy to Christian Europe. P/NP or letter grading.

110C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923. (4) Designed for juniors/seniors. Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in 19th and 20th Century Europe. Anatolia, and the Middle East while they were under Ottoman rule (1300 to 1923) and in the Turkish Republic since 1923. P/NP or letter grading.

112A-112B-112C. Armenian History. (4-4-4) Designed for juniors/seniors. 112A. Armenia in Ancient and Medieval Times, 1st Millennium B.C. to A.D. 11th Century; 112B. Armenia from Cilician Kingdom through Periods of Foreign Domination and National Struggles, 11th to 19th Centuries; 112C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. Armenian question and genocide, national republic, Soviet Armenia, and the dispersion.

C112D. Introduction to Armenian Oral History. (4) Lecture/discussion, three hours. Designed for juniors/ seniors. Uses and techniques of Armenian oral history: preprinterview, interview, and postview interview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212.

114. Topics in Middle Eastern History. (4) Designed for juniors/seniors. Examination of major issues in history of Middle East. P/NP or letter grading.

115A-115B-115C. History of Ancient Mediterranean World. (4-4-4) Designed for juniors/seniors. 115A. Survey of history of the Ancient world from foundation of the Persian Empire. 115B. History and institutions of the Greeks from their arrival to the death of Alexander. 115C. History and institutions of Rome from founding of the city to the death of Constantine.

117A-117B-117C. History of Rome. (4-4-4) Designed for juniors/seniors. Political, social, and cultural history of Persia. 110A. Islamic Iran to 1800; 110B. Iran from 1800 to the Present.

111A-111B. History of the Turks. (4-4) Designed for juniors/seniors. Survey of society, government, and political history of the Turks from earliest times to the present. P/NP or letter grading. 111A. Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. Rise and fall of the Ottoman Empire. 111B. 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world.

111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923. (4) Designed for juniors/seniors. Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in 19th and 20th Century Europe. Anatolia, and the Middle East while they were under Ottoman rule (1300 to 1923) and in the Turkish Republic since 1923. P/NP or letter grading.
C119C. From Roll to Codex: Manuscripts in Early Middle Ages. (4) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society to 1100. Concurrently scheduled with course C219C. P/NP or letter grading.

C119D. From Parchment to Print: Manuscripts in Later Middle Ages. (4) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society from 1100 to 1500. Concurrently scheduled with course C219D. P/NP or letter grading.

119M. The Christian Church, 100 to 1517. (4) (Formerly numbered 119.) Lecture. Designed for juniors/seniors. Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. P/NP or letter grading.

121A-121B. Medieval Europe. (4-4) Designed for juniors/seniors. Basic introduction to Western Europe from late antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. 121A. 400 to 1000; 121B. 1000 to 1500.

121C. Medieval Civilization: Mediterranean Heartlands. (4) Designed for juniors/seniors. Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

121D. Medieval People: The 13th Century. (4) Designed for juniors/seniors. Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works.

M122. Power and Imagination in Byzantium. (4) (Same as Classics M170.) Lecture, three hours. Requirements: courses M70 or 123A-123B. Designed for juniors/seniors. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

124A-124B. East-Central Europe, 15th to 19th Century. (4-4) Designed for juniors/seniors. 124A. The Long 19th Century, 1780 to 1914. Analysis of characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and consequences of its partial failure in the economy, politics, and culture. 124B. The Short 20th Century, 1918 to 1990. Analysis and interpretation of the history of Europe where wars, revolts and revolutions, different types of extremisms led to a historical detour: 70 years of departure from Western values and at last an effort to turn back to them.

125A. Renaissance and Reformation, 1450 to 1660. Reorganization of power, new forms of representation, and discourses about rule and obedience in Europe from the mid-15th through 16th century; popular culture; peasant society; retashfioning of religion and power; localization.

125B. Baroque Culture and Absolutist Politics, 1600 to 1715. Changing nature of state and social domination; redeployments of military violence; strategies of population discipline; absolutism and baroque culture; new forms of bureaucratic intervention; representation of the family, sexuality, and the body; witch persecutions.

125C. Old Regime and Revolutionary Era, 1715 to 1815. Enlightened absolutism and reform, challenge of new political and economic ideas, crisis of the Old Regime, impact of French Revolution and Napoleonic empire.

125D. Bourgeois Century, 1815 to 1914. Restoration politics, Industrial Revolution, upheavals of 1848, unification of Germany and Italy, imperialism, rise of socialism, population growth, changes in social structure, origins of World War I.

125E. Era of Total War, 1914 to 1945. World War I, interwar period, and World War II. Social, cultural, political, and economic aspects, with focus on strain between model of parliamentary democracy and dynamics of mass politics (e.g., Bolshevik Revolution, Italian Fascism, national socialism, and Spanish Civil War).

125F. World War II and Its Aftermath, 1939 to the Present. World War II, origins and persistence of the Cold War, reconstruction in the West, de-Stalinization, decolonization, crisis of the welfare state, background to and course of the 1989 revolutions, current political configuration.

126A-126F. Cultural and Intellectual History of Modern Europe. (4 each) Designed for juniors/seniors. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context. P/NP or letter grading.

126A. 16th Century. Renaissance cultural and intellectual history of Europe. Central themes include comparative history of ideas, theory and practice of art and architecture, civic and religious humanism, religious experience, and new cultural genres of history and philological scholarship.

127A-127B-127C. War and Diplomacy in Europe. (4-4-4) (Formerly numbered 127A-127B.) Designed for juniors/seniors. P/NP or letter grading.

129A. Baroque and Enlightenment Germany. (4) Designed for juniors/seniors. Development of state institutions, culture, and society in Central Europe from 1550 to 1789. Consideration of absolutism as a political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

129C. 20th-Century Germany. (4) Designed for juniors/seniors. Transitions that Germany has faced during this century: two world wars, shift from monarchy to republic to national socialism to a “divided nation,” and finally “reunification.” Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

130. Europe in the Age of Revolution, Circa 1775 to 1815. (4) (Formerly numbered 130A-130B-130C.) Lecture, designed for juniors/seniors. Period from revolt of the Thirteen Colonies to French Revolution of 1789, and Napoleonic regime, viewing social and political changes unleashed by these revolutionary movements in a comparative and transnational perspective. P/NP or letter grading.

131A-131D. History of Russia. (4-4-4-4) Designed for juniors/seniors. P/NP or letter grading.

131A. From the Origins to the Rise of Muscovy. 131B. Russia and its culture, Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom.

131B. Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; peasant problem; beginnings of industrialization; movements of political and social protest; non-Russian peoples; political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime.

131C. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability?

131D. Culture and Society in Imperial Russia. Recommended preparation: course 131B or Russian 99A or 119. Thematic examination of culture and society in Russia during era of state-sponsored Westernization (1689 to 1917). Topics include nobility, peasantry, and village life from serfdom to postemancipation era, urban society, working-class life and thought, women, clergy, religion, popular culture, accommodation, and resistance.

132A-132B-132C. History of Italy. (4-4-4) Lecture. Designed for juniors/seniors. P/NP or letter grading.

132A. 132B. 132C. 132D. The making of modern Italy, 1871 to the present. From oligarchy to democratic bureaucracy in two wars and three republics.

141A-141B. History of Britain. (4-4) Designed for juniors/seniors. Analysis of British economy, society, and polity, focusing on dynamics of both stability and change. P/NP or letter grading.

144A-144B. American Economic History. (4-4) Designed for juniors/seniors. Political, economic, and cultural survey of the independent Balkan states in the Middle Ages.

149A-149B. American Economic History. (4-4) Designed for juniors/seniors. Analysis of major economic, social, and political developments in the U.S. from 1787 to the present. Focus on the economic, social, and political changes that have shaped the U.S. since 1890.
155A-155B. American Working Class Movements. (4-4) Designed for juniors/seniors. Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics.

156C-156D-156E. Social History of African Americans. (4-4) Designed for juniors/seniors. Survey of major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social collectivities. Emphasis on class, regional, racial, and ethnic comparisons. 156C. Colonial and Early National, 1600 to 1800; 156D. Victorian and Industrial, 1800 to 1920; 156E. 20th Century, 1900 to 1975.

156F-156G. History of the African Family. (4-4) Designed for juniors/seniors. Perspective on the contemporary African family through study of its development over the course of four centuries. Topics include Western European origins, sex roles, child-rearing, sexuality, work patterns. Emphasis on class, racial, ethnic, and regional variations. 156F. 1600 to 1870; 156G. 1870 to 1990.

156H. Medicine and Society in 19th-Century America. (4) Designed for juniors/seniors. Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?

157A-157B. North American Indian History. (4-4) Designed for juniors/seniors. History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. 157A. Precontact to 1830; 157B. 1830 to the Present.

M158A. Comparative Slavery Systems. (4) Same as Afro-American Studies M158A.) Designed for juniors/seniors. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (4-4) Same as Afro-American Studies M158B-M158C.) Designed for juniors/seniors. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus.

158D. Afro-American Urban History. (4) Designed for juniors/seniors. Examination of Afro-American urban life prior to 1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

M159A. History of the Chicano Peoples. (4) (Same as Chicana and Chicano Studies M159A.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mula-do) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of social change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economic development, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

M159B. History of the Chicano Peoples. (4) (Same as Chicana and Chicano Studies M159B.) Designed for juniors/seniors. Survey course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mula-do) north of the Rio through the 20th century, with special focus on labor and politics. Provides integrated understanding of social change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

M160A-160B. U.S. and Comparative Immigration History. (4-4) Designed for juniors/seniors. Use of overlapping diaspora model which integrates North Atlantic (Europe), South Atlantic (Africa-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to the present. Special focus on Southern California in course 160B. P/NP or letter grading.

162. American West. (4) Designed for juniors/seniors. Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.

163. History of California. (4) Designed for juniors/seniors. Economic, social, intellectual, and political development of California from earliest times to the present. P/NP or letter grading.

164. History of Los Angeles. (4) Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to the present. Emphasis on the diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles’ place among American urban centers.

165A. Early Latin America. (4) Designed for juniors/seniors. Advanced survey of Latin American history from conquest to independence, with emphasis on society, culture, and ethnic aspects.

165C. Indians of Colonial Mexico. (4) Designed for juniors/seniors. Survey of social and cultural history of the Indians of Mexico, especially central Mexico, from time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.

166. Latin America in the 19th Century. (4) Designed for juniors/seniors. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.

167A-167D. Latin America in the 20th Century. (4-4-4-4) Designed for juniors/seniors. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and “rightist” and “leftist” models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized.

167A. Haiti, Uruguay, Costa Rica, Cuba, Chile; 167B. Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; 167C. Panama, Colombia, Ecuador, Honduras, El Salvador; 167D. Brazil, Guatemala, Peru, Nicaragua.

168. History of Latin American International Relations. (4) Designed for juniors/seniors. Emphasis on developing interests of Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.

169. Latin American Elitology. (4) Requisite: course 167A, 167B, 167C, or 171. Designed for juniors/seniors. Elitology (defined as oral or noninstitutionalized knowledge involving leaders’ conceptual and perceptual life history views) in contrast to folklore (followers’ traditional or popular views). Elitology genres include oral history, literature, and cinema.

170A. Latin American Cultural History. (4) Described for juniors/seniors. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions.

170B. Classic Travel Accounts of Latin America since 1735. (4) Designed for juniors/seniors. Recommended for prospective researchers before they select their region of study. Introduction to “enlightened traveler” accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.

171. Mexican Revolution since 1910. (4) Designed for juniors/seniors. Examination of concept of “permanent crisis” to describe and explain the structure of “permanent revolution” under “one-party democracy.” Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

172. History of Argentina. (4) Designed for juniors/seniors. History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present. Emphasis on 19th-century development of an agro-export economy and 20th-century formation of a mass society.

173. Modern Brazil. (4) Designed for juniors/seniors. Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement lectures.

174. Brazilian Intellectual History. (4) Designed for juniors/seniors. General intellectual development of Brazil, with emphasis on those introspective moves in which Brazilians attempted to interpret themselves, their nation, and their civilization.

M175A-175Z. Topics in African History. (4 each) Preparation: one prior course in African history at UC-LA. Designed for juniors/seniors. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis:

|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 500, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
| 182T          | History of Africa since 400. (4)                                            |
|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 400, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
| 182U          | History of Africa since 300. (4)                                            |
|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 300, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
| 182V          | History of Africa since 200. (4)                                            |
|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 200, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
| 182W          | History of Africa since 100. (4)                                            |
|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 100, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
| 182X          | History of Africa since 1. (4)                                             |
|               | Designed for juniors/seniors. Analysis of social, economic, political, and cultural change in African history since 1, including the impact of colonialism, nationalism, and the slave trade on African societies. Students will learn about the cultural, social, and economic development of African civilizations from the earliest times to the present. |
193B. Religions of South and Southeast Asia. (4) Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include religions of the Veda; Brahmanism; (later) Hinduism. Consult Schedule of Classes for specifics. May be taken independently for credit.

193C. Religions of South and Southeast Asia. (4) Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult Schedule of Classes for specifics. May be taken independently for credit.

193D. Religions of the Ancient Near East. (4) Designed for juniors/seniors. Main polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magic, wisdom, and moral conduct.

193E. Special Topics in History of Religions. (4) Designed for juniors/seniors. Topics announced in Schedule of Classes and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

194A. History of Early Christians. (4) Designed for juniors/seniors. Christian movement from its origins to circa 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement’s encounters with its religious, social, and political world, and methods of research.

194C. Jesus of Nazareth in Historical Research. (4) Recommended preparation: course 194A. Designed for juniors/seniors. Stimated by significant post-Enlightenment historical investigations, students are led into firsthand knowledge (in translation) of various multilayered sources for reconstruction of the life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts.

195A. History of Technology. (4) (Not the same as course 195A prior to Spring Quarter 1999.) Lecture. Designed for juniors/seniors. Development of technology from global perspective. Role of technology in Western Europe’s interactions with Asia and the Americas, interaction of military and industrial technologies, social and political contexts for technology. P/NP or letter grading.

195B. History of Medicine. (4) (Not the same as course 195B prior to Spring Quarter 1999.) Lecture. Designed for juniors/seniors. Exploration of themes in history of medicine: education of physicians and their relationships to patients, identification and classification of diseases, contagion and epidemics, hospitals and asylums, medical technology and specialties, evolution of health care professions. P/NP or letter grading.

195C. Historical Perspectives on Gender and Science. (4) (Not the same as course 195C prior to Spring Quarter 1999.) Lecture. Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persona of “man of science,” role of women in scientific revolution, scientific investigations of women and the feminine. P/NP or letter grading.

195E. Topics in History of Science. (4) Lecture. Designed for juniors/seniors. Topics may include science and colonialism, science and religion, environmental history, science in Enlightenment, development of theory of evolution, science and public policy, public nature of science. P/NP or letter grading.

196. Field Research Methods. (4) Lecture, three hours. Designed for juniors/seniors. Provides opportunity for students to learn and practice field research, with particular emphasis on relationship between theory, field methodology, and research findings. P/NP or letter grading.

197A-197Z. Undergraduate Seminars. (4 each) Seminar, three hours. Designed for juniors/seniors. Topics announced in Schedule of Classes and include ancient Greek and Roman religions, “mysteries,” astrology, magic, gnosticism, and emperor-worship.

199A. Directed Study for Honors. (4) Discussion, three hours. Limited to history honors program students. Must be taken in Spring Quarter of junior year. Seminar on historical research and writing: student meetings with honors advisor to define research and preparation for the project. Extensive reading and research in field of proposed honors thesis.

199B. Directed Study for Honors. (4) Requisite: course 199A. Must be taken in Fall Quarter of senior year. Independent study and research on honors project under supervision of honors advisor, with presentation of research report and thesis outline to the advisor and second reader at end of quarter. Both must approve continuation of honors thesis project. In Progress grading (credit to be given only on completion of course 199HC). Only students approved for course 199HC receive credit for this course.

199C. Directed Study for Honors. (4) Discussion, three hours. Required course 199B. Must be taken in Winter Quarter of senior year. Preparation of final version of honors thesis and presentation of portions of work-in-progress to other students engaged in honors projects. Completed thesis must be submitted to thesis committee by last day of class in Winter Quarter.

199I. Independent Studies for Internships. (4) Preparation: maintenance of 3.0 grade-point average in major. Independent studies course to be supervised jointly by Field Studies Office and faculty advisor. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally only four units of internship with History Department are allowed. P/NP grading.

Graduate Courses

200A-200U. Advanced Historiography. (4 each) Seminar, three hours. May be repeated for credit.

200V. Advanced Historiography: Afro-American. (4) (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

M200W. Advanced Historiography: American Indian Peoples. (4) (Same as American Indian Studies M200A.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

200Y. Advanced Historiography: Application of Economics to History. (4) Discussion, three hours.

200Z. Advanced Historiography: Chicano. (4) Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new methodological and theoretical approaches in the field.

201A-201U. Topics in History. (4 each) Seminar, three hours. Topic titles are same as for courses 200A-200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor to enroll.

202A-202B. Seminars: Comparative Modern Economic History. (4-4) Discussion, three hours. Designed for graduate students. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress and S/U or letter grading.

M203A-M203B. Social Theory and Comparative History. (4-4) (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

M203C. Theories in Cultural History. (4) (Same as Sociology M296C.) Discussion, three hours. Introduction to cultural, linguistic, semiotic, or other new interpretative theories and practices developed in other fields and applied to historical material.

204A-204B. Seminars: Near and Middle Eastern History. (4-4) Seminar, three hours. Methodology, socioeconomic and political change in the Arab world. In Progress and S/U or letter grading.

205A-205B. Seminars: Medieval Middle Eastern History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

206A-206B. Seminars: Social History of the Middle East. (4-4) Seminar, three hours. Interrelationship of city, tribe, and village in the Middle East; role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change. In Progress and S/U or letter grading.

M207. Seminar: Ancient Mesopotamia. (4) (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

209A-209B. Seminars: Ottoman and Modern Turkish History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

211A-211B. Seminars: Armenian History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

C212. Methods in Armenian Oral History. (4) Seminar, three hours. Preparation: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D.
214. Problems in World History, 800 to 1800. (4) Seminar, three hours. Training course for graduate students to develop a field of world history and to prepare department teaching assistants to teach sections for the general education sequence in world history by helping them to grasp diverse cultures and daily workings of world societies to date.

216A-216B. Seminars: Byzantine History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

217. Sources and Handbooks of Medieval History. (4) Seminar, three hours. Preparation: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

218. Medieval Latin Literary History. (4) Seminar, three hours. Recommended preparation: reading knowledge of Latin and German or French. Examination of aspects of medieval history through study of paleography, medieval libraries, and transmission of ancient medieval authors.

219A-219B. Paleography I, II. (4-4) Seminar, three hours. Preparation: reading knowledge of Latin and German or French. S/U or letter grading. 219A. History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading. 219B. History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

C219C. From Roll to Codex: Manuscripts in Early Middle Ages. (4) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society to 1100. Concurrently scheduled with course C119C. S/U or letter grading.

C219D. From Parchment to Print: Manuscripts in Later Middle Ages. (4) Lecture, three hours. Examination of history of medieval manuscripts and circumstances of their production, use, and survival as evidence for study of medieval European society from 1100 to 1500. Concurrently scheduled with course C119D. S/U or letter grading.

221A-221B. Seminars: Medieval History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

222A-222B. Seminars: Medieval Intellectual History and History of Science. (4-4) Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology. In Progress and S/U or letter grading.

M223. Introduction to Transmission of Ancient Latin Literature. (4) (Same as Classics M223.) Discussion, three hours. Designed for graduate students. Examination of role of Latin classical authors in history of Middle Ages and Renaissance to understand processes by which Latin literature has been preserved.

225. Colloquium for Entering Graduate Students in Modern European History. (4) Seminar, three hours. Normally limited to and required of all entering graduate students. Introduction to topics, methods, and historiography of modern European history.

227A-227B. Seminars: Reformation. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

229A-229B. Seminars: Early Modern European History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

M230A-M230B. Seminars: Modern European History. (4-4) (Same as Art History M241A-M241B.) Seminar, three hours. May be repeated for credit with consent of adviser. In Progress and S/U or letter grading.

231A-231B. Seminars: Modern European Intellectual and Cultural History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

236A. Proseminar: Political Psychology. (4) (Same as Political Science M261A and Psychology M226A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

236B-C. Psychosociology. (4-4) Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research. In Progress and S/U or letter grading.

239A-239B. Seminars: English History — Middle Ages. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

241A-241B. Seminars: German History. (4-4) Seminar, three hours. Four hours. Designed for graduate students. In Progress and S/U or letter grading.

244A-244B. Seminars: British Empire History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

245. Colloquium: U.S. History. (4) Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, sources of materials, and current state of U.S. historiography.

246A-246B-246C. Introduction to U.S. History. (4-4-4) Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. 246A. Colonial Period; 246B. 1790 to 1900; 246C. 20th Century.

249A-249B. Seminars: Jacksonian America. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

252A-252B. Seminars: Recent U.S. History to 1930. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

253A-253B. Seminars: Recent U.S. History since 1930. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

254A-254B. Seminars: U.S. Social and/or Intellectual History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

256A-256B. Seminars: American Diplomatic History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

258A-258B. Seminars: Working Class History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

259A-259B. Seminars: Social History of Women in the U.S. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

M260C. Native American Revitalization Movements. (4) (Same as Anthropology M235B.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

M260D. Native American Historical Demography. (4) (Same as Anthropology M235C.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence.

261A-261B. Seminars: Afro-American History. (4-4) Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white. In Progress and S/U or letter grading.

262A-262B. Seminars: Chicano History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

M264. History of American Education. (4-4) (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

M265. Latin American Research Resources. (4-4) (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

M266A-266B. Seminars: Colonial Latin American History. (4-4) Seminar, three hours. In Progress and S/U or letter grading.

M268A-M268B. Seminars: Recent Latin American History. (4-4) (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress and S/U or letter grading.
275A-275B-275C. First-Year Colloquia: African History. (4-4-4) Seminar, three hours. Required of all entering graduate students in African history. Source identification, research methodologies, historiographical traditions, historical interpretation, approaches to teaching, and research design. Each course may be taken independently for credit. S/U or letter grading.

278A-278B-278C. Research Seminars and Dissertation: African History. (4-4-4) Seminar, three hours. Multiple-term seminars/workshops designed to bring together pre-dissertation candidates and dissertation writers for regular presentations and critical assessment of their work in progress. Each course may be taken independently for credit. S/U or letter grading.

282A-282B. Seminars: Chinese History. (4-4) Seminar, three hours. In progress and S/U or letter grading.

286A-286B. Seminars: South Asia. (4-4) Seminar, three hours. In progress and S/U or letter grading.

289A-289B. Seminars: Southeast Asia. (4-4) Seminar, three hours. In progress and S/U or letter grading.

291A-291B. Seminars: Jewish History. (4-4) Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period. In progress and S/U or letter grading.

293A-293B. Seminars: History of Religions. (4-4) Seminar, three hours. In progress and S/U or letter grading.

295. Theories of Scientific Change. (4) Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussion of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feynman, and others.

297A-297B. Seminars: History of Science. (4-4) Seminar, three hours. In progress and S/U or letter grading.

M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4) Same as English M298.) Topics vary according to participating faculty. May be repeated for credit.

M299. Interdisciplinary American Studies. (6) (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (4) Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.

495. Teaching History. (4) Designed for graduate students. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies. (1 to 8) Limited to graduate students. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

Donald A. Preziosi, Ph.D., Chair

Professors
Robert L. Brown, Ph.D. (Art History)
Donald A. Preziosi, Ph.D. (Art History)
Ronald J. Mellor, Ph.D. (History)
Debra L. Silverman, Ph.D. (History)

Associate Professor
Irene A. Bierman, Ph.D. (Art History)

Scope and Objectives
The interdisciplinary major in History/Art History allows students to study the relationship between art history and the history of society, politics, and culture.

Undergraduate Study

History/Art History B.A.

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.

No course for the major may be taken on a P/NP grading basis.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the history/art history counselor at (310) 825-3480.

Preparation for the Major

Required: History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

The Major

Required: History 99, 100A, or 100B; 197 or 199; and courses as indicated in the following groups:

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 127, 197, 199 to meet this requirement.

Honors Program

The honors program is designed for History/Art History majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior History/Art History majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average
of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and
(3) complete Art History 195A-195B with a grade of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and
(3) complete Art History 195A-195B with a grade of A.

Honors Collegium

Scope and Objectives

The Honors Collegium is an unusual educational alternative, with an interdisciplinary emphasis, designed primarily for students in their freshman and sophomore years. Some upper division courses are also offered. The collegium encourages animated discussion among students, as well as between students and professors. It seeks to promote scholarly exchange across the major disciplines in the University. And it offers small classes and individual attention.

Undergraduate Study

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship and may include a variable number of guest lecturers and additional specialists in their fields. Many courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly interdisciplinary seminars, and the courses vary each year. Refer to the Schedule of Classes for current course listings. An Honors Collegium brochure, which gives detailed course descriptions, is available from the program office or see http://www.college.ucla.edu/up/whoweare/honors.

Honors Collegium

Lower Division Courses

1. Transformations of the West in the 20th Century. (4) Seminar, three hours; outside study, nine hours. Critical examination of Jackson Turner’s claim that the U.S. frontier closed in 1890, ending a period of Western migration, conquest, and settlement. Particularly, assessment of how 20th-century writers confirm or deny Turner’s claim in their literature. P/NP or letter grading.

2. Comparative Genocide. (4) Lecture, four hours; discussion, one hour. Social comparative study of genocide, combining theoretical concepts with case studies (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

3. Historical and Sociological Perspectives on Women and Work. (6) Lecture, three hours; writing seminar, two hours. Exploration of paradox of postwar increase in women’s employment and comparative stasis in their range of occupations through investigation of historical development of women’s work in the U.S. P/NP or letter grading.

4. Surrealist Challenge. (4) Examination of revolutionary cultural movement of surrealism in France and Spain in the 1920s and 1930s, including films of Buñuel and Dali, paintings of Ernst and Magritte, and writings of Breton, Crevel, and Péret. P/NP or letter grading.

5. Science and the Human Condition. (4) Not the same as course 5 prior to Winter Quarter 1999.) Seminar, three hours; outside study, nine hours. Examination of impact that scientific method has on the human condition and on our concept of humankind through two case studies: processes by which Darwin formulated theory of evolution by natural selection and replacement of Newtonian physics by quantum theory. P/NP or letter grading.

6. Historical Construction of Reality. (4) Not the same as course 6 prior to Fall Quarter 1999.) Seminar, three hours; outside study, nine hours. Examination of how scientific method has on the human condition and on our concept of humankind through two case studies: processes by which Darwin formulated theory of evolution by natural selection and replacement of Newtonian physics by quantum theory. P/NP or letter grading.

7A. Urban Poverty and Public Policy in the U.S. (4) Lecture, four hours; discussion, one hour. Focus on social welfare in the U.S., providing historical overview of poverty and the social programs that have attempted to deal with it and addressing current debate on the subject. P/NP or letter grading.

8. Communication among Organisms. (4) Lecture, three hours; discussion, two hours. Study of communication among a variety of taxonomic groups ranging from single-celled organisms to plants, whales, and nonhuman primates. P/NP or letter grading.

9. Greeks and Barbarians: Multiculturalism in the Ancient World. (4) Seminar, three hours; outside study, nine hours. Through examination of art and literature from prehistoric period (Homer and Bronze Age) through the Hellenistic Age (4th through 2nd century B.C.), exploration of how and why diverse groups and cultures of classical antiquity defined themselves as different and what these expressions of difference have to do with modern perceptions of race and ethnicity. P/NP or letter grading.

10. Social Classification and Categorization. (4) Seminar, three hours; outside study, nine hours. Examination of way in which schemes of classification powerfully shape systems of social counting and accounting. Use of recent works from many disciplines to examine how classification constitutes both principles of vision and principles of division. P/NP or letter grading.

11. Galileo and the Scientific Revolution from the 17th to 21st Century. (4) Lecture, three hours; discussion, one hour; outside study, nine hours. Assuming the thesis that it is science and technology which have effected social and economic structures of modern life, examination of development of scientific and industrial revolutions from time of Galileo to modernity. P/NP or letter grading.

12. Thinking about Rights. (4) Seminar, three hours; outside study, nine hours. Examination of character of rights, who is capable of exercising or should exercise rights, and scope and content of rights as they have been debated and fought over in theoretical writings and political arenas for three centuries. P/NP or letter grading.

13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s. (4) Not the same as course 13 prior to Fall Quarter 1997.) Lecture, four hours; discussion, one hour; outside study, seven hours. Examination of French and Italian cinema in period around World War II, time marked by social tensions and political unrest. Investigation of French realism, Italian neorealism, and French abstract cinema as they reveal two different European cultures during a critical historical era. P/NP or letter grading.

14. History, Science, and Society. (4) Lecture, four hours; discussion, one hour; outside study, nine hours. Examination of interaction of science and society and effects of this interaction on history, development of societies, evolution of revolutionary ideas as modeled in Galileo, Darwin, and others, and selected contemporary issues such as genetic engineering and war against infectious diseases. P/NP or letter grading.

15. America, 1963 to 1973: Culture and Counterculture. (4) Seminar, three hours; outside study, nine hours. Through literature, film, and documentary, examination of period between assassination of President Kennedy to resignation of President Nixon, with aim of defining both the visionary appeal and costly illusions of the 1960’s revolution and of suggesting connections with contemporary culture. P/NP or letter grading.

16. Contemporary Fiction and Psychology of the Self. (4) Seminar, three hours. Examination of relationship between personal and interpersonal dynamics in literature as they are illuminated by Heinz Kohut’s theories of self psychology. P/NP or letter grading.

17. Archetypal Heroines. (4) Seminar, three hours. Examination of archetypal women in classical/traditional literature of several cultures and their revised reincarnations in contemporary ones. P/NP or letter grading.

18. Culture, Conquest, and Communication: Fatal Attractions. (4) Seminar, three hours; outside study, nine hours. Examination of cross-cultural implications of manifest destiny as it pertains to four “American” entanglements — Cortes and Montezuma, Cook and Hawai’i, Custer and the Sioux, and the U.S. and Vietnam, concluding with discussion of current issues of “development” and cultural assumptions of “the other.” P/NP or letter grading.

19. Interdisciplinary Perspectives on Production and Consumption of Popular Music. (4) Not the same as course 19 prior to Fall Quarter 1997.) Seminar, four hours; discussion, one hour; outside study, seven hours. Examination of popular music as a major cultural space for personal, social, and political expression. Production of popular music, including its relationship to economics, politics, and technology, and its consumption in relationship to society and self. P/NP or letter grading.
20. Artificial Intelligence: Machines as People, People as Machines. (4) (Not the same as course 20 prior to Fall Quarter 1999.) Seminar, three hours; laboratory, one hour; outside study, eight hours. Programming knowledge not required. Examination of human cognitive abilities and study of different historical approaches to programming human cognitive abilities and intelligence. Seminar, three hours; laboratory, one hour; outside study, eight hours. Preparation: satisfactory completion of English Composition Writing I requirement. Tracing of writing and rewriting of traditional story types, specifically the adventure story as represented by Defoe’s Robinson Crusoe and its remanisements in Coetzee’s Foe and the fairy tale as represented by Cinderella and its various cross-cultural remanisements. P/NP or letter grading.

21. Rise and Fall of Modernism. (6) Seminar, three hours; writing seminar, two hours. Study of early and middle 20th-century’s attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. P/NP or letter grading.

23. Globalization. (4) Seminar, three hours; outside study, nine hours. The making of one world from the 15th century on through exploration, trade, and colonization; revolutions in transportation and communication; regional and global networks of migration; transnational business and finance organizations; and (qualified) emergence of a global culture. P/NP or letter grading.

24. 21st Century: Technology, Society, and Ethics. (4) (Not the same as course 24 prior to Fall Quarter 1997.) Lecture, two hours; discussion, one hour; outside study, nine hours. Technology, society, and ethics in three major areas: environment and environmental engineering, or large-scale changes in biosphere; effects of technology on people; and effects of technology on nonhuman creatures. P/NP or letter grading.

26. The Bible as Political Theory. (4) (Not the same as course 26 prior to Fall Quarter 1997.) Seminar, four hours; outside study, eight hours. The Bible treated as a political text, addressing the prepolitical condition, formation of a political community, the state, survival without a state, and messianism, with focus both on institutions and on intellectual history. P/NP or letter grading.

27. Theories of Exchange: Social Life of Gifts and Commodities. (4) (Not the same as course 27 prior to Fall Quarter 1997.) Seminar, three hours; outside study, nine hours. Study of how creation, maintenance, and dissolution of social and political relations are mediated through exchange of gifts and/or commodities in different contexts and different societies. P/NP or letter grading.

28. Misleading Mirror: Self-Portraits in Word and Image. (4) Self-portraiture as it is represented in the painting, poetry, painting, essay, and film, both from point of view of the artist/representor and from perspective of the reader/viewer. P/NP or letter grading.

30. Vietnam War and American Culture. (4) Seminar, three hours; outside study, nine hours. Cultural, social, and political implications of the Vietnam War on American society through examination of photography, journalism, personal narrative, political commentary, drama, and fiction. P/NP or letter grading.

31. Making Citizens/Making Societies: Political Cultivation in Cross-Cultural Perspective. (4) (Not the same as course 31 prior to Fall Quarter 1999.) Seminar, three hours; discussion, one hour. Examination of how a society takes active concern in making sure that certain politically relevant dispositions, sensibilities, capacities, and skills are nourished in populations, at large, including the cultural modus operandi of both aristocratic and democratic cultivation and their political implications. P/NP or letter grading.

32. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences. (6) Seminar, three hours; writing laboratory, two hours. Two hours of creative acts of artists, writers, social scientists, and scientists in relation to their societies, cultures, disciplines, conventions, and art forms. P/NP or letter grading.

33. Art of Engagement. (6) Seminar, three hours; writing laboratory, two hours; outside study, 12 hours. Cross-curricular, cross-cultural examination of literature, art, and film as a way of discovering how writers and artists treat conflict between art as something inward and psychological and personal, and art as a vehicle of social and political import. P/NP or letter grading.

34. Film and Society: The Hollywood Myth of Ancient Rome. (4) Exploration of popular influence of ancient Rome on filmmakers of the 20th century, with eye to separating objective examination of Roman politics and social institutions and the myth they have become. P/NP or letter grading.

35. Scientific Method: Critical Inquiry into Questions of Extraterrestrial Life. (4) Lecture, three hours; discussion, one hour; outside study, nine hours. Course does not presume to answer question of whether or not there is intelligent life in the universe but rather uses this question as a pedagogical tool to introduce central ideas, techniques, and limitations of the scientific method — what questions would need to be asked, what scientific knowledge would be needed, and what obstacles would have to be overcome just to address this question. P/NP or letter grading.

36. Ethnicity and Social Class in America. (4) Introduction to data analysis, quantitative method, and use of statistics in social sciences, using General Social Survey (GSS) and concentrating particularly on ethnicity and social class. Students conduct statistical research of their own. P/NP or letter grading.

37A. Ethnicity, Social Class, and Social Mobility in the U.S. and Other Societies. (4) Seminar, three hours; outside study, nine hours. Study of the U.S. and other nations in terms of social class, social mobility, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through institutional software. P/NP or letter grading.

37B. Ethnicity, Social Class, and Social Mobility in Los Angeles. (4) Seminar, three hours; outside study, nine hours. Course 37A is not requisite to 37B. Study of Los Angeles in terms of social class, social mobility, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through institutional software. P/NP or letter grading.

38. Fritha Khalo: Multidisciplinary Construction of an Artist’s Life. (4) (Not the same as course 38 prior to Fall Quarter 1999.) Seminar, four hours; outside study, eight hours. Comprensive contextual and interpretive study of artist Frida Khalo’s life, art, and character as a way of examining seminal political/historical events and cultural movements. P/NP or letter grading.

39. Cross-Cultural Currents in Theater. (4) (Not the same as course 39 prior to Fall Quarter 1999.) Seminar, four hours; outside study, eight hours. With primary focus on response of 20th-century Western theater to Asia, examination of complex world of ethical concepts raised by artistic creation, including postcoloniality, representation, and ethnicity. P/NP or letter grading.

40. Transformations of Cultural Stories across Disciplines and Texts. (5) (Not the same as course 40 prior to Fall Quarter 1999.) Seminar, four hours; outside study, 11 hours. Preparation: satisfactory completion of English Composition Writing I requirement. Tracing of writing and rewriting of traditional story types, specifically the adventure story as represented by Defoe’s Robinson Crusoe and its remanisements in Coetzee’s Foe and the fairy tale as represented by Cinderella and its various cross-cultural remanisements. P/NP or letter grading.

41. Mathematical Concepts: Origins and Development. (4) (Not the same as course 41 prior to Fall Quarter 1999.) Seminar, three hours; outside study, nine hours. Exploration of various concepts in mathematics, especially in algebra, from historical point of view from ancient Babylonian quadratics to contemporary game theory and including study of some of the more remarkable applications. P/NP or letter grading.

42. European Expansion in Age of Columbus. (4) Seminar, three hours. Examination of European (mainly Iberian) exploration and colonization during the period from circa 1400 to 1650. P/NP or letter grading.

43. Male Identity and Sexuality in Ancient Rome. (4) Seminar, three hours; outside study, nine hours. Investigation of Roman cultural constructions of male identity and sexuality in context of political and social change in an emergent imperial ideology in the 1st century C.E.; examination of male “virtus,” sexual stereotypes, and dynamics of sex and power in imperial politics. P/NP or letter grading.

44. Trail of Light. (4) (Not the same as course 44 prior to Fall Quarter 1997.) Lecture, three hours; discussion, two hours; outside study, seven hours. Study of our understanding of light, colors, and vision: physics of light from Newton to Einstein; physics, chemistry, and biology of vision in relation to color; and appearance of light in art. P/NP or letter grading.

45. State, Nation, and Nationalism in Modern and Contemporary Europe. (4) (Formerly numbered M115.) Seminar, four hours; outside study, eight hours. Examination of state, nation, and nationalism in Europe in theoretical, comparative, and historical perspective. P/NP or letter grading.

46. Masculinity, Sexuality, and Patriotry. (4) Seminar, three hours. Examination of patriarchal aspects of male gender role in American society, including perspectives of biological determinism and social constructionism, cultural icons of masculinity, heritage of traditional and nontraditional male roles in Western societies, and alternative notions of masculinity in non-Western societies. P/NP or letter grading.

47. Literature of Colonization and Colonization of Literature. (4) Seminar, three hours; outside study, nine hours. Examination of various facets of interaction between Western and non-Western cultures since period of high imperialism beginning in the mid-19th century, with focus on the novel as prism through which to observe cultural meeting and interchange and their consequences. P/NP or letter grading.

48. Politics of Reproduction. (4) Seminar, three hours; outside study, nine hours. Examination of complex relations between individual, local, and global interests as they shape and reflect reproductive practices, public policy, and exercise of power. P/NP or letter grading.

49. Evidence in Law, Science, History, and Journalism. (4) Seminar, four hours; outside study, eight hours. Rigorous study of ways in which lawyers, scientists, historians, and journalists handle evidence, with aim of advancing cross-disciplinary inquiry to produce a common vocabulary and set of concepts that allow for discussion of evidentiary issues in differing fields of inquiry. P/NP or letter grading.

50A. Greek Views of Humanity. (4) Lecture, three hours; discussion, one hour. Greek views of human experience as expressed in literary forms invented or developed by the Greeks: epic, history, tragedy, comedy, and philosophy; study of way in which Greek texts provide foundation for subsequent Western literature and thought. P/NP or letter grading.
50B. Gender and Race: Constructions of Greek Political Thought. (4) Lecture, three hours; discussion, one hour. Course 50A is not requisite to 50B. Comprehensive introduction to Greek views of humanity with concentration on gender and race, especially as these issues are manifested in Plato and Aristotle. P/NP or letter grading.

51. Childhood in Historical and Sociological Perspective. (4) Seminar, three hours; outside study, nine hours. Examination of ways in which experience and social expectations of childhood have been transformed over time; discussion of how these experiences and expectations vary according to class, race, and gender. P/NP or letter grading.

52. Good, Better, Best Western: Approaches to the 19th-Century American Frontier. (4) Seminar, three hours. Study of the 19th-century American West as a geographical, economic, historical, and cultural region, expanding traditional discourse to include histories and stories of Mexicans, Native Americans, Mormons, and black Westerners. P/NP or letter grading.

53. Sociology of Food and Eating. (4) Seminar, three hours; outside study, nine hours. Exploration of social forces that have shaped the human diet; significance of food and consumption in personal experience and social relationships; role of food as a cultural symbol and ideological system. P/NP or letter grading.

54. Human Lives: Psychocultural Perspective. (4) Seminar, three hours; outside study, nine hours. Examination of human life course in psychocultural perspective, following observations of Kluckhohn and Murray, including investigations of (1) psychobiological underpinnings of human life, (2) human life as shaped by social and cultural processes, and (3) humanistic perspective defining uniqueness. P/NP or letter grading.

55. Culture and History of Utopias. (4) (Not the same as course 55 prior to Fall Quarter 1999.) Seminar, three hours; outside study, nine hours. Study of major utopian writings from Thomas More's classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural landscapes underlying quest for a more perfect society. P/NP or letter grading.

56. Language as a Window to the Mind. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Study of topics in language and the mind, including language acquisition in the child, language representation in the brain, relationship between language and culture. P/NP or letter grading.

57. Life and Sciences of Complexity. (4) (Not the same as course 57 prior to Fall Quarter 1999.) Seminar, three hours; outside study, eight hours. Study of motion and change in systems, including general systems theory, cybernetics, catastrophe theory, and dissipative structure theory, moving toward a view of emergence of complex systems or an answer to question of why we grow old and die. P/NP or letter grading.

58. Apartheid and Social Stratification in South Africa: Theory and Data. (4) Seminar, three hours. Examination as an empirical question of structure and consequences of apartheid in South Africa, including analyses both of history and of social stratification. P/NP or letter grading.

59. Literature and Culture of the American South. (6) Lecture/discussion, four hours; writing seminar, two hours. Examination of historical imagination as it is expressed in such writers as William Faulkner, Allen Tate, Flannery O'Connor, Richard Wright, and Zora Neale Hurston; in Civil War and WPA/FSA photography; and in Southern rhetoric and political documentary. P/NP or letter grading.

60. Immigration and New Second Generation. (4) (Not the same as course 60 prior to Fall Quarter 1998.) Seminar, three hours; outside study, nine hours. Immigrant experience in modern America is examined in light of new biotechnology in relation to medicine, agriculture, and general social issues. P/NP or letter grading.

61. Social Theory in the 20th Century. (6) Lecture, four hours; seminar, two hours. Examination of one hour. Examining of strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structures rather than the material, objective world. Focus on psychoanalysis; structuralism, functionalism, existentialism, and phenomenology as readings from Durkheim to Jean-Paul Sartre. P/NP or letter grading.

62. Community and Self-Interest in History of American Culture. (6) Lecture, four hours; discussion, one hour. Exploration of historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in the autonomous individual. P/NP or letter grading.

63. Emerging Infections and Their Effects on Society: Past, Present, and Future. (4) Seminar, three hours; outside study, eight hours. Examination of how people have responded to plagues and infections through early history and “golden age of microbiology” of last 200 years; study of contemporary responses, including genetics and prophage theories regarding what future may hold regarding infectious diseases. P/NP or letter grading.

64. Encounters with the Other: European Colonialism and Representation. (4) Seminar, three hours. Exploration of broad range of representations — drama, fiction, film, paintings, ethnography, and cultural anthropology — to understand role played by such cultural products in encounter between European sensibility and colonized “other.” P/NP or letter grading.

65. Carnival and Festivity. (4) Seminar, four hours; outside study, eight hours. Examination of Carnival and related customs occurring from Christmas to Ash Wednesday in Europe and the Americas. Exploration of perspectives from ethnography, folklore, theories of dance, history, religion, anthropology, and literary studies. P/NP or letter grading.

66. Substance Abuse and the Brain. (4) Seminar, three hours; outside study, nine hours. Study of a broad range of information about substance abuse, including molecular mechanisms of addiction, brain reinforcement for drug use, genetic predisposition, and mechanisms of tolerance and withdrawal, as well as study as associated with clinical, psychosocial, and political issues. P/NP or letter grading.

67. Structure of Physical Reality. (4) (Not the same as course 67 prior to Fall Quarter 1998.) Lecture, three hours; discussion, one hour; outside study, eight hours. No special mathematical knowledge required. Course in modern physics, including videos and practical demonstrations, Zen stories, and discussions of what Eastern and Western religions and philosophy in general have to say about forces of nature. Topics include quantum mechanics, microcosm of atoms, and elementary particle physics and philosophical implications. P/NP or letter grading.

68. History of Social Thought. (4) Lecture, three hours; discussion, one hour. Study of significant forms of social theory in the English Revolution to the beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Toqueville, Marx, and Freud. P/NP or letter grading.

71. History through Clothes. (4) (Not the same as course 71 prior to Fall Quarter 1998.) Seminar, three hours; outside study, nine hours. Exploration of what clothes mean and what they tell us about life in the past, including historical constructions of sexual, social, and political roles. P/NP or letter grading.

72. Elementary Particles in the Universe. (4) Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading.

74. Life Crises in Literature. (4) Seminar, three hours. Examination of typical life upheavals (child abuse, coming of age, death, etc.) as they are portrayed in modern literature and, by comparative analyses of diverse literatures, focus on ways in which universal events are filtered through the prism of distinct cultural perspectives. P/NP or letter grading.

75. On Nature of Things: Comparative Reading of Poem by Lucretius and Modern Science. (4) Seminar, three hours; outside study, nine hours. Most important and influential concepts of modern science, including atoms, their movements and nature, origin of the world, evolution of life; comparison with theories of Lucretius as defined in De Rerum Natura. P/NP or letter grading.

76. Race, Class, and Gender. (4) Seminar, three hours; outside study, nine hours. Analysis of interrelationship of race, class, and gender and of ways in which these social means of classification shape experience in American society. Research project on this topic into a hobby, sport, or occupation required. P/NP or letter grading.

77. Intellectual Life in Japan: Classics, Moderns, and Postmoderns. (6) Lecture, two hours; discussion, two hours; writing seminar, two hours. Examination of current modernity/postmodernity debate about contemporary Japanese art and culture in context of Japan’s intellectual tradition since the 16th century. Comparison of modern Western and Eastern cultural assumptions and other mental abilities, P/NP or letter grading.

78. Writing in Age of Revolution. (4) Lecture, four hours; discussion, one hour. Part of UCLA French Revolution Biennial Program. Examination of major developments from 1780 to 1820 in America and Europe through historical, rhetorical, and literary study. P/NP or letter grading.

79. Rhetoric of Rule: Spectacle and Image Making in Reign of the Sun King and Presidents Reagan and Clinton. (4) Lecture/discussion, four hours; outside study, eight hours. Use of Louis XIV and Presidents Clinton and Reagan as case studies to explore why and how political power is symbolically constructed and to understand power as rhetoric mediated through symbolic forms. P/NP or letter grading.

80. Literature of Diversity: Cultural Experience in America. (4) Seminar, three hours. Examination of richness and variety of American culture as revealed in literary works generally neglected in traditional surveys. Theories of ethnicity and nationalism presented in such works as Black Elk Speaks, They Were Watching God, Mexican Corridos on immigration, and China Men. P/NP or letter grading.

82. Community and Labor Development from Ground Up. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Introduction to practical applications of community development and outreach efforts in Los Angeles area, with projects from Community Outreach Partnership Center within School of Public Policy and Social Research. P/NP or letter grading.
83. Politics and Rhetoric of Literature. (6) Seminar, four hours; writing laboratory, two hours. Examination of relationship among politics, rhetoric, and literature in study of literature from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly conflict between self and state, between ideology and the practical business of living. P/NP or letter grading.

84. Los Angeles, 1900 to 2000: History of a 20th-Century City. (4) Seminar, three hours; outside study, nine hours. Interdisciplinary approach to study of Los Angeles, with attention to political and economic issues and emphasis on social and cultural history as reflected in literature, art, film, and architecture. P/NP or letter grading.

85. Science and Art: Concepts and Connections. (4) Seminar, four hours; outside study, eight hours. Study of relationships between intellectual problem solving in science and aesthetics, with particular attention to holographs and liquid light displays. P/NP or letter grading.

86. Federico Garcia Lorca and Literature of New York. (4) Lecture/discussion, three hours. Designed to place Lorca in the international current of urban literature. Examination of Lorca's poems (in translation) and drawings as representations of New York in art, cinema, and literature. P/NP or letter grading.

87. Humans and Other Animals. (4) (Not the same as course 97 prior to Fall Quarter 1998.) Seminar, three hours; outside study, nine hours. Examination of ongoing and historic relations between human beings and animals cross-culturally, including animals perceived as predators, renewable and nonrenewable resources, pets, trophies, collectibles, and objects of study. P/NP or letter grading.

89. Freud, Fairy Tales, and Feminism. (4) Lecture/discussion. Demonstration of both the power of Freud's ideas and vision and vitality of criticisms of Freud that emanate from self-psychology and feminist thinking in contemporary social science. P/NP or letter grading.

90. French Revolution: Ideologies and Images. (6) Lecture, two and one-half hours; discussion, one hour; writing seminar, two hours. Examination of history of French Revolution as series of world historical events and as source of dominant ideologies and images that have influenced culture of France, Western Europe, and North and South America. P/NP or letter grading.

92. Genes, Genomics, and Internet. (4) (Not the same as course 97 prior to Fall Quarter 1998.) Lecture, two hours; computer laboratory, three hours; outside study, seven hours. New science of genomics (computer analysis of genetic information), dealing with issues related to genetic evolution, medicine, bio-technology, evolution, information technology, and their societal impact. P/NP or letter grading.

94. Historic Roots of Healing Arts. (4) (Not the same as course 94 prior to Fall Quarter 1998.) Not open to students with credit for Psychiatry 98H. Introduction to traditions, practices, goals, and myths of healing professions in Western medicine. P/NP or letter grading.

95. Art, Politics, and Social Change in 19th-Century England and France. (4) Seminar, three hours. Exploration, through analysis of artists and intellectuals in 19th-century England and France, of social factors in cultural expression and way that national traditions and political and social conditions shape each set of literary and artistic innovations. P/NP or letter grading.

96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa. (4) Exploration of culture and society of contemporary South Africa through literature of both black and white South African authors and popular cultural forms such as people's theater and workers' poetry. P/NP or letter grading.

97. Issues in American Foreign Policy: Methodology of Assessment. (4) Lecture/debate, three hours; discussion, one hour. Exploration in debate format of wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading.

99. Case-Based Astrophysics with Computer Visualization. (4) Seminar, three hours; outside study, nine hours. Not open for credit to students with credit for Astronomy 2A, 2B, 3, or 3H. Use of images, especially animations showing temporal development of three-dimensional phenomena, to convey scientific principles behind the phenomena. Exploration of topics in astrophysics such as stellar evolution, binaries, cepheids, and redshifts, centered around astronomy software. P/NP or letter grading.

Upper Division Courses

M102. Culture, Media, and Los Angeles. (6) (Same as Afro-American Studies M102 and Asian American Studies M197H.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

104. Eurocentrism Debate: Viability of Western Tradition. (4) Seminar, three hours. Designed for juniors/seniors. Examination of both historically and critically of “Western tradition” as a cultural, social, and ideological construct and delineation for discussion of current debates over Eurocentrism, particularism, and multiculturalism. P/NP or letter grading.

105. Chinese and Greek Heroes, Past and Present. (4) Seminar, three hours. Designed for juniors/seniors. Comparison of Greek and Chinese notions of the heroic in ancient epics and redefinitions of the heroic in their modern permutations, allowing students to interrogate cultural constructions of manhood. P/NP or letter grading.

106. Imaginary Women. (4) (Same as Women’s Studies M106.) Designed for juniors/seniors. Study of four female cultural archetypes — abscissing wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

107. Painful Birth: Rise of Modern Capitalism in Late Medieval Italy. (4) Lecture, three hours; outside study, nine hours. Medieval texts and representations of the human figure in art, examination of rise of merchant and banking class in late medieval Italy, focusing on economic issues rooted in contempt for commerce, prohibition of usury, ideal of the nobility, and choice between Earth and sky. P/NP or letter grading.

109. Language, Meaning, and the Making of Poet- ry. (4) Seminar, three hours; workshop, one hour; outside study, eight hours. In words of the August pro- fessor, “Semiological warfare against the purveyors of semantic entropy.” In context of contemporary speech, study of history of philosophic and poetic discourse on language and its potentials, including social and political implications. P/NP or letter grading.

110. Marxist and Post-Marxist Approaches to Cul- tural Studies. (4) Seminar, four hours; outside study, eight hours. Examination of Marxist and post-Marxist approaches to study of culture, including classic texts, theoretical and empirical works, and the Marxist roots of postmodernism. P/NP or letter grading.

111. Stress and Coping. (4) (Formerly numbered 93.) Seminar, four hours; outside study, eight hours. Examination of research and theory on stress and coping, with emphasis on physical and mental consequences of stress and moderators of both social support and personality in coping strategies. P/NP or letter grading.

112. Inner and Outer Worlds of Children: Perspec- tives on Social Policies toward Children and Schoo- ling. (4) Seminar, three hours; outside study, nine hours. Study of two important components of schooling, (1) preparation of students for outer world of work, academic attainment, and placement in society and (2) their preparation for relation- ship they have with themselves. Critique of social policies in light of these observations. P/NP or letter grading.

113. Geographical Encounter and Exploration. (4) Seminar, four hours; outside study, eight hours. Ex- amination of coming together of various societies, whether preliterate or literate; the encounter. Exploration of both European and non-European travels, with emphasis on new thinking in fields of history and geog- raphy. P/NP or letter grading.

114. Darwin and The Origin of Species. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Reading of Darwin’s The Origin of Spe- cies in original text, then using it as springboard to in- vestigate history of his period, what influenced him, and how future scientists have used him. P/NP or letter grading.

M116. Art Alive: Art and Performance in the Muse- um. (4) (Same as Theater M193.) Offered in collabora- tion with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogues, movement, and music. Re- search into history and art history and production of a creative performance piece required. P/NP or letter grading.

117. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe. (4) Seminar, three hours; outside study, nine hours. Resistance is not a moral or philosophical issue, but a sociohistorical one. What makes resistance possible are specific his- torical circumstances and social relations that enable ordinary men and women to oppose their oppressors. Examination of this premise through analysis of orga- nized resistance to Nazi occupation in Europe. P/NP or letter grading.

M118. Roots of Patriarchy: Ancient Goddesses and Heroines. (4) (Same as Women’s Studies M126.) Lecture, three hours; outside study, nine hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco- Roman — Italy and economic issues rooted in contempt for commerce, prohibition of usury, ideal of the nobility, and choice between Earth and sky. P/NP or letter grading.

M119. Nuclear Weapons: Critical Decisions. (4) (Same as Policy Studies M116.) Lecture, three hours; outside study, nine hours. Examination of critical deci- sions regarding nuclear weapons, starting with Presi- dent Roosevelt’s decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Let- ter grading.

122. Violence against Women in Cross-Cultural Perspectives. (4) Seminar, three hours; outside study, nine hours. Exploration of sources of violent acts against women in different societies. Topics include wife beating, female sexual slavery, female in- fanticide, dowry deaths, female genital “circumcision,” rape, and emerging global human rights responses to these issues. P/NP or letter grading.

123. War and Peace in Africa. (4) Seminar, four hours; outside study, eight hours. Investigation into main causes and forms of warfare on African contin- ent, including relationship between internal war and transborder conflict, historic ethnic antagonism, com- petition for control of natural resources, and hostilities precipitated by militarism. P/NP or letter grading.
**Doctoral Degree**

**Admission**

Undergraduate requirements for the Ph.D. program are similar to those of UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, the more common route of admission to the Ph.D. program in Human Genetics. The requirements include a bachelor's degree, with preparation in physics, biology, and chemistry, and exposure through upper division courses in specific areas that may include genetics, biochemistry, molecular biology, cell biology, developmental biology, microbiology, virology, physiology, and immunology. Because of the high mathematical content of some areas of human genetics, advanced courses in mathematics may be substituted for biologically oriented courses. More advanced degrees (M.S., M.D., or equivalent) are also acceptable. Scores on the Graduate Record Examination (GRE) General Test and three letters of recommendation are required.

**Major Fields or Subdisciplines**

The field of human genetics is a well-defined discipline which includes subfields such as genomics, cytogenetics, biochemical and molecular genetics, medical genetics, immunogenetics, cancer genetics, and population genetics. The closely related field of mammalian genetics is also under the purview of this program.

**Course Requirements**

Students recruited through UCLA ACCESS follow ACCESS requirements in the first year. In the fall, students take Biological Chemistry CM253, which provides grounding in the chemical and biological properties of nucleic acids and proteins. In the Winter Quarter, they have the choice of several courses that emphasize cellular function and organization (e.g., Biological Chemistry CM267 or Neurobiology M209A). Knowledge of nucleic acid and protein structure and function as well as of cellular biology is essential for genetics. In the Spring Quarter, students may take any of several specialty courses, but the one recommended for students who have already decided to specialize in human genetics is Biological Chemistry CM248. As part of the ACCESS program during the first year, the students also take three two-unit seminar courses on current research topics, a course on ethics in research, and a course on computers in biology (students may test out of the computer course if they have adequate preparation). The faculty offers at least one seminar course in the field of human genetics.

A six-unit course on advanced human genetics is required of predoctoral students in the second year. Six additional units of coursework are required for the doctoral degree, preferably in seminar format.

Similar requirements apply to students that enter the department directly; however, a biostatistics course may be substituted for a biological course in the Winter or Spring Quarters.
Written and Oral Qualifying Examinations

Students are allowed to nominate a doctoral committee after satisfactory performance in courses and laboratory rotations, as judged by faculty or a designated faculty committee. They are required to take the examinations for advancement to candidacy at the end of their second year or the beginning of the third. The written qualifying examination consists of the preparation of two short research proposals in the field of human genetics. One of these addresses the student's proposed dissertation research and the second addresses a research problem unrelated to the dissertation research. The proposals must include the scientific rationale, experimental methods, anticipated results and interpretations, and bibliography. Students are evaluated on their understanding of the research that they are undertaking for their doctoral dissertation, their ability to identify an important scientific problem independently of their mentor, their ability to devise appropriate and original experimental strategies, and their ability to write clearly and concisely. The oral examination, taken a week or two after submission of the written proposals, consists of a discussion of the proposals and of additional questions to probe the student's general knowledge and understanding of human genetics.

Human Knowledge and Understanding of Human Genetics

Upper Division Courses

CM156. Human Genetics. (4) (Same as Microbiology and Immunology M241 and Molecular, Cell, and Developmental Biology M201.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombinational and transposition regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

Graduate Courses

M201. Use of the Computer in Biology. (2) (Same as Microbiology and Immunology M241 and Molecular, Cell, and Developmental Biology M201.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

M203. Stochastic Models in Biology. (4) (Same as Biomathematics M203.) Lecture, four hours. Requisite: Mathematics M170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. S/U or letter grading.

M207A. Theoretical Genetic Modeling. (4) (Same as Biomathematics M207A and Biostatistics M237A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 115B, 131A. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Biomathematics M207B and Biostatistics M237B.) Lecture, two hours; laboratory, two hours. Preparation: coursework equivalent to Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

CM256. Human Genetics. (4) (Same as Microbiology CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

CM267. Cell Structure, Signaling, and Differentiation. (6) (Same as Biological Chemistry CM267, Chemistry M267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

Christopher M. Stevens, Ph.D. (Germanic Languages)
Scope and Objectives
The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with two alternative major emphases: Indo-European linguistics and Indo-Iranian or other specialized language area studies.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Doctoral Degree
Admission
To be admitted to the program leading to the Ph.D. degree in Indo-European Studies, applicants must have a B.A. degree with a major in an Indo-European language field (for example, German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required; Graduate Record Examination (GRE) scores are not required. Applicants should also submit a writing sample, normally consisting of a recent term paper (preferably on a linguistic topic). Potential applicants may request a brochure by writing to the Indo-European Studies Program.

Admission to the program itself constitutes admission to the doctoral program; there is no master’s degree offered. Should deficiencies exist in requisites to specific work at the graduate level, applicants may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines
The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology. At present, the archaeology specialization is not available.

Course Requirements
The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including Indo-European Studies M150 and 210), mythology (for example, Classics 168), and archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

- **Linguistics.** An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different sub-branches, and additional units in courses offered by the Linguistics Department (for example, phonetics, structural linguistics) and related departments. These additional units should be chosen in consultation with the adviser.

- **Indo-Iranian or Other Specialized Language Area.** An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different sub-branches, and additional units in the area of specialization, to be chosen in consultation with the adviser.

- **European and Related Archaeology.** A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be chosen in consultation with your adviser.

**Written and Oral Qualifying Examinations**
When the required coursework is completed and prior to advancement to candidacy, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe the student’s grasp of the entire field. Should students fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination.

**Indo-European Studies Upper Division Courses**
131. **European Archaeology: Proto-Civilizations of Europe.** (4) Survey of European cultures from beginning of the food-producing economy in the 7th millennium B.C. to beginning of the Bronze Age in the 3rd millennium B.C.

132. **European Archaeology: Bronze Age.** (4) Requisite: course 131. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

M150. **Introduction to Indo-European Linguistics.** (4) (Same as Linguistics M150.) Preparation: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

199. **Special Studies.** (2 to 8) Tutorial, to be arranged.

**Graduate Courses**

250A-250B. **European Archaeology.** (4-4) Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

596. **Directed Individual Studies.** (2 to 8) Tutorial, to be arranged.

597. **Preparation for Ph.D. Qualifying Examinations.** (2 to 8) Tutorial, to be arranged.

599. **Research for Ph.D. Dissertation.** (2 to 8) Tutorial, to be arranged.

**Related Courses**
**Ancient Near East (Near Eastern Languages)**
160A-160B. **Introduction to Near Eastern Archaeology.**
161A-161B-161C. **Archaeology of Mesopotamia.**
260. **Seminar: Ancient Near Eastern Archaeology.**
261. **Practical Field Archaeology.**

**Anthropology**
110. **World Archaeology.**
112. **Old Stone Age Archaeology.**
C115R. **Strategy of Archaeology.**
M116Q. **Dating Techniques in Environmental Sciences and Archaeology.**
183. **History of Archaeology.**

**Archaeology**
259. **Fieldwork in Archaeology.**

**Armenian (Near Eastern Languages)**
230A-230B-230C. **Elementary Classical Armenian.**
231A-231B-231C. **Intermediate Classical Armenian.**
232A-232B-232C. **Advanced Classical Armenian.**

**Classics**

M111D. **Celtic Mythology.**
M111E. **Survey of Medieval Celtic Literature.**
M111F. **Celtic Folklore.**
211. **Old English.**
216A-216B. **Old Irish.**
217A-217B. **Medieval Welsh.**
218. **Celtic Linguistics.**
263. **Celtic Literature.**

**Folklore and Mythology**
M112. **Survey of Medieval Celtic Literature.**
M122. **Celtic Mythology.**
M126. **Baltic and Slavic Folklore and Mythology.**
M127. **Celtic Folklore.**
228. **Seminar: Topics in Celtic Folklore and Mythology.**

**German (Germanic Languages)**
230. **Survey of Germanic Philology.**
231. **Gothic.**
232. **Old High German.**
233. Old Saxon
252. Seminar: Historical and Comparative Germanic Linguistics

Greek (Classics)
240A-240B. History of the Greek Language
242. Greek Dialects and Historical Grammar
243. Mycenaean Greek

Indic (East Asian Languages)
110A. Elementary Sanskrit
110B. Intermediate Sanskrit
110C. Advanced Sanskrit
115. Readings in Sanskrit
M222A-M222B. Vedic
230. Selected Readings in Sanskrit Texts
234A-234B. Introduction to Panini’s Grammar
236A-236B. Pali and Prakrits

Iranian (Near Eastern Languages)
169. Civilization of Pre-Islamic Iran
170. Religion in Ancient Iran
190A-190B. Introduction to Modern Iranian Studies
M222A-M222B. Vedic
230A-230B. Old Iranian
231A-231B. Middle Iranian

Latin (Classics)
240. History of the Latin Language
242. Italic Dialects and Latin Historical Grammar

Linguistics
103. Introduction to General Phonetics
110. Introduction to Historical Linguistics
120A. Phonology I
120B. Syntax I

Old Norse Studies (Germanic Languages)
C140. Viking Civilization and Literature
151. Elementary Old Norse
152. Intermediate Old Norse
245A. Germanic and Scandinavian Mythology

Semiotics (Near Eastern Languages)
140A-140B. Elementary Akkadian
141. Advanced Akkadian
220A-220B. Ugaritic

Slavic (Slavic Languages)
M179. Baltic and Slavic Folklore and Mythology
201. Introduction to Old Church Slavic
202. Introduction to Comparative Slavic Linguistics
241A-241B. Advanced Old Church Slavic
242. Comparative Slavic Linguistics
251. Introduction to Baltic Linguistics

Scope and Objectives
The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, and cataloging. Whether students choose to pursue a master’s degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Applicants may write to the Department of Information Studies, 1009 Moore Hall, UCLA, Box 951521, Los Angeles, CA 90095-1521, for the department’s announcement and application materials.

Note: Information Studies 110 may not be applied toward the M.L.I.S. degree; courses in the 111 series may be applied toward the M.L.I.S. degree with approval of faculty advisors.

Graduate studies from other schools or departments who wish to take courses in the Department of Information Studies must obtain consent of instructor prior to enrolling.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The Department of Information Studies offers the Master of Library and Information Science (M.L.I.S.) degree and participates in concurrent or articulated degree programs with the Department of History, the Latin American Studies Program, and the John E. Anderson School of Management.

Admission
Students are admitted to the M.L.I.S. program in Fall Quarter only. In addition to Graduate Division requirements and application procedures, the department requires

1. A statement of purpose.
2. An official report of a score on the Graduate Record Examination (GRE) taken within the past five years. Applicants to the M.L.I.S. degree program who hold graduate degrees from accredited institutions in the U.S. may request a waiver of the GRE. Waivers are considered only after the committee on M.L.I.S. and certificate admissions has reviewed applicants’ official transcripts. An official report of a score on the Test of Written English (TWE) and the Test of English as a Foreign Language (TOEFL) is required for students whose native language is not English.
3. Three letters of recommendation.
4. Satisfaction of the following entrance requirements: (a) a college-level course in statistics (three semester units or four quarter units) within the last five years with a minimum grade of C. The course must have covered descriptive and inferential statistics. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in statistics administered by the department; (b) a college-level course in computer programming (three semester units or four quarter units) within the last five years with a minimum grade of C. Most standard languages such as BASIC, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as INMAGIC, dBASE, or PARADOX. At least one third of the course grade should be based on programming assignments. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in

Information Studies
computer programming administered by the department.

Entrance requirements should be completed before beginning the M.L.I.S. program. However, one requirement may be satisfied in the Fall Quarter of the student’s first year.

While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The admissions committee may request a report of an interview by the chair of the department or by a person designated by the chair as qualified to conduct an interview. Interviews are rarely conducted, and only for the purpose of clarifying a candidate’s academic background and career objectives.

To participate in a concurrent or articulated degree program, students must make application to and be admitted by both the department and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

M.A. History/M.L.I.S.
The M.A. History/M.L.I.S. is a concurrent degree program within the Department of Information Studies and the Department of History. Students can obtain two degrees: the M.L.I.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisors from both this department and the History Department.

M.A. Latin American Studies/M.L.I.S.
The M.A. Latin American Studies/M.L.I.S. is an articulated degree program within the Department of Information Studies and the Latin American Studies Program. Students can obtain two degrees: the M.L.I.S. and the M.A. in Latin American Studies.

M.B.A./M.L.I.S.
The M.B.A./M.L.I.S. is a concurrent degree program jointly sponsored by the Department of Information Studies and the John E. Anderson Graduate School of Management. The program is designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields.

Areas of Study
Consult the department.

Course Requirements
Full-time students are normally required to enroll in three courses per quarter in order to complete the program in six quarters. Part-time enrollment may be permitted.

Eighteen courses (72 units) are required for graduation from the M.L.I.S. program. Students take 20 units of core courses, four units of coursework in research methods, and 48 units of electives. Coursework must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

Basic Professional Competence. The requirement is met by completing five core courses (Information Studies 200, 201, 203, 220, 441) and at least one graduate-level research methodology course (such as Information Studies 205, 240, 241, 260, 261, or 290). Only in unusual cases does librarianship coursework taken elsewhere satisfy the basic competency requirements.

Specialized Competence. Completion of a course of study is required as evidence of knowledge of a field of specialization in information policy and management, information access, information systems, or information organization. The field of specialization and the specialized course program must be approved by a faculty adviser. The requirement is ordinarily met by the completion of 12 additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged. Students may petition to have prior coursework applied to their specializations.

During the second year, students may apply for an internship of one to three quarters either on campus or off campus at an approved library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement for students under the comprehensive examination plan; only four units may be applied toward the minimum graduate course requirements. In order to enroll in any S/U graded course, including 500-series courses, students must be in good academic standing.

Students who choose the thesis option are allowed to apply 12 units of 500-series coursework series course work toward the requirements for the degree.

Comprehensive Examination Plan
The comprehensive examination consists of two components: a basic component and a specialization component.

Basic Component. A formal written examination covering basic professional competencies is required. The purpose of the comprehensive examination is to demonstrate understanding of library and information science as a totality. The examination does not cover the basic professional competencies individually but deals with the field in a unified form. Students may sit for the examination after completion of three quarters of academic residency provided that (1) all outstanding entrance requirements are satisfied, (2) they have completed the five core courses and the required research methods course at the end of the quarter in which the examination is taken, (3) nine courses toward the degree (not including entrance requirements) have been completed by the end of the quarter in which the examination is taken, and (4) they are in good academic standing.

Specialization Component. A major paper produced in an elective course, normally in the area of specialization, is required. A grade of B or better must be earned in the course. The same course may not be used to satisfy both the paper and the research methods requirement.

Thesis Plan
Students under the thesis plan must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

Students indicate their interest in this plan by the end of Spring Quarter of the first year. If the thesis option (Plan I) is approved, a thesis committee of at least three faculty members is established. Most students complete 12 units of related coursework under the direction of the committee. The committee approves the subject and plan of the thesis, provides guidance in research, and approves the completed manuscript. Approval must be unanimous among committee members. After acceptance of the thesis, there is an oral examination on the thesis.

There is no written examination under the thesis plan.

Post-M.L.I.S. Certificate of Specialization
Admission
The Post-M.L.I.S. Certificate of Specialization is designed for holders of the M.L.S. or M.L.I.S. degree who either (1) want to redirect their careers and need the structure of a nine-course program and specialization paper to accomplish that, (2) want to update knowledge and skills across the discipline and require the structure of a nine-course program and specialization paper to accomplish those goals, or (3) recently graduated from a less comprehensive M.L.I.S. or M.L.S. degree program than that offered by UCLA and did not have the opportunity to specialize.

Applicants should hold a master’s degree from a program accredited by the American Library Association. The committee may offer admission to (1) applicants holding the master’s degree in library and information science from foreign countries when the degree has been evaluated by the Graduate Division as a bona fide master’s degree and (2) applicants who attended unaccredited programs if documentation supports admission despite the lack of a degree from an accredited program.

Meeting the specified requirements for a field of specialization does not automatically assure admission to the program. Part-time enrollment is encouraged to provide flexibility for the working information professional. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.
Areas of Study
The program meets the need for specialized training in various areas of information policy, information access, information systems, libraries and other information institutions, and information organization, as well as research competence. Further specialization within these fields is possible.

Course Requirements
The course program may begin in any quarter of the academic year. If students are admitted for a preliminary quarter to complete prerequisite courses, that quarter is not counted in the minimum residence requirements.

A minimum of nine courses (100, 200, 400, and 500 series) must be completed in the Department of Information Studies and other departments of the University. A research paper, bibliographical study, or literature survey appropriate for publication in a professional or scholarly journal or as a separate paper must be completed by the final quarter of study, usually in connection with enrollment in Information Studies 596. The specialization paper or project is required even if students have an advanced academic degree in which a thesis or dissertation was required, and the paper or project must be approved by the faculty adviser.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Doctoral Degree
Admission
Students are admitted to the program leading to the Ph.D. degree in Library and Information Studies in Fall Quarter only. They may enter with the M.L.S. or M.L.I.S. degree, other advanced degree, or directly from the bachelor’s degree. If the prior graduate degree does not include coursework equivalent to the core identified for the M.L.I.S. program, applicants must complete the core after admission.

In addition to Graduate Division requirements and application procedures, the department requires satisfaction of the following entrance requirements:

(1) A statistics requirement, satisfied by completing a college-level course with a minimum grade of C.

(2) A computer programming requirement, met either by completing a college-level course with a minimum grade of C or by passing a proficiency examination administered by the department (most standard languages such as BASIC, C, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as dBASE, INMAGIC, or PARADOX).

(3) A statement of purpose which identifies the applicant’s proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program.

(4) Graduate Record Examination (GRE) scores taken within the last five years. There is no minimum score for the GRE, but high scores are regarded favorably. Admitted students typically score over 1,100.

(5) In cases where the Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE) are required, the department expects a minimum score of 550 on the TOEFL and 4.0 on the TWE. Only in exceptional cases are applicants recommended for provisional admission who do not meet the minimum scores; in such cases, strong evidence of competency is English (such as a high verbal GRE score) must be provided.

(6) Evidence of research and writing such as published work, master’s thesis, or two research papers written in English.

(7) Three letters of recommendation.

(8) Favorable consideration may be given to applicants who have made distinguished contributions to the profession while working as a practicing professional, for instance in publications and/or work with professional societies.

(9) A personal interview is required. The committee seeks evidence of an appreciation of research and knowledge of potential research topics. The committee is particularly interested in the applicant’s commitment to a career in library and information science education and research, signs of originality and inquisitiveness, and good communication skills.

Major Fields or Subdisciplines
Students are expected to specialize in a subfield in one of three major areas of the curriculum: information storage and retrieval systems; information seeking and use; policies and issues in library and information science.

Course Requirements
A minimum of 18 to 21 courses, depending on the student’s previous experience and coursework, is required in the Ph.D. program.

Core Courses. The four required core courses are Information Studies 213, 214, 215, 291.

Specialization Courses. Students are required to take at least three courses in their chosen area of specialization. Courses should be chosen with theoretical/research content appropriate to the doctoral level.

Methods Courses. Three graduate-level methods courses are required beyond Information Studies 291. Courses should be chosen that are coherent and fit the student’s research interests (e.g., a series of quantitative, qualitative/ethnographic, or historical methods courses). Methods courses may be taken within the Graduate School of Education and Information Studies or in another department or unit as appropriate.

Doctoral Seminars. Three advanced doctoral seminars are required, one in each area of the curriculum as listed above under Major Fields (Information Studies 273, 274, and 275).

Cognate Courses. Three graduate-level courses are required to be taken as a cognate outside the department. Not all courses must be taken in a single discipline; however, together the courses should directly address the student’s area of research. The student must prepare a proposal for the cognate early in the program, to be approved by the adviser and the Department Doctoral Program Committee.

Additional Requirements. In addition to the course requirements listed above, doctoral students are required to participate in the doctoral research colloquium and a research apprenticeship, and to be reviewed annually by the Doctoral Program committee, each quarter, until advancement to candidacy.

Written and Oral Qualifying Examinations
Students are required to pass written qualifying examinations in each of the three areas of study listed above. One of the areas is designated by the student as the major examination area or specialization, for which an examination is prepared for the individual student; the other two are minor areas for which students take standardized examinations. The standardized (minor) written qualifying examinations are scheduled twice a year, in January and April; students must take the major examination in the same quarter as the minor examinations. Students who fail one of the three area examinations may repeat that area examination; if two area examinations are failed, students must repeat the entire examination. Students may not take the examinations more than twice.

After passing the written qualifying examinations, students are required to pass the University Oral Qualifying Examination, which is based on the oral defense of the dissertation proposal. The dissertation proposal and oral defense should be completed within one year after passing the written examinations.

The oral examination covers the significance of the chosen topic of research, the methodology and feasibility of the research, and the depth of the student’s knowledge in the specific field of the dissertation research.

Information Studies
Upper Division Courses
100. Perspectives on Literacy. (4) Lecture, two hours; discussion, two hours. Designed for sophomores/juniors/seniors. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue. Letter grading.
110. Information Resources and Libraries. (4) Lecture, one hour; discussion, two hours; laboratory, one hour. Designed for sophomores/juniors/seniors. Not open for credit to M.L.I.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries, efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology). P/NP or letter grading.

111A-M111E. Ethnic Groups and Their Bibliographies. (4 each) Lecture, four hours. Introduction to bibliographic and research tools and methods for students with interests in ethnic groups. Sections on other ethnic groups may be offered. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit. P/NP or letter grading.

111A. American Indian History and Culture; 111B. African American History and Culture; 111C. Latino History and Culture; 111D. Asian American History and Culture; M111E. Jewish History and Culture. (Same as Jewish Studies M111E.)

182. Records and Information Resources Management. (4) Lecture, three hours. Introduction to records and information resources management in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, re-archives management, and litigation support. Letter grading.

Graduate Courses

200. Information in Society. (4) Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. Letter grading.

201. Information Structures. (4) Lecture, three hours; discussion, one hour. Required core course. Introduction to various systems and tools used to organize materials and provide access to them, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management. Letter grading.

203. Design of Library and Information Services. (4) Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs. Letter grading.

204. Introduction to Information Technology. (4) Lecture, four hours. Requisite: course 201. Introduction to theories and principles of information technologies. Topics include social issues of information technologies and design and development of information systems. Background for further studies in information retrieval and design and maintenance of information systems. S/U or letter grading.

208. Development of Cultural Information Sources Using Digital Multimedia. (4) Lecture, two hours; laboratory, two hours. Overview of technologies, techniques, and principles underlying development and packaging of cultural information resources into digital multimedia such as digital libraries, World Wide Web homepages, and CD-ROMs, as well as user, policy, presentation, and evaluation considerations. Letter grading.

210. Seminar: Descriptive and Bibliographical Cataloging. (4) Seminar, four hours. Requisites: courses 410, 411. Students will learn descriptive cataloging and current research in information system design and evaluation, including experimental systems; principles; and analytical methods. Introduction to policy-making and players/stakes involved in information creation and use. Letter grading.

213. Proseminar: Information Storage and Retrieval. (4) Seminar, three hours. Designed for Ph.D. students. Introduction to principles of information organization, retrieval, and current research in information system design and evaluation, including experimental systems; principles; and analytical methods. Letter grading.

214. Proseminar: Information Policy and Issues. (4) Seminar, three hours. Designed for Ph.D. students. Introduction to public, political, economic, legal, and social issues affecting information and institutions, including relevant social theory, historical, political, and analytical methods. Introduction to policy-making and players/stakes involved in information creation and use. Letter grading.

215. Proseminar: Information Seeking and Use. (4) Seminar, three hours. Designed for Ph.D. students. Introduction to cognitive, affective, and behavioral factors affecting information seeking at individual and social levels; current theory and research on searching, navigation, and information system use; research literature on information seeking and use. Letter grading.

220. Information Access. (4) Lecture, four hours. Requisites: courses 200, 201. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies in control of information in computerized systems; use of print and electronic sources. Letter grading.

225. Latin American Research Resources. (4) (Same as History M265 and Latin American Studies M260.) Discussion, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for endeavors and efficient retrieval of information. Letter grading.

229B. Africana Bibliography and Research Methods. (4) (Same as African Area Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

229C. Introduction to Slavic Bibliography. (2) (Same as Slavic M229.) Lecture, two hours. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

240. Principles of Information Systems Analysis and Design. (4) Discussion, four hours. Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization. S/U or letter grading.

241. Measurement and Evaluation of Information Systems and Services. (4) Lecture, two hours; discussion, two hours. Preparation: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description. S/U or letter grading.

243. Human/Computer Interaction. (4) Lecture, four hours. Preparation: one programming course, one inferential statistics course. Survey of social, behavioral, design, and evaluation issues in human/computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions. Recommended for students in any discipline involved in design or implementation of information technologies. Letter grading.

245. Database Management Systems. (4) Lecture, three hours; laboratory, two hours. Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations. S/U or letter grading.

247. User-Centered Design of Information Retrieval Systems. (4) Seminar, two hours; discussion, two hours. Design implications of interaction between users and the features of automated information systems and interfaces that may serve the information-seeking process. Emphasis on search strategy and subject access through use of thesauri and other vocabularies. Letter grading.

249. Seminar: Special Topics in Information Science. (4) Seminar, four hours. Preparation: at least one course from 242, 243, 247, 280, 405. Requisites: courses 200, 201. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services. Letter grading.

260. Historical Bibliography. (4) Lecture, four hours. Requisites: courses 200, 402. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including antiquarian, Anglo-American, and histoire du livre approaches. Letter grading.

272. Research Seminar: Library and Information Science. (4) Seminar, four hours. Preparation: at least one course from 242, 243, 247, 280, 405. Requisites: courses 200, 201. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services. Letter grading.

290. Research Methodology. (4) Lecture, four hours. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques. S/U or letter grading.

291. Introduction to Research Design and Methodology. (4) Seminar, three hours. Designed for Ph.D. students. Introduction to research traditions in library and information science: quantitative/qualitative social science methods, ethnographic/field approaches, and historiography/critical approaches. Epistemological foundations of research, formulating research questions, and designing appropriate research studies. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Professional Development and Portfolio Design. (2 to 4) Lecture, two hours; discussion, two hours. Preparation: completion of library and information science core courses. Drawing on literature from many fields, exploration of issues related to professional development, such as career planning, continuing education, mentoring, and reflective practice; students also engage in process of guided portfolio design for M.L.I.S. degree. S/U grading.

405. Automation of Library Processes. (4) Lecture, four hours. Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and on-line services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies. Letter grading.

412. Cataloging and Classification of Nonbook Materials. (4) Lecture, four hours. Requisites: courses 410, 411. Problems in cataloging and classification of selected nonbook materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections. S/U or letter grading.

425. Computer-Based Information Resources 
(On-Line Searching). (4) Lecture, four hours. 
Requisite: course 441. Emphasis on use of reference and 
resource databases and different vendor systems. 
File structure and hardware requirements. Analyses 
of information needs and investigation of databases 
addressing those needs. Letter grading.

426. User Education/Bibliographic Instruction: 
Theory and Technique. (4) Lecture, four hours. His-
tory, theory, methods, and materials of user educa-
tion/bibliographic instruction in libraries and other 
information retrieval environments. Examination of 
a variety of user education/bibliographic instruction the-
ories and methodologies, including overview of plan-
ning and administration. Identification of problems in 
user education/bibliographic instruction. Applications 
of methods of teaching use of libraries and informa-
tion resources. S/U or letter grading.

430. Collection Development and Acquisition of 
Library Materials. (4) Lecture, four hours. Back-
ground of publishing and the book trade (new and an-
tiquarian) pertinent to collection development in pub-
lic, school, academic, and special libraries. Theory 
and practice of collection development and manage-
ment. Organization and administration of acquisitions 
departments. S/U or letter grading.

441. Management Theory and Practice for Infor-
mation Professionals. (4) Lecture, two hours; dis-
cussion, two hours. Principles and practice of man-
gagement in all types of organizations where informa-
tion professionals work. Letter grading.

442. Library Personnel Administration. (4) Lec-
ture, four hours. Basic principles of personnel man-
gagement. Survey of current personnel practices in li-
braries; how basic principles apply or need to be 
modified to fit the library setting. S/U or letter grading.

446. Library Services and Literature for Youth. (4) 
Lecture, four hours. Overview of literature and pro-
grams which are of interest to young adults (seventh 
grade and above). Discussion of special problems in 
working with young people and psychology of the 
teenager. S/U or letter grading.

461. College, University, and Research Libraries. 
(4) Lecture, four hours. Organization, administration, 
collections, facilities, finances, and problems of col-
lege and university libraries and their relationships 
within institutions of which they are a part. Functions 
of research libraries and work of their staff in serving 
scholars. S/U or letter grading.

463. Public Libraries. (4) Lecture, four hours. Gov-
ernment, organization, and administration of munici-
pal, county, and regional public libraries; develop-
ments in changing patterns of public library service. 
S/U or letter grading.

465. Library Services and Programs for Children. 
(4) Lecture, two hours; discussion, two hours. Theory 
and practice of service to children in public libraries. 
Overview of professional library service to children 
aged 14 and under; provides opportunities for stu-
dents to gain experience in particular skills needed to 
provide that service. Letter grading.

466. Storytelling. (4) Lecture, two hours; demon-
stration, two hours. Theory and practice of telling stories 
to children and adults in public and school libraries. 
S/U grading.

470. Special Libraries and Information Centers. 
(4) Lecture, four hours. Organization, administration, 
collections, facilities, finances, and problems of spe-
cial libraries and of special collections within general 
libraries. Methods of handling nonbook materials. 
Current trends in documentation and mechanization. 
S/U or letter grading.

471. Health and Life Sciences Libraries. (4) 
Lecture, four hours. Requisite or corequisite: course 441. 
Organization, administration, services, and problems of 
health and life sciences libraries; relationships with 
institutions of which they are a part and with the com-
munity. Letter grading.

473. Government Information. (4) Lecture, four 
hours. Introduction to nature and scope of govern-
ment information promulgated by the federal govern-
ment, as well as by state, municipal, international, 
and foreign governments. Problem-oriented ap-
proach. S/U or letter grading.

485. American Archives and Manuscripts. (4) Lec-
ture, four hours. Identification, description, subject 
analysis, and organization of records contained in ar-
chives and manuscript collections. Administration 
User requirements. Problems of acquisition, legal ti-
tle, literature, preservation, accessibility, and use. 
S/U or letter grading.

486. Issues and Problems in Preservation of Li-
brary Materials. (4) Lecture, four hours. Introduction 
to fields of library conservation and preservation, with 
emphasis on preservation administration. Letter grad-
ing.

488. Seminar: Advanced Issues in Archival Sci-
ence. (4) Seminar, three hours. Requisite: course 485. 
In-depth examination of theoretical issues and con-
temporary problems facing the archival profes-
sion. Topics revolve each term and include develop-
ment and role of archival appraisal, management of 
audiovisual materials, and management of medical, 
scientific, and technological documentation. Letter 
grading.

491. Interpersonal Communication Issues in Li-
brary Systems. (4) Lecture, four hours. Examination 
of interpersonal communication patterns in library 
management and staff relations, in resource sharing, 
and in providing information services. Emphasis on 
relationships within an organizational environment 
as well as the impact of programming, marketing, and 
implementation on communication within the en-
terprise. S/U grading.

497. Fieldwork in Libraries or Information Organi-
zations (4 or 8 units). Fieldwork, to be arranged. Su-
ervised field experience in approved library or infor-
mation organization. Concentration must be on man-
agerial or other professional problems of the site. 
Students spend full time in the field for most of the 
period. S/U grading.

498. Internship. (4) Discussion, to be arranged. Su-
ervised professional training in a library or informa-
tion center approved by internship coordinator. Mini-
um of 120 hours per term. May be repeated twice. 
S/U grading.

596. Directed Individual Study or Research. (2 to 
8) Tutorial, to be arranged. Directed special studies in 
fields of bibliography, librarianship, and information 
systems. Topics vary in content and duration. Varies in 
length and intensity depending on nature of study or com-
plexity of research. S/U grading.

597. Directed Studies for Ph.D. Qualifying Exami-
nations. (2 to 12) Tutorial, to be arranged. S/U grad-
ing.

598. M.L.I.S. Thesis Research and Writing. (2 to 8) 
Tutorial, to be arranged. Designed for graduate library 
and information science students. Supervised inde-
pendent research for candidates in M.L.I.S. thesis op-
tion. S/U grading.

599. Ph.D. Research and Writing. (2 to 12) Tutorial, 
to be arranged. S/U grading.

Hartmut S. Walter, Ph.D (Geography)
Arthur M. Winer, Ph.D (Environmental Health Sciences)
Benjamin Zuckerman, Ph.D (Physics and Astronomy)

Professors Emeriti
Samuel Aron, Ph.D. (Architecture and Urban Design)
Murray A. Milne, M.Arch (Architecture and Urban Design)
Richard Schoen, M.Arch (Architecture and Urban Design)

Associate Professors
Richard F. Ambrose, Ph.D. (Environmental Health Sciences)
Robert Fowell, Ph.D. (Atmospheric Sciences)
David A. Paige, Ph.D. (Earth and Space Science)
Mary R. Reid, Ph.D. (Earth and Space Science)
Richard Vance, Ph.D. (Organismic Biology, Ecology, and Evolution)
Robert E. Weiss, Ph.D. (Biostatistics)

Assistant Professors
Charles J. Corbett, Ph.D (Management)
Rebecca Emigh, Ph.D. (Sociology)
Peggy M. Fong, Ph.D. (Organismic Biology, Ecology, and Evolution)
Graham Forrester, Ph.D (Organismic Biology, Ecology, and Evolution)
Robert K. Jacobs, Ph.D. (Organismic Biology, Ecology, and Evolution)
Suzanne E. Paulson, Ph.D. (Atmospheric Sciences)
Sheldon K. Friedlander, Ph.D. (Chemical Engineering)
Hilary Sigman, Ph.D (Economics)
Laurence C. Smith, Ph.D. (Geography)

Scope and Objectives
The UCLA Institute of the Environment (IoE) offers multidisciplinary academic programs 
that address the full complexity of today's environmental problems. The IoE seeks to enhance 
the educational experience of students by introducing them to virtually every aspect of 
the environment. The mission is to explore the full complexity of today's environmental problems 
in a local, regional, and global scale.
through innovative, integrative, multidisciplinary research and outreach programs.

Los Angeles is often described as “the world in microcosm.” As such, it provides an unparalleled laboratory in which to carry out detailed investigations of a host of complex socioenvironmental issues. UCLA is uniquely situated to develop and implement new solutions to vexing problems related to the quality of life. To this end, the Institute of the Environment has been established as a new and unique academic unit devoted to interdisciplinary research and teaching related to environmental issues. The IoE is composed of faculty from a broad range of disciplines—the sciences, public policy, engineering, law, business, public health—working together to provide answers to complex environmental problems. As one of the world’s foremost research universities, UCLA is already participating in a wide range of research focusing on the environment. The Institute of the Environment seeks to coordinate and expand these studies by bringing new knowledge to the classroom and by reaching out to the community.

Students are able to augment their classroom experience with participation in the institute’s diverse research programs, including fieldwork at facilities such as the UCLA Stunt Ranch, Santa Monica Mountains Reserve, and UCLA Marine Science Center. These opportunities offer students valuable hands-on experience in land, air, and water research.

General Education Cluster
The Institute of the Environment sponsors Environment/General Education Clusters M1A-M1B-M1C on the global environment. The cluster format is a series of three integrated courses taught over the Fall, Winter, and Spring Quarters. The Fall and Winter Quarter courses consist of lectures and discussions. The Spring Quarter consists of seminars and field trips in which students explore specialized environmental topics such as the history of environmental thought, environmental policy, and feeding the Earth’s human population. Each course carries five units of academic credit and satisfies general education credit for four courses.

Environmental Studies

Lower Division Courses
M1A-M1B-M1C. Global Environment. (5-5-5) (Same as GE Clusters M1A-M1B-M1C.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1C. Letter grading. M1A-M1B. Multidisciplinary Perspective I, II. Lecture, three hours; discussion, two hours. Human effects on Earth’s ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. M1C. Special Topics. Seminar, three hours. Small groups address environmental topics like smog, deforestation, and recycling. Exercises include field trips and oceanographic cruise.

Upper Division Course

M127. Soils and Environment. (5) (Same as Geography M127 and Organismic Biology M127.) Lecture, five hours; discussion, one hour; field trips. Required: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and soil distribution. Letter grading.

Related Courses

H. Thomas Hahn, Ph.D. (Mechanical and Aerospace Engineering)
Stephen E. Jacobsen, Ph.D. (Electrical Engineering)
Aly H. Shabaik, Ph.D. (Materials Science and Engineering)
Daniel C.H. Yang, Ph.D. (Mechanical and Aerospace Engineering)
Jenn-Ming Yang, Ph.D. (Materials Science and Engineering)

Assistant Professors
Chang-Jin (C-J) Kim, Ph.D. (Mechanical and Aerospace Engineering)
Zvi Shiller, Ph.D. (Mechanical and Aerospace Engineering)

Scope and Objectives
The Integrated Manufacturing Engineering (IME) Program is an interdepartmental program based in the Mechanical and Aerospace Engineering Department. The main purpose is to educate future manufacturing engineers. The curriculum is centered around an integrated approach to product development, while clean environment, agility, and cost-effective-
ness are emphasized. Instruction is computer-aided, and teaching/learning laboratories are used to provide students with hands-on experience in advanced manufacturing technologies such as rapid prototyping, robotics, automated material handling, new manufacturing processes, and production planning and scheduling. Team teaching is employed to offer a balanced understanding of principles and methods required.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Integrated Manufacturing and Engineering Program offers the Master of Engineering (M.Eng.) degree in Integrated Manufacturing Engineering.

Admission

The M.Eng. degree program is an interdepartmental program within the Departments of Electrical Engineering, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

In addition to meeting the requirements of the Graduate Division, applicants to the M.Eng. program are required to take the General Test of the Graduate Record Examination (GRE). Applicants may be admitted to the program through any one of the three departments listed above.

More information may be obtained at http://ime.ucla.edu or by contacting the program coordinator, Integrated Manufacturing and Engineering, UCLA, 48-121 Engineering IV, BOX 951597, Los Angeles, 90095-1597.

Areas of Study

Consult the department.

Course Requirements

A total of 12 courses is required, including six 400-level core courses (Electrical Engineering 475C, Materials Science and Engineering 474A, 475A, Mechanical and Aerospace Engineering 474B, 474C, 475B), three electives (to be chosen in consultation with the faculty advisor), and three seminar courses (three quarters of Mechanical and Aerospace Engineering 476), which total 39 units.

Comprehensive Examination Plan

Group Project. Students must participate in a group project through enrollment in Mechanical and Aerospace Engineering 478 for a total of 11 units. The group size is approximately three students.

Thesis Plan

None.

Scope and Objectives

The undergraduate International Development Studies major aims to provide a liberal education in relation to the critical issues, experiences, and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international development in academia, public or private agencies, or nonprofit organizations.

Undergraduate Study

International Development Studies B.A.

Preparation for the Major

No specific courses are required as preparation for the major, but students should have some beginning experience in the social sciences at the college level and be in good academic standing.

The Major

Required: Fifty-six units of upper division courses (including International Development Studies 100A-M100B and Economics 110 or 111 or 112), taken for a letter grade, and the foreign language requirement. (For the social statistics and methodology requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in Item 5 below. Substitutions may be made only with consent of the faculty adviser.

The major consists of six parts (courses marked with an asterisk have requisites):

(1) International Development Studies 100A-M100B.

(2) Economics *110 or *111 or *112.

**International Development Studies**

### Upper Division Courses

100A-M100B. Introduction to Development Studies. (4-4) (Formerly numbered Development Studies 195A-195B.) Preparation: 3.5 grade-point average in courses offered for the major, formal application to honors program. Requisites: courses 100A-M100B. Research, discussion, and planning of honors thesis. 195B-195C. Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

197. Special Topics in International Development. (4) Seminar, three hours. Preparation: some beginning experience in social sciences at college level. Lecture/seminar format on selected topics in international development. Course either features visiting instructors in field of development studies or allows program's affiliated faculty to engage specific contemporary issues. May be repeated for credit with topic change.

### INTERNATIONAL RELATIONS

**College of Letters and Science**

UCLA
4256 Bunche Hall
Box 951472
Los Angeles, CA 90095-1472
(310) 825-3862
http://www.sscnet.ucla.edu/polisci/

**Scope and Objectives**

The undergraduate specialization in International Relations can only be taken jointly with a major in Political Science, and all requirements for the Political Science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in Political Science and specialization in International Relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international empha-

### Honors Program

Majors who have completed International Development Studies 100A-M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 195A-195B-195C in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.
For further information, contact the political science undergraduate counselor in the program office.

**Assistant Professors**

Michael D. Cooperson, Ph.D. (Near Eastern Languages and Cultures)
James L. Gelvin, Ph.D. (History)

**Scope and Objectives**

The undergraduate major in this discipline is called Near Eastern Studies. For details, see the program by that name later in this section.

The designation of the interdepartmental degree program in Islamic Studies is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religious alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/ or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an “idealized” and a “functional” or “practical” Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Islamic Studies Program offers the Master of Arts (M.A.) degree in Islamic Studies and participates in a concurrent degree program with the School of Public Health.

**Admission**

In addition to the general University requirements, a B.A. degree in Near Eastern Studies or in a related field with an emphasis on the Near East is required for admission to the M.A. program. The application deadline is March 1. Applicants are normally expected to have completed the equivalent of Arabic 102A-102B-102C, or Turkish Languages 101A-101B-101C at the time of application. In addition, applicants should have completed the equivalent of two years of Near Eastern history (classical and modern); some coursework in Islamic culture and institutions may be applied toward the history requirement. Should there be any deficiencies in these requirements, the requirements must be satisfied by taking the appropriate courses without credit toward the advanced degree. The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is necessary.

A score of 560 on the Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English and who have not attended English-speaking universities.

No special application form is required in addition to the UCLA Application for Graduate Admission.

**M.P.H./M.A. Islamic Studies**

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the M.A. in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

**Areas of Study**

Anthropology, Arabic, economics, geography, history, Islamic art history and architecture, music, Persian, political science, sociology, and Turkish.

**Course Requirements**

A minimum of nine courses is required, five of which must be at the graduate level. Students must take no fewer than four courses on the appropriate level in one Near Eastern language of their choice. Additionally, students must take no fewer than five relevant upper division and graduate-level courses selected from two of the major fields and subdisciplines listed above. The omission of history as one of the fields is approved only in exceptional cases. Eight units of 500-series courses may be applied toward the minimum graduate course requirement and toward the total course requirement, provided the courses are not in the same discipline.

**Comprehensive Examination Plan**

Four written examinations in the following areas must be passed: (1) any Near Eastern language; (2) the literature of the chosen language; (3) the history of the Near East; and (4) one of the other nonlanguage major fields or subdisciplines listed above. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the interdepartmental degree committee. The examiner or examiners are appointed by the chair of the interdepartmental degree program.

**Thesis Plan**

None.

**Doctoral Degree**

**Admission**

Students intending to work for the Ph.D. degree in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Students entering the program with an M.A. from another university should have attained a level of preparation in languages, his-
Major Fields or Subdisciplines
Anthropology, Arabic, art history, economics, geography, history, music, Persian, political science, Turkish.

Course Requirements
For students entering directly into the Ph.D. program, course requirements are the same for the M.A. Beyond this, advanced courses in two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree program, are taken.

Written and Oral Qualifying Examinations
Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one of the other nonlanguage major fields or subdisciplines listed above. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, and propositions are not permitted as alternatives to the written qualifying examinations.

Islamic Studies

Course List

Anthropology
130. Study of Culture
150. Study of Social Systems
M154P. Gender Systems: North American
M154Q. Gender Systems: Global
156. Comparative Religion
161. Development Anthropology
167. Urban Anthropology
215. Field Training in Archaeology
230Q. Theories of Culture
273. Cultures of the Middle East

Arabic (Near Eastern Languages)
102A-102B-102C. Intermediate Literary Arabic
111A-111B-111C. Elementary Spoken Egyptian Arabic
112A-112B-112C. Advanced Spoken Egyptian Arabic
113A-113B-113C. Elementary Spoken Levantine Arabic
114A-114B-114C. Spoken Moroccan Arabic
120. Islamic Texts

130. Classical Arabic Texts
132. Philosophical and Kalam Texts
141. Modern Arabic Literature
150. Introduction to Arabic Literature and Culture
199. Special Studies in Arabic
220. Seminar: Islamic Texts
230. Medieval Literary Texts
240. Seminar: Arab Historians and Geographers
250. Seminar: Arabic Literature
596. Directed Individual Study
597. Examination Preparation
598. Ph.D. Dissertation Research and Preparation

Archaeology
259. Fieldwork in Archaeology
596. Individual Studies for Graduate Students
597. Preparation for Ph.D. Qualifying Examinations

Armenian (Near Eastern Languages)
210. History of the Armenian Language
220. Armenian Literature of the Golden Age (A.D. 5th Century)
230A-230B-230C. Elementary Classical Armenian
231A-231B-231C. Intermediate Classical Armenian
232A-232B-232C. Advanced Classical Armenian

Art History
104A. Western Islamic Art
104B. Eastern Islamic Art
C104C. Problems in Islamic Art
105E. Byzantine Art
213. Advanced Studies in Islamic Art
C214. Problems in Islamic Art

Berber (Near Eastern Languages)
101A-101B-101C. Elementary Berber
102A-102B-102C. Advanced Berber
130. The Berbers
199. Special Studies in Berber Languages

Classics
M170. Power and Imagination in Byzantium

Ethnomusicology
147. Survey of Classical Music in India
240. Music of Arabic-Speaking Near East
241. Music of Iran and Other Non-Arabic-Speaking Communities
248A-248B. Classical Music of India

French
121A. Contemporary Francophone Literature: French-African Literature
257A-257B. Studies in French-African Literature

Geography
187. Middle East

Greek (Classics)
231A-231B-231C. Seminars: Later Greek and Byzantine Literature

Hebrew (Near Eastern Languages)
230. Seminar: Medieval Hebrew Literature
231. Texts in Judeo-Arabic

History
106A-106B-106C. Survey of the Middle East from 500 to the Present
107A-107B. Islamic Civilization
108A-108B. History of the Arabs
109A-109B. History of North Africa from the Moslem Conquest
110A-110B. Iranian History
111A-111B. History of the Turks
114. Topics in Middle Eastern History
123A-123B. Byzantine History
188B-188C. History of British India I, II
190A-190B. History of Southeast Asia
204A-204B. Seminars: Near and Middle Eastern History
205A-205B. Seminars: Medieval Middle Eastern History
206A-206B. Seminars: Social History of the Middle East
209A-209B. Seminars: Ottoman and Modern Turkish History
216A-216B. Seminars: Byzantine History
596. Directed Studies
597. Directed Studies for Graduate Examinations
599. Ph.D. Research and Writing

Iranian (Near Eastern Languages)
102A-102B-102C. Intermediate Persian
103A-103B-103C. Advanced Persian
140. Persian Belles Lettres (Adabiyyât)
141. Persian Analytical Prose
150A-150B. Survey of Persian Literature in English
169. Civilization of Pre-Islamic Iran
170. Religion in Ancient Iran
190A-190B. Introduction to Modern Iranian Studies
199. Special Studies in Iranian
220A-220B. Classical Persian Texts
221. Rumi, Mystic Poet of Islam
250. Seminar: Classical Persian Literature
251. Seminar: Contemporary Persian Literature
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Islamics (Near Eastern Languages)
110. Introduction to Islam
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Linguistics
220. Linguistic Areas
225. Linguistic Structures

Near Eastern Languages
200. Bibliography and Method of Near Eastern Languages and Literatures
210. Survey of Afro-Asiatic Languages
M241. Folklore and Mythology of the Near East
290. Seminar: Paleography
596. Directed Individual Study
597. Examination Preparation
599. Ph.D. Dissertation Research and Preparation

Philosophy
104. Topics in Islamic Philosophy

Political Science
132A-132B. International Relations of the Middle East
157. Government and Politics in the Middle East
C245. Middle Eastern Politics

Semiotics (Near Eastern Languages)
215B. Syriac

Sociology
134. Culture and Personality
187. Population and Society in the Middle East

Turkic Languages (Near Eastern Languages)
101A-101B-101C. Elementary Turkish
102A-102B-102C. Advanced Turkish
111A-111B-111C. Elementary Uzbek
112A-112B-112C. Advanced Uzbek
114A-114B-114C. Bashkir
160. Turkish Tradition
180. Modern Turkic Languages and Peoples

Maria Grazia Pellegreni, Dottore in Lettere
Elissa Tognozzi, Ph.D.

Scope and Objectives
Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdisciplinary graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

Undergraduate Study

Italian B.A.

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is requisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46.

The Major

Required: Thirteen upper division Italian courses, including 103A-103B, 113, 114A or 114B, 116A or 116B; one course from 118 or 119; one course from 120 or 121; four courses from 144 through 197; 190. One upper division elective course in a field relevant to Italian studies from outside the department may be substituted with consent of the undergraduate advisor.

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

Study in Italy

Students are encouraged to spend up to one year in Italy either to (1) study with an academic advisor in an Italian university. They are also urged to take advantage of summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on Casa Italiana, contact the department or the Summer Sessions Office, 1147 Murphy Hall.

Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requirements: Italian 102A-102B.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A–. Applications should be made during the last term of the junior year.

Italian and Special Fields

B.A.

Students with particular interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

Anthropology Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and one elective from 33, 34.

The Major

Required: Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate advisor; five courses from Anthropology 110, 111, 112, M115A, M115B, C115R, 118A, 118B, 130, 132, 133Q, 135A, 135B, 135C, 135S, 135T, 138, 139, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate advisor.

Art History Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Art History 50 or 51, 54, 57.

The Major

Required: Italian 100, 103A or 103B, 190, 195, and four courses from 113 through 197 selected in consultation with the undergraduate advisor; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, 109A, 109C, 110A, 110B, 110F, 127, 150D selected in consultation with the undergraduate advisor.

Classics Field

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40 or 41, and Greek 1, 2, 3 or Latin 1, 2, 3, or equivalent.

The Major

Required: Italian 100, 103A or 103B, 190, 195, and ten courses from 113 through 197 selected in consultation with the undergraduate advisor; Greek 100 or Latin 100, one course from Classics 141 through 147 (except 195),
and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

Design Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46; Design 21, 22, 23, 32B, and one course from 32C, 35A, 35B.

