### UCLA® General Catalog

Associate Registrar/Publications Manager: Anita Cotter  
Assistant Registrar/Catalog Editor: Kathleen Copenhaver  
Research Analyst and Text Editor: Leann J. Hennig  
Text Editor, Web Production and Design: James Hudgens  
Graduate Requirements Editor: John Cope  
Cover Design: Robin Weisz/Graphic Design  
Cover Illustration: Mick Wiggins, Baker Design Associates  
Photography: James Hudgens, Kathleen Copenhaver  
Produced by Academic Publications, UCLA Registrar’s Office, using FrameMaker 5.5.6.

Copies of the 1999-01 UCLA General Catalog are available for purchase at the UCLA Store for $6. To obtain a copy by mail, first determine the proper mailing charges by writing the UCLA Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645 or calling (310) 825-6064. Charges vary according to destination and method of shipment. Catalogs may also be ordered online; follow the BookZone link from the store's main menu at http://www.uclastore.ucla.edu and look for the link to the General Catalog.

### Please Note

Every effort has been made to ensure the accuracy of the information presented in the UCLA General Catalog. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

The departmental websites referenced in department addresses in this catalog are maintained by independent operators and do not necessarily reflect approved curricula and courses information. Consult the online catalog for the most current, officially approved courses and curricula.

Other information about UCLA may be found in the announcements of the Schools of Dentistry, Education and Information Studies, Engineering and Applied Science, Law, Management, Medicine, Nursing, Public Health, and Public Policy and Social Research, and in literature produced by the School of the Arts and Architecture and School of Theater, Film, and Television. The most current information on graduate programs is available online at http://www.gdnet.ucla.edu/publications.html. Links from this page go to various Graduate Division publications, including Program Requirements for UCLA Graduate Degrees which has the complete text for officially approved graduate programs.
Chancellor’s Message

The UCLA General Catalog for 1999-2001 presents the vast range of instructional offerings at UCLA’s College of Letters and Science and 11 professional schools. These pages document the rich comprehensiveness of UCLA, while reflecting the University’s commitment to high standards, curricular innovation, and interdisciplinary approaches to learning.

UCLA faculty and students come together in a true community of scholars to advance knowledge, address societal challenges, and pursue intellectual and personal fulfillment. Every facet of scholarly life here benefits immeasurably from the instructional process and its intersection with the research enterprise. In addition, public service is an integral part of our mission, and the University is actively engaged with the surrounding region in myriad ways.

UCLA’s leadership in teaching, research, and public service make it a beacon of excellence in higher education. I encourage you to peruse this volume — both to learn about one of the world’s premier academic programs, and to discover the excitement of the intellectually stimulating and diverse university community that is UCLA.

Albert Carnesale
Chancellor
About UCLA

Introducing UCLA

“...in 10 years...we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee.”

Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns...
The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between $2 and $500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914 the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road that would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later on May 23, 1919, California Governor William D. Stephens signed the legislation that created the “Southern Branch” of the University of California — no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science.

Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the “at” became a comma in 1958).

Move Westward
As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA's future growth. But in 1929, on the barren chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of 400 empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years, and both experienced phenomenal growth and development during the next half century. The most spectacular period of growth at UCLA occurred in the 25 years following World War II, when it tripled its prwar enrollment of 9,000 students and undertook what would become a $260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital that is now one of the largest and most highly respected in the world.

UCLA Today

In 1990-91 UCLA celebrates 80 years of growth, from a small two-year college to a comprehensive institution in the elite company of the nation's most prestigious research universities. This 80-year journey is one of the great success stories in American higher education.

UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Some 282 buildings on 419 acres house the College of Letters and Science plus 11 professional schools and serve more than 35,550 students. Another major period of campus development is currently nearing completion, providing needed additional space for chemistry, human genetics, law, neuroscience, and science and technology research programs, while several of UCLA's older buildings are now being made earthquake-safe through a broad seismic correction program.

The top administrative officer at UCLA is Chancellor Albert Carnesale, who took office on July 1, 1997, thus becoming the eighth chief executive in the 80-year history of UCLA.

Setting
Cradled in rolling green hills just five miles inland from the ocean, UCLA is in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque college town has mushroomed into an entertainment magnet for the entire Los Angeles area.
The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour’s drive.

**Ambience**

The stately Tudor Gothic and Italian Romanesque architecture of UCLA’s early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptor Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. People must visit the campus to appreciate it. Students thinking of applying to the University as undergraduates should contact Undergraduate Admissions and Relations with Schools (310-825-8764; http://www.saonet.ucla.edu/uars/prospect/tours.htm), about campus tours specifically tailored to prospective students. The Campus Visits Program (310-206-0616), sponsored by the UCLA Alumni Association, arranges both individual and group tours of the campus throughout the year for everyone else. The tours are offered by current students and reservations are required.

**Commitment to Research**

UCLA is one of the outstanding research universities in the country. What does this mean to students?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA students are taught by the people making the discoveries, so they learn the latest findings on every front. They may exchange ideas with faculty members who are authorities in their fields, and even as undergraduates are encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

**Question of Size**

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 31,774 students is about equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,784 men and women studying in its health sciences schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow students to feel that they belong. UCLA provides orientation sessions and several innovative academic assistance programs for new students, a staff of helpful advisors and counselors in every college/school and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be the academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 96 percent of all lower division lecture classes in 1998-99 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 18 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.

Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

**Hallmarks of Excellence**

Recent surveys indicate that in overall excellence, UCLA is one of America’s most prestigious and influential public universities. It is consistently rated among the best universities in the nation.

UCLA is accredited by the Western Association of Schools and Colleges and by numerous special agencies. Information regarding the University’s accreditation may be obtained in the Planning Office Library, Office of Academic Planning and Budget, 2107 Murphy Hall.

**Academics**

UCLA has one college and 11 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Education and Information Studies, School of Law, John E. Anderson Graduate School of Management, School of Public Policy and Social Research, and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 116 different disciplines; graduate students may earn one of 86 master's and 108 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. For example, new degree programs last year included the B.S. in Ecology, Behavior, and Evolution, B.S. in Marine Biology, B.S. in Plant Biology, M.S. and Ph.D. in Biomedical Engineering, M.S. and Ph.D. in Human Genetics, and M.S. and Ph.D. in Statistics. New undergraduate minors were established in Arabic and Islamic Studies, Armenian Studies, Asian American Studies, Comparative Literature, En-

Faculty
Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA’s distinguished faculty includes 1997 and 1998 Nobel prizewinners Paul D. Boyer and Louis J. Ignarro, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1997-99 three faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad, and 18 UCLA scientists and scholars were awarded Guggenheim fellowships. Four were elected as fellows of the prestigious American Association for the Advancement of Science (AAAS). With 12 additional American Academy of Arts and Sciences award winners, eight Sloan Foundation fellows, and two National Academy of Sciences awardees, UCLA placed among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in 274 American research universities. UCLA was judged fourteenth in the nation among both public and private universities. Of the 41 doctoral degree disciplines studied, 12 of UCLA’s academic departments were ranked among the top 10 in the country and 30 were ranked among the top 20.

Research
UCLA is among the 10 leading research universities in the country, receiving a record $410.1 million in 1997-98 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

Teaching
Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the most important criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

Student Body
Students at UCLA pride themselves on academic excellence. The Fall Quarter 1998 entering freshman class had an average high school GPA of 4.08, with an average composite score on the Scholastic Assessment Test (SAT) of 1,272 out of a possible 1,600.

One of the University's highest priorities is to advance the ethnic diversity of its students, faculty, staff, and administrators. The diversity of UCLA’s student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 115 foreign countries to study at UCLA. The University now enrolls the most ethnically mixed and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise 61.7 percent of the undergraduates and 42.1 percent of the graduate student population. And international students and scholars presently number over 1,900, making this one of the most popular American universities for students from abroad.

Numerous Other Factors
With more than 7.1 million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. UCLA Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country. And management of the UCLA at the Armand Hammer Museum of Art and Cultural Center and acquisition of the Geffen Playhouse in Westwood Village enhance the entire arts program.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, and the campus reprised that role in July 1991 for the U.S. Olympic Festival '91. On both occasions, UCLA housed a large Olympic Village and served as the venue for several events.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.
University Administration

The University of California system is governed by a Board of Regents whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, the Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the Academic Senate, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.

Academic Resources and Programs

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of organized research units (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs that lead to bachelor’s and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA’s educational program and the overall academic quality of the University.

In the overview that follows, UCLA’s 23 organized research units are listed within six major divisions — arts and humanities, health sciences, international studies, life sciences, physical sciences and engineering, and social sciences. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Arts and Humanities

Center for Medieval and Renaissance Studies

The Center for Medieval and Renaissance Studies (310-206-8552; http://www.humnet.ucla.edu/humnet/cmrs/) supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Major programs include funding research assistants, appointing visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center sponsors the publication of two journals, Viator, with emphasis on intercultural and interdisciplinary studies, and Comitatus, with articles by graduate students and recent Ph.D. graduates. For more information, send inquiries to the center at UCLA, Box 951485, Los Angeles, CA 90095-1485.

Center for Seventeenth- and Eighteenth-Century Studies

The Center for Seventeenth- and Eighteenth-Century Studies (310 Royce Hall, 310-206-8552; http://www.humnet.ucla.edu/humnet/c1718cs/) and the William Andrews Clark Memorial Library are united under the administrative direction of the center and the College of Letters and Science. The center organizes scholarly programs and workshops, seeks to enlarge the Clark Library holdings in the early modern period to enhance local research opportunities, has a publications program that makes the results of its conferences and workshops known to the community, provides long- and short-term fellowships to students and scholars doing research in early modern studies, offers graduate research assistantships and master classes, and organizes public programs and classical music concerts. The Clark Library, located approximately 10 miles from UCLA at 2520 Cimarron Street (323-731-8529; http://www.humnet.ucla.edu/humnet/clarklib/), is a rare book library specializing in seventeenth- and eighteenth-century British works. It also has a renowned collection centering on Oscar Wilde and his era and significant holdings of modern fine printing and Western Americana. Bequeathed to UCLA in 1934 by William Andrews Clark, Jr., a prominent Los Angeles book collector and philanthropist, the extensive collection is housed in an elegant building in the West Adams district.

In other research activities, the Center for Bilingual Research and Second Language Education is working to produce a society that is proficient in at least two languages. In the Linguistics Phonetics Laboratory (http://www.humnet.ucla.edu/humnet/linguistics/facilities/uclalab.html), one of the best-known laboratories of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. In the Hammer Center for Leonardo Studies and Research scholars have access to major resources for the study of the works of Leonardo da Vinci. The Center for the Study of Regional Dress (http://www.fmch.ucla.edu/CSRD/CSRD.htm) within UCLA’s Fowler Museum of Cultural History advances the study of past and present cloth and clothing traditions through research, exhibitions, and teaching. The Center for Jewish Studies (http://www.humnet.ucla.edu/humnet/jewishst/) sponsors lectures, conferences, and visiting scholars and coordinates Jewish studies activities on campus. And the Center for Modern and Contemporary Studies (http://www.humnet.ucla.edu/humnet/cmcs/) presents workshops, faculty seminars, and public lectures and discussions to bring together people with diverse interests in the humanities and social sciences.

Health Sciences

Brain Research Institute

The Brain Research Institute (BRI), center for neuroscience research and education at UCLA, has one of the largest investigative programs of its kind in the country, with more than 200 scientists involved in every aspect of research in the nervous system from molecular organization to human behavior. The BRI provides core facilities with new technologies and an
environment for multidisciplinary research and training in the structure and function of the central nervous system. The BRI sponsors affinity groups, conferences, symposia, and a variety of other activities designed to strengthen ties among neuroscientists campuswide. The interdisciplinary Ph.D. and B.S. programs in Neuroscience, jointly sponsored by the School of Medicine and the College of Letters and Science, are housed within the BRI. Public service activities include an elementary school outreach program directed by graduate students and a joint educational program with UCLA Extension. The Office of the Director is located in 2506 Gonda Center (310-825-1868; http://www.medsch.ucla.edu/som/bri/).

**Crump Institute for Biological Imaging**

The Crump Institute for Biological Imaging is a science and technology center that brings together physical, biomathematical, chemical, biological, and clinical scientists and students to merge the principles of imaging with those of molecular and cellular biology, genetics, and biochemistry. The imaging domains range from the molecular organization of viruses and cellular subunits to the biological processes of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. Imaging technologies are used to build a picture (image) of the spatial and temporal variations in biological processes. Imaging technologies encompass such areas as cryoelectron microscopy and protein structure studies to assemble and study simple organisms and subcellular domains; confocal fluorescent microscopy for study of cellular and subcellular processes; in vitro and in vivo autoradiography studies of integrated organ function; and positron emission tomography (PET), X-ray computed tomography (CT), and magnetic resonance imaging (MRI) studies of the structure and biological functions of organ systems in animal and human subjects. Specially designed microPET scanners for mice are developed as laboratory devices for repeated in vivo monitoring of gene expression. The institute has research and educational programs for visiting scientists, postdoctoral scholars, and Ph.D. graduate students which include the development of novel multimedia computer-based learning technologies. Dr. Michael E. Phelps is the director (310-825-6539; http://www.crump.ucla.edu/).

**Dental Research Institute**

The mission of the Dental Research Institute (DRI) is to be the preeminent orofacial research center in the U.S. by fostering excellence in research, professional training, and public education. Its objective is to study the basic mechanisms of disease in the orofacial region through original research. Members include scientists trained in the traditional disciplines of molecular biology, immunology, virology, biochemistry, pharmacology, pathology, genetics, developmental biology, neurobiology, and neurophysiology, among others, who are presently engaged in various research projects which include oral cancer/molecular oncology, viral oncology, molecular mechanisms of periodontal diseases, dental implantology, TMJ disorders and orofacial pain, neuroimmunology, molecular immunology, AIDS/HIV immunology, pain control/pharmacology, and wound repair/keloid tissue formation mechanisms. Currently several extramural funds supported by the National Institutes of Health and other private funding agencies are held by DRI members. The DRI contributes educational activities in the form of quarterly seminars in the UCLA Center for the Health Sciences to which everyone is welcome and encouraged to attend. The Office of the Director is located in 73-017 Center for the Health Sciences (310-206-8045; http://www.dent.ucla.edu/dri/).

**Jules Stein Eye Institute**

The Jules Stein Eye Institute is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility, located in the Center for the Health Sciences (310-825-5000; http://www.medsch.ucla.edu/som/jsei/), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. The Doris Stein Eye Research Center houses clinical facilities as well as new research and training programs concentrating on major eye diseases worldwide.

**Mental Retardation Research Center**

The Mental Retardation Research Center, located on the C level and the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 NPI&H (310-825-0313; http://www.mrrc.npi.ucla.edu/).

**UCLA-DOE Laboratory of Structural Biology and Molecular Medicine**

The UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, located in the Molecular Biology Institute (310-825-3754; http://www.doe-mpi.ucla.edu/) and the Center for the Health Sciences, is funded through a contract with the Department of Energy. Research is conducted in molecular nuclear medicine and structural biology and genetics. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, nuclear magnetic resonance (NMR), protein expression, and X-ray crystallography facilities.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the Lewis Neuromuscular Research Center, the Reed Neurological Research Center, and the Neuropsychiatric Institute and Hospital (http://www.MentalHealth.ucla.edu/). The Jonsson Comprehensive Cancer Center (http://www.cancer.mednet.ucla.edu/), one of only 35 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The UCLA AIDS Institute (http://www.medsch.ucla.edu/aidsinst/) is deeply involved in all aspects of the fight against AIDS, with basic research in epidemiology, immunology, and the clinical management of AIDS patients being done in the Center for Clinical AIDS Research and Education (http://www.medsch.ucla.edu/aidsinst/care/). And the School of Public Health, which established the Southern California Injury Prevention Research Center (http://www.ph.ucla.edu/sciprc/sciprc1.htm), has joined forces with the School of Medicine to form the Center for Health Promotion and Disease Prevention, another clinical research program to enhance the health of the community.

**International Studies**

**Office of International Studies and Overseas Programs**

The Office of International Studies and Overseas Programs (ISOP; http://www.isop.ucla.edu/) supports and coordinates international and foreign area studies at UCLA. ISOP and its centers also support several interde-
partmental degree programs (IDPs) focusing on particular regions of the world. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world’s leading specialists on area studies are affiliated with these centers.

The Coleman African Studies Center (10244 Bunche Hall, 310-825-3779; http://www.isop.ucla.edu/jscasc/) is one of the major interdisciplinary centers for African studies in the U.S. It encourages and coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the professional schools of Arts and Architecture, Education and Information Studies, Law, Medicine, Public Health, Public Policy and Social Research, and Theater, Film, and Television. The center also sponsors an active program of public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community.

The Center for European and Russian Studies (11367 Bunche Hall, 310-825-4060; http://www.isop.ucla.edu/euro/) develops and coordinates teaching and research on Russia and the successor states of the former Soviet Union, as well as the countries of western Europe, through conferences, lectures, seminars, and academic exchange programs with European and Russian institutions. It also offers an interdepartmental undergraduate major in European Studies and provides fellowships to graduate students to European area studies.

The Latin American Center (10343 Bunche Hall, 310-825-4571, e-mail: crameriz@isop.ucla.edu; http://www.isop.ucla.edu/lac/) is a major regional, national, and international resource on Latin America and hemispheric issues. The center sponsors and coordinates research, academic and public programs, and publications on Latin America in the humanities, social sciences, and professional schools and links its programs and activities with developments in the field and in other institutional settings. By combining instruction, research, and service and by encouraging multidisciplinary and interdisciplinary approaches, the center promotes the effective use of UCLA’s Latin American resources for the benefit of the campus, the broader community, and the public at large.

The Center for International Relations (11381 Bunche Hall, 310-825-0604; http://www.isop.ucla.edu/cir/) focuses on international governments, migration, the environment, the spread of nuclear weapons, international political economy, and conflict resolution mechanisms. The center sponsors conferences, seminars, and lectures that deal with modern international problems; the Center for Pacific Rim Studies (11286 Bunche Hall, 310-825-0045; http://www.isop.ucla.edu/pacrim/) promotes and disseminates research, teaching, and public education programs on issues emerging from increasing interactions among the peoples and nations bordering the Pacific Ocean; the Center for Chinese Studies (11353 Bunche Hall, 310-825-8683; http://www.isop.ucla.edu/ccs/) develops, coordinates, and supports graduate training in Chinese studies, major research projects, and a regional seminar; the Joint East Asian Studies Center (11266 Bunche Hall, 310-825-0007; http://www.isop.ucla.edu/eas/) with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region; the Center for Japanese Studies (11270 Bunche Hall, 310-825-7671; http://www.isop.ucla.edu/japan/) promotes research on Japan and scholarly exchange with Japanese institutions, and sponsors a colloquium series and conferences on Japan, as well as faculty research grants and graduate student fellowships; and the Center for Korean Studies (11282 Bunche Hall, 310-825-3284; http://www.isop.ucla.edu/korea/) presides over the biggest Korean studies program on the U.S. mainland, with the greatest number of specialists on its faculty dedicated to Korea and the largest number of students studying Korean subjects at both the undergraduate and graduate levels. The center also sponsors seminars, conferences, and symposia on Korea and Korean civilization.

The ISOP dean’s office also supports an interdepartmental undergraduate degree program in international development studies (http://www.isop.ucla.edu/ids/). This program focuses on critical issues and problems common to Third World countries. Other ISOP programs focus on language teaching and academic exchange. In addition, ISOP houses offices of the UC Education Abroad Program, the Southern California Fulbright Visiting Scholars Program, and the Southern California Consortium on International Studies (SOCCIS; http://www.isop.ucla.edu/soccis/).

The Center for the Study of Women (288 Kinsey Hall, 310-825-0590, e-mail: csw@csw.ucla.edu; http://www.csw.ucla.edu/csw/webfo~1.htm), is the only unit of its kind in the UC system that focuses on women and gender and draws on the energies of more than 200 faculty from 10 professional schools and 34 departments. The center’s major purpose is to encourage and facilitate faculty research on women and gender. To this end, the center (1) organizes public conferences and lecture series in the areas of feminist theory, politics, science, technology and medicine, sociology, queer studies, and international relations, (2) administers research grants, and (3) offers an affiliation for research and visiting scholars. In addition, the center sponsors various working groups, produces quarterly calendar of events posters, and hosts various programs for graduate students interested in women and gender, as well as an annual graduate student research conference.

Molecular Biology Institute

The Molecular Biology Institute (MBI), an interdepartmental organization of molecular biologists, promotes molecular biology research and teaching at UCLA. The institute houses the laboratories of 30 MBI members, as well as the administration of the Molecular Biology Interdepartmental Ph.D. Program, the UCLA-DOE Laboratory of Structural Biology and Laboratory Medicine, and the UCLA ACCESS to Programs in the Molecular, Cellular, and Integrative Life Sciences. Administrative offices are located in 168 MBI (310-825-1018; http://www.mbi.ucla.edu/).

The Fernald Child Study Center is a life sciences interdisciplinary research unit created to study and treat a variety of childhood behavioral problems and learning disorders. The Center for the Study of Evolution and the Origin of Life (http://www.igpp.ucla.edu/cseol/) melds the di-
verse research of more than 100 UCLA faculty members in the study of the emergence and evolution of life on Earth. And the UCLA Ocean Discovery Center (http://www.lifesci.ucla.edu/odc/) on the Santa Monica Pier educates Los Angeles-area school children and the public about life under the sea.

Physical Sciences and Engineering

Institute of Geophysics and Planetary Physics

The Institute of Geophysics and Planetary Physics (IGPP) is a multicampus research unit (MRU) of the University of California; the branch at UCLA is engaged in research in climate dynamics, geophysics, geochemistry, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies, global and regional environmental change, the origin of terrestrial life, the dynamical properties of the sun and solar wind, and the nonlinear dynamics of complex systems. Facilities include analytical laboratories in geochemistry, meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life, laboratories for experiments in fluid dynamics and high-pressure physics, developmental laboratories for instrumentation in space physics and seismology, and computational laboratories for large-scale numerical modeling relevant to the above topics. The UCLA office is located in 3845 Slichter Hall (310-825-1664; http://www.igpp.ucla.edu/Welcome.html).

Institute of Plasma and Fusion Research

The Institute of Plasma and Fusion Research (PPRF; 310-206-0501; http://www.ipfr.ucla.edu/) is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, postdoctoral research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering, and computer simulations and the theory of plasmas, space plasma physics, and experimental simulation of space plasma phenomena. Advanced plasma diagnostic development, laser-plasma interactions, and the use of plasmas in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, the Center for Clean Technology (http://cct.seas.ucla.edu/) in the School of Engineering and Applied Science fosters research on the interaction between technology and the environment, focusing on pollution prevention and control. On other frontiers, an Artificial Intelligence Laboratory designed exclusively for research in this burgeoning field operates under the wing of the Computer Science Department, and the Joint Services Electronics Program (http://www.ee.ucla.edu/jsep.html), funded by the Department of Defense, supports research in the Electrical Engineering Department to establish millimeter-wave electronics for widespread use.

Social Sciences

Institute of American Cultures

The Institute of American Cultures (1237 Murphy Hall, 310-206-2557; http://www.gdnet.ucla.edu/iaa/) is responsible for strengthening and coordinating interdisciplinary research and instruction in ethnic studies with special attention to UCLA’s four ethnic studies research centers. The institute conducts no research itself but makes funds available for research and fellowships and promotes the activities of the four centers whose goals are to study and illuminate the histories of African Americans, American Indians, Asian Americans, Chicanas/Chicanos, and others, and to apply the University’s capabilities to the analysis and solution of specific social issues. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The Center for African American Studies (2308 Murphy Hall, 310-825-7403; http://www.sscnet.ucla.edu/caas/) conducts and sponsors research on the African American experience, coordinates the Afro-American studies curriculum, publishes research results, and sponsors community service programming.

The American Indian Studies Center (3220 Campbell Hall, 310-825-7315; http://www.sscnet.ucla.edu/indian/CntrHome.html) serves as an educational and research catalyst and includes a library, master’s and postdoctoral fellowship programs, a publishing unit that produces books and a quarterly journal, and a student/community relations unit.

The Asian American Studies Center (3230 Campbell Hall, 310-825-2974; http://www.sscnet.ucla.edu/aasco/) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies. The center includes a library, publications unit, student/community projects unit, postdoctoral fellowships, and B.A., undergraduate specialization, and master’s programs.

The Chicano Studies Research Center (2307 Murphy Hall, 310-825-2363; http://www.sscnet.ucla.edu/csrc/) promotes the study and dissemination of knowledge on the experience of the people of Mexican descent and other Latinos in the U.S. The center primarily supports UCLA faculty and the training of the next generation of scholars engaged in this area of inquiry, with emphasis given to (1) interdisciplinary and collaborative research of a theoretical, interpretative, and applied nature, (2) the analysis, understanding, and articulation of issues critical to the development of Chicano and Latino communities in the U.S., and (3) establishment and maintenance of relationships with communities with similar academic and research interests at the state, national, and international levels.

Institute of Archaeology

The Institute of Archaeology (A210 Fowler Building, 310-206-8934; http://www.sscnet.ucla.edu/oa/) is dedicated to studying and understanding the past through laboratory studies of artifacts, analysis of field data, creation of archives to store this information, and the education of students and interested community members via publications and lectures. The institute, the only one of its kind in the U.S., coordinates various academic and practical facilities for more than 40 researchers and many graduate students and volunteers in 10 associated academic departments. It regularly sponsors workshops and special courses. Research facilities include the Information Center (regional office of the California Archaeological Inventory), Ceramics Laboratory, Computer Imaging of Archaeological Data, Obsidian Hydration and Lithics Analysis Laboratory, Paleoethnobotany Laboratory, Rock Art Archive, and Zooarchaeology Laboratory. The Publications Unit publishes the findings of scholars from UCLA and other archaeology centers, while the Public Lecture Program provides a forum for the public presentation of recent archaeological discoveries and advances.

Institute of Industrial Relations

The Institute of Industrial Relations (6350B Public Policy Building, 310-794-5957; http://www.sppr.ucla.edu/res_ctrs/industri.htm) has an interdisciplinary research program directed toward the study of all aspects of the employment relationship, including labor markets, labor law, labor-management relations, equal employment opportunity, occupational safety and health, and related issues. Through the Center for Labor Re-
search and Education, the institute also offers social policy and employment relations programs to the general public, unions, and management.

**Institute for Social Science Research**
The Institute for Social Science Research (4250 Public Policy Building, 310-825-0711; http://www.sscnet.ucla.edu/issr/) promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Center for American Politics and Public Policy, Center for the Study of Urban Poverty, Center for the Study of Society and Politics, Center for Social Theory and Comparative History, Survey Research Center, Social Science Data Archive, and Organizational Research Program. Training in survey research methodology is available to students through participation in the annual Los Angeles County Social Survey. The institute publishes the *ISSR Working Papers in the Social Sciences*.

Other interdisciplinary activities in the social sciences include the nationally respected Business Forecasting Project (http://www.anderson.ucla.edu/research/forecast/index.htm) in UCLA’s John E. Anderson Graduate School of Management and the Center for the Study of Evaluation (http://www.gseis.ucla.edu/research/cse.html) in the Graduate School of Education and Information Studies which is at the forefront of efforts to improve the quality of schooling in America. The Center for the Study of Urban Poverty (http://www.sscnet.ucla.edu/issr/csup/index.html) in UCLA’s John E. Anderson Graduate School of Management and the LeRoy Neiman Center for the Study of American Society and Culture (http://LeRoy-Neiman.sscnet.ucla.edu/) in the Department of Sociology explores emerging social and cultural trends in American society.

**Resources for Research and Study**

**Art Galleries and Museums**

A tour of all the UCLA museums and art galleries takes visitors from the corner of Wilshire and Westwood Boulevards to the northeast corner of the campus. UCLA at the Armand Hammer Museum of Art and Cultural Center regularly presents selections from the Armand Hammer Collection, which features Impressionist and Post-Impressionist paintings by such artists as Monet, Pissarro, Sargent, Cassatt, and Van Gogh. Related paintings by Constable, Picasso, and others from UCLA’s collection are also on view. The museum organizes and presents major changing exhibitions devoted to examinations of historical and contemporary art in all periods. Extensive cultural programming, including children’s performance and storytelling series, music, poetry readings, and “Dialogues on Art,” are presented Thursday evenings and Saturdays. The museum is open Tuesday through Saturday 11 a.m. to 7 p.m. (Thursday to 9 p.m.), Sunday 11 a.m. to 5 p.m.; closed Mondays, July 4, Thanksgiving, and Christmas. Admission is $4.50 for adults; $3 for seniors 65 and over, non-UCLA students, and UCLA faculty and staff; $1 for UCLA students; children 17 and under are admitted free. Admission is free on Thursday from 6 to 9 p.m. For information on programming and docent tours, call (310) 825-4361 or see http://www.hammer.ucla.edu/.

On the gallery level of the Armand Hammer Museum is the Grunwald Center for the Graphic Arts, which houses a distinguished collection of over 45,000 prints, drawings, and photographs, including nearly 10,000 works from the prestigious Armand Hammer Daumier and Contemporaries Collection. Maintained as a study and research facility for the benefit of students and the community, the center’s permanent holdings include significant European and American examples from the fifteenth century to the present. It is particularly noted for its collection of German Expressionist prints and works on paper by Matisse and Picasso, as well as the Richard Vogler Cruikshank Collection and the Frank Lloyd Wright Collection of Japanese prints. The center is open only by appointment Monday through Friday from 10 a.m. to 4 p.m. (310-443-7078).

The Wight Art Building, located in the Dickson Art Center on north campus, includes exhibition space of 6,000 square feet in which to mount campus exhibitions and student-organized programs and exhibits. For a schedule of exhibitions, call (310) 206-6467.

The Murphy Sculpture Garden, located between Bunche Hall and the Wight Art Building, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in this distinguished collection, situated on a picturesque five-acre expanse, are private gifts to the University. For information on docent tours, call UCLA at the Hammer Museum of Art and Cultural Center at (310) 443-7000.

The Fowler Museum of Cultural History is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. The museum is open Wednesday through Sunday from noon to 5 p.m. (Thursday to 8 p.m.). Admission is $5 for adults; $3 for seniors 65 and over, non-UCLA students, and UCLA faculty, staff, and Alumni Association members with I.D.; $1 for UCLA students; children 17 and under are admitted free. Admission is free on Thursday. Administrative offices are located in 1586 Fowler Building (310-825-4361; http://www.fmch.ucla.edu/).

**University Library System**

Libraries are crucial to classroom study, research, and independent learning, and the UCLA Library, a campus-wide network of libraries serving programs of study and research in many fields, is among the top five ranked research libraries in the U.S. Total collections number more than 7.1 million volumes, and more than 90,000 serial titles are received regularly.

Users identify and locate library holdings through two online information systems, both of which are accessible at http://www.library.ucla.edu. ORION contains records for all UCLA Library holdings and other campus collections, including the Archive Research and Study Center of the Film and Television Archive, Chicano Studies Research Center Library, Ethnomusicology Archive, Institute for Social Science Research Data Archives Library, and Instructional Media Library; ORION also identifies library item location and circulation status information. The MELVYL® System, which is also available via telnet (melvyl.ucop.edu), provides information on library holdings at all nine UC campuses and access to 25 periodical databases, several of which include article abstracts and/or full text. In addition, look for ORION2, a new web-based system that provides the same information and access to the campus collections as ORION but is easier to use and more widely available through the web.
For complete information on the UCLA University Library policies, procedures, services, programs, and hours, see http://www.library.ucla.edu/.

**College Library**

The College Library (http://www.library.ucla.edu/libraries/college/), located in the Powell Library Building, features collections and services in support of the undergraduate curriculum in the humanities, social sciences, sciences, and mathematics. Course reserve materials, including books, articles, audiotapes, homework solutions, lecture notes, and Academic Publishing Service Readers, are available for loan. The College Library Instructional Computing Commons, located on the first floor of Powell Library, provides students with access to PCs, Macs, and a variety of multimedia equipment, and Night Powell provides study space in a late-night reading room.

**Charles E. Young Research Library**

The Young Research Library (http://www.library.ucla.edu/libraries/url/) on north campus is designed primarily as a graduate research library in the humanities, social sciences, education, public policy, and urban planning. Most of its collections are arranged in open stacks, and the building also houses reference, circulation, graduate reserve, and periodicals services and the Microform and Media Service, with microcopies of newspapers, periodicals, and other selected materials. The Department of Special Collections in the Young Research Library contains rare books and pamphlets, primarily in the humanities and social sciences, from the fifteenth to twentieth century, university archives, early maps and atlases, files of early California newspapers, manuscript collections, transcripts of oral history interviews, ephemera, microfilm, tape recordings, prints, paintings, and drawings, including original architectural drawings.

**Arts Library**

Housed in the Dickson Art Center, the Arts Library (http://www.library.ucla.edu/libraries/arts/) collects material on architecture, art history, design, film, television, history of architecture, photography as fine art, studio art, and theater. It also contains the Elmer Belt Library of Vinci- ana, a special collection of rare books and incunabula about Leonardo da Vinci and related materials in Renaissance studies. Arts Special Collections, housed in the Young Research Library, contain noncirculating materials, including the Princeton Index of Christian Art, Artists’ file, archival records of major Southern California motion picture studios and television production companies, scripts from film, television, and radio, animation art, personal papers of writers, directors, and producers, photographs and production stills, posters, lobby cards, press kits, and West Coast theater playbills.

**Louise M. Darling Biomedical Library**

The Biomedical Library (http://www.library.ucla.edu/libraries/biomed/), located in the Center for the Health Sciences, serves all the UCLA health and sciences departments and schools and the UCLA Medical Center. Its collections focus on materials related to medicine, nursing, dentistry, public health, physiological sciences, biology, molecular biology, biochemistry, zoology, plant sciences, psychology, and life sciences, as well as rare works in the history of health and life sciences, botanical illustration, and Arabic and Persian medical manuscripts.

**Richard C. Rudolph East Asian Library**

Located on the second floor of the Young Research Library, the East Asian Library (http://www.library.ucla.edu/libraries/eastasian/) collects Chinese, Japanese, and Korean vernacular-language materials in the humanities and social sciences. The collection is particularly strong in Japanese Buddhism, religion, Chinese and Japanese fine arts, Chinese archaeology, premodern history and classical literature on both China and Japan, and Korean literature and religion.

**Hugh and Hazel Darling Law Library**

The Law Library (http://www.law.ucla.edu/Library/), housed in a new facility in the Law Building, collects published case decisions, statutes, and codes of the federal and state governments of the U.S. and other Common Law jurisdictions, legal treatises and periodicals in Anglo-American and international law, and appropriate foreign and comparative law holdings. The Law Library reports to the dean of the School of Law.

**Eugene and Maxine Rosenfeld Management Library**

Located in the John E. Anderson Graduate School of Management complex, the Management Library (http://www.anderson.ucla.edu/resources/library/libhome.htm/) houses materials on accounting information systems, arts management, business history, corporate history, entrepreneurship, finance, general management and management theory, industrial relations, international and comparative management, management information systems, management strategy and policy, marketing, operations, research, production and operations management, public/not-for-profit management, and real estate.

**Henry J. Bruman Maps and Government Information Library**

The Maps and Government Information (MGI) Library (http://www.library.ucla.edu/libraries/mgi/), housed in the Young Research Library, collects modern and historical maps (topographic, aerial, nautical, aeronautical), city plans, atlases and gazetteers, specialized books and serials on mapping and cartography, official publications from U.S. federal, state, and local governments, foreign national governments, and international and intergovernmental organizations, campaign literature from U.S. national and California state and local elections, and pamphlets and ephemeral materials on public affairs-related subjects published by nongovernmental organizations. The library also houses the Geographic Information System (GIS) Resource Center, which allows UC students, faculty, and staff to use computer technology to view, manipulate, store, and analyze spatial digital data sets.

**Music Library**

The collections of the Music Library (http://www.library.ucla.edu/libraries/music/) in Schoenberg Hall include books, music scores, sound recordings, microforms, and interactive media on Western music history and criticism; world music styles, cultures, and traditions; and music theory, aesthetics, philosophy, and organology. Music Special Collections include rare printed and manuscript books, scores, and opera librettos; personal papers of prominent Southern California composers, performers, and writers on music; and archives of film, television, and radio music; it also houses the Archive of Popular American Music, a special collection of published and manuscript sheet music, recordings, and related materials.
Special Archives and Collections

In addition to the extensive collections of the University Library, a rich array of other information resources is available to the UCLA community. The archives and collections listed below are independently managed by individual UCLA departments and centers.

The Center for African American Studies Library contains materials reflecting the African American experience in the social sciences, arts, and humanities. The American Indian Studies Center Library houses a collection on American Indian life, culture, and state of affairs in historical science, paleobiology, micropaleontology, invertebrate paleontology, ore deposits, geomorphology, hydrology, and chemical oceanography. And SEL/Physics, in Kinsey Hall, houses materials on solid-state, elementary particle, high-energy, mathematical, nuclear, and plasma physics, acoustics, spectroscopy, optics, and astrophysics.

UCLA Film and Television Archive

The UCLA Film and Television Archive (http://www.cinema.ucla.edu/) is the world’s largest university-based collection of motion pictures and broadcast programming. The archive’s holdings of original film and television materials serve both the UCLA community and national and international constituencies.

The Motion Picture Collection, with more than 37,000 films, is the country’s largest collection after the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection is the nation’s largest university-based collection of television broadcast materials. Its 35,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1946 to the present, with emphasis on drama, comedy, and variety programming. A special collection of over 100,000 news and public affairs programs is also maintained.

The archive’s exhibition program presents evening screenings and discussions in the James Bridges Theater that focus on archival materials, new work by independent filmmakers, and a wide array of international films. For program information, call (310) 206-FILM.

The Archive Research and Study Center (ARSC), located in 46 Powell Library (310-206-5388), provides on-site viewing of the Film and Television Archive’s collections and research consultation to students, faculty, and researchers. ARSC hours are weekdays 8:30 a.m. to 5 p.m.

Computer Services

The Office of Academic Computing (OAC) provides resources and services that support the UCLA distributed computing environment. Through its five service areas OAC seeks to facilitate cross-departmental information technology initiatives, provide specialized resources to faculty and students in pursuit of their research and instructional goals, and leverage the volume purchasing power of the University. For further information, call (310) 825-6635 or see http://www.oac.ucla.edu.

Research Technology Services (RTS) offers integrated services to help faculty members succeed in today’s research environment. Areas of expertise include (1) technical and administrative grant development support for interdisciplinary granting activities that require investments in information technology, (2) storage and management tools for research and instructional data, (3) analysis and interpretation of complex data sets through statistical and visualization support, (4) high-performance network consulting services for research, and (5) high-performance computing through UCLA’s SP/Cluster Program, consulting support for faculty to access the National Supercomputer Centers, and support for the development of central and local commodity-based Linux clusters. For further information, call (310) 825-7426 or see http://www.oac.ucla.edu/rts.

OAC Software Central provides information about software available to the UCLA community at educational or special volume discounts. Software Central works with the UCLA Purchasing Department to negotiate and implement volume software license agreements. Software Central provides access to licensed software by CD, disk, or download from the software distribution server. Technical support for many software applications is also available to UCLA licensees. For further information, call (310) 206-4780 or see http://www.oac.ucla.edu/software.

Student laboratories are supported through the OAC Commons Laboratory, located in 4328 Math Sciences, and the College Library Instructional Computing Commons (CLICC) in Powell Library. CLICC is a collaborative effort between OAC, Humanities Computing, Social Sciences Computing, the Office of Instructional Development, and College Librarians. OAC Commons is available to all undergraduates and provides 58 computers (48 Intel-based and 10 Macs), two high-speed printers, and three walkup ports for laptops. Five stations are designed for wheelchair access. For further information, call (310) 205-6772 or see http://www.oac.ucla.edu/labs.

OAC training and consulting services assist faculty and students with statistical computing, high-performance computing, and scientific visualization. Training services include classes in statistical applications such as SAS, SPSS, STATA; high-performance computing, including parallel programming and Fortran 90; and scientific visualization applications such as GIS. Call (310) 825-7431 or see http://www.oac.ucla.edu/trainin for further information. Register for classes at http://www.oac.ucla.edu/classes. In partnership with Communication Technology Services (CTS) and Administrative Information Services (AIS), OAC also provides access to over 300 online interactive training courses in diverse topics ranging from basic word processing to programming and LAN management. See http://computertraining.ucla.edu.

The Disabilities and Computing Program (DCP) provides adaptive technology services and support to students, faculty, and staff with disabilities, to faculty who are working with students with disabilities, and to departments. The DCP also coordinates access to computers, local area networks, and online information resources for people with disabilities. Specific services include (1) adaptive technology consulting and training, (2) information access consulting and training, (3) braille services, (4) web usability evaluations, and (5) adaptive technology purchase recommendations. Further information is available at 5907 Math Sciences (voice 310-206-7133, TDD 310-206-5155; http://www.dcp.ucla.edu).

Other Campus Resources

The Biological Collections of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mam-
mals primarily from the Western U.S., Canada, Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates. For more information, contact Fritz Hertel, 1233 Life Sciences (310-825-1282), or Donald Buth, 1335 Life Sciences (310-206-6084).

The Division of Laboratory Animal Medicine (1V-211 CHS, 310-825-7281; http://research.mednet.ucla.edu/cores/diam.html) is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The Hannah Carter Japanese Garden is one mile from the UCLA campus in Bel Air. The authentic Kyoto-style terraced garden was designed and constructed by Japanese artisans and architects using native plants and artifacts. The garden houses such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a koi pond. It was donated to UCLA in 1965 and is used by faculty, students, school and community groups, and others seeking a serene setting for meditation and solitude. The garden is open to the public by reservation only. For further information, call (310) 825-4574 or see http://www.urelations.ucla.edu/protocol/garden.html.

The Marine Science Center (310-206-8247; http://www.lifesci.ucla.edu/msc/) was established at UCLA in 1989 to coordinate marine-related teaching and research on campus and to facilitate interaction across departmental boundaries of faculty and students with similar interests in marine sciences. UCLA offers one of the broadest interdisciplinary educational programs in marine sciences in the U.S. Field trips for marine-related courses and access to research sites in the Santa Monica Bay, Channel Islands, and the Southern California Bight are provided by UCLA’s 68-foot research vessel Sea World UCLA.

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The seven-acre Mathias Botanical Garden, located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. Volunteer docents lead group tours. The botanical garden also has a research Herbarium containing 180,000 dried plant specimens. The administrative office is located in 124 Botany (310-825-3620; http://www.lifesci.ucla.edu/botgard/).

The University of California founded the UC Natural Reserve System (NRS) in 1965 to preserve for study a series of undisturbed natural areas representing the state’s vast ecological diversity. Students, teachers, and researchers from public and private educational institutions use the reserves as outdoor classrooms and living laboratories. The Stunt Ranch Santa Monica Mountains Reserve (23-126 Warren Hall, 310-206-3887; http://nrs.ucop.edu/reserves/Stunt.html), administered by the Los Angeles campus, officially joined the UC NRS in November 1995. The 310-acre site is within a 40-minute drive from UCLA and includes fine examples of chaparral and oak woodland ecosystems. The reserve lends itself to programs that focus on the natural ecosystems and issues of resource management in the urban/wildland interface. Undergraduate and graduate courses in the Departments of Anthropology, Earth and Space Sciences, Geography, Organismic Biology, Ecology, and Evolution, and Physics and Astronomy, and the Institute of the Environment utilize Stunt Ranch and other NRS sites.

The UCLA Ocean Discovery Center at the Santa Monica Pier (1600 Ocean Front Walk, 310-393-6149; http://www.lifesci.ucla.edu/odc/) is a marine science learning center serving K-12 classes from schools in the greater Los Angeles area. Interactive lessons and activities introduce students to basic concepts of marine environmental studies, marine biology, oceanography, and meteorology. The center is also open to the public, using the same conceptual approach to teach visitors about their connections to Santa Monica Bay and the world ocean.

Supplementary Educational Programs

In addition to the regular academic programs that are described in the Curricula and Courses section of this catalog, the following optional programs are available to UCLA’s undergraduate and graduate students.

Education Abroad Program

Each year more than 1,700 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world through the Education Abroad Program (EAP). UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities at more than 100 different universities in 36 countries: Australia, Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Scotland, Singapore, South Africa, Spain, Sweden, Taiwan, Thailand, Turkey, and Vietnam. Participants can spend up to a full academic year abroad, enjoying a unique opportunity to enhance language skills, take courses in their major, and become involved in the culture of the host country. One-term programs are available in Austria, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, France, Germany, Hong Kong, Hungary, India, Indonesia, Israel, Italy, Japan, Korea, Mexico, Netherlands, Russia, Singapore, Spain, Sweden, Taiwan, and Thailand. Summer programs are offered in Denmark and Mexico. In Costa Rica there is a one-term tropical biology field study program, and field study programs are available in Mexico. For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) at least a B average (3.0 GPA) overall at the time of application and (2) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well. Most programs require junior standing (90 units minimum) at departure; seniors and transfer students are welcome.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from $1,740 to $19,000, but University financial aid and special EAP scholarships are available to those who qualify. Applications must be filed several months in advance. EAP Offices are located in 10370 Bunche Hall and 1105 Hershey Hall. For more information, call (310) 825-4985 or see http://www.isop.ucla.edu/eap/.
Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of the colloquia, call the assistant to the provost of the College of Letters and Science at (310) 825-4286.

The Jacob Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, mathematics, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, statistics, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities and meets on alternate Fridays from 1 to 3 p.m. in C301 Anderson Complex during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in UCLA Today. The colloquium is directed by Michael D. Intriligator, professor of economics, political science, and policy studies. For further information, call the Western Management Science Institute at (310) 825-4144 or see http://www.anderson.ucla.edu/research/marschak/.

The Rothman Colloquium in Cognitive Science, organized by the interdisciplinary Cognitive Science Research Program, sponsors presentations by leading experts in the broad field of cognitive science, which explores the nature of human and artificial intelligence. Participating disciplines include artificial intelligence, biology, computer science, linguistics, neuroscience, philosophy, and psychology. The list of speakers is circulated to the participating departments on campus. For further information, call the Cognitive Science Research Program at (310) 825-0951 or see http://www.lifesci.ucla.edu/cogsci/Seminars/.

Summer Sessions

Throughout the summer, UCLA offers more than 500 courses from approximately 60 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year; repeat courses in which they may have done poorly; lighten their academic load for the following term; or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in the Undergraduate Study and Graduate Study sections of this catalog.

Regularly enrolled undergraduate students may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on the UCLA transcript, and grades earned are computed in the grade-point average. Check with the college or school counselor about applying these courses toward the minimum unit requirements and for any limitations the college or school may impose on Summer Sessions study.

Regularly enrolled graduate students may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult the graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees.

Unlike enrollment in regular terms, students may attend another college institution for credit while they are enrolled in Summer Sessions. Registration information is available in 1147 Murphy Hall (310-794-8333; http://www.summer.ucla.edu).

UCLA Extension

With over 100,000 adult student enrollments each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University --- its scholars, research, and resources --- to the community and the state as a whole.

Many of UCLA Extension's 4,500 classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline, in many interdisciplinary areas, and in emerging fields. In addition, Extension offers special programs each term on topical issues as well as those of ongoing public concern. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult the college or school counselor or graduate adviser before enrolling. For more information, see Concurrent Enrollment and Transfer of Credit and Courses of Instruction in the Academics section of this catalog. Graduate students should also see Transfer of Credit in the Graduate Study section.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension Building, 10995 Le Conte Avenue (310-206-6201; http://www.unex.ucla.edu). To obtain the current UCLA Extension Catalog, contact the Registration Office at (310) 825-9971. Hours are weekdays from 8 a.m. to 6 p.m. (5 p.m. Friday).

Student Life

Associated Students UCLA

Every registered UCLA student is a member of the Associated Students UCLA (ASUCLA). Four entities comprise ASUCLA: the undergraduate and graduate student governments, student media, and retail services and enterprises. For information on all four entities, including the services and enterprises described in the following section, see http://www.asucla.ucla.edu.

Automatic Tellers and Banking

Cash is available via on-campus automatic tellers. On the A Level of Ackerman Union are automatic tellers for Bank of America, University Credit Union, Washington Mutual, and Wells Fargo Bank. Near the North Campus Student Center are automatic tellers for Bank of America, University Credit Union, and Washington Mutual. The Hill Top Shop in Sunset Village and the UCLA Store/Health Sciences each have a Wells Fargo Bank machine. The UCLA Store/LuValle Commons, the Bombshelter, and the Terrace Food Court have automatic tellers for the Westwood Student Federal Credit Union.

The University Credit Union (http://www.ucu.org/) maintains an electronic services office on the A Level of Ackerman Union; the Westwood Student Federal Credit Union (http://www.ffcu.org/) is on the first floor of Kerckhoff Hall. Membership in these credit unions is open to UCLA students.

Campus Photo Studio and Graduation Etc.

Senior yearbook portraits and other formal portraits are available from the Campus Photo Studio (A Level of Ackerman Union, 310-206-8433). Seniors are advised to have yearbook portraits taken in Fall Quarter, since lines are long as the January deadline approaches. At the same location, Graduation Etc. (310-825-2587) sells caps and gowns for bachelor's de-
degrees, rents academic attire for advanced degrees, and provides announcements, diploma mounting, and other graduation-related products and services. See http://www.uclastore.ucla.edu/graduation/.

Cards and Gifts
Papercuts (A Level of Ackerman Union, 310-206-1564) offers an extensive selection of Hallmark cards and gift wrap, plus stuffed animals, mugs, and other gift items.

Copying and Printing Services
Pulse Copy and Technology operates two copy centers on campus: Lu Valle Commons (310-825-7568) and A Level of Ackerman Union (310-206-0894). Copies, color copies, binding, lamination, and printing are offered.

Gameroom
Xcape (A Level of Ackerman Union, 310-206-0829) is a gameroom featuring pinball, video games, and electronic games. Especially popular are weekend “unlimited play” opportunities, which allow hours of play for one flat fee.

Job Opportunities on Campus
ASUCLA reserves more than 2,500 part-time jobs for UCLA students in the UCLA Restaurants, UCLA Store, student union, and other departments. Listings are posted outside the Human Resources Office, 3519 Ackerman Union (310-825-7055; http://www.uclastore.ucla.edu/student-jobs/).

Aside from the student jobs reserved by ASUCLA, the residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the Young Research Library (310-825-7947). Other on-campus jobs may be available through the UCLA Career Center (see Student Services later in this section).

Lecture Notes and Academic Publishing Service
Lecture Notes is a subscription service that publishes concise weekly summaries of about 100 of UCLA's large lecture classes. Notes can be picked up in the Textbooks department of the UCLA Store, Ackerman Union (A Level, 310-206-0882; http://www.uclastore.ucla.edu/textbooks/lecturenotes/index.html). Academic Publishing Service (next to Lecture Notes, 310-825-2831; http://www.uclastore.ucla.edu/textbooks/ap/index.html) reproduces course materials for professors, obtaining 5,000 copyright authorizations each year.

Meeting Rooms
A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union or Kerckhoff Hall, contact the Student Union Operations Office on the A Level of Ackerman Union (310-206-0836).

UCLA Restaurants
ASUCLA operates the UCLA Restaurants and three coffee houses on the general campus. Hours vary, especially during summer and holiday periods. Consult the hours posted at each unit or check the UCLA Restaurants listing at http://www.uclastore.ucla.edu/information/restaurant.html.

Bombshelter Deli and Burger Bar (310-206-0727; http://www.uclastore.ucla.edu/restaurants/bombshelter.html), in the Court of Sciences, offers traditional deli sandwiches, an outdoor barbecue, snacks, rice bowls, sushi, broiled hamburgers and chicken, and salads at reasonable prices.

Campus Corner (310-206-0726; http://www.uclastore.ucla.edu/restaurants/taco-sub.html) is located just across Bruin Walk from Kerckhoff Hall. Taco Bell Express is on the north side, while the south side features sandwiches at SubSection.

The Cooperaage (310-206-0740; http://www.uclastore.ucla.edu/restaurants/cooperaage.html), on the A Level of Ackerman Union, offers pizza, chicken, grill items, and an extensive by-the-ounce salad bar. A stage and sound system for live entertainment and a large-screen TV for major events are available.

Kerckhoff Coffee House (310-206-0729; http://www.uclastore.ucla.edu/restaurants/kerckhoff.html), on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, fresh pastries, and gourmet sandwiches and soups.

Lu Valle Commons (310-825-1177; http://www.uclastore.ucla.edu/restaurants/luvalle.html), located just north of the School of Law, features deli food, international entrees, hamburgers, and other grilled specialties. Within Lu Valle Commons, Jimmy’s Coffee House (http://www.uclastore.ucla.edu/restaurants/jimmy.html) features specialty beverages, pastries, and desserts.

The North Campus Student Center (310-206-0720; http://www.uclastore.ucla.edu/restaurants/northcampus.html), southwest of the Young Research Library, offers Mexican entrees, frozen yogurt, pizza, deli and garden sandwiches, Italian food, stir-fry, and a salad bar. North Campus is open for breakfast, lunch, and dinner. At the west end, Northern Lights coffee house (310-206-0373; http://www.uclastore.ucla.edu/restaurants/northernlights.html) features gourmet coffees and Baskin-Robbins ice cream.

The Terrace Food Court, on the first floor of Ackerman Union, offers snacks at Rx Candy (310-206-7879), Wetzel’s Pretzels (310-206-8645), Columbo Frozen Yogurt (310-206-8645), and Tropix beverage bar (310-206-0732). Italian, Asian, and Mexican food and fish tacos are offered at La Cucina by Sbarro (310-794-4080), Panda Express (310-206-9395), and Rubio’s Baja Grill (310-794-4009), respectively.

Tsunami (310-206-9226; http://www.uclastore.ucla.edu/restaurants/tsunami.html), in the northwest corner of the A Level of Ackerman Union, serves Japanese noodles and sushi.

UCLA Store
In terms of sales, the UCLA Store is the biggest college store in the nation. There are five locations on campus, plus UCLA Spirit Stores at Santa Monica’s Third Street Promenade and Universal CityWalk. See http://www.uclastore.ucla.edu or the Daily Bruin for information on sales, author signings, and other special events. The website also offers current computer price lists and the opportunity for students to “preshop” textbooks by entering their course I.D. numbers to get a list of required and recommended books.

UCLA Store, Ackerman Union (B Level of Ackerman Union and parts of A Level, 310-825-7711), has seven departments. The Textbooks department carries required and recommended texts for most undergraduate and many graduate courses and operates a buyback service so students can sell used texts. BookZone offers reference books and a wide selection of titles in literature, science, history, and technical disciplines, including an impressive UCLA Faculty Authors section. The Computer Store carries Macintosh and Windows computers, printers, and software at low academic prices. Essentials offers school and office supplies, including consumables for computer printers. BearWear specializes in UCLA emblematic merchandise. Fast Track carries active footwear and sportswear for men and women, plus an extensive Clinique counter. Market is a convenience store, with snacks, health and beauty aids, and cut flowers.
**On-Campus Housing**

Living on campus can add an extra dimension of academic support, enjoyment, and convenience to the UCLA experience. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls), two residential suite complexes (Hitch and Saxon Residential Suites), Sunset Village, and De Neve Plaza accommodate nearly 6,700 undergraduates, while the Hilgard Houses accommodate 200 transfer and upper division students. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two or three students. Residential suites — shared by four or six students — consist of two bedrooms, a full bathroom, and a common living room. Sunset Village and De Neve Plaza rooms are air conditioned and shared by two or three students. Most rooms in Sunset Village and all rooms in De Neve Plaza have private baths. Hilgard Houses are four large residential homes on the east side of campus. Each accommodates about 40 students and has a large living room, study hall, small computer room, TV lounge, and patio. Students live in furnished doubles, triples, and quads. Each house has single-sex communal bathrooms and a small laundry room. Residential restaurants are located in Rieber Hall, Hedrick Hall, Covel Commons, and De Neve Plaza. All accommodate on-campus residents and serve meals daily. Residents may choose from a variety of meal plans.

Applications for on-campus housing are in the UCLA Housing booklet, available at the UCLA Housing Assignment Office, 270 De Neve Drive, Box 951381, Los Angeles, CA 90095-1381 (310-825-4271; http://www.cho.ucla.edu/housing/hao.htm). To apply for on-campus housing, the completed application must be postmarked by the following deadlines:

<table>
<thead>
<tr>
<th>Quarters</th>
<th>Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Quarter 1999</td>
<td>May 31, 1999</td>
</tr>
<tr>
<td>Freshmen</td>
<td>May 3, 1999</td>
</tr>
<tr>
<td>Transfer Students</td>
<td>June 1, 1999</td>
</tr>
<tr>
<td>Winter Quarter 2000</td>
<td>Assigned as available</td>
</tr>
<tr>
<td>Spring Quarter 2000</td>
<td>Assigned as available</td>
</tr>
</tbody>
</table>

For Fall Quarter, the Housing Assignment Office randomly designates a number to each application received; the number determines the order in which students are offered assignment to on-campus housing. All new freshman and transfer students who are admitted for Fall Quarter and apply for on-campus housing by the stated deadline are guaranteed University housing.

Students applying for Winter or Spring Quarter are assigned on a space-available basis in the order applications are received.

The full cost per student for the 1999-00 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is $6,045 to $6,565 (triples) or $7,005 to $7,525 (doubles) for residence halls, $7,500 to $8,020 (six persons) or $8,305 to $8,825 (four persons) for residential suites, and $7,660 to $8,180 (triples) or $8,475 to $8,995 (doubles) for Sunset Village and De Neve Plaza, plus a $22.44 social fee for residential programming.

The Office of Residential Life, in the Residential Life Building near Sproul Hall (310-825-3401; http://www.orl.ucla.edu/), is responsible for student conduct in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. The office is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

**Short-Term Housing**

If students need temporary quarters until they find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most short-term housing is available for
no more than one to three months, though some may be for longer periods. Sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office.

University Apartments for Single Graduate and Family Students

About five miles from campus, UCLA maintains nearly 1,400 off-campus apartments for married, single-parent, and single graduate students. Unfurnished one-, two-, and three-bedroom units are available. One-bedroom rentals for 1999-00, excluding utilities, are expected to range from $586 to $793 per month. Because assignment to several of the apartment units is by wait list, students should not wait until they have been accepted to UCLA to apply. Verification of marriage and/or copies of children’s birth certificates (English translation) must accompany the application. For up-to-date information, call University Apartments South at (310) 398-4692 or see http://www.cho.ucla.edu/housing/uasouth.htm.

University Apartments for Single Undergraduate Students

More than 230 apartments for single undergraduate students in four off-campus facilities are maintained by the University; all are located within walking distance of campus. Apartments vary from singles to three-bedroom units, with bedrooms usually shared by two or three students. Space rates for the 1999-2000 academic year, including utilities, range from $3,062 to $7,336. All occupants must be full-time UCLA students; rental agreements are for the entire academic year. An application is included in the UCLA Housing booklet, available at the UCLA Housing Assignment Office. Assignments are made on a space-available basis. Current UCLA students are assigned to the apartments during Spring Quarter; not all types of apartment spaces are available to entering students. Call the Housing Assignment Office at (310) 825-4271 or see http://www.cho.ucla.edu/housing/uanorths.htm for current availability information.

Transportation Services

A variety of parking, ridesharing, and other transportation options and services are offered through Transportation Services. There are several commuting alternatives for students to get to and from campus without driving their cars. To save time and money, many students form new or join existing UCLA carpools or vanpools. Both full-time and part-time riding opportunities are available.

Commuter Services

The Commuter Assistance-Ridesharing (CAR) Office (310-794-RIDE) can help students learn about vanpools available from their neighborhoods. Currently there are more than 130 vanpools commuting from nearly 80 communities throughout Southern California.

Students interested in forming a carpool who need help finding other students who live near them should call (310) 825-3618 and ask for a free RideGuide. As an additional incentive to rideshare, registered two- and three-person student carpools are given top priority to receive parking (see Parking Permits).

These alternatives and other commuting options, including an extensive network of public transit service providers, are described in the UCLA Commuter Guide, available at http://www.transportation.ucla.edu/ or at Parking Services on the corner of Strathmore Place and Westwood Plaza (Parking Structure 8, Level 2) weekdays from 7:45 a.m. to 5 p.m. For further information, call (310) 825-3618.

Parking Permits

Due to the limited availability of parking at UCLA, parking is offered to students who demonstrate the greatest need. Student parking permits are currently assigned through a need-based point system which takes into consideration class standing, commute distance, previous attendance, employment status, dependent children, and professional school obligations. Students are strongly encouraged to apply on time and follow all application and payment guidelines in order to increase their chances of receiving a permit.

When assigning parking permits to students, UCLA Parking Services gives the highest priority to carpools. Carpool permits are guaranteed to all qualified two- and three-person student carpool groups that apply on time. In addition, student carpools are parked in centrally located campus parking areas and share a discounted permit fee. All members of a proposed student carpool must apply in person as a group each term.

Most student permits are assigned for the academic year and can be paid for annually or quarterly. Renewal forms for students paying quarterly are automatically mailed before the Winter and Spring Quarter payment due dates. Students who are not offered a parking assignment during a given term or who wish to change their parking area need to reapply the following term. Student Parking Request forms, along with important quarterly due dates and helpful information on how to apply for a parking permit, are available by calling (310) 825-9871 or in person weekdays from 7:45 a.m. to 5 p.m. at Parking Services.

Students with permanent disabilities who have disabled persons’ placards or DMV-issued disabled persons’ license plates and students with short-term disabilities should contact the Office for Students with Disabilities (310-825-1501; http://www.saonet.ucla.edu/osd/) regarding parking assignments and on-campus transportation assistance.

Parking permits and access cards to campus lots and structures are not transferable and may be purchased only from UCLA Parking Services. Resale is prohibited and subjects both buyer and seller to disciplinary action.

Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways students can get involved in campus life and expand their horizons beyond classroom learning.

Clubs and Organizations

Joining a club or organization is a wonderful way to become involved on campus. UCLA currently has about 600 different registered organizations — more than are found on almost any other university campus in the country. Political, recreational, community service, cultural, academic, religious, and residential clubs can be found at UCLA. And it only takes three people to start their own if they can't find one that suits their interests.

Clubs focusing on sports and recreation are listed in the Department of Cultural and Recreational Affairs, located in the Wooden Center (310-825-3701; http://www.saonet.ucla.edu/recreate/). For a full listing of regis-
tered organizations, contact the Center for Student Programming (CSP), 105 Kerckhoff Hall (310-825-7041; http://www.saonet.ucla.edu/csp/). This office can help students start a club or join an existing one, and serves as the official registry for all campus organizations. CSP assists students with program and leadership development and fund-raising, interprets and enforces University rules and regulations, and administers official and general purpose bulletin boards on campus.

All student organizations are eligible to use the services of Student Event Management (SEM), located in 105 Kerckhoff Hall (310-825-6690); SEM offers technical and logistical consulting for student events, including cost estimates and event management.

Complaints Against Student Organizations
Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (105 Kerckhoff Hall; http://www.saonet.ucla.edu/csp/) or Student and Campus Life (1104 Murphy Hall; http://www.saonet.ucla.edu/sao/scl.html).

Fraternities and Sororities
The 41 Greek letter social organizations and their four governing councils — Asian Greek Council, Interfraternity Council (IFC, 310-825-7878; http://www.studentgroups.ucla.edu/ifc/), National Pan-Hellenic Council (NPHC, 310-206-1868), and Panhellenic Council (PHC, 310-206-5499; http://www.studentgroups.ucla.edu/panhellenic/) — are sponsored by a component of the Center for Student Programming — Fraternity and Sorority Relations (FSR), 118 Men’s Gym (310-825-6322; http://www.saonet.ucla.edu/csp/FSR/).

Greek letter social organizations registered and officially recognized by FSR are eligible to participate in programs such as the Greek Leadership Conference, Membership Recruitment, Greek Week, New Member Forums, Dating Expectations Programs, intramural tournaments, and all University-sponsored programs. Individual student members of IFC and Panhellenic Council are eligible for scholarships offered by the Intersorority Mothers’ Club, Los Angeles Alumnae Panhellenic, and their own governing councils. The FSR staff assists organizations in campus and community programming, fund raising, membership recruitment and development, training, and service/learning activities.

Fraternities
- Alpha Epsilon Pi
- Alpha Gamma Omega
- Alpha Phi Alpha
- Alpha Phi Omega
- Beta Theta Pi
- Delta Sigma Phi
- Lambda Chi Alpha
- Lambda Phi Epsilon
- Omega Sigma Tau
- Phi Beta Sigma
- Phi Kappa Psi
- Phi Kappa Sigma

Sororities
- Alpha Delta Pi
- Alpha Epsilon Phi
- Alpha Kappa Alpha
- Alpha Phi
- Chi Alpha Delta
- Chi Omega
- Delta Delta Delta
- Delta Gamma
- Delta Sigma Theta

FSR is also a designated campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group’s programs and support networks. “Greeks” follow their founding principles of service, scholarship, and friendship. There is a place for anyone who desires to contribute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members “live out” (not all chapters have houses). Approximately 3,000 UCLA students participate in “Greek life.”

Statue commemorating the centennial of the birth of Duke Ellington

Performing Arts
A rich variety of concerts, dance recitals, and theater productions is an integral part of life at UCLA. A full calendar of exceptional programs by the Music, Ethnomusicology, and World Arts and Cultures Departments and UCLA Performing Arts of the School of the Arts and Architecture and the Theater and Film and Television Departments of the School of Theater, Film, and Television provides opportunities for student involvement and personal growth.

The Music Department has 12 active performance organizations. Instrumentalists are invited to perform with one of seven groups, including the UCLA Philharmonia Orchestra. Vocalists may join the UCLA Chorale, the Collegiate Chorus, or the Musical Theater Workshop.

The Ethnomusicology Department provides students with the opportunity to perform in various non-Western and ethnic groups.

The World Arts and Cultures Department presents events and concerts involving departmental faculty, guest artists, and students. Student performances include M.F.A. concerts, an undergraduate and graduate student-produced concert, and the Senior Concert/Colloquium. Students also perform in more informal programs, such as the end-of-term Creative Work showings or Pau Hana, that feature many world dance forms.

Each year the Theater Department presents a series of major productions to the general public, and the Film and Television Department produces approximately 100 student-directed films and 50 television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Since its founding in 1936, UCLA Performing Arts (8100 Royce Hall, 310-825-4401; http://www.performingarts.ucla.edu/) has served as the premier West Coast showcase for world-class performing artists and ensembles as well as innovative new work in dance, music, theater, and performance art. UCLA Performing Arts presents more than 250 public concerts and events each year, often sponsoring debut performances of new works by major artists. Through UCLA Performing Arts, the campus hosts a varied and active performance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to events with Luciano Pavarotti, Yo-Yo Ma, Alvin Ailey American Dance Theater, Kathleen Battle, Mikhail Baryshnikov, Pina Bausch Tanztheater Wuppertal, Twyla Tharp, Stomp,
Pinchas Zukerman, and Branford and Wynton Marsalis. Subject to availability, discount tickets are offered to students, faculty, and staff.

Publications and Broadcast Media

Publications and broadcast media at UCLA are operated by the UCLA Communications Board and provide excellent training ground for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. The following are the major student-operated sources of information on campus:

The Daily Bruin, with a circulation of 20,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the Bruin is published each weekday of the regular academic year (once a week during the summer) and is distributed free from kiosks around campus and in Westwood and Brentwood. Students work as reporters, editors, designers, photographers, and advertising sales representatives; new staff members are always welcome. Bruin offices are located in 118 Kerckhoff Hall (310-825-9898; http://www.dailybruin.ucla.edu).

Seven newsmagazines reflecting the diversity of the campus community are published twice each term. Al-Talib is a publication devoted to Muslim issues; Fem reports on women’s issues; Ha’Am deals with Jewish issues; La Gente treats Chicano, Latino, and Native American issues; Nommo explores African issues; Pacific Ties is devoted to Asian issues; and TenPercent covers gay, lesbian, bisexual, and transgender issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome. The offices of these newsmagazines are located in 149 Kerckhoff Hall.

The UCLA yearbook, BruinLife, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the Freshman Record, is produced for new UCLA students. Students who would like to participate should contact the yearbook staff in 149 Kerckhoff Hall (310-825-3429).

Like many other large universities, UCLA has its own radio station. KLA Radio provides music, news, public service programming, and sports coverage during the academic year. The signal is sent to the residence halls over channel 29 on the cable television system. The studios are located at the rear of the Grand Ballroom in 2400 Ackerman Union (310-825-9107; request line: 310-825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

Sports and Athletics

Athletics (http://www.uclabruins.com/) play a major role in the University’s mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports and now ranks first in the U.S. in the number of National Collegiate Athletic Association (NCAA) championships won (77). In 1997-98 the UCLA athletic programs (men and women) placed fourth in the Sears Directors Cup national all-around excellence survey. In the 23-year history of the former USA Today survey, the men’s program placed first 11 times, while the women’s program placed first five times in the final nine years. UCLA was the first university in the country to win five NCAA men’s and women’s championships in a single year (1981-82).

UCLA also has produced a record number of professional athletes such as Troy Aikman, Eric Karros, Reggie Miller, Natalie Williams, and Corey Pavin and Olympians such as gold medalists Lisa Fernandez, Karch Kiraly, Gail Devers, and Dot Richardson.

Intercollegiate Athletic Facilities

The major indoor arena at UCLA is the famed Pauley Pavilion, which seats 12,800 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, Drake Stadium is the home of UCLA track and field competitions and site of many outdoor events, including the U.S. Olympic Festival ‘91. The Los Angeles Tennis Center, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. Easton Softball Stadium, which seats 1,050, is the home of the championship women’s softball team. The Morgan Intercollegiate Athletics Center houses the UCLA Athletic Hall of Fame. Off-campus facilities include Jackie Robinson Stadium for varsity baseball and the renowned Rose Bowl in Pasadena, home of the UCLA football team.

Men’s Intercollegiate Sports

UCLA is a member of the Pac-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 63 NCAA men’s championships — second highest in the nation — including 17 in volleyball, 15 in tennis, 11 in basketball, eight in track and field, five in water polo, three in soccer, two in gymnastics, and one each in golf and swimming. Students can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, water polo, golf, soccer, and cross-country. For more information, contact the Athletic Office at (310) 825-8699.

Women’s Intercollegiate Sports

With 11 different varsity sports, the UCLA women’s program is one of the most extensive in the country, and UCLA has played an important role in establishing women’s sports as part of the NCAA. Women’s teams have won an overall total of 14 NCAA titles — fifth highest in the nation — including seven in softball, three in volleyball, two in track and field, and one each in golf and gymnastics. UCLA also has won three collegiate water polo titles. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and soccer. For more information, contact the Athletic Office at (310) 825-8699.

Student Government

In addition to its Services and Enterprises division, ASUCLA includes the Undergraduate Students Association, the Graduate Students Association, and the Communications Board, which publishes the Daily Bruin and other campus student publications. Governed by a student-majority Board of Directors, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression students may not find in other aspects of their university experience.
Graduate Student Government

The Graduate Students Association (GSA) is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Directors and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program). GSA also maintains an electronic mail listserver for graduate student government bulletins, agendas, and general graduate student information. The GSA Office is located in 243 Kerckhoff Hall (310-206-8512; e-mail: gsa@asucla.ucla.edu; http://gsa.asucla.ucla.edu/).

Undergraduate Student Government

The Undergraduate Students Association (USA), with offices in Kerckhoff Hall (310-825-7068; http://students.asucla.ucla.edu/), is governed by the Undergraduate Students Association Council (USAC), which administers the USA operating budget through a network of six officers (president, internal vice president, external vice president, three general representatives) and seven student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare).

Many student government programs benefit both campus and community. The Community Service Commission (310-825-2333; http://students.asucla.ucla.edu/csc/) serves Los Angeles through more than 20 programs such as Amigos del UCLA, offering academic and emotional support for Latina/Latino students; UCLA Project BRITE, providing tutoring for inmates of juvenile correctional institutions; UCLA Special Olympics; and UCLA Hunger Project, to name just a few. More than 2,500 students offer their services on a volunteer basis.

Student government also supports approximately 20 student advocacy groups on campus, such as the African Student Union, American Indian Students Association, Asian Pacific Coalition, Gay and Lesbian Association, International Students Association, MEChA, UCLA Jewish Student Union, Samahang Pilipino, and the Union of Students with Disabilities.

The Campus Events Commission (CEC, 310-825-1958; http://students.asucla.ucla.edu/cecc/) and Cultural Affairs Commission (CAC, 310-825-6564) provide the campus with free and low-cost cultural and entertainment programming, as well as opportunities for student involvement. CEC is responsible for the Speakers and Concert Programs and the Ackerman Film Program. CAC sponsors WorldFest, a celebration of campus diversity, and the Jazz/Reggae Festival.

The ASUCLA Library (304D Kerckhoff Hall, 310-206-7997, e-mail: library@asucla.ucla.edu; http://students.asucla.ucla.edu/Library/) houses materials related to student and campus governance and aims to enhance understanding among students about University issues and to increase student involvement within the UCLA community.

UCLA Campus Events Speakers and Concert Programs

The Speakers Program, now over 25 years old, brings the world’s foremost entertainers, politicians, and literary figures to campus. It also presents two annual awards programs — the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Speakers and awardees have included Bill Gates, Oliver Stone, Goldie Hawn, Frances Crick, Johnny Carson, David Letterman, Whoopie Goldberg, John Cleese, Robin Williams, Jessica Lange, James Stewart, Spike Lee, Sir Anthony Hopkins, Harrison Ford, Lily Tomlin, Nicholas Cage, William Hurt, Patricia Schroeder, Jesse Jackson, Matt Groening, Studs Terkel, Shimon Peres, Walter Cronkite, Dustin Hoffman, Candice Bergen, Tom Hanks, and Denzel Washington.

The Concert Program brings new and name performing artists like the Talking Heads, Guns N’ Roses, 10,000 Maniacs, Public Enemy, Rage against the Machine, No Doubt, Big Bad Voodoo Daddy, Green Day, A Tribe Called Quest, Digital Underground, and The Pharcyde to UCLA for free and affordably priced concerts at noon in Westwood Plaza and at night in the Cooperage and Ackerman Grand Ballroom.

UCLA Recreation

UCLA offers a variety of recreational opportunities to meet the needs of the campus community. The Department of Cultural and Recreational Affairs (CRA), 2131 Wooden Center (310-825-3701; http://www.sanet.ucla.edu/recreate), is the administrative center for the coordination of programming, facilities, and equipment and supervision of campus recreational activities and services.

Intramural and Club Sports

The Intramural Sports Program consists of team, dual, and individual sports competition in tournament or league play. More than 40 activities, ranging from basketball and badminton to volleyball and water polo, are offered in men’s, women’s, and coed divisions. Varying skill levels are available in almost all activities, and the emphasis is on friendly competition. In order to maintain the quality of service to Intramural Sports participants, nominal individual and team entry fees have been established. The Club Sports Program offers students the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Annually over 18 club teams participate in a competitive schedule of league and tournament play with other college, university, and local area teams. Recognized teams exist in ice hockey, men’s and women’s rugby and lacrosse, cycling, men’s gymnastics, rowing, waterskiing, sailing, snow skiing, and surfing.

Recreation Class Program

A broad range of noncredit recreation classes is available in aquatics, dance, fine arts, martial arts, outdoor studies, tennis, and sports skills. Most classes are designed for beginning and intermediate skill levels. Private lessons in tennis, fitness activities, swimming, racquetball, and golf are also available. Students can also participate in cultural events through art exhibitions, the poetry reading program, museum tours, and theater in Los Angeles outings.

Fitness is offered either as a recreation class or on a drop-in basis. A Fitness Pass must be purchased ($25 for a four-quarter pass; $10 for a one-quarter pass) to participate in drop-in fitness classes.

Recreation Clubs

Students with special interests in activities that are primarily instructional or social in nature may pursue their interests through clubs such as amateur radio, chess, snow skiing, golf, swimming, and tennis.
Recreation Facilities/Informal Recreation
A popular attraction of CRA is the opportunity for independent recreation and exercise. UCLA students with appropriate identification have several major facilities in which to practice and play. The Wooden Recreation and Sports Center is a comprehensive student activities building with multiple gymsnasiums, nine racquetball/handball courts, two squash courts, a weight training facility, rock wall, exercise/dance and martial arts rooms, and a games lounge. The Sunset Canyon Recreation Center offers year-round activities in an outdoor park setting and features a 50-meter swimming pool, 25-yard family pool, picnic/barbecue areas, multipurpose play fields, an outdoor amphitheater, 10 lighted tennis courts, and various meeting rooms and lounges. The UCLA Marina Aquatic Center in Marina del Rey offers sailing, windsurfing, kayaking, canoeing, scuba diving, and rowing classes and activities, as well as the opportunity to sail, kayak, canoe, or row individually. The competitive sailing and rowing club teams are administered through the center. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Dance Building for recreational sports and activities.

Youth and Family Programs
Youth and Family Programs offer an exciting schedule of year-round activities for children 18 months to 17 years. Summer programs include Bruin Kids Day Camp (ages 5 to 12), Camp Explore (ages 12 to 14), UCLA Summer Programs for High School Students, group and private lessons, and special events. Year-round classes are also offered on Saturday mornings. Activities combine play with skill development and deepen the fun in learning.

Student Services
UCLA students enjoy a broad range of benefits and support services that enrich their college careers and help them attain academic and career goals.

Academic Counseling
Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see Academic Resources and Assistance in the Undergraduate Study section of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Ashe Student Health and Wellness Center
The Arthur Ashe Student Health and Wellness Center, located at 221 Westwood Plaza, is an outpatient clinic designed especially for UCLA students. Because it is supported by registration fees, a current BruinCard is required for service. Most services are prepaid by registration fees, and students may be seen by appointment or on a walk-in basis. Call (310) 825-4073 for up-to-date fee information. Core (prepaid) services include visits, most procedures, X rays, and most laboratory procedures. Noncore (fee) services, such as pharmaceuticals, injections, orthopedic devices, and some laboratory procedures, are less costly than elsewhere. If students withdraw during a school term, all Ashe Center services continue to be available on a fee basis for the remainder of that term, effective from the date of withdrawal.

The cost of services received outside the Ashe Center (such as the Emergency Room) is each student's financial responsibility. Students are strongly encouraged to purchase supplemental medical insurance either through the UCLA-sponsored Medical Insurance Plan (see below) or other plans that provide adequate coverage. For more information on Ashe Center services, call (310) 825-4073 or see http://www.sao-net.ucla.edu/health.htm.

Office hours weekdays are 8 a.m. to 6 p.m. except Tuesday, when service begins at 9 a.m. Patients without appointments and patients with orthopedic or surgery appointments are seen on the first floor; Women's and Men's Clinics, social service, and internal medicine appointments are on the second floor; all other patients with appointments (including immunizations) are seen on the third floor. For emergency care when the Ashe Center is closed, students may obtain treatment at the UCLA Medical Center Emergency Room or UCLA Family Practice on a fee-for-service basis.

Dental Care arrangements are available. Call (310) 825-4073 for further information.

Health Education (Pauley Pavilion) offers services and programs that interest, inform, and help students to lead a healthier lifestyle. Outreach programs, such as the Student Health Advocates, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of many aspects of health care. Call (310) 825-4730.

Men's Health Clinic (second floor) treats male genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call (310) 825-4073.

Primary Care (first and third floors) provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and licensed nurse practitioners. Though complete physicals are available for a fee, a prepaid "Well Exam" is available if students have general health questions or concerns. Students are encouraged to select a clinician who provides ongoing health care. Call (310) 825-4073 to schedule an appointment.

Specialty Clinics provide specialized care when students are referred by Primary Care. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, ear, nose, and throat, ophthalmology, urology, and neurology. Health clearances, immunizations, and travelshots are available by appointment for a moderate fee. Call (310) 825-4073.

Women's Health Service (second floor) offers comprehensive health care and counseling. Services include routine gynecological examinations, evaluation of gynecologic problems, abnormal Pap smear evaluation and treatment, contraception, and pregnancy testing. Counseling for relationships and sexual concerns is also available. Call (310) 825-4073 for appointments or to speak to clinicians.

Supplemental Medical Insurance
UCLA provides a student Medical Insurance Plan (MIP) which is available as a supplement to the services offered at the Ashe Center. MIP provides benefits for certain major medical expenses not covered by the Ashe Center, such as hospitalization, surgery, and emergency room costs.

All international students (graduate and undergraduate) on nonimmigrant visas and all graduate students must maintain adequate medical insurance coverage during all periods of enrollment at UCLA. MIP fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the UCLA Student Billing Statement (BAR) for all graduate students and for undergraduate and graduate international students. This is the only way that MIP can be purchased.

Graduate and international students who are insured under adequate private medical insurance may waive out of MIP. See Mandatory Medical Insurance Requirement under Registration in the Undergraduate Study and Graduate Study sections of this catalog for a description of what constitutes adequate private medical insurance and instructions for waiving out of MIP. For further information on medical insurance, call the Ashe Center Insurance Office at (310) 825-4073, option 4.
Bruin OnLine

Bruin OnLine (BOL) gives UCLA students, faculty, and staff access to campus network communication services and the Internet. Using a BOL connection from their computers at home or at a campus workstation, students communicate with friends, family, and professors via e-mail, enroll in classes or access student records through URSAS, check class availability in the online Schedule of Classes, search the UCLA Library via ORION, or connect to a range of campus events, programs, and services.

Bruin OnLine services include dial-up access to the UCLA campus backbone network and the Internet, an e-mail account, and space for personal webpages. BOL internet access software is available at the UCLA Store and can be downloaded from the BOL site (http://www.ucla.edu/bruinonline/).

For more information, contact the BOL Helpdesk in 4302 Math Sciences (310-825-7452, option 1, e-mail: consult@ucla.edu).

Campus Ombuds Office

The ombudsperson is a confidential and neutral party responsible for listening and responding to grievances or concerns from any member of the campus community (students, staff, faculty, or administrators). Acting impartially, the ombudsperson may investigate unresolved grievances or facilitate the resolution of problems for which there are no established guidelines and may also, where possible and when requested by the grievant, assist in resolving an issue through mediation (including sexual harassment cases). The ombudsperson is empowered to recommend changes to the University Policies Commission and/or to the chancellor regarding University policies and procedures. The office is located in 1172 Career Center (310-825-7627; http://www.saonet.ucla.edu/ombuds/); hours are weekdays 8 a.m. to 5 p.m.

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Central Ticket Office

Tickets for all UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center (310-825-2101; http://www.cto.ucla.edu/).

As part of its service, CTO offers student discount tickets to campus athletic and cultural events and local motion picture theaters (current BruinCards must be presented at the time of purchase). Students may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for Los Angeles city buses and tokens for the Santa Monica and Culver City bus systems.

Child Care Services

UCLA Child Care Services (http://www.childcare.ucla.edu/) operates four child care centers: Bellagio Center at Sunset Boulevard and Bellagio Drive; Fernald Center at Sunset Boulevard and Royce Drive; Colina Glen Preschool in the Colina Glen faculty housing area at Beverly Glen Boulevard and Nicada Drive; and University Village Center in the University Village family student housing complex at 3233 South Sepulveda Boulevard.

Child care is provided for children two months to five years old (two to five years at the Colina Glen Center and a kindergarten at the University Village Center). Fees range from $360 to $835 per month depending on the age of the child, the site, and schedule selected. A limited number of state grants is available at the Bellagio and University Village Centers for eligible student families. Call (310) 825-5086 for more information.

The Outreach Program helps parents make off-campus child care arrangements. The program coordinator meets parents the first Monday of each month from noon to 1 p.m. in 2 Dodd Hall and from 4:30 to 5:30 p.m. at the University Village Center for a “Choosing Child Care Forum.” For further information, call (310) 825-8474.

The Working Parents Newsletter addresses many issues of concern to working parents and is available through department subscription. Call (310) 206-3078 for information.

The University Parents Nursery School is a multicultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff; priority is given to students living in Family Student Housing. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Hours are weekdays 7:30 a.m. to 5:30 p.m. There is also a part-time morning program that ends at 12:30 p.m., and an afternoon program from 1:30 to 5:30 p.m. for children two years nine months to five years. The nursery school is located in the UCLA University Village Child Care Complex, 3233 South Sepulveda Boulevard (310-397-2735).

Helpline

UCLA Peer Helpline (310-825-HELP; http://www.ucla.edu/emergency/helpline.html) is a crisis intervention and referral hot line staffed by UCLA students and staff members. Students can call and talk to a trained peer counselor about school stress, relationship problems, loneliness, depression, drug problems, suicide, or anything else that is on their mind. Hours are Monday through Thursday 5 p.m. to midnight, Friday through Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (310-825-0768).

Office of the Dean of Students

The Office of the Dean of Students (1206 Murphy Hall, 310-825-3871; http://www.saonet.ucla.edu/dos/), exists to help students, either directly or by referral, with whatever needs they might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes “Official Notices” in the Daily Bruin at various times during the year. Such notices are important, and all students are held responsible for the information in them.

The Office of the Dean of Students also plays a role in administering campus discipline and applying the standards of citizenship that students are expected to follow at UCLA. The standards involve complying with the policies and regulations governing this campus and being aware that violation of those policies or regulations can result in disciplinary action. See Student Conduct: University Policies in the Appendix for more information.

Safety and Security

Dial 911 from any campus phone for police, fire, or medical emergencies (do not dial an additional 9 to establish an outside line). For nonemergency information, contact the UCLA Police Department at 601 Westwood Plaza (310-825-1491; http://www.ucpd.ucla.edu).

The UCLA Police Department provides a free Campus Escort Service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs) — specially trained UCLA students — are available to walk students, staff, faculty, and visitors between campus buildings and local living areas or Westwood Village. To obtain an escort, call (310) 794-WALK about 20 minutes before one is needed.

The free Evening Van Service provides a safe, accessible, and convenient mode of transportation around campus at night. Seven vans driven by CSOs operate Monday through Thursday from 6 p.m. to midnight and provide transportation between Ackerman Union, apartments on the west side of campus, Lot 32, the campus libraries, and the residence halls. For further information or a free brochure, call (310) 825-9800.

Cosponsored by the Women’s Resource Center and the UCLA Police Department, UCLA Sexual Violence Prevention and Education Services include workshops, self-defense classes, intake counseling, and referrals...
to offer practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape, sexual assault, and relationship violence. For more information, call (310) 206-8240 or the Crime Prevention Unit at (310) 825-7661.

Cardiopulmonary resuscitation (CPR) and basic emergency care courses are offered by the Center for Prehospital Care (924 Westwood Boulevard, Suite 720) and can be organized most days and times. For more information or to schedule a course, call (310) 794-8797.

The Office of Environment, Health, and Safety (EH&S) is dedicated to the reduction of workplace hazards on the UCLA campus and to the promotion of safety at all levels of the University community. EH&S is a consulting resource for UCLA departments and personnel who want to know more about how they can make their workplaces safe. The goal is to make health and safety information more readily accessible and usable and to promote the mission of the University in a safe and healthful manner. Requests for safety information and training, regulatory interpretation and applicability, approval for potentially hazardous procedures, resolution of safety problems, and surveillance and monitoring of persons and workplaces are handled by EH&S. For further information, call (310) 825-5689 or see http://www.ehs.ucla.edu.

Services for International Students

The Office of International Students and Scholars (OISS) and the Dashew International Student Center (DISC) provide services and programs for UCLA’s international community, particularly for 2,000 nonimmigrant students. A comprehensive orientation program for these students helps them achieve their academic objectives. Programs throughout the year allow them to share their viewpoints with American students and the community.

The OISS staff, located in 106 Bradley Hall on the west side of campus (310-825-1681; http://www.saonet.ucla.edu/intl/), includes professional and peer counselors specially prepared to assist students with questions about immigration, employment, government regulations, financial aid, academic and administrative procedures, cultural adjustment, and personal matters. OISS is also a designated Sexual Harassment Information Center for international students, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

In addition, OISS provides visa assistance for faculty, researchers, and postdoctoral scholars.

The DISC, also located in 106 Bradley Hall, seeks to improve student and community relationships and assists international students with language, housing, and personal concerns in addition to sponsoring cultural, educational, and social programs for UCLA students and community members. OISS and DISC frequently offer programs with interethnic and international themes.

Services for Students with Disabilities

The Office for Students with Disabilities (OSD), A255 Murphy Hall (voice 310-825-1501, TDD 310-206-6083, fax 310-825-9656; http://www.saonet.ucla.edu/osd/), provides academic support services to regularly enrolled students with documented permanent or temporary disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Free support services include readers, note takers, sign language interpreters, Learning Disabilities Program, special parking, registration assistance, fee deferments authorized by the California Department of Rehabilitation, on-campus transportation, campus orientation and accessibility, proctor and test-taking arrangements, tutorial referral, housing assistance, support groups, workshops, special materials, adaptive equipment, and referral to the Disabilities and Computing Program. Accommodations are varied and specifically designed to meet the disability-related needs of each student. All contact and assistance are handled confidentially.

For information on the Disabilities and Computing Program (DCP), see Computer Services earlier in this section of the catalog.

Student Legal Services

Currently registered and enrolled students with legal problems can get assistance from attorneys or law students under direct supervision of attorneys. They help students solve legal problems, including those related to landlord/tenant relations; domestic violence and harassment; divorces and other family law matters; accident and injury problems; criminal matters; automobile purchase, repair, and insurance problems; health care, credit, and financial aid issues; consumer problems; and University-related issues. Assistance is available only by appointment from 9 a.m. to 5 p.m. weekdays in 70 Dodd Hall (310-825-9894; http://www.saonet.ucla.edu/slgs/).

Student Psychological Services

Student Psychological Services (SPS; http://www.saonet.ucla.edu/sps.htm) offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (310-825-0768); the South Campus Office is in A3-062 CHS (310-825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each term. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

SPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).
UCLA Alumni Association
Celebrating more than 65 years of serving the UCLA community, the UCLA Alumni Association has nearly 75,000 members, making it one of the largest alumni groups in the nation. Whether a person is a recent graduate, a pioneer Bruin, or somewhere in between, membership in the Alumni Association is the best way to stay connected to UCLA and its growing excellence.

Membership dues enable the Alumni Association to serve as an advocate on campus and to play the vital role of guardian of the value of every UCLA degree. Dues also support programs such as Bruin Fest, Spring Sing, class reunions, and the scholarship program.

The association also offers a plethora of benefits and services. Members can make new friends, pursue lifelong learning, save money, and make a difference. Recently the association greatly expanded its career services program to meet the needs of members. UCLA graduates, Bruin parents, and friends of the University are invited to take advantage of all the association has to offer. It is located in the West Alumni Center, 325 Westwood Plaza (310-825-ALUM; 800-825-ALUM outside Los Angeles County; http://www.alumni.ucla.edu/index.cfm).

UCLA Career Center
The UCLA Career Center (http://www.career.ucla.edu/) offers career planning and employment assistance free to all UCLA students. Services are located in the Career Center and in two specialized branches: Engineering and Science Career Services in 5289 Boelter Hall and EXPO Internship and Study Abroad Services in 109 Kerckhoff Hall.

Career Planning and Exploration
Career counselors provide assistance in selecting a major, setting realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities can assist students in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Center Library offers a collection of over 3,000 career-related books and directories, videos, periodicals, and other materials. In addition, the Career Center offers workshops on a variety of career-related topics; many are repeated several times each term.

Employment Assistance
Students who need extra money to finance their college degree can find a large volume of part-time, temporary, and seasonal employment leads advertised through the Career Center’s 24-hour BruinTraks online listings available on the web. Students and recent graduates looking for full-time, entry-level career positions may access hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in BruinView campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-year academic institutions. Annual career fairs and special events offer additional opportunities to meet potential employers.

University Records System Access
Through University Records System Access (URSA), UCLA students acquire academic, financial, and personal information from their University academic records and enroll in classes. URSA is accessed through URSA OnLine at http://www.ursa.ucla.edu/ or through URSA Telephone at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

For most students, URSA OnLine provides the easiest way to gain real-time access to academic, financial, and personal records. The site is designed with an intuitive visual interface that walks students through the different steps of the procedure they are trying to accomplish, whether it be to check their Student Billing and Receivable (BAR) accounts, change address information, view and print Study Lists or Degree Progress Reports (DPRs), or see term grades. URSA OnLine also provides a convenient way to enroll in classes, to verify enrollment appointment times, and to view real-time enrollment counts.

Students use URSA Telephone to process class enrollment and to add, drop, or exchange classes/sections, sign onto class waitlists, add a class using a permission to enroll number, change the grading basis for a class, obtain a reading of a Study List, and obtain instructor names for all courses. Financial aid information allows students to check the status of financial aid applications, track documents submitted with applications, and verify the amounts of disbursements.

Veterans Affairs and Social Security Services
The Veterans Affairs coordinator, 1113 Murphy Hall, provides information for veterans and eligible dependents about veterans’ educational benefits and tutorial assistance; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women’s Resource Center
The Women’s Resource Center (WRC), located in 2 Dodd Hall (310-825-3945), offers services to all UCLA students, with special focus on gender-related issues and concerns.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, relationship violence, career development, single parenting, health, returning to school, men’s issues, and personal relationships. It also offers referrals for medical, legal, and personal counseling, mentoring programs for life, physical, and social sciences majors, and other services both on and off campus. A library includes specialized publications on gender-related issues. In addition, rape services consultants (RSCs) — individuals who provide information, support, and resources for members of the UCLA community who have been raped or sexually assaulted — can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise. The WRC is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Committed to improving the status of women on campus, WRC works with other campus agencies to help women reach their full potential.
Undergraduate Admission

Undergraduate Admissions and Relations with Schools
1147 Murphy Hall
(310) 825-3101
http://www.saonet.ucla.edu/uars.htm

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites students to visit UCLA and experience the campus firsthand. The UARS Office offers student-guided individual and group tours of the campus Monday through Friday at 10:15 a.m. and 2:15 p.m. and Saturday at 10:15 a.m. throughout the year; reservations are required. Call (310) 825-8764 for tour reservations or see http://www.saonet.ucla.edu/uars/prospect/tours.htm; call (310) 825-3101 for general UCLA admission information or see http://www.saonet.ucla.edu/uars.htm.

Applying for Admission

The first step in applying for admission is to obtain the UC Application for Undergraduate Admission and Scholarships, which contains all necessary forms and instructions, from the California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. Students apply to one UC campus for the basic $40 application fee; an additional $40 fee is charged for each additional campus selected.

Students then complete the application, taking care to list their desired major and the correct major code for the campus(es) to which they are applying. Mail the completed application and the nonrefundable application fee in the self-addressed envelope included in the application packet.

If students are in high school when they apply (freshman applicant), their self-reported application information is used to make preliminary admission decisions. Do not send the sixth and/or seventh semester high school transcripts. Once admitted, students must submit a final transcript, including a statement of graduation or proficiency, which is used to verify the application information. Students must submit official results of the Scholastic Assessment Test I (SAT I) or American College Test (ACT) and three subject tests from the SAT II; students should request that test results be sent directly to UCLA when they take each test. The tests should be taken by the December test date, as they are part of the review process for admission.

If students have attended or are attending another college when they apply (transfer applicant), their self-reported application information is used to make preliminary admission decisions. Once admitted, students must submit official transcripts from all colleges and universities attended (high school transcripts may also be required), which are used to verify the application information. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

Application filing periods for the year 2000 follow. Check the quarterly Schedule of Classes for updates or see http://www.registrar.ucla.edu/calendar/:

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Deadline</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winter Quarter 2000</td>
<td>Closed to new applicants</td>
<td></td>
</tr>
<tr>
<td>Spring Quarter 2000</td>
<td>October 1-31, 1999 (If open to new applicants, junior-level applicants only.)</td>
<td></td>
</tr>
<tr>
<td>Fall Quarter 2000</td>
<td>November 1-30, 1999 (Freshmen and transfers)</td>
<td></td>
</tr>
</tbody>
</table>

All majors are open for Fall Quarter. For Spring Quarter all majors in the College of Letters and Science, except communication studies, are open; majors in the Schools of Engineering and Applied Science, Nursing, Arts and Architecture, and Theater, Film, and Television are closed.

Notification of Admission

Students are mailed a notice from the UC Undergraduate Application Processing Service acknowledging receipt of their application. Later, they receive a letter from the UCLA Office of Undergraduate Admissions and Relations with Schools regarding the admission decision. The length of time before admission notification varies. In general, Fall Quarter applicants are notified in mid-March (freshmen) and mid-April (transfers); Spring Quarter applicants are notified in mid-December.

Students who are offered admission are asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable $100 deposit, also required at this time, is applied to the University registration fee as long as students register in the term to which they are admitted.

Entrance Requirements

The entrance requirements established by the University of California follow the guidelines set forth in the California Master Plan for Higher Education, which requires that the top one eighth of the state's high school graduates be eligible for admission to the University of California. These requirements are designed to ensure that all eligible students are adequately prepared for University-level work and are based on the principles that the completion of certain academic courses in high school prepares them to begin University work and choose a general field of study. Further, the grades earned in these courses indicate whether students will be successful in college-level courses.