The Major
Required: Italian 100, 103A or 103B, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; three courses from Design 101 through 197 selected in consultation with the undergraduate adviser.

English Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; English Composition 3, English 4, 10A, 10B, 10C.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; four courses from English 100, M101A through 119, 121, 140A through M197A selected in consultation with the undergraduate adviser.

Film and Television Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, 46.

The Major
Required: Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

French Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46; French 1, 2, 3, 4, 5, 6, 12 or 14.

The Major
Required: Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

History Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46; one course from History 1A, 1B, 1C, 88B through 88E, 88Q, 88U.

The Major
Required: Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from History 100, 102, 119M through 121D, 125A through 127B, 132A, 132B, 135A through 137B selected in consultation with the undergraduate adviser.

Linguistics Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

Music History Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, Music History 1A-1B or 2A-2B, 26A-26B-26C. Recommended: Music 20A, 20B, 20C.

The Major
Required: Italian 100, 103A or 103B, 190 or 222A, 195, 222B, and two courses from 113 through 197 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

Philosophy Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; five courses from Political Science 126A through 127G, 135A, 135B, 135C, 156 selected in consultation with the undergraduate adviser.

Political Science Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

The Major
Required: Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Political Science 111A through 113, 116 through 1192, 137A, 137B, 139A through 139Z, 153A, 155, 167A selected in consultation with the undergraduate adviser.

Portuguese Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

The Major
Required: Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 197 selected in consultation with the undergraduate adviser.

Spanish Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

The Major
Required: Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Spanish 120A, 120B and three courses from 122 through M161 selected in consultation with the undergraduate adviser.

Theater Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B.

The Major
Required: Italian 100, 103A or 103B, 122, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, 111B, 111C, Classics 143, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

Women’s Studies Field
Preparation for the Major
Required: Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46; Women’s Studies 10.

The Major
Required: Italian 100, 103A or 103B, 122, 195, and five courses from History 100, 102, 119M through 121D, 125A through 127B, 132A, 132B, 135A through 137B selected in consultation with the undergraduate adviser.

Italian Minor
To enter the Italian minor, students must have an overall grade-point average of 2.0 or better.
Required Lower Division Courses (12 units): Italian 5, 25, and one course from 42A, 42B, 46, 50A, 50B.
Required Upper Division Courses (20 units):
Italian 100 and four additional Italian courses.
All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdn.et.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree
The Department of Italian offers the Master of Arts (M.A.) degree in Italian.

Admission
Applicants to the M.A. program should send three letters of recommendation to the Graduate Adviser, Department of Italian.

Areas of Study
The M.A. degree is available with specializations in Italian literature and Italian language.

Course Requirements

Italian Language Specialization. For both the comprehensive examination plan and the thesis plan, 12 courses are required, including Italian 205A-205B, and 222A. The other nine courses must be distributed in three main literary periods: Middle Ages, Renaissance, modern (at least two courses in each period). Three of these may be upper division undergraduate courses if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended.

Italian Language Specialization. Requisites: a general grasp of linguistics equivalent to Linguistics 20 and 110, and a broad familiarity with Italian literary and cultural history. For both the comprehensive examination plan and the thesis plan, 12 courses are required, including Italian 222A-222B-222C and Linguistics 202 or equivalent. At least nine courses must be in the 200 series. No 500-series courses may be applied toward the M.A. course requirements.

Comprehensive Examination Plan
In general, the department favors the comprehensive examination plan, which consists of a minimum five-hour written examination to be given before the final examination period in the Fall and Spring Quarters. Alternatively, students may petition to substitute a master's thesis in lieu of the examination, although this option is not encouraged. The examination tests the student's general competency and does not have major and minor fields of emphasis. After the written examination, an oral examination must be taken. In case of failure, students may be reexamined once, subject to approval by the examination committee and the chair of the department.

Thesis Plan
This plan is recommended for research-oriented students of exceptional merit. Students who have completed the first year of graduate work with at least a 3.7 grade-point average may be nominated by one of the faculty members of the department for application to the thesis plan. If the nomination is accepted by the faculty, a three-member thesis committee is submitted to the Graduate Division for appointment.

At this point students must have completed Italian 205A-205B and at least two other graduate courses in Italian. On acceptance, the guidance committee helps students choose six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the sixth quarter of graduate work. After completion of the thesis, an oral examination must be passed testing knowledge in the field of the thesis and general competence in Italian literature.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. degree in Italian should send three letters of recommendation from professionals in the field of Italian studies to the Graduate Adviser, Department of Italian.

Requisite for entering the department's doctoral program is an M.A. in Italian literature from UCLA or its equivalent from another university in the U.S. Students who have a master's degree in Italian literature or its equivalent from another institution are required to pass Part I of the Ph.D. qualifying examinations by the end of the third quarter in residence. Students should expect to take Part II of the examinations after approximately six quarters.

Students holding the M.A. from UCLA normally take Part II of the qualifying examinations at the end of the sixth quarter in residence.

Major Fields or Subdisciplines
Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern areas comprise the major fields, while two centuries of Italian literature from any of the areas mentioned above make up the minor fields.

A major in a literary genre or a minor outside the department may be chosen, provided that it relates to the student's major field of specialization. This field must have the approval of the entire department.

Course Requirements
In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply are required. Students also must take such courses as their guidance committee prescribes for the qualifying examinations (such as Italian 596 or 597). All courses from Italian 201 on, except for 205A and 205B, may be applied toward the Ph.D. degree.

Written and Oral Qualifying Examinations
The comprehensive examination for the M.A. in Italian at UCLA corresponds to Part I of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (Part II), which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: an eight-hour examination in the student's major field and a six-hour examination in the minor field. Additionally, a two-hour University Oral Qualifying Examination is required. A summary of requirements entitled Regulations for the Ph.D. Examination is available in the department. In case of failure, students may be reexamined on unanimous approval of the guidance committee, after at least one academic quarter of additional residence.

Italian

Lower Division Courses
1. Elementary Italian—Beginning. (4) Lecture, five hours; live laboratory, one hour.
2. Elementary Italian—Accelerated. (8) Lecture, ten hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.
3. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.
5. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.
6. Elementary Italian—Continued (Continued), (8) Lecture, ten hours; laboratory, two hours. Enforced requisite: course 1A or 2. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.
7. Special Reading Course. (4) Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.
3A. Intermediate Italian — Accelerated. (8) Lecture, six hours; laboratory, two hours. Enforced requisite: course 2A or 3. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

7. Elementary Italian Conversation. (4) Lecture, five hours (first six-week summer session). Encompasses conversational material included in course 1, with emphasis on traveler’s vocabulary.

8A-BB-SC. Italian Conversation. (2-2-2) Discussion, three hours. Each course may be repeated once for credit. P/NP or letter grading.

42A-42B. Italy through the Ages, in English. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. P/NP or letter grading. 42B. Late Renaissance to Postmodern Period. Baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, Communism, terrorism, neorealist cinema, and “moral revolution” of the 1960s and 1970s.

46. Italian Cinema and Culture. (4) Lecture, two hours; discussion, one hour; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1960s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation’s filmmakers and writers.

50A-50B. Masterpieces of Italian Literature in English. (4-4) Lecture, three hours; outside study, nine hours. P/NP or letter grading. 50A. Middle Ages and Renaissance. Philosophical, religious, and sociopolitical issues examined in authors such as St. Francis, Guinizelli, Cavalcanti, Dante, Boccaccio, Petrarch, Poliziano, Lorenzo de’ Medici, Machiavelli, Castiglione, and Ariosto. 50B. Baroque Period to the Present. Close reading of major works selected from such writers as Tasso, Bruno, Campanella, Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, and Pirandello.

Upper Division Courses

100. Composition and Style. (4) Formerly numbered 130.) Lecture, three hours; outside study, nine hours. Requisite: course 25. Development of writing techniques and proficiency in composition and style, with emphasis on editing for grammar and style. P/NP or letter grading.

102A-102B-102C. Italian Cultural Experience, in English. (4-4-4) Lecture, three hours; outside study, nine hours. Study of cultural development of Italy. P/NP or letter grading. 102A. Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio, Petrarch, and the rise of Italian merchant class. 102B. Renaissance discovery of human genius; central period between Machiavelli and Galileo, leading Italy and Europe to scientific revolution. 102C. Birth of Italian nation from wars of independence to foundation of modern republic, delineated through narrative and cinema in historical context.

103A-103B-103C. Introduction to Italian Literature and Literary Analysis. (4-4-4) Formerly numbered 200A-200B-200C.) Lecture; three hours; outside study, nine hours. Requisite: course 100. Italian literature from 1150 to the present, with emphasis on methods of interpreting literary form and meaning in poetry, drama, epic, and novel. P/NP or letter grading.

103A. Knights, Saints, and Lovers. Beginning with generation dominated by St. Francis, love poets of court of Frederick II to three classic writers of Italian literature: Dante, Petrarch, and Boccaccio. Renaissance rediscovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Castiglione.

103C. Romanticism, Politics, and Disillusionment. Great poetry and dialogues of Giacomo Leopardi; patriotic literature accompanying rise of modern Italian state; futurism, surrealism, neorealism, and postmodernism. Authors may include Foscolo, Manzoni, Verga, Pirandello, Calvino, and Dario Fo.

110. Dante, in English. (4) Formerly numbered 110A-110B.) Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading.

113. Dante’s Divine Comedy. (4) Formerly numbered 113A-113B.) Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of medieval philosophy, religion, and politics in La Divina Commedia, greatest literary achievement of the age. P/NP or letter grading.

114A-114B. Middle Ages. (4-4) Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. 114A. Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, Dolce Stil Novo poets, and Petrarca) caught between courtly and religious codes. 114B. Medieval Humor, Moralism, and Society. Novels of Boccaccio’s witty and comic maestro, Decameron, analyzed within context of moral and social codes of the culture of the time.

116A-116B. Italian Renaissance. (4-4) Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. 116A. Renewal of Art and Thought. Study of the Quattrocento and its representations in the arts and humanistic thought (i.e., Antegna, Botticelli, Pico, Valla, and Piccinino). 116B. Power and Imagination in the Renaissance. Study of artistic work of Leonardo, Raphael, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in world molded by powerful political forces, such as the Roman Papacy and Medicis, Gonzaga, and D’Este courts.

118. Age of Enlightenment. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of philosophical and political prose, satiric poetry, and drama, unveiling birth of modern spirit through writings of Vico, Metastasio, Parini, and Alfieri. P/NP or letter grading.

119. Italian Ottocento. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of the Ottocento, the rich period of Italian history and culture from Romanticism to decadentism when philosophical and political issues affected not only the mind but also the heart. Emergence of unique brand of individualism through poetry and prose writings of Foscolo, Leopardi, Manzoni, Nievo, and Verga. P/NP or letter grading.

120. Literature in the 20th Century. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100. Analysis of novel, poetry, and drama of the 20th century in connection with modern thought and culture. Authors may include D’Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.

121. Literature and Film. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Comparative study of specific literary works and their translation into film and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.

122. Italian Theater. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Study of dramatic works from the Renaissance to the present and their theatrical presentation. P/NP or letter grading.

131. Reading and Reciting. (4) Lecture, three hours. Preparation: sufficient knowledge of Italian. Emphasis on dictation, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

M140. Italian Novella from Boccaccio to Basile. (4) Same as Folklore M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

150. Modern Fiction in Translation. (4) Lecture, three hours; outside study, nine hours. Select issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco’s The Name of the Rose, Pasolini’s The Ragazzi, Pirandello’s The Life of Matteo Pascal, and Calvino’s The Cosmicomics. P/NP or letter grading.

M158. Women in Italian Culture. (4) Same as Women’s Studies M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

190. History of the Italian Language. (4) Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracking of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

195. Special Fields Research. (4) Limited to senior Italian and Special Fields majors. Unscheduled tutorial in which paper (20 to 25 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge. P/NP or letter grading.

197. Variable Topics in Italian Studies. (4) Discussion, three hours; outside study, nine hours. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental undergraduate courses.

199. Special Studies. (2 to 4) Course of independent studies for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

Graduate Courses

201. Bibliography and Methods of Research. (4) Lecture, three hours.

205A-205B. Studies in Criticism. (4-4) Lecture, three hours; outside study, 18 hours. History, theory, and practice of criticism. S/U or letter grading. 205A. Brief History of Literary Criticism. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. 205B. Discussion of Modern Critical Approaches. Presentation, discussion, application, and comparison of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

210. Studies in Early Italian Literature. (4) Lecture, three hours; outside study, 18 hours. Topics include origins of Italian language and study of early texts, Scuola Siciliana and early poetry of Central and Northern Italy, and Dolce Stil Novo. S/U or letter grading.
214A-214F. Studies in Medieval Literature. (4 each) Lecture, three hours; outside study, 18 hours. S/U or letter grading.
214A. La Divina Commedia.
214B. Dante's Other Works.
214C. Petrarch's Canzoniere.
214D. Boccaccio's Decameron.
214E. Boccaccio's Other Works.
214F. Variable Topics. Variable-content seminar on themes and issues of medieval literature, with coverage of authors such as St. Francis of Assisi or Jacopo della Scala. Three hours; outside study, 18 hours. S/U or letter grading.

215A-215B. Studies in 15th-Century Literature. (4-4) Lecture, three hours; outside study, 18 hours. S/U or letter grading. 215A. Variable Topics. Variable-content seminar on themes and issues of 15th-century literature, with coverage of authors such as Pulci or Poliziano. 215B. Age of Lorenzo de' Medici and Poliziano.

216A-216B. Studies in Renaissance. (4 each) Lecture, three hours; outside study, 18 hours. S/U or letter grading.
216A. Machiavelli and Renaissance Political Thought.
216B. Ariosto and Renaissance Epic.
216C. Tasso.

216D. Renaissance Theater.
216E. Variable Topics. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto.

217. Studies in 17th-Century Literature. (4) Lecture, three hours; outside study, 18 hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Battista Marino, and baroque poetry. S/U or letter grading.

218A-218D. Studies in 18th-Century Literature. (4 each) Lecture, three hours; outside study, 18 hours. S/U or letter grading.
218A. Vicino.
218B. Affieri.
218C. Goldoni.
218D. Variable Topics. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico.

219A-219B. Studies in 19th-Century Literature. (4 each) Lecture, three hours; outside study, 18 hours. S/U or letter grading.
219A. Forciano.
219B. Leopardi.
219C. Manzoni.
219D. Variable Topics. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaso, or Nievo.

220. Studies in Turn-of-the-Century Literature. (4) Lecture, three hours; outside study, 18 hours. Topics include Verga and Vergano, poetry, prose, and theater of D'Annunzio, and poetry of Carducci and Pascoli. S/U or letter grading.

221A-221E. Studies in 20th-Century Literature. (4 each) Lecture, three hours; outside study, 18 hours. S/U or letter grading. 221A. Variable Topics. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D'Annunzio, Verga, Marini, and Pirandello.
221B. Contemporary Poetry. Analysis of legacy of two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s.
221C. 20th-Century Narrative to World War II. Assessment of turn-of-the-century narrative pattern (Gabriele D'Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marini, etc.
221D. 20th-Century Narrative since World War II. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of for-malistic modes adopted by the neo-avant-garde.
221E. Pirandello and Contemporary Theater. Through reading of theatrical texts, accompanied by analysis of how the plots have been realized on stage by important directors such as Strehler, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance.

222A-222B. Studies in History of Italian Language. (4-4) Three hours; outside study, 18 hours. Designed for graduate students. S/U or letter grading.
222A. History of the Italian Language. Historical survey of development of the language from medieval times to unification of the country (1861). Questions della lingua, general acceptance of Florentine speech, and its evolution into the national language.
222B. Structure of Modern Italian. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects.

222C. Italian Dialectology. Historical differentiation of Italian dialects considered in their areal dimension. Specific sociolinguistic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined.

M230A-M230B. Folk Tradition in Italian Literature. (4-4) (Same as Folklore M230A-M230B) Lecture, two hours.

250A-250D. Seminars: Dante. (4 each) Seminar, three hours.
251. Seminar: Petrarch. (4) Seminar, three hours.
252. Seminar: Boccaccio. (4) Seminar, three hours.
253A-253B. Seminars: Chivalric Poetry in Italy. (4-4) Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boia-rdo, Ariosto, and Tasso.
254. Seminar: Machiavelli. (4) Seminar, three hours.
255A-255B. Seminars: Baroque. (4-4) Seminar, three hours.
256A-256B. Seminars: 18th Century. (4-4) Seminar, three hours.
257A-257B. Seminars: Romanticism. (4-4) Seminar, three hours.
258A-258B. Seminars: Contemporary Italian Literature. (4-4) Seminar, three hours.

M260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4) (Same as Folklore M261.) Lecture, three hours; outside study, 18 hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, curses and curses, secular and ritual drama).

260B. Women in Italian Culture. (4) Lecture, three hours; outside study, 18 hours. Designed for graduate students. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

260C. Studies in Italian Cinema. (4) Lecture, three hours; outside study, 18 hours. Designed for graduate students. Italian cinema compared with other European countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

266. Variable Topics in Italian Studies. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

270. Problems and Methods in Teaching Italian. (4) Lecture, two hours.

275. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495D. Teaching Italian at College Level (2 to 4 units each), Tutorial, to be arranged. 495A. Techniques in Teaching Italian Literature; 495B. Techniques in Teaching Italian Culture; 495C. Techniques in Teaching Italian Film.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 12) May be repeated twice for credit. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) S/U grading.

Scope and Objectives

The Labor and Workplace Studies undergraduate specialization is intended to coordinate and enrich offerings on the workplace's connections to the social, political, and economic forces that surround it. Students become acquainted with institutions of the labor market such as public policies, employment practices, and unions. Faculty members from various disciplines are actively engaged in research on some aspect of employee relations, employee organizations, or workplace concerns in the U.S. or other countries. Administration of the program is coordinated through the Institute of Industrial Relations.

Undergraduate Study

Labor and Workplace Studies Specialization

The Labor and Workplace Studies specialization must be taken in conjunction with a major in the social sciences or in Psychology. Students with other majors may be admitted by petition.

Upper Division Requirements

Required: Management 150; Political Science 142C or History 155B; three other courses selected from Chicana and Chicano Studies 120, Economics 150, 151, 152, 181B, 183, Geography 155, History 155A, 155B, Political Science 142C, 169, Psychology M137E, Sociology M163, 171, 173, Women's Studies M163, 171. All students take a one-term specialization seminar designed for the exchange of disciplinary perspectives and directed research toward the end of the program.

Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (310-794-5983) or Professor Daniel J.B. Mitchell (310-825-1504).

Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.
The Latin American Studies Program, coordinated through UCLA's Latin American Center, offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Education and Information Studies, Management, Public Health, and Public Policy and Social Research provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

Undergraduate Study

Latin American Studies B.A.

Undergraduate studies of the Latin American region are designed to serve the needs of students (1) desiring a general education focused on the Latin American cultural region, (2) planning to enter business, government, or international agency service, (3) preparing to teach social sciences or language, and (4) preparing for advanced academic study of Latin America.

Students must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, students may take Portuguese 102A-102B which are designed for those with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

Course Limitations

Students may not take more than eight units of Latin American Studies 199 for letter-grade credit nor more than eight units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall grade-point average of 3.0, or senior standing.

Double Majors

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., Latin American Studies and History). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

Study in Latin America

Students are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. For information on studying in Mexico, Costa Rica, Chile, or Brazil, contact the Education Abroad Program, 1105 Hershey Hall, (310) 794-9820.

Core Areas for the Major

Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

Core I: Arts and Humanities

Preparation

Required: Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55A or 55B or Ethnomusicology 91K and World Arts and Cultures 73B.

Core Area

Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. Core Concentration: Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list may be applied toward the core concentration.

2. Theory and Methods: One course from theory and methods.

3. Internal Breadth: Four additional courses from the arts and humanities core area but outside the core concentration. No more than two of these may be electives.

External Breadth

Required: From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

(1) Literature and Folklore

Folklore and Mythology

World Arts and Cultures

C173B. Dance of Mexico

C180B. Studies in Dance Ethnography: Field Research

183. Dance in Latino American Cultures
Core II: Social Sciences

Preparation

Required: Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics M40 or Sociology M18 or Statistics 10.

Core Area

Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. Core Concentration: Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list may be applied toward the core concentration.

2. Theory and Methods: One course from theory and methods.

3. Internal Breadth: Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth

Required: From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

199. Readings in Political Science: Latin America

Theory and Methods

Political Science

*102. Statistical Analysis of Political Data
*104A-104B. Introduction to Survey Research
*105. Economic Models of Public Choice
(1) Core Concentration: Five courses as listed below in geography. Only one course from the electives list may be applied toward the core concentration.

(2) Theory and Methods: One course from theory and methods.

(3) Internal Breadth: Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives.

External Breadth

Required: From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in social sciences (e.g., history). The two additional courses required may be from either arts and humanities or social sciences. No more than three external breadth courses may be electives.

Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Community Health Sciences

Sociology

Economics

Electives

Latin American Studies Minor

The interdisciplinary program leading to the Latin American Studies minor allows students to choose from a broad range of course offerings in various departments to develop professional and methodological skills with area expertise.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units. For further information, contact Carolyn Ramirez-La Faso at (310) 206-6571.

Required Lower Division Courses (eight units):

Required Upper Division Courses (20 units):

Approved Undergraduate Courses

Core III: Ecology and Environment

Preparation

Required: Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 10.

Core Area

Required: Ten upper division courses from the approved list of Latin American courses distributed as follows:

Admission

In addition to University minimum requirements, the B.A. degree in Latin American Stud-
ies constitutes the normal basis for admission to the M.A. program. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless the applicant has been away from school for some time, in which case one of the letters may be from an employer
(2) A minimum of a 3.0 or B average in the junior/senior years of college
(3) A statement of purpose discussing the applicant’s background in Latin American studies, proposed program of study, and future career plans
(4) A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE)

Optional: a résumé or curriculum vitae describing both academic and Latin American experience.

Students are admitted each quarter. Application deadlines are November 1 for Winter Quarter, December 31 for Spring Quarter, and December 15 (to be considered for financial assistance) or May 1 for Fall Quarter.

Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, students may pursue both degrees simultaneously.

Articulated Degree Programs
Articulated degree programs are currently available with the (1) Department of Education in the Graduate School of Education and Information Studies (Master of Education in Curriculum); (2) Department of Information Studies in the Graduate School of Education and Information Studies (Master of Library and Information Science); (3) School of Public Health (Master of Public Health).

Concurrent Degree Programs
Concurrent degree programs are available with the (1) Department of Urban Planning in the School of Public Policy and Social Research (Master of Arts in Urban Planning); (2) John E. Anderson Graduate School of Management (Master of Business Administration).

Fellowship applications for the academic year are due on January 8 prior to the Fall Quarter for which application is made. Prospective students may write to the department for departmental brochures.

Areas of Study
Students are expected to develop and integrate two or three fields in Latin American studies, to be selected from the following: anthropology, art, economics, education, engineering, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the chosen fields must be a social science.

Course Requirements
Latin American Studies 205 is a core course required of all M.A. students, to be taken during the first Fall Quarter in residence.

All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance. Courses numbered in the 200- and 400-series are not applicable toward the M.A. degree. Graduate courses may be repeated unless they are of the lecture type.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the minimum five graduate courses required for the M.A. degree.

Comprehensive Examination Plan
A minimum of nine courses is required, to be distributed among three fields or disciplines on a 3-3-3 basis or among two fields on a 4-4 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

The examination requirement is fulfilled by the submission of three research papers written for at least two of the three fields included as part of the program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The papers are evaluated by a three-member faculty committee representing the degree candidate’s three fields or both fields if the candidate is doing only two fields. Two positive votes among the three-member faculty examination committee constitute a pass on the results. The committee evaluates the papers in the following terms: honor pass (unanimous vote), pass, pass subject to revision of one or more of the research papers, or fail (majority vote). If two of the three members of the committee request an oral examination based on the papers, the candidate may appeal. When papers are passed subject to revision, one member of the committee is assigned the responsibility of working with the student on the revision and determining when the paper has been satisfactorily revised. No reexaminations are permitted. The degree is awarded on recommendation of the faculty committee. Copies of the papers are filed in the Academic Programs Office of the Latin American Center.

Thesis Plan
Although students are generally expected to follow the M.A. comprehensive examination plan, in special cases they may be allowed to follow the M.A. thesis plan. Students must develop a carefully prepared proposal to be approved by the academic coordinator in consultation with the faculty committee chair. To be approved, the proposal must provide sound justification for the thesis plan, including provisions for funding any field research.

A minimum of 10 courses is required, consisting of a one-term core course and nine additional courses to be distributed on a 4-3-2 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

Once the thesis plan approval has been approved, students choose a three-member faculty thesis committee consisting of one professor from each of three disciplines, one of whom has already agreed to serve as chair. The thesis committee works closely with students in the development, writing, and revision of the thesis and is responsible for reading, evaluating, and approving the drafts and final version of the thesis, ensuring thereby that it meets University standards of scholarship. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the quarter before graduation, students must file for advancement to candidacy with the Graduate Division.

Latin American Studies

Lower Division Course
99. Introduction to Latin American Problems. (4) Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses
197. Interdisciplinary Topics in Latin American Studies. (4) Advanced interdisciplinary course for juniors/seniors. May be repeated for credit with topical change.

M197A. Introduction to Caribbean Literature. (Same as Spanish M197A.) Lecture, two hours; discussion, two hours. Interdisciplinary introduction to literature of French, Spanish, and English Caribbean.

199. Special Studies in Latin American Studies (4 or 6). Limited to juniors/seniors. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

Graduate Courses
M200. Latin American Research Resources. (4) (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

205. Latin Americanist Scholarship. (4) Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

M250A. Indians of South America. (4) (Same as Anthropology M272.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

250B. Interdisciplinary Seminar: Latin American Studies. (4) Seminar, three hours. Problem-oriented seminar on critical areas stressed in University’s cooperative programs in Latin America.
Approved Graduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America. Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

Fine Arts

Art History
*201. Topics in Historiography of Art History
C218A. Pre-Columbian Art of Mexico
C218B. Pre-Columbian Art of the Maya
C218C. Pre-Columbian Art of the Andes
C218D. Aztec Art
219B. Pre-Columbian Art
220. Oceanic, Pre-Columbian, African, and Native North American Art
C254. Latin American Art of the 20th Century
596. Directed Individual Study or Research

Ethnomusicology
201A. Proseminar: Ethnomusicology
208. Seminar: Ethnomusicology
*596. Directed Individual Studies

Film and Television
276. Seminar: Non-Western Films — Mexican Cinema
*298A-298B. Special Studies in Film and Television
Theater
*210. Topics in World Theater and Drama

World Arts and Cultures
*280A-280B. Advanced Studies in Dance Ethnology

Languages

Indigenous Languages of the Americas (Linguistics)
*18A-18B-18C. Elementary Quechua

Portuguese (Spanish and Portuguese)
*1. Elementary Portuguese
2. Elementary Portuguese
25. Advanced Portuguese
102A-102B. Intensive Portuguese
*105. Advanced Composition and Style

Spanish (Spanish and Portuguese)
*1. Elementary Spanish
*13. Reading Course for Graduate Students
2. Elementary Spanish
2G. Reading Course for Graduate Students
3. Elementary Spanish
4. Intermediate Spanish
5. Intermediate Spanish
25. Advanced Spanish and Composition
*105. Spanish Composition

Course List

Literature

Portuguese (Spanish and Portuguese)
C231. Colonial Brazilian Literature and Culture
C232. 19th-Century Brazilian Literature and Culture
C233. Machado de Assis
C234. Brazilian Modernism
C235. 20th-Century Brazilian Literature
M249. Folk Literature of the Spanish and Portuguese Worlds
254. Studies in Early Brazilian Literature
255. Studies in Modern Brazilian Literature

Spanish (Spanish and Portuguese)
237. Literature of the Spanish Conquest
238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature
239. Romanticism and Realism in Spanish-American Literature
240. Major Currents in Modern Spanish-American Literature
241A-241B. Contemporary Spanish-American Short Story
243A-243B. Contemporary Spanish-American Poetry
244A-244B. Contemporary Spanish-American Novel
245. Contemporary Spanish-American Essay
246. Contemporary Spanish-American Drama
M249. Folk Literature of the Spanish and Portuguese Worlds
277A-277B. Studies in Colonial Spanish-American Literature
278A-278B. Studies in 19th-Century Spanish-American Literature
280A-280B. Studies in Contemporary Spanish-American Literature
*M286A-M286B. Studies in Hispanic Folk Literature
290. Special Topics: Latin American Literature

Professional

Community Health Sciences
200. Global Health Problems
210. Community Health Sciences
M216. Qualitative Research Methodology
*231. Maternal and Child Nutrition
M232. Determinants of Health
M239. Race and Ethnicity as a Concept in Practice and Research
282. Communication in Health Promotion and Education

Education
*C203. Educational Anthropology
*204B. Introduction to Comparative Education
*204C. Education and National Development
204D. Minority Education in Cross-Cultural Perspective
204E. International Efforts in Education
204F. Nonformal Education in Comparative Perspective
*C207. Politics of Education
*238. Cross-National Analysis of Higher Education
*252B. Seminar: Education and Social Change
*253A. Seminar: Current Problems in Comparative Education

Engineering
*596. Directed Individual or Tutorial Studies (selected from any of the engineering departments)

Epidemiology
220. Principles of Infectious Disease Epidemiology
227. AIDS: A Major Public Health Challenge
280. Parasitic Diseases and Global Health
290. Seminar: Epidemiology — Infectious and Tropical Disease
*291. Seminar: Epidemiology — Methodology
293. International HIV/AIDS Seminar

Health Services
*240. Health Care Issues in International Perspective

Information Studies
*207. International Issues and Comparative Research in Library and Information Science
*223. Literature of the Social Sciences
*224. Literature of the Humanities and Fine Arts
M225. Latin American Research Resources
*596. Directed Individual Study or Research

Law
*270. International Trade Law
*271. International Business Transactions

Management
*205A. International Business Economics
*205B. Comparative Market Structure and Competition
209. Selected Topics in Business Economics
*234A. International Financial Markets
*234B. Financial Management of Multinational Corporations

381 / Latin American Studies
223. Seminar: Humid Tropics

Law / 382
Scope and Objectives

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the United States. The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Professional Study

Juris Doctor Degree

Admission

Students beginning their professional work are admitted only for the Fall Semester. They must have received a bachelor’s degree from a university or college of approved standing before beginning work in the school and are required to take the Law School Admission Test (LSAT).

The school seeks to admit students of outstanding intellectual ability who bring a wide range of backgrounds, experiences, and perspectives to the classroom and the legal profession. The faculty has concluded that the quality of the education of students is affected in significant ways by the presence of vital diverse viewpoints; students of all backgrounds select UCLA in significant part because of the school’s outstanding achievement in creating a highly diverse educational environment.

In evaluating applicants the school places substantial weight on traditional measures of academic ability, namely grades and LSAT scores, and recognizes that other factors and attributes contribute greatly to people’s ability to succeed as law students and lawyers. When assessing academic promise and achievement, an applicant’s entire file is considered, including letters of recommendation, whether economic, physical, or other challenges have been overcome, scholarly achievements such as graduate study, awards, or publications, and the rigor of the undergraduate educational program.

In addition, the school considers attributes that may contribute to assembling a diverse class, placing special emphasis on socioeconomic disadvantage. Also evaluated are work experience and career achievement, community or public service, career goals (with particular attention to the likelihood of applicants representing underrepresented communities), evidence of and potential for leadership, language ability, unusual life experiences, and any other factors (except those deemed inadmissible by The Regents or by other applicable law) that indicate applicants may significantly diversify the student body or make a distinctive contribution to the school or the legal profession.

UCLA has as one of its central purposes the training of attorneys who attain high levels of professional excellence and integrity and who exercise civic responsibility in myriad ways over long careers.

Detailed information about the academic programs offered by the School of Law, course titles and descriptions, fees, and the semester system calendar by which it operates are available in the Bulletin of the UCLA School of Law or from the School of Law website given at the beginning of this listing.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing of courses is not permitted.

Attendance and Grades

The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. Additionally, the first-year required course in lawyering skills provides students the opportunity to explore the relationship between legal analysis and lawyering tasks such as legal writing, oral advocacy, research, and client interviewing and counseling.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study. All of the courses in the second- and third-year curriculum are elective, with the exception of the legal profession requirement which is a requisite for graduation.
Concurrent Degree Programs

The School of Law offers five concurrent degree programs that allows students to fulfill the requirements of the J.D. and another graduate degree simultaneously. Students may also design a tailored program from other disciplines in UCLA’s curriculum or from another high-quality institution, but must arrange this in consultation with the School of Law and the other program selected. Students interested in pursuing a joint degree must apply simultaneously to both schools.

M.B.A./J.D.

The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is desired. Examples of such areas include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years.

M.A. Urban Planning/J.D.

The School of Law and the Department of Urban Planning in the School of Public Policy and Social Research offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

M.A. American Indian Studies/J.D.

The School of Law and the American Indian Studies Interdepartmental Program offer a concurrent plan of study over four years leading to both a J.D. and an M.A. This integrated program is designed to produce law graduates with a rich understanding of tribal cultures that expands their knowledge, facilitates their practice in the field of Indian law, and enhances their service to Indian nations. Legal study includes relevant tribal, U.S., and international law. Courses in American Indian studies address the diverse histories, world views, values, languages, and practices of North American tribes.

M.S.W./J.D.

The School of Law and the Department of Social Welfare in the School of Public Policy and Social Research offer a concurrent plan of study over four years leading to both a J.D. and an M.S.W. This integrated plan provides preparation for lawyers who want to focus on social welfare law and programs. Social workers interested in legal issues related to social welfare policy would also benefit from this preparation.

Education Program/J.D.

The School of Law and the Department of Education offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on its completion. This program currently is not accepting applicants.

Master of Laws Degree

The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact Professor Joel Handler, LL.M. Program, School of Law, 1242 Law, UCLA, Box 951476, Los Angeles, CA 90095-1476, for further information.

Law

Lower Division Course

88. Lower Division Seminar: Special Topics in Law. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in law approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Vernon Rosario, M.D., Ph.D.

Adjunct Assistant Professor

Carol Hodgson, Ph.D. (Medicine)

Scope and Objectives

Although lesbian, gay, bisexual, and transgender studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to “cure” the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato’s Symposium looked back to Achilles and Patroclus; women-loving-women of the nineteenth century remembered Sappho; an inmate of a New York prison interviewed in the early 1920s was able to recite a long list of famous lesbians and gay men.

After the birth of the modern gay liberation movement in 1969, this underground knowledge came out of the closet and found a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities. This challenge led to a dramatic increase in research on same-sex desire, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, bisexual, and transgender studies, which, over the last decade, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, bisexual, and transgender studies is usually on minority sexualities and genders, it is impossible
to study them in any meaningful way without raising questions about sexuality and gender in general. And those questions cannot be responsibly answered without considering class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, bisexual, and transgender studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality, gender, and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, bisexual, and transgender studies is the site of some of the most exciting work being done today on the relation of culture and sexuality.

First offered in Fall Quarter 1997, UCLA's minor in Lesbian, Gay, Bisexual, and Transgender Studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course in each of the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality and gender. They should be acquainted with some of the many different ways sexuality and gender have been organized in the past and are organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual and gender diversity of the world in which they live and of the complex ways in which sexuality and gender intersect with other categories of identity and practice.

Undergraduate Study

Lesbian, Gay, Bisexual, and Transgender Studies Minor

To enter the Lesbian, Gay, Bisexual, and Transgender Studies minor, students must have an overall grade-point average of 2.0 or better. Successful completion of the minor indicates on the transcript and diploma.

Lesbian, Gay, Bisexual, and Transgender Studies

Upper Division Courses

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (4) (Formerly numbered M14.) (Same as Women's Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Study of Sexual and Gender Orientation. (4) (Same as Women's Studies M115.) Lecture/discussion, three hours. Requisite: M114 or Women's Studies 10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit.

M116. Sexuality and the City: Queer Los Angeles. (4) (Same as Women's Studies M116.) Lecture, three hours. Requisite: course M114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles.

M133. Chicana Lesbian Literature. (4) (Same as Chicana and Chicano Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of familia in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana Chicano studies.

M134. Cultural Construction of Gender and Sexuality: Homosexualities. (4) (Same as Anthropology M134.) Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

L137. Gay and Lesbian Perspectives in Pop Music. (4) (Same as Music History M137.) Lecture, four hours. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

M167. Contested Sexualities. (4) (Same as Sociology M167 and Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

196. Senior Internship Seminar: Lesbian, Gay, Bisexual, and Transgender Studies. (4) Seminar, three hours. Preparation: completion of four courses toward the minor. Requisite: course M114. Limited to seniors. Internship in a lesbian, gay, bisexual, or transgender community organization coupled with a weekly seminar. Consideration of theoretical and political issues in such work and relation of those issues to ideas explored in minor courses already taken.

197. Selected Topics in Lesbian, Gay, Bisexual, and Transgender Studies. (4) Study of selected topics in lesbian, gay, bisexual, and transgender studies. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor.

197D. Special Topics in Lesbian and Gay Literature. (4) (Same as English M197D.) Preparation: satisfaction of English Composition requirement. Variable specialized studies course in lesbian and gay literature. Topics focus on a particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

199. Special Studies in Lesbian, Gay, Bisexual, and Transgender Studies. (2 to 4) Requisite: course M114. Directed program of independent study or research on a specific topic within lesbian, gay, bisexual, and transgender studies.

Life Sciences

College of Letters and Science

UCLA
2305 Life Sciences
Box 951606
Los Angeles, CA 90095-1606
(310) 825-6614
http://www.lifesci.ucla.edu/lscareer

Scope and Objectives

Students who wish to study life sciences have a choice of nine majors, all of which lead to a Bachelor of Science degree: Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology (Organismic Biology, Ecology, and Evolution Department), Microbiology and Molecular Genetics (Microbiology and Molecular Genetics Department), Molecular, Cell, and Developmental Biology (Molecular, Cell, and Developmental Biology Department), Neuroscience (Neuroscience Interdepartmental Program), Physiological Science (Physiological Science Department), and Psychology (Psychology Department). This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of
these majors require a common core of introductory courses which forms the foundation for any study of life sciences and which is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the life sciences core curriculum, see the website at http://www.lifesci.ucla.edu/lscore/index.html.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the nine majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C- or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2; one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

## Life Sciences

### Lower Division Courses

1. **Evolution, Ecology, and Biodiversity.** (4) Lecture, three hours; demonstration, two hours; outside study, seven hours. Not open for credit to students with credit for former Biology 5 or 6. Introduction to principles and mechanisms of evolution by natural selection, population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships. Letter grading.

2. **Cells, Tissues, and Organs.** (5) Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Requisite: Chemistry 14A or 20A or former course 10A. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Letter grading.

3. **Introduction to Molecular Biology.** (5) Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Enforced requisites: course 2, Chemistry 14C or 30 or former course 10D. Introduction to basic principles of biochemistry and molecular biology. Letter grading.

4. **Genetics.** (4) Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Enforced requisite: course 2, Chemistry 14C or 30 or former course 10D. Honors course parallel to course 3, but at a more advanced level. Letter grading.

5. **Introduction to Molecular Biology (Honors).** (5) Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced requisites: course 2, Chemistry 14C or 30 or former course 10D. Honors course parallel to course 3.

6. **Heredity and Chromosomes.** (4) Lecture, three hours; discussion, two hours. Introduction to heredity and the inheritance of traits in organisms. Letter grading.

7. **Population, Evolution, and Genetics.** (4) Lecture, three hours; discussion, two hours. Introduction to the study of population genetics and evolutionary genetics. Letter grading.

8. **Introduction to Molecular Genetics.** (4) Lecture, three hours; discussion, two hours; outside study, one hour. Introduction to the molecular basis of genetic variation, including the replication, repair, and recombination of DNA. Letter grading.

9. **Advanced Molecular Genetics.** (4) Lecture, three hours; discussion, two hours; outside study, one hour. Advanced topics in molecular genetics, including the mechanisms of DNA replication, repair, and recombination. Letter grading.

10. **Mathematical Genetics.** (4) Lecture, three hours; discussion, two hours. Introduction to the mathematical modeling of genetic systems. Letter grading.

## Upper Division Course

194. **Teaching Practicum in Life Sciences.** (2 or 4) Discussion, two hours; laboratory, three hours. Training and supervised practicum for undergraduates in teaching life sciences courses. Students serve as apprentice teaching assistants and assist in teaching laboratories and sections, in preparation, set up, and breaking down of materials for laboratory component, and in continued development of course material. Letter grading.

### Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs...
Preparation for the Major
Required: Linguistics 20, two of the following: Philosophy 31, Psychology 10, 100A, a cultural anthropology course; completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages. Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are requisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

The Major
Required: A minimum of 13 upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as follows: Anthropology 143, English 121, 122, Philosophy 127A, 127B, 172, Psychology 120, 124E, 133C, or upper division courses in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an adviser.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

Linguistics and Anthropology B.A.
Preparation for the Major
Required: Linguistics 20, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as follows: Anthropology 143, English 121, 122, Philosophy 127A, 127B, 172, Psychology 120, 124E, 133C, or upper division courses in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an adviser.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

Linguistics and East Asian Languages and Cultures B.A.
Preparation for the Major
Required: Completion of the sixth term in either Chinese, Japanese, or Korean; Linguistics 20, Philosophy 31; one cultural anthropology course; either Chinese 50, Japanese 50, or Korean 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major
Required: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A-100B, CM122, 140A-140B-140C, 149; for the modern Japanese track: Japanese 100A-100B-100C, 120, CM122, CM123 or CM127, 130B; for the classical Chinese track: Chinese 110A-110B-110C, four courses from 140A, 140B, 140C, 165, 170, 195; for the modern Chinese track: Chinese 100A-100B-100C, 101A, 101B, 130A, 130B; for the Korean track: Korean 100A-100B-100C, CM120, three courses from 101A, 101B, 101C, CM127, 130A, 130B.

Linguistics and English B.A.
Preparation for the Major
Required: Linguistics 20, English Composition 3, English 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major
Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, English 121, 122 or Applied Linguistics and Teaching English as a Second Language C116, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Linguistics and French B.A.
Preparation for the Major
Required: Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major
Required: Fifteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, French 100, 101, 102, 103, 105, 107, Psychology 120, 124E, 133C, or upper division courses in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an adviser.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.
Linguistics and Italian B.A.

Preparation for the Major
Required: Linguistics 20, Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third term in one other foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

The Major
Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

Linguistics and Philosophy B.A.

Preparation for the Major
Required: Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major
Required: Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 165B (or 200B with a grade of A in 120B and consent of instructor), three upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

Linguistics and Psychology B.A.

Preparation for the Major
Required: Linguistics 20, Psychology 10, 85, 100A, 100B, completion of the sixth term in one foreign language and the third term in a second foreign language. Program in Computing 10A is strongly recommended.

The Major
Required: Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, C130, C132, two upper division electives in linguistics, Psychology 120, 121, 133B, 133E, and two electives to be selected from 115, 116, M117C, 118, M119L, 124A, 124B, 124C, 124E, 130, 133C, 133E, 133F, 133G, M137J, 186A, 186B. Linguistics C135 and 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) are strongly recommended.

Linguistics and Scandinavian Languages B.A.

Preparation for the Major
Required: Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major
Required: Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, two courses from Scandinavian 105, 110, 115 (or one of these courses twice), 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Linguistics and Spanish B.A.

Preparation for the Major
Required: Linguistics 20, Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major
Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two additional upper division courses in linguistics (preferably C130 and 170), Spanish 100A-100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

African Languages B.A.

Preparation for the Major
Required: Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major
Required: A minimum of 13 upper division courses, including three courses in an African language; African Languages M190, Linguistics 103; two courses from Film and Television 106C, Folklore M155, French 121A, Theater 102E, or one or more special four-unit African Languages 199 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology 136A, 136B, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Political Science 151A, 151B, 151C, Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Computing Specialization

Students in any of the linguistics majors (except Linguistics and Computer Science) may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. Students graduate with a bachelor’s degree in their major and a specialization in Computing.

Linguistics Minor

The Linguistics minor is designed for students where training in linguistic analysis could be an enhancement to their major programs and to students who are interested in language(s) but do not have time in their undergraduate programs to pursue multiquarter language sequences. In addition, the minor provides students with a way to design “custom” joint degrees with linguistics where the Linguistics Department does not have an existing joint degree program combining linguistics and another field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Course (four units): Linguistics 20.

Required Upper Division Courses (24 to 26 units): Linguistics 103, 120A, 120B, and three elective courses, of which at least two must be selected from 104 through C185B.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.
**Master’s Degree**

The Department of Linguistics offers the Master of Arts (M.A.) degree in Linguistics.

**Admission**

Students are normally admitted to begin residence for the M.A. program in the Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and immediate and long-range goals in the field. Three scholars under whom the applicants have studied should submit letters to the department about the applicant’s qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted. There is no minimum score requirement. A copy of some research paper or other piece of writing in linguistics or a closely related field should also be submitted.

While not required for admission, Linguistics 103, 110, 120A, 120B, 165A, 165B are requisite to graduate courses in the corresponding areas. The time of admission, applicants are notified which, if any, of the above courses must be taken or audited. However, any question of whether courses taken elsewhere are equivalent to the above courses must be discussed with the adviser.

Prospective students may request an information brochure from the administrative assistant in the department.

**Areas of Study**

Consult the department.

**Course Requirements**

The Master of Arts degree requires the completion, with a B average or better, of nine graduate courses in linguistics. All students are required to take Linguistics 200A, 200B, 201, 202, and 206. The remaining four courses must be chosen from Linguistics 203 through 218 or C232 through C235. All first-year graduate students must take courses 411A-411B, and all second-year students must take course 444.

The following undergraduate courses or the equivalent are requisite to graduate courses in the corresponding areas: Linguistics 103, 110, 120A, 120B, 165A, 165B. Course 103, or an examination in practical phonetics, must be passed with a grade of B or better as a requisite to Linguistics 210A, a requisite course for the Ph.D. that may be taken at the pre-M.A. level. A proficiency examination in elementary logic, which may be waived on the basis of appropriate coursework, is requisite to course 206.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

**Comprehensive Examination Plan**

After completing the required courses and the foreign language examination, students must pass a comprehensive examination administered by a committee of the faculty. The committee, consisting of four members, is appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

**Thesis Plan**

After completing the required courses and the foreign language examination, if this plan is selected, students submit a thesis based on original research to a thesis committee for approval. If students intend to proceed to the Ph.D., this plan must be adopted.

For students wishing to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the quarter.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the quarter during which students expect to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

**Doctoral Degree**

**Admission**

General admission requirements for the program leading to the Ph.D. degree in Linguistics are the same as those listed for the M.A. If earlier graduate work was done at UCLA, admission into the Ph.D. program is considered on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty’s evaluation of the quality of the M.A. thesis and of overall work and promise.

If applicants have already received an M.A. in Linguistics from another department or institution, all the requirements expected of an M.A. candidate, including the coursework, must be fulfilled unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) a master’s thesis written at another institution or department may be submitted or (2) if a thesis was not written elsewhere, a paper equal in depth and scope to a thesis may be submitted. In either case an evaluation committee is appointed. The committee makes a recommendation to the entire faculty, which then accesses the applicant’s qualifications for admission into the Ph.D. program.

**Examinations**

**Written and Oral Qualifying Examinations**

Prospective students may request an information brochure from the administrative assistant in the department.

**Upper Division Courses**

**Major Fields or Subdisciplines**

Students may specialize in syntax, semantics, phonology, phonetics, language change, typology, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

**Course Requirements**

Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and eight units in an area distinct from that of the student’s major area of concentration. The 36 units may not include course 275 (colloquium), any 300- or 400-level course, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, some of the results of the student’s research must be presented at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

**Written and Oral Qualifying Examinations**

In order to be advanced to candidacy, students are required to prepare two substantive research papers in different areas or fields of linguistics. These papers are to be submitted to and approved by the guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy to the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination includes all the background necessary to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. Students are expected to take the examination and be advanced to candidacy no later than six quarters after being admitted to the doctoral program.

**Linguistics**

**Lower Division Courses**

1. **Introduction to Study of Language.** (4) Survey, for general undergraduates, of what is known about human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

2. **Language in the U.S.** (4) Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrival languages) and social and political aspects of American language use.

10. **Structure of English Words.** (4) Lecture, three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.
20. Introduction to Linguistics. (4) Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

88. Lower Division Seminar. (4) Seminar, three hours. Limited to freshmen. Variable topics; consult Schedule of Classes, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit. P/NP or letter grading.

99. Special Studies in Linguistics. (2 to 4) Supervised research or training. May be repeated for credit. P/NP or letter grading.

**Upper Division Courses**

103. Introduction to General Phonetics. (4) Lecture, four hours; discussion, one hour. Preparation: one prior linguistics course or course 20 concurrently. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena.

110. Introduction to Historical Linguistics. (4) Requisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.

C111. Intonation. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104/204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C211.

114. American Indian Linguistics. (4) Strongly recommended preparation: course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

M115. Survey of African Languages. (4) (Same as African Languages M190.) Requisite: course 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

120B. Syntax I. (4) Requisite: course 20. Course 120A is not required to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization.

125. Semantics. (4) Lecture, four hours; discussion, one hour. Requisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

127. Syntactic Typology and Universals. (4) Requisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed.

C130. Language Development. (4) Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives in language development. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C233.

C132. Language Processing. (4) Formerly numbered 133. Lecture, four hours; discussion/laboratory, one hour. Requisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inference, speech error models of sentence production, and computation of syntactic structure during production. Concurrently scheduled with course C232.

C135. Neurolinguistics. (4) Lecture, four hours; discussion, one hour. Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235.

140. Linguistics in Relation to Language Teaching. (4) Requisites: courses 120A, 120B. Aspects of linguistics in relation to teaching of language, with particular focus on special problems entailed in teaching non-European languages.

M146. Language in Culture. (4) (Same as Anthropology M140.) Lecture, three hours; discussion, one hour. Requisite: course 20 or Anthropology 33. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. P/NP or letter grading.

M150. Introduction to Indo-European Linguistics. (4) (Same as Indo-European Studies M150.) Preparation: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

160. Field Methods. (6) Discussion, four hours; individual or group sessions, one to two hours. Requisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

165A. Phonology II. (4) Lecture, four hours; discussion, one hour. Requisite: course 120A (undergraduate with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: au-tonomous plating and theory, interface of phonology and grammar.

165B. Syntax II. (4) Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantial universals in syntax, relation between syntax and semantics.

175. Linguistic Change in English. (4) Requisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax.

M176B. Structure of Japanese II. (4) (Same as Japanese CM123.) Lecture, three hours. Preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sequence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization.

177. Structure of Korean. (4) (Same as Korean CM120.) Lecture, three hours. Preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean.

C185A. Computational Linguistics I. (4) Requisites: courses 120B, C180. Program in Computing 10B. Recommended: course 165B or 200B. Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C209A.

C185B. Computational Linguistics II. (4) Requisite: course C185A/C209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B.

195. Senior Essay. (4) Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

196A. Honors Essay. (4) Preparation: 3.5 grade-point average. Requisite: course 165A/200A or 165B/ 200B (may be taken concurrently). Recommended: completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 196A is taken. Draft of extended piece of writing on a linguistic topic selected by the student is prepared under supervision of a faculty member. Consult professor in charge to enroll.

196B. Honors Essay. (2) Requisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.

197. Special Topics in Linguistics. (4) Requisite: course 1 or 20. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

199. Special Studies in Linguistics. (2 to 4) Requisites: courses 120A, 120B. May be repeated for credit.
Graduate Courses

200A. Phonological Theory I (4) Preparation: grad- 200B. Syntactic Theory I (4) Preparation: grad-
uate standing. A course 120A or equivalent course in phonology. Courses 200A and 201 form a two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress. Preparation: grade of B or better in course 103 or in examination on practical phonetics. Requisites: courses 200A, 200B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change.

210B. Field Methods II. (6) Requisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change.

211. Intonation. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 200, 103, 120A or 120B. Recommended: course 104/204. Survey of intonational theory for English and other languages with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C111.

212. Learnability Theory. (4) Requisite: course C180/C208. Survey of some of most significant re- results on capabilities of learners, given precise as- sumptions about their memory, time, and computa- tional power, and precise assumptions about informa- tion provided by the environment.

213A. Grammatical Development. (4) Requisite: courses 200A, 200B. Recommended: course C130/ C233. Survey of theoretical perspectives and contem- porary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

213C. Linguistic Processing. (4) Requisites: courses 210A, 200A, and/or course C132. Recommended: courses C132/ C232, 206. Survey of theoretical perspectives and contemporary empirical research in human process- ing of language (comprehension and/or production), with emphasis on syntactic processing, ambiguity resolution, effects of memory load, and relationship between grammar and processor.

214. Survey of Current Syntactic Theories. (4) Requisite: course 206. Survey of several current syntac- tics theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power.

215. Syntactic Typology. (4) Requisite: course 200B. Current results in word-order universals; genetic clas- sification of the world's languages; cross-language properties of specific construction types, including rela- tive clauses, passives, positive and negative confer- ence systems, agreement systems, deixis systems, and types of sentence complements.

216. Syntactic Theory III. (4) Requisite: course 206. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binary categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; com- plex quantifier structures.
251B. Topics in Phonetics and Phonology. (2) (Formerly numbered 251.) Lecture, four hours. Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 251A. May be repeated for credit. S/U grading.

252A. Topics in Syntax and Semantics. (4) (Formerly numbered 252.) Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. Meets with course 252B. May be repeated for credit.

252B. Topics in Syntax and Semantics. (2) (Formerly numbered 252.) Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be repeated for credit. S/U grading.

253A. Topics in Language Variation. (4) (Formerly numbered 253.) Requisite: course 110. Course 202 may be required. Specialized topics in language variation. Meets with course 253B. May be repeated for credit.

253B. Topics in Language Variation. (2) (Formerly numbered 253.) Requisite: course 110. Course 202 may be required. Specialized topics in language variation. Meets with course 253B. May be repeated for credit.

254A. Topics in Linguistics. (4) (Formerly numbered 254.) Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, 209, 209A, 209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. Meets with course 254B. May be repeated for credit.

254B. Topics in Linguistics. (2) (Formerly numbered 254.) Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, 209, 209A, 209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 254A. May be repeated for credit.

256A. Topics in Phonetics and Phonology II: Proseminar. (4) Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

256B. Topics in Phonetics and Phonology II: Proseminar. (2) Requisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

257A. Topics in Syntax and Semantics II: Proseminar. (4) Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

257B. Topics in Syntax and Semantics II: Proseminar. (2) Requisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

258A. Topics in Language Variation II: Proseminar. (4) Requisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit.

258B. Topics in Language Variation II: Proseminar. (2) Requisite: course 258A. Specialized topics in language variation. May be repeated for credit.

258C. Topics in Linguistics II: Proseminar. (4) Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, 209, 209A, 209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit.

259A. Topics in Linguistics II: Proseminar. (4) Requisites: courses 200B, 209A, 209B, 212, 213A, 214, 215, 216, or 218 may be applied. Specialized topics in linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

495. College Teaching of Linguistics. (2) Designed for graduate students. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalency but not toward any degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Studies. (1 to 8) Preparation: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis. (1 to 8) Preparation: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations. (1 to 8) Preparation: at least six graduate linguistics courses. May be taken only in terms which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation. (1 to 16) Preparation: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

African Languages

Lower Division Courses

1A-1B-1C. Elementary Swahili. (4-4-4) Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania.

2A-2B-2C. Intermediate Swahili. (4-4-4) Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C.

7A-7B-7C. Elementary Zulu. (4-4-4) Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

8A-8B-8C. Intermediate Zulu. (4-4-4) Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C.

11A-11B-11C. Elementary Yoruba. (4-4-4) Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of western Nigeria.

12A-12B-12C. Intermediate Yoruba. (4-4-4) Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C.

15. Intensive Elementary Swahili. (12) Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 1A-1B-1C) in Swahili, major language of East Africa, particularly Tanzania.

17. Intensive Elementary Zulu. (12) Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A-7B-7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.
18. Intensive Intermediate Zulu. (12) Lecture, 20 hours (eight weeks). Enforced requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A-8B-8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

31A-31B-31C. Elementary Bambara. (4-4-4) Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects.

32A-32B-32C. Intermediate Bambara. (4-4-4) Enforced requisite: course 32A is enforced requisite to 32B, which is enforced requisite to 32C.

41A-41B-41C. Elementary Hausa. (4-4-4) Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of northern Nigeria and adjacent areas.

42A-42B-42C. Intermediate Hausa. (4-4-4) Enforced requisite: course 42B is enforced requisite to 42C.

51A-51B-51C. Elementary Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51B. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

61A-61B-61C. Elementary Wolof. (4-4-4) Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia.

62A-62B-62C. Intermediate Wolof. (4-4-4) Enforced requisite: course 61C is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

97. Elementary and Intermediate Studies in African Languages. (1 to 6) Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa.

Upper Division Courses

103A-103B-103C. Advanced Swahili. (4-4-4) Requisite: course 2C. Course 103A is requisite to 103B, which is requisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili.

109A-109B-109C. Advanced Zulu. (4-4-4) Lecture, five hours; outside study, seven hours. Requisite: course 9C. Course 109A is requisite to 109B, which is requisite to 109C. Readings in Zulu literature and the contemporary press. Discussions mainly in Zulu.

123A-123B-123C. Advanced Yoruba. (4-4-4) Requisite: course 12C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

133A-133B-133C. Advanced Arabic. (4-4-4) Requisite: course 133D. Course 133A is requisite to 133B, which is requisite to 133C. Readings in Arabic literature and the contemporary press. Discussions mainly in Arabic.

134A-134B-143C. Advanced Hausa. (4-4-4) Requisite: course 1C. Course 134A is requisite to 134B, which is requisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa.

153A-153B-153C. Advanced Amharic. (4-4-4) Lecture, five hours (15 hours for intensive course). Requisite: course 52C. Course 153A is requisite to 153B, which is requisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

M190. Survey of African Languages. (4) (Same as Linguistics M115.) Requisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

199. Special Studies in African Languages. (1 to 6) Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

Graduate Courses

202A-202B-202C. Comparative Bantu. (4-4-4) Requisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C. Investigation of relationships among the Bantu languages; external and internal relationships of Bantu.

596. Directed Studies. (1 to 8) Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Indigenous Languages of the Americas

Lower Division Courses

17. Intensive Elementary Quechua. (12) Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 1A-1B-1C. Language of the Incas, and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

18A-18B-18C. Elementary Quechua. (4-4-4) Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

Upper Division Courses

119A-119B-119C. Advanced Quechua. (4-4-4) Requisite: course 18C. Course 119A is requisite to 119B, which is requisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua.

Graduate Course

596. Directed Studies in Quechua. (1 to 8) Requisites: courses 119A-119B-119C. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

256A-256B. Studies in Spanish Linguistics
257. Studies in Dialectology

Turkic Languages (Near Eastern Languages)
230A-230B-230C. Historical and Comparative Survey of Turkic Languages

Christopher S. Tang, Ph.D., Chair
Christopher Erickson, Ph.D., Vice Chair
William Broesamle, M.B.A., Senior Associate Dean
John J. McDonough, D.B.A., Senior Associate Dean
Steven A. Lippman, Ph.D., Vice Dean
William G. Ouchi, D.Litt., Ph.D., Vice Dean
Stacey Dunn, M.B.A, Associate Dean
Sue Johnson, Associate Dean
Jason L. Frand, Ph.D., Assistant Dean
Eric Mokover, M.B.A, Assistant Dean

Professors
Robert B. Andrews, Ph.D. (Operations and Technology Management)
Michael J. Brennan, Ph.D. (Finance; Goldyne and Irwin Hearsh Professor of Money and Banking)
John W. Buckley, Ph.D. (Accounting; Ernst and Young Professor of Accounting)
Lee G. Cooper, Ph.D. (Marketing)
Bruce L. Miller, Ph.D. (Human Resources/Organizational Behavior)
Michael R. Darby, Ph.D. (Business Economics; Warren C. Cordner Professor of Money and Financial Markets)
José de la Torre, D.B.A. (Strategy and Organization)
Sebastian Edwards, Ph.D. (Business Economics; Henry Ford II Professor of International Management)
Donald Elenkoff, Ph.D. (Decision Sciences, Operations and Technology Management)
Eric G. Flamholtz, Ph.D. (Accounting, Human Resources/Organizational Behavior)
Arthur M. Geoffrion, Ph.D. (Decision Sciences; James A. Collins Professor of Management)
Martin Greenberger, Ph.D. (Information Systems; IBM Professor of Computers and Information Systems)
Mark S. Grinblatt, Ph.D. (Finance)
Dominique M. Hanssens, Ph.D. (Marketing)
Patricia J. Hughes, Ph.D. (Accounting)
Sanford M. Jacoby, Ph.D. (Human Resources/Organizational Behavior)
Uday S. Karmarkar, Ph.D. (Operations and Technology Management; Times Mirror Professor of Management Strategy and Policy)
Larry J. Kimbrell, Ph.D. (Business Economics)
Archie Kleinfeld, Ph.D. (Human Resources/Organizational Behavior)
Edward E. Learner, Ph.D. (Business Economics; Charles H. Medley Professor of Management)
David Lewin, Ph.D. (Human Resources/Organizational Behavior; Neil Jacoby Professor of Management)
Benett P. Lientz, Ph.D. (Information Systems)
Steven A. Lippman, Ph.D. (Decision Sciences; George Robbins Professor of Management)
Francis A. Longstaff, Ph.D. (Finance)
James B. MacQueen, Ph.D. (Decision Sciences)
John W. Mamer, Ph.D. (Decision Sciences)
John J. McDonough, D.B.A. (Human Resources/Organizational Behavior, Accounting)
Bill McKeelvy, Ph.D. (Strategy and Organization)
Bruce L. Miller, Ph.D. (Accounting)
Daniel J.B. Mitchell, Ph.D. (Human Resources/Organizational Behavior; Ho-Su Wu Professor of Management)
Donald G. Morrison, Ph.D. (Marketing; William E. Leonhard Professor of Management)
William G. Ouchi, D.Litt., Ph.D. (Strategy and Organization; Sanford and Betty SigoiOFF Professor of Corporate Renewal)
William P. Pierskalla, Ph.D. (Operations and Technology Management; John E. Anderson Professor of Management)
Anthony P. Raiha, Ph.D. (Human Resources/Organizational Behavior)
Richard W. Roll, Ph.D. (Finance; Allstate Professor of Insurance and Finance)
Richard P. Rumelt, D.B.A. (Strategy and Organization; Harry and Elsa Kunin Professor of Business and Society)
Rakesh K. Sarin, Ph.D. (Operations and Technology Management; Paine Professor of Management)
Hans Schöfflhammer, D.B.A. (Strategy and Organization)
Eduardo S. Schwartz, Ph.D. (Finance; California Professor of Real Estate and Land Economics)
Carol A. Scott, Ph.D. (Marketing)
E. Burton Swanson, Ph.D. (Information Systems)
Christopher S. Tang, Ph.D. (Decision Sciences, Operations and Technology Management)
Walter N. Torous, Ph.D. (Finance)
Ivo J. Welch, Ph.D. (Finance)
J. Fred Weston, Ph.D. (Business Economics, Finance; Warren C. Cordner Professor Emeritus of Money and Financial Markets)
Harold M. Williams, J.D.

Professors Emeriti
William F. Brown, Ph.D.
Elwood S. Buffa, Ph.D.
Joseph D. Carrabino, Ph.D., P.E.
Fred E. Case, D.B.A.
David K. Esteman, Ph.D.
Walter A. Fogel, Ph.D.
Glen W. Graves, Ph.D.
Alfred E. Hofflander, Ph.D.
James R. Jackson, Ph.D.
Raymond J. Jessen, Ph.D.
Harold H. Kassarjian, Ph.D.
J. Clayburn La Force, Ph.D., Dean Emeritus
Robert Hal Mason, Ph.D.
Fred Massarik, Ph.D.
Frederic Meyers, Ph.D.
Frank G. Mittlebach, M.A.
Rosser T. Nelson, Ph.D.
Alfred Nicols, Ph.D.
Frank E. Norton, Ph.D.
John P. Sheldon, Ph.D.
R. Clay Sprowls, Ph.D.
George A. Steiner, Ph.D., Litt.D.
Robert Tannenbaum, Ph.D.
Robert M. Williams, Ph.D.
James O. Wilson, Ph.D. (James A. Collins Professor Emeritus of Management)

Associate Professors
Reza H. Ahmadi, Ph.D. (Operations and Technology Management)
Theodore A. Andersen, Ph.D. (Finance)
Sushil Bikchandani, Ph.D. (Decision Sciences)
Randolph E. Bucklin, Ph.D. (Marketing)
Bhagwan Chowdhrty, Ph.D. (Finance)
Christopher Erickson, Ph.D. (Human Resources/Organizational Behavior)
Connie J.G. Gersick, Ph.D. (Human Resources/Organizational Behavior)
Robert L. Geske, Ph.D. (Finance)
Richard A. Goodman, D.B.A. (Strategy and Organization)
Carla Hayn, Ph.D. (Accounting)
Barbara S. Lawrence, Ph.D. (Human Resources/Organizational Behavior Strategy and Organization)
Marvin B. Lieberman, Ph.D. (Strategy and Organization)
Alfred E. Osborne, Jr., Ph.D. (Business Economics)
Avanidhar Subrahmanyan, Ph.D. (Finance)

Assistant Professors
Jennifer L. Aaker, Ph.D. (Marketing)
David Aboody, Ph.D. (Accounting)
David R. Bell, Ph.D. (Marketing)
Shilomo Benartzi, Ph.D. (Accounting)
Antonio E. Bernardo, Ph.D. (Finance)
Pradeep Bhardwaj, Ph.D. (Operations and Technology Management)
Eric D. Darr, Ph.D. (Strategy and Organization)
Aimee L. Drolet, Ph.D. (Marketing)
Gavan J. Fitzsimons (Marketing)
Stephen C. Hansen, Ph.D. (Accounting)
Deborah D. Heisley, Ph.D. (Marketing)
Teck Hua Ho, Ph.D. (Operations and Technology Management)
Matthias Kahl, Ph.D. (Finance)
Olivier Ledoit, Ph.D. (Finance)
Aimee L. Drolet, Ph.D. (Marketing)
Walter N. Torous, Ph.D. (Finance)
Ivo J. Welch, Ph.D. (Finance)
J. Fred Weston, Ph.D. (Business Economics, Finance; Warren C. Cordner Professor Emeritus of Money and Financial Markets)
Harold M. Williams, J.D.

Bruce Willison, Ph.D., Dean
Transfer credit for any of the courses is subject to department approval and is considered only for requisite coursework. Decisions on admission to the minor are made by the Anderson School. The requisite grade-point average and completion of the preparation courses do not guarantee admission to the program.

Required Lower Division Courses (28 units):
Economics 1, 2, M40 (or Statistics 10 as a substitute for course M40); Management 1A-1B; Mathematics 3A, 3B (higher-level courses and/or Advanced Placement Test credit may be substituted).

Required Upper Division Courses (28 units):

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The John E. Anderson Graduate School of Management offers the Master of Science (M.S.) degree in Management and the Master of Business Administration (M.B.A.) degree, as well as concurrent M.B.A. degrees with other programs. In addition, the school offers the Executive M.B.A. Program and the M.B.A. for the Fully Employed (FEMBA).

Master of Business Administration
Admission
Although no specific undergraduate major is required for entrance, applicants should complete elementary algebra and differential calculus before entering the M.B.A. program. Applicants are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to Educational Testing Service, Box 966-R, Princeton, NJ 08541, (609) 771-7590. International applicants who do not hold degrees from universities or colleges where English is the primary language are required to take the Test of English as a Foreign Language (TOEFL). Inquiries can be addressed to (609) 951-1100.

The M.B.A. program application, which includes the application for admission to graduate status, is required. Admission is for the Fall Quarter only. Completed applications, with full documentation, must be filed directly with the John E. Anderson Graduate School of Management Office of Admissions by April 4. Early application is strongly advised.

Consideration is given to the academic record, score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and several written essays and letters of recommendation. Preference is given to those who have had full-time management-related work experience since completing the bachelor’s degree. Those few applicants admitted directly from a baccalaureate program may choose to work for up to three years before entering graduate school. No other admission deferrals are granted.

Applications and information about the M.B.A. program are available from the M.B.A. Program Admissions Office, John E. Anderson Graduate School of Management, UCLA B201 Anderson Complex, Box 951481, Los Angeles, CA 90095-1481.

J.D./M.B.A.
The School of Law and the John E. Anderson Graduate School of Management offer a concurrent degree program which enables students to prepare for a career where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Application should be made to both schools simultaneously.

M.D./M.B.A.
The John E. Anderson Graduate School of Management and the School of Medicine offer a concurrent degree program which enables students to prepare for a career where medicine and management overlap and where understanding of both fields is necessary. Examples of such areas include medical management at a hospital center and management of health care delivery. The program makes it possible to earn the M.D. and the M.B.A. in five academic years. Applications should be made to the M.B.A. program in the third year of medical school.

M.S. Computer Science/M.B.A.
The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Application materials should be requested separately from both schools.
M.L.I.S./M.B.A.
Jointly sponsored by the Department of Information Studies (Graduate School of Education and Information Studies) and the John E. Anderson Graduate School of Management, this three-year concurrent degree program is designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields. Application materials should be requested separately from both schools.

M.P.H./M.B.A.
The John E. Anderson Graduate School of Management and the School of Nursing offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges. Application materials should be requested separately from both schools.

M.A. Latin American Studies/M.B.A.
The John E. Anderson Graduate School of Management and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Application materials should be requested separately from both schools.

M.A. Urban Planning/M.B.A.
The John E. Anderson Graduate School of Management and the Department of Urban Planning (School of Public Policy and Social Research) offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service. Application materials should be requested separately from both schools.

M.S.N./M.B.A.
The John E. Anderson Graduate School of Management and the School of Nursing offer a three-year concurrent degree program designed for students who seek careers in hospital and nursing administration. By providing knowledge of both management and clinical care issues, the program prepares individuals for management positions in an increasingly complex environment. Application materials should be requested separately from both schools.

Areas of Study
Accounting; business economics; decision sciences; entertainment management; entrepreneurial studies; finance; human resources and organizational behavior; information systems; international business and comparative management; marketing; operations and technology management; strategy and organization; real estate.

Course Requirements
The three required elements of the M.B.A. program are the management core, the advanced electives, and the management field study. The management core courses teach the fundamental techniques and disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for one or more fields (typically two) of management work. The management field study allows an opportunity to apply knowledge gained in the program to strategic issues in real organizations.

Management Core. The management core consists of eight courses on subjects basic to the practice of management. These courses include one course on the management of human resources in organizations (Management 409) and seven courses in technical and functional fields (Management 402, 403, 405, 408, 410, 411, and 420).

Management Field Study: The two-term management field study project (Management 444A-444B) consists of teams of three to five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves as the basis for a comprehensive examination for members of the team. The field study is judged by standards applicable to professional management consulting.

Advanced Electives. These courses are chosen by students to focus on one or more fields of specialization within the broad realm of management. Eleven of these electives must be selected from management curriculum area or interdisciplinary studies courses. Management 404, 406, 407, and 412, formerly part of the management core, may be taken as advanced electives. Three electives may be selected from any University department, subject only to general University regulations. These free electives normally must be taken while enrolled in the program. They may support or complement the remainder of the program of study. A maximum of two four-unit Management 596 courses (independent studies) and one four-unit Management 454 course (internship) may be applied toward the 96-unit requirement. These courses count as free electives.

Comprehensive Examination Plan
The comprehensive examination requirement is fulfilled by completing the two-quarter core course in field studies.

Thesis Plan
None.

Executive M.B.A. Program
Admission
Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to study advanced management in a high quality educational environment while continuing to work full time in their professional roles. The program is limited to 60 participants with superior academic records and a minimum of eight to 10 years of work experience with five years at the management level.

Areas of Study
The emphasis is on general management training; increased competence in management specialties; management of international businesses; organizational and interpersonal skills; and sophisticated understanding of the integration of businesses and their environments.

Course Requirements
A total of 66 units of coursework toward the degree must be completed in residence in the Executive M.B.A. program at UCLA. Completion of the intensive 24-month course of study leads to a regular M.B.A. degree. First year required courses for Fall Quarter: Management 461, 463, 473A, and 474; Winter Quarter: Management 462, 464, and 468; Spring Quarter: Management 465, 467, 472 and 478. In the second year, the following courses are required: Fall Quarter: Management 466A, and 477; Winter Quarter: Management 466B, 470A, 470B, 476, or 478; Spring Quarter: Management 469, 470C, 470D, and 475. Four units of 596 coursework is applicable toward the degree course requirements.

Classes are held at the John E. Anderson Graduate School of Management on alternating weekends, all day Friday and Saturday, with three five-day, off-campus residential sessions at the beginning of the first year and at the middle and end of the second year. The final residential session is the culmination of an international field study and is held abroad. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, UCLA, A101F Anderson Complex, Box 951481, Los Angeles, CA 90095-1481.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.
Fully Employed M.B.A. Program

Admission
The M.B.A. for the Fully Employed (FEMBA) is designed for emerging managers with strong records of academic and professional achievement who wish to pursue an M.B.A. degree without leaving full-time employment. The program is limited to 125 participants with superior academic records and a minimum of four to six years of work and/or managerial experience. For further information and application, write to the Assistant Dean, Fully Employed M.B.A. Program, UCLA, A101 Anderson Complex, Box 951481, Los Angeles, CA 90095-1481.

Areas of Study
Consult the department.

Course Requirements
Students in the program choose one of two possible formats, with classes meeting either one afternoon per week (from 1:30 to 5 p.m.) and Saturday mornings (from 8:30 a.m. to noon) or all day Saturday (8:30 a.m. to noon and 1:30 to 5 p.m.). A regular M.B.A. degree is awarded on completion of 84 units which are typically completed in three years. The required units are a combination of specified core courses and advanced electives in finance, marketing, or general management.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Master of Science

Admission
All applicants to the program leading to the Master of Science degree in Management are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who do not hold a degree from an English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Three letters of recommendation must be submitted with the completed application. Program information and application materials may be obtained from the M.S./Ph.D. Programs Office, UCLA, CS24 Anderson Complex, Box 951481, Los Angeles, CA 90095-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 10.

Areas of Study
Decision sciences.

Course Requirements
Students entering the M.S. program are assumed to have taken calculus through differentiation and integration of several variables, two courses in probability and statistics, two quarters of computer programming, and a managerial core of courses in managerial accounting, managerial economics, and managerial finance (Management 403, 405, 408). These courses can be waived on the basis of previous coursework.

The specialization consists of the following five-course methodological core: Management 203A, 210A, 210B, 210C, 216A. The specialization also includes three elective courses that typically are supportive of the thesis, along with four units of Management 598. The elective courses may be methodological in nature or may relate to management science aspects of a functional field such as operations management, information systems, or finance. Courses from other departments may also be selected.

Comprehensive Examination Plan
None.

Thesis Plan
The thesis must be finished within one year after all required coursework is completed. A student lacking a strong prerequisite background nominates a thesis committee by the fifth quarter of study and presents a proposal for committee approval at the beginning of the sixth quarter.

Doctoral Degree

Admission
Information regarding admission to the program leading to the Ph.D. degree in Management is the same as that listed under the M.S. degree.

Major Fields or Subdisciplines
Accounting; business economics; decision sciences; finance; human resources and organization behavior; information systems; international business and comparative management studies; marketing; operations and technology management; policy and organization.

Course Requirements
Research Preparation Requirement. The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. Students are required to take five research courses which are not part of the major field area classes taught in the John E. Anderson Graduate School of Management. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than the Spring Quarter of the third year of study.

Breadth Requirement. The breadth requirement consists of eight courses which are clearly outside the major field area. Students should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field of research and teaching proficiency. Three of these courses may be waived by prior coursework from a previously earned master's degree. They must be completed before taking the oral qualifying examination.

There is no formal major field course requirement. In consultation with a major field adviser, a course of study is designed which prepares students to pass the major field examination.

Written and Oral Qualifying Examinations
Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of the Spring Quarter of the third year of study.

Students are required to present the substance of their dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, students are advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

Management

Lower Division Courses

88. Lower Division Seminar: Special Topics in Management, (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses
107. Business Communications, (4) Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/NP or letter grading.

122. Management Accounting. (4) Requisites: course 1B, Economics M40. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

123. Auditing. (4) Lecture, three hours. Requisite: course 120B. Comprehensive study of procedures used in verifying financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

125. Special Applications in Accounting. (4) Requisite: course 120B. Recommended: course 122. Designed for seniors. Use of "Strategic Management," a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line margin analysis, issuing debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/NP or letter grading.

127A. Tax Principles and Policy. (4) (Formerly numbered 127.) Requisite: course 1B. Study of fundamental income tax problems encountered by individuals and entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

127B. Corporate and Partnership Taxation. (4) Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

130A. Basic Managerial Finance. (4) Lecture, three hours. Requisites: course 120A or 120B, Economics M40. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

133. Investment Principles and Policies. (4) Lecture, three hours. Requisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

150. Elements of Industrial Relations. (4) Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industry.

175. Elements of Real Estate and Urban Land Economics. (4) Examination of business decision making as related to logistical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

182. Leadership Principles and Practice. (4) Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including leadership, lectures and "sensitivity training" laboratory.

197. Special Topics in Management. (4) Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

199. Special Studies in Management. (2 to 6) Discussion: three hours. Designed for juniors/seniors. Undergraduate individual investigation of selected research topic to be arranged with a faculty member. P/NP or letter grading.

Graduate Courses

201B. Econometrics and Business Forecasting. (4) Lecture, three hours. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

M202C. Growth, Science, and Technology. (4) (Formerly numbered 202C.) (Same as Policy Studies 281.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

205A. International Business Economics. (4) Requisite: course 405. International business environment, international economic institutions, national and regional trade policies and developments, trends in world markets, and international monetary problems; studied for their influence on organization and operation of the international corporation.

205B. Comparative Market Structure and Competition. (4) Requisite: course 205A. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.

207. Resource Administration of Nonmarket Activities. (4) Seminar, three hours. Requisite: course 405. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

208. Public Services and Private Functions. (4) Requisites: courses 405, 406. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

209. Selected Topics in Business Economics. (4) Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

210A. Mathematical Programming. (4) Discussion, three hours. Preparation: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of areas.

211A. Nonlinear Mathematical Programming. (4) Requisites: course 210A, Mathematics 32A. Theory, methods, and application of optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and computational experience.

211B. Large-Scale Mathematical Programming. (4) Requisite: course 210A. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidimensional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints.

212A. Decision Sciences Models I. (4) Requisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. S/U or letter grading.

212B. Decision Sciences Models II. (4) Requisites: course 212A, Mathematics 32A. Broad survey of non-linear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

212C. Decision Sciences Models III. (4) Requisites: courses 212A, 212B. In-depth reviews of actual decision sciences applications. Emphasis on professional skills needed for successful practical applications. S/U or letter grading.

213A. Intermediate Probability and Statistics. (4) Requisite: course 402. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels.

213B. Statistical Methods in Management. (4) Requisite: course 213A. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies.

213C. Introduction to Multivariate Analysis. (4) Requisite: course 213B. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

214B. Behavioral Science Models. (4) Formulaulation, analysis, and interpretation of mathematical models in behavioral sciences. Emphasis on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems.
231D. Takeovers, Restructuring, and Corporate Governance. (4) Lecture, three hours. Prerequisite: course 230. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of the firm. S/U or letter grading.

231E. Managing Finance and Financing the Emerging Enterprise. (4) Prerequisites: courses 230, 403, 408. Designed for second-year graduate students. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to securing organizations' money requirements.

232A. Security Analysis and Investment Management. (4) Lecture, three hours. Prerequisite: course 230. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

232B. Fixed-Income Markets. (4) Lecture, three hours. Preparation: demonstrable training in statistics. Prerequisites: courses 230, 233A. Introduction to fixed-income markets, institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

232D. Option Markets. (4) Prerequisite: course 230. Organization and role of organized derivative markets, including futures, and options futures; arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their strategies. S/U or letter grading.

234A. International Financial Markets. (4) Lecture, three hours. Prerequisites: courses 205A, 230. Conceptual understanding of foreign exchange market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

234B. Financial Management of Multinational Corporations. (4) Lecture, three hours. Prerequisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting, and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control.

238. Special Topics in Finance. (4) Prerequisite: course 230. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

239A. Theory of Exchanges under Uncertainty. (4) Prerequisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of exchange developed as introduction to theoretical literature on pricing of capital assets.

239B. Theory of Investment under Uncertainty. (4) Prerequisites: courses 230, 239A. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Focus on theory of firm valuation and investment decisions, with special attention to questions of exchange and allocative efficiency.

239C. Empirical Research in Finance. (4) Discussion, three hours. Preparation: training in econometrics. Prerequisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. In-depth study of empirical research in the field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. S/U or letter grading.

239D. Ph.D. Seminar: Corporate Finance. (4) Prerequisite: courses 239 series. Prerequisite: course 230. Designed for Ph.D. students. Advanced topics in corporate finance theory and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

239X-239Y-239Z. Finance Workshops. (1-1-2) Discussion, 90 minutes. Designed for Ph.D. students. Intended to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussions of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U or letter grading.

240A. The Operating Manager. (4) Definition and analysis of problems of production planning, inventory management, quality control, system design, and implementation from operating manager's perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new methodologies and techniques.

240B. Operations Planning, Scheduling, and Control. (4) Prerequisite: course 407. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

240C. Design of Operational Systems. (4) Prerequisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and interoperation of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs.

240D. Operations Strategy and Policy. (4) Discussion, three hours. Definition and scope of operations strategy and its relation to corporate strategy, importance of productivity and its measurement in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, work force and job design, strategic implications of operating decisions, suppliers and vertical integration. Case analyses involving strategic issues in manufacturing and nonmanufacturing situations.

240E. Managing Entrepreneurial Operations. (4) Lecture, three hours. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodologies, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operations.

240F. Supply Chain Management. (4) Lecture, three hours. Prerequisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid turnover in technology, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries competition has moved from the firm level to the supply chain level. Provides understanding of strategic, tactical, and operational issues in supply chain management. S/U or letter grading.

241A. Managing Technology for Competitive Advantage. (4) Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological innovation on operations managers at both strategi- cally and operationally levels. Course is integrative in nature.

242A. Models for Operations Planning, Scheduling, and Control. (4) Designed for Ph.D. students. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Application of planning, work force scheduling, inventory management, and detailed operations scheduling and control.

242B. Models for Operations Systems Design. (4) Designed for Ph.D. students. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational economies, capacity, location, facilities, processes/technology, work, and work structures.

243B. Inventory Theory. (4) Prerequisite: course 210B. General discussion of inventory models, with emphasis on characterizing the form of optimal policies and efficient computational methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

243C. Scheduling Models for Intermittent Systems. (4) Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man/machine interaction.

243X-243Y-243Z. Operations and Technology Management Seminars. (1-1-2) Discussion, 90 minutes to three hours. Required of all students in operations and technology management concentration during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

244X-244Y-244Z. Research in Operations and Technology Management. (1-1-2) Designed for Ph.D. students. Survey of research literature in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

245. Special Topics in Operations and Technology Management. (4) Lecture, three hours. Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and application of specialized knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.
246C. Management in Public and Private Nonprofit Sectors. (4) Designed for graduate students. Examination of roles and management systems of the three sectors of U.S. society: unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and decision-making, control, and ethical issues of service delivery systems.

247A. Environment of the Art World. (4) Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

247B. Role of Management in Artistic Decision Making. (4) Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

248A. Strategic Management in the Entertainment Industry. (4) Discussion, three hours. Requisites: courses 403, 405, 406, 408, 420. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Issues and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary markets (pay TV, videocassettes, syndication).

249A. Special Topics in Public and Private Nonprofit Management. (4) Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topic change.

249B. Special Topics in Arts Management. (4) Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

M250A. Labor Relations: Process and Law. (4) (Formerly numbered 250A.) (Same as Policy Studies CM232.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

250C. Behavioral Foundations of Human Resource Management. (4) Requisite: course 250B. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; design of work systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

251. Managing Human Resources. (4) Management of people in organizations, designed for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve organizational objectives, (2) personnel planning, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

252. Systems of Employee/Management Participation. (4) Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

253. Employee Discipline, Discharge, and Grievance/Appeal Settlement. (4) Designed for graduate students. Analysis of conflict in the employment relationship; theoretical and empirical findings. Principles and policies that underlie resolution of labor/management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

M255. Comparative Industrial Relations. (4) Formerly numbered 255S. (Same as Policy Studies CM231.) Lecture, three hours: outside study, nine hours. Requisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

257. Human Resource Management in Creative and Nonprofit Sectors. (4) Designed for graduate students. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

258. Selected Topics in Industrial Relations. (1 to 4) Designed for Ph.D. students. Examination of depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

259A. Individuals and Groups in Human Systems. (4) Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiation, and technology/work systems. S/U or letter grading.

259B. Advanced Studies in Human Resource Management. (4) Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiation, and technology/work systems. S/U or letter grading.

M259C. Labor Markets and Public Policy. (4) (Formerly numbered 259C.) (Same as Policy Studies CM230.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. S/U or letter grading.

261A. Management in the Distribution Channel. (4) Lecture, three hours. Requisite: course 411. Examination of decisions in the distribution channel. Issues of power in the channel and trade-offs between alternative channel systems.

261B. Global Marketing Management. (4) Lecture, three hours. Requisite: course 411. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

263A. Consumer Behavior. (4) Requisite: course 411. Study of nature and determinants of consumer behavior. Emphasis on influence of psychosocial factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

264A. Marketing Research: Design and Evaluation. (4) Lecture, three hours. Requisite: course 411. Designed for prospective users of research results rather than for specialists in research. Marketing research is an aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

264B. Advanced Marketing Research. (4) Discussion, three hours. Requisite: course 264A. Advanced topics in marketing research, with emphasis on quantitative tools to aid management decision making. Topics include demand and market share forecasting, conjoint analysis, market segmentation and cluster analysis, brand positioning and competitive market structures, and assessing market response to price, advertising, promotion, distribution, and sales force.

265A. Marketing and the Law. (4) Lecture, three hours. Requisite: course 411. Detailed study of legislative enactments (federal, state, or local) which influence operation of institutions engaged in marketing activities, together with analysis of judicial decisions which have interpreted these laws.

266A. Product Management. (4) Lecture, three hours. Requisite: course 411. Investigation of process of developing new products and management of mature brands in existing markets. Regarding new product development, focus on concept screening, designing new products, and test marketing. Tactical management of marketing mix with currently available data emphasizing satisfaction, satisfaction, and profitability in managing mature brands.

266B. Advertising and Marketing Communications. (4) Lecture, three hours. Requisite: course 411. Detailed review of use of communication tools in marketing, critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies.
268. Selected Topics in Marketing. (4) Lecture, three hours. Requisite: course 411. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

269A. Theory in Marketing. (4) Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

269B. Research in Marketing Management. (4) Discussion, three hours. Designed for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

269C. Quantitative Research in Marketing. (4) Designed for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research.

269D. Behavioral Research in Marketing. (4) Designed for Ph.D. students who are conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives.

269E. Special Research Topics in Marketing. (4) Designed for Ph.D. students. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

269X-269Y-269Z. Workshops: Marketing. (1-1-2) Designed for Ph.D. students. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

270C. Application Frontiers in Information Systems. (4) Lecture, three hours. Requisite: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

271C. Emphasis: Information Systems. (4) Discussion, three hours. Requisite: course 404. Special topics in new and emergent technologies such as multimedia, digital imaging, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

272A. Information Systems Development. (4) Discussion, three hours. Methods and tools for information systems design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Classic and alternative approaches, such as rapid prototyping. System integration. Automated support. S/U or letter grading.

274A. Special Topics in Information Systems. (4) Discussion, three hours. Designed primarily for Ph.D. students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

278A. Urban Real Estate Financing and Investing. (4) Discussion, three hours. Investor-oriented course in which real estate and business trends are evaluated to determine real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

278B. Sources, Uses, and Flows of Real Estate Capital. (4) Discussion, three hours. Analysis of money, capital, and mortgage markets to determine potential availability and cost of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

279A. Special Studies in Urban Land Economics. (4) Limited to master's or Ph.D. candidates working on thesis or dissertation-related research. May be repeated for credit.

279B. Selected Topics in Urban Land Economics. (4) Discussion, laboratory, and fieldwork. Designed for second-year graduate students. Intended for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

280A. Studies, Research Philosophies, and Methodology in Human Systems. (4) Discussion, three hours. Designed for Ph.D. students. Survey of seminary studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimental, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

280B. Personal and Professional Development. (4) Discussion, three hours. Designed for Ph.D. students. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

280C. Research Design in Human Systems Studies. (4) Discussion, three hours. Designed for Ph.D. students. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and Ph.D. dissertations. May be repeated for credit. S/U or letter grading.

281A. Sociotechnical Systems. (4) Designed for graduate students. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

281B. People in Organizations. (4) Designed for graduate students. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

282. Task Group Processes. (4) Lecture, three hours. Requisite: course 281A or 281B. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technological environment. Imparts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

284A. Organization Design. (4) Lecture, three hours. Requisite: course 281A or 281B. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on sociotechnical and differentiation/integration models. S/U or letter grading.

284B. Organization Development. (4) Discussion, three hours. Designed for graduate students. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

285A. Leadership, Motivation, and Power. (4) Discussion, three hours. Designed for graduate students. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles. S/U or letter grading.
285B. Managerial Interpersonal Communication. (4) Discussion, three hours. Designed for graduate students. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication styles and skills, considering nonverbal perceptual, and cross-cultural aspects. S/U or letter grading.

286. Negotiations Behavior. (4) Discussion, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and ethnic theories through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for most effective application of these skills. S/U or letter grading.

287. Groups and Their Facilitation. (4) Discussion, three hours. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including "sensitivity" basic groups, group counseling, self-help groups, small groups, and committees in management and decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

288A. Selected Topics in Behavioral Science. (4) Discussion, three hours. Designed for graduate students. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretical positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

288B. Current Issues in Sociotechnical Systems and Organization Design. (4) Discussion, three hours. Designed for graduate students. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

288C. Selected Topics in Human Systems Studies and Organizational Behavior. (4) Discussion, three hours. Designed for graduate students. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

288D. Current Issues in Human Systems Change and Development through Consulting. (4) Discussion, three hours. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosing, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

288E. Proseminar: Behavioral and Organizational Sciences Colloquium. (4) Discussion, three hours. Designed for graduate students. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

292A. Research and Development Policy. (4) Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of forecasting technological future. S/U or letter grading.

292C. Comprehensive Planning in Public Sector. (4) Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy affecting invention and innovative transfer of technology; governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

293A. Political Environment of American Business. (4) Lecture, three hours. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

M293B. Morality of Capitalism. (4) (Same as Political Science M211.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

293C. Ethical Considerations in Business. (4) Lecture, three hours. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

295B. Small Business Management. (4) Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characterizing operating problems of small firms and application of appropriate methods or techniques for their solution.

295C. Corporate Entrepreneurship. (4) Inquiry into nature of entrepreneurial and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploration of technical and organizational innovations, management of new product or process development, and effective new venture management in a corporate context.

296A. International Business Management. (4) Discussion, three hours. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociopolitical, cultural, legal, political, and economic environmental characteristics on planning, structuring of organizational relationships, and coordination and control in multinational firms. S/U or letter grading.

296B. International Comparative Management Research. (4) Designed for Ph.D. students. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

297A. Comparative and International Management. (4) Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory. S/U or letter grading.

297B. International Business Policy. (4) Prerequisite: course 205A. Analysis of key managerial problems encountered in a multinational corporation. Concepts and theories acquired in other courses in international business and comparative management, applied to a series of complex cases and simulations of international business operation.

297C. International Business Law. (4) Requisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investing; international business and government relations.

297D. International Business Negotiations. (4) Prerequisite: course 296A. Exploration of international business negotiations, transactions with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/disolution of joint ventures, extent of foreign ownership, management control, terms/conditions for technology transfer, investment incentives.

297E. Business and Economics in Emerging Markets. (4) Lecture, three hours. Prerequisite: course 205A or 405. Analysis of changing economic, political, demographic, and sociocultural conditions in developing countries as they affect the business environment. Process of economic growth, market-oriented reforms, and creation of domestic capital markets. Inflation and stabilization programs; identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

298A. Special Topics in Management Theory. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298B. Special Topics in International and Comparative Management. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298C. Special Topics in Sociotechnical Systems. (4) Designed for Ph.D. students. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

298D. Special Topics in Management. (1 to 4) Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

298X-298Y-298Z. Management Strategy and Policy Workshops. (1-1-2) Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U or letter grading.

299R. Research Methods in Management. (4) Designed for Ph.D. students. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.
375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Mathematics for Management. (4) Designed for graduate students. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and management. Emphasis on mathematical models, techniques, and decision making. S/U grading.

401A-401B. Managerial Problem Solving. (2-2) Discussion, three hours. Use of international business simulation and series of complex multifaceted cases to learn to apply M.B.A. core disciplines in real-world globally focused business problems. In Progress and letter grading.

402. Data Analysis, Statistics, and Decision Making. (4) Designed for graduate students. In-depth introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems.

404. Information Systems. (4) Lecture, four hours; discussion, one hour (optional). Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.

405. Managerial Economics. (4) Lecture, four hours; discussion, one hour (optional). Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.

406. Global Economy. (4) Requisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in world economy affect economic growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments.

407. Managerial Model Building. (4) Lecture, three hours. Requisites: courses 402, 403, 405. Survey of uses of formal modeling approaches in managerial decision making. Emphasis on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public systems.

408. Managerial Finance. (4) Requisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of organization’s resources.

409. Managing Human Resources in Organizations. (4) Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizational units as they influence the managerial process and development of prospective general managers.

410. Operations and Technology Management. (4) Requisites: courses 402, 403, 405. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. S/U or letter grading.

412. Management of Organizations. (4) Lecture, three hours. Preparation: completion of first-year core program. Integrative approach to theory and practice of management, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce.

421A. Management Communications I (1) Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.

421B. Management Communications II. (1) Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective collectively written managerial communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organization around writing and speaking exercises. Personal attention to students’ written communications and oral presentations.

444A-444B. Management Field Study: Two-Quarter Plan. (4-4) Fieldwork, three hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. S/U or letter grading.

445. Management Field Study: One-Quarter Plan. (8) Fieldwork, six hours. Must be taken in second year (or its equivalent for part-time students) and be based on client need and adviser approval. Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. S/U or letter grading.

451. Fieldwork in Organizational Development. (2 to 12) Requisite: course 284B or 450. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings.

452. Fieldwork in Technical Assistance for Minority Business Enterprises. (1 to 4) Preparation: completion of first year of master’s program. Supervised practical field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

453. Fieldwork in Arts Management. (4 to 12) Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

454. Fieldwork in Organizations. (4) Preparation: completion of two terms of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal coursework. May not be repeated for credit.

457. Fieldwork in Investment Management. (4) Discussion, three hours. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Research in Management. (1 to 8) (Formerly numbered 598N.) Directed individual study or research. May be repeated. S/U grading.

597. Preparation for Qualifying Examinations. (4 or 12) Preparation for master’s comprehensive examination or Ph.D. qualifying examinations.

Executive M.B.A. Program

461. Managerial Problem Solving. (2) Limited to Executive M.B.A. Program students. Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual’s diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progression, working with others, and shaping the work culture.

463. Data Analysis and Management Decisions under Uncertainty. (4) Limited to Executive M.B.A. Program students. Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.

465. Quantitative Methods for Managers. (4) Limited to Executive M.B.A. Program students. Survey of modeling approaches to managerial planning and decision. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.

466A-466B. Financial Policy for Managers. (4-2) Limited to Executive M.B.A. Program students. Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework.

468. Economic Forecasting. (2) Limited to Executive M.B.A. Program students. Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions.

469. Management of Human Resources. (4) Limited to Executive M.B.A. Program students. Introduction to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

470A. Introduction to Research and Policy Analysis. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Provides methods of organizational and strategic analysis to determine relationships of the organization with its environment. In Progress grading (credit to be given only on completion of course 470D).

470B. Strategic Overview. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Preparation of a strategic overview of a selected international company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys. In Progress grading (credit to be given only on completion of course 470D).

470C. Action Research Project. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B). In Progress grading (credit to be given only on completion of course 470D).

470D. Seminar: Policy Analysis. (2) Lecture, two hours. Limited to Executive M.B.A. Program students. Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. S/U or letter grading.

472. Marketing Strategy and Policy. (4) Limited to Executive M.B.A. Program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

473A. Managerial and Organizational Processes. (2) Formerly numbered 473.) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Macroanalytic issues, including intergroup relations, design and functioning of organizations, and relationships of organizations to their environment. S/U or letter grading.

473B. Customer Information Strategy. (2) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Development of a customer orientation as a necessity for success in the highly competitive global marketplace, including principles of customer orientation, information as a strategic asset, customer equity, market forecasting, measuring effects of marketing investments, and customer response-based strategy. S/U or letter grading.

477. The Manager and Business/Society Relationships. (4) Limited to Executive M.B.A. Program students. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

478. Selected Topics in Management. (2 to 4) Seminar, 90 minutes to three hours. Limited to Executive M.B.A. Program students. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. “Microstructure” is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials. Such materials must fulfill simultaneously dimensional, property, quality control, and economic requirements.

The department also has a program in electronic materials which provides a broad-based foundation in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department’s Materials Engineering major. A joint major field, Chemistry/Materials Science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science).

The graduate program allows for specialization in one of the following fields: ceramics and ceramic processing, electronic and optical materials, and structural materials.

Undergraduate Study

Materials Engineering B.S.

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

The Major

Course requirements are as follows (180 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 105D.

(2) Materials Science and Engineering 88, 110, 110L, 121, 122, 130, 131, 131L, 190; Electrical Engineering 121A, 121B, 122AL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical and Aerospace Engineering 191A or 192A.

(3) Three elective courses from Chemical Engineering C114, Civil and Environmental Engineering 130, 130F, 135A, Electrical Engineering 121A, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 123 (two units), 143A, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C.

(4) One course from Electrical Engineering 131A or Mathematics M170A or Mechanical and Aerospace Engineering 193 or Statistics M100A, plus 12 additional units from Chemistry and Biochemistry 30, 30L, Materials Science and Engineering 197, Physics 1C, or by petition, upper division courses from engineering, intermediate or advanced foreign language, mathematics, or physical or life sciences. Intermediate foreign language courses may be lower division.

(5) Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C.

(6) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Electronic Materials Option

Course requirements are as follows (193 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Electrical Engineering 10, 101, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, and Civil and Environmental Engineering 108 or Mechanical and Aerospace Engineering 105D.

(2) Materials Science and Engineering 88, 110, 110L, 121, 122, 130, 131, 131L, 190; Electrical Engineering 121A, 121B, 122AL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical and Aerospace Engineering 191A or 192A.

(3) Four elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 131A, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 172L.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

The department of Materials Science and Engineering offers the Master of Science (M.S.) degree in Materials Science and Engineering.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE). A bachelor's degree in materials science, metallurgy, or ceramics is required. Students having a bachelor's degree in chemistry, physics, or other engineering disciplines are admitted if an introductory materials course has been taken or remedial work comparable to an introductory course is performed.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.seas.ucla.edu/ms/. Forms are also available by writing to the Materials Science and Engineering Department, UCLA, 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study

There are three main areas in the M.S. program: ceramics and ceramic processing; electronic and optical materials; and structural materials. Students may specialize in any one of the three areas, although most students are more interested in a broader education and select a variety of courses. Basically, students select courses which serve their interests best in regard to thesis research and job prospects.

Course Requirements

Thesis Plan. Nine courses are required, of which six must be graduate courses. The courses are to be selected from the following lists, although suitable substitutions can be made from other engineering disciplines or from chemistry and physics with the approval of the departmental graduate adviser. Two of the six graduate courses may be Materials Science and Engineering 598 (thesis research). The remaining three courses in the total course requirement may be upper division courses.

Comprehensive Examination Plan. Nine courses are required, six of which must be graduate courses, selected from the following lists with the same provisions listed under the thesis plan. Three of the nine courses may be upper division courses.

Electronic and optical materials: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 221, 222, 223, 244, 298.

Ceramics and ceramic processing: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 244, 246A, 246D, 298.

Structural materials: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 243A, 243C, 244, 250A, 250B, 298.

As long as a majority of the courses taken are graduate courses, selected from the following lists, although suitable substitutions can be made from other engineering disciplines or from chemistry and physics with the approval of the departmental graduate adviser.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 108A, 108, 199; Computer Science 1MS2A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D,
M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Comprehensive Examination Plan
Consult the graduate adviser for details. If the comprehensive examination is failed, students may be reexamine once with the consent of the graduate adviser.

Thesis Plan
In addition to fulfilling the course requirements, under the thesis plan, students are required to write a thesis on a research topic in materials science and engineering supervised by the thesis adviser. A M.S. thesis committee reviews and approves the thesis.

Doctoral Degree
Admission
In addition to meeting the requirements of the Graduate Division, applicants to the program leading to the Ph.D. degree in Materials Science and Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Application forms, including a departmental supplement to the application, may be obtained at http://www.seas.ucla.edu/ms/. Forms are also available by writing to the Materials Science and Engineering Department, UCLA, 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major Fields or Subdisciplines
Ceramics and ceramic processing; electronic and optical materials; structural materials.

Course Requirements
There is no formal course requirement for the Ph.D. degree, and students may substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and one minor field. The major field has a scope corresponding to a body of knowledge contained in nine courses, at least six of which must be graduate courses, plus the current literature in the area of specialization. The major fields named above are described in a Ph.D. major field syllabus, each of which can be obtained in the department office. The minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B- or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor field is chosen to support the major field and is usually a subset of the major field.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations
During the first year of full-time enrollment in the Ph.D. program, students need to take the oral preliminary examination, which encompasses the body of knowledge in materials science. After all coursework is completed in the major and minor fields, students take a written preliminary examination in the major field. Students may not take an examination more than twice.

After passing both preliminary examinations, students are ready to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but usually include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

Materials Science and Engineering
Lower Division Courses

88. Freshman Seminar: New Materials. (2) Seminar, two hours; outside study, four hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics. Letter grading.

90L. Physical Measurement in Materials Engineering. (2) Laboratory, four hours; outside study, two hours. Requisite: course 14. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques. Letter grading.

Upper Division Courses

110L. Introduction to Materials Characterization A Laboratory, (2) Lecture, two hours; laboratory, four hours. Requisite: course 14. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, Laue method, crystal structure determination, and special projects. Letter grading.

111. Introduction to Materials Characterization B (Electron Microscopy), (4) Lecture, three hours; laboratory, two hours. Requisites: courses 14, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy; emissive and reflective modes; chemical analysis; electron optics of both instruments. Letter grading.

123. Electronic Packaging and Interconnection, (2) Lecture, two hours; outside study, six hours. Various electronic packaging methods and interconnection technologies. Design, fabrication, and testing of complex microelectronic components, interconnections, and assemblies. Letter grading.
130. Phase Relations in Solids. (4) Lecture, four hours; outside study, eight hours. Requisites: course 14, and Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions. Letter grading.

131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2) Lecture, two hours; outside study, four hours. Corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Letter grading.

150. Introduction to Polymers. (4) Lecture, three hours; laboratory, two hours. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication. Letter grading.

160. Introduction to Ceramics and Glasses. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 14, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering. Letter grading.

162. Electronic Ceramics. (4) Lecture, four hours; outside study, eight hours. Requisites: course 14, Electrical Engineering 100. Utilization of ceramics in microelectronics; thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical and waveguide applications and designs. Letter grading.

M180. Introduction to Biomaterials. (4) Same as Biomedical Engineering M180. Lecture, three hours; laboratory, seven hours. Requisite: course 14. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Letter grading.

191L. Computer Methods and Instrumentation in Materials Science. (2, 4) Lecture, two hours; outside study, four hours. Requisite: course 132 or 190 or 598 or 599. Types of technical documents and basic document patterns. Document planning, paragraph and sentence structures. Illustration and references. Reports, theses, and proposals. Oral presentation. Letter grading.

199. Special Studies. (2 to 8) Reading, study. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

222. Growth and Processing of Electronic Materials. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 130, 131. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation. Letter grading.

223. Materials Science of Thin Films. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 131. Fabrication, structure, and property correlations of thin films used in microelectronics for data and information processing. Topics include film deposition, interface properties, stress and strain, electromigration, phase changes and kinetics, reliability. Letter grading.

224. Deposition Technologies and Their Applications. (4) Formerly numbered 248B. Lecture, three hours; outside study, nine hours. Designed for graduate and undergraduate students. Deposition methods including those used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-assisted vapor deposition processes, plasma spray, electroplating. Applications in semiconductor, chemical, optical, mechanical, and metallurgical industries. Letter grading.

243A. Fracture of Structural Materials. (4) Lecture, four hours; laboratory, two hours; outside study, four hours. Requisite: course 143A. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design. Letter grading.

243C. Dislocations and Strengthening Mechanisms in Solids. (4) Lecture, four hours; outside study, eight hours. Requisite: course 143A or Mechanical and Aerospace Engineering 156B. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening. Letter grading.

244. Electron Microscopy. (4) Lecture, four hours; outside study, eight hours. Requisite: course 111. Essential features of electron microscopy; geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Mößbauer fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory. S/U or letter grading.

246A. Mechanical Properties of Nonmetallic Crystalline Solids. (4) Lecture, four hours; outside study, eight hours. Requisite: course 160. Material and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties. S/U or letter grading.

296. Seminar: Advanced Topics in Materials Science and Engineering. (2) Seminar, two hours; outside study, two hours. Advanced study and analysis of current topics in materials science and engineering. Discussion of current research and literature in research specialties of faculty members teaching course. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate materials science and engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

474A. Advanced Transportation Systems. (4) Lecture, four hours; outside study, eight hours. Survey of aerospace and advanced ground transportation systems, materials, structures, propulsion systems, control systems, communication systems, and infrastructure support. Letter grading.

475A. Manufacturing Processes. (4) Lecture, four hours; outside study, eight hours. Manufacturing properties of materials, theromomechanical processes, chemical and physical processes, material removal processes, packaging, fastening, joining and assembly, tooling and fixtures. Letter grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate materials science and engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Haruzo Hida, Ph.D. (Number Theory)
Heinz-Otto Kross, Ph.D. (Applied Mathematics, Numerical Analysis)
Ker-Chau Li, Ph.D. (Statistics)
Thomas M. Liggett, Ph.D. (Probability Theory)
D. Anthony Martin (Mathematical Logic)
Alexander Sergeev Merkurjev, Ph.D. (Algebra)
Ronald J. Miech, Ph.D. (Number Theory)
Yanni N. Moschovakis, Ph.D. (Mathematical Logic, Computability Theory)
Thomas Mountford, Ph.D. (Probability Theory)
William I. Newman, Ph.D. (Applied Mathematics and Computation)
Stanley J. Osher, Ph.D. (Scientific Computing, Applied Mathematics)
Peter Petersen, Ph.D. (Riemannian Geometry)
Sorin T. Popa, Ph.D. (Operator Algebras)
James V. Ralston, Ph.D. (Partial Differential Equations)
Paul H. Roberts, Ph.D., D.Sc. (Fluid Mechanics)
Jonathan D. Rogawski, Ph.D. (Automorphic Forms, Number Theory, Representation Theory)
Bruce L. Rothschild, Ph.D. (Combinatorics and Graph Theory)
Murray S. Schacher, Ph.D. (Algebra, Number Theory)
Roberto Schoenmann, Ph.D. (Probability Theory)

Lloyd S. Shapley, Ph.D. (Game Theory, Mathematical Economics)
Zhen-Su She, Ph.D. (Applied Mathematics)
Eitan Tadmor, Ph.D. (Applied Mathematics)
Masamichi Takesaki, Ph.D. (Operator Algebras)
V.S. Varadarajan, Ph.D. (Quantum Theory, Ordinary Differential Equations)
James H. White, Ph.D. (Differential Geometry and Applications to Molecular Biology)
Wing Hung Wong, Ph.D. (Statistics)
Lai-Sang Young, Ph.D. (Dynamical Systems)

**Professors Emeriti**

Richard F. Arens, Ph.D.
Donald G. Babbitt, Ph.D.
Robert J. Blattner, Ph.D.
David G. Cantor, Ph.D.
Lennart Carleson, Ph.D.
C.C. Chang, Ph.D.
S.Y. Cheng, Ph.D.
Philip C. Curtis, Jr., Ph.D.
Thomas S. Ferguson, Ph.D.
David Gillman, Ph.D.
Basil Gordon, Ph.D.
John W. Green, Ph.D.
Alfred W. Hales, Ph.D.
Paul G. Hoel, Ph.D.
Alfred Horn, Ph.D.
S.T. Hu, Ph.D., D.Sc.
Robert I. Jennrich, Ph.D.
Paul B. Johnson, Ph.D.
Barrett O’Neill, Ph.D.
Lowell J. Paige, Ph.D.
Sidney C. Port, Ph.D.
Raymond M. Redheffer, Ph.D.
Leo R. Sario, Ph.D.
Robert Steinberg, Ph.D.
Frederick A. Valentine, Ph.D.
N. Donald Ylvisaker, Ph.D.

**Associate Professors**

Rodsio De Sapio, Ph.D. (Differential and Algebraic Topology)
Ming Gu, Ph.D. (Computational Linear Algebra)
Gregory Hjorth, Ph.D. (Logic)
Geoffrey Mess, Ph.D. (Low-Dimensional Topology)
Ricardo Perez-Marco, Ph.D. (Dynamical Systems)
Lihe Wang, Ph.D. (Partial Differential Equations)

**Assistant Professors**

Gang Liu, Ph.D. (Mathematical Physics)
Terence Tao, Ph.D. (Analysis)
Christoph Thiele, Ph.D. (Harmonic Analysis)

**Lecturers**

David Cohen, M.A.
Susie W. Hakansson, Ph.D. (Mathematics Education)
Shelley Krieglert, Ed.D. (Mathematics Education)
Barbara G. Wells, Ph.D. (Mathematics Education)

**Adjunct Professor**

Herbert Enderton, Ph.D. (Mathematical Logic)

**Adjunct Assistant Professors**

Michael Chu, Ph.D. (Hedrick)
Randolph Cooper, Ph.D. (Program in Computing)
Ivan Dimitrov, Ph.D. (Hedrick)
Elias Jonsson, Ph.D. (Computational and Applied Mathematics)
Michael Leonard, Ph.D. (Program in Computing)
Huazhang Luo, Ph.D. (Hedrick)
Michael Mossinghoff, Ph.D. (Program in Computing)
Dario Novak, Ph.D. (Program in Computing)
Irina Popovic, Ph.D. (Computational and Applied Mathematics)
Jianhong Jackie Shen, Ph.D. (Computational and Applied Mathematics)
Dimitri Shlyakhtenko, Ph.D. (Hedrick)
David Strong, Ph.D. (Program in Computing)
Eric Urban, Ph.D. (Hedrick)
Don Wang, Ph.D. (Hedrick)
John Westman, Ph.D. (Program in Computing)
Scope and Objectives
Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study
Admission
Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Preparation for the Major
Admission
Students may petition for Mathematics 31A, 31B equivalency; those with a score of 3 receive eight units of credit and analytic geometry credit. They may petition for 31A, 31B equivalency, or they may take courses 31A, 31B at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 3 on the AB or BC examination should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA.

Credit Limitations
Credit is given for at most one course in each of the following groups: (1) 3A, 31A; (2) 3B, 31B, 31E; (3) 3C, 32A; (4) 110A, 117; (5) M170A, Statistics M100A, 110A.

Mathematics 2, 38A, 38B, and Statistics 10 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A-151B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics M170A and Statistics M100A are not open for credit to students with credit for Electrical Engineering 131A.

Students may not take or repeat a mathematics course for credit if it is a prerequisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 31B, they must do so before completing course 32A).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 32A and 32AH).

Upper Division Courses
Mathematics 113, 115A, 117, 131A, 132, 142, 151A, 164, and 167 are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

Undergraduate Majors
The department offers five majors: Mathematics, Applied Mathematics, Mathematics of Computation, Mathematics/Applied Science, and General Mathematics. The department also participates with the Economics Department in the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major.

The Mathematics major is designed for students whose basic interest is mathematics; the Applied Mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the Mathematics of Computation major for individuals interested in the mathematical theory and the applications of computing; the Mathematics/Applied Science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the General Mathematics major for students planning to teach mathematics at the high school level. As part of the Mathematics/Applied Science major, the department offers programs for students interested in the fields of actuarial science, management/accounting, medical and life sciences, and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

Students planning to pursue graduate study in mathematics are strongly encouraged to take a three-term sequence of graduate-level courses during their senior year.

Mathematics B.S.
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, and two courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Life Sciences 1, Philosophy 31, 32, Physics 1B, 1C, 6B, 6C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

The Major
Required: Mathematics 110A-110B, 115A, 131A-131B, 132, one course from 120A, 121, 123, and at least five courses from 106 through 199 and Statistics M100A through M120B. The 12 courses must be passed with a minimum overall grade-point average of 2.0.

Applied Mathematics B.S.
Preparation for the Major
Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

The Major
Required: Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: numerical analysis — courses 151A-151B, probability and statistics — courses M170A and 170B or Statistics M100A and 100B or 110A-110B, differential equations — courses 135A-135B; four courses from 110A through 199 and Statistics M100A through M120B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall grade-point average of 2.0.
Mathematics of Computation B.S.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

The Major

Required: Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A-151B, and six courses from 110A through 199 and Statistics M100A through M120B; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

Mathematics/Applied Science B.S.

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial plan, management/accounting plan, medical and life sciences plan, or operations research plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as biochemistry, biology, chemistry, economics, geography, and physics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M100A through M120B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students are not admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

Actuarial Plan

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 11, 100. Economics 100 may not be applied as one of the upper division courses for the major.

The Major

Required: Seven Mathematics Department courses, including Mathematics 115A, 131A, 164, M170A and 170B or Statistics M100A and 100B or 110A-110B, and two courses from Mathematics 113, 151B, 171, Statistics 100C, M120A; six outside courses, including Economics 101, 102, 147A, 160, and two courses from Economics 142 through 167, and English Composition 131A through 131D, Management 130A, 130B, 190.

Management/Accounting Plan

Preparation for the Major

The Major

Required: Seven Mathematics Department courses, including Mathematics 115A, 131A, 164, M170A or Statistics M100A or 110A, Mathematics 170B or Statistics 100B or 110B, and two courses from Mathematics 110A through 199 and Statistics 100C; seven management courses, including Management 120A, 120B, 122, 140, 212A, 212B, and one additional course from 108 through 190.

Medical and Life Sciences Plan

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Chemistry and Biochemistry 20A, 20B, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

The Major

Required: Mathematics 110A or 117, 115A, 123, M170A or Statistics M100A or 110A, one course from 131A through 136, one course from 142 through 167, and six courses from 106 through 199, 370A, 370B, and Statistics 100B through M120B.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

Honors Program

Students majoring in Mathematics, Applied Mathematics, and Mathematics of Computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall grade-point average of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.
Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

Computing Specialization
Majors in Mathematics, Applied Mathematics, Mathematics/Appplied Science, or General Mathematics may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 20, 30, 60, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0, and (3) completing at least two courses from Mathematics 149 through 159. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

Mathematics Minor
The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

To enter the minor, students must have an overall grade-point average of 2.0 or better and meet with the undergraduate mathematics adviser in the Student Services Office, 6356 Math Sciences.

**Required Lower Division Courses (12 units):**
Mathematics 32A, 33A, 33B.

**Required Upper Division Courses (20 units):** At least five courses (20 units) selected from Mathematics 106 through 199 and Statistics M100A through M120B.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees
The department of Mathematics offers the Master of Arts (M.A.) degree in Mathematics and the Master of Arts in Teaching (M.A.T.).

Master of Arts
Admission
Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to the program leading to the Master of Arts degree in Mathematics, applicants must have earned in these upper division mathematics courses a cumulative grade-point average of at least 3.2.

Applicants must take the Graduate Record Examination (GRE) General Test and the Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

Areas of Study
The Master of Arts degree in Mathematics may be earned under the comprehensive examination plan in the basic (pure mathematics) program, in an interdisciplinary program in applied mathematics, or in statistics.

Course Requirements
Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics, respectively. All courses must be passed with the grades of B– or better.

Students may enroll in Mathematics 596 while fulfilling the essay requirement. Students planning to teach in secondary schools who do not already have valid credentials for such teaching should enroll in the single subject instructional credential program in the Department of Education (Graduate School of Education and Information Studies). Of the courses required by this program, students receive M.A.T. credit only for the following courses: Education 312, 330A, and 330B, 406A-406B-406C, 407A-407B. Actual receipt of the credential is not a degree requirement. Interested students should check with the Department of Education for a full and up-to-date description of credential requirements and should submit a Department of Education application for admission to the credential program.

Additional Courses. Besides the six core courses described above, a seventh upper division or graduate course in mathematics is required. Particularly recommended are Mathematics 106, 110B, 110C, 111, 131B, 135A, and Statistics 100B. Candidates on the junior college track normally take five 100-level or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, one course of a predominantly mathematical nature taken in another department may be presented for degree credit.

Students may not receive degree credit for Mathematics 104, 370A, or 370B. In addition, students may not receive degree credit for more than two quarters of Mathematics 596 or for more than two quarters of any 300-series courses.

Essay Requirement. A master's essay on some subject in mathematics related to the student's prospective teaching is required. This is written by the student, under the direction of a faculty member, while enrolled in Mathematics 596.

Comprehensive Examination Plan
In the M.A.T. program, one examination in mathematical subject matter is taken, as is one in content and philosophy of secondary school.
Mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

Thesis Plan
None.

Doctoral Degree
Admission
Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For direct admission to the program leading to the Ph.D. degree in Mathematics, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

Major Fields or Subdisciplines
The Ph.D. degree in Mathematics may be earned under the pure, applied, or statistics option. Many possible choices of fields exist within these programs, and students are urged to read the booklet, Graduate Studies in Mathematics at UCLA, where the specialties of the faculty and the active research areas in the department are described in some detail.

Course Requirements
Under the pure mathematics and statistics options, students must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285N, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. Each student must actively participate (and lecture 90 minutes, normally two lectures) in at least two advanced seminars. Credit for one of the seminars must be obtained within three quarters registered after passing the written qualifying examinations, the other within five quarters after passing the written qualifying examinations.

Under the applied mathematics option, students must pass (with a grade of A or B) at least 12 approved graduate courses, including at least 12 courses from Mathematics 205A through 285N. At most, three of these may be in the 285 series.

Written and Oral Qualifying Examinations
Students must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three quarters of full-time study. Three examinations must be passed within six quarters of full-time study with one examination at the Ph.D. level. Students in the applied option have the opportunity to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By option, the following examinations are required.

Pure Option: One examination in algebra and one examination in real analysis. Either one or both of these required examinations may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes.

Applied Option: One examination in real analysis and one examination in either numerical analysis or applied differential equations.

Statistics Option: One examination in real analysis and probability at the M.A. level and one examination in theoretical and applied statistics at the Ph.D. level.

Students should consult an adviser in the area in which they plan to do research for advice on which qualifying examinations should be taken to work in that area.

After passing the four written qualifying examinations, the student may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

Mathematics
Lower Division Courses

2. Finite Mathematics. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Functions of real variables, matrices, exponential and logarithmic functions, partial differentiation, and optimization. P/NP or letter grading.

3A. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 2 (C– or better). Functions of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

3B. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Functions of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

3C. Calculus for Life Sciences Students. (4) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Functions of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

31A. Calculus and Analytic Geometry. (4) Lecture, three hours; discussion, one hour. Requisite: course 31A (C– or better). Transcendental functions; methods and applications of integration.

31BH. Calculus and Analytic Geometry (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 31B.

31E. Calculus for Economics Students. (4) Lecture, three hours; discussion, one hour. Requisite: course 31A (C– or better). Not open for credit to students with credit for course 2B, 3C, or 31B. Calculus with applications to economics. Partial differentiation, differentials, implicit functions, exponential and logarithmic functions, optimization, constrained extremum, first-order linear differential equations with constant coefficients. P/NP or letter grading.

32A. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Requisite: course 31B (C– or better). Introduction to driven differential equations of several variables.

32AH-32BH Calculus of Several Variables (Honors). (4) Lecture, three hours; discussion, one hour. Requisite: course 31B (B or better). Honors sequence parallel to courses 32A, 32B.

32B. Calculus of Several Variables. (4) Lecture, three hours; discussion, one hour. Requisite: course 32A (C– or better). Introduction to integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

32BL. Calculus Computer Laboratory. (1) Corequisite: course 32B. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

33A. Matrices and Differential Equations. (4) Lecture, three hours; discussion, one hour. Requisite: course 33A (C– or better). Introduction to matrix theory, differential equations, and systems of differential equations.

33AH. Matrices and Differential Equations (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 33A. P/NP or letter grading.

33AL. Linear Algebra and Differential Equations Computer Laboratory. (1) Corequisite: course 33A. Application of mathematical software to solve problems in linear algebra and differential equations.

33B. Infinite Series. (4) (Formerly numbered 31C.) Lecture, three hours; discussion, one hour. Requisite: course 33A (C– or better). Infinite sequences and series, applications.

33BH. Infinite Series (Honors). (4) (Formerly numbered 31CH) Lecture, three hours; discussion, one hour. Honors course parallel to course 33B. P/NP or letter grading.

38A-38B. Fundamentals of Mathematics for Elementary Teachers. (4–4) Not open to freshmen or for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. P/NP or letter grading. 38A. Lecture, three hours; discussion, one hour. Counting numbers and other subsystems of real numbers; sets, operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures. 38B. Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.
61. Introduction to Discrete Structures. (4) Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B. Theory of elementary discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebra.

**Upper Division Courses**

**General and Teacher Training**

104. Fundamental Concepts of Geometry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 2A, 3B. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

106. History of Mathematics. (4) Requisite: course 3A or 3A. History and development of mathematics from ancient times to the present; emphasis on the contributions of the great civilizations of India, China, and the Middle East.

**Algebra, Number Theory, and Logic**

110A-110B. Algebra. (4-4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Advanced undergraduate algebra, with emphasis on theory, proof, and applications; topics vary from year to year.

110C. Algebra. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A-110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

111. Theory of Numbers. (4) Requisites: courses 110A-110B. Analytic number theory, with emphasis on the theory of primes, algebraic number theory, Diophantine equations.

112. Introduction to Set Theory. (4) (Formerly numbered M112.) (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 3A or Philosophy 32. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers.

113. Combinatorics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 3B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions; combinatorial designs, graphs and trees, applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

114A-114B. Logic and Computability. (4-4) (Formerly numbered 114A-114B-114C.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; Herbrand expansions. Effectively computable, Turing computable, and recursive functions; thesis of Church. Universal functions; unsolvability results. Recursive and recursively enumerable sets; recursively enumerable of valid sentences. Formal number theory; definability of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. P/NP or letter grading.

115A-115B. Linear Algebra. (4-4) Lecture, three hours; discussion, one hour. P/NP or letter grading. 115A. Requisite: course 33A. Abstract vector spaces, linear transformations, matrices; determinants; inner product spaces; eigenvalues. 115B. Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

115AH. Linear Algebra (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 115A.

117. Algebra for Applications. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; linear algebra, polynomial relations, introduction to group theory.

**Geometry and Topology**

120A-120B. Differential Geometry. (4-4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A. Curves in 3-space; Frenet formulas, surfaces in 3-space, normal curvature, Gaussian curvature, congruence of curves and surfaces, intrinsic geometry of surfaces, isometries, geodesics, Gauss/Bochner theorem. P/NP or letter grading.

121. Introduction to Topology. Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

122. Foundations of Geometry. (4) Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

**Analysis**

131A-131B. Analysis. (4-4) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity, 131B. Requisites: courses 33B, 115A. Derivatives, Riemann integrals, sequences and series of functions, power series, Fourier series.

131AH-131BH. Analysis (Honors). (4-4) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A-131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

164. Linear Programming. (4) (Formerly numbered 144.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, duality theorem, simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.
167. Game Theory. (4) (Formerly numbered 147.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Games in extensive form, strategic equilibrium, matrix games and minimax theorem, cooperative and noncooperative solutions of bimatrix games, and Lemke/Howson algorithm. Possible additional topics include combinatorial games, stochastic games, coalitional games, and the core, marriage problem, and cost allocation. P/NP or letter grading.

Probability
M170A. Probability Theory. (4) (Formerly numbered M150A.) (Same as Statistics M100A.) Lecture, three hours; discussion, one hour. Requisite: courses 32B, 33B. Not open to students with credit for Statistics M100A, 110A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading.

170B. Probability Theory. (4) (Formerly numbered 150B.) Lecture, three hours; discussion, one hour. Requisite: course M170A or Statistics M100A. Convergence in distribution, normal approximation, laws of large numbers, Poisson processes, random walks.

171. Stochastic Processes. (4) (Formerly numbered 151.) Lecture, three hours; discussion, one hour. Requisite: course M170A or Statistics M100A. Discrete Markov chains, continuous-time Markov chains, renewal theory.

Special Studies
190. Honors Mathematics Seminar. (4) Seminar, three hours. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

199. Special Studies in Mathematics. (1 to 4) At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

Graduate Courses
Teacher Preparation
201A-201B-201C. Topics in Algebra and Analysis. (4-4-4) Preparation: bachelor’s degree in mathematics. Designed for mathematics/education program students. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

202A-202B. Mathematical Models and Applications. (4-4) Preparation: bachelor’s degree in mathematics. Emphasis for mathematics/education program students. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

Number Theory
205A/205B-205C. Number Theory. (4-4-4) Requisites: courses 210A, 246A. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

Algebra
210A-210B-210C. Algebra. (4-4-4) Requisites: courses 110A-110B, 110C. Students with credit for courses 110B and/or 110C cannot receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. (4) Requisite: course 210A. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. (4) Requisite: course 210A. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. (4) Requisite: course 210A. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Introduction to Algebraic Geometry. (4) Requisite: course 210A. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

216. Further Topics in Algebraic Geometry. (4) Requisites: courses 214A-214B. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

M217. Geometry and Physics. (4) (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include super-symmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

Logic and Foundations
220A-220B-220C. Mathematical Logic and Set Theory. (4-4-4) Lecture, three hours. Requisite: course M112. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theorems; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing. S/U or letter grading.

222A-222B. Lattice Theory and Algebraic Systems. (4-4) Lecture, three hours. Requisite: course 210A. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatory, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

223A. Model Theory. (4) Requisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223B. Set Theory. (4) Requisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

223C. Recursion Theory. (4) Requisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

Geometry and Topology
225A. Differentiable Manifolds. (4) Lecture, three hours. Requisites: courses 121, 131A-131B. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes theorem on manifolds.

225C. Further Topics in Geometry and Topology. (4) Lecture, three hours. Requisites: courses 225A, 225B. Topics include cohomology (singular, cellular, de Rham), duality theorems, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

226A-226B-226C. Differential Geometry. (4-4-4) Lecture, three hours. Requisite: course 225A. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

233. Partial Differential Equations on Manifolds. (4) Lecture, three hours. Requisites: courses 226A, 251A. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green’s function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

234. Topics in Differential Geometry. (4) Lecture, three hours. Requisites: courses 225A-225B, Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

235. Topics in Manifold Theory. (4) Lecture, three hours. Requisites: courses 225A, 225B. Homotopy theory, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

236. Topics in Geometric Topology. (4) Lecture, three hours. Requisites: courses 225A, 225B. Geometric topology, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

245A-245B-245C. Real Analysis. (4-4-4) Lecture, three hours. Requisites: courses 121, 131A-131B. Students with credit for former course 134 cannot receive M.A. degree credit for course 245A. Basic measure theory. Measure theory on locally compact spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on R^n and T^n.

250C. Advanced Topics in Ordinary Differential Equations. (4) Requisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

251B-251C. Topics in Partial Differential Equations. (4-4) In-depth introduction to topics of current interest in partial differential equations or their applications.

253A-253B. Several Complex Variables. (4-4) Requisites: courses 245A-245B-245C, 246A-246B-246C. Introduction to analytic functions of several complex variables. The d-bar problem, Cousin problems, domains of holomorphy, compact manifolds.

254A-254B. Topics in Real Analysis. (4-4) Requisites: courses 245A-245B-245C, 246A-246B-246C. Selected topics in analysis and its applications to geometry and cannot receive M.A. degree credit for course 245A. Topics may vary from year to year. May be repeated for credit by petition.

255A-255B-255C. Topics in Functional Analysis. (4-4-4) Requisites: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert spaces, semigroups of operators, linear topological vector spaces, and other related areas.

270A. Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

270B-270C. Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

270D-270E. Design, analysis, and implementation of sparse systems, algebraic eigenvalue problem. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

271A. Tensor Analysis. (4) Requisite: course 131A. Algebra and calculus of tensors on n-dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

Probability and Statistics

275A-275B. Probability Theory. (4-4) Requisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorems, conditioning, ergodic theory, martingale theory.

275E. Stochastic Particle Systems. (4) Lecture, three hours. Requisite: course 275C. Markov processes, interacting particle systems, including contact process, stochastic lasing model, and exclusion processes; percolation theory. S/U or letter grading.

275F. Structural Equation and Graphical Models. (4) Lecture, three hours. Preparation: two quarters of graduate-level statistics, such as courses 276A-276B or equivalent sequence in another department. Statistical and causal dependencies. Linear structural equations, latent variables, categorical variable models, multilevel structures, hierarchical sampling plans. Conditional, unconditional statistical theory. Causal diagrams, directed acyclic graphs, conditional-independence models for continuous, categorical, mixed data. Parameter estimation, identification, model testing, policy analysis.

M282B. Conditioning, Markov chains, Poisson process, Brownian motion, stationary processes, applications. M282B. Simulation, renewal theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology.

Special Studies

285A-285N. Seminars. (4 each) Formerly numbered 285A-285L. Seminar, three hours. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading.

285A. History and Development of Mathematics.
285B. Number Theory.
285C. Algebra.
285D. Logic.
285E. Geometry.
285F. Topology.
285G. Analysis.

285H. Differential Equations.
285I. Functional Analysis.
285K. Probability.
285N. Dynamical Systems.

290. Seminar: Current Literature. (4) Designed for Ph.D. students. Readings and presentations of papers in mathematical literature under supervision of a staff member.

296A-296N. Participating Seminars. (1 to 4 each) Formerly numbered 296A-296M.) Seminars and discussion by staff and students. S/U grading.

296A. History and Development of Mathematics.
296B. Number Theory.
296C. Algebra.
296D. Logic.
296E. Geometry.
296F. Topology.
296G. Analysis.
296H. Differential Equations.
296I. Functional Analysis.
296J. Applied Mathematics.
296K. Probability.
296M. Mathematics.
296N. Dynamical Systems.

330. Observation and Participation: Mathematics and Science Instruction. (1 to 2.) Seminar, one hour; classroom observation and participation, two hours. Observation, participation, or tutoring in mathematics and science classes at middle school and secondary levels. May be repeated for credit. P/NP (undergraduates) or S/U (graduates) grading.

370A-370B. Teaching of Mathematics. (4-4) Lecture, three hours; discussion, one hour. Requisite: course 33B. Limited to senior mathematics department majors. Course 370A is requisite to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Mathematics. (2) Seminar, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new Ph.D. students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (eight units) may be applied toward M.A. degree unless departmental consent is obtained. S/U or letter grading.

Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is
strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses C++), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 15, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in Computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

**Lower Division Courses**

1. **Introduction to Computers and Computing.** (4) Lecture, three hours; laboratory, one hour. Not open for credit to students with credit for course 15 or 10A; may not be taken concurrently with course 15 or 10A. Fundamentals of computers and computing editors, spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/NP or letter grading.

2. **Software Tools for Information Management.** (1) Lecture, one hour; laboratory, two hours. Preparation: some familiarity with computers. Not open for credit to students with credit for course 1; may not be taken concurrently with course 1. May be taken by students with credit for more advanced courses. Introduction to spreadsheets and databases in a laboratory setting. P/NP grading.

3. **Introductory FORTRAN Programming.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A receive only two units of credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced program in computing courses should take course 10A rather than this course.

4. **Introduction to Programming.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended for students with no prior computing experience: course 1. Students with credit for course 3 receive only two units of credit for this course. No prior programming experience assumed. Basic principles of programming, using C++; algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

5. **Intermediate Programming.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Abstract data types and their implementation using the C++ class mechanism; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications; object-oriented programming and software reuse; recursion; algorithms for sorting and searching.

6. **Advanced Programming.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. More advanced algorithms and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms.

7. **Introduction to LISP and Symbolic Computation.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

8. **Programming for Internet in Java Language.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. Introduction to Java computer language. Class and interface hierarchies; graphics components and graphical user interfaces; streams; multithreading; event and exception handling. Issues in class design and design of interactive Web pages. P/NP or letter grading.

10. **Special Topics in Programming.** (1 to 4) Lecture, one to three hours; discussion, zero to one hour. Enforced prerequisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

**Upper Division Courses**

110. **Parallel and Distributed Computing.** (5) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B or equivalent familiarity with programming in C or C++ language. Introduction to programming of parallel computers. Shared and distributed memory parallel architectures; currently available parallel machines; parallel algorithms and program development; estimation of algorithmic performance; distributed computing; selected advanced topics.

116. **Advanced Topics in Programming.** (2 to 4) Lecture, one to three hours; discussion, one to two hours. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

**Graduate Courses**

285C. Computational Algebra.

285D. Logic and Theory of Computation.

285K. Randomness and Computation.

285L. Computational Statistics.

296. Participating Seminar: Logic and Theory of Computation. (1 to 4) Seminar and discussion by staff and students. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**Mathematics/Economics**

Interdepartmental Program

mathecon.htm

Robert F. Brown, Ph.D., Chair
Professors
Kirby A. Baker, Ph.D. (Mathematics)
Robert F. Brown, Ph.D. (Mathematics)
Bryan C. Ellickson, Ph.D. (Economics)
Jonathan D. Rogawski, Ph.D. (Mathematics)
William R. Zame, Ph.D. (Economics)

**Scope and Objectives**

In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated. Mathematically competent economists, with bachelor's degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require strong undergraduate preparation in mathematics for admission.

The B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and the parts of economics that emphasize the use of mathematics and statistics.

**Undergraduate Study**

Mathematics/Economics
B.S.

**Preparation for the Major**

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

**The Major**

Required: Seven Mathematics Department courses, including Mathematics 110A or 117,
Aerospace Engineering B.S.

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, ma-
The Major

Course requirements are as follows (189 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(3) Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical and Aerospace Engineering 131A/131AL, 132A, 133A/133AL, 150C, 150R (heat and mass transfer, thermodynamics, combustion/propulsion); 153A (acoustics); 155, 163A, 164, 169A (unless taken as part of the core), Civil and Environmental Engineering 137L, Electrical Engineering 142 (dynamics and control); Mechanical and Aerospace Engineering 156B, 166C, 168, 193, Civil and Environmental Engineering 130F (structural and solid mechanics); Mechanical and Aerospace Engineering 161A (unless taken as part of the core), 161B, 161C, 161D (space technology); 162A, 162C, M192F (design and mechanisms); Materials Science and Engineering 143A.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Mechanical Engineering B.S.
The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with options in design and manufacturing, dynamics and control, and fluids and thermal engineering.

The Major

Course requirements are as follows (191 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100 (also 110L — see item 2 below), Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(3) Twenty technical elective units, to be selected from the three subject areas listed below, of which at least 12 units (including at least four laboratory units) should be from a single subject area:

(4) Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees

The Mechanical and Aerospace Engineering Department offers Master of Science (M.S.) degrees in Aerospace Engineering, Mechanical Engineering, and Manufacturing Engineering.

Aerospace Engineering and Mechanical Engineering

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program in Aerospace Engineering or in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.mae.ucla.edu/. Forms are also available by writing to the Mechanical and Aerospace Engineering Department, UCLA, 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Areas of Study

Dynamics, fluid mechanics, heat and mass transfer, microelectromechanical systems, structural and solid mechanics, systems and control.

Course Requirements

At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 500 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. The courses should be chosen so that the breadth requirements and the requirements at the graduate level are met. The breadth requirements are only applicable to students who do not have a B.S. degree from an ABET-accredited aerospace or mechanical engineering program.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 156, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Aerospace Engineering

Breadth Requirements. Students are required to take at least three courses from the following four categories: (1) Mechanical and Aerospace Engineering 154A or 154B or 154S; (2) 150B
or 150P; (3) 155A or 166A or 169A; (4) 161A or 171A.

**Graduate-Level Requirement.** Students are required to take at least one course from the following: Mechanical and Aerospace Engineering 250D, 253B, 254A, 254B, 255B, 256F, 263B, 269D, or 271B. The remaining courses can be taken to gain depth in one or more of the several specialty areas covering the existing major fields in the department.

**Mechanical Engineering**

**Breadth Requirements.** Students are required to take at least three courses from the following four categories: (1) Mechanical and Aerospace Engineering 162A or 169A or 171A; (2) 150A or 150B; (3) 131A or 133A; (4) 156A or 156B.

**Graduate-Level Requirement.** Students are required to take at least one course from the following: Mechanical and Aerospace Engineering 231A, 231B, 231C, 250A, 255A, 256A, M256B, M269A, or 271A. The remaining courses can be taken to gain depth in one or more of the several specialty areas covering the existing major fields in the department.

**Comprehensive Examination Plan**

The comprehensive examination, which is offered every quarter, must be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. Students may, in consultation with the adviser and the major field chair, choose to take the comprehensive examination at the time of admission to the M.S. program. In case of failure, students may be reexamined once with the consent of the graduate adviser.

**Thesis Plan**

The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

**Manufacturing Engineering**

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science degree in Manufacturing Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Admission forms, including a departmental supplement to the application, may be obtained at http://www.mae.ucla.edu. Forms are also available by writing to the Mechanical and Aerospace Engineering Department, UCLA, 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

**Areas of Study**

Consult the department.

**Course Requirements**

At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. Choices may be made from the following major areas:

**Undergraduate Courses.** No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

**Upper Division Courses.** Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 163A, 163C, 168, 174, 193, 194, 195.

**Graduate Courses.** Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 263A, 263C, 263D, 280, 293, 294, 295, 296A, 296B, 297.

**Additional Courses.** The remaining courses may be chosen from additional courses listed under the major fields of study in the department or from the following: Architecture and Urban Design 226B, M227B, 227D; Computer Science 241A, 241B; Management 240A, 240B, 240C, 240D, 241A, 241B, 242A, 242B, 243A, 243B, 243C; Mathematics 120A, 120B.

**Comprehensive Examination Plan**

The comprehensive examination, which is offered every quarter must be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. In case of failure, students may be reexamined once with the consent of the graduate adviser.

**Thesis Plan**

The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

**Doctoral Degrees**

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Aerospace Engineering and in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants to the Ph.D. program normally should have completed the requirements for the master’s degree with at least a 3.25 grade point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Admission forms, including a departmental supplement to the application, may be obtained at http://www.mae.ucla.edu. Forms are also available by writing to the Mechanical and Aerospace Engineering Department, UCLA, 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

**Major Fields or Subdisciplines**

Dynamics; fluid mechanics; heat and mass transfer; manufacturing and design (mechanical engineering only); microelectromechanical and solid mechanics; systems and control.

Ph.D. students may propose ad hoc major fields, which must differ substantially from established major fields and satisfy one of the following two conditions: (1) the field is interdisciplinary in nature; (2) the field represents an important research area for which there is no established major field in the department (condition 2 most often applies to recently evolving
research areas or to areas for which there are too few faculty to maintain an established major field.

Students in an ad hoc major field must be sponsored by at least three faculty members, at least two of whom must be from the department. 

Course Requirements

The basic program of study for the Ph.D. degree is built around major and minor fields. The established major fields are listed above, and a detailed syllabus describing each Ph.D. major field can be obtained from the Student Affairs Office.

The program of study for the Ph.D. requires students to perform original research leading to a doctoral dissertation and to master a body of knowledge that encompasses material from the student’s major field and breadth material from outside the major field. The body of knowledge should include (1) six major field courses, at least four of which must be graduate courses; (2) one minor field; (3) any three additional courses, at least two of which must be graduate courses that enhance the study of the major or minor field.

The major field syllabus advises students as to which courses contain the required knowledge, and students usually prepare for the written qualifying examination (formerly referred to as the preliminary examination) by taking these courses. However, students can acquire such knowledge by taking similar courses at other universities or even by self-study.

The minor field embraces a body of knowledge equivalent to three courses, at least two of which must be graduate courses. Minor fields are often subsets of major fields, and minor field requirements are then described in the syllabus of the appropriate major field. Established minor fields with no corresponding major field can also be used such as applied mathematics, and applied plasma physics and fusion engineering. Also, an ad hoc field can be used in exceptional circumstances, such as when certain knowledge is desirable for a program of study that is not available in established minor fields.

Grades of B– or better, with a grade-point average of at least 3.33 in all courses included in the minor field, and the three additional courses mentioned above are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only).

Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the major field, students take a written qualifying (preliminary) examination covering this knowledge. Students must have been formally admitted to the Ph.D. program or admitted subject to completion of the M.S. degree by the end of the quarter following the quarter in which the examination is given. The examination must be taken within the first two calendar years from the time of admission to the Ph.D. program. Students must be registered during the quarter in which the examination is given and be in good academic standing (minimum GPA of 3.25). The student’s major field proposal must be completed prior to taking the examination. Students may not take an examination more than twice. Students in an ad hoc major field must pass a written qualifying examination that is approximately equivalent in scope, length, and level to the written qualifying examination for an established major field.

After passing the written qualifying examination, students must take the University Oral Qualifying Examination within four calendar years from the time of admission to the Ph.D. program. The nature and content of the University Oral Qualifying Examination are at the discretion of the doctoral committee but include a review of the dissertation prospectus. The examination may include a broad inquiry into the student’s preparation for research.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are “inside” members and must hold appointments at UCLA in the student’s major department in the School of Engineering and Applied Science. The “outside” member must be a UCLA faculty member who does not hold an appointment in the student’s department.

Mechanical and Aerospace Engineering

Lower Division Courses

20. FORTRAN Programming with Numerical Methods Applications. (4) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisites: Mathematics 31A, 31B. Introduction to programming with FORTRAN. Applications to numerical methods used in engineering. Letter grading.

94. Introduction to Computer-Aided Design and Drafting. (4) Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects. Letter grading.

Upper Division Courses

102. Mechanics of Particles and Rigid Bodies. (4) Lecture, three hours; recitation, two hours; outside study, seven hours. Requisites: Mathematics 33A, Physics 1A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications. Letter grading.

103. Elementary Fluid Mechanics. (4) Lecture, three hours; recitation, two hours; outside study, seven hours. Requisites: Mathematics 32B, 33A. Physics 1B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

M105A. Introduction to Engineering Thermodynamics. (4) (Same as Chemical Engineering M105A.) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: Mathematics 32B, Physics 1B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

105D. Transport Phenomena. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: course 103, Mathematics 32B, 33A. Physics 8B. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control. Letter grading.

131AL. Thermodynamics and Heat Transfer Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Letter grading.

133A. Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive fluid flow systems. Letter grading.

133AL. Power Conversion Thermodynamics Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 135A, 157. Experimental study of power conversion and heat transfer systems using state-of-the-art plant process instrumentation and equipment. Experiments include studies of thermodynamic operating characteristics of an actual Brayton cycle, Rankine cycle, compressive refrigeration unit, and absorption refrigeration unit. Letter grading.

134. Design and Operation of Thermal Hydraulic Power Systems. (4) Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

135. Fundamentals of Nuclear Power. (4) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Introduction to nuclear engineering: nuclear physics, neutron cross sections, nuclear fission and fusion; elementary analysis and design of reactors. Criticality, one-group neutron diffusion theory, heat removal, and heterogeneous effects. Letter grading.
136. Thermal Hydraulic Design of Nuclear and Other Power Systems. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Designed for seniors. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, overall plant design, steady state and transient operation. Letter grading.

M140. Introduction to Biomechanics. (4) (Same as Biomedical Engineering M140.) Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 156A. Force dynamics of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Letter grading.

150B. Aerodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 150A. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils (Cl, Cm) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow. Letter grading.

150P. Aircraft Propulsion Systems. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisites: courses M105A, 150A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

150R. Rocket Propulsion Systems. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: courses M105A, 150A. Recommended: course 150P. Rocket propulsion concepts, including chemical rockets (liquid, gas, and solid propellants), hybrid airbreathing-rocket engines, electric (ion plasma) rockets, nuclear rockets, and solar-powered vehicles. Current issues in launch vehicle technologies. Letter grading.

153A. Engineering Acoustics. (4) Lecture, four hours; outside study, eight hours. Designed for junior/senior engineering majors. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aspects. Letter grading.

154A. Preliminary Design of Aircraft. (4) Lecture, four hours; outside study, eight hours. Requisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of a low-speed aircraft. Letter grading.

154S. Flight Mechanics, Stability, and Control of Aircraft. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft; Effects of airplane flexibility on stability derivatives. Letter grading.

155. Intermediate Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 102. Axioms of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft; Effects of airplane flexibility on stability derivatives. Letter grading.

157. Basic Mechanical Engineering Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 103, M105A, 105D, Civil Engineering 108, Electrical Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Letter grading.

157A. Fluid Mechanics and Aerodynamics Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 150A, 150B, 157. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field. Letter grading.

161A. Introduction to Astronautics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 192A. Space environment of Earth, trajectories and orbits, spacecraft and stages, two-body problem, orbital transfer and rendezvous, problem of three bodies, elementary perturbation theory, influence of Earth's oblateness. Letter grading.

161C. Spacecraft Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 161B. Coverage of preliminary design, by students of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, life-time, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole. Letter grading.

161D. Space Technology Hardware Design. (4) Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended requisite or prerequisite: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by SEAS professional machine shop and tested by the students. New project carried out each year. Letter grading.

162B. Mechanical Product Design. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 193. Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project. Letter grading.

162C. Electromechanical System Design Laboratory. (4) Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite: course 162A. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. Assembled machine is instrumented and monitored for operational characteristics. Letter grading.

162M. Senior Mechanical Engineering Design. (4) Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 131A, 133A, 152A, 152B, 159A, 171A. Must be taken in last two academic terms of students' programs. Analytical design course of a large engineering system culminating in its computer simulation. Design factors include efficiency, economy, safety, reliability, and social impact. Final report of engineering specifications and drawings to be presented by design teams. Letter grading.

163A. Introduction to Computer-Controlled Machines. (4) Lecture, four hours; outside study, eight hours. Requisite: course 171A (may be taken concurrently). Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall computer-aided mechanical systems. Motion and command generation, servo-controller design, and computer/machine interfacing. Letter grading.

163C. Robotics and Motion Control Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Hands-on experience with robotic devices and articulated machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multiaxes coordination, programming of industrial robots. Final project required. Letter grading.

166A. Analysis of Flight Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of shafts; combined bending and torsion of thin-walled sections; shear flow, shear-lag; bending of beams. Elements of plate theory; buckling of columns. Letter grading.
166C. Design of Composite Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Letter grading. Term projects using FEM computer codes. Letter grading.

169A. Introduction to Mechanical Vibrations. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102, 192A, Civil Engineering 108. Recommended: Mathematics 33A or 33B. Linear system theory; random variables, distributions, functions of random variables. Design techniques for control of mechanical systems. Letter grading.

171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I. (4) Lecture, four hours; outside study, eight hours. Requisite: course 191A or 192A or Electrical Engineering 102. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and other fields; transfer methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Letter grading.

172. Control System Design Laboratory. (4) Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Successful controller design requires students to formulate performance measures for control problem, experimentally identify mechanical systems, and develop uncertainty descriptions for design models. Exploration of issues concerning model uncertainty and sensor/actuator placement. Students implement control designs on flexible structures, rate gyroscope, and inverted pendulum. Detailed reports required. Letter grading.

174. Probability and Its Applications to Risk, Reliability, and Quality Control. (4) Lecture, four hours; outside study, eight hours. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling, Letter grading.

191A. Complex Analysis and Integral Transforms. (4) Lecture, four hours; outside study, eight hours. Requisite: course 192A. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform; properties, convolution, inversion; Fourier transform; properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction. Letter grading.

194. Introduction to CAD/CAM Systems: Design and Implementation. (4) Laboratory, eight hours; outside study, four hours. Requisites: courses 20, 94. Hands-on experience with CAD/CAM systems design and implementation, with special emphasis on theory of parametric curves and surfaces and their computer interactive graphics implementation. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

231D. Application of Numerical Methods to Transport Phenomena. (4) Lecture, four hours; outside study, eight hours. Requisite: course 132A. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electrical and magnetic fields. S/U or letter grading.

231F. Advanced Heat Transfer. (4) Lecture, four hours; outside study, eight hours. Requisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport. S/U or letter grading.

232B. Advanced Mass Transfer. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration, cooling combustion. S/U or letter grading.

235A. Nuclear Reactor Theory. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 135, 192A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. S/U or letter grading.

236A. Nuclear Materials Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: course 135, Materials Science 143A. Materials requirements for nuclear technologies; radiation effects on mechanical properties, void swelling and creep, fuel and solid breeder swelling and restructuring, gas release, computer codes for swelling and gas release, structural analysis of fission and fusion materials including radiation effects. S/U or letter grading.
250A. Foundations of Fluid Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Corequisite: course 192B. Development and application of fundamental principles of fluid mechanics at graduate level, with emphasis on incompressible flow. Fluid kinematics, basic equations, constitutive relations, exact solutions on the Navier-Stokes equations, vorticity dynamics, decomposition of flow fields, potential flow. Letter grading.

250B. Viscous and Turbulent Flows. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows. S/U or letter grading.

250C. Compressible Flows. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Effects of compressibility in viscous and inviscid flows. Steady and unsteady, inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics. S/U or letter grading.

250D. Hypersonic and High-Temperature Gas Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 192A, 192B, 192C, 250A, 250D. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on techniques of solving unsteady three-dimensional Navier-Stokes equations. Topics include spectral representation of functions, discrete Fourier transform, etc. Letter grading.

250F. Hypersonic and High-Temperature Gas Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Recommended: course 250C. Molecular and chemical description of equilibrium and nonequilibrium high-temperature gas flows, chemical thermodynamics and statistical thermodynamics for calculated gas properties, equilibrium flows of real gases, vibrational relaxation, reaction rate processes, nonequilibrium flows of real gases, and computational fluid dynamics methods for nonequilibrium hypersonic flows. Letter grading.

251A. Stratified and Rotating Fluids. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical, and historical importance. Linear and finite amplitude wave motion. Flow past bodies; blocking phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents. S/U or letter grading.

252A. Stability of Fluid Motion. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. S/U or letter grading.

252B. Statistical Theory of Turbulence. (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include statistical description of turbulence, energy decay, Kolmogorov similarity, analytical theories, and origins of Reynolds stress. S/U or letter grading.

252D. Combustion Rate Processes. (4) Lecture, four hours; outside study, eight hours. Requisite: course 252C. Basic concepts in chemical kinetics: molecular collisions, distribution functions and averaging, semiemipirical and ab initio potential surfaces, trajectory calculations, statistical mechanics, and reactivity. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements. S/U or letter grading.

253A. Advanced Engineering Acoustics. (4) Lecture, four hours; outside study, eight hours. Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. S/U or letter grading.

254A. Special Topics in Aerodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B, 192A, 192B, 192C. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. S/U or letter grading.

254B. Helicopter Dynamics and Aeromechanics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 166A, 169A. Recommended: course 150B. Overview of helicopter dynamics and aeromechanics. Topics include rotor configuration and control systems, rotor aerodynamics and performance, blade flapping dynamics, helicopter rotor aerelasticity, coupled rotor/fuselage dynamics, and control of aeroelastic problems. Letter grading.

255A. Advanced Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear systems; parametric excitation and nonlinear resonance. Application to mechanical systems. S/U or letter grading.

255B. Mathematical Methods in Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear systems; parametric excitation and nonlinear resonance. Application to mechanical systems. S/U or letter grading.

256A. Mechanics of Deformable Solids. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 156B, 156A. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations; general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems. S/U or letter grading.

256B. Elasticity. (4) (Same as Civil Engineering M230.) Lecture, four hours; outside study, eight hours. Requisite: course 256A. Equations of linear elasticity; uniqueness of solution; Betti-Rayleigh reciprocity; Saint-Venant’s principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy’s stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Letter grading.

256C. Plasticity. (4) (Formerly numbered 256C.) (Same as Civil Engineering M239.) Lecture, four hours; outside study, eight hours. Requisites: courses 256A, 256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvaut/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

256F. Analytical Fracture Mechanics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 156A, 156B, 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. S/U or letter grading.

258. Experimental Techniques in Fluid Mechanics and Thermal Science. (4) Lecture, four hours; outside study, eight hours. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods. S/U or letter grading.

259A. Seminar: Advanced Topics in Fluid Mechanics. (4) Seminar, four hours; outside study, eight hours. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers). S/U or letter grading.

259B. Seminar: Advanced Topics in Solid Mechanics. (4) Seminar, four hours; outside study, eight hours. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids. S/U or letter grading.

260. Current Topics in Mechanical Engineering. (2 to 4) (Formerly numbered 260A-260Z.) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U or letter grading.

263A. Electromechanics of Computer-Controlled Machines. (4) Lecture, four hours; outside study, eight hours. Requisite: course 267A. Recommended: courses 168A, 168B, 163C. Mechanics and control problems of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromagnetic and piezoelectric actuators and control systems with mechanical flexibilities. S/U or letter grading.

263B. Spacecraft Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended: courses 255B. Modeling, dynamics, stability, and control of spacecraft. Dynamics of thrust systems, spin spacecraft dynamics; spinup through resonance, spinning rocket dynamics; environmental torques in space, modeling and model reduction of flexible spacecraft. Letter grading.

263D. Advanced Robotics. (4) Lecture, four hours; outside study, eight hours. Recommended preparation: courses 155, 163C, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multi-axes coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, motion planning and control of manipulators in space, obstacle avoidance. Letter grading.

M267A. Optimum Structural Design. (4) (Same as Civil Engineering M240.) Lecture, four hours; outside study, eight hours. Requisite: course 261A or Civil Engineering 225A. Methods of structural systems analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. S/U or letter grading.

267B. Project in Mechanical Engineering. (2 to 4) (Formerly numbered 267A-267Z.) Seminar, two to four hours; outside study, four to eight hours. Projects for third-year students involving design and reporting, with a possible oral presentation and viva voce examination. For advanced senior students. S/U or letter grading.

M269A. Dynamics of Structures. (4) (Same as Civil Engineering M242.) Lecture, four hours; outside study, eight hours. Requisite: course 261A or Civil Engineering 225A. Structural response: eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. S/U or letter grading.

269D. Aeroelastic Effects in Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow-induced instability and response of structural systems. S/U or letter grading.

M270A. Linear Dynamic Systems. (4) (Formerly numbered 270A.) (Same as Chemical Engineering M280A and Electrical Engineering M240A.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Linear systems with a single input and output channel. Special topics. Small-gain theorem and passivity. Multivariable control systems. Linearization of control systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

274. Methods of Probabilistic Safety Assessment. (4) Lecture, four hours; outside study, eight hours. Requisite: course 174. Methods for evaluation of risk from large technological systems; advanced statistical methods for data analysis; models of dependent failures; elicitation and use of expert opinions; human reliability models; propagation of uncertainties in physical models; applications to nuclear power plants, waste repositories, and space systems. Letter grading.

280. Microelectromechanical Systems (MEMS). (4) Lecture, four hours; outside study, eight hours. Requisite: Materials Science 14. Introduction to microelectromechanical systems; basic principles of integrated circuit (IC) manufacturing; bulk micromachining; directional etching and etch-stops; surface micromachining; deposition, selective wet etching, and dry etching; mechanical behavior of thin film-based structures; and applications micromachining chemical vapor deposition, and non-thermal plasmas. An introduction to the fundamentals of MEMS. Letter grading.
280L. Microelectromechanical Systems (MEMS) Laboratory. (4) Lecture, four hours; laboratory, six hours; outside study, five hours. Requisite: course 180. Hands-on micromachining. Mask layout, clean room procedure, lithography, oxidation, LPCVD coatings, evaporation, wet etchings (both isotropic and anisotropic), dry etchings, process monitoring. Students fabricate simple micromechanical devices by both surface and bulk micromachining and test and characterize them. Letter grading.

281. Microsciences. (4) Lecture, four hours; outside study, eight hours. Requisite: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices. Letter grading.

283. Experimental Mechanics for Microelectromechanical Systems (MEMS). (4) Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/thermal properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/ fracture/ fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

290A. Structural Integrity and Durability. (4) Lecture, four hours; outside study, eight hours. Fundamental concepts of structural integrity, damage tolerance, and longevity; linear elastic and elastic-plastic mechanical concepts of structural integrity, damage tolerance, four hours; outside study, eight hours. Fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/ fracture/ fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

294. Advanced CAD/CAM Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 194. CAD/CAM systems design, with special emphasis on computational geometry, path to trajectory conversion, command generation, controller and interpolator design, research topics in CAD/CAM systems. Letter grading.

296B. Thermochemical Processing of Materials. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 193. Thermodynamics, heat and mass transfer, principles of material processing: phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces, and heat sources, natural convection, nucleation and growth of microstructure, etc. Applications with chemical vapor deposition, infiltration, etc. Letter grading.

302. Concurrent Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: Materials Science 194A, Product design, CAD/CAM, engineering analysis integration, project management. Letter grading.

474C. Total Quality Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: course 474B. Total quality management, statistics, probability, off-line quality control, on-line quality control, quality inspection. Letter grading.

497A-497B. Field Project in Manufacturing Engineering. (4-4) Lecture, two hours. Teams of students perform detailed analyses to address problems presented and implement manufacturing solutions within industrial settings. S/U or letter grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus, S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

M190B. Field Studies Seminar: Health Outreach Issues and Interventions. (2 or 4) (Same as Psychiatry M192B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Requisite: course M190A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

M196B. Modeling and Simulation of Biological Systems. (5) (Same as Computer Science M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours; outside study, eight hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematical models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

199. Special Studies. (2 to 6) Individual projects carried out under direction of a faculty member. Special studies in medicine with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

Graduate Courses

M235. Neuroactive Peptides: Molecular Biology to Function. (2) (Same as Neurobiology M235 and Neuroscience M246.) Presentation of current knowledge of gut and brain peptides by surveying their experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

M260A-M260B. Methodology in Clinical Research I, II, (6-6) (Same as Biostatistics M260A-M260B.) Lecture, three hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

M270C. Modeling Methodology for Biomedical Systems. (4) (Same as Computer Science M296A.) Lecture, four hours; outside study, eight hours. Recommended preparation: course M196B, some intermediate knowledge of linear systems analysis or linear algebra (e.g., Mathematics 115A, Electrical Engineering 141, 142, Mechanical and Aerospace Engineering 171A). Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems, including dynamic system experiment/model development, compartmental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. S/U or letter grading.

M270D. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Biostatistics M270 and Computer Science M296B.) Lecture, four hours; outside study, eight hours. Requisite: course M270C. Estimation methodology and model parameter estimation algorithms for quantifying fitting dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design. S/U or letter grading.

Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught information acquisition through history taking, physical examination, and laboratory evaluation; information synthesis through achieving a differential diagnosis and evaluative plan; and medical decision making for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Medicine

Upper Division Courses

M190A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (4) (Same as Psychiatry M192A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

Microbiology and Immunology / 428
Scope and Objectives

The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises, and academic positions.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

Admission

The department does not accept students whose sole objective is the Master of Science degree in Microbiology and Immunology.

Areas of Study

See Doctoral Degree.

Course Requirements

The department does not have specific requirements for the master's degree, as it rarely confers the degree. However, nine courses, at least five of which must be graduate-level courses, and the successful completion of both the written and oral qualifying examinations are necessary to be considered for a terminal master's degree by the Graduate Affairs Committee. Eight units of 500-series courses may be applied toward the total course requirement of which four units may be applied to the graduate-level course requirement.

Comprehensive Examination Plan

Students must pass both the doctoral written and oral qualifying examinations.

Thesis Plan

None.

Doctoral Degree

Admission

Students are admitted to the program leading to the Ph.D. degree in Microbiology and Immunology through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051. For information and applications contact the ACCESS Program Office directly.

Under very special circumstances, prospective students may obtain permission to apply directly to the department. Information is available from the graduate adviser.

Major Fields or Subdisciplines

Students are expected to be competent in both microbiology and immunology. However, thesis work must be done in one of the following divisions: immunology, medical microbiology, or virology.

Course Requirements

(1) Biological Chemistry CM253

(2) One of the following three courses: Neurobiology M209A, Microbiology and Immunology M229, and Biological Chemistry CM267.

(3) Two seminar courses related to cell and molecular biology.

To be completed by the end of the second year:

(1) One of the following three courses is also required: Microbiology and Immunology M208, M227, M261.

(2) One additional lecture course in the field of molecular life sciences.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The departmental written examination is to be taken at the end of the first year of study and no later than the Fall Quarter of the second year. The examination is in the form of a "mini" grant proposal and focuses on one or a few specific questions asked by the student's current research project. The examination is graded on a pass/fail/review and resubmit basis. Students who do not pass the examination on the first attempt must pass it within three months of the original submission date.

Oral Qualifying Examination. The University Oral Qualifying Examination is to be taken within three years (nine quarters) of entrance into the program. Advancement to candidacy is awarded on successful completion of this examination. If inadequacies are encountered, students may be required to repeat the examination. The examination consists of three parts.

Research Proposal. Students must prepare a written research proposal and present the proposal orally to their dissertation committee. The topic of the proposal must be in an area different from that of the thesis project. The topic should be within the fields of interest in the department (i.e., immunology, bacteriology, virology, molecular biology, mycology, and parasitology). The proposal must utilize an approach different from that employed in the student's own research. That is, students should not apply their own methodology to another system. The proposal should follow a standard grant format but not necessarily a National Institutes of Health (NIH) grant format. This is decided between the student and the student's preceptor.

Student Research. Students should be able to discuss their own research plans and results to date.

General Scientific Background. Students are also examined on general knowledge of microbiology and immunology.

Dissertation Seminar. Once students have completed the dissertation, they are required to present an overview of their dissertation work in an open seminar at which their committee is present.
Microbiology and Immunology

Upper Division Courses

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Microbiology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM232. P/NP or letter grading.

M185A. Immunology. (5) (Same as Microbiology M185A and Molecular, Cell, and Developmental Biology M185A.) Lecture; three hours; discussion, 90 minutes; outside study, 11.5 hours. Requisites: Life Sciences 3, 4, or highest prerequisite course or corequisites: Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Not open for credit to students with credit for course M251 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunocommunity; cellular and molecular aspects of humoral and cellular immune reactions.

190. Directed Individual Research Studies in Microbiology and Immunology. (2 to 8) Preparation: submission of written research proposal. Limited to seniors. Individual research projects carried out under direction of a professor.

199H. Honors Thesis (4 or 8 units). Tutorial, to be arranged. Limited to microbiology and molecular genetics honors program students. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of four units may be applied toward the microbiology and molecular genetics major. P/NP or letter grading.

Graduate Courses

201. Microbiology and Immunology. (8) Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

202A. Fundamentals of Immunology. (2) Introduction to experimental immunobiology and immunocommunity; cellular and molecular aspects of humoral and cell-mediated immune functions.

202B. Medical Bacteriology. (2) Characteristics of bacteria rickettsiae and chlamydiae associated with diseases of humans; host/parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity.

202C. Medical Virology. (2) Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses.
M261. Molecular and Cellular Immunology. (6) (Same as Microbiology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

M262A. Seminar: Current Topics in Immunobiology of Cancer. (2) (Same as Microbiology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

M262D. Selected Topics in Immunology. (2) (Same as Microbiology M262D.) Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

M263. Molecular and Cellular Immunology Seminar. (2) (Same as Microbiology M263.) Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

M268. Molecular Parasitology. (4) (Same as Microbiology CM268 and Molecular, Cell, and Developmental Biology CM268.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Letter grading.

271. Immunology Overview. (2) Lecture, two hours; discussion, one hour. Designed for graduate students. Identification of major components of immune system, their modes of active maturation and regulation, cytokine signaling systems, principal effector mechanisms, and immune contributions to autoimmunity and hypersensitivity.

274. Interactions of Immune System and Nervous System. (2) Lecture, one hour; discussion, one hour. Designed for 10 graduate and postdoctoral immunology, behavioral sciences, and neurosciences students. Study of existing knowledge of interrelationships between central and peripheral nervous system and immune system. Review of research on central nervous system effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

M275. Biology of HIV. (4) (Same as Epidemiology M228.) Lecture, three hours. Preparation: two biology courses. Requisites: Biostatistics 100A, Epidemiology 100. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. Letter grading.

M285. Intermediate Immunology. (4) (Same as Microbiology CM285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisite: course M185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A.

M293. Major Concepts in Oncology. (4) (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

M294L. Cancer Histopathology Laboratory. (2) (Same as Microbiology M294L and Pathology M294L.) Lecture, one hour; laboratory, two hours. Requisites: courses M229 or Neurobiology M209A, M294 (preferred) or M293, Biological Chemistry CM253, CM267. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Laboratory, to be arranged. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 6) Tutorial, to be arranged.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

Owen N. Witte, M.D. (President’s Professor of Developmental Immunology)

Professors Emeriti
June Lascelles, Ph.D.
Rafael J. Martinez, Ph.D.
Donald P. Nierlich, Ph.D.
William R. Romig, Ph.D.
Eli E. Sercarz, Ph.D.
Jack G. Stevens, D.V.M., Ph.D. (M. Philip Davis Professor Emeritus of Microbiology and Immunology)

Associate Professors
Douglas L. Black, Ph.D.
David A. Campbell, Ph.D.
Lawrence T. Feldman, Ph.D.
Otisore Martinez-Maza, Ph.D.
Olaf Schnieewind, M.D., Ph.D.
Robert W. Simons, Ph.D.
Jerome Zack, Ph.D.

Assistant Professors
David D. Chang, M.D., Ph.D.
Genhong Cheng, Ph.D.
M. Carrie Miceli, Ph.D.
Dominique M. Missiakas, Ph.D.
Kohnsukes M. Mitanii, Ph.D.

Adjunct Associate Professor
David Bianco, Ph.D.

Adjunct Assistant Professors
Peggy Cotter, Ph.D.
Ralph Robinson, Ph.D.
Imke Schroder, Ph.D.

Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in Microbiology and Molecular Genetics prepare for careers in biomedical research, medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine.
Students interested in a fundamentally disease-oriented approach to microbiology should see the Microbiology and Immunology Department description.

**Undergraduate Study**

**Microbiology and Molecular Genetics B.S.**

**Preparation for the Major**

**Life Sciences Core Curriculum**

**Required:** Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 14D, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C— or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

To be admitted as Microbiology and Molecular Genetics majors, transfer students with 60 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2; one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Students intending to major in Microbiology and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

**The Major**

**Required:** Microbiology and Molecular Genetics 101, 101L, 102, 102L, C106, C159, M185A; Chemistry and Biochemistry 153A, 153C, 153L; four additional upper division courses from the departmental list or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 grade-point average in the major. A maximum of four units of Microbiology and Molecular Genetics 199 or Microbiology and Immunology 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

**Honors Program**

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty adviser from the Department of Microbiology and Molecular Genetics or the Department of Microbiology and Immunology. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, students are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Spring Quarter for the elective program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master's Degree**

**Admission**

Applicants for the program leading to the Master of Arts degree in Microbiology and Molecular Genetics must obtain faculty sponsorship before submitting an application and, in addition to the other application materials (see Ph.D. application procedures), must submit a five-page research proposal describing the thesis problem. Information and the proposal format are available from the graduate adviser's office.

The department accepts relatively few students whose objective is a master's degree and does not encourage application.

**Areas of Study**

Consult the department.

**Course Requirements**

A total of nine courses is required for the M.A. degree, and five courses must be at the graduate level. Required courses are specified on an individual basis by the initial advisory committee (three faculty members) which generally becomes the thesis committee.

There is no limit to the number of times Microbiology and Molecular Genetics 598 may be repeated. It is graded S/U only and can be taken for two to 12 units per quarter. A maximum of two courses (eight units) in the 500 series may apply to the nine-course (36 units) M.A. degree requirements, with only one course (four units) applying toward the five-course (20 units) graduate course requirement.

**Comprehensive Examination Plan**

None.

**Thesis Plan**

The thesis committee is established shortly after admission to the program. A committee member outside the department is not required but highly recommended. The department offers only a thesis plan for the master's degree.

**Doctoral Degree**

**Admission**

Admission to the program leading to the Ph.D. degree in Microbiology and Molecular Genetics is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

Under special circumstances, new Ph.D. students may be admitted directly. The following criteria apply for new Ph.D. students admitted directly to the program

Applicants must have completed an undergraduate major in microbiology or a related field with superior scholastic achievement and should have preparation in calculus, physics, biology, genetics, physical, organic and biochemistry, and microbiology. In certain cases, on recommendation of the graduate adviser and the departmental admissions committee, background deficiencies may be remedied concurrently with graduate studies. The Graduate Record Examination (GRE) General Test is required for admission, and the Subject Test in Biochemistry, Cell and Molecular Biology, Chemistry, or Biology is recommended. Three letters of recommendation from individuals who can provide direct knowledge of both the applicant's academic record and potential for superior achievement in independent research are required. The GRE scores and letters should be submitted directly to the department. The department generally accepts students in Fall Quarter only. Under exceptional circumstances the Graduate Admissions Committee may agree to admit a student in Winter or Spring Quarter. Completion of a master's degree is not normally required.

**Major Fields and Subdisciplines**

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphology, animal virology, general bacteriology and physiology, host/pathogen relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research in all of these fields. The objective of the department is to provide depth and training in independent study and research for graduate students.

**Course Requirements**

**Formal Lecture/Laboratory Courses.** (1) Biochemistry: Chemistry and Biochemistry CM253 (six units; offered only in Fall Quarter; to be completed during the first year); (2) Cell Biology: Chemistry and Biochemistry M267 or Neurobiology M209A or Microbiology and Molecular Genetics M229.
A total of eight additional units of 200-level coursework to be selected from at least two of the following four subject areas is required. These courses may be selected to remedy background deficiencies or to deepen knowledge of a particular subject area. Acceptable courses include the following:

1. General microbiology: Microbiology and Molecular Genetics C211, C212.
2. Host/parasite interactions and virology: Microbiology and Molecular Genetics C206, Microbiology and Immunology M208.
3. Immunology: Microbiology and Molecular Genetics M185A, M261, or CM285.
4. Genetics and regulation: courses from current listings maintained in the department office.

Other courses may be accepted with written consent of the departmental graduate adviser and the student's advisory committee.

**Student-Participation Seminar Courses.** Each quarter, seminar courses in which students read and report on current scientific research literature are organized. Students must enroll in five such courses (10 units) during their first five years in residence.

**Laboratories.** During the first 12 months in residence, students rotate for one quarter each through three laboratories. Students normally enroll in Microbiology and Molecular Genetics 596 for a minimum of four units of credit for each rotation.

**First-Year Proposal.** By August 15 of the first year of study students must submit an original research proposal of approximately six double-spaced pages. Students should choose a current paper in an area of interest in which the next experiment is fairly obvious, possibly even suggested in the discussion. The experiment should be designed with appropriate controls and succinctly presented along with the interpretation of possible results. The proposal should be focused on one or a very few specific questions. It is unacceptable to submit a duplicate or revised version of a previous class assignment (for example, Biological Chemistry CM253). Suggestions and evaluations are returned to the student and used by the faculty to evaluate continuation into the second year.

**Written and Oral Qualifying Examinations**

The oral examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. These periods may be extended with the written consent of the departmental graduate adviser and the student's mentor.

The examination is administered by the doctoral committee which normally serves as the dissertation committee as well. As a major part of the examination, students prepare and defend a written research proposal. Before presentation to the doctoral committee, the students are encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both the student's proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess the student's preparation and qualifications.

**Microbiology and Molecular Genetics**

**Lower Division Courses**

6. **Introduction to Microbiology.** (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 101, Life Sciences 2, or former Biology 5. Described for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

7. **Developments in Biotechnology.** (4) Lecture, three hours; demonstration, one hour; outside study, eight hours. Recommended prerequisite: course 6 or Biology 2 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

10. **Applied Medical Microbiology.** (5) Lecture, three hours; laboratory, five hours; outside study, eight hours. Enforced prerequisite: Life Sciences 2. Designed for students interested in medical microbiology and those going into allied health professions. Not open for credit to students with credit for course 101; does not substitute for course 101 in the major. Introduction to biology of bacteria and their role in diseases of humans. Letter grading.

**Upper Division Courses**

101. **Fundamentals of Bacteriology.** (5) Lecture, three hours; discussion, one hour; computer/multimedia laboratory, one hour. Requisites: Chemistry 153A, Life Sciences 3. Recommended: Life Sciences 4. Recommended corequisite: course 101L. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology.

101L. **Bacteriology Laboratory.** (3) Discussion, one hour; laboratory, six hours. Requisites: Chemistry 153A, Life Sciences 3. Recommended: Life Sciences 4. Recommended corequisite: course 101 (or 101 with a grade of C or better if previously taken). General laboratory techniques and theory in microbiology and molecular genetics, including isolation and identification of bacterial species from nature, transformation of Escherichia coli, Ames test, analysis of auxotrophic mutants.

102. **Introductory Virology.** (4) Lecture, three hours; discussion, one hour; Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended: Chemistry 153A. Recommended corequisite: course 102L. Introduction to viral genetics, virological properties, replication, methods of detection, interactions with host cells and multicellular hosts.

102L. **Virology Laboratory.** (2) Discussion, one hour; laboratory, four hours. Requisites: Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended corequisite: course 102 (or 102 with a grade of C or better if previously taken). General laboratory techniques and theory in virology, including complementation, recombination, transduction, experiments in animal virology using tissue culture.

C106. **Molecular and Genetic Basis of Bacterial Infections.** (4) Lecture, three hours; discussion, one hour. Requisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206.

C111. **Biology of Prokaryotic Cell.** (4) Lecture, three hours; discussion, one hour. Requisites: course 101, Chemistry 153C. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211.

C112. **Molecular Biology of Bacterial Growth.** (4) Lecture, three hours; discussion, one hour. Requisites: course 101, Chemistry 153A, 153L, Life Sciences 4. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C212.

120. **Advanced Techniques in Microbiology.** (4) Lecture, one hour; laboratory, six hours. Requisites: courses 101 and 101L, with grades of B or better. Techniques used in research laboratories in microbiology/biotechnology field. Introduction to current techniques. Practical and theoretical background of these techniques. Interested qualifying students to be given opportunity to participate in summer internships.

CM133. **Principles, Practices, and Policies in Biotechnology.** (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM234. P/NP grading.

C134. **Ethics and Accountability in Biomedical Research.** (2) Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course CM234. P/NP grading.

CM156. **Human Genetics.** (4) (Same as Human Genetics CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.
C159. Advanced Molecular Genetics. (5) Lecture, three hours; discussion, two hours. Requisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C259.

CM165. Bioprocess Technology. (4) (Same as Chemical Engineering CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Requisites: course 101, Chemical Engineering C115, Chemistry 156. Current bioprocess technologies involving microorganisms, especially extremophiles, and novel biochemical pathways. Concurrently scheduled with course CM265. Letter grading.

CM168. Molecular Parasitology. (4) (Same as Molecular, Cell, and Developmental Biology CM168.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course CM268. Letter grading.

M176. Advanced Topics in Animal Virus/Host Interaction. (4) (Same as Molecular, Cell, and Developmental Biology M176.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Life Sciences 3, 4. Recommended: course 102 or Chemistry 153B or Molecular, Cell, and Developmental Biology 144. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understanding of entry, replication, and spread of animal viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required.

M212. Molecular Biology of Bacterial Growth. (4) Lecture, three hours; discussion, one hour. Requisites: course 101, Chemistry 153C. Analysis of bacterial growth at the molecular level, including genetic, transcriptional, and regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course M223. Level of entry: junior/senior.

C211. Biology of Prokaryotic Cell. (4) Lecture, three hours; discussion, one hour. Requisite: course 101, Chemistry 153C. Review of current knowledge of structural and functional biology of bacteria. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211. Term paper on research topic selected by each graduate student required.

M216. Membrane Research Seminar. (2) Seminar, 30 minutes; discussion, 90 minutes. Requisite: course 101. Designed for graduate students. Back-up on each of developmental systems in bacillus, mycobacteria, dicyostelium, and streptococcus. Student analysis and discussion of recent publications in each of these areas. S/U or letter grading.

M223. Membrane Research Seminar. (2) (Same as Microbiology and Immunology M223.) Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

M226A-M226B. Principles of Microbial Pathogenesis. (4-4) (Same as Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. S/U grading.

M226A. Bacterial and Mycotic Infections; M226B. Parasitic and Viral Infections.

M227. Molecular Genetics of Bacteria and Phage. (4) (Same as Chemistry M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM227.) Lecture, three hours; discussion, one hour. Requisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

M229. Cellular Biology of Host/Pathogen Interaction. (6) (Same as Microbiology and Immunology M229 and Molecular, Cell, and Developmental Biology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogenic, eukaryotic host cells, and interaction between pathogens and host.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scale-up strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

CM234. Ethics and Accountability in Biomedical Research. (2) (Same as Microbiology and Immunology M234.) Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject protection, and adherence to institutional standards and certain international laws and regulations. Concurrently scheduled with course C134. S/U grading.

M240. Cytokines and Reproductive Biology. (2) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

242. Seminar: Microbial Molecular Genetics. (2) Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic cellular and molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

M246. Computer Analysis of Genetic Organization. (4) (Same as Microbiology and Immunology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Requisite: course C159 or Life Sciences 4. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

250. Seminar: Microbial Metabolism. (2) Discussion and student presentations of recent work in areas of genetic regulation and physiology of bacterial metabolism.
251. Seminar: Regulation and Differentiation. (2) S/U grading.

M252. Seminar: Microbial Pathogenesis. (2) (Same as Microbiology and Immunology M252.) Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

254. Pre-mRNA Processing in Cellular Metabolism and Differentiation. (2) Seminar, three hours. Designed for graduate students. Reading and discussion of papers dealing with mRNA metabolism and posttranscriptional control of gene expression. From detailed RNA chemistry and autocatalytic reactions to more recently described and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation, and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

255. Seminar: Microbial Cell Biology. (2) Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit.

CM256. Human Genetics. (4) (Same as Human Genetics CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cyto genetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

CM259. Advanced Molecular Genetics. (5) Lecture, three hours; discussion, two hours. Requisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C159.

M260. Immunology Forum. (2) (Same as Microbiology and Immunology M260.) Requisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

M261. Molecular and Cellular Immunology. (6) (Same as Microbiology and Immunology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

M262A. Seminar: Current Topics in Immunobiology of Cancer. (2) (Same as Microbiology and Immunology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

M262D. Selected Topics in Immunology. (2) (Same as Microbiology and Immunology M262D.) Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

M263. Molecular and Cellular Immunology Seminar. (2) (Same as Microbiology and Immunology M263.) Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

CM265. Bioprocess Technology. (4) (Same as Chemical Engineering CM265.) Lecture, two hours; laboratory, eight hours; outside study two hours. Requisites: courses 101, Chemical Engineering C115, Chemistry 156. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioreversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165.

266. Genetic Mechanisms Seminar. (2) Seminar, three hours; outside study, three hours. Designed for students in Predoctoral Training Program in Genetic Mechanisms. Current research topics in genetics. May be repeated for credit. S/U grading.

CM268. Molecular Parasitology. (4) (Same as Microbiology and Immunology M268 and Molecular, Cell, and Developmental Biology CM268.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course CM168. Letter grading.

CM285. Intermediate Immunology. (4) (Same as Microbiology and Immunology M285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisite: course M185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

290. Seminar: Molecular Genetics. (2) Seminar, one hour; discussion, one hour. Designed for graduate students. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U grading.

M294. Cancer Histopathology Laboratory. (2) (Same as Microbiology and Immunology M294L and Pathology M294L.) Lecture, one hour; laboratory, two hours. Requisites: course M229 or Neurobiology M209A, Biological Chemistry CM253, CM257, and Pathology M294 (preferred) or M293. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

296A-296Z. Seminars: Research Topics in Microbiology and Molecular Genetics. (1 to 4 each) Discussion, three hours. Advanced study and analysis of current topics in microbiology and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.
The graduate program seeks to prepare students in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Starting with the biochemistry and pharmacology of drugs, departmental investigators study gene expression and its regulation, signal transduction processes, cell-to-cell communication, viral replication and pathogenesis, autoimmunity, and integrative organ functions using techniques of structural chemistry and biology, molecular and cell biology, transgenic and chimeric mice, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Biological Imaging and the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Note: There is no degree program in pharmacy at UCLA.

Master’s Degree

Admission

The Master of Science (M.S.) degree in Pharmacology is offered only under special circumstances: for example, to candidates who already have a doctoral degree in another field and wish to obtain additional training in pharmacology or to those doctoral students who are already in the program and who for some reason cannot continue for the Ph.D. To obtain the M.S. degree, students must formally request approval by the graduate training committee. If approved, a graduate committee, proposed by students and approved by the graduate training committee, reviews the thesis. None of the research conducted for the M.S. thesis may be applied to a Ph.D. degree later.

Areas of Study

Consult the department.

Course Requirements

The M.S. degree requires satisfactory completion of the required courses as listed under doctoral course requirements below, excluding three quarters of Molecular and Medical Pharmacology 200.

Comprehensive Examination Plan

None.

Thesis Plan

The M.S. degree requires satisfactory completion of a thesis.

Doctoral Degree

Admission

In addition to meeting University requirements for graduate admission, applicants to the program leading to the Ph.D. degree in Pharmacology must have received a bachelor's degree in a biological or physical science or in the premedical curriculum. Requisite courses include basic biology, basic chemistry, organic chemistry, and biochemistry, including laboratory. Quantitative analysis and physical chemistry are recommended.

In suitable cases, students who have course deficiencies may be admitted to graduate status, but any deficiencies have to be removed within a specified time. Graduate Record Examination (GRE) scores and three letters of recommendation are required.

Applicants may write to the department for a departmental brochure and/or application form.

Students may also enter the program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

The Department of Molecular and Medical Pharmacology offers two M.D./Ph.D. programs concurrently with the UCLA School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the School of Medicine in order to qualify. The second is the Speciality Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

Major Fields or Subdisciplines

Cardiovascular pharmacology; chemical pharmacology; medical pharmacology; immunopharmacology; neuroendocrine pharmacology; neuropharmacology; psychopharmacology; nuclear medicine (positron emission tomography); pharmacokinetics.

Course Requirements

Required: Molecular and Medical Pharmacology 200 (three quarters), 211A-211B, 212A-212B, 234A-234B, 237A-237B, 241, 251 (must be taken every quarter), and two electives chosen from Molecular and Medical Pharmacology M265, Biological Chemistry CM253, CM267 or Neurobiology M209A, Physiology 201A-201B/M203A-M203B, or a course in biostatistics.

These requirements are waived for students who have passed equivalent courses with grades of B or better within the past 36 months. Students are required to maintain a grade-point average of 3.0 in all coursework and to achieve grades of B or better in all molecular and medical pharmacology courses. One grade of less than B in a required molecular and medical
pharmacology course results in probationary status; the course must be repeated with a grade of B or better; two grades of less than B result in recommendation to the graduate dean for dismissal. A single grade below B in any of the other required courses results in probationary status as well. Any student with two grades less than B in any of the nonmolecular and medical pharmacology courses is considered by the graduate training committee for dismissal. A total of three grades below B in any of the required courses results in recommendation to the graduate dean for dismissal.

All required coursework should be completed by the end of the sixth quarter.

The department provides a system of laboratory rotations (Molecular and Medical Pharmacology 200) in order to familiarize students with a variety of pharmacological research areas and techniques. During the first year in the department, students participate in projects of the laboratories of their choosing. Students also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of their own research areas.

Students must submit a report on their activities at the end of each quarter of Molecular and Medical Pharmacology 200 to research advisers. The report should include the nature of the project, how the student participated, the results obtained, and a critical evaluation of the project. A copy of this report and an evaluation form by the research adviser is submitted to the graduate training committee. A report on the student and the final grade is also submitted to the committee by the research adviser.

For students entering through UCLA ACCESS, required courses include Molecular and Medical Pharmacology 237A, 241, 251 (each term after entering a pharmacology laboratory for dissertation research), Biological Chemistry CM253, and CM267 or Neurobiology M209A. Recommended electives include Molecular and Medical Pharmacology 211A, 211B, 212A, 212B, 234A, 234B, 237B, M255, Physiology 210A-210B/M203A-M203B, and one biostatistics course. Students may use course 200 or courses in other departments for the three required laboratory research rotations.

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals.

**Written and Oral Qualifying Examinations**

After completing all required courses, students take a departmental comprehensive examination consisting of a written part and an oral part. The examination panel then recommends continuation toward the Ph.D. degree, further remedial study, or termination. The examination tests for a rational analytical approach to problem solving and for ability to integrate material learned in different courses. Students are required to know basic principles of pharmacology and the status of topics of current interest in pharmacology.

After passing the departmental comprehensive examination, students must take the University Oral Qualifying Examination within 24 months. The examination is administered by the doctoral guidance committee. The examination concentrates on the background literature, experimental methods, and implications of the field of interest and dissertation project.

If any one of the above required examinations is failed, students may be reexamined at a later date determined by the guidance committee.

**Molecular and Medical Pharmacology**

**Upper Division Courses**

110A-110B. Drugs: Mechanisms, Uses, and Misuse. (4-4) (Formerly numbered 110.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Chemistry 15, Life Sciences 2, 3. Course 110A is required to 110B. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse.

199. Special Studies. (2 to 8) Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students.

**Graduate Courses**

200. Introduction to Laboratory Research. (2 to 4) Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

203. Medical Pharmacology. (2) Lecture, zero to two hours; discussion, zero to two hours. Requisites: courses 211A-211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs.

211A-211B. Principles of Pharmacology. (4-2) Lecture, three to eight hours; discussion, zero to nine hours. Preparation: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine.

M221. Cellular and Molecular Neurochemistry. (4) [Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M224, and Psychiatry M221.] Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor-effector coupling. S/U or letter grading.

al, tissue, cellular, and molecular levels, emphasizing receptors, receptor-effector coupling, neurotransmitters, autonomic and central nervous system pharmacology.

M248. Introduction to Biological Imaging. (4) [Same as Biomedical Physics M248.] Lecture, three hours; laboratory, one hour. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories.

251. Seminar: Pharmacology. (2) Seminar presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

M255. Biological Catalysis. (4) [Same as Biological Chemistry M255, Chemistry CM255, and Molecular, Cell, and Developmental Biology CM252.] Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or CM139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

M257. Introduction to Toxicology. (4) [Same as Pathology M257.] Requisites: course 241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

M258. Pathologic Changes in Toxicology. (4) [Same as Pathology M258.] Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

288. Gene Therapy. (4) Lecture, three hours; discussion, one hour. Introduction to basic concepts of gene therapy, wherein treatment of human disease is based on transfer of genetic material into an individual. Molecular basis of disease, gene delivery vectors, and animal models. Letter grading.

291. Special Topics in Pharmacology. (2 to 4) Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates and faculty.

298. Seminar: Current Topics in Molecular and Medical Pharmacology. (2) Limited to pharmacology, ACCESS program, and interdepartmental Molecular Biology Ph.D. program students. Students conduct or participate in discussions on assigned topics. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Research in Pharmacology. (4 to 12) Tutorial, to be arranged.

Scope and Objectives
The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves the committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; development biology and neurobiology; DNA replication, repair, and recombination; gene regulation; immunobiology; microbiology/virology; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein structure and function; and structural biology.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnets.ucla.edu. Students are sub-
iect to the degree requirements as published in Program Requirements for the year in which they matriculate.

Doctoral Degree

Admission

The Molecular Biology Interdepartmental Program admits graduate students to the Ph.D. program in Molecular Biology through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

At the completion of the first-year UCLA ACCESS curriculum, including three laboratory rotations, students choose a permanent research and thesis adviser. Students interested in entering the program for their research work must choose a research adviser who is a member of the Molecular Biology Institute (MBI) faculty. Entrance to the program is determined by an evaluation of the student's undergraduate and first-year graduate performance and the proposed area of thesis research. Undergraduate coursework should include calculus, general chemistry and/or biochemistry, organic chemistry, physics, biology, and genetics. Any course deficiencies should be addressed in the first year in the UCLA ACCESS program.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

A minimum of 12 units per quarter must be maintained during graduate study. Grades of B or better must be received in all courses. Any grade less than a B requires a repeat of the course, or its equivalent, as per the approval of the graduate adviser.

First Year. Successful completion of the UCLA ACCESS curriculum, including any of the core courses, student seminar courses, and the ethics course is required. Recommended G-level elective: Biological Chemistry CM248.

Second Year. Two to three sections of Molecular Biology 298 (see NOTE under Written and Oral Qualifying Examinations). These may be taken one per quarter, or students may choose to take two in one quarter. Three different topics are offered each quarter taught by various MBI faculty members. Students have the choice of grading basis, either letter grade or S/U.

Second through Sixth Years. Independent research: one 596 course prior to advancement to candidacy and one 599 course after advancement to candidacy.

Written and Oral Qualifying Examinations

The written examination is coupled to the Molecular Biology 298 student seminar courses. One examination must be submitted for each of the three required 298 sections. (NOTE: Alternatively, one of three papers may be submitted for a student seminar during the first year of study in the UCLA ACCESS program, and the third 298 section may then be waived.) Examinations take the form of a single-spaced, three page (or equivalent) research proposal based on the topic and required reading for each section. Papers are graded separately from the course grade, on a pass, rewrite, or no pass basis. A constructive critique is provided by the instructor to give students the opportunity to improve their skills in critical analysis and experimental design. All three papers must be passed before presenting the oral qualifying examination and advancing to candidacy.

Research Proposition. The University Oral Qualifying Examination is held at the end of the second year of graduate study, after the required three written qualifying examinations (298 papers) have been passed. The examination includes preparation of a written research proposition, which gives the doctoral committee the opportunity to judge the student's ability to think creatively and formulate significant ideas for research. The subject of the proposal should not be immediately connected with the student's own thesis research, although it may be in the same very broad, general area (i.e., molecular genetics). The topic selected must be approved by the student's research adviser and by the graduate adviser. The oral examination covers the student's proposition as well as general scientific background. More detailed instructions on the written proposal and oral examination are available in the Molecular Biology Graduate Office.

Midstream Seminar. Students meet with their doctoral committee every year during their graduate study. In year two for their University Oral Qualifying Examination, in year six (or earlier) for their final oral examination (dissertation defense), and in years three, four, and five on a more informal basis to evaluate progress, define specific goals, and solicit advice on the direction of further research. The doctoral committee meeting in year three takes the form of a “midstream seminar,” where the student presents to the committee a summary of the background, objectives, present accomplishments, and future plans for the dissertation research. The student may present the history and significance of the area and discuss the merits and pitfalls of the particular experimental approach being taken.

Molecular Biology

Graduate Courses

297. Seminar: Molecular and Cellular Life Sciences. (2) In-depth surveys of recent developments in specific fields of life sciences research. By reading and presenting primary research articles, students learn to critically evaluate research papers and organize and present a seminar on a specific research topic. S/U or letter grading.

298. Seminar: Current Topics in Molecular Biology. (2) Formerly numbered M298. Students conduct and participate in discussions on assigned topics. May be repeated for credit. S/U or letter grading.

Related Courses

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the research committee or research supervisor, other related courses may be included in the program.

Biological Chemistry
M221. Cellular and Molecular Neurochemistry
CM248. Molecular Genetics
CM253. Macromolecular Structure
M255. Biological Catalysis
M253. Metabolism and its Regulation
M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics
M266A-M266B-M266C. Seminars: Molecular Embryology
CM267. Cell Structure, Signaling, and Differentiation
Chemistry and Biochemistry
M230B. Structural Molecular Biology
M230D. Structural Molecular Biology Laboratory
CM253. Macromolecular Structure
M253. Metabolism and its Regulation
M264A-M264B-M264C. Molecular Basis of Atherosclerosis
M267. Cell Structure, Signaling, and Differentiation
Microbiology and Immunology
250. Cell and Molecular Biology
M256. Seminar: Viral Oncology
M260. Immunology Forum
M262A. Seminar: Current Topics in Immunobiology of Cancer
M263. Molecular and Cellular Immunology Seminar
Microbiology and Molecular Genetics
242. Seminar: Microbial Molecular Genetics
M248. Molecular Genetics
250. Seminar: Microbial Metabolism
251. Seminar: Regulation and Differentiation
M260. Immunology Forum
M263. Molecular and Cellular Immunology Seminar
290. Seminar: Molecular Genetics
Molecular, Cell, and Developmental Biology
228. Prokaryotic and Eukaryotic Gene Systems
M230B. Structural Molecular Biology
M230D. Structural Molecular Biology Laboratory
M234. Genetic Control of Development
CM248. Molecular Genetics
M257A. Gene Manipulation: Genetic Engineering

Scope and Objectives
The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The M.A. and Ph.D. degrees provide opportunities for advanced concentrated study and require independent and innovative research that ultimately results in publishable thesis and dissertation materials.

Undergraduate Study
Molecular, Cell, and Developmental Biology B.S.
The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

Preparation for the Major
Life Sciences Core Curriculum
Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students
To be admitted as Molecular, Cell, and Developmental Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major
(1) Required Courses: Chemistry and Biochemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140, 104, 138 or C141, 144.

(2) Electives: At least 24 upper division elective units, of which at least 12 must be in courses offered by the department. Any upper division departmental course, except Molecular, Cell, and Developmental Biology 193 or 199, is acceptable. The following courses outside the department may be taken to satisfy a maximum of 12 units in this category: Chemistry and Biochemistry 153C, 156, CM159A, CM159B, Microbiology and Molecular Genetics 101, 102, C106, C112, C159, Organismic Biology, Ecology, and Evolution 110, 146, 162, M166.

(3) Laboratory: At least four units of upper division laboratory experience selected from Chemistry and Biochemistry 154, Microbiology and Molecular Genetics 101/101L (both courses must be taken), 102/102L (both courses must be taken), Molecular, Cell, and Developmental Biology 155, 190A through 190D, 199, Organismic Biology, Ecology, and Evolution M158, 162, M166.

Additional Requirements
(1) A maximum of eight units of Molecular, Cell, and Developmental Biology 190 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.
(2) Any single course may be applied toward only one category within the major (e.g., course C141 may be applied toward the required or elective category but not toward both).
(3) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. MCDB majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
Admission
The department does not accept students whose sole objective is the Master of Arts degree in Molecular, Cell, and Developmental Biology. The department rarely awards the master’s degree except in instances where the student is unable to complete the requirements for the doctorate.

Areas of Study
See under Doctoral Degree.

Course Requirements
The program consists of at least nine courses in graduate standing, of which at least five must be graduate-level (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement unless these courses are not offered for a letter grade.

Specific course requirements are established for each student by the guidance committee.

Comprehensive Examination Plan
The departmental written qualifying examination, or its equivalent as determined by the graduate adviser, serves as the comprehensive examination for the M.A. degree.
Thesis Plan
A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master’s thesis committee of three faculty members. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

Doctoral Degree
Admission
The Department of Molecular, Cell, and Developmental Biology admits students directly into the program leading to the Ph.D. degree in Molecular, Cell, and Developmental Biology and also through UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

The department expects graduate students to have or to acquire a background comparable to the requirements for the B.S. degree in Molecular, Cell, and Developmental Biology at UCLA. A background in chemistry, physics, and mathematics is essential. Deficiencies in these or other subjects must be made up at the earliest opportunity, preferably during the first year of the Ph.D. program.

Applications and additional information may be obtained from Student Affairs Office, 2316 Life Sciences, UCLA, Box 951606, Los Angeles, CA 90095-1606, or from UCLA ACCESS.

Major Fields or Subdisciplines
Fields of emphasis in molecular, cell, and developmental biology naturally reflect the research foci of the faculty. These include cell biology, molecular biology, genetics and developmental biology, in both plants and animals; and immunology, neurobiology, parasitology and molecular evolution.

Course Requirements
In addition to any remedial coursework specified by the graduate adviser, all Ph.D. students are required to take (and pass with grades of B or better) a minimum of four graduate-level courses and three graduate seminars approved by the department. Students may elect, in consultation with their thesis adviser, to take additional graduate courses or seminars in a particular area of specialization. Consult the department for course requirements.

All molecular, cell, and developmental biology graduate students are required to take the teaching assistant training course (Molecular, Cell, and Developmental Biology 495) and are expected to teach a minimum of three quarters during their graduate careers. Students indicate to the Graduate Office which quarter they are available to be a teaching assistant. If they fail to volunteer and fall behind in the normal schedule of a teaching assistant, the graduate adviser may assign them to a course arbitrarily.

Written and Oral Qualifying Examinations
Written Qualifying Examination. The written qualifying examination must be passed before taking the University Oral Qualifying Examination. The written qualifying examination requirement is satisfied through written papers generated in connection with selected courses, including seminar courses. Such papers are separate from the formal course requirements for these courses and do not form part of the course grade. It is the responsibility of the student to arrange with the instructor at the beginning of a course to submit such a paper at the end of the course. The department’s version of the written qualifying examination is used by most Ph.D. programs in the molecular life sciences, and the graduate courses taken by molecular life sciences students all offer the written qualifying examination paper option. The papers are in the form of a mini research proposal and are graded as pass, rewrite, or fail. If a rewrite is required, specific criticism is supplied by those grading the paper. A minimum of three such papers, with a grade of pass, is required. A copy of each paper, with graders’ comments, becomes part of the student’s file.

Oral Qualifying Examination. The University Oral Qualifying Examination, ordinarily taken by the end of the second year in residence, is composed of two sections: presentation of an independent research proposal, and testing of general knowledge of advanced biology. The examinations are administered by the doctoral committee and conform to the standard requirements of the Graduate Division. Detailed instructions and suggestions are given in the Graduate Student Handbook.

Molecular, Cell, and Developmental Biology

Lower Division Courses

40. AIDS and Other Sexually Transmitted Diseases. (4) Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

70. Genetic Engineering and Society. (4) Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4. Basic principles of genetic engineering, overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

80. The Green World: Plant Biology for Now and the Future. (4) Lecture, three hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable “clean” energy, reclamation of deforested and nutritionally depleted soils, and “biological factories” to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective. (4) Seminar, three hours. Limited to freshmen who have not completed Life Sciences 3. Designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that uses gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.

88D. Lower Division Seminar: Genetics and Society. (4) Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritance in order to understand scientific methods and science teaching.

88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications. (4) Seminar, three hours; outside study, nine hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific genetic basis underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.

88F. Lower Division Seminar: Science and Scientists — Expectations and Realities. (2) Examination of change from when science was done by individuals as an avocation without societal goals to contemporary science which is done by professionals and is driven by societal needs and pressures. P/NP or letter grading.

M88H. Lower Division Seminar: Limits of Biological Design through Physical Principles. (4) (Same as Physics M88H.) Seminar, three hours. Enforced requisites: Chemistry 20A and 20B (or former courses 10A and 10B), Life Sciences 1, 5, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. Letter grading.

Upper Division Courses
100. Introduction to Cell Biology. (4) (Formerly numbered Biology 100B.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 20 series or former courses 10A, 10B, and 10BL (may be taken concurrently), Life Sciences 3, 4. Not open for credit to students with credit for course C139 or M140 or former Biology 100B. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics.

104. Cell and Molecular Biology Laboratory. (6) Lecture, 90 minutes; discussion, one hour; laboratory, eight hours; outside study, seven and one-half hours. Requisites: Life Sciences 3, 4. Introduction to methods in molecular biology. Topics include purification, manipulation and analysis of DNA, RNA, and protein. Emphasis on computer sequence analysis and use of current literature.
CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Microbiology and Immunology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide metrics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

C139. Molecular Cell Biology. (5) Requisites: Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for course 100 or C139. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intracellular and intracellular signaling, immunity and gene function, structure and replication. Concurrently scheduled with course CM220.

M140. Cell Biology: Cell Cycle. (5) (Same as Biological Chemistry M140.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A and 14B/14BL, or 20 series, Life Sciences 3, 4. Not open for credit to students with credit for course 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, cellular transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion.

C141. Molecular Basis of Plant Differentiation and Development. (4) (Formerly numbered Biology C141.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants, and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239.

144. Molecular Biology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for former Biology 100A, Chemistry 153B, or Organismic Biology 121. Structure of genes and chromosomes; prokaryotic and eukaryotic replication and transcription; repair and recombination; RNA processing.

C150. Plant Chemical and Molecular Communication. (4) (Formerly numbered 150.) Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, plant/herbivore interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C250.

155. Molecular Genetic Methods. (4) Lecture, two hours; discussion, one hour; laboratory, six hours; outside study, three hours. Recommended preparation: course CM110 or C114A. Concurrently scheduled with course CM174A. Techniques for isolation and manipulation of DNA, RNA, and proteins. Emphasis on genetic transformation, cell culture, and molecular cloning. Applications of recombinant DNA technology. Letter grading.

CM156. Human Genetics. (4) (Same as Human Genetics CM156 and Microbiology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3. Strongly recommended: courses C100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

CM160. Biological Catalysis. (4) (Same as Chemistry CM160.) Requisites: courses 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reactivation mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetic, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolisms and interactions in a mechanistic level. Concurrently scheduled with course CM252.

CM168. Molecular Parasitology. (4) (Same as Microbiology CM168.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course CM268. Letter grading.

M170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4) (Same as Chemistry CM170.) Lecture, two to three hours; discussion, zero to two hours; outside study, four to seven hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3, and Chemistry 153L. Recommended: Chemistry 153C, 154, Life Sciences 4. Light harvesting, photosynthesis, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. P/NP or letter grading.

171. Principles of Neurobiology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, and Organization C16. Strongly recommended: course 100 or C139 or M140. Introduction to basic principles of neurobiology, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transmission and coding in sensory pathways, and neural control of movement. Emphasis on understanding of synaptic transmission and interactions between cells of nervous system.

C172. Molecular Genetics of Bacteria and Phage. (4) Lecture, three hours; discussion, one hour. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course CM207.

C174A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Letter grading.

C174F. Molecular Parasitology. (2) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Letter grading.

C174G. Signal Transduction by G-Protein Coupled Receptors. (2) Lecture, one hour; discussion, one hour. Requisites: courses 100 or C139 or M140, Life Sciences 3, 4. Introduction to G-protein mediated signal transduction as used by sensory, neurotransmitter, and many hormones receptors that alter intracellular second messengers. Structure and functions of molecules that participate in signal transduction via G-proteins (receptors, G proteins, effectors), with emphasis on original experiments leading to present concepts. Letter grading.

M175A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M175B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channel and receptors; focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M175C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course M175B (or Neuroscience M101B or Physiological Science M180B or Psychology M117B) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.
M176. Advanced Topics in Animal Virus/Host Interaction. (4) (Formerly numbered 176.) (Same as Microbiology M176.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Life Sciences 3, 4. Recommended: course 144 or Chemistry 153B or Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on understanding the molecular and cellular aspects of the host-virus interaction. Special emphasis on use of genetic techniques for addressing fundamental questions in cellular and molecular biology. Not open for credit to students with credit for course M185A. May be repeated once for credit. Letter grading.

C177. Molecular Biology of Animal Viruses. (4) Lecture, three hours. Requisites: Chemistry 153B, Life Sciences 3. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course CM279.

CM178. Molecular Genetics. (6) (Same as Biologica Chemistry CM178 and Human Genetics CM178.) Lecture, five hours. Requisites: course 100 or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular and molecular biology. Not open for credit to students with credit for course M185A. May be repeated once for credit. Letter grading.

C180. Molecular and Cellular Immunology. (6) Lecture, four and one-half hours; discussion, 90 minutes. Requisites: course 100 or C139 or M140, Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for course M185A. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course CM261.

M185A. Immunology. (5) (Same as Microbiology M185A and Microbiology and Immunology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11.5 hours. Requisites: Life Sciences 3, 4. Recommended requisites or corequisites: course 100 or C139 or M140, Chemistry 153A, 153L. Not open for credit to students with credit for course C180/CM261. Introduction to experimental immunobiology and immunohistochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

CM185B. Intermediate Immunology. (4) (Same as Microbiology CM185B.) Lecture, three hours; discussion, one hour. Requisite: course C180 or M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

189. Seminar: Social Implications of Current Biological Research. (2) Seminar, two hours; outside study, four hours. Discussions about how current research in biology, particularly in areas of molecular, cell, and developmental biology, affects social issues and policy. May be repeated once for credit; however, only two units of this course or Organismic Biology 189 may be applied toward either the Biology or Molecular, Cell, and Developmental Biology major.

190A-190D. Honors Research in Molecular, Cell, and Developmental Biology. (2 to 4 each) Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken with Molecular, Cell, and Developmental Biology Department faculty for at least two terms and for a total of at least eight units. In Progress grading. A report on progress must be presented to undergraduate adviser at the end of each term. Eight units may be applied toward undergraduate major. Letter grading.

M1901. Social Studies of Psychiatric Disorders. (4) (Same as Neuroscience M130, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course M176A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive-compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

1903. Teaching Practicum in Molecular, Cell, and Developmental Biology. (4) Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Training and supervised practicum for advanced undergraduates in teaching cell and molecular biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward undergraduate major.

1904. Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain written authorization from department chair and appropriate dean.

Graduate Courses

M201. Use of the Computer in Biology. (2) (Formerly numbered 21.) (Same as Human Genetics M201 and Microbiology and Immunology M241.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

CM207. Molecular Genetics of Bacteria and Phage. (4) (Same as Chemistry M227, Microbiology M227, and Microbiology and Immunology M227.) Lecture, three hours; discussion, one hour. Requisites: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course C172. Letter grading.

CM220. Molecular Cell Biology. (6) (Same as Neurobiology M209A and Physiology M209A.) Not open for credit to students with credit for course 100 or M140. Introduces students to cell biology for graduate students in basic medical sciences and selected undergraduate courses. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course C139.

C222A. Molecular Evolution. (2) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequential data. Original research proposal required. Letter grading.

C222F. Molecular Parasitology. (2) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Original research proposal required. Letter grading.

C222G. Signal Transduction by G-Protein Coupled Receptors. (2) Lecture, one hour; discussion, one hour. Requisites: courses 100 or C139 or M140, Life Sciences 3, 4. Introduction to G-protein mediated signal transduction as used by sensory, neurotransmitter, and many hormones receptors that alter intracellular second messengers. Structure and functions of molecules that participate in signal transduction via G proteins (receptors, G proteins, effectors), with emphasis on original experiments leading to present concepts. Letter grading.

CM223. Cell Structure, Signaling, and Differentiation. (6) (Same as Biological Chemistry CM267, Chemistry M267, and Human Genetics CM267.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and cell-transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

M226A-M226B. Principles of Microbial Pathogenesis. (4-4) (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbe interaction. M226A. Bacterial and Mycotic Infections; M226B. Parasitic and Viral Infections.
M229. Cellular Biology of Host/Pathogen Interactions. (6) (Same as Microbiology M229 and Microbiology and Immunology M229.) Lecture, four hours; discussion, 90 minutes. Requisites: Biological Chemistry CM253. Cellular and molecular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

M230B. Structural Molecular Biology. (4) (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory. (2) (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemistry CM233, Microbiology CM233, and Microbiology and Immunology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scale-up strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

M234. Genetic Control of Development. (4) (Formerly numbered Biology 234.) (Same as Biological Chemistry M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

M237. Introduction to Cellular Physiology and Biophysics. (6) (Same as Physiological Science M212 and Physiology M212.) Lecture, five hours. Requisite: Physiological Science 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranous, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

C239. Molecular Basis of Plant Differentiation and Development. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students.

M240. Cytokines and Reproductive Biology. (2) (Same as Microbiology M240 and Microbiology and Immunology M240.) Lecture, 90 minutes; discussion, one hour. Requisite: course CM135G or CM152G. Recent advances in cytokine biology and reproduction. S/U or letter grading.

242. Topics in Neurobiology. (4) Lecture, three hours; discussion, one hour. Requisite: problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

M246. Computer Analysis of Genetic Organization. (4) (Same as Microbiology M246 and Microbiology and Immunology M246.) Lecture, two hours; laboratory, six hours. Requisite: Life Sciences 4 or Microbiology C159. Lectures and laboratory instruction in computer use, with emphasis on applications to molecular biology. S/U or letter grading.

C250. Plant Chemical and Molecular Communication. (4) Lecture, three hours; discussion, one hour. Designed for graduate students. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synthesis of principles of plant defense mechanisms and responses to microbial and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

CM252. Biological Catalysis. (4) (Same as Biological Chemistry M255, Chemistry CM255, and Pharmacology M255.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetic, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM160. Letter grading.

C255. RNA Editing. (4) Seminar, two hours. Preparation: knowledge of molecular biology and molecular genetics. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type RNA editing, C-to-U substitution in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena.

M256. Human Genetics. (4) (Same as Human Genetics CM256 and Microbiology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Topics of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

257A. Gene Manipulation: Genetic Engineering. (4) (Formerly numbered Biology 257A.) Lecture, three hours; discussion, two hours. Requisite: course 138. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

257B. Gene Manipulation: Advanced Course. (2) Lecture, 90 minutes; discussion, one hour. Requisite: course 157 or 257A. Additional topics in methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

CM261. Molecular and Cellular Immunology. (6) (Formerly numbered Biology CM261.) (Same as Microbiology M261 and Microbiology and Immunology M261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course C180. Oral presentation required of graduate students. S/U or letter grading.

M266A-M266B-M266C. Seminars: Molecular Embryology. (2-2-2) (Same as Biological Chemistry M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

CM258. Molecular Parasitology. (4) (Same as Microbiology CM268 and Microbiology and Immunology M268.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course CM168. Letter grading.

276. Seminar: Molecular Genetics. (2) Topics vary each term.

278. Seminar: Molecular Genetics of Development. (2) Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

CM279. Molecular Biology of Animal Viruses. (4) (Same as Microbiology and Immunology M208.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanisms involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course C177.

282. Seminar: Topics in Cell Biology. (2) Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, and epigenetic transformation, nuclear organization, and function.

284. Seminar: Structural Macromolecules. (2) Seminar, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology.
CM285. Intermediate Immunology. (4) (Formerly numbered Biology CM285.) (Same as Microbiology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Requisite: course C180 or M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.  

286. Seminar: Plant Development. (2) Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.  

289. Current Topics in Plant Molecular Biology. (2) (Formerly numbered Biology 289.) Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.  

495. Preparation for Teaching Molecular, Cell, and Developmental Biology. (2) (Formerly numbered Biology 296A.) Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.  

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.  

495. Preparation for Teaching Molecular, Cell, and Developmental Biology in Higher Education. (2) Designed for graduate students. Study of problems and methodologies in teaching molecular, cell, and developmental biology, including workshops, seminars, apprentice teaching, and peer observation. S/U grading.  

496. Directed Individual (or Tutorial) Studies. (2 to 12) S/U grading.  

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**Scope and Objectives**  

Students interested in a concentration in music history and literature should consider the majors in Music History and Musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in Ethnomusicology offered through the School of the Arts and Architecture.  

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords valuable cultural background.  

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.  

**Undergraduate Study**  

**Music B.A.**  

**Admission**  
All applicants for admission and change of major are required to pass an audition in their principal performing medium.  