Fulfilling the minimum admission requirements, however, does not assure admission to UCLA. The selection of applicants is based on demon-
Admission as a Freshman

Students are considered freshman applicants if they have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, students must meet three major requirements: the Subject Requirement, the Scholastic Requirement, and the Examination Requirement. These are the minimum requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

A series of changes in the minimum eligibility requirements for freshman applicants is being gradually implemented over three years, beginning with students entering UCLA in Fall Quarter 2001. Contact Undergraduate Admissions and Relations with Schools for further information.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during the last two years in high school. These are the minimum courses required for admission; students are encouraged to exceed these requirements whenever possible.

History/Social Science

Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government; and one year of world history, cultures, and geography.

English

Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern literature. No more than two semesters of ninth-grade English can be used to meet this requirement.

Mathematics

Three years of college preparatory mathematics that include the topics covered in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus). Mathematics courses taken in the seventh and eighth grades may be used to fulfill this requirement if the high school accepts them as equivalent to its own courses.

Laboratory Science

Two years of laboratory science (three years are recommended) which provide fundamental knowledge in at least two of these areas — biology, chemistry, and physics. Laboratory courses in Earth/space sciences are acceptable if they have requisites or provide basic knowledge in biology, chemistry, or physics. No more than one year of ninth-grade laboratory science can be used to meet this requirement.

Language Other than English

Two years of the same language, other than English (three to four years are recommended). Courses should emphasize speaking and understanding and include instruction in grammar, vocabulary, reading, and composition.

College Preparatory Electives

Two units (four semesters), in addition to those required above, to be selected from the following subject areas: history, English, advanced mathematics, laboratory science, language other than English, social science, and visual and performing arts.

Scholastic Requirement

Eligibility for admission to the University of California is based on a combination of the grade-point average (GPA) in the academic subject requirements and the American College Test (ACT) or Scholastic Assessment Test I (SAT I) scores. For detailed scholarship information, see the UC publication Introducing the University or contact Undergraduate Admissions and Relations with Schools.

Examination Requirement

All freshman applicants must submit scores from the following tests:

1. Either the American College Test (ACT) composite score or the Scholastic Assessment Test I: Reasoning Tests (SAT I) total score.
2. Three Scholastic Assessment Test II: Subject Tests (SAT II) which must include
   a. Writing AND
   b. Mathematics, level 1 or 2, AND
   c. One additional test (either English literature, foreign language, science, or social studies).

The tests should be taken by the December test date, as they are part of the review process. Students should request that test results be sent directly to UCLA when they take each test.

Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) academic grade-point average, (2) scores on the SAT I or ACT and the three SAT II tests, (3) quality, content, and level of coursework throughout the entire high school program, including the senior year, and (4) number of and performance in honors and advanced placement (AP) courses.

Students should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

For detailed information on admission requirements for freshman students, see the UC publication Introducing the University or contact UARS.

Admission as a Transfer Student

Students are considered transfer applicants if they have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) They may not disregard their college record and apply for admission as a freshman. Priority is given to junior-level applicants. Students who wish to transfer to UCLA should follow these general guidelines:

The number of advanced standing students applying to UCLA has increased significantly during the last several years. Students admitted to the University exceed the minimum University of California transfer eligibility requirements, and those with the strongest preparation and performance are offered admission.

In accordance with the California Master Plan for Higher Education, first preference is given to California community college applicants. Applicants transferring from other UC campuses are next in priority, followed by applicants transferring from other colleges and universities. Each application receives a comprehensive review, integrating all available information.
The academic criteria are as follows: grade-point average (GPA) in transferable courses, significant preparation for the major, completion of the English composition and mathematics requirements, and progress toward completion of the Intersegmental General Education Transfer Curriculum (IGETC) or UCLA general education requirements. Applicants who have completed the English composition and mathematics requirements as early as possible in their academic program and who have 90 transferable quarter units by the time they enroll in the University receive priority admission consideration.

For more detailed information on admission requirements for transfer students, see the UC Application for Undergraduate Admission and Scholarships and the UC Answers for Transfers booklet or contact UARS.

Intercampus Transfers
Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the UC Application for Undergraduate Admission and Scholarships and submit the required application form with the application form. The filing periods are the same as those for new applicants (see When to Apply at the beginning of this section). Students who have attended another UC campus and wish to be considered for admission to UCLA must have been in good standing when they left that campus. Intercampus transfers are not automatic; students must compete with all other applicants.

Senior-Level Applicants
Students attaining senior standing are not generally admitted by the University.

Transfer Credit and Credit by Examination
The University awards unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS). All courses which meet the criteria are used in determining eligibility for admission. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units x 1.5 = 18 quarter units.)

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement (AP) Tests given by the College Board and the International Baccalaureate. Contact UARS for more information.

Applicants from Other Countries

Application for Admission
To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

The application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted as early as possible after the filing period opens (see When to Apply at the beginning of this section). This allows time for the necessary correspondence and, if students are admitted, to obtain their passport visas.

Proficiency in English
Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, they are required to take the UCLA English as a Second Language Placement Examination (ESLPE) before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Depending on the ESLPE results, students may be required to successfully complete one or more English as a second language courses. In addition, they are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing their ability. Make arrangements for this test by contacting TOEFL/TSE Publications, PO. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at http://www.toefl.org. Have the test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

Mandatory Medical Insurance Requirement
UCLA requires, as a condition of registration, that all undergraduate international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement for International Students under Undergraduate Registration later in this section.

Readmission
Undergraduate students are required to apply for readmission only if they are absent from the University for more than one term. Thus, if they complete a term and then withdraw, cancel, or fail to register for the next term, registration information is available for the term immediately following.

Students who are absent for two or more consecutive terms must complete an Undergraduate Application for Readmission form and file it with the Registrar. All such students returning in the same standing (undergraduate) must file readmission applications by the following dates or, if the deadline falls on a weekend or holiday, on the following workday.

<table>
<thead>
<tr>
<th>Quarter</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Quarter</td>
<td>August 15</td>
</tr>
<tr>
<td>Winter Quarter</td>
<td>November 15</td>
</tr>
<tr>
<td>Spring Quarter</td>
<td>February 25</td>
</tr>
</tbody>
</table>

Application forms are available at 1113 Murphy Hall. The completed application must be accompanied by a $40 application fee (nonrefundable) and transcripts of records from any other institutions (including UCLA Extension) students attended during their absence. The paper records of nonregistered students, including transcripts submitted for transfer credit, are retained for five academic years by the Registrar’s Office. Students who have not been registered for the last five years must resubmit official transcripts of all work completed outside UCLA. Readmission is generally approved if students were in good academic standing (2.0 grade-point average) when they left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. The college or school may have other academic regulations governing readmission (consult the appropriate counseling office). Contact the readmission clerk at (310) 825-1091 for further information.

Second Bachelor’s Degree Applicants
By policy, second bachelor’s degrees are not generally granted by the University, except in the School of Nursing.

Undergraduate Registration

Enrollment and Degree Services
1113 Murphy Hall
(310) 825-1091
http://www.registrar.ucla.edu

Registration consists of paying fees and enrolling in classes. The UCLA Student Billing Statement (BAR), mailed monthly to students’ UCLA mailing addresses by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed online or by telephone through URSA (University Records System Access). Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.
Paying Fees

Details on fee payment, enrollment procedures, and deadlines are in the quarterly Schedule of Classes, available for purchase at the UCLA Store several weeks before the beginning of each term. To obtain a copy, write to UCLA Store, Attn: Mail Out, 308 Westwood Plaza, Los Angeles, CA 90024-1645, or call (310) 825-6064. The Schedule of Classes is available at http://www.ucla.edu/registrar.ucla.edu/schedule/.

Eligible students must pay fees by the applicable deadlines. Payments may be mailed, paid by credit card through URSA OnLine, or deposited in the UCLA Administrative Main Cashier’s Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and are assessed an additional $50 late payment fee.

Mandatory Medical Insurance Requirement for International Students

UCLA requires, as a condition of registration, that all undergraduate international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment.

The following plans are NOT acceptable and do NOT fulfill the University requirement for adequate medical/health insurance: (1) travel insurance plans of any kind, (2) any plans purchased outside the U.S. and/or not issued by a U.S. company, (3) reimbursement arrangements or vouchers, including those from home governments and consulates in the U.S.

UCLA provides a student Medical Insurance Plan (MIP) that fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the BAR statement for all undergraduate international students. This is the only way that MIP can be purchased.

International students who do not purchase MIP must have an adequate private medical insurance plan with all of the following minimum benefits:

(1) A minimum of $100,000 in lifetime benefits.

(2) Coverage of at least 75 percent of medical expenses, with a deductible of $500 or less and a copayment of 20 percent or less.

(3) A policy issued in the U.S. by a U.S. carrier.

(4) Inclusion of Medical Evacuation and Repatriation benefits for those on J-1 or J-2 visas.

If the private medical insurance plan does not meet all of the above requirements, students must purchase MIP.

International students who decide to waive out of MIP because they have adequate private medical insurance must complete the Medical Insurance Waiver Request included each term with the BAR statement and submit the form when they pay their registration fees. Students whose fees are paid by financial aid or other sources must submit their MIP waiver by the published registration deadline each term. Students may waive out of MIP at http://www.saonet.ucla.edu/health/insurance/mipforms/auth.html; the online waiver deadline is 48 hours prior to the official fee payment deadline published in the quarterly Schedule of Classes calendar.

This information serves as notice of the mandatory medical insurance requirement; it is each student’s responsibility to obtain the necessary information before they register. Changes and exceptions requested after students have registered cannot be honored. MIP cancellation requests must be made to the Ashe Student Health and Wellness Center Insurance Office within 10 days from the MIP effective date.

For all other undergraduate students, the MIP fee appears as a voluntary option on the BAR statement and is in addition to the amount due each term. To request MIP, students must select it by marking that item on the remittance portion of the BAR statement. The remittance slip must be returned to the UCLA Administrative Main Cashier by the published registration deadline each term. This is the only way that MIP can be purchased.

For further information on MIP or adequate medical insurance requirements, call the Ashe Student Health and Wellness Center at (310) 825-4073 option 4.

Enrolling in Classes

The quarterly Schedule of Classes contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the Schedule and with the aid of academic counseling from the school or college advisers, students can assemble a program of courses (see Choosing the Major and Planning a Program later in this section).

Students should plan two or three alternate programs in case their first choice of courses is not available. They may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

University Records System Access Enrollment

Through University Records System Access (URSA), UCLA students enroll in classes and obtain academic, financial, and personal information from their University records. URSA can be accessed either through URSA OnLine at http://www.ursa.ucla.edu/ or through URSA Telephone at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m., Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

The easiest way for most students to enroll is through URSA OnLine, which also provides enrollment appointment times. The site’s intuitive interface makes it easy to view course descriptions and times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a printout of the Study List. Students can also check their BAR account, make online credit card payments, and obtain refund information.

By using URSA Telephone, students can obtain enrollment appointment times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a reading of their Study List, which includes the day, time, and location of classes, examination codes, and instructor names. Students may also verify that their registration fees have been paid and that they have no outstanding holds, factors that could affect their ability to enroll. In addition, they may check financial aid information.

In-Person Enrollment

For classes that require written approval or specialized processing, students may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists

At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes “official,” and all wait lists are eliminated. Students should obtain a reading of their Study List through URSA after all enrollment transactions. Students are responsible for all courses and the grading basis as listed on URSA, and they cannot receive credit for courses not listed. Errors or omissions should be corrected before the academic dean’s deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

Beginning with the third week of instruction, most changes to the Official Study List can be made with a fee via URSA or require an Enrollment Petition which is available for purchase in the school supplies section at any UCLA Store. Approval signatures are required before processing. If students add a special studies (199) course, they must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. Consult the Schedule of Classes for deadlines and complete instructions.

Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action appear on the official transcript.
Change of College/School or Major

Changing the college/school or major requires the approval of the college/school or department students want to attend. Applications for change of college/school are made by petition, which is available without charge from the college or school office. Change of major petitions are available from the department students want to attend. They may not change majors after the opening of the last term of their senior year.

Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA varies according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar’s Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay annual tuition in addition to registration fees, as published in the quarterly Schedule of Classes and online at [http://www.registrar.ucla.edu/fees/](http://www.registrar.ucla.edu/fees/). For a full definition of residence and nonresidence, see the Appendix.

Fees are current as of publication but are subject to change without notice by The Regents. See [http://www.registrar.ucla.edu/fees/](http://www.registrar.ucla.edu/fees/) for updates.

</tr>
</tbody>
</table>

The registration fee covers certain student expenses for counseling service, laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Ashe Student Health and Wellness Center. This fee is charged whether or not students make use of these services.

Course Materials Fees

The College of Letters and Science and several professional schools are authorized to assess course materials fees for particular courses. The fees may take the form of materials use fees or instructional enhancement fees. Depending on the academic unit, schools either assess these fees at the start of the quarter or based on actual enrollment at the end of the fourth week of instruction. Students are responsible for ensuring that all Study List errors and omissions are corrected prior to this time.

All students in a course with an approved course materials fee are assessed the fee, regardless of major. The fee is nonrefundable once assessed. Students who are approved for a Late Add enrollment in a course after the fourth week of instruction are required to pay the course materials fees, which are billed through the BAR statement, for the entire quarter.

Other Fees

Miscellaneous fees charged to UCLA undergraduate students include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes) and a $20 late fee if the BAR statement has an unpaid balance in excess of $25. A $60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. Minimal charges of $5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the Schedule of Classes.

Fee Refunds

Students who formally withdraw from the University may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in the Academics section of this catalog or consult the Schedule of Classes for policy details and specific refund dates for each term.

Fee Waiver Requests

Late registration, processing, and penalty fees are waivable on request in writing to the office assessing the fees only if they were incurred through the fault of the University or because a student suffered sudden and debilitating injury or accident.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. Students who have ongoing family or employment responsibilities or health problems that preclude full-time study may qualify for part-time enrollment.

Students who have approval from their college or school to enroll in 10 units or less may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the educational fee. Students must file the Request for Fee Reduction form with their college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction. Students who receive the part-time fee reduction from their academic dean may not also use the UC employee reduction; they must use one or the other.

Estimated Annual Budgets for Undergraduate California Residents

Expenses cover the three regular session terms of the 1999-00 academic year and do not include Summer Sessions. Nonresidents must add $9,384 annual tuition to their total expenses for an accurate estimate. The budgets are designed to serve as a guide and are subject to change.

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive, (310) 825-4491.
Financial Support

Financial Aid Office
A129J Murphy Hall
(310) 206-0400
http://www.saonet.ucla.edu/fa.htm

Students do not need to come from low-income families to qualify for financial aid. They must, however, demonstrate financial need, which is defined as the difference between the cost of attending UCLA and the amount that they and their families should be able to contribute. The University expects that students and their families bear as much of the necessary cost of a student's education as their circumstances permit.

The Financial Aid Office publishes a Financial Aid Handbook with detailed information. Students can obtain a free copy at the Financial Aid Office, A129J Murphy Hall, UCLA, Box 951435, Los Angeles, CA 90095-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications is March 2 (or the Friday before that date if March 2 falls on a weekend). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline are considered only if funds are still available. The Daily Bruin and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the UC Application for Undergraduate Admission and Scholarships during the filing period (see Undergraduate Admission at the beginning of this section). They can also use the admissions application to apply for undergraduate scholarships.

Free Application for Federal Student Aid

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Free Application for Federal Student Aid (FAFSA). If students are financially independent according to the federal financial aid guidelines, their own financial circumstances are analyzed rather than those of their parents.

The FAFSA is used to apply for all federally funded programs, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. The FAFSA is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed by March 2. Be sure to indicate that a report is to be sent to UCLA by using the UCLA Title IV code: 001315.

Continuing students may obtain UCLA Financial Aid Application Packets beginning in January of each year at the Financial Aid Office. Continuing undergraduate students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Types of Financial Aid

There are four basic types of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some funds that are a gift (scholarship or grant) and some that have to be paid back or earned through employment.

Unless otherwise stated, students must demonstrate financial need to qualify for aid, and they must be making normal academic progress as defined by their college or school, their department, and the Financial Aid Office (for a full definition of financial aid minimum progress standards, see the Appendix of this catalog).

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a requisite only for University and name (endowed) scholarships other than those listed below. Each year approximately $300,000 is awarded from the many different scholarship funds. Awards range from $100 to $2,000 and are not renewable. Students must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; students receive a yearly honorarium if they have no financial need. Scholars who establish financial need by filing the FAFSA receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA’s scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from $500 to $2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter and to community college transfer students. No financial need is involved, but eligibility requirements exist, and students should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded. Freshman award amounts range from $500 to $10,000; transfer awards are $500 each. The Dr. Ralph Bunche Scholarship Awards, also presented by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, are given to students from historically underrepresented communities. In addition to the monetary awards, Alumni Scholars receive special privileges. Recipients who receive work-study and/or loans as part of a financial aid package receive additional alumni grant monies.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents’ income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of $150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/ Marine) scholarship is desired. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.
Grants
Grants are funds that do not have to be repaid and are based solely on need. Whenever awarding policies and funds permit, the financial aid package includes a grant.

Federal Pell Grants
Federal Pell Grants are federal aid awards intended to be the “floor” of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1999-00 range from $400 to $3,150, depending on federal funding, and are determined by student financial resources and the family’s financial resources. U.S. citizens and eligible noncitizens may apply by filing the FAFSA. The University requires all eligible undergraduates to apply for a Federal Pell Grant.

Cal Grants A and B
California residents who have not completed more than nine quarters or six semesters of college work prior to September 1999 are eligible to apply for a California Student Aid Commission Cal Grant award. The FAFSA and GPA Verification Form are the official applications for these programs. Cal Grant A awards are applied toward registration fees. They are based on need and academic achievement and are renewable each year. Cal Grant B awards are intended to assist low-income families and are renewable annually. First-year freshmen receive a quarterly stipend. In subsequent years recipients receive a stipend plus funds toward educational and registration fees.

State University Grants
These grants provide eligible students with financial assistance from state funds. Awards range from $100 to $4,000. All undergraduate students are considered.

Federal Supplemental Educational Opportunity Grants
These awards are federally funded and are granted only to undergraduates with financial need. Awards range from $100 to $4,000. Recipients must be U.S. citizens or eligible noncitizens.

Loans
Loans allow students to postpone paying some of the costs of their education until they have completed school. A financial aid offer includes a long-term, low-interest loan.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, students should assess their total educational debt and their ability to repay following graduation. The University makes every effort to assist students during the repayment of their obligation, but University services, including registration and the release of official transcripts, are withheld if the loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action. All first-time borrowers must attend a loan entrance interview before their funds are released.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview helps students understand their loan agreement and their rights and responsibilities. If students fail to participate in an exit interview, the University places a hold on their academic records and registration materials. Call (310) 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Federal Perkins Loans
Low-interest Federal Perkins loans are available to all students who are U.S. citizens or eligible noncitizens. Repayment begins six or nine months after students terminate at least half-time study. Repayment terms are fully explained when students accept the loan. Minimum repayment is $90 per quarter, including interest, up to a maximum of 10 years.

Federal Nursing Loans
To be eligible for a nursing loan, applicants must be U.S. citizens or eligible noncitizens and students in the School of Nursing. Up to $3,000 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans
Students need not be receiving financial aid to apply for emergency loans. They may borrow up to $100 for immediate emergency needs; the amount is repayable on the 20th of the month following the month in which the loan was made. To qualify, applicants must be registered UCLA students with satisfactory loan repayment records. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Federal Family Education Loan Program
Federal Stafford Loans are long-term need-based loans made by banks and credit unions. They are available to U.S. citizens and eligible noncitizens who are enrolled in at least a half-time program at UCLA. Freshmen may borrow up to $2,625, sophomores up to $3,500, and juniors and seniors up to $5,500 per academic year, to a maximum of $23,000.

Unsubsidized Federal Stafford Loans for Middle-Income Borrowers are not based on need. Although repayment can be deferred until after graduation, interest begins to accrue while students are in school. Students must file a FAFSA to be considered for the program.

Through Federal Parent Loans for Undergraduate Students (PLUS) parents may be eligible to borrow up to the cost of a student’s education for the academic year minus any estimated financial aid. These loans are not deferrable.

Work-Study Programs
Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows them to work a maximum of 20 hours per week while attending school. An academic year’s work-study award may range from $1,000 to $1,800, but gross earnings may not exceed the amount awarded.

Under Federal Work-Study, the federal government pays a portion of the hourly wage; the employer contributes the balance. Whenever possible, work is related to student educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of the work, experience, and capabilities. To be eligible, students must be U.S. citizens or eligible noncitizens.

Off-campus community service positions are also available in nonprofit organizations and governmental agencies. Students who are placed in these positions may petition the Financial Aid Office for an increase in work-study funding up to a maximum of $5,000.

Whether employed on or off campus, students must maintain full-time enrollment (12 units for undergraduates, eight units for graduate students) to be exempt from Social Security and Medicare taxation.

Getting the Bachelor’s Degree
College and Schools
The UCLA campus consists of one college and 11 schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

The College of Letters and Science provides a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees.

The schools provide training for specific professions and are authorized to grant professional degrees (for example, Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 11 professional schools, four of which offer undergraduate degree programs: School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television.
Each college and school has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when students attend UCLA, they are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Their academic life is governed by the college or school that houses their major.

UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. In addition there are a number of special programs and minors that students may complete as an adjunct to their major. The bachelor's degree (only one may be earned) is the culmination of their undergraduate work; master's and doctoral degrees are earned in graduate study.

Student Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to students to realize when they need help and to seek it out. It is also the responsibility of students to keep informed and to comply with the rules, regulations, and policies affecting their academic standing and their life as UCLA students. Consult this catalog, the college and school announcements, and the Schedule of Classes for the information needed; watch for official announcements in the Daily Bruin and on campus bulletin boards. Meeting academic deadlines, monitoring the Study List for accuracy, completing requisites, and fulfilling degree requirements are all part of their academic duties as students. Living up to their responsibilities adds immeasurably to the value and enjoyment of their education (also see Student Conduct in the Appendix of this catalog).

Choosing the Major

One of the most important decisions students have to make in college is their choice of major — the field of study that represents their principal academic interest and that likely will contribute toward their career goals. Some students select their major at the time they fill out the University's application for admission. A far greater number, however, are undecided about their major.

Students in the College of Letters and Science do not need to declare their major in their freshman year. The college allows them to attend with an undeclared major until the end of their sophomore year. In fact, if students are not certain of their specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major students select. To narrow the choices, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss interests and plans with a departmental counselor or faculty adviser, a college counselor, or advisers in the UCLA Career Center.

Certain majors, especially in the arts, theater, film and television, engineering, and the sciences, require early declaration. Some have enrollment quotas and allow application by new majors only during a specified term. Students should check with the departmental adviser for the majors that interest them.

In addition, UCLA undergraduate students are limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if they wait to declare a major, they should not wait too long. In any case, they must declare a major by the beginning of their junior year (90 quarter units).

When students are ready to declare their major, or if they wish to change from one major to another, they should obtain a Petition for Change of Major at the college or school office. There is no fee for the petition.

Planning a Program

New students should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, they need to plan courses to satisfy all of the degree requirements while staying within the maximum number of units required for graduation. The Orientation program for new students takes them through a step-by-step process designed to ensure they enroll in an effective program (see Orientation later in this section). Students who cannot attend Orientation should see their college or school adviser or, if they have selected a major, should make an appointment with their major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, students are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of Nursing and School of Theater, Film, and Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed.

As students work toward a bachelor's degree, they should be aware that in addition to unit requirements there are three types of requirements they must satisfy. The first type consists of Universitywide requirements that all undergraduates must satisfy; the rest vary depending on the major and the college or school that offers it.

(1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;
(2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);
(3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. See the College and Schools section of the catalog for a description of the college or school requirements and the Curricula and Courses section for departmental requirements.

University Requirements

The University of California has established two requirements that all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is each student's responsibility to see that these requirements are fulfilled.

Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that students must satisfy before entering UCLA or during their first year in residence. They may meet this requirement by

(1) Scoring 3, 4, or 5 on one of the College Board Advanced Placement Tests in English OR
(2) Scoring 680 or better on the SAT II Subject Test in Writing OR
(3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR
(4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination during the month of May before they enrolled; others take an examination at UCLA early in their first term.

If students do not meet the requirement in one of the ways described above, Academic Senate regulations require them to enroll in either En-
English Composition A or 2 (determined by performance on the Subject A Examination) as early as possible during their first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. Students receiving a final grade of C− or less must repeat the course during their next term in residence. Satisfaction of the Subject A requirement is a requisite to English Composition 3 and all subsequent English courses.

English as a Second Language

The English as a Second Language Placement Examination (ESLPE) is required of all entering UCLA students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE. Undergraduate students may take the ESLPE once only. Unauthorized retakes of the examination result in an invalid examination score.

Nonnative-speaking first-year students who have taken the Subject A Examination are evaluated on the basis of their Subject A composition and informed if they need to take the ESLPE before the term in which they are to register. Failure to take the ESLPE results in a hold on student records. Results of the ESLPE and the Subject A Examination are reviewed to determine which track (Subject A or ESL) is a more appropriate placement. Students placed in the Subject A track may satisfy the Subject A requirement by following the guidelines listed above. If students are placed in the ESL track, they must complete the requirement by taking the designated courses through the ESL track.

Nonnative-speaking transfer students with grades of B or better in the English Composition 3 and English 4 equivalent courses at their transfer institution are exempt from the ESL requirement. Other students must take the ESLPE and may be required to take one or more ESL courses beginning in their first term in residence at UCLA to satisfy the ESL requirement.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. In the case of a nonpassing score on the examination, students are placed in one or more of the credit-bearing courses — English as a Second Language 33A, 33B, 33C, and 35. Students must begin taking courses during their first term in residence at UCLA and must complete the courses in sequence with grades of C or better (C− or a Passed grade is not acceptable). All units are applied toward graduation but cannot be applied toward general education requirements. Certain ESL courses fulfill major requisite requirements and provide upper division elective units.

American History and Institutions

The American History and Institutions requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

1. Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
2. Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:
   - Asian American Studies M153
   - Chicana and Chicano Studies M159A, M159B
   - Economics 183
   - Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR
3. Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR
4. Scoring 500 or better on the SAT II Subject Test in American History OR
5. Scoring 3, 4, or 5 on the College Board Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 151A, 151B, Political Science 145B, or 145C.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (310-825-3720).

Course Credit and Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C− through D− yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C+ or better in other courses.

In order to qualify for a bachelor's degree in any college or school at UCLA, students must earn at least a C (2.0) average in all courses taken at any University of California campus. Students who fail to maintain this level may be placed on academic probation or may become subject to dismissal.

Petitions

A petition is a form submitted to explain a student's need or desire to be excepted from any standard rule or regulation of the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over the particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between students, their college or school and, in some cases, the department chair, granting students an exception from the existing regulations.

Petitions are also used at UCLA to change the college/school or major, take more or fewer units than regulations permit, make changes to the Study List after URSA processing ends, or obtain credit by examination. In addition, students may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from the college/school or department; consult the Schedule of Classes for details about procedures.

Academic Probation

Students are placed on probation if their overall grade-point average falls between 1.5 and 1.99 or if they do not earn at least a 2.0 GPA in any one term. While they are on probation, they may not take any course on a Passed/Not Passed basis, and they may have to limit their Study List to 12 units.

Probation ends at the close of a regular term if students have attained a C (2.0) average for the term and a cumulative C average in all University
work. Students who do not end probation within two terms are subject to dismissal.

**Academic Dismissal**

Students are subject to dismissal from the University under any of the following conditions:

1. If their grade-point average in any one term is less than 1.5 OR
2. If they do not earn at least a C (2.0) average in any term when they are on probation OR
3. If they do not end probation within two terms.

If students are subject to dismissal, their transcripts carry that notation. They should make an appointment with their college or school counselor. Depending on the situation, they are given conditions for continuation or are dismissed from the University.

The college or school counselor can explain the conditions for readmission if students wish to return to the University after dismissal (see Readmission earlier in this section).

**Progress toward the Bachelor’s Degree**

The undergraduate curriculum at UCLA is designed as a four-year curriculum. In order to graduate in four years, students need to complete at least 45 units during each academic year, not just the 36 required for “minimum progress.” In the absence of special circumstances justifying slower progress, they should plan to complete 45 units per year, in an arrangement of courses appropriate to their needs. Students should consult their college or school counselor if they have questions or need advice.

Each college and school enforces minimum enrollment or minimum progress regulations. Students may be subject to disqualification for failing to meet minimum progress requirements. Check with a college or school counselor. Read the degree requirements section under each college and school for specific Study List limits. See the Academics section of this catalog for information on concurrent enrollment, credit by examination and credit from other institutions, and individual special studies (199) course limitations.

**Undergraduate Research**

**Undergraduate Research Centers**

The Undergraduate Research Centers (URC) assist students in the humanities and social sciences (1201A Campbell Hall, 310-825-2935) and in the life and physical sciences (2121 Life Sciences, 310-794-4227) by supporting scholarly, critical, and creative undergraduate research. The centers provide individual research counseling, house the Student Research Program (SRP) and the URC/AAP mentor program, and administer stipends and scholarships for undergraduate research. URC sponsors *Westwind, A Journal of Undergraduate Writing and Research* and *The Undergraduate Science Journal*, and organizes campuswide undergraduate research events such as the Humanities and Social Sciences Undergraduate Research Conference and Science Poster Day. In addition, URC coordinates the Summer Research Program for Undergraduate Research Scholars. Website: [http://www.college.ucla.edu/ugresearch/centers.html](http://www.college.ucla.edu/ugresearch/centers.html).

**Student Research Program**

Housed in each Undergraduate Research Center, the Student Research Program (SRP) offers undergraduate students, especially lower division undergraduates, opportunities to become actively involved in the University research community. Working with faculty members on research projects, SRP students gain valuable research training and experience for advanced undergraduate work and preparation for graduate school. Students earn transcript notation after completing 60 to 100 hours of research (approximately six to 10 hours per week). There is no minimum grade-point average. Website: [http://www.college.ucla.edu/up/SRP/](http://www.college.ucla.edu/up/SRP/).

**Undergraduate Research Development Stipend**

Undergraduate Research Development Stipend (URDS) awards are available on a competitive basis and by application for undergraduate students who have financial need and who want to participate in two terms of research through the Student Research Program. The commitment to the SRP project is for Winter and Spring Quarters, and stipends are set at $1,000 per term. Applications are accepted during Fall Quarter only, and the deadline for submission of applications is late November. Website: [http://www.college.ucla.edu/up/SRP/srpstip.htm](http://www.college.ucla.edu/up/SRP/srpstip.htm).

**Academic Research Courses**

All academic departments offer undergraduate research courses that allow students to obtain academic credit for their research experiences. Students enrolled in the courses are often upper division students with Student Research Program experience. Department requirements for credit vary, but all departments require a research proposal to enroll in independent studies and a research report to receive credit when the research project is completed. Senior students working toward honors or highest honors in many majors must complete a two-term (or more) research project that culminates in an honors thesis. Arrangements must be made with a faculty mentor before students can register for the course. See the undergraduate adviser in the department of interest for more information.

**Center for Academic and Research Excellence**

The Center for Academic and Research Excellence (CARE), located in 2103 Life Sciences ([http://www.lifesci.ucla.edu/CARE/](http://www.lifesci.ucla.edu/CARE/)), provides enrichment opportunities for students majoring in the sciences and mathematics who seek careers in scientific research and teaching and whose success through graduate training will increase the numbers of historically underrepresented individuals in academic and technological fields. CARE offers a variety of research opportunities during the academic year and summer that allows students the financial support to dedicate themselves to research. CARE programs, some sponsored by grants through federal agencies such as the National Institutes of Health (NIH) and the National Science Foundation (NSF), are for UCLA students as well as students from other universities.

**Academic Resources**

A broad range of options at UCLA can lend an added dimension to the undergraduate academic program. Other services and programs available to both graduate students and undergraduates are listed in the About UCLA section of this catalog.

**Center for American Politics and Public Policy**

The Center for American Politics and Public Policy (CAPP) selects 25 to 30 undergraduates each fall and spring to participate in its Quarter in Washington, DC Program, which offers an exciting opportunity to combine UCLA courses with research and field experience in areas directly related to the policy-making process of the federal government. Students live in the Washington area for 12 weeks, dividing their time between courses taught by UC faculty and a part-time field placement position. They are registered as UCLA students and earn academic credit for the courses taken. Most of the courses emphasize politics and public policy. The core course carries political science credit. Efforts are also made to provide at least one course in a subject other than political science, such as art or history. All courses take advantage of Washington’s unique resources for study and research.

CAPPP administrators help students find a field placement, which is central to a research seminar each student takes, in a Washington organization. Washington field placement locations have included the American Enterprise Institute, CNN, Carnegie Endowment for International Peace, General Accounting Office, Heritage Foundation, Japan Economic Institute, Justice Department, Office of National Drug Control Policy, Senator Edward Kennedy’s Office, Treasury Department, and others. For further
Center for Experiential Education and Service Learning

The Center for Experiential Education and Service Learning (CEESL), formerly known as Field Studies Development, strives to enhance the quality of undergraduate education at UCLA by offering students the opportunity to participate in “experiential” learning. In courses supported by CEESL, students work outside the classroom at internships or public service positions and use their experiences as the basis for academic projects. In this way, students participate in their communities and gain insights into a range of professional fields, while applying and testing academic theories firsthand. CEESL is located in 160 Powell Library (310-825-7867; http://www.oid.ucla.edu/Ceesl/).

A variety of exciting field placements is available to students either in the form of internships or short-term projects such as community service work, local industry and business positions, and out-of-state opportunities. Students combine service experiences with research and writing to receive academic credit. For example, a CEESL student interning at a talent agency researched and wrote a paper on racial stereotypes in the acting profession; a student working with ESL students at an elementary school wrote a paper on the politics of English-only legislation and its impact on teaching; students volunteering at a health clinic researched and produced educational pamphlets on AIDS prevention in Russian and Armenian for recent immigrants in the community.

Supported Courses

Every term CEESL supports a variety of unique courses that incorporate community work with course readings, lectures, and discussions. These courses and seminars create opportunities for students to work with an instructor and to interact with their peers in a structured environment. Examples of such courses are Film and Television 192 and Community Health Sciences 195. Courses supported by CEESL are mostly designed for upper division students who have the necessary academic preparation to benefit from out-of-classroom learning opportunities. Lower division students may participate in courses that offer a portion of course credit for community service and fieldwork.

Upper division students looking for a more intensive service or field experience may enroll in immersion programs or in sequential courses. Immersion programs are structured around a block of courses with focus on the study and observation of a single topic (for example, social and cultural stigma). They require a full-time commitment for one or two terms, for which students earn 12 to 16 units per term. The Developmental Disabilities Immersion Program (DDIP) and Sociology Immersion Quarter (with changing themes) are two long-standing immersion programs. Sequential courses are taken consecutively for two or three terms. Students receive prefield training during the first term and conduct service and research in subsequent terms.

Students may also design individualized service-learning and internship projects to meet their specific academic, personal, and career goals. These are organized through individual studies courses (199 or 199i), in which a CEESL graduate student coordinator helps students develop suitable projects, secure field placements, and identify faculty sponsors.

Each term CEESL publishes a list of service and experience-based courses. Interested students should visit 160 Powell Library for the most recent schedule and speak with a coordinator for more information. The deadline for enrollment in CEESL supported courses is the end of the second week of the term.

Community Service and Internship Sites

All CEESL participants need to secure academically viable placement sites. Hundreds of local and national opportunities are listed in 160 Powell Library and at EXPO Internship and Study Abroad Services. Students may also initiate contact with a site on their own. However, all community service and internship placements must be approved by a CEESL coordinator.

EXPO Internship and Study Abroad Services

The EXPO Internship and Study Abroad Services, a branch of the UCLA Career Center, offer access to a variety of off-campus learning experiences. Information on the programs or services below is available at 109 Kerckhoff Hall (310-825-0831) or at http://www.saonet.ucla.edu/career/EXPO.htm.

UCLA National Internship Program

More than 5,000 UCLA students have learned about the inner workings of government and business while serving in the internship program. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and media organizations in Sacramento, Washington, DC, and other U.S. cities. Stipends for students in the program can be arranged.

Los Angeles Internship Program

Local internships are available throughout the year in fields such as advertising, business, film, media, and politics.

International Opportunities

EXPO advises students on study, travel, volunteer, international internship, and short-term work opportunities outside the U.S., offering information on overseas study programs open to UCLA students. EXPO maintains a library of current materials related to study, travel, and other opportunities abroad. International Student Identity Cards and Youth Hostel Cards are also issued.

Freshman and Sophomore Programs

Collegium of University Teaching Fellows

The Collegium of University Teaching Fellows (CUTF) was initiated to provide a mechanism for UCLA's finest advanced graduate students to develop and teach lower division seminars in their area of expertise. These unique courses cover all areas, from the social sciences and humanities to the life and physical sciences. Undergraduate students have the chance to take courses that are at the cutting edge of a discipline and to experience the benefits of participating in a small-seminar environment. General education and honors credit is granted for most seminars, which are offered in Winter and Spring Quarters only (consult the quarterly Schedule of Classes). Enrollment is limited to allow students close contact with the instructors. For further information, contact the Office of Instructional Development in 160 Powell Library (310-825-5467; http://www.oid.ucla.edu/Cutf/index.html).

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA's promising freshmen and sophomores. Some upper division courses are also offered. For a complete description of this program, see the College of Letters and Science in the College and Schools section of this catalog.

Lower Division Seminars

Lower division seminars are departmentally sponsored and designed to provide freshmen and sophomores the opportunity to participate in a small classroom setting to enhance writing, verbal, and analytical skills. Many courses carry general education credit.

Professional Schools Seminar Program

The Professional Schools Seminar Program (PSSP) offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in Fall, Winter, and Spring Quarters (consult the quarterly Schedule of Classes). Enrollment is limited to allow students...
close contact with professional school faculty members; lower division students are preferred. Students must satisfy the Subject A requirement before enrolling in these seminars. General education and honors credit is granted for most seminars. For further information, contact the PSSP Office in 160 Powell Library (310-825-5467; http://www.oid.ucla.edu/Pssp/index.html).

Individual Classes
Most departments offer the individual studies (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Students should consult their department or the departmental listings in this catalog for further information.

Individual Majors
Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Refer to the Curricula and Courses section of this catalog for major requirements.

Reserve Officers’ Training Corps
The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows students to qualify for an officer’s commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs provide a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in the Curricula and Courses section of this catalog.

Teaching Careers
Although UCLA has no undergraduate major in education, students may prepare for a career in teaching and/or education on campus. Information is available from the following offices:

(1) Education Studies Minor Program Office, 1009 Moore Hall, for information regarding the minor which is described in detail in the Curricula and Courses section of this catalog.

(2) College of Letters and Science Counseling Service, A316 Murphy Hall, for information regarding the Diversified Liberal Arts Program which is described in detail in the Curricula and Courses section of this catalog.

(3) UCLA Center X (1041 Moore Hall, http://www.gseis.ucla.edu/x/x.html) for information about the Teacher Education Program which offers both a Master of Education (M.Ed.) degree and a Cross-Cultural Language and Academic Development (CLAD) or Bilingual Cross-Cultural Language and Academic Development (BCLAD) Credential in a combined, full-time two-year program.

(4) The Department of Mathematics for details on the Mathematics/Education Program which is jointly sponsored by the Department of Mathematics and UCLA Center X of the Graduate School of Education and Information Studies. In their junior year, mathematics majors who have a grade-point average of 3.0 or better and a firm commitment to teaching in urban public schools begin to take introductory education courses. In the senior year, while completing the bachelor’s degree in mathematics, students begin teacher-education courses. Students earn a master’s in education and a teaching credential in one academic year and two summers beyond the baccalaureate. A similar program for science majors is planned for Fall Quarter 1999; contact Dr. Arlene Russell, 1037A Young Hall, for details.

(5) UCLA Career Center, for information on employment opportunities in teaching and education.

(6) UCLA Graduate School of Education and Information Studies, Office of Student Services, 1009 Moore Hall, for information on master’s and doctoral degree programs in education and current information on requirements for various instructional credentials.

Advising and Academic Assistance
UCLA’s academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. Students need only to seek it out. This section introduces them to the many kinds of assistance available to undergraduates. Refer to the section on Student Services in the About UCLA section of this catalog for other helpful programs.

College and School Advisers
Each college/school and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help students plan their academic program, monitor their progress toward the bachelor’s degree, provide information about college/school and major requirements and requisites, and assist them with academic problems, improving study habits, and program planning. See the Schedule of Classes for a listing of counselors and advisers.

Counseling Assistants
Counseling assistants (CAs) in the College of Letters and Science are graduate students who help lower division students with course selection, major requirements, and graduate school information. Many CAs have served as teaching assistants (TAs) and can give unique perspectives on courses and faculty, in addition to academic advice and referrals to student support services. Appointments can be made at Window 1, A316 Murphy Hall (http://www.college.ucla.edu/up/ca/). CAs are also available on a walk-in basis on weekday afternoons in Covel Commons and in selected departments across campus.

ASK Peer Counselors
The ASK Peer Counseling Program is an extension of the College of Letters and Science Counseling Service. ASK peer counselors are undergraduate students in the college trained to provide counseling and respond to students’ immediate concerns and questions in convenient walk-up settings. No appointments are required. Counselors can provide most petitions, give directions, make referrals, and bridge the gap between campus life and the college office in Murphy Hall.

Students can find ASK counselors weekdays when school is in session at these campus locations: Campbell Hall (southwest corner), Royce quad, and Powell Library (southeast corner) from 10 a.m. to 2 p.m.; the ASK Web Lab, A316C Murphy Hall, from 10 a.m. to 3 p.m.; and adjacent to 1105 Murphy Hall from 10 a.m. to 4 p.m. Students may also e-mail questions to ASK@up.ucla.edu.

Orientation
Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation students work in small groups with peer counselors and gain insight into necessary academic skills, learn how to plan and construct their academic program, and become familiar with the educational opportunities, student services,
and facilities available at UCLA. Individual counseling sessions help students adjust to University life and fulfill the advising requirements of their college or school. Sessions for family members are also offered.

During the summer, Orientation offers three-day, two-night residence hall live-in programs for first-year students and one-day programs for transfer students. Prior to Winter and Spring Quarters, a one-day program is offered. There is a fee for participation. For more information, contact the Orientation Office in 201 Covel Commons (310-206-6685; http://www.college.ucla.edu/up/ORIENTATION/).

College Tutorial Services

College Composition and ESL Tutorials
The College Composition Tutoring Laboratory (http://www.college.ucla.edu/up/CT/), in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English Composition A, 2, and 3 and to students writing papers for other UCLA courses. The laboratory is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process — from generating and organizing ideas to polishing final drafts.

The College ESL Tutoring Laboratory (http://www.college.ucla.edu/up/CT/ESL.htm) assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. Most of the ESL tutors are graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Laboratories are located in 228 Covel Commons and offer free individual tutoring by appointment. For tutoring appointments or further information, call (310) 206-1491.

College Mathematics/Sciences Tutorials
The College Mathematics/Sciences Tutorials, located in 230 Covel Commons, provide an organized-by-appointment tutorial program for most introductory courses in biology, chemistry, mathematics, and physics. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the term; early registration is strongly advised. Drop-in tutoring is also offered. Schedules vary each term. For further information, call (310) 206-6965 or 825-7305 or visit http://www.college.ucla.edu/up/CT/math_sci.htm.

College Tutorials for Student Athletes
The College Tutorials for Student Athletes (http://www.college.ucla.edu/up/CT/athletic.htm) provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in other tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located in 209 Covel Commons. For appointments and further information, call (310) 825-8699.

Academic Advancement Program
The Academic Advancement Program (AAP), a multiracial program, has a threefold mission: (1) to ensure the academic success, retention, and graduation of its more than 6,500 students, (2) to increase the numbers of its students entering graduate and professional schools, and (3) to develop the academic, political, scientific, economic, and community leadership necessary to transform society in the twenty-first century. Programs are proactive rather than reactive, comprehensive rather than fragmented, and oriented toward furthering the long-term academic and personal growth of AAP students rather than merely solving immediate problems.

AAP encourages and promotes academic achievement and excellence by providing students with tutoring, academic, personal, and career counseling, graduate mentoring, scholarships, research opportunities and stipends, opportunities to participate in innovative science programs, and a computer laboratory. Freshman and Transfer Summer Programs provide an academic transition into the University for entering students.

Students are eligible for AAP if their academic profiles and personal backgrounds may impact their University experience and their retention and graduation from UCLA. Students are also eligible if they are part of any federally funded program that requires counseling, tutoring, or mentoring. For more information, contact the AAP Office in 1232 Campbell Hall (310-206-1550; http://www.humnet.ucla.edu/aap/).

Freshman and Transfer Summer Programs
Two six-week academic summer programs are sponsored by AAP, the Freshman Summer Program (FSP) and the Transfer Summer Program (TSP). Both are designed to introduce students to life at UCLA and to prepare students to succeed at UCLA by exposing them to the rigor and demands of academic life and the wide range of campus programs, services, and learning resources available to undergraduates.

Students enroll in two University courses that meet UCLA requirements for graduation and receive close personal attention, in either small groups or individual sessions, from teaching assistants and tutors. They are encouraged to live on campus so that they can participate in the many cultural and social events, interact with students of diverse backgrounds, build a network of friends, and broaden their life experiences and world outlook. For more information, call (310) 206-1571.

Counseling Services
AAP counselors encourage students to explore their talents and abilities, follow their interests and their passions, believe in themselves, set the highest standards for themselves, and aspire to academic and personal excellence. Counselors, including two science counselors, work with students to plan their academic programs, monitor progress toward the bachelor’s degree, provide information about requirements and requisites for different majors, and discuss graduate school and career options.

AAP peer counselors are upper division AAP students who work with entering students and assist them in making the transition to the University. They provide a student perspective on life at UCLA.

Program Leading to Undergraduate Success
The Program Leading to Undergraduate Success (PLUS), a federally funded component of AAP, provides intensive personalized services, including counseling, peer counseling, tutoring, workshops, and social and cultural programs for first-generation college, low-income, UCLA freshmen. Application information is available at 1229 Campbell Hall (310-825-9276, fax 310-825-1312; http://www.geocities.com/~plus).

Tutorial Services
Providing tutorial services for more than 450 courses, AAP aims to foster excellence, not remediation. Tutoring is done primarily by AAP undergraduates who are themselves successful upper division students. AAP tutors provide students with the intellectual challenge, encouragement, and personal support they need to recognize their own authority as thinkers and learners. The majority of AAP tutoring is done in small groups, which fosters discussion and allows students to listen to, grapple with, and articulate new and different perspectives.

Graduate Mentor Program
The AAP Graduate Mentor Program (GMP) is grounded in the belief that it is never too early for students to prepare for graduate school and that it is never too late to decide to do so. Graduate student mentors help AAP students prepare for graduate school. The primary goal of GMP is to in-
crease the number of AAP students who enroll in graduate or professional schools.

Instructional Media

The **Instructional Media Laboratory** provides individual student access to course- or textbook-related audio, interactive, and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. The laboratory is located in 270 Powell Library (310-206-1211; http://www.oid.ucla.edu/Imlab/).

The **Instructional Media Library** is UCLA’s central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community and beyond. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. The library is located in 46 Powell Library (310-825-0755; http://www.oid.ucla.edu/Imlib/).

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean’s Honors List and Provost’s Honors

The School of the Arts and Architecture, School of Engineering and Applied Science, School of Theater, Film, and Television award Dean’s Honors to deserving students each term, while the College of Letters and Science awards Provost’s Honors each term. The School of Nursing awards Dean’s Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult the college or school for further information.

Honors at Graduation

The college or school awards honors according to overall GPA at graduation. To be eligible students must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade.

The levels of honors are **summa cum laude**, **magna cum laude**, and **cum laude**. Specific requirements vary for each level and are detailed in the College and Schools section of this catalog. See the quarterly **Schedule of Classes** for the most current calculations of Latin honors.

Departmental Honors

In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on the recommendation of a student’s major department, based on successful completion of a departmental honors program. Students should consult their department for its requirements.

Departmental Scholar Program

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as UCLA Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. Students interested in becoming Departmental Scholars should consult their departments well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

**Alpha Lambda Delta and Phi Eta Sigma**

Membership in the national freshman honor societies is based solely on academic achievement during the freshman year. To be eligible students must have a 3.5 grade-point average with 12 graded University of California units in the first term of their freshman year, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871; http://www.studentgroups.ucla.edu/aldpes/).

**Golden Key**

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, uniting with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates and graduating seniors, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871; http://www.studentgroups.ucla.edu/Goldenkey/).

**Mortar Board**

Mortar Board (http://www.studentgroups.ucla.edu/mboard/) is a national honor society for college seniors which recognizes outstanding and continual scholarship, leadership, and service to the campus community. To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available from the Center for Student Programming (105 Kerckhoff Hall, 310-206-5523) and the Office of the Dean of Students (1206 Murphy Hall, 310-825-3871) early in Winter Quarter and are due by mid-February. Approximately 40 members are selected each spring by the outgoing chapter.

**Phi Beta Kappa**

Phi Beta Kappa is a national honorary society in the humanities, liberal arts, and sciences, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do not apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum grade-point average considered is 3.67 (for 140 or more UC units); the minimum number of UC units considered is 90 (students at the 90-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. Students who are elected are notified by mail. For more information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall (310-206-9667; http://www.college.ucla.edu/up/honors/pbk.htm).

**Outstanding Senior Award**

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted during Fall Quarter and close in late January. Awards are presented at the annual UCLA Alumni Association Awards Ceremony in May. Award recipients receive senior class rings and life memberships in the Alumni Association. For more information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza (310-206-0523; http://www.alumni.ucla.edu/).
## Undergraduate Majors and Degrees

### School of the Arts and Architecture
- **Art** B.A. International Development Studies B.A.
- **Design** B.A. Italian B.A.
- **Ethnomusicology** B.A. Italian and Special Fields B.A.
- **Music** B.A. Latin American Studies B.A.
- **World Arts and Cultures** B.A. Linguistics B.A.

### School of Engineering and Applied Science
- **Aerospace Engineering** B.S. African Languages B.A.
- **Chemical Engineering** B.S. Linguistics B.A.
- **Civil Engineering** B.S. Linguistics and Anthropology B.A.
- **Computer Science** B.S. Linguistics and Computer Science B.A.
- **Computer Science and Engineering** B.S. Linguistics and East Asian Languages and Cultures B.A.
- **Electrical Engineering** B.S. Linguistics and English B.A.
- **Materials Engineering** B.S. Linguistics and French B.A.
- **Mechanical Engineering** B.S. Linguistics and Italian B.A.
- **African Languages** B.A. Linguistics and Philosophy B.A.
- **Chemical Engineering** B.S. Linguistics and Psychology B.A.

### College of Letters and Science
- **Afro-American Studies** B.A. Linguistics and Scandinavian Languages B.A.
- **Anthropology** B.A., B.S. Linguistics and Spanish B.A.
- **Art History** B.A. Mathematics B.A.
- **Asian American Studies** B.A. Applied Mathematics B.S.
- **Atmospheric Sciences** B.S. General Mathematics B.S.
- **Chemistry and Biochemistry** B.S. Mathematics B.S.
- **Biophysics** B.S. Mathematics/Applied Science B.S.
- **Biochemistry** B.S. Mathematics of Computation B.S.
- **Chemistry** B.S. Mathematics/Economics B.S.
- **Chemistry/Materials Science** B.S. Molecular, Cell, and Developmental Biology B.S.
- **César E. Chávez Center for Chicana and Chicano Studies** B.A. Musicology B.A.
- **Classics** B.A. Near Eastern Languages and Cultures B.A.
- **Classical Civilization** B.A. Ancient Near Eastern Civilizations B.A.
- **Greek** B.A. Arabic B.A.
- **Greek and Latin** B.A. Hebrew B.A.
- **Latin** B.A. Iranian Studies B.A.
- **Communication Studies** B.A. Jewish Studies B.A.
- **Comparative Literature** B.A. Near Eastern Studies B.A.

## School of Public Policy and Social Research

- Public Policy
Graduate Study

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to — the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline all provide an extraordinary range of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, education is enriched by the several hundred postdoctoral fellows and visiting scholars from other universities who engage in research and, in some instances, teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration, is intended to develop mastery of a field and prepare students for the practice of a profession. The doctoral degree (Ph.D., Ed.D., and so forth) is designed to prepare students for creative activity and original research, often in association with college or university teaching.

Administration

Graduate Division
The UCLA Graduate Division is responsible for administering policy established by the Academic Senate and its Graduate Council for master’s, doctoral, and graduate professional degree programs other than the professional degree programs in law, medicine, and dentistry. It oversees graduate recruitment and admissions (including the recruitment of a diverse student body), fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, and the maintenance of high-quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — academic affairs.

Graduate Council
The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University’s commitment to the philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

Graduate Adviser
At matriculation, a graduate student usually selects or is assigned a graduate adviser who assists in program planning and completion of degree requirements. Sometimes this role is temporarily assumed by a faculty adviser assigned to the program as a whole. When the student’s master’s or doctoral committee is established, the chair of the committee assumes the adviser’s role.

Graduate Students Association
The Graduate Students Association (GSA) at UCLA shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see Student Activities in the About UCLA section of this catalog or visit http://gsa.asucla.ucla.edu/~gsa/frame_main.html.

Graduate Admission
Graduate Admissions/Student and Academic Affairs
1255 Murphy Hall
(310) 825-1711
http://www.gdnet.ucla.edu/asis/infoserv/gdservcs.htm

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor’s degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above-average scholarship, from a university or university-level institution. If their examinations have been graded Excellent, Very Good, Good, and Pass, students must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, and so forth, or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, should not apply for graduate admission. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, and so forth, also do not qualify for graduate admission unless they also hold recognized university-level degrees or titles.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA’s schools, college, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission
Applicants are encouraged to apply electronically using the online application available at http://www.gdnet.ucla.edu. The paper Application for Graduate Admission may be obtained in person or by mail from the prospective school or department.

Applications are accepted Fall Quarter, although some departments also accept applications for Winter and Spring Quarters. Further information is provided in this catalog’s departmental listings and in the application brochure. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.
When to Apply

Most departments and schools have deadlines in November and December for the following Fall Quarter. Consult the Application for Graduate Admission for specific deadlines for each major. Applications may be considered if received after a program’s stated deadline, provided the enrollment limits have not been exceeded.

Supporting papers and materials to be submitted, including official transcripts of record and a $40 nonrefundable application fee, are specified in the application brochure and at http://www.gdnet.ucla.edu. Submitted materials are not returnable.

Graduate Record Examination

Applicants who apply for admission to a department or school that requires Graduate Record Examination (GRE) scores should arrange to take the examination no later than December so scores arrive on time.

GRE scores should be sent directly to the prospective department and not to the Graduate Division.

GRE applications and information about both paper and computer-based testing are available from offices of the Educational Testing Service, P.O. Box 6000, Princeton, NJ 08541-6000. For information on GRE Fee Waivers, write to the associate program director at the address above.

Letters of Recommendation

Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze students’ abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application brochure and at http://www.gdnet.ucla.edu.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement under Graduate Registration later in this section.

International Applicants

International applicants should have an academic degree or professional title earned at a university and are evaluated on the basis of grades (marks) and class or rank achieved. Students should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application brochure.

Proficiency in English

International students who hold a bachelor’s or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction are exempt from both the Test of English as a Foreign Language (TOEFL) and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from TOEFL/TSE Publications, P.O. Box 6151, Princeton, NJ 08541-6151 (609-771-7100) or at http://www.toefl.org.

Students whose native language is not English are required to take the UCLA English as a Second Language Placement Examination (ESLPE) in addition to the TOEFL, before the term in which they are to register. Failure to sit for the ESLPE results in a hold on student records. Those graduate students who believe that their initial ESLPE score is not reflective of their English language proficiency due to having recently arrived in the U.S. may sit for the examination a second time in the subsequent term only (retaking the examination in the same term is not counted as a valid result). In cases where students retake the examination in their second term of study, the most recent examination score is held to be valid. Unauthorized retakes of the examination result in an invalid examination score. Depending on the ESLPE results, students may be required to complete one or more courses in the English as a Second Language 33 series, beginning in their first term in residence at UCLA. These courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. Students should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if they are required to take any English as a second language courses. If they do not achieve a minimum score on the ESLPE, their admission is deferred until they have acquired the necessary proficiency in English. Neither the TOEFL nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

International students or permanent residents who are not native speakers of English, before they are allowed to serve as teaching assistants, must take and pass either the Test of Spoken English (TSE) offered at TOEFL Centers in their home countries or the SPEAK examination (institutional version of the TSE) on arrival at UCLA. They can “pass” with a score of 50 or “pass conditionally” with a score of 45 if they also are enrolled in English as a Second Language 32 or 34 at UCLA. Students should consult with their departments to determine if they require a higher score. If students are to serve as teaching assistants during their first term at UCLA, it is very important that they either take and pass the TSE before arrival, or arrive on campus early enough to take the SPEAK examination before instruction begins. UCLA's Office of Instructional Development (OID) conducts the SPEAK testing. Students should contact either their departments or the TA Training Program at (310) 206-2622 or 825-7867 or at http://www.oid.ucla.edu/TAPT/speak.html for more information and the SPEAK examination schedule.

No Degree Objective

UCLA has no special limited or unclassified categories of graduate admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master’s degree who wish some refresher study, or international students on a year’s stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs, and the academic program must agree to accept the student for the no degree objective (NDO) status. All admission to no degree objective programs, except for students in official Education Abroad Programs, must be specially approved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see Concurrent and Articulated Degree Programs later in this section). Students who are applying for a second academic degree at the same level or lower than the one they already hold are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. Students who wish to apply Summer Sessions courses to their subsequent graduate program should consult in advance with their departmental adviser. This is also true if they have been readmitted to graduate standing and wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 1147 Murphy Hall. Also see Academic Residence and Transfer of Credit later in this section.

If students take Summer Sessions courses following the award of their bachelor's degree, the grades do not appear on the undergraduate tran-
Special Programs and Training

UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences

The life and basic biomedical sciences departments at UCLA offer a mechanism for a combined recruitment, admission, and first-year program that provides Ph.D. students in the molecular, cellular, and integrative life sciences with maximal choice and flexibility in selecting a research specialization. Through UCLA ACCESS, students are able to select research projects from faculty mentors according to changing perceptions, interests, and goals without regard to traditional departmental boundaries. The first year of each degree program has a common curriculum and advising structure.

The following Ph.D. programs use UCLA ACCESS to recruit and admit students: Biochemistry and Molecular Biology, Microbiology and Molecular Genetics, Molecular Biology, Molecular Cell, and Developmental Biology, and Physiological Science in the College of Letters and Science; Anatomy and Cell Biology, Biological Chemistry, Experimental Pathology, Human Genetics Microbiology and Immunology, Pharmacology, and Physiology in the School of Medicine. For specific information, refer to the individual department listings in the Curricula and Courses section of this catalog.

Admission

Applicants apply to UCLA ACCESS rather than to an individual department and must have completed an undergraduate major in a life or physical sciences discipline with superior scholastic achievement. Students should have preparation in physics, biology, and chemistry, as well as specialized courses within the major which may include cell biology, neurobiology, immunology, structural or computational biology, microbiology, virology, plant molecular biology, developmental biology, biochemistry, or molecular biology. In certain cases, background deficiencies may be remedied concurrently with graduate studies if recommended by the UCLA ACCESS steering committee. In addition to the UCLA Application for Graduate Admission, students should submit their scores on the Graduate Record Examination (GRE) General Test (Subject Test is optional) and three letters of recommendation from individuals who can provide direct knowledge of their academic record and potential for superior achievement in independent research. Admission is limited to Fall Quarter.

Applications and further information are available from the Program Coordinator, UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051, or at http://www.uclaaccess.ucla.edu/NewLook-Frame.html.

First-Year Course Requirements

Individual requirements vary based on background and scientific interest and are determined by the steering committee. In general a formal course of study consists of three lecture courses, three laboratory rotations, and three seminar courses. In addition, participation is required in related activities on an informal basis.

Three survey lecture courses to be selected from a list of approved courses maintained in the program office are required (one in molecular biology, one in cellular biology, and an elective in one of several areas). Students must enroll in one seminar course each term that includes reading and reporting on current research literature.

During their first nine months in residence, students rotate for one term each through three laboratories selected from the UCLA ACCESS faculty list. They enroll in a 500-level course for six units of credit for each rotation.

An additional course in ethics (Microbiology and Molecular Genetics CM234) is required.

All departments participating in UCLA ACCESS consider teaching experience to be an integral part of the graduate program. Students are required to complete two terms of teaching in their second year. They are also required to complete a course on approaches and methods for successful teaching.

Transfer to the Degree-Granting Program

Students are admitted to UCLA graduate standing through UCLA ACCESS on a provisional basis for up to four terms. At the end of Spring Quarter, academic progress is evaluated by the steering committee. Students who receive a satisfactory evaluation select a faculty mentor as their doctoral committee chair. With concurrence of the mentor and the degree-granting program, students then transfer from UCLA ACCESS to that program for the remainder of their Ph.D. studies.

In the event students are unable to identify a suitable mentor and program by the end of their first year, one additional laboratory rotation approved by the steering committee is available during the summer quarter. Students who are unable to arrange for a laboratory after four rotations are recommended for release from their provisional graduate standing.

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses that would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

Students who have completed at least one term of graduate study at UCLA, are in good academic standing, and have obtained the necessary approvals may enroll in a 501 course through their department. When they have completed the course at USC, their grade is forwarded to UCLA to
be recorded on the transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the minimum five-graduate-course requirement. Applications, available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, should be completed before the start of the term in which the course is offered.

**UC Intercampus Exchange Program**

Students who have completed one term of graduate study at any campus of the University and are in good academic standing may attend another campus as an Intercampus Exchange Graduate Student with the approval of their department chair, the chair of the department or group in which they wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although students are considered to be in residence at their home campus, as an Intercampus Exchange Student they have library, health service, and recreation center privileges at the host campus. Grades are transferred to their home campus and entered on the official record.

Applications are available from Graduate Admissions/Student and Academic Affairs and should be filed at least four weeks before the beginning of the term in which students expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the Education Abroad Program described in the About UCLA section of this catalog.

**Postdoctoral and Visiting Scholars**

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance.

A postdoctoral scholar is one who (1) has been awarded a doctoral degree or the foreign equivalent where at least three years of undergraduate study are requisite to admission to the graduate program, (2) has been awarded a fellowship, traineeship, or equivalent support (including academic appointments such as postgraduate researcher) for studies at the postdoctoral level, and (3) is pursuing a program of research and training under the direction of a faculty member with the approval of the department or research unit, and by the dean of the Graduate Division. Enrollment as a postdoctoral scholar is normally for a period of one to three years and is limited to a period not to exceed five years, including time spent in postdoctoral training at other institutions. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to visiting scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA, working with a colleague for a limited time, normally no more than one year. Visiting scholars are distinguished from postdoctoral scholars in that they are not in training under faculty supervision but rather are themselves peers of our faculty, visiting from other universities and institutions where they hold appointments. Visiting scholars ordinarily have adequate support funds from sources outside the University.

Further information on postdoctoral and visiting scholars is available from Graduate Student Support, 1228 Murphy Hall.

**Graduate Registration**

Enrollment and Degree Services
1113 Murphy Hall
(310) 825-1091
http://www.registrar.ucla.edu

Registration consists of paying fees and enrolling in classes. The UCLA Student Billing Statement (BAR), mailed monthly to students' UCLA mailing addresses by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed online or by telephone through URSA (University Records System Access). Students must complete both processes by the established deadlines to be officially registered and enrolled for the term.

**Paying Fees**

Details on fee payment, enrollment procedures, and deadlines are in the quarterly Schedule of Classes, available for purchase at the UCLA Store several weeks before the beginning of each term. To obtain a copy, write to UCLA Store, Attn: Mail Out, 308 Westwood Plaza, Los Angeles, CA 90024-1645, or call (310) 825-6064. The Schedule of Classes is available at http://www.registrar.ucla.edu/schedule/.

Eligible students must pay fees by the applicable deadlines. Payments may be mailed, paid by credit card through URSA OnLine, or deposited in the UCLA Administrative Main Cashier’s Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and are assessed an additional $50 late payment fee.

**Mandatory Medical Insurance Requirement**

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment.

The following plans are NOT acceptable and do NOT fulfill the University requirement for adequate medical/health insurance: (1) travel insurance plans of any kind, (2) any plans purchased outside the U.S. and/or not issued by a U.S. company, (3) reimbursement arrangements or vouchers, including those from home governments and consulates in the U.S.

UCLA provides a student Medical Insurance Plan (MIP) that fulfills the University requirement for adequate medical insurance. The MIP fee is included each term in the amount due on the BAR statement for all graduate and international students. This is the only way that MIP can be purchased.

Students who do not purchase MIP must have an adequate private medical insurance plan with all of the following minimum benefits:

(1) A minimum of $100,000 in lifetime benefits.
(2) Coverage of at least 75 percent of medical expenses, with a deductible of $500 or less and a copayment of 20 percent or less.
(3) A policy issued in the U.S. by a U.S. carrier.
(4) Inclusion of Medical Evacuation and Repatriation benefits for those on J-1 or J-2 visas.

If the private medical insurance plan does not meet all of the above requirements, students must purchase MIP.

Students who decide to waive out of MIP because they have adequate private medical insurance must complete the Medical Insurance Waiver Request included each term with the BAR statement and submit the form when they pay their registration fees. Students whose fees are paid by financial aid, graduate fellowship funds, or other sources must submit their MIP waiver by the published registration deadline each term. Students may waive out of MIP at http://www.saonet.uclal.edu/health/insuranc/mip-forms/auth.html; the online waiver deadline is two days prior to the official fee payment deadline published in the quarterly Schedule of Classes calendar.

This information serves as notice of the mandatory medical insurance requirement; it is each student’s responsibility to obtain the necessary information before they register. Changes and exceptions requested after students have registered cannot be honored. MIP cancellation requests must be made to the Ashe Student Health and Wellness Center Insurance Office within 10 days from the MIP effective date.

For further information on MIP or adequate medical insurance requirements, call the Ashe Center Insurance Office at (310) 825-4073, option 4.
Enrolling in Classes
The quarterly Schedule of Classes contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the Schedule and with the aid of academic counseling from the school or college advisers, students can assemble a program of courses.

University Records System Access Enrollment
Through University Records System Access (URSA), UCLA students enroll in classes and obtain academic, financial, and personal information from their University records. URSA can be accessed either through URSA OnLine at http://www.ursa.ucla.edu/ or through URSA Telephone at (310) 208-0425. URSA operates Sunday from 6 p.m. through 1 a.m. Tuesday and Tuesday through Saturday from 6 a.m. to 1 a.m., including holidays.

The easiest way for most students to enroll is through URSA OnLine, which also provides enrollment appointment times. The site’s intuitive interface makes it easy to view course descriptions and times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a printout of the Study List. Students can also check their BAR account, make online credit card payments, and obtain refund information.

By using URSA Telephone, students can obtain enrollment appointment times, enroll in classes, add, drop, or exchange classes, sign onto class waitlists, and confirm class enrollment through a reading of their Study List, which includes the day, time, and location of classes, examination codes, and instructor names. Students may also verify that their registration fees have been paid and that they have no outstanding holds. Factors that could affect their ability to enroll. In addition, they may check financial aid information.

In-Person Enrollment
For classes that require written approval or specialized processing, students may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists
At 11:59 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes “official,” and all wait lists are eliminated. Students should obtain a reading of their Study List through URSA after all enrollment transactions. Students are responsible for all courses and the grading basis as listed on URSA, and they cannot receive credit for courses not listed. Errors or omissions should be corrected before the academic dean’s deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List results in a failing grade.

Beginning with the third week of instruction, changes to the Official Study List can be made with a fee via URSA through the end of the last day of instruction. Consult the Schedule of Classes for full enrollment details.

Change of Major
Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filled with Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but students should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program
Three courses (or 12 units) per term are considered the normal enrollment for graduate students and are required for students not in doctoral candidacy to be counted for full-time standing in the University’s official enrollment records. Therefore, students are directed by their departments to enroll full time whenever possible.

Throughout their appointments, teaching assistants are required to be registered and enrolled in at least eight quarter units and graduate student researchers in at least 12 quarter units. Those assistants/researchers who take a leave of absence, or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level for graduate student researchers may be counted in reaching the eight- or 12-unit load.

Graduate students holding fellowships must be enrolled in at least eight units, both before and after advancement to candidacy. The eight-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Department of Veterans Affairs regulations is available from the Veterans Affairs coordinator, 1113 Murphy Hall.

Continuous Registration
Graduate students are normally required to register in all three terms of each academic year, including the term in which their degrees or certificates are to be awarded. Students who are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see below) are exempt from this requirement. They must be registered in order to receive financial aid, use University facilities, or take any University examination except the master’s comprehensive or doctoral final oral examination (defense of the dissertation).

Students who fail to register or to file for an official leave of absence by the end of the second week of instruction are assumed to have withdrawn from UCLA. They then have to reapply and compete for readmission with all other graduate applicants if they wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a term may pay half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from the departments.

Employment and Degree Progress
Policy governing the employment of graduate students considers them primarily as students rather than employees and emphasizes their need to make timely progress toward their degree. Students are limited to a maximum of 12 quarters of appointment in academic apprentice teaching titles and a maximum of 18 quarters in a combination of academic apprentice teaching and research titles. Appointment to any title limits employment to 50 percent time during the academic year.

University policy prohibits the employment of graduate students in academic titles. This policy was established to ensure that students (1) make timely progress toward their degree, (2) not be subject to the conflicting roles of student and faculty member, and (3) not be involved in the instruction of their peers.

Registration in the Final Term for Award of the Degree
(1) Students must register in the final term in which the degree is to be conferred if they are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, (d) a doctoral student and were not registered the term immediately preceding the term in which their dissertation is filed, or (e) receiving University funds in the form of a fellowship or appointment as a teaching assistant, reader, or graduate student researcher. Students who were not continuously registered or on leave of absence and are required to register to receive their degree must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in the final term, students may be eligible to pay the filing fee instead of registering (see below).

(3) Students who were registered in the preceding term and have completed all degree requirements, including final examinations and filing the thesis/dissertation, during the interval between terms and before the first
day of instruction are not required to register (or pay the filing fee) to receive their degree at the end of the following term.

**Filing Fee**

Students who have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master’s comprehensive or doctoral final oral examination may be eligible to pay a filing fee of half the registration fee instead of registering and paying all required fees. Applications are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final term, consult Standards and Procedures for Graduate Study at UCLA, available in 1255 Murphy Hall or in individual departments.

**Health Assessment and Evaluation**

New students enrolling in the School of Dentistry, Education and Information Studies, Medicine, Nursing, or Public Policy and Social Research must complete and return to the Ashe Student Health and Wellness Center the Health Evaluation forms provided by their departments. For clearance information, call (310) 794-7896.

**Graduate Fees and Financial Support**

**Fees**

Although the exact cost of attending UCLA varies according to academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar’s Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay annual tuition in addition to registration fees, as published in the quarterly Schedule of Classes and online at http://www.registrar.ucla.edu/fees/. For a full definition of residence and nonresidence, see the Appendix.

Fees are current as of publication but are subject to change without notice by The Regents. See http://www.registrar.ucla.edu/fees/ for updates.

</tbody>
</table>

Students in the Schools of Dentistry, Law, Management M.B.A. program, Medicine, Nursing, and Theater, Film, and Television should refer to the quarterly Schedule of Classes for explanation of additional fees.

**Other Fees**

Miscellaneous fees charged to UCLA graduate students include a $50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); $50 for advancement to doctoral candidacy; a $20 late fee if the BAR statement has an unpaid balance in excess of $25; and $5 or less for most petitions and other special requests. A $60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. A complete list of fees may be found in the Schedule of Classes.

**Reduced Nonresident Tuition**

The annual nonresident tuition fee for graduate doctoral students who have advanced to candidacy is reduced by 75 percent. Doctoral students may receive this reduced nonresident tuition rate for a maximum of three years. After three years, the full nonresident rate is assessed.

**Fee Refunds**

Students who formally withdraw from the University or take an approved leave of absence may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in the Academics section of this catalog or consult the Schedule of Classes for policy details and specific refund dates for each term.

**Estimated Annual Budgets for Graduate California Residents**

Expenses cover the three regular session terms of the 1999-00 academic year and do not include Summer Sessions. Students admitted in fall 1999 to the D.D.S., J.D., M.B.A., M.S.N., M.F.A. in Theater, M.F.A. in Film and Television, and M.D. degree programs must add the professional school fee (varies by school), and nonresidents must add $9,384 annual tuition to their total expenses for an accurate estimate. Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from the health professions counselor. The budgets are designed to serve as a guide and are subject to change.

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive, (310) 825-4491.

**Financial Support**

Graduate Student Support
1228 Murphy Hall
(310) 825-1025
http://www.gdnet.ucla.edu/asis/infoserv/gdservcs.htm

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

Information on available funding for entering students is included in the Application for Graduate Admission. Readmitted students should also re-
quest the Application for Graduate Admission, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by January 8. (Some departments have earlier deadlines; consult the application brochure for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by the Graduate Division. Students should contact their department for more detailed information.

Fellowships
The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

Assistantships
Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. Teaching assistantships provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) Graduate student researcher appointments give students experience working on faculty-supervised research projects.

Awards Based on Financial Need
Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and financial resources. Financial aid applicants must file the Free Application for Federal Student Aid (FAFSA).

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid “package” which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.

Requirements for Graduate Degrees
Graduate students earn a master’s or doctoral degree by distinguished achievement in advanced study and research. In addition to coursework, there are various means of evaluating achievement in study, including qualifying and comprehensive examinations and various kinds of laboratory and fieldwork. Achievement in research is primarily assessed through evaluation of the master’s thesis or doctoral dissertation. Professional master’s and doctoral degree programs require professional training. Demonstration of achievement in these fields may take various forms, including fieldwork, completion of projects, and training that involves professional licensure.

University Minimum Standards
The requirements described here for master’s and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master’s degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. Students are advised to consult Program Requirements for UCLA Graduate Degrees at http://www.gdnet.ucla.edu and the departmental graduate adviser for details. Policies and regulations are outlined in Standards and Procedures for Graduate Study, which is available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall or at http://www.gdnet.ucla.edu.

Transfer of Credit
There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor’s degree may be applied toward a graduate degree unless students are UCLA Departmental Scholars (see Academic Excellence in the Undergraduate Study section of this catalog). Also, courses taken for any other degree may not be applied toward a master’s degree at UCLA unless students are enrolled in a Graduate Council-approved concurrent degree program (see Concurrent and Articulated Degree Programs later in this section).

Transfer of Credit from Within the University
Students may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master’s degree requirements at UCLA. Such courses may fulfill up to one half of the total course and graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

Transfer of Credit from Outside the University
With approval of the dean of the Graduate Division and the major department, courses completed with grades of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master’s programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units × 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 —or for example, 12 quarter units × .666 = 7.99 or 8 semester units.)

Transfer of Credit from Summer Sessions
Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. Students should consult their departmental graduate adviser about applying Summer Sessions courses to their graduate program.

Transfer of Credit from UCLA Extension
Extension courses can be applied only if they are concurrent courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with grades of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master’s degree. The master’s program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If the master’s program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing the grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.
Academic Residence

Master’s Degree
The minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

Doctoral Degree
The minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If students earned a master’s degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (four units) during a term.

Students may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

Foreign Language Requirements
Foreign language requirements are determined by individual departments and programs. If their program has a language requirement, students should fulfill it either before or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that they can acquire broad knowledge in their field of study and keep abreast of foreign developments in the field. Students are urged to complete language requirements as early as possible in their graduate career. If the department requires two or more foreign languages, students must complete at least one before the University Oral Qualifying Examination (unless the department requires that both be completed before the examination).

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not the native language.

For further details on foreign language requirements, consult the departmental graduate adviser.

Program of Study and Scholarship

Master’s Degree
At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of these must be graduate-level courses.

UCLA offers master’s degrees under two plans: Plan I, the Master’s Thesis, and Plan II, the Master’s Comprehensive Examination. Some departments offer both plans, and students must consult with their department to determine the plan for meeting their degree requirements. University minimum requirements are the same under either plan.

Master’s Thesis (Plan I)
After advancement to candidacy, students under Plan I must submit a thesis reporting on results of their original investigation of a problem.

While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members’ eligibility requirements). The thesis committee, which must be appointed before students may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty members have approved the subject for the thesis, work may begin. Students are responsible for preparing the thesis in the proper form and for observing filing deadlines.

Master’s Comprehensive Examination (Plan II)
Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its format is available in the departments.

Doctoral Degree
Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before students take the University Oral Qualifying Examination. Students determine their course of study in consultation with a graduate adviser until the doctoral committee is appointed.

Doctoral Examinations before Advancement to Candidacy
Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. They are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after students complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with the student and then nominates a doctoral committee.

University Oral Qualifying Examination
The doctoral committee, consisting of at least four faculty members nominated by the department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

Master’s Degree
When students have completed approximately half the program for the master’s degree (usually at least two terms), they should formally apply for advancement to candidacy. Application forms are available from the departments and must be filed there no later than the second week of the term in which students expect to receive their degree (by the end of the second week of the first Summer Session for a September degree).

Students may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. They then have one year from the date of advancement to complete all requirements for the degree, including their thesis or comprehensive examination. Candidacy expires at the end of one year.
and reinstatement during the term in which they plan to receive the degree is by petition only.

Doctoral Degree

Students are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four terms of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. They are officially advanced to candidacy on the date the completed application for candidacy form is received in Graduate Admissions/Student and Academic Affairs, provided the information on the form is correct and complete and the examination was conducted in accordance with Graduate Council regulations. Students are billed the advancement to candidacy fee on their BAR statement.

Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see above). Four terms in academic residence at UCLA are required. (Also refer to Academic Residence earlier in this section.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the end of this section. For further details, consult the Graduate Division.

Doctoral Dissertation

Once the doctoral committee approves the subject for the dissertation, the in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates ability for independent investigation. The doctoral committee guides the progress toward its completion. Students are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines.

Final Preparation and Filing of Thesis or Dissertation

For guidance in the final preparation of the thesis or in the preparation and submission of the dissertation and accompanying abstract, students may

(1) Consult the theses and dissertations adviser, Office of the University Archivist, 390 Powell Library.

(2) Read Regulations for Thesis and Dissertation Preparation, available in Graduate Admissions/Student and Academic Affairs or in the Archivist’s Office.

(3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each term (see the Calendar at the beginning of this catalog).

Master’s Thesis

When all members of the committee have approved the thesis and students are ready to file it, they must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to Graduate Admissions/Student and Academic Affairs where completion of degree requirements is verified. After final approval by the dean of the Graduate Division, students must file the thesis with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Doctoral Dissertation

When all members of the committee have approved the dissertation and students are ready to file it, they must submit the original signature (approval) page and title page to Graduate Admissions/Student and Academic Affairs where completion of degree requirements is verified. After final approval by the dean of the Graduate Division, students must file two paper copies of the dissertation with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded). Consult the Schedule of Classes Calendar for exact dates.

Doctoral Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which all committee members must be present, may be held before students have prepared the final copy of their dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult the doctoral committee chair or graduate adviser for further information.

Interdepartmental Degree Programs

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 28 interdepartmental programs offer bachelor’s, master’s, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs that currently lead to advanced degrees are listed below. All are described more fully in the Curricula and Courses section of this catalog. For further information, students should contact the chair or graduate adviser of the specific program that interests them.

African Area Studies (M.A.)
Afro-American Studies (M.A.)
American Indian Studies (M.A.)
Applied Linguistics (Ph.D.)
Archaeology (M.A., Ph.D.)
Asian American Studies (M.A.)
Biomedical Engineering (M.S., Ph.D.)
Biomedical Physics (M.S., Ph.D.)
Environmental Science and Engineering (D.Env.)
Folklore and Mythology (M.A., Ph.D.)
Indo-European Studies (Ph.D.)
Integrated Manufacturing Engineering (M. Engr.)
Islamic Studies (M.A., Ph.D.)
Latin American Studies (M.A.)
Molecular Biology (Ph.D.)
Neuroscience (Ph.D.)
Romance Linguistics and Literature (M.A., Ph.D.)

Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master’s or doctoral. UCLA also offers concurrent and articulated degree programs, which allow students to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. Students may petition to design their own articulated program (with departmental and Graduate Division approval), but they may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study;
they prepare students more fully for the world's complexities by combining the cultural (political/social/economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

Concurrent Degree Programs
By allowing a specified amount of credit to apply to both degrees, concurrent degree programs permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

- American Indian Studies, Interdepartmental M.A. — Law, J.D.
- Architecture and Urban Design, M.Arch. — Urban Planning, M.A.
- Asian American Studies, Interdepartmental M.A. — Public Health, M.P.H.
- Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
- History, M.A. — Information Studies, M.L.I.S.
- Islamic Studies, Interdepartmental M.A. — Public Health, M.P.H.
- Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
- Management, M.B.A. — Computer Science, M.S.
- Management, M.B.A. — Information Studies, M.L.I.S.
- Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
- Management, M.B.A. — Law, J.D.
- Management, M.B.A. — Medicine, M.D.
- Management, M.B.A. — Nursing, M.S.N.
- Management, M.B.A. — Public Health, M.P.H.
- Management, M.B.A. — Urban Planning, M.A.
- Social Welfare, M.S.W. — Law, J.D.
- Urban Planning, M.A. — Law, J.D.

Articulated Degree Programs
Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

- African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
- African Area Studies, Interdepartmental M.A. — Film and Television, M.F.A.
- Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
- Latin American Studies, Interdepartmental M.A. — Information Studies, M.L.I.S.
- Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
- Medicine, M.D. — Graduate Division health science major, Ph.D.
- Oral Biology, M.S. or Ph.D. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Students should contact Graduate Admissions/Student and Academic Affairs for information on designing articulated programs.

General Policies and Regulations

Standards of Scholarship
To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work that would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation
Students are on probation and are subject to dismissal if their cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive terms falls below a B average. The dean of the Graduate Division, in consultation with the department, determines student eligibility to continue graduate study in probationary status. Students who are allowed to continue must make timely progress toward improving their grade-point average.

Disqualification and Appeal
If students are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, they have their records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, they may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals are considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Disagreements over evaluation of academic quality are not considered appropriate causes for appeal. Refer to Standards and Procedures for Graduate Study at UCLA for specific details on how to submit an appeal or contact Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council’s Committee on Degree Programs. Students are required to submit a written statement on the basis for the appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints
Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

Students who have complaints of a scholastic or professional nature involving faculty should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, students should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, they may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against individual students should be made at the Office of the Dean of Students, 1206 Murphy Hall. Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (105 Kerckhoff Hall) or Student and Campus Life (1104 Murphy Hall).

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints from teaching assistants about workloads and evaluations are governed by the provisions of the Teaching Assistant Grievance Procedures, which are spelled out in detail in the Academic Apprentice Personnel Manual. Copies are available from departments and from Graduate Student Support, 1228 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be handled as described in the Non-discrimination, Harassment, and Faculty Code of Conduct sections in the Appendix.

Academic Policies

Units and Grading Policy
Students at UCLA are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the Manual of the Academic Senate, the manual prevails in all cases. Copies of the Senate manual are available for review in the Academic Senate Office, 3125 Murphy Hall.

Grades
Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at UCLA:

Undergraduate Students

<table>
<thead>
<tr>
<th>Grade</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Extraordinary</td>
</tr>
<tr>
<td>A</td>
<td>Superior</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
</tr>
<tr>
<td>C</td>
<td>Fair</td>
</tr>
<tr>
<td>D</td>
<td>Poor</td>
</tr>
<tr>
<td>F</td>
<td>Fail</td>
</tr>
<tr>
<td>P</td>
<td>Passed (achievement at grade C level or better)</td>
</tr>
<tr>
<td>NP</td>
<td>Not Passed</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
</tr>
<tr>
<td>DR</td>
<td>Deferred Report</td>
</tr>
</tbody>
</table>

The grades A, B, and C may be modified by a plus (+) or minus (−) suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for students to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees unless otherwise prohibited by the requirements of the degree program. The Schools of Dentistry, Medicine, and Law maintain their own grading codes. Students who are interested in programs in any of these schools should consult the appropriate school announcement.

Graduate Students

<table>

<td>Satisfactorily demonstrated potentiality for professional achievement in field of study</td>
</tr>
<tr>
<td>C</td>
<td>Passed the course but did not do work indicative of potentiality for professional achievement in field of study</td>
</tr>
<tr>
<td>F</td>
<td>Fail</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory (achievement at grade B level or better)</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress</td>
</tr>
<tr>
<td>DR</td>
<td>Deferred Report</td>
</tr>
</tbody>
</table>

Grade Points
In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (for example, one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A−</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B−</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>C−</td>
<td>1.7</td>
</tr>
<tr>
<td>D+</td>
<td>1.3</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>D−</td>
<td>0.7</td>
</tr>
<tr>
<td>F, NP, U</td>
<td>0.0</td>
</tr>
</tbody>
</table>

Courses in which students receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, IP, and NR, are disregarded in determining the grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent GPAs.) NR indicates that no grade was received from the instructor.
Computing Grade-Point Average

The grade-point average is determined by dividing the number of grade points earned by the number of units attempted. The number of grade points earned for a course equals the number of grade points assigned times the number of course units. For example, suppose a student takes three four-unit courses and receives grades of A–, B–, and C+.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
<th>Course Units</th>
<th>Total Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A–</td>
<td>3.7</td>
<td>4</td>
<td>14.8</td>
</tr>
<tr>
<td>B–</td>
<td>2.7</td>
<td>4</td>
<td>10.8</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
<td>4</td>
<td>9.2</td>
</tr>
<tr>
<td>Total</td>
<td>12</td>
<td></td>
<td>34.8</td>
</tr>
</tbody>
</table>

To determine the GPA for the term, divide the total grade points earned (34.8) by the total course units attempted (12). The GPA is 2.9.

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Grades earned at another institution or in UCLA Extension courses other than those prefixed by XLC do not affect the GPA.

Other schools and agencies may calculate GPAs differently from the University when evaluating records for admission to graduate and professional school programs. Students should contact them about their policies in this regard.

Passed/Not Passed Grades

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed (P/NP) basis.

By alleviating grading pressures, this option allows students to explore areas in which they have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect the GPA. Students receive neither units nor course credit for an NP grade.

Students may enroll in one course each term on a P/NP basis (two courses if they have not elected the P/NP option in the preceding term). They may not elect this option for Summer Sessions courses without an approved petition. Their department or school may require that they take some or all courses in their major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult the college or school for details.

Students may make program changes to or from P/NP grading through the sixth week of instruction (see the Schedule of Classes Calendar for exact dates); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any UCLA Store).

Certain undergraduate courses are offered only on a Passed/Not Passed (P/NP) basis and are designated PN in the Schedule of Classes.

Satisfactory/Unsatisfactory Grades

Graduate students in good standing (minimum 3.0 GPA) may enroll for Satisfactory/Unsatisfactory (S/U) grading in one graduate or upper-division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner are not counted in computing the GPA. Students receive neither units nor degree credit for a U grade. They may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the Schedule of Classes Calendar); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any UCLA Store).

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the Schedule of Classes.

Incomplete Grades

Once an Incomplete (I) grade is assigned, it remains on the transcript along with the passing grade students may later receive for the course. The instructor may assign the I grade when work is of passing quality but is incomplete for a good cause (such as illness or other serious problem). It is the student’s responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, students may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Students should not reenroll in the course; if they do, it is recorded twice on the transcript. If the work is not completed by the end of the next full term in residence, the I grade lapses to an F, NP, or U as appropriate. The college or school may extend the deadline in unusual cases (not applicable to graduate students).

Consult the Schedule of Classes for procedure instructions.

In Progress Grades

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the Schedule of Classes), evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of In Progress (IP) are assigned in the intervening term(s) and are replaced with the final grade when students complete the full sequence. The school or college faculty or the Graduate Council determines credit if they do not complete the full sequence and petition for partial credit.

Deferred Report Grades

Students may receive a Deferred Report (DR) grade when the instructor believes their work is to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If students are given a disciplinary DR grade, the Office of the Dean of Students assists them in resolving the problem. For graduate students, the dean of the Graduate Division sets a deadline by which the DR lapses to an F if the problem is not resolved and a grade assigned. The DR is changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that the situation is resolved. The DR grade is not included in determining the grade-point average.

Repetition of Courses

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

1. To improve the grade-point average, students may repeat only those courses in which they receive a grade of C– or lower; NP or U grades may be repeated to gain unit credit. Courses in which a letter grade is received may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.

2. Repetition of a course more than once requires the approval of the college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

3. Degree credit for a course is given only once, but the grade assigned each time the course is taken is permanently recorded on the transcript.

4. For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points are computed in the
Graduate classification is based on the degree objective and whether or not, approved by their college or school. See the degree requirements under the maximum, they may not be allowed to continue, except in rare cases. In the School of Nursing and School of Theater, Film, Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and 208 units is allowed in the School of Engineering and Applied Science). The minimum units allowed are between 180 and 200 (depending on the program). In all campus units except the School of Engineering and Applied Science, students are required to earn a minimum of 180 units from all college-level coursework for the bachelor’s degree at UCLA. A maximum of 208 units is allowed in the School of Nursing and School of Theater, Film, and Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed. If students exceed the maximum, they may not be allowed to continue, except in rare cases approved by their college or school. See the degree requirements under each college and school for further details. Graduate classification is based on the degree objective and whether or not students are advanced to candidacy for a doctorate.

Credit by Examination
Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner. The results of these courses are entered on the record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master’s degrees but cannot apply to academic residence requirements for master’s or doctoral degrees.

Students need approval from the appropriate instructors, the department, and the college or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

Correction of Grades
All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. Students who are dissatisfied with a grade should review their work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on the transcript. See the Appendix for further details and procedures for appealing grades.

Class Standing
Undergraduate classification is determined by the number of units completed.

<table>
<thead>
<tr>
<th>Classification</th>
<th>Completed Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Freshman</td>
<td>0.0 – 44.9</td>
</tr>
<tr>
<td>Sophomore</td>
<td>45.0 – 89.9</td>

</table>

In all campus units except the School of Engineering and Applied Science, students are required to earn a minimum of 180 units from all college-level coursework for the bachelor’s degree at UCLA. A maximum of 208 units is allowed in the School of Nursing and School of Theater, Film, and Television; in the School of the Arts and Architecture and College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed. If students exceed the maximum, they may not be allowed to continue, except in rare cases approved by their college or school. See the degree requirements under each college and school for further details. Graduate classification is based on the degree objective and whether or not students are advanced to candidacy for a doctorate.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit
Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. Concurrent enrollment is not permitted except in extraordinary circumstances, and no credit is given for courses taken concurrently elsewhere without the approval of the college or school. This does not apply to UCLA Summer Sessions.

Undergraduate Students
During the summer or during a term when students are not registered at UCLA, they may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The UCLA Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is the students’ responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. They should avoid courses that are closely related to those they have already taken, as they cannot receive credit twice for the same or similar courses. Students who wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA should consult their college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus other than UC Santa Cruz (unless the letter-grade option is elected at UCSC) and grades earned by Arts and Architecture and Letters and Science undergraduate students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Students may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When they have completed the work, they must have the other college send a copy of their transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); they must also fill out a Transfer Credit Evaluation Request form at UARS, 1147 Murphy Hall.

Students who wish to receive degree credit for work taken through UCLA Extension should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. Grades earned by Arts and Architecture and Letters and Science undergraduate students in courses prefixed by XLC are computed in the UCLA grade-point average. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

The maximum number of community college units allowed toward the bachelor’s degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools does not grant transfer credit for community college courses beyond 105 quarter units, but students may still receive subject credit for this coursework to satisfy lower division requirements. Consult the college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5 — for example, 12 semester units × 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — for example, 12 quarter units × .666 = 7.99 or 8 semester units.)

Graduate Students
With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master’s degree. For more details, see Transfer of Credit under Requirements for Graduate Degrees in the Graduate Study section of this catalog.

Transcripts and Student Records
The Registrar prepares, maintains, and permanently retains a record of each student’s academic work. Student files of pertinent documents are maintained up to five years following the last date of attendance. Students...
may view their documents in Academic Record Services, 1134 Murphy Hall, by calling (310) 825-3801 to make an appointment. Advance notice of 24 hours is required for viewing.

The permanent record is the transcript, which reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically the courses, units, grades, cumulative GPA, transfer credits, and total units.

The University Records System Access (URSA) allows all UCLA students to obtain course confirmation, UCLA grades for any completed term, GPA, completed units, and outstanding holds. Students may also confirm registration fee payment, update and review selected student information, and change their security code. Students may access the system for up to 10 years after their graduation or last term of attendance. For additional information, consult the Schedule of Classes.

As needed, students may obtain a free printout of their grades for the most recent graded term from the Registrar’s Office, 1113 or 1134 Murphy Hall, by presenting their valid current-term BruinCard.

To have official transcripts sent to other schools, institutions, or agencies, complete a Transcript Request form (available in the Murphy Hall North Lobby) or write to the Registrar’s Office, Attn: Transcripts, UCLA, Box 951429, Los Angeles, CA 90095-1429. Requests must include the student name while in attendance at UCLA, Social Security number and/or student I.D. number, dates of attendance, and student signature for release.

To reduce the risk of fraud and tampering, UCLA transcripts are printed on customized security paper. Transcripts are issued in blue envelopes marked “Official Transcripts Enclosed.” Requests for additional notations or enclosures are considered special handling and may incur additional fees.

Each transcript costs $5; additional fees apply for transcripts requiring special handling and/or mailing services. Call (310) 825-3801 for prices and to make arrangements for special services. Although fax services are available, transcripts that are faxed are not considered official and may not remain confidential. Continuing students and former students with UCLA Student Billing (BAR) accounts may charge transcript orders to their accounts. Other requests must be accompanied by a check made payable to Regents-UC. Transcript fees are subject to change at any time. Requests are not processed if students have outstanding financial, academic, or administrative obligations (holds) to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Transcripts for UCLA Extension courses must be ordered from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90024.

Verification of Student Status
The Registrar issues a verification transcript to verify fee payment and enrollment status as students are eligible. Verification cannot be issued if registration fees for the term have not been paid. Verification transcripts cost $5 each and are issued at 1134 Murphy Hall.

Verifications for loan forms and student aid guarantors are processed through the National Student Loan Clearinghouse, a nonprofit industry-sponsored organization representing schools, guarantors, lenders, servicers, and secondary markets for the sole purpose of standardizing, simplifying, and automating enrollment verifications and deferment processing. UCLA provides student enrollment verification data, including student names, mailing addresses, Social Security numbers, and enrollment status, to the clearinghouse on a regular basis. Release of this information to the clearinghouse has been approved by the U.S. Department of Education and ruled in compliance with the Federal Family Educational Rights and Privacy Act (FERPA). The $5 verification transcript fee is waived for student loan requests when proof of need is presented.

Submit all verification request forms (including “good student” auto insurance discounts and health insurance verifications) to Academic Record Services, 1134 Murphy Hall. Forms for clearinghouse participants are forwarded to the clearinghouse by Academic Record Services.

Certificate of Resident Study for International Students
International students who must leave the University and the country before completing a degree or certificate program may request a Certificate of Resident Study in addition to a formal transcript. The certificate cannot be awarded if the studies involved are covered by a diploma or other certificate. The chair of the major department recommends the award of the certificate through a petition to the college, school, or Graduate Division. To be eligible to receive the certificate, students must have completed a program of at least nine courses with a minimum GPA of 2.0 (2.5 for Graduate Division students) and have satisfactorily completed a research project over a period of nine months or more.

UCLA BruinCard
The UCLA BruinCard is a mandatory student identification card that is used to electronically confirm student status and eligibility for services. Supportive photo identification, such as a driver’s license or passport, is required when the card is issued.

The primary benefit of the BruinCard is convenience. It is a versatile card that serves the following functions: confirmation of student status; I.D. card for faculty, staff, and students; residence halls access card; library card; recreation card; debit card (if activated) for purchases at all campus stores and restaurants; AT&T Calling Card (if this feature is elected); and time-management card for departments using the Kronos system.

Students with a hold from an office with which they have an outstanding obligation (financial, academic, or administrative) may not receive services until the hold is released by the initiating office. For details on outstanding holds and initiating offices, check with URSA Telephone (310) 208-0425 or URSA OnLine.

BruinCard centers at 123 Kerckhoff Hall, 107 UCLA Wilshire Center, and 150A Sproul Hall are open weekdays from 9 a.m. to 4 p.m. (310-825-2336). To report lost or stolen cards, call (310) 208-3199.

Change of Name or Address
Students who wish to change their name on their University records should fill out a UCLA Correction or Change of Name form (available in the Murphy Hall North Lobby) and submit it to Academic Record Services, 1134 Murphy Hall. All name changes are recorded on the transcript. If students change their address, they should notify Enrollment and Degree Services in 1113 Murphy Hall as soon as possible.