**Preparation for the Major**  

Required: Music 20A, 20B, 20C, 12 units from courses 60A through 65, two years (12 units) of performance organizations (courses C90A through 90N) for a letter grade, Music History 26A-26B-26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N. Students must participate in a minimum of two different organizations over the course of their stay at UCLA. In addition, they are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.  

**The Major**  

Required (for all concentrations except composition and jazz studies): A minimum of 48 upper-division units, including Music 120A, 120B, 120C, Music History 126A-126B-126C, and six courses selected from one of the concentrations listed below.  

**Composition:** A minimum of 65 upper-division units, including Music 104A or 104B, 106A, 106B, 116, 120A, 120B, 120C (accelerated sections), 123A-123B-123C, 124A or 124B or 124C, C176, and at least eight elective units selected from courses 101, 104A or 104B (if not already taken), 117, 118A, 118B, additional terms of 123A-123B-123C, 124A or 124B or 124C (if not already taken), 156, 199, Ethnomusicology 117, 128, 130, 136A, 136B, 146, C156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 181. A senior recital, to include at least 30 minutes of original music, is also required (exceptions by petition only).  

**Music Education:** Music 100A-100B-100C, 116, 117, eight units from courses 115A through 115E. Students are encouraged to take additional coursework from 112A, 112B, 118A,
Complete, annual editions of Requirements for UCLA Graduate Degrees Music (M.M.) degree. The Department of Music offers the Master of
they matriculate.

Program Requirements

tions") on the Graduate Division website at

are available (listed under "Publica-
tions regarding graduate degree programs and

Graduate Study

History 126A-126B-126C, 150.

required. Music History 26A-26B-26C.

The Major

Required: Music 20A, 20B, 20C, 12 units from
courses 60A through 65 or 12 units of course
71, two years (12 units) of performance organiz-
ations (courses C90A through 90N) for a let-
ter grade, Music History 26A-26B-26C.

Preparation for the Major

Music History 127A through 127G, 130, 133, 134, 135A, 135B, 135C, 139. Ethno-
musicology M108A, 108B, 120A, 120B, 121, 170, and one upper division elective course in
music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade.

Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K; students taking keyboard or guitar lessons may choose from C90A through 90N.

Theory: Music 120C and six courses selected in consultation with a faculty adviser.

Jazz Studies Concentration

Preparation for the Major

Required: Music 20A, 20B, 20C, 12 units from
courses 60A through 65 or 12 units of course
71, two years (12 units) of performance organi-
izations (courses C90A through 90N) for a let-
ter grade, Music History 26A-26B-26C.

Preparation for the Major

Required: Music 120A, 120B, 120C, M127,
M129A-M129B-M129C, M186, 12 units of
course M177, Ethnomusicology M110A, Music History 126A-126B-126C, 150.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdn.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees

The Department of Music offers the Master of
Arts (M.A.) degree in Music and the Master of
Music (M.M.) degree.

Admission

Applicants to the M.A. program or to the M.M.
program must have completed a B.A. degree,
or its equivalent, in Music. Other fields of study
are accepted if applicants have the musical
training and musicianship necessary to pursue
graduate work. Transcripts must show at least
52 quarter units of work outside music, includ-
ing one college year (or its high school equiva-
 lent) of French, German, Italian, or Spanish
and an average grade of at least B in the basic
areas that normally constitute the undergradu-
ate core curriculum in music (harmony, coun-
terpoint, music history, analysis, and musician-
ship).

Applicants to the M.A. program in Music are re-
quired to (1) take a departmental assessment
examination; (2) submit a letter describing
background of study and stating reasons for
wishing to pursue graduate studies in music;
(3) submit three letters of recommendation
from former instructors and/or professionals
with whom applicants have worked; and (4)
submit written examples of work. For composi-
tion, musical scores of at least three composi-
tions must be submitted.

No application can be considered until the as-
essment examination has been taken and all of
the above materials have been received.

Applicants to the M.M. program are required to
(1) submit a statement of purpose which also
includes a description of their background of
study and (2) submit three letters of recom-
mendation from former instructors and/or profes-
sionals with whom the applicants have worked and perform an audition. A repertoire
list, summary of recent performances, and
sample recital programs are also required.

No new applicants are being accepted into the
M.F.A. program. Those currently active in the
program will be allowed to finish within a rea-
sonable amount of time.

Admission Timetable

Note: Applicants for fellowships must take the
early examination; all monies are awarded at
the end of the first year.

Areas of Study

The Music Department offers the Master of
Arts degree in the field of composition and the
Master of Music degree in all classical solo
instruments, voice, and conducting. Degrees in
historical musicology, ethnomusicology, and
systematic musicology are offered through
other departments. As noted above, the Mas-
ter of Fine Arts degree in performance prac-
tices is being phased out.

Course Requirements

Master of Arts

Students are required to complete a minimum
of nine courses, five of which must be at the
200 level. Only four units of Music 596A, 596C,
or 596D and four units of 597 or 598 may be
applied toward the total course requirement.
No more than four units of all types of 500-se-
ries courses may be applied toward the mini-
num graduate course requirement. Upper divi-
sion courses that may be applied toward the
minimum of nine courses include Music 109A,
118B, 151A, 151B, 156, C175 (four units only),
Ethnomusicology 106A, 106B, 106C, 113,
M126, 128, 130, 136A, 136B, 146, 147,
C156A, 156B, 157, 158A, 158B, 158C, 160A,
160B, 170, 173, M180, 181. Course 598
serves to guide the preparation of the thesis
and should normally be taken during the last
quarters of residence.

Required courses are Music 251A, 266A-
266B; one course from Music 251B, 251C,
251D; Music 252A-252B-252C in sequence,
with the option of substituting 596A for 252C;
and two electives with the recommendation of
Failure to meet any deadline may result in a
delay in action or no action on an application
in a delay in action or no action on an application
for admission, as well as that for a fellowship or
assistantship.

Assessment Examination. The assessment ex-
amination for the M.A. is administered at
Schoenberg Hall on the UCLA campus twice a
year. Students who are applying from outside
the Southern California area and find it impos-
sible to take the examination on campus can
make arrangements with the Student Services
Office to take the examination in absentia be-
fore the dates listed above. Information is in-
cluded in the applicant's packet.

The assessment examination is approximately
five hours long and covers music theory, his-
tory and analysis, and musicianship skills.

The dossier and assessment examination are
reviewed, along with those of other applicants,
by each area to assess the applicant's poten-
tial as a graduate student in that field at UCLA.

Placement Examination. The placement exam-
ination, which is administered during the week
before classes start in Fall Quarter, is required
of all new M.M. students and covers theory,
musicianship skills, and music history. Those
who do not pass any portion are required to do
remedial work which must be completed by the
end of the first year.
the graduate adviser. In addition to the thesis, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

Master of Music

Students are required to complete a minimum of 68 units, 16 of which must be at the 200 level, 40 units at the 400 level, and six units at the 500 level. Sixty-four of these units are specified below. The remaining elective must be from 200-, 400-, or 500-series courses. Music 595A serves to guide the preparation of the master's recital and should normally be taken during the last quarter of residence. The department provides a maximum of six quarters of enrolled private instruction in performance. If students do not complete the degree within that period and wish to continue instruction, they must do so at their own expense on a noncredit basis.

Course requirements are as follows:

Instrumental/Vocal Performance. A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level performance instruction; three quarters of 400-level performance organizations; two quarters of Music C485; one quarter of Music 401 and of 595A; and one additional course (selected with advisement) from Music 261A through 261F, 267, 270E, 270F, 271, 401, 596D, courses in pedagogy, Musicology 250A, 250B, 269, Ethnomusicology 271, 273, 275, 279. Keyboard specialists may substitute three additional quarters of Music C485 for the performance organization requirement.

Conducting. A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level conducting instruction; three quarters of 400-level performance organizations; two quarters of Music C485; one quarter of Music 401 and of 595A; and one additional course (selected with advisement) from Music 261A through 261F, 267, 270E, 270F, 271, 401, 596D, courses in pedagogy, Musicology 250A, 250B, 269, Ethnomusicology 271, 273, 275, 279. Conducting students may substitute two additional quarters of 400-level performance organizations for the Music C485 requirement.

Master of Fine Arts

Students are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596C, or 596D and eight units of Music 596 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years. The degree is normally completed in three years.

Course requirements are as follows: Musicology 200A; two quarters of Music 261A through 261F; six quarters of 400-level performance instruction; two quarters (eight units) of Music 598; and seven electives. If students are in the conducting specialty, they declare either a choral or instrumental specialization. Six quarters of Music 475 are required in the area of specialization and at least two in the other area. On a two-year program, the ratio would be four to one. Recommended electives include Music C175 (four units only) 596A, 596C, 596D, Ethnomusicology 170, and additional courses from the 200 and 400 series. Music 598 serves to guide the preparation of the final project and should normally be taken during the last two terms of residence.

Performance Requirements. Each year students must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Except for the first-year recital, students are to write the program notes for the annual performance project. These must be submitted with the program to the graduate adviser in performance practices at least one month before the concert date. If students are in the conducting specialty, they present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

Comprehensive Examination Plan

Master of Arts

None.

Master of Music

After students have completed the core seminars and three quarters of performance/conducting instruction, and after verification from the graduate adviser that the requirements have been met, a master's committee for the final year is formed. The committee consists of the student's master teacher and two other Music Department faculty in related areas of instruction. Two of the three committee members must be full-time Academic Senate faculty. The committee oversees the preparation of the recital and adjudicates the recital itself.

Master's Recital. Students present a final master's recital. During the final year of residence and after completion of the major coursework, students perform for their committee for its approval. The committee decides whether the student qualifies for the presentation of the master's recital. No recital takes place until it has been approved by the committee. An audio tape of the recital is archived in the Music Library.

Master of Fine Arts

Final Project. A final project is to be completed during the last year of residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Students in conducting present an on-campus program, or a substantial portion thereof, with one of the department's performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. Students decide the topic for the final project in consultation with their committee chair, who is responsible for supervising the work. Pieces from or related to the study are to be included in the final recital. Both the paper and the recital are evaluated by the committee.

A completed draft of the scholarly paper must be submitted to the committee members by the first day of classes of the quarter in which the final recital has been scheduled. If this requirement is not met, the recital is postponed until the next regular academic quarter in which this requirement can be met.

Students must provide concise, well-written program notes and include a brief biography. These should be submitted to the graduate adviser in performance practices for approval at least one month prior to the final recital. Publicity information for the final recital must be submitted to the graduate adviser at the beginning of the previous quarter.

The final version of the scholarly paper, with the accompanying recital program, must be submitted in the format of a thesis. (Students should contact the theses and dissertations adviser, 390 Powell Library, for information and the Student Services Office for information specific to the M.F.A. program.) The final paper, signed by all M.F.A. committee members, must be submitted in duplicate (two thesis-quality photocopies or the original and one photocopy) to the Student Services Office by the last day of classes in the quarter in which the student is to graduate.

The language requirement and a majority of the coursework must be completed before submitting the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted at the beginning of the Fall Quarter of the last year of residence. It is approved by the graduate committee for performance.

Thesis Plan

Master of Arts

The thesis is a work proposed by the student and approved by the composition and theory faculty. The thesis topic and composition of the committee are approved by the faculty before nomination to the Graduate Division.

Master of Music

None.

Master of Fine Arts

None.

Doctoral Degrees

Admission

Applicants to the program leading to the Doctor of Philosophy (Ph.D.) degree in Music must have completed a Master of Arts degree in Music (or the equivalent degree). The degree nor-
mally will have been taken in the same field of concentration as the proposed doctoral. If applicants wish to obtain a doctorate in a field other than that of the M.A., additional coursework, as prescribed by the area, must be completed. Applicants are required to (1) take a departmental assessment examination; (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of work. For composition, musical scores of at least three compositions are required. Applicants should submit their M.A. thesis or composition, if possible.

Applicants to the program leading to the Doctor of Musical Arts (D.M.A.) degree are required to (1) submit a statement of purpose which also includes a description of the their background of study; (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked (for the D.M.A. the Music Department is especially interested to hear from persons who can speak to the applicant's academic potential); (3) submit a sample seminar or research paper; and (4) perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required.

No application can be considered until the assessment examination or audition has been taken and all of the required materials have been received.

**Admission Timetable**

**Note:** Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Assessment examination/audition is administered.

March 1 — Late applications are accepted until March 1 for the M.A. and Ph.D. only.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due for late applications.

Early April — Assessment examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

**Assessment Examination.** The assessment examination for the Ph.D. is administered at Schoenberg Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills. The dossier and assessment examination are reviewed, along with those of other applicants, by area to assess the applicant's potential as a graduate student in that field at UCLA.

**Placement Examination.** The placement examination, which is administered during the week before classes start in Fall Quarter, is required of all new D.M.A. students and covers theory, musicianship skills, and music history. Those who do not pass any portion are required to do remedial work which must be completed by the end of the first year.

**Major Fields or Subdisciplines**

The Music Department offers the degrees of Doctor of Philosophy in the field of composition; Doctor of Philosophy in the field of composition with a cognate in ethnomusicology; and Doctor of Musical Arts in all classical solo instruments, voice, and conducting. Degrees in historical musicology, ethnomusicology, and systematic musicology are offered through other departments.

**Course Requirements**

**Doctor of Philosophy**

Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level. If students are in the program in composition with the cognate in ethnomusicology and have had no prior coursework in ethnomusicology, they are required to take Ethnomusicology 20A-20B-20C. They are also encouraged to participate in the ethnomusicology performance organizations (Ethnomusicology 91A through 91Z).

Students may complete the residence requirement by electing courses recommended by the graduate adviser from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

Required courses for the Ph.D. are Musicology 200A; Music 251A, 266A-266B; one course from 251B, 251C, 251D; and six quarters of Music 252A-252B-252C in sequence, with the option of substituting Music 596A for 252C. Students who have received the M.A. in composition from UCLA normally take a minimum of three quarters of Music 252 in the Ph.D. program.

Students who have received the M.A. in composition elsewhere normally take two full cycles of Music 252A-252B-252C in sequence, with the option of substituting Music 596A for either or both 252Cs. In addition to the dissertation, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

**Cognate in Ethnomusicology.** Students may substitute Ethnomusicology C201A for Musicology 200A and Ethnomusicology 282 or 283 for Music 251B through 251D. Students are required to take two courses from Ethnomusicology 207, M211, 237, 240, 241, 248A, 248B, 250A, 250B.

**Doctor of Musical Arts**

Students are required to complete a minimum of 102 units, 28 of which must be at the 200 level, 60 units at the 400 level, and 10 units at the 500 level. Ninety-eight of these units are specified below. The elective must be from 200-, 400-, or 500-series courses. Music 599 serves to guide the preparation of the dissertation and should normally be taken during the final year of residence. Students who received the M.M. at UCLA are expected to complete at least 32 additional units and two recitals beyond the M.M. requirements, subject to the specific requirements of their area of specialization. The department provides a maximum of nine quarters of enrolled private instruction in performance. Students who were admitted to the program with a master's degree from another institution may petition for up to a year of private lessons (18 units) and 12 units of academic courses to be applied to D.M.A. requirements.

The requirements for the D.M.A. are below.

**Instrumental/Vocal Performance.** A core of Music 202, 203, 204; three courses from Music 261A through 261F, 271; eight quarters of 400-level performance instruction; three quarters of Music C485; one quarter of Music 401, 595B, and 599; the appropriate course from Music 469, 471, 473, 474, 476, 477; one additional course from Music 261A through 261F, C267, 270E, 270F, 271, 596D, additional courses in pedagogy, Musicology 250A, 250B, 269, Ethnomusicology 271, 273, 275, 279.

**Conducting.** A core of Music 202, 203, 204; three courses from Music 261A through 261F, 271; eight quarters of 400-level conducting instruction; three quarters of 400-level chamber ensembles; one quarter of Music 401, 595B, and 599; one course from Music 469, 471, 473, 474, 476, 477; one additional course from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, Ethnomusicology 271, 273, 275, 279. Conducting students may substitute three quarters of 400-level performance organizations for the Music C485 requirement.

**Written and Oral Qualifying Examinations**

**Doctor of Philosophy**

When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee.
members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the six written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. On successful completion of the written examinations, a departmental oral qualifying examination is scheduled.

The written examinations consist of the following:

1. Style composition: composition of a short piece in the style of a particular period, genre, or composer as posed by the examiner (within a 24-hour period, optionally either on or off campus).

2. General history of music (three hours).

3. Analysis of form and style (three hours).

4. Two or more from the following (four hours total): acoustics, aesthetics, psychology of music, ethnomusicology, or music theory from the medieval period to the present, with an optional emphasis on theoretical writings before or after 1700.

5. Twentieth-century music (three hours).

Students with a cognate in ethnomusicology may substitute an ethnomusicology area for item 2 and in lieu of items 3 and 4, may choose any three of the following (two hours each): acoustics, aesthetics, music theory, form and analysis, general history of music, or organology.

On completion of the written and oral qualifying examinations and the second language, students may submit the dissertation topic and request for a doctoral committee, for approval. The dissertation topic and the composition of the doctoral committee are approved by the faculty before nomination to the Graduate Division.

For students with a cognate in ethnomusicology, the composition (item 1) should reflect the ethnomusicological area of interest of the student and draw from a variety of traditional, classical, Western, and/or non-Western sources; a public reading of this composition is required. The monograph should deal with a cross-cultural 20th-century work.

Doctor of Musical Arts

Two preliminary recitals are required to be adjudicated by the Music Department M.M./D.M.A. Committee.

Two sets of qualifying examinations are required. The written examinations cover material in the three-quarter core sequence of Music 202, 203, 204, one of the performance practice seminars, and the appropriate pedagogy course. The second examination is the defense of the final recital repertoire dissertation topic with the doctoral committee (University Oral Qualifying Examination—see below).

The second-year entrepreneurial recital is an individual project in public performance outside the UCLA campus. All scheduling, publicity, program notes, and ticketing must be arranged by the student without assistance from the supervising instructor. After that recital and the written qualifying examinations have been passed and the foreign language requirement has been met, students may submit the request for a doctoral committee.

A minimum of three months before the final doctoral recital (which is a full professional recital of approximately 90 minutes duration), students take the second examination, the University Oral Qualifying Examination. This consists of the student’s performance of a major portion of the works on the program (including the new music forum premiere work) and includes a defense of the recital repertoire, the dissertation topic, and its relationship to the final recital.

Music

Lower Division Courses

1A-B. Fundamentals of Music. (4-4) Lecture, three hours; discussion, two hours. Designed for non-music majors. 1A. Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. 1B. Requisite: course 1A. Diatonic harmony; four-part writing, including inversions, sevenths, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

2A-B. Preparatory Music Majors. (2-2) Lecture, two hours; discussion, one hour. Limited to Music majors. Course 2A is not open to credit for students with credit for course 1A; course 3B is not open for credit to students with credit for course 1B. Course for Music majors in music fundamentals, including musicianship, theory, and terminology.

4A-4B-4C. Basic Musicianship. (2-2-2) Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

8G. Graduate Piano Sight-Reading. (2) Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated, S/U grading.

10. Computer-Assisted Sight-Singing Laboratory. (2) Lecture, two hours; laboratory, one hour. Requisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

12A-12B. Counterpoint. (2-2) Lecture, four hours. 12A. Preparation: music theory placement examinations. 18th-century modal counterpoint in two parts, including writing of motets. 12B. Requisites: courses 20A, 20B, 20C. 18th-century tonal counterpoint in two parts, including writing of inventions.

15. Art of Listening. (4) Lecture, three hours; laboratory, one hour. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice.

20A. Music Theory I. (4) Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfeggio of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

20B. Music Theory II. (4) Lecture, four hours; discussion, four hours. Requisite: course 20A (C or better). Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

C90A. UCLA Chorale. (2) Activity, four hours. Preparation: audition. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choir ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C480. P/NP or letter grading.

C90B. Collegiate Chorus. (2) Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of “Choral Union,” a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

C90C. Chamber Singers. (2) Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

C90D. Opera Workshop. (2) Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

C90E. Symphony Orchestra. (2) Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

C90G. Wind Ensemble. (2) Activity, four hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C482. P/NP or letter grading.

90H. Collegium Musicum. (2) Activity, three hours. Preparation: audition. Group performance of vocal and instrumental music of medieval, Renaissance, and baroque eras on period instruments. May be repeated for credit without limitation. P/NP or letter grading.

90J. Men’s Glee Club. (2) Activity, three hours. Preparation: audition. Select male chorus of 40 to 45 voices performing male choral music of all periods, with emphasis on popular and folk arrangements. May be repeated for credit without limitation. P/NP or letter grading.

90K. Women’s Chorus. (2) Activity, three hours. Preparation: audition. Select female chorus of 45 to 55 voices performing treble choral music of all periods, with emphasis on music after 1750. May be repeated for credit without limitation. P/NP or letter grading.

90L. Music Theater Workshop. (2) Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete musical theater productions, including repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading.

90M. Marching and Varsity Bands. (2) Activity, four hours. Preparation: audition. Group performance of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

90N. Jazz Ensemble. (2) Activity, three hours. Preparation: audition. Group performance of jazz and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

Upper Division Courses

100A-100B-100C. Music in American Education. (4-4-4) Lecture, four hours; laboratory, one hour. Requisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C. Designed for Music majors in specialization other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

106A. Orchestration I. (4) Discussion, three hours. Requisites: courses 120C (accelerated section), 123C. Designed for Music majors in specialization other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

106B. Orchestration II. (4) Discussion, three hours. Requisites: courses 106A, 120C (accelerated section), 123C. Designed for Music majors in specialization other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

109A-109B-109C. Composition for Motion Pictures and Television. (2-2-2) Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 109A is requisite to 109B, which is requisite to 109C. Compositional practice of music for dramatic and documentary film in cinema and television. Techniques used in recording and editing.

112A-112B. Practical Scoring. (4-4) Lecture, two hours; laboratory, two hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Study of music literature applicable to elementary school programs. Emphasis on practical problems in scoring for small and large ensembles at various educational levels.

113A-113B. Music Literature for Children. (4-4) Lecture, three hours; laboratory, one hour. Requisites: course 1A, Music History 2A. Course 113A is not requisite to 113B. Designed for elementary education students. Study of music literature applicable to elementary school programs.

115A-115B-115C. Study of Instrumental and Vocal Techniques (1 each). Laboratory, three hours. Requisite or concurrent: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 115A-115D may be repeated once for credit.

115A. Strings; 115B. Woodwinds; 115C. Brass; 115D. Percussion; 115E. Voice.

116. Introduction to Conducting. (2) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

117. Study and Conducting of Instrumental and Choral Literature. (2) Lecture, three hours. Requisite: course 116. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature. (2-2) Lecture, one hour; laboratory, two hours. Requisites: courses 116, 117. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit.

120A. Music Theory IV. (4) Lecture, four hours; discussion, four hours; preparation, passing score on departmental first-year examination. Requisite: course 20C with a grade of C (2.0) or better. Theory: baroque counterpoint including choral prelude, two-part invention; exposition and first modulation of a three-part invention; canonical principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

120B. Music Theory V. (4) Lecture, four hours; discussion, four hours. Requisite: course 120A with a grade of C (2.0) or better. Theory: advanced chromatic harmony, polytonality, free atonality, serialism, and minimalism.

121. Special Topics in 20th-Century Music. (4) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit.

122. Speculative Music Theory. (4) Discussion, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Techniques of atonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

123A-123B-123C. Composition. (4-4-4) Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is requisite to 123B, which is requisite to 123C. Designed for composition students. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

124C. Scoring and Arranging for Choral Ensemble. (4) Discussion, three hours. Requisites: courses 106B, 120C (accelerated section). 123C. Practical applications in scoring and arranging for choral ensembles, including a capella as well as chorus with instruments. Preparation and production of score and parts. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

M127. Jazz Keyboard Harmony. (1) (Same as Ethnomusicology M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

M129A-M129B-M129C. Jazz Theory and Improvisation. (2-2-2) (Same as Ethnomusicology M129A-M129B-M129C.) Lecture, four hours. Elements of jazz theory and improvisation. M129A. Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. M129B. Course 129A with a grade of C or better. Medium-level jazz harmonic constructions. M129C. Course 129A with a grade of C or better. Advanced-level jazz harmonic constructions.

M131. Development of Latin Jazz. (4) (Same as Ethnomusicology M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as “Latin jazz.” P/NP or letter grading.

136A-136B-136C. Historical Survey of Music Theater. (4-4-4) Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/NP or letter grading. 136A. Early Forms to 1900; 136B. 1900 to 1945; 136C. 1945 to 1975.
150. Introduction to Music Criticism. (4) Lecture, three hours. Designed for Music majors. Readings and discussion of music criticism past and current, and exercise in the writing of criticism of live concert events and recordings. Designed to aid students (performers, critics, or listeners) in verbalizing the experience of listening to music.

158. New Orleans Jazz. (4) Lecture, three hours; discussion, two hours. Major black and Creole figures in origin and development of jazz in New Orleans from turn of the 20th century through the 1960s, with emphasis on polyrhythmic roots, local municipal traditions, and stylistic analysis.

160A-165. Undergraduate Instruction in Performance for the Performance Specialist. (2 each) Limited to junior/senior Music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a regular concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. 160A, Violin; 160B, Viola; 160C, Cello; 160D, String Bass; 160E, Harp; 160F, Classical Guitar; 160G, Viola da gamba; 160H, Lute; 161A, Flute; 161B, Oboe; 161C, Clarinet; 161D, Bassoon; 161E, Saxophone; 162A, Trumpet; 162B, French Horn; 162C, Trombone; 162D, Tuba; 163, Percussion; 164A, Piano; 164B, Organ; 164C, Harpsichord; 165, Voice.

C167. Selected Topics in Keyboard Literature. (4) Lecture, three hours; studio, three hours. Requisite: a core course 164A or 164B or 164C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C267.

174A-174B-174C. Language of Song. (2-2-2) Designed for Music majors. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student’s current vocal repertoire. Background in the language is encouraged. 174A, German; 174B, French; 174C, Italian.

C175. Chamber Ensembles. (2) Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C485. P/NP or letter grading.

M177. Jazz Combo. (2) (Same as Ethnomusicology M177) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

Scope and Objectives
The Department of Musicology provides students with a broad understanding of the history and literature of the music of Europe and the Americas and of its place in the development of Western culture. Courses cover virtually every period, style, and genre as well as particular areas of popular music and jazz which have influenced or been influenced by Western art music. Music history appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The graduate program provides students with a strong foundation that enables them to pursue careers in teaching and research.

The undergraduate program prepares students for graduate programs in music and related fields and provides them with sufficient background to teach in secondary schools after obtaining the necessary credentials in education. With its focused requirement of study in an area outside music, the program also offers training within the broader context of the humanities. Depending on their particular interests and career goals, students may select courses in the arts, literature, history and society, philosophy, and religion; these may be concentrated within such fields as Afro-American, American Indian, Asian American, Chicana and Chicano, and women's studies. If students wish to participate in performance at UCLA, they are encouraged to do so.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for all qualified students.

Undergraduate Study
Music History B.A.

Admission
The Music History program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

Preparation for the Major

Required: Music 20A, 20B, 20C, Music History 26A-26B-26C, and six units (three terms) of performance organizations selected from Ethnomusicology 91A-91Z or Music C90A through 90M. Enrollment in Music 20A requires either a minimum score on the Music Theory Placement Examination administered by the Music Department or successful completion of Music 3A-3B (or a comparable year-long college-level music theory sequence). Students with limited musicianship skills may find it useful to enroll in Music 4A-4B-4C concurrently with Music 20A, 20B, 20C. Transfer applicants may petition to waive courses 20A, 20B, 20C if they have completed equivalent work prior to enrolling at UCLA.

The Major

Required: Music 120A, 120B, 120C, Music History 101, 126A-126B-126C; three courses from Music History 127A through 127G; two additional upper division music history courses (eight units) or, by petition, lower division courses with additional work as specified by the instructor; and three upper division ethnomusicology courses (12 units), each from a different geographical or cultural area. Students may petition to substitute ethnomusicology or music history theory courses for one or more of Music 120A, 120B, 120C, as appropriate. Students may enroll in lessons from the Music Department, if instructors are available.

Music History Minor

The Music History minor provides undergraduates with an overview of music history, starting with required courses that offer beginning students a general historical survey from antiquity through the 20th century. Upper division courses have been selected to provide study of more specific areas of interest, with various electives that offer a variety of perspectives on music history.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition at the Student Services Office.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gradnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

Admission
The Department of Musicology does not admit candidates for the Master of Arts degree in Musicology only, although students may be awarded the M.A. enroute to the Ph.D.

Applicants for the M.A. are required to (1) take the Graduate Record Examination (GRE) Subject Test in Music; (2) submit a letter describing their background study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked; (4) submit two official transcripts from each college attended; and (5) submit written examples of their work such as a paper on an appropriate subject.

Admission Timetable
December 30 — Application for admission/fellowship is due.
January 30 — Supplementary application materials are due.
By March 15 — Notice of acceptance or denial is sent.
Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.
Areas of Study
The Musicology Department offers the Master of Arts degree in the field of historical musicology. Degrees in composition, performance, and ethnomusicology are offered through other departments.

Course Requirements
Students are required to complete a minimum of nine courses at the 200 level.

The requirements are Musicology 200A, 200B, 200C; three seminars chosen from 260A through 260F and 262; and a choice of three electives (up to two outside the department). The musicology electives include Musicology 211A through 211F, 210, 211, 250A, 250B, and other 200-level courses.

Comprehensive Examination
Students take the comprehensive examination after completing their course requirements, which is normally by the end of their fifth quarter. All other degree requirements, including language proficiencies, must be satisfied before the examination can be taken. The examination is scheduled by the faculty during the Spring Quarter; all second-year students take it together. However, transfer students entering with a master’s degree are expected to take the examination at the end of their first year, before proceeding on to their Ph.D. coursework. In anticipation of the examination, students are asked to designate three fields in which they are to be examined. Two of these fields must be historical: one before 1700 (medieval, Renaissance, or 17th century) and one after 1700 (18th century, 19th century, or 20th century). The third field may be a genre, methodology, or other topic that is recognized as a scholarly specialization among musicologists, e.g., Latin American music, opera, popular music, feminist musicology, ethnomusicology, criticism, African American music. The examination is designed to test factual knowledge, power of historical analysis and synthesis, and capacity for critical and reflective thinking.

The faculty, after taking into account the fields designated by the student and the suggestions of the student and the adviser, approve the appointment of three of its members to serve as the examining committee. Two weeks before the examination, students submit three samples of their best written work which demonstrate their research, writing, thinking, and analytical skills (typically three seminar papers) prepared for at least two musicology faculty members. The samples do not need to match up with the designated areas of examination. The committee’s review of these papers constitutes the first stage of the examination. The second stage is the written examination which is taken together by the cohort of students but is designed differently for each. The members of the examining committee (in consultation with each other to avoid duplication) formulate three essay topics related to the designated fields. Each student receives these topics at the time of the examination and is given up to four hours to address them. The comprehensive examination is concluded by a two-hour oral examination covering the three designated fields and the written work that has been submitted. On the basis of the student’s overall performance, the committee awards a grade of high pass (pass to continue in the Ph.D. program), pass (terminal pass), fail, or pass subject to reevaluation. In this last instance, the student is permitted to repeat the deficient portions of the examination in the following Winter Quarter, after additional coursework or study is completed. More than one such attempt may be granted at the discretion of the faculty.

Thesis Plan
None.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. degree in Musicology must have completed a Master of Arts degree (or the equivalent) in Music. The degree normally is in musicology or music history. Otherwise additional coursework, as prescribed by the department, must be completed.

Applicants for the Ph.D. are required to (1) take the Graduate Record Examination (GRE) Subject Test in Music; (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom they have worked; (4) submit two official transcripts from each college attended; and (5) submit written examples of their work such as a paper on an appropriate subject. Applicants should also submit their M.A. thesis, if possible.

Major Fields or Subdisciplines
The Musicology Department offers the Doctor of Philosophy degree in the field of historical musicology. Degrees in composition, performance, and ethnomusicology are offered through other departments.

Course Requirements
Students are required to take a minimum of six courses beyond the M.A., including three seminars from Musicology 260A through 260F and 262, and three electives in areas they wish to pursue. Students whose M.A. is not from UCLA may be required, in consultation with the graduate adviser, to take other relevant and necessary courses beyond the six specified.

Written and Oral Qualifying Examinations
Guidance Committee. A guidance committee assists students in the preparation of the written and oral qualifying examinations. The committee is made up of five members, all in the professorial ranks. Students suggest the membership, including the person who guides their dissertation and other faculty, according to the examinations to be taken; the department appoints the chair, who should not be the chair of the student’s doctoral committee. A list of questions and repertoire is available to students to help them prepare for this examination.

Soon after completion of the doctoral coursework, normally at the end of the third year, students take the special field examination, which includes both written and oral components. By this time, students must have decided on an area of specialization and secured the agreement of a qualified faculty member to serve as the dissertation adviser. Taking into account the field designated and the suggestions of students and the adviser, the faculty approves the appointment of three of its members to serve as the examining committee. Three months before the examination, students submit to the committee a reading and repertoire list related to the area of specialization. Typically, this consists of a bibliography in the general area of the dissertation research and a list of relevant musical works, together totaling no more than 50 items. The members of the examining committee (in consultation with one another to avoid duplication) each formulate one or more questions related to the topic, repertoire, and methods thus staked out by the students. Students are allowed one week to address these topics in writing, using any desired research materials. After the completed written examination has been distributed to the examiners, a two-hour oral examination is scheduled. At this time, the committee may discuss the results of the written examination with students and ask further questions related to the area of the dissertation research. If a majority of the committee determines that the written and oral examinations have been passed, students begin preparation for the second stage, the University Oral Qualifying Examination. If the committee determines that the written and oral examinations have not been passed, students may retake the special field examination after six months of further preparation. More than one such attempt may be granted at the discretion of the faculty.

The University Oral Qualifying Examination is a defense of the dissertation prospectus. All other requirements, including language proficiencies, must be satisfied before the examination can be scheduled. At least two weeks before the examination, students must submit the prospectus to the members of the examination committee, who may be but need not be the same as those on the first committee. The prospectus must be a substantially researched overview of the proposed dissertation that demonstrates that students are fully prepared to undertake the dissertation project. Students are encouraged to consult with the members of their committee before the examination, which concentrates on the feasibility and significance of the project and their preparation for it. If the defense is unsatisfactory, the candidate may repeat the examination once, at the discretion of the faculty. After passing the examination, students are advanced to candidacy and begin
Music History

**Lower Division Courses**

2A-2B. Introduction to Literature of Music. (4-4) Lecture, four hours; laboratory, one hour. Course 2A is not requisite to 2B. Limited to undergraduate stu- dents. Designed for nonmusic majors. P/NP or letter grading. 2A. Technical and formal principles of music literature through the mid-18th century. 2B. Music liter- ature from the mid-18th century to the present.

5. History of Rock and Roll. (4) Lecture, four hours. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to the present. Emphasis on how this music has reflect- ed and influenced changes in sexual, racial, and class identities and attitudes. Letter grading.

7. Film and Music. (4) Lecture, four hours. History of music and cinema, particularly ways music is used to produce meanings in conjunction with the visual image. P/NP or letter grading.

12. 20th-Century Music of the Western World. (4) Lecture, four hours. Survey of main trends in 20th- century music, with emphasis on representative works from avant-garde, mainstream, and popular traditions. P/NP or letter grading.

26A-26B-26C. History and Analysis of Music I. (4-4-4) Lecture, four hours; laboratory, one hour. En- forced requisite: Music 20C. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. Students must receive a C– or better to proceed to next course in sequence. History and literature of mu- sic from ancient world to 1815, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

28A-28B-28C. Early Music Laboratory. (2-2-2) Lab- oratory, three hours. Enforced corequisite: course 26A or 26B or 26C. Practical laboratory in which stu- dents perform music of various periods, as correlated with courses 26A-26B-26C. P/NP or letter grading.

**Upper Division Courses**

126A-126B-126C. History and Analysis of Music I. (4-4-4) Lecture, four hours; laboratory, one hour. Requi- site: course 26C, Music 20A, 20B, 20C. Course 126A is requisite to 126B, which is requisite to 126C. Students must receive a C– or better to proceed to next course in sequence. History and literature of mu- sic from 1815 to the present, with emphasis on analy- sis of representative works of each style period. Ma- terials selected illustrate history of style and changing techniques of composition. Letter grading.

127A-127B. Selected Topics in History of Music. (4 each) (Formerly numbered C127A-C127F.) Dis- cussion, three hours. Requisites: courses 26A-26B- 26C. Designed as presemesters for undergraduates in preparation for graduate work. Special aspects of mu- sic in each period studied in depth. P/NP or letter grading. 127A. Middle Ages; 127B. Renaissance; 127C. Baroque; 127D. Classic; 127E. Romantic; 127F. 20th Century; 127G. Other Topics.

131. American Popular Song. (4) Lecture, four hours. Survey of American popular song from the 18th century to the present, with emphasis on relation- ships of popular current in American life and culture. P/NP or letter grading.

132. Mozart. (4) Lecture, four hours. Designed for students who do not read music. Life, works, and myth- ology of Wolfgang Amadeus Mozart, in context of both his age and our own, P/NP or letter grading.

133. Bach. (4) Lecture, two hours; laboratory, two hours. Designed for undergraduate students. Life and works of Johann Sebastian Bach. P/NP or letter grad- ing.

134. Beethoven. (4) Lecture, two hours; laboratory, two hours. Designed for undergraduate students. Life and works of Ludwig van Beethoven. P/NP or letter grading.

135A-135B-135C. History of Opera. (4-4-4) Lec- ture, four hours; laboratory, one hour. Designed for undergraduate students. P/NP or letter grading. 135A. Opera of Baroque and Classical Periods; 135B. Opera of Romantic Period; 135C. Opera of the 20th Century.

136. Music and Gender. (4) (Formerly numbered 136.) (Same as Women's Studies M136.) Lecture, four hours. Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular music; methods in feminist and gay/lesbian theory and criticism. Letter grading.

137. Gay and Lesbian Perspectives in Pop Mu- sic. (4) (Same as Lesbian, Gay, Bisexual, and Trans- gender Studies M137.) Lecture, four hours. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

138. History of Electronic Dance Music. (4) Lec- ture, four hours. Survey of groove-based electrified dance music from its origins in 1980s’ pop and soul to the present, covering disco, house, techno, ambient, rave, and jungle. Emphasis on interaction of technol- ogies; musical styles; psychoactive drugs; and club cultures to induce “altered states” of musical con- sciousness; promise (versus reality of) political and spiritual transformation; electronic dance music as a new “art” music. Letter grading.

139. History and Literature of Church Music. (4) Lecture, four hours. Study of forms and liturgies of Western church music. P/NP or letter grading.

140. Music, Media, and Consumer Society. (4) Lecture, four hours. Consideration of impact of re- cording technologies (gramophone, tape recorder, Walkman, sampler), broadcast media (radio, televi- sion, MTV, Internet), and global capitalism (record la- bels, advertising, Muzak) on way we consume and are consumed by music. How music functions and malfunctions on records, on movies, behind ads, and in semiotic fabric of everyday life. Letter grading.

145. American Musical. (4) Lecture, four hours. Sur- vey of American musical in the 20th century, begin- ning with its roots in operetta, vaudeville, and Gilbert and Sullivan, and focusing on its connections to polit- ics, technology, film, opera, and a variety of popular musical styles, including Tin Pan Alley, jazz, and rock. Letter grading.

150. History of Jazz. (4) Lecture, four hours. De- signed for music history, music, and ethnomusicology majors, and other students with some background in musical performance and theory. History and analysis of variety of jazz styles, from late 19th-century fore- runners to the present, with emphasis on social meanings of musical practices. Letter grading.

156. Studies in Musical Genres. (4) Lecture, four hours. Survey of musical genres, with emphasis on analysis of structural organization. P/NP or letter grading.

188. Topics in Music History. (4) (Formerly num- bered 188A-188F.) Lecture, three hours; laboratory, one hour. Variable topics selected from several out- standing composers in Western art music. Consult Schedule of Classes for topics to be offered. Letter grading.

195. Honors Course. (4) Tutorial, two hours. Prepa- ration: completion of minimum of four upper division music history courses with departmental grade-point average of 3.5 or better and an overall GPA of 3.0. Limited to junior/senior Music History majors. One- to two-term independent research study project under supervision of an appropriate faculty member, culmi- nating in department honors thesis of approximately 25 pages. P/NP or letter grading.

199. Special Studies in Musicology. (2 or 4) Tutori- al, to be arranged. Preparation: 3.0 grade-point aver- age. Limited to seniors. Individual studies in musicol- ogy resulting in a research project. May be repeated for a maximum of eight units. P/NP or letter grading.

**Musicology**

**Lower Division Courses**

6GA-6GB. Musicianship for Musicology Graduate Students. (2-2) Seminar/laboratory, three hours. De- signed to help entering graduate students remedy en- trance deficiencies. S/U grading.

**Graduate Courses**

200A. Research Methods and Bibliography. (6) Lecture, three hours. Designed for graduate musicology students. Survey of general bibliographic material in music.

200B. Historiography. (6) Seminar, three hours. De- signed for graduate musicology, ethnomusicology, and music students. Critical examination of principles and procedures which inform historical study of mu- sic, with emphasis on impact of recent cultural theory.

200C. Contemporary Music Criticism. (6) Semi- nar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to recent developments in the field of musicology, focus- ing on problems of how music operates as a cultural practice and how musical meanings can most effec- tively be analyzed and written about.

210. Medieval Notation. (6) Lecture, three hours. Vocal and instrumental notation; paleography of the period.

211. Renaissance Notation. (6) Lecture, three hours. Vocal and instrumental notation; paleography of the period.
263. History of Performance. (4) Investigation of principal theoretical writings concerning music from antiquity through Zarlin. 250B. Investigation of principal theoretical writings concerning music from Rameau to the present.

257. Music of the U.S. (6) Discussion, three hours. Designed for graduate students. Examination of principal figures and trends in music of the U.S. since the 18th century.

261A-261F. Problems in Performance Practices. (4 each) Lecture, three hours. Designed for graduate students. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. 261A, Medi eval; 261B, Renaissance; 261C, Baroque; 261D, Classical; 261E, Romantic; 261F, Contemporary.

262. Contemporary Popular Music Studies. (4) Seminar, three hours. Designed for graduate students. Critical exploration of methodologies of interdisciplinary field of popular music studies. Analysis of how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race.

264. Seminar: Topics in Musicology. (6) Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit.

265. Ideal of Authenticity in Performance: 1827 to the Present. (4) Seminar, three hours. Preparation: ability to read musical notation and knowledge of musical history equivalent to successful completion of courses 126A-126B-126C. Not a course in performance, but intellectual history of performance and interpretation from solidification of classical canon to disintegration. How have performers mediated between claims of imaginative sympathy, performing tradition, and textual evidence? Use of historical texts and recordings to reconstruct interpretive strategies and justifications of the past and reconsideration of such major 20th-century trends as idea of Werktrum, Toscani versus Furtwängler debates, impact of recording and mass media, and rise of historical performance movement. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Introductory Practicum for Teaching Apprentices in Musicology. (2) Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

596. Directed Individual Studies in Musicology. (2, 4, or 6) Tutorial, to be arranged. Limited to graduate students. S/U grading.

Nancy Ezer, Ph.D. (Hebrew)
Michael Fishbein, Ph.D. (Arab)
Latifeh Hagig, M.A. (Iranian)
Ralph Jaeckel, Ph.D. (Turkic)

Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area which was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Ahir, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself. Undergraduate majors may be taken in Ancient Near Eastern Civilizations, Arabic, Hebrew, Iranian Studies, and Jewish Studies. Master’s and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

Ancient Near Eastern Civilizations B.A.

There are four options for a major in Ancient Near Eastern Civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria/Palestine, and (4) biblical studies.

Preparation for the Major

Requisites for options 1 and 2 are German 1 and 2; requisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the requisite levels.

The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as fol-
Arabic B.A.

Preparation for the Major

Required: Arabic 1A-1B-1C, 102A-102B-102C, 150.

The Major

Hebrew B.A.

Preparation for the Major

Required: Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 103A-103B-103C; three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

Iranian Studies B.A.

Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

Preparation for the Major

Required: Iranian 1A-1B-1C or equivalent, 150A-150B.

The Major

Jewish Studies B.A.

Preparation for the Major

Required: Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

The Major

Required: Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, 120 or 125, Jewish Studies M150A-150B, 151A-151B, 199, and four upper division courses. At least two of the four must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining two may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

Arabic and Islamic Studies Minor

The Arabic and Islamic Studies minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Islamic culture.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Arabic 1A-1B-1C or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

Required Upper Division Courses (28 units): Seven courses from the Hebrew and Jewish studies section of the department; 199 courses may not be applied. At least one course from each of the three disciplines of language, literature, and history must be selected. Eligible language courses begin in the fourth quarter of study (i.e., course 102A for Western Armenian, course 105A for Eastern Armenian). With approval of the undergraduate adviser, two of the seven courses may be taken outside the department. Ordinarily, courses listed as Related Courses under the Armenian section in the UCLA General Catalog may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Hebrew and Jewish Studies Minor

To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better, have completed Hebrew 1A-1B-1C or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

Required Upper Division Courses (28 units): Seven courses from the Hebrew and Jewish studies section of the department; 199 courses may not be applied. With approval of the undergraduate adviser and based on course content, two of the seven courses may be taken outside the department.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Near Eastern Languages and Cultures Minor

The Near Eastern Languages and Cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 376 Kinsey Hall, (310) 825-4165.

Required Upper Division Courses (28 units): Seven courses selected in consultation with an
academic adviser from any of the courses offered by the department; 199 courses may not be applied. With approval of the undergraduate adviser, two of the seven courses may be taken outside the department, provided the content of the courses bears a direct relation to the culture of the Near East.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of Near Eastern Languages and Cultures offers the Master of Arts (M.A.) degree in Near Eastern Languages and Cultures.

Admission

In addition to the regular University requirements, a bachelor’s degree or its equivalent in the language area chosen for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required of applicants to the M.A. program. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE score of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

Areas of Study

Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

Course Requirements

A minimum of nine upper division and graduate courses is required, of which at least six must be at the graduate level. Students are required to take one quarter of Near Eastern Languages 200.

In general, students choosing either the language, literature, or archaeology option are required to study two Near Eastern languages, one of which is considered the major language. Students in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, students may choose as their major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), or Old Persian. For the second language, any of the above or Hittite or Sumerian may be chosen.

Students in Hebrew choose Hebrew and another Semitic language. In Turkic, either two Turkic languages or Turkish and a second culturally related language may be chosen. In Arabic, Armenian, and Iranian (modern), a major language and a second culturally related language are chosen.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, Persian, Sanskrit, and Old and Middle Iranian are studied.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

In general, students are required to take written final comprehensive examinations in their major and minor languages, as well as the history and literature of their major field. Further details can be found in the departmental Guide to Graduate Studies, available in the department.

Thesis Plan

None.

Doctoral Degree

Admission

In addition to the regular University requirements, an M.A. or equivalent in the applicant’s field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required for admission to the program leading to the Ph.D degree in Near Eastern Languages and Cultures. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE score of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

The M.A. program need not have been completed at UCLA.

Major Fields or Subdisciplines

Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

Course Requirements

Students who choose a language emphasis for the Ph.D. are required to add a third Near Eastern language to the two that are required for the M.A.

Students are required to achieve high competence in two of their languages and to familiarize themselves with the cultural backgrounds of each of the languages chosen. For language options, see the M.A. requirements section. Students are also expected to take the equivalent of one year of general linguistics. Those studying Semitics or Old Iranian study three languages.

If the literature option is chosen, students are required to achieve high competence in two Near Eastern languages and their literatures. For language options, see the M.A. requirements section. Students are required to familiarize themselves, through appropriate coursework, with the history of the cultural area, and the methods of literary research and the history of literary criticism.

If the archaeology emphasis in the ancient Near Eastern civilizations specialization is chosen, students are required to achieve high competence in two ancient Near Eastern languages and must be well-versed both in the history of the cultural area and in archaeological methodologies. For language options, see the M.A. requirements section.

Further details about the choice of languages and examination requirements may be found in the departmental Guide to Graduate Study, available in the department.

Written and Oral Qualifying Examinations

Qualifying examinations must be passed before the formation of a doctoral committee.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates in ancient Near Eastern civilizations are examined in two ancient languages and in the history and archaeology of the major areas of the ancient Near East.

When students pass the written examinations, their doctoral committee administers the University Oral Qualifying Examination. Passing this examination allows students to advance to candidacy and begin work on the dissertation.

Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

Lower Division Course

10. Jerusalem: The Holy City. (4) Lecture, three hours. Survey of history of Jerusalem over 3,000 years as a symbolic focus for three faiths: Judaism, Christianity, and Islam.
Upper Division Courses

M104A-M104B, Ancient Egyptian Civilization. (4-4-4) (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. M104A. Chronological discussion of Prehistory, the Old and Middle Kingdom. M104B. The New Kingdom and the Late period until 332 B.C.

M105, History of Ancient Mesopotamia and Syria. (4) (Same as History M105.) Lecture, three hours. Designed for juniors/seniors. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period.

120A-120B-120C, Elementary Ancient Egyptian. (4-4-4) Lecture, three hours; laboratory, two hours. Grammar and texts.

121A-121B-121C, Intermediate Ancient Egyptian. (4-4-4) Lecture, three hours. Requires: courses 120A-120B-120C. Readings in ancient Egyptian literature.

123A-123B, Coptic. (4-4) Lecture, three hours. Introduction to Coptic grammar and reading of Coptic texts.

124, Middle Egyptian Technical Literature. (4) Requires: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included.

130, Ancient Egyptian Religion. (4) Lecture, three hours. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religio-political institutions such as divine kingship and pious foundations.

140A-140B-140C, Elementary Sumerian. (4) Lecture, three hours; outside study, nine hours. Requires: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

145, Sumerian Literary Texts. (4) Lecture, three hours. Requires: courses 140A-140B. Reading and interpretation of selected Sumerian literary texts.

150A-150B-150C, Survey of Ancient Near Eastern Literatures in English. (4-4-4) Lecture, three hours. Each course may be taken independently for credit. 150A, Mesopotamia; 150B, Egypt; 150C, Syria and Palestine.

160A-160B, Introduction to Near Eastern Archaeology. (4-4) Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology.

161A-161B-161C, Archaeology of Mesopotamia. (4-4-4) Survey of main archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit.

162, Archaeology and Religion of the Holy Land. (4) Lecture, three hours. Survey of archaeology of Palestine from the Bronze Age to destruction of Jerusalem in A.D. 70, with emphasis on religious development of ancient Israel.

163A-163B, Archaeology of Iran. (4-4) Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. 163A, Prehistoric and protohistoric phases of Iranian archaeology. 163B, Archaeology of Elam, Iron Age, and Achaemenid Empire.

164A-164B-164C, Archaeology of Historic Periods in Mesopotamia. (4-4-4) Requires: courses 105, 161A-161B-161C. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit.

165, Archaeology of Pharaonic Egypt. (4) Lecture, three hours. Requires: courses M104A-M104B. Selected topics on archaeology of Pharaonic Egypt, with emphasis on material culture as source for political, social, and economic history of ancient Egypt.

179, Special Studies in the Ancient Near East. (2 to 6) Tutorial, to be arranged.

Graduate Courses

210, Late Egyptian. (4) Lecture, three hours. Requires: courses 121A-121B-121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit.

211A-211B, Egyptian Texts of the Greco-Roman Period. (4-4) Lecture, three hours. Requires: course 121C. Introduction to grammar and orthography of hieroglyphic and hieratic texts from Greco-Roman temples. Text readings and translation of various textual types.

220, Seminar: Ancient Egypt. (4) Seminar, three hours. May be repeated for credit.

221A-221B, Demotic. (4-4) Requires: course 121C. Introduction to Demotic grammar, and orthography. Reading of texts from various genres.

240A-240B-240C, Seminars: Sumerian Language and Literature. (4-4-4) Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history.

250, Seminar: Ancient Mesopotamia. (4) (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

250X, Seminar: Ancient Mesopotamia. (1) Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading.

260, Seminar: Ancient Near Eastern Archaeology. (4) Seminar, two hours. May be repeated for credit.

261, Ancient Near Eastern Field Archaeology. (2 to 8) Fieldwork, two hours. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated.

262, Seminar: Object Archaeology. (4) Discussion, two hours; laboratory, one hour. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeramanek Collection of Los Angeles County Museum of Art.

263, Seminar: Egyptian Monuments. (4) Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated.

265, Depositional History and Stratigraphic Analysis. (4) (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

596, Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

597, Examination Preparation. (2 to 8) Tutorial, to be arranged. S/U grading.

Lower Division Courses

1A-1B-1C, Elementary Arabic. (4-4-4) Lecture, six hours. Basic grammar and syntax.

Upper Division Courses

102A-102B-102C, Intermediate Arabic. (4-4-4) Lecture, four hours; discussion, one hour. Requires: courses 1A-1B-1C. Grammar and syntax; readings of excerpts from literary texts; composition.

103A-103B-103C, Advanced Arabic. (4-4-4) Requires: courses 102A-102B-102C. Review of grammar, composition, conversation, and readings from classical and modern literary texts.

111A-111B-111C, Elementary Spoken Egyptian Arabic. (4-4-4) Lecture, three hours. Requires: courses 1A-1B-1C. Basic grammar and syntax of Egyptian colloquial Arabic.

112A-112B-112C, Advanced Spoken Egyptian Arabic. (4-4-4) Lecture, three hours. Requires: courses 111A-111B-111C. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

113A-113B-113C, Elementary Spoken Levantine Arabic. (4-4-4) Lecture, three hours. Requires: courses 1A-1B-1C. General introduction to spoken Arabic of Syria, Lebanon, and Palestine. Grammar and syntax, with emphasis on language of everyday conversation.

114A-114B-114C, Spoken Moroccan Arabic. (4-4-4) Lecture, three hours; laboratory, one hour. Introduction to spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills.

120, Islamic Texts. (4) Requires: course 103C. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit.

130, Classical Arabic Texts. (4) Requires: course 103C. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit.

132, Philosophical and Kalam Texts. (4) Lecture, three hours. Requires: course 120. Readings in medieval and Kalam texts. May be repeated for credit.

141, Modern Arabic Literature. (4) Requires: course 103C. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit.
Graduate Courses

207. Armenian Intellectual History (4) Lecture, three hours. Intellectual and cultural trends reflected in Armenian literature, historiography, religious and philosophical thought.

230A-230B-230C. Elementary Classical Armenian. (4-4-4) Formerly numbered 130A-130B. Lecture, three hours. Requisite: course 230A. Introduction to grammar of the classical literary language (5th to mid-19th century) and guided readings in narrative prose texts.

231A-231B-231C. Intermediate Classical Armenian. (4-4-4) Formerly numbered 131A-131B. Lecture, three hours. Requisite: course 231A. May not be included in 131A.

232A-232B-232C. Advanced Classical Armenian. (4-4-4) Formerly numbered 132A-132B. Lecture, three hours. Requisites: courses 231A or 231B or 231C. May not be included in 132C.

Hebrew

Lower Division Courses

1A-1B-1C. Elementary Hebrew. (4-4-4) Lecture, three hours; laboratory, two hours. Structural principles of grammar. Students who have prior knowledge of reading and some vocabulary are advised to take courses 1A-1B-1C. Students with credit for course 1A cannot receive credit for course 1B, which is requisite to 1C. Students with credit for course 1B cannot receive credit for 1C, which is requisite to 1D.

10A-10B-10C. Accelerated Elementary Hebrew. (4-4-4) Lecture, five hours. Open to students who wish to cover equivalent of two years of college Hebrew in one academic year. Designed for students who have previously studied rudiments of Hebrew. Students with credit for course 1A cannot receive credit for 1B; those with credit for course 1B and 1C cannot receive credit for 1D.

20A-20B. Introduction to Biblical Hebrew. (4-4) Lecture, three hours. 20A. Phonology, morphology, and structure of biblical Hebrew. 20B. Enforced requisite: course 20A. Continuation of course 20A. Readings of biblical prose texts.

Upper Division Courses

101. Hebrew Conversation and Composition. (4) Lecture, three hours; discussion, two hours. Requisites: courses 1A-1B-1C. Intensive course for students who are interested in improvement of their proficiency in basic Hebrew. Reading of simplified texts, written and oral grammatical drills, and conversation exercises. Offered in summer only. P/NP or letter grading.

102A-102B-102C. Intermediate Hebrew. (4-4-4) Lecture, five hours. Requisites: courses 1A-1B-1C. Amplification of grammar; reading of texts from modern literature.

103A-103B-103C. Advanced Hebrew. (4-4-4) Lecture, three hours. Requisites: courses 102A-102B-102C. Introduction to modern Hebrew literary texts.

120. Biblical Texts. (4) Formerly numbered 120A-120B. Lecture, three hours. Requisites: courses 102A-102B-102C. Translation and analysis of biblical texts, with attention to aspects of grammar, style, and interpretation.

125. Hebrew Bible with Medieval Commentaries. (4) Lecture, three hours. Requisite: course 103C. Hebrew Bible with the commentaries of Rashi, Ibn Ezra, and/or Nahmanides. May be repeated for a maximum of 16 units.

130. Rabbinic Texts. (4) Lecture, three hours. Requisites: courses 103A-103B-103C. Readings in medieval Hebrew prose and poetry. May be repeated for a maximum of 16 units.

135. Medieval Hebrew Texts. (4) Lecture, three hours. Requisites: courses 103A-103B-103C. Readings in medieval Hebrew prose and poetry. May be repeated for a maximum of 16 units.

140. Modern Hebrew Poetry and Prose. (4) Lecture, three hours. Requisites: courses 103A-103B-103C. Study of major Hebrew writers of past one hundred years: poetry — Mendele, Ahad Ha'am, Agnon, Yehuda Halevi; prose — Bialik, Tchernichovsky, Greenberg, Shlonsky, Alterman, Amihai. May be repeated for credit.

150. Hebrew Essay. (4) Lecture, three hours. Requisites: courses 103A-103B-103C. Hebrew essay from its rise in Europe in the late 18th century to contemporary Israeli essay. Study of literary, political, philosophical, and scholarly essay. May be repeated for credit.

170. Dead Sea Scrolls and Biblical Studies. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 102A-102B-102C, 120. Introduction to history of the Dead Sea Sect, their literature, and its impact on biblical studies, with focus on interpretation in the Qumran texts.

180A-180B. Survey of Hebrew Grammar. (4) Lecture, three hours. Requisites: courses 102A-102B-102C. Descriptive and comparative study of Hebrew grammar: phonology and morphology. Topics include development of Hebrew language from biblical times to the present day, its relation to Arabic and other Semitic languages, methods of language expansion in Israel, Hebrew pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic). May be repeated for credit.

190C. Survey of Hebrew Prose. (4) Seminar, three hours. Critical study of Hebrew texts in specific problems and trends in Hebrew literature and historical study of various biblical books. May be repeated for credit. Letter grading.

199. Special Studies in Hebrew. (2 to 8) Tutorial, to be arranged.

Graduate Courses

Iranian

Lower Division Courses

1A-1B-1C. Elementary Persian. (4-4-4) Lecture, four hours; laboratory, two hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian grammar.

10A-10B-10C. Persian Conversation. (2-2-2) Lecture, three hours. Systematic and structured Persian conversation.

20A-20B-20C. Accelerated Elementary Persian. (6-6-6) Lecture, four hours; discussion two hours; laboratory, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose compositions. P/NP or letter grading.

Upper Division Courses

102A-102B-102C. Intermediate Persian. (4-4-4) Lecture, three hours; laboratory, three hours. Requisite: course 1C or 20C. Course 102A is requisite to 102B, which is requisite to 102C.

103A-103B-103C. Advanced Persian. (4-4-4) Lecture, three hours. Requisite: course 102C. Students who successfully complete courses 20A-20B-20C with grades of A may be permitted to enroll. Each course may be taken independently for credit. 103A. Introduction to Classical Persian Poetry; 103B. Introduction to Classical Persian Prose; 103C. Introduction to Contemporary Persian Poetry and Prose.

111A-111B-111C. Elementary Kurdish. (4-4-4) Lecture, three hours; laboratory, two hours. Proficiency-based course in basic grammar of literary Kurdish (Sorani). Graded readings, translation, composition (level one), conversation (levels one and two).

120. Comparative Study of Six Major Persian Poets. (4) Lecture, two hours; discussion, one hour. Preparation: knowledge of Persian. Lectures in Persian, readings in English and Persian. Comparative study of six major Persian poets from the 10th to 14th century who shaped the sense of Persian identity and delineated chief distinguishing characteristics of Persian thought and culture. P/NP or letter grading.

140. Persian Belles Lettres (Adabiyât). (4) Lecture, 10B. The special status of the Persian language and the important role it has played in the development of the Islamic world. May be repeated for credit with consent of instructor. P/NP or letter grading.

141. Persian Analytical Prose. (4) Lecture, three hours. Requisite: course 102C. Study of selected analytical and expository prose texts, with emphasis on philosophy, sciences, literary criticism, and history. May be repeated for credit with consent of instructor. P/NP or letter grading.

142. Persian Popular Ethics. (4) Lecture, three hours. Requisite: course 102C. Study of major Persian works on popular ethics which have helped shape normative social, cultural, and political values in Iranian civilization. May be repeated for credit with consent of instructor. P/NP or letter grading.

150A-150B. Survey of Persian Literature in English. (4-4) Lecture, three hours. Knowledge of Persian not required. Each course may be taken independently for credit.

169. Civilization of Pre-Islamic Iran. (4) Survey of Iranian culture from the beginning through Sasanian period.

170. Religion in Ancient Iran. (4) History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichaism, Mazdakism.

180A-180B. Iranian Civilization. (4) Lecture, three hours; discussion, one hour. Cultural and social history of the Iranian world, with emphasis on legacy of Persian language and literature. Letter (majors) or P/NP or letter (nonmajors) grading.

190A-190B. Introduction to Modern Iranian Studies. (4-4) Lecture, three hours. Requisites: courses 1A-1B-1C. Survey of Iranian languages. Comparative and historical grammar.

199. Special Studies in Iranian. (2 to 8) Tutorial, to be arranged.
Graduate Courses

221. Rumi, Mystic Poet of Islam. (4) Seminar, three hours. Requisite: course 220A or 220B. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

M222A-M222B. Vedic. (4-4) (Same as Indic M222A-M222B.) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to Indic 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

231A-231B. Middle Iranian. (4-4) Studies in grammars and texts of such Middle Iranian languages as best serve students’ needs (e.g., Pahlavi, Sogdian, Sakian). Only course 231B may be repeated for credit.

250. Seminar: Classical Persian Literature. (4) Seminar, three hours. Requisites: courses 103A-103B-103C. 199. May be repeated twice for credit.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

598. M.A. Thesis Research and Preparation. (2 to 8) Tutorial, to be arranged.

9D. Introduction to Asian Civilizations: History of the Near and Middle East
106A-106B-106C. Survey of the Middle East from 500 to the Present
110A-110B. Iranian History

Indic (East Asian Languages)
110A. Elementary Sanskrit
110B. Intermediate Sanskrit
110C. Advanced Sanskrit

Indo-European Studies
210. Indo-European Linguistics: Advanced Course
280A-280B. Seminars: Indo-European Linguistics

Islamics

Upper Division Courses
110. Introduction to Islam. (4) Lecture, three hours. Genesis of Islam, its doctrines, and practices, with readings from the Qur’an and hadith; schools of law and theology; piety and Sufism; reform and modernism.

130. Shi’a in Islamic History. (4) Lecture, three hours. Rise and development of Shi’a Islam, its doctrines, and practices; major branches: Twelvers, Isma’ilis, Zaydis; their contribution to Islamic thought and civilization; modern trends of reinterpretation and reform.

Graduate Courses
596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

598. M.A. Thesis Research and Preparation. (2 to 8) Tutorial, to be arranged.

Related Courses
History
107A-107B. Islamic Civilization

Jewish Studies
Lower Division Course
10. Social, Cultural, and Religious Institutions of Judaism. (4) Lecture, three hours: discussion, one hour. Judaism’s basic beliefs, institutions, and practices. Topics include development of biblical and rabbinic Judaism; concepts of god, sin, repentance, prayer, and the messiah; history of Talmud and synagogue; evolution of folk beliefs and year-cycle and life-cycle practices.

Upper Division Courses
M111E. Ethnic Groups and Their Bibliographies: Jewish History and Culture. (4) (Same as Library and Information Science M111E.) Basic reference sources on specific topics on Judaica, ranging from biblical studies to the Holocaust to Jewish life in the U.S.

130. Modern Jewish Religious Movements and Their Ideologies. (4) Lecture, three hours. Introduction to and overview of Jewish religious movements and evolution of their ideologies in the Western world from time of the Enlightenment to the present.

140A-140B. American Jewish History. (4-4) Lecture, three hours. Examination of social and cultural history of American Jewish community from its inception to the present, with emphasis on integration of successive immigrants and development of institutions. P/NP or letter grading.

140B. 1914 to the Present.

141. Modern Anti-Semitism. (4) Lecture, three hours. Examination of modern anti-Semitism from the 18th century to the present; comparison of modern racist ideologies with premodern theories; case studies (e.g., Dreyfus affair, Bellisss Trail, Holocaust); Jewish reactions to these phenomena.

142. History and Institutions of State of Israel. (4) Lecture, three hours. Study of social and cultural development of State of Israel from its pre-state institutional structures to the present, with emphasis on major trends, personalities, and ideologies, and state’s position in wider framework of modern Jewish history.

M143. Introduction to Jewish Folklore. (4) (Same as Folklore M142.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

M150A-150B. Hebrew Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit.

150A. Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Comparative Literature M101.) Study of literary culture of ancient Israel through examination of principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). P/NP or letter grading.

150B. Rabbinic Judaism. Topics include emergence of rabbinic Judaism; its original literary forms; rabbinic worldview; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism.

151A-151B. Modern Jewish Literature in English. (4-4) Lecture, three hours. Each course may be taken independently for credit.

151A. Diaspora Literature. Study of literary responses of Jews to modernity, its challenges and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work.

151B. Israeli Literature. Study of translations from Hebrew literature written in Israel and reflecting cardinal facets of Israeli life: social issues, security problems, identity of the state, role of individual. Analysis of formal aspects of each work.

155. Literature of the Cabala. (4) Lecture, three hours. Cabalist culture in the broad sense (i.e., Jewish esoteric culture from the rabbinc and modern period). Topics include precabalist and cabala of the early cabala, the Zohar, Lurianic cabala, nature of mysticism, the question of whether there was a Jewish mysticism.

170. Dead Sea Scrolls and Early Judaism. (4) Lecture, three hours: outside study, nine hours. Introduction to Dead Sea Scrolls in English translation. Survey of literature, community of Khirbet Qumran, and their place in early Judaism. P/NP or letter grading.

175. Modern Hebrew Novel as a Film. (4) Reading of literary works written by modern Hebrew writers which have been translated into English and then made into movies. Lectures, readings, and discussion of novels and movies and guest speakers from movie industry and UCLA.

M187. The Holocaust in Literature. (4) (Same as Comparative Literature M165.) Lecture, three hours. Requisite: History 191E or 191F or 191G. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

190. Undergraduate Seminar: Jewish Studies. (4) Examination of a single topic in depth with object of encouraging and guiding students’ research in area of Jewish studies. Literary, cultural, and historical subjects included.

M191C-M191D. Focal Themes in Jewish History. (4-4) (Same as History M191C-M191D.) Designed for juniors/seniors. Survey of social, political, and religious developments.

192A-M192B. Medieval Period: Jewish Intellectual History. (4-4) (Same as History M192A-M192B.) Designed for juniors/seniors. Lecture, three hours. Study of Jewish intellectual history from the 8th century to the present.

197A-197Z. Variable Topics in Jewish Studies. (4 each) Lecture or seminar, three hours. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

197A. 20th-Century Jewish Thought. May not be repeated for credit.

197B. Jewish Feminist Theology.
Near Eastern Languages

Lower Division Courses

50A-50B-50C. Introduction to Near Eastern Languages and Cultures. (4-4-4) Lecture, three hours. Three-term sequence designed both as an introduction for undergraduate students and as requisite to various majors within department. Art and archaeology, languages and literatures, cultural history. Each course may be taken independently for credit. 50A. Ancient Near East; 50B. Medieval Near East; 50C. Modern Near East.

Graduate Courses

200. Bibliography and Method of Near Eastern Languages and Literatures. (4) Lecture, two hours. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

210. Survey of Afro-Asiatic Languages. (4) Lecture, three hours. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family. 224. Folklore and Mythology of the Near East. (4) (Same as Folklore M241.) Requisite: Folklore 101.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Seminics

Upper Division Courses

140A-140B. Elementary Akkadian. (4-4) Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.

141. Advanced Akkadian. (4) Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylonian texts.

142. Akkadian Literary Texts. (4) Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

199. Special Studies in Semitics. (2 to 8) Tutorial, to be arranged.

Graduate Courses

215B. Syriac. (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit.

220A-220B. Uguritic. (4-4) Lecture, two hours. Requisites: Hebrew 102A-102B-102C. Study of Uguritic language and literature. Only course 220B may be repeated for credit.

230. Seminar: Northwest Semitic Languages and Literatures. (4) Seminar, two hours. May be repeated for credit.

240X. Seminar: Akkadian Language. (1) Seminar, two hours. Readings of texts from various Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

241. Seminar: Akkadian Literature. (4) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

241X. Seminar: Akkadian Literature. (1) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

296. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

Turkic Languages

Upper Division Courses

101A-101B-101C. Elementary Turkish. (4-4-4) Lecture, five hours. Grammar, reading, conversation, and elementary composition drills.

111A-111B-111C. Elementary Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

112A-112B-112C. Advanced Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

114A-114B-114C. Bashkir. (4-4-4) Lecture, three hours. Requisites: course 102A. Grammar, reading of literary and folkloric texts.

115A-115B-115C. Elementary Azeri. (4-4-4) Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skills.

120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A-102B-102C or 111A-111B-111C or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, paralembology, and lexicology analyzed on today's native material.

160. Turkish Tradition. (4) Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

165. Islamic Literary Heritage of Central Asia. (4) Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

199. Special Studies in Turkic Languages. (2 to 8) Tutorial, to be arranged.

235A-235B-235C. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. (4-4-4) Lecture, three hours. Requisite: course 180. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

240A-240B-240C. Advanced Ottoman. (4-4-4) Lecture, three hours. Requisites: courses 210A-210B-210C. Emphasis on different genres of Ottoman writing (belle lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

250A-250B-250C. Islamic Texts in Chagatai. (4-4-4) Lecture, three hours. Requisites: courses 220A-220B-220C. Philological and linguistic survey of basic Islamic source material written in Chagatai literary language. Reading and discussion of Chagatai texts on Islamic topics.

280A-280B. Seminars: Modern Turkish Literature. (4-4-4) Seminar, two hours. Requisite: course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatai, and Azeri. (4-4-4) Seminar, two hours. Requisites: courses 210A-210B-210C and/or 220A-220B-220C. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatai, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

Scope and Objectives

The graduate major in this discipline is called Near Eastern Studies. For details, see the program by that name earlier in this section.

The undergraduate major is designed primarily for students preparing for a special emphasis in this geography area from the ancient to the modern period, (2) those who plan to live and work in the Near East whose careers can be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

Undergraduate Study

Near Eastern Studies B.A.

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. Students must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or the equivalent in the language of their choice.

Students may substitute for the European language requirement Program in Computing 1 and one course from Economics M40, Political Science 6, Sociology M18, or Statistics 10, plus one course from Geography 171, Political Science 102, Psychology 142H, or Sociology C112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Art History 104A, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major

Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Ancient Near East M104A, M104B, Anthropology 110, Art History M102A, M102B, 104B, C104C, 105F, Economics 110, 111, 112, 190, Ethnomusicology 20B, 130, Geography 187, Political Science 132A, 132B, 157, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Professor Irene A. Bierman at the program address.
Scope and Objectives
The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Students graduating with a doctoral degree in anatomy and cell biology and an emphasis in neurobiology can look forward to an academic career in medical and dental schools or research institutes and, in accord with this, the department strives to produce graduates soundly prepared for teaching at this level and for the conduct of productive research in neurobiology and cell biology. Program information is available through the department website.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
Admission
The Department of Neurobiology offers the Ph.D. degree in Anatomy and Cell Biology, and students may obtain the Master of Science (M.S.) degree in Anatomy and Cell Biology; however, the department normally does not admit candidates for the M.S. degree only.

Areas of Study
The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements
A minimum of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Neurobiology 597 or 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from Neurobiology 104, M202, M203A, M203B, M209A, and M209B; one departmental seminar; other courses essential to the student’s program; courses in the minor field (for those under the comprehensive plan). If Neurobiology 104 is selected, Neurobiology 254 must be taken concurrently, making a nine-unit requirement.

Comprehensive Examination Plan
Under the written comprehensive examination plan, students must demonstrate a grasp of the general principles of the required coursework, as well as an understanding of some related field relevant to their objectives.

Thesis Plan
For the thesis plan, a committee of an adviser and two departmental members approaches the thesis proposal after all coursework is completed. All members participate in criticism and approval of the eventual thesis, but there is no oral defense.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. degree in Anatomy and Cell Biology must have a bachelor's degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, general and organic chemistry, biochemistry, and college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, molecular biology, and statistics are highly recommended.

Doctoral applicant admission is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570 Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines
The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements
(1) Students are required to take for credit the following courses or course combinations: Neurobiology M202, M209A (or Biological Chemistry CM267 or Microbiology and Immunology M229), M209B, Biological Chemistry CM253, and an elective that is sanctioned by UCLA ACCESS.
(2) Participation in at least three seminar courses, one of which should be in the Department of Neurobiology.
(3) Completion of such elective courses as are essential for research interest.
(4) Rotation through three research laboratories in the first year, one term each, with course 596 credit (four units).

Since the Department of Neurobiology graduate degree program is a full participant in UCLA ACCESS, the students are referred to that program for further course requirements.

Written and Oral Qualifying Examinations
The written qualifying examination is intended to evaluate students’ knowledge of the research field and ability to formulate a practicable and significant research program.

Students submit by the end of the Spring Quarter of the second year a research proposal in the format of an individual National Institutes of Health (NIH) grant application. The research proposal reflects, as closely as possible in each individual’s case, the plan for the dissertation research. Students whose research goals are well focused and formulated may also assemble a doctoral committee at this time, and that committee reviews and grades the proposal. If the student has not settled on a research focus at this point, the written research proposal encompasses as closely as possible a topic within the student’s area of research interest. In this instance, an appropriate faculty committee is assembled to review and grade the proposal on a pass/fail basis. In either case, a research proposal that meets with approval of the appropriate committee constitutes the written qualifying examination.

Bona fide written dissertation proposals which satisfy the requirements for the written qualifying examination can be followed closely by the University Oral Qualifying Examination, which consists of an oral defense of the proposal accompanied by a 30- to 60-minute presentation with appropriately prepared visual aids. Research proposals that are less focused on the dissertation research, but which satisfy the requirements of the written qualifying examination, can be followed by a University Oral Qualifying Examination after plans for the dissertation research are formulated. The University Oral Qualifying Examination is heard and graded on a pass/fail basis by the student’s doctoral committee. The examination is scheduled by the student and major professor at a time that allows all of the members of the committee to attend. There is no specified time allotment for the examination. However, it is anticipated that one-half day should be adequate in the majority of cases. In the event that the committee reaches the conclusion that a failing grade is necessary, either because the research plan is faulty or the student is inadequately prepared to defend the plan, one addi-
tional opportunity is given to modify the proposal and pass the examination. The first University Oral Qualifying Examination should be taken no later than two and one-half years into the program and any reexamination no later than three years.

The Department of Neurobiology may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

**Neurobiology**

**Lower Division Course**

88. Lower Division Seminar: Special Topics in Neurobiology. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

**Upper Division Courses**

104. Histology and Cell Biology. (6) Lecture, four hours; laboratory, six hours. Designed for dental students. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included. Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

211. Cellular Basis of Learned Behavior. (2) Lecture/discussion, one two-hour session; laboratory, to be arranged. Preparation: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory.

221. Cellular and Molecular Neurochemistry. (4) (Same as Biological Chemistry M222, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics—metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

222. Cellular, Molecular, and Functional Aspects of Reproductive System. (4) (Formerly numbered 227.) (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

229. Oral Embryology and Histology. (4) (Same as Oral Biology M203.) Lectures and laboratory in instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

234. Seminar: Developmental Neuroendocrine-immunology. (2) (Same as Oral Biology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

235. Neuroactive Peptides: Molecular Biology to Function. (2) (Same as Medicine M235 and Neuroscience M246.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

251. Problems in Developmental and Comparative Immunology. (2) Review of current literature emphasizing early development and evolution of immune competence.

254. Structure and Function of Cells and Tissues. (2) Lecture, one hour; discussion, one hour. Requisite or corequisite: course 104. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Physiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology, hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

258. Seminar: Neurosciences. (2) Preparation: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit.

261. Neuronal Circuit Analysis. (2) (Same as Neuroscience M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

265. Evolution of Cancer. (2) Review of current literature emphasizing appearance of tumors and neoplasms in representive invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint.

M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars. (2-2-2) (Same as Physiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Designed for graduate students. Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

290. Tutorials in Anatomy. (2) Tutorial, one hour. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

390A-390B. Peer Review System. (2-2) Preparation: advancement to candidacy in integrative or systems biology. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

495A-495F. Preparation for Teaching in Anatomical Sciences. (2 to 4 each) Designed for graduate students. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

---

M201. Microscopic Anatomy and Cell Biology (7 units). Lecture/laboratory, two to three three-hour sessions (15-week semester). Designed for medical students. Microscopic study of structure and function of tissues and cells, with special reference to the human body.

M202. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Requisite: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

M203A-M203B. Neuroscience. (4-4) (Same as Physiology M203A-M203B.) Lecture, four hours. Designed for medical and qualified graduate program students. Lectures, demonstrations, examinations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.
597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.
598. Thesis Research for M.S. Candidates. (2 to 12) Tutorial, to be arranged.
599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged.

Associate Professor
Robert G. Frank, Jr., Ph.D., Division Chief

Upper Division Courses

107A-107B. Historical Development of Medical Sciences. (4-4) Lecture, three hours. Major contributions of medicine and medical personalities from earliest times to 1650. 107A. Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts. M108A-M108B. History of Biological Sciences. (4-4) (Same as History M195F-M195G.) Lecture, three hours. Designed for juniors/seniors. M108A. Biological Sciences from Ancient Times to the Early 19th Century; M108B. Biological Sciences from the Early 19th Century to the Mid-20th Century.

120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions. (4) Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

135. Popular Beliefs and Medicine. (4) Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedical science. Lecture, discussion, and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

Graduate Courses

240A-240B. History of Medical Sciences. (2-2) Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present.
250. History of Medical Psychology. (2) Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thought, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

596. Directed Individual Studies in Medical History. (2 to 12) Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Neurology

Upper Division Course

199. Special Studies. (2 to 8) Discussion, one to two hours; laboratory, four to six hours. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students.
Undergraduate Study

Neuroscience B.S.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.5 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, students are encouraged to select courses that complement the major; Psychology 10 is recommended as a social sciences elective. They are also encouraged to take a statistics course (e.g., Statistics 10 or approved lower or upper division equivalent).

Transfer Students

To be admitted as Neuroscience majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

The following 12 courses are required for the Neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 2: Three four-unit area electives (one from each area) as follows:

Area 2B: One systems and integrative neuroscience course from Computer Science M196B, Molecular, Cell, and Developmental Biology 171, Neuroscience M119N, M130, M174, 197B, Organismic Biology, Ecology, and Evolution M166, 167, M173, Physiological Science 111B, C125, 126, 138, 142, C143, C144, C145, Psychology 119F.

Area 2C: One molecular, cell, and developmental neuroscience course from Molecular, Cell, and Developmental Biology 138, C139, M185A, Neuroscience M148, 151, 197C, Organismic Biology, Ecology, and Evolution M158, Physiological Science 147.

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms in the same laboratory; one term applies toward Group 3 and one toward Group 4) or 199HA and 199HB (both terms in the same laboratory: one term applies toward Group 3 and one toward Group 4) or Psychology M181A-M181B (with approval of the neuroscience curriculum committee before start of project: one term applies toward Group 3 and one toward Group 4).

Group 4: Two additional elective courses from the Group 2 or 3 list or from Chemistry and Biochemistry 130B, 153C, Molecular, Cell, and Developmental Biology 104, CM156, C174A through C174F (two courses at two units each), CM185B, Neurobiology/Medical History 246, Physiological Science C100, C135.

Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted. Students may not apply both Molecular, Cell, and Developmental Biology 171 and Neuroscience M148/Physiological Science M148 toward the major; only one of the courses may be applied.

No more than eight courses may be from any one department. A maximum of eight units of Neuroscience 199 or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Honors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office, 1506D Gonda Center. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.
To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A.

Required Upper Division Courses (31 units): Neuroscience M101A-M101B-M101C (five units each) and four elective courses (16 units) selected from M102 or from Group 2, 3, or 4 as listed under the Neuroscience major.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Neuroscience
See the Neuroscience Interdepartmental Graduate Program for the graduate course offerings.

Upper Division Courses

M101A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open to credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M101B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Psychological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M101C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisite: course M101B (or Molecular, Cell, and Developmental Biology M175B or Physiological Science M180B or Psychology M117B) or Psychological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

101L. Neuroscience Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses M101A-M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experience with important methodology and experimental approaches in neuroscience.

M102. Introduction to Functional Anatomy of the Central Nervous System. (4) (Formerly numbered M132.) (Same as Psychology M117K.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

103. Neuroscience for Physicists, Mathematicians, and Engineers. (4) Lecture, three hours. Introduction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

M119N. The Visual System. (4) Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

M130. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M119, Physiological Science M181, Psychiatry M119, and Psychology M117L.) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A or Physiological Science 111A or Psychology 115). Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive-compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M148. Molecular and Cellular Physiology of Neurons. (5) (Same as Physiological Science M148.) Lecture, four hours; outside study, 11 hours. Requisite: course M101A or Physiological Science 111A. Advanced treatment of selected topics in cellular neurophysiology.

151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disease. (4) Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to understand more about role of genes in normal development of brain and in disease. Required student participation in discussions.

M174. Biomedical Systems/Biocybernetics Research Laboratory. (Same as Computer Science CM196L.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: Computer Science M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Letter grading.

194. Independent Study of Neuroscience Literature. (2) Library research, six hours minimum. Requisite: course 191A. Directed independent library research with a faculty member. Written proposal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

196H. Honors in Neuroscience. (4) Lecture, one hour; discussion, two hours; Preparation: one statistics course (Statistics 10 or equivalent). Limited to neuroscience honors program students. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA/199HB. Letter grading.

197A-197B-197C. Special Topics in Neuroscience. (4-4-4) (Formerly numbered 197.) Lecture, three hours. Requisite: course M101A. Topics on one or more aspects of neuroscience. May be applied as an elective only in the specific area of group 2. 197A. Behavioral and Cognitive Neuroscience; 197B. Systems and Integrative Neuroscience; 197C. Molecular, Cell, and Developmental Neuroscience.

199. Independent Research in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course M101A. Limited to seniors and juniors with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

199HA. Honors Thesis in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course M101A. Limited to neuroscience honors program students. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on completion of course 199HB).

199HB. Honors Thesis in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course M101A. Continued reading and research that culminate in honors paper. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

Course List

Chemistry and Biochemistry
130B. Organic Chemistry: Reactivity and Synthesis, Part II
153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation

Computer Science
M196B. Modeling and Simulation of Biological Systems

Molecular, Cell, and Developmental Biology
104. Cell and Molecular Biology Laboratory
138. Developmental Biology
139. Molecular Cell Biology
CM156. Human Genetics
171. Principles of Neurobiology
C174A-C174G. Advanced Topics in Cell and Molecular Biology
M185A. Immunology
CM185B. Intermediate Immunology

Organismic Biology, Ecology, and Evolution
129. Animal Behavior
132. Field Behavioral Ecology
M158. Cell Biology
M166. Animal Physiology
167. Regulatory Physiology
M173. Anatomy and Physiology of Sense Organs

Psychological Science
C100. Experimental Statistics
111B. Foundations in Psychological Science
C125. Comparative Endocrinology: Molecular to Behavioral
126. Biological Clocks
C135. Dynamical Systems Modeling of Physiological Processes
138. Neuromuscular Physiology and Adaptation
142. Sensorimotor Physiology
C143. Neuromotor Control of Posture and Movement
C144. Neural Control of Physiological Systems
C145. Neural Mechanisms Controlling Movement
147. Neurobiology of Learning and Memory

Psychology
110. Fundamentals of Learning

Scope and Objectives

The goal of the interdepartmental graduate Neuroscience Program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organization of nervous systems; intercellular and intracellular communication, including the cellular and molecular basis of neurotransmitter production and reception; development, including the molecular and cellular basis of trophic interactions; behavior; cognition; and the neurobiological and molecular bases of neurological and neuropsychiatric disorders.
Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

None.

Doctoral Degree

Admission

Successful applicants to the program leading to the Ph.D. degree in Neuroscience must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) and Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus and at least one year each of general chemistry, organic chemistry and biochemistry, physics, and basic biology, including molecular and cell biology. Three letters of recommendation are required.

Major Fields or Subdisciplines

Molecular, cellular, developmental, systems, behavioral, and clinical neuroscience.

Course Requirements

First-year students take a five-course sequence (Neuroscience M201, M202, M203, M204, M205) and participate in at least two laboratory rotations. Students also attend a “Meet the Professors” presentation series and enroll in a three-quarter seminar series, Neuroscience 210A-210B-210C.

Second-year students take at least one quarter of biomathematics (either Biomathematics 160, 170A, 170B, Physiological Science CM200, or Psychology 250A), as well as three courses from a menu of advanced neuroscience courses. In the second or third year, students take an additional three quarters of Neuroscience 211A-211B-211C.

Written and Oral Qualifying Examinations

A written qualifying examination is required following completion of the core requirements, generally by the beginning of the second year. The objective of the examination is to test basic knowledge and ability to relate knowledge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

After passing the written qualifying examination, students, in consultation with the adviser, choose the doctoral committee to administer the University Oral Qualifying Examination.

Neuroscience

Graduate Courses

M201. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Neurobiology M201.) Lecture, three hours; laboratory, three hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

M202. Cellular Neurophysiology. (4) (Same as Physiological Science M202.) Lecture, three hours; discussion, one hour. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

M203. Molecular Neurobiology. (4) (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A-201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neurobiology M204, Physiological Science M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: courses M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M205. Behavioral and Systems Neuroscience. (4) (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Requisites: courses M201, M202, M203, or M204. Introduction to fundamentals of behavioral and systems neuroscience. Emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2) Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

220. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Physiological Science M210 and Psychology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisites: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

223. Mechanisms and Relief of Pain. (2) (Same as Oral Biology M204.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

224. Cell and Tissue Neurobiology. (4) (Same as Neuroscience M209B.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

226. Neuroactive Peptides: Molecular Biology to Function. (2) (Same as Medicine M235 and Neurobiology M235.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

227. Neural Control of Cardiopulmonary Function. (4) (Same as Physiological Science M247.) Lecture, two hours; discussion, two hours. Requisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

254. Interdisciplinary Research Seminar. (2) Lectures and discussions on many different disciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecturer; new information in depth from students in fields closely related to subject discussed. S/U grading.

255. Functional Organization of Behavior. (2) (Same as Psychiatry M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

257. Structure and Function of Limbic System. (2) (Same as Biological Chemistry M221, Neurobiology M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

471 / Neuroscience
M259. Neurobiology of Sleep. (3) (Same as Psychiatry M249 and Psychology M266.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREMP sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

M261. Neuronal Circuit Analysis. (2) (Same as Neurobiology M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

M262. Neural Systems for Motor Control. (4) (Same as Physiological Science M240.) Requisite: Physiological Science C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of the cerebral cortex, with respect to modification of motor output.

M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4) (Same as Physiological Science M263.) Requisite: Physiological Science C145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

M267. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

271. Neurobiology of Disease. (2) Analysis of clinical neurological and psychiatric disorders from perspective of basic neuroscience.

M273. Neural Basis of Memory. (4) (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

274. Computational Neuroscience. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

275. Advanced Techniques in Neurobiology. (2) Lecture, one hour; laboratory, one hour. Preparation: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Methods in Neuroscience Public Education. (2) Seminar, one hour; fieldwork, six hours. Designed for juniors/seniors and graduate students. Training and supervised internship for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Designed for students requiring special instruction or time to work on dissertation.

Susan M. Huser, R.N., M.S.
Joyleen Y. Martinez, R.N., M.S.
Kathy McCloy, R.N., M.S.
Ronda D. Mintz-Binder, R.N., M.N.
Dale R. Perry, R.N., M.S.
Deborah A. Rice, R.N., M.N.
Patricia Russell, R.N., M.P.H.
Dawn S. Stone, R.N., M.N.

Adjunct Associate Professor
Colleen K. Keenan, R.N., Ph.D

Adjunct Assistant Professor
Suzette Cardin, R.N., D.N.Sc.

Scope and Objectives
The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the Announcement of the UCLA School of Nursing by writing to the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

History and Accreditation
In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in Nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree
program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master’s degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The B.S. degree curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master’s nurse practitioner program has Board of Registered Nursing approval.

Undergraduate Study

Nursing B.S.

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Admission

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on licensure as a registered nurse, completion of requisite courses, scholarship, and attainment of a passing score on four Regents College Examinations. Students must have grades of C or better in requisite courses and an overall grade-point average of 3.0 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In addition to the regular UC Application for Undergraduate Admission and Scholarships which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

Degree Requirements

Students must complete 180 quarter units of college work and satisfy the general University requirements as follows:

1. Completion of all required general education courses as specified for completion both prior to admission and/or at UCLA: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), general chemistry (one college-level course), English composition (two courses), mathematics (one course), introductory or general microbiology with laboratory (one course), human nutrition (one course), introductory physics (one course or one year of high school physics with laboratory, with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course), and electives as needed.

2. Completion of a block of 30 units of credit by examination administered by the Regents College Examination Service in Adult Nursing, Fundamentals of Nursing, Maternal and Child Nursing-AD, and Psychiatric/Mental Health Nursing (this unit credit applies to the Nursing major only).

3. Completion of 76 to 88 units of lower and upper division coursework in residence, including Biostatistics 100A, Chemistry and Biochemistry 14B, Epidemiology 100, Life Sciences 2, 3, Nursing C100A, C102, C104, C105, C120, 190, 192, 193, 195, 196, and one or more courses from C100B, C110F, C111F, C112, C113A, C113B, C114F, C115F, C116F, C117F, C123, C130, C132F, and three four-unit electives.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

All required nursing courses in the school must be completed with a grade of C or better in each course.

Study Lists

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

Honors

Dean’s Honors

Dean’s Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible students must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

Honors at Graduation

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: summa cum laude, an overall average of 3.817; magna cum laude, 3.715; cum laude, 3.566. To be eligible students must have completed at least 98 University of California units for a letter grade. See the quarterly Schedule of Classes for the most current calculations of Latin honors.

School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor’s and the master’s program with the highest grade-point average in all nursing courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree as well as a concurrent degree with the John E. Anderson Graduate School of Management.

Admission

The following is required of applicants to the M.S.N. program:

1. Either graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division, or graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. If admitted under the latter, applicants may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

2. Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

3. An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A must be completed before entering the school.

4. An upper division nursing research course taken at a National League for Nursing-accredited institution and equivalent to Nursing 193 must be completed before entering the school.
An upper division physical assessment course taken at a National League for Nursing-accredited institution and equivalent to Nursing 192 must be completed before entering the school (not required of students selecting the nursing administration specialty).

Professional and/or academic competence in nursing attested through three letters of recommendation.

A satisfactory scholarship record.

Since written and verbal communication skills are basic to the practice of nursing, it is essential that applicants read, write, and speak English well. International applicants from a country in which English is not the first language and medium of instruction, whether a licensed registered nurse in the U.S. or not, are required to pass the Test of English as a Foreign Language (TOEFL) with a score of 560 or higher (scores must be submitted prior to consideration for admission).

All international applicants who are not licensed registered nurses in the U.S. prior to consideration for admission are required to pass the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination.

Prospective students interested in the Master of Science in Nursing program must file two applications: (1) Application for Graduate Admission and (2) Application for Admission to the School of Nursing. Both applications may be obtained from the Student Affairs Office. The application deadline for priority consideration is December 15; February 1 is the final deadline.

M.B.A./M.S.N.
The School of Nursing and the John E. Anderson Graduate School of Management offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Applicants must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

M.S.N. Curriculum for Certified Nurse Practitioners/Midwives
The School of Nursing offers the opportunity for applicants with a B.S. degree in Nursing and certification in California as an adult nurse practitioner (N.P.), family N.P., pediatric N.P., women's health care N.P. or a nurse midwife (C.N.M.), to earn the M.S.N. degree in one year. Students meet all the same admission requirements for the master's degree except for an upper division physical assessment course, and must provide evidence of certification as an N.P. or C.N.M. prior to consideration for admission. While students who follow this curriculum are held to the school minimum of 44 units for the M.S.N., up to eight units may be waived via petition based on skill and knowledge obtained through certification training. Course requirements include Nursing C200A-C200B, 204, C220, 225 (not required for students with a BRN furnishing number), C230, C237D or 238C or 239C, 264 (C.N.M. students take course 236), 437D or 438D or 439D, 597 and four units of theory elective.

Areas of Study
The School of Nursing offers graduate studies in the following areas:

1. Acute care.
2. Administration: nursing administration, nursing administration/occupational health.
4. Primary care: family, nurse-midwifery, occupational and environmental health nursing, pediatric.

Students in the acute, family, gerontology, and oncology nurse practitioner specialties may choose the neuropsychiatric subspecialty. All students may to add preparation in consultation, education, or management to their clinical requirement.

Course Requirements
A minimum of three core courses (eight to nine units) and additional coursework in the 100, 200, and 400 series are required for each area of clinical specialization. A total of four units of 500-series courses may be applied toward the total course requirement for the degree.

A minimum grade-point average of 3.0 is required. Grades of B are required in graduate clinical nursing courses in order to advance to the next clinical course in a series. A minimum of three quarters of full-time enrollment (eight units per quarter) is required for academic residence.

Core Requirements

Specialty Requirements
Additional course requirements vary according to specialty area selected:

Acute Care Specialty. The goal of the acute care specialty is to prepare nurses to assume an advanced practice role as a clinical nurse specialist or a nurse practitioner in acute care nursing. At least two years of prior experience in acute care nursing are highly recommended. Graduates are expected to function as acute care clinicians, educators, consultants, or researchers and to become leaders in a variety of inpatient and outpatient health care settings. Required courses include Nursing C200A-C200B, 204, C216F, C217F, C220, C230, 239A, 239B, 239C, 264, 416, 439A, 439B, 439C, and four units of theory elective.

Family Specialty. The family specialty prepares family nurse practitioners to provide primary health care for individuals throughout the life span. The focus is on collaborative, interdisciplinary practice to assure comprehensive quality health care and health maintenance in outpatient, work site, home health, nursing home, and hospital settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention and health promotion. Required courses include Nursing C200A-C200B, 204, C210F, C211F, C212, C220, 225, C230, 239A, 239B, 239C, 264, 439A through 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Gerontology Specialty. The gerontology specialty prepares nurses to assume an advanced practice role as nurse practitioners to meet the increased demands for leadership in health care for older persons, particularly those challenged by chronic illness. Emphasis is on the comprehensive assessment, treatment, and evaluation of the client and family. Advanced knowledge and skills in pathophysiology and psychosocial concepts guide theory-based practice, with the goal of optimizing functional status. Interdisciplinary collaboration and care management are emphasized. Required courses include Nursing C200A-C200B, 204, C220, 225, C230, 232F, 233F, 239A, 239B, 239C, 264, 439A through 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Neuropsychiatric Subspecialty. The neuropsychiatric subspecialty prepares nurses to assume an advanced practice role as nurse practitioners to meet the increased demands for leadership in health care for older persons, particularly those challenged by chronic illness. Emphasis is on the comprehensive assessment, treatment, and evaluation of the client and family. Advanced knowledge and skills in pathophysiology and psychosocial concepts guide theory-based practice, with the goal of optimizing functional status. Interdisciplinary collaboration and care management are emphasized. Required courses include Nursing C200A-C200B, 204, C220, 225, C230, 232F, 233F, 239A, 239B, 239C, 264, 439A through 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.
ogy nurse practitioner specialties and Nursing 241F, 242F, 441, 442.

Nurse-Midwifery Specialty. The nurse-midwifery specialty prepares certified nurse-midwives to provide care to women, newborns, and their families. The focus is on an independent and collaborative practice to assure comprehensive quality health care and health maintenance throughout the childbearing, interconceptional, perimenopausal, and newborn periods. Care is provided in outpatient, home, and inpatient settings. Emphasis is on the assessment, diagnosis, treatment, and evaluation of the client’s responses to actual or potential health problems and includes primary prevention. Required courses include Nursing C200A, 204, C220, 225, C230, 234, 235, 236, 237A through 237E, 434, 437A through 437F.

Nursing Administration Specialty. The nursing administration specialty focuses on organizational theory, health services and financial management, and the practice of nursing administration within acute, ambulatory care, and/or community-based settings. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced management practice needed to plan and evaluate nursing services. Health services and financial management content provides a framework for organizing, directing, and coordinating health care resources.

The program requires both theory and management practicums, including a 10-week administrative residency. Stipends for the residency program may be provided by the institutions in which the residency is completed. Individualized plans for practicums are available. Required courses include Nursing C200B, 204, 213A, C213B, 218A, 218B, 218C, 219A, 219B, C220, 264, 418A through 418D, Environmental Health Sciences 250, 251, Epidemiology 100.

Occupational and Environmental Health Nursing Specialty. The occupational and environmental health nursing specialty integrates principles of occupational and environmental health assessment and care with primary ambulatory care of adult groups. Practitioners evaluate the individual as seen within the work setting as well as within the family and community group. Primary focus and emphasis are on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers. Requirements are met through a combination of courses and experiences specific to the delivery of occupational and environmental health care services. Required courses include Nursing C200A-C200B, 204, C211F, C213A, C213B, 213C, C220, 225, C230, 239A, 239B, 239C, 264, 439A through 439D, Environmental Health Sciences 200A, 251, 254, 259, 259D, and Epidemiology 100 or equivalent. An elective experience in the clinical nurse specialist role is also available.

Oncology Specialty. The oncology specialty trains advanced practice nurses to provide leadership in the field of oncology nursing. This option includes a focus on nursing care of critically and chronically ill cancer patients and their families in a variety of settings and across the health/illness continuum (prevention, diagnosis, treatment, rehabilitation, palliative care). Students undertake intensive individualized preparation in either the role of nurse practitioner or clinical nurse specialist. Required courses include Nursing C200A-C200B, 204, C214F, C215F, C220, C230, 239A, 239B, 239C, 264, 416, 439A, 439B, 439C, and four units of theory elective. Additional required courses for the oncology nurse practitioner include Nursing 225, 439D.

Pediatric Specialty. This specialty prepares pediatric nurse practitioners to assume leadership roles in the health care of children. Emphasis is on the assessment, diagnosis, treatment, and evaluation of children’s actual or potential health problems. Content stresses care for acute and chronic illnesses as well as primary prevention. Required courses include Nursing C200A-C200B, 204, C212, C220, C223, C225, C230, 238A, 238B, 238C, 264, 438A through 438D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Comprehensive Examination Plan
Successful completion of the comprehensive examination is required. The examination is given in written form during Spring Quarter. Students are eligible to take the examination once they are advanced to candidacy and may repeat the examination twice. Retakes only are offered during Summer and Winter Quarters.

Students must complete all requirements for the degree within one calendar year after advancement to candidacy.

Thesis Plan
None.

Doctoral Degree Admission
Priority for admission to the program leading to the Ph.D. degree in Nursing is given to graduates of accredited master’s degree programs in nursing. Those admitted to doctoral study with a bachelor’s degree in nursing and a master’s degree in a nonnursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master’s advanced practice programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted with a bachelor’s degree in nursing are required to complete a program of master’s courses in nursing at UCLA as a requisite to entry into doctoral courses.

Applicants to the Ph.D. degree program must provide evidence of the following:
(1) A master’s degree in nursing; a Bachelor of Science degree in Nursing and a master’s degree in a nonnursing field; or a Bachelor of Science degree in Nursing. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and the Graduate Division. Students who are accepted with deficiencies are required to complete appropriate master’s courses.
(2) A scholarship record satisfactory to the Graduate Division and to the School of Nursing with a minimum grade-point average of 3.5.
(3) A combined verbal, quantitative, and analytic score of 1,500 on the Graduate Record Examination (GRE), taken within the past five years. Exceptions to this score may be considered when there is compelling evidence in other areas.
(4) An upper division statistics course with content equivalent to Biostatistics 100A or Biomathematics 170A.
(5) A graduate-level nursing research course with content equivalent to Nursing 205.
(6) A four-unit graduate-level nursing theory development course.
(7) A minimum score of 560 on the Test of English as a Foreign Language (TOEFL) for applicants from countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission).
(8) A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission.
(9) Status as a licensed registered nurse; evidence of current licensure as a registered nurse in the State of California is mandatory.

(10) Four letters of reference affirming the applicant’s potential for scholarly, investigative, and creative endeavors in nursing.

(11) Examples of scholarly papers and/or creative works.

(12) A statement of educational objectives, specific focus of research, and program and career goals.

(13) Curriculum vitae.

Prospective students interested in the Ph.D. program must file two applications: (1) Application for Graduate Admission and (2) Application for Admission to the School of Nursing. Both applications may be obtained from the Student Affairs Office. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

**Major Fields or Subdisciplines**

In the doctoral program, students focus their study in one of two areas: biobehavioral research or health systems research. Students who choose biobehavioral research focus on studies that describe, explain, and predict biologic and behavioral factors which relate to health promotion and disease prevention. Students who choose health systems research focus on studies that examine the function, structure, process, and outcome of a range of multidisciplinary health delivery systems such as hospitals, nursing homes, and community-based organizations. Both research areas incorporate human diversity and the influence of the psychosocial and physical environments.

**Course Requirements**

**Core Requirements.** The following courses are required of all students in the Ph.D. program:

1. Nursing science: Nursing 202, 206A-206B.
2. Nursing research: Nursing 207, 208, 299A, 299B-299C, 299D.
3. One statistics sequence (recommended minimal sequences: Education 230B, 230C, and 231A. For additional quantitative: Education 231B; for additional qualitative: see Anthropology or sociology offerings.)

**Cognate Requirements.** Twenty-four units of cognate courses relevant to the major area of study (biobehavioral research, health systems research) are taken. A minimum of four units and a maximum of 12 units are taken in nursing. The remainder are taken in support discipline areas.

**Written and Oral Qualifying Examinations**

**Written Qualifying Examination.** The written qualifying examination must be passed after completion of the basic core courses. The examination evaluates three areas of knowledge:

1. the basic concepts of nursing science; (2) nursing research methods and analysis; and (3) the basic concepts of the student's focused area of study. Normally no more than one reexamination is permitted.

**Oral Qualifying Examination.** The University Oral Qualifying Examination, taken after completing the course requirements and successfully passing the written qualifying examination, evaluates students’ dissertation proposals. The initial step is selection of a doctoral committee. Students are responsible for obtaining the consent of four or more faculty members to serve on the committee as certifying members. Qualifications of members must be consistent with students’ area of research and special interests and also with the requirements for doctoral committees as stated in the Standards and Procedures for Graduate Study at UCLA. Additional members, including those from an institution or clinical agency representing the student’s clinical and research interests, may be appointed as noncertifying members by petition if the doctoral program committee and the student agree that additional experts are needed. The graduate adviser of the doctoral program committee must give approval of members consenting to serve on the doctoral committee before student seeks approval of the dean of the Graduate Division.

**Nursing**

**Upper Division Courses**

C100A-C100B. Biobehavioral Foundations of Health Assessment. (3-3) Lecture, two hours. Theories of health behaviors in relation to assessment of epide- miological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. Concurrently scheduled with courses C200A-C200B. Letter grading. C100A. Requisite: course C100A or approved physical assessment course. C100B. Requisite for acute care, family, gerontology, nurse midwifery, occupational health, oncology, and pediatric specialty students: course C100A.

102. Professional Nursing in Culturally Diverse Communities. (5) Lecture, four hours; community experience, one hour. Assistance for registered nurses in transition to professional nursing role (i.e., from caring for individuals to caring for families and communities). Emphasis on delivery of acute and chronic community-based care and mental health services in multicultural society. Examination of concepts of professional nursing and cultural and human diversity, as well as ethical and political issues. Letter grading.

105. Human Physiology. (4) Lecture, four hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. Letter grading.

C110F. Theoretical Foundations of Family Nursing. (4) Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Concurrently scheduled with course C210F. Letter grading.

C111F. Theoretical Foundations of Family Nursing. (4) Lecture, three hours; selected field experiences. Requisite: course C110F. Continuation of course C110F. Concurrently scheduled with course C211F. Letter grading.

C112. Health-Related Family Theory. (2) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Identification of limitations of current theory and applicability of current knowledge to various problems encountered in care of families. Concurrently scheduled with course C212. Letter grading.

C113A. Occupational Health Nursing Role and Theory. (2) Lecture, two hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Concurrently scheduled with course C213A. Letter grading.

C113B. Occupational Health Programs. (2) Lecture, two hours. Requisite: course C113A. Program planning, evaluation, and management of occupational health programs, including analysis of individual leadership styles and management concepts. Assessment of economic, political, and other factors that affect occupational health and safety programs. Concurrently scheduled with course C213B. Letter grading.

C114F. Human Responses to Cancer. (4) Lecture, three hours; selected field experiences. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Concurrently scheduled with course C214F. Letter grading.

C117F. Human Responses to Critical Illness. (4) Lecture, three hours; discussion, one hour. Requisite: course C116F. Builds on pathophysiologic concepts and nursing management of critically ill adults presented in course C116F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses. Concurrently scheduled with course C217F. Letter grading.