Leaving UCLA
Intercampus Transfer
Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the UC Application for Undergraduate Admission and Scholarships and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see Undergraduate Admission in the Undergraduate Study section of this catalog). Applications are available from the Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, UCLA, Box 951436, Los Angeles, CA 90095-1436, other University of California Undergraduate Admissions Offices, or the local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Term
Students who need to be absent from classes temporarily for reasons beyond their control should notify their instructors. Regardless of the reasons for absence, they are required to complete all coursework. If they cannot complete the work on time because the absence is late in the term
or prolonged, they may request that the instructors assign an Incomplete grade (see Incomplete Grades earlier in this section).

One-Term Absence for Undergraduates
Undergraduate students who have completed at least one term at UCLA and fail to register for the following term may return to the University the next subsequent term as continuing students. Students who plan to attend another institution (including UCLA Extension) during their absence should consult their college or school counselor before enrolling elsewhere (see Concurrent Enrollment and Transfer of Credit earlier in this section). Students who are absent for two or more consecutive terms are no longer considered continuing students and must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines).

Leave of Absence for Graduate Students
Graduate students in good standing may be granted leaves of absence, normally for periods of one to three terms, on approval from the appropriate department and the Graduate Division. The maximum amount of official leave of absence allowed is six terms (two academic years). Leaves must be requested before the end of the second week of classes (see Withdrawal below for fee refund procedures and more information). Request forms are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For details on leaves of absence, see Standards and Procedures for Graduate Study at UCLA, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time and cannot receive University financial support. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a term and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation
Before the first day of classes, students may cancel registration by mailing a written notice to Enrollment and Degree Services, Attn: Cancellation Clerk, 1113 Murphy Hall, UCLA, Box 951429, Los Angeles, CA 90095-1429. Refund is as follows: fees paid by new undergraduate students are refunded except for the nonrefundable $100 acceptance of admission fee and a $10 service fee; fees paid by new M.B.A. and Dentistry students are refunded except for their respective nonrefundable acceptance of admission fee; for new graduate, continuing, and reentering students, a service fee of $10 is deducted from the amount of fees paid. A $20 cancellation fee is also deducted if medical insurance was purchased.

Undergraduates who return to the University for the following term are considered continuing students. Students who are absent longer than one term must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines). If they cancel in their first term at UCLA, they must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal
Withdrawing from the University means discontinuing attendance in all courses in which students are enrolled. Students who withdraw during a term need to file a Notice of Withdrawal, available from their academic dean's office (undergraduates) or departmental office (graduate students).

When students officially withdraw, a percentage of the registration fee is refunded depending on the date the withdrawal form is filed with the academic dean.

Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the Schedule of Classes for policy details and specific refund dates.

Students may withdraw only if they have not taken any final examinations or otherwise completed the work in any classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if they started the term in good academic standing. If they withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on their continuance in undergraduate standing. Before withdrawing, they are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once they have officially graduated from the University.

Students who register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation receive F, NP, or U grades, as appropriate, for all courses in which they are enrolled for that term. A $60 fine is assessed if any check for registration fee payment is returned by a bank for stopped payment, insufficient funds, or any other reason. No fees are refunded, and future registration privileges may be curtailed or revoked. Transcripts are not issued if students have outstanding financial obligations to the University.

Undergraduate Students
If students return to the University for the term following withdrawal, they are considered continuing students. If they return later than the following term, they must apply for readmission.

Graduate Students
If students do not register for a term, they are considered to have withdrawn from the University and must apply for readmission when they return.

Graduation from UCLA
Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Undergraduate Students
The awarding of the bachelor's degree does not happen automatically but is the culmination of several steps that begin when students identify the term they expect to complete degree requirements through URSA Telephone (consult the Schedule of Classes for complete instructions on using URSA to declare degree candidacy). This must be done before students complete 160 units (172 for the School of Engineering and Applied Science) or a $13 late candidacy fee is assessed. The identified term must fall within the academic year (four quarters) subsequent to the term in which students reach or expect to reach the 160-/172-unit mark. Exceptions can be made by the degree auditor depending on the program of study (for example, double majors).

Students may request a review of their degree progress by a counselor in their college or school office at any time. Advisers in the major department are also available for counseling on departmental requirements.

The “degree expected term” students specify through URSA Telephone is used by the degree auditors to review coursework and begin the audit of the completion of degree requirements. Students cannot graduate without such an audit. If the expected graduation date changes, update the degree term through URSA Telephone. Once students have completed 160/172 or more units, a fee is assessed each time they change the “degree expected term” through URSA Telephone.

Students who are current-term or past-term candidates over the unit limit can only change the “degree expected term” in person at 1113 Murphy Hall. They must use the UCLA Declaration of Candidacy form (available
consult the Schedule of Classes for the deadline to declare candidacy for the current term (with fee if 160/172 or more units completed). Declaration of candidacy after the published deadline may result in a degree award date for the following term and additional candidacy penalty fees.

Students can confirm their “degree expected term” at any time through URSA Telephone at (310) 208-0425. Declaring candidacy is not a guarantee of graduation. Students who have requested through URSA that no public information (including their name) be released are not included in the program booklet for Commencement ceremonies.

Students who intend to complete degree requirements as nonregistered students (for example, taking a course through UCLA Extension or at another institution or needing to remove an Incomplete grade) must file a request to graduate “in absentia” with the degree auditor by the candidacy deadline for the “degree expected term.” Students graduating “in absentia” are assessed the special order diploma fee in addition to the declaration of candidacy fee.

Students in the School of the Arts and Architecture, School of Nursing, School of Engineering and Applied Science, and School of Theater, Film, and Television are audited for degree requirements by staff members in their respective counseling/student affairs offices and should consult them regarding questions on degree requirements and school degree audit procedures.

A computer-generated Degree Progress Report (DPR) serves as the degree check for students in the College of Letters and Science. The DPR contains a detailed evaluation of transfer credit, courses and grades for each completed term, degree requirements completed, and requirements still outstanding. Students can view and print their DPR through URSA OnLine or order one at A316 Murphy Hall.

A “Summary of Shortages for the Bachelor’s Degree” statement is mailed to each current-term candidate who does not satisfy degree requirements that term. Students who receive such notices should contact a degree auditor immediately to discuss their expected completion of the requirements. If students expect to satisfy degree requirements in a later term, they must change their “degree expected term” over URSA Telephone or at 1113 Murphy Hall. They may be assessed applicable fees, with the option to submit payment or be billed through BAR.

Graduate Students
Candidates for both master’s and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (consult the Schedule of Classes for filing deadlines).

For full details on degree requirements and procedures for graduate students, see the Graduate Study section of this catalog.

Final Transcript
Official transcripts with the graduation date included are available approximately seven weeks after the end of the term. Students who require earlier proof of graduation should contact their degree auditor.

Degree Date
Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of Summer Session C (mid-September). For the School of Law and School of Medicine, degrees are awarded at the end of Fall and Spring Semesters. Consult the respective University calendars (quarter, summer sessions, semester) for the actual degree award date, which is the final day of the term.

Diplomas
Diplomas for both undergraduate and graduate students are available approximately three to four months after the degree award date. Information about obtaining the diploma in person (no fee) or by mail (with fee) is sent to students approximately seven weeks after the end of their final term. To expedite receipt of the diploma, students are encouraged to return the diploma mailer form and remit the mailing fee. Recorded information regarding diploma availability may be obtained by calling the Diploma Hot Line at (310) 825-8883. The Registrar’s Office retains diplomas for five years from graduation date.

If the original diploma is destroyed, a duplicate may be ordered by contacting the Registrar’s Office, Diploma Reorder, 1113 Murphy Hall. There is a fee for the replacement diploma, and it bears a reissue date and the signatures of the current officials of the state and University.

Commencement
Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, and recognition of candidates who have achieved high academic distinction and honors. Check with the school or college for eligibility requirements, programs, and time schedules.

Academic regalia (caps, gowns, and hoods) are available for rent/purchase at Graduation Etc. (A Level of Ackerman Union, 310-825-2587, http://www.uclastore.ucla.edu). In addition, graduation announcements, diploma covers, and diploma mounting are available.

Further information, including the schedule of ceremonies, maps and parking information, what to expect, and commencement updates, is available from the University commencement website at http://www.commencement.ucla.edu/.
Vital relationship between dance/performance and theory/criticism.

Features offers an innovative interdisciplinary arts curriculum based on the context of music-making from a global perspective, and the Department of Design focuses on electronic and digital imagery in visual communication design and on the computational devices and computer applications most likely to be sought by industry in the twenty-first century.

Students in the Department of Ethnomusicology study the performance and context of music-making from a global perspective, and the Department of Music offers concentrations in composition, music education, performance, and jazz studies. The Department of World Arts and Cultures offers an innovative interdisciplinary arts curriculum based on the vital relationship between dance/performance and theory/criticism.

Informative brochures on the school are available from the Office of Recruitment and Outreach, 1100 Dickson Art Center, UCLA, Box 951620, Los Angeles, CA 90095-1620, (310) 825-9708.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

Majors and Degrees Offered

Architecture (M.Arch. I, M.Arch. II, M.A., Ph.D.)
Art (B.A., M.A., M.F.A.)
Dance (M.A., M.F.A.)
Dance/Movement Therapy (M.A.)
Design (B.A., M.A., M.F.A.)
Ethnomusicology (B.A., M.A., C.Phil., Ph.D.)
World Arts and Cultures (B.A.)

Note: New students are not being admitted to the M.A. in Design or the M.A. in Dance/Movement Therapy at this time.

Undergraduate Study

Admission

In addition to the University of California Undergraduate Application, departments in the School of the Arts and Architecture require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

Study Lists

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units if they have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. Consult the Student Services Office no later than the end of the third week of instruction.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as major, scholarship, and residence requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Under-
graduate Degree Requirements in the Undergraduate Study section of this catalog.

School of the Arts and Architecture students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take the courses for a letter grade.

School Requirements
The general requirements of the School of the Arts and Architecture must be completed with a grade-point average of 2.0 or better.

Unit Requirements
Students must complete for credit, with a passing grade, no less than 180 units and no more than 216 units, of which at least 64 units must be upper division courses (numbered 100 through 199). Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Students may petition to be reviewed for a double major on an individual basis. Contact the Student Services Office for an outline of criteria required.

Major Requirements
A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). All majors include both lower and upper division courses. Those listed under Preparation for the Major (lower division) should be completed before upper division major work is undertaken.

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the major department must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts and Architecture may require a general final examination.

Individual Majors
Highly motivated students who believe that no single major accommodates their specific interests and goals may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and must explain the intent concerning the anticipated program of study and reasons why the academic goals cannot be achieved within an existing major. Proposals must be submitted no later than the end of the sophomore year. Transfer students must complete at least one term of residence at UCLA before proposing an individual major. Students interested in designing an individual major should consult with the Director of Student Services, School of the Arts and Architecture, 1100 Dickson Art Center, (310) 825-9707.

Scholarship and Minimum Progress
A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

Minimum Progress
Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.

Residence Requirements
Students are “in residence” while enrolled and attending classes at UCLA as a major in the School of the Arts and Architecture. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the School of the Arts and Architecture. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

English Composition and Critical Reading and Writing Requirements

English Composition and Rhetoric
English Composition 3 with a minimum grade of C must be completed by the end of the third term at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

Critical Reading and Writing
One course from Comparative Literature (formerly Humanities) 2A, 2B, 2C, 2D, or English 4 with a minimum grade of C must be completed by the end of the second year at UCLA and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 5 also meets this requirement. Comparative Literature 2A, 2B, 2C, or 2D may not be applied toward the humanities/literature requirement if taken to meet this requirement.

Foreign Language Requirement
Students may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, or scoring 4 or 5 on the AP foreign language test in Latin, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA’s level three or above with a grade of Passed or C or better.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

Computing/Mathematics/Statistics Requirement
One course (four units) in mathematics or statistics or an introductory course in computers selected from Anthropology M80, Computer Science 1, 2, Economics M40, Geography M40, Mathematics 1, 2, 3A, 3B, 3C, 31A, 31B, Program in Computing 1, 10A, 10B, 10C, Sociology M18, Statistics 10, M11, M12, M21A, M21C. An SAT I mathematics score of 600 or better or an SAT II mathematics subject test score of 550 or better also meets this requirement.

Additional Upper Division Nonmajor Requirements
In addition to the general education requirements, students are required to take a minimum of 12 units of upper division nonmajor courses. Courses that do not apply on this requirement are studio, performance, activity, independent study, debate, creative dramatics, internships, production, workshop, and field studies courses. Consult the school counselor prior to enrolling.

General Education (GE) Requirements

Reciprocity with Other UC Campuses
Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of the Arts and Architecture general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to the Student
Intersegmental General Education Transfer Curriculum
Transfer students from California community colleges have the option to fulfill UCLA’s lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of the Arts and Architecture general education requirements.

Arts and Architecture GE Course List
Courses marked with one asterisk (e.g., History *4. Introduction to History of Religions) are listed in more than one category and can fulfill GE requirements in only one of the cross-listed categories.
**If Comparative Literature 2A, 2B, 2C, or 2D is taken to meet the Arts and Architecture critical reading and writing requirement, it may not also be applied toward the humanities/literature requirement.

A. Science
Two courses from different departments:

Anthropology
7. Human Evolution
10. Principles of Human Evolution: Genetic Basis
12. Principles of Human Evolution: Comparative Analysis

Astronomy
2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe
3H. Introductory Astronomy and Astrophysics
4. Universe of Stars and Stellar Systems
5. Life in the Universe
6. Cosmology: Our Changing Concepts of the Universe
81. Astrophysics I: Stars and Nebulae
82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology

Atmospheric Sciences
2, 2E. Air Pollution
3, 3E. Introduction to the Atmospheric Environment
4. California Weather and Climate
5. Climates of Other Worlds
6, 6E. Climate and Climatic Change
8. Clouds, Rain, and Storms
10. Introduction to the Earth System

Chemical Engineering
2. Technology and the Environment

Chemistry and Biochemistry
2. Introductory Chemistry
15. Survey of Organic Chemistry and Biochemistry

Civil and Environmental Engineering
3. Fundamentals of Environmental Engineering Science

Earth and Space Sciences
1. Introduction to Earth Science
2. Earth History
5. Environmental Geology of Los Angeles
8. Earthquakes
9. Origin and Evolution of Solar System
15. Introduction to Oceanography
16. Major Events in History of Life
17. Dinosaurs and Their Relatives
20. Natural History of Southern California

Geography
1. Physical Environment
2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World

Life Sciences
1. Evolution, Ecology, and Biodiversity
2. Cells, Tissues, and Organs
3. Introduction to Molecular Biology
4. Genetics

Microbiology and Molecular Genetics
6. Introduction to Microbiology
7. Developments in Biotechnology
10. Applied Medical Microbiology

Molecular, Cell, and Developmental Biology
30. Biology of Cancer
40. AIDS and Other Sexually Transmitted Diseases
70. Genetic Engineering and Society
80. The Green World: Plant Biology for Now and the Future

Organismic Biology, Ecology, and Evolution
10. Plants and Civilization
12. Biodiversity and Extinction: Crisis and Conservation
13. Evolution of Life
21. Field Biology
25. Oceans
50. Desert Life

Physics
1A. Physics for Scientists and Engineers: Mechanics
1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields
1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity
3A. General Physics: Mechanics of Solids and Fluids
3B. General Physics: Heat, Sound, Electricity and Magnetism
3C. General Physics: Light, Relativity, and Modern Physics
6A. Physics for Life Sciences Majors: Statics and Dynamics
6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics
6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport
10. Physics

Physiological Science
3. Introduction to Human Physiology
5. Issues in Human Physiology: Diet and Exercise
13. Introduction to Human Anatomy

Psychology
15. Introductory Psychobiology

B. Social Sciences
Three courses, with at least one from each group:

B1. Group A

Economics
1, 2. Principles of Economics
5. Introductory Economics

History
1A. 1B, 1C. Introduction to Western Civilization
2A. Power, Ethics, and Technological Change
2B. Social Knowledge and Social Power
3A, 3B, 3C. Introduction to History of Science
3D. Themes in History of Medicine
*4. Introduction to History of Religions
8A. Colonial Latin America
8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
8C. Latin American Social History
9A. Introduction to Asian Civilizations: History of India
9C. Introduction to Asian Civilizations: History of Japan
9D. Introduction to Asian Civilizations: History of the Near and Middle East
10A, 10B. Introduction to Civilizations of Africa
11A, 11B. History of China
13B. History of the U.S. and Its Colonial Origins: 19th Century
13C. History of the U.S. and Its Colonial Origins: 20th Century

A. Science
Two courses from different departments:

Anthropology
7. Human Evolution
10. Principles of Human Evolution: Genetic Basis
12. Principles of Human Evolution: Comparative Analysis

Astronomy
2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe

**Near Eastern Languages**
50A. Introduction to Near Eastern Languages and Cultures: Ancient Near East
50B. Introduction to Near Eastern Languages and Cultures: Medieval Near East
50C. Introduction to Near Eastern Languages and Cultures: Modern Near East

**Portuguese (Spanish and Portuguese)**
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
*46. Brazilian Culture and Civilization
Romanian (Slavic Languages)
99. Introduction to Romanian Civilization

Russian (Slavic Languages)
99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century

Slavic (Slavic Languages)
99. Introduction to Slavic Civilization

Spanish (Spanish and Portuguese)
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

Women’s Studies
*M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies

C3. Literature

Comparative Literature (formerly Humanities)
1A. World Literature: Antiquity to Early Middle Ages
1B. World Literature: Late Middle Ages to the 17th Century
1C. World Literature: Age of Enlightenment to the 20th Century
1D. Great Books from the World at Large
**2A. Survey of Literature: Antiquity to Early Middle Ages
**2B. Survey of Literature: Late Middle Ages to the 17th Century
**2C. Survey of Literature: Age of Enlightenment to the 20th Century
**2D. Survey of Literature: Great Books from the World at Large

English
10A. English Literature to 1660
10B. English Literature, 1660 to 1832
10C. English Literature, 1832 to the Present
70. Major British Authors before 1800
75. Major British Authors, 1800 to the Present
80. Major American Authors
85. The American Novel
90. Shakespeare
95A. Introduction to Poetry
95B. Introduction to Drama
95C. Introduction to Fiction
96. The Short Story in England and America

French
12. Introduction to Study of French Literature (in French)

German (Germanic Languages)
50A. Masterworks of German Literature in Translation: Medieval Period through Classicism
50B. Masterworks of German Literature in Translation: Romanticism to the Present

Italian
50A. Masterpieces of Italian Literature in English: Middle Ages and Renaissance
50B. Masterpieces of Italian Literature in English: Baroque Period to the Present

Japanese (East Asian Languages)
60. Image of Japan: Humanistic Tradition

Portuguese (Spanish and Portuguese)
40A, 40B. Portuguese, Brazilian, and African Literature in Translation

Russian (Slavic Languages)
25. The Russian Novel in Translation
*30. Russian Literature and World Cinema

Scandinavian
50. Introduction to Scandinavian Literature

Spanish (Spanish and Portuguese)
60A, 60B, 60C. Hispanic Literatures in Translation
61A, 61B, 61C. Hispanic Literatures in Spanish
*62A, *62B, *62C. Hispanic Literatures and Film

Selected upper division courses
in English and in other language and literature departments

C4. Philosophy/Religion

Ancient Near East (Near Eastern Languages)
*10. Jerusalem: The Holy City
130. Ancient Egyptian Religion

Anthropology
156. Comparative Religion

Chinese (East Asian Languages)
160. Chinese Buddhism
175. Introduction to Chinese Thought

Classics
88A. Lower Division Seminar: Socrates
M145A. Ancient Greek and Roman Philosophy
M145B. Later Ancient Greek Philosophy
166A. Greek Religion
166B. Roman Religion

East Asian Languages and Cultures
60. Image of Japan: Humanistic Tradition

History
*4. Introduction to History of Religions

Indic (East Asian Languages)
175. Introduction to Indic Philosophy

Iranian (Near Eastern Languages)
170. Religion in Ancient Iran

Islamics (Near Eastern Languages)
110. Introduction to Islam

Japanese (East Asian Languages)
C160. Japanese Buddhism
161. Religious Life in Modern Japan
175. Introduction to Japanese Thought

Jewish Studies (Near Eastern Languages)
130. Modern Jewish Religious Movements and Their Ideologies

Korean (East Asian Languages)
160. Korean Buddhism
175. Introduction to Traditional Korean Thought
187. Popular and Folk Religion in Korea

Philosophy
1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Introduction to Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
21. Skepticism and Rationality
22. Introduction to Ethical Theory
31. Logic, First Course
32. Logic, Second Course
M103A. Ancient Greek and Roman Philosophy
M103B. Later Ancient Greek Philosophy

Honors

Dean’s Honors
To receive Dean’s Honors in the School of the Arts and Architecture, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean’s Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at Graduation
Honors at graduation are awarded to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors are summa cum laude, magna cum laude, and cum laude. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year determine student eligibility. See the quarterly Schedule of Classes for the most current calculations of Latin honors.
Counseling and Program Planning
The School of the Arts and Architecture offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center, (310) 206-3564.

Graduate Study
The advanced degree programs offered in the School of the Arts and Architecture provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, the special collections of the Arts and Music Libraries, and the University's exhibition and performance halls.

The School of the Arts and Architecture cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of the arts areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division.

Admission
In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of creative work (auditions, portfolios, computer programs, etc.) are required. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements
Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available on the Graduate Division website at http://www.gd-net.ucla.edu/departments.html.

School of Dentistry
No-Hee Park, Dean

UCLA
53-038 Dentistry
Box 951762
Los Angeles, CA 90095-1762
(310) 206-6063
http://www.dent.ucla.edu

The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational, training, and research programs prepare dental students for professional careers dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment modalities and health care delivery systems. Students become actively involved in preventive and clinical dental care immediately in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; mandatory fourth-year selectives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center, the Roybal Children’s Dental Center, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. A graduate program and a number of resident specialty programs foster new lines of research which lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. (Doctor of Dental Surgery) degree program, a number of resident programs, and Oral Biology M.S. and Ph.D. degree programs. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required.

Degrees Offered
Dental Surgery (D.D.S.)
Oral Biology (M.S., Ph.D.)

Predental Curriculum
For details on the three-year predental curriculum, see the College of Letters and Science later in this section.

D.D.S. Degree Program
The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anaesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see http://www.dent.ucla.edu or write to the Office of Student Affairs and Admissions, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

Resident Programs
The School of Dentistry offers the following opportunities for resident study: a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four- or six-year oral and maxillofacial surgery residency training program; a three-year prosthodontics, periodontics, and combined orthodontic/pediatric dentistry program; two-year pro-
grams in the specialties of endodontics and orofacial pain and dysfunction; and a 27-month program in orthodontics and pediatric dentistry.

Information on the resident programs can be obtained by writing directly to Resident Programs, School of Dentistry, A3-042 Dentistry, UCLA, Box 951762, Los Angeles, CA 90095-1762.

Graduate School of Education and Information Studies
Harold G. Levine, Interim Dean

UCLA
2320 Moore Hall
Box 951521
Los Angeles, CA 90095-1521
(310) 206-9260
http://www.gseis.ucla.edu

The UCLA Graduate School of Education and Information Studies (GSEIS) includes two departments — the Department of Education and the Department of Information Studies. Together, the two departments embody the school’s commitment to understand and improve teaching and learning, educational practice, information policy, and information systems in a diverse society. Research and doctoral training programs bring together faculties committed to expanding the range of knowledge in education, information science, and associated disciplines. The professional training programs seek to develop librarians, teachers, and administrators within the enriched context of a research university.

GSEIS is committed to developing expertise in both old and new methods of information storage and retrieval and to bringing innovative approaches in educational technology and information access to the schools and classrooms of the state and nation. In addition, GSEIS faculty members are engaged in research, teaching, and program development in the areas of management and leadership of schools and libraries, information policy formation, and information systems designs in organizations of all kinds.

Through its scholarship, its graduate training programs, and its partnerships with schools and educational professionals, GSEIS honors its commitment to improve practice in schools, universities, and libraries, enhance theoretical and applied research, expand the role of the university in policy creation, and advance the careers of professional leaders and specialists.

Together our commitment is to the highest quality professional education and to the application of research to the challenges facing a diverse and increasingly urbanized world.

The school offers programs of study leading to the degrees of M.A. in Education, Master of Education (M.Ed.), Master of Library and Information Science (M.L.I.S.), Doctor of Education (Ed.D.), Ph.D. in Education, Ph.D. in Library and Information Science, joint Ed.D. in Educational Administration with UC Irvine, and joint Ph.D. in Special Education with California State University, Los Angeles. Several credential programs are available through the Department of Education, and a post-M.L.I.S. certificate program is offered by the Department of Information Studies.

Degrees Offered
Education (M.A., M.Ed., Ed.D., Ph.D.)
Educational Administration (Joint Ed.D. with UC Irvine)
Library and Information Science (M.L.I.S., Ph.D.)
Special Education (Joint Ph.D. with California State University, Los Angeles)

School of Engineering and Applied Science
A.R. Frank Wazzan, Dean

UCLA
6426 Boelter Hall
Box 951600
Los Angeles, CA 90095-1600
(310) 825-2826
http://www.seas.ucla.edu

Since its inception as the College of Engineering in 1945, the School of Engineering and Applied Science has been on the cutting edge of technological advances. In addition to the school’s strengths in traditional engineering programs, it is advancing research in the evolving fields of biomedical engineering, wireless communications and networking, and micromachines. Researchers are also creating innovative methods of handling increasing Internet traffic and imaginative uses of new materials.

As we approach the twenty-first century, the pace of technological development quickens, and engineers need to adapt faster to help meet societal needs and maintain U.S. leadership in the marketplace. Engineers must greatly expand their knowledge in their own disciplines and must be able to work as team members across disciplines to solve increasingly complex problems.

UCLA meets the needs of the marketplace by seeing that laboratory breakthroughs translate into technologies and products. Faculty members engage in mutual collaborations with industry, from applied research to technology goal setting. The school’s educational mission nurtures innovation and provides a balanced approach to teaching and research.

Students receive their professional education through classroom investigation and real-world applications. The curriculum includes exposure to the humanities, social sciences, and fine arts and addresses the need to educate men and women about their responsibility to create, protect, and manage technology with due regard for ethics and human values. The challenges and rewards of a career in engineering have never been greater. Students who can commit to a high standard of achievement are invited not only to join but also to contribute to the great success story of UCLA.

Degrees Offered
Aerospace Engineering (B.S., M.S., Ph.D.)
Biomedical Engineering (M.S., Ph.D.)
Chemical Engineering (B.S., M.S., Ph.D.)
Civil Engineering (B.S., M.S., Ph.D.)
Computer Science (B.S., M.S., Ph.D.)
Computer Science and Engineering (B.S.)
Electrical Engineering (B.S., M.S., Ph.D.)
Engineering (M.Engr., Engr.)
Engineering and Applied Science (Graduate Certificate of Specialization)
Integrated Manufacturing Engineering (M.Engr.)
Manufacturing Engineering (M.S.)
Materials Engineering (B.S.)
Materials Science and Engineering (M.S., Ph.D.)
Mechanical Engineering (B.S., M.S., Ph.D.)

Undergraduate Study
Students in the School of Engineering and Applied Science (SEAS) may elect one of the eight four-year curricula listed below.
(1) Bachelor of Science in Aerospace Engineering
(2) Bachelor of Science in Chemical Engineering
Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled Undergraduate Admission in the Undergraduate Study section of this catalog. Students must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Freshman applicants are strongly advised to take the tests required by the University for admission on or before December 2. Reports of test scores are needed to give full consideration to admission requests; students should ask the testing agencies to send their results directly to the UCLA Undergraduate Admissions Office.

Applicants are accepted at either the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in engineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of normal full-time study. Some students who select certain majors, such as Computer Science and Engineering or Chemical Engineering, may be required to complete additional lower division courses as requisites for the major sequence.

Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Algebra</td>
<td>2 years</td>
</tr>
<tr>
<td>Plane geometry</td>
<td>1 year</td>
</tr>
<tr>
<td>Trigonometry</td>
<td>.5 year</td>
</tr>
<tr>
<td>Chemistry and physics with laboratory</td>
<td>2 years</td>
</tr>
</tbody>
</table>

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the Scholastic Assessment Test I: Reasoning Tests (verbal and mathematics sections) and Scholastic Assessment Test II: Subject Tests in Writing, Mathematics, and Physics or Chemistry before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

Credit for Advanced Placement Tests

Students may fulfill part of the school requirements with credit allowed at the time of admission for College Board Advanced Placement Tests with scores of 5, 4, or 3. Students with Advanced Placement Test credit may exceed the 213-unit maximum by the amount of this credit. Advanced Placement Test credit for freshmen entering in Fall Quarter 1999 fulfills requirements in the School of Engineering and Applied Science as indicated on the Advanced Placement chart for the school.

Some portions of Advanced Placement Test credit are evaluated by corresponding UCLA course number. If students take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation.

Students who have completed 96 quarter units after high school graduation at the time of the examination receive no Advanced Placement Test credit.

Admission as a Junior

Applicants for admission to the school in junior standing should have completed 90 quarter units (60 semester units) in good standing, including the following minimum subject requirements:

1. Chemistry courses equivalent to UCLA's Chemistry and Biochemistry 20A, 20B, 20L (only Chemistry and Biochemistry 20A is required for the computer science and engineering degree; the computer science degree does not require chemistry; the chemical engineering curriculum also requires Chemistry and Biochemistry 30, 30L, 130A/130AL, which do not need to be taken prior to admission to UCLA); (2) mathematics courses equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B; (3) physics courses equivalent to UCLA's Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected.

Transfer students must complete a course equivalent to UCLA's English Composition 3 and a second more advanced course in English composition.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

All lower division requirements should be completed by the end of the spring term prior to anticipated enrollment at UCLA.

Requirements for Bachelor of Science Degrees

The requirements for the B.S. degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science, Computer Science and Engineering, Electrical Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 180 to 200 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. Students must also satisfy the curricular requirements for the curriculum they choose to follow.

University Requirements

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Scholarship and Minimum Progress Requirements

In addition to the University requirement that students must earn at least a C (2.0) average in all courses taken at any University of California campus, at least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. A 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is also required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

Senior Resident Requirement

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence at the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

</tbody>
</table>
Study Lists and Credit Limitations

Study Lists require approval of the dean of the school or a designated representative. It is the student’s responsibility to present a Study List which reflects satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. Students are expected to enroll in at least 12 units each term. Students enrolling in less than 12 units must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. Students may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

Students must attain a minimum grade of C to satisfy the English Composition 3 requirement, which must be met before completing 90 quarter units (a grade of C– does not satisfy this requirement). Undergraduates who have not taken (or otherwise satisfied the requirement for) English Composition 3 at the time they are admitted must complete the course at UCLA during Fall, Winter, or Spring Quarter.

After 213 quarter units, enrollment may not normally be continued in the school. Students may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After students have completed 105 quarter units (regardless of where these units have been completed), they do not receive unit credit or subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor’s degree.

No credit is granted toward the bachelor’s degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

Credit for Transfer Students

A course in digital computer programming, using a higher-level language such as FORTRAN, PASCAL, C, or C++; satisfies the computer programming requirement. Applicants to majors in Computer Science, Computer Science and Engineering, and Electrical Engineering should take C or C++.

Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Academic and Student Affairs.

Preparation for the Majors

The following lower division courses or their equivalents are required preparation for engineering majors:

Mathematics

Analytic geometry and calculus, eight units; calculus of several variables, eight units; matrices and differential equations, four units; infinite series, four units (total of 24 quarter units minimum).

UCLA equivalent courses: Mathematics 31A, 31B, 32A, 32B, 33A, 33B.

Physics

Calculus-based courses in mechanics of solids, vibration, wave motion, sound, fluids, heat, kinetic theory, electricity, magnetism, electromagnetic waves, light and relativity, with laboratory (total of 19 quarter units minimum).

UCLA equivalent courses: Physics 1A, 1B, 1C, 4AL, 4BL, depending on curriculum selected.

Chemistry

Two quarters or two semesters of general chemistry with laboratory (total of 10 quarter units minimum).

UCLA equivalent courses: Chemistry and Biochemistry 20A, 20B, 20L. Only Chemistry and Biochemistry 20A is required for the computer science and engineering degree; chemistry is not required for the computer science degree. The chemical engineering curriculum also requires Chemistry and Biochemistry 30, 30L, 130A/130AL.

Engineering

Digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C (four units); other courses: statics, dynamics, graphics and descriptive geometry, surveying, circuit analysis, properties of materials, strength of materials, additional chemistry, additional computer science.

UCLA equivalent courses: Civil and Environmental Engineering 15; Computer Science 11; Electrical Engineering 5C; Mechanical and Aerospace Engineering 20; engineering core courses; free electives. See specific undergraduate curricula for core courses, SEAS general education (GE) courses, and free electives.

Additional Courses

Life sciences (four units), English composition (four units), humanities/social sciences (total of 16 quarter units minimum).

UCLA equivalent courses: SEAS general education (GE) courses.

Curricular Requirements

The curricula for the bachelor's degrees include the following categories, depending on curriculum selected:

(1) Twelve to 16 engineering major field courses (48 to 64 units), depending on curriculum followed.

(2) One to 10 engineering core courses (four to 40 units), depending on curriculum selected.

(3) Mathematics courses, ranging from four to 12 upper division units; see curricula in individual departments.

(4) SEAS general education (GE) course requirements: (a) English Composition 3, which must be completed with a minimum grade of C within the first 90 units; (b) six courses from the humanities and social sciences, with at least two courses from each category; (c) one life sciences course (this requirement is automatically satisfied for Chemical Engineering majors).

All lower division courses taken to satisfy items b and c must be selected from the College of Letters and Science GE requirements list (see the Curricula and Courses section of this catalog or online GE Requirements at http://www.registrar.ucla.edu/GE/). Students interested in taking a foreign language to satisfy this requirement must first consult with an academic counselor in the Office of Academic and Student Affairs.

For item b, at least three courses must be in the same academic department or must otherwise reflect coherence in subject matter. Of the three, at least two must be upper division courses selected from an approved list available in the Office of Academic and Student Affairs.

Computer Science, Computer Science and Engineering, and Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

Lists of courses approved to satisfy specific curricular requirements are available from the Office of Academic and Student Affairs.

The aerospace engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, materials engineering, and mechanical engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs. The computer science curriculum is accredited by the Computing Sciences Accreditation Board (CSAB), the nationally recognized accrediting body for computer science programs.

Advising and Program Planning

As new undergraduates, students must have their course of study approved by an academic counselor. After the first term, curricular and ca-
reer advising is accomplished on a formal basis. Students are assigned a faculty adviser in their particular specialization in their sophomore year or earlier.

In addition all undergraduate students are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides them with advice regarding general requirements for the degrees and University and school regulations and procedures. It is the students’ responsibility to periodically meet with their academic counselor in the Office of Academic and Student Affairs, as well as with their faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

Students normally follow the curriculum in effect when they enter the school. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

All SEAS undergraduate students may use the computerized SEAS Academic Program Planner, an interactive self-advising system which informs users immediately if their programs meet the requirements for graduation. Students beginning upper division coursework in the major are required to submit an Academic Program Proposal to the Office of Academic and Student Affairs for approval by the associate dean.

Academic counselors in the Office of Academic and Student Affairs are available to assist with University procedures and to answer any questions students may have in regard to general requirements.

**Passed/Not Passed Grading**

Students may take one course per term on a Passed/Not Passed basis if they are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only SEAS general education courses (with the exception of English Composition 3) and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see Units and Grading Policy in the Academics section of this catalog or consult the Office of Academic and Student Affairs.

### Honors

**Departmental Scholars**

Students who are exceptionally promising juniors or seniors may be nominated as Departmental Scholars to pursue bachelor’s and master’s degree programs simultaneously. See Academic Excellence in the Undergraduate Study section of this catalog and the Announcement of the UCLA School of Engineering and Applied Science for details.

**Dean’s Honors List**

Students following the engineering curricula are eligible to be named to the Dean’s Honors List each term. Minimum requirements are a course load of at least 15 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7. Students are not eligible for the Dean’s Honors List if they receive an Incomplete (I) or Not Passed (NP) grade or repeat a course. Only courses applicable to an undergraduate degree are considered toward eligibility for Dean’s Honors.

**Honors at Graduation**

Students who have achieved scholastic distinction may be awarded the bachelor’s degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places them in the top five percent of the school (GPA of 3.815 or better) for summa cum laude, the next five percent (GPA of 3.729 or better) for magna cum laude, and the next 10 percent (GPA of 3.552 or better) for cum laude. See the quarterly Schedule of Classes for the most current calculations of Latin honors.

Based on grades achieved in upper division courses, engineering students must have a 3.815 grade-point average for summa cum laude, a 3.729 for magna cum laude, and a 3.552 for cum laude. For all designations of honors, students must have a minimum 3.25 grade-point average in their major field courses. To be eligible for an award, students should have completed at least 80 upper division units at the University of California.

**Tau Beta Pi**

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs “to foster a spirit of liberal culture in engineering colleges.”

### Special Programs and Activities

**Extracurricular Activities**

The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school’s Executive Committee.

**Women in Engineering**

Women make up approximately 20 percent of the undergraduate and 15 percent of the graduate enrollment in the School of Engineering and Applied Science. Today’s opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a “males only” field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual résumé book to aid women students in finding jobs and presents a career day for women high school students.

**Continuing Education**

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX) Department of Engineering, Information Systems, and Technical Management in close cooperation with the School of Engineering and Applied Science. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (540 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for engineering and information systems class programs, (310) 825-3344 for short course programs, (310) 825-0328 for environmental management, and (310) 825-3858 for technical management programs. The fax number is (310) 206-2815.

**Graduate Study**

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master’s degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.
Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After students arrive at UCLA, the adviser helps them plan a program to remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which students are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90095. Students may also submit an online application at http://www.seas.ucla.edu. From there connect to the homepage of the preferred department or program and then to the online graduate application.

Undergraduate Courses
No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199, Civil and Environmental Engineering 106A, 108, 199, Computer Science M152A, M152B, 171L, 199, Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199, Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199, Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with the graduate adviser on departmental requirements and restrictions.

Master of Science Degrees

Major Fields or Subdisciplines
The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., manufacturing engineering in the Department of Mechanical and Aerospace Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and Ph.D. fields and subdisciplines. Students are free to propose to the school any other field of study, with the support of their adviser.

Course Requirements
A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from the department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in the School of Engineering and Applied Science. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan
The thesis must either describe some original piece of research that students have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in their major field of study. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Comprehensive Examination Plan
The comprehensive examination, which is offered every term, is required in written form only. The comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, students may be reexamined once with the consent of their departmental graduate adviser.

Cooperative Degree Program
The School of Engineering and Applied Science has established a joint degree program with the John E. Anderson Graduate School of Management which allows students to earn two master's degrees simultaneously: the M.B.A. and the M.S. in Computer Science. Contact the Office of Academic and Student Affairs for details.

Master of Engineering Degree
The Master of Engineering (M.Engr.) degree is granted to graduates of the interdepartmental Integrated Manufacturing Engineering (IME) Program which educates and trains future manufacturing engineering leaders. For further information, contact the Integrated Manufacturing Engineering Program, 48-121 Engineering IV, UCLA, Box 951597, Los Angeles, CA 90095-1597. (310) 825-7780, fax: (310) 205-4830, e-mail: imeinfo@ime.ucla.edu. Website: http://ime.ucla.edu.

The M.Engr. degree is also granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Box 951601, Los Angeles, CA 90095-1601, (310) 825-1704.

Engineer Degree
The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an Engineer degree or even pick up the Engineer degree enroute to the Ph.D. degree; similarly, a student in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

Doctoral Degrees

Major Fields or Subdisciplines

Biomedical Engineering Interdepartmental Program
Bioacoustics, speech, and hearing; biomedical engineering; biomechanics, biomaterials, and tissue engineering; biomedical instrumentation; biomedical signal and image processing; neuroengineering.

Chemical Engineering Department
Chemical engineering.

Civil and Environmental Engineering Department
Environmental engineering, geotechnical engineering, structures (structural mechanics and earthquake engineering), water resource systems engineering.

Computer Science Department
Artificial intelligence, computer networks, computer science theory, computer system architecture, programming languages and systems (software systems, data and knowledge-based systems), scientific computing (biomedical engineering systems, physical systems).
Electrical Engineering Department
Applied mathematics (established minor field only), communications and telecommunications, control systems, electromagnetics, integrated circuits and systems, operations research, photonics and optoelectronics, plasma electronics, signal processing, solid-state electronics.

Materials Science and Engineering Department
Ceramics and ceramic processing, electronic and optical materials, structural materials.

Mechanical and Aerospace Engineering Department
Applied mathematics (established minor field only), applied plasma physics and fusion engineering (minor field only), dynamics, fluid mechanics, heat and mass transfer, manufacturing and design, microelectromechanical systems (MEMS), structural and solid mechanics, systems and control.

Students may propose to their department any other field of study with the support of their adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

All candidates must fulfill the minimum requirements of the Graduate Division. Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

Graduate Certificate of Specialization
A Certificate of Specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master’s and/or doctoral degrees.

School of Law
Jonathan D. Varat, Dean

UCLA
1242 Law
Box 951476
Los Angeles, CA 90095-1476
(310) 825-4841
http://www.law.ucla.edu

By any standard, the UCLA School of Law is recognized as one of the nation’s great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of a faculty that includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school’s strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what ultimately faces them as lawyers and policymakers. Students and faculty often pioneer new programs together, such as the Environmental Clinic, the Program in Public Interest Law and Policy, and a concentration in business law.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association.

Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Degrees Offered
Juris Doctor (J.D.)
Master of Laws (LL.M.)

Concurrent Degree Programs
The School of Law offers five concurrent degree programs that allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously: the M.B.A./J.D. with the John E. Anderson Graduate School of Management, the M.A./J.D. with the Department of Urban Planning in the School of Public Policy and Social Research, the M.A./J.D. with the American Indian Studies Program in the College of Letters and Science, the M.S.W./J.D. with the Department of Social Welfare in the School of Public Policy and Social Research, and either the M.Ed., M.A., Ed.D., or Ph.D./J.D. with the Department of Education in the Graduate School of Education and Information Studies. For details on all degree programs, see the Law copy in the Curriculum and Courses section of this catalog.

In addition to the formal concurrent programs listed above, students may design a tailored program from other disciplines in UCLA’s curriculum or from another high-quality institution; this must be arranged in consultation with the School of Law and the other selected program.

Special Programs
Program in Public Interest Law and Policy
The School of Law has long attracted students interested in public interest law faculties in the country and sits next to the School of Public Policy and Social Research in a city that is a living laboratory for every conceivable social problem.
Building on these strengths, the school instituted a Program in Public Interest Law and Policy in Fall Semester 1997. Students take a special lawyering skills class, participate in a public interest workshop in their first year, and take required year-long seminars in their second and third years. Through the three-year program, which leads to the J.D. degree, students work closely with the small group of faculty who designed the program.

The program marks a distinct break with the way law schools have traditionally trained lawyers for public interest careers. Recognizing the need for coordinated and sequenced training and hoping to engage the interest of the most dedicated public interest-minded students, the program offers a challenging approach to legal education that helps aspiring lawyers refine their own career goals while training them for legal and policy work in the public interest.

Clinical Program

The UCLA School of Law offers one of the finest clinical education programs in the nation. Housed in a state-of-the-art clinical wing, the program provides extensive and rigorous practical training for student-lawyers interested in litigation and transactional work prior to entry into the legal profession. Through simulated and actual client contact, students learn skills such as interviewing and counseling clients, drafting legal documents, examining and cross-examining witnesses, negotiating commercial agreements and litigation settlements, deposing witnesses, mediating disputes, and arguing before a judge or jury.

For example, in the recently established Frank G. Wells Environmental Law Clinic, students work on large and small cases, both federal and state, involving citizen enforcement actions under various environmental statutes, especially actions under the Clean Water Act against polluters of the Santa Monica Bay. In the Community Outreach, Education, and Organizing Clinic, students work on a variety of projects that involve them with members of the community. In one project, students created a workshop to teach lay persons about Proposition 187, the California initiative that sought to eliminate government benefits for illegal immigrants. Other innovative programs include a complex litigation clinic that concentrates on the discovery process, a mediation clinic working in municipal court, and a public policy advocacy course that focuses on public interest policy questions.

In addition to the specialty clinics, students can choose from an extensive array of clinical subjects ranging from trial advocacy and alternative dispute resolution to fact investigation and pretrial procedures. Students in most clinical courses work with real clients under close faculty supervision, either in the school’s in-house clinical office or in public interest law settings.

The clinical wing includes a two-story Law Office designed with modern lawyering technology. The student work rooms are equipped with networked computers that have access to legal research databases, the Internet, and leading-edge computer litigation support systems.

The School of Law was a pioneer of clinical legal education, and the program continues on the cutting edge of methods for training lawyers. Clinical faculty members have written numerous influential texts and articles that are used by law schools nationwide.

Extern Program

The school has one of the most extensive, best established, and most diversified student extern programs in the nation. Under supervision of experienced public interest and governmental lawyers and federal judges, students perform legal work in government offices, public interest law firms, nonprofit agencies, and the chambers of federal judges.

In the semester-long program, students develop legal skills in supervised settings and acquire perspectives about the lawyering process or the judicial decision-making process. They also participate in a faculty-led, law school-based seminar in which they reflect systematically in a classroom setting on their experiences in the placement. Students regularly report that the program is an excellent educational experience.

Business Law Program

The Business Law Program gives second- and third-year law students a coherent program of focused coursework in an important practice area. Students who successfully complete the program receive an appropriate notation on their transcripts.

The program has several goals. A large part of practice consists of transactions — a term encompassing agreements as diverse as the negotiation of a lease, the financing of low-cost housing, and the mergers of billion-dollar companies. Lawyers structuring those transactions and those engaged in litigation about them need to understand both legal principles and economic dynamics. Yet students interested in such practices are sometimes uncertain how they may best prepare themselves for such careers. The program provides guidance for these students, offering suggested courses and sequences of courses that enable those interested in a career in business law — or another field where such knowledge would be useful — to plan orderly, logical schedules that build from the basic to the advanced.

Business law students take three foundational courses in their second year of law school: financial analysis, business associations, and taxation. Thereafter, students may select one of five cores, or areas of specialization: corporate and securities, commercial and financing, international business, taxation, and a general business field. In each of the fields students choose among a set of relevant courses that build on and reinforce each other. Students then complete the concentration with an advanced transactional course.

College of Letters and Science

Brian P. Copenhaver, Provost

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 825-1965
http://www.college.ucla.edu

“ ‘The Idea of a Multiversity’ is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom.”

Clark Kerr, The Uses of the University

With over 23,369 students and 800 faculty, UCLA’s College of Letters and Science is the largest academic unit in the UC system. Underscoring the “multiversity” concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 120 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a “liberal arts education” which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, life sci-
ences, physical sciences, and social sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its components: College of Letters and Science Counseling Service, Honors Programs, and Academic Advancement Program.

**Humanities**

The mission of the Division of Humanities is to promote, through scholarly inquiry and transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition and to engage in thoughtful reflection on those deep and abiding questions that relate to what it is to be human. Faculty and students reflect on art, literature, philosophy, and other expressions of the human spirit, each of which deepens their understanding. The instructional goal is to engage students in this inquiry — to further their knowledge and competence to express themselves clearly, rigorously, with style and originality.

Programs in the humanities range from teaching the craft of composition in writing programs to developing an appreciation of profound philosophers and writers from Asia, the Near East, Europe, England, and America. Pauline R. Yu is the divisional dean.

**Life Sciences**

Faculty and students in the Division of Life Sciences play an essential role in unlocking the secrets and mechanisms of life at the most fundamental level. The geography of Southern California is very conducive to life sciences research. An area as ecologically rich and diverse as Southern California is a natural laboratory for environmental physiologists and plant and animal ecologists.

Scientists in biology, microbiology and molecular genetics, and molecular biology conduct research in cell and developmental biology. Neuroscientists, neurophysiologists, psychobiologists, and behavior biologists research the underlying mechanism of the neural basis of behavior. Physiological scientists examine the regulation of human movement, neural control of breathing, and environmental conditions such as weightlessness, which affect bone and muscle structure and function. Cognitive scientists are concerned with the nature of knowledge — how people learn, remember, associate, and think, and how computers relate to thought processes. Frederick A. Eiserling is the divisional dean.

**Physical Sciences**

Departments in the Division of Physical Sciences present the results of mankind’s efforts to understand the physical aspects of the natural sciences, which include the study and understanding of the properties and characteristics of matter and energy; the science of numbers and order; studies of the origin and structure of the universe, solar system, and Earth; and climatic change. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, and observational.

Faculty and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interactions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas, and high-energy accelerator physics. Roberto Peccei is the divisional dean.

**Social Sciences**

Departments in the Division of Social Sciences are guided by the ideal of creating a deeper understanding of cultures and heritages and helping young people make sense of the rapidly changing world. By studying and comparing diverse cultures with their own, students gain self-knowledge and global awareness.

Anthropology students study human communities and social systems, archaeological records, and artifacts. Communication studies students learn about the mass media of today and their technological advances, social uses, and abuses. Leading economists investigate the applications of economic principles to business decisions. The geographic purview extends from studying the effects of location on human behavior to the Earth’s ecosystem. Courses in history bring about understanding of the forces that have shaped the many societies and cultures of this country and the world. Political scientists study the motivations of political behavior and the relations between today’s superpowers. UCLA sociologists examine subjects ranging from the everyday interaction of people to the complexities of social organizations. Scott L. Waugh is the divisional dean.

**Majors and Degrees Offered**

African Area Studies (M.A.)
African Languages (B.A.)
Afro-American Studies (B.A., M.A.)
American Indian Studies (M.A.)
American Literature and Culture (B.A.)
Ancient Near Eastern Civilizations (B.A.)
Anthropology (B.A., B.S., M.A., Ph.D.)
Applied Linguistics (C.Phil., Ph.D.)
Applied Linguistics and Teaching English as a Second Language (M.A.)
Applied Mathematics (B.S.)
Arabic (B.A.)
Archaeology (M.A., C.Phil., Ph.D.)
Art History (B.A., M.A., Ph.D.)
Asian American Studies (B.A., M.A.)
Astronomy (M.S., M.A.T., Ph.D.)
Astrophysics (B.S.)
Atmospheric, Oceanic, and Environmental Sciences (B.S.)
Atmospheric Sciences (M.S., C.Phil., Ph.D.)
Biochemistry (B.S.)
Biochemistry and Molecular Biology (M.S., C.Phil., Ph.D.)
Biological Sciences (B.S., M.A., C.Phil., Ph.D.)
Business Economics (B.A.)
Chemistry (B.S., M.S., C.Phil., Ph.D.)
Chemistry/Materials Science (B.S.)
Chicana and Chicano Studies (B.A.)
Chinese (B.A.)
Classical Civilization (B.A.)
Classics (M.A., C.Phil., Ph.D.)
Cognitive Science (B.S.)
Communication Studies (B.A.)
Comparative Literature (B.A., M.A., C.Phil., Ph.D.)
Cybernetics (B.S.)
Earth Sciences (B.A.)
East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
East Asian Studies (B.A.)
Ecology, Behavior, and Evolution (B.S.)
Economics (B.A., M.A., C.Phil., Ph.D.)
Economics/International Area Studies (B.A.)
English (B.A., M.A., C.Phil., Ph.D.)
English/Greek (B.A.)
English/Latin (B.A.)
European Studies (B.A.)
Folklore and Mythology (M.A., Ph.D.)
French (B.A., M.A., C.Phil., Ph.D.)
French and Linguistics (B.A.)
General Chemistry (B.S.)
General Mathematics (B.S.)
General Physics (B.A.)
Geochemistry (M.S., C.Phil., Ph.D.)
Geography (B.A., M.A., C.Phil., Ph.D.)
Geography/Environmental Studies (B.A.)
Geology (B.S., M.S., C.Phil., Ph.D.)
Geology — Engineering Geology (B.S.)
Geology — Paleobiology (B.S.)
Geophysics — Applied Geophysics (B.S.)
Geophysics and Space Physics (B.S., M.S., Ph.D.)
German (B.A.)
Germanic Languages (M.A., C.Phil., Ph.D.)
Greek (B.A., M.A.)
Greek and Latin (B.A.)
Hebrew (B.A.)
Hispanic Languages and Literatures (C.Phil., Ph.D.)
History (B.A., M.A., C.Phil., Ph.D.)
History/Art History (B.A.)
Indo-European Studies (C.Phil., Ph.D.)
International Development Studies (B.A.)
Iranian Studies (B.A.)
Islamic Studies (M.A., C.Phil., Ph.D.)
Italian (B.A., M.A., C.Phil., Ph.D.)
Italian and Special Fields (B.A.)
Japanese (B.A.)
Jewish Studies (B.A.)
Korean (B.A.)
Latin (B.A., M.A.)
Latin American Studies (B.A., M.A.)
Linguistics (B.A., M.A., C.Phil., Ph.D.)
Linguistics and Anthropology (B.A.)
Linguistics and Computer Science (B.A.)
Linguistics and East Asian Languages and Cultures (B.A.)
Linguistics and English (B.A.)
Linguistics and French (B.A.)
Linguistics and Italian (B.A.)
Linguistics and Philosophy (B.A.)
Linguistics and Psychology (B.A.)
Linguistics and Scandinavian Languages (B.A.)
Linguistics and Spanish (B.A.)
Marine Biology (B.S.)
Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
Mathematics/Applied Science (B.S.)
Mathematics/Economics (B.S.)
Mathematics of Computation (B.S.)
Microbiology and Molecular Genetics (B.S., M.A., Ph.D.)
Molecular Biology (Ph.D.)
Molecular, Cell, and Developmental Biology (B.S., M.A., Ph.D.)
Music History (B.A.)
Musicology (M.A., C.Phil., Ph.D.)
Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
Near Eastern Studies (B.A.)
Neuroscience (B.S.)
Philosophy (B.A., M.A., C.Phil., Ph.D.)
Physics (B.S., M.S., M.A.T., Ph.D.)
Physiological Science (B.S., M.S., Ph.D.)
Plant Biology (B.S.)
Political Science (B.A., M.A., C.Phil., Ph.D.)
Portuguese (B.A., M.A.)
Psychobiology (B.S.)
Psychology (B.A., M.A., C.Phil., Ph.D.)
Public Administration (M.P.A.)
Religion, Study of (B.A.)
Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
Russian Language and Literature (B.A.)
Russian Studies (B.A.)
Scandinavarian (M.A.)
Scandinavian Languages (B.A.)
Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
Sociology (B.A., M.A., C.Phil., Ph.D.)
Spanish (B.A., M.A.)
Spanish and Linguistics (B.A.)
Spanish and Portuguese (B.A.)
Statistics (M.S., Ph.D.)
Teaching English as a Second Language (M.A.)
Women's Studies (B.A.)

Note: The following master's degree programs require application to the doctoral degree program: English, Philosophy, Physics, Psychology. New students are not being admitted to the M.A.T. in Astronomy or the M.P.A. in Public Administration at this time.

**Undergraduate Study**

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, students are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses they are relatively free to concentrate attention on one field of interest: their major.

Students are expected to select a major by the beginning of their junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet a special need (individual major). Preparation for a major often requires prior completion of courses known as “requisites.”

**Counseling Services**

The Division of Honors and Undergraduate Programs has three counseling units to advise undergraduate students: (1) AAP Counseling Service, 1209 Campbell Hall, (310) 825-1481; (2) Honors Counseling Service, A311 Murphy Hall, (310) 825-1553; and (3) College Counseling Service, A316 Murphy Hall, (310) 825-3382. Staff members are specially trained to assist students with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance their university education.

**Declaring a Major**

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as “undeclared.” These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest.

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When they are ready to do so, they obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs their intended major.

**Assessing Progress toward the Degree**

One responsibility of a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that students read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements needed. Departmental counselors can advise students regarding progress and completion of the major requirements. It is important that students maintain an accurate assessment of progress toward the degree by utilizing departmental and College Counseling Service resources. To assist in degree planning, the College Counseling Service provides computerized Degree Progress Reports (DPRs) on request.

**Minimum Progress**

UCLA is a full-time institution, and it is expected that students complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per term. Normal progress (toward graduation in four years) may be defined as the completion of 45 units per year.
According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms are placed on probation, and students who do not pass at least 32 units during three consecutive terms are subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

**Majors**
A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. Students who have been away from the University for several terms should consult with their major department or curriculum adviser concerning the requirements under which they are to graduate. There are three categories of majors in the College of Letters and Science: departmental majors, interdepartmental majors, and individual majors.

**Departmental Majors**
A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 98 departmental majors currently offered by the college.

**Interdepartmental Majors**
An interdepartmental major consists of at least 13 related courses, of which at least 11 are upper division and no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 24 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Detailed descriptions of the interdepartmental majors are given in the Curricula and Courses section of this catalog.

**Individual Majors**
If students have some unusual but definite academic interest for which no suitable major is offered at the University and have completed at least three terms of work (nine courses) at the University with a grade-point average of 3.4 or better, they may plan an individual major. The consent of the Division of Honors and Undergraduate Programs and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. For further details about individual majors, contact the Honors Programs Office, A311 Murphy Hall, (310) 825-1553.

**Returning Students and Their Majors**
Students returning to the University to resume their studies after an absence of several years may find their previous major area of study no longer available. They then must select a current major in which to complete their studies. Consult the College of Letters and Science Counseling Service for assistance.

**Minors**
Students may choose from 46 different college/school minors, each of which must be taken jointly with an organized departmental or interdepartmental major. For a list of minors see the Undergraduate Study section. Detailed descriptions of the minors are given in the Curricula and Courses section of this catalog.

**Specializations**
Students may choose from eight different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance their work in certain areas. Each of these specializations must be taken jointly with an organized departmental or interdepartmental major. For a list of specializations see the Undergraduate Study section. Descriptions of the specializations are given in the Curricula and Courses section of this catalog. For descriptions of the Computing specialization, see the programs in anthropology, cybernetics, economics, geography, linguistics, mathematics, mathematics/economics, organismic biology, ecology, and evolution, psychology, and sociology.

**Life Sciences Core Curriculum**
For information on the life sciences core curriculum, see the Curricula and Courses section of this catalog.

**Student Research Program**
For information on the Student Research Program (SRP), see Alternative Academics in the Undergraduate Study section of this catalog.

**Double Majors**
Students in good academic standing may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and students must obtain the approval of both departments. With few exceptions, double majors in the same department are unacceptable. Students must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

**Changing Majors**
Students in good academic standing who wish to change their major may petition to do so provided they can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if students are on probation or have begun their last term.

Students who fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

**Study List**
The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per term. For exceptions, see Minimum Progress earlier in this section. Students may carry four and one-half courses (18 units) without petition. After the first term, students may petition to enroll in as many as five courses if they attained at least a B average the preceding term in a program of at least three graded courses. First-term transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

**Requirements for Bachelor’s Degrees**
Each student must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on department requirements, see the Curricula and Courses section of this catalog.
Structure of a Degree
Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor’s degree:

University Requirements
(1) Subject A or English as a Second Language (ESL)
(2) American History and Institutions

College Requirements
(1) English Composition or ESL Composition
(2) Quantitative Reasoning
(3) Foreign Language
(4) General Education Requirements

Department Requirements
(1) Preparation for the Major
(2) Major Requirements

Electives
The remaining units, defined as electives, are courses which vary according to student interests and goals. When selecting courses, keep the following degree criteria in mind:

Scholarship
Students must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of their major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Academic Residence Requirement
See Academic Residence Requirements below.

Upper Division Unit Requirement
At least 60 units must be upper division (numbered 100-199) for students entering Fall Quarter 1999 and thereafter.

University Requirements
For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

College Requirements
The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, academic residence, English composition, quantitative reasoning, foreign language, and general education requirements.

Unit Requirements
Students must satisfactorily complete for credit a minimum of 180 units for the bachelor’s degree. At least 60 of the 180 units must be upper division (numbered 100-199) for students entering Fall Quarter 1999 and thereafter. A maximum of 216 (228 for double majors and special programs) units is allowed. Students with advanced placement (transfer) credit may exceed the unit maximum by the amount of that credit.

Scholarship and Major Requirements
Students must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor’s degree. They must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Academic Residence Requirements
Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. No more than 16 of the 68 units may be completed in UCLA Summer Sessions. While enrolled in the college students must complete at least 10 upper division courses (40 units), including six courses in the major. These academic residence requirements apply to all students, both continuing and transfer.

College Writing Requirement
Note: Students must complete the University’s Subject A or English as a Second Language (ESL) requirement prior to completing the college’s writing requirement.

Effective Fall Quarter 1999, all new students admitted to the College of Letters and Science are required to complete a two-quarter English Composition Writing I and Writing II requirement. Continuing and returning students fulfill the requirements in effect prior to Fall Quarter 1999.

Two courses in English composition are required for graduation. Both courses must be taken for a letter grade, and students must receive grades of C or better (C– grades are not acceptable). The Writing I requirement must be satisfied by completing English Composition 3, or an equivalent course approved by the Letters and Science Faculty Executive Committee, within the first three quarters of enrollment.

The Writing I requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Tests in English; a combination of a score of 720 or better on the SAT II Subject Test in Writing and superior performance on the English Composition 3 Proficiency Examination; or, for students whose native language is not English who satisfy the Subject A requirement with English as a Second Language 35, successful completion of English as a Second Language 36 or an equivalent.

The Writing II course is selected from a list of courses approved by the Faculty Executive Committee. Consult the College of Letters and Science Counseling Service for an updated list. The Writing II course may also be applied toward the general education requirements or preparation for the major.

Transfer Students
Transfer students with 90 or more units who have completed the Intersegmental General Education Transfer Curriculum will have satisfied both parts of the English Composition requirement.

No transfer student is admitted to the college without completing, with a grade of C or better (a grade of C– is not acceptable), a college-level writing course that the Office of Undergraduate Admissions and Relations with Schools accepts as equivalent to English Composition 3.

English as a Second Language (ESL) Students
Students whose native language is not English may satisfy the English Composition requirement by completing English as a Second Language 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

Quantitative Reasoning and Foreign Language Requirements
In the College of Letters and Science students must demonstrate basic skills in quantitative reasoning and satisfy the foreign language requirement.

Note: All courses taken to satisfy these requirements must be completed with a grade of Passed or C or better.

Quantitative Reasoning
May be satisfied by achieving an SAT I mathematics score of 600 or better, an SAT II mathematics subject test score of 550 or better, or by completing one of the following courses: Anthropology M80, Biostatistics 100A, 100B, Computer Science 10C, 10F, Economics M40, Geography M40, Mathematics 2 (or any higher numbered course except 38A, 38B, and 104), Philosophy 31, Political Science 6, Program in Computing 10A, 10B, 10C, Sociology M18, 109A, Statistics 10, M11, M12, M21A, M21C.

Foreign Language
May be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA’s level three or above OR (2) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit OR (3) presenting a UCLA foreign language departmental examination score indicating competency through

Note: All UCLA course equivalents consist of lower division advanced placement units. Students may not repeat for units or grade points an AP Test credit that has been given UCLA course number equivalency (e.g., History 13A-13B-13C).
level three (consult the Schedule of Classes for times and places of these regularly scheduled examinations).

If students wish to demonstrate proficiency in a language which is taught in a UCLA department but for which there is no scheduled examination, they should contact the appropriate department to arrange for one. Students wishing to take an examination in a language not taught at UCLA should contact a college counselor.

The following language courses may be used to fulfill the foreign language requirement:

- African Languages (Linguistics) 1A-1B-1C or 15 (Swahili); 7A-7B-7C or 17 (Zulu); 11A-11B-11C or 25 (Yoruba); 31A-31B-31C or 35 (Bambara); 41A-41B-41C or 45 (Hausa); 51A-51B-51C (Amharic)
- Afrikaans (Germanic Languages) 105A, 105B
- Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B-140C (Sumerian)
- Arabic (Near Eastern Languages) 1A-1B-1C
- Armenian (Near Eastern Languages) 101A-101B-101C or 104A-104B-104C
- Berber (Near Eastern Languages) 101A-101B-101C
- Bulgarian (Slavic Languages) 103A-103B-103C
- Chinese (East Asian Languages) 1, 2, and 3, or 1A and 2A, or 3R or 8
- Czech (Slavic Languages) 102A-102B-102C
- Dutch (Germanic Languages) 103A-103B, and 103C, or 104A-104B
- French 1, 2, and 3, or 8
- German (Germanic Languages) 1, 2, and 3, or 8
- Greek (Classics) 1, 2, and 3, or 16; 15 (Modern Greek)
- Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C
- Hungarian (Slavic Languages) 101A-101B-101C
- Indigenous Languages of the Americas (Linguistics) 17 or 18A-18B-18C (Quechua)
- Iranian (Near Eastern Languages) 1A-1B-1C or 20A-20B-20C (Persian)
- Italian 1, 2, and 3, or 1A and 2A
- Japanese (East Asian Languages) 1, 2, and 3, or 8
- Korean (East Asian Languages) 1, 2, and 3, or 1A, 2A, and 3A, or 8
- Latin (Classics) 1, 2, and 3, or 16
- Polish (Slavic Languages) 102A-102B-102C
- Portuguese (Spanish and Portuguese) 1, 2, 3
- Romanian (Slavic Languages) 101A-101B-101C or 104
- Russian (Slavic Languages) 1, 2, and 3, or 10 or 11A-13B (two units each) or 15A-15B
- Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)
- Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)
- Serbian/Croatian (Slavic Languages) 103A-103B-103C
- South and Southeast Asian Languages (Applied Linguistics and Teaching English as a Second Language) 40A-40B-40C (Hindi); 50A-50B-50C (Vietnamese); 60A-60B-60C (Thai); 70A-70B-70C (Tagalog)
- Spanish (Spanish and Portuguese) 1, 2, and 3, or 2A and 3A
- Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)
- Ukrainian (Slavic Languages) 101A-101B-101C
- Yiddish (English) 101A, 101B, and 101C, or 102B

**General Education (GE) Requirements**

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college — humanities, physical sciences, social sciences, and life sciences — students are encouraged to explore the different possibilities for further university study. Whether or not students have a specific educational goal, general education requirements are designed to broaden their intellectual perspective and to set them on the path to becoming educated members of society.

The set of GE course requirements students follow is specified on the list labeled GE Course List. They must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

All students entering UCLA in Fall Quarter 1999 with 45 or more quarter units are not required to complete the complementary course requirement in physical sciences.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

**General Education Clusters**

General education clusters, available to entering freshmen only, are an option for satisfying general education requirements. The clusters span three quarters and are interdisciplinary team-taught courses designed to introduce students to multiple areas of knowledge. They focus on a common topic and are organized in such a way that students can explore how different disciplines converge and diverge in their approach to a particular problem.

General education clusters are taught by some of the University’s most distinguished faculty and are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. During Fall and Winter Quarters, instruction in the clusters consists of lecture courses taught in concert with discussion sections. In Spring Quarter students enroll in one of a number of small satellite seminars whose topics are related to the cluster theme.

For the current cluster course offerings, refer to the general education website at [http://www.college.ucla.edu/ge/clusters.htm](http://www.college.ucla.edu/ge/clusters.htm).

**Course Exemptions**

Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

**Course Substitutions**

Two lower division seminars which have been approved for GE credit may be substituted for courses on the GE Course List. Students may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the General Education Handbook, and descriptions are listed in the quarterly Schedule of Classes under Special Programs.

**Advanced Placement Credit**

For application of advanced placement (AP) credit on the general education requirements, see the Advanced Placement chart or consult a college counselor.

**Reciprocity with Other UC Campuses**

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the college’s GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a college counselor regarding eligibility for this option.

**Interssegmental General Education Transfer Curriculum**

Transfer students from California community colleges have the option to fulfill UCLA’s lower division general education requirements by complet-
ing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although general education or transfer core courses are graduation requirements rather than admission requirements, students are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the College of Letters and Science general education requirements.

**General Education Groupings by Major**

For the purpose of these requirements, departmental and interdepartmental majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

### A. Humanities

#### A1. Literature

- African Languages
- American Literature and Culture
- Arabic
- Chinese
- Comparative Literature
- English
- English/Greek
- English/Latin
- French
- German
- Greek
- Greek and Latin
- Hebrew
- Italian
- Italian and Special Fields
- Japanese
- Korean
- Latin
- Portuguese
- Russian Language and Literature
- Scandinavian Languages
- Slavic Languages and Literatures
- Spanish
- Spanish and Portuguese

#### A2. Philosophy

- Philosophy

#### A3. Language and Linguistics

- French and Linguistics
- Linguistics
- Linguistics and all special fields
- Spanish and Linguistics

#### A4. Culture and Civilization

- Ancient Near Eastern Civilizations
- Classical Civilization
- East Asian Studies
- Iranian Studies
- Jewish Studies
- Near Eastern Studies
- Religion, Study of
- Russian Studies

#### A5. The Arts

- Art History
- Music History

### B. Physical Sciences

- Atmospheric & Oceanic Sciences
- Biochemistry
- Chemistry
- Chemistry/Materials Science
- Cybernetics
- Earth Sciences
- Geology
- Geophysics
- Mathematics
- Mathematics/Applied Science
- Mathematics/Economics
- Mathematics of Computation
- Physics

### C. Social Sciences

#### C1. Historical Analysis

- History
- History/Antiquity

#### C2. Social Analysis

- Afro-American Studies
- Anthropology
- Asian American Studies
- Chicana and Chicano Studies
- Communication Studies
- Economics
- European Studies
- Geography
- Geography/Environmental Studies
- International Development Studies
- Latin American Studies
- Political Science
- Sociology
- Women’s Studies

### D. Life Sciences

- Biology
- Cognitive Science
- Ecology, Behavior, and Evolution
- Marine Biology
- Microbiology and Molecular Genetics
- MCD Biology

### College of Letters and Science GE Course List

Courses marked with an asterisk (e.g., Honors Collegium +1. Transformations of the West in the 20th Century) are listed in more than one category and can fulfill GE requirements in only one of the cross-listed categories.

Completion of a general education cluster earns the equivalent of four general education courses distributed among the four categories of GE requirements. Specific GE credit may vary from year to year based on the cluster course content. Inquire at the General Education Office, A265 Murphy Hall, or refer to the general education website at http://www.college.ucla.edu/ge/clusters.htm for specific general education application.

All honors sections of courses listed below also fulfill GE requirements.

#### A. Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

##### A1. Literature

- Classics
- 40. Survey of Greek Literature in Translation
- 41. Survey of Latin Literature in Translation

##### Comparative Literature (formerly Humanities)

- 1A. World Literature: Antiquity to Early Middle Ages
- 1B. World Literature: Late Middle Ages to the 17th Century
- 1C. World Literature: Age of Enlightenment to the 20th Century
- 1D. Great Books from the World at Large
- 2A. Survey of Literature: Antiquity to Early Middle Ages
- 2B. Survey of Literature: Late Middle Ages to the 17th Century
- 2C. Survey of Literature: Age of Enlightenment to the 20th Century
- 2D. Survey of Literature: Great Books from the World at Large

##### English

- 10A. English Literature to 1660
- 10B. English Literature, 1660 to 1832
- 70. Major British Authors before 1800
- 75. Major British Authors, 1800 to the Present
- 80. Major American Authors
- 85. The American Novel
- 88J. Lower Division Seminar: Introduction to Asian American Fiction
- 88L. Lower Division Seminar: Poetics of Myth
- 88M. Lower Division Seminar: Three Philosophical Novels
- 88N. Lower Division Seminar: When Myth Systems Collide -- 20th-Century Literature and Culture Confront Traditional Myths
- 90. Shakespeare
- 95A. Introduction to Poetry
- 95B. Introduction to Drama
- 95C. Introduction to Fiction
- 96. The Short Story in England and America

##### Folklore and Mythology

- 89. Poetics of Myth

##### French

- 12. Introduction to Study of French Literature (in French)
- 114A, 114B, 114C. Survey of French Literature (in French)

##### German (Germanic Languages)

- 50A. Masterworks of German Literature in Translation: Medieval Period through Classicism
- 50B. Masterworks of German Literature in Translation: Romanticism to the Present
A2. Philosophy

Honors Collegium
32. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences
+50A. Greek Views of Humanity

Philosophy
1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Introduction to Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
21. Skepticism and Rationality
22. Introduction to Ethical Theory

A3. Language and Linguistics

Classics
55. Origins and Nature of English Vocabulary

English
88K. Lower Division Seminar: Introduction to English Etymology

Honors Collegium
56. Language as a Window to the Mind

Language
Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

Linguistics
1. Introduction to Study of Language
2. Language in the U.S.
Jewish Studies (Near Eastern Languages)
10. Social, Cultural, and Religious Institutions of Judaism
Korean (East Asian Languages)
50. Korean Civilization
Near Eastern Languages
50A. Introduction to Near Eastern Languages and Cultures: Ancient Near East
50B. Introduction to Near Eastern Languages and Cultures: Medieval Near East
50C. Introduction to Near Eastern Languages and Cultures: Modern Near East
Portuguese (Spanish and Portuguese)
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
46. Brazilian Culture and Civilization
Russian (Slavic Languages)
30. Russian Literature and World Cinema
99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century
Slavic (Slavic Languages)
99. Introduction to Slavic Civilization
Spanish (Spanish and Portuguese)
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
A5. The Arts
Afro-American Studies
M110A, M110B. African American Musical Heritage
Art History
50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Introduction to African Art
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art
*88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship
Chicana and Chicano Studies
M108A. Music of Latin America
Classics
42. Cinema and the Ancient World
Design
10. Nature of Design
Ethnomusicology
20A, 20B, 20C. Musical Cultures of the World
M108A, M108B. Music of Latin America
M110A, M110B. African American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music
Film and Television
106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change
Folklore and Mythology
M154A, M154B. African American Musical Heritage
Honors Collegium
*13. Realism in Times of Crisis: French and Italian Cinema of the 1930s and 1940s
*28. Misleading Mirror: Self-Portraits in Word and Image
34. Film and Society: The Hollywood Myth of Ancient Rome
Music
15. Art of Listening
Music History
2A, 2B. Introduction to the Literature of Music
5. History of Rock and Roll
7. Film and Music
13. 20th-Century Music of the Western World
133. Bach
134. Beethoven
135A, 135B, 135C. History of Opera
Theater
102E. Theater of Non-European World
104C. History of American Theater: WWI to the Present
World Arts and Cultures
134. History of Dance in Culture and Performance
135. Dance in the U.S.
181A. Dance Cultures of Asia
182. Dance in Africa and the African Diaspora
C187. Dance in Native American Cultures
B. Physical Sciences
Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:
Astronomy
2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe
4. Universe of Stars and Stellar Systems
5. Life in the Universe
6. Cosmology: Our Changing Concepts of the Universe
81. Astrophysics I: Stars and Nebulae
82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology
88A. Lower Division Seminar: Cosmic Evolution
Atmospheric Sciences
2. 2E. Air Pollution
3. 3E. Introduction to the Atmospheric Environment
4. California Weather and Climate
5. Climates of Other Worlds
6. 6E. Climate and Climatic Change
10. Introduction to the Earth System
Chemical Engineering
2. Technology and the Environment
Chemistry and Biochemistry
2. Introductory Chemistry
14A. Chemical Structures and Equilibria
14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy
14BL. General and Organic Chemistry Laboratory
15. Survey of Organic Chemistry and Biochemistry
15L. Laboratory in Elementary Organic Chemistry and Biochemistry
20A. Chemical Structure
20B. Chemical Energetics and Change
20L. General Chemistry Laboratory
Civil and Environmental Engineering
3. Fundamentals of Environmental Engineering Science
Computer Science
2. Great Ideas In Computer Science
Earth and Space Sciences
1. Introduction to Earth Science
2. Earth History
5. Environmental Geology of Los Angeles
8. Earthquakes
9. Origin and Evolution of Solar System
*15. Introduction to Oceanography
*20. Natural History of Southern California
Geography
1. Physical Environment
Honors Collegium
*5. Science and the Human Condition
*11. Galileo and the Scientific Revolution from the 17th to 21st Century
*24. 21st Century: Technology, Society, and Ethics
35. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life
C. Social Sciences

Four courses (two each from Groups C1 and C2):

C1. Historical Analysis

Two courses from a single sequence are recommended:

Classics
*10. Survey of Classical Greek Culture
*20. Survey of Roman Civilization

History
1A, 1B, 1C. Introduction to Western Civilization
*2A. Power, Ethics, and Technological Change
*2B. Social Knowledge and Social Power
3A, 3B, 3C. Introduction to History of Science
3D. Themes in History of Medicine
4. Introduction to History of Religions
8A. Colonial Latin America
8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
8C. Latin American Social History
*9A. Introduction to Asian Civilizations: History of India
*9C. Introduction to Asian Civilizations: History of Japan
*9D. Introduction to Asian Civilizations: History of the Near and Middle East
*10A, *10B. Introduction to Civilizations of Africa
*11A, *11B. History of China
13B. History of the U.S. and Its Colonial Origins: 19th Century
13C. History of the U.S. and Its Colonial Origins: 20th Century
20. World History to A.D. 600
21. World History, 1200 to 1800
22. Contemporary World History, 1870 to the Present

Honors Collegium
*2. Comparative Genocide
*3. Historical and Sociological Perspectives on Women and Work
*11. Galileo and the Scientific Revolution from the 17th to 21st Century
42. European Expansion in Age of Columbus
62. Community and Self-Interest in History of American Culture
68. History of Social Thought
*71. History through Clothes
84. Los Angeles, 1900 to 2000: History of a 20th-Century City
90. French Revolution: Ideologies and Images
95. Art, Politics, and Social Change in 19th-Century England and France
*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

Political Science
10. Introduction to Political Theory

C2. Social Analysis

Afro-American Studies
M5. Social Organization of Black Communities

American Indian Studies
10. Introduction to American Indian Studies

Anthropology
8. Archaeology: An Introduction
9. Culture and Society
33. Culture and Communication
M70. Politics of Reproduction

Asian American Studies
21. Asians and Pacific Islanders in American Society

Chicana and Chicano Studies
10B. Chicanos in American Society

Communication Studies
10. Introduction to Communication Studies
88C. Lower Division Seminar: Future of Mass Communication

Economics
1. 2. Principles of Economics
5. Introductory Economics

Geography
3. Cultural Geography
4. Globalization: Regional Development and World Economy

History
*2A. Power, Ethics, and Technological Change
*2B. Social Knowledge and Social Power

Honors Collegium
*2. Comparative Genocide
*3. Historical and Sociological Perspectives on Women and Work
*11. Galileo and the Scientific Revolution from the 17th to 21st Century

American Indian Studies
10. Introduction to American Indian Studies

General Education

Cultural Geography
4. Globalization: Regional Development and World Economy

History
*2A. Power, Ethics, and Technological Change
*2B. Social Knowledge and Social Power

Honors Collegium
*2. Comparative Genocide
*3. Historical and Sociological Perspectives on Women and Work
*11. Galileo and the Scientific Revolution from the 17th to 21st Century
42. European Expansion in Age of Columbus
62. Community and Self-Interest in History of American Culture
68. History of Social Thought
*71. History through Clothes
84. Los Angeles, 1900 to 2000: History of a 20th-Century City
90. French Revolution: Ideologies and Images
95. Art, Politics, and Social Change in 19th-Century England and France
*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

Political Science
10. Introduction to Political Theory

C2. Social Analysis

Afro-American Studies
M5. Social Organization of Black Communities

American Indian Studies
10. Introduction to American Indian Studies

Anthropology
8. Archaeology: An Introduction
9. Culture and Society
33. Culture and Communication
M70. Politics of Reproduction

Asian American Studies
21. Asians and Pacific Islanders in American Society

Chicana and Chicano Studies
10B. Chicanos in American Society

Communication Studies
10. Introduction to Communication Studies
88C. Lower Division Seminar: Future of Mass Communication

Economics
1. 2. Principles of Economics
5. Introductory Economics

Geography
3. Cultural Geography
4. Globalization: Regional Development and World Economy

History
*2A. Power, Ethics, and Technological Change
*2B. Social Knowledge and Social Power

Honors Collegium
*2. Comparative Genocide
*3. Historical and Sociological Perspectives on Women and Work
*11. Galileo and the Scientific Revolution from the 17th to 21st Century
42. European Expansion in Age of Columbus
62. Community and Self-Interest in History of American Culture
68. History of Social Thought
*71. History through Clothes
84. Los Angeles, 1900 to 2000: History of a 20th-Century City
90. French Revolution: Ideologies and Images
95. Art, Politics, and Social Change in 19th-Century England and France
*96. Cultural Dimensions of Apartheid and Post-Apartheid South Africa

Political Science
10. Introduction to Political Theory
D. Life Sciences

Three courses from the following, one of which must have a laboratory and/or demonstration component:

Anthropology
7 (Human Evolution) or 12 (Principles of Human Evolution: Comparative Analysis)
10. Principles of Human Evolution: Genetic Basis
Earth and Space Sciences
*15. Introduction to Oceanography
16. Major Events in History of Life
17. Dinosaurs and Their Relatives
*20. Natural History of Southern California

Geography
2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World
5. People and the Earth's Ecosystems

Honors Collegium
*5. Science and the Human Condition
8. Communication among Organisms
25. Human Genome: Prospects for a Super Race?
*57. Life and Sciences of Complexity
63. Emerging Infections and Their Effects on Society: Past, Present, and Future
66. Substance Abuse and the Brain

Life Sciences
1. Evolution, Ecology, and Biodiversity
2. Cells, Tissues, and Organs

Microbiology and Molecular Genetics
3. Introduction to Molecular Biology
4. Genetics
15. Life, Concepts, and Issues

Molecular, Cell, and Developmental Biology
6. Introduction to Microbiology
7. Developments in Biotechnology

Organismic Biology, Ecology, and Evolution
10. Plants and Civilization
*11. Biomedical Research Issues in Minority Communities

Psychology
10. Introductory Psychology
*88A. Lower Division Seminar: Stress, Adaptation, and Coping

Social Sciences
20. Racial Minorities in the U.S.

Sociology
1. Introductory Sociology
2. Changing Society and Making History
3. Sociology of Everyday Life
4. Jobs and Careers: Sociological Approach
5. Social Organization of Black Communities
31. Dilemmas of Third World Development

Women's Studies
10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

General Education Clusters

M1A-M1B-M1C. Global Environment. (Same as Environment M1A-M1B-M1C.)

Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

Two life sciences courses
Two physical sciences courses

In addition, the cluster also satisfies the laboratory and/or demonstration component for both life sciences and physical sciences, as well as the complementary course requirement for physical sciences.

20A-20B-20C. Interracial Dynamics in American Culture, Society, and Literature.

Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

One humanities/culture and civilization course
Two humanities/literature courses
One social sciences/historical analysis course

Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

One humanities/culture and civilization course
One humanities/philosophy course
One social sciences/historical analysis course
One social sciences/social analysis course

70A-70B-70C. Evolution of Cosmos and Life.

Students who complete the entire sequence of three courses (15 units total) receive GE credit for four courses under the current GE program, distributed as follows:

Two life sciences courses
Two physical sciences courses

In addition, the cluster also satisfies the laboratory and/or demonstration component for both life sciences and physical sciences, as well as the complementary course requirement for physical sciences.
Credit Limitations
Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final term before graduation. Students should consult a counselor in the College Counseling Service if they have questions.

Subject A
If students do not satisfy the Subject A requirement prior to enrolling at UC, they must pass an approved course or other program prescribed by their UC campus of residence. Only after satisfying the Subject A requirement can they take for transfer credit an English composition course after enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College
After completing 105 quarter units (26.25 courses) toward the degree in all institutions attended, students are allowed no further unit credit for courses completed at a community college.

Physical Education
No more than four units in physical education activities courses may be applied toward the bachelor’s degree.

300- and 400-Level Courses
No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor’s degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

Performance Courses
No more than 12 units of music and/or dance performance courses (Ethnomusicology 91A-91Z, 191A-191Z, Music C90A through C90N, and World Arts and Cultures 71B through 79, C171B through C179) may be applied toward the bachelor’s degree whether taken at UCLA or another institution.

Foreign Language
Credit is not allowed for completing a less advanced course in grammar and/or composition after students have completed a more advanced course. College credit for an international student’s native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Programs
Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor’s degree.

Advanced Placement (AP) Tests
Advanced Placement (AP) Test credit may not be applied toward a degree unless students had less than 36 units of credit at the time of the examination(s). See the Advanced Placement chart for UCLA course equivalents and credit allowed for general education requirements.

ROTC Courses
For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the requirements for the bachelor’s degree; for students contracted in the Military Science Department, 26 units of military science credit may be applied; for students contracted in the Naval Science Department, 26 units of naval science credit may be applied.

Independent Study Courses
No more than two courses (eight units) of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Physics 1A, 2AH, 3A, 6A, 8A, 10
Any two or more courses from Physics 1A, 2AH, 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics
No credit is allowed for more than one lower division course in statistics (Anthropology M80, Economics M40, Geography M40, Political Science 6, Psychology 41, Sociology M18, Statistics 10, M11, M12, M21A, M21C) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program
Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination
Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or UCLA Honors Programs.

Students may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before they may petition for credit by examination in another course. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office, A311 Murphy Hall.

Honors

College Honors
College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

College Honors is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework or 36 units of honors coursework that include a senior research project/thesis based on original research or 28 units of honors coursework if they entered College Honors as a transfer student. With the assistance of Honors Programs counselors, students integrate this coursework throughout their undergraduate education with other University, college, and major requirements for the bachelor’s degree. In this way, these units need not be above and beyond their other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, some preferential preenrollment in classes each term, access to specially designed honors classes, eligibility for unique scholarships and research stipends, counseling on graduate and professional programs, graduate library privileges, and letters of verification for graduate and professional school applications. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA and who file their housing application on time are also offered preferred on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and a combined SAT score of 1,360 or better (on one test date) or an ACT score of 31 or better or (2) graduate in the top three percent of their high school class. Entering transfer students are admitted with a transfer GPA of 3.5. Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate.
Students may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Honors Programs Office.

Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, students must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places them in the top five percent of College of Letters and Science graduates (GPA of 3.817 or better) for summa cum laude, the next five percent (GPA of 3.715 or better) for magna cum laude, and the next ten percent (GPA of 3.566 or better) for cum laude. Coursework taken on the Education Abroad Program is applied toward honors at graduation. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in the graduating year (fall, winter, spring, summer) determine eligibility. Students should consult their graduation-year catalog or the quarterly Schedule of Classes for the most current calculations of Latin honors.

Provost's Honors

The Provost's Honors list recognizes high scholastic achievement in any one term. The following criteria are used to note Provost's Honors on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I; (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Provost's Honors are automatically recorded on the transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility to participate in the college/school honors program. Students must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees students must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. Students interested in becoming Departmental Scholars should consult their department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Honors Programs Office in A311 Murphy Hall.

Honors Collegium

The Honors Collegium is a unique and innovative educational alternative of seminars and courses designed primarily for students in their freshman and sophomore years. Some upper division courses are also offered. Refer to Honors Collegium in the Curricula and Courses section of this catalog for a complete description of the program.

Honors Programs Office

The Honors Programs Office, located in A311 Murphy Hall (310-825-1553, 825-3786, http://www.college.ucla.edu/up/WhoWeAre/Honors/), provides academic counseling and services for College Honors students, Departmental Scholars, Education Abroad Program students, and students pursuing individual majors. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include a specialized honors curriculum, academic counseling, degree checks, assistance with petitions and, for College Honors students only, letters describing the program to graduate and professional schools.

A variety of scholarships and awards for qualified continuing students is also available.

In addition, the Honors Programs Office administers Phi Beta Kappa (national honor society).

Preparing for a Professional School

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each group of courses is to assist students if they plan to apply to a professional school at the end of their sophomore (90 units) or junior (135 units) year.

If students are not accepted by a professional school or plan to receive their degree before entering, they must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as “undeclared” majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Information and counseling on preparing for professional schools and assistance in filing applications and preparing for interviews are available through the Preprofessional Advising Office, A334 Murphy Hall. Workshops, drop-in counseling, reference letter services, and MCAT, DAT, AMCAS, LSAT, GRE, GMAT, and other applications are available. For more information, call (310) 825-1817 or visit the website at http://www.college.ucla.edu/up/PAO/.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. Students should determine and satisfy the specific requirements of the dental schools to which they expect to apply.

To be adequately prepared for the predental curriculum, students should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements

(1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements

(1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30L, and 130A/130AL, 153A, 153L; (2) English Composition 3, English 4 (or upper division composition in place of 4; English Composition 3 taken at UCLA or the equivalent taken at another college satisfies this requirement, but credit for English Composition 3 and/or English 4 through Advanced Placement does not); (3) Life Sciences 1, 2, 3, 4, and two biology courses with laboratory; (4) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C; (5) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and/or music, and philosophy should also be included.

For further information, consult Admissions Requirements of U.S. and Canadian Dental Schools, AADS, 1625 Massachusetts Avenue NW, Suite 101, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Preprofessional Advising Office (310-825-1817).

Predental Hygiene Curriculum: Two Years

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at any two- or four-year college institution; the last two years must be taken at the School of Dentistry at the University of California, San Francisco.

Admission to UCSF is by competitive application. The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the Announcement of the School of Dentistry, UC San Francisco.
The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

**Preprofessional Advising Office at (310) 825-1817.**

**Predental Hygiene Curriculum Requirements**

(1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental curriculum); (3) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, 153A, 153L; (4) one year of English which includes Composition 3; (5) Life Sciences 1, 2, 3, 4; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended. For more information, call the Preprofessional Advising Office at (310) 825-1817.

**Premedical Studies: Four Years**

If students intend to apply for admission to a medical school and wish to complete the requirements for a bachelor’s degree before such admission, they should select a major within the College of Letters and Science. **Medical schools have no preference as to major. Students should choose the major in which they are most interested and can do best.** In addition to fulfilling the requirements of the selected major, they should satisfy the specific requirements for medical schools to which they expect to apply.

High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French, German, or Spanish), two units. It is desirable that a course in freehand drawing be taken in high school.

**Premedical Curriculum Requirements**

The following courses are usually required for admission to the UCLA School of Medicine: (1) two years of college biology/life sciences to include the study of organismic, cellular, molecular, developmental, and genetic biology, including at least one year of laboratory courses and one year of upper division courses (Life Sciences 1, 2, 3, 4, plus additional life sciences courses to meet the general and laboratory coursework requirements); (2) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, 153A, 153L; (3) 12 quarter units of English, including at least one course in English composition (English Composition 3 taken at UCLA or the equivalent taken at another college satisfies this requirement, but credit for English Composition 3 and/or English 4 through Advanced Placement does not; an intermediate or advanced composition course is highly recommended); (4) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, students should consult the following publications: Medical School Admission Requirements, U.S. and Canada, Association of American Medical Colleges, 2450 N Street NW, Washington, DC 20037-1126; The Education of Osteopathic Physicians, ACOM, 5510 Friendship Boulevard, Suite 310, Chevy Chase, MD 20815-7231; and The New MCAT Student Manual (also an AAMC publication available at the above AAMC address). For more information, call the Preprofessional Advising Office at (310) 825-1817.

**Prenursing Curriculum**

Contact the Preprofessional Advising Office at (310) 825-1817 for information on prenursing curriculum requirements.

**Preoptometry Curriculum: Three Years**

A three-year program designed to prepare students for admission to optometric schools may be completed in the College of Letters and Science. Students planning to transfer to the School of Optometry at Berkeley should contact Sandy Jaeger, School of Optometry, University of California, Berkeley, CA 94720, (510) 642-9537, as early in their preprofessional studies as possible.

Students are adequately prepared for preoptometric studies if they have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

**Specific UC Berkeley School of Optometry Requirements**

(1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; (2) English Composition 3, and English 4 or 100; (3) Life Sciences 1, 3; (4) Mathematics 1, 5A, and 3B, or 3A, 3B, and 3C, or 31A, 31B, and Statistics 10; (5) Microbiology and Molecular Genetics 6 or 101; (6) Physics 1A, 1B, and 1C, or 3A, 3B, and 3C, or 6A, 6B, and 6C; (7) introductory anatomy (Physiological Science 13) and physiology (Organismic Biology, Ecology, and Evolution M166); (8) Psychology 10. Recommended: neuroanatomy, cell physiology, or additional statistics courses.

The balance of the 135 quarter units required for admission may be selected from social sciences, foreign languages, and humanities.

For further information, obtain the booklet Information for Applicants to Schools and Colleges of Optometry from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141, or call the Preprofessional Advising Office at (310) 825-1817.

**Prepharmacy Curriculum: Two Years**

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum students must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, students should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.

Students who have completed the prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy on the San Francisco campus. A personal interview may be required. Applicants should contact the school in early fall of the year preceding the September of proposed admission. Contact the Office of Student Affairs, School of Pharmacy. Applications and admission information may be obtained from the University of California, San Francisco, School of Pharmacy Student Affairs, Box 0150, San Francisco, CA 94143-0150 (415-476-2732).

**Prepharmacy Curriculum Requirements**

(1) Subject A; (2) American History and Institutions; (3) Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, 130A/130AL, 153A, 153L; (4) English Composition 3, English 4; (5) Life Sciences 1, 2, 3; (6) intermediate algebra and trigonometry (if not completed in high school), Mathematics 3A and 3B, or 31A and 31B; (7) Physics 1A, 1B, and 4AL, or 3A and 3B, or 6A and 6B; (8) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities.

Requirements for schools change on a yearly basis; it is best to check with each individual school for specific requirements. For further information, call the Preprofessional Advising Office at (310) 825-1817.

**Prephysical Therapy Curriculum: Three or Four Years**

Students who intend to apply for admission to a physical therapy school should select a major (Physiological Science and Psychology are commonly selected) and complete the following requisite courses: (1) Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; (2) Life Sciences 1, 2, 3; (3) Physics 3A, 3B, 3C; (4) introductory anatomy (Physiological Science 13) and physiology (Organismic Biology, Ecology, and Evolution M166); (5) Psychology 10, 115, 127, 130; (6) one course in statistics and one in computing. The req-
uisite courses should be taken for a letter grade; grade-point averages for these courses should not be lower than 3.0, with no grade lower than a C. Students should write to schools with physical therapy programs early in their sophomore year for specific admission requirements and application deadlines. Information concerning in-state and out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th Street NW, Washington, DC 20005, and the Preprofessional Advising Office (310-825-1817).

**Prepublic Health Studies**

The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathematics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses each in mathematics, biological sciences, and social sciences, and one course in physical sciences.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school’s announcement booklet for additional requirements or recommendations for entry into the various programs of study. Information is available at the Preprofessional Advising Office (310-825-1817).

**Prerespiratory Therapy Curriculum: One Year**

Santa Monica College (SMC) offers a two-year program in respiratory therapy accredited by the American Medical Association (AMA) through which students may obtain a Certificate of Completion.

The first year of the curriculum may be taken at UCLA or any other two- or four-year college/university. Many UCLA students opt to incorporate the first-year respiratory therapy curriculum into their UCLA science or premedical B.S./B.A. degree requisites and, after completing their UCLA degree, enter the second year at the SMC Respiratory Therapy Program. The only first-year course that must be taken at Santa Monica College is an introductory course on respiratory therapy as a profession (Respiratory Therapy 1).

The second year of the program (the formal respiratory therapy curriculum) is taken through Santa Monica College. It is a lecture, laboratory, and clinical program conducted at the UCLA Medical Center, beginning with summer school each year. Admission to the second year is by competitive application. Because enrollment in the second year is limited, students should become familiar with the admission requirements as early as possible.

**First-Year Prerespiratory Therapy Curriculum Requirements**

1. Respiratory Therapy 1 (taken at SMC in Fall/Spring Quarter);
2. general human anatomy with laboratory;
3. general chemistry with laboratory;
4. basic lower division English;
5. U.S. history or general political science;
6. any general humanities course (art, music, foreign languages, etc.);
7. microbiology with laboratory;
8. human physiology with laboratory;
9. general psychology;
10. speech or advanced English composition.

For further information and/or a counseling appointment, contact the SMC Respiratory Therapy Program at (310) 434-3463.

**Prelaw Studies**

Law schools have no preference with regard to specific majors or particular courses. However, two terms of English composition in preparing to apply to law school would be useful. Admission to law school is based on the quality of academic work, LSAT scores, and other qualities as reflected in the written application, personal statement, and letters of recommendation. The College of Letters and Science offers advising on preparing for and applying to law schools through daily drop-in counseling, appointments, and workshops. For more information, call the Preprofessional Advising Office at (310) 825-1817.

For additional information, see the Law School Admission Bulletin available at the Admissions Office, UCLA School of Law, 71 Dodd Hall.

---

**Graduate Study**

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master’s and doctoral degrees. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available on the Graduate Division website at http://www.gdnet.ucla.edu/department.html.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

---

**John E. Anderson Graduate School of Management**

Bruce Willison, Dean

UCLA
110 Westwood Plaza, Suite F407
Box 951481
Los Angeles, CA 90095-1481
(310) 825-6121
http://www.anderson.ucla.edu/

In today’s rapidly changing global marketplace, it is essential that professional managers be conversant with the latest concepts and principles of management. At UCLA’s John E. Anderson Graduate School of Management, which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, the Anderson School offers the business community a wide range of higher education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in fundamental and cutting-edge research in all fields of management and by educating scholars who can continue to create this new knowledge.

Anderson School students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

The school offers a variety of programs leading to graduate degrees at the master’s and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master’s, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management
is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school also offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

Degrees Offered
Master of Business Administration (M.B.A.)
Master of Science (M.S.)
Doctor of Philosophy (Ph.D.)

Centers and Programs

Business Forecasting Project
Using large-scale econometric models, the Business Forecasting Project (http://www.anderson.ucla.edu/research/forecast/index.htm) makes quarterly and long-term forecasts of the national and California economies, focusing on unemployment and employment by three-digit SIC code. Results of the forecasts are announced at conferences attended by members of the media and leaders in business and government.

Center for Digital Media
The Center for Digital Media's mission is to become an internationally recognized institution for studying the effects of new media and digital technologies on organizations and the business environment, providing a wellspring of fresh ideas on innovation in the field. The center (http://www.anderson.ucla.edu/research/digital/Digital.html) actively exploits its location in Southern California to develop mutually beneficial relationships with major industries, providing its industrial partners with research studies, networking, consulting, and recruiting opportunities, while providing faculty and students with the latest information, project financing, access to decision makers, and research topics related to digital media.

Center for Health Care Management
The Center for Health Care Management (CHCM) is operated jointly by the Anderson School and the School of Public Health. Organized as a partnership with the health services management community, the center's activities are designed to be supportive of management practitioners in the health care community. The center offers management education programs uniquely suited to managers and executives from health care organizations. In addition, it conducts research carefully identified to further the practice of management of health service organizations. Programs have included a top management course for Cedars-Sinai Medical Center and a management development program for diagnostic radiologists.

Center for International Business Education and Research
The Center for International Business Education and Research (CIBER; http://www.anderson.ucla.edu/research/ciber/) is dedicated to enhancing the teaching and understanding of issues related to the global marketplace. The center actively increases international business research across the campus through the direct funding of faculty research travel, graduate student research assistantships, and academic conferences.

Center for Operations and Technology Management
The Center for Operations and Technology Management (COTM; http://www.anderson.ucla.edu/cotm/cotm.htm) addresses the needs of manufacturing and service companies in the areas of technology management, service delivery, and manufacturing operations. These issues are becoming central to competitive success in global markets. The center organizes conferences and seminars, as well as faculty and student projects with companies. Its programs introduce M.B.A. students to the key concerns in technology and operations in business today.

Harold Price Center for Entrepreneurial Studies
The Harold Price Center for Entrepreneurial Studies (http://www.anderson.ucla.edu/research/esc/) provides academic and extracurricular activities that prepare M.B.A. candidates for the challenge of business management in entrepreneurial environments. These efforts include teaching and curriculum development, student activities, and scholarly research. The interdisciplinary curriculum draws on faculty expertise in many areas.

Human Resource Round Table
The Human Resource Round Table (HARRT) is affiliated with the Anderson School and with UCLA's Institute of Industrial Relations. The program's mission is to enhance the profession of human resource management by linking the academic and practitioner human resource management communities.

Information Systems Research Program
The Information Systems Research Program (ISRP) was established to recognize the importance of maintaining close ties between the activities of practicing professionals and the activities of academics in the information systems area, while at the same time raising money to support education and research activities in the information systems area. The senior managers and technical professionals who belong to the Information Systems Associates participate in a number of activities to facilitate professional interchange and networking, such as the Information Systems Executive Leadership annual award dinner and the annual Information Systems Associates Symposium.

John M. Olin Center for Policy
The John M. Olin Center for Policy facilitates teaching and research dealing with the issues and processes of public policy and business/government interaction. The center serves as a facilitator and catalyst for the Anderson School's distinguished faculty with strong and diverse policy interests. It accomplishes this mission by sponsoring or cosponsoring a number of public policy conferences and by providing summer faculty research support and research apprenticeships for Anderson School doctoral students working on research projects dealing with the issues and processes of public policy and business/government interaction.

Leadership, Education, and Development Program
The Leadership, Education, and Development (LEAD) program sponsors four-week residential summer institutes at outstanding business schools, including the Anderson School, and recruits qualified African American, Hispanic, and Native American students between their junior and senior years of high school. LEAD is designed to introduce participants to the world of business, economics, finance, and management through a carefully tailored curriculum involving University faculty, guest lecturers from industry, and corporate field trips.

Office of Executive Education
Lifelong learning plays a critical role in the success of today's business leaders. The Anderson School's Office of Executive Education Programs offers more than 40 innovative open enrollment and customized programs that address complex and rapidly changing business issues. The Executive Program covers such diverse areas as strategic planning, organizational design, and competitive positioning.

Office of International Affairs
The Office of International Affairs (OIA; http://www.anderson.ucla.edu/research/oaia/oia_hmpg.html) reflects the Anderson School's commitment to incorporating global issues into management education. Through a portfolio of innovative initiatives, such as the Global Partners Forum conference series, Executive Roundtable series, and Oxford-UCLA CEO Briefings, OIA expands the school's opportunities for global management education and research and marshals school resources to the task of achieving a comprehensive and effective international focus throughout its programs.
Riordan Programs
The Riordan Programs were established in 1987 by the Riordan Foundation in response to the growing demand for trained managers who can provide vision and leadership in culturally diverse communities. The programs' success results from the collaborative efforts of Anderson School faculty, students, and alumni, and corporate leaders throughout the community. Together these individuals encourage underrepresented students to pursue higher education in management and to become future leaders in business and society.

School of Medicine
Gerald S. Levey, Dean and Provost

UCLA
12-105 Center for the Health Sciences
Box 951720
Los Angeles, CA 90095-1720
(310) 825-6081
http://www.medsch.ucla.edu

UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Students at the UCLA Medical Center are exposed to the best of all worlds — strong research-oriented basic and clinical science departments, a hospital consistently ranked among the nation's elite, superb affiliated clinical facilities that provide the full spectrum of teaching settings and patient populations, and a biomedical library that is considered one of the world's best. The UCLA School of Medicine offers an M.D. degree program, allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs, as well as a wide range of master's and doctoral degrees offered through the Graduate Division.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including two of the nation's 56 hospital-based biomedical cyclotrons producing short-lived radioisotopes for biological research and diagnostic nuclear medicine procedures.

M.D. Degree Program
The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humanistic approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

The School of Medicine curriculum combines traditional teaching with problem-based learning and laboratories to maximize the educational experience. Because medical school is but one phase in a physician's education, the curriculum fosters an environment where students are well-prepared for a future in which scientific knowledge, social values, and human needs are ever changing. Formats for instruction include lectures, tutorials, seminars, laboratory sessions, demonstrations, and visits to physicians' offices; students are exposed to patients from their first week through graduation.

The M.D. degree is conferred at the culmination of a four-year medical curriculum that prepares students broadly for careers in research, practice, or teaching in the medical field of their choice. As medicine moves into the twenty-first century, the curriculum continues to evolve, emphasizing issues of growing importance such as primary care, development of research opportunities for those considering careers in academic medicine, human genetics, and the evolving world of gene therapy, psychosocial issues of health and disease, preventive medicine, and medical ethics.

Students interested in details on the M.D. curriculum or who wish to apply to the M.D. program should contact the School of Medicine Admissions Office, 12-105 CHS, UCLA, Box 951720, Los Angeles, CA 90095-1720. See the College of Letters and Science earlier in this section for details on the four-year premedical studies program.

Special Programs
Special programs have been designed to address the needs and issues of specific communities and populations.

UCR/UCLA Biomedical Sciences Program
The UCR/UCLA Biomedical Sciences Program is a cooperative venture involving UC Riverside, the UCLA School of Medicine, and selected Riverside community sites. Students may earn both the B.S. and M.D. degrees in seven years through a combined program maximizing the curriculum of both.

Drew/UCLA Medical Education Program
The Drew/UCLA Medical Education Program is designed to attract students who express and demonstrate an interest in addressing the concerns of underserved populations. Students in the program spend their first two years at the UCLA campus and complete their last two years of clinical work at the King/Drew Medical Center on the Drew University campus.

Articulated and Concurrent Degree Programs
The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows students to earn both the M.D. and Ph.D. in about seven years, depending on their course of study and research. The Ph.D. may be awarded in one of several medical sciences fields. For more information, contact the Medical Scientist Training Program at (310) 794-1817.

A concurrent program with the John E. Anderson Graduate School of Management allows medical students to earn both the M.D. and M.B.A. degrees over five years by following a designated course of study and some shared coursework. Separate application must be made to the Anderson School during the third year of medical school. For additional information, contact the School of Medicine at (310) 825-2866 or 825-3970.

An arrangement with the School of Public Health enables students to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health at (310) 825-5516.

Postgraduate Medical Training Programs
Postgraduate medical training programs, including residencies, are offered through all the clinical departments at UCLA and the affiliated training hospitals such as Harbor-UCLA, Cedars-Sinai, and West Los Angeles VA Medical Centers, Sepulveda-San Fernando Valley Program, and many others. Programs at the affiliated institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the individual clinical departments of the School of Medicine or the affiliated hospitals.

Allied Health Programs
For information regarding allied health programs in the UCLA Center for the Health Sciences, call (310) 794-8352.

Graduate Programs
Master's and/or doctoral degrees are offered through the UCLA Graduate Division in the following fields: anatomy and cell biology (Department of Neurobiology), biological chemistry, biomathematics, biomedical physics, experimental pathology, human genetics, microbiology and immunology, neuroscience, pharmacology, and physiology. Detailed information on
these programs, for which admission to the School of Medicine is not required, is provided in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog

**Graduate Degrees Offered**

Anatomy and Cell Biology (M.S., C.Phil., Ph.D.)

Biological Chemistry (M.S., Ph.D.)

Biomathematics (M.S., Ph.D.)

Biomedical Physics (M.S., Ph.D.)

Human Genetics (M.S., Ph.D.)

Microbiology and Immunology (M.S., Ph.D.)

Neuroscience (Ph.D.)

Pathology — Experimental Pathology (M.S., Ph.D.)

Pharmacology (M.S., Ph.D.)

Physiology (M.S., Ph.D.)

Psychiatry and Biobehavioral Sciences Clinical Psychology

Internship (Certificate)

Note: The following Master of Science degrees require application to the doctoral degree program: Anatomy and Cell Biology, Microbiology and Immunology, Pharmacology, Physiology.

---

**School of Nursing**

Marie J. Cowan, Dean

UCLA

2-200 Factor Building

Box 951702

Los Angeles, CA 90095-1702

(310) 825-7181

http://www.nursing.ucla.edu

The School of Nursing was established at UCLA in 1949 and rapidly became a leading school of nursing in the U.S. Now the school enjoys a national and international reputation for excellence in teaching, research, and clinical practice.

One of the strengths of the school is its teaching of the scientific basis for nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, or in selected community sites. Education at the master's level provides advanced practice options in primary care, acute care, and nursing administration. The majority of graduate students acquire expertise as nurse practitioners, with several options for clinical preparation in primary or acute care. The doctoral program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

The School of Nursing has an exceptionally well-qualified faculty, and many have earned national and international reputations for excellence. The school is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in health care and the diversity of the patient population. Graduates of the program are sought by health care institutions and educational programs, and many alumni have become leaders in the field. Education in this research University with its full range of academic disciplines provides a rich environment for preparation in the health sciences.

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

**History and Accreditation**

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in nursing leading to the Bachelor of Science (B.S.) degree and made possible the establishment of a graduate program leading to the Master of Science (M.S.) degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The M.S. degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. was approved in 1995.

The B.S. program curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's nurse practitioner program has Board of Registered Nursing approval.

**Degrees Offered**

Bachelor of Science (B.S.)

Master of Science in Nursing (M.S.N.)

Doctor of Philosophy (Ph.D.)

**Philosophy of the School**

The UCLA School of Nursing is guided by a philosophy which embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students.

Nursing encompasses clinical practice, education, research, consultation, leadership, management, and service to the profession and the community. It involves individuals, families, groups, organizations, and communities as clients. The profession must consider the human and physical environments that interact with these clients who may have health conditions that range from wellness to illness. Nursing activities must include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. At an advanced practice level, nursing involves comprehensive primary health care which encompasses the responsibility and accountability for continuity of care across the health/illness spectrum.

Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science. Guided by ethical standards that consider the perspectives of the client, the health care provider, and the larger society, nursing has a social mission which encompasses the right and responsibility to provide health care to all its clients regardless of disease status, gender, race, or culture.

Persons who receive client-centered nursing care are complex individuals who exist in relationship to others in their family and community. This complexity of person involves biological, behavioral, emotional, sociocultural, and spiritual dimensions. Each individual reflects a unique combination of these dimensions that interact dynamically with the environment. The clients of nursing are autonomous decision makers who have certain values and knowledge about themselves that not only are relevant but essential to successful health care outcomes. As a result, persons have a
right and a responsibility to participate collaboratively with the nurse and other health professionals in their care.

Successful nursing students are active learners who bring unique gender, cultural, and ethnic life experiences to the professional practice of nursing. Students at all levels learn relevant theory, acquire practice skills, and are socialized into the profession of nursing. Increasing levels of complexity and sophistication of learning and socialization are expected of students in the different programs. Whether at the beginning practice, advanced practice, or scholar level, nursing students learn to apply knowledge, skills, and professional attitudes in their practice which may include educative, administrative, and research arenas. While students have the right and responsibility to participate in their own learning, faculty members have the right and responsibility to structure the teaching/learning environment to facilitate learning. Individual academic counseling and a variety of one-on-one, small-group, and interactive learning formats assist students to meet program and individual learning goals.

School of Public Health
Abdelmonem A. Afifi, Dean

UCLA
16-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5524
http://www.ph.ucla.edu/

The emergence of public health as an independent discipline dates back over a century, when the field was concerned mainly with the epidemic of communicable diseases and some facets of sanitation. Changes in socioeconomic conditions, lifestyle, and other factors have brought such issues as injuries, aging, air pollution, alcoholism, drug addiction, smoking, mental health, homicide, and sexually transmitted diseases to the fore as community health problems. In time the following general statement evolved — “The mission of public health is to fulfill society’s interest in assuring conditions in which people can be healthy.”

Public health professionals can promote the health of the community through (1) research into the development of methodologies in biostatistics, epidemiology, demography, and techniques of prevention, (2) investigations into factors which influence health behavior, quality of and access to health care, health education, nutrition, environmental problems, and problems of special population groups such as mothers, children, and minorities, and (3) development of research into new areas that impact on the health of the community. Public health professionals are also responsible for translating knowledge of disease and health enhancement into resolution of health problems in the community. Whether public health professionals elect to serve through research or the application of public health principles to improve health, they are committed not only to the prevention of disease but to promotion of health and improvement in the quality of life.

The UCLA School of Public Health began as a department of the Universitywide school which was established in 1944. By 1961 UCLA’s school became an independent entity whose mission is to create, disseminate, and apply pertinent knowledge to assure the conditions in which people can be healthy. These conditions include a favorable social, economic, and physical environment, access to an effective preventive and therapeutic health system, and an awareness of how to prevent disease or disability and promote health. As part of the UCLA Center for the Health Sciences, the school focuses on the health problems of populations, whereas the other three health sciences schools are concerned primarily with the health problems of individuals.

To fulfill its national and international mission, the school (1) educates new professionals and leaders for the public and private sectors of the health system in the U.S. and abroad, (2) prepares future public health researchers and educators, (3) provides continuing education for current professionals and leaders in the public health field, (4) conducts basic and applied research relevant to describing, protecting, and improving conditions for a healthy public, and (5) contributes knowledge, expertise, and service to the community. It is the goal of the school to ensure that the protection and improvement of the public’s health is accomplished by the most efficient and effective means, consistent with equity for all individuals in the state, the nation, and the world.

Degrees Offered

Biostatistics (M.S., Ph.D.)
Environmental Health Sciences (M.S., Ph.D.)
Environmental Science and Engineering (D.Env.)
Epidemiology (M.S., Ph.D.)
Health Services (M.S., Ph.D.)
Preventive Medicine and Public Health (M.S.)
Public Health (M.P.H., M.S., Dr.P.H., Ph.D.)

Note: The M.S. and Ph.D. degrees in Public Health are offered through the Department of Community Health Sciences. New students are not being admitted to the M.S. in Preventive Medicine and Public Health at this time.

Departments and Programs

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences deals with five areas of study and program implementation, including behaviors which prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health education and promotion, public health policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Services deals with the organization, financing, delivery, quality, and distribution of health care services. The school is also responsible for the administration of the interdepartmental degree program in environmental science and engineering.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; three concurrent degree programs: M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies; and three articulated degree programs: M.D./M.P.H. with the School of Medicine and M.A./M.P.H. with African Area Studies and with Latin American Studies.

Admission

In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog. Help in deciding on a department is available in the school’s Student Affairs Office.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

Degree Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings in the Curricula and Courses section of this catalog for specific requirements and procedures.
Centers and Programs

Center for Health Policy Research
The Center for Health Policy Research was established in March 1994 to apply the expertise of UCLA faculty and researchers to meet national, state, and local community needs for health policy-related research and information. Building on the extensive health policy research of School of Public Health faculty, the center was established to accomplish three missions: (1) to conduct research on national, state, and local health policy issues, (2) to provide public service to policymakers and community leaders, and (3) to offer educational opportunities for graduate students and postdoctoral fellows.

The center, sponsored by the School of Public Health and the School of Public Policy and Social Research, provides a collaborative health policy research environment for UCLA’s leading professional schools and academic departments. The center's staff assists faculty and other researchers to obtain extramural research and training funds, and it helps researchers manage and conduct research studies. Faculty from the Schools of Public Health, Public Policy and Social Research, and Medicine participate in center research projects and its public service and educational activities.

The center, directed by Professor E. Richard Brown, publishes its health policy research findings in a series of Policy Briefs, making policy-relevant information directly accessible to policymakers, public health and health care leaders, the media, and the general public. The center also publishes more extensive findings in a series of Policy Research Reports and sponsors lectures and seminars on health policy-related topics for students, faculty, and staff. For additional information, call (310) 206-5491 or visit http://www.healthpolicy.ucla.edu/.

Center for Health Promotion and Disease Prevention
Established in July 1991, the Center for Health Promotion and Disease Prevention is a joint endeavor of the UCLA Schools of Public Health and Medicine. The five full-time faculty members have their primary appointments in one of the clinical departments in the School of Medicine such as obstetrics, surgery, medicine, or pediatrics and, depending on their training, joint appointments in an appropriate department in the School of Public Health such as community health sciences, health services, or epidemiology. Within the School of Medicine, faculty members are involved in clinical activities and teaching, especially in the course on doctoring. Within the School of Public Health, they are engaged in teaching and research. Faculty research activities are wide-ranging and involve studies on the quality of life of men with prostate cancer, manpower requirements for the care of those with HIV infections, community interventions for asthma control in Latino children, systems for smoking cessation used by physicians caring for Latino patients, etc.

The center, through its members, has ties with a variety of local and national organizations concerned with managed care, as well as with the Veterans Administration and several other hospitals and professional organizations. It serves as the UCLA site for the activities of the Pacific AIDS Education and Training Center. The center, directed by Professor Charles E. Lewis, is also responsible for overseeing the Preventive Medicine Residency Program.

Center for Health Services Management
The Center for Health Services Management was jointly established in fall 1996 by the School of Public Health and the John E. Anderson Graduate School of Management as UCLA’s response to the increasingly challenging environment for health care management in California. It is designed to bring together the best in university-based research and education with the best and most current in management practices in the California health care community, for the mutual benefit of both.

The center is a laboratory in which new challenges can be identified and new solutions can be tested through the joint efforts of the University and the health care community. It is the vehicle to improve training and education of managers and executives, both in the degree and certificate programs at the University as well as the management development programs within health care organizations themselves.

A central theme is an active working partnership with the health services management community. The center operates under the direction of a joint University/community guidance committee, and all activities, whether research, teaching, or consultation, involve intense collaboration between health care practitioners and University faculty and students.

UCLA has a large group of nationally known scholars and teachers who are expert in both the organization of health services and in the latest approaches to modern management. The University is located in the middle of the most active and rapidly changing health care environment in the U.S. and has a wide and active group of alumni, friends, and colleagues in the Southern California health care community who can be called on to teach, advise, support, and counsel the development of the center.

The center, codirected by Professors Paul R. Torrens and Victor C. Tabbush, conducts activities in three major areas: applied health services management research, education and teaching in a variety of settings and on a variety of levels, and consultation to organizations and individuals about health services management issues. For additional information, call (310) 206-3435 or visit http://www.ph.ucla.edu/cs/hsmgt.html.

Center for Healthier Children, Families, and Communities
The Center for Healthier Children, Families, and Communities was established at UCLA in 1995 to address some of the most challenging health and social problems facing children and families. The center's mission is to improve society’s ability to provide children with the best opportunities for health and well-being and the chance to assume productive roles within families and communities.

Through a unique interdisciplinary partnership between UCLA departments, schools, and affiliated institutions, including the Schools of Public Health, Medicine, Nursing, Education, Law, and Public Policy and Social Research and the Department of Psychology, as well as providers, community agencies, and affiliated institutions, a critical mass of expertise has been assembled to conduct activities in five major areas: (1) child health and social services, (2) applied research, (3) training of health and social service providers, (4) public policy research and analysis, and (5) technical assistance and support to community providers, agencies, and policymakers. The center is led by three codirectors, Professors Neal Halton, Jonathan E. Fielding, and Neal Kaufman. For additional information, call (310) 206-1898 or visit http://www.ph.ucla.edu/chcfc/.

Center for Human Nutrition
Established in 1996, the Center for Human Nutrition is a joint endeavor of the Schools of Public Health and Medicine. Participating faculty have their academic appointments in Medicine and/or Public Health. The center brings together faculty, postdoctoral research fellows, graduate students, and medical students to focus on the roles of nutrition and food in human health and disease and is closely affiliated with UCLA’s Clinical Nutrition Research Unit, which is focused in the area of nutrition and cancer prevention.

Programs include basic biological research; nutrition education for various constituencies including medical, graduate, undergraduate, and postgraduate students; participation in multicenter clinical trials for primary and secondary disease prevention through dietary intervention; and public health and international nutrition. The center maintains core laboratory/research facilities in body composition, dietary assessment and intervention, micronutrient analysis, lipid and hormone analyses, stable isotope techniques, and related areas.

The public health and international aspect of the programs include focus on nutrition surveillance of populations, nutritional status and food supply in developing and transitional countries, and nutrition and food policy. The center provides research and field experience opportunities for students from UCLA and elsewhere and, through linkages with several international institutions, has several international visiting scholars in residence at most times. For additional information, call (310) 206-1987 or 825-3738.
Center for Occupational and Environmental Health

In 1977 a group of chemical workers in California became sterile after exposure to the pesticide DBCP, which is known to be a carcinogenic and reproductive toxin. That incident prompted the California State Legislature to mandate the formation of occupational health centers in the northern and southern regions of the state. The purposes of the Center for Occupational and Environmental Health (COEH) are training occupational and environmental health professionals, conducting research, and providing services through consultation, education, and outreach. The centers constitute the first state-supported institutions to provide occupational and environmental health leadership in the U.S.

UCLA’s COEH is housed in the Center for the Health Sciences and involves the Schools of Public Health, Medicine, Nursing, and Public Policy and Social Research. Collaboration also occurs with the School of Engineering and Applied Science.

Specific COEH programs within the School of Public Health include:

Environmental Chemistry

Environmental chemistry is concerned with the sampling, analysis, and fate/transport of chemicals in the environment and data interpretation for the analysis of environmental chemicals and hazardous wastes. Environmental chemists are employed in research, government, and industry associated with environmental management, industrial hygiene, environmental toxicology, air pollution, water quality treatment, and other related areas.

Occupational and Environmental Epidemiology

Occupational and environmental epidemiologists conduct research to establish causal links between environmental exposure and adverse health outcomes. The study of exposure-response relationships is central to the role of the epidemiologists.

Occupational and Environmental Medicine

A joint occupational medicine residency between UCLA and USC provides specialty training for physicians in occupational medicine. The program leads to a master’s degree in public health and board eligibility in occupational medicine. The first year of the program involves taking courses at the UCLA School of Public Health leading to an M.P.H. degree. In the second year students participate in clinical and field rotations under the supervision of the Division of Occupational and Environmental Medicine at USC. A similar joint residency program in occupational medicine is offered with the UC Irvine COEH.

Occupational Ergonomics

Occupational ergonomics is the science of designing a work environment compatible with the capabilities and needs of the workforce. The primary goal of the program is to improve the design of the workplace for the prevention of occupational illnesses and injuries. Current research areas include static and dynamic strength modeling, task analysis, and identification and qualification of risk factors for cumulative trauma disorders.

Occupational Hygiene

Occupational hygienists are environmental specialists concerned with evaluation and control of the workplace environment for exposure to potentially dangerous agents, physical stresses, biologic agents, and ergonomic effects. Occupational hygienists provide insight into these problems based on their knowledge of the health effects of exposure to the substances involved and the physics and chemistry of the environment. These specialists work as part of interdisciplinary teams with epidemiologists, physicians, nurses, and toxicologists.

Service Outreach to the Community

The center has the task of providing expertise in occupational and environmental health to the community. Available services and opportunity for student activities include (1) consultative assistance to physicians, nurses, and occupational hygienists, (2) faculty evaluation of the work environment with potential occupational health hazards and surveillance of industrial workers exposed to hazardous substances, and (3) continuing education opportunities for professionals and educational programs for workers exposed to potential occupational health hazards. For additional information, visit http://www.ph.ucla.edu/coeh/.

Toxicology

Toxicology is the study of the adverse effects of chemicals and physical agents on living organisms. The goal of the discipline is to understand what agents provide a threat to organisms and how they function in order to minimize their impact. Toxicologists work collaboratively with physicians, nurses, industrial hygienists, and epidemiologists to determine the causes of occupational and environmental disease.

Center for Public Health and Disaster Relief

With funding from the Los Angeles County Department of Health Services, the Center for Public Health and Disaster Relief was established to address the critical issues faced when a disaster impacts a community. The center’s mission is to develop a curricular focus area and research agenda that examines how natural and human-generated disasters affect the public’s health. The center staff and participating faculty are multidisciplinary in nature and have backgrounds that include emergency medicine, environmental health sciences, epidemiology, gerontology, health services, social work, sociology, urban planning, and public health.

The center, through the Department of Community Health Sciences, is the only program in the nation to offer multiple graduate-level courses in public health and natural disasters. Courses taught by center faculty include an introduction to public health and disasters, program planning and evaluation of disaster preparedness programs, cooperative interagency disaster management from a public health perspective, post-disaster community health, and disaster epidemiology.

The courses bring together students who have strong research backgrounds with those students who are frontline disaster practitioners, thus enriching the future pool of public health disaster experts. In order to expose future professionals to the rigor of this area, opportunities have been or are being developed to place graduate interns within emergency and disaster units of the Los Angeles County Department of Health Services, the California Emergency Medical Services Authority, the American Red Cross, and the World Health Organization.

Center staff and colleagues have studied earthquakes in California since the early 1970s. Recent research contributes to knowledge about human behavior and disaster preparedness before and after earthquakes, emotional and physical injuries, and utilization of both medical and disaster services following earthquakes. Similar factors are currently under study following the 1997-98 El Niño season. The center is directed by Professor Steven Rottman. For additional information, call (310) 794-6646 or visit http://www.ph.ucla.edu/cphdr/.

Health Career Resource Center

In September 1996 the School of Public Health established the Health Career Resource Center (HCRC) which offers a variety of career planning resources, counseling, and job search services designed to help both students and alumni explore public health career possibilities, obtain employment and internship leads, and develop skills for conducting a successful job search.

The center also houses the Diversity Enrichment Program (DEP), designed to provide a wide range of preparatory, informational, and developmental services for disadvantaged students considering a career in public health. The goal of this program is to promote the increase of underrepresented/disadvantaged individuals within the public health profession by providing education and resource information that facilitates access and encourages retention in public health graduate degree programs.

Services provided include the following:

(1) Career Planning and Job Search, with résumé and curriculum vitae critique, one-on-one counseling, job search skill building workshops, career and job search resource literature, internship information, and fellowships, scholarships, grants, and postdoctoral opportunities.
Employment Opportunities, with part-time and temporary job listings, full-time career opportunity listings, access to online job search engines, and alumni networking opportunities.

Recruitment and Retention Services, with recruitment and outreach conferences, application processing assistance, Graduate Record Examination preparatory courses, retention counseling, new student orientation, and tutorial support for enrolled students.

Residents participating in the academic phase must enroll in one of the departments within the School of Public Health and must fulfill all requirements for an M.P.H. degree. The residency program is designed to prepare qualified physicians for leadership roles in preventive medicine and public health practice, research, and teaching. The program is based on the academic strengths of the School of Public Health in conjunction with the School of Medicine.

The residency provides training in the academic and practicum years as a significant public health problem. The master's project, which addresses a significant public health problem, must be completed by the student. The master's project, which addresses a significant public health problem, is supervised by an UCLA faculty member. The program includes required classes, electives, and a report on that project. The master's project, which usually includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem.

Currently two departments accept students into this program, although all five departments in the school have the option to offer a concentration in their area. For those areas not listed below, contact the department of interest directly.

Preventive Medicine Residency Program

The School of Public Health offers an accredited residency in public health and general preventive medicine, a specialty recognized by the American Board of Preventive Medicine. Under Program Director Charles E. Lewis, the residency is designed to prepare qualified physicians for leadership roles in preventive medicine and public health practice, research, and teaching. The program is based on the academic strength of the School of Public Health in conjunction with the School of Medicine and outstanding UCLA-affiliated agencies such as the Los Angeles County Department of Health Services.

The residency provides training in the academic and practicum years as defined by the Accreditation Council for Graduate Medical Education. Residents participating in the academic phase must enroll in one of the departments within the School of Public Health and must fulfill all requirements for the M.P.H. (or equivalent) degree as specified by the department in which they are enrolled. Application should be made both to the department and the residency simultaneously. Residents may also undergo studies toward qualification for a more advanced degree (Dr.P.H. or Ph.D.) in public health; this involves further coursework, an approved project or dissertation, and academic examinations as specified by the school. Part of this work may be applied toward the practicum.

During the practicum phase, residents obtain practical experience in preventive medicine supervised by onsite preceptors, the residency program director, and appropriate UCLA faculty. Flexibility is an essential component of the UCLA practicum; residents may work in a variety of settings while pursuing their commitment to preventive medicine and public health. The particular strengths of this program lie in the areas of public health practice (particularly in medically underserved areas), clinical preventive medicine, health services, epidemiology, administration/management, and research. In addition, residents may develop individualized training programs in any area of preventive medicine. Applicants who have completed their M.P.H. studies at an accredited school of public health may be admitted directly into the practicum. A license to practice medicine in California is a requisite to entering the practicum. For further information, contact the School of Public Health Students Affairs Office or visit http://www.ph.ucla.edu/php/.

Program for Health Professionals

Health professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by faculty members in the School of Public Health. Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years of professional experience or its full-time equivalent in a health care setting.

Generally the first year of study is devoted to the specific core requirements in the area of concentration and to the required M.P.H. core courses in biostatistics, community health sciences, environmental health sciences, epidemiology, and health services. The course of study also entails completing required and elective courses in the specialty area, a master's project, and a report on that project. The master's project, which usually includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem.

Community Health Sciences

The M.P.H. degree is offered in the health education/promotion concentration and can be completed in 21 months with once-a-month, four-day course sessions spanning Thursday through Sunday and an additional intensive summer session between the two academic years. Coursework is the same as for the concentration in the regular M.P.H. program, except that the fieldwork internship requirement (Community Health Sciences 400) is replaced with an extended master's project completed under the guidance of a faculty member. The program includes required core and specialty courses, elective courses offered based on the special interests and needs of students enrolled in the program. For program information and consultation, contact Professor Snehendu Kar at (310) 825-5156, e-mail: kar@ucla.edu.

Health Services

The M.P.H. degree is offered in the health care management concentration and provides a rigorous program of graduate education and training. The two-year program is problem-based and relevant to the rapidly changing health care environment. Growing competition demands that professionals develop an evolving knowledge base and understanding of current management practices and their applications to health care in both the public and private sectors. The curriculum is built around the following themes: health services organization, management content and
practice, finance/economics, analytical skills, public health/understanding the community, and personal development/career planning. The program has also created partnerships with leaders in the health care community, drawing on their strengths and insights to ensure that the educational process is consonant with the needs of the industry. Classes and other instructional activities are scheduled on alternate Fridays from 1 to 9 p.m. and Saturdays from 8 a.m. to 5 p.m. during the academic year. Practical field studies are conducted during the interim summer. For program information, call Professor Paul R. Torrens at (310) 206-3453 or visit http://www.ph.ucla.edu/sciprc/sciprc1.htm.

Southern California Environmental Health Sciences Center

The Southern California Environmental Health Sciences Center (SCEHSC) was established through funding from the National Institute of Environmental Health Sciences (NIEHS). Researchers and professionals from UCLA, University of Southern California, and California Institute of Technology have collaborated to create an interdisciplinary approach to the study and advancement of research in environmental health. As one of the newest of 19 centers across the nation, the SCEHSC primarily focuses on using epidemiologic methods to study effects of the environment on human health, especially with regard to the multiethnic populations of California and the Pacific Rim.

The SCEHSC is organized into an administrative core, five research cores, and four service cores, with the overall goal to understand how environmental factors affect health and how personal factors modify response. Research cores include exposure assessment, respiratory effects, childhood cancer, adult cancer, and statistical methods, while the service cores include analytical chemistry, molecular biology, biological sample processing, and biostatistics.

The center supports an Environmental Health Research Pilot Projects Program to advance research in environmental health by expanding opportunities to pursue larger-scale projects. It also maintains a Community Outreach and Education Program to develop models for community outreach and school curricula to educate the public on how to control, reduce, or eliminate the threat of living with environmental hazards. Dissemination of research findings to the health care, corporate, and policy-making communities and the public at large enables the SCEHSC to facilitate an informed public debate and, ultimately, improved public policies, making it a regional and national resource on environmental health research. For more information, contact Professor John R. Froines at (310) 206-6141 or Professor William C. Hinds at (310) 825-7152.

Southern California Injury Prevention Research Center

Injuries kill more people under the age of 45 than all other causes of death combined. The Southern California Injury Prevention Research Center (SCIPRC) is one of nine centers in the U.S. that focus on the problem of intentional (homicide, suicide, abuse) and unintentional (motor vehicle crash, drowning, falls) injuries through three phases of injury control — prevention, acute care, and rehabilitation — addressed through its research, training, and community service components.

The theme of SCIPRC is to research intentional and unintentional injuries among ethnic/racial minorities, disadvantaged persons, and other underserved populations. Highly focused, multidisciplinary community-based research projects are undertaken with the collaboration of public health scientists, clinicians, social scientists, and biomechanics specialists affiliated with UCLA, University of Southern California, King/Drew and Rancho Los Amigos Medical Centers, Los Angeles County Department of Health Services, Edward R. Roybal Institute for Applied Gerontology, and California State Office of Traffic Safety and Departments of Health Services and Industrial Relations.

Graduate students can affiliate with SCIPRC through academic coursework in injury and research experience with ongoing investigations and can apply for support for independent graduate student research. For additional information, call (310) 206-4115 or visit http://www.ph.ucla.edu/sciprc/sciprc1.htm.
The center conducts and facilitates research, courses, seminars, working groups, and conferences designed to have a major impact on policy at the local, national, and international levels. The center has launched a groundbreaking new study of the social, political, and economic effects of computer technology and the Internet. Conferences include the Superhighway Summit with the Academy of Television Arts and Sciences, Religion and Prime Time Television with the American Cinema Foundation, and an annual national media conference with Children Now and Stanford University.

**Center for Health Policy Research**

Jointly sponsored by the School of Public Policy and Social Research and the School of Public Health, the Center for Health Policy Research (http://www.healthpolicy.ucla.edu/) conducts research on the national, state, and local levels, provides testimony, and conducts seminars and forums for government leaders and policymakers both public and private. Research activities emphasize a community- and population-based perspective to improve health outcomes. Current research areas and programs touch on such issues as access to health services, managed care, health care reform, women's health, disease prevention policy, cost issues, and the health policy-making process itself.

**Center for International Science, Technology, and Cultural Policy**

The Center for International Science, Technology, and Cultural Policy (http://www.sppsr.ucla.edu/rsrch/rch_cnt/CISTCP.HTML) facilitates interdisciplinary research on the influences of government policy on the development of the arts and sciences and their commercial and noncommercial expressions, including technology, the media, fashion/design, and other uses of the nation's knowledge capital. The center's mission is to improve the basis for policy decisions by conducting and supporting solid empirical research designed to examine alternative policy models, including the comparison of systems across countries as well as across substantive areas within the same country. Rigorous policy research on these topics requires discipline-based, but also interdisciplinary, research teams that are informed by social science theory. The center promotes dissemination of policy research to governments seeking to make more empirically informed policy decisions.

**Center for Labor Research and Education**

Regarded as the flagship of all U.S. labor centers, the Center for Labor Research and Education (http://labor.sppsr.ucla.edu/) plays a unique role as a bridge between the University and the labor community. As part of the Institute of Industrial Relations, the center is a cosponsor, with the Urban Planning Department, of the Community Scholars Program — a dynamic project that brings labor and community leaders to UCLA to study economic development. The center also serves as the West Coast coordinator for the AFL-CIO's George Meany Center, providing summer residential programs for union leaders, and regularly hosts visiting trade unionists and scholars from around the world. A vital part of the center is the Labor Occupational Health and Safety Program, which provides extensive resources and training in the field of workplace safety and health.

**Center for Policy Research on Aging**

One of the newest of the school's research centers, the Center for Policy Research on Aging (http://www.sppsr.ucla.edu/rsrch/rch_cnt/cpра.html) was formed to address the significant issues of an aging society through policy analysis, dissemination of information, and technical assistance to the public and private sectors. The demographic challenges of a nation growing older and living longer force us to confront the roles of government and the private sector in serving the increasing number of elderly and their families. The center's mission is to conduct research, inform policymakers, link communities to local, state, and federal governments, and foster collaboration among UCLA faculty members.

**Institute of Industrial Relations**

Established by the California Legislature in 1945, the Institute of Industrial Relations (http://www.sppsr.ucla.edu/res_cnts/industr.htm) conducts research and community service programs that focus on all aspects of the
modern employment relationship involving workers, management, and unions. These issues run the gamut from technological change and workforce preparedness to collective bargaining and macroeconomic policy. Community service programs are directed at the Southern California region as well as the state and nation. Because of the ongoing globalization of the economy, the institute — both in research and community service — increasingly is focusing on international issues.

**Institute of Transportation Studies**
The Institute of Transportation Studies (http://www.sppsr.ucla.edu/res_ctrs/its/its_home.htm) was created in 1993 to conduct research and provide professional education on the social, economic, environmental, and cultural aspects of transportation policy. Research projects have included measuring the efficiency and effectiveness of transit performance, particularly regional rail and bus transit systems in the Los Angeles area; the development of statistically reliable methods for estimating average vehicle occupancy from sampling in the field; and the first major study comparing the transportation-related impacts of the 1994 Northridge earthquake to the damage inflicted by the 1989 Loma Prieta and 1995 Kobe earthquakes.

**Lewis Center for Regional Policy Studies**
The Lewis Center for Regional Policy Studies (http://www.sppsr.ucla.edu/res_ctrs/lewis/lewis.htm) was established in 1990 with a $5-million endowment from Ralph and Goldy Lewis to promote the multidisciplinary study, understanding, and solution of regional policy issues, with special reference to Southern California. Research projects include studies on the impact of the North American Free Trade Agreement on Latinos in the U.S., welfare and work, pollution prevention policies, transportation and parking policies, work-residence relationships in restructuring metropolitan areas, and economic development strategies for local areas. With the support of several foundations, the center also has begun a major research program on ethnic and immigration issues, one product of which is the 1996 volume *Ethnic Los Angeles*.

**North American Integration and Development Center**
The North American Integration and Development Center (http://www.sppsr.ucla.edu/res_ctrs/namerica.htm) was created to provide technical assistance to local communities affected by the North American Free Trade Agreement (NAFTA). The center conducts research and offers continuing education programs in cooperation with nongovernmental organizations in selected communities to support local economic development efforts and facilitate their relationship with the North American Development Bank (NADBank). The center is developing a comprehensive online database with essential information for economic development planning and makes it available to the public on-line through custom-designed Internet sites.

**UCLA Policy Forum**
As the chief outreach arm of the School of Public Policy and Social Research, the UCLA Policy Forum (http://www.sppsr.ucla.edu/outrch/out_pf.html) is a leader in promoting dialogue on major issues through its Center for Public Dialogue and in providing training and other programs through the Advanced Policy Institute and the Center for Executive Policy Education. Policy Forum programs include the Senior Fellows Program, in which distinguished policy practitioners are appointed to spend a year engaged in a dialogue with UCLA scholars and in mentoring graduate students.
program include acting, directing, playwriting, design, technology and production management, and the producers program.

The Department of Film and Television includes both production and critical studies programs, with approximately 265 graduate and 60 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producers program. The critical studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, a complete animation laboratory for both traditional and computer-generated animation, and a laboratory and research facility for digital media. The M.A. and Ph.D. programs are supported by the collections of the University's libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and classroom instruction.

M.A. and Ph.D. faculty members and students also participate in various campus organized research units.

Informative brochures on the school are available from the Student Services Office, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

Students interested in obtaining instructional credentials for California elementary and secondary schools should consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

**Majors and Degrees Offered**

Film and Television (B.A., M.A., M.F.A., C.Phil., Ph.D.)
Theater (B.A., M.A., M.F.A., C.Phil., Ph.D.)

**Undergraduate Study**

**Admission**

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require applicants to submit additional supporting materials. Information on departmental requirements is mailed to students on receipt of their application. The annual deadline date for applications is November 30 for admission in the following Fall Quarter.

**Study Lists**

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After the first term, students may petition to carry more than 17 units (up to 20 units maximum) if they have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If students have not filed their Study List by the end of the second week of classes, they must obtain the consent of the dean of the school to continue for that term.

**Graduate Courses**

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet specific requirements. Courses numbered in the 400 and 500 series may not be applied toward the degree.

**Concurrent Enrollment**

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

**Requirements for Bachelor of Arts Degrees**

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

**University Requirements**

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

**School Requirements**

The general requirements of the School of Theater, Film, and Television must be completed with a grade-point average of 2.0 or better.

**Unit Requirements**

Double majors in the school, or between the school and other academic units, are not permitted.

Students must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If students take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

**Major Requirements**

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). The Theater major includes both lower and upper division courses. Those listed under Preparation for the Major (lower division) must be completed before upper division major work is undertaken. The Film and Television major requires upper division work only.

Students must complete their major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the school must be taken for a letter grade.

As changes in major requirements occur, students are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

**Scholarship and Minimum Progress**

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

**Minimum Progress**

Students are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; they are placed on probation if they fail to pass these units. They are subject to dismissal if they fail to pass at least 32 units in three consecutive regular terms in residence.
Residence Requirements
Students are “in residence” while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor’s degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

English Composition/Critical Reading and Writing Requirements

English Composition and Rhetoric
English Composition 3 with a minimum grade of C should be completed by the end of the freshman year and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 4 also meets this requirement.

Critical Reading and Writing
One course from Comparative Literature (formerly Humanities) 2A, 2B, 2C, or English 4 with a minimum grade of C should be completed by the end of the sophomore year and may not be taken on a Passed/Not Passed basis. An Advanced Placement (AP) Test score of 5 also meets this requirement. Comparative Literature 2A, 2B, or 2C may not be applied toward the literature requirement if taken to meet this requirement.

Additional Degree Requirements
In addition to the school’s general education requirements, students must complete the following requirements:

Literature
Three courses (12 units) in literature are required, at least one of which must be upper division. Any literature course taken in the original language can fulfill this requirement. Comparative Literature 2A, 2B, or 2C may not be applied toward the critical reading and writing requirement if taken to meet this requirement; English 4 may not be applied here.

Foreign Language Proficiency
Students may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language test in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA’s level three or above with an average grade of C or better.

International students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

General Education (GE) Requirements

Reciprocity with Other UC Campuses
Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of Theater, Film, and Television general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Box 951622, Los Angeles, CA 90095-1622.

Intersegmental General Education Transfer Curriculum
Transfer students from California community colleges have the option to fulfill UCLA’s lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA’s general education requirements are fulfilled when students complete it. If they select the IGETC, they must complete it entirely before enrolling at UCLA. Otherwise, students must fulfill the School of Theater, Film, and Television general education requirements.

Theater, Film, and Television GE Course List
For specific courses that fulfill the general education requirements, refer to the lists below or consult the Student Services Office before enrolling. Note: Courses that include the study of theater, film, or television may not be applied toward any general education requirements.

A. Art and Philosophy
Five courses (20 units), with no more than two courses from any single group:

A1. Group A
Art History
50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Introduction to African Art
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art

Classics
51A. Art and Archaeology of Classical World: Greece
51B. Art and Archaeology of Classical World: Rome

A2. Group B
World Arts and Cultures
134. History of Dance in Culture and Performance
140A. Art as Social Action
140B. Art as Moral Action
140C. Seminar: Intercultural and Interdisciplinary Performance
141. Lighting Design for Dance Theater
181A. Dance Cultures of Asia
182. Dance in Africa and the African Diaspora
C187. Dance in Native American Cultures

A3. Group C
Afro-American Studies
M110A, M110B. African American Musical Heritage

Chicana and Chicano Studies
M108A. Music of Latin America

Ethnomusicology
20A, 20B, 20C. Musical Cultures of the World
M108A, 108B. Music of Latin America
M110A, M110B. African American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music

Folklore and Mythology
M154A, M154B. African American Musical Heritage

Music
15. Art of Listening

Music History
2A, 2B. Introduction to Literature of Music
13. 20th-Century Music of the Western World
133. Bach
134. Beethoven
135A, 135B, 135C. History of Opera

A4. Group D
Philosophy
1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
5A. Philosophy in Literature
6. Introduction to Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
21. Skepticism and Rationality
22. Introduction to Ethical Theory

B. Social Sciences
Three courses (12 units), with no more than two courses from any single group. Whenever possible, two courses from a single sequence are recommended:

B1. Group A
Chinese (East Asian Languages)
50. Chinese Civilization
Classics
10. Survey of Classical Greek Culture
20. Survey of Roman Civilization
East Asian Languages and Cultures
60. Introduction to Buddhism
Folklore and Mythology
15. Introduction to American Folklore Studies
German (Germanic Languages)
100A. German Civilization and Culture before 1700
100B. Modern German Civilization and Culture from 1700 to 1919
100C. German Civilization and Culture in the 20th Century
Italian
42A. Italy through the Ages, in English: Holy Roman Empire to Sack of Rome
42B. Italy through the Ages, in English: Late Renaissance to Postmodern Period
Japanese (East Asian Languages)
50. Japanese Civilization
Jewish Studies (Near Eastern Languages)
10. Social, Cultural, and Religious Institutions of Judaism
Korean (East Asian Languages)
50. Korean Civilization
Portuguese (Spanish and Portuguese)
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
Russian (Slavic Languages)
99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century
Spanish (Spanish and Portuguese)
M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil
Women’s Studies
10. Introduction to Women’s Studies: Feminist Perspectives on Women and Society

B2. Group B
Communication Studies
10. Introduction to Communication Studies
History
1A, 1B, 1C. Introduction to Western Civilization
3A, 3B, 3C. Introduction to History of Science
3D. Themes in History of Medicine
4. Introduction to History of Religions
8A. Colonial Latin America
8B. Political Economy of Latin American Underdevelopment, 1750 to 1930
8C. Latin American Social History
9A. Introduction to Asian Civilizations: History of India
9C. Introduction to Asian Civilizations: History of Japan
9D. Introduction to Asian Civilizations: History of the Near and Middle East
10A, 10B. Introduction to Civilizations of Africa
11A, 11B. History of China
14BC. U.S. since 1945
Political Science
10. Introduction to Political Theory
20. World Politics
40. Introduction to American Politics

50. Introduction to Comparative Politics
B3. Group C
Anthropology
8. Archaeology: An Introduction
9. Culture and Society
33. Culture and Communication
Psychology
10. Introductory Psychology
Sociology
1. Introductory Sociology
2. Changing Society and Making History
3. Sociology of Everyday Life
4. Jobs and Careers: Sociological Approach
31. Dilemmas of Third World Development

C. Science
One course (four units) in physical sciences and one course (four units) in biological sciences:

C1. Physical Sciences
Astronomy
2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe
4. Universe of Stars and Stellar Systems
5. Life in the Universe
6. Cosmology: Our Changing Concepts of the Universe
Atmospheric Sciences
2. Air Pollution
3. Introduction to the Atmospheric Environment
4. California Weather and Climate
5. Climates of Other Worlds
6. Climate and Climatic Change
Chemistry and Biochemistry
2. Introductory Chemistry
15. Survey of Organic Chemistry and Biochemistry
Earth and Space Sciences
1. Introduction to Earth Science
2. Earth History
5. Environmental Geology of Los Angeles
8. Earthquakes
9. Origin and Evolution of Solar System
15. Introduction to Oceanography
Geography
1. Physical Environment
Mathematics
2. Finite Mathematics
3A, 3B. Calculus for Life Sciences Students
31A, 31B. Calculus and Analytic Geometry
Physics
1A. Physics for Scientists and Engineers: Mechanics
1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields
1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity
3A. General Physics: Mechanics of Solids and Fluids
3B. General Physics: Heat, Sound, Electricity and Magnetism
3C. General Physics: Light, Relativity, and Modern Physics
6A. Physics for Life Sciences Majors: Statics and Dynamics
6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics
6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport
10. Physics

C2. Biological Sciences
Anthropology
7. Human Evolution
10. Principles of Human Evolution: Genetic Basis
12. Principles of Human Evolution: Comparative Analysis
Earth and Space Sciences
16. Major Events in History of Life

Geography
2. Biogeography: Spatial Dynamics of Biological Diversity in a Changing World
5. People and the Earth’s Ecosystems

Microbiology and Molecular Genetics
6. Introduction to Microbiology
7. Developments in Biotechnology

Molecular, Cell, and Developmental Biology
30. Biology of Cancer
40. AIDS and Other Sexually Transmitted Diseases
70. Genetic Engineering and Society

Organismic Biology, Ecology, and Evolution
10. Plants and Civilization
13. Evolution of Life
21. Field Biology
25. Oceans

Psychology
15. Introductory Psychobiology

Honors

Dean’s Honors
To receive Dean’s Honors in the School of Theater, Film, and Television, students must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean’s Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at Graduation
Honors at graduation are awarded to students with superior grade-point averages. To be eligible, students must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are cum laude, an overall average of 3.663; magna cum laude, 3.792; summa cum laude, 3.848. See the quarterly Schedule of Classes for the most current calculations of Latin honors.

Counseling and Program Planning
The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building, (310) 206-8441.

Graduate Study
The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the Young Research Library, UCLA Film and Television Archive, special collections of the Arts Library, and the University’s exhibition and performance halls.

The School of Theater, Film, and Television cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The producers program is an M.F.A. management program in the Departments of Theater and Film and Television, with options in either theater or film and television.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of these areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division.

Admission
In addition to requiring that applicants hold a bachelor’s degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements
Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see Program Requirements for UCLA Graduate Degrees available on the Graduate Division website at http://www.gd-net.ucla.edu/departments.html.
Curricula and Courses

Course Listings

In the following section, curricula and courses are listed alphabetically with the college or school administering the program identified in the program heading. Every effort has been made to ensure the accuracy of the information presented. However, all courses, course descriptions, instructor designations, and curricular degree requirements described herein are subject to change or deletion without notice. For up-to-date information, consult the quarterly Schedule of Classes or visit http://www.registrar.ucla.edu/schedule/.

For a complete outline of graduate degree requirements, see Program Requirements for UCLA Graduate Degrees available on the Graduate Division website at http://www.gdnet.ucla.edu/departments.html.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. Lower division courses (numbered 1-99) are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the prerequisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Lower division/first-year seminars (numbered 88) are departmentally sponsored courses designed to provide freshmen and sophomores the opportunity to participate in small classroom settings to enhance writing, verbal, and analytical skills. Many carry general education credit.

Variable topics courses (numbered 97 and 197) are offered at both the lower (97) and upper (197) division levels; topics within a defined subject area vary with the instructor and individual offerings. These topics have a fixed and permanent place in the regular curriculum.

Professional schools seminars (numbered 98) are designed by the faculty of the professional schools specifically for freshmen and sophomores. Outside of the professional schools, 98 courses are often offered as the lower division equivalent of 198 courses, defined below. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the Schedule of Classes for respective offerings.

Group special studies courses (numbered 198) are structured special studies for groups. They may be departmentally sponsored experimental and/or temporary in nature (e.g., courses taught by a visiting professor) or those which are being tested for permanent inclusion in the curriculum. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the Schedule of Classes for respective offerings.

Individual special studies courses (numbered 199, 199F, 199H, and 199I) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are structured by the instructor and student at the time they are initiated and are open to juniors (with a minimum 3.0 grade-point average in the major field), seniors, and graduate students. To enroll, students must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, and/or 199I courses per term. After completing 16 units of 199 and/or 199H credit on a letter grade basis, students must take any additional 199 and/or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. Students with an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific requisites and credit limitations.

Graduate Courses

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree. With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If students take a graduate courses as an undergraduate, they may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596, directed individual study or research; 597, preparation for master's comprehensive or doctoral qualifying examination; 598, master's thesis research and preparation; and 599, doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with USC.) See individual departmental listings for specific limitations on 500-series courses.

Note: These definitions do not apply to the School of Law, which maintains its own course numbering system.

UCLA Extension Courses

In general, students may not attend UCLA Extension for degree credit if they are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see Concurrent Enrollment in the Academics section of this catalog.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Language in Culture is offered by the Department of Anthropology (Anthropology M140) and the Department of Linguistics (Linguistics M146). The course is listed under both departments.

Kereopatse W. Kgositsele, Ph.D. (English)

Visiting Assistant Professor
Kobla Ladzekpo, M.A. (Ethnomusicology)

Scope and Objectives
The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including the social sciences, humanities, and professional fields. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 30 active faculty members on campus with African interest and expertise in many disciplines, students have multiple options to design individualized programs.

According to a recent survey, 45 percent of the program’s graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 30 percent work with international or foreign organizations in 20 countries.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The African Area Studies Program offers the Master of Arts (M.A.) degree in African Area Studies and participates in articulated degree programs with the Department of Film and Television and with the School of Public Health.

Admission
In addition to the University minimum requirements, applicants to the M.A. program are required to (1) submit three letters of recommendation, which normally should be from academic referees; (2) present a dossier containing a résumé describing academic, Africa-related, and professional experience and a research paper or other writing sample that well demonstrates their writing and analytical skills; and (3) take the Graduate Record Examination (GRE) General Test. Also, applicants should have adequate preparation in undergraduate fields related to the program. Required preparation for the M.A. in African Area Studies most typically consists of a Bachelor of Arts in the social sciences, humanities, or fine arts.

M.F.A. Film and Television/M.A. African Area Studies
The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies with the M.F.A. in Film and Television, with a specialization in motion picture/television. Student must be accepted by both the Film and Television Department and the Program in African Area Studies before admission is offered.

M.P.H./M.A. African Area Studies
The African Area Studies Program and the School of Public Health have an articulated degree program whereby a student can work sequentially for the M.A. in African Area Studies and the Master of Public Health. By planning the concentration in public health while taking the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Areas of Study
Students choose a disciplinary (or interdisciplinary) concentration that requires at least five courses. Most concentrations are in the social sciences, fine arts, humanities, public health, or urban and regional planning. Sociology and anthropology may be taken as a combined major, as may interdisciplinary courses in development studies.

Course Requirements
A minimum of nine courses is required for the M.A., at least of which must be at the graduate level. The courses must be distributed between disciplines as follows:

(1) Major discipline: a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser.

(2) A minimum of four other courses outside the major area, of which three must be at the graduate level.

Except for 500-series courses, University regulations indicate that students in an interdepartmental degree program may not apply courses taken on an S/U grading basis toward the master's degree. By petition, the program will consider an exception for one of the nine required courses. Such petitions must be approved by a graduate adviser and the Graduate Division. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, other 500-level courses may be allowed but may not be applied toward the minimum graduate course requirement.
Comprehensive Examination Plan
The comprehensive examination plan involves a four- to six-hour written examination. It is set by a three-person faculty committee, two members of which must be from the major discipline or field of concentration. The examination is taken in the last quarter of residence. In consultation with the graduate adviser, students select committee members for the examination. The chair of the committee receives questions from other members and is responsible for setting the examination questions and requirements. An additional oral examination may be held at the discretion of the examining committee. If the comprehensive examination is failed, it may be retaken only once.

Thesis Plan
The thesis option is available by permission of the graduate adviser. Upon obtaining permission, students, in consultation with the graduate adviser, select a faculty committee to supervise and assess the thesis. Two of the three faculty committee members, including the chair, must be from the area of concentration; a third member must be from another discipline. The thesis must reflect the major discipline or field of concentration. An oral defense may be required in some circumstances.

African Area Studies

Graduate Courses

M229B. Africana Bibliography and Research Methods. (4) Same as Information Studies M229B. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Course List

African Area Studies

All courses are not offered every academic year. Students should verify courses with the respective departments.

Courses with asterisks are special courses which may be applied toward the M.A. degree requirements with prior approval of the graduate adviser. These courses either do not exclusively focus on Africa or focus on Africa only in certain years.

African Languages (Linguistics)

**African Studies**

*Interdepartmental Program*

*College of Letters and Science*

**Professors**

Christopher Ehret, Ph.D. (History)

Tesfome H. Gabriel, Ph.D. (Film and Television)

Thomas J. Hinnebusch, Ph.D. (Linguistics, African Languages)

Hartmut S. Walter, Ph.D. (Geography)

**Scope and Objectives**

The African Studies specialization is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward a bachelor’s degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology.

**Undergraduate Study**

**African Studies Specialization**

Students completing the African Studies specialization receive a degree with a major in a selected discipline and a specialization in African Studies. The chair of the committee in charge certifies completion of the program.

**Preparation for the Specialization**

*Required:* History 10A-10B and either African Languages M190 or a three-semester sequence in any African language.

**Upper Division Requirements**

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, they are required to take an upper division course related to Africa in each of four departments.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (310-825-2944) or Professor Hartmut S. Walter, Geography, 1177 Bunche Hall (310-825-3116, 825-1071).
to a heightening of self-awareness and self-pride. For non-African American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of African Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the African American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

**Undergraduate Study**

**Afro-American Studies B.A.**

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates.

**Preparation for the Major**

Required: History 10A and the courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (requisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): anthropology — Anthropology 8, 9, 10 (or 7), 12; economics — Economics 1, 2, M40, Mathematics 3A, 31E (or 3A and 3B, or 31A and 31B); English — English Composition 3, English 4, 10A, 10B, 10C (all must be taken in sequence); history — History 1A-1B-1C, 10B, 13A-13B-13C, and 99 or 100; philosophy — Philosophy 4, 21, 22, 31; political science — Economics 1, Political Science 6, 20, 40, Sociology 1; psychology — Anthropology 7, Mathematics 2, Organismic Biology, Ecology, and Evolution 2, Physics 10 (or 1A or 3A or 6A); Psychology 100A, 100B, one year of high school chemistry (or Chemistry and Biochemistry 2 or 20A); sociology — Afro-American Studies M5 or Anthropology 34, Anthropology 9, Mathematics 2, Sociology 1, 18. Students are strongly urged to complete the required lower division courses within the first two years of the major.

**The Major**

Required: (1) Anthropology M164, English M104A or M104B or M104C, History M158B-M158C; (2) four upper division and/or graduate courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved course list. Note: Students may petition the committee which administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, students should select a combination of courses that best meets their current and future educational and career goals.

**Approved courses** (recommended courses are indicated by an asterisk):

Afro-American Studies *100B, 103A through 103Z, 107, 110, 112, 120, 130, 133, 135, M136, 147A, 147B, 150, 151, 160, 161, 183, 190, 191, 192, 199*

Economics *11, 101, 102, 103A through 103Z, 107, 110, 111, 112, 120, 130, 133, M135, M136, 147A, 147B, 150, 151, 160, 161, 183, 190, 191, 192, 199*

English Composition 131A through 131D, 136A, 136B, 136C*

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. Afro-American Studies majors with grade-point averages of 3.5 or better complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American Studies and another). Students interested in this option must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, students are encouraged to plan their curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Afro-American Studies Program offers the Master of Arts (M.A.) degree in Afro-American Studies.

Admission

Applicants for admission to the M.A. program must possess a bachelor’s degree in the social sciences or humanities and demonstrate an interest in African American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) official transcripts; (2) three academic letters of recommendation; (3) a minimum 3.0 or B average in the junior/senior years of college; (4) a statement of purpose describing their background in African American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses their interests and abilities; and (7) other evidence of promise that is deemed relevant, such as work experience, accomplishments, or community and public service.

Admission to the program is limited to Fall Quarter. Prospective students may request applications from the program office.

Areas of Study

The M.A. in Afro-American Studies is interdepartmental, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are offered in the following schools and departments: Art, Dance, Economics, Geography, Psychiatry and Biobehavioral Sciences, Theater, Folklore and Mythology, Latin American Studies, African Area Studies, Education, Library and Information Science, Management, Public Health, Social Welfare, and World Arts and Cultures.

Course Requirements

A total of 12 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of six required courses. Students are required to take Afro-American Studies M200A, three courses from 200B through 200F, 270A, and one graduate-level course in research methods (for social sciences students) or critical theory (for humanities students). The methods course should be selected from the list approved by the interdepartmental degree committee (students may petition to substitute an appropriate upper division course if their outside department’s methods course is closed to nonmajors). These courses should normally be taken in the first year of study. The second year is devoted to acquiring disciplinary competence in the cognate field, and six courses must be selected from that discipline.

Eight units of 500-series courses (excluding 597 and 598) may be applied to either the total course requirement or the minimum graduate course requirement.

Comprehensive Examination Plan

Students may elect to complete the M.A. degree through the comprehensive examination option. The examination is administered by a committee consisting of at least three faculty members appointed by the program. The examination is offered on a regular basis.

Thesis Plan

The thesis is the final report on the results of the student’s original investigation. Before beginning work on the thesis, students should consult closely with their academic adviser and the thesis committee.

Afro-American Studies

Lower Division Courses

M5. Social Organization of Black Communities. (4) (Same as Sociology M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics of contemporary African American society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

M100B. Psychology from an Afro-American Perspective. (4) Survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and future of Afro-American psychology.

M101. Special Topics in Afro-American Studies. (4) Variable topics. May be repeated for credit. Concurrently scheduled with course C201.

M102. Culture, Media, and Los Angeles. (6) (Same as Asian American Studies M197H and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

M103A. African American Theater History: Slavery to Mid-1800s. (4) (Same as Theater M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (4) (Same as Theater M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

M103E. African American Theater History: The Depression to the Present. (4) (Same as Theater M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

M104A. Early Afro-American Literature. (4) (Same as English M104A.) Preparation: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, and Pauline Hopkins.

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (4) (Same as English M104B.) Preparation: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.
M104C. Afro-American Literature since the 1960s. (4) (Same as English M104C.) Preparation: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

M107. Cultural History of Rap. (4) (Same as Ethnomusicology M119 and Folklore M110.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

M109. Women in Jazz. (4) (Same as Ethnomusicology M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers, and producers and their impact on development of jazz. P/NP or letter grading.

M110A-M110B. African American Musical Heritage. (4-4) (Same as Ethnomusicology M110A-M110B and Folklore M114A-M114B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies, Central, and South America.

CM112D. African American Art. (4) (Same as Art History CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide profound and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM212D. P/NP or letter grading.

M120. Race, Inequality, and Public Policy. (4) (Same as Policy Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America.

M144. Ethnic Politics: African American Politics. (4) (Same as Political Science M144B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: Political Science 40. Designed for juniors/seniors. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americas being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about black, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

M145. Ellingtonia. (4) (Same as Ethnomusicology M111.) Music of Duke Ellington, his life, and reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

M158A. Comparative Slavery Systems. (4) (Same as History M158A.) Designed for juniors/seniors. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (4-4) (Same as History M158B-M158C.) Designed for juniors/seniors. Survey of the Afro-American experience, with emphasis on three great transitions of Afro-American life: transition from Africa to New World slavery; transition from slavery to freedom, and transition from rural to urban milieu.

M164. Afro-American Experience in the U.S. (4) (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

M166. Afro-American Sociolinguistics: Black English. (4) (Same as Anthropology M165.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

M172. The Afro-American Woman in the U.S. (4) (Same as Psychology M172.) Designed for juniors/seniors. Impact of social, psychological, and economic forces which impact on interpersonal relationships of Afro-American women and women of African American descent. Focus on members of a large society and as members of their biological and ethnic group.

M175. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (4) (Same as Women's Studies M175.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of inter-racial relationships of African Americans in three communities: work life, friendships, and intimate love relationships. P/NP or letter grading.

M195. Investigative Journalism and Communities of Color. (4) (Same as Asian American Studies M163.) Lecture, three hours. Role of investigative journalism in chronicling conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverages.

M201. Special Topics in Afro-American Studies. (4) Variable topics. May be repeated for credit. Concurrently scheduled with course C101.

C201. Special Topics in Afro-American Studies. (4) Lecture on African American families. (3) (Same as Anthropology M212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of African American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM112D. S/U or letter grading.

M240. Assessment and Treatment of African American Families. (3) (Same as Psychiatry M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family.

241. Special Topics in Afro-American Studies. (4) Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of African-American studies.

C270A. Survey of Afro-American Research. (4) Seminar, three hours. Overview of research methodologies in humanities and social sciences, with first-hand reports from faculty in various fields. Introduction to research in and related to Afro-American studies and application of such research.

Graduate Courses

M200A. Advanced Historiography: Afro-American History. (4) (Same as History M200A.) Seminar, three hours. May be repeated for credit.

200B. Seminar: Political Economy of Race. (4) Seminar on political economy, with special reference to black economic history and current conditions. Topics may include the dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, seminar emphasizes implications of transnationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socioeconomic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology. (4) (Same as Sociology M202C.) Seminar.

M200D. Afro-American Sociolinguistics: Black English. (4) (Same as Anthropology M202D.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

M200E. Studies in Afro-American Literature. (4) (Same as English M202E.) Intensive research and study of major themes, issues, and writers in Afro-American literature. May be repeated for credit.

M200F. African American Psychology. (4) Seminar. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars: African philosophies, perspectives on racism in psychology, and research in the black community.

C201. Special Topics in Afro-American Studies. (4) Variable topics. May be repeated for credit. Concurrently scheduled with course C101.

C201. Special Topics in Afro-American Studies. (4) Lecture on African American families. (3) (Same as Anthropology M212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of African American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM112D. S/U or letter grading.

M240. Assessment and Treatment of African American Families. (3) (Same as Psychiatry M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family.

241. Special Topics in Afro-American Studies. (4) Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of African-American studies.

C270A. Survey of Afro-American Research. (4) Seminar, three hours. Overview of research methodologies in humanities and social sciences, with first-hand reports from faculty in various fields. Introduction to research in and related to Afro-American studies and application of such research.
The American Indian Studies minor is designed for students who wish to augment their major program of study in the College of Letters and Science with a group of related courses from various disciplines germane to American Indian studies. The minor exposes students to Indian-related research and literature in a number of different disciplines, such as anthropology, economics, history, political science, sociology, and theater.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units, and file a petition at the American Indian Studies Center, 3220 Campbell Hall, (310) 206-7511. All degree requirements, including the specific requirements for this minor, must be fulfilled within 228 units.

Required Lower Division Course (four): American Indian Studies 10 with a grade of C or better.

Required Upper Division Courses (28): Seven courses selected from the following: (1) one American Indian languages and communication systems course (Anthropology 144 or Linguistics 114); (2) three history and social sciences courses from Anthropology 113Q, 113R, 114P, 114Q, 114R, 118A, 118B, 158, 172R, History 157A, 157B, 165C, Sociology M161, Women’s Studies 130; (3) three humanistic perspectives on language and expressive culture courses from Art History C117A, C117B, C117C, 118D, English 106, 180X, Ethnomusicology 106A, 106B, 106C, Folklore and Mythology 130, Theater 103F, World Arts and Culture C187.

A minimum of 20 units applied toward the minor requirements must be in addition to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The American Indian Studies Program offers the Master of Arts (M.A.) degree in American Indian Studies and participates in a concurrent degree program with the School of Law.

Admission

A bachelor’s degree from an accredited undergraduate institution is required for admission to the M.A. program. Applicants must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, applicants must submit a detailed account of their background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University’s minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but applicants are encouraged to take the examination and submit test results as part of the documents supporting their enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to Fall Quarter. Application forms and further information may be obtained from the Committee to Administer the M.A. Degree in American Indian Studies.

J.D./M.A. American Indian Studies

The American Indian Studies program and the School of Law offer a concurrent degree program whereby students may pursue the M.A. and the Juris Doctor degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. For the curriculum, 10 courses are required for the degree, of which seven must be at the graduate level. Only 12 units of law are allowed to be double-counted toward the M.A. degree by petition to the Graduate Division. Applicants interested in the program should contact the American Indian Studies Program.

Areas of Study

The American Indian Studies M.A. is an interdepartmental program with 13 participating academic schools and departments: Anthropology, Art, Education, English, Ethnomusicology, Folklore and Mythology, History, Law, Library and Information Science, Linguistics, Music, Sociology, and Theater. The disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Stud-
Course Requirements

A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C, which must be taken in the first year, and one of the language/linguistics options described below, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

One of the following courses must be completed to fulfill the language/linguistics requirement: (1) Linguistics 114; (2) Anthropology 243P; or (3) for native speakers of an American Indian language, an independent study course (taken with consent of the instructor) in either linguistics or anthropology, designed and supervised by a consenting faculty member, in which the objective of the course is to impart a structural knowledge of the student’s language. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Students select one area of concentration: (1) history and law, (2) expressive arts, (3) social relations, (4) language, literature, and folklore.

Students can petition for optional combinations of interdisciplinary work through the committee to administer the program. In addition to the four required courses, students must complete a minimum of four courses in an area of concentration. Three of these must be graduate-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be chosen from an approved list maintained by the program.

Two courses in the 500 series may be applied toward the 10-course requirement. However, only one 596 course may be applied toward the program requirement of seven graduate courses.

Comprehensive Examination Plan

A proposed comprehensive examination committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. The comprehensive examination normally consists of a written examination in the major area of concentration and in the minor area of concentration. The written examination is typically followed by an oral discussion of the student’s answers involving both the student and the committee members. The examination is designed and evaluated by the student’s M.A. committee. Students should work closely with their committee members in preparing for the examination.

Thesis Plan

A proposed thesis committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. Students must also submit a thesis proposal to their M.A. committee by the end of the fourth quarter of study. The M.A. thesis should demonstrate the student’s ability to define and solve a significant problem in the area of concentration. It should give evidence of mastery of theory and methodology relevant to the topic, familiarity with literature in the field, competency in research techniques, and ability to make an original contribution to the field. Copies of the thesis must be submitted to each member of the committee by the fifth week of the quarter in which students expect to graduate.

American Indian Studies

Lower Division Course

10. Introduction to American Indian Studies. (4) Lecture, four hours; discussion, one hour. Survey of selected Native North American cultures from pre-Western contact to the contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

Upper Division Courses

M161. Comparative American Indian Societies. (4) (Same as Sociology M161.) Lecture, three hours. Requisite: course 10 or Sociology 1. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

197. Special Topics in American Indian Studies. (4 to 8) Variable topics selected from the following: Myth and Folklore of American Indian Societies: Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult Schedule of Classes for topics and instructors. May be repeated twice for credit.

199. Special Studies in American Indian Studies. (2 to 4) Special individual studies on topics in American Indian studies. P/NP or letter grading.

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (4) (Same as History M2000W.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

M200B. Cultural World Views of Native America. (4) (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthro- pology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

M200C. Contemporary Issues of the American Indian. (4) (Same as Anthropology M269 and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B.

201. Topics in American Indian Studies. (4) Discussion, three hours.

M228. Seminar: Indian Law — Tribal Legal Systems. (4) (Same as Law M528.) Study of historic and contemporary legal systems of selected tribes, with emphasis on relationships among law, religion, and social order.

M267. Indian Law. (5) (Same as Law M267.) Lecture, three hours (15 weeks). Special legal status of American Indians and Indian tribes and tension between moral/legal claims and political forces. Sources and scope of federal, state, and tribal power on Indian reservations; property law concepts unique to Indian tribes and Indians; rights of American Indians in relation to federal, state, and tribal governments and federal trust relationship to Indians.

375. Teaching Apprentice Practicum. (1 to 4) Preparation; apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

care to surgical patients. During their training in the department, students develop clinical skills of medical management of surgical patients, techniques of invasive line and monitor placement, and airway management skills. They are assigned to work with a specific attending anesthesiologist and/or anesthesiology resident on a daily basis in one of the operating room locations and participate in the preoperative evaluation and preparation of their patients and development of an anesthetic plan. Students then observe how to prepare for and execute their anesthetic plan. They have opportunity to perform procedures as their abilities and the situation permit. In addition, the department has established the Human Patient Simulator which provides students with a simulated operating room setting where a variety of clinical situations are initiated so they can practice their clinical skills. Students are also expected to attend clinically oriented lectures on a wide range of anesthesia topics, including physiology, pharmacology, and critical care.

For further details on the Department of Anesthesiology and a listing of the courses offered, see the Announcement of the UCLA School of Medicine.

**Adjunct Professor**

Sondra Hale, Ph.D.

**Scope and Objectives**

Anthropology, the broadest of the social sciences, is the study of humankind. One of the strengths of anthropology as a discipline is its “holistic” or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The department recognizes the following four fields in anthropology:

**Archaeology** is diverse in both methodology and geographic coverage. The greatest strengths within the department lie in the study of cultural evolution, complex societies, hunters/gatherers, iconography, craft specialization, quantitative analysis, and political economy and include major programs focused on Western North America, California, and the high cultures of Mesoamerica and South America.

**Biological anthropology** is the study of humans and other primates from a Darwinian point of view. The program focuses on the evolutionary ecology of early hominids, extinct primates, and contemporary humans and includes training in evolutionary theory, behavioral ecology, evolutionary psychology, paleoanthropology, paleoecology, primate behavior, and mathematical modeling. Faculty members associated with the program have engaged in fieldwork in Africa, Central America, and Southeast Asia where ongoing projects include work on primate behavior, hominid evolution, and evolutionary psychology.

**Sociocultural anthropology** concerns the examination and understanding of social systems and cultural perceptions, and the human capacities which enable them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, South America, East and Southeast Asia, and Oceania. They have also engaged in ethnohistoric research among Americas with diverse ethnic identities and in various institutional settings.

Cutting across the four fields are three other categories of course offerings: applied anthropology, regional cultures, and history, theory, and method.

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

**Undergraduate Study**

**Anthropology B.A.**

**Preparation for the Major**

*Required:* Anthropology 7 (or 10 and 12), 8, 9, 33, and one elective from 10, 12, 8B, 88. All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.

**The Major**

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural “holistic” and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.
To provide a comprehensive understanding of the discipline as a whole, students must take two courses in the sociocultural anthropology field and one course in each of the other three fields (see “Scope and Objectives”). Students may take any upper division course in the given area to fulfill this requirement. All courses must be taken for a letter grade, and students must maintain an overall 2.0 GPA.

Students must complete 15 four-unit courses as follows:
(1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
(2) One upper division region and society course.
(3) One upper division history/theory course.
(4) One upper division methodology course.
(5) Four additional upper division anthropology courses.
(6) A cluster of three related fields courses that demonstrate cohesion, to be selected in consultation with the undergraduate adviser and approved by the department.

Concentrations for the Major
Concentrations, although not required, may help define and structure an Anthropology major when students want emphasis in one of the four major fields. Whether or not they opt for a concentration, the requirements for the major must still be satisfied. It is possible to use courses within their specified concentration to fulfill overlapping requirements for the major. Exceptions to the requirements below are by petition only. More detailed information on the concentrations is available from the undergraduate adviser.
(1) Archaeology: Anthropology 115P, 117 (fieldwork); two courses from 110, 111, 113; one methods course from M115A, M115B, C115R, M116Q, 117P, 118A, C126P, 129Q, 138; one quantitative methods course from M80, 180, 186; one area course from 112, 113P, 113Q, 113R, 114P, 114Q, 114R; three theory courses from 120, 124, 132, 133Q, 133R, 150, 152, 153, 156, 158, 186P, CM189A, CM189B, Geography 140, 148, Sociology 101
(2) Biological Anthropology: Anthropology 120; one quantitative methods course from M80, 180, 186; one methods course from 115P, M116Q, 117, 117P, C126P, 143; one human biology and behavioral ecology course from 124, 186P, CM189A, CM189B; one paleoanthropology course from 121A, 121B, 121C, or both 12 and 129Q (credit is not granted for both courses 7 and 12); one human genetics course from Molecular, Cell, and Developmental Biology CM156, Organismic Biology, Ecology, and Evolution C15; one primate behavior course from Anthropology 128A, 128B, Organismic Biology, Ecology, and Evolution 129
(3) Linguistic Anthropology: Anthropology 33, M140, Linguistics 20, Sociology CM124A; two methods courses from Anthropology 141, 142A, 143, Linguistics 103; one ethnography course from Anthropology 144, M145, 146, Linguistics 114; one course from Anthropology 133Q, 133R, 135A, 135B, 135C, Communication Studies 140, Linguistics 110, 127, Psychology M137J; one term of a non-European language
(4) Sociocultural Anthropology: Anthropology 130, 150; one primary course from three of the four subconcentrations listed below; one history, theory, and methods courses from M80, 126P, 139, 180, 182, 186, Sociology 101; one region and society course from 158, 171, 172R, 173Q, 174P, 175R, 175S, 175T, 175U, 175V, 177; two additional courses from one of the subconcentrations listed below:
(a) Applied and Development Subconcentration: Primary course: Anthropology 161; additional courses: M155Q, 167, M167, 186, International Development Studies M100B
(b) Ecological and Evolutionist Subconcentration: Primary course: Anthropology 153; additional courses: 128A, 128B, 132, 158, 165, 186, 186P, Geography 140
(c) Social Processes and Practice Subconcentration: Primary courses: Anthropology 151, 152, M154P; additional courses: 88, 128A, 128B, 132, 155, 156, 158
(d) Psychocultural and Medical Subconcentration: Primary courses: Anthropology 135A, 135B, 135C, 135T; additional courses: 135S, M168

Honors Program
The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted students should have a cumulative grade-point average of 3.0 overall and a 3.5 cumulative GPA in their upper division anthropology courses. The application for admission must be submitted during Fall Quarter. Ideal candidates should have junior or senior standing and have completed at least two upper division anthropology courses. The proposal, research, analysis, and writing of the paper take place over four terms through Anthropology 197HA-197HD. Course 197HA should be taken in Winter Quarter and 197HB in Spring Quarter. Research should be done in summer, and courses 197HC and 197HD should be taken in Fall and Winter Quarters of the graduation year. Students should contact the departmental honors advisor early in their studies for more information.

Anthropology B.S.

Preparation for the Major
Required: Anthropology 7 (or 10 and 12), 8, 9, 33; Chemistry and Biochemistry 14A, 14B/14BL, and 14C/14CL, or 20A, 20B, 20L, 30, and 30L; Life Sciences 1, 2, 3, 4; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, and 6C. All courses must be taken for a letter grade, and students must maintain an overall 2.0 grade-point average.

The Major
The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. All courses must be taken for a letter grade, and students must maintain an overall 2.0 GPA.

Students must complete 10 four-unit courses as follows:
(1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
(2) One upper division region and society course.
(3) One statistics course.
(4) One upper division history/theory course.
(5) Two additional upper division anthropology courses.

Computing Specialization
Majors in either anthropology bachelor’s degree program may select a specialization in Computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 180 or 186, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60 or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), and (4) satisfying all the other requirements for a bachelor’s degree in the specified major. Students graduate with a bachelor’s degree in their major and a specialization in Computing. Interested students should contact the undergraduate adviser.

Anthropology Minor
Students who wish to take a series of courses in anthropology, but major in another discipline, may be interested in the Anthropology minor. Students select courses from the four fields within anthropology (archaeology, biological anthropology, linguistic anthropology, sociocultural anthropology), although they are encouraged to focus the body of their coursework within one field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (eight): Two courses from Anthropology 7, 8, 9, 10, 12, 33.

Required Upper Division Courses (20): The core course (Anthropology 111, 120, 130, M140, or 150) from one of the four anthropology fields listed above and four additional courses. Students are encouraged to concentrate their upper division coursework within one
field and are required to consult with the undergraduate adviser in planning their program of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

**Master’s Degree**

The Department of Anthropology offers the Master of Arts (M.A.) degree in Anthropology.

**Admission**

Admission to the M.A. program is restricted to the Fall Quarter. All applicants are required to have a B.A. degree or its equivalent from a recognized college or university. A minimum grade-point average of 3.0 or its equivalent is also required for the last two years of undergraduate work and for any postbaccalaureate work completed. The department does not require an applicant to have a degree in anthropology, but it is highly desirable. If a student has a B.A. or M.A. from another field is admitted, a program of background studies in anthropology is formulated. Knowledge of a foreign language is not required for admission, but completion of the M.A. language requirement is recommended before beginning graduate work. The Application for Graduate Admission must be submitted by December 15 for consideration for the Fall Quarter of the following year. The following supporting material must be submitted directly to the Anthropology Department by January 5: (1) official transcripts of record, in duplicate, from each college or university at which work has been completed; (2) statement of purpose; (3) three letters of recommendation (preferably from anthropologists); (4) writing sample; and (5) Graduate Record Examination (GRE) scores sent by the testing agency.

Applicants applying for readmission to the program or petitioning to change their major to anthropology are treated in the same manner as first-time applicants. These students are required to submit (1) the appropriate application form and (2) the same supporting documents as new applicants by the stated deadline date. Graduate students who have been readmitted to the program are subject to any changes in departmental policy and regulations that have been instituted since the last time they were enrolled as an anthropology major.

The department requires that two faculty members sponsor an applicant before admission is recommended. Prospective sponsors are canvassed by the Departmental Admissions Committee, but it is also appropriate for applicants to contact potential sponsors.

For further information on the departmental program, a graduate information syllabus may be obtained without charge by writing to the Anthropology department.

**Areas of Study**

Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

**Course Requirements**

The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

An M.A. degree requires 10 courses (40) taken for a letter grade, with a minimum 3.0 grade-point average. The 10 required courses are distributed as follows:

1. Two courses must be the graduate prosem,inar, Anthropology 200A-200B;
2. One course must be the graduate core seminar in the student's field of specialization (200 series);
3. Three courses must be graduate seminars (200 series);
4. Four courses may be upper division (100 series) designated elective courses;
5. Three courses may be outside the major with the approval of the three-member guidance committee,
6. Two courses may be independent studies.

Eight units of course 596 taken for a letter grade may be applied toward the total M.A. course requirement, but only four of these eight units are applicable to the minimum graduate-course requirement.

Courses taken on a S/U basis, Anthropology 598, and 300- and 400-series courses may not be applied toward fulfillment of the M.A. unit requirement.

**Core Course Requirements**. The purpose of the core course requirement is to ensure that students are versed in the major fields in anthropology. Courses taken while in graduate status at UCLA may be applied toward the unit requirement of the M.A. degree. These fields and courses have been designed to meet the minimal needs of students specializing in other subfields of study.

1. Archaeology: Anthropology 111 or M201A
2. Biological: Anthropology 120G
3. Linguistic: Anthropology M140 or 242
4. Sociocultural (select one): Anthropology 130, 150, 203A, 203B, 203C

Students must demonstrate basic knowledge in all fields by exercising one or a combination of the following three options:

1. Taking the core course with a passing grade of B or better;
2. Petitioning that coursework completed elsewhere, or at UCLA as an undergraduate, constitutes the equivalent of such courses;
3. Passing the subfield's core course examination given in Spring Quarter.

A grade of B or better is required in any core course taken at UCLA. If students received a grade of B−, C+, or C, they may not repeat the core course, but must take the core course examination and pass or be subject to dismissal. If a grade of C− or below is received, students may repeat the course, but must receive a grade of B or better the second time the course is taken, or be subject to dismissal.

**Comprehensive Examination Plan**

None.

**Thesis Plan**

The purpose of the master's thesis is to demonstrate ability to generate and assemble a body of data, to analyze it, and to indicate its relevance to established anthropological thought as well as to write a lucid prose. Students must submit an original paper based on field, laboratory, or library research to all three committee members by the end of the fifth quarter of residence. The thesis committee assists students in formulating the research paper, monitoring its progress, and evaluating the paper when submitted. It is essential that students maintain close contact with all three members while preparing the M.A. thesis. Consult the Graduate Division's publication, *Policies and Procedures for Thesis and Dissertation Preparation and Filing*, for instructions on the preparation and submission of the thesis.

**Doctoral Degree**

**Admission**

Students who enter the graduate program with an M.A. degree, whether or not in anthropology, are required to demonstrate basic knowledge of the discipline before being permitted to begin the requirements for the Ph.D degree in Anthropology. It is expected that students accomplish this during the first year of academic residence by completing (in accordance with the procedures and regulations stated in the M.A. degree section) the following:

1. Nominating a three-member departmental advisory committee;
2. Completing the core course requirement;
3. Establishing competency in a foreign language, equivalent to the master's level requirement;
4. Taking the graduate core seminar only in the student's field of specialization. This is re-
required of all students even though they may already have a master's degree in anthropology;
(5) Taking the graduate prosemars, Anthropology 200A-200B. This is required of all entering students;
(6) Submitting to the student's departmental advisory committee, for evaluation, a prior master's paper or a research paper that was written while in graduate standing.

Only when these requisites have been met are students permitted to begin the requirements for the Ph.D. degree.

Major Fields or Subdisciplines
Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

Course Requirements
The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

Students who received their M.A. degree from this department are expected to enroll in three seminars, each with a different faculty member, between receipt of the master's degree and taking the doctoral qualifying examinations. The department does not require any specific courses or number of courses for receipt of the Ph.D.

Written and Oral Qualifying Examinations
The Ph.D. qualifying examination is composed of written and oral examinations. The timing of these examinations are set in consultation with the members of the doctoral committee and are to be taken within a 10-week period of time. Students must be registered and enrolled to take the qualifying examinations.

Written Examination. The written portion of the qualifying examination is administered by the three-member departmental doctoral committee. Students are examined in three subfields; two fields are drawn from a list maintained in the department and the third is specific to the student's dissertation interests and needs. In addition, students are expected to demonstrate competence in general anthropological theory. The format of the written examination is to be determined by the student's departmental doctoral committee. There must be a minimum of two weeks between completing the written examination and taking the oral portion of the qualifying examination.

University Oral Qualifying Examination. The oral portion of the doctoral qualifying examination is primarily a defense of the dissertation proposal and is administered by the four-member Ph.D. doctoral committee.

The committee determines the conditions for reexamination should students not pass either portion of the qualifying examination.

Anthropology

Lower Division Courses

7. Human Evolution. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Evolutionary processes and evolutionary past of the human species. P/NP or letter grading.

8. Archaeology: An Introduction. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several campus archaeologists.

9. Culture and Society. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

33. Culture and Communication. (4) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to ways in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people's behavior and understanding of each other's actions. Topics include language socialization, cross talk, and verbal and nonverbal communication.

34. Introduction to Urban Speech Communities. (4) Lecture, three hours; discussion, one hour. Introduction to study of speech communities in metropolitan areas, with special focus on communities in Los Angeles. Emphasis on ways in which communities share and incorporate speech norms of urban society while maintaining rules for conduct and interpretation of speech within specific speech communities. Topics include language and identity, socialization, social dialects, and communication.

M70. Politics of Reproduction. (4) Same as Psychiatry M96.) Seminar, three hours. Preparation: satisfaction of Subject A requirement. Examination of ways that power, as it is structured and enacted in everyday activities, influences human reproductive behavior. Use of case materials from a variety of cultures, including the U.S., to study how common interests within households, communities, and states impinge on childbearing and childrearing choices made by individual women and men.

M92. Introduction to Quantitative Methods. (4) (Formerly numbered 80.) (Same as Statistics M21A.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include descriptive statistics (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test). P/NP or letter grading.

88. Lower Division Seminar. (4) Seminar, three hours. Variable topics; consult Schedule of Classes or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

Archaeology

111. Study of Archaeology. (4) Survey of contemporary prehistoric archaeology. Emphasis on what archeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.)

113P. Archaeology of North America. (4) Lecture, three hours. Prehistory of North American Indians; evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology.

113Q. Prehistory and Ethnography of California. (4) Lecture, three hours. Requisite: course 8 or 9. From earliest Californians through 10,000 years of history, study of diversity in California’s original peoples. Aspects of technology, ideology, ecology, and social/political organization. Historic impacts on California Indians by Euro-Americans. P/NP or letter grading.

113R. Southwestern Archaeology. (4) Examination of prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to “Great Events” (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems.

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere). (4) Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec/Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). (4) Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114R. Ancient Civilizations of Andean South America. (4) Lecture, three hours. Requisite: course 8 or 9. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Incas and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114S. Comparative Study of Ancient States. (4) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Urak, Teotihuacan, Classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. Concurrently scheduled with course CM214S. P/NP or letter grading.
Biological Anthropology

120. Survey of Biological Anthropology. (4) Lecture, three hours. Requisites: courses 7, or 10 and 12. Limited to majors and graduate anthropology students. Survey of biological anthropology including all major subsareas. (Core course for biological field) P/NP or letter grading.

120G. Biological Anthropology in Review. (6) Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate anthropology students. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation.

121A. Primate Fossil Record. (4) Lecture, three hours. Recommended requisites: courses 7, or 10 and 12. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene. P/NP or letter grading.

121B. Australopithecines. (4) Lecture, three hours. Recommended requisites: courses 7 or 10 and 12. 121A. Morphology, ecology, and behavior of the genus Australopithecus. History of their discoveries and their place in human evolution. P/NP or letter grading.

121C. Evolution of Genus Homo. (4) Lecture, three hours. Recommended requisites: courses 7 or 10 and 12. 121A. 121B. Origin and evolution of the genus Homo, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man. P/NP or letter grading.

121P. Reconstructing Hominid Behavior and Paleoecology. (4) Seminar, three hours. Use of paleontological, archaeological, ecological, and geological evidence to infer life through the Cenozoic and early Pleistocene hominid behavior and environmental context of human evolution. P/NP or letter grading.

121Q. Paleoanthropology in Review. (6) Lecture, three hours; seminar, three hours. Corequisite: course 12. Limited to juniors/seniors. Designed for advanced students interested in human evolution, fossil evidence, and theoretical constructs. Students attend course 12 lectures plus three-hour seminar per week. P/NP or letter grading.

124P. Evolution of Human Sexual Behavior. (4) Lecture, three hours. Recommended requisite: course 7 or 10 or 12. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex. Corequisite: course 124P.

135B. Current Topics and Research. Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Survey of the field of psychological anthropology with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings.

135C. Seminar: Psychocultural Studies. (4) Seminar, three hours. Requisite: course 9. Firsthand exposure to current research in psychocultural studies. Various university scholars are brought in to discuss their on-going research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

135T. Psychoanalysis and Anthropology. (4) Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach.

M136G. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Psychiatry M112.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

137. Selected Topics in Cultural Anthropology. (4) Lecture, three hours. Study of selected topics in cultural anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

138. Methods and Techniques of Ethnography. (4) Introduction to problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. Relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely problems and challenges in this major area of anthropological concern.

139. Field Methods in Cultural Anthropology. (4) Lecture, three hours. Designed for juniors/seniors. Introduction to skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison.

Linguistic Anthropology

M140. Language in Culture. (4) (Same as Linguistics M146.) Lecture, three hours; discussion, one hour. Requisite: course 33 or Linguistics 20. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) P/NP or letter grading.

141. Ethnography of Everyday Speech. (4) Lecture, three hours. Requisite: course 33. Designed for juniors/seniors. Course has two interrelated objectives: (1) to introduce students to ethnography of communication — description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction.

142A-142B. Microethnography of Communication. (4) Lecture, three hours. Requisite: course M140. Course 142A or Sociology CM144A is requisite to 142B. Students may primary records (sound tape, videotape, or film) of naturally occurring social interactions which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory outside of class and minimal fees to offset costs of equipment maintenance and insurance required.

143. Field Methods in Linguistic Anthropology. (4) Lecture, three hours. Requisite: course M140. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and textual analysis. Practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading.

144. American Indian Ethnolinguistics and Sociolinguistics. (4) Requisite: course 33 or American Indian Studies M121. Introduction to sociocultural aspects of language use in Native North American Indian speech communities. Specific focus includes both microsociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (male and female speech, baby talk, ceremonial speech, etc.). Macrosociolinguistic considerations include language contact and its relationship to language change and language in American Indian education.

M145. Afro-American Sociolinguistics: Black English. (4) (Same as Afro-American Studies M165.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

146. Language and Culture of Polynesia: Past, Present, and Future. (4) Lecture, three hours. Requisite: course M140. Introduction to Polynesian cultures and languages, with particular emphasis on past and present sociocultural systems, patterns of language structure and language use, verbal art, language socialization strategies, and forms of cultural assimilation and resistance to European contact. Fieldwork on contemporary Polynesian cultures in U.S. urban areas.

147. Selected Topics in Linguistic Anthropology. (4) Lecture, three hours. Study of selected topics in linguistic anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

Social Anthropology

152. Politics: Tribe, State, Nation. (4) Lecture, three hours. Cross-cultural examination of politics and political organization. Law and the modern order; corporate groups; ideology. Relations of political institutions to other institutions of society and to issues of identity and representation.

153. Evolution of Human Societies. (4) Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic facts to be placed in the larger social, political, and cultural contexts; examination of the relation of modes of production, distribution, and consumption of goods and services in their relation to social networks, power structures, and institutions of family, kinship, and class. P/NP or letter grading.

155. Women's Voices: Their Critique of Anthropology of Japan. (4) Lecture, three hours. Preparation: introductory sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

155Q. Women and Social Movements. (4) (Same as Women's Studies M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropological course. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

156. Comparative Religion. (4) Survey of various methodological approaches in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally.

157. Selected Topics in Social Anthropology. (4) Lecture, three hours. Study of selected topics in social anthropology. Consult Schedule of Classes for topics and instructors. May be repeated for credit. P/NP or letter grading.

158. Hunting and Gathering Societies. (4) Lecture, three hours. Requisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two view points. Use of this analysis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies.

158P. Pastoral Nomads. (4) Lecture, three hours. Requisite: course 9 or 150. Survey of pastoral nomadic societies. Consideration of environmental and social demands of livestock domestication and production. Focus on ecological features, cultural practices, and social organization, with special attention to historical interactions between pastoral nomads and settled peoples.
Regional Cultures

Africa

171. Sub-Saharan Africa. (4) Lecture, three hours. Issues of ecology and political economy; continuing impacts of colonialism, nationalism, and current challenges for development; changes in social relations. Examination of African significance to development of anthropology. Cultural background for understanding events in contemporary Africa provided.

North America

172A. Native North Americans. (4) Lecture, three hours; discussion, one hour (optional). Designed for juniors/seniors. Consideration of diversity of Native American societies north of Mexico, including their origins, formation, and development. Particular attention to subsistence systems and their relationship to social institutions and cultural practices, especially religion. Letter grading.

172B. Change and Continuity among Native North Americans. (4) Lecture, three hours. Requisite: course 172A. Consideration of tremendous change Native American societies and cultures have undergone since European contact. Emphasis on patterns of adaptation and continuity as Native Americans confronted colonization and its implications.

172R. Cultures of the Pueblo Southwest. (4) Lecture, three hours. Survey of ethnographic and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups.

172V. Culture Change and the Mexican People. (4) (Same as Chicana and Chicano Studies M172V.) Lecture, three hours. Requisite: course 9 or Chicana and Chicano Studies 10A or 10B. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include culture and evolution, Indian nation-states, miscegenation, peasantries, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

Middle America

173Q. Latin American Communities. (4) Overview of social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in context of economic, political, and cultural environments.

South America

174P. Ethnography of South American Indians. (4) Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of man and society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement.

Asia

175R. Societies of Central Asia. (4) Lecture, three hours. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and status of women, religion, and the relationship in Hindu/Buddhist culture contact zone, and current problems of modernization. P/NP or letter grading.

175S. Japan. (4) Lecture, three hours. Overview of contemporary Japanese society. General introduction, kinship, marriage and family life, social mobility and education, norms and values, religions, patterns of interpersonal relations, social deviance. P/NP or letter grading.

175T. Civilizations of East Asia. (4) Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization.

175U. Cultures of the Indonesian Archipelago. (4) Lecture, three hours. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javaneses, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical overview with examination of such topics as religious and political ideas and institutions, art, symbolism and ritual, illness and healing, and psychological issues and their causes.