C120. Theories of Instruction and Learning in Nursing. (3) Lecture, two hours. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia. Concurrently scheduled with course C220. Letter grading.
C123. Childhood Development: Research and Application to Nursing. (2) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Concurrently scheduled with course C223. Letter grading.

C130. Advanced Pathophysiology. (4) Lecture, four hours. Requisite: course 105 or equivalent taken within past five years. Operative mechanisms, management, and control of major portions of human organ systems (i.e., normal human physiology with application to pathophysiology). Builds on basic concepts of cell- and system-oriented physiology; presentation of emerging and topical issues affecting advanced practice and clinical management. Concurrently scheduled with course C230. Letter grading.

M158. Culture, Illness, and Healing. (4) (Same as Anthropology M168.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

190. Community Health Nursing. (8) (Formerly numbered 190F.) Lecture, three hours; clinical, 15 hours. Clinical concentration in multicultural community health nursing settings: public health, rehabilitation, mental health centers, occupational health, and schools. Theoretical content focuses on the community as a context for understanding the relationship between health status of individuals and groups with the psychosocial/physical environment. Letter grading.

192. Physical Assessment. (4) Lecture, four hours. Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collection instrument, planning for data analysis, protection of human rights, reading research reports, and writing a research proposal. P/NP or letter grading.

195. Nursing Management. (3) Lecture, two hours; field study, three hours. Requisites: course 104, Biostatistics 100A, Epidemiology 100. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in organizational structures and community health care settings. Letter grading.

196. Issues in Providing Health Care to Culturally Diverse Populations. (4) Lecture, three hours; discussion, one hour. Open to non-nursing students with consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings. Letter grading.

199. Special Studies in Nursing. (2 to 16) Tutorial, to be arranged. Limited to seniors. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

Graduate Courses

201. Health-Related Quality of Life. (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

202. Philosophical Foundations of Science of Nursing. (4) (Formerly numbered 210F.) Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Concurrently scheduled with course C110F. Letter grading.

210. Theoretical Foundations of Family Nursing. (2) Lecture, two hours. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Letter grading.

210F. Theoretical Foundations of Family Nursing. (4) (Formerly numbered 210F.) Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Concurrently scheduled with course C110F. Letter grading.

211F. Theoretical Foundations of Family Nursing. (4) (Formerly numbered 211F.) Lecture, three hours; selected field experiences. Requisite: course C110F/C210F. Continuation of course C210F. Concurrently scheduled with course C111F. Letter grading.

212. Health-Related Family Theory. (2) (Formerly numbered 212F.) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Identification of limitations of current theory and applicability of current knowledge to various problems encountered in care of families. Concurrently scheduled with course C112. Letter grading.

213A. Occupational Health Nursing Role and Theory. (2) Lecture, two hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Concurrently scheduled with course C113A. Letter grading.

213B. Occupational Health Programs. (2) Lecture, two hours. Requisite: course C113A/C213A. Program planning, evaluation, and management of occupational health programs, including analysis of individual leadership styles and management concepts. Assessment of economic, political, and other factors that affect occupational health and safety programs. Concurrently scheduled with course C113B. Letter grading.

214. Human Responses to Cancer. (2) Lecture, two hours. Cancer-related research and theory from a variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Letter grading.

214F. Human Responses to Cancer. (4) (Formerly numbered 214F.) Lecture, three hours; selected field experiences. Cancer-related research and theory from a variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Concurrently scheduled with course C114F. Letter grading.

C217F. Human Responses to Critical Illness. (4) (Formerly numbered 217F) Lecture, three hours; discussion, one hour. Requires: course C116F/C216F. Builds on pathophysiologic concepts and nursing management of critically ill adults presented in course C216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses. Concurrently scheduled with course C117F. Letter grading.

218A. Nursing Administration Theory. (4) Lecture, four hours. Application of organizational, communication, leadership, and management theories in health care systems, including content related to organizational structure and function, and research design and methodologies. Letter grading.

218C. Nursing Administration Theory. (4) Lecture, four hours. Requires: course 218B. Theories related to organizational development and change, political action, marketing, and public relations and the media, including ethics of decision making and local, national, and international markets. Letter grading.

219A. Essentials of Accounting and Budgeting in Health Care Organizations. (4) Lecture, four hours. Highly desirable preparation: functional competency in use of electronic spreadsheet (e.g., LOTUS or EXCEL). Designed for graduate nursing administration program students. Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on definition of terms and concepts, followed by practical applications within a variety of health care settings. Letter grading.

219B. Operations Planning and Control for Nursing Administrators. (4) Lecture, four hours. Preparation: functional competency in use of integrated spreadsheet/database/graphics software (e.g., LOTUS or EXCEL). Requires: course 219A. Exposure to concepts, issues, and analytic techniques of C-B/A-C-E-A, CQI, decision making, forecasting, productivity determinations, program planning and evaluation for nurse administrators. Emphasis on practical application of methods and techniques within health care arena. Letter grading.

220. Theories of Instruction and Learning in Nursing. (3) (Formerly numbered 220.) Lecture, two hours. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia. Concurrently scheduled with course C120. Letter grading.

222. Immunosuppression and Patient Care. (2) Lecture, two hours. Requires: course 218A. Focus on immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on pathologic and pathophysiologic mechanisms of immunosuppression as a basis for information in patient education and clinical decisions, and supportive treatments and modifiers. Letter grading.

223. Childhood Development: Research and Application to Nursing. (2) (Formerly numbered 223.) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Concurrently scheduled with course C123. Letter grading.

224. Health-Related Problems of Vulnerable Populations. (2) Lecture, two hours. Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S. Letter grading.

225. Pharmacology for Advanced Practice Nurses. (4) Lecture, four hours. Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions. Letter grading.

229. Biologic/Psychologic Interface in Health and Illness. (2) Lecture, two hours. Interaction of physiologic, behavioral, and psychosocial factors in health and illness, and research underlying these factors, including differential influence of gender, ethnicity, and culture. Letter grading.

C230. Advanced Pathophysiology. (4) (Formerly numbered 230.) Lecture, four hours. Requires: course 105 or equivalent taken within past five years. Designed for graduate nursing students. Operative mechanisms and control of major portions of human organ systems (i.e., normal human physiology with application to pathophysiology). Builds on basic concepts of cell and system-oriented physiology; presentation of emerging and topical issues affecting advanced practice and clinical management. Concurrently scheduled with course C130. Letter grading.

234. Health Assessment of Women: Primary Care. (3) Lecture, three hours. Requires: course 192. Theoretical basis for health assessment and changes in women as related to primary care, with focus on physiologic, psychosocial, and behavioral factors and on theoretical components of nurse-midwifery management process. Common health problems other than those related to gynecology or reproduction included. Elements of primary care which focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

236. Professional and Legal Issues in Nurse-Midwifery. (2) Lecture, two hours. Designed for graduate students in advanced practice in nurse-midwifery option of master’s program. Current theory and research of advanced nursing roles, with emphasis on role of certified nurse/midwife. Organizational, administrative, legal, and ethical issues as required by certifying agencies. Letter grading.

237C. Primary Care of Women: Postpartum and Newborn Management. (2) (Formerly numbered 237B.) Lecture, two hours. Requires: course 237B. Theory, research, assessment, and management of common, low-risk, and high-risk conditions occurring during postnatal period and adaptation to extrauterine life, including neonatal physical assessment. Breast-feeding support and maternal/infant interactions. Letter grading.

237D. Primary Care of Women: Advanced Nurse-Midwifery Management. (2) Lecture, two hours. Requires: course 237C. Synthesis of previous coursework, with focus on nurse-midwifery management of complications of intrapartum period and management or referral as necessary. Basic theory of obstructic ultrasonography and appropriate use of informa-
237F. Primary Care of Women: Family Planning and Gynecology Management. (4) Lecture, four hours. Preparation: critical analysis and application of family planning and gynecological theories, research, and clinical experience. Exploration of education and application of family planning and gynecologic theories, research, and clinical experience. Prior to graduation, students must have completed a minimum of three family planning and gynecologic courses. Letter grading.

241F. Biobehavioral Foundations of Neuropsychiatric Assessment. (4) Lecture, three hours; field experiences. Requisites or corequisites: courses C200A-C200B. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

242. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, three hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, three hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

244. Theoretical Foundations of Complementary Health Care II. (2) Lecture, two hours. Continuation of course 243. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

244F. Theoretical Foundations of Complementary Health Care II. (4) Lecture, four hours. Requisite: course C243F. Continuation of course 243F. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

247. Advanced Seminar: Medical Anthropology. (4) (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of medical anthropology, culture, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

299A. Nursing Research Seminar. (4) Seminar, three hours. Preparation: one cognate area course. Requisites: courses 206A-206B, 207, 208. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights faculty expertise in research, culminating in communication and dissemination of their research. S/U grading.

299B-299C. Nursing Research Seminars. (1 to 4 each) Seminar, one hour; discussion, one to four hours. Preparation: statistics sequence in cognate area. Requisites: courses 206A-206B, 207, 208. Seminars are advanced research courses for students throughout execution of their dissertations, beginning with selection of a researchable problem and culminating in communication and dissemination of their research. S/U grading.

299D. Nursing Research Seminar. (1 to 4) Seminar, one hour; discussion, one to four hours. Preparation: statistics sequence in cognate area. Requisites: courses 206A-206B, 207, 208. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

416. Advanced Practice Nursing: Acute Care Laboratory Practicum. (1) Laboratory, three hours. Required of acute care and oncology specialty students. Introduction to advanced practice diagnostic or therapeutic procedures and related indications, complications, and follow-up care in laboratory setting, including advanced electrocardiograms and chest X-ray interpretation, understanding, and application of organizational theory within leadership and management roles in organizations involved with health care. Provides a practical setting to apply theory, particularly content of course 218A, under supervision of a skilled preceptor. Letter grading.

418A. Nursing Administration Practicum. (2) Clinical practicum, six hours. Corequisite: course 218A. Analysis, evaluation, and application of organizational theory within leadership and management roles in organizations involved with health care. Provides a practical setting to apply theory, particularly content of course 218A, under supervision of a skilled preceptor. Letter grading.

418B. Nursing Administration Practicum. (2) Clinical practicum, six hours. Corequisite: course 218B. Synthesis and application of previous learning and organizational theories in development of organizational strategies in relation to health economics and finance, quality patient care, resource management, informatics, law, policy, and ethics. Provides a practice setting to apply theory, particularly content of course 218B, under supervision of a skilled preceptor. Letter grading.

418C. Nursing Administration Practicum. (2) Clinical practicum, six hours. Corequisite: course 218C. Participation in and evaluation of processes of project management, organizational development and change, political influence outside the organization, maximizing diverse relationships and relationships with physicians, administrators, and boards, marketing, dealing with the media, and ethics of administration decision making. Provides a practice setting to apply theory, particularly content of course 218C, under supervision of a skilled preceptor. Letter grading.
418D. Nursing Administration Residency (10 units). Seminar, two hours; clinic practicum, 32 hours. Requisite: course 418C. Students assume leadership role in planning, managing, and evaluating an administrative project, and demonstrate expertise in application and evaluation of organizational theories in multiple roles. Students also plan for future continuous personal and professional growth. Letter grading.

434. Health Assessment of Women: Primary Care Clinical Management. (2) Clinic practicum, six hours. Clinical experience in application of principles of health assessment and primary care of women, with focus on physiologic, psychosocial, and behavioral factors and on clinical components of nurse-midwifery management process. Common health problems other than those related to gynecology or reproduction included. Elements of primary care which focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

437A. Nurse-Midwifery Clinical Management I. (4) Clinic, 11 hours; clinical conference, one hour. Corequisite: course 237A. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on counseling and screening for prevention and early detection of common risk conditions that may complicate prenatal period. Letter grading.

437B. Nurse-Midwifery Clinical Management II. (4) (Formerly numbered 437C.) Clinic, 12 hours. Corequisite: course 237B. Application of current theory, research, and knowledge relevant to nurse-midwifery care and management of childbearing family during intrapartum and immediate newborn periods. Letter grading.

437C. Nurse-Midwifery Clinical Management III. (4) (Formerly numbered 437B.) Clinic, 12 hours. Corequisite: course 237C. Application of knowledge to management of postpartum women and newborns, with emphasis on interventions to assist with breastfeeding and counseling about interconceptional family planning and prevention of complications in new-born’s transition to extratertiary life. Letter grading.

437E. Primary Care of Women: Family Planning and Gynecology Clinical Management. (4) Clinic, 11 hours; clinical conference, one hour. Corequisite: course 237E. Primary care for gynecology, family planning, and evaluation of clients in premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling applied in clinical experiences, case studies, and skills laboratories. Letter grading.

437F. Primary Care of Women: Nurse-Midwifery Integration. (6) Clinic, 24 hours (10 weeks) or 40 hours (six weeks). Requisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the childbearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant). Letter grading.

438D. Pediatric Primary Care: Residency. (9) Clinic practicum, 27 hours. Requisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems. Letter grading.

439B. Advanced Practice Nursing: Clinical Practicum. (4) Clinic practicum, 12 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

439C. Advanced Practice Nursing: Clinical Practicum. (4) Clinic practicum, 12 hours. Corequisite: course 239C. Third clinic practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms. Special emphasis on acute and chronic problems across life span, including review and analysis of current theory and research. Letter grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (4 to 8). Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated once for credit, but only four units may be applied toward graduate degree requirements. S/U grading.

597. Individual Study for Comprehensive Examination. (4 to 8) Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student’s chair. May be repeated for credit, but only eight units may be applied toward Ph.D. degree requirements. S/U grading.

http://www.obgyn.medsch.ucla.edu/

**Chairs**
Alan H. DeCherney, M.D., Executive Chair
Teichiro Fukushima, M.D., Vice Chair, King/Drew
Howard L. Judd, M.D., Vice Chair, Olve View-UCLA
Lawrence Platt, M.D., Vice Chair, Cedars-Sinai
Michael G. Ross, M.D., Vice Chair, Harbor-UCLA

**Scope and Objectives**

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women’s health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Chairs
Bartly J. Mondino, M.D. (Wasserman Professor of Ophthalmology), Chair
Sherwin J. Isenberg, M.D. (Grace and Walter Lantz Endowed Professor), Vice Chair
Harbor-UCLA Arthur L. Rosenbaum, M.D., Vice Chair

Scope and Objectives
Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Adjunct Assistant Professors
Anahid Jewett, Ph.D.
Diana Messadi, D.D.S., Ph.D.
Shen Pang, Ph.D.

Scope and Objectives
Ocular biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
The Department of Oral Biology offers the Master of Science (M.S.) degree in Oral Biology.

Admission
In addition to meeting the general admission requirements set by the Graduate Division, applicants to the program leading to the M.S. degree in Oral Biology must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics. The Graduate Record Examination (GRE) General Test is required for admission.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant’s background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./M.S. or advanced certificate training/M.S. by making simultaneous application for graduate study in the Oral Biology Department and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions/Student and Academic Affairs. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Areas of Study
Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements
A total of 36 units is required to satisfy the degree requirements. Eight core courses (Oral Biology 201A-201B-201C, 205, 215, 260, and 275) are required and should be taken during the first year of graduate study.

Additional elective courses (a minimum of five units), either at the upper division or graduate level, essential to the research area must be taken.

Eight units of courses 596 and 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
None.

Thesis Plan
The thesis is intended to demonstrate the student’s ability to design and carry out a research project and analyze and present the resulting data. Results are expected to be of publishable scientific quality. The subject of the thesis must be approved by the graduate adviser and research mentor. At the end of the first year of study, students should prepare and send a proposal of the research project to the graduate adviser.

Doctoral Degree
Admission
In addition to meeting the general admission requirements set by the Graduate Division, applicants to the program leading to the Ph.D. degree in Oral Biology must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics. The Graduate Record Examination (GRE) General Test is required for admission.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant’s background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./Ph.D. or advanced certificate training/Ph.D. by
making simultaneous application for graduate study in the Oral Biology Department and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions/Student and Academic Affairs. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Major Fields or Subdisciplines
Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements
In the first two years, Oral Biology 201A-201B, 205, 206, 215, and 275 are required. Two laboratory rotations (Oral Biology 596) and the seminar (Oral Biology 260) are also required.

In the second year, students are expected to choose an area of emphasis and continue to take additional required and elective courses (a minimum of four to five courses). A menu of the second-year curriculum in each area of emphasis is available in the program office.

Written and Oral Qualifying Examinations
By the beginning of the second year of study, students are responsible, with the advice and consent of the graduate adviser, for organizing the guidance committee. Faculty members constituting the guidance committee include the student’s research mentor and two others from the student’s areas of emphasis. The guidance committee is responsible for approving the course of the student’s doctoral study and conducting a review of the student’s progress. The members of the guidance committee plus one more faculty member serve on the doctoral committee: three members must be from the Oral Biology Department and one member must be from a department outside the School of Dentistry.

After the completion of the core course requirements, a broad essay-type examination in the major areas of oral biology and cell biology is given by the graduate training committee. Based on the result of the written qualifying examination as well as performances in coursework, recommendations are made to the student to (1) continue with the Ph.D. program requirements, (2) schedule a retake of the written qualifying examination, (3) be directed to the M.S. program, or (4) be terminated. Permission to retake the examination is granted by the graduate training committee no more than two times.

After satisfactory completion of the written qualifying examination, it is expected that the University Oral Qualifying Examination be completed, preferably by the end of the summer of the second year.

The examination consists of a proposal that outlines the dissertation research, providing a review of the literature, a statement of the aims of the research, and a description of the planned research activities. Discussion of the written proposal is followed by a question and answer period on general topics related to oral biology.

The guidance committee’s decision to advance the student to candidacy, to allow for repeating the examination, or to disqualify from the program is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework, and the research ability as judged by an abstract of the research submitted with the proposal and the research mentor’s written assessment.

Oral Biology

Graduate Courses

201A-201B. Advanced Oral Biology. (3-2-3) Lecture, three hours/two hours/three hours. 201A. Ontogenesis. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view; followed by embryogenesis of oral and dental structures of humans. S/U or letter grading.

201B. Homeostasis in Oral Systems. (2) Lecture, two hours. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonsalivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face. Letter grading.

201C. Pathobiology. (3) Lecture, three hours. Molecular bases for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

2023. Research in Clinical Immunology and Lymphology. (3) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

205. Methodology in Research Design and Data Analysis. (4) Lecture, two hours; discussion, one hour; computer laboratory, one hour. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their Ph.D. research.

206. Current Topics in Oral Immunology. (1) Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc.

209. Scientific Ethics. (2) Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

211. Biology of the Temporomandibular Joint. (2) Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

215. Fundamentals of Immunology. (2) Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmunity, cancer, and immunodeficiency syndromes.

226A-226B. Craniofacial Growth and Development. (2-2) Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

227. Dental Embryology and Histology. (2) Description and interpretation of important stages in development of the oral and craniofacial structures and features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the oral apparatus which are of significance to clinical dental specialists.

228. Dental Pharmacology and Therapeutics. (2) Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

M234. Seminar: Developmental Neuroendocrine-immunology. (2) (Same as Neurobiology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

260. Oral Biology Seminar. (2) Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

273. Research in Clinical Immunology and Lymphology. (3) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

275. Molecular and Cell Biology for Oral Biology Graduate Students. (3) Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research.

M293. Major Concepts in Oncology. (4) (Same as Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 8) S/U grading.

Peter N. Nonacs, Ph.D.

Scope and Objectives

Organismic biology touches every aspect of modern life, and understanding how living organisms are adapted to their environments is the major challenge of the discipline. To meet this challenge, the Department of Organismic Biology, Ecology, and Evolution offers undergraduate and graduate instruction at all levels of biology — from regulatory and physiological processes within organisms through the natural ecology and behavior of living organisms and to the population and community dynamics of multiple species. All of these subject areas address practical problems facing the world today, and all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Undergraduate Study

Students may earn a Bachelor of Science degree in one of four different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; Marine Biology; and Plant Biology. The majors build on similar lower division introductory courses and differ primarily in the upper division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects and for students who later seek admission to health sciences-related professional schools. The remaining three majors — Ecology, Behavior, and Evolution; Marine Biology, and Plant Biology — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Biology B.S.

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

A core curriculum must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: Two morphology and systematics/ecology, behavior, and evolution courses (Microbiology and Molecular Genetics 101/101L, Organismic Biology, Ecology, and Evolution 103, 105, 110, 116, 120, 122, C126, 129, 130, C135, 136); two developmental and molecular biology/physiology courses (Molecular, Cell, and Developmental Biology 138, C141, 144, 171, Organismic Biology, Ecology, and Evolution 121, 128, C134A or 134B, 146, M158, 162, M166, 167, 179); two additional upper division courses in molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193) or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192); Chemistry and Biochemistry 153A, 153L; three additional upper division courses in atmospheric sciences (one course from Atmospheric Sciences 101, 102, 104, or 130), chemistry, mathematics (except Mathematics 104, 106), microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199), physics, physiological science (except Physiological Science 193, 195A, 195B, 196), or from Biomechanics 110, Biostatistics 100B, Earth and Space Sciences 116, Geography 112, Psychology 115. Courses selected must include two laboratory courses (Organismic Biology, Ecology, and Evolution 191A, 193, 105, 110, 136, M158, 162, M166, 167, 181).

Additional Requirements

(1) A maximum of eight units of the Organismic Biology, Ecology, and Evolution 190 series or four units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.
Ecology, Behavior, and Evolution B.S.

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A (31A, 31B, and 32A must be taken to satisfy the calculus requirement); Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Ecology, Behavior, and Evolution majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: One morphology and systematics course (Organismic Biology, Ecology, and Evolution 103, 105, 110, or 130); one physiology course (Organismic Biology, Ecology, and Evolution 146, 162, M166, or 167); one additional laboratory course (Organismic Biology, Ecology, and Evolution 103, 105, 110, 136, 146, 162, M166, 167, or 181); three ecology, behavior, and evolution courses (Organismic Biology, Ecology, and Evolution C119, 120, 122, 129, C135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; Chemistry and Biochemistry 153A, 153L; or two or more upper division courses in chemistry, geography, geology, mathematics (except Mathematics 104, 106), microbiology, organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I), or physics (recommended: taxon-oriented courses such as Organismic Biology, Ecology, and Evolution 107, 111, 112, 113A, 114, C115, 152; other courses in ecological, behavioral, and evolutionary processes such as Organismic Biology, Ecology, and Evolution 116, 117, 122, M127, 128, C134A, in addition to courses listed above).

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a high grade-point average.

Additional Requirements

(1) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

(2) As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109/C215 prior to applying for the Marine Biology Quarter.

Marine Biology B.S.

The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A (31A, 31B, and 32A must be taken to satisfy the calculus requirement); Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Marine Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: Chemistry and Biochemistry 153A, Organic Biology, Ecology, and Evolution 107, 111, 112, 113A, 114, C115, 152; other courses in ecological, behavioral, and evolutionary processes such as Organismic Biology, Ecology, and Evolution 116, 117, 122, M127, 128, C134A, in addition to courses listed above).

Additional Requirements

(1) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

(2) As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109/C215 prior to applying for the Marine Biology Quarter.

Plant Biology B.S.

The Plant Biology major prepares students for postgraduate programs and careers in plant biology, including environmental biology, ecology, agricultural sciences, plant physiology, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to
participate in individual supervised research projects using plants as experimental organisms.

**Preparation for the Major**

**Life Sciences Core Curriculum**

* Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

To be admitted as Plant Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

**The Major**

* Required: Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution 146 or 162; one laboratory course (Organismic Biology, Ecology, and Evolution 101A, 103, 105, 110, M158, 162, M166, or 167); one plant morphology or anatomy course (Organismic Biology, Ecology, and Evolution 101A, 103, or 152); two molecular or cellular plant biology courses (Molecular, Cell, and Developmental Biology C141, C150, M170, Organismic Biology, Ecology, and Evolution 121); one ecology or evolution course (Organismic Biology, Ecology, and Evolution 120, 122, 128, 130, or 133); one field quarter course involving research in plant biology (Organismic Biology, Ecology, and Evolution 118, 124, 128, or 148) or a laboratory internship (Organismic Biology, Ecology, and Evolution 190 series or 199) which requires a written paper on some aspect of plant research; two additional upper division courses in chemistry, computer science, geography, microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199).

**Additional Requirements**

1. A maximum of eight units of the Organismic Biology, Ecology, and Evolution 190 series or four units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

2. Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Plant Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

**Field Biology**

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Organismic Biology, Ecology, and Evolution 103, 107, 113B, 114, C115, 118, 124, C125, C126, 131, 132, and 134B. The Marine Biology Quarter occurs during Fall Quarter and includes some combination of Organismic Biology, Ecology, and Evolution 102, 104, 106, 123, 147, 148, 163, 164, and 165. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Fall or Winter Quarter. Information and applications are available in the Undergraduate Advising Office.

**Honors Program**

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Organismic Biology, Ecology, and Evolution 190A-190B.

**Computing Specialization**

Majors in Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B, Geography 168, Organismic Biology, Ecology, and Evolution C159, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor’s degree in their major and a specialization in Computing.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Department of Organismic Biology, Ecology, and Evolution offers the Master of Arts (M.A.) degree in Biology, with specialization in a wide spectrum of fields.

**Admission**

Applications who plan to enter graduate school are urged to seek the advice of faculty members in their field of interest.

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor’s degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects should be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology is also required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of the applicant’s accomplishments or potential in research, teaching, and related scholarly activities.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Organismic Biology, Ecology, and Evolution.

Students are admitted in the Fall Quarter only. Applications are reviewed by the department’s admissions committee which advises prospective sponsors about the desirability of admission.

**Areas of Study**

Study consists of coursework and research within the department and within related programs in chemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at a marine science center in Fall Quarter, field biology in Spring Quarter, and tropical biology through courses.
offered by the Organization for Tropical Studies.

Course Requirements
The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum five graduate courses required. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per quarter.

Specific course requirements are established individually for students by the guidance committee.

Comprehensive Examination Plan
Students who select this plan must take a three-hour examination prepared and graded by the committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. For students who fail, recommendation for or against a second examination must be made by the graduate adviser.

Thesis Plan
A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty. Before beginning work on the thesis, approval of the subject and general plan must be obtained from the thesis committee.

Doctoral Degree
Admission
See Admission under Master's Degree above. Applicants are admitted to the program leading to the Ph.D. degree in Biology in the Fall Quarter only. Applications are reviewed by an admissions committee following a January 1 deadline. The admission committee advises prospective sponsors about the desirability of admissions.

Major Fields or Subdisciplines
See Areas of Study under Master's Degree.

Course Requirements
Students must enroll for full-time study as defined by the University. Doctoral students must complete a minimum of 20 units of graduate-level courses (200 series).

Written and Oral Qualifying Examinations
Departmental Written Qualifying Examination. Students are required to take the departmental written qualifying examination during their first year in residence.

The examination consists of two parts: Part I examines the breadth of understanding (conceptual and synthetic) of the diversity of specialized subjects within integrative biology and is coupled to two graduate courses (Organismic Biology, Ecology, and Evolution M200A, M200B). Part II is designed to test students' ability to read critically and evaluate the literature in their chosen scientific specialty.

Oral Qualifying Examination. The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes students' preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure results in dismissal. The repeat is graded pass/fail. The examination must be completed by the end of the third year following first registration.

Organismic Biology, Ecology, and Evolution

Lower Division Courses
10. Plants and Civilization. (4) Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

11. Biomedical Research Issues in Minority Communities. (4) Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

12. Biodiversity and Extinction: Crisis and Conservation. (4) Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

13. Evolution of Life. (4) Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

21. Field Biology. (4) Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: course 2. Not open for credit to students with credit for course 122, former course 6, or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

25. Oceans. (4) Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms.

50. Desert Life. (4) Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

Upper Division Courses
101A. Biology of Lower Plants. (6) Lecture, four hours; laboratory, six hours. Requisite: Life Sciences 1. Introduction to biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and role of lower plants in the environment. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

101B. Biology of Vascular Plants. (6) Lecture, three hours; laboratory, six hours. Requisite: Life Sciences 1. Introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

103. Plant Evolution and Systematics. (4) Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1, 2, 3, 4. Evolution, systematics, morphology, principles of taxonomy, phytogeography, phylogenetic analysis, speciation, and natural history of plants. P/NP or letter grading.

C104. Experimental Invertebrate Zoology. (6) Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

105. Biology of Invertebrates. (6) Lecture, three hours; laboratory/field trips, six hours. Requisite: Life Sciences 1. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

106. Experimental Marine Invertebrate Biology. (4 or 6) Lecture, two hours; laboratory, 12 hours. Requisites: courses 105, and M166 or M167 (either may be taken concurrently). Offered either as a six-unit quarter-long course or as a four-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

107. Entomology. (6 or 8) Requisite: Life Sciences 1. Offered either as a six-unit quarter-long course or as an eight-unit Field Biology Quarter course. Six-unit course has lecture, three hours; laboratory, six hours; additional field trips. Morphology, physiology, development, systematics, behavior, and ecology of insects. Eight-unit course covers same basic lecture and laboratory material in two and one-half intensive weeks, followed by extended field trip where students do individual field projects in insect biology.

110. Vertebrate Morphology. (6) Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, 3, 4. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

112. Ichthyology. (4) Lecture, two hours; laboratory, six hours; field trips. Requisite: Life Sciences 1. Highly recommended: courses 110, 111. Biology of fresh-water and marine fishes, with emphasis on their evolution, systematic, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams.

113A. Herpetology. (4) Lecture, three hours; laboratory, one hour; weekend field trips. Requisite: Life Sciences 1. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering anatomy, classification, systematics, behavior, morphology, and physiology of these animals.

113B. Field Herpetology. (8) Requisite: Life Sciences 1. Recommended: courses 110, 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

115. Mammalogy. (4) Lecture, three hours; discussion, one hour; laboratory, three hours. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, and physiological properties. Concurrently scheduled with course C213.

116. Conservation Biology. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues.

117. Evolution of Vertebrates. (4) Lecture, three hours; laboratory, three hours. Requisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods.

118. Plant Adaptations. (8) Lecture, one hour; field trip, 10 hours. Preparation: completion of preparation for the major courses. Five-week course offered only as part of Field Biology Quarter. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments. Topics include population, and ecophysiological levels of integration.

120. Evolution. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Recommended: Life Sciences 4. Designed for departmental majors specializing in environmental and population biology. Introduction to mechanisms and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

121. Molecular Biology and Evolution. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open to students with credit for former course 100A or Molecular, Cell, and Developmental Biology 144. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution.

122. Ecology. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Highly recommended: Mathematics 3A and 3B. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems. P/NP or letter grading.

123. Marine Ecology. (4 or 8) Lecture, five hours; laboratory. Current systematics, ecology, behavior, morphology, and physiology of these animals.

124. Field Ecology. (4 or 8) Lecture, two hours; laboratory or field trip, 10 hours. Requisite: Life Sciences 1. Recommended: courses 110, 120, 122. Offered either as a four-unit-quarter-long course or as a four-unit-five-week intensive course given off campus as part of Marine Biology Quarter. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required.

125. Tropical Animal Communication. (4 or 8) Requisite: Life Sciences 1. Offered either as a four-unit-quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trip where students do individual projects in animal communication. Concurrently scheduled with course C225.

126. Behavioral Ecology. (4 or 8) Requisites: course 120 or 122 or 129. Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a four-unit-quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

127. Soils and Environment. (5) Same as Environmental Science 127 and Geography M127. Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion; and management of soils as related to plant growth and distribution. Letter grading.

128. Plant Physiological Ecology. (4) Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1, Physics 1C or 6C. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperature, and water movement in soil/plant/atmosphere continuum. Letter grading.

129. Animal Behavior. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 4. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

131. Insect Ecology. (4 or 8) Lecture, two hours; laboratory or field trip, eight hours. Requisite: Life Sciences 1. Recommended: courses 120, 122. Offered either as a four-unit-quarter-long course with weekend field trip, or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

132. Field Behavioral Ecology. (8) Lecture, two hours; laboratory/field trip, 10 hours. Requisite: Life Sciences 1. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

133. Vegetation and Ecosystem Dynamics. (4) Lecture, three hours. Requisite: Life Sciences 1. Introduction to form and functional relationships of major world vegetation types in relation to their physical environments.

134A. Physiological Ecology of Desert Animals. (4) Lecture, three hours; laboratory, one hour; field trips, four hours. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

134B. Field Physiological Ecology of Desert Animals. (8) Requisite: Life Sciences 1. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

136. Ecology, Behavior, and Evolution Laboratory. (4) Lecture, two hours; laboratory, four hours; field trips. Requisites: course 120 or 122 or 129 (may be taken concurrently). Life Sciences 1, 4, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Strongly recommended: course 122. Designed for Ecology, Behavior, and Evolution majors. Laboratory and field exercises on population genetics, growth, and regulation; competition and predation; behavioral interactions; species’ diversity and distribution. Methodological aspects from theoretical models and computer simulations to laboratory and garden experiments to fieldwork. Mandatory field trips, including two weekend trips.

137. Chemical Communication. (4) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30L, and 130A/130AL. Life Sciences 1, 2, 3. Chemical signals are most important means by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthesis approach, with emphasis on applications to cell biology, physiology, and ecology. P/NP or letter grading.
145. Advanced Paleontology. (4) (Same as Earth and Space Sciences CM118.) Lecture, three hours. Prerequisites: courses 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM245, P/NP or letter grading.

146. Physicochemical Biology. (4) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 1, 2, 3, Physics 1C or 6C. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction. Letter grading.

147. Biological Oceanography (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux.

149A. Tropical Ecology. (4) Prerequisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C221A. P/NP or letter grading.

151B. Field Tropical Ecology. (8) Prerequisite: Life Sciences 1. Two weeks of off-campus research projects along with five weeks of discussion of tropical biology, community structure, shape and function of tropical ecosystems, and tropical forest biogeography. Concurrently scheduled with course C221B.

152. Functional Plant Anatomy. (4) Lecture, three hours; laboratory, six hours. Prerequisites: Life Sciences 1, 2, 3, 4. Structure and functional significance of various cells and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.

159. Computational Biology. (4) Lecture, three hours; laboratory, one hour. Prerequisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and networks connections to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C275.

162. Plant Physiology. (6) Lecture, four hours; laboratory, four hours. Prerequisites: Life Sciences 1, 2, 3. Basic aspects of plant function, including photosynthesis, plant biochemistry, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; photosynthesis; osmoregulation; osmotic interactions and compartmentalization. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

166. Animal Physiology. (6) (Same as Physiological Science M166) Lecture, three hours; laboratory, five hours; discussion, one hour. Prerequisites: Molecular Biology M158A-CM158B, the theoretical introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is recommended for students interested in marine biology. Letter grading.

167. Regulatory Physiology. (6) Lecture, three hours; laboratory, five hours. Prerequisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course 169 or Molecular, Cell, and Developmental Biology M170 or to physiological science majors. Introduction to physiological principles, with emphasis on organismal systems. Letter grading.

168. Organismic Biology, Ecology, and Evolution / 488 (4) Same as Anthropology CM189A-CM189B. Theoretical Behavioral Ecology. (4-4) (Same as Anthropology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Given off campus at a marine science center.

190A-190D. Honors Research in Organismic Biology, Ecology, and Evolution. (2 to 4 each) Individual research designed to broaden and deepen student's knowledge of some phase of biology. Must be taken with Organismic Biology, Ecology, and Evolution Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented under the guidance of an undergraduate adviser each term a 190 course is taken. Eight units may be applied toward departmental majors.

192. Teaching Practicum in Organismic Biology, Ecology, and Evolution. (1 to 4) Limited to junior and senior departmental majors. Training and supervised practicum for advanced undergraduates in teaching biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward course requirements for departmental majors. P/NP or letter grading.

199. Special Studies. (2 to 16) Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented under undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward departmental majors.
C212. Experimental Invertebrate Zoology. (6) Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

C213. Mammalogy. (4) Lecture, three hours; discussion, one hour. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C115.

C214. Physiological Ecology of Desert Animals. (4) Lecture, three hours; laboratory, one hour; field trips, four hours. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134A.

C216. Quantitative Methods in Behavior and Ecology. (4) Lecture, two hours; laboratory, six hours. Requisite: course 122 or 129. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review general nature of quantitative problems that arise in behavior and ecology and statistical methods used to solve them. Laboratory exercises emphasize analysis using comprehensive statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research.

C218. Oceanology. (4) Lecture, four hours; discussion, one hour. Requisite: graduate students. Ecosystems of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

C221A. Tropical Ecology. (4) Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C151A. S/U or letter grading.

C221B. Field Tropical Ecology. (6) Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of Field Biology Quarter. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C151B.

C225. Tropical Animal Communication. (4 or 8) Requisite: Life Sciences 1. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course concurrent with course C216. S/U or letter grading.

C227. Behavioral Ecology. (4 or 8) Requisites: courses 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C125. S/U or letter grading.

M204. Advanced Biology of Algae. (4) Lecture, four hours; discussion, one hour. Emphasis on understanding the living organism and its habitat. Given off campus at a marine science center.
CM245. Advanced Paleontology. (4) Same as Earth and Space Sciences CM228B. Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM145. S/U or letter grading.

247. Advanced Plant Biology. (4) Lecture, three hours; discussion, two hours. Requisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organ-specific structure, function, and metabolism. Students prepare and present reports on current literature, especially those derived using more advanced methods. Concurrently scheduled with course C159.

279. Seminar: Evolutionary Biology. (2) Seminar, two hours; outside study, four hours. Requisite: course M231. Emphasis on a particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

282. Seminar: Ichthyology. (2) Requisite: course 111 or 112. Students present papers and discuss specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.

M290. Seminar: Comparative Physiology. (2) (Same as Physiological Science M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neurophysiology, or behavioral physiology. S/U or letter grading.

291. Seminar: Physiology and Biochemistry of Arthropods. (2) Seminar, two hours. S/U or letter grading.

CM295A-CM295B. Theoretical Behavioral Ecology. (4) (Same as Anthropology CM289A-CM289B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one upper-division mathematics course (preferably calculus or probability and statistics). Course CM295A is requisite to CM295B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B.

299. Seminar: Parasitology. (2) Seminar, two hours. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Biology in Higher Education. (2) Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

496. Preparation for Teaching Biology in Higher Education. (2) Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

Scope and Objectives
Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Organizational Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

Undergraduate Study
Organizational Studies Specialization
Students may elect to combine the Organizational Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor’s degree.

The option of completing an individual major in Organizational Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.
Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

**Preparation for the Specialization**

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or M18 and 104 or equivalent.

**Upper Division Requirements**

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in Item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

**Chair**

Gerald A.M. Finerman, M.D.

**Scope and Objectives**

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

**Orthopaedic Surgery**

**Upper Division Course**

**Graduate Courses**

205A-205B. Gross and Developmental Anatomy for Medical Students. (5-5) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Designed for medical students. Open to nonmedical students with consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. 205A. Limbs, Thorax, and Abdomen (first eight weeks); 205B. Pelvis, Head, and Neck.

207. Gross and Developmental Anatomy for Graduate Students. (12) Lecture/laboratory, three four-hour sessions (16-week semester). Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck.

**Scope and Objectives**

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in
Program Requirements for the year in which they matriculate.

Master’s Degree

Admission

Students are only accepted into the program for the purpose of obtaining a Ph.D. degree in Experimental Pathology. However, the department also awards a Master of Science degree in Experimental Pathology in cases where a student is unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

Areas of Study

Consult the department.

Course Requirements

Students must complete the core courses and the six elective units required of all experimental pathology graduate students. The minimum number of units required is 36, and the minimum number of graduate units required is 35. The maximum number of units permitted in the 500 series is eight units, and the maximum number of 500-series units that may be applied toward the graduate course requirement is four units.

Students must take the written qualifying examination. An M.S. student must answer at least two thirds of the questions on the examination and pass with a minimum grade of B. Students have the same amount of time as Ph.D. students to complete the examination.

Students must execute an original scholarly research project, which must be approved by a committee of three faculty. Students then must write up the project as a thesis which requires approval of the same committee. The student and the faculty adviser must select two other faculty members for the committee. Members of the committee must be in the department.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

Consult the department.

Doctoral Degree

Admission

Admission to the program is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

Consult the graduate adviser.

Course Requirements

First Year. Fall Quarter: Biological Chemistry CM253, one seminar course, one laboratory rotation.

Winter Quarter: Neurobiology M209A or Biological Chemistry CM267, one seminar course, one laboratory rotation.

Spring Quarter: Choice of elective (for students obtaining degrees in experimental pathology, this is normally four units of basic mechanisms of disease), one seminar course, one laboratory rotation.

Second Year. Fall Quarter: Pathology and Laboratory Medicine 250A. (Students who have not taken basic mechanisms take a taped course and the seminar.)

Winter Quarter: Six units from Pathology and Laboratory Medicine 234A through 234D; Pathology and Laboratory Medicine 250B.

Spring Quarter: Pathology and Laboratory Medicine 250C.

Written and Oral Qualifying Examinations

The written examination must be completed by the end of the second year, after the core course requirements are completed.

The examination consists of the submission of a written grant proposal related to the general areas of the student's dissertation, yet different from the dissertation. The format of the proposal is based on the first award application from the Public Health Service Grant application, with minor modifications. The proposal must be submitted by the middle of September of the student's second year. Students must take the University Oral Qualifying Examination by the end of September of that year.

Pathology and Laboratory Medicine

Upper Division Course

199. Special Studies. (2 to 6) Supervised laboratory research. 10 hours minimum. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

Graduate Courses

200A. Dental Pathology. (3) Lecture, three hours; laboratory, three hours. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

231A. Pathological Anatomy and Physiology. (6) Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodalchome photomicrographs and projection of microslides. Concentration in area of general pathology.

M237. Molecular and Cellular Foundations of Disease. (4) (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and chemical pathology. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

255. Mapping the Human Genome. (3) Lecture, 90 minutes; discussion, 90 minutes. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

M256. Seminar: Viral Oncology. (2) (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

M257. Introduction to Toxicology. (4) (Same as Pharmacology M257.) Requisite: Pharmacology 241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

M258. Pathologic Changes in Toxicology. (4) (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, lung, kidney, nervous system, and vascular system).

M293. Major Concepts in Oncology. (4) (Same as Microbiology and Immunology M293 and Oral Biology M293.) Lecture, three hours. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control, physical, chemical, and viral oncogenesis, epidemiology of cancer, tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

M294. Molecular Basis of Cancer. (4) (Same as Microbiology and Immunology M294.) Lecture, three hours. Requisites: Biological Chemistry CM253, CM267, Microbiology and Immunology M229, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

M294L. Cancer Histopathology Laboratory. (2) (Same as Microbiology M294L and Microbiology and Immunology M294L.) Lecture, one hour; laboratory, two hours. Requisites: course 294 (preferred) or M293, Biological Chemistry CM253, CM267, and Microbiology and Immunology M229 or Neurobiology M209A. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

596. Directed Individual Study or Research. (4 to 12) Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

PEDIATRICS
School of Medicine

Stephen A. Feig, M.D., Executive Vice Chair
Sherin Derakshar, M.D., Vice Chair, Research
Robert B. Ettinger, M.D., Vice Chair, Clinical Affairs, UCLA Medical Center
Stuart Slavin, M.D., Associate Vice Chair, Medical Education
E. Richard Stelhm, M.D., Vice Chair, Academic Affairs, UCLA Medical Center
Carol D. Berkowitz, M.D., Interim Chair, Harbor-UCLA
Frederick James, M.D., Chair, King/Drew
Mohammed Malekzadeh, M.D., Interim Chair, Olive View-UCLA
David L. Rimoin, M.D., Ph.D., Chair, Cedars-Sinai

Scope and Objectives
The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients. The required six-week clinical clerkship in pediatrics can be taken at any of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the School of Medicine Handbook of Clinical Courses, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Pediatrics

Lower Division Course

88. Lower Division Seminar: Special Topics in Pediatrics. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Graduate Course

M215. Interdepartmental Course: Tropical Medicine. (2) (Same as Medicine M215, Microbiology and Immunology M215, and Pathology M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

Scope and Objectives
In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

“Philosopher,” translated from the Greek, literally means “lover of wisdom.” The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Undergraduate Study

Philosophy B.A.

Preparation for the Major

Required: Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

The Major

Required: Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.
Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

**Honors Program**

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (eight units) in philosophy with an average GPA of 3.5.

**Philosophy Minor**

To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

**Required Lower Division Courses (eight units):** Philosophy 7 or 21, and 22 or 31.

**Required Upper Division Courses (24 units):**

- Five courses, including at least one from each of the three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.
- All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

**Master’s Degree**

**Admission**

The department does not accept students whose sole objective is the Master of Arts degree in Philosophy.

**Areas of Study**

Consult the department.

**Course Requirements**

For the Master of Arts, students must complete with grades of B or better at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the philosophy series numbered between 200A and 290. The total course requirement must include Philosophy 200A-200B-200C and one designated course in logic. Consult the Manual for Graduate Students in Philosophy for the list of designated courses.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

**Comprehensive Examination Plan**

Students seeking the M.A. must pass the master’s comprehensive examination, which consists of three different examinations. One is scheduled after each of the three first-year seminars. Consult the Manual for Graduate Students in Philosophy for further information about the examination. In case of failure, the examination may be repeated.

The examination is passed or failed as a whole, which does not necessarily require passing of all three parts.

**Thesis Plan**

None.

**Doctoral Degree**

**Admission**

Admission to the program leading to the Ph.D. degree in Philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application should be sent directly to Graduate Admissions/Student and Academic Affairs. The departmental application, three letters of recommendation (on the official forms), official scores on the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), official scores from the Test of English as a Foreign Language (TOEFL) for applicants whose first language is other than English, and two official transcripts from each institution attended should be sent to the graduate counselor in the Philosophy Department. Departmental information and application can be obtained by writing to the department in September.

**Major Fields or Subdisciplines**

Consult the department.

**Course Requirements**

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

- **Logic:** Two upper division or graduate courses in logic, one of which must be completed by the end of the first year, unless a preparatory course is necessary: Philosophy 135A plus one other designated course in either the Philosophy or Mathematics Department. Consult the Manual for Graduate Students in Philosophy for the list of designated courses.

History of Philosophy. One graduate course in history of philosophy, plus enough graduate or undergraduate courses (taken at UCLA or elsewhere) to make up an equivalent of Philosophy 100A, 100B, 100C. Specifically, each student must have studied (or now study) Plato, Aristotle, some important medieval philosopher, Descartes, some British empiricist, and Kant.

**Ethics and Value Theory:** One graduate-level course.

**Metaphysics and Epistemology:** One graduate-level course.

**Special Area Requirement.** Two designated graduate courses in one of two areas: metaphysics and epistemology or ethics. Consult the Manual for Graduate Students in Philosophy for further details.

**Electives.** As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally no substitutions for these courses are allowed, but students who have done graduate coursework elsewhere as graduate students may be permitted to substitute previous graduate coursework in exceptional cases.

**Written and Oral Qualifying Examinations**

The department does not require any written examination to be passed by students as a condition of advancement to candidacy. It does, however, require each student to take all three parts of the master’s comprehensive examination by the end of the student’s first year (according to the description and schedule given above) to give the department evidence of proficiencies and deficiencies.

For advancement to candidacy, students must pass a preliminary oral qualifying examination as described below.

In the second and third years, students must satisfy two special area requirements: one in metaphysics and epistemology and one in ethics. Students must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a “proposition” in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in the second year, and the proposition requirement covering the remaining area should be completed in the third year. Consult the Manual for Graduate Students in Philosophy for further details.

In the third year, students begin a new series of individual studies courses (Philosophy 596) in consultation with the dissertation supervisor to develop a well-defined dissertation project. A
doctoral committee is chosen and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether students are able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of the student's preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

Philosophy

Lower Division Courses

1. Beginnings of Western Philosophy. (4) Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last two weeks.

2. Introduction to Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

4. Philosophical Analysis of Contemporary Moral Issues. (4) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

5. Philosophy in Literature. (4) Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.

6. Introduction to Political Philosophy. (4) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/ NP or letter grading.

7. Introduction to Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge.

8. Introduction to Philosophy of Science. (4) Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at non-technical level of episodes from history of science.

9. Principles of Critical Reasoning. (4) Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experimentation and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

21. Skepticism and Rationality. (4) Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

22. Introduction to Ethical Theory. (4) Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc.

31. Logic, First Course. (4) Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational forms of reasoning and structure of language.

97. Freshman Seminar. (4) Variable topics; consult Schedule of Classes or “Department Announcements” for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

Upper Division Courses

100A. History of Greek Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socrates through Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of developing Christian philosophy from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

100C. History of Modern Philosophy, 1650 to 1800. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of the philosophers of this period (and perhaps others) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

Group I: History of Philosophy

M101A, Plato — Earlier Dialogues. (4) Same as Classics M146A.) Lecture, three hours; discussion, one hour; outside study eight hours. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

M101B, Plato — Later Dialogues. (4) Same as Classics M146B.) Lecture, three hours; discussion, one hour; outside study eight hours. Preparation: one philosophy course. Study of selected topics in middle and later dialogues of Plato.

M102. Aristotle. (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected works of Aristotle.

M103A. Ancient Greek and Roman Philosophy. (4) (Same as Classics M145A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

M103B. Later Ancient Greek Philosophy. (4) (Same as Classics M145B.) Lecture, three hours; outside study, nine hours. Preparation: one course from 100A, M101B, M102, M103A. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/ NP or letter grading.

104. Topics in Islamic Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

106. Later Medieval Philosophy. (4) Preparation: one philosophy course. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

107. Topics in Medieval Philosophy. (4) Preparation: one philosophy course. Recommended requisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

C108. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes’ political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

C109. Descartes. (4) Requisites: course 21 or two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

C110. Spinoza. (4) Lecture, three hours; discussion, one hour. Preparation: course 21. Study of philosophy of Spinoza. May be concurrently scheduled with course C209, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C111. Leibniz. (4) Lecture, three hours; discussion, one hour. Preparation: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C112. Locke and Berkeley. (4) Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other, Limited to 30 students when concurrently scheduled with course C212. P/ NP or letter grading.
114. Hume. (4) Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

115. Kant. (4) Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

116. 19th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in 19th-century thought. May be repeated for credit with consent of instructor.

117. Late 19th- and Early 20th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

118. Kierkegaard. (4) Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

119. Topics in Modern Philosophy. (4) Preparation: one philosophy course. Selected topics in one or more philosophies of the early modern period, or a study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

Group II: Logic, Semantics, and Philosophy of Science

124. Philosophy of Science: Historical. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

125. Philosophy of Science: Contemporary. (4) Lecture, three hours; discussion, one hour. Requisite: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

126. Philosophy of Science: Social Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

127A. Philosophy of Language. (4) Requisite: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

127B. Philosophy of Language. (4) Requisite: course 31. Course 127A is not requisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor.

128A. Philosophy of Mathematics. (4) Requisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics: logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).

129. Philosophy of Psychology. (4) Lecture, three hours; discussion, one hour. Preparation: one four-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

130. Philosophy of Space and Time. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relativist views of space and time, philosophical impact of relativity theory.

131. Science and Metaphysics. (4) Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

132. Philosophy of Biology. (4) Preparation: one philosophy course. Selected topics in one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

133. Topics in Logic and Semantics. (4) Requisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

134A. Introduction to Set Theory. (4) (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Requisite: course 32 or Mathematics 31B. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

135A. Metaphysics of Sentential Logic. (4) Lecture, three hours; discussion, one hour. Requisite: course 32. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

135B. Metaphysics of Predicate Logic. (4) Lecture, three hours; discussion, one hour. Requisite: course 135A. Classical logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on Gödel incompleteness theorem.

136. Modal Logic. (4) Requisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations. Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.

Group III: Ethics and Value Theory

150. Society and Morals. (4) Lecture, three hours; discussion, one hour. Requisite: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-151B-151C. History of Ethics. (4-4-4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Course 151A is not requisite to 151B, which is not requisite to 151C. 151A. Selected Classics in Ancient Ethical Theories: Plato, Aristotle; 151B. Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; 151C. Selected Classics of Medieval Ethics.

153A. Topics in Ethical Theory: Normative Ethics. (4) Requisite: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

153B. Topics in Ethical Theory: Metaethics. (4) Requisite: course 22. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

154. Topics in Value Theory: Rationality and Action. (4) Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

155. Medical Ethics. (4) Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

156. Topics in Political Philosophy. (4) (Formerly numbered 156.) Lecture, three hours; discussion, one hour; outside study, eight hours. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C247. P/NP or letter grading.

157A-157B. History of Political Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. May be repeated for credit with consent of instructor. 157A. Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. 157B. Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

166. Philosophy of Law. (4) Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. (4) Preparation: two relevant philosophy or linguistics courses. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

173. Metaphor and Literal Speech. (4) (Same as Applied Linguistics and TESL M109.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: Linguistics 1. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.
175. Topics in Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Requisite: course 211 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

176. Metaphysics of Modality. (4) Requisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of model theory of modal logic. What are “possible worlds”? What is the “accessibility” relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) “Haeccelism” and (2) Aristotelian Esentialism?” P/NP or letter grading.

177a. Existentialism. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

177b. Historical Problems in Existentialism. (4) Preparation: one philosophy course. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explicating and interpretation of the texts. May be repeated for credit with consent of instructor.

178. Phenomenology. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Oriental Philosophy: Buddhism. (4) Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

182. Elements of Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions: nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenalism, materialism, dualism).

184. Topics in Metaphysics. (4) Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

186. Topics in Theory of Knowledge. (4) Requisite: course 182 or 183. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

187. Philosophy of Action. (4) Preparation: two philosophy courses. Study of various concepts employed in understanding human action. Topics may include rational choice, intention, weakness of will, and self-deception.

188. Philosophy of Perception. (4) Preparation: two philosophy courses. Critical study of main philosophical theories of perception and arguments used to establish them.

189. Major Philosophers of the 20th Century. (4) Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Kripke). May be repeated for credit with consent of instructor.

Special Studies

M192. Philosophical Analysis of Issues in Feminist Theory. (4) (Same as Women's Studies M192.) Lecture, three hours. Requisite for Women's Studies majors: Women's Studies 10; for other students: one philosophy course. Examination of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approaches to feminist theories. May be repeated for credit with consent of instructor.

190. Christian Ethical Thought. (4) Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment and reflection. May be repeated for credit with consent of instructor.

195. 19th- and 20th-Century Religious Thought. (4) Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

196. Undergraduate Seminar: Philosophy. (4) Seminar, one hour; discussion, three hours. Variable topics; consult Schedule of Classes or “Department Announcements” for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

199. Special Studies. (2 to 8) Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. (4) Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. (4) Study of later dialogues.

203. Seminar: History of Ancient Philosophy. (4) Selected problems and philosophers. May be repeated for credit with consent of instructor.

206. Topics in Medieval Philosophy. (4) Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

207. Seminar: History of Medieval and Renaissance Philosophy. (4) Selected problems and philosophers. May be repeated for credit with consent of instructor.

208. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes political philosophy, especially the Leviathan, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

209. Descartes. (4) Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

210. Spinoza. (4) Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

211. Leibniz. (4) Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

212. Locke and Berkeley. (4) Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

214. Hume. (4) Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor.

216. 19th-Century Philosophy. (4) Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

219. Topics in Modern Philosophy. (4) Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

220. Seminar: Topics in History of Philosophy. (4) Seminar, three hours. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. (4) Requisite: Mathematics M112A. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor.

221B. History of Set Theory. (4) Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

222A-222B-222C. Gödel Theory. (4-4-4) 222A. Preparation: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. 222B. Requisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. 222C. Requisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series.

224. Philosophy of Physics. (4) Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

225. Probability and Inductive Logic. (4) Requisites: course M134, or Mathematics M112A and 112B. Topics include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning.
226. Topics in Mathematical Logic. (4) Content varies from term to term. May be repeated for credit with consent of instructor.
227. Philosophy of Social Science. (4) Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one’s own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.
230. Seminar: Logic. (4) May be repeated for credit with consent of instructor.
231. Seminar: Intensional Logic. (4) Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of Principia Mathematica, possible worlds semantics. May be repeated for credit with consent of instructor.
233. Seminar: Philosophy of Physics. (4) May be repeated for credit with consent of instructor.

Group III. Ethics and Value Theory
241. Topics in Political Philosophy. (4) Requisites: course 150 or C156 or 157A or 157B or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.
244. Seminar: History of Ethics. (4) Selected topics. May be repeated for credit with consent of instructor.
246. Seminar: Ethical Theory. (4) Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.
2C47. Topics in Political Philosophy. (4) (Formerly numbered 247.) Lecture, three hours; discussion, one hour; outside study, eight hours. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.
248. Problems in Moral Philosophy. (4) Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.
255. Seminar: Aesthetic Theory. (4) Selected topics. May be repeated for credit with consent of instructor.
2M26. Topics in Legal Philosophy. (4) (Same as Law M217.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishment, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.
2M27. Seminar: Philosophy of Law. (4) (Same as Law M524.) Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

Group IV. Metaphysics and Epistemology
271. Seminar: Topics in Metaphysics and Epistemology. (4) Discussion, three hours. May be repeated for credit with consent of instructor.
275. Human Action. (4) Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.
280. 20th-Century Continental Philosophy. (4) Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.
281. Seminar: Philosophy of Mind. (4) May be repeated for credit with consent of instructor.
282. Seminar: Metaphysics. (4) May be repeated for credit with consent of instructor.
283. Seminar: Theory of Knowledge. (4) May be repeated for credit with consent of instructor.
284. Seminar: Philosophy of Perception. (4) May be repeated for credit with consent of instructor.
285. Philosophy of Psychoanalysis. (4) Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.
286. Philosophy of Psychology. (4) Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax, behaviorism, functionalism, and alternatives; physiology and psychology.
287. Seminar: Philosophy of Language. (4) May be repeated for credit with consent of instructor.
288. Seminar: Wittgenstein. (4) Seminar, three hours. May be repeated for credit with consent of instructor.
289. Seminar: Philosophy of Religion. (4) May be repeated for credit with consent of instructor.
290. Workshop: Philosophy of Language. (4) Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.
299. Seminar: Philosophical Research. (4) Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

Special Studies
375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
495. Teaching College Philosophy. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.
596. Directed Individual Studies. (2 to 8) Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.
Undergraduate Study
The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for the majors must be taken for a letter grade.

Astronomy Courses
The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A-2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in Astrophysics should take Astronomy 3H, Chemistry and Biochemistry 20A.

Senior majors in Astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.4 or better, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

Physics B.S.
The Physics major should be taken if students intend to continue toward the Ph.D. in Physics.

Preparation for the Major
Required: Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 3 or 10A. Recommended: Astronomy 3H, Chemistry and Biochemistry 20A.

Honors Program
Senior majors in Astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.4 or better, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

Physics B.S.
The Physics major should be taken if students intend to continue toward the Ph.D. in Physics.

Preparation for the Major
Required: Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on
the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior year; (3) there must be at least five upper division courses in the plan; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Pre-approved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 116, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

To be admitted as Physics majors, transfer students with 80 or more units must have completed one year of calculus (equivalent to Mathematics 31A, 31B, 32A) and one year of calculus-based physics with laboratory (equivalent to Physics 1A, 1B, 1C, 4AL, 4BL), with grades of C or better. An additional year of calculus is recommended.

Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

General Physics B.A.

The General Physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office.

The Major

Required: Physics 105A, 110A, 110B, 12, 115A, 131, one course from the 180 series, two upper division physics electives (excluding C185 and 199), and five upper division physics courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

Instructional Credentials

Students may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the instructional credential program in the Teacher Education Laboratory is required. Consult the Department of Education, 1009 Moore Hall, (310) 825-8328, for information.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Astronomy

Master’s Degrees

The department offers the Master of Science (M.S.) degree and the Master of Arts in Teaching (M.A.T.) degree in Astronomy; however, the department is not admitting students to the M.A.T. program at this time.

Master of Science

Admission

The basic requirement for admission to the M.S. program in Astronomy is a bachelor’s degree in physics or astronomy. Applicants in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

Areas of Study

Consult the department.

Course Requirements

Eleven courses are required for the master’s degree, of which at least 10 must be at the graduate level in physics and astronomy. At least one of the courses must consist of a quarter of work on the second-year research project. Courses taken in the 300 or 500 series may not be applied toward the total course requirements or the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination consists of satisfactory completion of the second-year research project, culminating in a written report of the methods used and results obtained, and the oral portion of the comprehensive examination at the master’s level. The oral portion is described in more detail under the description of the written and oral qualifying examinations for the doctorate.

Thesis Plan

None.

Master of Arts in Teaching

Admission

The department is not admitting students to the M.A.T. program at this time.

Areas of Study

It is not required to designate an area of specialization for the M.A.T. degree

Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy, mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan

The comprehensive examination plan is the same as for the M.S. degree.

Thesis Plan

None.

Doctoral Degree

Admission

The basic requirement for admission to the program leading to the Ph.D. degree in Astronomy is a bachelor’s degree in physics or astronomy. Students in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Gradu-
Comprehensive Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

**Major Fields or Subdisciplines**
Consult the department.

**Course Requirements**
The required courses for the Ph.D. degree are Astronomy 270 through 276, Physics 210A, 210B, 221A. During the Fall and Winter Quarters of the second year, students must enroll in Astronomy 277A-277B. In addition, Astronomy 278 must be taken at least once per year for the first two years. Students must take the nine core courses in astronomy and physics offered during the first five quarters of residence and achieve a grade-point average of at least B, averaged over all astronomy and physics graduate courses taken during this time. Exceptions or substitutions can be made by petition only and must be arranged in advance or, for students transferring from another institution, during or before the first quarter of residence.

**Research Project**
Students must satisfactorily complete the second-year research project, culminating in a written report of the methods and the results of the research performed. Before undertaking the second-year research project, students must identify a faculty adviser who is willing to oversee their work on the project.

**Written and Oral Qualifying Examinations**
Inasmuch as the primary goal of the graduate program in astronomy is to train students to do research at the Ph.D. level, the purpose of the master's comprehensive/doctoral qualifying examination is (1) to assess students' general knowledge of astronomy and physics at the graduate level and (2) to assess students' capacity to perform fundamental research, and thus to become successful research scientists. The structure of the comprehensive examination is designed accordingly. The master's comprehensive/doctoral qualifying examination and the requirements leading up to it are administered by a graduate evaluation committee, appointed by the vice chair, and consisting of three members. The graduate evaluation committee evaluates all second-year students every Spring Quarter.

All second-year students are assessed by the graduate evaluation committee for their performance on the qualifying examination on the basis of the following:

1. A collective assessment of the written report on the second-year research project, which constitutes the written qualifying examination.
2. Performance on the oral portion of the comprehensive examination, administered by the comprehensive examination committee at the beginning of the Spring Quarter of the student's second year. During this oral portion of the comprehensive examination, students present the results of their second-year research project and are expected to be able to respond to questions and to solve basic problems from all core areas of astrophysics in which they have had the opportunity to take the course following the normal schedule of classes.

The graduate evaluation committee notifies students of the assessment of their performance on the examination the written comprehensive examination. The examination is based primarily on the combination of the oral examination plus the written report on the second-year research project. In addition, the committee reviews the instructors' written narratives and the file of the student's final examinations in all graduate courses taken in order to place the student's performance on the oral examination into a maximally broad context. The potential outcomes of the assessment are

1. Pass — with immediate eligibility to proceed to the University Oral Qualifying Examination.
2. No pass — with the possibility of reassessment in the following year on the basis of a specific written list of requirements supplied by the graduate evaluation committee. (This option is intended to be used sparingly for students with a single, identifiable and presumably correctable weakness, but who are otherwise above the passing threshold.) The no-pass option can only be used once for any particular student.
3. Terminal master's pass — allowing the student only to finish any outstanding course requirements for the master's degree, if any.
4. Fail — resulting in immediate termination of the student's affiliation with the department.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of the examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of the committee, questions may be asked with regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of the examination, the committee decides whether a final oral examination is required.

The oral qualifying examination is taken no later than the tenth quarter in residence.

**Physics**

**Master's Degrees**
The department offers the Master of Science (M.S.) degree in Physics and the Master of Arts in Teaching (M.A.T.) degree.

**Master of Science**

**Admission**
Applicants to the M.S. program in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

**Areas of Study**
It is not required to designate an area of specialization for a terminal master's degree.

**Course Requirements**
The University requires a total of nine courses for the M.S. degree. To satisfy the minimum requirement of six graduate courses in physics specified by the department, it is recommended that five of the minimum requirement of six be the five fundamental core courses: Physics 210A, 210B, 215A, 221A, 221B, since the comprehensive examination is based on the content of these courses. Students must also take, and pass with a grade of B or better, one of the following breadth courses: Physics 220, 221C, 231A. The remaining three courses of the minimum nine courses required for the M.S. degree may be satisfied through upper-division or graduate courses in physics or a related field, which are acceptable to the Physics and Astronomy Department for credit toward the M.S. degree, with the restriction that no more than two may be chosen from Physics 596 and/or seminar courses. Physics 597 and 598 may not be applied.

**Comprehensive Examination Plan**
A passing grade on the written comprehensive examination is required. If students fail to pass the examination at the master's level, they may take it a second time the next quarter it is given. For more detailed information, see Written and Oral Qualifying Examinations in the Doctoral Degree section.

**Thesis Plan**
Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements can usually be made for students to write a master's thesis,
provided they have a particularly interesting subject and provided a professor is willing to undertake the guidance of their project. In this case, students must petition the committee of graduate advisers for permission to pursue the thesis plan. If the petition is approved, the comprehensive examination is waived.

**Master of Arts in Teaching Admission**

For information about the M.A.T. program in Physics, direct inquiries to the Director of the Master of Arts in Teaching Program, Department of Physics and Astronomy, 3-164 Knudsen Hall, UCLA, Box 951547, Los Angeles, CA 90095-1547.

**Areas of Study**

It is not required to designate an area of specialization for the M.A.T. degree.

**Course Requirements**

This degree leads to qualification for instructional credentials at the secondary school or junior college level. The University requires a total of 12.5 courses for the M.A.T. degree. The program consists of at least five graduate physics courses, four of which are chosen from Physics 210A, 210B, 215A, 221A, 221B, and five professional (300) series courses.

Courses required are (1) the five graduate physics courses and (2) the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12 (Education 406A-406B-406C, 407A-407B, 312, 315A-315B, 330B, 330C, and Physics 370, which is a special physics teaching laboratory).

Courses in the 500 series are not applicable toward the M.A.T. degree. Students are required to see the adviser at the beginning of each quarter through the completion of the degree.

**Comprehensive Examination Plan**

A passing grade on the written comprehensive examination is required. Students who fail to qualify at the master's level of achievement may repeat the examination a second time.

**Thesis Plan**

None.

**Doctoral Degree Admission**

Applicants to the program leading to the Ph.D. degree in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

**Major Fields or Subdisciplines**

Doctoral degrees are based on original work, generally in one of the following fields of specialization: accelerator physics; elementary particles; intermediate energy and nuclear physics; low-temperature/physics: plasma and astrophysics; condensed matter, including solid-state; and spectroscopy.

Arrangements can also be made to obtain a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, and geophysics. The details of each program should be established in consultation with the graduate affairs officer.

**Course Requirements**

By the end of the first year of graduate study students are expected to acquire a mastery of the core graduate physics material represented by Physics 210A and 210B (electromagnetic theory), 215A (statistical physics), and 221A and 221B (quantum mechanics). Detailed syllabi for these courses are available in the graduate counselor's office. Since the material in these core courses represents the body of knowledge tested on the written comprehensive examination, usually all or most of the five courses are the student's main course load in the first year of graduate study.

No later than the fourth quarter of residence, students are expected to begin taking a series of courses, seminars, and tutorials to prepare them for original research in a given area of specialization. Information produced by various area committees on preferred course sequences and programs is available to students and to their advisers. No later than the sixth quarter of residence, students are expected to begin taking a sequence of Physics 596 courses with a faculty member in their chosen field of specialization. The purpose of these 596 courses is to prepare students for original Ph.D. dissertation research and to enable them to obtain a Ph.D. research sponsor. It is the responsibility of the faculty member with whom the 596 courses are taken to provide the student with a frank, on-going evaluation of progress toward these goals. By the second quarter of the 596 sequence, students are expected to make a substantive oral presentation describing the results of a problem in the 596 program before an audience which includes the faculty member(s) with whom they are taking course 596 and three other faculty members. It is the responsibility of the faculty member to specify the content of the presentation. The function of the three additional faculty members is to serve as a departmental resource in the event that difficulties arise during the presentation. The presentation is intended both to allow the faculty member to assess the student's ability to carry out research and to provide a forum to discuss the student's research goals.

No later than the end of the eighth quarter of residence, students are expected to make a formal arrangement with a faculty member who agrees to serve as the Ph.D. research sponsor. This agreement, which includes a general statement on the direction of the Ph.D. dissertation research, is communicated to the graduate affairs officer. If by the end of the eighth quarter of residence students have not obtained a Ph.D. research sponsor, this situation is referred to the graduate affairs officer to the Committee of Graduate Advisers. The committee then makes a decision on whether the student should continue in the graduate program based on discussions with the student, the student's 596 advisers, and other concerned parties.

All students must fulfill a breadth requirement by passing one of the following with a grade of B or better: Physics 220, 221C, or 231A. In addition, students who have not taken Physics 132 or its equivalent in undergraduate status must do so at the beginning of the graduate program. The core and breadth requirements should be completed by the fifth quarter in residence.

**Written and Oral Qualifying Examinations**

A written comprehensive examination is required of all graduate students. The examination is administered by a departmental comprehensive examination committee and is graded as follows: (1) pass at the Ph.D. level of achievement; (2) pass at the master's level of achievement; or (3) fail.

The written comprehensive examination consists of two three-hour sections given on consecutive days, and its scope is defined by the graduate physics material in the five core courses (Physics 210A, 210B, 215A, 221A, and 221B).

The written comprehensive examination is offered twice a year, in the week before the beginning of classes in the Fall Quarter and in the period between the Winter and Spring Quarters.

Students entering the graduate program in the Fall Quarter are expected to take the written comprehensive examination before their fourth quarter of residence.

Students who fail the examination at the desired level and want to repeat it must take it the next time it is offered.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of the examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of
the committee, questions may be asked in regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members of the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of the examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

**Astronomy**

**Lower Division Courses**

2A-2B. Introduction to the Physical Universe. (4-4) Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. 2A. Planets and Stars; 2B. Galaxies and Cosmology. Enforced requisite: course 2A (C or better).

3. Astronomy: Nature of the Universe. (4) Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

3H. Introductory Astronomy and Astrophysics. (4) Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in Astrophysics or in physical and mathematical sciences.

4. Universe of Stars and Stellar Systems. (4) Lecture, three hours; discussion, one hour. Enforced requisites: course 3 or 3H. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive novae (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies.

5. Life in the Universe. (4) Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics.

81. Astrophysics I: Stars and Nebulae. (4) Lecture, three hours; laboratory, one hour. Enforced requisites: Mathematics 31A, 31B, and Physics 1A or 2AH. Open to qualified sophomores and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interactions between these parameters. Methods and importance of astrophysics. Variable stars. Planetary and gaseous nebulae. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (2 each) Discussion, two hours; outside study, four hours. Limited to freshmen. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. P/ NP or letter grading.

88A. Cosmic Evolution. Varied astronomical and physical processes of evolution; discussion of how over billions of years, basic mechanisms of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life.

**Upper Division Courses**

180. Astrophysics Laboratory. (4) Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in Astrophysics, Physics, or a related field. Lectures cover statistical mechanics, astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images.

199. Special Studies. (2 or 4) Limited to senior Astrophysics and Physics majors (with an outstanding record). Special studies with an individual faculty member.

**Graduate Courses**

270. Fundamentals I: Fluids and Dynamics. (4) Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, waves, and accretion. The Jeans, Kelvin-Helmholtz, and Rayleigh-Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction.

274. Galaxies. (4) Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei.

277A-277B. Astronomy Research Project. (6-6) Designed for second-year graduate astronomy students. Two-term research project planned in conjunction with a faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

278. Special Topics in Astronomy. (2 or 4) Informal course with lecture/semninar format, focusing on one of a set of specific topics in astronomy. S/U (two-unit course) or letter (four-unit course) grading.

M285. Origin and Evolution of Solar System. (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.
296. Research Topics in Astronomy. (2) (Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M297. Research Tutorial in Astronomy. (2 or 4) (Same as Physics M297.) Lecture, one hour; discussion, two hours. Preparation: Junior standing. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of interest in astrophysical physics. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596A. Directed Individual Studies. (4 to 10) May be repeated at discretion of department.

596L. Advanced Study and Research at Lick Observatory. (4 to 12) Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department.

599. Ph.D. Research and Writing. (10 to 12) May be repeated at discretion of department.

Physics

Lower Division Courses

3B. General Physics: Mechanics, Waves and Sound. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum, energy; Kepler laws; dynamics of systems of particles; fluid mechanics.

3L. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism. (2) Laboratory, one hour; lecture, one hour; laboratory, two hours. Preparation: courses 1A, 1B, and 1C. Experiments in wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits.

1Q. Contemporary Physics. (2) Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

3A. General Physics: Mechanics of Solids and Fluids. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum, energy; Kepler laws; dynamics of systems of particles; fluid mechanics.

18L. Modern Physics Laboratory. (3) Laboratory, six hours. Preparation: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 4AL, 4BL. Strongly recommended for students with credit for courses 1A, 1B, and 1C. Experiments on superconductivity, radioactivity, atomic clock; measurement of speed of light, fine structure constant, Boltzmann constant, Planck constant. Letter grading.

88. Lower Division Seminar: Current Topics in Physics. (2) Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Consult Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

M88. Limits of Biological Design through Physical Principles. (4) (Same as Molecular, Cell, and Developmental Biology M88H.) Seminar, three hours. Preparation: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C, Chemistry 20A and 20B (or former courses 10A and 10B), Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. Letter grading.

Upper Division Courses

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Preparation: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 105A, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation. P/NP or letter grading.

110A. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 110B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Electrostatics and magnetostatics. P/NP or letter grading.

116. Electronics. (4) Lecture, three hours; laboratory, four hours. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. P/NP or letter grading.

120. Numerical Analysis Techniques and Particle Simulations. (4) Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (FORTRAN). Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 105A, 105B, 110A, 110B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

199. Special Studies in Physics. (2 to 4) May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

Graduate Courses

201Q. Modern Physics Research Areas. (2) Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

213B. Advanced Atomic Structure. (4) N-j symbols, continuous groups, fractional parentage coefficients, n systems electronic.

215A. Statistical Physics. (4) Thermodynamics and statistical mechanics with applications.

215C. Quantum Statistical Mechanics and the Many Body Problem. (4) Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

220. Classical Mechanics. (4) Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

221A-221B-221C. Quantum Mechanics. (4-4-4) Lecture, three hours. 221A. Fundamentals of quantum mechanics, operators and state vectors, equations of motion. 221B. Requisite: course 221A. Rotations and other symmetry operations, perturbation theory. 221C. Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

223. Advanced Classical Mechanics. (4) Requisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media, both classical and quantum.

224. Introduction to the Strong Interaction. (4) Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.

225A-225B. Advanced Nuclear Physics. (4-4) Requisites: courses 221A-221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.

230A-230B-230C. Relativistic Quantum Theory. (6-6-6) Lecture, four hours. Requisites: courses 221A-221B-221C. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.

231A. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 268A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231B. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

231C. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.

232A-232B. Relativity. (4-4) Special and general theories, with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity. (4) Lecture, four hours. S/U or letter grading.

M236. Geometry and Physics. (4) Same as Mathematics M217F.) Lecture, three hours. Interdisciplinary course on topics at interface between physics, quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include super-symmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems, S/U grading.

266. Seminar: Propagation of Waves in Fluids. (2 to 4) Seminar, three hours. S/U or letter grading.

268. Seminar: Spectroscopy. (2 to 4) Seminar, three hours. S/U or letter grading.

269A. Seminar: Nuclear Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269B. Seminar: Elementary Particle Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

280E. Advanced Plasma Laboratory. (4) Lecture, two hours; laboratory, four hours. Requisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

290. Research Tutorial: Plasma Physics. (2 or 4) Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

291. Research Tutorial: Elementary Particle Theor. (2 or 4) Requisites: courses 226A, 230A-230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4) Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics. (2 or 4) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

295. Research Tutorial: Solid Earth Physics. (2 or 4) Requisite (or course 292 if appropriate) of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in solid earth physics. May be repeated for credit. S/U grading.

296. Research Topics in Physics. (2) Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

297. Research Tutorial: Astrophysical Physics. (2 or 4) (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astrophysics. May be repeated for credit. S/U grading.

298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4) Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

299. Research Tutorial: Nuclear Physics. (2 or 4) Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

300. Seminar: Special Problems in Plasma Physics. (2 or 4) Seminar, four hours. S/U grading.

370. Teaching Physics. (4) Study of physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of Master of Arts in Teaching (M.A.T.) program but open to other interested students.
375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Physics. (2) Seminar (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (2 to 12) May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4) May be repeated twice for credit. S/U grading.

599. Ph.D. Research and Writing. (8 or 12) May be repeated for a maximum of 18 units. S/U grading.

Barney A. Schlinger, Ph.D. (Neuroendocrine Physiology)
Dwayne D. Simmons, Ph.D. (Developmental Neurobiology)

**Assistant Professors**

Alan Garfinkel, Ph.D. (Cardiac Electrophysiology, Mathematical Modeling)
Patricia E. Phelps, Ph.D. (Developmental Neurobiology)

**Adjunct Associate Professors**

Nasser A. Farahabakhsh, Ph.D.
Fernando Gómez-Pinilla, Ph.D.

**Adjunct Assistant Professors**

Ronald H. Cooper, Ph.D.
William C. Whiting, Ph.D.

**Scope and Objectives**

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including cardiopulmonary function and adaptation, musculoskeletal physiology, cell biology, biomechanics, neural control of movement and homeostasis including neuroendocrinology, and neural integration and sensory transduction. Many Physiological Science majors enter graduate programs in biomedical sciences and professions in other health-related fields.

**Undergraduate Study**

**Physiological Science B.S.**

**Preparation for the Major**

**Life Sciences Core Curriculum**

**Required:** Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C- or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

**Transfer Students**

To be admitted as Physiological Science majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

**The Major**

**Required:** Physiological Science 107, 111A (or M180A), 111B-111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 190 or 199 may be applied toward the elective requirement. Courses 193, 195A, 195B, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

**Honors Program**

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Department of Physiological Science offers the Master of Science (M.S.) degree in Physiological Science.

**Admission**

Applicants to the M.S. program are expected to have completed an undergraduate degree in the biological or physical sciences. In general, at the time of admission students should have completed a year of coursework in each of the following: calculus, physics, biology, inorganic chemistry, and organic biochemistry. A grade-point average of at least 3.0 (B) in all upper divi-
tion undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant’s statement of purpose, which should include (a) relevant background or preparation; (b) field of emphasis, specific study interests, and type of research sought; (c) expectations, goals, degree objective; (d) one or more departmental faculty members whose research area parallels the study interest. The Graduate Record Examination (GRE) is required as part of the admission file.

A brochure of faculty names and research interests is available from the department. Applicants are encouraged to communicate directly with the faculty, and personal interviews are encouraged.

Areas of Study
Consult the department.

Course Requirements
The M.S. degree requires nine courses, including a second-level statistics or research design course. A minimum of six of the nine courses must be graduate-level (200) courses, toward which two 596 courses may be applied. Coursework is selected by the student and the student’s advisory committee, with approval by the graduate affairs committee. All coursework must be completed by the end of the second year. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times master’s students may enroll in course 597 or 598.

Comprehensive Examination Plan
If this plan is elected, students must achieve a passing mark on a comprehensive examination. Breadth of knowledge is demonstrated by passing a written comprehensive examination administered at the end of the Fall and Spring Quarters. Preparation for the examination varies with background; students follow a curriculum during the first year of study that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in physiological science or other departments. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry; (2) cell biology or cellular neurophysiology; and (3) systems physiology or systems neuroscience. The examination is scored passed at the master’s level of achievement, which permits students to continue into the Ph.D. program, or failed at the master’s level of achievement, and therefore also at the Ph.D. level of achievement. Students failing the examination at either the master’s or Ph.D. levels of achievement are required to retake the examination at the next offering. Students wishing to continue into the Ph.D. program who fail the examination at the Ph.D. level on the second attempt are awarded a terminal Master of Science degree.

Thesis Plan
If the thesis plan is elected, students must report the results of an original research investigation. Under the guidance of the thesis committee, students must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, students may submit either a thesis manuscript or a manuscript suitable for publication.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. degree in Physiological Science are expected to complete the same admission requirements as outlined for the M.S. degree. In addition to the above, students may also be admitted to the program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines
Consult the department.

Course Requirements
Nine courses, at minimum, are specified for the doctoral degree. Two 596 courses may be applied toward the degree requirements. Courses are selected by the student and the student’s advisory committee and approved by the graduate affairs committee.

Written and Oral Qualifying Examinations
Breadth of knowledge is demonstrated by passing a written preliminary examination administered at the end of Fall Quarter of the second year. Preparation for the examination varies with background, and students follow a curriculum during the first year of study that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in physiological science or other departmental curricula. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry, (2) cell biology or cellular neurophysiology, (3) systems physiology or systems neuroscience. The examination is scored passed at the Ph.D. level of achievement, passed at the master's level of achievement (students are required to pass a second examination at the Ph.D. level within the following six months), or failed (students are required to leave the program). Alternatively, students receiving a master’s level of achievement score may leave the doctoral program and complete the M.S. degree.

After successfully passing the departmental written qualifying examination, and before advancement to candidacy, a University Oral Qualifying Examination is conducted by the doctoral committee. The examination must be passed by the end of the third year of study. Students present a written research proposal of their intended dissertation project to their advisory committee and one member of the graduate affairs committee at least two weeks prior to the examination. Students are expected to have formulated a research plan, have demonstrated appropriate research capability, and be knowledgeable of relevant research literature. Students may petition the graduate affairs committee for extension of the deadline. If students do not pass, the examination may be rescheduled once at the discretion of the doctoral committee.

Physiological Science

Lower Division Courses
3. Introduction to Human Physiology. (4) Lecture, three hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

5. Issues in Human Physiology: Diet and Exercise. (4) Lecture, three hours. Not open to Physiological Science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

13. Introduction to Human Anatomy. (5) Lecture, four hours; laboratory, three hours. Not open to Physiological Science majors. Structural survey of human body, including skeleton, muscles, nerves, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

90. Introduction to Physiological Science. (2) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

Upper Division Courses
C100. Experimental Statistics. (4) [Formerly numbered 100.] Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course CM100. P/NP grading.

M102. Human Anatomy for Biomedical Engineers. (4) Same as Biomedical Engineering M102. Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Letter grading.
138. Neuromuscular Physiology and Adaptation. (4) Requisite: course 111B. Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30, Life Sciences 1, 2, 3, 4, Physics 1A, 1B, 1C, 4A, and 4B, or 6A, 6B, and 6C. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology M170A or Organismal Biology M167 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

167. Physiology of Nutrition. (4) (Formerly numbered 197B.) Lecture, four hours. Limited to senior Physiological Science majors. Topics include physiological adaptation to starvation and physiological responses to oxidants/antioxidants, vitamins, minerals, photochemicals, and their relationship to common chronic diseases and physiology of fuel utilization during aerobic and anaerobic exercise. Letter grading.

M173. Anatomy and Physiology of Sense Organs. (4) (Same as Organismic Biology M173.) Lecture, three hours; discussion, one hour. Requisites: courses 111A and 111B (or Molecular, Cell, and Developmental Biology M170A-M170B, or Molecular, Cell, and Developmental Biology M175A-M175B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sensory systems and the evolution of their underlying mechanosensory and chemical sensory systems. Letter grading.

M180A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M180B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A). (Formerly numbered 148.) (Same as Neuroscience M148.) Lecture, four hours; discussion, one hour. Requisite: course 111A or M180A. Advanced treatment of selected topics in cellular neurophysiology.

150. Musculoskeletal Mechanics. (5) Lecture, three hours; discussion, one hour. Requisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biomechanics, biodynamics, and modeling.

151. Limb Dynamics. (5) Lecture, three hours; laboratory, two hours; discussion, one hour. Requisite: course 150. Biomechanical analysis of human movement, with special emphasis on control of limb movements.

C152. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A and 14B, or 14B/14BL, or 20A, 20B, 20L, and 30L. Life Sciences 1, 3, 4, 4C, Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

M166. Animal Physiology. (6) (Same as Organismic Biology M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L. Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4A, and 4B, or 6A, 6B, and 6C. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology M170A or Organismal Biology M167 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.
M202. Cellular Neurophysiology. (4) (Same as Neuroscience M202.) Lecture, three hours; discussion, one hour. Requisites: course 111A or M180A or Physics 6B, Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

M205. Behavioral and Systems Neuroscience. (4) (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

M210. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Neuroscience M230 and Physiology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisite: Neuroscience M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

211. Exercise Cardiovascular Physiology. (4) Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

M212. Introduction to Cellular Physiology and Biophysics. (6) (Same as Molecular, Cell, and Developmental Biology M227 and Physiology M212.) Lecture, five hours. Requisite: course 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

M213. Principles of Integrative Physiology. (6) (Same as Physiology M213.) Lecture, four hours; discussion, two hours. Designed for graduate students. Open to juniors/seniors with consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of zyme, transporter, and bone capacities to natural loads.

215. Molecular and Cellular Foundations of Physiology. (5) Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

CM225. Comparative Endocrinology: Molecular to Behavioral. (4) (Same as Physiology M225.) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course 1215.

M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4) (Same as Neurobiology M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/historical, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive endocrine circuits.

C235. Dynamical Systems Modeling of Physiological Processes. (5) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C135.

M240. Neural Systems for Motor Control. (4) (Same as Neuroscience M262.) Requisite: course C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of the cerebral cortex, with respect to modification of motor output.

C244. Neural Control of Physiological Systems. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

C245. Neural Mechanisms Controlling Movement. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C145.

M247. Neural Control of Cardiopulmonary Function. (4) (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Requisites: courses 111A, 111B or 133 or 142 or M180A, M180B. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state and afferent signals. Emphasis on critical reading of literature.

250A. Muscle Dynamics. (4) Requisite: course 151. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques.

250B. Musculoskeletal Mechanics. (4) Requisites: course 151, Mathematics 3A, 3B. Mechanical parameters of moving human musculoskeletal system, including use of cinematographic, force platform, and digital computer techniques. Topics include biostatics, biomechanics, and empirical data modeling.

C252. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5) Lecture, three hours; outside study, 12 hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C152.
M255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophysial interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

M272. Neuroimaging and Brain Mapping. (4) (Same as Neuroscience M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

291A-291B-291C. Seminars: Cardiovascular Function and Adaptation. (2 to 4 each) Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

292. Evolution and Development of Auditory System. (2 or 4) Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for two units; seminar paper and two-hour seminar presentation required for four units. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each) Required: courses 138 M260. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

296. Research Seminar: Physiological Science. (2) Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

297. Seminar: Muscle Cell Biology. (2 to 4) (Formerly numbered 297A-297B-297C.) Seminar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Physiological Science. (2) Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor; department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 8) To enroll for letter grade, petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to end of second week of class. Eight units may be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different four-unit courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 16) To be arranged with faculty member serving as student’s comprehensive examination chair or Ph.D. committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 16) To be arranged with faculty member serving as student’s thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation. (2 to 16) May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA’s Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.
Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

Admission

A master's degree program is not a general objective of the department. However, the Master of Science degree in Physiology may be awarded by comprehensive examination or thesis in special cases.

Areas of Study

See Doctoral Degree.

Course Requirements

Nine courses, of which at least five must be graduate courses, are required for the master's degree. A maximum of eight units of 500-series courses may be applied to the total course requirements; only four units may be applied to the graduate course requirement.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

Consult the department.

Doctoral Degree

Admission

All candidates for admission to graduate status in the Department of Physiology are expected to pursue the Ph.D. degree in Physiology; the department does not admit candidates for the M.S. degree. Ph.D. students must conform to the general admission requirements established by the Graduate Division and have received a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, completed coursework should include courses in mathematics through calculus and differential equations, college physics, chemistry (including organic chemistry and biochemistry), and biology (courses in cell biology and molecular biology are highly recommended).

In general, candidates seeking admission to the Physiology Department should apply through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6150. Additional information can be obtained from the Graduate Student Office, Department of Physiology, UCLA School of Medicine, Box 951751, Los Angeles, CA 90095-1751. Applicants should submit applications by December 15.

In certain cases, at the discretion of the department, if applicants lack preparation in one of the above-mentioned courses but have a strong background in areas pertinent to physiology, students may be admitted to graduate status provided that deficiencies are made up. (It is recommended that the deficiencies be corrected prior to matriculation.)

Applicants must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in the applicant's undergraduate major (MCAT scores are accepted in lieu of the GRE); (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research; and (4) an essay describing academic background, work experience, motivation for research, and career goals. Selected applicants are asked to have an interview with members of the graduate program committee (composed of faculty and a graduate student representative) or a designated interviewer. The graduate program committee then, in a written evaluation, advises the departmental committee on instruction of its recommended admits. Final decisions of admission to the graduate program reside with the committee on instruction which examines the recommendations for academic excellence, promise in scientific career goals consistent with the scientific expertise of the faculty, and the existence of financial support for the admit during the first and subsequent years of training.

Major Fields or Subdisciplines

The major fields in which graduate students may pursue research include (1) cellular physiology and biophysics; (2) molecular physiology; and (3) integrative physiology. The subdisciplines of these areas include cellular and molecular electrophysiology; membrane transport; cellular signal transduction; channel and transporter structure and function; muscle physiology; fundamental neurophysiology; neuromuscular physiology; and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

Course Requirements

The following courses are required during the first two years: Biological Chemistry CM253; Physiology M204 or M210 or Neuroscience M205; Physiology M209A. Biological Chemistry CM267 or Microbiology and Immunology M229 may be substituted with permission of the graduate adviser, M212, M213. In addition, during the first two years, a total of 12 units must be completed in techniques or special topics courses (e.g., Physiology 220 through 298) or comparable courses in cell biology, neuroscience, molecular biology, chemistry, or biology) as governed by research interest. The specific courses are determined in consultation with the mentor and the Instruction Committee.

Three laboratory rotations must be taken during the first year. The remaining time is to be devoted to developing and pursuing dissertation research (Physiology 597 and 599).

Written and Oral Qualifying Examinations

The written examination is taken during the summer following the completion of the second year. The purpose of the examination is to assess ability to read and critically evaluate research papers in the chosen division of physiology (e.g., molecular, cellular, or integrative physiology). About three to four weeks prior to the examination, students are given three reading lists (generated by professors selected by the graduate program committee), each containing five to 10 articles (including review articles and short reports such as those found in Science and Nature) on three different topics. During the written examination, students are asked one or more essay questions in the area of two of the reading lists. For the third area, students are given an actual short article that is missing its discussion section; students are asked to write a discussion for that paper. The examination is taken on two consecutive half days. The examination is number coded and given a pass/fail grade by the examining committee.

The University Oral Qualifying Examination is designed to establish that students can independently identify significant research questions, put them in context of existing knowledge in physiology, design appropriate and realistic protocols for testing hypotheses, and assure that the dissertation project is both appropriate and feasible. The examination takes place by the end of the Fall Quarter of the third year (end of seventh quarter) and is based on a written proposal circulated to members of the doctoral committee at least seven days prior to the examination. The proposal should pose an original research question outside the immediate area of dissertation research, should provide enough background (with references) to put the question in context of previous work, and should propose the experimental design that would be used to test the hypotheses in the proposal. The proposal must have the form of a mini-research grant application of about 20 pages, double spaced. Students must have independently generated the hypotheses to be tested and the experimental design for the testing of the hypotheses. Although students may consult faculty members or other students for information as to the execution of certain protocols, such as for references, the creative and critical aspects of the proposal must be the students' own work. The examination is an oral presentation of this proposal with concurrent questioning by the committee. The written proposal contains a brief two- to four-page summary of the proposed dissertation which is also discussed at the oral examination with the goal of clarifying its suitability as a Ph.D. project.

Midstream Oral Presentation. In addition to the oral qualifying examination, there is a mid-
221. Cell Physiology: Excitability. (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

M223. Membrane Molecular Biology. (4) (Same as Biological Chemistry M223,) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

M225. Comparative Endocrinology: Molecular to Behavioral. (4) (Same as Physiological Science CM225) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars. (2-2-2) (Same as Neurobiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Designed for graduate students. Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty and visitors from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

298. Current Topics in Physiology. (2 to 4) (Formerly numbered 250A-250B-250C.) Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.

598. Thesis Research for M.S. Candidates. (2 to 12) Tutorial, to be arranged.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged.

Scope and Objectives

The Department of Policy Studies is an interdisciplinary unit composed of faculty members from around the campus, as well as faculty unique to the department. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include social insurance and welfare programs, unemployment and training, drug policy and crime, economic development, environmental quality, education, and health care. The department plays a major roll in two schoolwide programs: the Master of Public Policy (M.P.P) degree and the undergraduate minor in Public Policy.

The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, and political processes.

The undergraduate minor in Public Policy familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on the minor, see Public Policy and Social Research Schoolwide Programs later in this section of the catalog.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree Admission

Applicants to the program leading to the Master of Public Policy (M.P.P) degree are evaluated on their overall record. The final decision is based on a subjective assessment of the applicant’s potential to meet the scholarship requirements of the program and to succeed as a policy professional. A grade-point average of 3.0 or better in the junior and senior years is required and preferred. A grade-point average of 3.0 or better in the junior and senior years is required and preferred. Additional consideration is given to applicants with a 3.5 or above. Additional consideration is given to the strength of the applicant’s undergraduate program and its standards. The quantitative nature of the core curriculum requires that attention be given to quantitative and analytical abilities. An elementary statistics course is strongly recommended.

Scores on the Graduate Record Examination (GRE) General Test are used in combination with the GPA to help predict academic performance in the M.P.P. program. Scores above 650 in each area are usually essential to gain admittance to the program, although possible reasons for lower scores are considered. Especially high GRE scores may help alleviate concerns about a troublesome academic record, but a high GRE score alone is insufficient reason for admission. Under certain conditions, the Admissions Committee may agree to consider scores on the Graduate Management Admission Test (GMAT) or the Law School Admission Test (LSAT) in lieu of GRE scores.

The statement of purpose is evaluated to determine the applicant’s genuine academic interest in and commitment to a career in public policy, as well as the applicant’s general ability to write coherent and convincing prose. The statement can also help determine the match between the applicant’s interests and the school’s offerings, and to assess written communication skills.

Applicants with at least two years of work experience in policy-making or implementation are preferred. Internships and volunteer work in a policy setting are also viewed positively.

Three letters of recommendation are required from supervisors in policy-related work or instructors in undergraduate courses. Recommenders should be individuals who know the applicant well and who can comment specifically on the potential for a career as a policy professional rather than someone of high status in a firm or school who hardly knows the applicant.

A score of at least 600 on the Test of English as a Foreign Language (TOEFL) is required for applicants whose native language is not English.

Applications and program information can be obtained on written request to the School of Public Policy and Social Research, or by e-mailing mppinfo@ucla.edu.

Areas of Study

In the second year, students select either two two-course concentrations or one four-course concentration from the following: social welfare, transportation and urban development, employment and labor, regional development and policy.

Concentrations in the following additional areas are also being developed and are available based on need and student/faculty interest: environmental policy, health policy, communications policy, international policy and economic development.

Students also have the option, with their faculty adviser’s approval, of designing their own concentrations from other courses offered in the School of Public Policy and Social Research or in other UCLA schools or departments.

Course Requirements

Students take three four-unit courses per quarter for a total of 72 units, including nine core courses, four concentration courses, two electives, and a two-quarter seminar in applied policy analysis. A field internship is also required, generally between the first and second years.

All students are required to take the core curriculum, which provides a broadly based foundation in social/policy analysis together with relevant quantitative, analytical, managerial, and organizational methods. The first eight of the core courses are normally taken in the first year.

Comprehensive Examination Plan

The comprehensive examination requirement is met by completion of an extended policy paper during the two-quarter policy seminar, which builds on the core courses, internship experience, and the concentration courses. The final policy paper presented by the student must be certified as complete by both the relevant seminar leader and the student’s adviser.

Thesis Plan

None.

Policy Studies

Lower Division Courses

10A. Introduction to Public Policy. (4) Lecture, three hours; outside study, nine hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor’s own research, visitors, small student projects, or field trips.

10B. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

Upper Division Courses

101. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. Development of some central concepts of rational-choice model and examination of theories and evidence about systematic ways in which actual behavior deviates from that model. Exploration of various reasons groups of rationally self-seeking individuals might fail to act as rationally self-seeking groups and discussion of policy implications of individual and collective departures from rational action.
103. Ethics, Morality, and Public Life: Contemporary Controversies. (4) Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills.

104. Culture and Political Structure of Los Angeles. (4) Lecture, three hours; outside study, nine hours. Exploration of two pieces of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. How are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is “mainstream” today? How does political structure help or impede the notion of a united city?

CM110. Information Superhighway. (4) (Same as Communication Studies M115.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course C270.

M111. Culture, Identity, and Media. (4) (Same as Communication Studies M157.) Discussion, three hours; outside study, nine hours. Interplay between culture and electronic media, both “old” and “new.” Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia.

M116. Nuclear Weapons: Critical Decisions. (4) (Same as Honors Colloquium M118.) Lecture, three hours; outside study, nine hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt’s decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

M120. Race, Inequality, and Public Policy. (4) (Formerly numbered 120.) (Same as Afro-American Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America.

141. Employment and Labor Policy: Survey. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. Pro and con philosophical analysis of reasons for government regulation. Analysis of current data on labor unions, the work-place, and labor-market trends. Workforce diversity, education and training, social welfare policy, and global issues (immigration, trade, and global economy as it affects the workforce). Future trends and issues on policy horizon.

C142. Labor Markets and Public Policy. (4) (Formerly numbered 142.) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

143. Comparative Industrial Relations. (4) (Formerly numbered 144.) Lecture, three hours; outside study, nine hours. Requisite: course 10A. At national and international levels, historical and contemporary analytical comparison of political, legal, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of “web of rules” governing rights and obligations of the parties; and resolution of conflict. Concurrently scheduled with course CM230.

145. Labor Policies in the U.S.: Historical Perspective. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Insight into evolution of labor policies in the U.S. from 19th century to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupational safety and health, and international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) motivation and action of major players (business, labor, government), and (3) changing patterns of government involvement in public policy.

148. Business and Public Policy. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to key issues arising at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, nature of business-government relationship, business political activity, and major government policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (energy, environment, risk, liability, corporate governance); and corporate social responsibility, business ethics, and green business. Discussion of topics in their historical and political context, with comparison between economic regulation in the U.S. and other countries.

190. Special Topics in Public Policy. (4) Discussion, three hours. Examination of particular subfields of policy studies (e.g., international policy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Must be taken for credit if applied toward minor in Public Policy. May be repeated for credit with topic change. P/NP or letter grading.

197. Research Seminar: Policy Studies. (4) Seminar, three hours; outside study, nine hours. Requisites: courses 10A, 10B. Required of students in policy studies minor. Production of research paper that examines in depth a particular policy issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation.

199. Special Studies in Policy Studies. (2 or 4) Preparation: 3.0 grade-point average. Limited to juniors/seniors. Intensive directed research in policy studies, P/NP or letter grading.

Graduate Courses

201. Principles of Microeconomic Theory I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 202) to prepare students for economic analysis of public policy, with review of economic principles and basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

202. American Political Institutions and Processes. (4) Lecture, three hours; outside study, nine hours. Requisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Topics include monopoly, factor markets, general equilibrium, welfare economics, externality, public goods, uncertainty, and intertemporal optimization. Letter grading.

205. Bureaucracy and Public Management. (4) Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organizational environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies.

206. Political Economy of Policy Adoption and Implementation. (4) Lecture, three hours; outside study, nine hours. Analysis of how policy is formed, adopted, and implemented. How policies are formulated, by whom, how policy agendas are set, how to define relationships between politicians, bureaucrats, lobbyists, and media experts. Letter grading.

207. Political Economy. (4) Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business-government relations. Analysis of domestic policy options nations are pursuing in response to economic globalization, such as protectionism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAFTA and non-governmental organizations, to address global environmental crisis, etc.

209. Management in the 21st Century. (4) Lecture, three hours; outside study, nine hours. Overview of moral philosophy, political theory, and public-sector ethics using readings from classical and contemporary literature and case studies. Consideration of various ways in which terms such as “democracy” and “liberty” are used in public discourse. Practice in developing and defending moral arguments, both orally and in writing. Letter grading.

M211. Public Policy for the Elderly and Their Families. (4) (Same as Social Welfare M290P) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

M212. Child Welfare Policy. (4) (Same as Social Welfare M290L) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

M213. Mental Health Policy. (4) (Same as Social Welfare M290K) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

M214. Poverty, the Poor, and Welfare Reform. (4) (Same as Social Welfare M290L) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

M215. Health Policy. (4) (Same as Social Welfare M290M) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M216. Public Policy for Children and Youth. (4) (Same as Social Welfare M290N) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M220. Transportation, Land Use, and Urban Form. (4) (Same as Urban Planning M286) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M221. Travel Behavior Analysis. (4) (Same as Urban Planning M297T) Lecture, three hours; outside study, nine hours. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

M222. Transportation Economics, Finance, and Policy. (4) (Same as Urban Planning M289) Lecture, three hours. Overview of transportation finance and economics concepts of transportation finance and equilibrium; highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

M223. Transportation and Environmental Issues. (4) (Same as Urban Planning M290L) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

M230. Labor Markets and Public Policy. (4) (Formerly numbered M230) (Same as Management M259C) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course C142. S/U or letter grading.

M231. Comparative Industrial Relations. (4) (Formerly numbered M231) (Same as Management M255) Lecture, three hours; outside study, nine hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible components of human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of “web of rules” governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course C144. S/U or letter grading.

M232. Labor Relations: Process and Law. (4) (Same as Management M250A) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

M233. Employment Issues in California. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Drawing on resources of UCLA Business Forecasting Project, introduction to general features of California labor market, analysis of employment fluctuations and forecasting techniques including linkages between employment fluctuations in California and elsewhere in the country, and social issues related to labor market. Letter grading.

M234. Labor Markets and Social Policy. (4) Lecture, three hours; outside study, nine hours. Examination of analytical tools and conceptual models needed to understand policies directed toward people in lower tail of income distribution. Concepts include static and dynamic labor supply, labor demand, compensating differentials, human capital, and economic models of immigration and crime. Letter grading.

M240. Theories of Regional Economic Development I. (4) (Same as Urban Planning M236A) Lecture, three hours; laboratory, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions.

M241. Introduction to Regional Planning: Evolution of Regional Planning Theories. (4) (Same as Urban Planning M232A) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

CM225. Environmental and Resource Economics and Policy. (4) (Formerly numbered C235) (Same as Economic M231C) Lecture, three hours. Requirements: courses 204 and 208, or Urban Planning 207 and 220B. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Concurrently scheduled with course C115. Letter grading.

M257. Medicare Reform. (4) (Same as Health Services M252) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing Medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Services M236) Seminar, four hours. Discussion; two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

M269. Health Care Policy and Finance. (4) (Same as Health Services M249E) Seminar, four hours. Requisites: Biostatistics 100A, 100B, Health Services 203A-203B, 236. Public policy concerning payment for medical care services and characteristics of the market for those services; demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs. Letter grading.

C270. Information Superhighway. (4) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course CM110.

280. Science, Technology, and Industrial Policy. (4) Lecture, three hours. Designed for graduate students. Examination of government support of research and development and industrial policy; approaches to fostering science, technology, and industrial growth and commercialization of public sector knowledge; selective subsidies and support of research and development and individual firms; technology change and the labor market.
M281. Growth, Science, and Technology. (4) (Same as Management M202C.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

290. Special Topics in Public Policy. (4) Discussion, two to three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. S/U grading.

291. Methods of Policy Analysis. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Techniques of policy analysis with applications: benefit and cost; optimization and constraint; risk, risk aversion, risk spreading; tax incidence, incentive effects, and deadweight loss; strategic interactions (games and negotiations). Emphasis on concepts rather than computation.

292. Quantitative Policy Analysis. (4) Lecture, three hours. Requisites: courses 203, 208. Exploration of additional statistical and econometric tools (e.g., discrete choice analysis, methods to deal with endogeneity bias, and analysis of longitudinal data) as follow-up to requisite courses. Application of statistical tools in conduct of analysis and evaluations of public policy initiatives and policy-relevant issues.

M293. Privatization, Regulation, and Public Finance. (4) (Formerly numbered 293.) (Same as Urban Planning M243.) Lecture, three hours; outside study, nine hours. Requisites: course 201. Exploration of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

294. Education Markets and Education Policy. (4) Lecture, three hours. Designed for graduate students. Provides set of tools that can be used to analyze pressing policy questions in field of education and some substantive background in policy issues of the day.

298A-298B. Seminars: Applied Policy Analysis. (4-4) Seminar, three hours; outside study, nine hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and internship (unless waived). Two-term seminar in which students prepare major public policy projects and papers which are case studies of policy evaluation and implementation and are equivalent to professional master's theses. Papers build on prior core courses, internship experience, and policy cluster courses. Letter grading.

596. Directed Studies. (2 to 8) Limited to graduate students. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

Ronald L. Rogowski, Ph.D., Chair

Professors
Joel D. Aberbach, Ph.D.
Richard D. Baum, Ph.D.
Leonard Binder, Ph.D.
James DeNardo, Ph.D.
Franklin D. Gilliam, Jr., Ph.D.
Miriam A. Golden, Ph.D.
Shanto Iyengar, Ph.D.
Edmond Keller, Ph.D.
Deborah W. Larson, Ph.D.
Michael F. Lofchie, Ph.D.
Susanne Lohmann, Ph.D.
Karen J. Orren, Ph.D.
Carole Pateman, D.Phil.

Professors Emeriti
Hans H. Baerwald, Ph.D.
Irving Bernstein, Ph.D.
L. Blair Campbell, Ph.D.
Mattei Dogan, Docteur ès Lettres
Ernest A. Engelbert, M.P.A., Ph.D.
Leonard Freedman, Ph.D.
Robert C. Fried, Ph.D.
Robert Gerstein, Ph.D.
Edward Gonzalez, Ph.D.
Douglas S. Hobbs, Ph.D.
Marvin Hoffenberg, M.A.
Arnold L. Horelick, Ph.D.
Michael D. Intriligator, Ph.D.
Roman Kolkowicz, Ph.D.
Andrzej Korbonski, Ph.D.
Charles R. Nixon, Ph.D.
David C. Rapoport, Ph.D.
Foster H. Sherwood, Ph.D., LL.D.
Richard Sisson, Ph.D.
Richard L. Sklar, Ph.D.
Leo M. Snower, Ph.D.
David A. Wilson, Ph.D.
James Q. Wilson, Ph.D.
Charles E. Young, Ph.D.
Ciro Zoppo, Ph.D.

Associate Professors
Richard D. Anderson, Jr., Ph.D.
Barbara Geddes, Ph.D.
John B. Londregan, Ph.D.
Kirstie McClure, Ph.D.
Raymond A. Rocco, Ph.D.
James Tong, Ph.D.

Assistant Professors
Kathleen Bawn, Ph.D.
John Badger, Ph.D., in Residence
Lars-Erik Cederman, Ph.D.
Alberto Diaz-Cayeros, Ph.D.
Scott C. James, Ph.D.
Barbara Koremenos, M.P.P., Acting
Moham N. Penubarti, Ph.D.
Daniel Posner, Ph.D.
Michael F. Thies, Ph.D.
Daniel S. Treisman, Ph.D.
Brian Walker, Ph.D.

Adjunct Professor
Roy Pateman, M.Phil.

Scope and Objectives
The undergraduate major in Political Science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

Undergraduate Study
Political Science B.A.

Prepolitical Science Major
All students intending to major in Political Science must enroll as Prepolitical Science majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

Preparation for the Major
Required: Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are requisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or one of the following statistics courses: Anthropology M80, Economics M40, Geography M40, Social Sciences 40, Sociology M18, Statistics 10.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

The Major
Required: Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.
In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

1. A concentration in one field by completing the lower division course and at least four upper division courses in that field.

2. A distribution of the lower division course and two upper division courses in each of two other fields (four upper division courses).

3. Two additional elective courses in political science to comprise the total of 10.

Field Concentration Requirements
The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

I. Political Theory: Political Science 10 and any four courses in Field I.

II. International Relations: Course 20 and any four upper division courses in Field II.

III. American Politics: Course 40 and any four courses in Field III.

IV. Comparative Politics: Courses 50, 168, and any three additional courses in Field IV. Course 118 may also be applied toward concentration in this field.

Courses 195A-195B-195C and 199 may not be applied no more than twice toward the concentration field. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Political Science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units (effective Fall Quarter 1997) for graduation. Additional upper division units must be taken to reach the 60-unit total.

Undergraduate Seminars
Each term the department offers a series of seminars (Political Science C197A-C197D) in each field. The requisite are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program
The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before they enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

Political Science Minor
The Political Science minor introduces students to political processes and institutions.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Undergraduate Office, 4256 Bunche Hall.

Required Lower Division Courses (eight units):
Any two lower division political science courses.

Required Upper Division Courses (20 units):
Any five upper division political science courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
Admission
The department admits only those students whose objective is the Ph.D. degree. A Master of Arts degree in Political Science may be earned as part of the process of completing requirements for the Ph.D.

Areas of Study
Consult the department.

Course Requirements
Students must take Political Science 200A and 200AL (statistics), four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses. Fields decide which courses meet major and minor field requirements.

Of the 16 required courses, students must take at least seven during their first year of graduate study and 12 by the end of their second year.

With the approval of the graduate adviser and the dean of the Graduate Division, graduate courses in political science taken elsewhere may be applied toward departmental course requirements. The maximum number of such courses is six if students come to UCLA with a master’s degree in political science and choose to forego another master’s degree from UCLA. In all other cases, the maximum is four for courses taken at another UC campus and two for courses taken outside the UC system.

Written and Oral Qualifying Examinations
Research Paper Requirement. Students must submit two research papers, one by the beginning of the seventh term of graduate study and one by the beginning of the ninth term of graduate study. These papers may also be used to meet course requirements. Each paper is assigned to two or more faculty graders by the Graduate Studies Committee. Papers can be graded qualified, not qualified, or qualified with distinction. If a paper is graded not qualified, students may submit a revised version or another paper once only. Resubmitted first papers are due two weeks before the end.
of the ninth quarter. Resubmitted second papers are due two weeks before the end of the tenth quarter. For the Ph.D., students must receive at least a qualified grade on both papers.

Papers are evaluated for knowledge of subject, originality of ideas, and craftsmanship of research. They are also evaluated for conciseness: good papers may vary in length but are not expected to exceed 30 pages. They need not be publishable, but in their structure and format and in their coverage of topics and tasks are expected to resemble papers published in peer-reviewed journals of their fields. The committee evaluating the papers assumes that students have not devoted all their research time to two papers but have selected for submission, or for revision and submission, the best two from a portfolio of several seminar papers.

By the tenth quarter of graduate study, students must present a research design for their dissertation in a seminar or colloquium. It need not be the version students submit for the University Oral Qualifying Examination. The requirement may be waived at a field’s discretion.

Students may take that examination after they have completed their course and paper requirements and written a dissertation proposal accepted by their research adviser. But students must take it no later than their twelfth quarter of graduate study, and the examination committee must have the proposal at least two weeks before the examination.

The examination committee judges the feasibility and worth of the project and the student’s ability to undertake it. The committee also may recommend changes in the research design.

**Political Science**

### Lower Division Courses

#### 6. Introduction to Quantitative Research. (4) Lecture, three hours; discussion, one hour. Introduction to the collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

#### 10. Introduction to Political Theory. (4) Lecture, three hours; discussion, one hour. Introduction to the analysis of selected political theorists and concepts from Plato to the present.

#### 20. World Politics. (4) Lecture, three hours; discussion, one hour. Introduction to political economy, specifically application of economic reasoning to political and social phenomena.

#### 40. Introduction to American Politics. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case.

**Upper Division Courses**

#### 102. Statistical Analysis of Political Data. (4) Lecture, three hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 6. Designed for juniors/seniors. Study of methods and techniques of analysis of political data.

#### 104A-104B. Introduction to Survey Research. (4-8) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 6. Designed for juniors/seniors. Study of fundamentals of survey research as a method.

#### M105. Economic Models of Public Choice. (4) (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparatory to lower division of political science course. Enforced requisites: Economics M11. Designed for juniors/seniors. Analysis of methodological and theoretical issues in political decision making. Topics include collective decision making, individual decision making, and voting.

#### 107. Women and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Enforced requisites: Economics M11. Designed for juniors/seniors. Study of women and politics in the context of political decision making.

#### Field I: Political Theory

111A-111B-111C. History of Political Thought. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

111A. Ancient and Medieval Political Theory from Plato to Machiavelli. 111B. Early Modern Political Theory from Hobbes to Bentham. 111C. Late Modern and Contemporary Political Theory from Hegel to the Present.

112A. Democratic Theory. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

113. Problems in 20th-Century Political Theory. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

114A-114B. American Political Thought. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

115. Problems in 20th-Century Political Theory. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

116. Marxism. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

117. Jurisprudence. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

118. Political Violence. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

119A-119B. Special Studies in Political Theory. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

120. Foreign Relations of the U.S. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

121. Studies in Formulation of American Foreign Policy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.

122. World Order. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of major political thinkers and schools.
123A-123B. International Law. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Course 123A is requisite to 123B. Designed for juniors/seniors. Study of nature and place of international law in conduct of international relations. Letter grading.

124. International Political Economy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Study of political aspects of group decision making in a nuclear age. Emphasis on international economic policies of the U.S., Japan, and Europe. Letter grading.

125. Arms Control and International Security. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

126. Peace and War. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Theory and research on causes of war and conditions of peace.

127A-127B. Atlantic Area in World Politics. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. 127A. Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. 127B. U.S. and Europe. Requisite: course 127A. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S.-Soviet relations.

128A. U.S./Soviet Relations. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Survey of relations between the U.S. and former Soviet Union from Revolutions of 1917 to collapse of the U.S.S.R. in 1991.

128B. International Relations of Post-Communist Russia. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russian relations with NATO, the former communist states of Eastern Europe, China, and the Commonwealth of Independent States.

129. Comparative Foreign Economic Policy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany since 1945.

130. Politics of Latin American Economic Development. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Interaction of international and domestic factors in political and economic evolution of Latin America.

131. Latin American International Relations. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Major problems of Latin American international relations and organization in recent decades.

132A-132B. International Relations of the Middle East. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. 132B. Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945.

133. International Relations of Sub-Saharan Africa. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Focus on regional issues and conflicts; foreign policies of African states; role of external powers.

134. Foreign Policy Decision Making and Tools of Statecraft. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 120. Designed for juniors/seniors. Concepts and process models of individual and group decision making in foreign policy. Strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

135. International Relations of China. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Relations of China with its neighbors and the other powers, with emphasis on contemporary international relations and policies of China vis-à-vis the U.S. and Soviet Union.

136. International Relations of Japan. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as these interact to shape the international relations of Japan. 137A-137B. International Relations Theory. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Examination of various theoretical approaches to international relations, P/NP or letter grading.

137A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M103A) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

Field III: American Politics

140A-140B-140C. National Institutions. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. 140A. Congress, Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. 140B. The Presidency, Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. 140C. Supreme Court. Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

141A-141D. Electoral Politics. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. 141A. Political Psychology. (Same as Psychology M138) Requisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

141B. Public Opinion and Voting Behavior. Requisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation.

141C. Political Behavior Analysis. Requisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct conventional and non-conventional studies of voter behavior in course 141B and similar courses.

141D. Mass Media and Elections. (Same as Communication Studies M161.) Requisite: course 40. Assessment of manner in which Americans’ political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media ‘effects,’ and role of the media in the American political process.

142A-142B-142C. Political Parties and Interest Groups. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors. 142A. Political Parties. Organization and activities of political parties in the U.S., attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices. 142B. Politics of Interest Groups. Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategy and tactics of influence. 142C. Government and Labor. Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.

143A-143B. Subnational Government. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors. 143A. State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic. 143B. Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

144A-144B. Ethnic Politics. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors. 144A. Chicano/Latino Politics. (Same as Chicana and Chicano Studies M147A) Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying interaction of state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

145. African American Politics. (Same as Afric-African American Studies M144.) Course M144A is not requisite to M144B. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students’ analytical skills.
145A-145D. Public Law and Judicial Process. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors.

145A. Anglo-American Legal System. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

145C. Constitutional Law — Civil Liberties. Protection of civil and political rights and liberties under the constitution.

145D. Judicial Oversight of the Bureaucracy. Legal controls of administration action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

146A-146F. Organization Theory, Public Policy, and Administration. (4 each) Formerly numbered 146A-146E. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors.

146C. Governing the Bureaucracy in the U.S. Requisite: course 40. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in “permanent government” (career bureaucrats).

146D. Theories of Organization and Decision Making. Requisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

146E. National Policy Development and Implementation. Requisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term.

146F. Politics, Ethics, and Business. Requisite: course 40. Examination of political issues, interests, and institutions that impose constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries.

149. Special Topics in American Government and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: course 40, two courses in Field III. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

Field IV: Comparative Politics

151A-151B-151C. African Politics. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

151A. Government and Politics of Africa. (Formerly numbered 166A, 166C.) Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and political processes.

151B. Political Economy of Africa. (Formerly numbered 166B.) Examination of interactions of economic and political factors in African development, with special attention to political basis of inappropriate economic policies. Emphasis on change toward a more appropriate economic strategy in recent times.

151C. Special Topics in African Politics. (Formerly numbered 166D.) Consult Schedule of Classes for topics to be offered in specific term.

152A-152B-152C. Government and Politics of Western Europe. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading.

152A. Britain. (Formerly numbered 152A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading.

152B. France. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading.

152C. Germany. (Formerly numbered 152C.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading.

153A. West European Government and Politics. (Formerly numbered 153A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of governmental policy development, organization, operation, and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

153B. Game-Theoretic Approach to West European Politics. (Formerly numbered 153B.) Course 153A is not requisite to 153B. Uses of elementary game theory in study of post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S.

154A-154B. Government and Politics in Latin America. (4-4) Formerly numbered 163A-163B. Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of governmental policy development, organization, and practices. 154A. States of Middle America; 154B. States of South America.

155. Advanced Pluralist Democracies. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

156A-156D. Government and Politics of Post-Communist States. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading:

156A. Russia. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union.

156B. Eastern Europe. (Formerly numbered 157.) Survey of institutions and political processes in selected post-Communist states of Eastern Europe.

156C. Post-Soviet States. (Formerly numbered 156B.) Survey of institutions and political processes in selected former Soviet republics other than Russia.

156D. Political Economy of Post-Communist Reform. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform.

157. Government and Politics in the Middle East. (4) Formerly numbered 164.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of government in the Arab States, Turkey, Israel, and Iran. P/NP or letter grading.

159A-159B. Government and Politics of China. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

159A. Chinese Revolution and Age of Mao Zedong. (Formerly numbered 159A.) Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

160. Government and Politics of Japan. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

165. Islam and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Religion and spiritual foundations of Islamic legal and political institutions; legitimacy of historical and contemporary Islamic regimes, movements, and ideologies; political strategies of Islamic activism. P/NP or letter grading.

166. Comparative Analysis of Government Institutions. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparison of major institutional structures such as presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, federal vs. unitary systems, plurality vs. proportional electoral systems, etc. Method of analysis is rational choice (political actors are assumed to optimize their results given institutional constraints and action of other actors). Result is that institutions affect political outcomes in systematic ways. P/NP or letter grading.

167A. Ideology and Development in World Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism.

167B. Comparative Development and Administration. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.

168. Comparative Political Analysis. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: two courses in Field IV, or course 50 and one course in Field IV. Designed for juniors/seniors. Required of all students concentrating in Field IV. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.
169. Special Studies in Comparative Politics. (4) (Formerly numbered 169A-169Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: two courses in Field IV. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in advance. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 115

Special Studies

194. Selected Topics in Political Science. (2 to 4) Seminar; three hours; outside study, eight or nine hours. Designed for juniors/seniors. Seminar on selected current topics of interest in political science. Consult Schedule of Classes for topics and instructors. May be repeated for credit; may be applied toward major but not to concentration or distribution requirement. P/NP or letter grading.

195A-195B-195C. Honors Seminars and Thesis. (4-4-4) Preparation: one course in C197 series, 3.5 grade-point average in upper division political science courses, eligibility for Letters and Science honors. Course 195A is requisite to 195B, which is requisite to 195C. Designed for juniors/seniors. One-year honors seminar and thesis-writing sequence. Students entering course 195A are expected to have some experience in writing research papers and to have in mind a research topic suitable for treatment at length and in depth:

195A. Students define their research topic, select a suitable research method, determine appropriate sources of information, prepare research proposal, find a thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussion of students' topics, methods, and problems in research, as well as general consideration of political science research topics and methods of current or continuing interest. Students also meet privately with instructor to discuss research progress.

195B-195C. Writing of honors thesis under direction of a faculty member. Thesis is read by appropriate field committee and graded high honors, honors, or no honors. In Progress grading.

C197A-C197D. Seminars for Majors. (4 each) Seminar, three hours. Preparation: two upper division courses in field in which seminar is offered. Limited to junior/senior Political Science majors with 3.25 grade-point average in upper division political science courses. Consult Schedule of Classes for topics to be offered in a specific term. May be applied toward distribution or concentration requirement. May be concurrently scheduled with various graduate courses.

C197A. Political Theory; C197B. Political Institutions; C197C. Politics; C197D. Comparative Government.

M197G. Introduction to Development Studies: Political Economy of Development. (4) (Same as International Development Studies M100B and Sociology M180.) Seminar, three hours. Designed for juniors/seniors. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

197W. CAPPP Washington Research Seminar. (8) Seminar; three hours; laboratory, 24 hours. Limited to CAPPP Program students. Seminar for undergraduates in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on in-person experience from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing.

199. Readings in Political Science. (2 to 4) Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Individual studies. Not may be applied toward concentration or distribution requirement. May be repeated for a maximum of 16 units.

Graduate Courses

Formal Theory and Quantitative Methods

200AL. Statistical Methods Laboratory I. (4) Laboratory, three hours. Corequisite: course 200A.

200D. Quantitative Methods in Politics. (4) Seminar, three hours. Preparation: knowledge of calculus and matrix algebra. Recommended requisite: course 200C. Designed to build on foundations set in course 200C. Focus on logical and mathematical structure underlying some statistical methods that are frequently used in political science. Emphasis on understanding structure of the models rather than on gaining added experience using them to analyze data. Applied data analysis. Letter grading.

M200E. Advanced Regression Analysis. (4) (Same as Psychology M256.) Seminar, three hours. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

201A. Introduction to Formal Political Analysis. (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading.

201B. Theory of Collective Choice. (4) Seminar, three hours. Recommended preparation for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

203A. Economic Theory and Methods for Political Science I. (4) Discussion, three hours. Preparation: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection, bargaining, and economic growth as time permits.

203B. Economic Theory and Methods for Political Science II. (4) Discussion, three hours. Requisite: course 203A. Continuing survey of microeconomic and mathematical techniques used in formal political science, with focus on market failures and on modeling individual choice in nonmarket situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure, and information asymmetries.

204. Game Theory in Politics. (4) Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science.

M208A. Game Theory. (4) (Same as Economics M214B and Mathematics M261.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

M208B. Topics in Applied Game Theory. (4) (Same as Economics M215.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

M208D. Multivariate Analysis with Latent Variables. (4) (Same as Psychology M257.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis, causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

M208E. Bayesian Econometrics. (4) (Same as Economics M232A.) Lecture, three hours. Requisites: Economics 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simulation of models, criticism. S/U or letter grading.

209. Special Topics in Formal Theory and Quantitative Methods. (4) Seminar, three hours.

Political Theory

210A-210B. Introduction to Political Theory. (4-4) Lecture, three hours. Exploration of major texts and issues in political theory. 210A. Classical and Medieval, Enlightenment and early modern, 210B, and analysis from Plato through Aquinas. 210C, Early Modern from Machiavelli through the Enlightenment.

M211. Morality of Capitalism. (4) (Same as Management M293B.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

212. Seminar: Political Theory. (4) Seminar, three hours.

214. Political Theory in Transnational Context. (4) Seminar, three hours; discussion, one hour (optional). Critical analysis of selected text from postcolonial, spatial, feminist, postmodern, and post-structuralist theories that assess impact of processes of globalization on such major concepts and problems of traditional social and political theory as sovereignty, citizenship, rights, community, representation, and democracy. S/U or letter grading.
International Relations

220. International Relations Theory. (4) Discussion, three hours. Approaches to and central problems of international relations theory.

221. Advanced International Relations Theory. (4) Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B.

222. Seminar: Strategic Interaction. (4) Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

223. Politics and Strategies of Modern War. (4) Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. May be concurrently scheduled with course C197B.

225. American Foreign Policy. (4) Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic political levels. Application to selected cases in American foreign policy.

226. The Making of American Foreign Policy. (4) Seminar, three hours. Intensive analysis of policy formulation process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

227. Foreign Policy Process. (4) Discussion, three hours. Requisites: courses 120, 220. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

230. Contending Perspectives on International Political Economy. (4) Discussion, three hours. Survey of various theoretical approaches to international political economy.

231. International Political Economy I. (4) Seminar, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies.

232. International Political Economy II. (4) Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

233A-233B-233C. Political Economy Workshops (0-4-4). Discussion, two hours. Preparation: successful completion of major field examinations. Workshop for students preparing to write dissertation. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. In Progress and letter grades (courses 233A-233B); letter grade (course 233C).

234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0-0-12). Discussion, two hours. Preparation: successful completion of major field examinations. Course 234A is requisite to 234B, which is requisite to 234C. Courses must be taken in sequence. Workshops for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. May be concurrently scheduled with course C197A.

239. Selected Topics in International Relations. (4) Discussion, three hours. May be concurrently scheduled with course C197B.

Comparative Politics

240A-240B. Seminars: Comparative Politics. (4-4) Seminar, three hours. Course 240A is requisite to 240B. Letter grade. 240A. Formerly numbered 240.) Survey of ideas and approaches that have been historically important in field of comparative politics, with a selection of theories and methodologies that have comprised the field over time. 240B. Survey of contemporary research approaches and problems in field of comparative politics, with a range of theories and methodologies used by practitioners in the field.

241. African Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

242. Chinese and East Asian Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

243. Japanese and Western Pacific Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

244. Latin American Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

245. Middle Eastern Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

246A. Western European Politics. (4) Formerly numbered C250A.) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

246B. Political Development of Modern Europe. (4) Formerly numbered C250B.) Seminar, three hours; discussion, one hour (optional). Principal phases of political development from high feudalism to the present, together with theories of causation.

247. Politics of the Soviet Union and Post-Soviet Region. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

247A. Evolution of Soviet and Russian Politics. (4) Seminar, three hours; discussion, one hour (optional). Discussion seminar surveying political evolution of Soviet Union and its transformation.

247B. Domestic Context of Russian Foreign Policy. (4) Seminar, three hours; discussion, one hour (optional). Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. May be concurrently scheduled with course C197B.

248. South Asian Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

251. Political Economy of Structural Adjustment. (4) Discussion, three hours. Some familiarity with economics helpful. Principal arguments for structural adjustment (trade and economic liberalization) and considerations of political issues that arise from this process.

252. Parties and Party Systems. (4) Formerly numbered C252A.) Seminar, three hours; discussion, one hour (optional). Theories and practices of political parties, party systems, and elections in comparative perspective.

253. Political Change in Communist Systems. (4) Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence.

254A. Comparative Political Behavior. (4-4) Seminar, three hours; discussion, one hour (optional): Political Institutions, Delegation, and Policy-Making. Analysis of political foundations of policy-making. Characterization of democratic institutions as a series of delegations, from voters to elected officials, within parties and legislatures, and from elected politicians to unelected bureaucrats. Examination of implications of different institutional designs for how those delegations are made and controlled.

255. Seminar: Political Change. (4) Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

256. External Sources of Domestic Politics. (4) Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions.

257. Labor and Working-Class Politics. (4) Discussion, three hours. Questions and topics on comparative labor and working-class politics.

258. Selected Topics in Comparative Politics. (4) Discussion, three hours. Critical examination of a major problem in comparative politics.

American Politics

260A. Survey Course in American Politics: Political Parties and the Electoral Process. (4) Discussion, three hours.

260B. Survey Course in American Politics: American Political Institutions. (4) Discussion, three hours.

261A. Proseminar: Political Psychology. (4) Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

261B. Mass Attitudes and Political Behavior. (4) Discussion, three hours. Requisite: course 141B or 260A. Analysis of development and change of political attitudes in mass publics and their relationship to voting, protest, and violence. May be concurrently scheduled with course C197C.

261C. Political Communication. (4) Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of “media effects” research, reporting and advertising as determinants of election outcomes, adversarial versus deferential journalism, and analyses of media bias.

261D. Seminar: Political Psychology. (4) Same as Psychology M228B.) Discussion, three hours. Requisite: course M261A or Psychology 220A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.
M261E. Critical Problems in Political Psychology. (4) (Same as Psychology M228C.) Discussion, three hours.

C262. Political Parties. (4) Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

C264. Politics and Society. (4) Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

265. Politics and Economy. (4) Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor.

266. Group Theories of Politics. (4) Discussion, three hours. Critical appraisal of “group theory” approaches to study of political decision making, with special attention to empirical research problems and findings.

269. Seminar: Political Behavior. (4) Seminar, three hours.

C270. Legislative Behavior. (4) Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

C271. Executive Politics and the Presidency. (4) Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

272. Political Environment of the Federal Executive. (4) Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations.

273. American Political Development. (4) Discussion, three hours. National political institutions in historical perspective, theories of state building, state-society relations, political culture.

C279. Seminar: Public Law. (4) Seminar, three hours. May be concurrently scheduled with course C197C.

C281. Public Policy Studies. (4) Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

284. Seminar: Bureaucracy and Organization. (4) Seminar, three hours. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive.

Special Studies

290. Modern Political Economy. (4) Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macroeconomics, forms of political participation, the state, government regulatory growth of government, bureaucracy elections, public policy, inflation.
programs for psychiatry interns and residents and for medical students.

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs. Additional information is available from the department office.

**Developmental Disabilities Immersion Program**

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (formerly Field Studies Development). Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill Psychology undergraduate major requirements. Students individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Center for Experiential Education and Service Learning (160 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

**Clinical Psychology Internship**

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, 68-255B NPI6H (310-794-1587).

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

**Psychiatry and Biobehavioral Sciences**

**Lower Division Course**

88. Lower Division Seminar: Special Topics in Psychiatry and Biobehavioral Sciences. (4) Seminar, three hours outside study, nine hours. Preparation: satisfaction of pre-requisite. Variable topics seminar which examines specific issues or problems and ways that professionals in psychiatry and biobehavioral sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

**Upper Division Courses**

M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M136Q.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

M180A. Contemporary Problems in Mental Retardation. (4) (Same as Psychology M180A.) Lecture, three hours. Requisites: Psychology 100A and 127 or 130 or 133A through 133L. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

M180B. Contemporary Issues in Mental Retardation. (4) (Same as Psychology M180B.) Lecture, three hours. Requisite: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

185. Social Psychology of Urban Student Education. (6) Lecture, 90 minutes; discussion, 90 minutes; fieldwork, six to eight hours. Designed for juniors/ seniors. Students interested in study of urban youth and their education acquire comprehensive and first-hand knowledge of factors affecting these students’ achievement. Field study component requires students to intern with youth in schools and after-school programs. P/NP or letter grading.

M191. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychology M117J.) Lecture, three hours. Requisite: Neuroscience M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 11S. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M192A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (4) (Same as Medicine M190A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

M192B. Field Studies Seminar: Health Outreach Issues and Interventions. (2 or 4) (Same as Medicine M190B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Requisite: course M192A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

199. Special Studies in Psychiatry. (2 to 4) Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C6-202 NPI6H.

**Graduate Courses**

M203. Molecular Neurobiology. (4) (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A-201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neuroscience M204, Neuroscience M201, and Physiology M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

207A-207B-207C. Hypnosis Seminars. (2-2-2) Experimental seminars to prepare mental health professionals for adult and child clinical applications, involving didactics, demonstrations, trainee practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia, self-hypnosis), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnosis. Emphasis on acquiring skills for clinical practice. S/U grading.

M210. Seminar: Psychocultural Studies and Medical Anthropology. (4) (Same as Anthropology M234.) Seminar, three hours. Devoted to presentation of current research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives in social sciences. S/U or letter grading.

M213. The Individual in Culture. (4) (Same as Anthropology M235.) Seminar, three hours. Designed for graduate students.

M214. Cross-Cultural Studies of Socialization and Children. (4) (Same as Anthropology M236.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

M221. Cellular and Molecular Neurochemistry. (4) (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Pharmacology M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors for case studies and research. S/U or letter grading.

M222. Transcultural Psychiatry. (4) (Same as Anthropology M224P.) Seminar, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, “culture specific” syndromes, non-Western psychiatry, and questions of “sick” societies. May be repeated for credit.

M231. Hispanic Mental Health Issues and Treatment. (2) (Formerly numbered 231.) (Same as Social Welfare M230E.) Mental health issues and needs of Hispanics through seminars and videotapes discussing with historical comparison of psychiatry in Mexico and the U.S. Analysis of various theoretical perspectives regarding biopsychosocial behavior: distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clients.

M234. Affective Disorders. (2 or 4) (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M236Q, Education M222A, and Psychology M226.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

237. Seminar: Behavioral Neuromyelitis. (1) Seminar, one hour per month; discussion, 30 minutes per month. Seminar is presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

M238. Survey Research Techniques in Psychocultural Studies. (4) (Formerly numbered 238.) (Same as Anthropology M238P, Education M226A-226B.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing research on psychocultural problems.

M240. Assessment and Treatment of African American Families. (3) (Same as Afro-American Studies M240.) Lecture, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for case study analysis. Didactic and practical training in case management with an African American child and family.

242. Parent and Child Psychotherapy Seminar. (1) Preparation: current experience in psychoanalytically oriented practice. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, “culture specific” syndromes, non-Western psychiatry, and questions of “sick” societies. May be repeated for credit.

243A-243B-243C. Mental Retardation and Chronically Medically Ill Children, Youth, or Adults. Seminar, 90 minutes. Didactic, 90 minutes. Didactic and practical training in assessment of assigned readings by students plays major role in each session.

M246. Psychological Aspects of Mental Retardation. (4) (Same as Psychology M246.) Lecture, 90 minutes. Discussion of major topic areas of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special education. Presented in interdisciplinary framework as generic information independent of discipline. S/U grading.

M247. Psychological Aspects of Mental Retardation. (4) (Same as Psychology M247.) Lecture, 90 minutes. Discussion of major topic areas of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

M249. Neurobiology of Sleep. (3) (Same as Neuroscience M259 and Psychology M269.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Preparation of relevant clinical phenomena. S/U or letter grading.

M251. Mental Health Services. (4) (Same as Health Services M249J.) Lecture, three hours. Requisites: Health Services 200A-200B. Designed for doctoral students. Survey of delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and programatic goals. Letter grading.

253. Seminar: Child Development. (1) Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

M254. Supporting Families of Children with Special Needs. (2) (Formerly numbered 254.) (Same as Social Welfare M203D.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional’s reactions, community resources, and issues of genetic counseling, placement, and development on change. S/U or letter grading.

257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders. (3-3-3) Laboratory, 90 minutes; didactic, 90 minutes. Laboratory and case material. Instruction more intuitive than mathematical. Letter grading.

M258. Epidemiology of Mental Illness. (4) (Same as Anesthesiology M258.) Lecture, four hours. Epidemiology of psychiatric illness, covering epidemiology, nosology, as-
M272. Psychological Anthropology. (4) (Same as Anthropology MZ240.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

M273. Advanced Seminar: Medical Anthropology. (4) (Same as Anthropology M236Q, Community Health Sciences M244, and Nursing M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4) (Same as Psychology M285.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

M280. Politics of Reproduction. (4) (Same as Anthropology M269P.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illustrate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

281. Behavioral Therapy in an Educational Setting. (4) Lecture, one hour; laboratory, six to 10 hours. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

M282. Anthropology of the Human Body. (4) (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

M285. Functional Neuroimaging: Techniques and Applications. (4) (Same as Biomedical Physics M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

M286A-M286B-M286C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2) (Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Requisite: Biostatistics 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

287. Small Group Cognitive/Behavioral Interventions. (4) Lecture, three hours. Presentation of brief therapeutic interventions for adults and children at risk for suicide, depression, conduct problems, and HIV, with didactic and experiential techniques.

M289. Intervention to Reduce HIV and Its Consequences. (4) (Same as Community Health Sciences M299.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.

295A. Neurobiology and psychopharmacology of drug abuse, as well as epidemiology and prevention. Discussion of pros and cons of various treatment modalities for drug dependence.

295B. Drug use patterns and treatment issues in specific populations such as women, adolescents, the homeless, the multiply diagnosed, as well as different ethnic populations. Exploratory relationship between drug abuse, sexuality, and HIV/AIDS.

295C. Theoretical perspectives on drug abuse and abuse as well as policy and ethical aspects of drug abuse research. Research design and analysis issues pertinent to drug abuse research.

298. Current Topics in Biobehavioral Sciences. (1 to 4) Current issues in biobehavioral sciences offered on select basis depending on instructor interest and topical relevancy of problems. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

402. Journal Club. (1) Seminar, two hours; outside study, two hours. Presentation of participants' current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

403. Individual Case Supervision. (1 to 4) Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.
For nonmajors, the department offers many courses that can give them new and valuable disciplines are studied) and in terms of the differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology — in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they became most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience, either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in such areas as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study

Psychology B.A.

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychology major. They are then identified as Prepsychology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychology major. The following required courses must be taken for a letter grade (a C– or better in each course and a 2.3 overall grade-point average in the preparation courses) before students reach 110 total units (transfer students must complete all remaining preparation courses by the end of the first year of enrollment): Anthropology 7 or 10 or 12; Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus; Physics 10 or 1A or 6A; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22;
Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychology major one term before the term in which they plan to enroll. Students without no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: introductory psychology, physical anthropology, introductory biology, introductory physics, introductory chemistry (or one year of high school chemistry with a C or better), introductory philosophy, and one course from statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C***.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Core courses: Psychology 110, 115 (or M117A-M117B-M117C), 120, 130 or one course from 133A through 133L, 135; (2) one laboratory/fieldwork course from 111, 113, 116, 121, 131, 136A, 136B, 136C, 171A, 174, 186A, 186B; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division psychology electives.

All upper division courses must be taken for a letter grade. For all entering freshmen and transfer students, a C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

Cognitive Science B.S.

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Pre-Cognitive Science major. They are then identified as Pre-Cognitive Science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Cognitive Science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses) before students reach 130 total units: Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 31A, 31B; Philosophy 7, 8, or 9; Physics 10 or 1A or 6A; Program in Computing 10A, 10B, 15; Psychology 10, 85, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Pre-Cognitive Science major one term before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: two courses in calculus/analytical geometry, introductory psychology, statistics (recommended), introductory biology, introductory physics, one philosophy course (critical reasoning, philosophy of science, or philosophy of the mind), introductory chemistry (or one year of high school chemistry with a C or better), and one course in computer programming in C***.

Psychobiology B.S.

The Psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychobiology major. They are then identified as Prepsychobiology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychobiology major.

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4A, 4AL, and 4BL, or 6A, 6B, and 6C.

Also required are Psychology 10, 100A, 100B. Students cannot take Psychology 100B until...
they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Psychobiology major one term before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

All core curriculum courses must be taken for a letter grade (a C– or better in each course and a 2.0 overall grade-point average in the core curriculum) before students reach 130 total units. Psychology 100A and 100B must be completed before students reach 130 total units. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students
To be admitted as Psychobiology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2; one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission. Introductory psychology and statistics are recommended.

The Major
After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Organismic Biology, Ecology, and Evolution 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A-M117B-M117C), 116, 120; (2) one course from Psychology 127, 130, 133A through 133I, 135; (3) 16 units of graded elective courses from the following list: Organismic Biology, Ecology, and Evolution 107, 112, 113A, 114 (no more than one from this group), Psychology M117A, M117B, M117C, M117I, M117K, 119A through M119N, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Chemistry and Biochemistry 153A, 153L, Molecular and Medical Pharmacology 110A, 110B, Molecular, Cell, and Developmental Biology 104, 138, C139, CM156, 171, M185A, Neuroscience 151, M174, Organismic Biology, Ecology, and Evolution 102, C104, 105, 106, 110, 111, C115, 117, C119, 120, 121, 122, 124 (only four units may be applied toward the major), 131 (only four units may be applied toward the major), C135, 146, M158, 164, M166, 167, 179, Physiological Science 142, C144, 147, M173.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

Fieldwork and Research Opportunities
Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduates closer to understanding research and its applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188A, 188B, 192, 193, 194A, 194B, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

Honors
Honors Courses
Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. All such courses offer credit toward the departmental honors program. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

Honors Program
Psychology, Cognitive Science, and Psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 190A-190B-190C) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. In addition, they must take at least two psychology honors courses selected from a list provided by the department, with a grade of B or better in each. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors. Consult the Undergraduate Advising Office early in the educational planning for further information and application forms.

Student Award for Research Training (START)
The Student Award for Research Training (START) represents a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of START is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for START takes place each Fall Quarter. Most students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, they are required to attend a weekly seminar in which presenters, including faculty members, address topics such as graduate school, careers in academia, and research in psychology. START provides students with the opportunity to work closely with faculty research sponsors, graduate students, and departmental counselors.

Developmental Disabilities Immersion Program and Concentration
The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (formerly Field Studies Development). Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill Psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

To earn a concentration, majors in Psychology, Cognitive Science, and Psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from the Center for Experiential Education and Service Learning, 160 Powell Library. The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the Psychology major), 130 or one course from 133A through 133I (also satisfies a core requirement for the Psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a departmental certificate of completion at graduation; they must notify the department during the
term they plan to graduate to receive the certificate. The concentration does not appear on the diploma or transcript.

If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A-M181B does not apply toward the major.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or the Center for Experiential Education and Service Learning (160 Powell Library).

### Computing Specialization

Majors in Psychology, Psychobiology, and Cognitive Science may select a specialization in Computing by (1) satisfying all the requirements for a bachelor’s degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15 (recommended), 30, 60, and (3) completing Psychology 85 and at least two courses from 121, 142H, 150, 151, 186A, 186B (one 199 course must be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor’s degree in their major and a specialization in Computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

### Applied Developmental Psychology Minor

The Applied Developmental Psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduates how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1611 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

**Required Lower Division Course (four units):** Psychology 10.

**Required Upper Division Courses (24 units):** Psychology 133X and 133Y (to be taken concurrently with the two-term internship described below) and four additional courses, of which at least three must be upper division, from Education 91A through 91D, 125A, Linguistics C130, C135, Psychology 129F, 130, 131, 132, 133A through 133I, M176, 197 (content must be approved by the Undergraduate Advising Office), 199 (content must be approved by the Undergraduate Advising Office), Sociology 136, M174. One of the four additional courses must include either Psychology 130, one course in the 133 series, or 197 (content must be approved by the Undergraduate Advising Office).

**Internship Requirement:** Students work as interns for two academic terms at an approved day care center/school and enroll concurrently in Psychology 133X and 133Y. The internship provides hands-on experience working with young children as teacher’s aids and opportunities for observing children. By completing an additional one-term internship (see the director of the Infant Development Program, 1611 Franz Hall, for details), students may meet many of the “Teacher Qualifications and Duties” outlined in Section 101316.2 under Title 22, Division 12, California Department of Social Services.

All minor courses, except for the internship courses, must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students’ majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

### Cognitive Science Minor

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than Cognitive Science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

**Required Courses (28 units):** Psychology 85 and one course from 15, 100B, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Students must also select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) biological basis of cognition cluster — three courses from Linguistics C135, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), M17K, 119B, 119F, M119L, M119N; (2) computation and modeling cluster — three courses from Biomathematics 108, Computer Science 161, 183, Psychology 150, 151, 186A, 186B (at least one course must be from Computer Science 161, Psychology 186A, 186B); (3) human cognition cluster — Psychology 121 and two courses from 112C, 120, 124A through 124F, 133B, 133BH, 133C, 133E; (4) mind and language cluster — three courses from Linguistics 120A, 120B, 125, C130, C132, C135, C185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 122, 123, 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students’ majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

### Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 133X, 133Y, and 193. The program is located in Franz Hall and provides child care for about 15 infants ranging in age from three months to three years.

### Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.
Psychology Clinic
The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of research projects through the clinic.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree
Admission
The Department of Psychology does not admit candidates for the Master of Arts degree in Psychology only, although students may be awarded the M.A. en route to the Ph.D.

Areas of Study
Consult the department.

Course Requirements
Requirements for the M.A. are nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be completed), and at least three of the four required core courses (refer to the section on doctoral course requirements for further details). One 596 course (four units) may be applied as an elective. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared before the M.A. is awarded.

Comprehensive Examination Plan
Consult the department.

Thesis Plan
None.

Doctoral Degree
Admission
A departmental brochure describing the graduate program in psychology is available from the department.

Admission to the program leading to the Ph.D. degree in Psychology normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants should mail the following documents directly to the Psychology Department by December 15 for clinical area applicants and January 2 for applicants to other areas to be considered for admission the following Fall Quarter.

1. The University's Application for Graduate Admission, available in 3453 Franz Hall.
2. Three letters of recommendation.
3. One official transcript from each college attended.
4. Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).
5. The Test of English as a Foreign Language (TOEFL), required of all international applicants.

Interviews (in person or by phone) are required for clinical area finalists.

Students entering the graduate program must demonstrate adequate breadth of preparation in psychology and related disciplines. Students are expected to have taken courses equivalent to the following: (1) Psychology 100A; (2) two courses selected from Psychology 110, 115, and 120; and (3) two courses selected from Psychology 127, 130, 135. In addition, it is recommended that students have the following college-level coursework: one course in biology or zoology; one course in mathematics (such as calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses. The recommended courses may be waived by the student's advisor.

Students who have completed any of the undergraduate majors offered by the UCLA Department of Psychology have satisfied the undergraduate preparation requirements. Students who have not had training in the areas cited above may either take the missing courses or have their area evaluate their preparation and, in consultation with the student, plan a program of study that provides the appropriate breadth.

The individual program may include undergraduate coursework, graduate coursework, readings followed by an examination, or some combination of these. Emphasis is on breadth and preparation, both within and outside the Department of Psychology. The plan should include a firm date of completion and requires approval of the graduate affairs committee. Continuation in the Ph.D. program is contingent on satisfactorily clearing undergraduate deficiencies by the end of the fourth quarter in residence.

Major Fields or Subdisciplines
Students are required to obtain a thorough background in research methodology and psychological theory. Major specialized training is available in the following areas of psychology: behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, learning and behavior, measurement and psychometrics, or social psychology. Students admitted in either the behavioral neuroscience or cognitive areas may take the program in cognitive neuroscience. The course requirements serve as a combined major and minor. Students who select this option remain in their area of admission for administrative purposes.

Course Requirements
General Core Requirements
All students, regardless of area, must fulfill the requirements listed below. A course may not be used to fulfill requirements in more than one major or minor area unless no other course options are designated. The core program includes four courses, plus Psychology 250A, 250B, 251A-251B (and 251C, if an additional quarter is needed to complete the course). Courses 250A and 250B must be completed in the first two quarters; 251A-251B-251C must be completed by the end of the fourth quarter. The additional four core courses must be completed within the first six quarters in residence. If the core courses have not been completed by the end of the fifth quarter, the balance of courses must be completed during the sixth quarter, even if the preferred courses are not offered at that time.

By the end of the second year, students must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course from Psychology 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258, 259, 287.

During the third year, students must enroll in a minimum of three graduate-level courses, plus one quarter of course 596. At least one quarter of 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

Major Area Course Requirements
Each area requires certain courses of students majoring in that area. Requirements are as follows:

Behavioral Neuroscience. Neuroscience M201 and either option 1 — Neuroscience M202 and M204 or option 2 — Psychology M117A. Students interested in molecular biology generally take option 1 and minor in neuroscience. In addition, all majors take eight units from the Psychology 205 series, three quarters of Psychology 212, and two approved behavioral neuroscience seminars.

Clinical. Psychology 270A-270B-270C, 271A-271B-271C, 277A, and two advanced clinical courses from Psychology 272A through 298. All 278 courses must be first approved by the clinical area. At least one of the advanced courses must be numbered above 272A.

Practicum and Internship Requirements for Clinical Students.
(1) At least 400 hours of approved supervised preinternship practicum (Psychology 401) are required, of which 150 hours must involve direct clinical service and 75 hours must be formal schedule supervision. These hours are usually completed during the second through fourth years.

(2) The equivalent of one-year of full-time supervised internship (Psychology 451) in an acceptable setting approved by the faculty, is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship requirements.

In cases in which graduate students have (1) completed all academic requirements, (2) passed the final oral examination, (3) received doctoral committee approval to file the dissertation, (4) provided evidence of satisfactory completion of at least nine months of an internship approved by the faculty, and (5) obtained approval from the clinical area chair, students may petition to file the dissertation and be awarded the Ph.D. degree with the clear understanding that the remaining months of internship that are required by the American Psychological Association will be completed as outlined in the internship contract. Such petitions are considered to be exceptions rather than the rule. Documentation of subsequent internship completion is provided by the director of clinical training.

Cognitive. Psychology 260A-260B plus four courses, including at least two from Psychology 259, 261 through 266, and at least one from Psychology 268A through 268E or 269.

Cognitive Neuroscience. The following course requirements satisfy both major and minor area requirements: Neuroscience M201; Psychology M117A or Neuroscience M202; Psychology 212, Psychology 260A, 260B, eight units of Psychology 205, Psychology 207A, 207B, or 207C. Four additional courses are required in the cognitive area, which must include at least one core course and one seminar.

Developmental. Psychology 240A-240B; two courses from Psychology 242A through 242F, 243B, 244, 299.

Learning and Behavior. Psychology 200A, 200B, plus two courses from 204B through 204E, 210, 290, 293.

Psychological Statistics. (4) Lecture, three hours. Laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

100A. Psychological Statistics. (4) (Formerly numbered 41.) Lecture, three hours; laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

100B. Research Methods in Psychology. (6) (Formerly numbered 42.) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10, 100A (C– or better for prespsychology and prespsychobiology, C or better for precognitive science). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

101. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

88A. Stress, Adaptation, and Coping. Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

97. Variable Topics in Psychology. (4) Lecture, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores. P/NP or letter grading.

150. Individualized Minor or Minor in Experimental Psychology. Students may petition for individualized minors or a minor in experimental psychology. Training is also available in community psychology.

Courses taken to satisfy a student's minor area requirements cannot be chosen from among those that could satisfy the major area requirements. The minor is normally satisfied by taking three to four specified courses as indicated below. Other options are also available; see departmental bulletins for further details. The following is standardized departmental course work for minors.

Behavioral Neuroscience. Four units from the Psychology 205 series, plus two of the following: four additional units from Psychology 205A through 205B, 207A, 207B, or 207C, or 291. In addition, students may select Neuroscience M201 and M205.

Cognitive. Three of the following courses, two of which must be from Psychology 259 through 266: Psychology 259, 261, 262, 263, 265, 266, 268A through 268E, 269.

Developmental. Psychology 240A or 240B, plus two courses from Psychology 242A through 242F, 243A, 243B, 244, M246, 299.

Experimental Psychopathology. Four courses petitioned and approved by the clinical area.

Health Psychology/Behavioral Medicine. Psychology 227 and two quarters of 425, plus two courses selected from Psychology 222B, four units of 205 or 225, and 298 seminars on relevant topics approved by the health psychology faculty and the Graduate Affairs Committee.

Learning and Behavior. (1) Comparative option — Psychology 210, plus two of the following: Organismic Biology, Ecology, and Evolution 120, C219, 274, Psychology 204E, Anthropology 128A, 128B; (2) learning option — Psychology 200A, 200B, plus one course from Psychology 204B through 204F and 293.

Political Psychology. See department bulletin for details.

Written and Oral Qualifying Examination

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth the student's knowledge of the major field. The second section is an individualized examination which examines in depth the student's knowledge of the area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before the oral qualifying examination can be taken.

Contact the department for the specific examination requirements of the various areas of specialization.

Psychology Lower Division Courses

10. Introductory Psychology. (4) Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research. P/NP or letter grading.

15. Introductory Psychobiology. (4) Lecture, three hours. Designed for nonmajors. Survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using comparative approach where appropriate, emphasis on relevance of biological mechanisms to understanding of humans and their interaction with their environment.

85. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

Upper Division Courses

100A. Psychological Statistics. (4) (Formerly numbered 41.) Lecture, three hours; laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

100B. Research Methods in Psychology. (6) (Formerly numbered 42.) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10, 100A (C– or better for prespsychology and prespsychobiology, C or better for precognitive science). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

101. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

88A. Stress, Adaptation, and Coping. Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

97. Variable Topics in Psychology. (4) Lecture, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores. P/NP or letter grading.

Upper Division Courses

100A. Psychological Statistics. (4) (Formerly numbered 41.) Lecture, three hours; laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

100B. Research Methods in Psychology. (6) (Formerly numbered 42.) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10, 100A (C– or better for prespsychology and prespsychobiology, C or better for precognitive science). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

110. Fundamentals of Learning. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area. P/NP or letter grading.

111L. Learning Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

112A. Basic Processes of Motivated Behavior. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 110. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

112B. Psychobiology of Fear and Anxiety. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10, 100A, 110. Recommended: course 115. Designed for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112C. Principles of Skill Acquisition. (4) Lecture, three hours; outside study, 110 or 120 (recommended). Designed for Psychology majors. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning.

113. Behavior and Alcohol Laboratory. (4) Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Students conduct an experiential study of alcohol on learning and complex processes using paid volunteers. Examination of setting and role of individual differences in relation to current theories of alcohol use and abuse. P/NP or letter grading.

113H. Behavior and Alcohol Laboratory (Honors). (4) Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Honors course parallel to course 113. P/NP or letter grading.

114. Alcoholism. (4) Designed for juniors/seniors. Theories and research on impact of causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

116. Behavioral Neuroscience Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 100A, 100B, 115 (may be taken concurrently). Designed for psychobiology and psychology majors. Laboratory experience with various topics in behavioral neuroscience. P/NP or letter grading.

M117A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. P/NP or letter grading.

M117B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M117C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisite: course 115 or M117B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Physiological Science M180B) or Physiological Science 111A. Neural systems involved in behavior to higher cognitive function. Discussion of how assemblies of neurons process complex information and control movement. P/NP or letter grading.

118. Comparative Psychobiology. (4) (Same as Molecular, Cell, and Developmental Biology M171.) Designed for juniors/seniors. Exploration of biological basis of human cognition. Topics include cross-cultural perspectives, development of stress responses and disease states. Consideration of stress-related topics, including behavioral pharmacological variables in stress and stress management.

119. Psychobiology of Pain and Painlessness. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Analysis of basic pharmacologic principles, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

120. Cognitive Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking. P/NP or letter grading.
121. Laboratory in Cognitive Psychology. (4) Laboratory, four hours. Requisites: courses 10, 100A, 100B, 120 (may be taken concurrently). Designed for Psychology and Cognitive Science majors. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition. P/NP or letter grading.

122. Language and Communication. (4) Lecture, three hours. Requisite: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; and physiological and psychological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

123. Psycholinguistics. (4) Designed for juniors/seniors. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

124A. Sensation and Perception. (4) Lecture, three hours. Requisites: courses 10, 100A, 120. Designed for majors/minors in contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches. P/NP or letter grading.

124AH. Sensation and Perception (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 124A.

124B. Visual Information Processing. (4) Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 120. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects. P/NP or letter grading.

124C. Human Memory. (4) Lecture, two hours; discussion, one hour. Requisite: course 120. Designed for juniors/seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

124D. Principles of Human Performance. (4) Designed for Psychology majors. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesis, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicle control, and sport.

124E. Language and Cognition. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10, 120. Designed for juniors/seniors. Revealed theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition.

124F. Thinking. (4) Lecture, three hours. Requisite: course 120. Analysis of experimental studies of human categorization, reasoning, decision making, problem solving, creativity, and related topics.

124FH. Thinking (Honors). (4) Lecture, three hours. Honors course parallel to course 124F. P/NP or letter grading.

127. Abnormal Psychology (Honors). (4) Lecture, three hours. Overview of characteristics of major forms of psychopathology, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

129A. Personality Measurement. (4) Lecture, three hours. Requisites: courses 10, 100A. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions. P/NP or letter grading.

129B. Introduction to Psychoanalysis. (4) Lecture, three hours. Requisites: courses 10, 100A. Development of Freud's ideas from 1895 to 1926, with emphasis on drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicot, and Bim. P/NP or letter grading.

129C. Culture and Mental Health. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Requisites: courses 10, 100A. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos, Chicanos, Asian Americans, and American Indians). P/NP or letter grading.

129D. Personality. (4) Lecture, three hours. Requisite: course 10. Survey of major topics in field of personality, including personality theory, personality assessment, and cultural role of perception, learning, and motivation in personality.

129F. Clinical Psychology of Childhood and Adolescence. (4) Lecture, two hours; discussion, one hour. Requisite: course 127. Survey of childhood and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/NP or letter grading.

130. Developmental Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental processes and representations underlying development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

133E. Perceptual Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Topics include origins and development of human perceptual abilities, origins of knowledge about functionally important aspects of the environment, ecological and computational issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

133F. Psychology and Education. (4) (Formerly numbered 134.) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and educational consequences of the disadvantaged. P/NP or letter grading.

133G. Culture and Human Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

133I. Applied Developmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, safety, legal, and public policy issues, child-rearing practices. P/NP or letter grading.

133Y. Advanced Applied Developmental Psychology. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 133X. Designed for Applied Developmental Psychology minors. Advanced issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observations of children, and designing daycare curricula. P/NP or letter grading.

135. Social Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A, 135 (may be taken concurrently). Designed for juniors/seniors. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena. P/NP or letter grading.

136A. Social Psychology Laboratory. (4) Lecture, one hour; laboratory, four hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Introduction to research designs and methods used to test social psychological hypotheses, including experiments, observation, content analysis, and/or questionnaires. P/NP or letter grading.

136B. Nonexperimental Methods in Social Psychology. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires. P/NP or letter grading.

136C. Survey Methods in Psychology. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Survey research in psychology, with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories. P/NP or letter grading.

137A. Sport Psychology. (4) Lecture, three hours. Designed for junior/senior Psychology majors. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

137AH. Sport Psychology (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 137A.

137B. Attitude Formation and Change. (4) Lecture, three hours. Requisites: courses 10, 100A, 135. Structure and functions of attitudes, their measurement, how they develop, and methods for changing them. P/NP or letter grading.

137C. Close Relationships. (4) Lecture, three hours. Requisites: courses 10, 100A, 135. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles. P/NP or letter grading.

137D. Introduction to Health Psychology. (4) Requisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

M137E. Work Behavior of Women and Men. (4) (Same as Women’s Studies M137E.) Requisite: course 10 or Women’s Studies 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

137F. Introduction to Sport Psychology. (4) Lecture, three hours. Designed for juniors/seniors. Survey of topics in sport psychology, including leadership and team dynamics, moral development and aggression, personality, motivation, fan behavior, and performance enhancement. Consideration of youth sport through world-class athletics. P/NP or letter grading.

137G. Interpersonal Influence and Social Power. (4) Lecture, three hours. Requisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

M137J. Psychology of Language and Gender. (4) (Same as Communication Studies M124 and Women’s Studies M137J.) Lecture, three hours. Requisite: course 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language across cultural, sex bias in lexicon and usage, sex differences in language, sex differences in political science, sex and gender in research, and conversational interaction.

M138. Electoral Politics: Political Psychology. (4) (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 10. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, race and politics, and psychological analysis of public opinion on these issues.

M140. Introduction to Study of Aging. (4) (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for seniors. Perpectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

142H. Advanced Statistical Methods in Psychology (Honors). (4) (Formerly numbered 142J.) Lecture, three hours; laboratory, two hours. Requisites: courses 100A, 100B. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression. P/NP or letter grading.

150. Mathematical Models in Psychology. (4) Lecture, two hours; discussion, two hours. Requisites: Mathematics 3C or 31B, Computer Science 10C or 10F. Review of theoretical models and experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

151. Computer Applications in Psychology. (4) Lecture, two hours; discussion, two hours. Requisite: Computer Science 10C or 10F. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

M163. Death, Suicide, and Trauma. (4) (Same as Sociology M138.) Lecture, three hours. Designed for juniors/seniors. Definition and taxonomy of death; new permissiveness and taboos related to death; re-evaluation of the terror of death; analysis of the meaning of death in society structure surrounding the individual; preventive, interventive, and postventive in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeth; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward Psychology or Sociology major).

M165. Psychology of Gender. (4) (Same as Women’s Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex role development and role conflict, physiological and personality differences between men and women, and influences on intellectual abilities and achievement, and impact of gender on social interaction.

166. Environmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions of emotional response to physical and social environments, measurement of information of rate of situational and personality variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework. P/NP or letter grading.

170A. Behavior Modification. (4) Lecture, three hours. Designed for juniors/seniors. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

170B. Fieldwork in Behavior Modification. (4) Discussion; two hours; fieldwork; six hours. Requisite: course 110 with a grade of A or 170A. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

170C. Advanced Fieldwork in Behavior Modification for Nonpsychology Majors. (4) Lecture, two hours; fieldwork, six hours. Requisite: course 170B. Not open to students with credit for course 171A. Does not fulfill laboratory requirement for majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

171A. Advanced Fieldwork in Behavior Modification for Psychology Majors. (4) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 170B. Designed for Psychology majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

171B. Practicum: Design and Implementation of Behavioral Interventions. (4) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 171A. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.
M172. The Afro-American Woman in the U.S. (4) (Same as Afro-American Studies M172 and Women's Studies M172.) Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

173. Advanced Abnormal Psychology. (4) Lecture, three hours. Required: courses 10, 100A, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders. P/NP or letter grading.

174. Interpersonal Process Analysis. (4) Lecture, two hours; laboratory, three hours. Required: courses 100A, 100B, 127. Designed for Psychology majors. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged). P/NP or letter grading.

175. Community Psychology. (4) Required for junior/senior Psychology majors. Application of psychological principles to understanding and solution of community problems. Topics include community development, design for junior problems, drugs, racism, and rehabilitation of prisoners.

176. Communication and Conflict in Couples and Families. (4) (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Required: courses 10, 100A, 127. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

178. Human Motivation. (4) Lecture, three hours. Designed for juniors/seniors. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achievement strivings, and causal attributions.

179B. Biomedical and Psychosocial Aspects of AIDS/HIV. (4) Lecture, three hours. Required: course 137D or 179A or Health Services 100. Designed for juniors/seniors. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, psychological and sociocultural aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

180A. Contemporary Problems in Mental Retardation. (4) (Same as Psychiatry M180A.) Lecture, three hours. Required: courses 10, 100A, and 127 or 133A through 133I. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and social questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

180B. Contemporary Issues in Mental Retardation. (4) (Same as Psychiatry M180B.) Lecture, three hours. Required: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

185A. Gerontology. (4) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Required: course 85, Program in Computing 10A, 10B. Designed for junior/senior Psychology majors. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, production systems, connectionist networks, and mathematical models. Lectures and discussions interwoven with computer simulations written in common LISP.

185B. Cognitive Science Laboratory: Neural Networks. (4) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Required: course 85, Program in Computing 10A, 10B (or PASCAL). Designed for junior/senior departmental majors. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neuropsychology; basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.

187A. Psychology and Law. (4) Lecture, two hours; discussion, two hours. Required for juniors/seniors. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

187AH. Psychology and Law (Honors). (4) Lecture, two hours; discussion, two hours. Honors course parallel to course 187A.

187B. Advanced Psychology and Law. (4) Lecture, three hours; discussion, one hour. Required for seniors. Course 187A. Designed for juniors/seniors. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

188A. Research in Cognitive Science. (4) Lecture, two hours; laboratory, six hours. Required for Cognitive Science majors. Practical applications of cognitive science through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

188B. Fieldwork in Cognitive Science. (4) Formerly numbered 188.) Seminar, two hours; fieldwork, six hours. Required for Cognitive Science majors. Practical applications of cognitive science through fieldwork. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

189. Ergonomics and Human Factors. (4) Lecture, three hours; outside study, nine hours. Required: courses 10, 120. Designed for juniors/seniors. Examination of human capabilities and limitations in design of human/machine systems such as vehicles, workspaces, and computer software for goals of safety and efficiency. Topics include sources of error, information processing, manual control, training, and personnel selection.

189H. Ergonomics and Human Factors (Honors). (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Honors course parallel to course 189. P/NP or letter grading.

190A-190B-190C. Honors Course. (4) Seminar, two hours. Limited to psychology honors program students. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, course 190C may be applied toward elective course requirement for any Psychology Department major.

193. Fieldwork in Psychology. (4) Seminar, two hours; fieldwork (approved community setting), six hours. Limited to sophomores/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194A. Research in Psychology. (4) Formerly numbered 194.) Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194B-194C. Ongoing Research in Psychology. (4) (Formerly numbered 194B.) Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Minimum of two terms required. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. In Progress and P/NP grading.
197. Current Issues in Psychology. (4) Lecture, three hours. Designed for junior/senior majors. Study of selected current topics of psychological interest. Consult Schedule of Classes for topics and instructors. Only one graded 197 course may be applied toward elective course requirements by the Undergraduate Office. A maximum of four units of course credit and only one for a letter grade (additional 199 course credit). Only one four-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by the Undergraduate Office, four units of course 199 may be applied toward elective course requirements for Psychology major and toward Psychology 188 requirement for Cognitive Science major.

198. Directed Individual Research and Studies. (4) Preparation: submission of written proposal outlining course of study. Limited to junior/senior Psychology, Psychobiology, and Cognitive Science majors (juniors must have at least 3.0 grade-point average in major). Consult Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms.

Graduate Courses

200A. Animal Learning and Behavior. (4) Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

200B. Human Learning and Behavior. (4) Lecture, three hours. Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of socially significant problems.

201. Current Issues in Learning and Behavior. (1) Discussion, 90 minutes. Designed for graduate students. Required of learning and behavior students. A minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit, S/U grading.

202. Research in Learning and Behavior. (2) Forum in which graduate students discuss the literature and methodological, analytical, and interpretational issues related to specific topics of research in learning and behavior. S/U grading.

204B. Theories of Learning. (4) Discussion, three hours. Requisite: course 200A. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

204C. Applied Learning. (4) Lecture, three hours. Designed for graduate psychology students. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

204D. Fear and Anxiety. (4) Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research. Elements of behavior and emotion that underlie human fear and anxiety.

204E. Primitive Motivational Processes. (4) Lecture, three hours. Designed for graduate students. Analysis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior.

204F. Animal Cognition and Cellular Basis of Learning. (4) Discussion, three hours. Designed for graduate students. Discussion of experimental literature on spatial and temporal learning of relative rates of reward (the matching law), and classical conditioning, all treated from a computational/representational perspective, with emphasis on implications for cellular bases of learning and memory. S/U or letter grading.

205A. Behavioral Neuroendocrinology. (2) Lecture, three hours. Designed for graduate students. Mechanisms of hormonal influence on the brain that influence behavior, including permanent actions in development and transient actions in adulthood. Using a comparative approach, topics include sexual differentiation, long-term effects of stress, seasonal and other changes in adulthood, and aging.

205B. Human Neurophysiology. (2) Lecture, three hours. Designed for graduate students. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modular organization and coordination, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems.

205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function. (2) Lecture, three hours. Designed for graduate students. Detailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neuromodulators, “neurotransmitters,” neurotropic agents). Discussion of their roles in major brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer’s disease, Parkinsonism, Huntington’s disease, and Down’s syndrome and dementia.

205D. Clinical Psychopharmacology. (2) Lecture, two hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and “atypical” compounds.

205E. Psychobiology of Emotion and Stress. (2) Lecture, three hours. Designed for graduate students. Overview of literature on role of the brain and autonomic and endocrine systems in emotional and stress-related responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases.

205F. Physiology of Learning. (2) Lecture, three hours. Designed for graduate students. Search for anatomical loci of emotions. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible.

205G. Pain. (2) Lecture, three hours. Designed for graduate students. Consideration of pain from both basic science and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity.

205I. Motor Coordination. (2) Lecture, three hours. Designed for graduate students. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: efference copy, oscillator coupling, potentiation, and depotentiation. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording.

205J. Homeostatic Drive, Hunger, and Thirst. (2) Lecture, three hours. Designed for graduate students. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of three main basis of depletion of body fluid compartments. Consideration of hunger, focusing on two theories — “Glucostatic” and “Energostatic.”

205K. Vision Neurobiology. (2) Lecture, three hours. Designed for graduate students. Exploration of anatomical, physiological, and computational visual system, focusing on retina, visual cortex, and overall performance.

205L. Cognitive Neuroscience. (2) Lecture, three hours. Designed for graduate students. Overview of current state of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization.

205M. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include agnosias and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. S/U or letter grading.

M205Z. Behavioral and Systems Neuroscience. (4) (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

207A-207B-207C. Seminars: Physiological Psychology. (4-4-4) Requisite: course 115.

212. Evaluation of Research Literature in Physiological Psychology. (1) Discussion, 90 minutes. Review of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

220A. Social Psychology. (4) Lecture, three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.

220C. Advanced Social Psychology. (4) Lecture, three hours. Requisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.

220D. Introduction to Social Psychology. (4) Lecture, three hours. Designed for graduate students. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

222A. Interpersonal Relations. (4) Discussion, three hours. Requisite: course 220A. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.
222B. Interpersonal Influence and Social Power. (4) Seminar, three hours. Preparation: advanced social psychology course (psychological or sociological). Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political figures, etc.

223. Seminar: Social Survey Research. (4) Seminar, three hours. Requisites: course 220B. Contemporary issues and topics in social survey research methodology.

225. Seminar: Critical Problems in Social Psychology. (4) Discussion, three hours. Requisites: courses 220A, 220B. May be repeated for credit with consent of instructor.

226A-226B-226C. Current Literature in Social Psychology. (2-2-2) Discussion, 90 minutes. Course 226A is limited to first-year social psychology students. Courses 226B-226C are open to nonsocial psychology students with consent of instructor. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.

227. Health Psychology. (4) Lecture, two hours; discussion, one hour. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

M228A. Proseminar: Political Psychology. (4) Same as History M236A and Political Science M228A. Proseminar: Political Psychology. (4) Seminar, three hours. Requisites: course 220B. Commentary: three hours. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

M228B. Seminar: Political Psychology. (4) Same as Political Science M261A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

M228C. Critical Problems in Political Psychology. (4) Same as Political Science M261D.) Discussion, three hours. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

M229. Social Cognition. (4) Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

M231. Psychology of Gender. (4) Seminar, three hours. Preparation: one prior course on gender/women's studies. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

M232. Human Sexuality. (4) Lecture, three hours. Designed for graduate students. Intended to teach students how to carry out research on human sexual behavior. Content include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

M233. Seminar: Environmental Psychology. (4) Requisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man-environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating information rate from environments to arousal and preferences for those environments.

M234. Social Psychological Aspects of Competitive Youth Sport. (4) Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

M235. Personality. (4) Seminar, three hours. Preparation: undergraduate degree or training in psychology. Personality theory and research approaches to study of personality. Emphasis on intensive exploration of selected concepts and related research.

M236. Survey Research Techniques in Psychocultural Studies. (4) Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

M239. Personality, Motivation, and Attribution. (4) Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affective domains.

M240A-240B. Developmental Psychology. (4-4) Lecture, three hours. Preparation: one undergraduate developmental psychology course. Designed for graduate students. Consideration of variables influencing cognitive and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

M241. Current Developments in Developmental Psychology. (1) Discussion, 90 minutes. Designed for graduate developmental psychology students. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interweave presentations by graduate students.

M242A-242B. Seminars: Developmental Psychology. (4 each) Seminar, three hours. Requisites: courses 240A-240B. Each course may be taken independently and may be repeated for credit:

M242A. Perceptual Development.

M242B. Cognitive Development.

M242C. Socialization.

M242D. Social Development and Education. (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

M242F. Development of Language and Communication.

M244. Critical Problems in Developmental Psychology. (4) Lecture, three hours. Requisites: courses 240A-240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

M245. Personality Development and Education. (4) Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

M246. Psychological Aspects of Mental Retardation. (4) Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

M249. Evaluation Research. (4) Requisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and psychological applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

M251A-251B-251C. Research Methods. (4-4-4) Designed for graduate psychology students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 21A only).

M252B. Discrete Multivariate Analysis. (4) Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.

M254A. Psychological Scaling. (4) Lecture, three hours. Designed for graduate students. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.

M257. Multivariate Analysis with Latent Variables. (4) (Same as Political Science M208D.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogies of traditional methods in multivariate analysis. Causal modeling; theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

259. Quantitative Methods in Cognitive Psychology. (4) Requisites: courses 250A, 250B. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

260A-260B-260C. Proseminars: Cognitive Psychology (1-1-1) Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

261. Perception. (4) Lecture, three hours. Concepts, theories, and research in study of perception. Consideration of the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

262. Human Learning and Memory. (4) Lecture, three hours. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory.

265. Thinking. (4) Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, imagery, concepts.

268A-268E. Seminars: Human Information Processing. (4 each) Seminar, three hours. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit. 268A. Perception; 268B. Human Learning and Memory; 268C. Judgment and Decision Processes; 268D. Language and Cognition; 268E. Human Performance.

269. Seminar: Cognitive Psychology. (4) Seminar, three hours. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

271D. Clinical Research Laboratory. (2) Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Designed for graduate clinical psychology students. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.

271E-271F. Clinical Research Laboratories. (2-2) Requisite: course 271D. Designed for graduate clinical psychology students. Required of first-year clinical psychology students. S/U grading. 271E. Brief overview of research design issues in clinical psychology and practical issues in students’ own research activities. 271F. Discussions of students’ particular research activities and issues, plus laboratories in computer analysis of statistical data.

272A-272G. Advanced Clinical Psychological Methods. (4 each) Seminar, three hours. Requisite or corequisite: course 401 or 451. Each course may be taken independently for credit.

272A. Behavioral Modification. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

272C. Clinical Interventions for Psychological Problems of Children. (2-2-2) Corequisites: courses 270A, 270B, 270C. Designed for graduate clinical psychology students. Year-long course sequence covering topics necessary for work in clinical psychology in the training, including legal and ethical issues, child abuse, suicide assessment, issues in empirically validated treatments, psychosocial consultation and psychoactive medications, working with diverse client populations, etc. S/U grading.

272D. Family Therapy and Family Dynamics. (2-2) Special Problems.

272E. Special Problems.

272F. Behavior Modification with Adults. Designed for second-year graduate clinical psychology students. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems.

272G. Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 270A-270B-270C, 271A-271B-271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social learning, psychoanalytic, and systems theories, with relevant research findings.

273A-273B-273C. Professional and Ethical Issues in Clinical Psychology. (2-2-2) Lecture, one hour; discussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence covering topics necessary for work in clinical psychology in the training, including legal and ethical issues, child abuse, suicide assessment, issues in empirically validated treatments, psychosocial consultation and psychoactive medications, working with diverse client populations, etc. S/U grading.

273D. Family Process: Psychological and Social Perspectives on the Family. (4) Various theoretical perspectives applicable to analysis of family structure and dynamics. Critical issues in application of family constructs to clinical problems.

274. Clinical Approaches to Children with Learning and Behavior Problems. (4) Lecture, three hours; discussion, one hour. Designed for Ph.D. students. Theoretical and research issues and problems related to purposes and practices involved in assessment and treatment of problems for children with learning and behavior problems. Practice experiences to illustrate course content and provide opportunities to improve research and clinical competence.

277A-277B. Advanced Clinical Assessment. (4-4) Laboratory, two hours; additional hours to be arranged through Psychology Clinic. Designed for graduate clinical psychology students. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy.

M280. Affective Disorders. (2 or 4) (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

283. Psychopathology. (4) Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4) (Same as Psychiatry M277.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

286. Issues and Concepts of Clinical Psychology. (4) Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends.

287. Critical Problems in Clinical Research Methodology. (4) Requisites: courses 250A, 250B. Special problems of measurement and design in clinical research.

289A-289B-289C. Current Issues in Clinical Psychology. (1-1-1) Discussion, two hours. Designed for first-year graduate clinical psychology students. Presentation of research and applied topics relevant to clinical psychology in Progress and S/U grading.

290. History of Psychology. (4) Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues.

292. Biobehavioral Mechanisms of Stress and Disease. (4) Lecture, three hours. Designed for graduate psychology students. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement.

293. Behavioral and Psychophysiological Problems of Alcoholism. (4) Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches.
M294. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Psychological Science M255.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology, hypothalamo-hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

M296. Neurobiology of Sleep. (3) (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

297. Issues in Social Development of the Minority Child. (4) Seminar, three hours. Designed for graduate students. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.

298. Special Problems in Psychology. (4) Content depends on interests of particular instructor. May be repeated for credit.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curricular and instruction at the University. May be repeated for credit. S/U or letter grading.

401. Fieldwork in Clinical Psychology (1 to 12). Requisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).

402. Clinical Research Practicum. (2) (Formerly numbered 402A-402B-402C.) Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings include research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

403. Special Topics Study Course. (1 to 4) Under faculty supervision, group of students meets each week for a quarter in a self-led study group to pursue a specific topic of their choice that is not covered in other department courses. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. (4-4-4) Preparation: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

410D-410E-410F. Clinical Assessment Supervision. (4-4-4) Discussion, two hours; other, one hour. Designed for third-year graduate clinical psychology students. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment.

420A-420B. Health Psychology Practicum. (2-2) Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observations and/or clinical work in the field.

421. Research in Social Psychology. (2) Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

422. Social Survey Research Practicum. (4) Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview survey.

425. Health Psychology Lecture Series. (2) Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology. (2 to 4) Fieldwork, to be arranged. S/U or letter grading.

495. Presentation of Psychological Materials. (4) Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Psychology. (2 to 12) One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

597. Individual Studies. (2 to 12) Designed primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a requisite for taking examinations. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Preparation: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

Public Health

Schoolwide Programs

UCLA

16-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5524
http://www.ph.ucla.edu

Scope and Objectives

The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; three concurrent degree programs: M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies; and three articulated degree programs: M.D./M.P.H. with the School of Medicine and M.A./M.P.H. with African Area Studies and with Latin American Studies.

For information on the Master of Science and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, or Health Services, or the Master of Science and Ph.D. degrees in Public Health within the Department of Community Health Sciences, see the listings for those departments. For information on the interdepartmental D.Env. degree program housed in the Department of Environmental Health Sciences, see the listing for Environmental Science and Engineering.

The Master of Science in Preventive Medicine and Public Health program is not admitting new students at this time.
Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The School of Public Health offers the Master of Public Health (M.P.H.) degree and participates in concurrent and articulated degree programs with other schools and departments. Master of Science (M.S.) degree programs offered through the school are listed under the departments of Biostatistics, Community Health Sciences, Environmental Health Sciences, Epidemiology, and Health Services.

Master of Public Health
The M.P.H. is a professional degree in the field of public health. Students are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Admission
For admission to the M.P.H. program, both the School of Public Health Application for Admission to Graduate Status and the UCLA Application for Graduate Admission must be completed. Three letters of recommendation, two from former professors and one from an employer (if no employer, three former professors), test scores, and transcripts are required before an application is considered complete. Application forms and the Announcement of the UCLA School of Public Health may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Box 951772, Los Angeles, CA 90095-1772. It is the student’s responsibility to ensure that the application file is complete.

The preferred date for receipt of applications for the following Fall Quarter is December 15. Applications received after this date have reduced opportunities for admission and financial aid.

Applicants must meet the University minimum requirement of an acceptable bachelor’s degree with a B average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered. In addition, applicants must be accepted by and accommodated in the department of the School of Public Health in which they wish to study. Applicants who need help in deciding on a department should speak either to the department administrators or to the staff in the Student Affairs Office.

Applicants to the School of Public Health must perform satisfactorily on the verbal and quantitative sections of a recent Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program.

The Epidemiology Department requires GRE scores. The Biostatistics Department has different criteria for evaluating performance on aptitude tests for its master's and doctoral degrees. Those applying to the biostatistics program should contact that department. No screening examination is required for admission; however, specified courses are required by the Departments of Biostatistics and Environmental Health Sciences. Applicants whose undergraduate coursework has been deficient in breadth of fundamental training have to take specified undergraduate courses after admission.

The prior program of study for applicants to the Master of Public Health degree should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and other courses that constitute an adequate preparation for the proposed area of specialization.

Applicants whose prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for the proposed area of specialization must include courses in those sciences in their graduate programs; these may not be applied toward the minimum requirements for the degree.

Interdivisional International Health. The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations and cross-cultural settings.

Interested students must specify the department most relevant to their skills area on their application, clearly indicating their international interests. Once admitted, students are given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the Community Health Sciences Department.

Biostatistics
Students concentrating in biostatistics should have completed at least one year of calculus. Students whose mathematical preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.

Environmental Health Sciences
Students concentrating in environmental health sciences should have a bachelor’s (or master’s) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

Health Services
Applicants interested in the joint M.P.H./M.B.A. program in the Health Services Department must take the GMAT, not the GRE.

Applicants to the one-year health services organization program must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program. Satisfactory performance on the GRE is required, and a personal interview is recommended.

M.P.H. Program for Health Professionals
Health and allied professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by the faculty of the School of Public Health, and all five departments in the school have the option to offer a specialization in their area.

Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years of professional experience or its full-time equivalent in a health care setting.

The first year of study is devoted to the specific core requirements in the area of specialization and to the required M.P.H. core courses in biostatistics, community health sciences, epidemiology, health services, and environmental health sciences. The second year of study entails completing required and elective courses in the specialty area, a master’s project, and a report on that project. The master’s project, which includes an internship carried out under faculty supervision, addresses a significant public health problem. The master’s report, based on that project, focuses on the integra-
tion and application of theoretical and methodological approaches within public health to a specific problem. For further information, contact the department of interest.

Areas of Study

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Biostatistics

Required department courses include Biostatistics 110A and 110B (100A and 100B may be substituted with departmental permission); Biostatistics 200A, 201, 402A, 402B (402B satisfies the field training requirement), 403A, and 406; and eight units of elective courses from Biostatistics 200B, 200C, M210 through M237B, or 403B through 419 (except 406). Additional elective courses are recommended and should be selected in public health, biostatistics, or mathematics.

Community Health Sciences

Students select one of the following areas of concentration: health education/promotion, international family health, public health nutrition, public health policy, or sociocultural aspects of health. All students are required to complete Community Health Sciences 210, 211A-211B, and 400. It is expected that Community Health Sciences 210 and 211A-211B be completed during the student's first three quarters in residence. Normally two years or six quarters are needed to complete the 60 units of coursework required. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year (48 units), but only after formal consideration and approval by the department's faculty.

Health Education/Promotion. Community Health Sciences 282, 482, 483, and 487 are required. In addition, two to three elective courses from the list of specialty areas are selected in consultation with the adviser. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with the faculty adviser, from within the school or in other departments/schools at UCLA.

International Family Health. For health professionals (physicians, nurses, and nutritionists) who intend to work or have worked in developing areas and nonhealth professionals with work experience in international health, community development, or related work. Community Health Sciences 200, 434A, and 441 are required. In consultation with the adviser, additional elective courses are selected from Community Health Sciences 132, M140, 231, 233, M236, 246, 280, 294, 443, 447, 448, and relevant courses from within the school or other departments/schools at UCLA.

Public Health Nutrition. The public health nutrition specialization is for dietitians and nutritionists who have an R.D., are R.D.-eligible, or have an equivalent licensure/credential from another country; persons concurrently enrolled in an internship leading to R.D. eligibility; physicians and dentists; and other health professionals on a case-by-case basis depending on completed graduate and undergraduate coursework. Community Health Sciences 231 and 443 are required. In consultation with the adviser, elective courses are selected from Community Health Sciences 212, 218, 233, 432, M436A, M436B, 444, 448, 449, and relevant courses from within the school and currently under development in the Community Health Sciences Department.

Public Health Policy. The public health policy specialization provides education in the policy process and policy analysis applied to health promotion and disease prevention. In addition to department requirements, Community Health Sciences 252, 258, and 482 are required; the internship requirement may be reduced for students with extensive prior experience. In consultation with the adviser, students must also select two courses from Community Health Sciences 214, 230, M236, 237, M274, 291, 432, M436A, M436B, and relevant courses from within the school or in other departments/schools at UCLA.

Sociocultural Aspects of Health is for students interested in the relation between social and cultural characteristics and health-related behaviors and outcomes. At least 20 units of sociocultural aspects of health courses are required. Students are required to complete Community Health Sciences 221 and one course from each of the following four areas: (1) age and the course of one's life: 237, 238, 285, 291; (2) ethnicity and culture: M140, M239, 447, 483; (3) gender: 220, 246, 431, 435; (4) social context: 230, 235, 272, 273, M275, 284. In consultation with the adviser, students may select additional electives from Community Health Sciences 283, 293, 294, 433, 474, and relevant graduate and professional courses from within the school or in other departments/schools at UCLA.

Environmental Health Sciences

Required courses include Biostatistics 100B, Environmental Health Sciences 200A, 200B 201, 210, 401 (or 410A and 410B), M411. Each departmental required course may be waived if a similar college-level course has been taken elsewhere, students can pass the waiver examination. Elective courses should be selected in the chosen area of specialization.

At least five of the courses must be graduate courses (200, 400, and 500 series). Thus, approximately 20 units are to be completed by specialty courses and electives for a two-year program, assuming a minimum of 12 units per quarter. It should be noted that the department core, supplemented by Environmental Health Sciences 470, satisfies the requirement for taking the registered sanitarian's examination.

Epidemiology

Students with no prior clinical doctorate degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 220, 400, and 12 elective units, at least four of which must be selected from one of the following courses featuring computer use and applications, or a relevant course decided on after consultation with the adviser: Biostatistics 403A, 403B, Epidemiology 261, 401, 402, 410A, 410B, 414, 415, 418, and 419. The eight remaining units must be selected from either the computer use and applications courses or the following list of general electives: Epidemiology 202A, 203, 210, M212, 221, 222 223A, 223B, 224A, 224B, 227, M228, 230, 240, 241, 246, 247, 248, 251, 252, 253, M255, 260, 270, 280, 290, 411, and 417.

Students with a prior clinical doctoral degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 400, and eight total elective units from either the general list of electives or those featuring computer use and applications.

All students must submit a report demonstrating competence in epidemiologic methodology. The report may not be submitted prior to the completion of Epidemiology 400, which must be taken after completion of course 201B.

Health Services

Health Services specialization programs include (1) health care management, (2) health policy, (3) health professionals, (4) health services organization, and (5) a cooperative M.P.H./M.B.A. All specialization programs require Health Services 200A-200B, 400, and a summer internship in a local health care organization, as well as School of Public Health core courses: Biostatistics 100A, Community Health Sciences 100, Environmental Health Sciences 100, and Epidemiology 100.

Students with a prior M.B.A. and three years of managerial experience in health care are required to take 15 courses rather than 18.

Health Care Management. The health care management specialization is a two-year program requiring 21 full courses and a major written research report based on the summer internship. Required courses include Health Services 234, M236, M249L, 251, 400, M422, 431, 433, 436, 442A, 442B, and Management 403. In addition, students select at least one elective course from Health Services 131, 132, 134, M204A, M204B, M204C, 214, 220, 231, 232, M233, 253, 238, 239, 240, CM241, M242, 249A through 249L, 250, M287, M411, 427, 434, 435, 438, 441, 444, 446, or 447E.

Health Policy. The Health Policy specialization is a two-year program requiring 21 full courses, a summer internship in a local health care organization, and a major written research report. Required courses include Health Services 214 or 249F or 249K, M233, M236, M249E, M249L, M287, 400, M422, 427, and 431. In addition, students select at least two elective courses from Health Services 131, 132, 134, M204A, M204B, M204C, 220, 231, 232, 234, 235, 238, 239, 240, CM241, M242, 249A through 249L, 250, M287, M411, 427, 434, 435, 438, 441, 444, 446, or 447E.
The Health Professionals specialization is an executive-style program for people with at least three years of managerial experience in the health care field. It is a two-year program requiring 18 full courses and a major written research report based on the summer internship. Required courses include Health Services 132, 234, M236, M422, 431, 433, 436, 440A, 442A, 450, and Biostatistics 100B.

Health Services Organization. The health services organization specialization is a one-year program requiring a minimum of 12 full courses (48 units). Admission is limited to students with prior doctoral-level degrees (M.D., Ph.D., J.D., D.D.S., or equivalent). Required courses include Health Services M236 and either Management 403 or Health Services M249E. Students may petition to waive out of the summer internship and Health Services 400 requirements if they have prior experience of relevance to public health practice.

Cooperative M.P.H./M.B.A. The cooperative M.P.H./M.B.A. program is a three-year concurrent degree program. It requires a minimum of 12 full courses (48 units) in the School of Public Health and a summer internship in a local health care organization. Required courses include Health Services 400 and M422. Management 402 may substitute for Biostatistics 100A. Students are waived out of the Health Services 400 requirement if they have successfully completed an equivalent course in the M.B.A. program.

Cooperative Master’s Degrees

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A. African Area Studies/M.P.H.

The School of Public Health and the African Area Studies Program have an articulated degree program whereby students can work for the Master of Arts degree in African Area Studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Student Affairs Office, UCLA School of Public Health.

M.A. Asian American Studies/M.P.H.

The Asian American Studies Program and the Department of Community Health Sciences in the School of Public Health offer a concurrent degree program whereby students can work for the Master of Arts degree in Asian American Studies and the Master of Public Health. Students must complete the program requirements for both degrees. However, a maximum of 12 units of coursework in the School of Public Health, may be applied toward both the M.A. in Asian American Studies and the Master of Public Health. When applying, the same statement of purpose may be submitted to each program. Applicants interested in this concurrent program should contact the Asian American Studies Program and the Student Affairs Office, UCLA School of Public Health.

M.A. Islamic Studies/M.P.H.

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts degree in Islamic Studies and the Master of Public Health. A maximum of 12 units of coursework in the School of Public Health may be applied toward both the M.A. in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

M.A. Latin American Studies/M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

M.B.A./M.P.H.

The Department of Health Services and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses (44 units), at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree.

Required school core courses include Biostatistics 100A or 110A; Community Health Sciences 100 (210 for community health sciences majors); Environmental Health Sciences 100 (200A-200B for environmental health sciences majors); Epidemiology 100 (200, 201A-201B for epidemiology majors); and Health Sciences 100 (200A-200B for health services majors). Each core course may be waived if students have taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the core courses, at least three courses (two or four units) outside the area of specialization are strongly recommended.

Only courses in which a grade of C– or better is received may be applied toward the requirements for a master’s degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

Students must pass a comprehensive examination in their department. Students may be reexamined once. The aim of the examination, as a culminating experience, is to assess the student’s ability to select theories, methods, and techniques from across the content matter of a field, integrate and synthesize knowledge, and apply it to the solution of public health problems.

Thesis Plan

None.

Doctoral Degree

Admission

In addition to the University minimum requirements, for admission to the Doctor of Public Health (Dr.P.H.) degree program, the school requires:

(1) Satisfactory performance on the Graduate Record Examination (GRE). Applicants to the Department of Community Health Sciences, at the discretion of the department, may substitute equivalent performance on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT).

(2) Completion of the M.P.H. or a master’s degree in an appropriately related field. If the master’s degree is in a field other than public health, applicants must have taken the equivalent of the core mandatory M.P.H. courses or include them in the course of study after admission.

(3) At least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses.

(4) A positive recommendation by a department in the School of Public Health. Applicants to the Department of Community Health Sci-
ences must have acceptance by an initial doctoral adviser in the department.

(5) Approval by the doctoral admissions committee and the associate dean for Student Affairs. Screening examinations may be required by each department.

(6) A writing sample is required by the Department of Community Health Sciences.

(7) The Department of Community Health Sciences requires at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

It is recommended that applicants to the Department of Community Health Sciences contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

**Major fields or Subdisciplines**

Major fields and subdisciplines and typical course plans are listed below.

**Biostatistics**

Consult the graduate adviser.

**Community Health Sciences**

There are five areas of specialization or examination within the department: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health.

**Environmental Health Sciences**

Recommended courses are determined in consultation with the adviser. Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Environmental Health Sciences are required for breadth. The major requires an additional area of concentration which may be either inside or outside the school.

**Epidemiology**

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management, and/or policy; and laboratory and clinical studies in medical, health, or biological sciences.

Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Epidemiology are required for breadth. (Students may petition to include up to two 100-level courses.) The major requires an additional area of concentration which may be either inside or outside the school (e.g., biostatistics, biology, microbiology and immunology, neuroscience).

**Health Services**

The Dr.P.H. in Health Services is intended to prepare students for leadership positions in health services administration. In contrast to the Ph.D., the orientation is professional rather than academic and comprehensive rather than specialized.

The requisites are an M.P.H. degree or its equivalent, and full-time work experience in some aspect of public health is highly recommended. Candidates are then enrolled in the Dr.P.H. which may (with full-time study) be completed in three years.

In the first two doctoral years, the formal coursework is intended to acquaint students with the full scope of public health knowledge. Students are normally expected to complete 72 units or 18 full courses beyond the M.P.H. degree to develop mastery in the following areas: (1) basic tools of social analysis; (2) health and disease in populations; (3) promotion of health and prevention of disease; and (4) health systems and their management. The specific course program depends on the applicant's previous coursework and experience.

Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Health Services.

The third doctoral year includes a residency in a public or private health services organization, seminar courses (eight units) devoted to principles and strategies of health services leadership, and the preparation of a problem-solving dissertation related to the residency experience.

After completion of the second doctoral year, candidates must pass a qualifying examination. Normally, one reexamination after failure is allowed. After the third doctoral year, a final oral examination based on the dissertation is required of all candidates.

**Course Requirements**

Course requirements in the major field depend on the department/program and the field chosen. Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments outside the major department.

The major department requires an additional area of concentration which may be either inside or outside the school. In departments allowing it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

**Biostatistics**

A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of the first year in the program, if not taken prior to entering. Courses covered by this and other examinations are determined in consultation with an adviser and the department faculty. Students must complete the following courses, unless previously taken: Biostatistics 115, 200A, 200B-200C, M250A-M250B: any three additional graduate-level courses in biostatistics selected with consent of the adviser; three courses in the 400 series selected with consent of the adviser; Statistics M100A, 100B. All registered doctoral students must enroll in Biostatistics 402B (consulting laboratory/field training course) for one quarter each year and in Biostatistics 245 every quarter.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Biostatistics are required for breadth. The department also requires an additional area of concentration which may be either inside or outside the school. Biostatistics 402B may be used as the additional area of concentration.

Electives, selected in consultation with the adviser, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

**Community Health Sciences**

If students do not have a master's degree in public health, the school's core courses for the Master of Public Health (M.P.H) degree are required: Biostatistics 100A, Epidemiology 100, Health Services 100, and Environmental Health Sciences 100; and the department's core courses, Community Health Sciences 210, 211A-211B. Additionally, all students are required to take the following courses if they have not already taken them or their equivalents during the course of their master's studies: Community Health Sciences 212, Biostatistics 100A, 100B, and 406. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to the coursework specified above, students must take a minimum of 48 units in residence in the doctoral program. Twenty of the 48 units required must be taken within the Department of Community Health Sciences. Only four units of individual studies (Community Health Sciences 596) may be counted toward the 48-unit minimum requirement. Students must take a minimum of two courses (eight units) in research methodology (i.e., data analysis) and two courses (eight units) in statistics (i.e., data analysis). These courses may be taken inside or outside of the School of Public Health. Students are required to attend the Doctoral Roundtable (Community Health Sciences 286) continuously from the first year of residency until they have been advanced to candidacy. The Doctoral Roundtable does not fulfill any of the 48 units required for the doctorate.

Students must complete a minor which is expected to be in another department within the School of Public Health. Six graduate-level courses (24 units) are required, four units of which must be taken from within one depart-
ment. Students must consult with their advisers before declaring a minor.

**Written and Oral Qualifying Examinations**

Before advancement to candidacy, students must pass written examinations in the major field prepared and administered by the guidance committee or by the faculty of the department. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after students have made a tentative decision on a dissertation topic.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in the School of Public Health; one must be an outside member who holds no appointment in the School of Public Health; one of the four must be from the minor field.

The doctoral committee administers the University Oral Qualifying Examination after the written examinations have been successfully completed.

**Community Health Sciences**

Before advancement to candidacy, all coursework must have been completed, and students must have passed two written examinations and an oral qualifying examination in the major field. The first written examination is taken by all students. The other is tailored to the specific interests of the individual student. Both written examinations may be repeated only once. Additionally, students must complete the requirements for the minor field.

The first examination provides an assessment of the student's breadth of substantive knowledge, theory, and methods that are common to the disciplines that comprise community health sciences. Students are expected to demonstrate a coherent and well-synthesized command of this material. The examination is administered by the doctoral departmental committee in the Fall Quarter of each year. The second examination is in one of the areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Students are expected to demonstrate in-depth knowledge in the area and to be able to apply this knowledge and knowledge derived from the minor to problems or practice and policy. The examination is based on a reading list generated by the student in consultation with the student's guidance committee, which also administers the examination. It is administered after the first examination at a time that has been agreed upon mutually by the students and the guidance committee.

After the student has passed the written qualifying examinations and completed the minor requirements, and at least one month prior to taking the University Oral Qualifying Examination, a doctoral committee is nominated. The student first selects the committee chair, who also serves as the adviser. The student and chair then work together to nominate the remaining committee members. The doctoral committee consists of at least four faculty members including the chair, who hold professorial appointments at UCLA. Two of the faculty must be tenured. Two of the four must hold appointments in the Department of Community Health Sciences; one must be an outside member who holds no appointment in the School of Public Health; one of the four must be from the minor field. Eligible faculty include those in the tenure-eligible series, the in-residence series, acting or emeritus in these series; in addition, one of the four committee members, who may also cochair if appropriate, may hold an appointment in the adjunct or clinical professorial series. The composition of the committee must be approved by the department chair. The doctoral committee guides the student's progress toward completion of the dissertation.

The student is advanced to candidacy and commences work on a dissertation by passing the University Oral Qualifying Examination, which is administered by the doctoral committee. Only the student and the committee members attend this examination; all committee members must be present. The examination may be repeated once if a majority of the committee so recommends.

---

**PUBLIC POLICY AND SOCIAL RESEARCH SCHOOLWIDE PROGRAMS**

*School of Public Policy and Social Research*

UCLA
3250 Public Policy Building
Box 951656
Los Angeles, CA 90095-1656
(310) 206-4613
http://www.sppsr.ucla.edu/

**Scope and Objectives**

The School of Public Policy and Social Research offers an undergraduate minor in Public Policy.

**Undergraduate Study**

**Public Policy Minor**

The Public Policy minor provides undergraduates with a systematic overview of public policy questions, deals with these questions in theoretical and conceptual ways, and exposes students to practical issues of public policy through the examination of specific policy issues and real-world policy questions.

To enter the minor, students must have an overall grade-point average of 2.0 or better, enroll in Policy Studies 10A, and file a petition at the School of Public Policy and Social Research Office of Academic Services, 3371 Public Policy Building. For further information, contact Professor Eric H. Monkkonen at (310) 206-4613.

**Required Lower Division Core Courses (eight units):** Policy Studies 10A, 10B. Highly recommended: one statistics course.

**Required Upper Division Courses (20 units):**
(1) Three courses from one of the following clusters: labor and work cluster — Policy Studies 141, C142, C144, 145, 148; policy studies cluster — Policy Studies 101, 102, 103, 104, M120; social welfare cluster — Social Welfare 100A, 100B, 101, 102, 104A through 104E, 105; urban policy and planning cluster — Urban Planning 191, 192, 193 (may be repeated for credit with topic change), 197; (2) one elective course offered by the School of Public Policy and Social Research not used to satisfy the core or cluster requirement; (3) research seminar (Policy Studies 197); fieldwork experience taken for credit may be substituted for the research seminar by petition.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**RADIATION ONCOLOGY**

*School of Medicine*

UCLA
B265 UCLA Medical Plaza 200
Box 956951
Los Angeles, CA 90095-6851
(310) 794-1252
http://www.radonc.ucla.edu/rowww/rohome.html

**Chairs**

H. Rodney Withers, M.D., D.Sc., Chair
Guy J.F. Juillard, M.D., Vice Chair, Clinical Affairs
William McBride, D.Sc., Vice Chair, Division of Experimental Radiation Oncology
James B. Smathers, Ph.D., Vice Chair, Physics

**Scope and Objectives**

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, West Los Angeles VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and West Los Angeles VA Medical Center.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy, rather than or in addition to surgery, is to pre-
serve function and/or cosmesis while eliminating the cancer. Other activities include total body irradiation before bone marrow transplantation and stereotactic radiosurgery for A-V malformations, meningiomas, and malignant intracranial lesions. Research interests include clinical trials, radiation biology, radiation modifiers, molecular biology, immunology, and applied physics. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of various radiations is essential.

The educational programs serve medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Chairs
Richard J. Steckel, M.D. (Leo G. Rigler Professor of Radiological Sciences), Chair
Richard H. Gold, M.D., Executive Vice Chair
Barbara M. Kadel-Wootton, M.D., Vice Chair
Osman Ratib, M.D., Ph.D., Vice Chair

Scope and Objectives

The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging pertaining to thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, nuclear medicine, computed tomography, magnetic resonance imaging, ultrasound, and interventional radiology are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through self-study of radiologic film files. A two-week core clerkship is offered once every four weeks to third- and fourth-year medical students. There are no on-call responsibilities.

Greater depth of experience is provided by the four weeks of elective clerkship offered to fourth-year medical students which emphasizes training in the subspecialties selected by students from the list above.

For further details on the Department of Radiological Sciences and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

Scope and Objectives

The UCLA major in the Study of Religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

Undergraduate Study

Study of Religion B.A.

Preparation for the Major

Required: History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

The Major

Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.
Honors Program
The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three 199 courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Bartchy at the program address.

Study of Religion

Upper Division Courses

100. Undergraduate Seminar: Study of Religion. (4) Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

110. Religion and Violence. (4) Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimate violence. Materials include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S.

120. Abrahamic Religions: Traditions in Tension. (4) Seminar, three hours. Examination of Abrahamic tradition as received and developed by Jews, Christians, and Muslims according to rubrics of linkage and interaction, with view both to potential clashes in the 21st century and to resources inherent in these traditions for heading off such clashes and misunderstandings.

Course List
Courses marked with an asterisk have readings in foreign languages. See departmental course listings for requisites.

Group I: Methods

Anthropology
156. Comparative Religion

History
193A. History of Religions: Myth
193E. Special Topics in History of Religions

Philosophy
175. Topics in Philosophy of Religion

Study of Religion
100. Undergraduate Seminar: Study of Religion
110. Religion and Violence

Theater
101A. History of World Theater and Drama: Ritual and Religious Drama

Group II: Nonliterate and Ancient Religious Traditions

Ancient Near East (Near Eastern Languages)
130. Ancient Egyptian Religion

Anthropology
114P. Ancient Civilizations of Western Middle America (Nahua/ Maya/spires)
114Q. Ancient Civilizations of Eastern Middle America (Maya/Spire)
171. Sub-Saharan Africa
174P. Ethnography of South American Indians
177. Cultures of the Pacific

Classics
166A. Greek Religion
166B. Roman Religion
168. Comparative Mythology

Folklore and Mythology
M122. Celtic Mythology
M126. Baltic and Slavic Folklore and Mythology
130. North American Indian Folklore and Mythology Studies
131. Folklore of India
155. Oral Traditions in Africa

History
193D. Religions of the Ancient Near East

Iranian (Near Eastern Languages)
170. Religion in Ancient Iran

World Arts and Cultures
181B. Dance in Southeast Asia
181D. Dance in South Asia
C187. Dance in Native American Cultures

Group III: Western and Near Eastern Religious Traditions

Christianity

Classics
M170. Power and Imagination in Byzantium

Greek (Classics)

*130. Readings in the New Testament

History
119M. The Christian Church, 100 to 1517
120M. The Christian Religion, 100 to 1350
125B. History of Modern Europe: Baroque Culture and Absolutist Politics, 1600 to 1715
150C. History of Religion in the U.S.
194A. History of Early Christians
194B. Religious Environment of Early Christians
194C. Jesus of Nazareth in Historical Research

Philosophy
100B. Medieval and Early Modern Philosophy
107. Topics in Medieval Philosophy

Slavic (Slavic Languages)
201. Introduction to Old Church Slavic

Islam

Arabic (Near Eastern Languages)

*120. Islamic Texts

Art History
C104C. Problems in Islamic Art

History
107A-107B. Islamic Civilization
109A. History of North Africa from the Moslem Conquest: To 1578
110A. Islamic History: Islamic Iran to 1800

Islamics (Near Eastern Languages)
110. Introduction to Islam

Judaism

Ancient Near East (Near Eastern Languages)
162. Archaeology and Religion of the Holy Land
170. Introduction to Biblical Studies

Comparative Literature
M101. Hebrew Literature in English — Literary Traditions in Ancient Israel: Bible and Apocrypha

Hebrew (Near Eastern Languages)

*120. Biblical Texts
125. Hebrew Bible with Medieval Commentaries
*130. Rabbinic Texts

History
111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923
M191A-M191B. Survey of Jewish History
191G. European Jewry from 1881 to the Present
M192A-M192B. Jewish Intellectual History

Jewish Studies (Near Eastern Languages)
130. Modern Jewish Religious Movements and Their Ideologies
M150A-M150B. Hebrew Literature in English

Sociology
159. Comparative Studies of Jewish Communities in the U.S. and Abroad

Group IV: South Asian and East Asian Traditions

Art History
114A. Early Art of India
114C. Japanese Art
114D. Later Art of India
114E. Arts of Korea
114F. Arts of Southeast Asia

Chinese (East Asian Languages)
160. Chinese Buddhism

*165. Introduction to Chinese Buddhist Texts
175. Introduction to Chinese Thought
265A-265B. Seminars: Chinese Buddhist Texts

East Asian Languages and Cultures
161. Buddhist Literature in Translation
162. Buddhist Meditation Traditions

History
186. Shinto, Buddhism, and Japanese Folk Religion
186A. Early History of India
193B, 193C. Religions of South and Southeast Asia

Indic (East Asian Languages)
175. Introduction to Indic Philosophy

Japanese (East Asian Languages)
C160. Japanese Buddhism

161. Religious Life in Modern Japan
175. Introduction to Japanese Thought
265A. Seminar: Japanese Buddhist Texts

Korean (East Asian Languages)
160. Korean Buddhism

*165. Introduction to Korean Buddhist Texts
175. Introduction to Traditional Korean Thought

A. John Skirius, Ph.D. (Spanish)
Malina Stefanovska, Ph.D. (French)
Timothy A. Stowell, Ph.D. (Linguistics)

Scope and Objectives
The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
The Romance Linguistics and Literature Program offers the Master of Arts (M.A.) degree in Romance Linguistics and Literature.

Admission
The UCLA B.A. degree in French, Italian, Portuguese, or Spanish, or equivalent, is required. Applicants to the M.A. program are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to the proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required. Applicants admitted from elsewhere with preparation considered deficient in view of the intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first quarter in the program, new students must consult the program chair concerning the formation of their guidance committee. If students know only the language of their majors, they should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

Areas of Study
Consult the department.

Course Requirements
Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in the major language, with specialization either in linguistics or in literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either linguistics or in literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of the student’s major field of study. Linguistics 20 is required as a requisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree. Up to eight units of Romance Linguistics and Literature 596 may be applied toward the M.A. degree. Courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan
The comprehensive examination is administered by three members of the guidance committee, appointed by the program chair. The written examination, consisting of one four-hour examination in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each quarter in the second week prior to final examinations. If the examination or any part thereof is failed, the failed portions may be retaken once when the examination is next regularly offered. Only those students who attain a high pass grade on the master’s examination are automatically admitted to the Ph.D. program.

Thesis Plan
The program favors the comprehensive examination plan, but under special circumstances M.A. theses for exceptionally well-qualified students are approved. Students may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is the student’s responsibility to choose an appropriate topic and find a professor to direct the thesis. After completion of the thesis, students must pass a two-hour oral examination testing knowledge of the field of the thesis and general competence. Only those students who attain a high pass on the examination are automatically eligible for admission to the Ph.D. program.

Doctoral Degree
Admission
The UCLA Master of Arts degree in Romance Linguistics and Literature or the UCLA Master or Arts degree in French, Italian, Portuguese, or Spanish, or equivalent is required for admission to the program leading to the Ph.D. degree in Romance Linguistics and Literature. A strong academic record (normally a grade-point average of 3.4 or better), three letters of recommendation, and the Graduate Record Examination (GRE) General Test (normally a combined verbal/quantitative score of 1,100 or better) are required.

Formal application is required of all candidates. Applicants who have completed the UCLA M.A. degree in Romance Linguistics and Literature with distinction (high pass) are automatically eligible for admission to the Ph.D. program; those who received a middle pass are reviewed like candidates from other institutions; those who received a low pass are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to pass (with grades of B or better) three graduate courses approved by the chair.

Following formal admission, students form a guidance committee in consultation with the chair. Students then meet as soon as possible with their guidance committee to work out a program of courses and set a tentative date for the qualifying examinations. The guidance
committee has final authority to prescribe the course of study. Until students have met with this committee and placed themselves under its direction, they are not officially in the Ph.D. program.

**Major Fields or Subdisciplines**
The program recognizes two fields of specialization: linguistics or literature.

**Linguistics.** (1) The present-day grammar of the Romance language of major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, and (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

**Literature.** One of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century.

The first minor may be one of the preceding fields not chosen for the major. The second minor may be the same field or a new field in another Romance language, or some other related field in the major language or in Romance linguistics.

**Course Requirements**
In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses; first minor — three courses; second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master’s degree (or equivalent), at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

**Written and Oral Qualifying Examinations**
The qualifying examinations, given by the doctoral committee during the Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field; (2) a two-hour examination in the first minor; (3) a one-hour examination in the second minor; and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time the prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

**Romance Linguistics and Literature**

**Graduate Courses**

**202A-202B. Topics in Historical Romance.** (4-4) Seminar, three hours; outside study, nine hours. Requirements: Linguistics 120A/120B or Spanish 120A/120B. Course 202A is requisite to 202B. Study of main historical changes in phonology, morphology, and syntax undergone by different Romance languages (mainly Spanish, Italian, and French). S/U or letter grading.

**204A-204B. Romance Syntax: French (1 to 4 each).** Lecture, three hours. Requisites: Linguistics 120B, 200B. Course 204A is requisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system; WH-movement and Complementizer system; clitic constructions, causatives, inversion phenomena; quantifier distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

**211. Comparative Romance Syntax.** (4) Lecture, three hours. Requisite: French 210A or Portuguese 204A or Spanish 204A. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

**255. Topics in Romance Syntax.** (1 to 4) Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

**596. Directed Individual Study or Research.** (4 to 8) Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

**597. Preparation for Graduate Examinations.** (4 to 12) Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**Research Methods Courses**

**201. Phonological Theory I.** Seminar, three hours; outside study, nine hours. Requirements: Linguistics 120A. Study of phonological theory, with emphasis on phonological theory in Romance and other languages. S/U or letter grading.