175V. Ethnology of Korea: Re-Presenting Lives in Contemporary South Korea. (4) Lecture, three hours. Examination of South Korea’s contemporary structural positioning, with focus on its dynamic development over a history of colonialism and war to capitalism; multiple and conflicting linkages of Korean people involving class, gender, family/kinship, and nation.

175W. Ideology and Social Change in Contemporary China. (4) Lecture, three hours. Introduction to sociocultural changes in China from 1949 to the present. Topics include ideology and politics in everyday life, social stratification and mobility, cultural construction of socialist person, changes in courtship, marriage, and family, and political economy of reforms in post-Mao era. P/NP or letter grading.

Middle East

176. Culture Area of the Middle East. (4) Lecture, three hours. Study of the Middle East has suggested many theories as to developmental history of human kind, evolution of human society, birth of monotheism, and origin of agriculture, trade, and the city. Presentation of anthropological material relevant to understanding the Middle East as a culture area, and Islam as basis of its shared tradition.

177. Cultures of the Pacific. (4) Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. DISTINCTIVE sociocultural features of each culture area presented in context of their adaptive significance.

History, Theory, and Method

180. Quantitative Methods in Anthropology. (5) Lecture, three hours; laboratory, one hour. Requisite: course M80. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric tests, and log-linear models. Emphasis on computer-based applications of data analysis techniques.

182. History of Anthropology. (4) Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of evolutionary theory and concept of culture in the late 19th century. "Root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombraso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, perception of deviance, and our view of culture in general.

183. History of Archaeology. (4) Preparation: at least one upper division archaeology course. Development of world archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affiliation.
185. Models of Cultural Evolution. (4) Lecture, two hours; discussion, one hour. Requisite: course 7 or 10. Introduction to Darwinian models of cultural evolution. How organic evolution has shaped the capacity for culture. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

CM189A-CM189B. Behavioral Developmental Ecology. (4-4) (Formerly numbered M185A-M185B.) (Same as Organismic Biology CM189A-CM189B.) Lecture, three hours; Preparation: one-division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM285A-CM285B. Letter grading.

Special Studies

M194. Senior Seminar: Language, Interaction, and Culture. (4) (Same as Applied Linguistics and TESL M194 and Sociology M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4) (Same as Sociology M196A-M196B.) Lecture, three hours. Requisites: Honors Colloquium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

197HA. Beginning Seminar. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of major research strategies in anthropology to aid honors students in developing research proposals.

197HB. Field Methods. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of field methods in anthropology to prepare students to conduct their own field research.

197HC. Data Analysis. (4) Seminar, three hours. Limited to anthropology honors program students. Survey of major forms of data analysis in anthropology to aid honors students in analysis of their own research data.

197HD. Writing for Anthropology. (4) Seminar, three hours. Limited to anthropology honors program students. Teaching of writing skills, with focus on how to write honors theses.

197K-197Z. Selected Topics in Anthropology. (2 to 4 each) Lecture or seminar, three hours. Study of selected topics of anthropological interest taught by resident and visiting faculty members. Consult Schedule of Classes for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

199. Special Studies in Anthropology. (2 to 8) Eight units may be applied toward upper-division anthropology courses required for the major.
Biological Anthropology

220. Current Problems in Biological Anthropology. (4) Seminar, three hours. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221B. Fossil Evidence for Human Evolution. (4-4) Examination and analysis of fossil evidence for man's evolution.

Cultural Anthropology

230G. Theories of Culture. (4) Lecture, three hours. Exploration of aspects within culture theory: emergence of culture with modes of production, discovery of culture, and "cultural capital" and cultural change. Investigation of production and transformation of meaning within cultural domains of politics, economy, and religion. S/U or letter grading.

231. Asian Americans: Personality and Identity. (4) Designed for graduate students. Effect of class, race, and racism on Asian American personality within the framework of anthropological theories.

232V. Current Issues in Ethnography. (4) Seminar, three hours. Designed for graduate students. S/U or letter grading.

233P. Symbolic Anthropology. (4) Requisite: course 133R. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit, S/U or letter grading.

233Q. Aesthetic Anthropology. (4) Requisite: course 133R. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit.

234A. Seminar: Psychocultural Studies and Medical Anthropology. (4) Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychology, trans-cultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

234B. Transcultural Psychiatry. (4) Same as Psychiatry M234.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatry, and questions of "sick" societies. May be repeated for credit.

234Q. Psychological Anthropology. (4) Same as Psychiatry M222.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

234T. Anthropology of Human Body. (4) Same as Psychiatry M234.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

235G. The Individual in Culture. (4) Same as Psychiatry M213.) Seminar, three hours. Designed for graduate students.

236P. Cross-Cultural Studies of Socialization and Children. (4) Same as Psychiatry M214.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) Same as Education M222A, Psychiatry M235, and Psychology M236.) Lecture, two hours; discussion, one hour. Examination of naturalistic methods and techniques in field research. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

238. Native American Revitalization Movements. (4) Formerly numbered 228.) Same as History M200C.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific topics include Handa-moon Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

239P. Selected Topics in Field Ethnography. (4 to 8) Seminar, three hours. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

Linguistic Anthropology

241. Topics in Linguistic Anthropology. (4) Same as Linguistics M246C.) Problems in relations of language, culture, and society. May be repeated for credit.

242. Ethnography of Communication. (4) Designed for graduate students. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior.

243P. American Indian Ethnolinguistics and Sociolinguistics. (4) Preparation: prior coursework in either anthropological linguistics, linguistics, or American Indian studies. Social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussions.

243Q. Afro-American Sociolinguistics: Black English. (4) Same as Afro-American Studies M200D.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

244. Field Methods in Linguistic Anthropology. (4) Seminar, three hours; work with informant, one hour. Requisite: Linguistics 20 or prior experience in linguistic analysis. Practice in eliciting and transcribing linguistic data from native informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and pragmatic analysis. Practice with native speakers of non-indo-European languages is important aspect of student participation. S/U or letter grading.

245. Linguistic and Intracultural Variation. (4) Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objects of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to study of intra-individual and interindividual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory.

246B. Grammar and Discourse Practicum. (4) Same as Applied Linguistics and TESL M272.) Requisite: course M246A. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from a range of languages. S/U or letter grading.

247. Topics in Semantics and Pragmatics. (4) Same as Applied Linguistics and TESL M268.) Requisite: Applied Linguistics and TESL 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change.

249A-M249B. Ethnographic Methods in Discourse Analysis I, II. (4-4) Same as Applied Linguistics and TESL 270, TESL 270A-M270B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading. May be repeated for credit with topic change.

Social Anthropology

251P. Cultural Ecology. (4) May be repeated for credit.
Regional Cultures

271. Contemporary Problems in Africa. (4) Formerly numbered 281P. Seminar, three hours. Problems in Africa in light of classical anthropological literature and recent work by anthropologists and other fieldworkers in Africa, with cases from eastern and southern Africa. S/U or letter grading.

M272. Indians of South America. (4) Same as Latin American Studies M250A. Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

273. Cultures of the Middle East. (4) Seminar, three hours. Survey of literature and problems of various cultures of the Middle East.

277. Anthropology of China. (4) Seminar, three hours. Designed for graduate students. Seminar of selected literature and current developments in field of Chinese social-cultural anthropology. Main topics include family and kinship, interpersonal relations, social differences, local elite and the state, rituals and beliefs, popular culture, consumerism, and cultural globalization. S/U or letter grading.

History, Theory, and Method

281. Selected Topics in History of Anthropology. (4) Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology. (4) Primarily designed for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.

283. Formal Methods of Data Analysis in Anthropology. (4) Seminar, three hours. Current topics and issues related to formal analysis of data and representation of cultural constructs: formal models of kinship terminologies, structural models of cognitive systems, graph theoretic models of networks, models of decision making, hierarchical information systems, stability in complex adaptive systems. S/U or letter grading.

M284. Qualitative Research Methodology. (4) Same as Community Health Sciences M216.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. S/U or letter grading.

285. Schools, Domains, and Strategies in World Archaeology. (4) Seminar, three hours. Comparative examination of schools of world archaeology, contrasting their respective databases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in history or philosophy of science.

285P. Selected Topics in Anthropological/Archaeological Theory. (4) Seminar, three hours. Designed for graduate students. Variable topics course on important theoretical subjects in anthropology and archaeology. May be repeated for credit. S/U or letter grading.

286. Selected Topics in Computer Simulation and Modeling. (4) Seminar, three hours. Prerequisites: course 180. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic evolutionary, and other theoretical foci. S/U or letter grading.

287. Poststructural Theories. (4) Seminar, three hours. Designed for graduate students. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the concept of culture, narrative, ethnographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

287P. Anthropology and Colonialism. (4) Designed for graduate students. Exploration of multifaceted nature of colonialism and its cultural manifestations in a variety of geographical areas. Reconsideration of history of anthropology for, as Talal Asad argues, “anthropology emerged as a distinctive discipline at the beginning of the colonial era.” S/U or letter grading.

CM289A-CM289B. Theoretical Behavioral Ecology. (4) Same as Organismic Biology CM295A-CM295B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM289A is requisite to CM289B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B. Letter grading.

292. Making Oral Presentations. (4) Lecture/student presentations, two hours; discussion, one hour. Designed for graduate students. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading.

297. Selected Topics in Anthropology. (2 to 4) Seminar, three hours. Designed for graduate students. Study of selected topics of anthropological interest. Consult Schedule of Classes for topics and instructors. May be repeated for credit. S/U or letter grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Anthropology. (2 to 4) Seminar/workshop, three hours. Required of all new teaching assistants. Workshop/seminar in teaching techniques, including evaluation of each student’s own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (1 to 12) Directed individual studies. S/U or letter grading.

599. Research for Ph.D. Dissertation. (2 to 12) Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework.

John H. Schumann, Ed.D., Chair

Professors
Roger W. Andersen, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Raimo A. Anttila, Ph.D. (Linguistics)
Lyle Bachman, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Marianne Celce-Murcia, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Susan R. Curtiss, Ph.D. (Linguistics)
Alessandro Duranti, Ph.D. (Anthropology)
Charles Goodwin, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Jordana Goodwin, Ph.D. (Anthropology)
Bruce P. Hayes, Ph.D. (Linguistics)
John Heritage, Ph.D. (Sociology)
Thomas J. Hinnnebusch, Ph.D. (Linguistics)
Nina M. Hyams, Ph.D. (Linguistics)
Patricia A. Keating, Ph.D. (Linguistics)
Edward L. Keenan, Ph.D. (Linguistics)
Hilda J. Koopman, Ph.D. (Linguistics)
Pamela L. Munro, Ph.D. (Linguistics)
Elainor Ochs, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Emanuel A. Schegloff, Ph.D. (Sociology)
Russell G. Schuh, Ph.D. (Linguistics)
Dominique L. Sportiche, Ph.D. (Linguistics)
Edward P. Stabler, Ph.D. (Linguistics)
Donca Steriade, Ph.D. (Linguistics)
Robert P. Stockwell, Ph.D. (Linguistics)
Anna Szaboloki, Ph.D. (Linguistics)

Professors Emeriti
George D. Bedell, Ph.D. (Linguistics)
William Bright, Ph.D. (Linguistics)
Russell N. Campbell, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Victoria A. Fromkin, Ph.D. (Linguistics)
Evelyn R. Hatch, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Mazil R. Kunene, Ph.D. (Linguistics)
Peter N. Ladefoged, Ph.D. (Linguistics)
Earl J. Rand, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Paul M. Schachter, Ph.D. (Linguistics)

Associate Professors
Asif Agha, Ph.D. (Applied Linguistics and Teaching English as a Second Language)
Steven E. Clayman, Ph.D. (Sociology)
Paul B. Kroskrity, Ph.D. (Anthropology)
Anoop Manjakan, Ph.D. (Linguistics)
Marcyliena H. Morgan, Ph.D. (Anthropology)
Timothy A. Stowell, Ph.D. (Linguistics)

Assistant Professors
Sun-Ah Jun, Ph.D. (Linguistics)
Carson Schuetze, Ph.D. (Linguistics)

Lecturers
Christine Holten, M.A. (Applied Linguistics and Teaching English as a Second Language)

Adjunct Professor
Ian Maddieson, Ph.D. (Linguistics)

Scope and Objectives
Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

Faculty members of the Department of Applied Linguistics and Teaching English as a Second Language, as well as professors in Anthropology, Education, Linguistics, Psychology, and Sociology, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the areas of discourse/grammar analysis, language acquisition, and language assessment. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Masters’s Degree
None.

Doctoral Degree
Admission
The basic requirement for admission to the program leading to the Ph.D. degree in Applied Linguistics is the completion of the UCLA M.A. degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Applicants whose graduate degree is in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit the following items by the preceding December 15: (1) a statement of purpose describing their research background and the type of dissertation they hope to prepare; (2) three letters of recommendation from professors who are well acquainted with their academic background; (3) the M.A. thesis or related research papers; (4) Graduate Record Examination (GRE) scores. International applicants should also submit their Test of English as a Foreign Language (TOEFL) scores.

The admissions committee considers all of the above criteria, as well as undergraduate and graduate grade-point averages, in deciding on the top candidates for the program.

Major Fields or Subdisciplines
Three areas of specialization are available: language acquisition, language assessment, and discourse analysis/functional grammar.

Course Requirements
Basic Preparation. Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in applied linguistics, students can choose either a phonetics and phonology track, a syntax and semantics track, or a discourse analysis track.

For all tracks, students must take Linguistics 120A, 120B, and Applied Linguistics and Teaching English as a Second Language 220. Under the phonetics and phonology track, students would then take Linguistics 165A or 200A, followed by Linguistics 201 or 203 or 204. Under the syntax and semantics track Linguistics 165B, and Linguistics 200B or 215 are taken. Under the discourse analysis track, students would take Applied Linguistics and Teaching English as a Second Language 260, followed by Applied Linguistics and Teaching English as a Second Language 271 or 274 or Sociology C244A, or Anthropology 204 or 242.

Units and Courses. As a breadth requirement, students must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses.

Linguistics 275, Applied Linguistics and Teaching English as a Second Language 400, or Applied Linguistics 597 or 599. No more than eight of the 32 units may be in 596 courses, and these should be in Applied Linguistics 596, if possible. The 32 units must include eight units in one area outside the area of specialization.
Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the eight-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as requisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501, 597, Applied Linguistics and Teaching English as a Second Language 400, and Linguistics 275. All other courses must be taken for letter grades.

Written and Oral Qualifying Examinations

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. Students are to choose the topics of these papers in consultation with appropriate faculty members and with the consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

The doctoral committee administers the University Oral Qualifying Examination, the focus of which is a prospectus of the dissertation which must be submitted to the committee prior to the examination. The committee also has the responsibility for determining the adequacy of the student's preparation for writing the dissertation. If the prospectus and preparation are judged adequate, the choice of the dissertation topic is thereby approved, and the student becomes eligible for advancement to doctoral candidacy. In case of failure, the doctoral committee determines whether or not the student may be reexamined and if further courses must be taken before the reexamination.

Applied Linguistics

Graduate Courses

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study. (4 to 8) Limited to Ph.D. students. Independent study in an area of applied linguistics. Up to eight units may be applied toward Ph.D. course requirements. May be repeated for credit.

597. Preparation for Ph.D. Candidacy Examination. (4 to 8) Preparation: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4 to 16) Preparation: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading.

Course List

Discourse Analysis/Functional Grammar

Applied Linguistics and Teaching English as a Second Language
260. Discourse Analysis
263. Crosslinguistic Topics in Functional Grammar I: Typology
264. Crosslinguistic Topics in Functional Grammar II: Discourse
265. Topics in Functional Grammar
M266. Topics in Semantics and Pragmatics
268. Crosslinguistic Research Laboratory
269. Current Issues in Discourse Analysis
271. Advanced Seminar: Cohesion Analysis of English Structure
M272. Grammar and Discourse
M273. Grammar and Discourse Practicum
274. Advanced Seminar: Contextual Analysis of English Structure
278. Discourse Laboratory

English
241. Studies in Structure of the English Language

Linguistics

201. Phonological Theory II
202. Language Change
203. Phonetic Theory
204. Experimental Phonetics
205. Morphological Theory
206. Syntactic Theory II
207. Formal Semantics
C209A, C209B. Computational Linguistics I, II
210A, 210B. Field Methods I, II
214. Survey of Current Syntactic Theories
215. Syntactic Typology
220. Linguistic Areas
225. Linguistic Structures
251A. Topics in Phonetics and Phonology
252A. Topics in Syntax and Semantics
253A. Topics in Language Variation
254A. Topics in Linguistics
256A, 256B. Topics in Phonetics and Phonology II: Proseminar
257A, 257B. Topics in Syntax and Semantics II: Proseminar
258A, 258B. Topics in Language Variation II: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
263A-263B-263C. Seminars: Language Variation (only one of these may be applied toward the 32-unit requirement)

Additional Courses in Other Departments

Anthropology
204. Core Seminar: Linguistic Anthropology
M234Q. Psychological Anthropology
242. Ethnography of Communication
245. Linguistic and Intracultural Variation
M249A-M249B. Ethnographic Methods in Discourse Analysis I, II

Education
204D. Minority Education in Cross-Cultural Perspective

German (Germanic Languages)
C238. Linguistic Theory and Grammatical Description
Sociology
C244A-C244B. Conversational Structures I, II
C258. Talk and Social Institutions
266. Selected Problems in Analysis of Conversation
267. Selected Problems in Communication

Spanish (Spanish and Portuguese)
209. Dialectology
256A-256B. Studies in Spanish Linguistics
257. Studies in Dialectology

Language Acquisition

Applied Linguistics and Teaching English as a Second Language
221. Experiential Seminar: Second Language Learning
222. Discourse-Centered Language Learning
223. Topics in Psycholinguistics
224. Language Socialization
229. Current Issues in Language Acquisition
230. Advanced Seminar: Interlanguage Analysis
231. Crosslinguistic Topics in Language Acquisition

Linguistics
213A. Grammatical Development
213B. Brain Bases for Language
C235. Neurolinguistics
254A. Topics in Linguistics
259A, 259B. Topics in Linguistics II: Proseminar
264A-264B-264C. Seminars: Special Topics in Linguistic Theory

Additional Courses in Other Departments

Education
217D. Language Development and Education
227B. Research on Cognitive and Language Characteristics of Exceptional Individuals

Psychiatry
257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders

Psychology
240A-240B. Developmental Psychology
242F. Seminar: Developmental Psychology — Development of Language and Communication
260A-260B-260C. Proseminars: Cognitive Psychology
262. Human Learning and Memory
263. Psycholinguistics
268D. Seminar: Human Information Processing — Language and Cognition

Language Assessment

Applied Linguistics and Teaching English as a Second Language
240. Design and Development of Language Assessment Procedures
241. Analysis and Use of Language Assessment Data
242. Experimental Design and Statistics for Applied Linguistics
249. Current Issues in Language Assessment
250. Advanced Seminar: Language Assessment
258. Assessment Laboratory

Additional Courses in Other Departments

Education
200B. Survey Research Methods in Education
200C. Analysis of Survey Data in Education
202. Evaluation Theory
211A. Measurement of Educational Achievement and Aptitude
211B. Measurement in Education: Underlying Theory
Scope and Objectives

The M.A. program in Applied Linguistics and Teaching English as a Second Language (TESL) is intended primarily for individuals who wish to pursue a career in applied linguistics research. It is designed to provide both breadth of knowledge in several areas of applied linguistics and the specialized knowledge and skills needed to plan and conduct research in one area.

The program is a two-year course of graduate study leading to a Master of Arts degree. The orientation of the program is toward research, and a thesis is required. The first year is designed to provide students with a fundamental understanding of the principles, issues, problems, and approaches to research in each of three areas within the discipline: language acquisition, assessment, and discourse analysis/functional grammar. It is expected that during the first year students identify one of these areas for specialization and begin consulting with a faculty member about areas of possible thesis research. During the second year students are expected to complete advanced courses in their selected area of specialization and to complete their thesis research.

In addition, the Department of Applied Linguistics and Teaching English as a Second Language and the Department of Linguistics offer an interdisciplinary degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531.

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3300 Rolfe Hall, UCLA, Box 951531, Los Angeles, CA 90095-1531.

Undergraduate Study

Language, Interaction, and Culture Minor

The Language, Interaction, and Culture minor is designed to train students in the naturalistic study of discourse in everyday interaction.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

Required Lower Division Course (four): Linguistics 20 with a grade of C or better.

Required Upper Division Courses (28): (1) Three pedagogical foundation courses from Applied Linguistics and Teaching English as a Second Language 101 or C110, C116, C118; (2) a minimum of two pedagogical skill courses from C111, C112, C113, C115, C117; (3) a maximum of two courses in language and/or educational issues from English 121, English Composition 120A, 120B, 120C, 132C, Linguistics 10, C130, 140, 175. Students may complete all requirements for the minor by taking courses in items 1 and 2 above.

A minimum of 20 units applied toward the minor requirements must be in addition to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Teaching English as a Second or Foreign Language Minor

The Teaching English as a Second or Foreign Language minor provides students with an overview of current second language pedagogical theories and practices; the experience of observing the second language acquisition process both in and out of the classroom; a supervised practicum experience in a variety of second language classroom settings; and an opportunity to reflect on the interaction of theory and practice in the teaching of English as a second or foreign language.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 80 quarter units, and file a petition with the minor adviser, 3300A Rolfe Hall, (310) 825-4631.

Required Lower Division Course (four): Linguistics 20 with a grade of C or better.

Required Upper Division Courses (28): (1) Three pedagogical foundation courses from Applied Linguistics and Teaching English as a Second Language 101 or C110, C116, C118; (2) a minimum of two pedagogical skill courses from C111, C112, C113, C115, C117; (3) a maximum of two courses in language and/or educational issues from English 121, English Composition 120A, 120B, 120C, 132C, Linguistics 10, C130, 140, 175. Students may complete all requirements for the minor by taking courses in items 1 and 2 above.

A minimum of 20 units applied toward the minor requirements must be in addition to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Transfer credit for any of the above is subject to departmental approval; consult the interdepartmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program
Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees
The Department of Applied Linguistics and Teaching English as a Second Language offers (1) the Master of Arts (M.A.) degree in Applied Linguistics and Teaching English as a Second Language and (2) the Master of Arts (M.A.) degree in Teaching English as a Second Language.

Applied Linguistics and Teaching English as a Second Language
Admission
Students normally apply to the M.A. program if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree. Applicants must also have taken the equivalent of Linguistics 120A and 120B (or make them up as deficiency courses).

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is a requisite for entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Students are requested to submit letters of recommendation directly to the graduate adviser, Department of Applied Linguistics and Teaching English as a Second Language, UCLA, 3300 Rolfe Hall, Box 951531, Los Angeles, CA 90095-1531. Since admission is limited to approximately 20 students per year, it is important that completed applications and supporting papers be submitted by December 15.

The admissions committee screens all applications using the following criteria: grade-point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English, a relevant research paper, letters of recommendation, and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study applied linguistics at UCLA; (2) area of applied linguistics in which the applicant may want to specialize and do research, reasons for this interest and qualifications and professional experience relevant to doing research in this area; and (3) knowledge of other languages, dialects, or cultures.

International students who hold a bachelor's degree or higher from a university in a country where the official language is English and in which English is the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the Test of English as Foreign Language (TOEFL) and the UCLA English as a Second Language Placement Examination (ESLPE). All other applicants must take the TOEFL prior to arrival at UCLA, submitting the score as part of the application process. These students must also take the ESLPE upon arrival at UCLA. Depending on the results of this examination, students may be required to take English as a Second Language courses to improve their command of academic English.

Areas of Study
Three areas of specialization in Applied Linguistics and Teaching English as a Second Language are available: second language acquisition, assessment, and discourse analysis.

Second Language Acquisition
Research in this area focuses predominantly on second language processes, which include research on (1) interlanguage systems; (2) underlying cognitive mechanisms that account for these systems; (3) the social, affective, and neurobiological factors that influence second language development; and (4) the effect of instruction on the process. Additional areas of inquiry include the relationship between first and second language acquisition, the effect of first language transfer, the interface between various linguistic theories and second language acquisition, and the comparisons between native and nonnative linguistic systems and how speakers use them in natural discourse.

Language Assessment
Language assessment is an area of applied linguistics that is concerned with the empirical investigation of theoretical questions on the one hand, and, with providing useful tools for assessment on the other. Language testing research has as its goals the formulation and empirical investigation of theories of language use in its widest sense. Specialization in the area of language assessment enables students to acquire an understanding of the conceptual foundations for language testing, the goals of language testing research and language test development, and current issues and problems in language testing. Students receive training in the development of language tests, the analysis of test results, and the interpretation and use of test results, enabling them to design and conduct research into theoretical questions in language testing.

Discourse Analysis
Discourse analysis is a broad area of research concerned with how language users produce and interpret language in context. Discourse analysts study the linguistic structure of speech acts, conversational sequences, speech activities, oral and literate registers, and stance marking, among other constructions, and seek to relate these constructions to social and cultural norms, preferences, and expectations. The field articulates how lexicogrammar and discourse systematically vary across social situations and at the same time help to define those situations. Analysis is conducted primarily through databases or corpus-based research, supplemented by other methods as appropriate (e.g., observation, elicitation, introspection). Analysts attend to the form, meaning, and function of language whether they begin with discourse-level segments and work down to forms or begin with forms and work up to the discourse level.

Discourse analysis may be carried out as an end in itself or as a tool contributing to research in language acquisition or language assessment.

Course Requirements
A total of 10 courses is required for the M.A. degree, including a minimum of seven 200-series courses. Nine of these courses are applied toward the University's nine-course minimum for the master's degree. A total of eight units of 500-series courses may be applied toward the 10 courses required by the department for the M.A.; however, only four of those units may be used to fulfill the University's nine-course minimum requirement for the degree. In addition, those students lacking a significant foreign language background are required to complete two additional foreign language electives.

Requisites: Introductory course in phonetics, phonology, and syntax equivalent to UCLA's Linguistics 103, 120A, 120B; a minimum of two quarters of a foreign language.

First-Year Curriculum
The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language 204, 206, one additional course.

Five foundation courses (Applied Linguistics and Teaching English as a Second Language 200, 202, 204, 206, C210) are required. Choice of additional coursework in the first year is flexible and is to be determined in conjunction with the faculty mentor and graduate adviser. Those students lacking the requisite linguistics courses and foreign language background are expected to take these courses within their first two quarters.

Students wishing to obtain a Certificate in Teaching English as a Second Language or who desire advanced language education training in order to serve as teaching assis-
or 220 or 230 or 231; C210/C110; C211/C111

Teaching English as a Second Language 202

which is not a California State Teaching

Certificate

Teaching English as a Second Language

Certificate, which is not a California State

Teaching Credential,

linguistics, or structure of language

doctorate of philosophy in linguistics,

other countries must have the equivalent of an

American bachelor's degree.

M.A. program, U.S. citizens and students from

other countries must have the equivalent of an

American bachelor's degree.

Admission

Students normally apply for the M.A. in Teaching

English as a Second Language if they desire

advanced training in the field. Because of the

sequential nature of courses given during the

first year, students are admitted only at the

beginning of Fall Quarter. To be admitted to the

M.A. program, U.S. citizens and students from

other countries must have the equivalent of an

American bachelor's degree.

After admission, students must maintain a

grade-point average of at least B (3.0). A GPA

of 3.25 (+) is required of students entering

the second year of the M.A. program and must

be maintained throughout the second year.

Applications for admission may be obtained

from the graduate adviser. The program

requires three letters of recommendation in sup-

port of the application. Applicants are required

to submit letters of recommendation directly to the graduate adviser in the

department. Since admission is limited to approxi-
mately 25 students per year, it is important that

completed applications and supporting papers be submitted by January 8.

The admissions committee screens all applications

using the following criteria: grade-point average (must be 3.0 or better); Graduate

Record Examination (GRE) scores; Test of English as a Foreign Language (TOEFL)
scores for international applicants whose native language is not English; a relevant research pa-

per; letters of recommendation; and a state-

ment of purpose. A personal interview is not

required for admission. The statement of pur-

pose should contain the following information:

(1) reasons for wishing to study Teaching En-

glish as a Second Language at UCLA; (2) spe-

cial qualifications as a researcher or a teacher;

(3) knowledge of languages other than En-

lish; and (4) knowledge of other cultures.

Areas of Study

Consult the department.

Course Requirements

Requisite: Linguistics 20 or equivalent.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language 200, two

guided electives.

Spring Quarter: Applied Linguistics and Teaching English as a Second Language 598, two

guided electives.

During the second year, students complete their specialization and elective course require-

ments and work on their thesis. The four elective courses are to be chosen in consultation

with the faculty adviser/mentor from courses in the department. Two of these electives must be

200-series courses in the student's area of specialization, beyond the foundation courses.

In order to enhance an interdisciplinary perspective, students are also encouraged to take relevant electives in other departments, such as anthropology, education, linguistics, neuroscience, psychology, and sociology.

At the beginning of the fourth quarter, students must enroll in Applied Linguistics and Teaching English as a Second Language 200. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair. Once students complete the thesis proposal, they enroll in Applied Linguistics and Teaching English as a Second Language 598, which is conducted as an independent tutorial with the master's thesis committee chair as mentor until the thesis is completed, typically the end of the second year. Students may only apply course 598 once toward the 10-course requirement.

Applied Linguistics and Teaching English as a Second Language 400 is a seminar in which M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 10 courses required for the M.A. degree.

Teaching English as a Second Language Certificate

Successful completion of the following courses, by graduate students enrolled in degree programs, qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Teaching Credential: Linguistics 20; Applied Linguistics and Teaching English as a Second Language 202 or 220 or 230 or 231; C210/C110; C211/C111 or C212/C112 or C217/C117; C213/C113 or Linguistics 103; C216/C116; C218/C118; and two quarters of a foreign language.

Comprehensive Examination

None.

Thesis Plan

The culmination of the mentoring relationship during the M.A. degree is the master's thesis, which is based on research that each student plans and conducts under the supervision of a faculty mentor. The master's thesis is a substantial research report, which could provide the basis for a journal article. During the fourth quarter, each student must enroll in Applied Linguistics and Teaching English as a Second Language 598. In this course, the student prepares a thesis proposal and forms, in collaboration with a faculty mentor, a thesis committee, which consists of three members of the Academic Senate, at least two of whom must be from the department. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair.

Teaching English as a Second Language

Admission

Students normally apply for the M.A. in Teaching English as a Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (+) is required of students entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Applicants are requested to submit letters of recommendation directly to the graduate adviser in the department. Since admission is limited to approximately 25 students per year, it is important that completed applications and supporting papers be submitted by January 8.

The admissions committee screens all applications using the following criteria: grade-point average (must be 3.0 or better); Graduate Record Examination (GRE) scores; Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English; a relevant research paper; letters of recommendation; and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information:

(1) reasons for wishing to study Teaching English as a Second Language at UCLA; (2) special qualifications as a researcher or a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

Areas of Study

Consult the department.

Course Requirements

Requisite: Linguistics 20 or equivalent.

First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

Fall Quarter: Applied Linguistics and Teaching English as a Second Language 200, 265, for-

eign language requirement or elective (course depends on language requirement plan).

Winter Quarter: Applied Linguistics and Teaching English as a Second Language 216 or

C116, 220 or 229 or 231, foreign language re-

quirement or elective (course depends on lan-

guage requirement plan).

Spring Quarter: Applied Linguistics and Teaching English as a Second Language C216 or

C116, 220 or 229 or 231, foreign language re-

quirement or elective (course depends on lan-

guage requirement plan).

Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Applied Linguistics and Teaching English as a Second Language C216 or C116, 220 or 229 or 231, 265, and Linguistics 103 or Applied Linguistics and Teaching English as a Second Language C113 or C213) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses to be completed in consultation with the graduate adviser during the second year.

Once the thesis proposal in course 598 is completed, the student continues to enroll in this course until the thesis is completed, typically the end of the second year. Only one 598 course may be applied toward the 14-course requirement.

A total of eight units of 500-series courses may be applied toward the 14 courses required for the degree; however, only four units may be used to fulfill the Graduate Division minimum requirement of five graduate-level courses.
Applied Linguistics and Teaching English as a Second Language

Upper Division Courses

100. Discourse and Society. (4) Lecture, four hours; discussion, two hours. Important contemporary perspectives for study of language in its social and cultural matrix. Topics include conversational organization, narrative, repair and grammatical organization, language in cultural settings, language socialization, and language impairment and institutional discourse. Focus on analysis of audio and video recordings of talk in a variety of natural settings. P/NP or letter grading.

101. Introduction to Language Learning and Language Teaching. (4) Lecture, two hours; discussion, two hours. Requisite: Linguistics 1. Exploration of skills and conditions involved in successful second and foreign language learning: application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

C110. Theories of Language Education and Learning. (4) Lecture, four hours; outside study, four to eight hours. Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. Concurrently scheduled with course C210. P/NP or letter grading.

C111. Writing for Language Education. (4) Formerly numbered C106. Lecture, four hours. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C211. P/NP or letter grading.

C112. Reading for Language Education. (4) Formerly numbered C107. Lecture, four hours. Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C212. P/NP or letter grading.

C113. Phonetics for Language Education. (4) Formerly numbered C103. Lecture, four hours. Requisite: Linguistics 20. Examination of phonological structure and contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C213. P/NP or letter grading.

C116. Structure of Present-Day English. (4) Formerly numbered C122. Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216. Letter grading.

C117. Literature in Language Education. (4) Formerly numbered C109. Lecture, four hours. Survey of the methodologies and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C217. P/NP or letter grading.

121. Language Learning and Immigrant Experience. (4) Seminar, four hours. Exploration of value and relevance of linguistic anthropological, ethnomethodological, sociocultural, pragmatic, and sociolinguistic approaches to study of immigration and second language acquisition. Readings from language learning literature provide literary account of immigrant experience which illustrates intimate relationship between language and culture in second language learning. Letter grading.

125. Language Socialization. (4) Seminar, four hours. Exploration of processes of socialization through language, and socialization to use language across life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Examination of ways in which social interaction between novices and experts is structured linguistically and culturally. Letter grading.

161. Talk and the Body. (4) Seminar, four hours. Relationship between language and human body raises a host of interesting topics. New approaches to phenomena such as embodiment become possible when the body is analyzed, not as an isolated entity, but as a visible agent whose talk and action are lodged within both processes of human interaction and rich settings where people pursue courses of action that count in their lives. Letter grading.

170. Field Methods in Discourse and Society. (4) Seminar, four hours. Approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in community settings. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. Letter grading.

M189. Metaphor and Literal Speech. (4) Same as Philosophy M173. Lecture; three hours; discussion, one hour; outside study, eight hours. Requisite: Linguistics 1. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphorical capacity. P/NP or letter grading.

M194. Senior Seminar: Language, Interaction, and Culture. (4) Same as Anthropology M194 and Sociology M194. Seminar, four hours. Limited to seniors in language, interaction, and culture minor. Capstone course. Students carry out and present empirical research project that integrates methodological and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

Graduate Courses

202. Foundations of Language Acquisition. (4) Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition and second language acquisition. Linguistic nature of learners’ interlanguage systems and underlying cognitive mechanisms posited to explain them, as well as various social, affective, and neurological factors which affect ultimate success of learner.

C211. Writing for Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C111. Additional assignments required of graduate students. S/U or letter grading.

C212. Reading for Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C112. Additional assignments required of graduate students. S/U or letter grading.

214. Materials Development for Language Education. (4) Formerly numbered 220.) Preparation of original set of language teaching materials geared to needs of a specified group of learners. Revisions of first drafts and evaluation of one's own work and that of one's peers. Introduction to process of publishing language teaching materials.

216. Structure of Present-Day English. (4) Lecture, six hours. Requisite: Linguistics 20. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C116. Additional assignments required of graduate students. Letter grading.

217. Literature in Language Education. (4) Lecture, four hours. Survey of important theoretical and methodological issues related to teaching literature to students in ESOL/ESL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C117. Additional assignments required of graduate students. S/U or letter grading.

219. Current Issues in Language Education. (4) Formerly numbered 229.) Requisite: course C210. Specialized topics in language education of interest to graduate students. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

222. Discourse-Centered Language Learning. (4) Not the same as course 222 prior to Fall Quarter 1997.) Requisite: course 202. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

223. Topics in Psycholinguistics. (4) Formerly numbered 260.) Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

224. Language Socialization. (4) Formerly numbered 265.) Requisite: course 206. Exploration of processes of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across communities of practice in different societies. Ways in which verbal interaction between novices and experts is structured linguistically and culturally.

225. Discourse-Centered Language Learning. (4) Formerly numbered 285.) Requisite: course 206. Exploration of processes of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across communities of practice in different societies. Ways in which verbal interaction between novices and experts is structured linguistically and culturally.

228. Crosslinguistic Research Laboratory. (4) Formerly numbered 266.) Requisite: course 201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in the field, such as voice, nominal reference, and word order. May be repeated for credit with topic change.

229. Current Issues in Language Assessment. (4) Formerly numbered 232.) Requisite: course 204. Designed to explore current issues in language assessment from both a theoretical and applied research perspective and to provide actual experience in addressing a current topic. Specific topics vary according to trends in the field. May be repeated for credit with topic change.

230. Advanced Seminar: Language Acquisition. (4) Requisite: course 206. Survey covering language learning and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

231. Crosslinguistic Topics in Language Acquisition. (4) Formerly numbered 271.) Requisite: course 220. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., crosslinguistically valid) mechanisms of language development. May be repeated for credit with topic change.

234. Experimental Design and Statistics for Applied Linguistics. (4) Formerly numbered 209.) Requisite: course 204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in the field. Exploration of issues in both qualitative and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical and methodological trends in the field. Project required. S/U or letter grading.

235. Current Issues in Language Assessment. (4) Formerly numbered 266.) Requisite: course 206. Specialized topics in discourse analysis of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical and practical concern in the field. May be repeated for credit with topic change.
M270A-M270B. Ethnographic Methods in Discourse Analysis I, II. (4) (Same as Anthropology M249A-M249B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading. M270A. Devoted to skills related to collecting socially and culturally meaningful data. M270B. Requisite: course M270A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal.

M270P. Ethnographic Technologies Laboratory I. (4) (Same as Anthropology M249P.) Corequisite: course M270A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and video recording verbal interaction. S/U grading.

M270Q. Ethnographic Technologies Laboratory II. (4) (Same as Anthropology M249Q.) Corequisite: course M270B or Anthropology M249B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

271. Advanced Seminar: Cohesion Analysis of English Structure. (4) (Formerly numbered 250.) Requisite: course C216. Investigation in depth of selected linguistic features of oral and written texts that are beyond standard grammar. Study of structures to determine their function in a variety of English texts representing several discourse types.

M272. Grammar and Discourse. (4) (Formerly numbered 272.) (Same as Anthropology M246A.) Requisite: course 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

M273. Grammar and Discourse Practicum. (4) (Formerly numbered 273.) (Same as Anthropology M246B.) Requisite: course M272. Survey of advanced topics in grammar and discourse, including predication, logical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

274. Advanced Seminar: Contextual Analysis of English Structure. (4) (Formerly numbered 252.) Requisite: course C216. Examination of selected words and/or structures in oral and written texts to determine when and why they occur. Beginning with frequency and distribution of the form(s), exploration of meaning and function of the form(s).

278. Discourse Laboratory. (4) (Formerly numbered 288.) Requisites: courses 206, 260, two other discours analysis courses. Designed for applied linguists Ph.D. students. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. May be repeated for credit. S/U or letter grading.

291. Current Issues in Applied Linguistics. (4) Specialized topics in applied linguistics of current relevance in two or more of the following areas: language acquisition, language assessment, and discourse analysis/functional grammar, and of interest to students in applied linguistics and TESL. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Applied Linguistics and TESL M.A. Colloquium. (4) Discussion, four hours. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

495. Training and Supervision of Teaching Assistants. (2) Seminar, two or more hours. Preparation: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with other UC campuses. S/U grading.

596. Directed Individual Study. (4) Limited to graduate students. Independent study in an area related to English as a second language. May not be repeated for credit.

596. M.A. Research and Thesis Preparation. (4 to 8) Limited to graduate students. Survey of research needs and thesis preparation. Includes optional section on experiential design and statistical methods. Credit (four) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

English as a Second Language

Lower Division Courses

The following courses are only for students whose native language is not English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see Subject A in the Undergraduate Study section of this catalog).

Depending on the results of this examination, students may either be exempt from any special ESL requirement or may be required to take one or more courses. They are placed into the ESL track as a result of their examination and must enroll in the ESL course each term beginning in their first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 35; each course must be passed with a grade of C or better (C– or a Passed grade is not acceptable). The required sequence for graduate students is ESL as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If students do not achieve a minimum score on the placement examination, they may be required to spend a term studying elementary English exclusively, through UCLA Extension, before retaking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C– or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the ESLPE.

32. Oral Communication Skills: Stress and Intonation. (4) Lecture, four hours; outside study, eight hours. Requisites: course 33A or 33B or 33C or 35 or proficiency demonstrated on English as a Second Language Placement Examination. Course 33B, 33C, or 35 may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussions, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

33A. Low Intermediate English as a Second Language. (4) Recitation, eight hours; laboratory, two hours. Requisite: Extension course XSL32 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Displaces eight units on student's Study List but yields only four units of credit toward a degree. Intensive instruction in introductory English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

33B. High Intermediate English as a Second Language. (4) Recitation, five hours. Requisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

33C. Advanced English as a Second Language. (4) Recitation, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension.

34. Advanced Oral Communication Skills for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

35. Developmental Composition for ESL Students. (4) Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Focus on the writing process, grammatical structures, mechanics of writing, and practice with major forms of academic writing. Additional emphasis on academic reading skills.

36. Intermediate Composition for ESL Students. (4) Lecture, four hours; outside study, eight hours. Requisite: course 35 or proficiency demonstrated on English as a Second Language Placement Examination. Importance of a community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.
37. **English Grammar and Style for Academic Purposes.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 33B (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Review of form and use of common grammatical structures found in academic discourse. Analysis of stylistic function of certain structures and practice in self-editing strategies. P/NP (undergraduates), S/U (graduates), or letter grading.

### Upper Division Courses

103. **Pronunciation for ESL Students.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent. P/NP (undergraduates), S/U (graduates), or letter grading.

106. **Advanced Composition for ESL Students.** (4) Requisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

107. **Advanced Reading and Vocabulary for ESL Students.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP (undergraduates), S/U (graduates), or letter grading.

109. **Introduction to Literature for ESL Students.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language. P/NP (undergraduates), S/U (graduates), or letter grading.

199. **Special Studies in South and Southeast Asian Languages.** (4) Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in English as a second language beyond those covered in current courses. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

### South and Southeast Asian Languages

#### Lower Division Courses

40A-40B-40C. **Introductory Hindi.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 40A is enforced requisite to 40B, which is enforced requisite to 40C. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension.

41A-41B-41C. **Intermediate Hindi.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Coverage of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

50A-50B-50C. **Introductory Vietnamese.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension.

51A-51B-51C. **Intermediate Vietnamese.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Coverage of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

60A-60B-60C. **Introductory Thai.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension.

61A-61B-61C. **Intermediate Thai.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Coverage of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

70A-70B-70C. **Introductory Tagalog.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Coverage of basic Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension.

71A-71B-71C. **Intermediate Tagalog.** (4-4-4) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 71A is enforced requisite to 71B, which is enforced requisite to 71C. Coverage of basic Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

### Upper Division Course

199. **Special Studies in South and Southeast Asian Languages.** (4) Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in one language offered in the program beyond introductory and intermediate courses currently offered. May be repeated for credit. See academic coordinator for contract. P/NP (undergraduates), S/U (graduates), or letter grading.

Susan B. Downey, Ph.D., Chair  
**Professors**  
Jeanne Arnold, Ph.D., in Residence (Anthropology)  
Jesse L. Byock, Ph.D. (Germanic Languages)  
Elizabeth Carter, Ph.D. (Near Eastern Languages and Cultures)  
Christopher B. Donnan, Ph.D. (Anthropology)  
Sarah B. Downey, Ph.D. (Classics)  
Steven Lattimore, Ph.D. (Classics)  
Donald A. Preziosi, Ph.D. (Art History)  
Dwight Read, Ph.D. (Anthropology)  
Lothar von Falkenhause, Ph.D. (Art History)

**Professors Emeriti**  
C. Rainer Berger, Ph.D. (Anthropology, Geography, Geophysics)  
Giorgio Buccellati, Ph.D. (Ancient Near East, History)  
Merrick Posansky, Ph.D. (History, Anthropology)  
Henry B. Nicholson, Ph.D. (Anthropology)  
James R. Sackett, Ph.D. (Anthropology)

**Associate Professors**  
Irene A. Biernack, Ph.D. (Art History)  
Hung-hsiang Chou, Ph.D. (East Asian Languages and Cultures)  
Gail E. Kennedy, Ph.D. (Anthropology)  
Richard Leventhal, Ph.D. (Anthropology)  
Charles Standish, Ph.D. (Anthropology)  
Daniel C. Polz, Ph.D. (Near Eastern Languages and Cultures)

**Assistant Professors**  
Richard Saur, Ph.D. (Anthropology)  
Thomas W. Plummer, Ph.D. (Anthropology)

**Scope and Objectives**

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, chemistry, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Archaeology Program offers the Master of Arts (M.A.) degree in Archaeology.

**Admission**

Since the M.A. program is interdisciplinary, any undergraduate major may be considered for admission, although those applicants who have had little previous archaeological educa-
tion may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required of all new applicants. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants who have not completed a course in the history of archaeology or in quantitative methods in archaeology are required to take corresponding courses at UCLA. The courses do count toward the minimum course requirements for the degree. Applicants are accepted for admission for Fall Quarter only. The program's Study Guidelines brochure is sent on request to the Chair, Archaeology Program.

Areas of Study
Africa; analysis of archaeological materials; ancient Near East; Andean South America; Egypt; Islamic world; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences;India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements
A minimum of 42 units (nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26) in the 200 and 500 series, including Archaeology M201A-M201B, M201C. Students must also take a laboratory-based course. The requirement can be met in the following ways: completion of Anthropology 117, 117P; completion of Archaeology M205 (courses taught by the directors of various laboratories); and, with the approval of the student's committee, an independent study course. A minimum of two additional elective graduate courses is required. The other units may be completed by taking either graduate or upper division courses. The proportion of graduate to undergraduate courses may vary depending on the student's preparation.

Comprehensive Examination Plan
The comprehensive examination consists of three examinations, given at the completion of each section of Archaeology M201A, M201B, and M201C respectively. The examinations are graded as high pass or no pass by a committee consisting of the chair of the Archaeology Program and the professor in charge of the course. Each section of the examination may be repeated once.

Thesis Plan
None.

Doctoral Degree

Admission
Completion of a master's program is required for the Ph.D. degree in Archaeology. Applicants who do not have a UCLA M.A. in Archaeology should refer to the Admission section under Master's Degree. The Graduate Record Examination (GRE) is required of all new applicants. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on (1) written recommendation by all three members of the M.A. committee; (2) submission of a plan of study, including projected coursework, choice of foreign language, description of qualifying examination components, and dissertation topics; and (3) quality of M.A. core examination results and M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see Master's Degree section).

Students entering with an M.A. from another university are required to demonstrate the ability to read at least one foreign language relevant to the area of interest and approved by their adviser. This requirement may be met by taking a reading examination administered by the program.

Major Fields or Subdisciplines
Africa; analysis of archaeological materials; ancient Near East; Egypt; Islamic world; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements
Students must be enrolled in a minimum of 12 units per quarter. Formal course requirements include a graduate-level course in research design, such as Anthropology 200, 283, Archaeology M201C and M265, if not taken during the M.A. program. Anthropology 285 and C291 are recommended as electives. Other course requirements are decided by the student's committee. Archaeology M201A-M201B and M201C are required. Additional requirements may be suggested by the dissertation committee.

No graduate degree is awarded until the student has worked in the field. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met by taking a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, Classics C251E. If a student wishes to fulfill this requirement by participation in fieldwork other than that in the courses listed above, the director of the project must submit a letter about the student's work to the chair of the Archaeology Program. Except for the courses listed above, any given formula to fulfill the requirement has to be cleared in advance with the chair of the program.

Written and Oral Qualifying Examinations

Written Qualifying Examination. By the end of the sixth quarter of the doctoral program, after the foreign language requirement has been fulfilled, students must take a written qualifying examination in the following three areas: (1) topical specialization; (2) analytical theory, method, and technique; and (3) regional culture history. If the examination is passed, students may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, students may make one further attempt if their committee deems it appropriate.

Oral Qualifying Examination. The University Oral Qualifying Examination must be taken by the end of the seventh quarter of the doctoral program. Students are required to submit to the doctoral committee a formal dissertation proposal of about 10 pages, including the particular research problem on which they are to be examined during the oral qualifying examination.

Archaeology

Upper Division Course

Graduate Courses
M201A-M201B. Graduate Core Seminars: Archaeology. (6-6) (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These compulsory core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

M201C. Regional Analysis in Archaeology. (4) (Same as Anthropology M211.) Lecture, three hours. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

M205. Special Topics in Archaeology. (6) (Same as Anthropology M212S.) Lecture, three hours. Designed for graduate students in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.
C210. Archaeological Materials Identification and Characterization. (6) Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

M214. Comparative Study of Ancient States. (4) (Same as Anthropology CM214S.) Lecture, three hours. Comparative anthropological study of first complex societies in the Near East, Mesoamerica, and the Andes, including early Egyptian, Uruk, Teotihuacan, classic Maya, Wari, and Tiwanaku, with focus on political and economic structures of these societies and on causes of state development and collapse. S/U or letter grading.

259. Fieldwork in Archaeology. (2 to 12) Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser.

M265. Depositional History and Stratigraphic Analysis. (4) (Same as Ancient Near East M265.) Lecture, two hours. Theoretical understanding of depositional processes ("law") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

501. Cooperative Program. (2 to 6) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 12) Hours to be arranged. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Preparation: completion of formal coursework, passing of language examinations before enrollment. May be repeated for credit with consent of adviser. S/U grading.

Related Courses

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for the area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. Students are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

URBAN DESIGN

Scope and Objectives

The Department of Architecture and Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization. The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees

The Department of Architecture and Urban Design offers the following degrees: Master of Architecture I (M.Arch. I), Master of Architecture II (M.Arch. II), and Master of Arts (M.A.) in Architecture. The department also participates in a concurrent degree program with the Department of Urban Planning.

Master of Architecture I

Admission

The M.Arch. I program accepts applications from students holding a bachelor’s degree or its equivalent, comparable in standard and content to a bachelor’s degree from the University of California. Applications are accepted from students with a broad diversity of backgrounds. No academic or experiential training in architecture is required. Students without previous experience in architecture are encouraged to review certain materials before enrolling. Students with an architectural background may be able to waive certain courses.

First-year classes assume some familiarity with the history and culture of architecture, possession of basic graphics skills, and understanding of fundamental concepts of mathematics and physics. Applicants are also strongly advised to become familiar with basic works in the history and theory of architecture before entering the program. A suggested reading list is available from the graduate adviser. Entry into the program is, therefore, conditional on having taken at least one college-level course in each of the following areas: Newtonian physics, mathematics (covering algebra plus geometry or trigonometry), a university survey of the history of architecture (minimum one semester or two quarters) encompassing examples from antiquity to the present, and drawing or basic design. For further information on these requisites, contact the graduate adviser.

The Admissions Committee considers applications from those who, at the time of application, do not have these requisites. If applicants do not have the requisites, they must specify in the application how they plan to complete them before entry into the program. The graduate adviser can provide guidance on how to do so. Admission is only offered on the condition that the applicant produce satisfactory evidence of having completed requisites before commencing classes. Instructors may test background in these areas before admitting students to certain courses. If applicants lack this necessary proficiency, they may need to spend an additional year fulfilling curricular requirements.

Applicants are required to submit three letters of recommendation, academic transcripts, Graduate Record Examination (GRE) test scores, a statement of purpose, and a creative portfolio. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

The M.Arch. I program is a full-time program and does not accept part-time students. All new students must enter in Fall Quarter. Additional information about the program may be obtained by writing directly to the admissions officer of the Architecture and Urban Design Department.

English Language Proficiency. If an applicant’s primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, on arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students should expect to spend additional time in residence.

M.A. Urban Planning/M.Arch. I Architecture

The Architecture and Urban Design Department in the School of the Arts and Architecture and the Department of Urban Planning in the School of Public Policy and Social Research
offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in architecture stresses physical, aesthetic, and technical issues in the design of buildings and building complexes. In the program, students pursue studies in both schools/departments and receive both the M.Arch. I and the M.A. in Urban Planning at the end of four years.

Students who are interested in the concurrent degree program must apply and be admitted to the M.Arch. I program in the Department of Architecture and Urban Design and to the M.A. program in the Department of Urban Planning.

During the first year a student follows the required urban planning curriculum. The second year is entirely in Architecture and Urban Design. The third and fourth year comprise a mix of both Architecture and Urban Design and Urban Planning courses, with the final design or written thesis or client or comprehensive project carried out in the fourth year. Students in the concurrent degree program must meet the thesis and comprehensive examination requirements separately for each department. This can be done with (1) an original piece of research of publishable length and quality (2) a client project, or (3) a design project. While students are encouraged to choose a combined project topic that integrates planning and policy aspects with design, the project must have distinct Architecture and Urban Planning components which can be evaluated separately by faculty thesis committees in the respective departments. For example, a design project in architecture might be supported by a paper, for the urban planning component, explaining the community impact of the implementation of the project. Two thesis and comprehensive examination committees must be formed (one from each department) and following their approval of the proposed thesis and examination project, eight to twelve units of combined coursework is allowed towards preparation and completion of the final project. A total of 41 courses (35 four-unit and six two-unit courses) or 152 units of coursework is required to graduate. Students take at least 36 units in Urban Planning and 88 units in Architecture and Urban Design to satisfy the specific requirements of each degree, including core courses in both programs and area of concentration courses from each program. To fulfill the core requirements for the M.A. in Urban Planning a student must take six core courses, plus one course related to planning practice or fieldwork. In Architecture and Urban Design a student takes 23 core courses (17 four-unit and six two-unit courses). In addition a student takes eight elective courses including two electives in the area of critical studies in architectural culture and six electives that fulfill the needs of the selected area of concentration.

These may be chosen from courses offered in Architecture and Urban Design and Urban Planning, which have been identified as acceptable to both programs. To fulfill final thesis, design thesis (in the form of a comprehensive examination) comprehensive or client project requirements, students need two or three courses (8-12) in the fourth year of study. Thirty-six units of coursework, or nine elective courses, are double counted in both Architecture and Urban Design and Urban Planning.

Students who decide not to complete the concurrent degree program can choose to complete either the M.Arch. I or the M.A. and must complete all the regular requirements for either program that is chosen. For additional information, contact the graduate adviser in the Department of Urban Planning or the graduate adviser in the Department of Architecture and Urban Design.

Areas of Study

Students are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in the area of critical studies in architectural culture and one studio or project application (Architecture and Urban Design 402 or 403 series), during the second year of study.

Specializations are currently available in the following areas: architectural design; urban design and policy; critical studies in architectural culture; architectural technology; design and computation.

Course Requirements

A minimum of 116 units of coursework is required of which at least 26 four-unit courses must be taken at the graduate level (200 and 400 series). Students must take at least eight units per quarter and may take up to 16 units in a quarter.

Required Courses. All students must successfully complete the following courses:

Design Studios. Design studios offered for M.Arch. I students are classified in three levels: introductory (411), intermediate (412, 413, 414), and advanced (402, 403 series, 415, 416). Within a given level, the design studios may be taken in any sequence. Any of these studios may be repeated for credit. If students maintain at least a B average in the studios, they automatically pass from the introductory to the intermediate level, from the intermediate level to the advanced level, and (for those students who plan to take the comprehensive examination in architectural design) from the advanced level to preparation for the comprehensive examination in architectural design. Students who do not maintain a B average in the studios are reviewed by a committee consisting of all design studio instructors and are not permitted to advance unless explicitly allowed by that committee.

Elective Sequence. Students must complete an elective sequence consisting of at least three related courses, terminating in a 402, 403 series in advanced studio (normally in the spring of the second year). The elective sequence is intended to allow students to gain in-depth knowledge of a chosen area of specialization and apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban design and policy, (2) critical studies in architectural culture, (3) architectural technology, (4) design and computation.

Details of currently available and approved elective sequences are available from the graduate adviser. Students who wish to meet the elective sequence requirement with sequences not on this standard list must secure approval from the M.Arch. I curriculum committee.

Additional Elective Courses. As well as completing an elective sequence, students are expected to explore a variety of topics by taking additional elective courses. Within the Architecture and Urban Design Department, electives are offered in the four areas listed under Elective Sequence above. In addition, elective work outside the department may be taken.

Students are required to take at least 20 units of elective coursework (including the elective sequence). At least 16 units must be taken within the Department of Architecture and Urban Design. The usual pattern is as follows:

First year: Fall, Winter, Spring — none.
Second year: Fall, Winter, Spring — four units each term.
Third year: Fall, Winter — four units each term.

Many of the elective courses are organized in sequences that begin with an introductory course in the fall, continue on to a more advanced course in the winter, and culminate with a 402 or 403 series studio in the spring. At the beginning of Fall Quarter of the second year, students should consult the academic adviser and carefully plan the elective coursework.

Waiving Required Courses. Students who can demonstrate that they already have adequate background in topics covered by specific required courses may petition to waive those courses and replace them with electives. However, permission to waive required courses does not, in itself, reduce the minimum number of 29 courses required for the M.Arch. I degree, nor does it reduce the nine-quarter residence requirement.

A petition to waive an individual required course should be addressed to the faculty member responsible for that course and may be granted at the faculty member’s discretion, possibly by means of a special examination.
Areas of Study
Students are required to select their major area at the time of application to the program. The five major areas include architectural design; urban design and policy; critical studies in architectural culture; architectural technology; design and computation.

Course Requirements
A minimum of four academic quarters in residence is required. This is a full-time program, and students are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level. This includes eight units of Architecture and Urban Design 597 or eight units of course 598. The remaining 12 units may be either upper division (undergraduate) or graduate courses. Eight units of 596 courses may be included as part of the 44-unit requirement but may not be part of the graduate course requirement.

Major Area. Students are required to select their major area at the time of application to the program and must take a minimum of 32 units of coursework in that area. Requirements for each of the five major areas are established individually as follows:

Architectural Design
Students are required to complete at least 12 units of advanced design studio work, plus 12 units of approved seminar courses.

Urban Design and Policy
Students are required to complete a year-long sequence of related urban design studio and seminar courses, consisting of one studio and one seminar course each quarter.

Critical Studies in Architectural Culture
Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402 or 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

Architectural Technology
Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402 or 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

Design and Computation
Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402, 403-series project course which explores
applications; and (3) 12 units of elective coursework in this area.

In partial fulfillment of the requirements for the M.Arch. II degree, students are required to complete either a thesis or a comprehensive examination.

Comprehensive Examination

The comprehensive examination consists of a design or research project on a topic approved by the comprehensive examination committee. The three-person examination committee consists of a chair and two other faculty members. The committee is established by the student at least one quarter before presentation of the comprehensive examination. Students must take at least eight units of Architecture and Urban Design 597 supervised by the chair of the examination committee.

The comprehensive examination must be submitted within two years after entry into the program.

The comprehensive examination is intended to provide the opportunity for the presentation of a design project or independent scholarly research in a professional format of the highest standard. This format must be approved in advance by the comprehensive examination committee.

The comprehensive examination differs from the thesis in three ways. First, an oral defense or public presentation may be required. Second, students submit a report that meets the standards for the permanent collection of the Arts Library, which may be as large as 11 x 17 inches and may include photographs or original drawings, if properly mounted. This report must contain the title page, abstract, signature page, and bibliography, as in a thesis. Third, the report must be submitted to and accepted by the departmental graduate adviser.

Thesis Plan

The thesis consists of a research project or a design project on a topic approved by the student's thesis committee. The three-person thesis committee consists of a chair and two other faculty members. The committee is established by the student at least one quarter before presentation of the thesis. Students must take at least eight units of Architecture and Urban Design 598 supervised by the chair of the thesis committee.

The thesis must be submitted within two years after entry into the program.

The thesis is intended to provide the opportunity for the presentation of an independent scholarly research or design project in a written format in accordance with UCLA regulations for theses and dissertations. The thesis is filed at the University Archives after it meets the approval of the thesis committee and general University thesis requirements. The copy is microfilmed, then bound and placed in the permanent collection of the Arts Library.

The thesis and comprehensive plans are identical in terms of the quality of the work that is expected and the deadlines that apply.

Master of Arts

Admission

The Master of Arts in Architecture is an academic degree and prepares students to do specialized research or teaching in fields related to the architecture profession. Applicants are required to hold a baccalaureate degree (or its equivalent) comparable in standard and content to a bachelor's degree from the University of California. Applicants should possess the experience and knowledge that would allow advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, Graduate Record Examination (GRE) test scores, and a creative portfolio. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, on arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, students should expect to spend additional time in residence.

It may be possible for an M.A. student in Architecture to petition to transfer from the M.A. to the Ph.D. program. See Doctoral Degree, Admission.

Areas of Study

Students are required to focus their work on a specific academic area or professional issue. Specializations are currently available in the following areas: critical studies in architectural culture; architectural technology (including energy-conserving design); design and computation. In addition, students have the option of the open M.A. wherein they structure their own area of interest from the courses offered by the department.

Course Requirements

Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six quarters of study. Students must choose and pursue one area of specialization. A thesis or a comprehensive project is required. When the committee members have signed the thesis proposal, students may take at least four and no more than eight units of Architecture and Urban Design 598 and begin work on the thesis itself. The course should be taken at some point during the last year of study.

Students are required to complete a minimum of 16 courses (64) of graduate or upper division work. At least five (20) of the courses must be 200-series courses and at least two (eight) must be 500-series courses. No more than 20 units of 500-level courses may be counted toward the total unit requirement for the degree. Up to seven courses may be taken from upper division (undergraduate) or graduate courses offered campuswide.

The University of California minimum requirements for the Master of Arts degree must be completed.

Students must enroll in at least four and no more than eight units of course 598. Students may also apply 12 units of course 596 toward the unit requirements for graduation. Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree, but a limited number may be applied toward elective course requirements.

Comprehensive Examination Plan

Students can choose to present a design project as a comprehensive examination (see M.Arch. I). This should be determined at least three months prior to the anticipated date of graduation.

Thesis Plan

Students can choose to do a research thesis. This should be determined at least three months prior to the anticipated date of graduation.

Doctoral Degree

Admission

Applicants to the Ph.D. degree in Architecture must hold a bachelor’s degree from an accredited college or university. It is anticipated that most applicants have completed a first professional degree in architecture (a five-year Bachelor of Architecture degree or a professional Master of Architecture degree). If applicants have degrees in other fields, they are also encouraged to apply but they may, at the discretion of the Ph.D. program committee, be required to complete specific coursework in the Department of Architecture and Urban Design as a condition of admission.

Students must fulfill the requirements of the Graduate Division and the Architecture and Urban Design Department. The application dossier must include (1) a short biographical résumé; (2) transcripts of academic record; (3) examples of research and/or creative work; (4) three letters of recommendation; (5) statement of purpose and proposed program of studies; (6) Graduate Record Examination (GRE) scores.

Where feasible, the Ph.D. program committee may require an interview. Applicants whose
Admission to the program is granted to a small group each year, according to the following criteria:

1. Evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field.

2. Demonstration of an outstanding academic record through the evidence of grades (3.5 minimum grade-point average), GRE scores, and references.

3. Demonstration in the work submitted of adequate communication skills, particularly writing skills.

4. Presentation of a clear and realistic statement of purpose.

Petition to transfer from the M.A. to the Ph.D. program: M.A. students interested in applying to the Ph.D. program should work closely with an adviser in the field during the first year. Students should select courses which result in a research product (such as a seminar paper, project analysis, or computer program). In addition, they should anticipate the requirements for the Ph.D. program and begin to prepare for the language requirement and minor.

In the spring of the first year, M.A. students may petition the Ph.D. committee for acceptance into the doctoral program. The request must be accompanied by a current transcript, a research proposal, and a short written report by the primary adviser. Based on these materials the Ph.D. committee recommends one of the following options: (a) immediate admission into the Ph.D. program; (b) completion of a thesis leading to an M.A. degree and the option thereafter to apply separately for admission into the Ph.D. program; (c) recommend the student take a terminal M.A. degree.

Minor Field. Students are required to include in the program of study at least one minor field, which must be from outside the Department of Architecture and Urban Design.

The objectives of the minor field requirement are to assure adequate academic breadth in students’ preparation and to encourage participation by architecture Ph.D. students in the general intellectual life of the University. In planning minor fieldwork, students are advised accordingly, and the choice must be approved by the adviser.

Due to the wide diversity of backgrounds of Ph.D. students in architecture, it is appropriate to allow some flexibility in requirements for completion of the minor. The normal method of completing and demonstrating competence in the minor field is to complete at least 16 units of coursework, which represent a unified course of study in that field, with grades of B or better. If a qualified departmental faculty member is willing to provide the necessary supervision, the Ph.D. program committee, in consultation with that faculty member and the student, may accept an alternative method of completing the requirement (for example, a substantial research project). Any proposal to complete the minor by such an alternative method must explicitly demonstrate, to the satisfaction of the Ph.D. program committee, that the objectives of the minor field requirement are met.

Course Requirements

Students must be in residence in the Ph.D. program a minimum of two years. (Note: this is an absolute minimum; longer residence requirements apply to most students, as detailed below.)

Generally, students are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation. Minimum unit requirements are as follows:

- All candidates are required to complete six quarters in residence and 72 units of coursework.

Students who hold a professional degree in architecture before admission to the program are required, in order to become eligible to take the qualifying examination, to complete four quarters in residence and 48 units of coursework.

Doctoral students with an M.Arch. I, M.Arch. II, or M.A. degree in Architecture and Urban Design from UCLA may petition the Ph.D. program committee to, at its discretion, reduce these requirements to a minimum of three quarters in residence and 36 units of coursework.

To be counted toward these requirements, units must be in graduate courses, at least 50 percent of the units must be courses in architecture and urban design, and an overall grade-point average of 3.0 or better must be maintained. In exceptional cases, and with the prior approval of the Ph.D. program committee, upper division courses may be applied toward these requirements to a strictly limited extent.

Students are required to take a proseminar in architectural theory, normally in Fall Quarter of the first year.

Since the Ph.D. is an academic rather than a professional degree, it is expected that a substantial proportion of the coursework is in the 200 series. The minimum requirement is for at least 32 units to be in 200-series courses.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by the adviser and approved by the Ph.D. program committee.

No more than eight units of Architecture and Urban Design 596 may be applied toward degree requirements, but eight units of course 597 and as many units of course 599 as necessary may be applied.

Written and Oral Qualifying Examinations

After successful completion of (1) the first-year review evaluating research skills, (2) mathematics, computing, or foreign language requirement, and (3) coursework requirements, as detailed above, students may apply to take the two qualifying examinations. The application to take the qualifying examinations must be made to the Ph.D. program committee. The committee application includes an outline and brief discussion of the proposed dissertation.

The purpose of the examinations is to establish broad mastery of the field of architecture, the required levels of competence in the major and minor fields, appropriateness of the proposed dissertation, and adequate preparation to undertake it.

The examinations consist of the following parts:

1. A comprehensive written and oral examination in the major field.

Students fail the comprehensive oral examination in the major field if more than one committee member votes no pass regardless of the size of the committee. If a majority of the examining committee so recommends, the comprehensive examination in the major field may be repeated once within an established timeframe. Students cannot replace more than one original committee member with a new member in the reconstituted committee. Students who do not meet these requirements within the time frame are recommended for termination.

2. A written examination in the minor field (this may be waived under certain circumstances, see following).

3. The University Oral Qualifying Examination focusing primarily on the subject of the proposed dissertation.
It is the normal expectation that all parts of the qualifying examinations do extend over more than two quarters.

The major and minor field examinations are conducted by a three-member examination committee appointed by the chair of the Architecture and Urban Design Department on the advice of the Ph.D. program committee. It consists of Academic Senate members who serve as the inside members of the doctoral committee.

The written examination in the major field is a substantial exercise followed by an oral presentation to the examination committee. The work must demonstrate that students have achieved the level of competence of a scholar specializing in the field, could teach an introductory course in the field, and can contribute to the progress of the field through scholarship and research.

The written examination in the minor field is a short exercise and may be waived for candidates who hold a recognized master's degree in the field in which the minor is located or, at the discretion of the examination committee, on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination explores the proposed dissertation topic and the ability to undertake the proposed work successfully.

Students may receive academic credit for preparation for the qualifying examinations by enrolling in Architecture and Urban Design 597.

Architecture and Urban Design

Lower Division Course

88. Lower Division Seminar: Special Topics in Architecture and Urban Design. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in architecture and urban design approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

M190. Human Environment: Introduction to Architecture and Urban Planning. (4) (Same as Urban Planning M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

C191. Introduction to Sustainable Architecture and Community Planning. (4) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C247A.

C192. Modern and Postmodern Architecture. (4) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C282B.

C193. City Studies: Culture and City Form. (4) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C280.

194A-194B. History of Architecture and Urban Design. (4) Lecture, three hours. Consideration of architectural and urban projects in relation to their theoretical, philosophical, and sociopolitical contexts, including issues of gender and diversity. 194A, Introduction to history of architecture and urban design from prehistory to age of mannerism. Discussion of world at large, architectural and urban solutions. 194B, Introduction to history of architecture and urban environments from Baroque period to the present.

199. Special Studies. (2 to 8) Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

Graduate Courses

201. Theories of Architecture. (4) Formerly numbered 201A.) Lecture, three hours. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding the nature of speculative inquiry in an architectural context.

203. Decision Making in Planning and Design. (4) Lecture, three hours. Exploration of challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals' own prospects. Psychological and mathematical approaches for improving decision quality.

204. Imaging the Future. (4) Seminar, three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes.

M225A-M225B-M225C. Fundamentals of Athletic, (4-4-4) (Same as Design CM221, CM222, CM223.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurational and its relationship to the mathematical viewpoint. May be repeated for credit with consent of adviser. S/U or letter grading.

M226A. Introduction to Computer-Aided Architectural Design, Two-Dimensional. (4) Lecture, three hours; laboratory, one hour. Concepts of hardware, software, and networks; paint, draft, multimedia, DTP, and presentation programs; CAD in an office environment.

M226B. Introduction to Computer-Aided Architectural Design, Three-Dimensional. (4) Lecture, three hours; laboratory, one hour. Concepts of three-dimensional space, modeling, and virtual reality; file formats; modeling, rendering, and animation programs; video conference.

226C. Computer Visualization. (4) Lecture, three hours. Designed for graduate students. Concept and techniques of computer visualization of artifacts, including realistic rendering and animation.

M227A. Programming Computer Applications in Architecture and Urban Design. (4) (Same as Design CM241.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. May be repeated for credit with consent of adviser. S/U or letter grading.

M227B. Introduction to Geometric Modeling. (4) (Same as Design CM242.) Lecture, three hours; outside study, nine hours. Requisite: course M227A. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. May be repeated for credit with consent of adviser. S/U or letter grading.

M227C. User Interaction Techniques in Design. (4) Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured.

242. Climate Responsive Design. (4) Preparation: professional degree in architecture. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students.

243. Energy Modeling. (4) Preparation: one course in building climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

255A-255B. Climatic Issues in Urban Design. (4-4) Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc.
M259. Advanced Real Estate Development for Planners and Architects. (4) (Same as Urban Planning M259.) Discussion, three hours. Requisite: Urban Planning 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

271. Elements of Urban Design. (4) Lecture, three hours. Introduction to basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and technological framework of urban systems and its dynamic interrelations.

M272. Real Estate Development for Planners and Architects. (4) (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests.

279. Housing for Developing Countries. (4) Discussion, three hours. Considerations of sociocultural, economic, and political factors, materials, structural systems, shelter accessories, and manufacturing technologies related to priorities of developing countries in housing policies and planning and design of shelter.

C280. City Studies: Culture and City Form. (4) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C193.

282A. Roots of Modernism. (4) Lecture, three hours. Overview of developments in Western architecture during the 18th and 19th centuries, covering Romantic and historicist trends of the 1700s, eclectic preferences of the 1800s, and turn-of-the-century promodern developments including art nouveau.

C282B. Modern and Postmodern Architecture. (4) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current elements of modernism, postmodernism, and postpostmodernism. Concurrently scheduled with course C192.

283. Special Topics in Modern Architecture. (4) Lecture, three hours. Exploration of cultural and political context of architecture and planning work. Examination of theory and practice from variety of perspectives applied to a set of varied physical environments and to a set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete case studies where politics and ideology shape design processes.

294A-294B. Environmental Psychology. (4-4) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

296. Professional Critique Studies in Architectural Culture. (4) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

297. Group Process in Design. (4) Lecture, two hours; discussion, two hours; laboratory, two hours. Designed to equip students with knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes.

298A-298B. Renaissance and Baroque Architecture. (4-4) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics.

299. Selected Topics in Architecture and Urban Design. (2 to 4) Selected academic topics initiated by students, students, faculty and directed by a faculty member. May be repeated for credit.

290. Landscape Studies. (4) Lecture, three hours. Introduction to cultural geography and human built environment. Exploration of key issues through case studies of settlement patterns, vernacular and political landscapes, origin myths, Enlightenment rationalism, technological change, market forces, historic preservation, gardens, horticulture, and landscape design. Letter grading.

291. Theory of Architectural Programming. (4) Lecture, three hours. Exploration of concepts and methods of architectural programming and its interaction with design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of solution types for given situations.

292. Social Meaning of Space. (4) Discussion, three hours. Evolution of concepts of space from its origins in ritual and primitive social organizations, concentrating on the role of space perception and representation of space in literature on perceptual development, and studies of adaptation to spatial order of the human-made environment.

293. Politics, Ideology, and Design. (4) Lecture, three hours. Exploration of cultural and political context of architecture and planning work. Examination of theory and practice from variety of perspectives applied to a set of varied physical environments and to a set of current spatialized concepts. Consideration of theoretical propositions that are shaping present urban and architectural debate and concrete case studies where politics and ideology shape design processes.

294A-294B. Environmental Psychology. (4-4) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

296. Professional Critique Studies in Architectural Culture. (4) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

297. Group Process in Design. (4) Lecture, two hours; discussion, two hours; laboratory, two hours. Designed to equip students with knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes.

298A-298B. Renaissance and Baroque Architecture. (4-4) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics.

299. Selected Topics in Architecture and Urban Design. (2 to 4) Selected academic topics initiated by students, students, faculty and directed by a faculty member. May be repeated for credit.

402. Projects in Urban Design. (4) Studio, eight hours. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

403A-403D. Projects with Specific Topics. (2 to 4 each) Studio, eight hours. Preparation: prior courses of particular sequence. 403A. Projects in Policy. Preparation and evaluation. 403B. Projects in Architectural and Urban Technology. 403C. Projects in Design and Computation. 403D. Projects in History and Theories of Architecture.

M404. Joint Planning/Architecture Studio. (4) (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

411. Introductory Design Studio. (4) Studio, 12 hours. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of closely controlled exercises dealing with combining the elements. Design of a small building in which previously acquired knowledge is synthesized into a single design in latter part of course.

412. Building Design Studio. (4) Studio, 12 hours. Requisite: course 411. Design of project starts with exploration of architectural program in relation to design process and, particularly, implications of program on architectural forms and concepts. In second phase, structural elements are introduced to fulfill program requirements and to support and further develop intended forms and concepts.

413. Building Design with Landscape Studio. (4) Studio, 12 hours. Requisite: course 412. Building design and site planning in relation to water, landforms, and plants in natural landscape, with special attention to natural light, heat, and ventilation.

414. Major Building Design. (4) Studio, 12 hours. Designed for second-year graduate students. Design projects which enable students to concentrate specifically on architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental control, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form.

415. Major Building Design II. (4) Studio, 12 hours. Exploration of topics course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, mechanical systems, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on integration of environmental control systems.

416. Comprehensive Design Studio. (4) Studio, 12 hours. Preparation: completion of required coursework up to first term of third year. Course completes regular required sequence of design work, preparing students for third-year thesis preparation. Comprehensive design projects are structured to test students on integration of structural aspects, mechanical systems, site planning, and climatic considerations within their design solutions.

421. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 411, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.
422. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 412, which introduces theoretical and technical issues such as site planning, urban design, landscape design, design with climate, and building typology, etc., through lectures, seminars, and independent or studio-related exercises.

423. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 413, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

424. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 414, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

425. Studio Support. (2) Lecture/studio, 90 minutes. Design development of project initiated in preceding studio (usually course 414). One room or part of building is developed in detail, with integration of a range of technical systems such as structures, mechanical systems, etc.

426. Studio Support. (2) Lecture/studio, 90 minutes. Studio support course, related to course 416, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

428. Advanced Architectural Drawing. (4) Discussion, three hours; studio, three hours. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation.

437. Construction Documents. (4) Studio, eight hours. Preparation: one course in basic building construction (such as 436). Office/field communications explored through design of simple structure and creation of key working drawings and outline specifications. Introduction to CAD (computer-aided design and drafting) systems.

441. Environmental Control Systems. (4) Design of systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building.

442. Building Climatology. (4) Preparation: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate.

444. Light and the Visual Environment. (4) Preparation: one course in building climatology. Exploration of extent to which physical form of a building controls the luminous environment of its occupants; design of naturally and artificially illuminated interior spaces; parameters of human visual comfort.

446. Communication and Diffusion of Innovation. (4) Seminar, three hours. Innovation in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips.

496. Special Projects in Architecture. (2 to 8) Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

497. Special Projects in Urban Design. (2 to 8) Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

597. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) May be repeated for credit. S/U grading.

William J. Brice
Raymond B. Brown, M.A.
Elliot J. Elgart, M.F.A.
Robert F. Heinecken, M.A.

Associate Professors
Barbara Drucker, M.F.A.
James Welling, M.F.A.
Patricia Wickman, M.F.A.

Lecturers
Anne Marie Karlsen, M.F.A.
Don Suggs, M.F.A.

Scope and Objectives

The Department of Art offers professional art training which emphasizes experimentation and encourages students to draw from many disciplines in their creative process. The department provides a strong background in theory and criticism to support contemporary studio practice. Bachelor of Arts and Master of Fine Arts degrees are offered in painting/drawing, new genres, photography, sculpture, and ceramics. An interdisciplinary studio option is offered within the M.F.A. program. In addition, a Master of Arts degree is offered in critical and curatorial studies. All programs have access to the art resources at UCLA and in the Los Angeles community.

Undergraduate Study

Art B.A.

Preparation for the Major

The Major

Required: A minimum of 13 upper division courses, including Art 100, 150, six courses from at least four of the following: 130, 133, 137, 140, 145, 147, 148, one course from Art History 101A through C119B, and four art electives.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees

The Department of Art offers the Master of Arts (M.A.) degree in Art and the Master of Fine Arts (M.F.A.) degree.

Master of Arts

Admission

Students are admitted to the M.A. program in Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work in February. Applicants must submit slides (maximum 20) or videotape (if applying to the video field).

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

Areas of Study

Drawing, painting, sculpture, photography, ceramics, and alternative media. No limit to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 36 quarter units in the department in courses numbered 130 through 280 is required, with a B average or better.

Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in the field of specialization, including four units of Art 276. In addition, four units of Art 280 are required as part of the 36 units.

A minimum total of 36 quarter units of art history, theory, and criticism in undergraduate or graduate study is also required, including Art 280. Art history courses completed as an undergraduate count toward the 36-unit art history requirement and toward the total units required for the degree. Subjects with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 36-unit art history requirement and toward the total units required for the degree. Subjects related to the special interests of the student may be substituted by petition.

A maximum of two 596 courses (eight units) may be applied toward the 36 units required for the degree.

Comprehensive Examination Plan

Each degree is granted on the basis of the quality of the student's work as demonstrated in the exhibition which accompanies the final comprehensive examination. The number of units of credit attained is irrelevant to this.

A review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

Thesis Plan

None.

Master of Fine Arts

Admission

Students are admitted to the M.F.A. program in Fall Quarter only. See Admission section for the M.A. in Art above. The M.A. is not prerequisite to the M.F.A., but may be elected as a stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of accumulative art history units.

Areas of Study

Painting and drawing, sculpture, photography, ceramics, new genres, and interdisciplinary studio. No limits to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 72 quarter units in the department in courses numbered 130 through 280 is required, with a B average or better.

Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken, including four units of Art 276 and a minimum of 24 quarter units in the field of specialization. In addition, eight units of Art 280 are required as part of the 72 units.

A minimum total of 40 quarter units of art history in undergraduate or graduate study is also required (including Art 280). Art history courses completed as an undergraduate count toward fulfilling the Art Department's 40-unit art history requirement but do not count toward the 72 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 40-unit art history requirement and toward the total units required for the degree. Subjects related to the special interests of the student may be substituted by petition.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination plan is the same as the plan offered for the Master of Arts in Art.

Thesis Plan

None.

Art

Lower Division Courses

1A. Drawing. (4) Studio, eight hours; five hours arranged. Course in basic drawing skills intended as preparation for work in a variety of media.

1B. Sculpture. (4) Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists.

11A. Painting. (4) Studio, eight hours; five hours arranged. Basics of painting: introduction to technical procedures, tools, and materials. Discussion of fundamental conceptual and formal concerns. P/NP or letter grading.

11B. Photography. (4) Studio, eight hours; five hours arranged. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of the photographic medium within the context of art, supported by studies in theory, aesthetics, and history of photography. P/NP or letter grading.

11C. Printmaking. (4) Studio, eight hours; five hours arranged. Introductory survey of various technical and conceptual concerns in a variety of printmaking media as preparation for more focused study in particular media at upper division level. P/NP or letter grading.

11D. New Genres. (4) Studio, eight hours; five hours arranged. Introduction to projects in installation, performance, video, film, intermedia, and other nontraditional media and processes. P/NP or letter grading.

11E. Ceramics. (4) Studio, eight hours; five hours arranged. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art. Letter grading.

31. Modernism. (4) Discussion, three hours. Survey of 20th-century European/American art, its antecedents, and its social and political context.

32. Survey of Critical Thought. (4) Discussion, three hours. Overview of premodern, modern, and postmodern theory as reflected in critical writing and artistic practice, with emphasis on the 1940s to the present.

Upper Division Courses

100. Issues in Contemporary Art. (4) Discussion, three hours. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for a maximum of 16 units.

130. Advanced Drawing. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Drawing as both an independent expressive medium and as a means of visualization. May be repeated for a maximum of 16 units.

133. Advanced Painting. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Varied media and subjects to further develop students' technical and expressive means to implement their ideas. May be repeated for a maximum of 16 units.
147 / Art History

137. Advanced New Genres. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Emphasis to be selected by faculty from one or more of the following media: installation, performance, video, film, other nontraditional media and processes. May be repeated for a maximum of 16 units.

140. Advanced Printmaking. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected studies in fine printmaking, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

145. Advanced Sculpture. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

147. Advanced Photography. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Selected projects in photography and related media, concentrating on development of individual students’ artwork. Studio emphasis with special focus in theory and critical analysis. May be repeated for a maximum of 16 units.

148. Advanced Ceramics. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11E, 31, 32. Selected studies in ceramics, with emphasis on individualized creative experimentation with materials and techniques introduced in course. Methods and processes to be selected from a range of possibilities, including handforming and modeling, preparation and use of molds, slipcasting, and use of potter’s wheel. May be repeated for a maximum of 16 units.

150. Senior Studio. (4) Studio, eight hours; five hours arranged. Requisites: courses 1A, 1B, 11A through 11D, 31, 32. Limited to seniors. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. May be repeated once for credit.

M186A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186A and World Arts and Cultures M166A.) Studio/lecture, six hours. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186B and World Arts and Cultures M166B.) Studio/lecture, six hours. Requisites: courses M186A/M186AL. Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Chicana and Chicano Studies M186C and World Arts and Cultures M166C.) Studio/lecture, six hours. Requisites: courses M186B/M186BL. Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M188. Whose Monument Where?: Course on Public Art. (4) (Same as Chicana and Chicano Studies M188 and World Arts and Cultures M167.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the “public,” what is “public space” at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently? P/NP or letter grading.

197. Honors Course. (4) Hours to be arranged. Preparation: 3.0 grade-point average overall, 3.5 grade-point average in major. Limited to juniors/seniors, individual studies for majors. May be repeated once for credit.

199. Special Studies in Art. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

271. Painting. (2 to 8) Studio, eight hours. Study in painting and associated media. May be repeated for credit with consent of adviser.

272. Graduate Printmaking. (2 to 8) Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media. May be repeated for credit with consent of adviser.

273. Graduate Sculpture. (2 to 8) Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student’s particular discipline. Individual studio visits and consultation. May be repeated for credit with consent of adviser.

274. Photography. (2 to 8) Studio, eight hours. Studies concentrating on development of individual students’ artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art. May be repeated for credit with consent of adviser.

275. New Genre. (2 to 8) Studio, eight hours. Studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes. May be repeated for credit with consent of adviser.

276. Graduate Group Critique. (4) Discussion, four hours; tutorial, to be arranged. Group critique/discussion of students’ research. Additional tutorial meetings by arrangement with instructor. May be repeated for credit.

277. Graduate Ceramics. (2 to 8) Studio, eight hours. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of a significant body of original work reflecting student’s expressive and theoretical concerns. May be repeated for credit.

278. Interdisciplinary Studio. (2 to 8) Studio, eight hours. Tutorial focused on directed research, studio visits, and group discussions of recommended readings. May be repeated for credit. S/U or letter grading.

280. Graduate Seminar: Art. (4) Discussion, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit.

281. Exhibition and System. (4) Examination of temporary exhibition and its associated field of publications as an intertextual system of meaning, beginning with individual works and proceeding to on-site analysis of current exhibitions. May be repeated for credit. S/U or letter grading.

282. Exhibitions and Public Programs. (4) Seminar, four hours. Introduction to principles of program planning and community development in relation to visual arts and work of art museums. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4). Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for M.A. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. May not be applied toward M.A. course requirements. May be repeated. S/U grading.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Anthony Vidler, Dipl.Arch,Chair

Professors
Albert Boime, Ph.D.
Robert L. Brown, Ph.D.
Group B: (8) 104A, 104B, C104C, (9) 114A, total:

Three different areas in Group B (three courses following 12 areas, distributed as follows: one

1. A total of six courses (24 units) from the courses as follows:

- Required: Eleven upper division art history courses.
- The Major

1. A total of six courses from the following 12 areas, distributed as follows: one course from three different areas in Group A (three courses total) and one course from three different areas in Group B (three courses total):

   - Two art history electives from the above 12 areas; courses 127, 197, and 199 may also be included.

   - Two terms of one foreign language or equivalent are also required. The language is in addition to the college foreign language requirements.

   - Art History majors should be aware that the upper division course requirements in the major (44 units) do not meet the upper division requirement of 60 units for graduation. Additional upper division units must be taken to reach the 60-unit total.

   - It is recommended that students have each term’s program approved by the departmental adviser.

Honors Program

- The honors program is designed for Art History majors who are interested in carrying out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

- All junior and senior Art History majors who have completed a minimum of four upper division art history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

- To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Art History 195A-195B with a grade of A—or better.

- To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete courses 195A-195B with a grade of A.

Museum Studies Minor

- The Museum Studies minor introduces undergraduate students to the history, theory, and practice of museums and museology through a group of linked and related courses from various disciplines in the College of Letters and Science and School of the Arts and Architecture. The program exposes students to museum studies as historically and currently practiced in the visual arts, in anthropology and ethnography, and in history and cultural studies more broadly. The minor complements and in part may serve as an introduction to the recently approved M.A. concentration in museum studies.

To enter the minor students must be in good academic standing (minimum 3.0 cumulative grade-point average), have completed 45 units at UCLA, and file a petition with the program adviser, 100 Dodd Hall, (310) 206-6905.

Required Lower Division Courses (eight units):

- Anthropology 9 or 33 and one course from Art History 50 through 57, with grades of B or better.

Required Upper Division Courses (28 units):

- Art History C103A-C103B, World Arts and Cultures 165A, 165B, and three elective courses selected from Art History 100, C103C, World Arts and Cultures 165C, and a wide range of other courses from various departments and programs, with approval of the program director. Courses from other departments and programs may be applied as electives on an individual case basis only.

A minimum of 20 units applied toward the minor requirements must be in addition to courses applied toward major requirements, and at least 16 units applied toward the minor must be taken in residence at UCLA. All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Transfer credit for any of the above is subject to departmental approval; consult the departmental adviser before enrolling in any courses for the minor.

Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

- The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

- The Department of Art History offers the Master of Arts (M.A.) degree in Art History.

Admission

- A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required of applicants to the M.A. program. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about the applicant’s interests in art history. Also required are two writing samples (two 10-page research papers). In addition, applicants must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses in
Fields A and B noted below. Specific areas may not be offered in satisfaction of more than one requirement.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during the first two quarters of residence and may not be applied toward the required courses for the degree. Instead of taking a course, students may elect to substitute a competency examination in the deficient area.

Prospective students may contact the graduate counselor, Department of Art History, for brochures and information. The department has no special departmental application.

Areas of Study

Sixteen areas in four fields:

Field A: (1) Aegean; (2) Greek and Roman; (3) medieval and Byzantine; (4) Renaissance and baroque; (5) modern and contemporary; and (6) American.

Field B: (7) African; (8) oceanic; (9) Native North American; (10) pre-Columbian; (11) Islamic; (12) Indian and Southeast Asian; (13) Chinese; and (14) Japanese.

Field C: (15) Critical theory.

Field D: (16) Museum Studies

Course Requirements

The M.A. degree requires the completion of a major and two minors within the art history major. There are four major/minor options available to M.A. students.

Option I: Western Major

Major from Field A, areas 1-6 — four courses in one area.

First minor from Field A, areas 1-6, or from Field C, area 15 — two courses from one area other than the major selected from Field A areas 1-6, or two courses from Field C, area 15.

Second minor from Field B, areas 7-14 — two courses in one area.

Option II: Non-Western Major

Major from Field B, areas 7-14 — four courses in one area.

First minor from Field B, areas 7-14, or from Field C, area 15 — two courses from one area other than the major selected from Field B, areas 7-14, or two courses from Field C, area 15.

Second minor from Field A, areas 1-6 — two courses in one area.

Option III: Critical Theory Major

Major from Field C, area 15 — two courses from Field C, area 15, plus four courses in one area from Field A or B, areas 1-6 or 7-14.

The first and second minors for this option are chosen as in options I and II based on the major selection from Field A or B, areas 1-6 or 7-14 — two courses in one area for each minor.

Instructors from the student’s major and two minor areas normally serve on the thesis committee. If the student wishes to complete two of the three areas with one instructor, a petition explaining the reasons for this must be approved by the graduate review committee.

For major/minor options I and II, students are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

For major/minor option III, students are required to take a minimum of 13 graduate and upper division courses but may be required to take up to 14 courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

Option IV: Museum Studies Major

Major from Field D, area 16—two courses from Field D, area 16, plus four courses in one area from Field A, B, or C, areas 1-6 or 7-14 or 15.

The first and second minors for this option are chosen as in options I and II based on the major selection from areas 1-6 or 7-14 or 15 — two courses in one area for each minor. Language requirements: The language of the student's major historical field is required, in conformity with foreign language requirements listed above.

For major/minor option IV, students are required to take a minimum of 13 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. Courses C203A-C203B are required. Of the courses taken from outside the depart-ment, a minimum of three must be from a museum studies- or museology-related subject in another department, taken for graduate or upper division credit. No more than two of the graduate courses may be directed studies (596) projects. A list of recommended courses from which the student may select is provided by the student's adviser.

All students must take (1) Art History 200 and (2) either course 201 or 202. Courses should be determined in consultation with students' major and minor advisers with the stipulation that progress toward the M.A. may not be impeded by requiring a course not offered at least once every two years.

On completion of all course and foreign language requirements, the department requests the Graduate Division to appoint the thesis committee. After the committee has been appointed, students may petition for advancement to candidacy for the M.A. degree. Candidates have one calendar year after advance-
paper written at the M.A. level in the major or intended major field; (3) three or more letters of recommendation from individuals familiar with the applicant's scholarly work, of which one must be a detailed letter of assessment and endorsement from the individual who served as the major adviser for the M.A.; (4) a written statement from the intended Ph.D. major adviser of willingness to supervise the applicant's Ph.D. work; (5) evidence of reading fluency in two appropriate foreign languages; (6) Graduate Record Examination (GRE) scores.

If an applicant is applying directly to the Ph.D. program from the M.A. in Art History program at UCLA, there is a slightly modified procedure. For details, see the graduate counselor.

A reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian (i.e., Chinese, Japanese, South Asian, Southeast Asian), pre-Columbian and Latin American, Native North American, oceanic, Islamic, and Italian art history. An applicant may demonstrate this knowledge by (1) submitting proof of a GSFLT (Graduate School Foreign Language Test) score of 600 or better (for French, German, and Spanish only; examination not given for Italian); (2) taking and passing the relevant UCLA departmental language examinations; or (3) submitting proof of completion of UCLA's German 6 and/or French 5 with a grade of B or better. If an applicant plans on majoring in Japanese or Chinese art history, substitute either Chinese or Japanese respectively for either French or German. If an applicant plans on majoring in South Asian, Southeast Asian, or Islamic art history, substitute for either French or German an appropriate research language of South Asia, Southeast Asia, or the Islamic Middle East. The choice must be made in consultation with, and with the consent of, the major adviser. The Asian and Islamic requirements, however, are normally satisfied by enrolling in an appropriate course sequence for six consecutive quarters (normally beginning with the first quarter of graduate study) and by maintaining a grade of B or better. If one intends to major in pre-Columbian and Latin American art history, applicants must demonstrate reading fluency in Spanish plus one additional foreign language. In the case of Spanish, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement. Applicants intending to major in Native North American or oceanic art must master one European language and one additional foreign language. If an applicant intends to focus on Italian art history, competency in German and either French or Italian must be demonstrated. For the latter, UCLA's Italian 5, passed with a grade of B or better, satisfies the requirement.

If the applicant has passed a required foreign language at another institution, the relevant UCLA departmental foreign language examination must be taken and passed nonetheless, or an official recent (within two years) GSFLT score of 600 or better in the language must be submitted. Exceptions are granted only when the examination taken at another institution (1) has been passed within the past two years and (2) can be demonstrated to have been equivalent in nature to that of the UCLA departmental foreign language examination. Coursework in foreign languages taken at another institution may not be used as evidence of reading competence.

**Major Fields or Subdisciplines**

Twenty-two areas in three fields:

Field A: (1) Aegean; (2) American; (3) baroque; (4) Byzantine; (5) contemporary (post-1945); (6) 18th century; (7) Greek; (8) medieval; (9) 19th century; (10) Renaissance; (11) Roman; and (12) 20th century.

Field B: (13) African; (14) Chinese; (15) Indian; (16) Islamic; (17) Japanese; (18) Native North American; (19) oceanic; (20) pre-Columbian; (21) Southeast Asian.

Field C: (22) critical theory.

**Course Requirements**

At the time of application to the Ph.D. program, the student selects a major field of study within art history; by the end of the second quarter of residence, an additional minor (or minors) is selected. The faculty member responsible for the minor serves as the minor adviser. The major and minor advisers are responsible for the student's course of study and completion of requirements within the field. In addition, the major adviser must be consulted regarding the student's overall course of study at least once each quarter. A change of adviser and of either the major or minor field must be changed by the graduate review committee.

If a student enters the Ph.D. program deficient in Art History 200 or its equivalent, it must be added to the total requirements. In some cases, course 201 may also be required if recommended by the faculty adviser.

The department offers three options in the selection of majors and minors.

**Option I**

Major from Field A, areas 1-12, or Field B, areas 13-21 — five courses in one area.

Minor from Field A or B, areas 1-12 or 13-21 — three courses in one area other than the major field, or from Field C, three courses from area 22.

**Option II**

Major from Field A, areas 1-12, or Field B, areas 13-21 — five courses in one area.

Minor from an extra-departmental area such as history, anthropology, or film — three courses in one area.

**Option III**

Major from Field C, area 22 — four courses from Field C, area 22, plus four courses in one area from Field A or B, areas 1-12 or 13-21.

Minor from Field A or B, areas 1-12 or 13-21 — three courses in one area not chosen as part of the major or three courses in one area from an extra-departmental area.

For major/minor options I and II, a minimum total of eight graduate and upper division courses is required, of which at least four must be art history courses at the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses with approval of the major or minor advisers (where applicable).

For option III, a minimum total of 11 graduate and upper division courses is required, of which at least four must be art history courses at the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses with approval of the major or minor advisers (where applicable).

**Written and Oral Qualifying Examinations**

After completion of coursework and language study, students must take the Ph.D. written comprehensive examination to test breadth and depth of knowledge in the major and minor fields of study. If the examination is failed, or any part thereof, that portion may be repeated during the subsequent quarter of residence. No further repetition is allowed.

After passing the written comprehensive examination, students select a dissertation topic. The members of the doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, students then take the University Oral Qualifying Examination, given by the doctoral committee. Assuming there is no more than one no pass vote, students may initiate the procedure to become advanced to candidacy.

**Art History**

**Lower Division Courses**

50. Ancient Art. (4) Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture.

51. Medieval Art. (4) Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

54. Modern Art. (4) Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

55A. Introduction to African Art. (4) Lecture, three hours; discussion, one hour. Introduction to field of African art history, with focus on selected traditions. P/NP or letter grading.

55B. Arts of Pre-Columbian America. (4) Lecture, three hours; discussion, one hour. Survey of sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.
56A. Art of India and Southeast Asia. (4) Lecture, three hours; discussion, one hour. Survey of major art- 
istic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical 
problems, as well as social and political conditions under which artworks were patronized and produced. 

56B. Introduction to Chinese Art. (4) Lecture, three hours; discussion, one hour. Introduction to discipline of 
Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and 
textual sources, peculiarities of patronage, traditional art history and classification, and approaches to represen-
tation in premodern China. 

57. Renaissance and Baroque Art. (4) Lecture, three hours; discussion, one hour. History of art and 
architecture in Western Europe from 1400 to 1750. 

101A. Egyptian Art and Archaeology. (4) Lecture, three hours. Study of architecture, sculpture, painting, 
and minor arts during the Predynastic period and Old Kingdom. 

101B. Egyptian Art and Archaeology of the Middle 
and New Kingdoms. (4) Lecture, three hours. Prerequisite: course 50 or Classics 10. 

M102A. Minoan Art and Archaeology. (Same as Classics M153A.) Lecture, three hours. Prerequisite: 
course 50 or Classics 10. Study of development of art and architecture in Minoan Crete from ca. 3000 to 
1000 B.C. 

M102B. Mycenaean Art and Architecture. (Same as Classics M153B.) Lecture, three hours. Prerequisite: 
course 50 or Classics 10. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 
1000 B.C. 

M102C. Archaic Greek Art and Archaeology. (Same as Classics M153C.) Lecture, three hours. Prerequisite: 
course 50, Classics 10. Study of development of art and architecture of Greek world from approximately 
800 through 490 B.C. 

M102D. Classical Greek Art and Archaeology. (Same as Classics M153D.) Lecture, three hours. Prerequisite: 
course 50, Classics 10. Recommended: upper division classics or Greek courses. Study of develop-
ment of art and architecture of Greek world from approximately 490 through 350 B.C. 

M102E. Hellenistic Greek Art and Archaeology. (Same as Classics M153E.) Lecture, three hours. Prerequisite: 
course 50, Classics 10. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmission of Greek art forms to the Romans. 

M102F. Etruscan Art. (Same as Classics M153F.) Lecture, three hours. Prerequisite: course 50 or Classics 25. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. 

M102G. Roman Art. (Same as Classics M153G.) Lecture, three hours. Prerequisite: course 50. Art and 
arithmetic of Rome and its Empire from ca. 300 B.C. to A.D. 300. 

M102H. Late Roman Art. (Same as Classics M153H.) Lecture, three hours. Prerequisites: courses 
50, 102G. Art of Roman Empire from the 2nd through the 4th centuries (A.D.). 

M102J. Greco-Roman Architecture. Lecture, three hours. Prerequisite: course 50, Classics 10. 

105A. Early Christian Art. (4) Lecture, three hours. Prerequisite: course 51. Origins and development of 
architecture, sculpture, and painting of early Christianity to 700 A.D. 

105B. Early Medieval Art. (4) Lecture, three hours. Prerequisite: course 51. Art and architecture of Western 
Europe from the Migration period until A.D. 1000. 

105C. Romanesque Art. (4) Lecture, three hours. Prerequisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries. 

105D. Gothic Art. (4) Lecture, three hours. Prerequisite: course 51. Art and architecture of Europe in the 
13th century. 

105E. Byzantine Art. (4) Lecture, three hours. Prerequisite: course 51. Theory and development of Byzan-
tine art from the iconoclastic controversy to 1453 and 
edition of Byzantine art in Armenia, Georgia, the 
Caucasus, and Russia. 

105F. Late Gothic Art and Architecture. (4) Lecture, three hours. Prerequisite: course 51. Art and architecture of Europe in the 
14th and early 15th centuries. 

106A. Italian Art of the Trecento. (4) Lecture, three hours. Prerequisite: course 57. Art and architecture of the 
14th century. 

106B. Italian Art of the Quattrocento. (4) Lecture, three hours. Prerequisite: course 57. Art and architecture of the 
15th century. 

106C. Italian Art of the Cinquecento. (4) Lecture, three hours. Prerequisite: course 57. Art and architecture of the 
16th century. 

106D. Late Renaissance Art: Counter-Reformation. (4) Lecture, three hours. Prerequisite: course 57, 106C. 

108A-108B. Northern Renaissance Art. (4-4) Lecture, three hours. Prerequisite: course 57. Course 108A 
is requisite to 108B. Painting and sculpture in the Northern Renaissance. 

108C. From Bruegel to Rubens. (4) Lecture, three hours. Prerequisite: course 57. Art and history in the 
Spanish southern Netherlands (i.e., present-day Belgium) circa 1550-1660. 

109A. Baroque Art. (4) Lecture, three hours. Prerequisite: course 57. Art and architecture of Italy and 
Spain, 16th to late 17th century. 

109B. Baroque Art. (4) Lecture, three hours. Prerequisite: course 108A. Art and architecture of Northern 
Europe, 16th to late 17th century. 

109C. European Art of the 18th Century. (4) Lecture, three hours. Prerequisite: course 57. Painting, ar-
citecture, and sculpture of the 18th century examined in light of political and intellectual developments. 

Special emphasis on effect of the rise of democratic institutions, especially the French Revolution. 

110A. European Art of the 19th Century. (4) Lecture, three hours. Prerequisite: course 54. Neoclassi-
icism and Romanticism, with emphasis on France — development and influence of David, Ingres, and 
Delacroix. 

110B. European Art of the 19th Century: Realism and Impressionism. (4) Lecture, three hours. Prerequisite: 
course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in 
England and Germany. 

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. (4) Lecture, three hours. Prerequisite: course 54. Study of major developments in modern art, 1880s to 1930, in- 
cluding Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism. 

110E. Art and Politics in the Contemporary Americas: Post-World War II U.S. Art and Politics. (4) 
Prerequisite: course 54. Selective survey of media and art supporting, condoning, and resisting U.S. capital-
ism and imperialism, with special emphasis on Vietnam era and arts of protest. 

110F. Selected Topics in Modern Art. (4) Lecture, three hours. Prerequisite: course 54. Changing topics in 
modern art (post-1780) which reflect interests of individ-
al and social and political concerns, both national and international. 

110G. Art and Politics in the Contemporary Americas: Latin America. (4) Prerequisite: course 54, Na-
tionalist and revolutionary responses of Latin America to U.S. imperialism. Discussion of the cases of Mexi-
co, Cuba, Chile, and Nicaragua. 

1110H. Latin American Art of the 20th Century. (4) Lecture, three hours. Mainstream modern and 
contemporary art and architecture of selected Latin American countries, including both modernist and 
postmodernist forms, considered in context of social and political concerns, both national and internation-
al. Concurrently scheduled with course C254. P/NP or letter grading. 

C112A. American Art before the Civil War. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212A. 

C112B. American Art in the Gilded Age, 1860 to 1900. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212B. 

C112C. American Art, 1900 to 1945. (4) Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. Concurrently scheduled with course C212C. P/NP or letter grading.
CM112D. African American Art. (4) (Same as Afro-American Studies CM112D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insightful and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. Concurrently scheduled with course CM126B. P/NP or letter grading.

114A. Early Art of India. (4) Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts.

114D. Later Art of India. (4) Lecture, three hours. Not open to freshmen. Survey of Indian art from the 10th to 19th century. Decline of Buddhist art, last flourishing of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/NP or letter grading.

114E. Arts of Korea. (4) Lecture, three hours. Art and archaeology of Korea from the Neolithic period through the Yi dynasty. Particular emphasis on early ceramics and Yi literati painting.

114F. Arts of Southeast Asia. (4) Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

C115A. Advanced Indian Art. (4) Lecture, three hours. Requisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257.

C115D. Art and Material Culture, Neolithic to 210 B.C. (4) Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C261A. P/NP or letter grading.

C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4) Lecture, three hours. Requisite: course 115D. Study of major artistic and cultural trends following World War II in the U.S. and Europe; covering abstract expressionism to pop art. Concurrently scheduled with course C216A.

C119A. Advanced Studies in African Art: Western Africa. (4) Lecture, three hours. Concurrently scheduled with course C112B. P/NP or letter grading.

127. Undergraduate Seminar. (4) Seminar, three hours. Discussion, research papers, and oral presentations. May be repeated twice.

C150A. Contemporary Art, 1940s to 1950s. (4) Lecture, three hours. Requisite: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe; covering abstract expressionism to pop art. Concurrently scheduled with course C250A. P/NP or letter grading.

150D. Selected Topics in Contemporary Art. (4) (Formerly numbered 110D.) Lecture, three hours. Requisite: course 54. Changing topics in contemporary art (post-1945) which reflect interests of individual regular and/or visiting faculty members. May be repeated once for credit. P/NP or letter grading.

195A-195B. Departmental Honors Courses. (4) Preparation: completion of minimum of four upper division art history courses with 3.5 departmental grade-point average and overall 3.5 grade-point average. Limited to junior/senior Art History and History of Art History majors. Two-term independent research project under supervision of an appropriate faculty member, culminating in departmental honors thesis of approximately 30 pages. In Progress grading.

197. Honors Course. (4) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. Individual studies for majors. Eight units may be applied toward the major. P/NP or letter grading.

Graduate Courses

201. Art Historical Theory and Methodologies. (4) Lecture, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present. May be repeated for credit with consent of adviser.

203. Topics in Historiography of Art History. (4) Lecture, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or the work of one or more authors. May be repeated for credit with consent of adviser.

204. Restoration, Preservation, and Conservation. (4) Seminar, two hours. May not be repeated.

205. Studies in Prints. (4) Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

206. Studies in Drawings. (4) Seminar, two hours. Critical studies in history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts. May be repeated for credit with consent of adviser.

210. Egyptian Art. (4) Seminar, two hours. Requisites: courses M101A, M101B, M102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures. May be repeated for credit with consent of adviser.

211. Topics in Aegean Art. (4) Seminar, two hours. Requisites: courses M102A, M102B. Art and architecture of Aegean Bronze Age (3300 to 1000 B.C.). Monuments or theoretical problems related to art and culture, of Crete, Greece, the Cyclades, or Western Anatolia. May be repeated for credit with consent of adviser.

C212A. American Art before the Civil War. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112A.
C212B. American Art in the Gilded Age, 1860 to 1900. (4) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112B.

C212C. American Art, 1900 to 1945. (4) Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. May be repeated for credit with consent of adviser. Concurrently scheduled with course C112C. S/U or letter grading.

CM212D. African American Art. (4) (Same as Afro-American Studies CM212D.) Lecture, three hours. Detailed inquiry into work of 20th-century African American artists whose works provide insight and critical commentary about major features of American life and society, including visits to various key African American art institutions in Los Angeles. May be repeated for credit with consent of adviser. Concurrently scheduled with course CM112D. S/U or letter grading.

C214. Problems in Islamic Art. (4) Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. May be repeated for credit with consent of adviser. S/U or letter grading.

C215B. Pre-Columbian Art of Mexico. (4) Lecture, three hours. Selected topics in art of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119A.

C216A. Advanced Studies in African Art: Western Africa. (4) Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroon, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C119B.

C217. Primitivism and Art. (4) Lecture, three hours. History of primitivism in visual arts and its institutional base from ancient Greece to the present, with emphasis on relevance to contemporary issues, critiques, and theory. May be repeated for credit with consent of adviser. S/U or letter grading.

C218A. Pre-Columbian Art of Mexico. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Pre-Columbian Mexico from ca. 1200 B.C. to the Conquest, with emphasis on special problems of theory and method. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117A.

C218B. Pre-Columbian Art of the Maya. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with emphasis on history and iconography. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117B.

C218C. Pre-Columbian Art of the Andes. (4) Lecture, three hours. Requisite: course 55B. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117C.

C218D. Aztec Art. (4) Lecture, three hours. Requisite: course 55B or C117A. Painting, sculpture, architecture, and other arts of Nahuali-speaking peoples of central Mexico in the centuries before the Spanish conquest, with emphasis on their social and historical context and major scholarly debates. May be repeated for credit with consent of adviser. Concurrently scheduled with course C117D. S/U or letter grading.

219A. Oceanic Art. (4) Discussion, two hours. Studies in selected topics in the art of Pacific islands. May be repeated for credit with consent of adviser.

219B. Pre-Columbian Art. (4) Discussion, two hours. Studies in selected topics in art of pre-Hispanic Latin America. May be repeated for credit with consent of adviser.

219C. African Art. (4) Discussion, two hours. Studies in selected topics in art of sub-Saharan Africa. May be repeated for credit with consent of adviser.

219D. Native North American Art. (4) Discussion, two hours. Studies in selected topics in art of the American Indian. May be repeated for credit with consent of adviser.

221. Topics in Classical Art. (4) Lecture, two to three hours. Studies in selected topics in Byzantine and Parthian art. May be repeated for credit with consent of adviser.

222. Classical Art. (4) Seminar, two hours. Studies in selected topics in Byzantine and European medieval art. May be repeated for credit with consent of adviser.

227. Renaissance and Baroque Paleography. (4) Seminar. Preparation: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions. May be repeated for credit with consent of adviser.

230. Italian Renaissance Art. (4) Seminar, two hours. Preparation: knowledge of Italian. Study of various aspects of Leonardo’s theoretical approach to art in terms of sources and impact on followers. May be repeated for credit with consent of adviser.

231. German Renaissance and Baroque Art. (4) Seminar, two hours. Preparation: knowledge of German. Study of selected topics (e.g., particular artist, trend, or problem), Research papers and oral reports required. May be repeated for credit with consent of adviser.

240. Baroque Art. (4) Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus. May be repeated for credit with consent of adviser.

244. Topics in European Art from 1700 to 1900. (4) Lecture, two to three hours. In Progress grading.

245. European Art from 1700 to 1900. (4) Seminar, two hours. May be repeated for credit with consent of adviser.

246. Art and Architecture of Georgian England. (4) Seminar, two hours. May be repeated for credit with consent of adviser.

250A. Contemporary Art, 1940s to 1950s. (4) Lecture, three hours. Preparation: course 54. Study of major artistic and cultural trends following World War II in the U.S. and Europe, covering abstract expressionism to pop art. Concurrently scheduled with course C150A. S/U or letter grading.

251. Contemporary Art. (4) Discussion, three hours. Selected topics in contemporary art, criticism, and theory. S/U or letter grading.

253. Modern Art. (4) Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) which reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times. May be repeated for credit with consent of adviser.

254. Latin American Art of the 20th Century. (4) Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. May be repeated for credit with consent of adviser. Concurrently scheduled with course C110H. S/U or letter grading.

258. Advanced Chinese Art. (4) Lecture, three hours. Study in Chinese painting and sculpture. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115B.

260A. Indian Art. (4) Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. May be repeated for credit with consent of adviser. S/U or letter grading.

260B. Chinese Art. (4) Lecture, two hours. Advanced studies in secular and religious artistic traditions of China. May be repeated for credit with consent of adviser. S/U or letter grading.

261A. Art and Material Culture, Neolithic to 210 B.C. (4) Lecture, three hours. Studies in Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115D. Extensive research paper required of graduate students. S/U or letter grading.

261B. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. (4) Lecture, three hours. Genesis of Chinese civilization, impact of Buddhist art (cave temples), rise of new media and technologies. May be repeated for credit with consent of adviser. Concurrently scheduled with course C115E. S/U or letter grading.
C261C. Art and Material Culture of Late Imperial China, 906 to 1191. (4) Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). May be repeated for credit with consent of adviser. Concurrently scheduled with course C115F S/U or letter grading.

265. Fieldwork in Archaeology. (2 to 8) Participation in archaeological excavations or other archaeological research under supervision of the staff. May be repeated for credit with consent of adviser.

M270. Art Law. (4) Same as Law M301. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distin-
guished guest speakers and one field trip.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprentice ship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit, S/U grading.

495. Teaching Art History. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Designed for graduate students. Required of all new teaching assistants during Fall Quarter of their teaching assistant appointment. Workshop/seminar in teaching techniques and pedagogical issues, consisting of readings, discussions, and guest speakers on selected topics. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC, S/U grading.

596. Directed Individual Study or Research. (2 to 8) S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) S/U grading.

ARTS AND ARCHITECTURE

School of the Arts and Architecture

UCLA
1100 Dickson Art Center
Box 951620
Los Angeles, CA 90095-1620
(310) 206-3564
http://www.arts.ucla.edu

Scope and Objectives

There is no major in arts and architecture; however, the following courses are part of the schoolwide curriculum.

Arts and Architecture

Upper Division Courses

100. Selected Topics in the Arts. (4) Lecture, four hours; discussion and/or laboratory, three hours; outside study, five hours. Selected topics in the arts explored through a variety of approaches which may include projects, readings, discussion, research papers, and oral presentations. Topics to be announced in advance. May be repeated for a maximum of eight units. P/NP or letter grading.

101. Aesthetics of Multimedia. (4) Lecture, three hours; laboratory, one hour; outside study, eight hours. The arts stand at expressive center of new forms of digital expression described as “multimedia.” Historical roots of this new expression traced over 1,500 years of world culture as preparation for collaborative multimedia student projects.

Chi-Fun Cindy Fan, Ph.D., Chair
Min Zhou, Ph.D., Vice Chair

Professors
Edna Bonacich, Ph.D. (Sociology, UC Riverside)
Lucie C. Cheng, Ph.D. (Sociology)
Shirley Hune, Ph.D. (Urban Planning)
Jerry Kang, J.D., Acting (Law)
Snehendu B. Kar, Dr.P.H., M.Sc. (Community Health Sciences)
Geraldine V. Padilla, Ph.D. (Nursing)
Stanley Sue, Ph.D. (Psychology, UC Davis)
Robert A. Nakamura, M.F.A. (Film and Television)
Don T. Nakashiri, Ph.D. (Education)

Professor Emeritus
Harry H. Kitano, Ph.D. (Social Welfare)

Associate Professors
King-Kok Cheung, Ph.D. (English)
Chi-Fun Cindy Fan, Ph.D. (Geography)

James E. Lubben, D.S.W. (Social Welfare)
Valerie J. Matsumoto, Ph.D. (History)
Aileen Moon, Ph.D. (Social Welfare)
Paul Ono, Ph.D. (Urban Planning)
Min Zhou, Ph.D. (Sociology)

Assistant Professors
Pauline Agbayani-Siewert, Ph.D. (Social Welfare)
Wei-Yin Hu, Ph.D. (Economics)
Marjorie Kagawa-Singer, Ph.D. (Community Health Sciences)
Jinqi Ling, Ph.D. (English)
David Wong Louie, M.F.A. (English)
Kyeoung Park, Ph.D. (Anthropology)
Michael Salmon, Ph.D. (History)
Shu-mei Shih, Ph.D. (East Asian Languages and Cultures)
Cindy Yee-Bradbury, Ph.D. (Psychology)
Henry Yu, Ph.D. (History)

Adjunct Associate Professor
Yui Ichikawa, Ph.D. (History)

Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian American and Pacific Island peoples in the U.S. from several disciplines. An undergraduate major leading to a B.A. degree is available for those students who wish to pursue their studies about Asian Pacific Americans in more depth, while the graduate program leads to the M.A. degree. Students enrolled in an organized undergraduate major other than Asian American Studies may pursue a minor in the field. A major goal of the program is to communicate the experiences of Asian Pacific Americans as an ethnic group. Courses examine the important issues and concerns of Asian Pacific Americans, including their history, social organization, and culture.

Undergraduate Study

Asian American Studies B.A.

The B.A. program in Asian American Studies provides a general introduction for students who anticipate advanced work at the graduate level or careers in research, public service, and community work related to Asian Pacific Americans. An overall grade-point average of 2.0 is required for admission to the major.

Preparation for the Major

Required: Asian American Studies 21 or Social Sciences 20.

The Major

Required: A total of 14 upper division courses, including Asian American Studies 100A-100B, one research methods course, two Asian American theme courses, two courses with focus on an Asian Pacific American subgroup, two ethnic/race/gender relations courses, two courses on Asian or an Asian Pacific subgroup’s history/culture/social or political institutions, and three elective courses selected from Asian American studies or the approved list of interdepartmental courses. At least seven of
the courses taken for the major must be from the approved list of interdepartmental courses (available in the program office each term). Students must also demonstrate proficiency equivalent to the completion of a one-year course of study in an Asian language prior to graduation.

No more than eight units of course 199 may be applied toward the major.

All courses applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must maintain an overall grade-point average of 2.0 in all courses.

Asian American Studies Minor

The Asian American Studies minor is designed for students who wish to gain understanding of and competence in Asian American studies.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the program counselor, Asian American Studies Center, 3230 Campbell Hall.

Required Upper Division Courses (28 units):
Asian American Studies 100A-100B; one Asian American theme course selected from M110, M112A, M112B, 113, 115, M117, M119, M123, M129A, M163, 196, 197A through 197Z, 199; one course with focus on an Asian Pacific American subgroup selected from 130A through 130E, M132A, M132B, M153, M154, 171A through 171E, 196, 197A through 197Z, 199; and three Asian American studies elective courses. No more than four units of course 199 may be applied toward the minor, and only courses in Asian American studies or those multiple-listed with the program may be taken to fulfill requirements for the minor.

All minor courses must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Asian American Studies Specialization

The specialization in Asian American Studies was discontinued effective Winter Quarter 1998. Students currently participating in this program (1) must complete both a departmental major and the Asian American studies specialization by Winter Quarter 2000 or (2) may modify their programs to fit the minor requirements.

Students must take Asian American Studies 100A-100B, one Asian American theme course, one course with focus on an Asian American subgroup, and two Asian American studies elective courses. No more than four units of course 199 may be applied toward the specialization.

All courses applied toward the specialization must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and students must maintain an overall grade-point average of 2.0 in all courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

Admission

In addition to the University’s minimum requirements, applicants for the Master of Arts program in Asian American Studies are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the program as part of the application. Three letters of recommendation are also required.

Areas of Study

Since the Asian American Studies program is interdepartmental, its major fields are determined by the participating faculty from various departments.

Course Requirements

A total of 11 graduate and upper division courses is required for the degree. Of that number, seven must be graduate level (200 or 500 series). Three of the graduate courses must be selected from Anthropology 231, Education 204D, 253G, English M260A, History 201H, 245, Law M315, Sociology 235, 261, 263.

The remaining four of the minimum 11 courses must be approved by the faculty adviser. These four courses, three of which may be upper division, should be selected to give the student additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the 11 courses; only one of the two may be applied toward the required seven graduate courses.

Comprehensive Examination Plan

The M.A. degree may be completed through a written comprehensive examination. The written examination is administered by a committee consisting of at least three faculty members appointed annually by the administrative head of the interdepartmental program in Asian American Studies. The examination is based on an annually updated “Approved List of Core Works in Asian American Studies,” a collection of books, novels, articles, and reports in the field of Asian American studies. The examination is normally offered during the break between Winter and Spring Quarters. Students must take the written examination at least one academic quarter before it is administered. Students are given two chances to pass the examination. Academic credit for examination preparation is given through Asian American Studies 596.

Thesis Plan

Plan A (Thesis). The thesis is intended to provide the opportunity for independent scholarly research on the historical and contemporary experiences of the Asian American population and should be an original contribution to the field. It should be the length and quality of a publishable journal article. A thesis committee of three faculty members is normally constituted at the beginning of the student’s second year in residence in the Fall Quarter, at which time the student is expected to submit a plan of research for approval. After approval and completion of the thesis, the committee conducts an oral examination on its subject, usually in the Spring Quarter of the second year. The approved thesis must be typed and filed according to University regulations governing master’s theses. Academic credit for thesis research and preparation is given through Asian American Studies 598.

Plan B (Field Research Thesis). A field research thesis is recommended for students who are interested in the practical application of what they have learned in their graduate coursework or who are intending to pursue careers with Asian American community organizations and agencies. A field research thesis committee, consisting of three faculty members (one of whom is designated as the chair) and possibly the chief administrative officer of the client community organization, meets with the student and approves the project plan at the beginning of the student’s second year in residence in the Fall Quarter. The chief administrative officer of the client community organization may either be appointed as an additional member of the committee, in which case the officer would be expected to read and sign the thesis as the fourth member, or serve as an unofficial and unappointed consultant for the student, in which case the officer would not sign the thesis. After the thesis is completed, the committee conducts an oral examination on the written report of the thesis, usually in the Spring Quarter of the student’s second year. The approved thesis report must be typed and filed according to University regulations governing master’s theses. Academic credit for field research is given through course 596 or 598.
Asian American Studies

Lower Division Courses

21. Asians and Pacific Islanders in American Society. (4) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and cultures of Asians and Pacific Islanders in the U.S. Topics include origins and history of migration to the U.S., social movements, ethnic images in literature and art, communities in the U.S. and California, and their current issues. P/NP or letter grading.

99. History of Asians in America. (4) (Formerly numbered 100A). Lecture, three hours; discussion, one hour. Multidisciplinary examination of history of Asians and Pacific Islanders in the U.S. P/NP or letter grading.

Upper Division Courses

100. Contemporary Asian American Communities. (4) (Formerly numbered 100B.) Lecture, three hours; discussion, one hour. Multidisciplinary introduction to Asian American communities in the U.S. Topics include demographics and social, political, and economic issues. P/NP or letter grading.

101A. Field Studies Methods in Asian Pacific Communities. (4) Lecture, three hours. Preparation: course 100 through 197Z. Development of community profiles on Asian Pacific American communities of students' choice, using various field studies techniques of data collection. P/NP or letter grading.

101B. Internships in Asian Pacific Communities. (4) Discussion, 90 minutes; fieldwork, eight hours minimum. Requisite: course 101A or another Asian studies course (except 199). Integrates academic and empirical work by providing students the challenge of performing public service and community work in Asian Pacific or other multicultural communities, and of bringing their ongoing internship experiences back to classroom. P/NP or letter grading.

103. Social Science Research Methods. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Introduction to fundamentals of conducting social research on Asian Americans, providing experience in using some research methods and exercises in evaluating nature and quality of scientific research on Asian American issues. P/NP or letter grading.

105. Asian American Historiography. (4) Seminar on exploration of how works of history are written about Asian Americans. Focus on problems of historiography and methodology when considering source materials related to history and experience of Asian Americans. P/NP or letter grading.

107A. Introductory Video Ethnography and Documentary Workshop. (4) (Formerly numbered 107A.) Laboratory, three hours. Introduction to concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scripting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

107B. Advanced Video Ethnography and Documentary Workshop. (4) Laboratory, three hours. Requisite: course 107A. Advanced concepts and methods of video documentation and video ethnography of the Asian Pacific American community. Topics include scripting, budgeting, video image and sound control through camcorder functions, basic composition/lighting, sound recording, interviewing techniques, and editing. Students required to do off-campus fieldwork and complete video documentary. P/NP or letter grading.

M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems. (4) (Same as Health Services M110.) Lecture, three hours. Discussion of unions and coalitions to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

M112A. Asian American Literature to 1880. (4) (Formerly numbered M112A.) (Same as English M102A.) Preparation: satisfaction of Subject A requirement. Survey of Asian American literature from the 18th to the 19th century. Major authors include Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston. P/NP or letter grading.

M112B. Asian American Literature since 1880. (4) (Formerly numbered M112B.) (Same as English M102B.) Preparation: satisfaction of Subject A requirement. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

113. Asian Americans and the Law. (4) Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include anti-Asian prohibitions against Asian Americans' right to testify, Japanese relocation orders, and equal educational opportunity for Asian Americans. P/NP or letter grading.

115. Asian American Women. (4) Lecture, three hours. Condition of Asian women in America. Topics include women in Asian American history, racial and cultural stereotypes, and contemporary issues. Methodological approaches to study of gender issues presented and evaluated. P/NP or letter grading.

119. Asian American Aesthetics. (4) (Same as World Arts and Cultures M152.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

121B. Exploring Asian American Theater: Special Problems. (4) Study of an Asian American play; students required to compose one act based on their own experience using lessons learned in class. Exploration of scene study and acting exercises. P/NP or letter grading.

M123. Asian Pacific Americans in the U.S. Economy. (4) (Same as Economics M189.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

M124. Health Issues for Asian Americans and Pacific Islanders: Myth or Model? (4) (Formerly numbered M197.) (Same as Community Health Sciences M140.) Lecture, three hours; fieldwork, one hour. Introductory overview of mental and physical health issues of Asian Americans and Pacific Islanders; identification of gaps in health status indicators and barriers to both care delivery and research for these populations. Letter grading.

M132A. Filipino American Literature. (4) (Formerly as Comparative Literature M166A.) Seminar, three hours. Comprehensive introduction to Filipino American literature, with emphasis on Filipino American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Filipino culture on Filipino American literature. P/NP or letter grading.

M132B. Chinese Immigrant Literature and Film. (4) (Same as Chinese M153 and Comparative Literature M171.) Lecture, two hours; discussion, one hour. Outside study, eight hours. Designed for juniors/seniors. History of overseas Chinese communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

135B. Asian Pacific Communities in Hawaii: Field Studies. (4) Lecture, one hour; discussion, three hours; internship, 10 hours minimum. Requisite or corequisite: course 135A. Participation in academic internships (minimum 50 hours) in social service, cultural, political, educational, and community organizations to gain experiential learning experience in Hawaii's multicultural society. Given in Hawaii. P/NP or letter grading.

M154. Chinese Immigration. (4) (Same as Sociology M153.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

M163. Investigative Journalism and Communities of Color. (4) (Same as Afro-American Studies M195.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverage.

196. Seminar: Asian American Studies. (4) Seminars on topics such as ethnic literature, public policies, economic development, approaches, processes of implementation, evaluation, and strategies to effect policy. S/U or letter grading.

197A-197Z. Topics in Asian American Studies. (4 each) Lecture, three to four hours. Limited to seniors. Topics include education, literature, social process, public policy, and economic development. P/NP or letter grading.

M197C. Topics in Asian American Literature. (Same as English M197C.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

M197H. Culture, Media, and Los Angeles (6 units). (Same as Afro-American Studies M102 and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality.

199. Special Topics in Asian American Studies. (2 to 4) Requisite: course 100A or 100B or comparable knowledge in Asian American studies. Limited to juniors/seniors. Special individual studies on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies. (4) Designed for graduate students. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues.

200B. Critical Issues in Asian American Communities. (4) Lecture, three hours. Designed for graduate students. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns.

200C. Critical Issues in Asian American Studies. (4) Lecture, three hours. Designed for graduate students. Critical review of research methods, strategies, and philosophies related to empirical research methods, stressing uses and relevancy in research with ethnic minority populations. Review of characteristics and logical processes of research and applicability of scientific and scholarly inquiry in advancing knowledge. S/U or letter grading.

M239. Race and Ethnicity as a Concept in Practice and Research. (4) Same as Community Health Sciences M239.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

M261. Theorizing the Third World. (4) (Same as Comparative Literature M274.) Seminar, three hours; outside study, nine hours. Investigation of politics of power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

M297A-297Z. Topics in Asian American Studies. (4 each) Designed for graduate students. Selected topics in Asian American studies.

M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit.

297B. Asian Migration to the U.S. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

297C. Urbanization in Asia—Policy Issues and Problems. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

M297D. Asian Americans and Legal Ideology. (Same as Law M315.) Exploration of Asian American experience as it relates to American legal system, considering both dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students. (2) Lecture, one hour; discussion, one hour. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Hours to be arranged.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

**Undergraduate Study**

**Atmospheric, Oceanic, and Environmental Sciences B.S.**

**Preparation for the Major**

*Required: Atmospheric Sciences 2, 3, 6, 10; Chemistry and Biochemistry 20A; Mathematics 3A, 3B, and 3C, or 31A, 31B, 32A, 32B, 33A, and 33B; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17); 4AL, 4BL; Program in Computing 3 or 10A.*

To be admitted as Atmospheric, Oceanic, and Environmental Sciences majors, transfer students should have completed one year of calculus and one year of calculus-based physics with laboratory, with grades of C or better.

**The Major**

*Required: Atmospheric Sciences 101, 102, 103, 104, three additional upper division atmospheric sciences courses selected in consultation with the undergraduate advisers, and two courses from a list of chemistry, mathematics, and physics courses selected in consultation with the undergraduate advisers.*

Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 20B, 103, Mathematics 115A, 135A, 136, Physics 131, 132; students preparing for graduate studies in upper atmosphere and space physics should take Mathematics 115A, 135A, Physics 110A, 110B, M122; students preparing for graduate studies in atmospheric dynamics and physics should take Atmospheric Sciences 101, CM120, CM125, Mathematics 115A, 135A, 136, Physics 131, 132.

**Atmospheric and Oceanic Sciences Minor**

The Atmospheric and Oceanic Sciences minor provides a formal vehicle for students specializing in other science fields to pursue interests in the atmospheric and oceanic environment. It is designed to be flexible, recognizing that many topics in this field cross traditional disciplinary boundaries.

To enter the minor, students must have an overall grade-point average of 2.0 or better and must make an appointment with a departmental undergraduate adviser for approval in selecting a coordinated program of courses from within the department and related disciplines. For further information, contact the department at (310) 825-1217.

**Required Courses (28 units):** Seven four-unit courses, including (1) three from Atmospheric Sciences 101, 102, 103, 104, C110, C115, CM120, CM125, 130, M140, C145, 160, C165, C170, 180, C185 and (2) four additional courses, two of which must be upper division, from any of the above atmospheric sciences courses beyond the minimum three required or from Atmospheric Sciences 2, 3, 6, 10, 190 (must be taken twice), Chemistry and Biochemistry 103, 110A, 110B, 113A, C113B, 114, Earth and Space Sciences 15, Mathematics 115A, 115B, 132, 135A, 135B, 136, 146, M170A, 170B, Organismic Biology, Ecology, and Evolution C109, C119, 122, 123, 133, 147, 148, Physics 110A, 110B, 112, M122, 131, 132, Statistics 110A, 110B. Other relevant courses from related disciplines may be substituted with prior approval of the department.

Groups of courses relevant to specific subareas of atmospheric sciences include (1) atmospheric chemistry: Atmospheric Sciences 104, M140, Chemistry and Biochemistry 103, 110A, 110B, C113B, 114; (2) atmospheric chemistry and biology: Atmospheric Sciences 101, 104, Organismic Biology, Ecology, and Evolution C109, C119, 122, 133; (3) atmospheric dynamics: Atmospheric Sciences 101, 102,
Program Requirements

Subject to the degree requirements as published in http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

The Department of Atmospheric Sciences offers the Master of Arts (M.A.) degree in Atmospheric Sciences.

Admission

For the M.A. program, there are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to the Department of Atmospheric Sciences. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

A total of nine courses must be completed in graduate status, five of which must be in the 200 or 500 series. Students must attain a grade of B (3.0) or better in one course in each of two fields other than the field of specialization.

Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Core Courses. General core: Atmospheric Sciences C200A, C200B; dynamic and synoptic core: C201A, 201B, 201C; atmospheric physics and chemistry core: M203A, C203B, 203C; upper atmosphere and space physics core: C205A, 205B, 205C.

Atmospheric Sciences C200A is required of all students without formal background in fluid dynamics. Atmospheric Sciences C200B is required of all students without formal background in the atmospheric sciences.

Dynamic/Synoptic Specialization. Students are required to answer five questions — one from the general core, two from the dynamic/synoptic core, one from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core or, for those students with prior formal study in fluid dynamics and the atmospheric sciences, three questions from the dynamic/synoptic core and one each from the other two core groups.

Atmospheric Physics and Chemistry Specialization. Students are required to answer five questions (two questions from the combined general core and dynamic/synoptic core question alternatives, two from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core).

Upper Atmosphere and Space Physics Specialization. Students are required to answer five questions (two questions from the combined general core and dynamic/synoptic core question alternatives, one from the atmospheric physics and chemistry core, and two from the upper atmosphere and space physics core).

The special oral examination for each student is designed based on an individual list of topics selected in consultation with the graduate advisers. The list should represent the equivalent of two courses in the student's area of research specialization. The oral examination for each student is conducted by a Departmental Guidance Committee of three members appointed by the chair of the department at the conclusion of the first year of study.

Comprehensive Examination Plan

The comprehensive examination, based on selected coursework, is conducted at the end of Fall and Spring Quarters. Grading of the examination is based on a 4.0 scale, with a 3.0 required for a pass at the M.S. level, and a 3.5 or better to continue for the Ph.D. Students are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward the Ph.D. Students are encouraged to take the examination as soon as possible. The examination must, however, be attempted by the end of the student's first two years of study and, if necessary, be re-taken at the earliest available time.

Thesis Plan

Students who have a grade-point average of 3.5 or better may petition the department to obtain the M.S. by writing an original thesis. The petition must be received by the graduate advisers at least one year before completion of the degree (at the end of the first year of study). Provided a high academic standard in coursework is maintained, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. degree.

Doctoral Degree

Admission

For the Ph.D. degree in Atmospheric Sciences, there are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to the Department of Atmospheric Sciences. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

For students entering the department with an M.S. degree, there are no specific course requirements other than Atmospheric Sciences 270 in which a formal seminar attended and graded by all faculty members must be presented. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background in order to help them pass the comprehensive examination.

Written and Oral Qualifying Examinations

Students who selected the M.S. comprehensive examination plan must also take an in-depth oral examination in their area of research specialization. Subsequently, a doctoral committee is appointed to conduct the University Oral Qualifying Examination on the selected dissertation topic and related areas, and the final dissertation defense which is required of all students. Each of these examinations must be passed in no more than two attempts.
Atmospheric Sciences

Lower Division Courses

1. Introduction to Weather Maps and Weather Forecasting. (4) Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

2. Air Pollution. (4) Lecture, three hours; discussion, one hour. Causes and effects of high concentrations of pollution in the atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

3. Introduction to the Atmospheric Environment. (4) Lecture, three hours; discussion, one hour. Nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; ionosphere and auroras; causes of air pollution; proposed methods and status of weather modification.

4. California Weather and Climate. (4) Lecture, three hours; discussion, one hour. Enforced requisite: Physics 1B. Course for majors parallel to course 3; discussion section includes use of calculus. Discussion topics include atmospheric thermodynamics, extratropical synoptic-scale disturbances, atmospheric aerosol and microphysical processes, clouds and storms, radiative processes, atmospheric dynamics. Letter grading.

5. Climates of Other Worlds. (4) Lecture, three hours; discussion, one hour. Enforced requisite: Physics 1B. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Letter grading.

6. Climate and Climatic Change. (5) Lecture, three hours; discussion, three hours. Enforced requisite: Physics 1B. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Letter grading.

6A. Climate and Climatic Change. (5) Lecture, three hours; discussion, three hours. Enforced requisite: Physics 1B. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Letter grading.

6B. Climate and Climatic Change. (5) Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 6; discussion section places scientific and technological aspects of controversy in context of societal impacts of climate variations. Discussion of modern methods used to predict climate change and their impact. Letter (majors) or P/NP or letter (nonmajors) grading.

7. Clouds, Rain, and Storms. (4) Lecture, three hours; discussion, one hour. The rainfall and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric flow organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

8. Introduction to the Earth System. (4) Lecture, three hours; discussion, one hour. Overview of Earth as a system of distinct, yet connected, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Effects of biological processes in shaping the physical environment. Mechanisms that drive climate of Earth and that have produced a protective ozone shield around the planet. Exploration of possibility of technological solutions to global pollution problems.

8A. Introduction to the Earth System. (4) Lecture, three hours. Variable topics; consult Schedule of Classes for topics to be offered in a specific term. P/NP or letter grading.

8B. Lower Division Seminar. (4) Seminar, three hours. Variable topics; consult Schedule of Classes or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

104. Fundamentals of Air and Water Pollution. (4) Formerly numbered 2A, 144.) Lecture, three hours; discussion, one hour. Requisite: Chemistry 20B. Chemistry and physics of air and water pollution, including photochemistry, acid rain, air pollution meteorology and dispersion, groundwater and surface water pollution, chemical cycling, air/water interface, global atmospheric change. Letter grading.

106. Mesometeorology. (4) Lecture, three hours. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, air mass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. Concurrently scheduled with course C228. P/NP or letter grading.

109. Geophysical Fluid Dynamics. (4) Formerly numbered CM147.) Lecture, four hours. Requisite: course 103. Design and construction of physical oceanographic measurement program to describe large-scale geostrophic circulation in Santa Monica Basin, which has depths as large as 1,000 meters and extends 50 kilometers offshore from Los Angeles. Letter grading.

110. Environmental Chemistry Laboratory. (4) Formerly numbered CM151.) (Same as Chemistry M104.) Lecture, two hours; laboratory, three hours. Requisite: Chemistry 20B. Laboratory experience for students who wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment. P/NP or letter grading.
C145. Microphysics of Clouds, Precipitation, and Aerosols. (4) (Formerly numbered C152.) Lecture, three hours; discussion, one hour. Requisite: Physics 1A, 1B, and 1C, or 6A and 6B. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol, condensation, precipitation; and thunderstorms. Concurrently scheduled with course C203B. Letter grading.

160. Remote Sensing of the Environment. (4) (Formerly numbered 146.) Lecture, three hours. Requisite: Physics 1C or 6B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Introduction to properties of radiation in the atmosphere and principles of active and passive remote sensing of atmospheres and surfaces as it applies to monitoring of Earth's environment and global change. Letter grading.

C170. Introduction to Solar System Plasmas. (4) (Formerly numbered C154.) Lecture, three hours; discussion, one hour. Requisite: Mathematics 33A, Physics 1C. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetosphere, upper atmosphere, and ionosphere, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C205A. Letter grading.

180. Numerical Methods in Atmospheric Sciences. (4) (Formerly numbered 161.) Lecture, three hours; discussion, one hour. Preparation: one course in C or FORTRAN programming. Requisite: Mathematics 33B. Survey of numerical methods employed in atmospheric and related sciences; theory, application, and programming. Letter grading.

C185. Statistics in Atmospheric Sciences. (4) (Formerly numbered C162.) Lecture, three hours; discussion, one hour. Requisite: Mathematics M170A or Statistics M100A. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C213. P/N or letter grading.

190. Operational Meteorology. (2) (Formerly numbered 198.) Laboratory, six hours. Requisite: course C110. Limited to junior/senior atmospheric sciences majors. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Letter grading.

195. Senior Paper. (4) Limited to senior atmospheric sciences majors. Supervised through individual consultation with an appropriate faculty member. Students work on a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing honors thesis.

199. Special Studies in Meteorology (2 or 4) Special individual studies.

Graduate Courses

C203A. Introduction to Atmospheric Chemistry. (4) (Same as Civil Engineering M262A.) Lecture, three hours. Requisite for undergraduates: Chemistry 20B. Principles of chemical kinetics, thermodynamics, speciation, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere; basic photochemistry of troposphere and stratosphere; basic photochemistry of troposphere and stratosphere. Letter grading.

C203B. Microphysics of Clouds, Precipitation, and Aerosols. (4) Lecture, three hours; discussion, one hour. Theoretical foundation combined with application and observation data. Topics include cloud formation and structure; condensation processes; thermodynamic equilibrium; nucleation; aerosol processes — formation, diffusion, sedimentation, condensation, precipitation; and thunderstorms. Concurrently scheduled with course C145. Letter grading.

C205B. Descriptive Solar-Terrestrial Physics. (4) Lecture, three hours; discussion, one hour. Solar, interplanetary, magnetospheric, auroral, geomagnetic phenomenological background for studies in space physics. Complements theoretical space physics courses. Contextual understanding and literacy in space physics terminology provided. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

205C. Planetary Upper Atmospheres. (4) Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites — thermospheric structure and morphology, circulations, and disturbances; ionospheres as collisional and magnetized (unmagnetized) plasmas: currents, drifts, and instabilities. Examples of upper atmosphere — magnetospheric interaction with lower atmosphere and magnetosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Dynamic and Synoptic Meteorology

212A. Numerical Methods in Geophysical Fluid Dynamics. (4) Lecture, three hours. Requisite or co-requisite: course C201A. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computational models and computational boundary conditions. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C213. Statistics in Atmospheric Sciences. (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics M170A or Statistics M100A. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C185. Letter grading.

215. Ocean Circulation. (4) Lecture, three hours. Requisites: courses C200A, C201A. Phenomena, theory, and modeling of ocean circulations with global to regional scope. Circulation types include thermohaline and wind-driven currents. Examination of relationships between ocean circulations and smaller-scale motions, atmospheric climate, and biogeochemical transport. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

216A. Tropical Motions with Moist Processes. (4) Lecture, three hours. Requisite: course 201C. Cumulus convection and the boundary layer in the tropics. Cloud clusters and mesoscale convection systems. Interaction of cumulus with large-scale environment. Tropical cyclones. Monsoon meteorology. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

218. Dynamics of the Atmosphere/Ocean System. (4) Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air/sea interactions. Effects of oceans on climate. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

221. Geophysical Turbulence. (4) Lecture, three hours. Requisites: courses C200A, C201A, Phenomena, theory, and modeling of turbulence in Earth’s oceans and atmosphere — from fine structure to planetary scale motions. Regimes of turbulence include homogeneous flows in two and three dimensions, shear flows, convection, stably stratified flows, and geostrophic motions. Examination of relationships between turbulence and its transport effects on general circulations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

224A. Atmospheric Turbulence. (4) Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

M224B. Atmospheric Diffusion and Air Pollution. (4) (Same as Civil Engineering M228B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

228. Mesoscale Modeling. (4) Formerly numbered 228. Lecture, three hours. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, air mass thunderstorms, multicell storms, supercell tornadoes, gust fronts, and derechos. Discussion on design of field project. Concurrently scheduled with course C115. Letter grading. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Atmospheric Physics and Chemistry

230A-230B. Atmospheric Chemistry I, II. (4-4) Lecture, three hours. Requisite: course M203A. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

230A. Photochemistry of troposphere; physical chemistry of ground and mesoscale motions; from shallow heat sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in current and future models. Turbulent behavior of systems. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

230B. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results.

232. Chemical Transport Modeling. (4) Lecture, three hours. Requisites: courses M203A, 230A-230B. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234A. Cloud and Precipitation Physics I, II. (4-4) Lecture, three hours. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234B. Cloud and Precipitation Physics II. (4) Lecture, three hours. Requisite: course C230B. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals.

234B. Requisite: course C234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrometeors of rigid bodies in a viscous medium; hydrometeors of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collection.

Special Studies

270. Seminar: Atmospheric Sciences. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar: Atmospheric Dynamics. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

273. Seminar: Atmospheric Physics. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar: Atmospheric Chemistry. (2) Seminar, one hour. May be repeated for credit. S/U or letter grading.

276. Seminar: Mesoscale Processes. (2) Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

281. Special Topics in Dynamic Meteorology. (2 to 4) Individual meetings with instructor to be arranged. Content varies from year to year. S/U grading.

283. Special Topics in Atmospheric Physics. (2 to 4) Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry. (2 to 4) Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations. (2 to 4) Individual meetings with instructor to be arranged. Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

296A-296K. Advanced Topics in Atmospheric Sciences. (2 each) Advanced study and analysis of current topics in atmospheric sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

296A. Numerical Modeling of the Atmosphere.

296B. Synoptic and Mesoscale Meteorology.

296C. Numerical Mesoscale Modeling.

296D. Climate Dynamics.

296E. Numerical Modeling of the Atmosphere and Ocean.

296F. Hierarchical Modeling of Ocean/Atmosphere System.

296G. Upper Atmosphere and Space Physics.

296H. Recent Advances in Atmospheric Chemistry.

296I. Upper Atmospheric Dynamics.

296J. Experimental Mesoscale Meteorology.

296K. Tropical Meteorology.
Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
The Department of Biological Chemistry offers the Master of Science (M.S.) degree in Biological Chemistry.

Admission
The department only rarely and under special circumstances accepts students into the M.S. program.

Areas of Study
Consult the department.

Course Requirements
All graduate students must take the first-year UCLA ACCESS curriculum. See course requirements in the Doctoral Degree section below. In addition to the core course requirements, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With the consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to the program. Course 596 may be graded on an S/U or letter basis; 597 and 598 are graded S/U only.

Comprehensive Examination Plan
In general, the department prefers students to enter directly into the Ph.D. program, but if they enter the master's program, the comprehensive examination plan is preferred. Only in exceptional situations are students approved for the thesis plan. In either plan students must pass a departmental written examination. Only course requirements and the written examination are needed to complete the comprehensive examination plan.

Thesis Plan
In addition to coursework, a written thesis is required. A thesis committee helps students plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Doctoral Degree
Admission
Students are admitted to the program leading to the Ph.D. degree in Biological Chemistry through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences. In addition, under special circumstances, the department may admit students directly to the program in the first year. Application materials may be obtained from the UCLA ACCESS Program Office, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

M.D./Ph.D. Program. Applicants may apply for the M.D./Ph.D. program by making simultaneous applications for graduate status in the Biological Chemistry Department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

Major Fields or Subdisciplines
Consult the department.

Course Requirements
Students are required to take four didactic courses: Biological Chemistry CM248, CM253, and Neurobiology M209A or Biological Chemistry CM267 or Microbiology and Immunology M229, and one additional four- to six-unit graduate-level course selected according to the student's preference. Three of these courses are taken in the first year as part of the ACCESS program, which also requires two three-unit seminar courses and Molecular, Cell, and Developmental Biology M201.

First-year students must arrange for at least three rotations in the laboratories of different faculty members to help in the selection of a research adviser through UCLA ACCESS.

After the first year, students spend most of their time on dissertation research. In addition to the general course requirements listed above, Ph.D. students are expected to complete Biological Chemistry 596, 597, and/or 599 during quarters in which research (596, 599) or study for written or oral examinations (597) is part of the program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

Written and Oral Qualifying Examinations
A satisfactory performance in rotations and the first-year courses as judged by the graduate student guidance committee and department faculty is required before students can select their doctoral committee.

The University Oral Qualifying Examination, which must be passed before students can be advanced to candidacy, is administered by a doctoral committee of four faculty members.
The purpose is to evaluate students’ ability to formulate and defend two short research proposals. The proposals are submitted in a written form and defended orally. One proposal is an original research proposal that is not directly related to the dissertation research. This also fulfills the requirements for the written examination. The other proposal should discuss the proposed dissertation research. The doctoral committee determines whether students pass the examination and whether reexamination is allowed in case of failure. The examination may be repeated only once. The University Oral Qualifying Examination should be completed before the beginning of the third year of graduate work.

**Biological Chemistry**

### Upper Division Courses

**CM133. Principles, Practices, and Policies in Biotechnology.** (2) (Same as Biomedical Physics CM133, Chemical Engineering CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

**CM159B. Mechanisms in Regulation of Transcription II.** (2) (Same as Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisites: Chemistry 153B, 154. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

**CM169. Cell Structure, Signaling, and Differentiation.** (6) (Same as Human Genetics CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, and 153C. Recommended: course CM155G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM267. Letter grading.

**CM178. Molecular Genetics.** (6) (Same as Human Genetics CM178 and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**195. Current Research in Biological Chemistry.** (2) Limited to juniors/seniors. Personal interview required. Readings, discussion, and research projects. Topics include fermentation processes, scale-up strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. P/NP or letter grading.

**199. Directed Individual Research Studies in Biological Chemistry.** (2 to 8) Laboratory, four to 20 hours. Preparation: submission of written research proposal and consultation with instructor. Limited to juniors/seniors. Individual research projects carried out under direction of a faculty member. P/NP or letter grading.

### Graduate Courses

**201A-201B. Biological Chemistry (5 each).** Preparation: organic chemistry. Open to nonmedical students with consent of instructor. Primarily for first-year medical students and runs throughout School of Medicine’s second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress and S/U grading.

**204. Human Biological Chemistry and Nutrition Laboratory.** (3) Laboratory, four hours. Open to nonmedical students with consent of instructor. Experimental techniques in interrelated biochemistry and nutrition, analysis of experimental results. S/U or letter grading.

**220A-220B-220C. Research Laboratory Rotations (2 to 8 each).** Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under graduate student’s close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U grading.

**M221. Cellular and Molecular Neurochemistry.** (4) (Same as Neurobiology CM222, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and mosaics, genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M223. Membrane Molecular Biology.** (4) (Same as Physiology M223.) Lecture, two hours; discussion, two hours. Preparation: course CM233. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

**CM233. Principles, Practices, and Policies in Biotechnology.** (2) (Formerly numbered M233.) (Same as Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, scale-up strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Genetic Control of Development.** (4) (Same as Molecular, Cell, and Developmental Biology M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

**M237. Molecular and Cellular Foundations of Disease.** (4) (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

**CM248. Molecular Genetics.** (6) (Same as Human Genetics CM248, Microbiology M248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisites: course CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neuroendocrine science, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

Karim F. Hirji, Ph.D.

Adjunct Assistant Professor
Timothy D. Johnson, Ph.D.

Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers—such as genetics, molecular biology, oncology, pharmacology, neurosciences, and physiology—biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.

The department’s orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on.

The master’s program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of Biomathematics offers the Master of Science (M.S.) degree in Biomathematics.
Admission
High academic achievement in one scientific or mathematical field is required for admission to the M.S. program. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) are recommended. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Application for Graduate Admission, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics.

Admission to the M.S. program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Areas of Study
Consult the department.

Course Requirements
Master's candidates must complete five graduate-level courses in biomathematics, three of which must be chosen from Biomathematics 201, 202, 203, and 204. If any of the five courses were completed as an undergraduate, students may petition the department to count them in fulfillment of this requirement; however, in accord with Academic Senate regulations, they cannot be applied toward the minimum requirements stated below for the master's degree.

Master's candidates must complete the University minimum requirement of nine (36 units) of graduate and upper division courses taken in graduate standing, five (20 units) of which must be graduate courses. No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

Comprehensive Examination Plan
A written comprehensive examination administered by a committee consisting of at least three faculty members appointed by the chair, with approval of the advising committee chair, covers material presented in the coursework. This is usually given during the summer.

Thesis Plan
Generally, students are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advising committee, which must approve the thesis committee, as well as plans for the thesis.

Doctoral Degree
Admission
High academic achievement in one scientific or mathematical field is required for admission to the program leading to the Ph.D. degree in Biomathematics. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Application for Graduate Admission, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics.

Admission to the doctoral program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Major Fields or Subdisciplines
Students must complete the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to requests from students.

Course Requirements
The following courses are required: Biomathematics 201, 202, 203, 204, and eight units from 205, 206, M207B, 208A, 220, M230.

Applied Mathematics. Five graduate courses with a grade-point average of 3.6 or better from an approved list, with two substitutions possible if especially appropriate to the student's research field. The courses should be approved in advance by the graduate advising committee. Consent may be given by the advising committee to count prior graduate courses for full or partial completion of this requirement. Pluses attached to a letter grade add .3 and minuses subtract .3. Students who take more than the minimum five courses are allowed to average their best five grades to meet the standard. At the discretion of the departmental advising committee, the grade-point standard can be relaxed if there is evidence of superior attainment in all other aspects of a student's training.

Biology. No formal requirement beyond preparation for the field of major biological emphasis.

Independent Research. Students are encouraged to take at least four units of Biomathematics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As students progress, there is an increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:

Mathematics. By individual study or coursework, students should have strength at the upper division level in linear algebra, differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

Statistics. Additional training in biostatistics is highly recommended.

Computer Methods. Students must be facile programmers and acquainted with numerical methods needed for their area of research. The numerical analysis sequence in the Department of Mathematics or supervised independent study is suggested.

Biology and Biological Chemistry. A broad background is expected, from molecular to organ-system levels. This probably is provided in requirements for the field of major biological emphasis; supplemental coursework is advised, if needed.

Written and Oral Qualifying Examinations
In the summer, the department offers a written comprehensive examination to test competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three. (The brochure, Policies for the Written Comprehensive Examinations for the Doctorate in Biomathematics, is available from the department.)

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in the field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by the advising committee.

If a medical school's basic sciences curriculum is approved by the advising committee, a student who has completed the first two years of that curriculum at a level of academic performance acceptable for continuation to clinical training and who has passed Part I of the National Board Examinations is deemed to have met the biological sciences requirements for the doctoral degree in biomathematics.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasib-
ility of the student’s proposed dissertation work. It also explores the strengths and integration of the student’s biomathematical, mathematical, and biological research knowledge in the intended area of research. Advancement to candidacy follows, after passing this examination.

**Biomathematics**

**Upper Division Courses**

106. Introduction to Cellular Modeling. (4) Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requisite: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Introduction to modeling cells and cell systems, including intracellular biochemical networks, applications to cancer research. How to develop one’s own computer models using IMSL mathematics subroutines. S/U or letter grading.

108. Introduction to Modeling in Neurobiology. (4) Lecture, four hours; computer laboratory, two hours. Preparation: some computer programming. Requisite: Mathematics 32A. Designed for upper division science majors and biomedical graduate students. Development of skills to formulate and program one’s own studies using IMSL mathematics subroutines. P/NP or letter grading.

110. Elements of Biomathematics. (4) Lecture, three hours; laboratory, three hours. Preparation: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology.

M153A-M153B. Regression Analysis (4-4). (Same as Biostatistics M153A-M153B and Statistics M120A-M120B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, 115B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. M153A. BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. M153B. Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

160. Introductory Biomathematics for Medical and Biological Research. (4) Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation.

170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters. (4) Lecture, four hours; discussion, 90 minutes. Intensive elementary statistics course emphasizing design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning.

170B. Statistical and Mathematical Modeling in Medical and Biological Research. (4) Lecture, four hours; discussion, 90 minutes. Design and extracellular potential distribution in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data.

172. Clinical Trials. (4) Lecture, three hours; discussion, two hours. Requisite: Biostatistics 100C or Statistics 100B. Topics include steps in bringing a possible drug to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of prognostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management. P/NP or letter grading.

190HA-190HB. Honors Research in Biomathematics. (2) Limited to juniors/seniors. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for a total of at least eight units. Thesis required.

199. Special Studies in Biomathematics. (2 to 8) Limited to juniors/seniors. Special studies in biomathematics, including either reading assignments or laboratory work or both, designed for proper training of students.

**Graduate Courses**

201. Deterministic Models in Biology. (4) Preparation: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models.

203. Stochastic Models in Biology. (4) (Formerly numbered 203J.) (Same as Human Genetics M203J.) Lecture, four hours; discussion, one hour. Preparation: knowledge of differential equations to level of course 201, some mathematical modeling, computer programming. In-depth mathematical modeling of problems in tissue and cell dynamics to level of research literature. Analytical and numerical techniques for solving partial differential equations. S/U or letter grading.

204. Biomedical Data Analysis. (4) Quantity and quality of observations have been greatly affected by present-day extensive use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research.

205. Electric Potential Problems in Membranes, Cells, and Tissues. (4) Preparation: knowledge of differential equations and electrostatics. Review of electrostatics; potential problems in rectangular, spherical, and cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and spherical cells and syncytiotrophic potential barriers for ions traversing a membrane pore.

M207A. Theoretical Genetic Modeling. (4) (Formerly numbered 207J.) (Same as Biostatistics M237A and Human Genetics M207A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 115B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

M207B. Applied Genetic Modeling. (4) (Same as Biostatistics M237B and Human Genetics M207B.) Lecture, two hours; laboratory, two hours. Preparation: coursework equivalent to Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

208A. Modeling in Neurobiology for Mathematicians. (4) Lecture, four hours; laboratory, two hours. Preparation: introductory ordinary partial differential equations, programming experience. Introduction to electrochemical bases for nerve function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

208B. Modeling in Neurobiology for Biologists. (4) Lecture, four hours; laboratory, two hours. Preparation: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one’s own simple programs that use IMSL subroutine libraries. Survey of current leading research areas. S/U or letter grading.

211. Tissue and Cell Dynamics. (4) Lecture, three hours; discussion, one hour. Preparation: knowledge of differential equations to level of course 201, some mathematical modeling, computer programming. In-depth mathematical modeling of problems in tissue and cell dynamics to level of research literature. Analytical and numerical techniques for solving partial differential equations. S/U or letter grading.

M230. Computed Tomography: Theory and Applications. (4) (Same as Biomedical Physics M230.) Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

M231. Statistical Methods for Categorical Data. (4) (Same as Biostatistics M210.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 100B or 110B, Statistics 100B. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

M232. Statistical Analysis of Incomplete Data. (4) (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Requisite: Statistics 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Applied Bayesian Inference. (4) (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: Biostatistics 115 or Statistics 100C, 200A. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

M281. Survival Analysis. (4) (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 110B, Statistics 100B. Statistical methods for analysis of survival data. S/U or letter grading.

M282. Analysis of Repeated Measures Designs. (4) (Same as Biostatistics M236.) Lecture, three hours; discussion, one hour. Requisites: Biostatistics 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

596. Directed Individual Study or Research in Biostatistics. (2 to 12) Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change.

597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Letter grading.

## Biomedical Engineering

*John D. Mackenzie, Ph.D., Interim Chair*

### Professors

Arthur P. Arnold, Ph.D. (Neurobiology, Physiological Science)

Elliott Brown, Ph.D. (Electrical Engineering)

Marie Françoise Chesneau, M.D., Ph.D. (Neurology)

Yoram Cohen, Ph.D. (Chemical Engineering)

Jean B. deKernion, M.D. (Urology)

Russell L. Demer, M.D., Ph.D. (Ophthalmology, Neurology)

Vijay K. Dhir, Ph.D. (Mechanical and Aerospace Engineering)

Joseph J. DiStefano III, Ph.D. (Computer Science, Medicine)

Bruce H. Doebbin, M.D. (Neurology)

Bruce S. Dunn, Ph.D. (Materials Science and Engineering)

V. Reggie Edgerton, Ph.D. (Physiological Science)

Jack L. Feldman, Ph.D. (Physiological Science, Neurobiology)

Harold R. Finerman, Ph.D. (Electrical Engineering)

Gerald A.M. Finerman, M.D. (Orthopaedic Surgery)

C. Fred Fox, Ph.D. (Microbiology and Molecular Genetics)

G.R. Galliatiel, Ph.D. (Psychology)

Bruce R. Gerratt, Ph.D. (Head and Neck Surgery)

Robert P. Gunsalus, Ph.D. (Microbiology and Molecular Genetics)

Vijay Gupta, Ph.D. (Mechanical and Aerospace Engineering)

Marvin Horvath, M.D. (Plastic Surgery)

Chih-Ming Ho, Ph.D. (Mechanical and Aerospace Engineering)

Edward J. Hoffman, Ph.D. (Molecular and Medical Pharmacology, Radiological Sciences)

Henry S. Huang, D.Sc. (Molecular and Medical Pharmacology, Biomathematics)

Stephen E. Jacobsen, Ph.D. (Electrical Engineering)

Jiann-Wen Ju, Ph.D. (Civil and Environmental Engineering)

J. Michael Kabo, Ph.D. (Orthopaedic Surgery)

William J. Kaiser, Ph.D. (Electrical Engineering)

Patricia A. Keating, Ph.D. (Linguistics)

J. John Kim, Ph.D. (Mechanical and Aerospace Engineering)

Jesse F. Kraus, Ph.D., M.P.H. (Epidemiology)

Elliott M. Landaw, M.D., Ph.D. (Biostatistics)

James C. Liao, Ph.D. (Chemical Engineering)

Jia-Ming Liu, Ph.D. (Electrical Engineering)

John D. Mackenzie, Ph.D. (Materials Science and Engineering)

Ajit K. Mal, Ph.D. (Mechanical and Aerospace Engineering)

Keith Markoff, Ph.D. (Orthopaedic Surgery)

Istvan Mody, Ph.D. (Neurology, Physiology)

Sherie L. Morrison, Ph.D. (Microbiology and Molecular Genetics)

Peter M. Narins, Ph.D. (Physiological Science)

Yahya Rahmat-Samii, Ph.D. (Electrical Engineering)

Wan-i Roychowdhury, Ph.D. (Electrical Engineering)

James G. Tidball, Ph.D. (Physiological Science)

Allan J. Tobin, Ph.D. (Neurology, Physiological Science)

John D. Villasenor, Ph.D. (Electrical Engineering)

Jenn-Ming Yang, Ph.D. (Materials Science and Engineering)

Kung Yao, Ph.D. (Electrical Engineering)

### Professors Emeriti

Thelma Estrin, Ph.D. (Computer Science)

Walter J. Karpelus, Ph.D. (Computer Science)

Allen Klinger, Ph.D. (Computer Science)

Jacques J. Vidal, Ph.D. (Computer Science)

### Associate Professors

Abeer A. Alwan, Ph.D. (Electrical Engineering)

Gregory Carman, Ph.D. (Mechanical and Aerospace Engineering)

Gang Chen, Ph.D. (Mechanical and Aerospace Engineering)

Simon R. Cherry, Ph.D. (Molecular and Medical Pharmacology)

Linda Demer, M.D., Ph.D. (Cardiology, Physiology)

Robin L. Garrell, Ph.D. (Chemistry and Biochemistry)

Bahram Jalali, Ph.D. (Electrical Engineering)

Chang-Jin (C.J.) Kim, Ph.D. (Mechanical and Aerospace Engineering)

Nir Kossovsky, M.D. (Pathology and Laboratory Medicine)

Andrew F. Leuchter, M.D. (Psychiatry and Biobehavioral Sciences)

Harold G. Morbouque, Ph.D. (Chemical Engineering)

Helen R. Na, Ph.D. (Electrical Engineering)

Ichiro Nishimura, D.D.S., D.M.Sc., D.M.D. (Dentistry)

### Assistant Professors

Marvin Bergsneider, M.D. (Neurosurgery)

Susan Y. Bookheimer, Ph.D. (Psychiatry and Biobehavioral Sciences)

Ian A. Cook, M.D. (Psychiatry and Biobehavioral Sciences)

Michael W. Deem, Ph.D. (Chemical Engineering)

Alan Garfinkel, Ph.D. (Physiological Science, Cardiology)

George Huang, D.Sc., D.D.S. (Dentistry)

Jack Judy, Ph.D. (Electrical Engineering)

David C. Myles, Ph.D. (Chemistry and Biochemistry)

Valery I. Nenov, Ph.D. (Neurosurgery)

Sheila Niremberg, Ph.D. (Neurology)

Daniel J. Valenti, Ph.D. (Radiological Sciences)

### Adjunct Professors

Nassar A. Farahbakhsh, Ph.D. (Physiological Science)
All applicants need to submit a statement of purpose relating their reasons for seeking admission, in addition to three letters of recommendation detailing their academic preparation, industrial or research laboratory training, and potential for future professional development. To apply for the M.S. degree, applicants should have a B.S. degree in engineering, life sciences, or physical science, with a grade-point average (GPA) of not less than 3.0 in the last two years of undergraduate study.

Meeting the above minimum requirements does not guarantee admission; the actual standard for admission is set by the current pool of applicants and is generally much higher.

Application forms, including a departmental supplement to the application, may be obtained at http://www.biomedengr.ucla.edu, or by writing to the Biomedical Engineering IDP, School of Engineering and Applied Science, UCLA, 7523 Boelter Hall, Box 951600, Los Angeles, CA 90095-1601, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study
Bioacoustics, speech, and hearing; biochemical engineering; biocybernetics; biomaterials and tissue engineering; biomechanics; biomedical instrumentation; biomedical signal and image processing.

Course Requirements
At least nine courses are required, of which at least five must be graduate courses. For the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. Lower division courses may not be applied toward a graduate degree.

Comprehensive Examination Plan
The comprehensive examination plan requires a passing grade on the first part (four hours) of the written comprehensive preliminary examination for the Ph.D.

Thesis Plan
A research thesis, completed through enrollment in eight units of Biomedical Engineering 598, is to be written on a biomedical engineering topic approved by the field committee, which consists of the student’s thesis supervisor and two other UCLA faculty; the thesis supervisor and at least one other member are selected from a current list of designated members for the interdepartmental program that is approved by the Graduate Division.
Written and Oral Qualifying Examinations

The written qualifying examination is known as the Ph.D. preliminary examination in the School of Engineering and Applied Science. After mastering the body of knowledge designed in the major field, students take a preliminary examination in the major field. The examination typically consists of both a written part and an oral part, and students pass the entire examination and not in parts. The oral part does not exceed two hours, and in some major fields need not be required at all. Students who fail the examination may repeat it once only, subject to the approval of the major field committee. This major field examination, together with the three courses in each of the two minor fields, should be completed within six quarters after admission to the Ph.D. program.

After passing the written qualifying examination described above, students are ready to take the University Oral Qualifying Examination, which should occur within three quarters after completing the written examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student’s preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are selected from a current list of designated “inside” members for the interdepartmental program that is approved by the Graduate Division. The “outside” member must be a UCLA faculty member who does not appear on the “inside” list.

Biomedical Engineering

Upper Division Courses

101. Introduction to Biomedical Engineering (4) Lecture, three hours; outside study, nine hours. Designed for physical sciences, life sciences, and engineering students. Introduction to wide scope of biomedical engineering via treatment of selected important individual topics by small team of specialists. Letter grading.

M102. Human Anatomy for Biomedical Engineers. (4) (Same as Physiological Science M102.) Lecture, three hours; laboratory, two hours. Not open for credit to physiological science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structure and organization of human body and detailed examination of specific systems pertinent to biomedical research. Letter grading.

M103. Human Physiology for Biomedical Engineers. (4) (Same as Physiological Science M103.) Lecture, three hours; laboratory, two hours. Not open for credit to physiological science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Letter grading.

Jeffrey H. Kleck, Ph.D.
Min-Yuan Leu, Ph.D.
Hazel L. Lewis, Ph.D.
James C. Liu, Ph.D.
David Metcalf, Ph.D.
Craig Morikawa, Ph.D.
James A. Rosemark, Ph.D.

Scope and Objectives

The Biomedical Physics M.S./Ph.D. Program is an AAPM-accredited interdepartmental graduate program supported by the Depart-
requirements of Molecular and Medical Pharmacology, Radiation Oncology, and Radiological Sciences. It offers training in four specialties: biophysics, medical imaging, medical physics, and radiation biology. Specialized facilities for training and research are available in the departmental clinical laboratories, the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, the Image Processing Laboratory, and a number of associated hospitals. Highly specialized equipment includes two biomedical cyclotrons, the radiation oncology cyclotron, the picture archiving and communication system (PACS), four positron emission tomography (PET) scanners, the stereotactic gamma irradiator, and many VAX and SUN computers with image processor systems. In addition, clinical equipment is available to supervised students for practicums and research purposes. The program prepares students for careers as independent researchers or professional medical physicists, and graduates are qualified to work in a clinical environment and to pursue board certification as medical physicists or to apply for a clinical medical physics residency.

Graduates in biomedical physics can expect to engage in any combination of research, teaching, clinical service, and consultation. Biomedical physicists are usually employed in hospitals frequently associated with a medical school, where they are members of the academic staff. They are also in demand in high-technology private industry engaging in research and development of diagnostic equipment. In government agencies, biomedical physicists are involved in the formulation and enforcement of regulations applied to the use of radiation in health care delivery.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Biomedical Physics Program offers the Master of Science (M.S.) degree in Biomedical Physics.

**Admission**

In addition to the University’s minimum requirements, applicants to the M.S. program are required to hold a bachelor’s degree with a major in a science or engineering program. Also, it is expected that applicants have completed (1) one year of college physics (calculus-based); (2) two years of college mathematics through differential equations, including calculus equivalent to Mathematics 31A, 31B, 32A, 32B, 33A, 33B; (3) one year of college chemistry; and (4) at least one course in computer science. Deficiencies in the above courses must be removed prior to advancement to candidacy.

In addition, applicants to the specialty fields of biophysics, medical imaging, and therapeutic medical physics must have a strong foundation in basic physics or a degree in engineering, mathematics, or other sciences with physics training equivalent to a minor in physics (upper division courses in electricity and magnetism, quantum mechanics, atomic structure, statistical mechanics, and mechanics). Applicants may be accepted with some deficiencies in entrance requirements which must be removed prior to advancement to candidacy.

Scores on the Graduate Record Examination (GRE) General Test, taken in the last three years, should be sent to the department. Three letters of recommendation are required. If applicants already have a master’s degree, one of the letters should be from their thesis advisor.

A brochure describing the program in biomedical physics may be obtained from the department.

**Areas of Study**

Therapeutic medical physics; medical imaging; biophysics; and radiation biology and experimental radiation therapy.

**Course Requirements**

For students with a medical physics background or a career objective other than a practicing medical physicist, a more sharply focused curriculum may be advised.

Biomedical Physics 596 and 598 may be applied toward the degree. Eight units of 500-series courses may be applied toward the total course requirements, four units toward the minimum graduate course requirement.

**Comprehensive Examination Plan**

Students may pass a comprehensive examination (Plan II) that consists of the materials from the common core courses. The examination is offered at least once a year, and students have two chances to pass the examination.

Students who plan to continue on the Ph.D. study track may request approval from their faculty adviser for the Ph.D. written specialty examination to be used to satisfy the requirement for the M.S. comprehensive examination (Plan II). Students could then receive the M.S. in addition to the Ph.D.

**Thesis Plan**

Students satisfy the requirement by writing a thesis (Plan I) based on a research project. After students complete the course requirements, they must choose a faculty member to guide their research and chair the thesis committee.

**Doctoral Degree**

**Admission**

Admission to the program leading to the Ph.D. degree in Biomedical Physics requires a bachelor’s degree with a major in a science or engineering program and (1) selecting a specialty, (2) passing either all of the core courses with grades of B or better or the M.S. comprehensive examination, and (3) passing a written specialty qualifying examination which may be repeated once. Biomedical Physics 221 is required of all students. Completion of a master’s program is not required.

**Major Fields or Subdisciplines**

Therapeutic medical physics; medical imaging; biophysics; and radiation biology and experimental radiation therapy.

**Course Requirements**

After selecting a specialty, students acquire sufficient knowledge by taking courses recommended for the specialty; these include the common core courses. The courses form a basis for the Ph.D. written specialty examination. Students must pass all core courses with grades of B (a B– or lower is not acceptable) or better or pass the entire M.S. comprehensive examination.

Transfer students can either take the core courses or pass an M.S. comprehensive examination.

The following specialties are offered:

**Biophysics**. Minimum course requirements of 60 hours. The biophysics specialty includes the core courses within the department, graduate courses from physics, engineering, chemistry/biochemistry, biological chemistry, pharmacology, and biometrics, and research study and seminar courses.

**Medical Imaging**. Minimum course requirements of 60 hours. The courses for the medical imaging specialty include the nine common core courses (Biomedical Physics 200A, 204, 205, 216, 217, 218, 260A-260B-260C) and the following nine courses, along with any special direction by the graduate adviser: Biomedical Physics 200B, 202A-202B-202C, 203, 208A, 208B, 209, 221.

For students with a medical physics background or a career objective other than a practicing medical physicist, a more sharply focused curriculum may be advised.

Biomedical Physics 596 and 598 may be applied toward the degree. Eight units of 500-series courses may be applied toward the total course requirements, four units toward the minimum graduate course requirement.

**Comprehensive Examination Plan**

Students may pass a comprehensive examination (Plan II) that consists of the materials from the common core courses. The examination is offered at least once a year, and students have two chances to pass the examination.

Students who plan to continue on the Ph.D. study track may request approval from their faculty adviser for the Ph.D. written specialty examination to be used to satisfy the requirement for the M.S. comprehensive examination (Plan II). Students could then receive the M.S. in addition to the Ph.D.

**Thesis Plan**

Students satisfy the requirement by writing a thesis (Plan I) based on a research project. After students complete the course requirements, they must choose a faculty member to guide their research and chair the thesis committee.
Therapeutic Medical Physics. Students must demonstrate competence in the subject matter covered in the core courses. In addition, students are required to take the three clinical rotations (Biomedical Physics 202A-202B-202C), 201, 203, 208B, 210, M230, and some advanced mathematics courses. Additional coursework is recommended by faculty in accordance with students' specific needs.

Radiation Biology and Experimental Radiation Therapy. Students must demonstrate competence in the subject matter covered in the core courses. Because of the breadth of radiation biology and experimental radiation oncology, it is not feasible to design a single curriculum for all students. Instead, additional coursework is recommended by faculty in accordance with specific needs.

Written and Oral Qualifying Examinations

Each specialty structures its own examination, which is written and graded by more than two faculty members.

Each specialty can request that its own students pass a major topic(s) from other specialties. Students must demonstrate competence in the common core courses and pass the Ph.D. written specialty examination before they can proceed to the Ph.D. This demonstration of competence must be reviewed and approved by faculty-at-large. Students are permitted two opportunities to pass the Ph.D. written specialty examination which is given at least once a year.

Biophysics. A written specialty examination is given on areas covered by courses students have taken, with emphasis on questions based on course topics but directed at determining the personal ability of students for scholarship rather than factual knowledge per se.

Medical Imaging. A written specialist examination is directed at determining the personal ability of students for scholarship rather than factual knowledge per se. While the material covered may be related to courses taken, it need not be limited to material covered in the courses. The questions are based on both knowledge of the topics and the ability to think creatively in medical imaging.

Therapeutic Medical Physics. Students must demonstrate knowledge both of the material presented in the coursework and of current research in the field by passing a written specialty examination.

Radiation Biology and Experimental Radiation Therapy. Students must demonstrate knowledge both of the material presented in the basic radiation biology course and of current research in the field by passing a written specialty examination.

Oral Qualifying Examination. The written specialty examination for admission to the Ph.D. program should be taken by the end of the sixth quarter in residence. Once this examination is passed and students have chosen a research area for the dissertation, they should, within a reasonable time frame agreed on with the dissertation adviser, form a doctoral committee and schedule the University Oral Qualifying Examination. This examination is based on a proposed dissertation topic. Passing the examination is a requirement for continuance in the doctoral program. The format of the oral qualifying examination is consistent with University requirements. A final oral dissertation defense is required.

Biomedical Physics

Lower Division Course

88. Lower Division Seminar: Special Topics in Biomedical Physics. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in biomedical physics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

CM133, Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

199. Directed Individual Studies or Research for Undergraduate Students. (2 to 4) Preparation: submission of written proposal outlining course of study or research. Directed individual studies in biomedical physics for undergraduate students to be structured by faculty members and student at time of initial enrollment.

Graduate Courses

200A. Physics and Chemistry of Nuclear Medicine. (4) Lecture, three hours; discussion, one hour. Nuclear structure, statistics of radioactive decay, nuclear radiations and their interaction with matter, nuclear decay processes, nuclear reactions, and compartment models. Physical and chemical properties of radioactive preparations used in nuclear medicine. Basic principles of nuclear medicine imaging, SPECT, and PET.

200B. Nuclear Medicine Instrumentation. (4) Lecture, one hour; laboratory, three hours. Requirements: course 200A. Introduction to nuclear medicine instrumentation, including well ionization chambers, probe and well scintillation detectors, scintillation cameras, and single photon and positron emission computed tomography.

201. Medical Radiation Accelerator Design. (4) Lecture, three hours. Requirements: course 216. Overview of physical principles involved in design of current particle accelerators (electron, proton, heavy particle) and analysis of characteristics of current accelerators and facility design.

202A-202B-202C. Applications of Medical Physics to Clinical Problems. (4-4-4) Selected studies in clinical use of radioisotopes:

202A. Nuclear Medicine. Requirements: course 200B.

204. Introductory Radiation Biology. (4) Effect of ionizing radiation on chemical and biological systems. 205. Physics of Diagnostic Radiology. (4) Lecture, three hours; discussion, one hour. Production of X rays, basic interactions between X rays and matter, X-ray system components, physics principles of medical radiography, radiographic image quality, fluoroscopy, image intensifiers, special procedures, X-ray protection. Laboratory experiments illustrate basic theory.

206. Advanced Instrumentation. (4) Lecture, three hours; discussion, one hour. Requirements: course 205. Introduction to recent advances in digital diagnostic imaging systems, with topics centered on instrumentation including digital subtraction angiography (DSA) methods of producing three-dimensional images.

206A. Medical Physics Laboratory: Medical Imaging. (4) Discussion, two hours; laboratory, four hours. Requirements: course 205. Hands-on experience performing acceptance testing and quality control checks of imaging equipment such as fluoroscopy, digital subtraction angiography, mammography, ultrasound, magnetic resonance imaging, computed tomography, and computed radiography.

206B. Medical Physics Laboratory: Radiation Therapy. (4) Discussion, two hours; laboratory, four hours. Requirements: course 203. Hands-on experience calibrating treatment planning and radiation therapy equipment.

209. Digital Techniques in Radiological Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: one course in C or another computer language. Basic principles of digital technology used in radiological sciences. Concepts and experience necessary to undertake radiological research in a diverse computing environment. Discussion of relationship between computers and diagnostic equipment with regard to data acquisition, equipment interfacing, and data analysis. C language programming taught.

210. Principles of Medical Imaging. (4) Lecture, three hours; discussion, one hour. Requirements: course 209. Study of image representation, computational structures for imaging, linear systems theory, image enhancement and restoration, image compression, segmentation, and morphology. Special topics include visualization techniques, three-dimensional modeling, computer graphics, and neural net applications. Laboratory projects apply concepts developed in class.

211. Medical Ultrasound. (4) Lecture, 90 minutes; laboratory, two hours. Preparation: one calculus course. Production of real-time ultrasound images, transducer modeling and design, Doppler and color flow instrumentation, biohazards of ultrasound, ultrasound phantom design, and ultrasound tissue characterization techniques. Laboratory included.
212. Biochemical Basis of Positron Emission Tomography (PET). (4) Lecture, three hours; discussion, one hour. Introduction to biochemical processes and application of radioisotopes to study metabolism noninvasively by positron emission tomography (PET). Validation of kinetic models to derive quantitative information from PET. Introduction to clinical and experimental application of PET.

213. Quantitative Autoradiography. (4) Lecture, three hours; discussion, one hour. Application of quantitative autoradiography for estimating brain and heart functions. Topics include 2-deoxyglucose method for metabolic rate; idoantipyrine method for blood flow; amino acid method for protein synthesis; quantitative receptor autoradiography; neuroanatomy and neurophysiology of autoradiogram and PET scan interpretation.

214. Medical Image Processing Systems. (4) Lecture, three hours; discussion, one hour, Requisites: courses 209, 210. Advanced image processing and image analysis techniques applied to medical images. Discussion of approaches to computer-aided diagnosis and image quantitation, as well as application of pattern classification techniques (neural networks and discriminant analysis). Examination of problems from several imaging modalities (CT, MR, CR, and mammography).

216. Fundamentals of Dosimetry. (4) Lecture, three hours; laboratory, one hour, Review of fundamental interactions of radiation and matter and introduction to fundamentals of radiation dosimetry. Overview of dosimetry instrumentation as well as radiation sources.

217. Statistics and Data Analysis in Biomedical Physics. (4) Lecture, three hours; laboratory, two hours. Requisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to computer-based statistical concepts, data analysis, and experimental design within biomedical physics research. Standard statistical packages and various statistical computing algorithms on relevant data sets within the radiological sciences.

218. Radiologic Functional Anatomy. (4) Lecture, three hours; discussion, two hours. Introduction to human anatomy as visualized through radiologic and nuclear medicine imaging modalities such as X-ray, CT, MRI, sonogram, PET, and SPECT.

219. Principles and Applications of Magnetic Resonance Imaging. (4) Lecture, three hours; laboratory, one hour. Basic principles of magnetic resonance (MR) imaging physics, and contrast mechanisms. Emphasis on hardware, Fourier transform imaging methods, structure of pulse sequences, various scanning parameters and reduction of artifacts. Introduction to MR spectroscopy, MR angiography, and fast imaging techniques.

220. Advanced Magnetic Resonance Imaging. (4) (Same as Neuroscience M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical and physiological aspects of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

229. Seminar: Medical Imaging. (1) Continuous registration required of students in medical imaging specialty. Topics of current interest in medical imaging, with lecturers from the department, other universities, and private industry.

M225. Functional Neuroimaging: Techniques and Applications. (4) (Same as Psychiatry M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

596. Research in Biomedical Physics. (4 to 12) Directed individual study or research. Only one 596 course may be applied toward M.S. degree requirements. May be repeated for credit.

597. Preparation for Ph.D. Qualifying Examinations. (4) May not be applied toward M.S. degree requirements. May be repeated. S/U grading.

598. Research for and Preparation of M.S. Thesis. (4 to 12) Two courses may be applied toward M.S. degree requirements. May be repeated. S/U grading.

William G. Cumberland, Ph.D., Chair

Professors
Abdelmonen A. Atifi, Ph.D., Dean
William G. Cumberland, Ph.D.
Dorota M. Dabrowska, Ph.D.
Robert M. Elashoff, Ph.D.
Jeremy M.G. Taylor, Ph.D., in Residence

Professors Emeriti
Potter C. Chang, Ph.D.
Virginia A. Clark, Ph.D.
Winfred J. Dixon, Ph.D.
Olive Jean Dunn, Ph.D.
Donald Guthrie, Ph.D., in Residence
Robert I. Jennrich, Ph.D.
Raymond J. Jessen, Ph.D.

Associate Professors
Virginia F. Flack, Ph.D.
Nathaniel Schenker, Ph.D.
Robert E. Weiss, Ph.D.
Weng Kee Wong, Ph.D.

Assistant Professors
Thomas R. Belin, Ph.D., in Residence
Gang Li, Ph.D.
Janet Sinsemiehr, Ph.D., in Residence

Lecturers
Jeffrey Gornbein, Dr.PH.
Jean L. Mickey, Ph.D., Emerita
Adjunct Professor
Frederick J. Dorey, Ph.D.
James W. Sayre, Dr.P.H.

Adjunct and Visiting Associate Professors
Nancy G. Berman, Ph.D., Adjunct
Karim F. Hirji, D.Sc., Adjunct
Martin L. Lee, Ph.D., Visiting
David W. Gjertson, Ph.D., Adjunct

Adjunct Assistant Professors
Cheryl L. Faucett, Ph.D.
Stella Grosser, Ph.D.

Scope and Objectives
In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics (see Public Health Schoolwide Programs). All students receive a balanced education, blending theory and practice.

A degree in biostatistics prepares students for work in a wide variety of challenging positions in government, industry, and education. Graduates have found careers involving teaching, research, and consulting in such fields as medicine, public health, life sciences, survey research, and computer science. There has always been a strong demand for well-trained biostatisticians; graduates have had little difficulty finding employment well suited to their particular interests.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
The Department of Biostatistics offers the Master of Science (M.S.) degree in Biostatistics. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission
Applicants to the M.S. program must have completed a bachelor’s degree. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Undergraduate preparation for the program should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus), or equivalent.

Additional admission requirements for the M.S. in Biostatistics are the same as for the M.P.H. See the M.P.H. admission section under Public Health Schoolwide Programs.

Course Requirements
The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses (200 and 500 series). The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

Unless previously taken, the following courses must be included in the degree program: Biostatistics 110A, 110B, 115, 200A, 200B-200C, M215, 240, 402A, 402B, 596; Statistics M100A, 100B; and 12 units of special topics courses from Biostatistics M210 through M237B (except M215), M250A through 285, 403A, or 404 through 419 (except 406). At least four of the 12 units must be in the 200 series.

For exceptional students who have had a year course in probability and theoretical statistics plus one or more courses in applied statistics, it may be possible to complete the degree in one year.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with the adviser’s consent and approved by the chair.

A written report and written comprehensive examination covering the above course material must be passed. A failed examination can be repeated only once.

Comprehensive Examination Plan
The written comprehensive examination which covers the content of the required courses must be passed. No more than one reexamination after failure is allowed. Students who do not take the reexamination at the time specified by the department forfeit their right to reexamination.

Thesis Plan
None.

Doctoral Degree
Admission
Qualifications for admission to the program leading to the Ph.D. degree in Biostatistics are those currently specified by the Graduate Division.

Consult the department for further information.

Major Fields or Subdisciplines
Consult the graduate adviser.

Course Requirements
Students must complete the following courses, unless previously taken: Biostatistics M250A-M250B, 251, 255; Statistics 200A-200B; and at least three special topics courses from the Biostatistics 230, 270, and 280 series. Some substitution is accepted from courses in statistics and biomathematics. For students who have not completed a master’s degree or equivalent in mathematics, computer science, or a field of application in biostatistics, the following additional courses must be included in the degree program, unless previously taken: Biostatistics 200A, 200B-200C, M215. In addition, the student’s full program of study must be approved by the department and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field such as AIDS, biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. Students are required to participate in Biostatistics 402B (consulting laboratory) for one quarter each year and in course 245 (the advanced seminar) every quarter.

After advancement to candidacy, students are no longer required to enroll in Biostatistics 402B.

Written and Oral Qualifying Examinations
Before advancement to candidacy, students must pass two written examinations and the University Oral Qualifying Examination. A failed examination may only be repeated once.

The written mathematical statistics examination is taken in the spring of the first year in residence; if failed, it must be retaken the following Spring Quarter. The written qualifying examination is taken in Fall Quarter of the second year.

The University Oral Qualifying Examination is taken before advancement to candidacy and after successful completion of the written examinations. Administered by the doctoral committee, it is usually a defense of the dissertation proposal.

The timing of reexaminations is specified by the department in the case of written examinations or by the student’s committee in the case of the oral examination. Students who do not take the reexaminations at the specified time forfeit their right to reexamination.
Biostatistics

Upper Division Courses

100A. Introduction to Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: one biological or physical sciences course. Designed for juniors/seniors. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size. P/NP or letter grading.

100B. Introduction to Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: course 100A. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, regression and correlation analysis. Letter grading.

110A. Basic Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: Mathematics 31B. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimates, statistical inference. P/NP or letter grading.

110B. Basic Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: course 110A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression; topics related to analysis of variance and experimental designs. P/NP or letter grading.

115. Topics in Estimation. (4) Lecture, three hours; discussion, one hour. Preparation: Statistics M100A, M100B. Small and large sample properties of common estimation techniques arising in biostatistical application. Letter grading.

M153A-M153B. Regression Analysis (4-4-4). (Same as Biomathematics M153A-M153B and Statistics M120A-M120B.) Lecture, three hours; discussion, one hour. Preparation: course 100A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. M153A, BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building.

M153B. Analysis of variance and covariance, nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression. 199. Special Studies. (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term. P/NP or letter grading.

Graduate Courses

200A. Biostatistics. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: courses 100A and 100B, or 110A and 110B. Topics in methodology of applied statistics, such as design, analysis of variance, regression. S/U or letter grading.

200B-200C. Biostatistics (4-4). Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: courses M153A, 200A. P/NP or letter grading. M200B. Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis and clinical trials. M200C. Measures of association and analysis of categorical data, theory of generalized linear models.

201. Topics in Applied Regression. (4) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: course 200A. Further studies in multiple linear regression, including model assessment principle components and errors in variables. Additional topics include estimation hypothesis testing in K4 matching for propensity score and introduction to logistic regression and its usefulness in propensity methodology. Letter grading.

M206A-M206B-M206C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2) (Same as Psychology M206A-M206B-M206C.) Seminar, 90 minutes. Preparation: course 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

M209. Statistical Modeling in Epidemiology. (4) (Same as Epidemiology M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: Epidemiology 204 or M211. Principles of modeling, including meaning of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

M210. Statistical Methods for Categorical Data. (4) (Same as Biomathematics M210.) Lecture, three hours; discussion, one hour. Preparation: course 100B or 110B. Statistical theories for analysis of categorical data; discussion and illustration of their applications and limitations. S/U or letter grading.

M211. Statistics for Epidemiology. (4) (Same as Epidemiology M211.) Lecture, four hours. Preparation: two terms of statistics (such as courses 100A, 100B). Preparation: Epidemiology 201A-201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in Epidemiology 201A-201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

212. Distribution Free Methods. (4) Lecture, three hours; discussion, one hour. Preparation: course 100B or 110B. Statistical inference and application of distribution free methods in biostatistics. S/U or letter grading.

213. Statistical Simulation Techniques. (4) Lecture, three hours; discussion, one hour. Preparation: course 110B, Statistics 100B. Techniques for simulation of categorical data; computer implementation of procedures. S/U or letter grading.

M220. Experimental Statistics. (4) (Same as Physical Science CM220.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. S/U or letter grading.

231. Simultaneous Statistical Inference. (4) Lecture, three hours; discussion, one hour. Preparation: Statistics courses 100B. Methods and theory of simultaneous statistical inference. Letter grading.

M232. Statistical Analysis of Incomplete Data. (4) (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Preparation: Statistics courses 100A, 100B. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical inference. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Applied Bayesian Inference. (4) (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour; laboratory, one hour. Preparation: courses 115 or Statistics 100C, 200A. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference; Bayes from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

M236. Analysis of Repeated Measures Designs. (4) (Same as Biomathematics M236.) Lecture, three hours; discussion, one hour. Preparation: courses 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

M237A. Theoretical Genetic Modeling. (4) (Same as Biomathematics M237A and Human Genetics M237A.) Lecture, three hours; discussion, one hour. Preparation: coursework equivalent to Mathematics 115A, 115B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.
Business and Administration
College of Letters and Science

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 825-3382

Faculty Advisory Committee
Joel D. Aberbach, Ph.D. (Political Science)
Michael R. Darby, Ph.D. (Management)
Harold Demsetz, Ph.D. (Economics), Emeritus
Benjamin Klein, Ph.D. (Economics), Chair
Mary A. Weager (History)
Lynne Goodman Zucker, Ph.D. (Sociology)

Scope and Objectives
The Business and Administration specialization is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science or the School of the Arts and Architecture, as well as a sequence of courses.

For example, students interested in international business might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might add this program to a social sciences major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may not be taken with any economics major.)

Completion of this program in addition to a Letters and Science or Arts and Architecture major gives students the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

Undergraduate Study

Business and Administration Specialization

Note: Admission to the Business and Administration specialization is suspended effective December 30, 1999. Students applying from July 1, 1999 through December 30, 1999 must have completed Economics 1, 2, and Management 1A-1B with grades of C—or better by December 30, 1999.

A minimum grade of C—is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. Students may satisfy one of the field studies course requirements by completing an independent studies course (199), taken in an appropriate department with prior consent of the program faculty adviser. Students also are required to seek guidance from a field studies coordinator in choosing and researching their topic.

To enter the specialization, students must file a petition with the College Counseling Service in the College of Letters and Science or the Student Services Office in the School of the Arts and Architecture. Students who do not complete the program prior to graduation must petition out of the program to be eligible to graduate. (Such petitions are automatically granted; there is no penalty for not completing the program.) All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units. A statement of completion is noted on the transcript and diploma when students have successfully completed the requirements for this specialization and for graduation.

For further information and help in assessing the appropriateness of this program and how it relates to career/education goals, contact the College Counseling Service in the College of Letters and Science.

Core Courses

Required: Economics 1 and 2; Management 1A-1B; one statistics course; one mathematics course (except Mathematics 1, 38A, 38B, 104); two courses from English 4, English Composition 100, 110W, 129A through 129D, 131A through 131D, 132A through 132D, 136A, 136B, 136C (136A and 136B are in Progress courses; credit is given only on completion of both courses).

Analytical Skills

Required: Three courses from one of the following areas: (1) quantitative methods and formal reasoning: Anthropology 180, 186, Computer Science 141, Economics 147A, 147B, Geography 171, Mathematics 61, 113, 164, 167, M170A, 170B, Philosophy 9, 31, 32, Political Science 102, Program in Computing 10A, 10B, 10C, Psychology 142H, 144, 150, 151, Sociology 104, 112, 113, Statistics M100A, 100B, 110A, 110B, (2) administration: Political Science M105, 142C, 143A, 143B, 145D, 146B, 146C, 146D, 167B.

Field Studies

Required: Any three courses listed below, preferably from within one of the 10 fields (courses marked with an asterisk may not be applied toward this area if taken as part of the core):

(1) Communications: Communication Studies 100, 101, Sociology CM124A, CM124B, 135
(2) Urban and Regional Development Studies: Geography 148, M149, 150, 155, 157
(3) Applied Psychology: Linguistics 1 or 20, 10, Psychology 110, 111, 120, 121, 136A, 137A, 187A
(4) Economy and Society: Anthropology 150, 167, History 149A, 149B, Political Science M141D, 142B, 143A, 143B, Psychology 175, Sociology 158, 168, 173
(5) Economic Systems: Economics 110, 180, 190, Political Science 124, 129, 130, Sociology 173
(7) Accounting: Management 120A, 120B, 122, 123, 124, 127A, 128
(8) Artificial Intelligence: Economics 142, 148, Mathematics 142, 149, 172A, 172B
(10) Labor Studies: History 155A, 155B, Political Science 142C, Psychology M137E, Sociology 171
Assistant Professors
Eric Avila, Ph.D.
Alicia Gaspar de Alba, Ph.D.
María Cristina Pons, Ph.D.

Lecturers
Rafael Alarcón, Ph.D.
Max Benavidez, B.A.
Adolfo Bermeo, Ph.D.
Amalia Cabezas, Ph.D.
Fernando Gapasin, Ph.D.