**202. Phonological Theory II.** Seminar, three hours; outside study, nine hours. Requirements: Linguistics 120A. Study of phonological theory, with emphasis on phonological theory in Romance and other languages. S/U or letter grading.

**206. Syntactic Theory I.** Seminar, three hours; outside study, nine hours. Requirements: Linguistics 120A. Study of syntactic theory, with emphasis on syntactic theory in Romance and other languages. S/U or letter grading.

**208. Syntactic Theory II.** Seminar, three hours; outside study, nine hours. Requirements: Linguistics 120A. Study of syntactic theory, with emphasis on syntactic theory in Romance and other languages. S/U or letter grading.

**209. Dialectology**

**222A. History of the Italian Language**

**222C. Italian Dialectology**

**225G. Linguistic Structures**

This voluntary training allows students to qualify for an officer’s commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of the major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which teach management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of $150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 or by writing to Armed Forces Opportunities, R.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

Chair

David L. Terrell, M.S., Lieutenant Colonel

Professor

David L. Terrell, M.S., Lieutenant Colonel

Adjunct Assistant Professor

David R. Shepler, M.A., Captain
Scope and Objectives
Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Undergraduate Study

Four-Year Program
The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program
The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A-140B-140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a five-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the five-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the five-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid $150 per month during the academic year. Additionally, they can qualify for up to $3,450 for tuition and textbooks. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Aerospace Studies

Lower Division Courses

Freshman-Year Courses
Z. Leadership Laboratory. (No credit) Laboratory, three hours. Mandatory for and limited to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of an organized cadet corps. As integral part of aerospace curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. P/NP grading.

1A-1B-1C. Foundation of U.S. Air Force. (2-2-2) Lecture, one hour. Survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officers' Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

Sophomore-Year Courses
20A-20B-20C. Evolution of U.S. Air Force Air and Space Power. (2-2-2) Lecture, one hour. Historical survey of air and space power designed to motivate students to transition from Air Force ROTC cadet to officer candidate. Featured topics include Air Force heritage and leaders; introduction to air and space power through examination of competencies, functions, and doctrines; and continued application of communication skills. P/NP or letter grading.

Upper Division Courses
130A-130B-130C. Air Force Leadership Studies. (4-4-4) Lecture, three hours. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Use of case studies to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

140A-140B-140C. National Security Affairs/Preparation for Active Duty. (4-4-4) Lecture, three hours. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis on refining communication skills. P/NP or letter grading.

199. Special Studies in Aerospace Studies. (2 or 4) Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading.

Jonathan Fox, B.S., Captain
David Pojtinger, M.B.A., Captain

Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other basic skills required of motivated, effective leaders.

Undergraduate Study

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 14 units of coursework and a six-week summer camp.

Army ROTC students may satisfy military history requirements by completing History 125E, 125F, 127A, 127B, 130, 147A, 148A, 148B, 148C, 152A, or 152B in lieu of Military Science 110, with consent of the ROTC adviser.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of $150 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.
Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC Scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

Four-Year Program
Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

Two-Year Program
The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Basic Camp, membership in the Army Reserve or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service.

Commissioning
Successful completion of the Advanced Course program and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

Military Science

Lower Division Courses

Z. Leadership Laboratory. (No credit) Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in class and develop their confidence as future military officers.

10. Introduction to Leadership. (2) Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes.

11. U.S. Defense Establishment I. (2) Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading.

14. Principles of Land Navigation Applicable in Maneuver. (2) Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

18. Modern Guerrilla Warfare. (2) Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

21. Psychology of Leadership I. (2) Lecture, one hour; discussion, one hour. Study of relationship of individual differences, group dynamics, organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms.

24. Theory of Warfare. (2) Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

Upper Division Courses

112. Psychology of Leadership II. (3) Lecture, one hour; discussion, one hour. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leadership behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader.

113. Theory of Learning Applied to Teaching. (2) Lecture, one hour; discussion, one hour. Study of instructional processes, lesson content planning procedures, techniques of applicability education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading.

123. Military Legal Systems. (2) Lecture, one hour; discussion, one hour. Introduction to military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution.

125. Decision Making. (2) Lecture, one hour; discussion, one hour. Designed to present students who become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes.

126. Military Professionalism and Ethics. (2) Lecture, 30 minutes; discussion, 90 minutes. Ethical concepts held by America’s military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model.

199. Supervised Independent Studies. (1 to 3 units). Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.
month. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

**College Program (Nonscholarship)**

Three- and four-year College Program students are selected by the department chair at the beginning of each academic year from applicants of the freshman and sophomore classes. These students must compete for advanced standing prior to their junior year. A two-year program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, subsistence pay of $150 per month in their junior and senior years. Non-scholarship students serve on active duty for a minimum of three years following graduation and commissioning. College Program students may be recommended for scholarship benefits based on superior academic performance and participation in NROTC.

**Marine Corps Option**

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

**Commissioning**

Students must meet UCLA degree requirements in their selected fields and complete the naval science courses as follows: Naval Science 1A, 20A (freshman year), 102B (sophomore year), 103 (junior year), 102C (senior year). Courses 1B, 20A, 101A, and 101B can be taken in either the sophomore or junior year. Courses 103 and 104 are to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A and 101B.

In addition, scholarship students must include in their programs one year of approved calculus, one year of approved calculus-based physics, one year of approved freshman English, one term of American military history, and one term of computer science. Non-scholarship students must include in their programs one year of college algebra or higher mathematics, physical science, and English, and one term of computer science. Of these requirements, Marine Corps option students are only obligated to fulfill the American military history/national security policy requirement.

**Naval Science Minor**

The Naval Science minor is designed for students completing a major in a departmental program who wish to augment that major. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

**Required Lower Division Courses (10 units):**

Naval Science 1B, 20A, 20B.

**Required Upper Division Courses (20 units):**

All minor courses must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

---

**Naval Science**

**Lower Division Courses**

1A. Introduction to Naval Science. (2) Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

1B. Naval Ship Systems I. (4) Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

20A. Naval Ship Systems II. (4) Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problems, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

20B. Seapower and Maritime Affairs. (2) Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

**Upper Division Courses**

101B. Navigation II. (4) Requisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

102B. Naval Leadership and Management I. (4) Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

102C. Leadership and Ethics. (2) Requisite: course 102B. Current leadership and management in the U.S. Navy. Topics include human resources management, personnel management, material management, and performance and career evaluation.

103. Evolution of Warfare. (4) Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

104. Expeditionary Military Operations. (4) Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

199. Supervised Independent Studies. (1 to 4) Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

**Scope and Objectives**

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and gradu-
Undergraduate Study

Undergraduate Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Danish, Norwegian, and Swedish grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor. Native speakers of Norwegian, Swedish, and Danish may not enroll in any language course (including courses 105, 110, 115) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student’s linguistic background and the reason for wanting to take the language course in question.

Scandinavian Languages B.A.

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.

The Major

Required: Twelve upper division Scandinavian courses, including 105 or 110 or 115, 141, 142, 143. As an option, three upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Scandinavian Minor

To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

Required Courses (28 units): Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Scandinavian Section offers the Master of Arts (M.A.) degree in Scandinavian.

Admission

In addition to the University minimum requirements, prospective students in the M.A. program must have an undergraduate major in Scandinavian languages or equivalent. Applicants who have deficiencies in the undergraduate major must remedy them by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division. The Scandinavian Section welcomes applications for all three quarters (Fall, Winter, Spring).

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the Ph.D. in Germanic Languages. For a brochure describing the program and requirements, write to the department.

Areas of Study

There are no specific major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three courses on the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever students have completed the course requirements and feel prepared to be examined on both the coursework and the reading list. The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

Thesis Plan

None.

Scandinavian

Lower Division Courses

1. Elementary Swedish. (4) Discussion, four hours. P/NP or letter grading.
11. Elementary Norwegian. (4) Discussion, four hours. P/NP or letter grading.
21. Elementary Danish. (4) Discussion, four hours. P/NP or letter grading.
50. Introduction to Scandinavian Literature. (4) Lecture, three hours: discussion, one hour; outside study, eight hours. Designed for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folklore through modern novel, poem, play, short story, and film, read in English and critically discussed. P/NP or letter grading.

Upper Division Courses

C144. Henrik Ibsen on the World Stage. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. P/NP or letter grading.

C145. Getting Married: Strindberg and Battle of the Sexes. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C252. P/NP or letter grading.

C146. Kierkegaard and Foundations of Existentialism. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C253. P/NP or letter grading.

C147. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavians. Discussions, oral and written reports. May be concurrently scheduled with course C254. P/NP or letter grading.

C180. Literature and Scandinavian Society. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Introduction to fairy tales and legends of Scandinavian. Discussions, oral and written reports. May be concurrently scheduled with course C255. P/NP or letter grading.

C181. Contemporary Swedish Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors.

C182. Theory of the Scandinavian Novel. (4) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C186. P/NP or letter grading.

C184. Hans Christian Andersen. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

C185. Seminar: Scandinavian Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate advisor. May be concurrently scheduled with course C265. CM186. Voices of Women in Scandinavian Literature. (4) Formerly numbered C186. (Same as Women’s Studies M186.) Discussion, three hours. Prerequisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C266. P/NP or letter grading.

C254. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of selected works by Knut Hamsun and other existentialist writers. May be concurrently scheduled with course C188. Letter grading.

C256. Theory of the Scandinavian Novel. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C286. Theory of the Scandinavian Novel. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

Graduate Courses

C251. Henrik Ibsen on the World Stage. (4) Discussion, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C252. Getting Married: Strindberg and Battle of the Sexes. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. August Strindberg’s portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C145. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C256. Pan’s Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavians who explored the nature of modern idyll. May be concurrently scheduled with course C147. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C265. Seminar: Scandinavian Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate advisor. May be concurrently scheduled with course C185.

C266. Voices of Women in Scandinavian Literature. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course CM186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C267. Scandinavian Folk Narrative. (4) Lecture, three hours; outside study, nine hours. Preparation: advanced knowledge of a modern Scandinavian language. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies which strive to answer the question “why do people tell the stories that they tell?” Concurrently scheduled with course C188. Letter grading.

C375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

C396. Directed Individual Study or Research. (2 to 6) Limited to graduate Scandinavian students. To be arranged with faculty member who directs the study or research. Twelve units may be applied toward total course requirement, but only four units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

C397. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4 to 8) To be arranged with faculty member who directs the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

C599. Research for and Preparation of Ph.D. Dissertation. (4) To be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

Scope and Objectives
The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature and culture or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples. The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in the Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

The Major
The department offers three majors: (1) Russian Language and Literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic Languages and Literatures, and (3) Russian Studies. The equivalent of a major in Slavic or Russian Language and Literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Slavic or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Russian Language and Literature B.A.
Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major
Required: Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A-101B-101C and 102A-102B-102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

Students also must concentrate in either literature or linguistics. For the literature concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year), and two courses from 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150 are required. For the linguistics concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

Slavic Languages and Literatures B.A.
Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

The Major
Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+); courses 118, 119, 120 (all three may be taken in the sophomore year); one three-course sequence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbian/Croatian 103A-103B-103C, 103D-103E-103F (place ment with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbian/Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 140A through 140D, M150; two courses from Czech 155, Polish 152A, 152B, Serbian/Croatian 154, Slavic 125, 126.

Russian Studies B.A.
Preparation for the Major
Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major
Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian M170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

Russian Language Minor
To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (13 units):
Russian 6 and two courses from 25, 99A, 99B.

Required Upper Division Courses (23 units):
Russian 101A-101B-101C and two additional upper division Russian language and literature courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Language and Literature Minor
The Russian Language and Literature minor was discontinued effective Fall Quarter 1998. Students currently participating in the program (1) must fulfill all requirements for the minor by Winter Quarter 2001 or (2) may modify their programs to fit any of the three new minors.
Master’s Degree

The Department of Slavic Languages and Literatures offers the Master of Arts (M.A.) degree in Slavic Languages and Literatures.

Admission

In addition to the University minimum requirements, the department requires the following from applicants to the M.A. program: the equivalent of a UCLA B.A. in Russian Language and Literature, Slavic Languages and Literatures, or Russian Studies, or three years of Russian language and a variety of Russian history, literature, and linguistics courses.

All applicants must submit three letters of recommendation from persons capable of judging their academic potential and a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application; it is not an obligation for foreign students whose native language is not English, unless they have a bachelor’s degree from a university where the instruction is in English. The Test of English as a Foreign Language (TOEFL) is required of all international students whose first language is not English.

A departmental brochure describing the curriculum in some detail (graduate and undergraduate) is available from the department.

Areas of Study

Candidates for the M.A. degree choose a specialization in either literature or linguistics, with Russian as the principal language and literature.

Course Requirements

A minimum of 36 units is required of students in literature and 40 units of students in linguistics.

Slavic 201, Russian 204, 212A, and 220A are required of all M.A. students.

Literature students must also take Russian 211A, 211B, 212B, 213, and 219.

Linguistics students must also take Slavic 202; Russian 220B; one course from Russian 211A, 211B, 212B, 213; three courses from Russian 241, 242, 265; Russian 243, 263, 264; and Russian 210, Slavic 241A, 241B.

Courses in the 500 series may not be applied toward the M.A. course requirements.

Students with M.A. degrees from other institutions must pass the M.A. comprehensive examination in order to be admitted to the doctoral program. Those whose degree is in Slavic languages and literatures and who are continuing in the same area of specialization (literature or linguistics) should take the examination within three quarters following matriculation. Courses should be selected to fill in lacunae as determined by the requirements of the UCLA M.A. program. All lacunae must be filled before admittance to the doctoral examinations.

Students with M.A. degrees in disciplines other than that of their planned specialization, or students who do not have an M.A. but have taken graduate-level courses equivalent to those required at UCLA for an M.A. degree, must complete the required number of course units; course substitutions may be made with the permission of the graduate adviser. Independent study courses (500-level) may not be used as substitutes.

Comprehensive Examination Plan

Applications for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken and are accepted only if students have passed the Russian language proficiency examination. M.A. examinations are offered at the end of each quarter. After students have declared their intention to take the examination in a given quarter, a committee consisting of three members is appointed by the chair. The examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The oral part may be conducted partly in Russian.

The student’s combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on retaking examinations graded pass and a one-year limit on examinations graded fail.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. comprehensive examination with a grade of high pass; (2) passing the reading examination in both French and German; and (3) demonstrating proficiency in modern Slavic languages other than Russian as follows: applicants to the literature area must complete one year of the language of their second Slavic literature; applicants to the linguistics area must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group). Equivalent language proficiency may be demonstrated through written and oral examinations rather than coursework.

Applicants who do not have an M.A. in Slavic Languages and Literatures from UCLA must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

Major Fields or Subdisciplines

Candidates for the Ph.D. degree choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature. By special arrangement doctoral stu-
Students may specialize in a language or literature other than Russian.

**Course Requirements**

Before the formation of a doctoral committee, students must be officially admitted to the doctoral program and have taken the following required courses.

Students whose specialization is linguistics must take Slavic 221, 222, 223, and three other advanced linguistics courses or seminars. Recommended preparation for linguists includes Linguistics 103, 110, 120A, 120B, M150.

Students whose specialization is literature must take two courses from Slavic 230A-230B-230C and four advanced literature courses or seminars. Students are also advised to acquire a sound general knowledge of modern Western European literature.

**Written and Oral Qualifying Examinations**

*Qualifying Paper.* Students are required to submit to the faculty a qualifying paper that demonstrates their ability to conduct serious and original research. The paper must be received and approved by the faculty adviser (usually the prospective examination and dissertation committee chair) no later than one quarter preceding the quarter in which students expect to take the qualifying examinations.

*Examinations.* All students are expected to have a sound general knowledge of both Slavic philology and Russian literary history.

Students in linguistics take two three-hour written examinations and a two-hour oral examination. Usually one of the written examinations is on the structure of modern Russian and the other on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language. The oral examination is designed to test fields of major interest and general background and typically includes discussion of the dissertation topic.

Students in literature must take a series of written examinations on Russian literature and one on a Slavic literature other than Russian. For the examination on Russian literature, students choose six fields and make up an appropriate reading list for each with members of their doctoral committee. A field may cover an author, genre, theme, literary movement, school of theory, etc. Each of four periods — early Russian literature, the 18th century, the 19th century, and the 20th century — must be represented by a field; the other two fields may cross period boundaries. The examination in a Slavic literature other than Russian tests students' knowledge of the history of the literature and familiarity with representative works. Each examination is one hour in length; the seven examinations are taken over the course of a single week.

Students who receive a grade of pass on the written examinations are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background and which typically includes discussion of the dissertation topic.

After considering students' overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles students to write a dissertation. At the committee's discretion, students may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two quarters (or one quarter and a summer) after passing the qualifying examinations, students must submit a prospectus and commence writing the dissertation.

*Formal Lecture.* Students are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

**Slavic**

**Lower Division Courses**

88. Seminar: Literature and Culture. (4) Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Consult Schedule of Classes or department for topics to be offered in a specific term.

99. Introduction to Slavic Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

**Upper Division Courses**

125. Interwar Central European Prose. (4) Formerly numbered M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

126. Postwar Central European Prose. (4) Formerly numbered M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

M179. Baltic and Slavic Folklore and Mythology. (4) (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European of antiquities.

199. Special Studies. (2 to 8) Limited to seniors.

**Graduate Courses**

**Linguistics**

201. Introduction to Old Church Slavic. (4) Lecture, three hours. Required for M.A. (linguistics). Introduction to phonology and grammar; readings.

211. Slavic Gender Linguistics. (4) Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

223. Introduction to South Slavic Languages. (4) Lecture, three hours. Requisite: course 202. Recommended: Serbian/Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

**M229. Introduction to Slavic Bibliography.** (2) (Same as Library and Information Science M229C.) Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

281. Seminar: Slavic Linguistics. (4) Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar: Structural Analysis. (4) Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

**Literature**

230A-230B-230C. Topics in Comparative Slavic Literature. (4-4-4) Lecture, three hours. Recommended preparation: upper division courses in Czech, Polish, Russian, and Yugoslav literatures. Two terms required for Ph.D. (literature). May be repeated for credit with consent of instructor and graduate adviser. 230A. Middle Ages through Baroque; 230B. Classicism to Romanticism; 230C. Realism to Modernism.

**Special Studies**

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
495. Teaching Slavic Languages at College Level. (4) Seminar, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of teaching methods and materials. Credit/no credit grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

Bulgarian

Upper Division Courses

103A-103B-103C. Elementary Bulgarian. (5-5-5) Lecture, five hours; laboratory, one hour; outside study, 10 hours minimum. Basic courses in the Bulgarian language. P/NP or letter grading.

154. Survey of Bulgarian Literature. (4) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

Czech

Upper Division Courses

102A-102B-102C. Elementary Czech. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Czech language. P/NP or letter grading.

102D-102E-102F. Advanced Czech. (4-4-4) Recitation, three hours. Requisite: course 102C.

155. Survey of Czech Literature from Middle Ages to the Present. (4) Formerly numbered 155A-155B. Lecture, three hours. Lectures and readings in English. Survey of Czech literature from the Middle Ages to the present.

Polish

Upper Division Courses

102A-102B-102C. Elementary Polish. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Polish language. P/NP or letter grading.

102D-102E-102F. Advanced Polish. (4-4-4) Recitation, three hours. Requisite: course 102C.

152A-152B-152C. Survey of Polish Literature. (4-4-4) Lecture, three hours. Lectures and readings in English. Survey of Polish literature from Middle Ages to the present.

Graduate Course

280. Seminar: Polish Literature. Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Russian

Language

1. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

2. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

3. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

4. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

5. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

6. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

7. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

8. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

9. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

10. Intensive Elementary Russian. (12) Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian. (2 each) Basic courses in the Russian language; two to four units per term recommended. Each two-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.

15A-15B. Accelerated Elementary Russian. (8-7) Lecture, five hours; laboratory, two hours; outside study, 15 hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/NP or letter grading.

16. Intermediate Russian. (2) Enforced prerequisite: course 3 or 13B or 15B. Designed for students who have completed first year of Russian (course 3 or 13B or 15B) but cannot take course 4 immediately. Conversation, reading, and composition. P/NP or letter grading.

100A-100B. Literacy in Russian. (4-4) Discussion, three hours. For students who speak Russian but have difficulty reading and writing. Each course may be taken independently for credit with consent of instructor. P/NP or letter grading.

101A. Russia and the West; 101B. Soviet Russia; 101C. Contemporary Russia.

102A-102D. Fourth-Year Russian. (4-4) (Formerly numbered 102A-102B-102C.) Lecture, three hours. Requisite: course 101C. Advanced conversation and composition, with emphasis on vocabulary development and review of selected grammar topics in fiction, nonfiction, poetry, film. Each course may be taken independently for credit. P/NP or letter grading.

102A. The Individual and the State; 102B. The Family in Contemporary Russia; 102C. Growing Up in Russia; 102D. Emphasis on Social Science.

103A-103B-103C. Russian for Native and Near-Native Speakers. (4-4-4) (Formerly numbered 103.) Discussion, three hours. Improvement of oral and written language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. Courses may be taken independently for credit and may be repeated for credit with topic and/or instructor change. P/NP or letter grading.

107. Russian for Social Scientists. (2) Preparation: three years of Russian. Reading of texts relevant to social scientists: viewing of Soviet TV. May be repeated for credit.

Linguistics

123. Historical Commentary on Modern Russian. (4) Lecture, three hours. Requisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

Literature and Civilization

25. The Russian Novel in Translation. (4) Lecture, three hours; discussion, one hour. Designed for non-majors. Study of major works by the great 19th-century Russian novelists.

30. Russian Literature and World Cinema. (4) Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, focusing on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eyes of another. P/NP or letter grading.

125. The Russian Novel in Its European Setting. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of Russian literature from its origins through the Enlightenment, with focus on influence of church, state, and society in evolution of a national literature.

126. Historical Commentary on Modern Russian. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present.

130A-130B-130C. Russian Poetry. (4-4-4) Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change.

140A. Introduction to Analysis of Russian Poetry. Role of biography, cultural subtlety, rhetoric, and form in interpreting poetic texts. 130B. Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. 130C. Russian Poetry in the 20th Century. Major poetic schools from early modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

140A-140D. Russian Prose Fiction. (4-4-4-4) Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change. 140A. Introduction to Analysis of Russian Narrative Prose. Close analysis of genre, narrative, and rhetorical strategies and interplay of literature, history, and culture. 140B. Russian Romantic Prose. Karamzin, Pushkin, Gogol, and others. 140C. Great Realists. Dostoevsky, Tolstoy, and others. 140D. 20th-Century Modernism.

M150. Russian Folk Literature. (4) (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian. M170. Russian Folklore. (4) (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

193. Seminar: Russian Literature. (4) Seminar, three hours. Requisite: course 6. Recommended: course 101C. Reading and discussion of selected authors; written seminar papers usually required. May be repeated for credit with topic and/or instructor change.

Graduate Courses

201A-201B-201C. Russian: Vocabulary, Pronunciation, Style. (4-4-4) Lecture, three hours. Requisites: courses 102C, 106. Conducted in Russian. Reading and analysis of texts with focus on vocabulary, pronunciation, and style, respectively, in three consecutive terms. Letter grading.

Linguistics

203. Practicum in Russian. (2) Requisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

241. Topics in Russian Phonology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

242. Topics in Russian Morphology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

243. Topics in Historical Russian Grammar. (4) Lecture, three hours. Requisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

265. Topics in Russian Syntax. (4) Lecture, three hours. Requisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

Literature and Civilization

211A. Literature of Medieval Rus’. (4) Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to end of the 17th century.

211B. 18th-Century Russian Literature. (4) Lecture, three hours. Requisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

212B. Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenev, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the presbysybol period, especially the short stories of Chekhov.

213. 20th-Century Russian Literature. (4) Lecture, three hours. Requisites: course 204, Slavic 201. Surge of critical and psycho-historical approaches to Russian literature.

214. 20th-Century Russian Literature. (4) Lecture, three hours. Requisites: course 204, Slavic 201. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

290. Seminar: Russian Poetry. (4) Seminar, three hours. Recommended preparation: course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

291A. Seminar: Literature of Medieval Rus’. (4) Seminar, three hours. Requisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar: 18th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

291C. Seminar: 19th-Century Russian Literature. (4) Seminar, three hours. Requisites: courses 212A-212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292A. Seminar: 20th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 212C. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar: Russian Literary Criticism. (4) Seminar, three hours. Requisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

296. Seminar: History of Russian Culture. (4) Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

Serbian/Croatian

Upper Division Courses

103A-103B-103C. Elementary Serbian/Croatian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in Serbian/Croatian. P/NP or letter grading.

103D-103E-103F. Advanced Serbian/Croatian. (4-4-4) Recitation, three hours. Requisite: course 103C. P/NP or letter grading.

154. South Slavic Literature. (4) Formerly numbered 154A-154B. Lecture, three hours. Lectures and readings in English. Survey of South Slavic literature from Middle Ages to the present. P/NP or letter grading.

Ukrainian

Upper Division Courses

101A-101B-101C. Elementary Ukrainian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Ukrainian language. P/NP or letter grading.

152. Ukrainian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotsiaryevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tychyna.
**Social Sciences**

**College of Letters and Science**

UCLA
1312 Murphy Hall
Box 951438
Los Angeles, CA 90095-1438
(310) 825-4017

**Scope and Objectives**

There is no major in social sciences; however, several undergraduate courses are offered for interested students.

**Social Sciences**

**Lower Division Courses**

20. Racial Minorities in the U.S. (4) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicano, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psychosocial dimensions of racism, social movements, and minorities in California.

30. Law and Society. (3) Introduction to nature of legal institutions, processes, and norms.

40. Introductory Statistics. (4) In a series of case studies from science and decision making, use of probability and statistics to quantify uncertainty and figure out how to make sensible choices in the face of it. Topics include how to design experiments and conduct surveys to reduce uncertainty, how to analyze data, and how to validly assess causality. Discussion-style learning blended with interactive sessions on personal computers, making numerical and graphical summaries that both measure uncertainty and help figure out what to do about it. P/NP or letter grading.

88. Introduction to Social Sciences. (4) Seminar, three hours. Introduction to methods, concepts, and practices of social scientific scholarship. Organized around broad, interdisciplinary themes in anthropology, economics, geography, history, political science, psychology, and sociology. Emphasis on social sciences disciplines as a whole. P/NP or letter grading.

**Upper Division Course**

100. History and Politics of Affirmative Action. (4) Lecture, three hours; discussion, one hour. Selected themes in sociology, politics, and education to explore questions surrounding diversity, affirmative action, and discrimination. P/NP or letter grading.
Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student's interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Policy and Social Research, the program affords students instructional opportunities in the other affiliated departments — Policy Studies and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

The Department of Social Welfare offers the Master of Social Welfare (M.S.W.) degree.
Doctoral Degree

Admission

Admission requirements for the program leading to the Ph.D. degree in Social Welfare include meeting the general admission requirements of the Graduate Division and a Master of Social Work (M.S.W.) degree from an accredited school of social work with a superior academic record. Students who possess a master’s degree in social science and professional experience in a related field may also be admitted under one of the following plans:

1. Applicants who wish to obtain an M.S.W. are required to complete the first-year M.S.W. program. Students can be exempted from some second-year M.S.W. requirements via examinations on the basis of preparation received in doctoral courses. This plan is also available to applicants with a B.A. degree who possess an outstanding academic record.

2. Applicants who do not wish to obtain an M.S.W. may be required to take certain M.S.W. courses as requisites to doctoral courses.

The Graduate Record Examination (GRE) General Test is required. International applicants are required to take the Test of English as a Foreign Language (TOEFL). The program may request that additional examinations be taken to assist in the assessment of candidacy for admission.

Official transcripts from every school attended since high school are required. Three letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify communication skills, applicants may submit any of the following: published articles, master’s thesis, unpublished papers, or term papers written in graduate courses.

Admission criteria include quality of performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express oneself clearly in writing, success in professional employment and other pertinent experiences, results of the GRE, and other qualifications indicating eligibility for advanced study and research. Enrollment in the doctoral program is limited, and it may not be possible to accept all applicants who meet the formal qualifications for admission.

Prospective students must apply separately to the Department of Social Welfare and to the Graduate Division. Both applications and the school brochure are available on written request to the Department of Social Welfare doctoral program.

Major Fields or Subdisciplines

The program trains research-oriented scholars to advance the field of social welfare through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas: (1) specialization in a substantive area of social welfare, (2) integration of social and behavioral science knowledge into social welfare, and (3) research methods. Programs of study are planned in relation to the special and individual needs and interests of students.

Course Requirements

There is a minimum core of required courses which includes two seminars on practice theory and research; two seminars on social welfare policy; and two graduate-level courses in statistics. In addition, students are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the department related to their specialization in social welfare; (2) three courses in advanced research methods; and (3) three quarters of research internship.

Every effort is made to individualize the curriculum around students’ area of interest and plans for the dissertation. In order to achieve this goal, a variety of patterns is utilized, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University.

Written and Oral Qualifying Examinations

The qualifying examinations consist of two parts:

1. An examination in social welfare policy and practice, reviewing current theory and research. The examination is given at the end of the third quarter of the first year.

2. A major publishable scholarly paper on a social welfare topic, demonstrating the student’s mastery of social science theory and methods of scientific inquiry. The paper is evaluated by a three-member committee appointed by the chair of the doctoral committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is requisite to pursuing the dissertation. If students fail one or more components, they may be permitted to re-take the examination only on recommendation of the department’s doctoral program committee.

Advancement to doctoral candidacy follows successful completion of both the written qualifying examination and subsequently the University Oral Qualifying Examination, which covers the dissertation proposal and related areas. It is administered by a doctoral committee which consists of three members from the Department of Social Welfare and at least one faculty member from another department of the University.

Social Welfare

Upper Division Courses

100A. Introduction to Social Welfare: Policies and Programs. (4) Origin and development of major U.S. social welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of the profession to major social problems.

100B. Social Welfare Policy: Overview. (4) Requisite: course 100A. Review of existing policy regarding major social issues in the field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations.

101. Social Welfare in a Multicultural Society. (4) Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups.

102. Social Welfare Organizations and Community Systems. (4) Recommended requisites: courses 100A, 100B. Detailed demonstration of implementation of policy via the functioning of human service organizations. Examination of organizational structures/functions. Exploration of characteristics and organization of the community and forces that influence its development and change.

103. Introduction to Direct Practice with Individuals, Families, and Groups. (4) Requisites: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via the casework process. Students practice these skills in written, role-play, small group, and video or audio exercises. P/NP or letter grading.

104A. Filipino American Community and Family. (4) Examination of interaction of Filipino American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Filipino American families and communities. P/NP or letter grading.

104B. Japanese American Redress. (4) Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology from the U.S. government to over 110,000 Japanese Americans incarcerated in concentration camps during World War II. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Formerly numbered 104C.) (Same as Gerontology M104C and Women’s Studies M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Formerly numbered 104D.) (Same as Gerontology M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) (Formerly numbered 104E.) (Same as Gerontology M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

104F. Japanese American Community and Family. (4) Examination of interaction of Japanese American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

105. Social Welfare Policy in Modern America: Historical Perspectives. (4) Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as “the welfare state”; examination of origins of the U.S. welfare state, its development over time, and features that make it distinctive as compared to welfare states in other nations.
106. Research Seminar and Field Observation: Social Welfare. (4) Seminar, three hours; discussion, one hour; outside study, eight hours. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation experience (module) from a number of field settings. P/NP or letter grading.

107. Field Practicum: Social Welfare. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 106. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instruction of a supervising faculty member. P/NP or letter grading.

M108. Violence against Women. (4) (Same as Women's Studies M187.) Lecture, three hours. Requisites: Women's Studies 10, 110A. Factual information and theoretical analyses regarding various forms of violence against women and girls in their homes, workplaces, and communities through critical examination of social structures and social science research.

M140. Introduction to Study of Aging. (4) (Formerly numbered 140.) (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major factors of human aging—biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

Graduate Courses

201A-201B. Dynamics of Human Behavior. (3-3) Lecture, two hours; discussion, one hour. Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development. Letter grading.

202A-202B. Dynamics of Human Behavior. (2-2) Requisites: courses 201A-201B. Deviations and pathologies or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

203A-203B-203C. Integrative Seminars. (2-2-2) Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

M203D. Supporting Families of Children with Special Needs. (2) (Same as Psychiatry M254.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

M205E. Hispanic Mental Health Issues and Treatment. (2) (Same as Psychiatry M321.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

205. Cross-Cultural Awareness. (4) (Formerly numbered 205A.) Lecture, two hours; discussion, two hours. Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U or letter grading.

220. History and Philosophy of Social Welfare. (2) History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, philosophical, and scientific climate of the period.

M221A. Foundations of Social Welfare Policy. (4) (Formerly numbered 221A.) (Same as Policy Studies M221A.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

221B. Social Welfare Policy and Services II. (2) Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop, how roles and functions are divided, and how service delivery systems function. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

223. Seminar: Social Work Profession. (2) Nature and role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional standards, certification, licensing; professional roles and responsibilities; self-criticism and improvement of the profession. S/U grading.

225A-225B. Social Welfare Policy. (4-4) Discussion, three hours. Designed for Ph.D. students.

225A. Formulation and Analysis. Examination of principal issues in development of social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

225B. Implementation and Evaluation. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including roles of different professionals, criteria for effectiveness, and use of quantitative methods in policy analysis.

230A-230B-230C. Theory of Social Welfare Practice with Individuals, Families, and Groups I, II, III. (2-2-2) Lecture, two hours. Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

231A-231B-231C. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social case-work practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

240A-240B-240C. Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings I, II, III. (2-2-2) Lecture, two hours. Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. S/U or letter grading.

241A-241B-241C. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

M241D. Social Advocacy and Domestic Violence. (4) (Same as Law M359.) Lecture, three hours; fieldwork. Use of domestic violence as a case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change the systems.

245A. Epistemology of Practice. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge, science and practice interaction.

245B. Models of Social Work Practice Research. Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

258. Critical Problems in Social Welfare. (2) Designed for Ph.D. students. Current problems in the field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

290. Social Welfare Research. (3) Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

281A-281B-281C. Advanced Social Welfare Research. (2-2-2) Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress and S/U or letter grading.

286A. Survey of Research Methods. (4) Discussion, four hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

286B. Advanced Research Methods. (4) Discussion, four hours. Advanced concepts underlying research methods. Continuing study of theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

290A-290B-290C. Seminars: Social Work. (4-4-4) Seminar, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.
M290D. Women, Health, and Aging: Policy Issues. (4) (Same as Health Services CM241.) Lecture, three hours; discussion, one hour. Preparation: two upper-division social sciences courses, two upper-division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

M290E-M290F-M290G. Child Abuse and Neglect (2-2-1) (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C. Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Lecture, two hours. Course M290E is requisite to M290F, which is requisite to M290G. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M290I. Children with Special Health Care Needs: Systems Perspective. (4) (Same as Policy Studies M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

M290K. Mental Health Policy. (4) (Same as Policy Studies M213.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

M290L. Poverty, the Poor, and Welfare Reform. (4) (Same as Policy Studies M215.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. Social and economic context of poverty in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

401A-401B-401C. Practicum: Social Work. (3-3-3) Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Special Study and Research in Social Welfare. (2 to 8) Tutorial, to be arranged. Individual program for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

596B. Special Study and Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

597A. Preparation for M.S.W. Comprehensive Examination. (2 to 8) Tutorial, to be arranged. S/U grading.

597B. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

**Scope and Objectives**

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a survey conducted by the Conference Board of the Associated Research Councils.

Sociology has a particular appeal to those students whose interests are broad and unspecialized. At both the undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in Sociology is to enhance students' capacity for critical
analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Undergraduate Study

Sociology B.A.

Preparation for the Major

Required: One course from Sociology 1, 2, 3, 4, M5, 31; one course from Mathematics 2, 3A, 31A; Sociology M18 (or Statistics 10, Psychology 100A, or Economics M40).

All courses required for the major in Sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

The Major

Required: Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 104H, 105, 106, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. Students must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English Composition 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, students must complete Mathematics 2, 3A, or 31A, and an honors section of Sociology 1 and M18.

Prior to taking other upper division sociology courses, students must complete an honors section of Sociology 101 and 102 (Honors College 61 may be substituted for course 102).

Also required are three undergraduate seminars from the Sociology 197 series; two additional upper division sociology courses; courses 104H and 199HA-199HB-199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English Composition 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 2201 Hershey Hall. Students should apply in the last term of their junior year.

Computing Specialization

 Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology C112, 113. Students graduate with a bachelor's degree in sociology and a specialization in Computing.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

Admission

The graduate program of the Department of Sociology takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily accepts students who are seeking the Ph.D. degree. The M.A. degree in Sociology is earned as part of the process of completing the requirements for the Ph.D.

In addition to the minimum University requirements (an acceptable bachelor's degree and a B average in all upper division and graduate work), the Sociology Department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences; (2) transcripts from all colleges where applicants have studied (the department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics); (3) a statement of purpose, not to exceed three typewritten double-spaced pages, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these; (4) copies of one or two term papers or research reports written by the applicant; (5) an official statement of scores on the Graduate Record Examination (GRE); and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department. Applicants need not be uniformly high on all indicators of potential. The admissions committee, which generally consists of at least five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the committee considers several items, including samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal GRE scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply.

The deadline for receipt of applications is December 1. Application forms and more detailed information are available on request from the graduate affairs assistant in the department.

Areas of Study

See Major Fields or Subdisciplines in the Doctoral Degree section.

Course Requirements

In addition to the departmental requirements, some field examinations have their own course requirements for students who plan to take that field examination.

Before the Master's Paper Review

All students are required to take nine courses (36 units).

(1) Sociology 202A-202B. The courses, an examination of the interrelations of theory, method, and substance in exemplary sociological works, must be taken in the first year.

(2) A two-quarter graduate-level methodology sequence of which there are several alternatives such as the survey methods course or the demographic methods course. The methodology series is presently numbered Sociology 208A-208B, 211 through 216B, 217B-217C, 218A-218B, C244A-C244B. Students are required to take one methods sequence before the master's paper review and one methods
sequence after the review. In choosing a methodology sequence, students should note that some of the Ph.D. area programs and subprograms require particular methodology sequences. If students have equivalent methodological training elsewhere, they should file a petition (along with pertinent evidence and an adviser's recommendation) with the executive committee for exemption from the methodology requirement.

Students who want to take a course outside the department because they feel it would be beneficial to their master's paper or area of interest may petition to take one course outside of sociology. The petition must be approved by the chair or graduate director.

Comprehensive Examination Plan
No later than in the sixth quarter of residence students must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate general competence in sociological theory, methodology, and selected substantive areas.

As early in the graduate career as possible, students select two faculty members who consent to serve as their master's committee. Faculty serving should represent a broad range of professional interests. Formation of the master's committee may not be postponed beyond the beginning of the fourth quarter of residence in graduate work. For more specific guidelines, deadlines, and procedures regarding the master's review, contact the graduate affairs assistant.

In consultation with and on the advice of the committee, students develop a paper, usually initially written for a course, demonstrating intellectual attainment. For example, the paper may show that the student (1) has an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with the student's capacity to do Ph.D.-level work.

When the master's committee feels these requirements have been met, they nominate the student for faculty review by submitting the paper to the Graduate Curriculum and Advisement Committee. That committee appoints a two-person evaluation panel which reports its assessment to the Graduate Curriculum and Advisement Committee as a whole. They consider the panel's report as well as those of the master's committee and present an evaluation and recommendation to the full faculty. The Graduate Curriculum and Advisement Committee may recommend any of the following options:

(1) The paper is passed. The M.A. is granted and the student is permitted to proceed to the Ph.D.
(2) The paper is passed conditionally. The M.A. is granted and the student is permitted to proceed to the Ph.D. on completion of specified revisions of the paper.
(3) A terminal M.A. degree is granted.
(4) The paper is not acceptable. The student may resubmit at a later time or be asked to withdraw.

The Graduate Curriculum and Advisement Committee's recommendation and the analysis on which it is based is made available to the student, the master's committee, and the faculty no later than one week prior to the faculty review. The faculty at its review may ratify the recommendation of the Graduate Curriculum and Advisement Committee or alter it, including the option of making recommendation to the dean of the Graduate Division to terminate graduate status.

Thesis Plan
None.

Doctoral Degree
Admission
For general admission information for the program leading to the Ph.D. degree in Sociology, see Admission under Master's Degree.

In the quarter following acceptance of the master's paper, usually at the beginning of the third year, students must submit a proposal to the Graduate Curriculum and Advisement Committee specifying two of the field examinations listed below and a time table for completing these examinations.

Students who enter graduate studies at UCLA with a Master of Arts degree in Sociology from another institution normally come up for a master's paper review in the first quarter of residence at UCLA, and under no circumstances later than the third quarter of residence. In this review, the department determines whether or not the student may proceed directly to preparation for the field examinations, if additional courses need to be taken for breadth purposes, or if the submitted paper needs additional work or if an additional paper needs to be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. thesis written at another university, students should submit for the master's paper review a transcript from the university at which the M.A. degree was earned so that this department can determine whether the requirements ordinarily constraining students in the first years of this program have been met.

Major Fields or Subdisciplines
Class, Politics and Society. The class structure, broadly defined, is the center of contemporary capitalism. The class, politics, and society field focuses on the nature of the class structure, how it affects the character of work and the work process, the nature of the modern corporation, and the relation of the class structure to politics and political power. The field pays attention to the issue of salience of class versus other identities such as gender, age, race, and nationalism, and examines the contemporary globalization tendencies of capitalism.

Comparative Ethnicity and Nationalism. The comparative ethnicity and nationalism field focuses on the comparative study of race, ethnicity, and nationalism. It addresses the rationale, or lack of rationale, for distinguishing analytically between nation and race; differences across time, place, and context in the conceptualization of ethnicity, nation, and race; the distinctiveness in comparative perspective of the organization and understanding of ethnicity, nation, and race in America; the manner in which the modern state, in different contexts, has shaped the organization and expression of claims based on ethnicity, nation and race; the opposition (or pseudo-opposition) between primordialist and contextualist or constructivist theories of ethnicity, nation, and race; and the contribution, and limitations, of rational choice and other microanalytical approaches to the understanding of ethnicity, nation, and race.

Conversation Analysis. Conversation analysis is a field of inquiry that addresses talk and other forms of conduct in interaction studies through the detailed examination of naturally occurring instances or specimens of its occurrences. Talk-in-interaction is taken to be that primordial site of sociality in which much of what constitutes the life of a society and its institutions is realized. Although conversation analysis has been the most intensively and extensively examined domain of talk-in-interaction, the field encompasses a broad range of settings and specialized genres of talk or speech-exchange systems, especially talk in work settings.

Economic Sociology. The economic sociology field provides an overview of the major debates in economic sociology, at both the macro and micro level. Topics include precapitalist economies and the development of capitalism: modernization, dependency, development, and the world system; global economy; economic institutions of advanced economies; labor, capital, property, and entrepreneurship; and class, stratification, and inequality.

Ethnographic Methodology. Sociology in the U.S. was largely created through a series of ethnographic studies. Over the last 25 years, ethnographic research has been the focus of some of the most probing self-examination in social science as a whole, featuring debates over reflexivity, human subjects’ consent in narrow and broad senses of the issue, the importance of context for understanding individual acts and items of culture, social constructionism and relativism, and bias (gender, cultural, etc.) in research procedures and the conceptualization of data.
Ethnomethodology. Ethnomethodology is a field of sociology which studies the common sense resources, procedures, and practices through which members of a culture produce and recognize mutually intelligible objects, events, and courses of action. Studies in the field are directed to the investigation of social processes underlying the construction of social phenomena ranging from factual knowledge, social organization, and attributes such as race and gender, through the acquisition of skills and management of memory.

Mathematical Sociology. The questions that mathematical sociologists work on span sociology. Graph theory and linear algebra are useful in the analysis of social structure. Markov models, difference equations, and differential equations have been used to describe change. Game theory is helpful in the analysis of conflict and interdependence. Computer simulations are often useful additions to mathematical analysis.

People-Processing Institutions. Complex modern societies rely on bureaucratic institutions for both social control and service provision purposes. What is distinctive of a number of such institutions is that they change the official status of some population or clientele who come within the jurisdiction. The people-processing institutions field examines interactional and institutional processes common to such institutions, which range from criminal and juvenile courts to schools and welfare agencies and from psychiatric clinics and emergency rooms to health maintenance organizations (HMOs).

Political Sociology. The political sociology field addresses four major topics: (1) the formation and transformation of states and political regimes; (2) collective action, social movements, and revolution; (3) ideology, consciousness, and attitudes; and (4) political organization and behavior.

Race and Ethnicity. The race and ethnicity field focuses on the nature and persistence of ethnic and racial categories and groupings in contemporary societies, and on how these structures relate to social stratification systems and political and economic dynamics. The field includes a variety of perspectives and concerns, including race relations, racism, ethnic stratification, immigration, ethnic economies, and ethnic politics. While race and ethnicity in the U.S. today are the central substantive concerns, the field is explicitly comparative-historical, viewing contemporary ethnic and racial structures in the context of the spread of European colonialism and imperialism.

Self and Society. The self and society field originates in the seminal insights of social psychology that the most personal experiences — the very sense of self and personal identity — are constituted through social relations. The field focuses on the interactional, discursive, and embodied processes through which selves are created, enacted, transformed, or dissolved. Classical and contemporary perspectives and issues such as the role of emotions and embodiment are studied.

Social Demography. The social demography field examines key issues and debates related to the biological, economic, social, and environmental causes and consequences of trends and patterns in demographic behaviors such as fertility, marriage, divorce, migration, social stratification, health, and mortality. Particular attention is paid to the rapidly growing literature on racial and socioeconomic differentials in demographic behavior, aging, the causes and consequences of population growth, and family and household structure and composition.

Social Stratification and Social Mobility. The major issues studied in the social stratification and social mobility field are stratification determinants of who gets greater and lesser amounts of scarce resources, in particular, the extent to which those resources are passed on from generation to generation within families and the extent to which those answers depend on the organization of families, schools, labor markets, and other institutions.

Sociology Of Gender. The sociology of gender field is concerned with gender inequality and gender differences and the social processes producing and reproducing them. It includes both macrosociological and microsociological perspectives on these processes. It also encompasses the growing scholarship on the intersection between race, class, and gender.

Urban and Suburban Sociology. The urban and suburban sociology field comprises the major topics in urban and suburban sociology. It addresses two main issues: (1) historical and comparative perspectives of urbanization and (2) urbanization and suburbanization in the U.S.

Course Requirements

After the Master's Paper Review

All students are required to take two courses (eight units) of an additional methodology sequence (Sociology 208A-208B, 211A through 216B, 217B-217C, 218A-218B, C244A-C244B), which must be completed before the award of the Ph.D. degree.

Comparative Ethnicity and Nationalism. Recommended: Sociology 230, 231, 235.

Conversation Analysis. Recommended: Sociology C244A-C244B, 258, 266.

Economic Sociology. Recommended: Sociology 237, 254, 259, and special topics courses in economic sociology selected from courses 285A through 285Z.

Ethnographic Methodology. Required: Sociology 217A, 217B-217C, and one substantive graduate course that uses ethnographic studies.

Ethnomethodology. Recommended: Sociology 222, 271.

People-Processing Institutions. Required: Sociology C229B, C258. Recommended: Sociology C229A.

Social Stratification and Social Mobility. Required: Sociology 210A-210B, 239A-239B. Recommended: Sociology 263.

Sociology of Gender. Required: Any two courses from Sociology 238, 241, 252.

Urban and Suburban Sociology. Recommended: Sociology 231, 236, 297B.

Courses in the 500 series (Sociology 595, 596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and dissertation research. While these courses may be taken to maintain enrollment, they do not count toward the course requirements.

Written and Oral Qualifying Examinations

Two specialized field examinations are administered and evaluated according to guidelines specified by the area programs. Consult the department for details regarding field examinations.

If the performance on the field examinations is satisfactory and the foreign language requirement has been fulfilled, students may nominate a doctoral committee and proceed to take the University Oral Qualifying Examination. The examination may range over general sociology, students’ specific fields, and students’ dissertation plans. It is given by the doctoral committee no later than six months after the completion of the written examination. A two-page abstract of the dissertation proposal must be submitted to the graduate affairs assistant for distribution to the entire faculty of the Sociology Department within two weeks of the oral examination.

In addition to the two-page abstract, a full-length dissertation proposal is required at the time of the preliminary oral examination. A dissertation proposal approved by the committee must be filed with the department reasonably soon after the preliminary orals. In the event of a major revision in the topic or methodology of the dissertation, a revised prospectus approved by the committee is required and is filed in the same manner as the original prospectus. Minor changes in the methodology and hypotheses which normally takes place as students carry out the dissertation research do not call for a revised prospectus.
When both the written and oral qualifying examinations have been successfully completed, students are advanced to candidacy by the Graduate Division.

**Sociology**

**Lower Division Courses**

1. **Introductory Sociology. (4)** Lecture, four hours. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation. P/NP or letter grading.

2. **Changing Society and Making History. (4)** Lecture, three hours; discussion, one hour. Leading question is how do politics, economics, and culture interact in changing society and making history? Answers provided by introductory level of study of containing substantive theories and contrasting methods of inquiry contained in both classical and exemplary conceptual works.

3. **Sociology of Everyday Life. (4)** Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of capacity to critically observe social practices through which everyday life is constructed.

5. **Social Organization of Black Communities. (4)** (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

6. **Interpretation of Quantitative Data. (4)** (Formerly numbered 18B.) (Same as Statistics M21C.) Lecture, three hours; discussion, one hour. Enforced prerequisites: course 1 (may be taken concurrently) and (Mathematics 2 or 3A). Satisfies statistics requirement for Sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals. P/NP or letter grading.

24. **Conversation and Society. (4)** Lecture, three hours. Examination of social norms that organize conversational interaction in everyday life. Consideration of relationship between conversation and other institutions in society. P/NP or letter grading.

31. **Dilemmas of Third World Development. (4)** Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

88A-88Z. **Lower Division Seminars. (4)** Seminar, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult Schedule of Classes or Department Announcements for topics and instructors.

**Upper Division Courses**

101. **Development of Sociological Theory. (4)** Comparative survey of basic concepts and theories in sociology from 1850 to 1920; codification of analytic schemes; critical analysis of trends in theory construction.

102. **Contemporary Sociological Theory. (4)** Prerequisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

103. **Marxist Sociology. (4)** Prerequisites: courses 102, 104. Fundamentals of Marxist theory and method and their historical development. Attention to competing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward theory requirement for the major.

104. **Introduction to Sociological Research Methods. (4)** Not open to students with credit for course 104H. Systematic treatment and semiquantitative skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

104H. **Introduction to Sociological Research Methods (Honors). (4)** Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly sociological research for students who intend to write an undergraduate honors thesis.

105. **Research Methods in Policy Analysis and Evaluation. (4)** Prerequisite: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management.

106. **Field Research Methods. (4)** Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Designed for juniors/seniors. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on interrelations between fieldwork role and substantive findings.

107. **Urban Poverty and Public Policy in the U.S. (Field Component). (4)** Prerequisite: course 144. Corequisite: one course from Geography 150 or 159A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

109A-109B. **Data Analysis for Social Scientists. (4-4)** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for undergraduates and graduate students, especially sociology honors students. P/NP or letter grading.

112. **Introduction to Mathematical Sociology. (4)** (Formerly numbered 112.) Lecture, three hours; laboratory, two hours. Requisites: course M18, Mathematics 3A. Studying relations (including introductions to probability theory, matrix algebra, and differential and integral calculus). Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including an analysis of initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematical sociology). Concurrently scheduled with course C243. Letter grading.

113. **Statistical and Computer Methods for Social Research. (4)** Lecture, three hours; laboratory, one hour. Prerequisite: course M18. Continuation of course M18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use the computer and write papers analyzing prepared data sets.

116. **Social Demography. (4)** Prerequisites: courses 1, 104. With focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues. Sociological approaches to understanding dilemmas of Third World social development and prospects for progress in the future.

117. **Sociology of Family Demographic and Economic Behavior. (4)** Examination of demographic behavior associated with social organization of the family and its relationship to society's economic system. American and European historical studies of family socioeconomic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half.

CM124A-CM124B. **Conversational Structures I, II. (4-4)** Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses 244A-C244B. P/NP or letter grading.

126. **Study of Norms. (4)** Requisites: courses 1, 104. Approaches for identifying and analyzing social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensation, and the emotions; the self and emotions; social construction of emotions.

129. **Sociology of Time. (4)** Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; “cyclical” and “linear” time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination.

132. **Social Psychology: Sociological Approaches. (4)** Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction process.

133. **Collective Behavior. (4)** Requisites: courses 1, 104. Designed for juniors/seniors. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization.

134. **Culture and Personality. (4)** Requisites: courses 1, 104. Designed for juniors/seniors. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social roles on behavior.

135. **Group Processes. (4)** Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques.
M174. Sociology of the Family. (4) Formerly numbered 174. (Same as Women's Studies M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

M175. Sociology of Education. (4) (Same as Education M108.) Requisite: course 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

M176. Sociology of Mass Communication. (4) (Same as Communication Studies M147.) Requisite: course 1. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

M177. The Military and Society. (4) Formerly numbered 177. (Same as Women's Studies M177.) Lecture, three hours; discussion, one hour. Examination of the military as an organization and profession: personnel issues such as family, class, race, gender, and sexual orientation and postmodern military issues such as civil/military relations, media coverage, peacekeeping operations, and the future of war. P/NP or letter grading.

M180. Introduction to Development Studies: Political Economy of Development. (4) (Same as International Development Studies M100B and Political Science M197G.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

182. Political Sociology. (4) Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social bases of power.

185. American Society. (4) Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.

186. Latin American Societies. (4) Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.

187. Population and Society in the Middle East. (4) Designed for juniors/seniors. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.

188. Comparative East Asian Societies before World War II. (4) Lecture, two hours; discussion, one hour. Designed for juniors/seniors. Introductory and comparative survey of traditional societies of East Asia, including China, Japan, Korea, and Vietnam, with focus on dynamic interactions between culture, state, and society in process of change.

189. Japanese Society. (4) Lecture, two and one-half hours; discussion, two hours. Requisite: course 1. Analysis of social structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.

190. Capitalism, Socialism, and Alternative Social Systems. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Theories of capitalism and socialism, with special attention to the noncapitalist systems, and assessment of the record of these experiments. P/NP or letter grading.

191. Society and Politics in Korea. (4) Lecture, three hours; discussion, one hour. Examination of society and politics in 20th-century Korea from a comparative/historical perspective; Korean case used to discuss major sociological and theoretical issues in social change and development (political and economic). P/NP or letter grading.

193. Asia-Pacific Social Transformation since World War II. (4) Lecture, three hours. Designed for juniors/seniors. Introductions to comparative surveys of post-World War II development in Asia-Pacific region, with focus on ascent of Japan, newly industrialized capitalist countries, and emergence of socialist states.

194. Senior Seminar: Language, Interaction, and Culture. (4) (Same as Anthropology M194 and Applied Linguistics and TESL M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the following disciplines (anthropology, applied linguistics, sociology) covered in course. Letter grading.

195A-195Z. Special Topics in Sociology. (4 each) Limited to juniors/seniors. Study of selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit and may be applied as elective units toward Sociology major.

M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4) (Formerly numbered 196A-196B.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the following disciplines (anthropology, applied linguistics, sociology) covered in course. Letter grading.

197A-197Z. Undergraduate Seminars. (4 each) Limited to junior/senior Sociology majors.

199. Special Studies. (2 to 6) Preparation: 3.0 grade-point average in major; Requisites: courses 1, 182, M108. Limited to senior Sociology majors and graduate students. Course of independent studies designed for students who (1) desire a more advanced or specialized treatment of an area covered in regular course work and present that course as a prerequisite or (2) desire to work in an area of sociological analysis currently not covered by an upper division course. Only eight units are allowed. See undergraduate counselor for course contract.

199A-199HX. Special Studies for Honors. (4-4) Requisite: course 104H. Limited to sociology honors program students. 199HA. Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required. 199HB. Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor. 199HC. Completion of written report or honors thesis.

199I. Independent Studies for Internships. (2 to 4) Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only four units of internship are allowed. P/NP grading.

Graduate Courses

201A-201B-201C. Proseminars: Sociology. (2-2-2) Seminar, two hours every other week. Required of first-year sociology graduate students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

202A-202B. Theory and Research in Sociology. (4-4) Lecture, two hours; discussion, two hours. Required of first-year sociology graduate students. Examination of interrelations of theory, method, and substantive theory in exemplary sociological works, with analytical and skills-centered orientation. Letter grading.

203A. Social Survey Practicum. (4) Lecture, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Training through practice in basic techniques of survey research.

203B. Social Survey Research Seminar. (4) Seminar, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Development of individual survey research projects under faculty supervision.

204. Topics in Sociological Theorizing. (4) (Formerly numbered 255A-255B.) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

208A-208B. Data Analysis for Social Scientists. (4) Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate social sciences students. In Progress grading.

209C. Mathematics for Social Statistics. (4) Lecture, three hours; computer exercises. Designed for graduate students. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

210C. Intermediate Statistical Methods III. (4) Lecture, four hours. Requisite: course 210B. Survey of advanced statistical methods used in social research, with focus on problems for which classical linear regression model is inappropriate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. Letter grading.
211A-211B. Comparative and Historical Methods. (4-4) in Progress grading. 211A. Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in each paradigmatic area. 211B. Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

212A-212B. Survey Data Analysis. (4-4) (Not the same as courses 212A-212B prior to Fall Quarter 1998.) Lecture, three hours. Requisite: courses 210A-210B. Analysis and interpretation of primarily nonexperimental quantitative data, focusing on sample survey and census data. Extensive practice at utilizing statistical methods encountered in previous courses, culminating in term paper in style of American Sociological Review or similar journal article. Topics include simple tabular analysis, log-linear analysis, ordinary least squares regression, robust regression, binomial and multinomial logistic regression, and scale construction. Logic of analysis and problems of statistical inference, including diagnostic procedures and methods for handling complex sample survey designs. In Progress and letter grading.

213A-213B. Techniques of Demographic and Ecological Analysis. (4-4) Requisite: course 210A. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

214A-214B. Naturalistic Methods for Recorded Data. (4-4) Special features of audio and video recordings as sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

215A-215B. Experimental Sociology. (4-4) Requisite: course 210A. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

216A-216B. Survey Research Design. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 210A. History of the survey method; facet metatheory and concept formation; questionnaire and item design; scales, indices, typologies; data collection; planning and management; network, atom, snowball, and experience sampling; multistage probability sampling, stratification and clustering. Students participate in survey research project. Letter grading.

217A. Analyzing Ethnographies. (4) Seminar, three hours. Analysis of ethnographic monographs.

218A-218B. Ethnomethodological Methods. (4-4) Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

220. Self and Society. (4) (Not the same as course 220 prior to Fall Quarter 1998.) Lecture, three hours. Examination of social and cultural processes shaping definition and experiencing of self, embodied interactional practices through which the self is constructed in everyday and institutional contexts, formation and transformation of self during life course, and construction of self in interaction with others. In Progress grading.

221. Social Ecology. (4) Requisites: courses M18, 116. Designed for graduate students. Examination of various approaches to both microecology and macroecology, including classical ecology, social area analysis, sociocultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans.

222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies. (4) Lecture, three hours. Designed for graduate students. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, problem of rationality, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first person; guest presentations by affiliated faculty in second part.

223. Phenomenological and Interactionist Perspectives on Selected Topics. (4) Lecture, three hours. Comparison of phenomenological and symbolic and perspectives by examining a particular body of live or currently unresolved substantive issues. Topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. When relevant, attention to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies.

224A-224B. Problems in Social Psychology. (4) Requisite: course 210A. Basic course for graduate students intending to specialize in social psychology.

224D. Current work being done in department in several areas. In Progress grading.

225A-225B. Demographic Perspectives on Relations of Family and Economic Systems. (4-4) Requisites: courses 210A-210B. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems change in tandem; (3) demographic variables; and (3) how this two-way process influences relationship of family and economic systems over time. 225A. Lectures and readings. 225B. Individual research projects involving term paper and classroom reports of results.

227. Sociology of Knowledge. (4) Designed for graduate students. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

228A-228B. Critical Issues in Macrosociology. (4-4) Lecture, two hours; discussion, one hour. Designed for graduate students. Conceptual introduction to area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually taught by faculty of varying orientations. In Progress grading.

229A. Sociology of Disputes and Troubles. (4) (Formerly numbered 229A.) Lecture, three hours; discussion, two hours. Development and transformation of everyday disputes and interpersonal troubles; dispute processing as informal social control in public places, neighborhoods, workplaces, and household settings in contemporary society. Concurrently scheduled with course C146. Letter grading.

229B. People Processing Institutions. (4) (Formerly numbered 229B.) Lecture, three hours; discussion, two hours. Course C229A is not requisite to C229B. Theory and research analyzing operation and decision-making processes of a variety of people processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Concurrently scheduled with course C149. Letter grading.

230. Nations and Nationalism. (4) Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading.

231. Race and Ethnicity: International Perspectives. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S., with emphasis on theoretical and methodological issues in comparative research.

232. Class, Politics, and Society. (4) (Not the same as course 232 prior to Fall Quarter 1998.) Lecture, four hours. Nature of class structure and how it affects relationship of class structure to politics and political power. Issue of salience of class versus other identities such as gender, age, race, and nationalism. Examination of contemporary globalization tendencies of capitalism. Letter grading.

233. Foundations of Political Sociology. (4) Lecture, three hours. Designed for graduate students. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structure to politics.

234. Sociology of Community Organization. (4) Designed for graduate students. Survey of recent and classical research and literature dealing with predominately political institutions, problem of order, and organization of communal life in the village and metropolis.

235. Theories of Ethnicity. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralism, primordialism, and rational choice perspectives.

236. Immigration. (4) Lecture, three hours. Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary framework. S/U or letter grading.

238. Feminist Theory. (4) Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent “antifeminist” feminists. Discussion of directions for future feminist sociology.

239A-239B. Quantitative Research on Social Stratification and Social Mobility. (4-4) Lecture, three hours. Requisites: courses 210A-210B. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading.

241. Theories of Gender in Society. (4) Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminism informed sociology necessitate a fresh approach? S/U or letter grading.

M242. Analysis of Data with Qualitative and Limited Dependent Variables. (4) Formerly numbered 242.) (Same as Statistics M211.) Lecture, three hours. Requisites: courses 210A-210B or Statistics M100A and 100B-100C. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

C243. Introduction to Mathematical Sociology. (4) (Not the same as course 243 prior to Fall Quarter 1998.) Lecture, three hours; discussion, one hour; laboratory, two hours. Requisites: courses 210A-210B. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Concurrently scheduled with course C112. Graduate students have additional readings, meet as a group one additional hour each week, and learn to use mathematical software such as MATHMATICA. S/U or letter grading.

C244A-C244B. Conversational Structures I, II. (4-4) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses CM124A-CM124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. S/U or letter grading. C244A. Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking and organization of repair, and some basic sequence structures with limited expansions. C244B. Requisite: course C244A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

245. Cultural Sociology: Classical and Contemporary Approaches. (4) Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsonsian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies.

246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions. (4) Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology, on premise that these extra-sociological approaches provide critical resources in advancing the field of cultural sociology today. Theoretical and comparative emphasis, with consideration of case studies.

247. Sociology of Emotions. (4) Lecture, two hours; discussion, one hour. Designed for graduate students. Sociological theories of emotional expression; experiential approaches to emotions; motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and the emotions; creativity and expressed affect; thought, sensations, and the emotions; specific emotions; cultural differences in emotional expression; measurement of emotions.

248. Selected Topics in Culture and Society. (4) Seminar, three hours. Designed for graduate students. Seminar on selected topics on culture and society. Consult Schedule of Classes for topics and instructors. S/U or letter grading.

M249A. Health Professions. (4) (Same as Community Health Sciences M274.) Lecture, three hours. Requisite: Community Health Sciences 210. Sociological examination of concepts of health and illness, and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of institutional settings. S/U or letter grading.

M249B. Health and Illness Behavior. (4) (Same as Community Health Sciences M275.) Lecture, four hours. Requisites: Community Health Sciences 210, Epidemiology 100. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. S/U or letter grading.

251. Topics in the Problem of Social Order. (4) Lecture, four hours. S/U or letter grading.

252. Selected Topics in Sociology of Gender. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit.

254. Human Capital, Social Capital, and Cultural Capital. (4) Lecture, three hours. Designed for graduate students. Intellectual theory of these concepts, practices of how differences in them are maintained, and importance of these concepts, as exemplified by research that utilizes these concepts, and critical reflection on research traditions.

256. Demography of Marriage Formation and Dissolution. (4) Discussion, three hours. Requisite: course 210A. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature.

258. Talk and Social Institutions. (4) Formerly numbered 258.) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

259. Social Structure and Economic Change: Historical and Comparative Perspectives. (4) Lecture, four hours. S/U or letter grading.

260. Economy and Society. Discussion, two hours. (4) Designed for graduate students. Review and critique of major analytical traditions in economy and society.

M262. Selected Problems in Urban Sociology. (4) (Same as Afro-American Studies M200C.) Seminar.

263. Social Stratification. (4) Lecture, four hours. S/U or letter grading.

264. Personal Identity in Historical Perspective. (4) Lecture, three hours. Designed for graduate students. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include family, home, work, food, clothing, and appearance in everyday life.

266. Selected Problems in Analysis of Conversation. (4) Requisites: courses C244A-C244B. Variable topics formats course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

268. Selected Problems in Psychoanalytic Sociology. (4) Discussion, three hours. Recommended preparation: at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

269. Collective Behavior and Social Movements. (4) Lecture, three hours. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization. Impact of collective behavior and social movements on social and political changes. S/U or letter grading.

270. Selected Problems in Socialization. (4) Lecture, four hours. S/U or letter grading.

272. Topics in Political Sociology. (4) Lecture, four hours. S/U or letter grading.

273. Attitudes and Social Structure. (4) Lecture, four hours. S/U or letter grading.

274. Social Change and Development in Korea. (4) Seminar, three hours. Requisite: course 191. In-depth understanding of social change and development in 20th-century Korea. Discussion, in comparison with concepts, and current examples of research that utilize these concepts, and critical reflection on research traditions.

275. Contemporary Issues of the American Indian. (4) (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

276. Selected Topics in Sociology of East Asia. (4) Designed for graduate students. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China’s Great Proletarian Cultural Revolution, (2) internal contradictions in Chineseness society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development, and (4) China and Japan comparatively.

277. Japanese Society: Selected Topics. (4) Lecture, two and one-half hours. Designed for graduate students. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison — Weberian, Durkheimian, Parsonsian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies.

278. Sociology of Latin America. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development.

279. Seminar: Applied Social Research. (4) Seminar, two hours; discussion, one hour. Opportunities for applied research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

280. Seminar: Evaluation Research. (4) Designed for graduate students. Technical and political aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

281. Selected Problems in Mathematical Sociology. (4) Exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, sociological interaction.

282. Organizations and the Professions. (4) Lecture, four hours. S/U or letter grading.
283. Applied Sociology. (4) Discussion, two hours. Designed for graduate students. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

284. Topics in Mental Health and Illness. (4) Requisite: course 148. Designed for graduate students. Seminars on selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

285A-285Z. Special Topics in Sociology. (4) Seminar, three hours. Designed for graduate students. Seminars on selected current topics of sociological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit.

M286. Applied Event History Analysis. (4) (Formerly numbered 286.) (Same as Statistics M213.) Lecture, three hours. Requisites: courses 209A-209B and 209C, or 210A-210B. Introduction to regression-like analyses in which outcome is “time to event.” Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; heterogeneity; multilevel survival models. S/U or letter grading.

287. Topics in Chinese Society. (4) Discussion, three hours. Preparation: at least two upper division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change before and after 1949. S/U or letter grading.

288A-288B-288C. Mental Health Services for Persons with AIDS. (4-4-4) Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

M290. Social Theory and Comparative History. (4) (Same as History M290A-M290B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

M296A-M296B. Social Theory and Comparative History. (4-4) (Same as History M293A-M293B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

297B. Urban and Suburban Sociology. (4) (Not the same as course 297B prior to Fall Quarter 1998.) Lecture, three hours. History and present condition of cities and suburbs in America. Today’s urban/suburban neighborhoods contrasted with premodern cities. Examination of process of urbanization as it began in the early 19th century and as it still continues: house and architectural changes and changing patterns of family and social life associated with them; patterns of ethnic, social and city and suburb origin and content of today’s urban ghettos; political and city and suburb. Focus on urban/suburban megalopolises associated with New York City, Los Angeles, Chicago, and Boston. GIS mapping. Letter grading.

298A-298B-298C. Workshops in Culture and Society. (2-2-2) Discussion, 90 minutes every other week. Interdisciplinary workshops for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. In Progress and S/U or letter grading.

299A-299B-299C. Seminars: Latin American Sociology. (2-2-2) Seminar, one hour; discussion, one hour. Regular forum for presentation, reading, and discussion of research on sociology of Latin America, including presentations by invited lecturers in Mellon Seminar in Latin American Sociology series. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a research faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495B. Supervised Teaching of Sociology. (2-2) Preparation: appointment as teaching assistant in Sociology Department. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser, graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literature. The courses are also functionally supportive of such interdepartmental programs as the California State Instructional Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

Undergraduate Study

Undergraduate Courses

Spanish 1 through 3 use Garner, Rusch, and Domínguez' Claro que sí. The method is induc-
tive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

Spanish B.A./Spanish and Linguistics B.A.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the Schedule of Classes or the department office for test dates and location.

Preparation for the Majors

Required: Spanish 25 or 25A or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent as determined by the undergraduate adviser. These courses must be passed with an average grade of C or better prior to beginning upper division work in either major.

The Majors

Plan A: Spanish Language and Hispanic Literature

Required: (1) Nine core courses, including Spanish 100A-100B, 119A, 119B, 120A through 120D, and 127 and (2) five upper division Spanish elective courses, selected in consultation with an adviser, in which several areas of study are possible (e.g., language and linguistics as preparation for teaching Spanish at the secondary level; literature of Spain; literature of Latin America; Chicano literature; or any combination which might also include literature and film, or women in Spanish and Latin American literature).

Plan B: Spanish and Linguistics

Required: Completion of six terms of study in one language other than Spanish and English or three terms in each of two other languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A-100B, 105, 115, M118A-M118B, Linguistics 103, 110, 120A, 120B, 165A or 165B, and four upper division Spanish electives.

Honors Program

The honors program is open to Spanish majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project which they pursue under the faculty member’s guidance through Spanish 170. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

Portuguese B.A.

Preparation for the Major

Required: Portuguese 3, M35, M42 or M44, 46, or equivalent.

The Major

Portuguese Language and Literature

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B or 130A-130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

Portuguese and Linguistics Concentration

Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A-M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

Study in a Portuguese-Speaking Country

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Spanish and Portuguese B.A.

Preparation for the Major

Required: Spanish 25, Portuguese 25, M35, M42 or M44, 46, or equivalent.

The Major

Required: Six upper division courses in language and linguistics, including Spanish 100A-100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: group A (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; group B (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; group C (Spanish-American and Brazilian literature to 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; group D (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

Portuguese Minor

To enter the Portuguese minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 3 or 102B.

Required Lower Division Course (four units):

Portuguese 46.

Required Upper Division Courses (24 units):

Portuguese 105 and five Portuguese courses selected from 100A through 199 (except 102A-102B). Only one four-unit Portuguese 199 course may be selected.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Spanish Minor

To enter the Spanish minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

Required Lower Division Courses (eight units):

Spanish 25 or 25A, and M42 or M44.

Required Upper Division Courses (26 units):

Five courses (22 units) in literature selected from Spanish 119A through 197 (two of the five must be from 120A through 120D). Only one four-unit Spanish 199 course may be selected.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Spanish Linguistics Minor

To enter the Spanish Linguistics minor, students must have an overall grade-point aver-
age of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

Required Lower Division Courses (eight units): Spanish 25 or 25A, and M35.

Required Upper Division Courses (24 units): Spanish 100A-100B, three courses from 107, 115, M118A, M118B, and one other upper division Spanish course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdntrnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees

Spanish

Admission

The department considers only applicants whose objective is the Ph.D. Admission to the program leading to the Master of Arts degree in Spanish is based on a careful review of the applicant’s academic record by the graduate admissions committee. Minimum requirements are the UCLA B.A. in Spanish or another recognized university and a satisfactory score on the Graduate Record Examination (GRE) General Test. If the graduate admissions committee deems that some area of the applicant’s preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

Areas of Study

The department offers two areas of concentration for the M.A. degree in Spanish: literature and linguistics.

Course Requirements

Ten courses, seven of which must be at the graduate level, are required for the MA. Spanish 495 may count as one of the 10 courses but may not replace one of the graduate courses. Up to two graduate courses may be taken in another department with the approval of the graduate adviser. Spanish 596 may be taken only once; courses 597 and 598 do not count toward the degree.

Students choose a concentration from either literature or linguistics.

Literature. Students who choose the literature concentration must take Spanish M201A-M201B and one graduate course in Spanish or Portuguese linguistics. The remaining seven elective courses are selected in consultation with the graduate adviser, who takes into account the student’s interests as well as the necessary preparation for the comprehensive examination.

Linguistics. Students who choose the linguistics concentration are required to take either Spanish M201A or M201B and nine elective courses to be selected in consultation with the graduate adviser, who takes into account the student’s interests as well as the necessary preparation for the comprehensive examination.

Comprehensive Examination Plan

Both concentrations offer six examination areas from which a student will choose four:

- Literature. (1) Spanish literature (medieval-Golden Age); (2) Spanish literature (18th to 20th centuries); (3) Spanish-American literature (Colonial and 19th century); (4) Spanish-American literature (20th Century/Chicano); (5) Luso-Brazilian literature; (6) linguistics.
- Linguistics. (1) Spanish syntax, (2) Portuguese syntax; (3) Spanish phonetics and morphology; (4) Spanish diachronic and synchronic language variation; (5) Spanish/Spanish-American literature; (6) Luso-Brazilian literature.

Faculty members provide reading lists for their respective areas and prepare and grade examinations based on the lists. Reading lists are made public each Spring Quarter for the next academic year. Each examination area is intended either to offer the students a general overview or it can reflect the central issues in the area.

Two examinations may be chosen in the same area. For example, a student who chooses the literature concentration may take two different examinations in area one (medieval to Golden Age), if the examinations are with two different faculty members. Examinations will be administered in all areas twice a year (during the fourth week of Fall and Spring Quarters).

Once the student chooses the concentration and examination areas, the professors representing those areas become the student’s de facto committee. Students are urged to discuss the reading lists and the expectations with each professor.

The M.A. comprehensive examination consists of four two-hour examinations.

The M.A. program in Spanish is the first phase of the Ph.D. degree program in Hispanic Languages and Literatures. When students have completed all requirements for the M.A. degree, the student’s examination committee meets to evaluate the student by considering the following: (1) one writing sample in Spanish; (2) results of the comprehensive examination; (3) coursework.

A recommendation is made by the student’s committee at a general department meeting. The department decides whether (1) the student has earned a terminal M.A. degree (that is, the student may not proceed to the doctoral program) or (2) the student has earned the M.A. degree and may proceed to the second phase of the Ph.D. Students holding an M.A. degree from another university must take the comprehensive examination and present a writing sample to their committee. Up to eight graduate courses may be petitioned to count toward the Ph.D. degree.

Thesis Plan

In lieu of taking the comprehensive examination, students in either concentration may seek permission to present a thesis for the M.A. degree. Students must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

Portuguese

Admission

The department considers only applicants whose objective is the Ph.D. Admission to the program leading to the Master of Arts degree in Portuguese is based on a careful review of the applicant’s academic record by the graduate admissions committee. Minimum requirements are the UCLA B.A. in Portuguese or its equivalent and a satisfactory score in the Graduate Record Examination (GRE) General Test; three letters of recommendation may also be sought. If the graduate admissions committee deems that some area of the applicant’s preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

Areas of Study

The department offers two areas of concentration for an M.A. degree in Portuguese: literature and linguistics.

Course Requirements

Ten courses, seven of which must be at the graduate level, are required for the MA. Spanish 495 may count as one of the 10 courses but may not replace one of the graduate courses. Up to two graduate courses may be taken in another department with the approval of the graduate adviser.

Literature. Students who choose the literature concentration must take Portuguese M201A-M201B and one graduate course in Spanish or Portuguese linguistics. The remaining seven elective courses are selected in consultation with the graduate adviser, who takes into account the student’s interests as well as the necessary preparation for the comprehensive examination.

Linguistics. Students who choose the linguistics concentration are required to take either Portuguese M201A or M201B and nine elective courses to be selected in consultation with the adviser, who takes into account the student’s interests as well as the necessary preparation for the comprehensive examination.
Comprehensive Examination Plan
Both concentrations offer six examinations, from which students must choose four:

Literature. (1) Brazilian literature (colonial and 19th century); (2) Brazilian literature (20th century); (3) Portuguese literature; (4) Spanish literature; (5) Spanish American literature; (6) Portuguese linguistics.

Linguistics. (1) Spanish syntax; (2) Portuguese syntax; (3) Portuguese phonetics and morphology; (4) Portuguese diachronic and synchronic language variation; (5) Spanish/Spanish American literature; (6) Luso-Brazilian literature.

Faculty members provide reading lists for their respective areas and prepare and grade examinations based on the lists. Reading lists are made public each Spring Quarter for the next academic year. Each examination area is intended either to offer the students a general overview or it can reflect the central issues in the area.

Two examinations may be chosen in the same area. For example, a student who chooses the literature concentration may take two different examinations in area one (colonial and 19th century) if the examinations are with two different faculty members. Examinations are administered in all areas twice a year (during the fourth week of Fall and Spring Quarters). Once the student chooses the concentration and examination areas, the professors representing those areas become the student’s de facto committee. Students are urged to discuss the reading lists and the expectations with each professor.

The M.A. comprehensive examination consists of four two-hour examinations. The M.A. program in Portuguese is the first phase of the Ph.D. degree program in Hispanic Languages and Literatures. When students have completed all requirements for the M.A. degree, the examination committee meets to evaluate the student by considering the following: (1) one writing sample in Portuguese; (2) results of the comprehensive examination; (3) coursework.

A recommendation is made by the student’s committee at a general department meeting. The department decides whether (1) the student has earned a terminal M.A. degree (that is, the student may not proceed to the doctoral program) or (2) the student has earned the M.A. degree and may proceed to the second phase of the Ph.D.

Students holding an M.A. degree from another institution must take the comprehensive examination and present a writing sample to their committee. Up to eight courses may be petitioned to count toward the Ph.D. degree.

Thesis Plan
In lieu of taking the comprehensive examination, students may seek permission to present a thesis for the M.A. degree. Students must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

Doctoral Degree

Admission
The UCLA M.A. in Spanish or in Portuguese, or equivalent, is required for admission to the program leading to the Ph.D. degree in Hispanic Languages and Literatures. Three letters of recommendation, which address the applicant’s capacity for research-oriented doctoral studies and possible entry into the profession, are also required from professors familiar with the applicant’s work as a graduate student. The Graduate Record Examination (GRE) General Test is also required.

Applicants holding the M.A. in Spanish or in Portuguese from UCLA must have the recommendation of the department to proceed toward the Ph.D. degree and are so notified on receipt of the M.A. degree.

Major Fields or Subdisciplines
Dissertation topics may be selected from any field in Spanish and Portuguese language and literature. Possible fields include: Spanish linguistics; Portuguese linguistics; diachronic Hispanic linguistics and philology; medieval Spanish literature; Renaissance and Golden Age Spanish literature; 18th- and 19th-century Spanish literature; 20th-century Spanish literature; colonial Spanish American literature; 19th-century Spanish-American literature; 20th-century Spanish-American literature; Chicano literature; early Portuguese literature; modern Portuguese literature; early Brazilian literature; modern Brazilian literature; Spanish and Luso-Brazilian folklore.

Course Requirements
After the B.A., a minimum of 18 graduate courses is required. The two-quarter sequence, Spanish or Portuguese M201A—M201B, may be required if students have not previously taken it or similar courses elsewhere. Up to one third of the total courses may be taken in other departments with the approval of the dissertation adviser. Seminars may be taken for credit no more than twice, with the approval of the appropriate guidance committee, if the content of the courses is substantially different.

Written and Oral Qualifying Examinations
The qualifying examinations consist of (1) presentation of a 40-60 page paper related to the specific dissertation area, (2) presentation of a 20- to 30-page paper in the general area of the dissertation; this paper may be comparative or theoretical, (3) a two-hour University Oral Qualifying Examination at which the above research papers and a dissertation prospectus are discussed.

The examinations are normally taken no later than nine quarters after receiving the B.A. and six quarters after receiving the M.A. Only students who pass the qualifying examination are advanced to candidacy for the Ph.D.

Spanish

Lower Division Courses
1. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.
2. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.
3. Intermediate Spanish. (4) Lecture, two hours; laboratory, five hours. Enforced requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.
5. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.
6. Intermediate Spanish. (4) Discussion, five hours. Enforced requisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A− or better may enroll directly in course 25.
8A-9B. Spanish Conversation. (2-2) Discussion, three hours. Course 8A is open to students with credit for course 4. Students who have completed course 3 with a grade of B or better may be admitted.
9A-9B. Advanced Conversation. (2-2) Discussion, three hours. Enforced requisite: course 8B.
335. Spanish, Portuguese, and Nature of Language. (4) Same as Portuguese M335.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.
Spain and Spanish America, particularly in the novel and distinctive stylistic features in prose literature of 120A-120D. Literature in the Hispanic World. (5-5-5) Discussion, one hour. Required of Spanish majors; must be taken in sequence. Historical/cultural survey of Hispanic literature from its beginning in medieval Iberia to contemporary writing in Spain, Latin America, and the U.S. Relationship between fundamental unity and astonishing geographic and cultural diversity. Particular attention to relation between literature and multicultural societies in which it is produced, as well as to individual texts which define or create new artistic possibilities.

122. Medieval Literature: El Camino de Santiago. (4) Lecture, three hours. Introductory course in medieval Spanish literatures following route of imaginary pilgrimage through northern Spain in the year 1300, from French border near Rocoveselles to shrine of St. James in Santiago de Compostela. Reading works of literature (and viewing slides, listening to music, etc.) associated with each stop along the way. Letter grading.

123. Medieval Literature: Poetry. (4) Lecture, three hours. Recommended preparation: course 120A. Study of main genres through representative works.

124. Golden Age: Poetry and Drama. (4) Lecture, three hours. Recommended preparation: course 120A. Study of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus.

127. The Enlightenment and Romanticism in Spain. (4) Lecture, three hours. Recommended preparation: course 120A. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

129. 20th-Century Spanish Prose. (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

130. Post-Romanticism, Realism, and Naturalism in Spain. (4) Lecture, three hours. Recommended preparation: course 120B. Development of major trends of Spanish literature from 1850 to 1898.

131. 20th-Century Spanish Prose. (4) Course, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

132. 20th-Century Spanish Prose. (4) Course, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

133. 20th-Century Spanish Poetry and Drama. (4) Course, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish poetry and drama since 1898.

134. Literature of Colonial Spanish America. (4) Lecture, three hours. Recommended preparation: course 120A. Study of major genres and authors from the Conquest to 1610.

135. Romanticism and Realism in Spanish-American Literature. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

140. Modernismo. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

141. Mexican Literature. (4) Course, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

144. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

145. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

146. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

147. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

149. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

150. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

151. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

152. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

156. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

158. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

159. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

161. Film and Literature of the Spanish-Speaking World. (4) (Same as Comparative Literature M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grade.

162. Senior Honors Tutorial. (4) (Formerly numbered 170A, 170B, 170C.) Preparation: completion of required nine upper division major core courses with 3.5 grade-point average. Directed individual research and writing of honors thesis.

163. Undergraduate Seminar. (4) Seminar, three hours. Limited to 15 junior/senior Spanish majors. Variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in a specific term.
Portuguese

Lower Division Courses

1. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour.

2. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

3. Intermediate Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

4A-8B. Portuguese Conversation. (2-2) Discussion, three hours. Enforced requisite: course 3 (B or better).

M35. Spanish, Portuguese, and Nature of Language. (4) (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

40A-40B. Portuguese, Brazilian, and African Literature in Translation. (4-4) Lecture, three hours. Reading and discussion of selected works in translation, Papers and examinations in English. 40A. Portuguese and Portuguese-African Literature. 40B. Brazilian Literature.

M42. Civilization of Spain and Portugal. (4) (Same as Spanish M42.) Lecture, three hours; discussion, one hour. Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

M44. Civilization of Spanish America and Brazil. (4) (Same as Spanish M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

46. Brazilian Culture and Civilization. (4) Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

Upper Division Courses

102A-102B. Intensive Portuguese. (4-4) Preparation: foreign language experience (other than Portuguese). Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

103. Language and Popular Culture. (4) (Formerly numbered 101A.) Lecture, three hours. Requisite: course 102B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity.

118A-118B. History of Portuguese and Spanish. (4-4) (Same as Spanish M118A-M118B.) Lecture, three hours. Requisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. M118A. Phonology; M118B. Morphology and Syntax.

120A-120B. Introduction to Portuguese Literature. (4-4) Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Portuguese literature.

C130A-130B. Brazilian Literature and Identity: Introduction. (4-4) Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Brazilian literature.

C131. Colonial Brazilian Literature and Culture. (4) Lecture, three hours. Requisite: course 25. Study of most important authors to 1930. May be repeated for credit with topic change. Concurrently scheduled with course C231. P/NP or letter grading.

C136. Brazilian Film and Literature. (4) Lecture, three hours. Conducted in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

197. Undergraduate Seminar. (4) Seminar, three hours. Requisite: course 25. Variable topics course with readings, discussions, and papers; consult Schedule of Classes or department counselor for topic to be offered in a specific term.

199. Special Studies. (2 to 4) Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (4) (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

202. Synchronic Morphology and Phonology. (4) Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

204A-204B. Generative Grammar. (4-4) Lecture, three hours. Course 204A is requisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semantics, and phonology on style, metaphor, and meter.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

C226. Baroque and Neoclassical Portuguese Literature. (4) Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

C227. 19th-Century Portuguese Literature. (4) Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C127. S/U or letter grading.

C228. Post-Romanticism and Naturalism in Portuguese Literature. (4) Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

C229. 20th-Century Portuguese Literature. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/U or letter grading.

C231. Colonial Brazilian Literature and Culture. (4) Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

C232. 19th-Century Brazilian Literature and Culture. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C132. S/U or letter grading.

C235. 20th-Century Brazilian Literature. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.
M249. Folk Literature of the Spanish and Portuguese Worlds. (4) (Same as Folklore M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4) (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

252. Studies in Early Portuguese Literature. (4) Discussion, two hours.

253. Studies in Modern Portuguese Literature. (4) Discussion, two hours.

254. Studies in Early Brazilian Literature. (4) Discussion, two hours.

255. Studies in Modern Brazilian Literature. (4) Discussion, two hours.

256A-256B. Studies in Portuguese Linguistics. (4-4) Lecture, two hours. Study of problems in analysis and description of the contemporary Portuguese language.

290. Special Topics. (4) Discussion, two hours. Designed for graduate students. Consult Schedule of Classes or department counselor for topics to be offered in a specific term. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (4 to 8) Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations. (4 to 12) Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

Speech

College of Letters and Science

UCLA
334 Kinsney Hall
Box 951538
Los Angeles, CA 90095-1538
(310) 825-3303
http://www.sscnet.ucla.edu/speech

Neil M. Malamuth, Ph.D., Chair
Professor
Neil M. Malamuth, Ph.D. (Communication Studies)
Professor Emeritus
Ralph Richardson, Ph.D.
Associate Professor
Paul I. Rosenthal, Ph.D. (Communication Studies)

Senior Lecturers
Marde S. Gregory, M.A.
Thomas E. Miller, M.A.

Lecturers
Dee Bridgewater, Ph.D.
John Kochian, M.A.
Sonya H. Packer, M.A.

Scope and Objectives
There is no major in speech; however, several undergraduate courses are offered for interested students.

Speech

Lower Division Courses

A. Oral Communication for Nonnative Speakers. (No credit) Lecture, four hours. Speech A displaces four units on student’s Study List but yields no credit toward a degree. Emphasis on public and private speaking skills in American English necessary for social, academic, and professional growth in this country. Provides experiences necessary to remove barriers to communication created by inappropriate oral language usage. Offered in summer only. P/NP grading.

1. Principles of Oral Communication. (4) Preparation: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

1A. English Language Program in Effective Speaking. (4) Lecture, eight hours and 20 minutes. Combination of courses A and 1 to help nonnative speakers of English increase fluency and vocabulary while also improving presentation skills. Language usage, reasoning, style, and delivery. Conversation and pronunciation practice. Offered in summer only. P/NP or letter grading.

2. Public Speaking and Discussion. (4) Enforced requisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposium, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

Upper Division Courses

190A-190B. Forensics. (2-2) May be repeated once for credit.

191. Analysis and Briefing. (2) Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit.

197. Proseminar: Rhetoric. (4) Designed for seniors. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

199. Special Studies. (2 to 4) Limited to seniors.

Thomas S. Ferguson, Ph.D.
Robert I. Jennrich, Ph.D.
James B. MacQueen, Ph.D.
Judea Pearl, Ph.D.
Sidney C. Port, Ph.D.
N. Donald Ylvisaker, Ph.D.

Assistant Professor
Frederic R. Schoenberg, Ph.D.
Yingnian Wu, Ph.D.

Lecturer
Mahbush Eslami, Ph.D.

Adjunct Assistant Professors
Darlene R. Goldstein, Ph.D.
Robert L. Gould, Ph.D.
Vivian Lew, Ph.D.
Zhenwei Zhou, Ph.D.

Scope and Objectives
The Department of Statistics was formally established in April 1998. One of the department goals is to coordinate both the undergraduate and graduate teaching of statistics at UCLA. Statistics is important for all sciences because a great deal of advanced work in each scientific discipline involves statistical analysis and interpretation of data. In addition, many laws, proposals, and programs in society require statistics for the purpose of evaluating collected quantitative data.

Undergraduate Study

Undergraduate Courses

Students planning to pursue advanced degrees in statistics should enroll in the Statistics M100A, 100B-100C sequence. The 110A-110B sequence is less comprehensive than the 100 series. In particular, probability topics do not receive the same level of coverage. Courses 110A-110B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the department office in February.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and
is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree
The Department of Statistics offers the Master of Science (M.S.) degree in Statistics.

Admission
Prospective graduate students in statistics need not have an undergraduate statistics major but should have at least 12 quarter courses (or eight semester courses) in substantial upper division quantitative work, preferably in mathematics and statistics. Applicants must have a cumulative grade-point average of at least 3.2 in the upper division courses. Applicants must take the Graduate Record Examination (GRE) General Test and a Subject Test, preferably in Mathematics, and must submit at least three letters of recommendation from persons who can attest to their quantitative skills.

Areas of Study
The strengths of current and prospective faculty members dictate the specific fields of emphasis in the department: computational and computer-intensive statistics, applied multivariate analysis, social statistics, and program evaluation.

Comprehensive Examination Plan
Students must pass the applied and theoretical statistics qualifying examinations at the M.S. level within seven quarters of full-time study. The examinations are offered during the Fall Quarter and toward the end of the Spring Quarter and are three-hour tests. Students may retake them any number of times until the examinations have been passed.

Thesis Plan
None.

Doctoral Degree
Admission
Prospective graduate students in statistics need not have an undergraduate statistics major but should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division quantitative work, preferably in mathematics and statistics. For direct admission to the program leading to the Ph.D. degree in Statistics, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master’s degree must have maintained an average of better than 3.5 in graduate study. Applicants must take the Graduate Record Examination (GRE) General Test and a Subject Test, preferably in Mathematics, and must submit at least three letters of recommendation from persons who can attest to their quantitative skills.

Major Fields or Subdisciplines
The strengths of current and prospective faculty members dictate the specific fields of emphasis in the department: computational and computer-intensive statistics, applied multivariate analysis, social statistics, and program evaluation.

Course Requirements
Students are required to pass (with grades of A or B) at least 18 approved graduate courses, of which at least six are outside the department. These courses are to be in professional or scientific fields closely related to research in statistics.

Written and Oral Qualifying Examinations
There are four qualifying examinations: one in theoretical statistics, one in applied statistics, one in data analysis, and one in probability. Students are required to pass three of the four exams at the Ph.D. level. The three passed must include applied and theoretical statistics. Students should pass qualifying examinations early in their graduate studies, preferably early in the second year. Students should consult an adviser in the area in which they plan to do research for advice on which qualifying examinations should be taken. After passing the written qualifying examinations, students set up a doctoral committee to administer the University Oral Qualifying Examination for advancement to candidacy.

Statistics

Lower Division Courses

10. Elementary Statistics. (4) (Formerly numbered 50.) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means. P/NP or letter grading.

M11. Introduction to Statistical Methods for Business and Economics. (4) (Formerly numbered M51B.) (Same as Economics M40.) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means. P/NP or letter grading.

M12. Introduction to Statistical Methods. (4) (Formerly numbered M51C.) (Same as Geography M40.) Lecture, three hours; laboratory, 90 minutes; outside study, seven and one-half hours. Satisfies statistics requirement for Geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. P/NP or letter grading.

M21A. Introduction to Quantitative Methods. (4) (Formerly numbered M51A.) (Same as Anthropology M80.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test). P/NP or letter grading.

M21C. Interpretation of Quantitative Data. (4) (Formerly numbered M51F.) (Same as Sociology M19.) Lecture, three hours; discussion, one hour. Enforced requisites: (Mathematics 2 or 3A) and Sociology 1 (may be taken concurrently). Satisfies statistics requirement for Sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals. P/NP or letter grading.

Upper Division Courses

M100A. Probability Theory. (4) (Formerly numbered M152A.) (Same as Mathematics M170A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33B. Not open to students with credit for course 110A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading.

100B-100C. Statistics. (4-4) (Formerly numbered 152B-152C.) Lecture, three hours; discussion, one hour. Not open to students with credit for courses 110A-110B. P/NP or letter grading. 100B. Requisite: course M100A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. 100C. Requisite: course 100B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

110A-110B. Statistics. (4-4) (Formerly numbered 154A-154B.) Lecture, three hours; discussion, one hour. Not open to students with credit for courses M100A and 100B. P/NP or letter grading. 110A. Requisites: Mathematics 32B, 33B. Not open to students with credit for course M100A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, expectation, estimation, central limit theorem, confidence intervals, testing. 110B. Requisite: course 110A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

M120A-M120B. Regression Analysis. (4-4) (Formerly numbered M153A-M153B.) (Same as Biostatistics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Requisites: course 100B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. M120A. BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics: model building. M120B. Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

130. Statistical Analysis System (SAS). (4) Lecture, three hours; discussion, one hour. How to enter and analyze data with Statistical Analysis System (SAS). Discussion of the many statistical techniques available in SAS and ways to extend basic system by SAS programming. P/NP or letter grading.

199. Independent Studies for Internships. (2 to 4) Tutorial, to be arranged. Independent studies course to be supervised jointly by the Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.
Graduate Courses

203. Sequential Analysis. (4) (Formerly numbered Mathematics 278D.) Lecture, three hours. Requisites: course 200B, Mathematics 131A. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics. Letter grading.

204. Nonparametric Function Estimation and Modeling. (4) (Formerly numbered Mathematics 278I.) Lecture, three hours. Requisite: course 200A. Introduction to many useful nonparametric techniques such as nonparametric density estimation, nonparametric regression, and high-dimensional statistical modeling. Some semiparametric techniques and functional data analysis. Letter grading.

M211. Analysis of Data with Qualitative and Limited Dependent Variables. (4) (Formerly numbered Mathematics M278L.) (Same as Sociology M242.) Lecture, three hours. Requisites: courses M100A and 100B-100C, or Sociology 210A-210B. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

212. Evaluation and Survey Analysis. (4) (Formerly numbered Mathematics 278E.) Lecture, three hours. Requisite: course M120B. Primary focus on methods of program evaluation. Randomized experiments, observational studies, and topics such as matching, stratification, covariance adjustments, and sensitivity analyses. Letter grading.

M213. Applied Event History Analysis. (4) (Formerly numbered Mathematics M278H.) (Same as Sociology M286.) Lecture, three hours. Requisites: Sociology 209A-209B and 209C, or 210A-210B. Introduction to regression-like analyses in which outcome is “time to event.” Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; survival analysis in the Cox model; nonproportional hazards; parametric survival models; heterogeneity in survival models. S/U or letter grading.

M215A-M215B. Linear Statistical Models. (4–4) (Formerly numbered Mathematics M279A-M279B.) (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss-Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

221. Time-Series Analysis. (4) Lecture, three hours. Requisites: courses M100A, 100B-100C. Exploration of methods for analyzing numerical time-series data. Basic topics in temporal and frequency analysis, followed by more recent topics. Examples in various fields including economics, signal processing, and atmospherics. S/U grading.

285. Current Topics in Statistics. (4) (Formerly numbered Mathematics 285L.) Seminar, three hours. Topics in various statistical areas by means of lectures and informal conferences with staff members. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice experiences under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Statistics. (2) Seminar, two hours; intensive training at beginning of Fall Quarter. Required of all potential departmental teaching assistants and new Ph.D. students. Practical and theoretical issues in teaching of statistics. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit. Letter grading.

Surgery

Upper Division Course

199. Special Studies. (2 to 8) Tutorial, to be arranged. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

Scope and Objectives

UCLA’s theater program offers comprehensive training for the profession, as well as serious study of theater’s 2,000-year history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, or the comprehensive study of theater, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

Undergraduate Study

Theater B.A.

The Bachelor of Arts degree provides a liberal education and preprofessional training in a comprehensive program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — acting, design, directing, the history and criticism of theater and drama, musical theater, and playwriting. The program is designed to ensure that students graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

This comprehensive program in Theater provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore acting, design, directing, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study.

At the upper division level, students choose from an array of advanced elective courses in acting, design and production, directing, musical theater, playwriting, and theater history and drama, leading to a culminating research or creative experience in the senior project.

The acting sequence electives include fundamental and advanced courses in all aspects of performance training that prepare students for careers in performance. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, movement, and combat.

The design and production sequence electives introduce design principles and investigate the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Four design and production areas of study are available at the upper division level — scenic design, costume design, lighting design, and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, computer-aided design, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each area of study examines design principles and practice specific to each field.

The directing sequence electives explore the basic theories of play direction, as well as text analysis and craft fundamentals. Advanced courses emphasize psychological aspects of director-actor communication and development of specific directorial and production styles.

The Ray Bolger musical theater program sequence electives are aimed at providing preprofessional training in a specific area of theater practice. Courses are designed to train selected students in acting, singing, and dance for the musical theater stage as well as providing knowledge of music theater history. The dance courses (Theater 1A-1B-1C) are open to all freshman Theater majors and must be taken as requisites to be considered for the music theater program. Auditions for the program are held during Spring Quarter of the freshman year. Junior transfer students are also eligible for consideration for an audition. The number of juniors admitted varies each year and is based on sophomore attrition. Ad-
ditional courses provide hands-on training with various artists and a range of performing experiences from workshops to full production.

The history and criticism of theater and drama sequence electives include the study of fundamental cultural, social, ethical, and political issues in the context of artistic expression enriched by historical perspective. The curriculum promotes an awareness of the theater as a global phenomenon embodying the contributions of diverse cultures and explores the verbal and visual elements of its language as revealed through the dynamics of theater production.

The playwriting sequence electives include specialized and advanced courses that prepare students to write one-act and full-length plays, books and lyrics for music theater, and scripts for the one-person show.

Admission
All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of the application the department notifies students of the screening process, which includes submission of a written essay on a topic selected annually by faculty members, letters of recommendation, and an interview and/or audition. Information on the schedule of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, design and production, directing, history and criticism, musical theater, and playwriting.

All entering students are admitted to the Theater major and may audition and/or interview for elective courses in acting, design and production, directing, history and criticism of theater and drama, musical theater, or playwriting.

Preparation for the Major
Required: Theater 11, 12, 13, 14A-14B-14C, 15, 50 (must be taken for four units total).

The Major
Required: A total of 58 upper division units, including Theater 101A-101B-101C, 106, 150 (must be taken for four units total), 180, and 34 upper division elective units selected from courses 100 through 199 not otherwise specified as requirements.

Through certain of these required courses, students are responsible for completing specific production assignments related to production activity of the theater curriculum.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The Department of Theater offers a Master of Arts (M.A.) degree in Theater and a Master of Fine Arts (M.F.A.) degree in Theater.

Master of Arts
Admission
The M.A. degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree and who do not wish to continue in the doctoral program.

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA Application for Graduate Admissions, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Requirements include the results of the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information such as résumé, portfolio, script, production book, and interview that may be required to establish the quality of applicants’ work in the specialization. Consult the Student Services Office.

Areas of Study
The program leads to a general graduate degree, though there are opportunities, through electives and thesis or research paper topic, to stress a particular interest such as acting, design, directing, dramatic writing, or theater history and criticism.

Course Requirements
Students are required to complete a minimum of 10.5 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study and research leading to the successful completion of either the thesis or comprehensive examination plan.

The required courses are Theater 245A and C272 (a two-unit course to be taken three times). After consultation with an adviser, students select seven other courses, including one graduate course in theater history (Theater 205A, 205B, or 205C), one graduate course in theater production theory (Theater 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take Theater 205A-205B-205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

Comprehensive Examination Plan
Students must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during the final quarter of residency, at which time students should have advanced to candidacy.

Thesis Plan
Before beginning work on the thesis, students must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the Ph.D. critical studies committee. A thesis committee is then formed when students are within one quarter of completing the coursework, at which time they are eligible to advance to candidacy. The adviser and the committee must have a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If the thesis fails to pass the committee, students may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

Master of Fine Arts
Admission
Students are admitted to the M.F.A. program in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA Application for Graduate Admissions, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.
Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Evidence of creative ability and professional intent is required. When submitting the application, applicants must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

Applicants should submit a complete résumé and audition for the acting committee or its representative.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). Submit a résumé and evidence of ability appropriate to the area of emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. An interview and presentation of the portfolio is required.

Directing. Submit a résumé and evidence of production work, which may include copies of prompt books, photographs, reviews, and critical commentaries, and an essay outlining a directorial approach to a selected play. If the review committee requests an interview, applicants are notified of city location and dates at which time a full portfolio may be presented. Interviews are conducted at various locations around the country in February.

Playwriting. Submit a résumé and two examples of creative writing which may include dramatic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

Producer's Program. Submit a résumé, examples of related coursework, and a statement outlining areas of specific interest and intent. An interview may be required by the department.

In addition, all applicants must submit three letters of recommendation. The Graduate Record Examination (GRE) is not required. Consult the Student Services Office.

Areas of Study
The areas of specialization for the M.F.A. program are as specified above under the Admission section.

Course Requirements
Acting. A total of 23.5 courses (94 units) is required for the degree; of these, 20.5 courses (82 units) must be graduate-level (200 and 400 series) courses. Only 12 units of 596 courses may be applied toward the total number of units for the degree and the minimum graduate course requirement.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). A total of 26 courses (104 units) is required for the degree; of these, 23.5 courses (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 10 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Directing. A total of 26.5 courses (106 units) is required for the degree; of these, 23.5 (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 12 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Students are required to enroll in a minimum of 12 units per quarter. Required courses are scheduled to permit completion within a three-year period.

Specific course requirements for each program are available in the Student Services Office.

Comprehensive Examination Plan
The plan is satisfied by fulfilling a series of creative projects appropriate to students' specializations. On completion of the final creative project or in the last quarter of residence, whichever is last, students must file for advancement to candidacy. The committee reviews and evaluates students' records. Student participation in the final review is at the discretion of the committee.

If students fail the review and evaluation of their creative work by the examining committee, they may, with the approval of the department chair, be reexamined.

Thesis Plan
None.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D. program in Theater must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, and criticism, (2) the imagination and quality of scholarly writing and academic achievements, (3) grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, and fellowships. Additionally, candidates should demonstrate awareness and experience in one of the major fields of theater.

Applicants may be admitted with an M.F.A., M.A., or B.A. degree. The dossier for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Services Office.

Major Fields or Subdisciplines
Ph.D. students in theater are expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

Course Requirements
During the first six quarters (two academic years), students must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic. A screening examination is administered during the first week of the Fall Quarter based on a reading list supplied at the time of application. Results of this examination may require the completion of background courses.

Written and Oral Qualifying Examinations
At the end of the student's second quarter in residence, a preliminary oral examination is administered by a representative committee of the faculty. The committee specifies the area of review, tests background preparation and progress to date, and determines general fitness to continue in the doctoral program.

After completing all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, students are required to pass a written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the committee, students may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the quarter in which it was first taken.

After the written examination is passed, a doctoral committee is formed to administer the University Oral Qualifying Examination. Students are advanced to candidacy only on successful completion of this examination.

Theater
Lower Division Courses
1A-1B-1C. Introduction to Dance for Music Theater. (1-1-1) Studio, four hours. Designed for Theater majors. Introduction to basic music theater dance technique. Letter grading.
Upper Division Courses

101A-101B. History of World Theater and Drama. (4-4-4) Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of theater as a social institution. 101A. Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collective ritual, Greek festival drama, andCloister drama of different cultures. 101B. Rise of Secular Drama. Study of Renaissance secular theater and drama in Europe, Asia, Africa, and the New World. 101C. Emergence of Realism and 20th-Century Responses. Study of realism and subsequent departures from realism in theater and drama.

102A. Theater of Japan. (4) Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions.

102B. Theater of Southeast Asia. (4) Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society.

102C. Cross-Cultural Currents in Theater. (4) Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures.

102D. Contemporary Theater Issues. (4) Lecture, three hours. Investigation of theater in contemporary American culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

103A. History of World Theater and Drama. (4-4-4) Lecture, two hours; studio, four hours. Exploration of theatrical performance and styles of expression, development of acting, voice, and movement skills. Letter grading.