Scope and Objectives

The strength of the undergraduate major in Chicana and Chicano Studies is the cross-disciplinary approach to teaching and the critical skills approach to learning. Interdisciplinarity is the mainstay of the Chávez Center’s academic objectives, achieved through the strengths and expertise of a core faculty that represents the fields of art, cultural studies, history, Latin American literature, sociolinguistics, and urban planning, and an associated faculty from a variety of disciplines. The center’s location in Los Angeles, home to the largest community of Mexican origin in the nation as well as to several other Latino groups, places it in a unique position to draw from this large and diverse population — social experiences, historical realities, cultural practices, linguistic attributes, and literary and artistic productions.

The interdisciplinary program is an effective environment for teaching fundamental academic skills such as critical thinking and writing, as well as for exposing students to the wide range of theories, methodologies, technologies, and pedagogies that intersect the discipline. The major prepares students for graduate education in professional and academic fields and for a variety of positions that involve community and social service in the U.S. and abroad. To that end, the bilingual curriculum is learner-centered, writing-intensive, and academically rigorous.

The Chávez Center is committed to the practice of different forms of scholarship and pedagogy and to the promotion of critical thinking about such issues as gender, sexuality, social action, language, race, ethnicity, class, assimilation/acculturation paradigms, and indigenous traditions. The literary and visual arts often function as vehicles for social change and creative empowerment, and so they constitute one major focus of the center’s curriculum. The center, in its teaching, research, and service, aims to strike a balance among the social sciences, humanities, and the arts.

Undergraduate Study

Chicana and Chicano Studies B.A.

The B.A. program in Chicana and Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicana/Chicano experience. Viewed as developmental, the program subjects the Chicana/Chicano reality to critical investigation, including social, economic, educational, historical, and political analysis. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major

Required: Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

The Major

Required: A total of 15 upper division courses, including Chicana and Chicano Studies 101, nine courses from the approved list of Chicana and Chicano Studies courses (available in the program office each term), one term of field studies, and three related study courses and one advanced seminar from the approved list of courses or by petition to the program director or undergraduate counselor. Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Recommended: English Composition 110W; Information Studies 111C; the introductory course in two of the following: anthropology, economics, history, political science, sociology; one or more courses in Chicana/Chicano history, literature, feminism, social science.

Optional Multidisciplinary Senior Thesis

Chicana and Chicano Studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing an undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and writing of the thesis.

Course Limitations

No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the program director. No more than two CED courses may be applied toward the major concentration.

Chicana and Chicano Studies Specialization

The Chicana and Chicano Studies specialization complements study in a traditional field. Students participating in this specialization are required to complete both a departmental major and the Chicana and Chicano Studies specialization. Students must take Chicana and Chicano Studies 10A, 10B, 101, and four courses from the approved list of Chicana and Chicano Studies courses (available in the program office each term).

Chicana and Chicano Studies

Lower Division Courses

10A. Introduction to Chicano Life and Culture. (4)
Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano Studies majors. Introduction to central concepts and historical experiences which define Chicano culture, from exploring indigenous roots to examining current trends. Emphasis on diversity of the Chicano experience, gender as a central cultural variable, and particular socioeconomic conditions which have shaped cultural response.

10B. Chicanos in American Society. (4)
Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano Studies majors. Examination of conditions of Chicanos in the U.S., with particular attention to socioeconomic aspects of their experience. Additional emphasis on examination of role of women in both a family context and the workplace.

Upper Division Courses

Lecture, three hours. Enrollment priority to Chicana and Chicano Studies majors and students in the specialization. Examination of following theoretical concepts and practical concerns: self-definition, relationship between educational institutions and the Chicana/Chicano community, nature of critical Chicana/Chicano specific research, basic issues in Chicana/Chicano culture, and current problems facing the Chicano/Latino community.

M102. The Mexican American and the Schools. (4) (Same as Education M102.) Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

M103C. Origins and Evolution of Chicano Theater. (4) (Same as Theater M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).
M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4) (Same as Theater M103D and World Arts and Cultures M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4) (Same as Theater M103H and World Arts and Cultures M103H.) Requires: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, nonproletarian Chicano, comedia, and Chicano performance art.

M105A. Early Chicana/Chicano Literature. (4) (Formerly numbered M105.) (Same as English M105A.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Sebastian de Elcano, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

M105B. Recent Chicana/Chicano Literature. (4) (Formerly numbered M105B.) (Same as English M105B.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature since 1943, beginning with reevaluation of Chicano literature from 1943, and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

M108A. Music of Latin America: Mexico, Central America, and the Caribbean Isles. (4) (Same as Ethnomusicology M108A.) Lecture, four hours; discussion, one hour. Survey of traditional and contemporary musical culture.

M109. Chicana/Chicana Folklore. (4) Lecture, four hours. Examination of roots of Chicana/Chicana folklore in Mexican oral tradition in the mid-19th century and development of Chicana/Chicana folklore to the present day. P/NP or letter grading.

M110. Chicana Feminism. (4) (Same as Women’s Studies M110.) Lecture, three hours. Requisite: Women’s Studies 10. Examination of theories and practices of women who identify as “Chicana feminist.” Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicana community and the dominant society. Attention to Anglo-European and Third World women.

M114. Chicanos in Film/Video. (6) (Same as Film and Television M114.) Lectures; screenings, eight hours; discussion, one hour. Examination of representation of Chicano Americans and Chicanos in four Hollywood genres — silent “greaser” films, social problem films, the Western, and the gang films — which are major genres that account for films “about” or “with” Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or “signify” on these Hollywood genres, including Zoot Suit, The Ballad of Gregorio Cortez, and Born in East L.A. Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

M115. Musical Aesthetics in Los Angeles. (4) (Same as Ethnomusicology M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolises of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

M116. Chicano/Latino Music in the U.S. (4) (Same as Ethnomusicology M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples that have inhabited present geographical boundaries of the U.S.

M120. Immigration and the Chicano Community. (4) Lecture, three hours. Discussion on relationship between international immigration and development of Chicano/Latino community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants.

M121. Issues in Latina/Latino Poverty. (4) Lecture, three hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in the U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on the underclass.

M122. Planning Issues in Latina/Latino Communities. (4) Lecture, three hours. Exploration of socioeconomic, demographic, and political forces that shape low-income communities and analyses of planning intervention strategies. Emphasis on community and economic development and environmental equity.

M123. Applied Research Methods in Latino Communities. (4) Lecture, three hours. Through combination of lectures, key readings, and several experiments, introduction to several applied research methods in fields that are highly relevant and methodologically rigorous studies on poor or Latin communities, including important data that can be used for critical analysis and policy recommendations.

M125. U.S./Mexico Relations. (4) Lecture, three hours. Examination of complex dynamics in relationship between Mexico and the U.S., using a political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries.

M131. Barrio Popular Culture. (4) Lecture, three hours. Construction of a model by which to organize study of Chicano/Chicana popular culture by focusing on the barrio as a metaphor for community. Examination of beliefs, myths, and values of Chicano/Chicana culture and representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history.

M132. Border Consciousness. (4) Lecture, three hours. Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and the U.S. Special attention to border consciousness as site of conflict and resistance.

M133. Chicana Lesbian Literature. (4) (Formerly numbered M133.) (Same as Women’s Studies M133 and Women’s Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbianism, and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of familia in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicana studies.

M134. Exhibiting Cultures. (4) Lecture, three hours. Analysis, through a cultural studies perspective, of exhibitions of Chicana/Chicana and Latino/Latina art that have occupied space in mainstream museums across the U.S. since the mid-1980s. Examination of how these shows both serve and subvert a multicultural agenda in the art world and how political identities are packaged and produced in process of exhibition-making. Field trips to local museums.

M145A. Introduction to Chicano Literature. (4-4) (Same as Spanish M145A-M145B.) Lecture, three hours. Requisite: Spanish 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus.

M145B. Literature after 1960; M145B. Literature after 1960.

M146. Chicano Narrative. (4) (Same as Spanish M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicana literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.

M147A. Chicano/Latino Politics. (4) (Same as Political Science M144A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level political science course or one upper division course in political organization or race or ethnicity from history, psychology, or sociology. Requisite: Political Science 40. Designed for juniors/seniors. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

M154. Contemporary Issues among Chicanas. (4) (Same as Women’s Studies M132B.) Requisite: Women’s Studies 10. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas.

M155. Latinos in the U.S. (4) (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Requisite: Sociology 1. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

M159A. History of the Chicano Peoples. (4) (Same as History M159A.) Designed for juniors/seniors. Survey course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Development related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

M159B. History of the Chicano Peoples. (4) (Same as History M159B.) Designed for juniors/seniors. Survey course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Development related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

M160. Introduction to Chicana/Chicana Speech in American Society. (4) Lecture, three hours. Survey course presenting (1) basic elements of Chicano language use, including history of Chicano languages, types and social functions of Chicano speech (pachuco, caló, Spanenglish), sexist language, and multilingualism and monolingualism and (2) major social issues associated with language use by Chicanos and other urban ethnic populations.
161. Chicano Sociolinguistics. (4) Lecture, three hours. Requisite: course 160. Exploration of various theories of sociolinguistics, social/cultural change, ethnicity, and power to develop a cohesive model of Chicano sociolinguistics. Topics include histories and typology of Chicano language varieties, language change and maintenance/loss, language attitude studies, and American social institutional (educational, legal) responses to Chicano presence.

162. Language Research in the Barrio. (4) Lecture/practicum, three hours. Requisite: course 160. Group-oriented practicum to gather, record, and analyze languages spoken in the Chicano community, using scientific methods. Development of research agenda and research instrument, gathering of actual speech and its analysis, and writing of final report under guidance of instructor. Student-selected research topics have included language use in the barrio, media portrayals of Latinos, and societal and educational attitudes toward language use of Latinos. Introduction to oral history, sociolinguistic interviewing, and social science methodology.

165. Language in Education. (4) Lecture, three hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and socialization, as well as institutional ideologies.

168. Representations of Latinos in Print Media. (4) Lecture/research, three hours. Examination of systemic (mis)representations of Latinos by a print media source (Los Angeles Times) by means of critical discourse analysis and metaphor theory. Investigation of empirical basis for theories of racism in language use in this context. Student projects range from immersion to education and crime to culture.

M172V. Culture Change and the Mexican People. (4) (Same as Anthropology M172V.) Lecture, three hours. Requisite: course 10A or 10B or Anthropology 9. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscigenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

180. City and Community: History of Chicana/Chicana Los Angeles, 1848 to 1945. (4) (Same as Anthropology M172V.) Lecture, three hours. Requisite: course 10A or 10B or Anthropology 9. Culture change theory encompasses such issues as innovation, syncretism, colonialism, modernization, urbanization, migration, and acculturation. Examination of methods anthropologists/ethnographers use in studying and analyzing culture change within ethnohistorical background of the Mexican and Mexican American people to clarify social and cultural origins of modern habits and customs and, more importantly, unravel various culture change threads of that experience. Topics include technology and evolution, Indian nation-states, miscigenation, peasantry, expansionism, industrialization, immigration, ethnicity, and adaptation. Field project on some aspect of culture change required. P/NP or letter grading.

M186AL-M186BL-M186CL. Beyond the Mexican Mural: Murals and Community Laboratory. (2-2-2) See Art 186AL-M186BL-M186CL and World Arts and Cultures M186AL-M186BL-M186CL. Construction of the mural in the Community Laboratory, two hours. Course M186AL is requisite to M186BL, which is requisite to M186CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support; it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading.

M186B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Art M186B and World Arts and Cultures M186B.) Studio/lecture, six hours. Requisites: courses M186A/M186AL Corequisite: course M186BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M186C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Art M186C and World Arts and Cultures M186C.) Studio/lecture, six hours. Requisites: courses M186B/M186BL Corequisite: course M186CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M188. Whose Monument Where: Course on Public Art. (4) (Formerly numbered M167.) Lecture, four hours. Recommended corequisite: course M186A, M186B, or M186C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the “public;” what is “public space” at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently? P/NP or letter grading.

197A-197Z. Special Topics in Chicana and Chicano Studies. (4) Lecture, three hours. Some sections may require prior coursework. Lecture or seminar format on select topics in Chicana and Chicano studies. May be repeated for credit with permission.

M197B. Topics in Chicana/Chicana Literature. (Same as English M197B.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Chicana/Chicana literature. Topics include labor and literature; Chicana/Chicana visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicana journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

199. Independent Studies. (2 to 4) Requisites: courses 10A, 10B. Limited to juniors/seniors. Intensive directed research program. May be repeated for a maximum of eight units.

Related Courses

Related study includes courses with some Chicana/Chicana content, such as those on Mexican, Latin America, and the experiences of people of color in the U.S.

Selim M. Senkan, Ph.D., Chair

Professor of Chemical Engineering
Ralph M. Parsons

Scope and Objectives
The Department of Chemical Engineering conducts undergraduate and graduate programs of teaching and research in the areas of thermodynamics, statistical mechanics, mass transfer, catalysis, semiconductor materials processing, plasma processing, electrochemistry and corrosion, high-temperature chemical kinetics, reaction engineering, combustion science, environmental reaction engineering, cryogenics and low-temperature processes, biochemical engineering, process systems engineering, process integration, computer-aided process design and control, particle technology, pollution control, pollution prevention, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society’s needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes bioengineering, biomedical engineering, and environmental options. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

Undergraduate Study
Chemical Engineering B.S.
The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering, biomedical engineering, and environmental options exist as subsets of courses within the accredited curriculum. Balance is sought between science and engineering practice.

The Major
Course requirements are as follows (194 minimum units required):

3. Two elective courses from Chemical Engineering 110, C111, 112, 113, C114, C115, C116, C118, 119, C125, C140, CM165, and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A). An upper division life or physical sciences course may be substituted for one chemistry elective with the approval of the faculty adviser.

4. Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Biomedical Engineering Option
Course requirements are as follows (198 minimum units required):

1. One general engineering course: Chemical Engineering M105A.

3. Two elective courses from Chemical Engineering C115, C125, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser); one upper division microbiology or molecular, cell, and developmental biology elective that requires one year of chemistry as a prerequisite and contains a laboratory component (laboratory component may be taken from a separate course).

4. Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

Environmental Option
Course requirements are as follows (199 minimum units required):

3. Two elective courses from Chemical Engineering C115, C118, 119, C125, C140, CM165 (another chemical engineering elective may be substituted for one of these with approval of the faculty adviser) and three advanced chemistry electives in the environmental field from Atmospheric Sciences M203A, Chemistry and Biochemistry 103, 110B, Environmental Health Sciences 240, 241, 261, Organismic Biology, Ecology, and Evolution M127 (other advanced chemistry courses may be selected in consultation with the faculty adviser).

4. Atmospheric Sciences 2A; Chemistry and Biochemistry 20A, 20B, 20L, 30L; Civil and Environmental Engineering 15 or Mechanical and Aerospace Engineering 20; Mathematics 31A,
Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degree

The Department of Chemical Engineering offers the Master of Science (M.S.) degree in Chemical Engineering.

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.chemeng.ucla.edu. In addition, the forms may be obtained by writing to the Chemical Engineering Department, UCLA, 5531 Boelter Hall, Box 951592, Los Angeles, CA 90095-1592, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Areas of Study

Consult the department.

Course Requirements

The requirements for a M.S. degree are a thesis, nine courses (36 units), and a 3.0 grade-point average in the graduate courses. Chemical Engineering 200, 210, and 220 are required for all master's degree candidates. Two courses must be taken from offerings in the Chemical Engineering Department, while two Chemical Engineering 598 courses involving work on the thesis may also be selected. The remaining two courses may be taken from those offered by the department or any other field in life sciences, physical sciences, mathematics, or engineering. At least 24 units must be in letter-graded 200-level courses.

All master's degree candidates are required to enroll in the seminar, Chemical Engineering 299, during each quarter of residence.

A program of study which encompasses these requirements must be submitted to the departmental Student Affairs Office for approval before the end of the student's second quarter of residence.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Comprehensive Examination Plan

None.

Thesis Plan

Consult the graduate adviser.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the program leading to the Ph.D. degree in Chemical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program that can remedy any deficiencies.

Application forms, including a departmental supplement to the application, may be obtained online at http://www.chemeng.ucla.edu. In addition, the forms may be obtained by writing to the Chemical Engineering Department, 5531 Boelter Hall, Box 951592, Los Angeles, CA 90095-1592, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

All Ph.D. students are required to take six courses (24 units). Three of these are Chemical Engineering 200, 210, and 220. Two additional courses must be taken from those offered by the Chemical Engineering Department. The third course can be selected from offerings in life sciences, physical sciences, mathematics, or engineering. All of these units must be in letter-graded 200-level courses.

Students are encouraged to take more courses in their field of specialization. These minor field courses should be selected in consultation with their research adviser. A 3.33 grade-point average in graduate courses is required. A program of study to fulfill the course requirements must be submitted for approval to the departmental Student Affairs Office no later than one quarter after successful completion of the preliminary oral examination.

All Ph.D. students are required to enroll in the Chemical Engineering Department's graduate seminar during each quarter of residence.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations

All Ph.D. students are required to take a preliminary oral examination that tests their understanding of chemical engineering fundamentals in the areas of thermodynamics, transport phenomena, chemical kinetics and reactor design. Students are provided problems in writing, and are then asked to solve them orally in front of a faculty committee. Students are required to take Chemical Engineering 200, 210, and 220 in preparation for the examination. Students whose first degree is in chemical engineering take the examination at the end of the second quarter in residence. Students whose first degree is not in chemical engineering (for example, chemistry) may petition to postpone the examination to the following year. Any student failing the Ph.D. preliminary examination may petition to reenter the Ph.D. program after successfully completing the master's thesis. If the petition is granted, then the student takes the preliminary examination concurrently with the master's thesis defense.

After successfully completing the required courses and the preliminary oral examination, students must pass the written and oral qualifying examinations. The examinations focus on the dissertation research and are conducted by a doctoral committee consisting of at least four faculty members nominated by the Department of Chemical Engineering, in accordance with University regulations.

The written qualifying examination consists of a dissertation research proposal that provides a clear description of the problem considered, a literature review of the current state of the art, and a detailed explanation of the approach to be followed to solve the problem. Students first present their ideas for the dissertation research at a precandidacy seminar administered by departmental faculty members of the doctoral committee. The seminar is held during the early part of the Winter Quarter of the second year of residency. Following the seminar,
students submit the dissertation research proposal to the doctoral committee. The written examination is due in the seventh week of the Winter Quarter.

The University Oral Qualifying Examination consists of an oral defense of the dissertation research proposal and is administered by the doctoral committee. The oral examination is held within two weeks of submitting the written examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are “inside” members and must hold appointments at UCLA in the student’s major department in the School of Engineering and Applied Science. The “outside” member must be a UCLA faculty member outside the student’s major department.

Chemical Engineering

Lower Division Course

2. Technology and the Environment. (4) Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO2 cycles), stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of life-cycle methods for evaluating environmental impact of processes and products. P/NP or letter grading.

Upper Division Courses

100. Introduction to Chemical Engineering. (4) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 11C/11CL, Mathematics 32B (may be taken concurrently), Physics 8B. Introduction to analysis and design of industrial chemical processes. Material and energy balances. Letter grading.

102. Chemical Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis. Letter grading.

104A. Chemical Engineering Laboratory I. (6) Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Letter grading.

104B. Chemical Engineering Laboratory II. (6) Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Requisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis. Letter grading.

M105A. Introduction to Engineering Thermodynamics. (4) (Same as Mechanical and Aerospace Engineering M105A.) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: Mathematics 32B, Physics 1B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

108A. Process Economics and Analysis. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives. Letter grading.

108B. Chemical Process Computer-Aided Design and Analysis. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 103, 106, 108A, Computer Science 10F. Introduction to application of some mathematical and computing tools to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations. Letter grading.

109. Mathematical Methods in Chemical Engineering. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Preparation: working knowledge of FORTRAN programming. Discussion of theory and applications of mathematics to chemical engineering problems, with focus on numerical and analytical techniques encompassing linear and nonlinear algebraic equations, finite difference methods, and ordinary and partial differential equations. Letter grading.

111. Cryogenics and Low-Temperature Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenic science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C211. Letter grading.

114. Electrochemical Processes and Corrosion. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electrolless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C214. Letter grading.

115. Biochemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C215. Letter grading.

116. Surface and Interface Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and surfaces, structures adopted by crystalline materials, analysis of structure and composition of crystals and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C216. Letter grading.

119. Pollution Prevention for Chemical Processes. (4) Lecture, four hours; recitation, one hour; preparation/outside study, seven hours. Requisite: course 108A. Waste audits and emission inventories, process design and process flowsheeting for waste minimization, economic analysis of environmental projects, life-cycle analyses. Letter grading.
C125. Bioseparations and Bioprocess Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biologic systems. May be concurrently scheduled with course C225. Letter grading.

CM133. Principles, Practices, and Policies in Biotechnology. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemistry CM133, Microbiology CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

CM165. Bioprocess Technology. (4) (Same as Microbiology CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Requisites: course C115, Chemistry 156, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Application to processes involving mineral leaching, REMED, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265. Letter grading.

199. Special Studies. (2 to 8) Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

200. Advanced Engineering Thermodynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 102. Phenomenological and statistical thermodynamics of chemical and physical systems with engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas. S/U or letter grading.

211. Cryogenics and Low-Temperature Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biologic systems. May be concurrently scheduled with course C225. Letter grading.

220. Advanced Mass Transfer. (4) Lecture, four hours; outside study, eight hours. Requisite: course 101C. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration, composite layers, turbulent transport. S/U or letter grading.

222. Design for Environment. (4) Lecture, four hours; outside study, eight hours. Limited to graduate chemical engineering, materials science and engineering, or Master of Engineering program students. Design of products for meeting environmental objectives; life-cycle inventories; life-cycle impact assessment; design for energy efficiency; design for waste minimization; computer-aided design tools, materials selection methods. Letter grading.

225. Bioseparations and Bioprocess Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 103, or Chemistry 156. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biologic systems. Concurrently scheduled with course C125. Letter grading.

231. Molecular Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 106 or 110. Analysis and design of molecular-beam systems. Molecular-beam sampling of reactive mixtures in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis. S/U or letter grading.

CM233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemistry CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, design and economic analysis of biological reactors. May be concurrently scheduled with course C115. Letter grading.

C215. Biochemical Reaction Engineering. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 101C and 106, or Chemistry 156. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115. Letter grading.

C216. Surface and Interface Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 113A. Introduction to engineering materials, particularly thin films used to make microelectronic devices. Topics include classification of crystals and structures adopted by crystalline materials, analysis of structure and properties of macromolecules and their surfaces, and processing of thin films for microelectronic devices. May be concurrently scheduled with course C116. Letter grading.

271. Electrochemical Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: Chemistry 114. Transport phenomena in electrochemical systems; relationships between molecular transport, convection, and electrode kinetics, along with applications to industrial electrochemical processes, design, and modern battery technology. S/U or letter grading.

234. Plasma Chemistry and Engineering. (4) Lecture, four hours; outside study, eight hours. Designed for graduate chemistry or engineering students. Application of chemistry, physics, and engineering principles to design and operation of plasma and ion-beam reactors used in etching, deposition, oxidation, and cleaning of materials. Examination of atomic, molecular, and ionic phenomena involved in plasma and ion-beam processing of semiconductors, etc. Letter grading.

250. Computer-Aided Chemical Process Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal design and operation of large-scale chemical processing systems. S/U or letter grading.

CM265. Bioprocess Technology. (4) (Same as Microbiology CM265.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Requisites: course C115, Chemistry 136, Microbiology 101. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165. Letter grading.

M280A. Linear Dynamic Systems. (4) (Same as Electrical Engineering M240A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem; Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

M280C. Optimal Control. (4) (Same as Electrical Engineering M240C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 240B or Mechanical and Aerospace Engineering 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

290A-290Z. Special Topics. (2 to 4 each) Seminar, to be arranged. Requisites for each offering announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit. S/U or letter grading.

M290U. Toxics Reduction: Science, Engineering, and Policy Issues. (4) (Same as Environmental Health Sciences M249 and Urban Planning M262A.) Lecture, three hours. Requisites: Urban Planning 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. S/U or letter grading.

298A-298Z. Research Seminars. (2 to 4 each) Seminar, to be arranged. Requisites for each offering announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.
Scope and Objectives
Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

Undergraduate Study
Admission
Students entering UCLA directly from high school who declare a Chemistry or Biochemistry major at the time of application are automatically admitted to that major.

UCLA students who wish to enter one of the majors must have a minimum grade of C– in each of the preparation for the major courses completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed courses for the major must also average at least 2.0.

Transfer students with more than 105 quarter units are accepted into the departmental majors only if they have completed one year of general chemistry with laboratory, one year of calculus, and either one year of calculus-based physics or one year of organic chemistry with laboratory. Biochemistry majors also should have completed courses equivalent to Life Sciences 2 and 3; Chemistry majors should have completed the equivalent of Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 30. Transfer students should consult the department’s Undergraduate Advising Office in 4009 Young Hall for assistance with the articulation of transfer coursework.

Chemistry Diagnostic Examination for First-Term General Chemistry
Students planning to enroll in Chemistry and Biochemistry 14A or 20A are required to pass the Chemistry Diagnostic Examination, which is administered at all first-year sessions of the summer Orientation Program and prior to the beginning of each term. For the dates and times of future examinations and a list of topics, refer to http://www.chem.ucla.edu/dept/Ugrad/chemexam.html. Scores are valid for two academic years only.

Students who do not pass the examination may enroll in Chemistry 17, offered only during Fall Quarter on a Passed/Not Passed basis, Chemistry 17 carries no graduation credit but does displace four units on the UCLA Study List. Students who pass this course are not required to retake the Chemistry Diagnostic Examination.

Advanced Placement in Chemistry
Students who have taken the Advanced Placement (AP) Chemistry Test and obtained a score of 4 or 5 receive eight units of chemistry credit and may petition for chemistry and biochemistry equivalency, or may take course 20A at UCLA. Everyone planning to take Chemistry and Biochemistry 14A or 20A must take the Chemistry Diagnostic Examination. If students received a score of 3 on the AP Chemistry Test, they receive eight units of chemistry credit but no course equivalency.

Credit Limitations
Students may not take or repeat a chemistry or biochemistry course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Chemistry and Biochemistry 20A, they must do so before completing course 20B).

Undergraduate Majors
The department offers three majors: Chemistry (with concentrations in chemistry and physical chemistry), Biochemistry, and General Chemistry. The Chemistry and Biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The General Chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Requirements for the majors are outlined below. For additional information, contact the Undergraduate Advising Office in 4009 Young Hall.

Chemistry B.S.
The B.S. degree program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major
Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4BL. To be admitted, students must complete the preparation courses with a grade-point average of 3.0 or better and file a petition with the Undergraduate Advising Office.

The Major
Required: Chemistry and Biochemistry 30, 110A, 110B, 113A, 113B, 114 (or 114H), 130A/130AL, 135A, 171, 172; one additional upper division chemistry, electrical engineering, or physics laboratory course; and three additional elective courses selected from upper division or graduate courses in biophysical chemistry, electrical engineering, mathematics, physical chemistry, physical inorganic chemistry, physical organic chemistry, or physics and approved by the physical chemistry adviser. Refer to the Undergraduate Advising Office website at http://www.chem.ucla.edu/dept/Ugrad/ for a list of approved electives.

By the junior year, students are strongly encouraged to join a research group within the physical chemistry division to obtain firsthand experience with state-of-the-art physical chemistry research.

Biochemistry B.S.
The B.S. degree program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major
Required: Chemistry and Biochemistry 20A, 20B, 20L, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17) and 4BL, or 6A, 6B, and 6C.

The Major
Required: Chemistry and Biochemistry 30, 110A, 130A/130AL, 130B/130BL, 153A, 153B, 153C, 153L, 154, 156, 171; one additional upper division or graduate course in chemistry and biochemistry; four elective upper division or graduate courses (16 units) approved by the undergraduate adviser (Microbiology and Molecular Genetics 101 and 101L highly recommended). Refer to the Undergraduate Advising Office website at http://www.chem.ucla.edu/dept/Ugrad/ for a list of approved electives.

General Chemistry B.S.
The B.S. degree program is for students who wish to acquire considerable chemical back-
ground in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of pharmacy, dentistry, or public health. This major cannot be taken as part of a double major. Students must declare the major before reaching 135 units.

**Preparation for the Major**

**Required:** Chemistry and Biochemistry 20A, 20B, 20L, 30L; Mathematics 31A, 31B, 32A, 33A; Physics 1A, 1B, and 1C (or 2AH, 2BH, and 17), 4BL.

Students must complete the preparation courses with at least a 2.0 grade-point average.

**The Major**

**Required:** Chemistry and Biochemistry 30, 110A, 130A/130AL, 130B/130BL, 153A, 153L, 171; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 grade-point average is required in all upper division courses in the department. Acceptance into the major is based on an original written proposal that is coherent in terms of student interests and objectives. The proposal should specify which courses students plan to apply toward the major and requires the approval of the faculty adviser.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at [http://www.gdnet.ucla.edu](http://www.gdnet.ucla.edu). Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

**Master’s Degrees**

The Department of Chemistry and Biochemistry offers Master of Science (M.S.) degrees in Chemistry and in Biochemistry and in Molecular Biology.

**Admission**

Applicants planning to work toward the Ph.D. degree should not seek an M.S. degree first but should apply directly to the Ph.D. program.

Application materials for the M.S. programs in Chemistry and in Biochemistry and in Molecular Biology may be obtained by contacting the department directly.

**Areas of Study**

Biochemistry and molecular biology; inorganic, organic, and physical chemistry.

**Course Requirements**

*Chemistry.* At least nine quarter courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. Students must take a minimum of two courses in their major area and one course in an outside area. Choices may be made from the following:

- **Inorganic:** Chemistry and Biochemistry 174, 207, 271A through 271Z, C275, C276A, 276B, 277, 279, C280, C281.

Substitutions may be made with consent of the area adviser. With the consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

**Biochemistry and Molecular Biology.** Thirty-six units of coursework are required. At least 20 of the 36 units must be at the graduate level (courses numbered 200 and above), while the remaining units may be upper division undergraduate courses (courses numbered from 100 to 199). Required courses include Chemistry and Biochemistry CM253 (six units) and at least six additional units of graduate level lecture courses chosen from a list of approved graduate courses available from the graduate adviser. Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement. Up to six units of graduate-level seminar courses may be applied to the graduate course requirement.

**Comprehensive Examination Plan**

*Chemistry.* In exceptional cases, the comprehensive examination plan is used in lieu of a thesis. Under this plan, students may apply an additional six units of Chemistry and Biochemistry 597 and six units of Chemistry and Biochemistry 228, 248, or 278 toward the graduate course requirement and the total course requirement. The comprehensive examination plan requires the satisfactory completion of three cumulative examinations.

*Biochemistry and Molecular Biology.* In exceptional cases, a comprehensive examination is administered in lieu of a thesis. The written examination is administered and graded by a faculty committee selected by the graduate adviser and is graded pass or fail. For students who fail, recommendation for or against a second examination is made by the graduate adviser.

**Thesis Plan**

*Chemistry.* The thesis plan is the preferred method of attaining the M.S. in Chemistry.

**Biochemistry and Molecular Biology.** The thesis plan is the preferred method of attaining the M.S. in Biochemistry and Molecular Biology. By the sixth week of the first quarter in residence, a master’s committee is appointed for each student consisting of the faculty research adviser and two additional faculty members chosen by the graduate adviser. The committee has the responsibility for approving or disapproving the master’s thesis. By the end of the first quarter, the student is required to submit a brief written research proposal for approval by the master’s committee. Students have five academic quarters after the submission of the proposal to complete the degree.

**Doctoral Degrees**

**Admission**

In addition to the University minimum requirements, an excellent undergraduate record is required of all applicants to the programs leading to the Ph.D. degrees in Chemistry and in Biochemistry and Molecular Biology. Graduate Record Examination (GRE) General and Subject Tests are recommended. The GRE and the Test of English as a Foreign Language (TOEFL) are required for international students.

Each student admitted to graduate standing in chemistry is given orientation examinations at the beginning of the first quarter. This is designed to help the student and the adviser plan a course program. The examinations include material covered in upper division courses in physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

There are no orientation examinations in biochemistry and molecular biology; the student plans a course program in consultation with the biochemistry graduate adviser. Preference in admission is given to those students who have already identified a faculty research adviser under whose direction the thesis research is conducted.

Chemistry students are encouraged to become familiar with research activities of all faculty in their area of interest and to join a research group as soon as possible.

Biochemistry and molecular biology students rotate through three research groups during the Fall, Winter, and Spring Quarters, with a final selection made at the end of the Spring Quarter.

Application materials may be obtained by writing to the department. Students may also be admitted to the biochemistry and molecular biology program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MB, Box 951570, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

**Major Fields or Subdisciplines**

Biochemistry; inorganic, organic, and physical chemistry.
Course Requirements

Chemistry: Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If the projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, students may be permitted appropriate modifications.

Organic Chemistry: (1) Required background material: Chemistry and Biochemistry 30, 130A, 130B, 136; (2) Chemistry and Biochemistry C243A, C243B, 244A, 244B; (3) four courses from Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, 245, C281, or outside areas with approval of the organic area adviser; (4) Chemistry and Biochemistry 248.

Physical Chemistry: (1) Required background material: Chemistry and Biochemistry 110A, 110B, 113A; (2) Chemistry and Biochemistry C215A-C215B, C223A-C223B, or equivalent; (3) Chemistry and Biochemistry 228 each term; (4) one term of Chemistry and Biochemistry 218 (for presentation of research).

Biochemistry and Molecular Biology. Candidates should normally complete as a minimum the coursework indicated below. Some of the requirements can be met on the basis of courses taken prior to entry into the graduate program with consent of the graduate adviser. Required coursework must be completed prior to advancement to candidacy.

(1) Required background material: one year of organic chemistry, one course in physical chemistry or biophysical chemistry, one year of biochemistry, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission.

(2) Chemistry and Biochemistry CM253 (six units), which should be taken in the first year.

(3) Fourteen units of additional upper division or graduate-level lecture courses, at least 10 of which should be completed in the first year. These courses are to be chosen from the following three categories: (a) cell biology and metabolism; (b) biophysical, bioorganic, and bioinorganic chemistry; (c) genetics and integrative biology. A list of available courses in these three categories is maintained by the graduate adviser. No more than 10 units from any one of the three categories may be applied.

(4) Chemistry and Biochemistry 258 during the first four quarters. Seminars offered in other departments may be substituted with permission of the graduate adviser.

(5) Chemistry and Biochemistry 268 during the first three quarters.

(6) Three laboratory rotations (Chemistry and Biochemistry 596) during the first year.

Written and Oral Qualifying Examinations

Chemistry. Rather than a single comprehensive examination, the department gives all chemistry Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per quarter at approximately monthly intervals. Students entering directly into the Ph.D. program who perform satisfactorily on the orientation examination in their special area may begin writing the examinations immediately. Students must begin by the start of their second quarter of residence and must continue until they have passed five. To remain in good standing, students should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum. Students with a master's degree from an American university are required to pass three examinations out of nine attempts.

Biochemistry and Molecular Biology: The written examination requirement is coupled to the graduate student seminars (Chemistry and Biochemistry 258 or others). Seminars offered in other departments may be substituted with permission of the graduate adviser. Beginning with Winter Quarter of the first year, each quarter students are required to submit written reports based on the seminar course to the instructor and other designated faculty members.

(1) Winter Quarter: A presentation and written report based on the Fall Quarter rotation research experience or other designated topic is to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter: A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field is to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year: At the end of the preceding Spring Quarter, a research topic is selected from a list prepared by the division. An in-depth seminar of this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the seminar and should propose specific experiments.

A failed report may be revised once. The written examination requirement for the biochemistry and molecular biology Ph.D. program is fulfilled after the student satisfactorily completes all three different types of reports.

Oral Qualifying Examination

The University Oral Qualifying Examination is based on the student's research proposal which should represent independent work and should offer the doctoral committee the opportunity to judge the student's ability to think creatively and to formulate significant ideas for research. The examination is to be attempted during the sixth quarter of residence by all biochemistry and molecular biology students and by chemistry students who completed the written qualifying examinations during the first year. All others must take the oral examination by the end of the seventh quarter. Failure to comply with this schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance students to candidacy, to allow them to repeat the oral, or to disqualify them is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework and examinations, and research ability and productivity.

Chemistry and Biochemistry

Lower Division Courses

2. Introductory Chemistry. (4) Lecture, two hours; discussion, two hours. Not open to students with credit for course 14A or 20A or former course 10A or 11A. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter. P/NP or letter grading.

9. Beginning a Career in Molecular Sciences. (1) Limited to 50 freshmen/sophomores. Recommended for students considering a career in chemical sciences. Introduction to and discussion of research and career opportunities in molecular sciences; establishment of a faculty/student mentorship for each student. May be repeated twice.

10C. Organic Chemistry for Life Sciences Majors. (2) Enforced requisite: former course 10B (C– or better) or one year of general chemistry. Introduction to organic compounds, functional groups, transition metal coordination chemistry, bioorganic and bioinorganic chemistry, isomerism, and stereochemistry. P/NP or letter grading.

10E. Intermediate Organic Chemistry. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: former course 10D (C– or better). Structural aspects of biologically and medicinally important organic molecules. Organic reactions involved in metabolism, biosynthesis, and pharmaceutical synthesis. Intermolecular forces involved in interactions of drugs with receptors and interactions of biological regulators with enzymes and nucleic acids. P/NP or letter grading.
14A. Chemical Structures and Equilibria. (4) (Formerly numbered 10A.) Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics. Successful completion of Chemistry Diagnostic Examination. Not open to students with credit for course 20A or former course 11A. Introduction to physical and general chemistry needed for the life sciences. Quantum chemistry, atomic properties, and chemical bonding in molecules, phase changes, equilibria, and acids and bases. P/NP or letter grading.

14B. Thermodynamics, Kinetics, Organic Structures, and Spectroscopy. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 14A or former course 10A (C– or better). Not open to students with credit for course 20L. Introduction to volumetric, spectrophotometric, and potentiometric analysis. Use and preparation of buffers and pH meters. Synthesis and kinetics techniques using compounds of interest to students in life sciences. P/NP or letter grading.

14CL. General and Organic Chemistry Laboratory I, (2) (Formerly numbered 10BL) Lecture, one hour; laboratory, three hours. Enforced requisites: courses 14A or former course 10A (C– or better), 14B (corequisite). Not open to students with credit for course 10C, 10E, 30, or 130A or former course 100D. NMR and mass spectrometry, conformational analysis, aromatics, oxygen- and nitrogen-containing organic molecules, transition metals and organometallics, supramolecular chemistry and molecular interactions. P/NP or letter grading.

14C. Organic Molecular Structures and Interactions. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 14B or former courses 10B and 10C (C– or better). Not open to students with credit for course 10E, 30, or 130A or former course 100D. NMR and mass spectrometry, conformational analysis, aromatics, oxygen- and nitrogen-containing organic molecules, transition metals and organometallics, supramolecular chemistry and molecular interactions. P/NP or letter grading.

15. Survey of Organic Chemistry and Biochemistry. (4) Enforced requisite: course 11A (C– or better). Not open to students with credit for former course 132A. Recommended for students in prenursing, prephysical therapy, and predental hygiene. Does not satisfy requirements for admission to medical and dental schools. Introduction to structures and reactions of organic compounds, particularly with respect to their roles and transformations in living systems.

17. Chemical Principles (No credit). Lecture, four hours; laboratory, two hours. Chemistry 17 displaces four units on student’s Study List but yields no credit toward a degree. Introduction to chemical principles: numbers, measurements, chemical calculations, gas laws, solutions, acids, bases, and salts, molecular structure, and nomenclature. Collaborative learning and problem solving; introduction to chemistry laboratory practice. P/NP grading.

20A. Chemical Structure. (4) Lecture, three hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics. Enforced requisite: successful completion of Chemistry Diagnostic Examination. First term of general chemistry. Survey of chemical processes, quantum chemistry, atomic and molecular structure and bonding, molecular spectroscopy. P/NP or letter grading.

20B. Chemical Energetics and Change. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 20A (C– or better). Second term of general chemistry. Chemical thermodynamics, phase behavior, chemical thermodynamics, solutions, equilibria, reaction rates and laws. P/NP or letter grading.

20L. General Chemistry Laboratory. (2) Lecture, one hour; laboratory, three hours. Enforced requisites: courses 20A (C– or better), 20B (corequisite). Use of the balance, volumetric techniques, volumetric and potentiometric analysis; Beer’s law, applications for environmental analysis and materials science. P/NP or letter grading.

30C. Organic Molecular Structures and Interactions. (4) Lecture, one hour; laboratory, six hours. Enforced requisites: courses 20B and 20L (C– or better), 30 (corequisite). Qualitative and quantitative analysis of chemical reactions and compounds, kinetics, separations, and spectroscopy. P/NP or letter grading.

30A-30C. Lower Division Seminars. (2 each) Two hours; outside study, four hours. Limited to 20 students. May be taken twice for credit.

38A. Serendipity in Science. Limited to 20 freshmen. Inquiry into unexpected discoveries in science that have had significant impact on society and analysis of circumstances which brought these about, beginning with discovery of helium in the sun by Janssen in 1868. P/NP letter grading.

96. Special Courses in Chemistry. (1 to 4) To be arranged. May be repeated for a maximum of eight units.

Upper Division Courses

103. Environmental Chemistry. (4) Lecture, four hours; discussion, one hour. Enforced requisites: courses 110A, 120A/130A or former courses 132B/132BL, 153A, 153T. Enforced corequisite: course 20B (C– or better). Not expected to take course C115B the following term. Recommended for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansions for adiabatic, low-lying; oscillator; angular momentum; hydrogen atom; matrix techniques; approximation methods; time-dependent problems; atoms; spectroscopy; magnetic resonances; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

110A. Physical Chemistry: Chemical Thermodynamics. (4) Lecture, three hours; discussion, one hour. Required: course 20B, Mathematics 31A, 31B, 32A or 32B (for life sciences majors), Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C. Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry. P/NP or letter grading.

113A. Physical Chemistry: Introduction to Quantum Mechanics. (4) Lecture, three hours; discussion, one hour. Required: course 113A. T opics of considerable relevance to medicine, such as penicillin; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

113B. Physical Chemistry: Introduction to Molecular Spectroscopy. (4) Lecture, three hours; discussion, one hour. Required: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Taught only during scheduled time periods. P/NP or letter grading.

114. Physical Chemistry Laboratory. (4) Lecture, two hours; laboratory, eight hours. Enforced requisites: courses 30L (or former course 11CL), 110A, 110B or 113B, 113A. Students may enter course C115B the following term. Recommended: knowledge of differential equations equivalent to Mathematics 125A or Physics 121A and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is required for C115B. P/NP or letter grading.

114H. Physical Chemistry Laboratory (Honors). (4) Lecture, two hours; laboratory, eight hours. Required: courses 30L (or former course 11CL), 110A, 110B or 113B, 113A, with grades of B or better. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics. P/NP or letter grading.

115A-C115B. Quantum Chemistry. (4) Lecture, four hours; discussion, one hour. Enforced requisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 125A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is required for C115B. Students entering course C115A are normally expected to take course C115B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theory; angular momentum; hydrogen atom; matrix techniques; approximation methods; time-dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.
130. Organic Chemistry: Reactivity and Synthesis, Part I. (4) Lecture, four hours; discussion, one hour. Requisite: course 130B with grades of C– or better. Corequisite: course 130B. Basic experimental techniques in organic synthesis (distillation, extraction, crystallization, and performing reactions) and organic analytical chemistry (melting point, refractive index, infrared spectroscopy, including proton and carbon NMR, infrared spectroscopy, mass spectrometry, and chromatography). P/NP or letter grading.

130BL. Organic Chemistry Laboratory. (2) (Formerly numbered 132BL.) Lecture, one hour; laboratory, four hours. Requisites: courses 30, 90L, with grades of C– or better. Corequisite: course 130B. Modern techniques in synthetic organic and analytical organic chemistry. Micro-preparative and semi-preparative scale multistep synthesis of known organic molecules. One- and two-dimensional nuclear magnetic resonance techniques. Written reports and proposals. P/NP or letter grading.

CM133. Principles, Practices, and Policies in Biochemistry. (2) (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Biochemistry and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful as an introduction to technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233. P/NP or letter grading.

153L. Biochemical Methods I. (4) Lecture, one hour; discussion, one hour; laboratory, four hours; outside study, seven hours. Enforced requisite: courses 14CL/140 or 130A/130AL (or former courses 130C/132BL) with grades of C– or better. Integrated term-long project involving characterization of an enzyme purified from meat obtained at local butcher. Lectures and discussions cover enzyme kinetics, affinity chromatography, gel exclusion chromatography, and enzyme kinetic analysis. P/NP or letter grading.

154. Biochemical Methods II. (4) Lecture, four hours; laboratory, eight hours. Requisites: courses 153A, 153B, 153L. Recommended: course 156. Two to three major laboratory projects using biochemical laboratory techniques to investigate contemporary problems in biochemistry. Topics include transcription, activation, molecular basis of RNA-protein interactions, and biochemical basis of platelet activation and initiation of blood clotting cascade. Experiments entail characterizing function of proteins, nucleic acids, and lipids involved in these processes.

CM155. Biological Catalysis. (4) (Same as Molecular, Cell, and Developmental Biology CM160.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or 1319 or 140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, structural chemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM255. Letter grading.

156. Physical Biochemistry. (4) Lecture, four hours; discussion, one hour. Requisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamics; energy levels, spectroscopy, and bonding; topics from structural, statistical, and electrochemical methods of biochemistry.

CM159B. Mechanisms in Regulation of Transcription II. (2) (Same as Biological Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression; including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

1516. Plant Biochemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C261A.
C181. Polymer Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 139A, 139B, 139C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C265.

C170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4) (Same as Molecular, Cell, and Developmental Biology M170.) Lecture, two to three hours; discussion, zero to two hours; outside study, four to seven hours. Requisites: courses 153A and 153B, or Life Sciences 3, and course 153L. Recommended: courses 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course C270. P/NP or letter grading.

171. Intermediate Inorganic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 130A with a grade of C- or better. Chemical bonding; structure and bonding in the solid state; main group, transition metal, lanthanide and actinide compounds and reactions; catalysis, spectroscopy, special topics. P/NP or letter grading.

172. Advanced Inorganic Chemistry. (4) (Formerly numbered 173.) Lecture, three hours; discussion, one hour. Requisite: course 171 with a grade of C- or better. Structure and bonding of inorganic molecules and solids, electronic spectra of complexes, reaction mechanisms of metal complexes, d- and f-block organometallic compounds, bioinorganic chemistry. P/NP or letter grading.

174. Inorganic and Metallographic Laboratory Methods. (4) Lecture, two hours; laboratory, eight hours. Requisites: courses 130A/130AL or former courses 132B/132BL, and 172 or former course 173. Synthetic chemistry of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenck methods; chromatographic and ion exchange separations. P/NP or letter grading.

C175. Inorganic Reaction Mechanisms. (4) Lecture, three hours; discussion, one hour. Requisites: courses 113A, and 172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C275A. P/NP or letter grading.

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Requisites: courses 113A, and 172 or former course 173. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C275A. P/NP or letter grading.

180. Solid-State Chemistry. (4) Lecture, three hours. Requisite: course 172 or former course 173. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C280. P/NP or letter grading.

C181. Polymer Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110A, and 130A or former course 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C281. P/NP or letter grading.

184. Chemical Instrumentation. (4) Lecture/quiz, two hours; laboratory, eight hours. Requisite: course 110A. Theory and practice of instrumental techniques of chemical and biological analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods. P/NP or letter grading.

190. Undergraduate Thesis Research. (4) Requisites: two terms of course 199 on related material. Final term of integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, comprehensive review of a given area. Thesis embodying entirety of year’s work to be submitted and oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation.

191. Advanced Undergraduate Research. (1) Requisite: course 199B (four units). To be arranged with faculty member who directs the research. Additional information may be obtained from undergraduate office. May be repeated for a maximum of four units. P/NP grading.

196A-196F. Special Courses in Chemistry. (1 to 4) Hours to be arranged.

219A. Directed Individual Studies or Research for Undergraduate Students. (2 to 4) Requisite: course 199A with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of eight units. P/NP grading.

219B. Directed Individual Studies or Research for Undergraduate Students. (2 to 4) Requisite: course 199A (eight units). Designed for departmental juniors with at least 3.0 grade-point average in major and departmental seniors. To be arranged with faculty member who directs the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of four units. P/NP or letter grading.

Graduate Courses

203. Research Ethics Seminar. (2) Seminar, 90 minutes. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all first- and second-year students in program. Informal discussions on case histories for responsible conduct of research. May be repeated for credit. S/U grading.

204. Student Research Seminar. (2) Seminar, one hour. Limited to students supported by UCLA program in Cellular and Molecular Biology Predoctoral Training. Required of all third-year students. Research seminar presented by students in their third year of support in program. S/U grading.

205. Introduction to Chemistry of Biology. (4) Lecture, three hours. Overview of biochemistry, pharmacology, and physiology, with emphasis on chemical interactions at molecular level.

206. Chemistry of Biology Seminar. (2) Discussion, three hours; outside study, three hours. Limited to students supported by UCLA program in Cell and Molecular Biology Predoctoral Training. Required of all third-year students. Research topics at interface of chemistry and biology. May be repeated for credit. S/U grading.

207. Organometallic Chemistry. (4) Lecture/discussion, three hours. Requisite or corequisite: course 243A. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonbonyls; applications in catalysis and organic synthesis.

213B. Physical Chemistry: Molecular Spectroscopy. (4) Lecture, three hours; discussion, one hour; tutorial, one hour. Requisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C113B. Independent study project required of graduate students. S/U or letter grading.

215D. Molecular Spectra, Diffraction, and Structure. (4) Lecture, three hours; discussion, one hour. Requisites: course C215B, Physics 131. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

218. Physical Chemistry Student Seminar. (2) Seminars presented by staff, outside speakers, post-doctoral fellows, and graduate students. May be repeated for credit. S/U grading.

219A-219Z. Seminars: Research in Physical Chemistry. (2each) Discussion, three hours. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature, and research specialty of faculty member teaching course. S/U grading.

219B. Chemistry and Physics of Surfaces.

219C. Physical Chemistry of Complex Fluids.

219D. Computer Simulation in Chemistry.

219E. Dynamics of Molecule-Molecule and Molecule-Surface Reactions.

219F. Environmental Chemistry and Global Cycling.

219G. Gas Phase Kinetics and Photochemistry.

219H. Spectroscopy and Dynamics of Molecules, Clusters, and Biological Systems.

219I. Spectroscopy of Isolated Molecules, Complexes, and Clusters.

219J. Chemistry and Biophysics of Interfaces.

219L. Modern Methods for Molecular Reactions and Structure.

219M. Chemistry of Materials at High Pressures.

219N. Cosmochemistry.

219O. Chemistry and Physics of Nanostructures.

219P. Statistical Mechanics of Complex Fluids.

219Q. Ultrafast Studies of Chemical Reaction Dynamics in Condensed Phase.

221A-221Z. Advanced Topics in Physical Chemistry. (2 to 4 each) Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.
C223A-C223B. Classical and Statistical Thermodynamics. (4-4) Lecture, four hours; discussion, one hour. Requisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.

223C. Statistical Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses C215B, C223B, Physics 131. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

227. Molecular Genetics of Bacteria and Phage. (4) (Same as Microbiology M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Requisite: course CM253 or Biological Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

228. Chemical Physics Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

229. Introduction to Physical Chemistry Research. (2) Lecture, 90 minutes. Designed primarily for entering graduate physical chemistry students. S/U grading.

M230B, Structural Molecular Biology. (4) (Same as Molecular, Cell, and Developmental Biology M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrils, proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory. (2) (Same as Molecular, Cell, and Developmental Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

232. Stereochemistry and Conformational Analysis. (4) Lecture/discussion, three hours. Requisite or corequisite: course C143A. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.

C233. Principles, Practices, and Policies in Biotechnology. (2) (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Microbiology CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical science students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, design and development strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

235A-235Z. Seminars: Research in Organic Chemistry. (2 each) Discussion, three hours. Advanced study and analysis of current topics in organic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

235A. Synthesis of Natural Products and Biopolymers.

235C. Supramolecular Chemistry.

235D. Modern Photochemistry and Biooxidants.

235E. Theoretical and Physical Organic Chemistry.

235F. Synthetic Methods and Synthesis of Natural Products.

235G. Organometallic Chemistry and Organic Synthesis.

235H. Reaction Mechanisms in Molecular Biology.

235I. Fullerene Chemistry and Materials Science.

235J. Organic and Bioorganic Chemistry.

235L. Supramolecular and Macromolecular Chemistry.

235M. Organic Solid-State Chemistry.

241A-241Z. Special Topics in Organic Chemistry. (2 to 4 each) Requisite or corequisite: course C243A. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

243A. Structure and Mechanism in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisites: courses 110B, 113A, and 130B/130BL or former courses 132C/132CL (may be taken concurrently), with grades of C- or better. Mechanisms of organic reactions, acid and base catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

243B. Organic Chemistry: Mechanism and Structure. (4) Lecture, three hours; discussion, one hour. Requisite: course C243A. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.

244A. Organic Synthesis: Methodology and Stereochemistry. (4) Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules.

245. Applications of Electronic Theory in Organic Chemistry. (4) Lecture, three hours; discussion, one hour. Requisite or corequisite: course C243A. Review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Hückel and Möbius conjugation; Woodward-Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.

247. Organic Colloquium. (2) Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

248. Organic Chemistry Student Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

249B. Problems in Advanced Organic Chemistry. (2) Designed primarily for first- and second-year graduate students as preparation for cumulative examinations. Problems in organic reaction mechanisms, synthesis, structure determination, spectrochemistry, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. May be repeated for credit. S/U grading.

251A-251Z. Advanced Topics in Biochemistry. (2 each) Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

CM235. Macromolecular Structure. (6) (Same as Biological Chemistry CM253 and Human Genetics CM253.) Lecture, five hours; laboratory, eight hours. Requisites: courses 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

254. Advanced Biochemical Methods. (4) Lecture, two hours; laboratory, eight hours. Requisite: course 156. Recommended: courses 155B, 153C. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.
CM255. Biological Catalysis. (4) (Same as Biological Chemistry M255, Molecular, Cell, and Developmental Biology CM255.) Requisites: courses 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmaceutically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM155. Graduate students required to write research paper and present oral report on it.

256A-256Z. Seminars: Research in Biochemistry. (2 each) Discussion, three hours. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

256A. Biochemistry of Plasma Proteins.

256B. Biochemistry of Protein Function.

256C. Biochemistry and Molecular Genetics of Fungi.

256D. Transcriptional Control Mechanisms in Drosophila Embryogenesis.

256E. Secondary Metabolites in Higher Plants: Biochemistry, Regulation, and Physiological Functions.

256F. Current Topics in Prokaryotic Development.

256G. Nucleic Acid Structure Determination by NMR.

256H. Basic Mechanisms of Promoter Activation.

256J. Contractile Proteins in Muscle Contraction and Cell Motility.

256K. Biochemistry and Molecular Biology of Chlamydomonas.

256L. Literature of Structural Biology.

256M. Mechanism and Regulation of Transcription Termination in Eukaryotic Organisms.

256N. Advanced Topics in Structural Biology.

256O. Membrane Biophysics.

256P. Analysis of Protein Structure.

256Q. Biochemistry and Function of Ubiquinone in Yeast and Higher Eukaryotes.

256R. Biomolecular Nuclear Magnetic Resonance Spectroscopy and Protein Structure.

256S. Proteome Bioinformatics.

256T. Physical Chemistry of Biological Macromolecules. (2) (Same as Biological Chemistry M257.) Requisites: courses 110A, 153A. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

256U. Advanced Topics in Biochemistry and Molecular Biology. (2) Lecture, two hours. Critical analysis of experimental design and methods in biochemistry and molecular biology. In-depth analysis of literature in one or more areas of current research. May be repeated for credit. S/U or letter grading.

CM259A. Mechanisms in Regulation of Transcription I. (2) (Same as Biological Chemistry CM259A.) First five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM253 or M267. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. S/U or letter grading.

CM259B. Mechanisms in Regulation of Transcription II. (2) (Same as Biological Chemistry CM259B.) Second five weeks. Lecture, four hours; outside study, two hours. Requisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B. S/U or letter grading.

256A. Plant Biochemistry. (4) Lecture, three hours; discussion, one hour. Requisite: course 153C. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course CM159A.

256B. Energy Transductions. (4) Lecture, three hours. Requisites: courses 153B, 153C. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation; other energy-linked oxidative functions; membrane active transport, muscle contraction, and special sensory functions.

256C. Metabolism and Its Regulation. (4) (Same as Biological Chemistry M256C.) Lecture, three hours. Requisites: course 110A, one course from 153B, 153C, 156, or Biological Chemistry 201A-201B. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

256D. Metabolic Basis of Atherosclerosis: Selected Topics. (2-2-2) (Same as Biological Chemistry M256D and Microbiology M264A-M264B-M264C.) Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

256E. Metabolic Control by Protein Modification. (2) First five weeks. Lecture, three hours; discussion, one hour. Requisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course CM156.

256F. Seminar: Techniques for Study of Gene Regulation. (2) Requisites: courses CM259A, CM259B. Seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis on specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

256G. Cell Structure, Signaling, and Differentiation. (6) (Same as Biological Chemistry CM266, Human Genetics CM267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: courses 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosome and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Letter grading.

256H. Biochemistry Research Seminar. (2) Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U or letter grading.

271A-271Z. Advanced Topics in Inorganic Chemistry. (2 to 4 each) Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.
Scope and Objectives

The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Undergraduate Study

Chemistry/Materials Science B.S.

Preparation for the Major

The Major

For further information, contact Leslie Hinman, Materials Science and Engineering, 6531 Boelter Hall, (310) 825-8916.

Scope and Objectives

The civil and environmental engineering programs at UCLA include structural engineering, structural mechanics, geotechnical engineering, earthquake engineering, water resources engineering, and environmental engineering.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, water resources engineering, and environmental engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of structures (including structural/earthquake engineering and structural mechanics), geotechnical engineering, water resources engineering, and environmental engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

Undergraduate Study

Civil Engineering B.S.

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

The Major

Course requirements are as follows (181 minimum units required):
Civil and Environmental Engineering / 196

(1) Eight core courses: Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A; Civil and Environmental Engineering 11, 108; Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103.

(2) Civil and Environmental Engineering 120, 121, 130, 135A, 151, 153; one mathematics course from Mechanical and Aerospace Engineering 174, 191A, 192A, 192B, 192C.

(3) Thirty-two elective units, to be selected from the courses listed below, which must include eight units of laboratory:

**Engineering Mechanics:** Civil and Environmental Engineering 130F, 130L, Mechanical and Aerospace Engineering 166C, 168.

**Geotechnical Engineering:** Civil and Environmental Engineering 125, 128L, Earth and Space Sciences 100, 139.

**Structures:** Civil and Environmental Engineering 135B, 135C, 135L, 137, 137L, 141, 142, 142L, 143, 144, 147, 180.

**Systems Analysis:** Civil and Environmental Engineering 106A, M140.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Department of Civil and Environmental Engineering offers the Master of Science (M.S.) degree in Civil Engineering.

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.cee.ucla.edu. Forms are also available by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

**Areas of Study**

Environmental engineering; geotechnical engineering; structural mechanics; structural/earthquake engineering; water resource systems engineering.

**Course Requirements**

At least nine courses are required, a majority of which must be in the Civil and Environmental Engineering Department. At least five of the courses must be at the 200 level. In the thesis plan, seven of the nine must be formal 100- or 200-series courses. The remaining two may be 500-series courses which may not be applied toward the nine-course requirement. A minimum 3.0 grade-point average is required in all coursework.

Each major field has a set of required preparatory courses which are normally completed during undergraduate studies. Equivalent courses taken at other institutions can satisfy the preparatory course requirements. The preparatory courses cannot be used to satisfy course requirements for the master's degree; courses must be selected in accordance with the lists of required graduate courses and elective courses for each major field.

**Undergraduate Courses.** No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

**Environmental Engineering**

**Required Preparatory Courses.** Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 33A, 33B; Mechanical and Aerospace Engineering 103, M105A, Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

**Required Graduate Courses.** Civil and Environmental Engineering 155, 157B, 157C, 163, 164, 253, 254B, 254C, 258A, 261, 265A, 265B; a maximum of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan:

- Civil and Environmental Engineering 150, 250A, 250B, 250C, 251, 252, 260, M262A, M262B; Chemical Engineering 101C or Mechanical and Aerospace Engineering 105D;

**Geotechnical Engineering**

**Required Preparatory Courses.** Civil and Environmental Engineering 108, 120, 121, 128L.

**Required Graduate Courses.** Civil and Environmental Engineering 220, 221, 222, 223, 228L.

**Structural Mechanics**

**Required Preparatory Courses.** Civil and Environmental Engineering 130, 135A, 135B.

**Required Graduate Courses.** Civil and Environmental Engineering 232, 235A, 235B, 236, M237A.

**Elective Courses.** Civil and Environmental Engineering 130F, 130L, 135C, 137, M140, M230, 231, 233, 234, 235C, M240, 275, 276; Mechanical and Aerospace Engineering 269B.

**Structural/Earthquake Engineering**

**Required Preparatory Courses.** Civil and Environmental Engineering 135A, 135B, 141, 142.

**Required Graduate Courses.** Civil and Environmental Engineering 235A, 246; at least three of the following courses: Civil and Environmental Engineering 241, 242, 244.

**Elective Courses.** Civil and Environmental Engineering 120, 121, 130, 135C, 137, 142L, 143, 175, 221, 222, 223, 232, 235B, 236, M237A, M240, 275, 276.

**Water Resource Systems Engineering**

**Required Preparatory Courses.** Chemistry and Biochemistry 20A, 20B, 20L, Mathematics 33A, 33B; Mechanical and Aerospace Engineering 103, M105A; Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

**Required Graduate Courses.** A minimum of five of the following courses: Civil and Environmental Engineering 250A, 250B, 250C, 251, 252, 253, 260, 265A, 265B.

**Elective Courses.** Civil and Environmental Engineering 150, 164, 255A, 255B; a maximum
of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan: Atmospheric Sciences C200B, M203A, 218; Computer Science 270A, 271A, 271B; Electrical Engineering 236A, 236B, 236C, 237; Environmental Health Sciences 225, 264; Mathematics 269A, 269B, 269C; Mechanical and Aerospace Engineering 274, 275.

Students may petition the department for permission to pursue programs of study which differ from the above norms.

**Comprehensive Examination Plan**

In addition to the course requirements, under this plan there is a comprehensive written examination covering the subject matter contained in the program of study. The examination is administered by a comprehensive examination committee, which may conduct an oral examination in addition to the written examination. In case of failure, the examination may be repeated once with the consent of the graduate adviser.

**Thesis Plan**

In addition to the course requirements, under this plan students are required to write a thesis on a research topic in civil and environmental engineering supervised by the thesis adviser. An M.S. thesis committee reviews and approves the thesis. No oral examination is required.

**Doctoral Degree**

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Civil Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies. For information on completing the Engineering degree, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.cee.ucla.edu. Forms are also available by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

**Major Fields or Subdisciplines**

Environmental engineering; geotechnical engineering; structural/earthquake engineering; water resource systems engineering.

**Course Requirements**

There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. The major field has a scope corresponding to a body of knowledge contained in a detailed Ph.D. field syllabus available on request from the department office. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B– or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are chosen to support the major field and are usually subsets of other major fields.

**Written and Oral Qualifying Examinations**

After mastering the body of knowledge defined in the three fields, the students take a written preliminary examination in the major field. When the examination is passed and all coursework is completed, students proceed to take an oral preliminary examination which encompasses the major and minor fields. Both preliminary examinations should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice.

After passing both preliminary examinations, students are ready to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

**Note:** Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are “inside” members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The “outside” member must be a UCLA faculty member outside the student's major department.

---

**Civil and Environmental Engineering**

**Lower Division Courses**

1. Introduction to Civil Engineering. (2) Lecture, two hours. Introduction to scope of civil engineering profession, including earthquake, environmental, geotechnical, structural, transportation, and water resources engineering. Letter grading.

2. Fundamentals of Environmental Engineering Science. (4) Lecture, four hours; outside study, eight hours. Quantitative analysis of sources, transformations, and effects of pollutants in water, air, and soil. Topics include drinking water, wastewater, hazardous wastes, radioactive wastes, and atmospheric emissions. P/NP or letter grading.

3. Patterns of Problem Solving. (4) Lecture, four hours; outside study, eight hours. Introduction to creative patterns of problem solving and decision making. Discussion of attitudes and techniques productive in problem solving. Heuristic guides for knowledge acquisition, problem presentation, and problem solution. Tools and concepts for decision making that include technology and human values. Letter grading.

4. Introduction to Computing for Civil Engineers. (4) Lecture, four hours; laboratory, four hours; outside study, four hours. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering programs. Letter grading.

**Upper Division Courses**

120. Principles of Soil Mechanics. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 108. Soil as a foundation for structures and as a material of construction. Soil formation, classification, physical and mechanical properties, soil compaction, earth pressures, consolidation, and shear strength. Letter grading.

121. Design of Foundations and Earth Structures. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 120. Design methods for foundations and earth structures. Site investigation, including evaluation of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures. Letter grading.

163. Introduction to Atmospheric Chemistry and Air Pollution. (4) Lecture, four hours; outside study, eight hours. Requisites: course 153, Chemistry 20A, 20B, Mathematics 31A, 31B, Physics 1A, 1B. Description of processes involved in chemical composition of troposphere: air pollutant concentrations/standards, urban and regional ozone, aerosol pollution, formation/deposition of acid precipitation, fate of anthropogenic/toxic/natural organic and inorganic compounds, selected global chemical cycle(s). Control technologies. Letter grading.

166. Environmental Microbiology. (4) Lecture, four hours; recitation, two hours; outside study, six hours. Requisite: course 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

199. Special Studies. (2 to 6) Tutorial, to be arranged. Application of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasionally, one or more students may be accepted. May be repeated for credit. Letter grading.

Graduate Courses

222. Soil Dynamics. (4) Lecture, four hours; outside study, eight hours. Requisite: course 120. In-depth study of stress-strain behavior of soils under cyclic and dynamic loading, analysis of soil layers, wave propagation, machine foundations, and similar items. Analysis of laboratory and field tests for determination of cyclic and dynamic soil properties. Effects of type of soil, degree of saturation, and loading conditions on cyclic properties. Letter grading.

223. Earth Retaining Structures. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 120, 121. Fundamental concepts of the theory of earth pressures. Analysis of retaining wall, pile, sheet pile, and excavation methods. Emphasis on design and construction. Fracture mechanics in soils, such as with soil nails and geosynthetics. Letter grading.

228L. Advanced Soil Mechanics Laboratory. (4) Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 120, 121. Laboratory and study covering more advanced aspects of laboratory determination of soil properties and characteristics. Development of permeability, consolidation, and shear strength. Review of advanced instrumentation and measurement techniques. Letter grading.

229. Special Topics in Soil Mechanics. (4) Seminar, four hours; outside study, eight hours. Topics may vary each term to cover subjects such as earth dam design, geotextile reinforced soils, consolidation, constitutive laws, finite difference methods in soil mechanics, theories of elasticity and plasticity, and case histories. Letter grading.

M234. Advanced Topics in Structural Mechanics. (4) Lecture, four hours; outside study, eight hours. Letter grading.

M235A. Advanced Structural Analysis. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theories of stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis. Letter grading.

M235B. Finite Element Analysis of Structures. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135B. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-axes affecting chemical elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects. S/U or letter grading.

M235C. Nonlinear Structural Analysis. (4) Lecture, four hours; outside study, eight hours. Requisite: course 135B. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian invariants. Letter grading. Letter grading.

263B. Advanced Topics in Transport at Environmental Interfaces. (4) Lecture, four hours; outside study, eight hours. Requisite: course 263A. In-depth treatment of selected topics involving transport phenomena at environmental interfaces between solid, fluid, and gas phases, such as aquatic sediments, porous aggregates, and vegetative canopies. Discussion of theoretical models and experimental observations. Application to important environmental engineering problems. Letter grading.

265A. Mass Transfer in Environmental Systems. (4) Lecture, four hours; computer applications, two hours; outside study, eight hours. Designed for graduate environmental engineering program students. Physical chemistry and mass transfer fundamentals related to contaminant fate and transport in soil, air, and water systems, including soil/water sorption and desorption, contaminant retardation, vaporization and dissolution of nonaqueous phase liquids (NAPL), and other environmental systems. Letter grading.

265B. Contaminant Transport in Soils and Groundwater. (4) Lecture, four hours; computer applications, two hours; outside study, six hours. Requisites: courses 250B, 254A. Principles of mass transfer as they apply in soil and groundwater, independent estimation of transport model parameters;remediating hazardous waste sites. Letter grading.

266. Environmental Biotechnology. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 153, 254A. Environmental biotechnology — concept and potential, biotechnology of pollutional control, bioremediation, biomass conversion: composting, biogas and bioethanol production. Letter grading.

296. Advanced Topics in Civil Engineering. (2 to 4) Seminar, to be arranged. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297. Seminar: Current Topics in Civil Engineering. (2 to 4) Seminar, to be arranged. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate civil engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employed as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours. Preparation: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate civil engineering students. Petition forms to request enrollment may be obtained from assistant dean. Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate civil engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 12) Tutorial, to be arranged. Limited to graduate civil engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 16) Tutorial, to be arranged. Limited to graduate civil engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Sarah P. Morris, Ph.D., Chair

Professors
Ann L.T. Bergren, Ph.D.
David L. Blank, Ph.D.
Andrew R. Dyck, Ph.D.
Bernard D. Frischer, Ph.D.
Sander M. Goldberg, Ph.D.
Michael W. Haslam, Ph.D.
Steven Lattimore, Ph.D.
Sarah P. Morris, Ph.D.
Brent H. Vine, Ph.D.

Professors Emeriti
Philip Levine, Ph.D.
Bengt T.M. Löfstedt, Ph.D.
Jaan Puhvel, Ph.D.
Albert H. Travis, Ph.D.

Associate Professors
Robert A. Gurval, Ph.D.
Katherine C. King, Ph.D.
Kathryn A. Morgan, Ph.D.
Carole E. Newlands, Ph.D.

---

**Scope and Objectives**

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, linguistics, mythology, philosophy, and religion. The department is also strong in two fields which are not universally taught in classics departments, namely medieval Latin and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in Greek and Latin. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

---

**Undergraduate Study**

Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses.

**Classical Civilization B.A.**

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the classical civilization major is to provide a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

**Preparation for the Major**

*Required:* Classics 10, 20, and one course from 40, 41, 42.

**The Major**

*Required:* (1) Greek 3 or Latin 3; (2) two courses in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B, 118); (3) two courses in classical art or archaeology (Classics M153A through M153K); (4) seven upper division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser) — no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 195 may be applied as only one course toward the major; (5) one senior seminar (Classics 197); with approval of the undergraduate adviser, a senior paper (Classics 195 or 199) may be substituted for the senior seminar.

**Greek B.A.**

*Preparation for the Major*  
*Required:* Classics 10, 20; Greek 1, 2, 3, or equivalent.

**The Major**

*Required:* Eight upper division Greek courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.
Greek and Latin B.A.

Preparation for the Major

Required: Classics 10, 20; Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: Ten upper division Greek and/or Latin courses (of which at least four must be in each language), including Greek 110 or Latin 110, and three courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

Latin B.A.

Preparation for the Major

Required: Classics 10, 20; Latin 1, 2, 3, or equivalent.

The Major

Required: Eight upper division Latin courses, including course 110, and four courses in classical civilization (Classics 140 through 197) and/or ancient history (History 115A, 115B, 115C, 116A, 116B, 117A, 117B, 117C). Courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser.

English/Greek B.A.

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Greek Minor

The Greek minor is designed to recognize a serious commitment to the study of the Greek language. After a year of elementary Greek (Greek 1, 2, 3) or its equivalent, students select departmental upper division reading courses in ancient Greek prose and poetry which provide close analysis of individual texts, with attention to their historical, literary, and cultural context. Subjects of study include Homer, lyric poetry, tragedy and comedy, history, rhetoric, philosophy, and the New Testament.

To enter the minor, students must have an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees

The Department of Classics offers the Master of Arts (M.A.) degrees in Classics, in Greek, and in Latin.

Admission

Requirements for admission to the M.A. programs are a UCLA B.A. degree, or the equivalent, with a major in classics for the Classics M.A., Greek for the Greek M.A., or Latin for the Latin M.A.; a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and Graduate Record Examination (GRE) scores. Applicants...
for the Classics M.A. program who are deficient in Greek or Latin may be admitted to the Greek or Latin program, then permitted to transfer into the classics program when the deficiencies have been removed.

Areas of Study

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Course Requirements

The courses presented for the Classics M.A. must include (1) Classics 287, (2) Greek or Latin 210, and (3) five courses from Greek 200A-200B-200C/Latin 200A-200B-200C. Courses for the Greek M.A. are (1) Classics 287, (2) Greek 210, and (3) Greek 200A-200B-200C. Courses for the Latin M.A. are (1) Classics 287, (2) Latin 210, (3) Latin 200A-200B-200C. The six-unit 200A-200B-200C courses test the appropriate part of the departmental reading lists in a one-hour translation examination. The remaining courses are to be selected in consultation with the graduate adviser.

No more than two half seminars, each counting as two units, may be applied toward the M.A. course requirements. No more than one course in the 500 series may be applied toward the M.A. course requirements.

No more than one 596 course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Before the examination, students are expected to complete the departmental reading lists in Greek authors for the Greek M.A., or Latin authors for the Latin M.A., or in Greek and Latin authors for the Classics M.A. The examination consists of a three-hour written test in Greek and Latin literature (Greek for Greek M.A., Latin for Latin M.A., and Latin for Classics M.A.) in two parts: (1) passages for translation at sight and for generic identification and comparison; (2) an essay question combining periods kept separate in the 200A-200B-200C courses (for Classics M.A., combining Greek and Latin). It is to be taken no later than one quarter after the fulfillment of the M.A. course requirements. It may be repeated once, in the quarter following the first attempt; in exceptional cases and with the consent of the departmental faculty, more than once. For admission into the Ph.D. program, a grade of B+ or better is required.

Thesis Plan

None.

Doctoral Degree

Admission

A UCLA M.A. degree in Classics, Greek, or Latin with a comprehensive examination grade of B+ or better, or an equivalent degree from another university is required for admission to the program leading to the Ph.D. degree in Classics.

In addition to an M.A. degree, the department requires a statement of purpose. If applicants do not have a UCLA M.A., they must also submit three letters of recommendation, normally from previous instructors in the classics, and Graduate Record Examination (GRE) scores. While there is no minimum required score, the GRE is used as a criterion in uncertain cases, and to assess applications for teaching assistantships and other financial assistance from the department. The application may be obtained by writing to the department.

Major Fields or Subdisciplines

The department offers the Ph.D. in Classics with major fields in classical literature and philology; classical linguistics; Byzantine Greek; and medieval Latin.

Course Requirements

Classical Literature and Philology: M.A. degree holders in Greek only or Latin only must take two 200A-200B-200C courses in another language. In addition, five (or more) 200-series courses are required of all Ph.D. students, including Greek 210 and Latin 210 unless taken previously. Required courses, except for Greek 210 and Latin 210, are in addition to those taken for the M.A.

Classical Linguistics: M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking two 200A-200B-200C courses in another language. A minimum of five (full) seminars is required for this major field: Classics 180 (an equivalent undergraduate or graduate course taken at UCLA or elsewhere), Classics 240, Greek 242, 243, Latin 242, and either Classics 230A-230B or one quarter of Vedic (Indic M222A, presupposing three quarters of upper division classical Sanskrit).

Byzantine Greek: M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in another language. A minimum of five (full) seminars is required: Greek 210, at least two seminars from 231A-231B-231C, 240A-240B, 245, History 216A-216B.

Medieval Latin: M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in another language. A minimum of five (full) seminars is required: Latin 130 or 120, 131, 133 (or equivalent undergraduate or graduate courses taken at UCLA or elsewhere); Latin 210; at least two seminars from Latin 231A-231B, 243 or History 219A or 219B; Greek 231A or 231B or 231C (or an upper division medieval language course such as French 115A, 115B, 115C, German 152, Italian 113, 114A, 114B, 190, Spanish M118A, M118B, 122, 123, or an equivalent undergraduate or graduate course taken at UCLA or elsewhere); History 217.

Most classics, Greek, and Latin seminars may be taken in one of two ways: (1) as full seminars, with the requirement of a final paper (or an equivalent workload, such as a final examination, as designated by the instructor) to be presented to the instructor and assessed as part of the final grade; full seminars carry four units, with letter grading or (2) as half seminars, requiring full participation in the course but no paper (or equivalent as described above). Half seminars carry two units and are normally taken for an S/U grade only, except that arrangements may be made with the instructor beforehand, at the instructor’s discretion, for a letter grade to be given.

Written and Oral Qualifying Examinations

The major fields have separate reading lists. All lists include the reading list in Greek and in Latin for authors required for the M.A. in Classics. The major fields have the following examination structure:

Classical Literature and Philology: (1) Two one and one-half hour translation examinations, one in Greek, one in Latin, which may be taken concurrently or separately, consisting of passages from the Ph.D. reading list and other literature (M.A. degree holders in Greek only or Latin only take an additional two-hour examination in sight translation from the other language); (2) a 15- to 22-page research paper on a field or author of the student’s choosing outside the area of specialization (submitted either before or after the comprehensive examination); (3) a written three-hour examination in the area of the student’s specialization and prospective dissertation topic.

Classical Linguistics: (1) A written three-hour translation examination in classical Greek or Latin (half from the reading list and half at sight); (2) a written three-hour examination consisting of passages of ancient texts covered in the required course, for translation and comment; (3) a two-hour written examination in comparative grammar.

Byzantine Greek: (1) A written three-hour translation examination in classical Greek (half from the reading list and half at sight); (2) a written three-hour examination on Byzantine Greek (translation from the reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Medieval Latin: (1) A written three-hour translation examination in classical Latin (half from the reading list and half at sight); (2) a written three-hour examination on medieval Latin (translation from the reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Each qualifying examination may normally be retaken twice. Promptly on the completion of the last qualifying examination, the University Oral Qualifying Examination is administered by the doctoral committee, probing the candidate’s knowledge of the major field (and possible stipulated areas outside the specialization) and discussing a formal dissertation proposal.
Classics

Lower Division Courses

10. Survey of Classical Greek Culture. (4) Lecture, two to three hours; discussion, 90 minutes; outside study, three and one-half hours. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology in Greek world. P/NP or letter grading.

20. Survey of Roman Civilization. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Latin not required. Study of life and culture of Rome from time of its foundation to end of antiquity. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation. P/NP or letter grading.

30. Introduction to Classical Mythology. (4) Formerly numbered 161.) Lecture, three hours; discussion, one hour. Introduction to myths and legends of ancient Greece and Rome, role of those stories in their societies, and modern approaches to studying them. P/NP or letter grading.

40. Survey of Greek Literature in Translation. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

41. Survey of Latin Literature in Translation. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.

42. Cinema and the Ancient World. (4) Lecture, three hours; discussion, 90 minutes. Use of popular cinema to introduce students to ancient Greek and Roman culture; limits of investigation set by individual instructor. P/NP or letter grading.

50. Power and Imagination in Ancient Rome. (4) Lecture, 90 minutes; discussion, 90 minutes. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

51A. Art and Archaeology of Classical World: Greece. (4) (Formerly numbered 51.) Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek art and archaeology at discretion of instructor. P/NP or letter grading.

51B. Art and Archaeology of Classical World: Rome. (4) (Formerly numbered 51.) Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Roman art and archaeology at discretion of instructor. P/NP or letter grading.

55. Origins and Nature of English Vocabulary. (4) Lecture, three hours. Origins and nature of English vocabulary, from Proto-Indo-European prehistory to current slang. Topics include the Greek and Latin component in English (including technical terminology), the alphabet and English spelling, semantic change and word formation, vocabulary in literature and film.

M70. Survey of Medieval Greek Culture. (4) (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Variable topics; consult Schedule of Classes or office of Undergraduate Advising for topics to be offered in a specific term. P/NP or letter grading.

88B. Socrates. Examination of evidence for Socrates’ life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him.

88C. Comparative Mythology. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and genetic models, reconstruction of protomyths common to prehistoric Western Asia and Europe.

88D. The Greek Symposium. Freshman seminar on the topic of the Greek symposium, an institution that permits students to understand many major features of Greek culture and society.

Upper Division Courses

140. Topics in History of Greek Literature. (4) Lecture, three hours. Requisites: courses 20, 41. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

141. Topics in History of Latin Literature. (4) Lecture, three hours. Requisites: courses 20, 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

142. Ancient Epic. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Homer’s Iliad and Odyssey, Vergil’s Aeneid, and Ovid’s Metamorphoses, studied in translation.

143. Ancient Drama. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

144. Topical Studies in Ancient Culture. (4) Lecture, three hours. Requisites: courses 10 or 20, and 40 or 41. Investigation of a problem in ancient culture that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

145A. Ancient Greek and Roman Philosophy. (4) (Same as Philosophy M103A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

145B. Later Ancient Greek Philosophy. (4) (Same as Philosophy M103B.) Lecture, three hours; outside study, nine hours. Requisite: one course from M145A, Philosophy 1, 100A, M101B, M102. Study of some major texts in ancient philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

146A. Plato — Earlier Dialogues. (4) (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

146B. Plato — Later Dialogues. (4) (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected works of Aristotle.

C151E. Archaeological Field Techniques. (12) Off-campus field archaeological, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

152. The Ancient City. (4) Lecture, three to four hours. Requisites: courses 10 and 20, or History 1A. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of form, design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources.

M153A. Minoan Art and Archaeology. (4) (Same as Art History M102A.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

M153B. Mycenaean Art and Architecture. (4) (Same as Art History M102B.) Lecture, three hours. Requisite: course 10 or Art History 50. Study of development of art and architecture in Mycenaean Greece from 2000 to 1000 B.C. P/NP or letter grading.

M153C. Archaic Greek Art and Archaeology. (4) (Same as Art History M102C.) Lecture, three hours. Requisite: course 10, Art History 50. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M153D. Classical Greek Art and Archaeology. (4) (Same as Art History M102D.) Lecture, three hours. Requisites: course 10, Art History 50. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M153E. Hellenistic Greek Art and Archaeology. (4) (Same as Art History M102E.) Lecture, three hours. Requisites: course 10, Art History 50. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

M153F. Etruscan Art. (4) (Same as Art History M102F.) Lecture, three hours. Requisite: course 20 or Art History 50. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

M153G. Roman Art. (4) (Same as Art History M102G.) Lecture, three hours. Requisite: Art History 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

M153H. Late Roman Art. (4) (Same as Art History M102H.) Lecture, three hours. Requisites: course 30, Art History 50. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

M153I-M153J-M153K. Classical Archaeology. (4) (Same as Art History M102I-M102J-M102K.) Lecture, three to four hours. Requisites: course 10 or 20 or Art History 50 or History 1A. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture and painting, P/NP or letter grading. M153L Greco-Roman Architecture; M153J Greco-Roman Sculpture; M153K Greco-Roman Painting.

Graduate Courses

201B. Topics in Ancient History: Roman World (2 or 4). Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

223. Introduction to Transmission of Ancient Latin Literature. (4) (Same as History M223.) Discussion, three hours. Designed for graduate students. Examination of role of Latin classical authors in history of Middle Ages and Renaissance to understand processes by which Latin literature has been preserved.

249. Textual Criticism: Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. (4) Seminar, three hours. Different steps required in preparation of a critical edition of an ancient text: localization of manuscripts; collation; establishing the stemma; selecting the right reading on basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of apparatus criticus and apparatus fontium.

250. Computing and Classics. (4) Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism.

251A. Seminar: Classical Archaeology — Aegean Bronze Age. (2 or 4) Seminar, three hours. S/U or letter grading.

251B. Seminar: Classical Archaeology — Greco-Roman Architecture. (4) Seminar, three hours. S/U or letter grading.

251D. Seminar: Classical Archaeology — Greco-Roman Painting. (2 or 4) Seminar, three hours. Studies in style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor.

251E. Archaeological Field Techniques. (12) Off-campus field archaeology, 36 hours. Preparation: at least one classical archaeology course. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. S/U or letter grading.

252. Topography and Monuments of Athens. (2 or 4) Lecture, two or four hours. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. S/U or letter grading.

260. Topics in Ancient Religion. (4) Seminar, three hours.

268. Seminar: Comparative Mythology. (4) Required course 168. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies.

287. Graduate Colloquium in Classical Literature. (4) Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

396. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

397. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

Greek

Lower Division Courses

1. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours.

2. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 1.

3. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 2.

4. Elementary Greek. (5) Lecture, five hours; outside study, 10 hours. Enforced requisite: course 3.

5. Elementary Modern Greek. (12) Lecture, 18 to 19 hours. Eight-week intensive introduction to principles of speaking, reading, and writing modern (demos) Greek. Offered in summer only. P/NP or letter grading.

6. Intensive First-Year Greek. (12) Lecture, 15 hours. Ten-week intensive introduction to Greek language equivalent to courses 1, 2, and 3. Offered in summer only. Letter grading.

Upper Division Courses

100. Readings in Greek Prose. Required course 3. Reading of Plato’s Apology or a text of comparable difficulty.

101A. Homer: Odyssey. (4) Required course 100.

101B. Homer: Iliad. (4) Required course 100.

102. Lyric Poets. (4) Required course 100. Selections from Archilochus to Bacchylides.

103. Aeschylus. (4) Required course 100.

104. Sophocles. (4) Required course 100.

105. Euripides. (4) Required course 100.

106. Aristophanes. (4) Required course 100.

107. Hesiod. (4) Lecture, three hours. Required course 100. Reading of Theogony and excerpts from Works and Days, with emphasis on Hesiod’s place in Greek literature and his role in transmission of Greek mythology.

110. Study of Greek Prose. (4) Required course 100. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose.

111. Herodotus. (4) Required course 100.

112. Thucydides. (4) Required course 100.

113. Attic Orators. (4) Required course 100.

115. Xenophon. (4) Lecture, three hours. Required course 100. Reading of one major work of Xenophon — the Memorabilia, Cyropaedia, Anabasis, Hellenica, or Oeconomicus — in Greek. P/NP or letter grading.

121. Plato. (4) Required course 100.

122. Plato: Republic. (4) Required course 100.

131. Readings in Later Greek. (4) Required course 100. Topics vary from year to year and include “Longinus,” On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolography Graeco.

132. Survey of Byzantine Literature. (4) Required course 100. Readings based on (1) Anthology of Byzantine Prose, ed. Nigel Wilson and (2) Oxford Book of Medieval and Modern Greek Verse, ed. C.A. Trypanis, or if unavailable, Poeti bizantini, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures.

133. Readings in Byzantine Literature. (4) Required course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digennes Akritas.

199. Special Studies in Greek. (2 to 8) Limited to seniors.

Graduate Courses

200A-200B-200C. History of Greek Literature (6-6-6). Lectures on history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in original language.
202A-202B. Homer: Odyssey and the Epic Cycle. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

203. Hesiod. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

204. Homeric Hymns. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205. Seminar: Aeschylus. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

206A-206B. Sophocles. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

207A-207B. Euripides. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

208A-208B. Aristophanes. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

209A-209B. Seminars: Hellenistic Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

211A-211B. Herodotus. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

212A-212B. Thucydides. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

213. Seminar: Greek Historiography. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

214. Demosthenes. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

215. Early Greek Orators. (2 or 4) Studies in works of Antiphon, Andocides, and Lysias. S/U (two-unit course) or letter (four-unit course) grading.

216. Menander. (2 or 4) Preparation: reading knowledge of classical Greek, S/U (two-unit course) or letter (four-unit course) grading.

217A-217B. Greek Lyric Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

217A. Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included.

217B. Pindar and Bacchylides. Study of choicier odes of Pindar and Bacchylides, with special attention to conventions of the epinician.

220. Seminar: Greek Novel. (2 or 4) Seminar, three hours. Study of the Greek romance and its place in Greek literature. Two texts (Chariton: Chaereas and Callirhoe and Longus: Daphnis and Chloe) studied in some detail. S/U (two-unit course) or letter (four-unit course) grading.

221. Seminar: Pre-Socratic Philosophers. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

222A-222B. Plato. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

223A-223B. Aristotle. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

224. Seminar: Post-Aristotelian Philosophy. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

243. Mycenaean Greek. (2 or 4) Seminar, three hours. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. S/U or letter grading.

244. Greek Papyrology. (4) Preparation: reading knowledge of Greek. Introduction to Greek papyri, considered both as historical documents and as carriers of literature.

245. Greek Paleography. (4) Studies in development of book hand in Greek manuscripts earlier than the invention of printing.

250. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

252. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

205A. Beginning Vergil: Selections from Aeneid I-VI. (2 or 4) Requisite: course 100. Reading of entire Aenidian corpus in Latin. May be repeated for credit with change in author and text.

205B. Advanced Vergil. (4) Lecture, three hours. Requisite: course 105A. Reading and discussion of Vergil's Eclogues, Georgics, and second half of the Aenidian. May be repeated for credit with change in readings. P/NP or letter grading.

207. Horace. (4) Requisite: course 100.

208. Ovid. (4) Requisite: course 100. Reading of one or more books from first half of the Aenidian, designed especially for students with only limited experience in reading Latin poetry.

111. Livy. (4) Requisite: course 100.

112. Tacitus. (4) Requisite: course 100.

116. Roman Novel. (4) Lecture, three hours. Requisite: course 100. Reading and discussion of either Petronius's Satyricon or Apuleius's Metamorphoses and development of the genre of prose novel in antiquity. May be repeated for credit with change in author and text.

117. Sallust. (4) Requisite: course 100.

118. Seneca. (4) Requisite: course 100. Selection of Seneca's works read in Latin.

120. The Vulgate. (4) Lecture, three hours. Requisite: course 3. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin.

121. Patristic Texts. (4) Lecture, three hours. Requisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin.

130. Introduction to Medieval Latin. (4) Requisite: course 3. Reading of easy prose texts, with emphasis on basic language training.

131. Medieval Latin Prose. (4) Requisite: course 130. Extensive reading of selected prose texts, with emphasis on idiosyncrasies of medieval Latin.

199. Special Studies in Latin. (2 to 8) Limited to seniors.

Graduate Courses

200A-200B. History of Latin Literature. (6-6) Lectures on history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original.

201. Roman Epic Tradition. (2 or 4) Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Varro, Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

202. Seminar: Catullus. (2 or 4) Detailed consideration of entire Catullian corpus. S/U (two-unit course) or letter (four-unit course) grading.

203A. Elegiac Poetry. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

203B. Propertius. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

204A-204B. Vergil's Aeneid. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205A. Seminar: Vergil's Eclogues. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

205B. Seminar: Vergil's Georgics. (2 or 4) Close reading of Vergil's text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work's place within the tradition of rural poetry. S/U (two-unit course) or letter (four-unit course) grading.

206. Horace. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

207. Roman Comedy. (2 or 4) Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (two-unit course) or letter (four-unit course) grading.

208. Ovid. (2 or 4) Preparation: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.
224. Seneca. (2 or 4) Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philosophical problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

225. Lucretius. (2 or 4) S/U (two-unit course) or letter (four-unit course) grading.

226. Seminar: Roman Stoicism. (2 or 4) Preparation: reading knowledge of Greek and Latin. S/U (two-unit course) or letter (four-unit course) grading.

227. Cicero’s Orations. (2 or 4) Seminar, three hours. S/U (two-unit course) or letter (four-unit course) grading.

228. Seminar: Medieval Latin. (2 or 4) Preparation: at least one upper division Latin course. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (two-unit course) or letter (four-unit course) grading.

229. Sight Translation (2 to 4). Discussion, three hours. Designed for graduate students. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions.

231A-231B. Seminars: Roman Historians. (2 or 4 each) Study of considerable portions of writings of the following. S/U (two-unit course) or letter (four-unit course) grading. 211A. Sallust; 211B. Livy; 211C. Tacitus.

232. Vulgar Latin. (4) History and characteristics of popular Latin; its development into early forms of the Romance languages.

233. Late Latin Poetry. (2 or 4) Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Tacitus and fall of the Roman Empire. May be repeated with change in author.

234. Late Latin Prose. (2 or 4) Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire. May be repeated with change in author.

235. Latin Prose Composition. (4) Development of Latin from the earliest monuments until its emergence in the Romance languages.

236. History of the Latin Language. (4) Development of Latin from the earliest monuments until its emergence in the Romance languages.

237. Neo-Latin Language, (2 or 4) Seminar, three hours. Preparation: at least two upper division Latin courses. Requisite: course 100. Survey of texts by one or more authors from Renaissance to the present, written on related topics. S/U (two-unit course) grading.

238. Teaching Latin. (4) Designed for graduate students. Techniques for teaching; organization of courses; review of content of curriculum offered in junior and senior high schools.

240. History of the Latin Language. (4) Study of the development of Latin from the earliest monuments until its emergence in the Romance languages. Choice of author varies from year to year. Close study of the text, of characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (two-unit course) or letter (four-unit course) grading.

242. Advanced Latin Prose. (2 or 4) Seminar, three hours. Close study of one rhetorical text (e.g., Rhetorica ad Herennium, Cicero’s De Oratore, Seneca’s Controversiae et Suasoriae, Quintilian’s Institutio). With attention to its place in rhetorical tradition. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

244. Neo-Latin Language, (2 or 4) Seminar, three hours. Preparation: at least two upper division Latin courses. Requisite: course 100. Survey of texts by one or more authors from Renaissance to the present, written on related topics. S/U (two-unit course) grading.

245. Teaching Latin. (4) Designed for graduate students. Techniques for teaching; organization of courses; review of content of curriculum offered in junior and senior high schools.

248. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

Scope and Objectives

The major in Communication Studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Em- ploying critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialty are offered: the concentration in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the concentration in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Undergraduate Study

Communication Studies B.A.

Students selecting the major in Communication Studies must complete the required lower division requisites and a minimum of 15 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available during Spring Quarter in the program office.

Preparation for the Major

Required Lower Division Courses: Communication Studies 10, Anthropology 33 or Linguistics 1, Speech 1, one statistics course from Economics M40 or Sociology M18 or Statistics 10. Three additional courses must be selected from Political Science 40, Psychology 10, Sociology 1, and Economics 1 or 2 or 5 or Political Science 30.

Students are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.
Writing Requirement
Required: English Composition 131D.

The Major
Required Core Courses: Communication Studies 100, 101, 150.

Interpersonal Communication Concentration
Required: Eleven courses as follows:
(1) Seven courses, three of which must be in communication studies and one of which must be Communication Studies 115 or 120, from Anthropology 141, Communication Studies 115, M116, 120, M125, 130, M144A, M144B, 197G, 197J, Psychology 137C, M165, 174, 177, 178, Sociology 132 or Psychology 135, Sociology 135 or Psychology 137I, and Sociology 156 or 160.

(2) Two mass communication elective courses from Communication Studies M135, 140, M147, 152, 153, M155, 156, 165, 170, 177, 180, 187, 197A, 197B, 197K, 197N, 197R, 197T.

Mass Communication Concentration
Required: Eleven courses as follows:
(1) Seven courses, three of which must be in communication studies, from Anthropology M140, Communication Studies M135, 140, M147, 152, 153, M155, 156, 160, M161, 165, 170, 171, 175 (or Film and Television 116), 177, 180, 187, 197A, 197B, 197C, 197K, 197N, 197R, 197T, Film and Television 106A, 108, 110A, and Political Science 141B or Psychology 137B or Sociology 133.

(2) Two interpersonal communication elective courses from Communication Studies 115, M116, 120, M124, M125, 130, M144A, M144B, 197G, 197J, Psychology 135 or Sociology 132, Psychology 137I or Sociology 135, Sociology 156 or 160.

Communication Studies
Lower Division Courses
10. Introduction to Communication Studies. (4) Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

15A. Production of Multimedia Software. (4) Description of what goes into a multimedia software program; discussion of different platforms (PC, Mac, network computers, servers, and transmitters) and distribution means (CD-ROM, DVD-ROM, Internet); content organization and layout, data structure and management; and overall planning for prototype and final product. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Special Topics in Communication Studies. (4 each) Seminar, three hours. Variable topics courses; consult Schedule of Classes for topics to be offered in a specific term; P/NP or letter grading. 88A. Mass Communication Theory; 88B. Systems, Institutions, and Policies; 88C. Media Content/Criticism and History; 88D. American Studies; 88E. Language/Interaction Structures; 88F. Social Systematics; 88G. Interpersonal Communication Theory; 88J. Heterogeneous Groups Communication;

Upper Division Courses
100. Communication Theory. (4) Requisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

101. Freedom of Communication. (4) Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

116. Communication and Conflict in Families. (4) (Same as Psychology M176.) Lecture, 90 minutes; discussion, 90 minutes. Requisites: Psychology 10, 100A, 100B, 127. Examination of (1) dysfunctional communication and conflict in families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce); P/NP or letter grading.

M117. Rhetoric of Rule. (4) (Same as French M143.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV’s and President Clinton’s attempts to manipulate their image in the “media” of their respective cultures.