104A-104B-104C. History of American Theater. (4) Lecture, three hours. Examination of representative theatrical genre from Primitive Times to 1640. 105A. Age of Shakespeare. 105B. Age of Restoration. 105C. Age of Public Theater. Lecture, three hours. Discussion of American theater history from 1887 to the present. May be repeated twice for credit.

106. History of American Theater and Drama. (4) Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dramatic works and theatrical presentations.

107. Drama of Diversity. (4) Lecture, three hours. Investigation of diversity in American society as manifested in dramatic works and theatrical presentations.

108. Special Topics in History and Criticism. (4) Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dramatic works and theatrical presentations.

111A. Selected Topics on History of European Theater from Primitive Times to 1640. (4) Lecture, three hours. Investigation of selected areas of study in theater history from the Greeks to 1640. May be repeated twice for credit.

111B. Selected Topics on History of European Theater from 1640 to 1900. (4) Lecture, three hours. Investigation of selected areas of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

111C. Selected Topics on History of European Theater from 1900 to the Present. (4) Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Baroque to the present. May be repeated twice for credit.

114A-114B-114C. Dance and Singing for Music Theater I. (1-1-1) Studio, five hours. Requisite: course 1A. Designed for Theater majors. Sophomore-level course providing foundation for music theater students’ voice training, as well as dance and movement training. Letter grading.

124B. Advanced Speech. (2) Studio/laboratory, three to four hours. Requisite: course 124A. Designed to acquaint students with International Phonetic Alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of dictation versatility.

125A. Advanced Movement. (2) Studio/laboratory, three hours. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

125B. Advanced Movement and Combat. (2) Studio/laboratory, three to four hours. Requisite: course 125A. Advanced and contemporary approach to classical and modern movement for the stage actor.

128A-128F. Acting, Voice, and Movement Workshops II. (2 each) Studio, four to six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

CM129. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these acting individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

130A. Fundamentals of Playwriting I. (4) Lecture, three hours; discussion, one hour. Required of Theater majors. Designed to stimulate students' creative faculties through preparation and completion of a one-act play. Students' critical faculties stimulated by play analysis and scene exercises in discussion section.

130B. Fundamentals of Playwriting II. (4) Lecture, three hours plus conference. Requisite: course 130A. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

130C. Writing for American Musical Theater. (4) Lecture/laboratory, three hours. Study of practice and techniques used in writing a libretto for musical theater; opening numbers, romance, subplots, and comedic. May be repeated once for credit.

C133A-C133B-C133C. Script Development Workshops. (4-4-4) Laboratory, three hours. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C133A may be repeated once for credit. Concurrently scheduled with courses C433A-C433B-C433C.

134A-134B-134C. Dance and Singing for Music Theater II. (1-1-1) Studio, five hours. Requisites: courses 1A, 114A-114B-114C. Designed for Theater majors. Junior-level course providing intermediate-level instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

135A-135B-135C. Dance and Singing for Music Theater III. (1-1-1) Studio, five hours. Requisites: courses 1A, 114A-114B-114C, 134A-134B-134C. Designed for Theater majors. Senior-level course providing advanced instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

136A. Advanced Acting for the Stage. (4) Lecture/laboratory. Requisite: course 123. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

137A-137B-137C. Continuum Study in Acting for the Stage. (4-4-4) Studio, six hours. Requisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

138. Special Problems in Performance Techniques. (4) Lecture/laboratory. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

141A. Lighting Techniques for the Stage. (4) Lecture, three hours; laboratory, six hours. Requisite: course 140A. Required of Theater majors. Intensive study of theater lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any combination.

144. Theater Sound Techniques. (2) Lecture, two hours; laboratory, two hours. Requisites: courses 14A-14B-14C. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

145. Costume Design for the Theater. (4) Lecture/laboratory. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.

147A. Drafting. (4) Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit.

147B. Rendering. (4) Introductory course in basic skills necessary for drawing and rendering for scenic, costume, and lighting design for theater, film, and television. May be repeated once for credit.

148. Special Courses in Design and Technical Theater. (4) Lecture, three hours. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

150. Theater Production and Performance. (2) Studio, six hours. Requisite: course 10. Required of Theater majors. Intensive study of production and technical theater majors. Senior-level course providing performance in a project or production, stage management, member of a crew, or assignment as a designer or assistant on a production. May be repeated for a maximum of eight units.

C156B. Introduction to Computer-Assisted Design. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C456B.

C156C. Introduction to Computer-Assisted Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C456C.

C163D. Directing Project for the Stage. (4) Lecture, four hours; studio, six hours. Requisites: courses 163A-163B-163C. Completion of course C163D satisfies course 180 requirement. Application of stage directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C253D.

C171A. Advanced Technical Laboratory. (1 to 4) Hours to be arranged. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of four units.

C171B. Advanced Theater Laboratory. (1 to 4) Hours to be arranged. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

C172. Technical Theater Laboratory. (2) Hours to be arranged. Required of Theater majors. Laboratory in various aspects of theater production. May be repeated for a maximum of eight units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

C173A. Design Assignment: Assistant Designer. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Laboratory experience as an assistant designer including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

C173B. Production Design Assignment: Designer. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Laboratory experience as a designer including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

C174A. Stage Managing Techniques. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Professional duties of stage manager, Problems of unions, professional audits, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run. May be repeated twice.

C174B. Project in Stage Management. (3) Studio, nine hours. Requisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in prepread roles of a production. May be repeated once for credit.

C174C. Project in Stage Management. (4) Studio, 12 hours. Requisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as a stage manager in prepread, rehearsal, and performance phases of a production. Problems of unions, auditions, organization, scheduling, and responsibilities of a lengthy run. May be repeated once for credit.

C175A-175D. Summer Theater Workshops. (4 or 8) Lecture, 12 hours. Preparation of complete designs and drawings for a production and assembly of a design portfolio and résumé. Projects prepared under guidance of a faculty adviser. Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of eight units.

C191. The Touring Company. (2 to 12) Lecture, 20 hours; laboratory, 22 hours. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

C192. Motion Picture, Television, and Theater Internship. (2, 4, or 8) Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Limited to senior Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

M193. Art Alive: Art and Performance in the Museum. (4) (Same as Honors Collegium M116.) Offered in collaboration with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogue, movement, and music. Research into history and art history and production of a creative performance piece required. P/NP or letter grading.

199. Special Studies in Theater Arts. (2 to 5) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of eight units.

Graduate Courses

202A. Seminar: Western Classical Theater. (4) Discussion, three hours. Designed for graduate students. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

202B. Seminar: Medieval Theater. (4) Discussion, three hours. Designed for graduate students. Selective studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

202C. Seminar: Renaissance and Baroque Theater. (4) Discussion, three hours. Designed for graduate students. Selective studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar: Bourgeois and Romantic Theater. (4) Discussion, three hours. Designed for graduate students. Selective studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar: Modern Consciousness in Theater. (4) Discussion, three hours. Designed for graduate students. Study of prototypes of modern experience as encountered in works of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar: Modern Realism. (4) Discussion, three hours. Designed for graduate students. Selective studies of theater’s response to science and technology, politics, and revolution. May be repeated twice for credit.

202G. Seminar: Modern Theatricalism. (4) Discussion, three hours. Designed for graduate students. Study of modernism and avant-garde theater, exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

202M. Seminar: American Theater. (4) Discussion, three hours. Designed for graduate students. Selective studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

202P. Seminar: Traditions of African Theater. (4) Discussion, three hours. Designed for graduate students. Selective studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

202R. Seminar: East Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selective topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.
208C. Practicum in Dramaturgy. (2 to 12) Discussion, three hours. Designed for graduate students. Selected topics in drama theory forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202T. Seminar: Southeast Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

203. Theater Ethics and Issues. (5) Seminar, four hours. Designed for graduate students. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

204. Theater Genres. (5) Seminar, four hours. Designed for graduate students. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

206. Themes in World Theater and Drama. (5) Seminar, four hours. Designed for graduate students. Selected topics in world theater history, drama, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

207A-207B. Theater Aesthetics. (4-4) Designed for graduate students. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of the theater. 207A, Classical and Medieval Theories of Art and Theater; 207B, Renaissance Theories of Art and Theater to the Present.

208A-208B. Dramaturgy I, II, (4-4) Lecture, three hours; laboratory, one hour. Designed for graduate students. Letter grading. 208A. (Formerly numbered 208.) Theoretical and practical aspects of dramaturgy's work in contemporary theater. 208B. Requisite: course 208A. Continuation of study of theory and practice of dramaturgy.

208C. Practicum in Dramaturgy. (2 to 12) (Formerly numbered 495C.) Laboratory, to be arranged. Requisites: courses 207A-207B. Demonstrates competence in practice of dramaturgy through completion of approved dramaturgical assignment. May be repeated for a maximum of 12 units. Letter grading.

209. Theater Authors. (5) Designed for graduate students. Investigation of work of a theater artist from history of world theater, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

210. Topics in World Theater and Drama. (5) Designed for graduate students. Investigation of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

220. Graduate Forum. (1) Seminar, two hours bi-monthly or five times per term. Limited to graduate theater students. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) Same as Film and Television CM229. Lecture, two hours; screenings, two hours. Limited to junior/senior students. Research, production, and film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of the collaborative effort; examination of distinctive and interrelationships among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

230A-230B-230C. Writing for the Contemporary Theater. (4 to 8 each) Lecture, three hours; studio, two hours. Designed for graduate students. 230A. One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. 230B. Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. 230C. Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

232. Manuscript Analysis. (4) Lecture, three hours. Designed for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

242A-242B-242C. History of Style and Ornamenataion. (4-4-4) Designed for graduate students. In-depth study of history of costume, architecture, interiors, furnishings, and their interrelationships from early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

243A-243B-243C. Scene Design. (4-4-4) Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. May be repeated once for credit.

244A. Advanced Theater Laboratory. (2 or 4) Laboratory, to be arranged. Designed for graduate students. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

244B. Advanced Theater Laboratory. (2 or 4) Laboratory, to be arranged. Designed for graduate students. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

245A. Production Management. (4) Lecture, three hours. Study in production management for the theater. Examination of professional duties of production manager, including preparation, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment.

245B. Production Management. (4) Lecture, three hours. Requisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment.

245C. Projects in Production Management. (4) Studio/laboratory. Requisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting.

246A-246B-246C. History of Costume. (4-4-4) Lecture/studio. Designed for graduate students. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures.

247. Collaborative Project in Design and Production. (3 to 4) Studio, four hours. Designed for graduate students. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

260. Directing I. (4) Lecture, four hours; studio, 24 hours. Designed for graduate students. Development of directorial skills of analysis, planning, staging, and criticism through medium of written preparations and directing of scenes.

261. Directing II. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in direction of post-realist plays through medium of interpretation and laboratory scene work.

263. Production Project in Direction for the Stage. (2 to 6) Discussion, one hour; studio, 12 to 24 hours. Designed for graduate students. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

263D. Directing Project for the Stage. (4) Lecture, four hours; studio, six hours. Requisites: courses 183A-183B-183C. Application of stage directing techniques in production of short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C163D.

264. Directing Classical and Historical Drama. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

265. Modern Theories of Production. (4) Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theatrical event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation.

266. Theatrical Conceptualization. (4) Examination of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production.

272. Production and Performance Laboratory. (2) Lecture, three hours; laboratory, to be arranged. Designed for graduate students. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses 272 and 247.

290A. Role of Management in Artistic Decision Making in the Theater. (4) Discussion, four hours. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations. S/U or letter grading.
425A-425B-425C. Advanced Movement I. (2 or 4 each) Studio/laboratory, three to six hours. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements.

425D-425E-425F. Advanced Movement II. (2 or 4 each) Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques.

429. Performance Workshop. (2) Studio, four hours. Limited to graduate students not enrolled in M.F.A. acting program. Exercises in performance techniques, including autodrama and scene study. Development of performance skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to scenes.

430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each) Lecture, three hours. Designed for M.F.A. playwriting program students. Guided completion of full-length scripts for the stage.

431. Special Topics in Playwriting. (4) Discussion, two to four hours. Designed for M.F.A. playwriting program students. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

433A-C433B-C433C. Script Development Workshops. (4-4-4) Laboratory, three hours. Designed for graduate students. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C433A may be repeated once for credit. Concurrently scheduled with courses C133A-C133B-C133C.

441A-441B-441C. Lighting Design. (4-4-4) Lecture/studio. Requisites: courses 14A-14B-14C. Study of current professional lighting design practices in television and film. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill.

445A. Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

445B. Color Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of color techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill. Letter grading.

445C. Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

445D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill. Letter grading.

445E. Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

460A-460W-460AS. Contemporary Issues in Direction. (1-1-1) Discussion, three hours. Designed for graduate students. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of four units. 460B. Problems in Advanced Direction for the Stage. (4-4) Lecture, to be arranged. Limited to M.F.A. candidates. Discussion and critique of work in progress. 460C. Preparation and presentation of a published play under rehearsal conditions. 460D. Preparation and presentation of a full-length original play under rehearsal conditions. 462. Production Project in Direction for the Stage. (4 or 8) Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress. 463. Production Project in Direction for the Stage (8 or 12 units). Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of a play of three or four acts, for a production in a small theater with limited technical facilities. 464. Projects in Theater Design. (2 or 4) Discussion, three hours. Laboratory, 12 hours to be arranged. Designed for graduate students. Study and practice in preparation of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units. 495A-495B-495C. Practicum and Practice in Teaching Theater. (2-2-2) Formerly numbered 495A, 496. Seminar, to be arranged; discussion, two hours. Limited to Ph.D. students. Study and practice of teaching theater at university level. Orientation and preparation of graduate (Ph.D.) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to the teaching experience. Letter grading. 496A-496B-496C. Directed Individual Studies: Research. (2 to 12) Work to be arranged. Designed for graduate students. May be repeated with consent of instructor. 496D. Directed Individual Studies: Writing. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor. 496E. Directed Individual Studies: Acting. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor. 501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading. 569A. Directed Individual Studies: Research. (2 to 12) Work to be arranged. Designed for graduate students. May be repeated with consent of instructor. 569B. Directed Individual Studies: Writing. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor. 569C. Directed Individual Studies: Acting. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor. 572. Production Project in Directing for the Stage. (4 or 8) Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress. 573. Production Project in Direction for the Stage (8 or 12 units). Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of a play of three or four acts, for a production in a small theater with limited technical facilities.

Master's Degrees
The Department of Urban Planning offers the Master of Arts (M.A.) degree in Urban Planning and participates in concurrent degree programs.

Master of Arts
Admission
The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the Department of Urban Planning, School of Public Policy and Social Research, UCLA, 3250 Public Policy Building, Box 951656, Los Angeles, CA 90095-1656.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are also encouraged to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for students whose native language is not English, unless at least two years of university-level coursework at an English-language institution have been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. For master's applicants, work samples such as reports, research papers, and slides are optional. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

J.D./M.A. Urban Planning
The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Applicants apply through the Department of Urban Planning. Graduate Record Examinations (GRE) scores are required.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

M.A. Latin American Studies/M.A. Urban Planning
The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Applicants apply through the Department of Urban Planning. Graduate Record Examinations (GRE) scores are required.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

M.Arch. I/M.A. Urban Planning
The Architecture and Urban Design Department in the School of the Arts and Architecture and the Department of Urban Planning in the School of Public Policy and Social Research offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

In order to be considered for the concurrent degree program, applicants must apply and be admitted to both the School of Law and the Department of Urban Planning.

For additional information, contact the graduate adviser in the Department of Urban Planning.

M.B.A./M.A. Urban Planning
The M.B.A./M.A. program is a three-year concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Department of Urban Planning. The program is designed for individuals who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students interested in the M.B.A./M.A. program should contact the M.B.A. Program Office, John E. Anderson Graduate School of Management, regarding admission requirements and application procedures.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

Scope and Objectives
The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. degree. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, an M.Arch. I in the Department of Architecture and Urban Design, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. A number of student organizations provide an interesting program of extracurricular activities.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.
Students interested in the concurrent degree program, must apply and be admitted to the M.Arch. I Program in the Department of Architecture and Urban Design, and the M.A. Program in the Department of Urban Planning.

For additional information, contact the graduate adviser in the Department of Urban Planning or the graduate adviser in the Department of Architecture and Urban Design.

Areas of Study
Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

Regional and International Development. The concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economies.

Social Policy and Analysis. The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

Environmental Analysis and Policy. The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.

Community Development and the Built Environment. This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, students can choose one of two specializations: community planning and development or physical development and public policy.

Additional Areas of Concentration. In special circumstances, students may devise their own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the department chair. Further details may be obtained from the graduate adviser.

Course Requirements
Students must complete a minimum of 72 units (18 courses). Students usually take 12 units per quarter, completing the program in two years.

A minimum of 13 courses must be graduate courses (all 200-series courses except for up to four courses or 16 units of 500-series courses) in urban planning or a related field. One 496 course (four units) may be applied toward the degree. Eight units of course 496 may be applied as electives.

Core Course Requirements. The core areas comprise knowledge common to all areas of planning, regardless of one’s specific focus. Six core courses are required: Urban Planning 207; 211 (or a course from the School of Law); 220A (waiver by examination); 220B, 222, and one course on urbanization covering urban problems and processes chosen from a menu of options. Course 222 may be waived with the instructor’s consent if the students can demonstrate mastery of the material through previous coursework with similar concepts, instructional materials, and content. Students are expected to present the relevant course syllabi. Qualified students with background in planning history may be allowed to waive course 222 and to enroll in 210B with permission of the instructor. Urban Planning 207, 220A, and 222, which are offered in the Fall Quarter, include required workshops on writing, verbal, and graphic presentation. Students who can demonstrate mastery of graphic presentation skills through prior background in design and/or graphic communications may waive the graphics workshop by portfolio review. The writing workshop may be waived by a written examination which is administered by the writing instructor at the beginning of Fall Quarter. Students must demonstrate sufficient writing skills and mastery of professional writing techniques.

On entering the program, students must pass proficiency examinations in basic mathematics and microeconomics before enrolling in Urban Planning 220A and 207 respectively. Copies of sample examinations are mailed to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination. Students are strongly encouraged to prepare for the examinations before beginning the program so that they can take Urban Planning 207 and 220A during their first year of study. If students do not pass either or both examinations, they are advised to take Mathematics 1 and/or Economics 1, 11, or 100 at UCLA during their first year of study. (These courses do not count toward the master’s degree.) Proficiency examinations need to be passed at the start of the second year in order to enroll in required courses 220A and/or 207, which are only offered in the Fall Quarter.

Area Course Requirement. Students must choose an area of concentration and select at least five courses, two of which are generally specified, from a list of courses prepared for that area. One of the required core courses on urbanization may be used to fulfill an area of concentration requirement.

Students may seek waivers for requirements that have been met through coursework prior to entering the M.A. program.

Comprehensive Examination Plan
Students must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

Plan A (Client-Oriented Project). A client-oriented project is recommended if students are more interested in practical application of what they have learned than in scholarly research. The time span of the final project approximates that of the thesis. Academic credit for project involvement is given through Urban Planning 205 and through course 597. Guidance of the project rests with a committee of at least one faculty committee chair, one consulting faculty, and a representative of the client. The project proposal should be ready for committee review by the end of the seventh week of Fall Quarter of the second year of study. The project must be successfully completed when it is approved by the faculty committee and delivered to the client.

As an alternative under Plan A, students may take Urban Planning 217A-217B for eight units credit, offered each year during the Winter and Spring Quarters, to fulfill the comprehensive examination requirement. The faculty members in charge of this course sequence, one supervising, one consulting, plus a representative of the client, make up the comprehensive examination committee. Students must notify the graduate counselor that they have selected this option and (in the event that more than one section is offered), they must indicate in which section of Urban Planning 217A-217B they are to enroll, by the end of the Fall Quarter of the second year of study.

Plan B (Two-Week Examination). Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. Each area-of-concentration faculty coordinator appoints a committee of three faculty members to cover the examination. Students may be requested to do additional work on the examination after it has been reviewed by the committee. No course credit is received for the two-week examination. Students who choose this option must notify the graduate counselor by the end of the Fall Quarter of the second year of study.

Client and comprehensive projects and two-week examinations must receive a grade of B to be of passing quality. To receive an S grade for a project graded on an S/U basis, the work
must be at the level of B. The comprehensive letter-graded project (Urban Planning 217A-217B) must receive a B average over the two terms to be of passing quality.

**Thesis Plan**

Students must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

The thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. In order to meet graduation deadlines, students must begin thesis work no later than the beginning of Fall Quarter of the second year and present a preliminary proposal to their thesis committee chair by the end of the second week of classes. The thesis committee consists of three ladder faculty and must be selected by the end of Fall Quarter of the second year. Students enroll in Urban Planning 205 for four units of academic credit for thesis preparation, and in four units of course 598.

The thesis project (course 598) must receive a grade of S to be of passing quality.

**Doctoral Degree**

**Admission**

The Department of Urban Planning admits students to the program leading to the Ph.D. in Urban Planning in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the department.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are required to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for students whose native language is not English, unless at least two years of university-level coursework at an English-language institution have been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. Work samples, preferably research papers and/or a copy of the master's thesis, are required of doctoral applicants. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Students admitted to the Ph.D. program must have a master's degree in planning or a closely related field. Students in the M.A. degree program in Urban Planning at UCLA should inform the graduate adviser before December 15 of their second year if they wish to be considered for the Ph.D. program for the following Fall Quarter.

A minimum grade-point average of 3.5 is required in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Applicants are required to submit two statements of purpose. The first should address how past experiences have shaped the applicant's interest in planning, the applicant's personal career plans, and how a Ph.D. in planning contributes to those plans. The second statement should describe the applicant's intended area of concentration, specific areas of interest in planning, including research interests, and current plans for the dissertation.

Before acceptance into the program, two faculty members must agree to assume responsibility for guiding students in their studies.

**Major Fields or Subdisciplines**

See Areas of Study under the Master of Arts section.

**Course Requirements**

A high level of competence in a major field and in planning theory and history, as measured by coursework and doctoral examinations, is required. In addition, students must satisfy a requirement in research methods outside of coursework and are required to take Urban Planning 208 to aid in the preparation of study for the major field examination. Also highly recommended in helping to develop a dissertation research and preparing for the Oral Qualifying Examination is Urban Planning 229.

**Planning Theory and History Requirement.** Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge is to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice. Students are expected to acquire an understanding of both and become familiar with the several styles and forms of planning and the major debates in the field.

Two advanced courses are required of all doctoral students during the first year and must be passed with grades of A– or better: Urban Planning 210B and 210C. Students may waive the two courses by taking a six-hour comprehensive written examination. Students who do not pass the examination must either take the courses the next time they are offered or repeat the examination (once only) after a period of no less than six months.

Students who receive less than an A– in the courses may either repeat the courses once in the following year or sit for a waiver examination once in the failed subjects (history in the case of course 210B; theory in the case of 210C).

**Major Field.** The major field is defined as a subject in which a student is prepared to teach two or three courses and conduct advanced research. The area should be generally recognized by academics in other planning sciences and should be substantially broader than a dissertation topic.

To prepare for an individualized major field examination which tests competence in an area of planned study, students must submit for approval a plan of study to their advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Spring Quarter of the first year. The plan must include (1) a one- to two-page description of the major field and its subspecializations; (2) a short indicative bibliography; (3) a list of suggested courses and research papers through which the student proposes to prepare for the examination; (4) a list of three courses to satisfy the research methods and outside field requirements; (5) a timetable indicating expected completion dates for all requirements and examinations; and (6) a brief statement identifying a possible dissertation research topic. Once approved, the plan is filed with the graduate adviser. The normal time for completion of the major field requirement is two academic years. The actual timing for the examination is set by agreement between the student and the advisory committee. Students may submit revised plans when necessary after consultation with their advisers and the coordinator of doctoral studies.

**Research Methods Requirement.** To fulfill the research methods requirement, students must complete a sequence of three methods courses beyond the introductory level with grades of B or better. All doctoral students must first demonstrate competence in statistical methods at the master's level (Urban Planning 220B or equivalent) either by completing Urban Planning 220B with a grade of B+ or better or by submitting a waiver petition with appropriate documentation.

In addition, as part of their plan of study, all students must take a preapproved set of three advanced courses in research methods. These courses, which students should begin taking in the first year in the Ph.D. program, must be closely related to the major field and must be completed with grades of B+ or better. A list of recommended courses is included in the Ph.D. handbook. Students may waive a portion of this requirement on the basis of prior work by submitting a petition with the appropriate documentation to their committee and the coordinator of graduate studies.

**Outside Field Requirement.** As with methods, the outside field requirement should be complementary with both the major field and with
the preparation of a detailed dissertation research proposal. Three courses are required and must be completed with grades of B+ or better. Students are encouraged to take these courses outside the Department of Urban Planning, but with approval from the advisory committee; courses in urban planning that are outside the major field can be included.

Written and Oral Qualifying Examinations
For details on the written qualifying examinations, see planning theory and history requirement and major field in the Course Requirements section above.

After successful completion of the planning theory and history, major field, and research methods requirements, students may nominate their doctoral committee. The committee (see graduate adviser for details) consists of four members, three of whom may be chosen from the advisory committee and one of whom must come from outside of the department.

The doctoral committee administers the University Oral Qualifying Examination. At this examination the students defend the dissertation proposal.

The University Oral Qualifying Examination should be taken by the end of the third year of doctoral study.

Urban Planning

Lower Division Course
88. Lower Division Seminar: Special Topics in Urban Planning. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in urban planning approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

CM149. Transportation Geography. (4) (Same as Geography M149.) Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

C184. Looking at Los Angeles. (4) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C284.

187. Planning and Designing Our Cities. (4) Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of student's own projects create framework for expanding understanding of urban planning and design process.

CM189. Environmentalism: Past, Present, and Future. (4 to 6) (Same as Geography M115.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate division lecture and field studies program. Concurrently scheduled with course C265. P/NP or letter grading.

M190. Human Environment: Introduction to Architecture and Urban Planning. (4) (Same as Architecture and Urban Design M190.) Lecture, three hours; outside study, nine hours. Study of the various modes and on complexities of in

Graduate Courses
M202A. Public Control of Land Development. (3 to 6) (Same as Law M202A.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

M202B. Governance: State, Regional, and Local. (3 to 6) (Same as Law M202B.) Lecture, three hours. Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability.

M202C. Seminar: Urban Affairs. (3 to 6) (Same as Law M202C.) Seminar, two hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and current control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

206A. Urban Data Analysis: Introduction to Geographic Information Systems. (4) Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one of the packaged statistics programs, Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipulation, spatial analysis, and information systems. Use of mapping and spatial analysis to address a planning problem. Letter grading.

206B. Urban Data Analysis: Planning Models. (4) Lecture, three hours; laboratory, one hour. Prerequisite: course 206A. Advanced course in urban data analysis which builds on course 206A. Examination of relationship between demographic and other socioeconomic processes, with emphasis on planning models. Topics include internal and international migration, crime analysis, transportation demand, and economic activity forecasting.

207. Public Resource Allocation. (4) Lecture, three hours. Preparation: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

209. Special Topics in Planning Theory. (2 to 8) Seminar, three hours. Topics in planning theory selected by faculty. May be repeated for credit.

210A. Introduction to Planning Theory. (4) Lecture, three hours. Historical introduction to major ideas and theories of planning which have influenced its development from the early 19th century to the present.
210B. Comparative History of Planning Practice. (4) Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its critics, and profession of planning through the 19th and 20th centuries. Comparison of evolution of the field in several countries, especially English-speaking countries.

210C. Colloquium in Planning Theory. (4) Lecture, one hour; discussion, two hours. Requisite: course 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

211. Law and the Quality of Urban Life. (4) Lecture, three hours. Introduction to law as an urban system, directed primarily toward those interested in the intersection of law and policy; broad array of urban issues examined, as is law's role as a partial cause and cure of urban problems. Examination of law as a changing process rather than a collection of principles, so that students develop facility to interact with law and lawyers in a positive and forceful manner.

214. Ethics in Planning. (4) Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, concept of environmental ethics, and evolution of code of ethics in planning profession.

220A. Introduction to Statistics and Methods of Planning. (4) Quantitative analysis and modeling. Hypothesis testing, analysis of variance, correlation, and of course 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

221. Evaluation Methods. (4) Lecture, three hours. Requisites: courses 207, 220A. Examination of methods used to evaluate efficiency and effectiveness of government programs and policies. Emphasis on methodological issues such as efficiency, fiscal audits, and evaluation design.

222. Introduction to Histories and Theories of Urban Planning. (4) Lecture, 90 minutes; discussion, 90 minutes. Exploration of planning thought and practice over time, leading in turn to place students in field settings. Students combine course 223 with one of course 490 or 496 to meet fieldwork requirement.

223. Professional Development Seminar. (4) Seminar, 90 minutes; discussion, 90 minutes. Recommended preparation: course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Job fair is held at end of Fall Quarter to place students in field settings. Generally taken Fall Quarter of first year of M.A. program.

229. Special Topics in Planning Methods. (2 to 8) Seminar on topics in planning methodology selected by the faculty. May be repeated for credit.

M215. Spatial Statistics. (4) (Formerly numbered 227.) Lecture, two hours; discussion, one hour; laboratory, one hour. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

216. Introduction to Nonprofit Development. (4) Discussion, three hours. Overview of basic concepts and skills utilized in nonprofit development initiatives, especially by community-based organizations. Focus on nonprofit provision of subsidized housing, emphasizing way nonprofit "broker" debt and equity funding from private, governmental, and philanthropic sources. Use of client projects and negotiation exercises.

217A-217B. Comprehensive Planning Project. (4) Designed for second-year students. Comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two terms. Successful completion of project meets requirements of Comprehensive Examination Plan A of master's program.

218. Graphics and Urban Information. (4) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of the built environment. Development of fundamental skills of graphic ideation and communication.

219. Special Topics in the Built Environment. (2 to 8) Seminar, three hours. Topics in the built environment selected by the faculty. May be repeated for credit.

220A. Quantitative Analysis in Urban Planning I. (4) Lecture, three hours. Preparation: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as a tool in analysis of planning-related data.

220B. Quantitative Analysis in Urban Planning II. (4) Lecture, three hours. Requisite: course 220A or equivalent as demonstrated by passing score on mathematics proficiency examination given first day of course 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

223A-235B. Urbanization and Rural Development in Third World Countries. (4 to 4) Lecture, 90 minutes; discussion, 60 minutes. Requisite for course 223A: course 223A; for course 235B: course 235A. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates.

224. Housing Markets. (4) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as the particular impacts of groups on the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses.

225. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

238. Regional Development Policy. (2 to 8) Seminar, three hours. Topics in urban and regional development policy selected by the faculty. May be repeated for credit.

242. Advanced Seminar: Urban and Regional Development. (4) Seminar, two hours; discussion, two hours. Designed for Ph.D. students. Advanced research seminar on major issues in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

243. Privatization, Regulation, and Public Finance. (4) (Formerly Policy Studies M253.) Lecture, three hours; outside study, nine hours. Requisite: Policy Studies 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

244. Housing Markets. (4) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as the particular impacts of groups on the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses.

245. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

246. Housing in Social and Economic Development. (4) Seminar, three hours. Possession of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include nature of housing "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing housing supply. Numerous case studies.

247. Race, Gender, Culture, and Cities. (4) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate the new diversities and gender with global restructuring, new urban economies, and policies of workplace, housing, schools, and governance.

249. Special Topics in Social Policy and Analysis. (2 to 8) Seminar, three hours. Topics in social policy and analysis selected by faculty. May be repeated for credit.

250. Introduction to Social Policy. (4) Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

251. Planning for Multiple Publics. (4) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year.

254. Survey Methods in Planning. (4) Lecture, three hours. Requisite: course 220B. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning; questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies.

256. Social Impact Analysis. (4) Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from development projects. Students develop mitigation measures to address identified adverse consequences.

M259. Advanced Real Estate Development for Planners and Architects. (4) (Same as Architecture and Urban Design M259.) Discussion, three hours. Requisite: course 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

260A. Political Economy and the Environment. (4) Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on functioning of market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

260B. Politics, Institutions, and the Environment. (4) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in environmental policy in light of growing environmental movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

261. Land-Use Control: Economic and Structural Perspectives. (4) Lecture, two hours; discussion, one hour. Requisites: courses 260A, 260B. Comparison of regulatory methods and issues involved in command or planning methods. Basics of land use as a commodity in first part; land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

M262A. Toxics Reduction: Science, Engineering, and Policy Issues. (4) (Same as Chemical Engineering M290U and Environmental Health Sciences M249.) Lecture, three hours. Requisites: courses 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. S/U or letter grading.

262B. Urban Environmental Problems: Water Resources. (4) Lecture, three hours. Water is life and wealth in California, which has world’s most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning.

M262C. Pollution Prevention. (2) (Same as Environmental Health Sciences M239.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

263. Natural Resource Conservation. (4) Discussion, three hours. Requisites: courses 260A, 260B. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

M264. Environmental Law. (3 to 6) (Same as Law M290.) Lecture, three to three and one-half hours. Examination of field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

C265. Environmentalism: Past, Present, and Future. (4 to 6) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

266. City and Countryside in the Third World. (4) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of regulatory methods and issues involved in command or planning methods. Basics of land use as a commodity in first part; land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

M267A. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes. (4) (Formerly, numbered 267A.) (Same as Geography M229.) Discussion, three hours. Recommended preparation: course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

267B. Rural Development Issues. (4) Lecture, three hours. Recommended preparation: course 266. Development more thoroughly of themes raised in earlier course. Topics may include peasants, development and rural-urban impacts, collective land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

269. Special Topics in Environmental Analysis and Policy. (2 to 8) Seminar, three hours. Topics in environmental analysis and policy selected by faculty. May be repeated for credit.

270. Homelessness: Housing and Social Service Issues. (4) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness; who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

M272. Real Estate Development for Planners and Architects. (4) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market and resource planning. May be repeated for credit with consent of instructor.

273. Site Planning. (4) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban areas.

274. Introduction to Physical Planning. (4) Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts.
275. Inner-City Housing Policies: Old and New Approaches. (4) Lecture, 90 minutes; discussion, 90 minutes. Study of federal and local housing policy as it affects inner cities, with emphasis on New York and Los Angeles. Examination of research on housing conditions and community development policies, with particular emphasis on alternatives such as resident-controlled housing; analysis of rehabilitation policies; review of new concepts and current legislative proposals.

277. Historic Preservation: Principles and Practices. (4) Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

278. Qualitative Research Methods for Planners and Designers. (4) Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include students' own research.

279. Seminar: Public Space. (4) Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them.

M280. Environmental and Resource Economics and Policy. (4) (Same as Policy Studies CM250.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 204 and 208. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Letter grading.

281A. Introduction to History of the Built Environment in the U.S. (4) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments.

281B. Advanced Seminar: History of the Built Environment. (4) Discussion, three hours. Requisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

282. Urban Design: Theories, Paradigms, Applications. (4) Lecture, three hours. Discussion and evaluation of philosophical bases, ideologies, and paradigms of urban design in last century; examination of how these are reflected on the built environment of cities.

283. History of the American Household and American Home. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 281A. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

284. Looking at Los Angeles. (4) (Formerly numbered 284.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C184.

285. Great Planning Debates: Gender. (4) Seminar, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M286. Transportation, Land Use, and Urban Form. (4) (Formerly numbered 286.) (Same as Policy Studies M220.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing imbalance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M287. Travel Behavior Analysis. (4) (Formerly numbered 287.) (Same as Policy Studies M221.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 201 and 203. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

288. Transportation Planning. (4) Lecture, three hours. Examination of how planners analyze, manage, and operate transportation systems. Measuring system performance, intelligent transportation systems, transportation demand management, parking management, freight movement and facilities, public transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled.

M289. Transportation Economics, Finance, and Policy. (4) (Formerly numbered 289.) (Same as Policy Studies M222.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

M290. Transportation and Environmental Issues. (4) (Formerly numbered 290.) (Same as Policy Studies M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

298. Special Topics in Emerging Planning Issues. (2 to 4) Discussion, two to four hours. Topics in newly emerging planning issues such as role of cutting-edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M404. Joint Planning/Architecture Studio. (4) (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

M470. Introduction to Occupational and Environmental Health Education. (4) (Same as Community Health Sciences M470.) Lecture, four hours. Preparation: at least three social sciences courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

494. Supervised Independent Teaching. (2 to 8) Supervised individual teaching experience. May be repeated for credit. S/U grading.

496. Field Projects. (2 to 8) (Formerly numbered 496F) May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Research in Planning. (2 to 8) May be repeated for credit.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) May be repeated for credit. S/U grading.

Assistant Professors:

Brian Taylor, Ph.D. (Urban Planning)

Jan Reiff, Ph.D. (History)

**Scope and Objectives**

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Urban Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The spe-

Scope and Objectives
The Women’s Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a minor. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the Women’s Studies minor in addition to a major in their chosen discipline.

The program offers the singular opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied — women in their racial, class, sexual, and cultural diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women’s studies offers unique contextual validation for today’s gender controversies and prepares students for a wide range of career and life choices, as well as for advanced study in traditional disciplines and the professions.

The field of women’s studies has exploded over the past 30 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a byproduct of studying other fields. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum. Further, women’s studies generates new perspectives on existing knowledge of women and gender, offers a critique of accepted beliefs and ideas, intellectually challenges existing structures of knowledge, and introduces new conceptual paradigms.

The core faculty members who teach women’s studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and a student representative sets program policies and curricula.

The program sponsors two student associations and assists other student groups with extracurricular programming on feminist issues. Research in women’s studies is promoted in cooperation with the Center for the Study of Women.

While no formal graduate program exists at UCLA at this time, a proposal for one is in the final stages of review for implementation in 2000. Meanwhile, graduate students are invited to use the program’s resources, attend lectures and events, and participate in the feminist research seminar sponsored by the center.

Undergraduate Study
Women’s Studies B.A.
The interdisciplinary major in Women’s Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

Admission
To be admitted to the major, students must have completed Women’s Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University’s diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women’s studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

All courses applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in women’s studies courses to receive credit for completing the program. Courses in which they receive a grade of C– or lower may not be applied toward the core requirements in the major.

Preparation for the Major
Required: Women’s Studies 10. Students must also complete departmental lower division requirements, as applicable, for upper division women’s studies courses in the disciplines.

The Major
The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two disciplinary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

Required: At least 13 upper division courses as follows:
(1) Three core courses, including (a) one feminist theory course from Women’s Studies 110A or 110B or M192, (b) course 130 or one course on the study of American ethnic minority women from the approved list of women’s studies credit courses issued each term by the program, and (c) course 197 (departmental 197 courses may not be applied).
(2) A distribution of at least four courses, each from a different department or discipline, selected from the approved list of women’s studies courses.
(3) Six additional concentration courses from one or two of the disciplines in which the core and distribution courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women’s health, or lesbian studies. If two fields are selected, the ratio of the six courses may be divided 3:3 or 4:2.

Four units of Women’s Studies 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women’s Studies 199HA-199HB.

Honors Program
The honors program is open to advanced junior and senior Women’s Studies majors with a 3.0 grade-point average in women’s studies courses and a minimum 3.0 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program chair for approval. Students wishing to undertake honors in the major are advised to complete Women’s Studies 197 by Spring Quarter of the junior year.

To be eligible for honors at graduation, students must successfully complete course 197 and two successive terms of independent studies (courses 199HA-199HB) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the program office.

Women’s Studies Minor
The Women’s Studies minor augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the Women’s Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 240 Kinsey Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Required Lower Division Course (four units): Women’s Studies 10.

Required Upper Division Courses (28 units):
One feminist theory course from Women’s Studies 110A or 110B or M192, 120 or 197, and five elective courses from the approved list of women’s studies courses issued each term by the program. At least three elective courses must be taken in departments other than the
major department. No more than four units of any 199 course may be applied.

All minor courses must be taken for a letter grade. with an overall grade-point average of 2.0 or better. Courses in which students receive a grade of C– or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Women’s Studies

Lower Division Course

10. Introduction to Women’s Studies: Feminist Perspectives on Women and Society. (4) Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions, historical background, women’s liberation, and the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change.

Upper Division Courses

Core Courses

110A. Feminist Theories in Social Sciences. (4) Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists’ attempts to describe, explain, and critique social institutions, considering impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, education, economics, family, religion, sexuality, etc. Applications of theories to research questions and methodologies.

110B. Feminist Theories in the Humanities. (4) Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies.

197. Senior Research Seminar. (4) Seminar. Three hours. Requisite: courses 10, and 110A or 110B. Designed for advanced junior/senior Women’s Studies majors or minors. In-depth study of a major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. P/NP or letter grading.

Supporting Courses

M101A. Lesbian and Gay Literature before Stonewall. (4) (Same as English M101A and Lesbian, Gay, Bisexual, and Transgender Studies M101A.) Lecture, four hours. Preparation: satisfaction of English Composition requirement. Survey of lesbian and gay literature in English since 1869, year of Stonewall Riots in New York City, commonly recognized as beginning of modern American gay liberation movement. Readings include works by such authors as Andrei Capri, Jane Rule, Maureen Duffy, Brigid Brophy, Barry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, and Jo Natale. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variation in role of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging. In a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity, Letter grading.

105. Topics in Women and Medicine. (4) Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women’s health, health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a woman’s health specialty and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

M106. Imaginary Women. (4) (Same as Honors Collegerium M106.) Designed for seniors/juniors. Study of four female cultural archetypes—absenting wife/mother, infantilistic mother, intellectual woman, and warrior woman—as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

M107A. American Women Writers. (4) (Same as English M107A.) Preparation: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature in relation of forms and techniques in writing by American women.

M107B. British Women Writers. (4) (Same as English M107B.) Preparation: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature in relation of forms and techniques in writing by British women.

M107C. Special Topics in Women and Literature. (4) (Same as English M107C.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Ethnomusicology M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1890s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M110. International Political Economy of Work and Gender. (4) (Same as Economics M110.) Lecture, three hours; outside study, nine hours. Preparation: satisfaction of English Composition requirement. Variable specialized studies course in women and politics, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

M111. Topics in Study of Sexual and Gender Orientation. (4) (Formerly numbered 111.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M111.) Lecture/discussion, three hours. Preparation: course 10 or 114. Studies in arts, humanities, social sciences, and life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer and transgender theories; multilingual and cross-cultural emphases. May be repeated for credit.

M112. Sexuality and the City: Queer Los Angeles. (4) (Formerly numbered 112.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M112.) Lecture, three hours. Preparation: course 114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles.

M119. Tristani, Isole, and History of Heterosexuality. (4) (Same as German M119.) Lecture, three hours; outside study, nine hours. Tristani and Isole are among the more famous and enduring of European literary lovers, and following their tradition from Middle Ages to the present provides opportunity to consider a host of issues—from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

120. Internship in Women’s Studies. (4) Seminar, three hours; internship, eight hours. Preparation: at least two upper division women’s studies courses. Requisites: courses 10, 110A or 110B. Field studies course combining seminar with field placement. Practical experience in working on women’s issues and connecting these experiences to methodological and theoretical themes explored in courses 110A or 110B. Letter grading.

M123. International Political Economy of Work and Gender. (4) (Same as Economics M115B.) Lecture, three hours; outside study, nine hours. Preparation: Economics 1 or 5 or 100. Analysis of women’s economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence.

125. Women and Health Care in the U.S. (4) Lecture/discussion, three hours. Preparation: course 10. Examination in depth of various women’s health care in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

M126. Roots of Patriarchy: Ancient Goddesses and Heroines. (4) (Formerly numbered 128.) (Same as Honors Collegeium M118.) Lecture, three hours; outside study, nine hours. Examination of ancient goddesses and heroines—European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman—using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

M132A. Chicana Feminism. (4) (Same as Chicana and Chicano Studies M110A.) Lecture, three hours. Preparation: course 10. Examination of theories and practices of women who identify as “Chicana feminist.” Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.

<tr>
<td>M137J</td>
<td>Psychology of Language and Gender. (4) (Same as Communication Studies M124 and Psychology M137J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics in psychological linguistics, language and gender. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; and in which language children learn gender-specific language.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M140</td>
<td>Women's Studies in French Literature. (4) (Same as French M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M141</td>
<td>Women, Health, and Aging: Policy Issues. (4) (Same as Sociology M141 and Health Services CM141.) Lecture, three hours; discussion, one hour. Preparatory: two upper division social sciences courses. Two upper division biological sciences courses.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M142</td>
<td>Maya Women and Contemporary Social Change. (4) Seminar, three hours. Requisite: course 10. Survey of recent literature on Maya culture in Chiapas, Mexico, and Guatemala. Examination of culture change through study of women as social actors, participating in political, economic, and religious change. Letter grading.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M145</td>
<td>Women in Higher Education. (4) (Same as Education M145.) Designed for juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate studies, and gender differences in curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M154Q</td>
<td>Gender Systems: Global. (4) (Formerly numbered M154Q.) (Same as Anthropology M154Q.) Lecture, three hours. Requisite: course 10. Designed for junior/senior social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relations of gender to the state, and colonialism and resistance movements. P/NP or letter grading.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M155G</td>
<td>Women and Social Movements. (4) (Formerly numbered M160.) (Same as Anthropology M155G.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropology courses. Comparative studies of social movements (e.g., national, socialist, liberal/reform) beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M155L</td>
<td>Women in Italian Culture. (4) (Same as Italian M155L.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M162</td>
<td>Sociology of Gender. (4) (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Requisite: course 10 or Sociology 1. Examination of processes which socially construct gender as a category. Topics include diachronic and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M163</td>
<td>Gender and Work. (4) (Formerly numbered M163.) (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M164</td>
<td>Politics of Reproduction. (4) (Same as Sociology M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, and new reproductive technologies.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M165</td>
<td>Psychology of Gender. (4) (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary gender differences. Topics include sex-role development and role conflict, physiological and personal differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M166</td>
<td>Women in Socialist and Post-Socialist States. (4) (Same as Sociology M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M167</td>
<td>Contested Sexualities. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167 and Sociology M167.) Lecture, three hours; discussion, one hour. Topics include intersection of Chicanismo, identity, representation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M171</td>
<td>Jurisprudence of Sexual Equality. (4) (Formerly numbered 170.) Lecture, four hours. Requisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment, pregnancy, leave policy) for purposes of comparison and critique.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M172</td>
<td>The Afro-American Woman in the U.S. (4) (Same as Afro-American Studies M172 and Psychology M172.) Designed for seniors/junior social sciences majors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M173</td>
<td>Interracial Work, Friendship, and Love Relationships of African American Men and Women. (4) (Same as Afro-American Studies M173.) Seminar, three hours. Requisites: one prior women's studies course. Examinations of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M174</td>
<td>Sociology of the Family. (4) (Same as Sociology M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M177</td>
<td>The Military and Society. (4) (Same as Sociology M177.) Lecture, three hours; discussion, one hour. Requisites: two courses of gender and American culture and social analysis; and proficiency in reading, writing, and research in basic research.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M185</td>
<td>Special Topics in Women's Studies. (4 each) Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in an area within women's studies.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M186</td>
<td>Voices of Women in Scandinavian Literature. (4) (Same as Scandinavian CM186.) Discussion, three hours. Requisite: Scandinavian 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts.</td>
<td>P/NP or letter grading</td>
<td></td>
</tr>
<tr>
<td>M187</td>
<td>Violence against Women. (4) (Same as Social Welfare M187.) Lecture, three hours. Requisites: courses 10, 110A. Examination of effects of economic development on women, with primary focus on Third World and transition economies of Eastern Europe and former Soviet Union, including roles of women in policy and practice, disparate effects by economic sector, and socioeconomic groups. Letter grading.</td>
<td>P/NP or letter grading</td>
<td></td>

M192. Philosophical Analysis of Issues in Feminist Theory. (4) (Formerly numbered M110D.) (Same as Philosophy M192.) Lecture, three hours. Requisite for Women’s Studies majors; course 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women’s rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

M194. Women and the City. (4) (Same as Urban Planning M194.) Lecture, three hours. Examination of relationship between women and cities: (1) how cities have affected women’s opportunities for economic and social equality, (2) women’s contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women’s needs and interests. P/NP or letter grading.

199. Special Studies in Women’s Studies. (4) Preparation: at least two upper division women’s studies courses, minimum 3.0 grade-point average. Directed program of independent readings and/or research on a specific topic within women’s studies. No more than four units may be applied toward Women’s Studies major or minor.

199HA-199HB. Directed Studies for Honors. (4-4) Preparation: 3.0 grade-point average overall, 3.0 grade-point average in major. Requisite: course 197. Limited to women’s studies honors program students. Two-term sequence to research and write honors thesis under direction of faculty sponsor. In Progress grading.

Scope and Objectives
The mission of the Department of World Arts and Cultures (WAC) centers on the creation, critical analysis, and contextualization of arts, dance, and research. The program reflects an approach that advocates the inclusion and integration of performance practice, studies in cultural and performance theory, and the real-world application of both forms of knowledge. It offers an environment for interdisciplinary inquiry that responds to the challenges facing our pluralistic society. Within this context, both practical and theoretical studies in dance and interdisciplinary artistic and expressive performance practices are major emphases.

The undergraduate program offers concentrations in dance and cultural studies, as well as the more flexible integrated and honors options. The graduate program offers a Master of Arts in Dance, a Master of Arts in Dance/Movement Therapy (admission currently suspended), and a Master of Fine Arts in Dance. Students are encouraged to explore relationships among the different curricular emphases, including theory, history and criticism, movement studies, education, and therapy, as a means to tailor a particular course of study to their professional goals.

Students in world arts and cultures at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Students from this unique department have gone on to pursue advanced degrees and/or careers in dance and humanities-based fields, arts management or practice, education, cultural policy, community outreach, architecture and urban planning, law, public service, and many others.

Undergraduate Study
World Arts and Cultures B.A.

The World Arts and Cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. Courses may be taken in three
different categories — performance, theoretical, and applied. Performance courses include the study of movement, art making, and aesthetic expression. Theoretical courses consider critical analysis, history, and theory as means for the contextualization of creative products and processes. Applied courses address the utilization of artistic practices in alternative formats and real-world situations. Courses from each of these categories are configured into the following concentrations, one of which students declare by the end of their sophomore year.

The **dance concentration** offers courses in a wide range of idioms from throughout the world, including studies in modern dance and ballet. Opportunities for performance, production, and movement studies, as well as dance history, kinesiology, and performance criticism and philosophy, are further options in this concentration. Multimedia forms of expression integrate music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The **cultural studies concentration** allows students to select from a range of courses offered within the department, as well as in anthropology, art history, ethnomusicology, folklore and mythology, film, music, and theater. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women’s studies).

The **integrated studies concentration** offers an opportunity for students to select an equal number of units from each of the three categories of course listings — performance, theoretical, and applied. Opportunities for hands-on experience through internships, apprenticeships, and field studies, as well as the opportunity to develop skills in media technology, are emphasized in this concentration.

The **honors concentration** is intended for exceptional students who have a minimum UCLA 3.5 grade-point average. Students can select their own program of study in close consultation with faculty. They develop a rationale outlining the objectives of their study, a self-assessment of their needs for the future, a proposed list of courses, some indication of their senior project, and a title for the course of study. This proposal is submitted to the student affairs officer and the faculty at the end of the sophomore year. After approval, students are assigned a faculty adviser for their junior and senior years. This structure allows them to focus on personal educational objectives.

Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple, Student Affairs Officer, at (310) 825-8537.

**Admission**

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on a questionnaire, transcripts, two letters of recommendation, and a personal essay. These materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Students interested in the dance concentration must participate in a January audition.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take world arts and cultures courses during the term in which they apply to the program. They must have a minimum 3.0 overall grade-point average and no more than 120 units of coursework.

Students or professional goals (e.g., international studies or professional goals) (e.g., international studies or professional goals) may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women’s studies).

The **major** includes a core of 32 units introducing the diverse forms of artistic practice, one of four concentrations (see above) consisting of 48 units, and an eight-unit senior project.

The following courses are required:

1. **A core of nine courses (32 units):** World Arts and Cultures 12, 20, 80A-80B, 80C, 134, 140A or 140B, Design 182, and Anthropology 9 or 33.

2. **A concentration of 48 units (see specific course listings below) as follows:**
   - **Dance Concentration:** 32 units from group A, eight units from group B, eight units from group C
   - **Cultural Studies Concentration:** eight units from group A, 32 units from group B, eight units from group C
   - **Integrated Studies Concentration:** 16 units from group A, 16 units from group B, 16 units from group C
   - **Honors Concentration:** 48 units of coursework to be approved by the department faculty; a minimum 3.5 UCLA grade-point average is required. Proposals are to be submitted to the department faculty at the end of the sophomore year.

**Group A: Performance Courses**

**Group B: Theoretical Courses**

**Group C: Applied Courses**

3. World Arts and Cultures 190A-190B (eight units total). These courses are the culmination of the major and have three possible areas of focus — performance, applied research, or cultural studies research — as follows: (a) the performance project is a creative project leading to the public production and public performance of original or traditional work; (b) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; (c) the cultural studies focus involves students in independent ethnographic research in some aspect of the arts. The subject of study can be found in, but is not restricted to, the Los Angeles community. Field study includes the use of video, slides, and sound recordings.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.
Master's Degrees

The Department of World Arts and Cultures offers the following master's degrees: Master of Arts (M.A.) degree in Dance, Master of Arts degree in Dance/Movement Therapy, and Master of Fine Arts (M.F.A.) degree in Dance.

Admission

The program in dance/movement therapy is not accepting applications for 1999-00.

Master of Arts

For the M.A. degree in Dance or in Dance/Movement Therapy, a baccalaureate degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as dance studios or dance performance. Prospective students may contact the UCLA Department of World Arts and Cultures for a brochure which gives additional information on the overall graduate program and specific curriculum for the stated area of specialization.

In addition to the application for admission, the department has its own screening procedure: three letters of recommendation, an audition, and a personal interview. The audition evaluates applicants' creative potential and technical proficiency with consideration toward applicants' primary focus.

Admission to the dance/movement therapy program requires one undergraduate course in abnormal psychology in addition to the requirements listed above.

Master of Fine Arts

M.F.A. applicants must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works; auditioners in performance present three selections already in their repertory. Applicants are required to prepare a statement (no more than one page) describing the works shown.

Areas of Study

The M.A. degree in Dance is designed for students preparing to continue professionally as researchers and teachers. The M.A. program in Dance/Movement Therapy is approved by the American Dance Therapy Association (ADTA). The M.F.A. degree is offered for students preparing to continue professionally as choreographers and/or performers.

Unique interests in areas such as dance ethology, education, history, philosophy and criticism, dance kinesiology, dance production, dance and media, computer-aided dance studios, and music for dance may be pursued on an individual basis.

Course Requirements

Course requirements, beyond the basic requirements previously outlined, vary for each program and are determined under the direction of faculty advisers.

M.A. in Dance

Thirty-six units are required, including nine courses (or more depending on the specialization chosen), distributed as follows: (1) World Arts and Cultures 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. These may not be courses taken to fulfill requisites or studio technique courses. Eight units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement. Specific concentrations within the M.A. may be designed under the direction of faculty advisers.

M.A. in Dance/Movement Therapy

A total of 66 units is required distributed as follows: (1) World Arts and Cultures 230; (2) 46 units in the department at the graduate level (200 series); (3) 16 units in or outside the department at the upper division or graduate level. These may not be technique courses nor courses taken to fulfill requisites. A total of 18 units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

While an undergraduate course in abnormal psychology is a requisite for the M.A., other courses in psychology (developmental, personality, and group dynamics) are highly recommended.

The program in dance/movement therapy requires an intensive experience in a therapeutic setting during the second year. The internship provides an orientation to the hospital clinical setting and experience as a movement therapist.

M.F.A. in Dance

A total of 72 units is required, distributed as follows: (1) 20 units of choreographic/performance training, including at least 12 units from World Arts and Cultures 211A through 211D and at least eight units from courses 192 and/or 490; (2) 12 units of studio technique courses at the 400 level; (3) 12 units of production courses from World Arts and Cultures 142, 145, 221, C227, 240B, 240C, 240D; (4) eight units of movement studies from World Arts and Cultures 122, 225A, 225B; (5) eight units of cultural/critical studies from World Arts and Cultures 181A through 181D, 182, 183, 230, 232, 235, 236, 240A, 280A, 280B, CM284, C287; (6) eight units of education, internship, field studies, and practicum studies from World Arts and Cultures 151A, 151B, 153, 191, 251A, 251B, 251C, C261A, 261B, 261C, 262A, 262B, 262C, 400, 441, 452, 498; (7) four units of elective coursework. Only four units of 500-level courses may be applied toward the degree. Students must enroll in a studio technique class every quarter except during an internship or the final concert/production. The required 72 units for the degree must include a minimum of 32 units of coursework at the graduate (200 and 400) level. The four units of coursework at the 500 level may be applied toward the overall unit total. Required courses are individually designed through advisement with the faculty academic adviser.

Students are expected to choose choreography or performance as their M.F.A. focus.

Comprehensive Examination Plan

Master of Arts

During the first year students in dance or dance/movement therapy who decide to take the comprehensive examination option write a proposal stating why this option is most suitable to their M.A. program. There are specific steps to the proposal presentation and approval process. Guidelines may be obtained from the department.

After completing coursework, passing the presentation, and nominating the comprehensive examination committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to complete their comprehensive examination.

Examining committee members grade each question (1) pass with honors, (2) pass, (3) pass minus, or (4) fail. In order to pass, each question must be graded pass or better by two out of three committee members. If the questions are failed, the examination may be re-taken once only during the next scheduled examination period.

Master of Fine Arts

For M.F.A. students, the preliminary examination consists of a written proposal submitted to a faculty panel and a presentation of proposed works. The written proposal includes fundamental concepts, objectives for the concert material, and production plans.

After passing the preliminary examination, a three-member M.F.A. comprehensive examination committee is selected to advise students in developing the final concert material. Obtain specific guidelines for nominating the comprehensive examination committee from the department. Students may advance to candidacy when the coursework toward the degree is completed and the presentation is passed. Students are allowed one year after advancement to candidacy to complete their M.F.A. comprehensive examination. Choreographers and performers prepare a major concert in the third year, or a series of concerts in the second and third years. An oral defense of the concert material is held with the M.F.A. comprehensive examination committee and production staff.
A written production book with visual materials and a concept paper are completed after the performance. Obtain specific guidelines from the department.

**Thesis Plan**

**Master of Arts**

During the first year M.A. students in dance or dance/movement therapy who decide to take the thesis option discuss potential thesis topics with faculty members. They prepare a written proposal which is presented to a faculty panel. After the thesis proposal is approved by the faculty panel, a three-member thesis committee is formed. There are specific steps to the proposal presentation and approval process. These guidelines may be obtained from the department.

After completing coursework, passing the presentation, and selecting the thesis committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to file the thesis.

**World Arts and Cultures**

**Lower Division Courses**

**1A-1B. Fundamentals of Modern Dance.** (2-2) Laboratory, four hours. Designed for nondance majors. Courses should be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists' works. Each course may be repeated once. P/NP or letter grading.

**1C. Fundamentals of Modern Dance.** (2) Laboratory, four hours. Study of dance technique and improvisation. Critical viewing, reading, and discussion of modern dance artists' works. May be repeated twice. P/NP or letter grading.

**5. Creative Process: Developing Imagination and Craft.** (2) Lecture, one hour; laboratory, three hours. Introduction to creative exploration in movement through improvisational and compositional exercises that access and develop the imagination, find relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once. P/NP or letter grading.

**6. Fundamentals of Ballet.** (2) Laboratory, four hours. Study of ballet techniques and principles, including dance terminology. May be repeated twice; only two units may be applied toward the major. P/NP or letter grading.

**7A-7B-7C. Beginning Ballet.** (2-2-2) Laboratory, four hours. Limited to World Arts and Cultures majors. Study of beginning ballet techniques and principles, including dance terminology; only two units may be applied toward the major. P/NP or letter grading.

**10. Introduction to Dance.** (2) Introduction to the many and varied theoretical aspects of dance as a discipline.

**12. Integrated Arts.** (Formerly numbered 100.) Lecture, three hours. Limited to World Arts and Cultures majors. Introduction to concepts and theories which integrate and underlie the multidisciplinary World Arts and Cultures major.

**23L. Laboratory in Conditioning for Dancers.** (2) Laboratory, four hours. Specific conditioning principles applied to stretching, strengthening, and endurance training. Personalized attention enables students to increase their ability to dance more efficiently and to prevent dance injuries. May be repeated twice. P/NP grading.

**25. Introduction to Dance/Movement Notation.** (2) Lecture, two hours; laboratory, one hour. Beginning skills in observing, analyzing, reconstructing, and recording dance/movement based on principles of the Labanotation and Laban Movement Analysis System.

**40. Introduction to Dance Theater.** (2) Lecture, two hours; laboratory, two hours. Introduction to practical and aesthetic perspectives on theater space, as well as as basic aspects of scene, lighting, costume, and sound design technology for dance production.

**48. Laboratory in Dance Production.** (1) Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading.

**50. World Arts Forum.** (1) Lecture, 90 minutes. Introduction to various arts resources on campus. Presentations by scholars, national leaders in the arts, international guests. Specific presentations vary from term to term. May be repeated for a maximum of four units. P/NP grading.

**70. Survey of Dancing in Selected Cultures.** (2) Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures.

**71B. Dance of Indonesia.** (2) Studio, three hours. Dance experience not required. Introduction to technique and repertory of dance traditions (e.g., Java, Bali, Sundan).

**71C. Dance of India.** (2) Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam).

**71E. Dance of Korea.** (2) Studio, three hours. Dance experience not required. Technique and repertoire of a selected dance tradition (e.g., Korean classical and folk).

**72B. Dance of West Africa.** (2) Studio, three hours. Dance experience not required. Introduction to technique and repertory of a selected region (e.g., Ghana, Guinea, Nigeria).

**73B. Dance of Mexico.** (2) Studio, three hours. Dance experience not required. Introduction to forms and styles in dance of several ethno-regional regions. Emphasis on identifying dance characteristics through actual dancing.

**74C. Dance of Spain.** (2) Studio, three hours. Dance experience not required. Technique and repertoire of dances from selected ethno-regional regions.

**74D. Dance of Anglo- and Celtic-American Tradition.** (2) Laboratory, four hours. Introduction to technique and repertory of vernacular dance traditions of the British Isles and their derivatives in North America. P/NP or letter grading.

**76B. Dance of Israel.** (2) Studio, three hours. Dance experience not required. Technique and repertoire from selected ethno-regional regions.

**79. Dance of a Selected Culture.** (2) Studio, four hours. Introduction to selected dance forms from a culture area or historical period or of a particular dance genre. May be repeated for a maximum of 20 units. P/NP or letter grading.

**80A-80B. Movement as Cultural Behavior.** (2-2) Studio, three hours. Limited to World Arts and Cultures majors. Studio/laboratory examination of individual and cultural factors which affect expressive movement in cultures. Experimental classes which enhance kineshetic and movement awareness of self and others through cultural perspective.

**80C. Fundamentals of Movement.** (4) Lecture, three hours; laboratory, two hours. Introduction to dance/movement principles and concepts, with primary emphasis on developing skills for understanding and analysis of art of moving. Techniques from Laban movement analysis work to be used to increase body instrument's effectiveness as a source of knowledge.

**Upper Division Courses**

**101A-101B-101C. Intermediate Modern Dance Technique.** (2-2-2) Lecture, two hours; laboratory, two hours. Technique levels II and III. Emphasis on increasing technical skill. Each course may be repeated once.

**C102A-C102B-C102C. Advanced Modern Dance Technique.** (2-2-2) Laboratory, four and one-half hours. Requisite: course 101C. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C402A-C402B-C402C. P/NP or letter grading.

**103. Improvisation in Dance.** (2) Studio, four hours. Designed for World Arts and Cultures majors. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice.

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement.** (4) (Same as Chicana and Chicano Studies M103D and Theater M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater. (Same as Chicana and Chicano Studies M103H.) Requisite: course 103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

**105. Form and Motion in Choreography.** (2) Formerly numbered 114.) Lecture, one hour; laboratory, three hours. Requisite: course 5. Study of processes derived from a Western theatrical tradition by which movement is generated with specific consideration toward shaping/forming of movement materials. May be repeated twice. P/NP or letter grading.

**C107. Workshop in Ballet.** (2) Formerly numbered C107A-C107B-C107C.) Lecture, one hour; studio, five hours. Requisites: courses 7A-7B-7C. Use of forms of ballet at intermediate to advanced levels, structured to integrate a somatic learning process of uncovering habitual choices in order to free personal movement habits. Examination and practice of theoretical and aesthetic elements of ballet, basic components of coordination, and technical training combined with expressivity. May be repeated for a maximum of 24 units. Concurrently scheduled with course C407. P/NP or letter grading.

**CM109. African Religion in the Diaspora.** (4) (Same as Folklore CM109.) Lecture, three hours. Designed for juniors/seniors and graduate students. Ethnography of diaspora African religions, including voodoo, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM209.

**110. Field Studies in World Arts and Cultures.** (2 to 4) Formerly numbered 120.) Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be taken for a maximum of eight units. P/NP or letter grading.
115. Topics in Choreography. (3) Lecture, two hours; laboratory, four hours. Requisite: course 5 or 103 or 105. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topic through lectures, readings, and discussion. The topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; con- structing identity. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

122. Movement Theories: Variable Topics. (2) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

123C. Projects in Dance Kinesiology. (4) Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics introduced in courses 123A and 123B.

126. Principles of Movement Analysis: Labanotation. (4) Lecture, two hours; laboratory, two hours. Emphasis on experiential understanding of movement through study of motion factors and elementary concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form.

C127. Video Production for Performance and Research in Traditional and Performing Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing a program, mastering final cut). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C227.

130. Selected Topics in World Arts and Cultures. (4) Lecture, three hours. Designed for juniors/seniors. Selected topics dealing with arts and cultures through disciplinary and interdisciplinary perspectives. May be repeated twice for credit. P/NP or letter grading.

132A-C132B. Philosophical Bases and Trends in Dance (4-2). Course 132A is requisite to C132B. Critical analysis of dance and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with course C231B.

134. History of Dance in Culture and Performance. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics introduced in traditional and recent research in world dance. P/NP or letter grading.

135. Dance in the U.S. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Designed for juniors/seniors. Study of dance expression in the U.S., including concert modern dance and ballet, popular idioms, and video dance. Special attention to influences from Native America, Asia, Africa, and Europe. P/NP or letter grading.

140A. Art as Social Action. (4) Designed for juniors/seniors. Discussion of what constitutes an artist's social responsibility and in what ways art is qualified to engage in direct political action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

140B. Art as Moral Action. (4) Designed for juniors/seniors. One's ability to distinguish between right and wrong actions is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

140C. Seminar: Intercultural and Interdisciplinary Performance. (4) Designed for juniors/seniors. Recent discussions of multiculturality have demanded a broader base of cultural literacy for society in general and from artists in particular. Moving beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and text-based media. May be repeated once for credit. P/NP or letter grading.

141. Lighting Design for Dance Theater. (4) Lecture, four hours; laboratory, two hours. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed.

141A. The City as a Work of Art. (4) Lecture, three hours. Designed for juniors/seniors. Interdisciplinary approach to complex physical, emotional, psychological, and spiritual dynamics that create and sustain urban life, with emphasis on artist's role in shaping the spaces which affect people's lives. Discussion of religious and social aspirations as expressed in music, poetry, dance, and visual arts, as well as architecture and city planning. P/NP or letter grading.

142. Advanced Studies in Dance Theater Lighting. (2 or 4) Lecture, four hours; laboratory, four or more hours. Requisite: course 141. Study of diverse dance theater lighting problems at advanced level and individual development of creative solutions. May be taken for a maximum of four units.

144. Costume and Scene Design Concepts for Dance Theater. (4) Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and set media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication.

145. Advanced Dance Costuming. (4) Lecture, three hours; laboratory, six hours. Requisite: course 144. Theory of dance costume construction as it relates to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include design projects currently in production. P/NP or letter grading.

146. Textiles of the World. (4) Lecture, four hours; discussion, one hour; laboratory, one hour. How cloth and clothing was and continues to be hand-woven in indigenous societies. Use of textiles from Fowler Museum collection to coordinate hands-on experience with cultural history. May be repeated twice for credit. P/NP or letter grading.

148. Advanced Laboratory in Dance Production. (1) Laboratory, two hours. Requisite or corequisite: courses 141, 144. Further development and application of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. May be repeated once. P/NP grading.

149. Dance Performance Practicum. (1) Laboratory, four hours. Dancing in selected choreography or repertory in performance. May be repeated for credit. P/NP grading.

150. Viewing Native American Culture. (4) Lecture, three hours; outside study, nine hours. Exploration of artistic, political, folk, and religious images of American Indians as demonstrated in literature, art, anthropology, and folklore and contrasted with historic and contemporary views held by Native Americans and others. P/NP or letter grading.

151A. Foundations of Dance Education. (4) Lectures, two hours; laboratory, three hours. Designed for World Arts and Cultures majors. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included.

151B. Dance as Culture in Education. (4) Lecture, two hours; laboratory, two hours. Designed for World Arts and Cultures majors. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included.

152. Asian American Aesthetics. (4) (Same as Asian American Studies M119.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lectures, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, artists activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

153. Creative Dance for Children. (4) Lecture, three hours; laboratory, one hour. Designed for World Arts and Cultures majors. Introduction to movement concepts, skills, and principles for teaching children's dance. Emphasis on dance as a creative medium of expression.

C160A-C160B-C160C. Group Dynamics and Process. (2-2-2) Lecture, one hour; laboratory, three hours. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C260A-C260B-C260C. P/NP or letter grading.

163. Living Vernacular. (4) Lecture, three hours. Survey of array of spaces and places from a cross-cultural or comparative perspective and with a performance emphasis, which means focus on mutual interaction of human beings and their created environments. Emphasis on "common," "ordinary," "anonym-ous," or "vernacular" nonbuilt and built environments, which are built and used by members of small-scale, "traditional," and "transitional" communities around the world. P/NP or letter grading.
C164. Arts of Identity. (4) Lecture, three hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural identity. Survey of these arts of identity in a variety of cultural settings to provide students with a “tool kit” for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C264. P/NP or letter grading.

165A. Introduction to MUSEUM: Museum Collections and Administration. (5) Lecture, six hours. Introduction to history and functions of museums, tracing development to the present. Collection, organization, management, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

165B. Introduction to MUSEUM: Museum Exhibitions and Education. (5) Lecture, six hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural identity. Survey of these arts of identity in a variety of cultural settings to provide students with a “tool kit” for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C264. P/NP or letter grading.

165C. Introduction to MUSEUM: Museum Collections and Administration. (5) Lecture, six hours. Introduction to history and functions of museums, tracing development to the present. Collection, organization, management, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

165D. Introduction to MUSEUM: Museum Exhibitions and Education. (5) Lecture, six hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural identity. Survey of these arts of identity in a variety of cultural settings to provide students with a “tool kit” for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C264. P/NP or letter grading.

M166A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4) Formerly numbered M166. (Same as Art M166A and Chicana and Chicano Studies M186A.) Studio/lecture, six hours. Corequisite: course M166AL. Introduction to the study of murals and the role of artists in the development of community. Emphasis on issues of community education and development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

M166B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Art M166B and Chicana and Chicano Studies M186B.) Studio/lecture, six hours. Corequisite: course M166BL. Continuation of investigation of murals as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M166C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Art M166C and Chicana and Chicano Studies M186C.) Studio/lecture, six hours. Corequisite: course M166BC. Continuation of investigation of murals as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M166D. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Art M166D and Chicana and Chicano Studies M186D.) Studio/lecture, six hours. Corequisite: course M166DL. Continuation of investigation of murals as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M167. Whose Monument Where: Course on Public Art. (4) (Same as Art M188 and Chicana and Chicano Studies M188.) Lecture, four hours. Corequisite: course M166A. Examination of monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the “public,” what is “public space” at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

C171. Dance of Indonesia. (2) Studio, three hours. Requisite: course 71B. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sundanese). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B.

C174. Dance of Spain. (2) Studio, three hours. Requisite: course 71E. Technique and repertoire of a selected dance tradition (e.g., Flamenco, Andalucia). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474E.

CM184. Dance and Folklore. (4) (Same as Folklore CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on European and European-American dance idioms. Concurrently scheduled with course CM284.  

C187. Dance in Native American Cultures. (4) Survey of Native American dance; role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Native American cultures and genres.

C188A-C188B. Studies in Dance Ethnography. (4-4) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical considerations of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C279A-C279B. P/NP or letter grading. C188A. Dance Event Ethnographies; C188B. Field Research. Requisite: course C180A.
Graduate Courses

C211A-211F. Advanced Choreography. (4) Lecture, two hours; laboratory, two hours. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refined and realistic self-evaluation; critical counsel by acknowledged choreographers.

C220. Music as Dance Accompaniment. (2 to 4) Requisite: course C220. Piano or percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C210. Graduate students must complete two additional assignments. May not be applied toward M.A. degree requirements.

C225A-225B. Theories of Movement: Labananalysis. (4) Lecture, two hours; laboratory, three hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

C226. Advanced Studies in Notation. (2) Requisite: course 126. Selected problems in directing from noted repertoire; principles of teaching, comparative notation systems, writing projects.

C227. Video Production for Performance and Research in Traditional and Performing Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (oralizing raw footage, constructing a program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/chorography. May be repeated once for credit. Concurrently scheduled with course C127.

C230. Research Methods and Bibliography in Dance. (4) Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities.

C231A. Basic Issues in Dance and Dance Theory. (4) Lecture, four hours. Issues common to specialization areas in the field of dance: movement, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc. S/U or letter grading.

C231B. Philosophical Bases and Trends in Dance. (2) Requisite: course 231A. Study of present-day concepts and their relationship to other art forms and cultural influences. Emphasis on dance of a particular culture group. May be repeated once. Concurrently scheduled with course C231B.

C240A. Production Arts Seminar. (4) Seminar, two hours; discussion, two hours; laboratory, two hours. Examination and research of dance and performer/audience relationships in various historic periods and cultural settings. Impact of different aesthetic/directorial approaches to theatrical production of dance. Exploration of selection of locale, style, aural and visual enhancements.

C240C. Production Arts Seminar. (4) Seminar, four hours; laboratory, to be arranged. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. S/U or letter grading.

C240D. Production Arts Seminar. (2) Seminar, three hours. Corequisites: courses 441, 490. Topics from current problems of students preparing M.F.A. concert productions.

C251A-251D. Advanced Studies in Dance Education. (4 each) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. S/U or letter grading.

C251B. Theories and Methods. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies.

C251C. Curriculum Development in Various Dance Settings. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process.

C251D. Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail.

C261B. Self and Culture. (4) (Not the same as course 261B prior to Fall Quarter 1997.) Lecture, two hours; laboratory, two hours. Requisite: course C261A. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts.

C261C. Dance/Movement Therapy: Dance as Healing and Therapy. (4) Lecture, two hours; laboratory, two hours. Requisites: courses C261A, 261B. Historical overview of various theoretical approaches and corresponding methodologies encompassed by dance/movement therapy, a contemporary creative arts therapy field which encompasses healing and therapeutic aspects of dance.

C262A-C262B-C262C. Seminars: Dance/Movement Therapy. (4-4-4) Seminar, two hours; laboratory, two hours. Requisites: courses C261A, C261B-C261C. Year-long sequential dance/movement therapy seminars adopting a psychodynamic life-span developmental approach to clinical community work with ethnically diverse populations.

C264. Arts of Identity. (4) Lecture, three hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural “identity.” Survey of these arts of identity in a variety of cultural settings to provide students with a “tool kit” for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C164. S/U or letter grading.

C279A-C279B. Studies in Dance Ethnography. (4-4) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C180A-C180B. S/U or letter grading. C279A. Dance Event Ethnographies; C279B. Field Research. Requisite: course C279A.

C280A-280B. Advanced Studies in Dance Ethnology. (4-4) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C180A-C180B. S/U or letter grading. C280A. Survey of literature of the field of dance ethnology and in related fields of anthropology, folklore, performance studies, and sociology. C280B. Advanced studies in methodologies and theories to develop dance-focused ethnographic research.

CM284. Dance and Folklore. (4) (Same as Folklore CM284.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and Euro-American dance idioms. Concurrently scheduled with course CM184.

C287. Dance in Native American Cultures. (4) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C187.

C297. Selected Topics in Dance. (2 to 4) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with courses C197. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U or letter grading.

400. Directed Professional Activities. (2 to 8) Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

C402A-C402B-C402C. Advanced Modern Dance Technique. (2-2-2) Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C102A-C102B-C102C. S/U or letter grading.
C407. Workshop in Ballet. (2) (Formerly numbered C407A-C407B-C407C.) Lecture, one hour; studio, five hours. Requisites: courses 7A-7B-7C. Use of forms of ballet at intermediate to advanced levels, structured to integrate a somatic learning process of uncovering habitual choices in order to free personal movement habits. Examination and practice of theoretical elements of ballet, basic components of coordination, and technical training combined with expressiveness. May be repeated for a maximum of 24 units. Concurrently scheduled with course C107. S/U or letter grading.

41. Dance Production Practicum. (2 to 4) Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of eight units. S/U grading.

451. Teaching Assistant Seminar. (2) Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

452. Directed Field Study in Dance Education. (2 to 8) Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading.

C471B. Dance of Indonesia. (2) Studio, three hours. Requisite: course 71B. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B.

C471C. Dance of Japan. (2) Studio, three hours. Requisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C.

C471D. Dance of India. (2) Studio, three hours. Requisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D.

C471E. Dance of Korea. (2) Studio, three hours. Requisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

C472B. Dance of West Africa. (2) Studio, three hours. Requisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

C472B. Dance of Mexico. (2) Studio, three hours. Requisite: course 73B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

C474C. Dance of Spain. (2) Studio, three hours. Requisite: course 74C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

C476B. Dance of Israel. (2) Studio, three hours. Requisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

C479. Dance of a Selected Culture. (2) Laboratory, four hours. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C179. S/U or letter grading.

480. Seminar: Research Topics. (2) Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

490. Projects in Choreography and Performance. (2 to 8) Tutorial, one three-hour rehearsal per unit per week minimum. Requisite: course 240C. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units.

496. Professional Internship in Dance. (4, 8, or 12) Full- or part-time supervised fieldwork. Limited to M.F.A. students. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties.

596A. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

596R. Directed Study or Research in a Hospital or Clinic. (2 to 8) S/U grading.

Appendix A

Regulations and Policies

Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University’s student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Box 951405, Los Angeles, CA 90095-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TTY (310) 206-6083.

Inquiries regarding nondiscrimination on the basis of disability covered by the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 may be directed to Dr. Douglas Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Box 951405, Los Angeles, CA 90095-1405, voice (310) 825-2242, TTY (310) 206-3349; http://www.saonet.ucla.edu/ada.htm.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the University of California Policies Applying to Campus Activities, Organizations, and Students (available in 1206 Murphy Hall or at http://www.ucop.edu/ucophome/wnews/aospol.html) for further information and procedures.

Student Conduct Policies

Students are members of both society and the academic community with attendant rights and responsibilities. Students are expected to comply with the general law, University policies, and campus regulations. For further information, refer to the University of California Policies Applying to Campus Activities, Organizations, and Students at http://www.ucop.edu/ucophome/wnews/aospol/toc.html and the UCLA Students Conduct Code at http://www.saonet.ucla.edu/dos/SCC98.htm.

A. Jurisdiction

The University shall have jurisdiction over student conduct that occurs on University property, or in connection with official University functions whether on or off University property. Although the University will not routinely invoke its disciplinary processes over student conduct that occurs off campus except in connection with an official University function, the University shall have discretion to exercise jurisdiction over conduct that occurs off campus and that would violate student conduct and discipline policies or regulations if the conduct had occurred on campus when (1) the alleged misconduct indicates the student poses a threat to the safety or security of any member(s) of the University community or (2) the alleged misconduct involves academic work or the forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

Specifically, the University may choose to exercise jurisdiction over off-campus incidents under item 1 above where the alleged misconduct involves

(a) Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person;

(b) Stalking (as defined in Section 102.10 of the University of California Policies Applying to Campus Activities, Organizations, and Students);

(c) Sexual harassment (as defined in Section 102.09 of the University of California Policies Applying to Campus Activities, Organizations, and Students);

(d) Hazing (as defined in Section 102.12 of the University of California Policies Applying to Campus Activities, Organizations, and Students).

In determining whether or not to exercise off-campus jurisdiction in cases under item 1 above, the University will consider the seriousness of the alleged misconduct; whether the alleged victim is a member of the campus community; the ability of the University to gather evidence, including the testimony of witnesses; or whether the off-campus conduct is part of a series of actions that occurred both on and off campus.

This section is intended only to provide guidance for the exercise of discretion by the University in invoking its jurisdiction over conduct that occurs off campus. It may not be relied on by any student charged under this section to create any rights, substantive or procedural, or as a basis for a challenge to the exercise of the University’s jurisdiction.

B. Grounds for Discipline

The chancellor may impose discipline for violation of, or an attempt to violate, any University policies or campus regulations. The lack of intent to commit a violation is not a factor in determining if a violation occurred; however, the lack of intent may be considered a mitigating factor in determining the appropriate sanction if it has been determined that a violation has occurred. Violations or attempted violations include, but are not limited to, the following types of misconduct (Sections 102.01 through 102.25 below are adapted from the University of California Policies Applying to Campus Activities, Organizations, and Students):

C. Types of Misconduct

102.01: Academic Dishonesty. All forms of academic misconduct, including but not limited to cheating, fabrication, plagiarism, multiple submissions, or facilitating academic dishonesty. For the purposes of this Code, the following definitions apply:

*Source: A national survey of a representative group of colleges conducted by the National Association of Colleges and Employers, representing the 80 percent range of offers for April 1999 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.
102.01a: Cheating. Cheating includes, but is not limited to, the use of unauthorized materials, information, or study aids in any academic exercise; or helping another student commit an act of academic fraud; or the failure to observe the express procedures or instructions of an academic exercise (e.g., examination instructions regarding alternate seating or conversation during an examination).

102.01b: fabrication. Fabrication includes, but is not limited to, falsification or invention of any information or citation in an academic exercise.

102.01c: Plagiarism. Plagiarism includes, but is not limited to, the use of another's words or ideas as if they were one's own; including but not limited to representing, either with the intent to deceive or by the omission of the true source, part or an entire work produced by someone other than the student, obtained by purchase or otherwise, as the student's original work; or representing the identifiable but altered ideas, data, or writing of another person as if those ideas, data, or writing were the student's original work.

102.01d: Multiple Submissions. Multiple submissions includes, but is not limited to, the re-submission by a student of any work which has been previously submitted for credit in identical or similar form in one course to fulfill the requirements of a second course, without the informed permission/consent of the instructor of the second course; or the submission by a student of any work submitted for credit in identical or similar form in one course to fulfill the requirements of a concurrent course, without the permission/consent of the instructors of both courses.

102.02: Other Forms of Dishonesty. Other forms of dishonesty, including but not limited to fabricating information or knowingly furnishing false information or reporting a false emergency to the University or to University officials acting in the performance of their duties.

102.03: Forgery. Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification. Section 102.03 applies to any individual for whom the University maintains records, regardless of current student status.

102.04: Theft. Theft of, conversion of, misappropriation of, or damage to or destruction of any property of the University or property of others while on University premises or at official University functions; or possession of any property of the University or others stolen while on University premises or at official University functions.

102.05: Computers. Theft or other abuse of computing facilities or computer time, including but not limited to unauthorized entry into a file to use, read, or change the contents or for any other purpose; unauthorized transfer of a file; unauthorized use of another individual's identification or password; use of computing facilities to interfere with the work of another student, faculty member, or University official; use of computing facilities to interfere with a University computing system. Violation of the University of California Electronic Mail Policy (available at www.ucop.edu/ucophome/policies/email/), or of any UCLA acceptable or allowable use policy, is also considered a violation of Section 102.05.

102.06: Unauthorized Conduct. Unauthorized possession of, receipt of, duplication of, or use of the University's name, insignia, or seal. Unauthorized entry to, possession of, receipt of, or use of any University properties, equipment, resources, or services. Selling or distributing course lecture notes, handouts, readers, or other information provided by an instructor, or using them for any commercial purpose, without the express permission of the instructor.

102.07: University-Owned Housing. Violation of policies, regulations, or rules governing University-owned or operated housing facilities or leased housing facilities located on University property.

102.08: Physical Abuse. Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person.

102.08a: Rape. For the purposes of this Code, rape refers to "rape" as defined by the California Penal Code (as it may be amended from time to time). Among other acts, the Penal Code prohibits the following acts:

(1) Sexual intercourse against a person's will accomplished by force or threat of bodily injury.

(2) Sexual intercourse against a person's will where the person has reasonable fear that she (or he) or another will be injured if she (or he) does not submit to the intercourse.

(3) Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, due to alcohol or drugs, and this condition was known, or reasonably should have been known by the accused.

(4) Sexual intercourse where the person is incapable of resisting because she (or he), at the time, is unconscious or asleep, and this is known to the accused.

102.08b: Sexual Assault. The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); rape by foreign object (forced penetration by a foreign object, including a finger); and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations when the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs and this condition was known, or reasonably should have been known by the accused. NOTE: For the purpose of this regulation, students should understand that

(1) Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant.

(2) Intoxication of the assailant shall not diminish the assailant's responsibility for sexual assault.

102.09: Sexual Harassment. Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

(1) Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;

(2) Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; or

(3) Such conduct has the purpose or effect of unreasonably interfering with an individual's performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration shall be given to the record of the incident as a whole and to the totality of the circumstances, including the context in which the alleged incidents occurred.

102.10: Stalking. Stalking behavior in which an individual willfully, maliciously, and repeatedly engages in a knowing course of conduct directed at a specific person which reasonably and seriously alarms, torments, or terrorizes the person, and which serves no legitimate purpose.

102.11: "Fighting Words." The use of "fighting words" by students to harass any person(s) on University property, on other property to which these policies apply, or in connection with official University functions or University-sponsored programs. "Fighting words" are those personally abusive epithets which, when directly addressed to any ordinary person are, in the context used and as a matter of common knowledge, inherently likely to provoke a violent reaction whether or not they actually do so. Such words include, but are not limited to, those terms widely recognized to be derogatory references to race, ethnicity, religion, sex, sexual orientation, disability, and other personal characteristics. "Fighting words" constitute "harassment" when the circumstances of their utterance create a hostile and intimidating environment which the student uttering them should reasonably know will interfere with the victim's ability to pursue effectively his or her education or otherwise to participate fully in University programs and activities.

102.12: Hazing. Hazing or any method of initiation or preinitiation into a campus organization or any activity engaged in by the organization or members of the organization which
causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any student or other person.

102.13: Obstruction or Disruption. Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

102.14: Disorderly Conduct. Disorderly or lewd conduct.

102.15: Disturbing the Peace. Participation in a disturbance of the peace or unlawful assembly.

102.16: Failure to Comply. Failure to identify oneself to, or comply with directions of, a University official or other public official acting in the performance of their duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

102.17: Controlled Substances. Unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in Federal and State laws or regulations.

102.18: Alcohol. Manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations.

102.19: Destructive Devices. Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.

102.20: Weapons. Except as expressly permitted by law, possession, use, storage, or manufacture of a firearm or other weapon capable of causing bodily injury.

102.21: Violation of Disciplinary Conditions. Violation of the conditions contained in the terms of a disciplinary action imposed under this Code.

102.22: Violation of Emergency or Interim Suspension Conditions. Violation of the conditions contained in a written Notice of Emergency or Interim Suspension issued pursuant to Section IV of this Code.

102.23: Violation of Campus Restraining Order. Violation of the conditions contained in a written Campus Restraining Order issued pursuant to Section III.A.2.a.(1) of this Code.

102.24: University Properties. Using University properties for the purpose of organizing or carrying out unlawful activity.

102.25: Violations of Law. Violation of Federal, State, or local laws.

Rape and Other Forms of Sexual Assault

UCLA does not tolerate sexual assault in any form, including acquaintance or date rape. Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated, the campus pursues disciplinary actions which may include sanctions up to and including dismissal from the University. A student charged with sexual assault can be prosecuted under California criminal statutes and disciplined under the campus student conduct policies and regulations. Even if the criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

Definitions

For explicit definitions of rape and sexual assault, refer to Sections 102.08a and 102.08b of the Student Conduct Policies listed above.

If a Person Has Been Raped or Sexually Assaulted

Those who believe that they are the victims of rape or other forms of sexual assault should:

1. Immediately call the police department. If possible, call 911 or the UCLA Police Department at (310) 825-1491.

2. Get medical attention. Campus police will provide transportation to the Santa Monica UCLA Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge.

Utilize campus and community support services:

1. Contact a Rape Services Consultant (RSC) at the Women’s Resource Center. RSCs have expertise in working with victims of rape or sexual assault. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, and how to file a police report and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist UCLA faculty, staff, and students regardless of where or when the assault occurred. For assistance, contact the Women’s Resource Center at (310) 206-8240 or go to 2 Dodd Hall and ask to speak to an RSC.

2. Contact the Rape Treatment Center at Santa Monica UCLA Medical Center (310-319-4000) for free emergency medical treatment and counseling services.

Campus Discipline Process When the Assailant Is a Student

Those who believe that they are the victims of rape or other forms of sexual assault by a student on University property or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall, http://www.saoenet.ucla.edu/dos/.

Cases referred to the Office of the Dean of Students are treated under the hearing procedures set forth in the UCLA Student Conduct Code (http://www.saoenet.ucla.edu/dos/SCC98.htm). Where the allegation is of rape or other forms of sexual assault, and the case is referred to the Student Conduct Committee, the following additional procedures shall apply:

1. The complainant shall be entitled, for support, to have up to two persons of the complainant’s choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person’s attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify before the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.

2. The complainant shall have the right to be present during the entire hearing, notwithstanding the fact that the complainant is to be called as a witness.

3. Evidence of the complainant’s past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant’s sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the panel before the complainant testifies.

4. The hearing shall be closed to spectators.

Harassment

Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

Definitions

For explicit definitions of sexual harassment, refer to Section 102.09 of the Student Conduct Policies listed above.

Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender’s supervisor and/or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant’s status at the University at the time of the alleged incident:
Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person’s sense of worth and interferes with one’s ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The University of California Policies Applying to Campus Activities, Organizations, and Students (hereafter referred to as Policies; http://www.ucop.edu/ucophome/uxnews/aospol/toc.html) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the Policies.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the Policies.

Further, under specific circumstances described in the Universitywide Student Conduct Harassment Policy (http://www.saonet.ucla.edu/dos/sxeharas.htm), students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this Policy are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

2. Women’s Resource Center, 2 Dodd Hall, (310) 825-3945

4. Office of International Students and Scholars, 106 Bradley Hall, (310) 825-1681, http://www.saonet.ucla.edu/sp.htm (for students)

5. Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985, http://www.saonet.ucla.edu/sp.htm (for students)

6. Office of Vice Chancellor — Academic Personnel, 2147 Murphy Hall, (310) 206-9345, http://www.apo.ucla.edu/apoweb/index.htm (for faculty, including non-Senate academic appointees and student academic appointees when acting in the capacity of their non-Senate appointments)

7. Campus Human Resources/Employee and Labor Relations Division, 200 UCLA Wilshire Center, (310) 794-0859, http://www.chr.ucla.edu (for campus staff employees and students when acting in the capacity of their staff appointments)

8. Medical Center Human Resources Office, 924 Westwood Boulevard (Bank of America Building), Suite 200, (310) 794-0500, http://149.142.193.6/healthnet/mecdr/hr/ (for Medical Center staff employees and students when acting in the capacity of their staff appointments)

9. UCLA Extension Dean’s Office, 770 UCLA Extension (UNEX), (310) 825-5603, http://www.unex.ucla.edu (for UCLA Extension faculty, staff employees, and students)

Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (d) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citi-
Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents or students were not enrolled in a regular session at any University of California campus prior to fall 1993, they are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse or their parents.

Establishing Intent to Become a California Resident

Indications of students’ intent to make California their permanent residence can include the following: registering to vote and voting in California elections; designating California as their permanent address on all school and employment records, including military records if they are in the military service; obtaining a California driver’s license or, if they do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence; establishing a California residence in which they keep their personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent’s right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa which precludes them from establishing domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

(1) Divorced or Separated Parents. Students may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

(2) Parent of Minor Moves from California. Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) they remained in California after their parent(s) departed, (b) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (c) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) Two-Year Care and Control. Students may be entitled to resident status if they are U.S. citizens or eligible aliens and they have lived continuously with an adult who is not their...
parent for at least two years prior to the residence determination date. The adult with whom they are living must have been responsible for their care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

1. **Member of the Military.** If students are members of the U.S. military stationed in California on active duty, unless they are assigned for educational purposes to a state-supported institution of higher education, they may be exempt from the nonresident tuition fees until they have lived in California long enough to become a resident. They must provide the residence deputy on campus with a statement from their commanding officer or personnel officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

2. **Spouse or Other Dependents of Military Personnel.** Students are exempt from payment of the nonresident tuition fee if they are a spouse or a natural or adopted child or step-child who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until they have lived in California long enough to become a resident. Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

3. **Child or Spouse of Faculty Member.** To the extent funds are available, if students are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

4. **Child or Spouse of University Employee.** Students may be entitled to resident classification if they are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Their parent's or spouse's employment status with the University must be ascertained each term.

5. **Child of Deceased Public Law Enforcement or Fire Suppression Employee.** Students may be entitled to a waiver of the nonresident tuition fee if they are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

6. **Dependent Child of a California Resident.** If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Temporary Absences

If persons are nonresident students who are in the process of establishing a residence for tuition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. **Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.**

If persons are students who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:

1. Continue to use a California permanent address in all records — educational, employment, military, etc.

2. Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.

3. Retain a California voter's registration and vote by absentee ballot.

4. Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

Petition for Resident Classification

Students may obtain a petition at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which they intend to be classified as residents.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447; http://www.registrar.ucla.edu/faq/res.htm) or to the Legal Analyst — Residence Matters, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 45 days of notification of the residence deputy’s final decision.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar’s Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress
requirements listed below, they should contact the Financial Aid Office immediately for further advising.

Undergraduate Students

Qualitative Standard
The qualitative standard is enforced by the college or school. Students are notified by their academic department if they fall below the required grade-point average (GPA).

Quantitative Standard
This standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of regular session terms. It may differ from the college/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in their first academic year at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 90 units by the end of the ninth term, 123 units by the end of the twelfth term, 156 units by the end of the fifteenth term, and 180 units by the end of the seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of terms for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 90 transfer units would have only 11 terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 57 units if they attended UCLA for six terms). They would then have only 11 terms of financial aid eligibility.

Nonstandard Enrollment
Progress for students approved for part-time enrollment by the Registrar’s Office is measured by a modified schedule. Part-time students should inform the Financial Aid Office of their enrollment arrangements so their aid can be adjusted accordingly. Any units earned during Summer Sessions are applied toward the unit count for the following year. Summer Sessions are not included as part of the overall term count.

Successful Completion
To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in a course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

Withdrawal and Cancellation
Withdrawal after the first day of classes during a term counts as a term attended when determining overall term and unit count eligibility, unless students do not attend any classes for the given term and receive a 100 percent refund of all fees. Cancellation of registration on or before the first day of classes does not count as a term attended when determining term or unit count eligibility. Beginning with Fall Quarter 1997, administrative cancellation does not count toward the overall term or unit count eligibility; however, cancellation in any term prior to Fall Quarter 1997 does count toward the term and unit counts.

Disqualification and Reinstatement
The Financial Aid Office monitors satisfactory progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

If students have not met the requirements shown on the schedule, their financial aid is discontinued until the deficiencies are satisfied. They may use Summer Sessions or completion of extra units during regular academic terms to make up deficiencies.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.

Appeal Process
Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected their ability to meet the requirements. The committee evaluates the request based on the rationale and evidence provided.

Graduate Students

Qualitative Standard
The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

Quantitative Standard
Students must successfully complete at least 12 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 12 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

Disqualification and Appeal Process
If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

Period of Eligibility
The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determining the remaining number of terms of financial aid eligibility.

Students who are in a credential program or a professional master’s program (other than Master of Fine Arts) are eligible for a maximum of nine terms of need-based financial aid.

Students who are in a Master of Fine Arts program are eligible to apply for aid for the first 12 terms of enrollment. If students are in an M.A. or M.S. program, a doctoral program, or a combination master’s/doctoral program, their eligibility expires after 27 terms of enrollment. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

Professional Schools
Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

Grading Regulations

Assigning a Grade
The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor’s evaluation of the student’s achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in
addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student’s own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

Grade Complaints
A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see Faculty Code of Conduct earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

Correction of Grades
All grades, except DR, I, and IP, are final when filed by the instructor in the end-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

Policy on Alternate Examination Dates
In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved.

(1) In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

(2) Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 1172 Career Center, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

(3) Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

Undergraduate Final Examinations
No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

Disclosure of Student Records
Pursuant to the Federal Family Educational Rights and Privacy Act, the California Educational Rights and Privacy Act, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right to (1) inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, address (local/mailing, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailing, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this “public information” released and published may so indicate through URSA OnLine (http://www.ursa.ucla.edu/). To restrict the release and publication of the additional items in the category of “public information,” complete the Decline to Release form available from Enrollment and Degree Services, 1113 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a variety of offices, including the Registrar’s Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, and the offices of a student’s college or school and major department. Students are referred to the UCLA Campus and CHS Directory which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of the Federal and State Laws and the University Policies. Inspection of student records maintained by the Registrar’s Office is by appointment only and must be arranged 24 hours in advance. Call (310) 825-3801 or inquire at Academic Record Services, 1134 Murphy Hall.
A copy of the Federal and State Laws, the University Policies, and the UCLA Campus and CHS Directory may be inspected in the office of the Information Practices Coordinator, 500 UCLA Wilshire Center. Information concerning students' hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

In addition to the public information described above, information related to students' Social Security number, sex, and marital status, and the name(s), address(es), and telephone number(s) of their parents or next of kin are made available to the UCLA External Affairs Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for External Affairs Information Restriction form available from Enrollment and Degree Services, 1113 Murphy Hall.

UCLA Retention/Graduation Rates and Time to Degree

Current retention and graduation rates are the highest on record for UCLA and among the highest rates for public universities anywhere in the country. One-year retention rates for new undergraduates have been above 90 percent for over a decade. For students entering over a three-year span from Fall Quarter 1995 to Fall Quarter 1997, more than 95 percent of new freshmen and 93 percent of new transfers were still enrolled at UCLA one year later.

Graduation rates are high and still increasing. Over the past three years the four-year, five-year, and six-year graduation rates for cohorts of entering fall freshmen averaged 38, 74, and 79 percent respectively, up from 29, 68, and 73 percent for the same set of indicators at a point in time six years ago. More than 80 percent of all full freshmen entering from 1986 to 1991 have now graduated from UCLA; final graduation rates of better than 82 percent are projected for all freshmen cohorts arriving since 1992.

Over the past three years the two-year, three-year, and four-year graduation rates for cohorts of entering fall transfers have averaged 37, 72, and 80 percent respectively, up from 23, 65, and 74 percent for the same set of indicators at a point in time six years ago. More than 80 percent of all full transfers entering from 1988 to 1993 have now graduated from UCLA; final graduation rates of better than 82 percent are projected for all transfer cohorts arriving since 1994. The graduation rates listed above refer exclusively to degrees awarded by UCLA. Students who transfer to and graduate from another UC campus or university are not included.

Time to degree for UCLA undergraduates declined significantly during the 1990s. During the past four years (1994-95 to 1997-98), more than 12,800 baccalaureate degrees were awarded to students who entered directly from high school. The average number of quarters registered at UCLA was 13.22, declining from an average of 13.74 quarters for similar graduates in 1989-90. Among the recent graduates, 50 percent were registered for 12 quarters or less (i.e., four years or less), 59 percent for 13 quarters or less, 70 percent for 14 quarters or less, and 92 percent for 15 quarters or less (i.e., five years or less).

During the same four years (1994-95 to 1997-98), more than 8,900 baccalaureate degrees were awarded to students who entered as transfers. The average number of quarters registered at UCLA was 7.64, declining from an average of 8.25 quarters for similar graduates in 1989-90. Among the recent graduates, 42 percent were registered for six quarters or less (i.e., two years or less), 57 percent for seven quarters or less, 68 percent for eight quarters or less, and 87 percent for 15 quarters or less (i.e., three years or less).

Additional information on retention and graduation rates is available at http://www.apb.ucla.edu.

Campus Security Information

UCLA Police Department

The UCLA Police Department (310-825-1491; http://www.ucpd.ucla.edu), located at Westwood Plaza and Circle Drive South, has 56 sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services and community safety programs.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles all criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus, Center for the Health Sciences, and University Apartments South. The City of Los Angeles Police Department does not handle calls for service on campus. All requests for police service should be made to the UCLA Police Department. All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. The University endorses a policy that strongly encourages victims to report all incidents to the department anytime of the day or night. Crimes occurring off campus should be reported immediately to the local law enforcement agency.

Police, fire, or medical EMERGENCIES can be reported by dialing 911 from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

Crime Statistics

Statistics on FBI Crime Index offenses (violent and property crime) and other offenses committed between 1994 and 1998, as well as a crime trend overview, are available at http://www.ucpd.ucla.edu/ucpd/stats96-98.htm.

Community Service Officers

The UCLA Police Department employs approximately 125 student community service officers (CSOs; http://www.ucpd.ucla.edu/ucpd/cso/index.htm) who are the "eyes and ears" (trained observers) of the department and act as nonintervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department's Communications Center and provide a direct link to police, fire, or medical aid. CSOs provide security service to a number of campus buildings, including residence halls and libraries. They are most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night and is accessible to people with disabilities.

Crime Prevention

An involved community is one of the best defenses against crime. Therefore, the department is committed to a community policing philosophy and supports a proactive Crime Prevention Unit (http://www.ucpd.ucla.edu/ucpd/crimepre.htm) that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Other programs are developed to meet the special needs of the campus community. Brochures and literature on crime prevention and personal safety are available. The Women's Resource Center (WRC) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational pro-
The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

Residential Housing
UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Police Department and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, Crime Alert Bulletins are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple common-sense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities are under the shared jurisdiction of their local police department and the UCLA Police Department, which provides assistance to students, faculty, and staff and/or referrals to neighboring police departments.

Safety Tips
The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent are able to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Police Department. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

Endowed Chairs
Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University’s three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or “chairs,” which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 144 endowed chairs which have been approved by the Office of the President of the University of California, as follows. (Asterisks indicate new chairs which have been approved by the Office of the President since publication of the 1997-99 UCLA General Catalog.)

School of the Arts and Architecture
S. Charles Lee Chair in Architecture and Urban Design
Harvey S. Perloff Chair
UCLA Art Council Professorship of Art

Graduate School of Education and Information Studies
Allan Murray Cartter Chair in Higher Education
*George F. Kneller Chair in Education and Anthropology
George F. Kneller Chair in Education and Philosophy

School of Engineering and Applied Science
L.M.K. Boelter Chair in Engineering
*Roy and Carol Doumani Chair in Biomedical Engineering
Norman E. Friedmann Chair in Knowledge Sciences
Hughes Aircraft Company Chair in Electrical Engineering
Hughes Aircraft Company Chair in Manufacturing Engineering

Fred H. Bixby Chair in Population Policy
Fred W. and Pamela K. Wasserman Chair in Health Services

School of Public Policy and Social Research
Marjorie Crump Chair in Social Welfare
Harvey S. Perloff Chair

Appendix D

Distinguished Teaching Awards

Academic Senate Recipients
Each year the UCLA Alumni Association presents Distinguished Teaching Awards to five Academic Senate faculty members. The highly prized awards are presented at the annual UCLA Alumni Association Awards Ceremony, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

1961
John F. Barron (Economics)
Hector E. Hall (Physiology)
Kenneth N. Trueblood (Chemistry and Biochemistry)

1962
Charles W. Hoffman (Germanic Languages)
Thomas P. Jenkin (Political Science)
1963
Ken Nobe (Chemical Engineering)

1964
George A. Bartholomew (Chemistry and Biochemistry)

1965
E. A. Carlson (Biology)

1966
E. A. Carlson (Biology)

1967
Basil Gordon (Mathematics)

1968
Edward W. Graham (Chemistry and Biochemistry)

1969
Robert J. Finkelstein (Physics and Astronomy)

1970
Ehrhard Bahr (Germanic Languages)

1971
Vernon E. Denny (Chemical Engineering)

1972
Barbara K. Keogh (Education)

1973
Kirby A. Baker (Mathematics)

1974
Robert B. Edgerton (Anthropology, Psychiatry and Biobehavioral Sciences)

1975
Alma M. Hawkins (World Arts and Cultures)

1976
Marianne Celce-Murcia (Teaching English as a Second Language and Applied Linguistics)

1977
Michael J. B. Allen (English)

1978
William R. Allen (Economics)

1979
Steven Krantz (Mathematics)

1980
A. R. Braunmuller (English)

1981
Arnold J. Band (Near Eastern Languages and Cultures)

1982
Dean Bok (Neurobiology)

1983
Claude Bernard (Physics and Astronomy)

1984
Robert Dallek (History)

1985

2019
Karen E. Rowe (English)

2020
Robert A. Bjork (Psychology)

2021
Robert Dallek (History)
The Gold Shield Faculty Prize

The $30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of $250,000 raised by Gold Shield for this purpose, which has grown to over $400,000. Guidelines provide that the prize “recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education.” Preference for recipients is given to faculty members in mid-career who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every two years by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

1986-88
Michael E. Jung (Chemistry and Biochemistry)

1988-90
Patricia M. Greenfield (Psychology)

1990-92
Jeffrey C. Alexander (Sociology)

1992-94
J. William Schopf (Earth and Space Sciences)

1994-96
Albert R. Braunmuller (English)

1996-98
Peter M. Narins (Physiological Science)

1998-00
Robert B. Goldberg (Molecular, Cell, and Developmental Biology)