120. Principles and Types of Group Communication. (4) Requisite: course 100. Analysis of purposes, principles, and types of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

M124. Psychology of Language and Gender. (4) (Same as Psychology M137J and Women’s Studies M127J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; “women’s” and “men’s” language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

M125. Talk and Social Institutions. (4) (Same as Sociology CM125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. P/NP or letter grading.

130. Cultural Factors in Interpersonal Communication. (4) Requisite: course 100. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and intraracial communications in the small group configuration.

M135. Narrative in Mass Communication. (6) (Same as Honors Collegium M135.) Seminar, four hours; outside study, 10 hours. Examination of narrative as a primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

140. Theory of Persuasive Communication. (4) Requisite: course 100. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences.

M144A-M144B. Conversational Structures I, II. (4) (Same as Sociology CM124A-CM124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. M144A. Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organizing of repair, and some basic sequence structures with limited expansions. M144B. Requisite: course M144A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

M147. Sociology of Mass Communication. (4) (Same as Sociology M178J.) Requisite: course 100. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

150. Methodologies in Communication Research. (4) Lecture, three hours; discussion, one hour. Requisite: course 100. Critical studies of quantitative and qualitative methodologies in communication research.

153. The Media and Aggression against Women. (4) Lecture, two hours; discussion, two hours. Requisite: course 152. Study of the growing body of literature on relationships among mass media and the incidence of aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media.

M155. Information Superhighway. (4) (Formerly numbered 155.) (Same as Policy Studies CM110.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services.

156. Human/Computer Communication. (4) Preparation: completion of the seven preparation for the major courses. Limited to communication studies majors. Survey of behavioral, design, and evaluation issues in human/computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

M157. Culture, Identity, and Media. (4) (Same as Policy Studies M111.) Discussion, three hours. Interplay of national culture and identity with electronic media, both "old" and "new." Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia.

160. Political Communication. (4) Requisites: courses 100, 101. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberations of the impact of the media.

M161. Electoral Politics: Mass Media and Elections. (4) (Same as Political Science M141D.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 160. Designed for juniors/seniors. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be taken for a maximum of four units per term. P/NP grading.

185. Field Studies in Communication. (2 to 4) Requisite: course 10. Designed for juniors/seniors. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be taken for a maximum of four units per term. P/NP grading.

187. Ethical and Policy Issues in Institutions of Mass Communication. (4) Requisites: courses 10, 101. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

189. Multicultural Television and Society. (4) Study and evaluation of cross-cultural, social, and psychological characteristics of selected national and international television programs and their implications for social learning in children. Designed to systematically study multicultural attributes related to sociocultural images and portrayals of television programs using various evaluation models and techniques.

191H. Research Methods in Communication (Honors). (4) Seminar, three hours. Requisite: course 150. Provides a working understanding of research methods in communication studies, particularly related to study of mass media effects, to give students the background necessary to design, implement, and report their own research projects. Letter grading.

196H. Undergraduate Honors Proseminar. (4) Preparation: 3.5 grade-point average in communication studies major, 3.3 grade-point average overall. Limited to seniors. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

199. Special Studies. (2 to 8) To be arranged with faculty member who directs the study. Limited to seniors. Independent studies for seniors who desire intensive or specialized investigation of selected research topics.
Adjunct Associate Professors
Martin Anderson, Ph.D.
Carol Archie, M.D.
Marion Taylor Baez, Ph.D., R.D.
Daniel H. Ershoff, Dr.P.H.
Joanne Leslie, Ph.D.
C. Kevin Malotte, Ph.D.

Adjunct Assistant Professors
Helen DuPlessis, M.D., M.P.H.
Vicki Ebin, Ph.D.
Janet Frank, Ph.D.
Ronald Halbert, M.D.
Kimberley Shoad, Dr.P.H.
Bonnie Taub, Ph.D.
Antonette K. Yancey, M.D., M.P.H.

Scope and Objectives
The Department of Community Health Sciences focuses on the determinants of health within the context of the social structure, community, health care systems, and family units. Of particular interest is how health-related behaviors of individuals are influenced by and interact with conditions in the social, cultural, physical, and biological environment to influence health status, with particular emphasis on identifying, evaluating, and discouraging health-damaging behaviors and facilitating health-promoting behaviors. The curriculum seeks to integrate basic and applied public health theories and methods in applying them to real problems of human populations. Assessment, planning, and evaluation are common themes in the department’s educational programs, which provide concentrations in the areas of health education/promotion, international family health, public health nutrition, public health policy, and sociocultural aspects of health. Students specializing in maternal and child health complete one of these concentrations as well as additional coursework.

The department offers both professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs generally assume positions in the planning, administration, and evaluation of public health programs and policies, both in the U.S. and abroad, which have as their objective the maintenance and improvement of the health of individuals, families, communities, and populations. Graduates of the doctoral programs assume teaching and research positions in a wide variety of settings, including universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degrees
The Department of Community Health Sciences offers the Master of Science (M.S.) degree in Community Health Sciences. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission
Admission requirements for the M.S. program in Public Health are the same as for the M.P.H. See the admission section under Public Health Schoolwide Programs for information on the M.P.H. program.

Areas of Study
Consult the graduate adviser.

Course Requirements
Students must complete at least one year of residence in graduate status at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Community Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses are required for the degree.

Mandatory core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived for students who have taken a similar course elsewhere and can pass the waiver examination.

Community Health Sciences 210, 211A-211B, 212, 213, Biostatistics 406, and four to six department courses (selected from an approved list) are required. Elective courses, selected in consultation with an adviser, must include the Community Health Sciences 270 series, 283 and research methods courses. Normal program length is six quarters.

Only courses in which a grade of C- or better is received may be applied toward the requirements for a master’s degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan
If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on the major area of study must be passed. Students who fail may be reexamined once.

The preparation of a major written research report is required, and it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Thesis Plan
If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before students may file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree
Admission
In addition to the University minimum requirements, the department requires for Ph.D. degree in Public Health (1) a master’s degree in public health (either an M.P.H. or M.S.) or other appropriate degree in a related field with a grade-point average of at least 3.5 for graduate studies; (2) a combined Graduate Record Examination (GRE) score of 1,200 for the verbal and quantitative sections; equivalent scores on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT) may be substituted at the discretion of the department; (3) a score of at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English; (4) an example of published or other written work; and (5) acceptance by an initial doctoral adviser in the department.

It is recommended that applicants contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

Major Fields or Subdisciplines
Faculty in the department represent a range of disciplines and focus their research and curriculum in five areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Ph.D. students may design their programs in one or more of these areas.

Course Requirements
The following courses are required if students have not already taken them or their equivalents in the course of the master’s degree or other postgraduate work: Biostatistics 100A, 100B, and 406; Community Health Sciences 210, 211A-211B, 212; Epidemiology 100; Health Services 100; Environmental Health Sciences 100. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to any of the above courses not already taken, students must take a minimum of 48 units in residence in the doctoral program, to include Community Health Sciences 270A - 270B. No more than four units may be individual studies (Community Health Sciences 596). Community Health Sciences 242 or 286 (Doctoral Roundtable) is required every quarter from the first year of residency until advancement to candidacy. The Doctoral Roundtable
Community Health Sciences

Lower Division Courses

Graduate Courses

200. Global Health Problems. (4) Lecture, two hours; discussion, two hours. Overview of health profile of the world in the 20th century. Global health problems and methods by which they have been dealt with in context of the Alma Ata goal of “health for all by year 2000.” Letter grading.

210. Community Health Sciences. (4) Lecture, three hours. Preparation: one social sciences course. Basic concepts, relationships, and policy issues in the field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective. Letter grading.

211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (4-4) Lecture, three hours; discussion, one hour; outside assignments, eight hours. Requisite: course 210. Course 211A is requisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules. Letter grading.

212. Advanced Social Research Methods in Health. (4) Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Requisites: courses 211A-211B, Biostatistics 100B, 406. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques. Letter grading.

214. Issues in Program Evaluation. (4) Discussion, three hours; reading and research paper, one hour. Requisite: course 212. Advanced seminar which explores problems of planning and implementing evaluation research in context of local demonstration projects. S/U or letter grading.

M216. Qualitative Research Methodology. (4) (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. S/U or letter grading.

218. Questionnaire Design and Administration. (4) Lecture, two hours; discussion, one hour; laboratory, one hour; outside assignments. Requisites: courses 211A-211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

219. Strategies for Multivariate Data Analysis. (4) Discussion, three hours; preparation: one multivariate statistics course. Designed for graduate students. Translation of theory into a data analytic plan, with special emphasis on social epidemiology; application of this analytic plan to real data; and interpretation of results obtained through multivariate analysis. Letter grading.

220. Demography of Women. (4) Lecture, four hours. Overview of demography of women, with focus on the U.S. Areas include trends and differentials in fertility, marital patterns and living arrangements, educational attainment, and labor force participation. Letter grading.
221. Introduction to Sociocultural Aspects of Health. (4) Lecture, three hours; discussion, one hour. Examination of how social stratification and culture relate to health and health-related behavior. Consideration of four major status characteristics: age, ethnicity, and gender, and socioeconomic status. Description of epidemiological patterns and discussion of social meaning of the four characteristics. Letter grading.

228. Drug Abuse Prevention. (4) Discussion, three hours. Identification and discussion of strategies for prevention of drug abuse at individual and community levels, particularly in minority populations. Letter grading.

230. Family and Sexual Violence. (4) Lecture, three hours; community, three to four hours. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as in response of social service, medical, and criminal justice systems. S/U or letter grading.

231. Maternal and Child Nutrition. (4) Lecture, four hours; Nutrition M245A-M245B. Discussion of how children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition and mental development, impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service. Letter grading.

M232. Determinants of Health. (4) (Same as Health Services M242.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

234. Obesity and Nutrition: Multidisciplinary Perspective. (2) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: admission to UCLA postdoctoral fellowship training program in obesity and nutrition. Multidisciplinary introduction at advanced graduate level to research methods and topics on obesity and related conditions in humans and in relevant animal and in vitro models. S/U or letter grading.

235. The Family and Mental Health. (4) Lecture, two hours; discussion, two hours; assignments, eight hours. Emphasis on how social organization of the family, relationships among family members, and extratraditional roles of family members contribute to or detract from psychological well-being of spouses, parents, and children. S/U or letter grading.

M236. Human Resources and Economic Development. (4) (Same as Education M252C.) Lecture, four hours. Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. S/U or letter grading.

238. Evolving Paradigms of Prevention: Interventions in Adolescence. (4) Seminar, three hours. Designed for graduate students. Introduction to organizing principles which guide and intervention in adolescent populations (identity formation, access to care, knowledge/attitudes/behavior influences) and provide a basis for understanding pivotal issues in health promotion, morbidity, and mortality. Letter grading.

M239. Race and Ethnicity as a Concept in Practice and Research. (4) Formerly numbered 239.) (Same as Sociology M250.) Discussion, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners. Letter grading.

M245A-M245B-M245C. Child Abuse and Neglect (2-2-1). (Same as Dentistry M300.5A-M300.5B-M300.5C. Lecture, two hours; discussion, one hour. Laboratory, one hour. Preparation: admission to UCLA postdoctoral fellowship training program in child abuse and neglect. Prevalence of child abuse and neglect, with emphasis on impact of social and psychological factors, including gender roles and socioenvironmental factors associated with general susceptibility to disease and subsequent mortality. S/U or letter grading.

246. Women’s Roles and Family Health. (4) Lecture, two hours; discussion, one hour. Rapidly changing roles of women throughout the world are having important effects on women’s own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion and class discussion provided through key theoretical works. S/U or letter grading.

247. Population Change and Public Policy. (4) Lecture, four hours. Examination of international population change, population-related policies, and public health implications of demographic processes. Letter grading.

248. Women’s Mental Health. (4) Discussion, three hours. Designed for graduate students. Prevalence of psychological distress and psychiatric disorder among women, with emphasis on impact of social and cultural factors, including gender roles and socialization, stratification and inequality, work and family roles, diagnosis, help-seeking behavior, and treatment. Letter grading.

M249L. Ethical Issues in Public Health. (4) (Same as Health Services M249L.) Lecture, four hours. Requisites: Health Services 200A-200B-200C. Case conferences, based on real-life ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2) (Same as Epidemiology M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which warrant discussion (e.g., M239). Discussion of research and prevention of pediatric injuries. Letter grading.

257. Program Planning in Community Disaster Preparedness. (4) Lecture, four hours; outside study, eight hours; courses 211A-211B, 226. Overview of epidemiology and emergency management principles combined to design, plan, implement, and evaluate community disaster preparedness programs, including needs assessment, identification of targets, population objectives, program planning, and process, outcome, and impact evaluation. Letter grading.

270A-270B. Foundations of Community Health Sciences. (4-4) Lecture, four hours. Requisite: course 210. Course 270A is required to 270B. Designed for doctoral students. In-depth analysis of theories, methods, and research on which community health sciences are based. Letter grading.

272. Social Epidemiology. (4) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociocultural, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioeconomic factors associated with general susceptibility to disease and subsequent mortality. S/U or letter grading.

273. Social Epidemiology of Chronic Disease. (4) Lecture, two hours; discussion, one hour. Requisite: Epidemiology 100. Relationship between sociocultural, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other sociocultural factors associated with chronic diseases. S/U or letter grading.

M274. Health Professions. (4) (Same as Sociology M249A.) Lecture, three hours. Requisite: course 210. Sociological examination of concepts “health” and “illness” and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. S/U or letter grading.

277. Advanced Community Health Education. (4) Lecture, two hours; discussion, two hours. Requisite: course 210. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program. Letter grading.
280. International Health Education: Training and Development. (4) Lecture, four hours. Preparation: one upper division research methods or epidemiology course. Requisite: course 210. Introduction to an international perspective of health education and health promotion. Survey of current developments in health education in both developed and developing countries. Letter grading.

282. Communication in Health Promotion and Education. (4) Lecture, two hours; discussion, two hours. Requisite: course 210. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies. Letter grading.

283. Aging and Health Behavior. (4) Discussion, three hours. Requisite: course 210. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among the aged. Letter grading.

284. Sociocultural Aspects of Mental Health. (4) Discussion, three hours. Designed for graduate students. Examination of how society shapes mental health of its members and lives of those who have been identified as having mental health problems. Inclusion of various demographic differences (e.g., gender, ethnicity) and how it is socially constructed. Letter grading.

285. Aging, Health, and Society. (4) Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of the elderly in America. Leading gerontological theories and major issues that affect the aged, showing how these theories and issues influence health status, health promotion, and illness among the elderly. S/U or letter grading.

286. Seminar: Behavioral Sciences and Health. (2 to 4) Seminar, two hours. Recent significant contributions of behavioral sciences to understanding health and illness, with selected and varying topics each term. May be repeated for credit. S/U grading.

M287. Politics of Health Policy. (4) (Same as Health Services M287.) Lecture, three hours; discussion, one hour. Requisite: course 210 or Health Services 200A-200B. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors. Letter grading.

288A-288B. Current Problems in Health Education. (4-4) Lecture, one hour; discussion, three hours. Preparation: three public health and/or social sciences courses. Requisite: course 210. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, family communication, and chronic diseases. In Progress and S/U grading.

289. Drug Abuse in Pregnancy: Special Focus on Adolescents and Utilizing Secondary Data Sources. (4) (Formerly numbered 298A.) Lecture, three hours; clinical placement. Designed for graduate students. Multidisciplinary graduate seminar combining didactic material on substance abuse in pregnancy, participation in ongoing research, and clinical experience in on- and off-campus settings. Medical, social, economic, and legal issues affecting pregnant substance abusers. Letter grading.

290. Race, Class, Culture, and Aging. (4) Lecture, three hours; discussion, one hour. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and the nation. Exploration of cultural and structural influences on health and lived experiences of these elders. Letter grading.

291. Health Policy and the Aged. (4) Lecture, three hours; discussion, one hour. Examination of political, economic, and social forces that shape health policy for the aged, identifying failings in those policies within framework of broader health policy problems. Letter grading.

292. Communication and Media Development in Health Promotion/ Education. (4) Lecture, three hours; field practice, one hour. Requisites: course 210 or permission of instructor. Seminar on aspects of communications planning, social marketing, mass media, and communications evaluation theory and practice. Letter grading.

294. Social and Behavioral Factors of AIDS/HIV: A Global Perspective. (4) Lecture, four hours. Requisites: course 100 and Epidemiology 100 or prior social sciences courses. Overview of social and behavioral factors which influence both the transmission as well as prevention of HIV/AIDS throughout the world. Letter grading.

295. Social and Behavioral Topics in Disaster Relief and Humanitarian Assistance. (2) (Formerly numbered 298.) Lecture, two hours. Designed for graduate students. Overview of broad interdisciplinary issues which necessarily converge in fields of disaster preparedness and implementation. Introduction to both theoretical and problem-solving strategies. Letter grading.

296. Advanced Research Topics in Community Health Promotion. (2) (Formerly numbered 296A-296L and 296M-296Z.) Discussion, two to four hours. Advanced study and analysis of current topics in community health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M299. Intervention to Reduce HIV and Its Consequences. (4) (Same as Psychiatry M289.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.

400. Field Studies in Public Health. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. or M.P.H. degree. Letter grading.

411. Issues in Cancer Prevention and Control. (4) (Formerly numbered 411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

420. Children with Special Health Care Needs: Systems Perspective. (4) (Same as Social Welfare M290I.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices which impact health, safety, and education of children and adolescents with special needs. Letter grading.

425. Child Advocacy: Skills for Effective Action. (4) (Formerly numbered M292BC.) Seminar, three hours; fieldwork, one hour. Designed for graduate students. Use of case method approach to involve students in small group discussion and in fieldwork projects about which they have special interest. Letter grading.

430. Advanced Issues in International Health. (4) Lecture, two hours; discussion, two hours. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance. S/U or letter grading.

432. Perinatal Health Care: Principles, Programs, and Policies. (4) Lecture, three hours; discussion, one hour. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measures, programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues. S/U or letter grading.

433. Reproductive Health: Demographic Applications. (4) Lecture, four hours. Introductory aspects of population dynamics; contraceptive biology (male and female); contraceptive methods; fertility-related behaviors and STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness. Letter grading.

434A. Maternal and Child Health in Developing Areas. (4) Lecture, four hours. Requisite: course 231. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieus. S/U or letter grading.

434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries. (2) Seminar, and social movements; media and public opinion; and other factors. Letter grading.

435. Seminar: Advanced Issues in Women's Health. (2) Seminar, two hours. Requisite: course 246 or 431. Provides a more advanced and in-depth understanding of social and cultural influences in health and illness, and considerations of women's place in scientific discourse. Examination of a series of case studies as a starting point for discussion. Letter grading.

M436A-M436B. Child Health, Programs, and Policies. (4-4) (Formerly numbered 436A-436B.) (Same as Health Services M449A-M449B.) Lecture, four hours. Requisite: Health Services 100. Course M436A is requisite to M436B. Examination of history and current policies and trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

437. Principles and Practice of Preventive Medicine I. (4) Lecture, six hours; discussion, two hours. Requisite: course 231 or permission of instructor. Designed for graduate students. Comprehensive review and evaluation of scientific background and application of principles of preventive medicine, with primary focus on the family and the disadvantaged. Letter grading.
436. Research Seminar: Community Child Health Services. (2) Seminar, one hour; laboratory, one hour; field trips, two hours. Examination and development of evaluation strategies for existing community child health services at the local and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel. S/U or letter grading.

441. Advanced Program Planning and Evaluation in International Health. (4) Lecture, two hours; discussion, two hours. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation. Letter grading.

444. Anthropometric and Dietary Aspects of Nutritional Assessment. (4) Lecture, two hours; laboratory, two hours. Requisite: course 443. Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation. Letter grading.

445. Food and Nutrition Planning: Policies and Programs in World Context. (4) Lecture, two hours; discussion, one hour; student participation, one hour. Requisite: course 434A. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and governmental and international interventions. S/U or letter grading.

447. Health Issues in the Middle East. (4) Lecture, four hours. Requisite: course 200 or 231 or 434A. Recommended: background in Islamic or Middle Eastern studies. Current health issues and problems of countries in the Middle East and implications for socioeconomic development. Review of economic, demographic, and cultural variation of the region to provide background for discussion of trends and patterns of health and nutritional status of population in the area. Letter grading.

448. Nutrition Policies and Programs: Domestic and International Perspectives. (4) Lecture, two hours; discussion, two hours; field visits. Preparation: one nutrition sciences course and/or nutrition program experience. Nutrition programs and policies in the U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and nongovernmental agencies. Emphasis on meeting needs of vulnerable populations. Letter grading.

449. Nutrition and Chronic Disease. (4) Lecture, four hours. Preparation: one graduate or undergraduate course each in chemistry or biochemistry, physiology, and nutritional sciences, or M.D. degree. Advanced-level seminar on nutritional needs of healthy individuals, current knowledge of role of nutrition in disease prevention, nutritional and metabolic responses to disease, and role of nutritional therapy in management of disease. Letter grading.

451. Post-Disaster Community Health. (4) Lecture, four hours. Requisite: course 235. Examination of how public health research and practices can be combined to address community health needs. Identification of disaster-related health problems, data collection strategies, and service delivery approaches in a post-disaster environment. Letter grading.

457. Introduction to Occupational and Environmental Health Education. (4) Formerly numbered 470. (Same as Urban Planning M470.) Lecture, four hours. Preparation: at least three social science courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

474. Self-Care and Self-Help in Community Health. (4) Lecture, two hours; discussion, two hours. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health. S/U or letter grading.

480. Health Education in Clinical Settings. (4) Lecture, two hours; discussion, two hours. Requisites: courses 271, 282, Health Services 100. Analysis of role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education. S/U or letter grading.

482. Practicum: Community Health Sciences. (4) Discussion, two hours; fieldwork, up to 20 hours. Requisites: courses 210, 211A:211B. Understanding of professional practice in health-related organizations. Letter grading.

483. Leadership Development and Empowerment for Health Promotion and Health Education. (4) Lecture, three hours; discussion, one hour. Requisites: courses 210, 211A-211B. Development of basic understanding of and competency in leadership development and empowerment support for health promotion in multicultural and distressed communities (e.g., south-central Los Angeles). Letter grading.

485. Resource Development for Community Health Programs. (4) Lecture, three hours; fieldwork, one hour. Designed for graduate students. Overview course of fund and resource development for public health and community-based programs. Lectures and workshops include developing grant proposals, researching funding sources, evaluating proposals, developing volunteer and in-kind resources, and implementing capital campaigns. Letter grading.

490. Professional Writing for Public Health. (2) Lecture, two hours. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

495. Teacher Preparation in Public Health. (2) Lecture, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Shu-mei Shih, Ph. D.

Lecturer
Marilyn Manners, Ph.D.

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Department faculty.
Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods of literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Undergraduate Study

Comparative Literature B.A.

Preparation for the Major

Required: Two courses from the Comparative Literature 1 or 2 series or comparable lower division courses in other departments; completion of the college English Composition requirement; literary proficiency in at least one language other than English, to be demonstrated by successful completion of (1) two years of the college language sequence or its equivalent or (2) an upper division literature course in the original language.

The Major

Required: Thirteen courses, of which (1) a minimum of four must be from comparative literature offerings, including Comparative Literature 100, 197, and at least two additional comparative literature courses selected from M101 through C195B; (2) four upper division literature courses using original language texts in the major language area; (3) three upper division literature courses using original language texts in the minor language area (students may petition the undergraduate adviser to take three upper division literature courses in translation if their major area is in a language other than English); (4) two upper division electives in a third language or a field such as anthropology, art, art history, classics, East Asian languages and cultures, film, folklore, history, music, philosophy, or political theory, to be selected in consultation with the undergraduate adviser.

Comparative Literature Minor

The Comparative Literature minor offers students interested in literature and the humanities the opportunity to gain insight into the critical problems and theories addressed by comparative literature and to apply that knowledge in literature and comparative literature courses.

To enter the minor students must have fulfilled the English Composition requirement, have completed 40 units with an overall grade-point average of 2.0 or better, have taken at least one year or equivalent of a language other than English, and file a petition with either the faculty or staff undergraduate adviser, 212 Royce Hall, (310) 825-4620.

Required Courses (28 units): (1) Four upper division comparative literature courses (one course from Comparative Literature 1A through 2D may be substituted); (2) two upper division courses in one literature (e.g., Arabic, Chinese, English, French, German, Korean, Russian, Spanish) in the original language; and (3) one upper division course in a second literature in the original language (one level six foreign language course may be substituted). If students complete two upper division courses in a language other than English, they may petition to take one upper division course taught in English translation to fulfill the third requirement.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of Comparative Literature offers the Master of Arts (M.A.) degree in Comparative Literature.

Admission

A bachelor’s degree in literature, ancient or modern, is a requisite for admission to the M.A. program. Applicants whose B.A. program lacks a literature major are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation. Literary proficiency in one foreign language and at least an elementary knowledge of a second one are expected.

Areas of Study

Each student’s study plan should combine the work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period such as Romanticism, a genre such as the novel, or a theoretical problem.

The major literature is the area of primary concentration. Students specialize in one historically defined period (such as medieval, Renaissance and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, students focus on a period comparable to the area of specialization in the major literature, although they may not have as much historical depth and breadth as in the major literature.

Course Requirements

The following 12 courses are the minimal course requirements. Some students take extra courses to make up deficiencies.

(1) Four courses in comparative literature: Comparative Literature 200; one course whose primary focus is theory, for example, Comparative Literature 290, 291, 292, or 293; two courses that deal with primary texts in a comparative context (courses on genre, period, or a special topic that examines primary texts).

(2) Five courses (a minimum of three must be graduate courses; the other two may be upper division) in the major literature.

(3) Three courses, at least one of which must be graduate, in the minor literature. Periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in the major literature should be studied.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement, but only one of the courses may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: the student receives an M.A. degree and is allowed to progress toward the Ph.D., the student is granted a terminal M.A., or the student fails the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature and the works of at least 10 authors in the minor literature. Normally, the reading list consists of approximately 24 to 30 works in the
major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the department office.

Thesis Plan
None.

Doctoral Degree
Admission
For entrance into the program leading to the Ph.D. degree in Comparative Literature, an M.A. degree in Comparative Literature is normally required. Applicants who have an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Three letters of recommendation should be submitted. Those entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a permission to proceed examination before being allowed to continue toward the Ph.D. They should be taken within the first year of residence.

The two written examinations (two hours each) are based on reading lists of approximately 10 to 12 items in the major field and 8 to 10 items in the minor field. Students who transfer from another department at UCLA are not required to take a permission to proceed examination in the area of their M.A. They are, however, required, to complete an examination in their minor field. Permission to proceed examinations should be passed by the end of the first year of residence.

Major Fields or Subdisciplines
The study plan for the Ph.D. should combine the work in one major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (for example, a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology. A related field such as art history, film, or gender studies may be substituted for one minor literature after program approval of a student's petition.

Course Requirements
All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. If the M.A. is not in Comparative Literature at UCLA, students must take three of the required six courses in comparative literature and one from each of the major and minor literatures. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, students are strongly advised to take at least two and usually three courses in each chosen literature.

For those who have taken the M.A. in Comparative Literature at UCLA, the following courses are required: two courses in comparative literature, one of which should be theoretically oriented; two to three courses in the second minor; two courses in the major, preferably in the period of emphasis, plus whatever additional courses might be required by the comparative literature committee and/or graduate advisers. None of the minimum required courses may be in the 500 series.

Written and Oral Qualifying Examinations
The examinations are both written and oral and may be taken over a period of two to three quarters. The written examinations are based on reading lists for the major and two minor literatures.

Ph.D. qualifying examinations should be taken at the end of the second year after the M.A. However, they must be taken by the end of the third year after the M.A. (ninth quarter). The examinations are composed of written and oral sections.

There is one three-hour historical examination in the major area. The reading list for the examination consists of 40 items chosen in consultation with the examining professor and with the approval of a core member of the comparative literature committee. No more than 20 of the items may be in the approximately 100-year period of emphasis.

For the minor fields, there are two options:

1. Students take one three-hour written examination in each minor field, based on approved reading lists of 25 to 30 items or
2. Students take one three-hour written examination in the minor field not included in the M.A. examinations and, with the approval of the program chair and the agreement of the examining professor, in lieu of the written examinations in the minor literature originally presented for the M.A., may arrange with the examining professor to write a paper of 20 to 30 pages on a topic or topics to be chosen in consultation with the examining professor. The paper would also be based on approved reading lists.

Students submit a detailed dissertation prospectus (approximately 20 pages) for the University Oral Qualifying Examination. The two to three-hour oral qualifying examination raises questions pertaining to all written examinations as well as any questions concerning the dissertation prospectus. All three of the candidate's fields should be included in the discussion.

The University Oral Qualifying Examination must be taken within 60 days after the last written examination is passed. The department allows a maximum of two attempts to pass the Ph.D. examinations.

Comparative Literature
Lower Division Courses

1A. World Literature: Antiquity to Early Middle Ages. (4) (Formerly numbered Humanities 1A.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as Iliad or Odyssey, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as Gilgamesh or Tristan and Isolde. P/NC or letter grading.

1B. World Literature: Late Middle Ages to the 17th Century. (4) (Formerly numbered Humanities 1B.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's Canterbury Tales, Dante's Divine Comedy, Boccaccio's Decameron, Cervantes' Don Quixote, Shakespeare, Calderón, Molière, and Racine. P/NC or letter grading.

1C. World Literature: Age of Enlightenment to the 20th Century. (4) (Formerly numbered Humanities 1C.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens. P/NC or letter grading.

1D. Great Books from the World at Large. (4) (Formerly numbered Humanities 1D.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NC or letter grading.

1E. Introduction to Classical Traditions of East Asia. (4) (Formerly numbered Humanities 1E.) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NC or letter grading.

2A. Survey of Literature: Antiquity to Early Middle Ages. (5) (Formerly numbered Humanities 2A.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as Iliad, Gilgamesh, Greek tragedies, Aeneid, Petronius, St. Augustine, or Tristan and Isolde. P/NC or letter grading.

2B. Survey of Literature: Late Middle Ages to the 17th Century. (5) (Formerly numbered Humanities 2B.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's Divine Comedy, Cervantes' Don Quixote, Shakespeare, Calderón, Molière, and Racine. P/NC or letter grading.
2C. Survey of Literature: Age of Enlightenment to the 20th Century. (5) (Formerly numbered Humanities 2C.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfactory achievement of prerequisite A requirement. Not open for credit to students with credit for course 1C. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens. P/NP or letter grading.

2D. Survey of Literature: Great Books from the World at Large. (4) (Formerly numbered Humanities 2D.) Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of prerequisite A requirement. Not open for credit to students with credit for course 1D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

Upper Division Courses

100. Introduction to Comparative Literature: Histories, Theories, Practices, and Perspectives. (4) Lecture, three hours. Preparation: satisfaction of prerequisite A and English Composition requirements. Requires: two courses from Comparative Literature 1 or 2 series or English 10 series or Spanish 60 series, etc. Seminar-style introduction to discipline of comparative literature presented through a series of texts illustrative of its formation and practice.

102. Classical Tradition: Epic. (4) (Formerly numbered Humanities 102.) Seminar, three hours. Emphasis on varieties of comic expression. Texts and individual assignments range from Renaissance and/or modern period. Designed for upper division literature majors. P/NP or letter grading.

103. Classical Tradition: Tragedy. (4) (Formerly numbered Humanities 103.) Seminar, three hours. Emphasis on how poets build on work of their predecessors. Designed for upper division literature majors. P/NP or letter grading.

120. The Individual and Society in the Renaissance. (4) (Formerly numbered Humanities 120.) Lecture, three hours; discussion, one hour. Emphasis on humanist ideas and values. May be concurrently scheduled with course C209. P/NP or letter grading.

121. Renaissance Drama. (4) (Formerly numbered Humanities 121.) Lecture, three hours. Designed for upper division literature majors. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C222. Undergraduates read all works in translation. P/NP or letter grading.

140. Dramatic Theory and Criticism in German and English Romanticism. (4) (Formerly numbered Humanities 140.) Seminar, three hours. Emphasis on role of author and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C240. Undergraduates read all works in translation. P/NP or letter grading.

150. The 19th-Century Novel. (4) (Formerly numbered Humanities 150.) Lecture, three hours. Designed for upper division literature majors. Comparison of novels of the 19th and 20th centuries. May be concurrently scheduled with course C250. Undergraduates read all works in translation. P/NP or letter grading.

151. Crisis of Authority. (4) (Formerly numbered Humanities 151.) Seminar, three hours. Designed for juniors/seniors. Darwin's Origin of Species underlines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(i)zed and male-dominated society appears in works such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C251. P/NP or letter grading.

152. Symbolist Tradition in Poetry. (4) (Formerly numbered Humanities 152.) Seminar, three hours. Designed for upper division literature majors. Interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Mayakovsky, Brecht, Fritz Lang, Duchamp, Bunuel, Lispector, Warhol, Orlan. Emphasis on cross-fertilization among different kinds of aesthetic expression. P/NP or letter grading.

154. Adventures of the Avant-Garde. (4) Seminar, three hours; outside study, nine hours. Designed for upper division literature majors. Interdisciplinary study of avant-garde literature and art, including futurism, Dadaism, Expressionism, Surrealism, new avant-gardes. Works by Marinetti, Boccioni, Picasso, Stein, Malevich, Popova, Mayakovsky, Brecht, Fritz Lang, Duchamp, Bunuel, Lispector, Warhol, Orlan. Emphasis on cross-fertilization among different kinds of aesthetic expression. P/NP or letter grading.

157. Colonial Encounters. (4) (Formerly numbered Humanities 157.) Seminar, three hours. Discussion of how a Western textual system restricts cultures of colonized peoples to an encounter with the European. As a means of understanding limits to a European frame of reference, reading of English literary works alongside their postcolonial counterparts. P/NP or letter grading.

158. Colonial Encounters. (4) (Formerly numbered Humanities 158.) Seminar, three hours. Discussion of how a Western textual system restricts cultures of colonized peoples to an encounter with the European. As a means of understanding limits to a European frame of reference, reading of English literary works alongside their postcolonial counterparts. P/NP or letter grading.

160. Topics in Literature and Visual Arts. (4) (Formerly numbered Humanities 160.) Lecture, three hours; outside study, nine hours. Designed for upper division literature majors. P/NP or letter grading.

161. Fiction and History. (4) (Formerly numbered Humanities 161.) Seminar, three hours. Designed for upper division literature majors. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts selected to illustrate historical influence on literary history. May be concurrently scheduled with course C261. P/NP or letter grading.
C163. Crisis of Consciousness in Modern Literature. (4) Formerly numbered Humanities C163.) Seminar, three hours. Designed for upper division literature majors. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Beckett, and Stevens. May be concurrently scheduled with course C263. Undergraduates read all works in translation. P/NP or letter grading.

C164. The Modern Continental Novel. (4) Formerly numbered Humanities C164.) Seminar, three hours. Designed for upper division literature majors. Study of the modern novel’s development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with course C264. Undergraduates read all works in translation. P/NP or letter grading.

M165. The Holocaust in Literature. (4) Formerly numbered Humanities M165.) (Same as Jewish Studies M165.) Lecture, three hours. Required of all juniors/seniors and of all students interested in Holocaust studies. An examination of the Holocaust in the literature of the Jews, the German, and the general world. An exploration of the ways in which literature records the Holocaust and reflects the larger landscapes of life affected by the Holocaust. Concurrently scheduled with course C265. Undergraduates read all works in translation. P/NP or letter grading.

M168. Korean American Literature. (4) Formerly numbered Humanities M168.) (Same as Asian American Studies M132A.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

M171, Chinese Immigrant Literature and Film, (4) Formerly numbered Humanities M171.) (Same as Asian American Studies M132B and Chinese M153.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues. P/NP or letter grading.

C172. The Postmodern Novel. (4) Formerly numbered Humanities C172.) Seminar, three hours. Designed for upper division literature majors. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with course C272. Undergraduates read all works in translation. P/NP or letter grading.

C173. Postmodernism and the Third World. (4) Formerly numbered Humanities C173.) Seminar, three hours. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C273. P/NP or letter grading.

C174. Film and Literature of the Spanish-Speaking World. (4) Formerly numbered Humanities M174.) (Same as Spanish M161.) Lecture, three hours. Exploration of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

190. Semiotics of Story and Film. (4) Formerly numbered Humanities 190.) Seminar, three hours. Designed for upper division literature majors. Investigation of theoretical aspects of semiotics and their application to specific narratives in prose and film. P/NP or letter grading.

192. Walter Benjamin’s Literary Criticism. (4) Formerly numbered Humanities 192.) Seminar, three hours. Designed for junors/seniors. Some knowledge of German desirable but not required, as all texts are available in English translation. Walter Benjamin has emerged in recent years as one of the most influential critics of the 20th century. Course approaches his work primarily through a reading of his specifically literary criticism which occupies a central place in his work. P/NP or letter grading.

194. Variable Topics. (4) Formerly numbered Humanities 194.) Seminar, three hours. Designed for juniors/seniors. Study of limited periods and specialized issues and approaches in literary theory, especially in relation to other modes of discourse such as history, philosophy, psychology, linguistics, anthropology. Consult Schedule of Classes for topics to be offered in a specified term. P/NP or letter grading.

C195B. Derrida as a Reader of Heidegger. (4) Formerly numbered C196.) Seminar, three hours; outside study, nine hours. Retracing of certain of Derrida’s attempts to read Heidegger, beginning with the essay “Restitutions,” in Truth and Painting. Other writings include Of Spirit: Heidegger and the Question and Geschlecht. May be concurrently scheduled with course C295B. P/NP or letter grading.

197. Senior Essay. (4) Lecture, three hours. Limited to senior Comparative Literature majors. Research essay on a comparative topic selected by the student and written under supervision of a core faculty member. P/NP or letter grading.

199. Special Studies in Comparative Literature. (2 to 4) Requisite: course 100. May be repeated for credit with consent of chair. P/NP or letter grading.

Graduate Courses

203. Classical Tradition: Tragedy. (4) Seminar, three hours. Preparation: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. S/U or letter grading.

C204. Satire. (4) Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual uses in interpretation of satire. Concurrently scheduled with course C104. Graduate students required to prepare papers based on texts read in original languages whenever possible and may meet as a group one additional hour each week. S/U or letter grading.

C205. Comic Vision. (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with course C105. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

206. Archetypal Heroes in Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. S/U or letter grading.

207. Allegory and Some Allegories. (4) Seminar, three hours. Preparation: reading knowledge of French, German, Italian, Latin, Greek, or Chinese. Designed for graduate students. Historical perspective on topic of allegory, with readings from texts traditionally held to be examples of the genre. Defining allegory is simple; saying which works count as examples of allegory, and why, is much harder. Authors include Prudentius, Augustine, Dante, Spenser, Donne, Tung Yueh, Hegel, Baudelaire, and Mallarmé. S/U or letter grading.

C208. Saints’ Lives as Literature. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Examination of genre of the saint’s life as it develops in Western European tradition from late classical to early modern period; connections between the saint’s life and other forms of literature; comparative considerations (e.g., the Western European saint’s life and classical Greek and Roman biography, Islamic traditions, and Buddhist traditions). Concurrently scheduled with course C108. S/U or letter grading.

C209. Love, Deceit, and Truth: Tristan and Isolde Legend in Literary Tradition. (4) Lecture, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Tracing of history and literary treatment of one of most enduring “myths” of medieval and modern storytelling: tale of ill-fated love triangle as exemplified in figures of Tristan, Isolde, and Mark. Literary texts to be read in translation, but comparative literature students encouraged to read texts in original language. Concurrently scheduled with course C109. S/U or letter grading.
C222. Renaissance Drama. (4) Lecture, three hours. Preparation: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with course C122. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C240. Dramatic Theory and Criticism in German and English Romanticism. (4) Seminar, three hours. Preparation: reading knowledge of German. Genesis conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with course C140. S/U or letter grading.

C250. The 19th-Century Novel. (4) Seminar, three hours. Preparation: reading knowledge of French or German. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with course C150. S/U or letter grading.

C251. Crisis of Authority. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Designed for graduate students. Darwin’s Origin of Species undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(iz)ed and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with course C151. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C252. Symbolist Tradition in Poetry. (4) Seminar, three hours. Preparation: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with course C152. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C253. Poetry and Poetics of Post-Symbolist Period. (4) Lecture, three hours. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valery, Stefan George, R.M. Rilke, Gunnar Ekelof, or Wallace Stevens. May be concurrently scheduled with course C153. S/U or letter grading.

C260. Topics in Literature and Visual Arts. (4) Lecture, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. Assuming that literature and visual arts are in some degree expressions of cultural and philosophical patterns of eras, study of relationships between writers and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between plastic and verbal arts in comparative study. May be repeated for credit with instructor and/or topic change. May be concurrently scheduled with course C160. Graduate students required to read works in original languages. S/U or letter grading.

C261. Fiction and History. (4) Seminar, three hours. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern foreign language. Readings range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Sartre, Camus, Thomas Mann, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors’ choice and use of historical material. May be concurrently scheduled with course C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

C262. The Psychological Novel. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. S/U or letter grading.

C263. Crisis of Consciousness in Modern Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with course C163. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C264. The Modern Continental Novel. (4) Seminar, three hours. Preparation: reading knowledge of at least one appropriate foreign language. Study of the modern novel’s development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrator. May be concurrently scheduled with course C164. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C265. Intertextuality in Literature and Film. (4) Discussion, three hours. Study of relationships between literature and film from perspective of intertextuality grounded in theorists Mikhail Bakhtin and Jacques Derrida. Readings include by critics Barthes, Chatman, and Kristeva. Focus on processes of inscription, reritualization, transformation, filiation, and dissemination during consideration of representative types of intertextuality. S/U or letter grading.

C266. Writing and the Photographic Image. (4) Seminar, three hours; outside study, nine hours. Preparation: knowledge of one appropriate foreign language. Designed for graduate students. Investigation of intertextual relations between writing and photography in American and European contexts. Study rests on premise that a photograph enters public domain framed by writing and discourse and that, in turn, some forms of writing are framed by photographic modes of representation. S/U or letter grading.

C267. Theory and Texts of the Fantastic. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with course C167. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with course C170. Graduate students required to prepare papers based on texts read in original languages whenever possible. S/U or letter grading.

C272. The Postmodern Novel. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism is defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Boll, and Calvino. Concurrently scheduled with course C172. Graduate students required to meet as a group one additional hour each week. S/U or letter grading.

C273. Postmodernism and the Third World. (4) Seminar, three hours. Preparation: reading knowledge of one appropriate foreign language. Emphasis on position of women in the cultures and ideology of the authors. S/U or letter grading.

C274. Theorizing the Third World. (4) Same as Asian American Studies M261.) Seminar, three hours; outside study, nine hours. Investigation of political power, gender, and race in complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

C275. Nationalism and Immigration Today. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Study of the interplay between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and the relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with course C173. S/U or letter grading.

M276. Reading Modern Bodies. (4) (Same as Japanese American Studies M261.) Seminar, three hours; outside study, nine hours. Designed for graduate students. Exploration of construction of human body through various modern technologies and discourses, including those of disease, diet, race, gender, and sexuality. Examination of texts from a variety of locales, with particular emphasis on Japanese. S/U or letter grading.

280. Latin American Literature in Comparative Contexts. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. In-depth study of one topic of Latin American literature in a comparative context. May be repeated for credit. S/U or letter grading.

293. Psychoanalytic Approaches to Literature. (4) Seminar, three hours. Requisite: course 200 or equivalent criticism course in English. Study of development of modern psychoanalytic approaches to literature, with particular stress on effective theories of criticism. Readings include Freud and early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schaffer) whose work is applicable to literary theory. S/U or letter grading.

C295B. Derrida as a Reader of Heidegger. (4) (Formerly numbered C296.) Seminar, three hours; outside study, nine hours. Retracing of certain of Derrida’s attempts to read Heidegger, beginning with the essay, "Restitutions," in Truth and Painting. Other writings include Of Spirit: Heidegger and the Question and Geschlecht. May be concurrently scheduled with course C196B. S/U or letter grading.

297. Death and the Limits of Representation. (4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Examination of fundamental shifts in the relationship that obtains between thinking and death which are closely tied to rethinking of the status and structure of representation. May be repeated for credit. S/U or letter grading.

298. Analytic Philosophy and Literary Theory. (4) (Formerly numbered 298.) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of one appropriate foreign language. Study of literary theory through exploration of approaches to literature by philosophers grounded on analytic tradition. Careful attention to concepts of truth, meaning, representation, metaphor, fiction, and literature. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 12) Limited to graduate comparative literature students. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

**Scope and Objectives**

Computer science is concerned with the design, modeling, analysis, and applications of computer-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in computer system architecture, computer network modeling and analysis, distributed computer systems, programming languages and systems, artificial intelligence, computer science theory, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. In addition to the departmental computing facility, there are nearly a dozen laboratories specializing in areas such as distributed systems, multimedia computer communications, VLSI systems, VLSI CAD, and artificial intelligence. The Cognitive Systems Laboratory is engaged in studying computer systems which emulate or support human reasoning. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained either through the Computer Science and Engineering major or through the Computer Science major described below.

The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

**Undergraduate Study**

**Computer Science and Engineering B.S.**

The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components...
from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, networking fundamentals, higher-level language skills, and application of these to systems. Students are prepared for employment in the high-technology industries that employ information and digital systems.

The Major
Course requirements are as follows (185 minimum units required):

1. Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16).
2. Computer Science 111, 118, 131, M151B (or Electrical Engineering M116C), 180, 181, Electrical Engineering 10, 102, 103, 110, 115A, 115C, Statistics 110A; six laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D); one computer science/electrical engineering elective (excluding Electrical Engineering 100).
3. Four upper division elective courses from the Computer Science Department. Course 199 may normally be taken only as a free elective; however, students may petition for exceptions in extraordinary situations.
4. Chemistry and Biochemistry 20A; Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 31C, 32A, 32B, 33A, 33B, 61.
5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Computer Science and Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

Computer Science B.S.
The computer science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, students study subject matter in software engineering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The program is accredited by the Computing Sciences Accreditation Board (CSAB), a specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation (CORPA).

The Major
Course requirements are as follows (181 minimum units required):

1. Four core courses: Computer Science 31, 32, 33, M51A (or Electrical Engineering M16).
2. Computer Science 111, 118, 131, 132, M151B (or Electrical Engineering M116C), 180, 181, Statistics 110A; one course from Computer Science 161 or 163; Mathematics 151A or Electrical Engineering 103; six laboratory units from Computer Science M152A (or Electrical Engineering M116L) and M152B (or Electrical Engineering M116D).
3. Two elective upper division computer science courses.
4. A minor or technical support area composed of a coherent group of three upper division courses selected from atmospheric sciences, biology, chemical engineering, chemistry and biochemistry, civil and environmental engineering, Earth and space sciences, economics, electrical engineering, information studies, linguistics, management, materials science and engineering, mathematics, mechanical and aerospace engineering, molecular biology, physics.
5. Electrical Engineering 1, 2, Physics 1A, 1B, 4AL, 4BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61.
6. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Computer Science majors must also select two additional humanities/social sciences courses and one additional life sciences course and are required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements. Chemistry 20A may be substituted for one of the life sciences courses.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree
The Department of Computer Science offers the Master of Science (M.S.) degree in Computer Science and participates in a concurrent degree program with the John E. Anderson Graduate School of Management.

Admission
In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

Application forms, including a departmental supplement to the application, may be obtained at http://www.cs.ucla.edu. Forms are also available by writing to the Computer Science Department, UCLA, 4732 Boelter Hall, Box 951596, Los Angeles, CA 90095-1596.

M.B.A./M.S. Computer Science
The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete the requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Contact the Anderson School for details.

Areas of Study
Artificial intelligence; computer science theory; computer system architecture; programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (biological systems, physical systems).

Course Requirements
Course Requirement: A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. No specific courses are required, but a majority of both the total number of formal courses and the total number of graduate courses must consist of courses offered by the Computer Science Department.

Undergraduate Courses. No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Breadth Requirement. Candidates for the M.S. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. The requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:
demonstrated creative ability. Normally the requirements for the master's degree with applicants normally should have completed examination (GRE). In addition, applicants are required to take Graduate Division, applicants to the Ph.D. degree in Computer Science are required to take.

Doctoral Degree Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Computer Science are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

Applicants normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.cs.ucla.edu. Forms are also available by writing to the Computer Science Department, 4732 Boelter Hall, Box 951596, Los Angeles, CA 90095-1596.

Major Fields or Subdisciplines
Artificial intelligence; computer science theory; computer system architecture; programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (biological systems, physical systems).

Course Requirements
Course Requirement. There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute examinations for coursework. Normally, however, the student takes courses to acquire the knowledge needed for preparation for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields; the major and at least one minor must be in computer science. The major field corresponds to a body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. A detailed syllabus for each major field can be obtained from the Student Affairs Office in the Computer Science Department. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B– or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. By petition and administrative approval, a minor field may be satisfied by examination.

Breadth Requirement. Candidates for the Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. The requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:

Group I: Four required courses or equivalent from Computer Science M51A, 143 or 180, M151B, 181.

Group II: Two required courses or equivalent from Computer Science 111, 112 or 118, 131 or 132, 161 or 163, 171 or 174, 270A.

In addition, for each degree students must complete at least one class per quarter for three quarters of Computer Science 201 with grades of Satisfactory.

Competence in any or all courses may be demonstrated in one of three ways:

(1) Satisfactory completion of the course at UCLA with a grade of B– or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B– or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Written and Oral Qualifying Examinations
After mastering the body of knowledge defined in the three fields and passing the breadth requirement, students take a written preliminary examination in the major field. When the examination is passed and all coursework is completed, students may be required to take an oral preliminary examination that encompasses the major and minor fields. The examination may be waived by the faculty on recommendation of the major field committee for students deemed to be making strong progress toward the degree. Students may not take a preliminary examination more than twice.

After passing the preliminary examination, the student should form a doctoral committee and prepare to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are “inside” members and must hold appointments at UCLA in the student’s major department in the School of Engineering and Applied Science. The “outside” member must be a UCLA faculty member outside the student's major department.

Computer Science

Lower Division Courses
1. Principles of Computer Science. (4) Lecture, four hours; laboratory, two hours; other, six hours. Not open for credit to Computer Science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing. P/NP or letter grading.

2. Great Ideas in Computer Science. (4) Lecture, four hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and neural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications. P/NP or letter grading.
Upper Division Courses

112. Computer System Modeling Fundamentals. (4) Lecture, four hours; outside study, eight hours. Requisite: Statistics 110A. Designed for juniors/seniors. Basic tools necessary for performance evaluation and design of distributed computer systems, including such topics as combinatorics, generating functions, probability theory, transforms, Markov chain, baby queueing theory. Presentation of this set of tools in a fashion that is rich with examples from computer systems field. Letter grading.

118. Computer Network Fundamentals. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: course 32. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming. Letter grading.

130. Software Engineering. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 32. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming. Letter grading.

131. Programming Languages. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 32, 33. Study, comparison, and evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementation. Use of a few languages selected from FORTRAN 77, ADA, SNOBOL 14, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features. Letter grading.

132. Compiler Construction. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 32, 131, 161. Compiler structure: lexical and syntactic analysis; semantic analysis and code generation; theory of parsing. Letter grading.

133. Parallel and Distributed Computing. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 111 (may be taken concurrently), 131. Distributed memory and shared memory parallel architectures; asynchronous parallel languages; MPI, Maisie; primitives for parallel computation; specification of parallelism, interprocess communication and synchronization; design of parallel programs for scientific computation and distributed systems. Letter grading.

143. Introduction to Database Systems. (4) Lecture, four hours; discussion, two hours; laboratory, two hours; outside study, four hours. Requisite: course 32. Information systems and database systems in enterprises. File organization and secondary storage structures. Nonrelational model and relational database systems. CODASYL and other data management approaches. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization. Letter grading.

M152B. Digital Design Project Laboratory. (4) Formerly numbered 152B. (Same as Electrical Engineering M116D.) Laboratory, four hours; recitation, two hours; outside study, six hours. Requisite: course M151B or Electrical Engineering M116C. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

161. Fundamentals of Artificial Intelligence. (4) Lecture, four hours; laboratory, two hours; outside study, six hours. Requisite: course 23. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to LISP with regular programming assignments. State space search, Trees, graphs, and problem reduction methods, brute force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures. Letter grading.

170A. Introduction to Scientific Computing. (4) Lecture, five hours; laboratory, two hours. Requisite: course 170. Design of senior Computer Science majors. Introduction to scientific modeling and simulation, using the very high-level computer language MATHMATICA and MAPLE. Extensive coverage of programming in MATHMATICA, with applications involving engineering modeling; simulation term project required. Letter grading.

171. Real-Time Computer Systems. (4) Lecture, four hours; outside study, eight hours. Designed for seniors. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction. Letter grading.

180. Introduction to Algorithms and Complexity. (4) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Mathematics 61. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds. NP-completeness. Letter grading.

190. Computer Science Design Project. (4) Lecture, four hours; outside study, eight hours. Preparation: adequate background in hardware, software, and computer applications. Limited to senior Computer Science and Engineering majors and senior Computer Science majors. Basic concepts of design projects in computer science, including interpretation of specifications, subtasking, design of experiments, data analysis and performance evaluation, cost engineering, reliability, and societal and safety considerations. Letter grading.

196A. Introduction to Bioengineering and Cybernetics. (2) Lecture, two hours; outside study, six hours. Preparation: calculus. Strongly recommended for students with potential interest in bioengineering or cybernetics as a major. Introductory survey of topics in bioengineering and cybernetics disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

CM196L. Biomedical Systems/Biocybernetics Research Laboratory. (4) (Formerly numbered C196L.) (Same as Neuroscience M174.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals. Controls. Concurrently scheduled with course C296LL. Letter grading.

199. Special Studies. (2 to 6) Tutorial, to be arranged. Limited to juniors/seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

Graduate Courses

201. Computer Science Seminar. (2) (Formerly numbered 201A-201B-201C.) Seminar, four hours; outside study, two days. Designed for graduate computer science students. Seminars on current research topics in computer science. May be repeated for credit. S/U grading.

202. Advanced Computer Science Seminar. (4) Seminar, four hours; outside study, eight hours. Preparation: completion of major field examination in computer science. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit. S/U or letter grading.

212B. Queueing Applications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 212A. Priority queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Consensus Law, Bounds. Queueing networks: definitions; job flow balance; product form solutions — local balance, M/M; computational algorithms for performance measures; asymptotic behavior and bounds; approximation techniques — diffusion — iterative techniques; applications. S/U or letter grading.

214. Data Transmission in Computer Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112. Limited to graduate computer science students. Discrete data streams, formats, rates, transductions; digital data transmission via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modern designs; physical interfaces in computer communication links; national/international standards; tests and measurements. S/U or letter grading.

215. Computer Communications and Networks. (4) Lecture, four hours; outside study, eight hours. Requisite: course 112. Resource sharing; computer traffic characterizations; multiplexing; network structures; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDL, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors. S/U or letter grading.

216. Distributed Multiaccess Control in Networks. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control. S/U or letter grading.

217. Advanced Topics in Internet Research. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Overview of Internet development history and fundamental principles underlying TCP/IP protocol design. Discussion of current research topics, including multicast routing protocols, multicast transport protocols (e.g., real-time transport protocol, RTP, and SRM), support for integrated services, World Wide Web, multimedia applications on Internet. Fundamental issues in network protocol design and implementations. Letter grading.

219. Current Topics in Computer System Modeling Analysis. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor. S/U or letter grading.

222A. Control and Coordination in Economics. (4) (Same as Economics M222A.) Lecture, three hours. Recommended preparation: appropriate mathematics course. Designed for graduate economics and engineering students. Stabilization policies, short- and long-run dynamics and stability analysis; decentralized coordination, organization in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

233A. Parallel Programming. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation; specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multivalued rendezvous; synchronous and asynchronous languages: CSP, ADA, LINDA, MAISIE, UC, and others; introduction to parallel program verification. S/U or letter grading.

234A. Distributed Database Systems. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak unit of concurrency control, commit protocols, semantic query answering, multidatabase systems, fault recovery techniques, network partitioning, execution and trade-offs, and design experiences. Letter grading.

245A. Intelligent Information Systems. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 241A, 255A. Knowledge discovery in databases, knowledge-base maintenance, knowledge-base and database integration architectures, and scale-up issues and applications to cooperative database systems, intelligent decision support systems, and intelligent planning and scheduling systems; computer architecture for processing large-scale knowledge-base/database systems. Letter grading.

249. Current Topics in Data Structures. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with consent of instructor. S/U or letter grading.

252A. Arithmetic Algorithms and Processors. (4) Lecture, four hours; outside study, eight hours. Requisite: course 251A. Number systems; conventional, redundant, signed-digit and reasoning, and logic-based declarative querying/programming are salient features of this technology. Letter grading.

258. Foundations of VLSI CAD Algorithms. (4) Lecture, four hours; outside study, eight hours. Preparation: one course in analysis and design of algorithms. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to computer-aided physical design of VLSI circuits at high-level phases of layout: partitioning, placement, and routing and algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. S/U or letter grading.

259A. LSI in Computer System Design. (4) (Same as Electrical Engineering M216A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. S/U or letter grading.

259B-M258C. LSI in Computer System Design. (4-4) (Same as Electrical Engineering M216B-M216C.) Lecture, four hours; laboratory, four hours. Requisite: course 258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

259D. VLSI CAD Techniques. (4) Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. In-depth study of latest advances in computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. S/U or letter grading.

259E. Foundations of VLSI CAD Algorithms. (4) Lecture, four hours; outside study, eight hours. Preparation: one course in analysis and design of algorithms. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to computer-aided physical design of VLSI circuits at high-level phases of layout: partitioning, placement, and routing and algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization. S/U or letter grading.
262F. Physical Design Automation of VLSI Systems. (4) Lecture, four hours; outside study, eight hours. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussion of applications of a number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and genetic algorithms. S/U or letter grading.

258G. Logic Synthesis of Digital Systems. (4) Lecture, four hours; outside study, eight hours. Requires: courses 255A, 258F. Detailed study of various problems in logic-level synthesis of VLSI digital systems, including two-level Boolean network optimization; multi-level Boolean network optimization; technology mapping for standard cells and field-programmable gate-array (FPGA) designs; retiming for sequential circuits; and applications of binary decision diagrams (BDDs). Letter grading.

259H. Analysis and Design of High-Speed VLSI Interconnects. (4) Lecture, four hours; outside study, eight hours. Requires: courses 220, 258F. Detailed study of high-speed VLSI interconnects at both integrated circuit (IC) and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution noise, delay models and power dissipation models, interconnect topology and geometry optimization, and clocking for high-speed systems. Letter grading.

260. Current Topics in Computer Science: System Design/Architecture. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. S/U or letter grading.

261A. Problem Solving and Search. (4) Lecture, four hours; outside study, eight hours. Requires: course 23. Examination in depth of that part of artificial intelligence concerned with problem-solving behavior, including problem spaces, brute-force search, heuristic search, two-player game searches, planning, subgoaling, GPS, macro-operators, and abstraction. Emphasis on mathematical rigor and comprehensive analyses of search algorithms. S/U or letter grading.

262A. Reasoning with Partial Beliefs. (4) Lecture, four hours; outside study, eight hours. Requires: course 112 or Electrical Engineering 131A. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation. S/U or letter grading.

262C. Computer Methods of Data Analysis and Model Formation. (4) Lecture, four hours; outside study, eight hours. Requires: course 112. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision of computerized models. S/U or letter grading.

262Z. Current Topics in Cognitive Systems. (4) Lecture, four hours; outside study, eight hours. Requires: course 262A. Additional requisites for each offering are determined by the instructor. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change. S/U or letter grading.

264A. Artificial Intelligence Programming I. (4) Lecture, four hours; outside study, eight hours. Recommended preparation: knowledge of LISP or PROLOG. Introduction to topics and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of LISP and introduction to lexically scoped LISP-like languages (e.g., TSCHEME, Lambda calculus, closures, data-driven and object-oriented programming, flavors, d-nets, resolution-based deductive systems. S/U or letter grading.

264B. Artificial Intelligence Programming II. (4) Lecture, four hours; outside study, eight hours. Requires: course 264A. Techniques of logic programming. Artificial intelligence programming languages (e.g., PROLOG, AMORD, DUCK, CONNIVER, PLANNER, QA4, KRL, ACTORS, etc.) and artificial intelligence features (e.g., nonmonotonic logics, data-dependencies for truth maintenance, meta-rules, semantic networks, frame-based systems). S/U or letter grading.

267A. Neural Models. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structure and function. Students required to prepare a paper analyzing research in one area of interest. S/U or letter grading.

267B. Artificial Neural Systems and Connectionist Computing. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multisensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest. S/U or letter grading.

268A. Computer Methodology: Advanced Numerical Methods. (4) Lecture, four hours; outside study, eight hours. Requires: Electrical Engineering 103 or Mathematics 151B or comparable experience with numerical computing. Designed for graduate computer science and engineering students. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises. Letter grading.

270A. Computer Methodology: Advanced Numerical Methods. (4) Lecture, four hours; outside study, eight hours. Requires: Electrical Engineering 103 or Mathematics 151B or comparable experience with numerical computing. Designed for graduate computer science and engineering students. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises. Letter grading.

271C. Seminar: Advanced Simulation Methods. (2) Seminar, two hours; outside study, six hours. Requires: course 271A. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modelizing techniques. Topics vary each term. May be repeated for credit. S/U or letter grading.
272. Advanced Discrete Event Simulation and Modeling Techniques. (4) Lecture, four hours; outside study, eight hours. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations, variance reduction techniques, simulation models of computer systems and manufacturing systems. Letter grading.

276A. Pattern Analysis and Machine Intelligence. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence. S/U or letter grading.

276B. Structured Computer Vision. (4) Lecture, four hours; outside study, eight hours. Designed for graduate students. Methods for computer processing of realistic image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications. S/U or letter grading.

276C. Speech and Language Communication in Artificial Intelligence. (4) Lecture, four hours; outside study, eight hours. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in applications. S/U or letter grading.

279. Current Topics in Computer Science: Methodology. (2 to 12) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change. S/U or letter grading.

280A-280ZZ. Algorithms. (4 each) Lecture, four hours; outside study, eight hours. Requisite: course 181. Additional requisites for each offering announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subquisites of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and with topic change. Letter grading.

281A. Computability and Complexity. (4) Lecture, four hours; outside study, eight hours. Requisite: course 181. Compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closed properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, "easy" and "hard" problems, PTIME/NP/TIME. S/U or letter grading.

281D. Discrete State Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decompositions, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation. S/U or letter grading.

284A-284ZZ. Topics in Automata and Languages. (4 each) Lecture, four hours; outside study, eight hours. Requisite: course 181. Additional requisites for each offering announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parallelism in computational systems; machine-based complexity. Subquisites of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and with topic change. S/U or letter grading.

287A. Theory of Program Structure. (4) Lecture, four hours; outside study, eight hours. Requisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics. S/U or letter grading.

288S. Seminar: Theoretical Computer Science. (2) Seminar, two hours; outside study, six hours. Requisites: courses 280A, 281A. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

289A-289ZZ. Current Topics in Computer Theory. (2 to 12 each) Lecture, four hours; outside study, eight hours. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. S/U or letter grading.

M296A. Modeling Methodology for Biomedical Systems. (4) (Same as Medicine M270C.) Lecture, four hours; outside study, eight hours. Recommended preparation: course M196B, some intermediate knowledge of linear systems analysis or linear algebra, or Mathematics 115A, Electrical Engineering 141, 142, Mechanical and Aerospace Engineering 171A). Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems, including dynamic system experiment/model development, multicompartamental, noncompartamental, and input/output models, linear and nonlinear. Emphasis on modeling applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. S/U or letter grading.

M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4) (Same as Biomedical Science M270D.) Lecture, four hours; outside study, eight hours. Requisite: course M296A. Estimation methodology and model parameter estimation algorithms for quantifying fitting dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experimental design. S/U or letter grading.

C296L. Biomedical Systems/Biocybernetics Research Laboratory. (4) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: course M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radiative isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course CM196L. S/U or letter grading.

298S. Seminar: Computer Science. (2 to 4) (Formerly numbered 209AA-209ZZ.) Seminar, two to four hours; outside study, four to eight hours. Recommended for graduate computer science students. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar. (2) Seminar, two hours; outside study, six hours. Limited to graduate Computer Science Department students. Seminar on communication of computer science material in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

497D-497E. Field Projects in Computer Science. (4-4) Fieldwork, to be arranged. Students are divided into teams led by instructor; each team is assigned an external company or organization which they investigate as a candidate for possible computerization, submitting a team report of their findings and recommendations. In Progress and S/U or letter grading.

596. Directed Individual or Tutorial Studies. (2 to 8) Tutorial, to be arranged. Limited to graduate computer science students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12) Tutorial, to be arranged. Limited to graduate computer science students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16) Tutorial, to be arranged. Limited to graduate computer science students. Reading and preparation for Ph.D. preliminary examinations, including preliminary research on dissertation. S/U grading.

Scope and Objectives

The major in Cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Undergraduate Study

Cybernetics B.S.

PreCybernetics Major

Students may apply for the precybernetics major via petition if they are sophomores and have taken at least three of the premajor mathematics courses with a 2.7 grade-point average or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Preparation for the Major

Required: A minimum of 76 to 81 units, including Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 115A; Physics 1A, 1B, and 1C or Electrical Engineering 1, or 2AH and 2BH; Program in Computing 10A; Psychology 10.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 grade-point average in mathematics, 3.0 GPA overall, and a minimum grade of C in all preparation for the major courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be passed with a grade of C or better.

Methodology Core

Required: Four subject areas as follows:

1. One overview course: Computer Science 196A.

2. Two courses in probability and statistics from one of the following groups: (a) Statistics M100A and 100B, or (b) Mathematics M170A and Statistics 100B, or (c) Electrical Engineering 131A and Statistics 100B.

3. Two courses in signals and control systems (one from each group): (a) Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical and Aerospace Engineering 171A.

4. One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas

Required: A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in physiological or cognitive psychology. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement

Required: One course from each of the applications/specialization areas selected from the current approved list.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Computing Specialization

Students may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and 60 are required, in addition to six courses selected from an approved list. Students graduate with a bachelor’s degree in cybernetics and a specialization in Computing.

Cybernetics

Upper Division Course

Graduate Courses

M300.5A-M300.5B-M300.5C. Child Abuse and Neglect (2-4). (Same as Community Health Sciences M245A-M245B-M245C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Lecture, two hours. Course M300.5A is requisite to M300.5B, which is requisite to M300.5C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M422. Health Policy Issues for Dental Professionals. (2) (Same as Health Services M448.) Lecture, two hours. Requisites: Biostatistics 100A, Epidemiology 100, Health Services 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

M433A. Case Studies in Dental Practice. (2) (Same as Health Services M448D.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

441C. Introduction to Health Care. (2) Lecture, two hours. Description and analysis of American dental care system from historical, ethical, and legal perspectives. Assessment of how dentistry fits within general provision of health care services in America, with comparisons to dental care provisions in other countries. S/U grading.

Scope and Objectives

The Department of Design offers the Bachelor of Arts and Master of Fine Arts degrees, which focus on visual communication design with emphasis on digital media. These uniquely challenging programs invite students to balance aesthetic sensibility with logical reasoning, formal theories with practical application, and contemporary thought with historical perspective.

The undergraduate program begins with the study of basic design elements and processes: form, color, drawing, letterforms and typography, visual technologies, and the manipulation of photography and video through image-capture technologies. Historical perspectives and social issues are also introduced. At the upper division level, studio courses explore current uses of interactive media and new directions in visual communication design, including the study of time and motion, as well as virtual form and space in computer-generated environments.

Through a balance of courses in theory, criticism, and practice, students develop an understanding of design principles. Most courses are taught as studios of no more than 20 students, which encourages individual growth and fosters a sense of community within the department.

The two-year Master of Fine Arts (M.F.A.) degree fosters mature, professional-quality work utilizing the most current technologies in the field of media design. The exploration of visual communication in a digital format leads to new concepts and understanding that address the role of design in the rapidly evolving area of digital media. The program focuses on developing an individual thesis project that incorporates in-depth research and theoretical exploration of a topic, culminating in a final exhibition of work. Students have the opportunity to participate in ongoing research projects that may form the basis of their thesis work. Sample topics include design of the interface and design of virtual environments and information spaces that integrate visual elements with sound, movement, time, and space.

Facilities and equipment in the department enable students to create visual designs in two, three, and even four dimensions. The newly created Center for Digital Arts expands opportunities for students to develop interactive media applications in a networked environment, as well as advanced computer graphics involving virtual reality and three-dimensional form. The center’s equipment combines high-end PC and Macintosh computers with facilities for music and nonlinear video editing.

Undergraduate Study

Design B.A.

Preparation for the Major

Required: Design 10, 21, 22, 23, 24, 25, 26, and one course from Art 31 or Art History 50 through 57.

The Major

Required: Thirteen upper division courses, including a minimum of three courses from comparative and theoretical studies (Design 101 through C106) and seven courses from area...
studies (courses 153 through 160). Three additional upper division courses must be selected from the courses listed above and/or from major electives (courses C121 through C143 and 182 through 199). In consultation with and with approval of the faculty adviser, other nonmajor courses may be applied toward major credit.

It is recommended that students have each term's program approved by the departmental adviser. Note: Consult the Schedule of Classes for courses restricted to majors only.

Graduate Study
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees
The Department of Design offers a Master of Arts (M.A.) degree and a Master of Fine Arts (M.F.A.) degree in Design.

Master of Arts
The Design Department is not accepting applications for admission to the M.A. program for Fall Quarter 1999.

Admission
Applicants for admission to the M.A. program are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. The application dossier must include (1) three letters of recommendation; (2) transcripts of academic record; (3) statement of purpose; (4) sample of work related to studies in design and computation; (5) Graduate Record Examination (GRE) scores; (6) proof of competence in English for applicants whose native language is not English (minimum score of 550 on the Test of English as a Foreign Language).

Acceptance is by a majority vote of the design faculty. Formal faculty review of graduate applicant portfolios takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study
Consult department.

Course Requirements
Although a new curriculum is approved for this degree, to date the courses that comprise this curriculum have not been submitted or approved.

Comprehensive Examination Plan
The written comprehensive examination is offered each quarter. A committee of at least three members appointed by the department administers the comprehensive examination. The comprehensive examining committee may conduct an oral query after reviewing the written examination. In case of failure, reexamination may be conducted once only with the consent of the departmental graduate adviser.

Thesis Plan
None.

Master of Fine Arts
Admission
Applicants for admission to the M.F.A. program in Design are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. Applicants are expected to have working knowledge of graphics software. Additional experience with video, interactive media, and/or three-dimensional modeling and animation is preferred. A portfolio is required in the form of slides (maximum 20) and/or videotape of no more than five minutes in length. A statement of purpose is also considered. A minimum score of 620 on the Test of English as a Foreign Language is required for applicants whose native language is not English. Formal faculty review of graduate applicant portfolios takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study
Media Design: interfaced design, interactive media, time-based work, virtual environments, and information spaces.

Course Requirements
A minimum of 72 quarter units of upper division and graduate design courses is required. No fewer than 24 quarter units in the Design 200 series are to be completed: Design C206, 254, and 256 must be taken during the first two quarters in residence, Design 258 during the first year in residence, and the graduate seminar, Design 269, is to be taken twice (eight units). A further 32 units are to be taken from the Design 400 series, at least eight units in the first year in residence, and 16 units of electives of which eight units of Design 596 may be applied toward the requirements for the degree.

Comprehensive Examination Plan
The comprehensive examination consists of an oral examination and a concentrated body of work which is presented as the master's statement. Also required is an accompanying record of the project, consisting of documentation in the form of slides of physical work, research material, and other visual material, and may include a written statement as determined by the graduate guidance committee.

Thesis Plan
None.

Design

Lower Division Courses

10. Nature of Design. (4) Lecture, three hours. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment. P/NP or letter grading.

22. Form. (4) Studio, six hours. Interrelation of two-dimensional surfaces and three-dimensional forms with traditional and experimental materials as a foundation for creativity; origination and solution of problems. P/NP or letter grading.

23. Drawing. (4) Studio, six hours. Translation of perception through delineation, drawing, and other descriptive media. Emphasis on development of students' motor control by means of freehand and mechanical drawing and by development of analytical and objective observation from life and three-dimensional objects. P/NP or letter grading.

24. Visual Technologies. (4) Lecture/studio, four hours; laboratory, two hours. Introduction and integration of traditional design tools, the camera, and digital technologies for application to visual thinking and fundamentals of design. P/NP or letter grading.

25. Letterforms and Typography. (4) Lecture/studio, four hours; laboratory, two hours. Requisite: course 24. Introduction to typography as basic element of information design and as it applies to various forms of media; historical basis for development of letterform design and its architecture. P/NP or letter grading.

26. Image Capture. (4) Lecture/studio, four hours; laboratory, two hours. Requisite: course 24. Introduction to image capture technologies through understanding of photography and video. Studio and field exercises include equipment operation, lighting techniques, and digital image manipulation. P/NP or letter grading.

35B. Introduction to Tools and Processes. (4) Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes.

Upper Division Courses

101. Introduction to Study of Design. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Historical introduction to principles of design, theories about design process, and culture of artifacts from classical times to the present day. P/NP or letter grading.

102. Introduction to Design and Computation. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Introduction to use of computational methods in representation, creation, and study of designs. Discussion of spatial algorithms, recursive procedures, and formal grammars and languages. Presentation of elementary applications in design. P/NP or letter grading.

103. Introduction to Visual Communication. (4) (Formerly numbered C103.) Lecture, three hours. Preparation: completion of preparation for the major courses. Designed for juniors/seniors. Introduction to methodology of design in context of visual communication, with focus on integrative themes and representative case studies that encourage independent student investigation. Letter grading.
104. Design and Society: Society and Design. (4) Lecture, three hours. Preparation: completion of preparation for the major courses. Open to nonmajors with consent of instructor. Historical and thematic examination of how design affects society from classical antiquity to the 20th century in order to understand historically how each type and application of design relates to sociological context in which it existed. Consideration of how various design practices and techniques related to each other. P/NP or letter grading.

C106. Media Studies. (4) (Not the same as course 106 prior to Fall Quarter 1998.) Lecture, three hours. Preparation: completion of preparation for the major courses. Overview and contextual understanding of influences and origins of media, communication paradigms, and technologies of past 150 years through reading and discussion of theoretical and historical works. Concurrently scheduled with course C206. Letter grading.

C121. Fundamentals of Architectonics: Proportion. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM221. P/NP or letter grading.

C122. Fundamentals of Architectonics: Symmetry. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM222. P/NP or letter grading.

C123. Fundamentals of Architectonics: Composition and Order. (4) Lecture, three hours; outside study, nine hours. Preparation: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM223. P/NP or letter grading.

C141. Programming Computer Applications in Architecture and Urban Design. (4) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. Concurrently scheduled with course CM241. P/NP or letter grading.

C142. Introduction to Geometric Modeling. (4) Lecture, three hours; outside study, nine hours. Preparation: course C141 or Computer Science 141. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. Concurrently scheduled with course CM242. P/NP or letter grading.

C143. User Interaction Techniques in Design. (4) Lecture, three hours; outside study, nine hours. Preparation: course C141 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. Concurrently scheduled with course CM243. P/NP or letter grading.

C153. Design for Video. (4) (Formerly numbered 165C.) Studio, six hours. Preparation: completion of preparation for the major courses. Use of video technology (video systems, cameras, displays, editing, and storage) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication. P/NP or letter grading.

C154. Design for Print Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: course 103 or C106. Introduction to procedures to create, plan, and produce visual communication design. Emphasis on acquiring and working with visual vocabulary to gain mastery of conceptual and creative procedures by learning techniques used to translate ideas into visual design and graphic imagery. P/NP or letter grading.

C155. Design for Print and Digital Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154. Integration of print and digital information technology, with continued emphasis on fully integrating visual vocabulary with mastery of conceptual and creative procedures. P/NP or letter grading.

C156A. Three-Dimensional: Design of Virtual Form. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisite: course 103 or C106. Through lectures, discussions, and studio work, introduction to basic elements of three-dimensional computer visualization, including modeling, image mapping, lighting, project construction, and rendering. P/NP or letter grading.

C156B. Three-Dimensional: Time and Motion in Virtual Space. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 156A. Extension of study of virtual three-dimensional form to include motion, time, and rhythm. Storyboard development, modeling of articulated characters and objects, virtual camera movement, and motion capture. P/NP or letter grading.

C157A. Design for Interactive Media. (4) (Formerly numbered 157.) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154, 157A. Extension of study of interactive media design. Focus on development of advanced conceptual skills in interface design and nonlinear narrative utilizing programming techniques such as lists and objects, Builds on skills and concepts acquired in course 157A. P/NP or letter grading.

C157B. Advanced Interactive Media. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154, 157A. Advanced study of interface design for interactive media applications. Introduction to multimedia and hypertext. Focus on learning role of conceptual designer as virtual communicator and design manager. P/NP or letter grading.

C158. Design for Environmental Communication. (4) Studio, six hours. Preparation: completion of preparation for the major courses. Requisites: courses 103 or C106, 154, 157A. Extension of study of interactive media design. Focus on development of advanced conceptual skills in interface design and nonlinear narrative utilizing programming techniques such as lists and objects, Builds on skills and concepts acquired in course 157A. P/NP or letter grading.

C184. Material Processes: Fiber Structure. (4) Studio, six hours. Use of basic hand methods of construction to develop both two- and three-dimensional forms, utilizing pliable materials but not to exclude other media. P/NP or letter grading.

CM221. Fundamentals of Architectonics: Proportion. (4) (Same as Architecture and Urban Design M225A.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C121. S/U or letter grading.

CM222. Fundamentals of Architectonics: Symmetry. (4) (Same as Architecture and Urban Design M225C.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C122. S/U or letter grading.

CM223. Fundamentals of Architectonics: Composition and Order. (4) (Same as Architecture and Urban Design M225E.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. May be repeated for credit with consent of adviser. Concurrently scheduled with course C123. S/U or letter grading.
Diversified Liberal Arts
Certificate Program

College of Letters and Science

Bruce Beiderwell, Ph.D. (English Composition)
Shelley Kneigr, Ph.D. (Mathematics)
James W. Trent Ph.D. (Education), Director

Scope and Objectives

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which students may waive the Multi-subject Assessment for Teachers (MSAT) in California. The MSAT examination must be passed (or the DLAP completed) before students in elementary school teaching credential programs may begin their student teaching. To earn an elementary school teaching credential, students must complete an accredited program offered through a graduate school of education.

Undergraduate Study

Diversified Liberal Arts
Certificate Program

To earn the certificate in Diversified Liberal Arts, students must complete a major in the College of Letters and Science. (For eligibility of students in the professional schools, consult a DLAP counselor.) They must also complete DLAP requirements in four main areas: (1) language and literature, (2) mathematics and science, (3) history and social science, (4) arts and culture. Many program requirements can be satisfied by courses taken to fulfill general education requirements.

Students must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college certifies completion of the program.

Students who do not complete the program prior to graduation must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a DLAP counselor in the College of Letters and Science, A316 Murphy Hall (310-206-6661; e-mail: dlap@hup.ucla.edu). For information regarding the Teacher Credential Program in the Graduate School of Education and Information Studies, see a counselor in 1009 Moore Hall (310-825-8328).

Robert L. McPherron, Ph.D. (Space Physics, Geophysics)
William I. Newman, Ph.D. (Planetary Physics)
The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to the broad subject area stretching from astronomy to chemistry. The Earth’s interior, planetary physics, and space plasmas. The variety of techniques applied lead to several concentrations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth Sciences is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in environmental sciences, law, government, business, journalism, public health, medicine, or dentistry. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

**Undergraduate Study**

**Geology B.S.**

**Preparation for the Major**

*Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 31A, 31B, 32A; Physics 1A, 1B, 1C, 4AL, 4BL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.*

To be admitted as Geology majors, *transfer students* with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

**The Major**

*Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil and Environmental Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Civil and Environmental Engineering 151, 155, Geography 100.*

**Geology — Paleobiology B.S.**

**Preparation for the Major**

*Required: Earth and Space Sciences 1 or 1H, 16 or 17, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A; Physics 1A, 1B, and 4AL, or 6A and 6B. All courses must be passed with a minimum grade of C–.*

To be admitted as Geology — Paleobiology majors, *transfer students* with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One introductory biology course with laboratory, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

**The Major**

*Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil and Environmental Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Civil and Environmental Engineering 151, 155, Geography 100.*

**Geophysics — Applied Geophysics B.S.**

**Preparation for the Major**

*Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C–.*

To be admitted as Geophysics — Applied Geophysics majors, *transfer students* with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. A second year of calculus, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.
The Major

Geophysics — Geophysics and Space Physics B.S.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, and 4BL (or 2AH, 2BH, 4AL, and 4BL); 17, 18L; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

To be admitted as Geophysics — Geophysics and Space Physics majors, transfer students with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. A second year of calculus, one year of calculus-based physics with laboratory, and one introductory computer programming course are recommended.

The Major

Required: Earth and Space Sciences 134, M140, 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 112, 131; two upper division courses from the physical sciences, engineering, or mathematics (must be approved by the undergraduate adviser).

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 248.

Earth Sciences B.A.

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 9, 15, 51A, 51B, 61; Chemistry and Biochemistry 20A, 20B, 20L; Life Sciences 1; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 1A, 1B, 1C, and 4AL, or 2AH, 2BH, and 4AL, or 6A, 6B, and 6C. All courses must be passed with a minimum grade of C-.

To be admitted as Earth Sciences majors, transfer students with 80 or more quarter units (54 semester units) must have completed one introductory Earth sciences course, two general chemistry courses with laboratory, and one year of calculus. One year of calculus-based physics with laboratory, one biology course with laboratory, and either one introductory origin and evolution of the solar system course or one introductory oceanography course are recommended.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative grade-point average of 3.5, have completed at least 90 graded units at the University of California, and have completed a minimum of two terms (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Geology Minor

To enter the Geology minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units):
Earth and Space Sciences 1, 2, 61.

Required Upper Division Courses (22 units):
Earth and Space Sciences 112, 119, and three courses from 116, 129, 137, 139, 150.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Geophysics and Planetary Physics Minor

Classical physics, supported by field data, mathematics, and computing, is used to understand diverse processes from ocean circulation and earthquakes to the formation of planets and the flow of particles and electromagnetic fields in space. These skills are valuable in environmental, engineering, and resource studies and more broadly in any kind of career which requires quantitative analysis.

To enter the Geophysics and Planetary Physics minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (12 units):
Earth and Space Sciences 1, 8, 9.

Required Upper Division Courses (20 units):
Earth and Space Sciences 134, 135, and three courses from M140, 152, 153, 154, 155.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.
The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics.

Geochemistry

Master's Degree
Admission
A bachelor's degree in chemistry, geology, physics, or a related field is required for the Master of Science degree in Geochemistry. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required; the Subject Test scores are optional and may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Areas of Study
The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements
A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Sixteen units of 500-series courses may be applied toward the total course requirement for the M.S. in Geochemistry. Twelve units may be applied toward the minimum graduate course requirement.

Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 235A, 235B, 235C, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Comprehensive Examination Plan
The advising committee prepares and administers the final examination (which normally is oral). In preparation for the examination, the committee takes proper recognition of the fact that some students are better qualified in chemistry and others in geology. However, it is required that a distinct competence in one of these fields be matched by at least an adequate performance in the other. In most cases, a failed final examination can be repeated one additional time.

Thesis Plan
The thesis must be approved by the research director (who usually is the chair of the advising committee), as well as by the other members of the advising committee. If students choose the thesis plan, no examination is required.

Doctoral Degree
Admission
A bachelor's degree in chemistry, geology, physics, or a related field is required for the Ph.D. degree in Geochemistry. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required; the Subject Test scores are required; the Subject Test may be optional and may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Major Fields or Subdisciplines
The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements
Students are expected to complete at least the minimum number of courses required for the M.S. degree. Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 51A, 51B, C107, C109, 234, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Written and Oral Qualifying Examinations
Written Qualifying Examination. The examination must be taken before the end of the first year of the doctoral program if the student has a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It may be given in either a question/answer format or in a proposal format, at the discretion of the student.

The question/answer format is a conventional written examination that covers the field of geochemistry and related areas of geology and chemistry. It may be followed by an oral part, at the discretion of the examining committee.

The proposal format is based on three written research proposals prepared by the student and submitted to the examining committee at least 10 days before the examination. The proposals must be concise and must entail three dissimilar projects; one of them should cover the intended dissertation topic. The proposals are presented briefly to the examining committee orally, and the committee examines their originality and scientific merit. The oral examination is not necessarily limited to the topics of the proposals.

In case of failure, an examination of either format can be repeated at the discretion of the examining committee.

University Oral Qualifying Examination. After passing the written qualifying examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week before the examination, students must provide each member of the doctoral committee with a written prospectus of their proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geology

Master's Degree
Admission
A bachelor's degree in geology, biology, chemistry, physics, or other science is required for the Master of Science in Geology. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Areas of Study
The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements
Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students' performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C, or 295A, 295B, 295C.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology
seminar (Earth and Space Sciences 251 through C260). Except for courses 597 and 598, those graded on an S/U basis are not applicable toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses may be applied toward the total course requirement for the M.S. in Geology. Four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan
This plan is recommended for those continuing to the Ph.D. degree. The examination is administered by the student’s three-member advising committee and one additional member who is appointed by the graduate adviser following consultation with the student. It consists of a six-hour written part and a subsequent oral part. The written part covers the student’s major field of study, whereas the oral part may be more general in scope. If the examination is failed, the committee may, on the basis of the student’s academic performance, recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Thesis Plan
This plan is normally required for students not continuing to the doctorate. The thesis committee consists of the three-member advising committee, whose chair is the supervisor of the thesis research. One member of the committee may be from another department. The thesis subject may be selected at once and the research undertaken concurrently with coursework. In any event, it should normally be selected within the first year of residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may, on the basis of the student’s academic performance, recommend either termination of graduate study or further coursework or research or both, leading to submission of a revised thesis. Revision and resubmission is not normally permitted more than once.

Doctoral Degree
Admission
A bachelor’s degree in geology, biology, chemistry, physics, or other science is required for the Ph.D. degree in Geology. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Major Fields or Subdisciplines
The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements
Students are expected to complete at least the minimum number of courses required for the M.S. degree and must take a geology seminar each year. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students’ performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C, or 295A, 295B, 295C.

Written and Oral Qualifying Examinations
Written Qualifying Examination. The examination must be taken before the end of the first year of the doctoral program if the student has a master’s degree; otherwise, it must be taken before the end of the second year of enrollment. It is administered by the advising committee augmented by a fourth member who is appointed by the graduate adviser in consultation with the student and serves as chair of the examining committee. It is given in either a question/answer format or a proposal/proposal format, which the student may select.

The question/answer format consists of a two-part examination. The first part is written and can cover any aspect of geology in which the student has had training. The second part is oral, is taken no later than a week after the first part, and can cover subjects from the written part and the field of the proposed dissertation, although it is not limited to these topics.

The proposal/proposal format consists of an oral examination based on three written research proposals or scientific propositions in any combination, which must be submitted to the examining committee at least 10 days before the examination. One of the essays must specify the intended dissertation research. The examination is concerned with the originality and soundness of the proposals and propositions, their scientific significance, and the quality of their elucidation and defense, although it is not limited to these topics.

University Oral Qualifying Examination. After passing the written qualifying examination, students must consult a faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week beforehand, students must provide each member of the doctoral committee with a written prospectus of the proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geophysics and Space Physics
Master’s Degree
Admission
A bachelor’s degree in a physical science, engineering, mathematics, or other field is required for the Master of Science degree in Geophysics and Space Physics. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Undergraduate preparation for admission to the program in geophysics and space physics with specialization in applied geophysics is the equivalent of the B.S. in Geophysics – Applied Geophysics, including a common mastery of the subject matter of Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Areas of Study
The program in geophysics and space physics offers study in Earth’s interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

The objective of the program in geophysics and space physics with specialization in applied geophysics is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly in petroleum exploration.

Course Requirements
Courses applied toward the 36-unit minimum requirement must include courses Earth and Space Sciences 200A, 200B, 200C and at least 12 additional units of 200-series (graduate) courses, of which at least half must fall within a single field of concentration (geophysics, geophysical fluid dynamics, planetology, or space physics) which students select with the advice and approval of their faculty adviser, and the remainder must contribute to their general competence in geophysics and space physics.

For the program in geophysics and space physics with specialization in applied geophysics, courses applied toward the 36-unit minimum requirement must include Earth and
Space Sciences 200A and 202, plus at least two courses from 204, 205, 222. Eight additional units of graduate-level courses are required; courses recommended are Earth and Space Sciences 200B, 208, M224A. Up to eight units of course 596 or 598 may count toward the graduate-level course requirements. Except for course 596 or 598, courses graded on a S/U basis do not apply toward the minimum requirement.

**Comprehensive Examination Plan**
Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which, along with a written statement of their field, must be submitted to the examining committee before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

In either format, the examination tests students' general knowledge of their field (e.g., Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by students in a written statement to which they must get the examining committee's concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with students. Among these members, at least three must be from the department and one must be from outside the student's field of concentration. Courses in the 500 series and courses graded on a S/U basis may not be applied toward the minimum requirement.

The comprehensive examination plan is not offered for the program in geophysics and space physics with specialization in applied geophysics.

**Thesis Plan**
At least three members of the thesis committee must be from the department. Eight units of 500-series courses (596, 598) may be applied toward the total course requirement.

A thesis is required for the program in geophysics and space physics with specialization in applied geophysics. A qualifying examination on the suitability of the proposed thesis should be taken by the fourth quarter of residence. A final examination must be taken on the adequacy of the completed thesis. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with the student, of whom at least three must be from the department.

**Doctoral Degree**

**Admission**
A bachelor's degree in a physical science, engineering, mathematics, or other field is required for the Ph.D. degree in Geophysics and Space Physics. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

**Major Fields or Subdisciplines**
The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

**Course Requirements**
Six courses are required, three in fundamental physics and three in the major geophysics disciplines. Students must attain a grade-point average of 3.3 or better, on a 4.0 scale in the six courses.

**Courses in Fundamental Physics.** Courses satisfying the fundamental physics requirement may be chosen from the following: Earth and Space Sciences 201, 202, Physics 210A, 210B, 215A, 220, 222A, 231A, Chemistry and Biochemistry C223A. Exceptions are that students may not obtain credit for both examinations in the following pairs due to overlap of subject matter: Earth and Space Sciences 201 and Physics 220; Earth and Space Sciences 203 and Physics 210A; Earth and Space Sciences 203 and Physics 210B; Physics 215A or Chemistry and Biochemistry C223A.

In addition to the above-listed courses, students may petition to count toward this requirement either or both of Physics 221A and 221B. Approval of a petition depends on relevance of quantum mechanics to more advanced study planned by the student. Other substitutions may be petitioned in exceptional cases. Students who can demonstrate they have mastered the material elsewhere may petition for course credit. The three fundamental physics examinations must all be passed prior to undertaking the departmental written qualifying examination.

**Courses in the Three Major Geophysics Disciplines.** Earth and Space Sciences 200A, 200B, 200C, on solid Earth, oceans and atmospheres, and space plasma physics must be passed with an average grade of 3.3 or better. The examinations must be attempted by the fourth quarter of enrollment. Students not achieving the necessary level of achievement by the sixth quarter of enrollment are not eligible to continue in the Ph.D. program and may not attempt the departmental written qualifying examination. Exceptions to this requirement may be granted by petition under extenuating circumstances.

**Written and Oral Qualifying Examinations**

**Written Qualifying Examination.** Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which must be submitted to the examining committee at least 10 days before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

The examination tests students' general knowledge of their field (Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by students in a written statement to which they must get the examining committee's concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with students, of whom at least three must be from the department and one must be from outside the students' field of concentration.

**University Oral Qualifying Examination.** After passing the field examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination as soon as possible. The examination determines the suitability of the chosen problem for the Ph.D. dissertation and their capacity to pursue research on the problem, but it is not limited to these topics. A written prospectus on their topic must be handed to the committee at least 10 days before the examination. Repetition of a failed examination is at the option of the doctoral committee. If students do not pass this examination within five years after entering the program, they are subject to dismissal.

**Earth and Space Sciences**

**Lower Division Courses**

1. **Introduction to Earth Science.** (4) Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.

2. **Fundamentals of Earth Science.** (4) Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical sciences majors with strong high school or some lower division preparation. Introduction to Earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods.

3. **Earth History.** (4) Lecture, three hours; laboratory, three hours; fieldwork. Enforced requisite: course 1 or 1H. Methods of historical science; consideration of special problems related to physical and biological evolution of Earth from earliest time to the present.
134. Computing in Earth and Space Sciences. (4) Lecture; three hours; laboratory; three hours. Requisites: Program in Computing 3 or 10A. Original programing and application of software to generate and test hypotheses with nonideal or incomplete data sets. Interpolation/extrapolation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications, probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software used in research and industry.

135. Introduction to Applied Geophysics. (4) Lecture; three hours; laboratory; one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals. P/NP or letter grading.

136A. Applied Geophysics. (4) Lecture; three hours; laboratory; three hours; field trips. Requisites: Mathematics 33A, Physics 1A, 1B, and 1C (2AH and 2BH), 4AL, 4BL, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refractor, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules. P/NP or letter grading.

136B. Applied Geophysics. (4) Lecture; three hours; laboratory/field trips, six hours. Requisites: course 136A, Program in Computing 3 or 10A. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics.

136C. Field Geophysics. (6) Lecture; three hours; discussion; one hour; laboratory; two hours; fieldwork, 10 hours. Requisite: course 135 or 136A. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip).

137. Petroleum Geology. (4) Lecture; three hours. Requisites: courses 61, 111. Geology applied to exploration for and production of natural gas and petroleum, techniques of subsurface exploration for petroleum geology.

139. Engineering and Environmental Geology. (4) Lecture, two and one-half hours. Requisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes.

141. Basin Analysis. (4) Lecture, three hours; laboratory, six hours. Requisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions.

152. Physics of the Earth. (4) Lecture; three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (2AH and 2BH). Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest. P/NP or letter grading.

153. Oceans and Atmospheres. (4) Lecture; three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (2AH and 2BH). Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

155. Planetary Physics. (4) Lecture; three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, Physics 1A, 1B, and 1C (2AH and 2BH). Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. P/NP or letter grading.

C160. Field Seminar. (2 to 6) Lecture; one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C260. P/NP or letter grading.

159G. Field Geology for Graduate Students. (2 to 4) Lecture; two hours; four to five field trips. Requisite: course 121B. Required of new graduate students in geology program. Advanced techniques in field geologic mapping, exposing students to igneous, metamorphic, and sedimentary terranes with varying amounts of tectonism. May be repeated for credit. P/NP or letter grading.

199. Special Studies in Earth and Space Sciences (2 to 6) May be repeated for credit.

199H. Honors Research in Earth and Space Sciences (4) Limited to seniors. Individual research designed to broaden and deepen students’ knowledge of some phase of Earth and space sciences.

Graduate Courses

204. Time-Series Analysis and Spectral Estimation. (4) Lecture; three hours. Preparation: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis.

C206. Physical Geochemistry. (4) Lecture; three hours; outside study, nine hours. Requisite: course 51B. Basic principles of physical chemistry for geochemical applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

C207. Geochemistry. (4) Lecture; three hours; discussion, one hour. Designed for junior/senior and graduate physical sciences students. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C107. Additional homework and class presentation required of graduate students. S/U or letter grading.

208. Geothermics. (4) Lecture, two and one-half hours; discussion, 30 minutes. Requisite: Mathematics 33A. Basic concepts of heat transfer applied to solutions of geothermal and geophysical problems, including conduction and boundary layers, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions.

210. GeochemoKinetics: Thermochronometry. (4) Lecture, three hours; discussion, one hour. Designed for graduate physical and biological sciences students. Theoretical basis and application of thermochronometry: derivation of diffusion equation and methods of solution, relationship between heat and mass diffusion and their simultaneous solution, Boltzmann/Matano/Dimroth closure theory; Ar/Ar systematics and interpretative models, multdiffusion domain theory, petrological applications.

M216. Evolutionary Biology. (4) (Same as Organism Biology M200A.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

M217. Molecular Evolution. (4) (Formerly numbered M2043G.) (Same as Organism Biology M231.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

CM218. Advanced Paleontology. (4) (Same as Organism Biology CM245.) Lecture, three hours. Required: course 116 or Organismic Biology 110 or 117. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM118. S/U or letter grading.

219. Planetary and Orbital Dynamics. (4) Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings.

220. Principles of Paleobiology. (4) Lecture/discussion, three hours. Limited to graduate science students. Open to qualified undergraduate biological and physical sciences students with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit.

221. Field Geology. (4) Lecture, one hour; discussion, one hour; fieldwork, 10 days. Required: course 121B or 195G. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit.

222. Introduction to Seismology. (4) Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis.

225A. Physics and Chemistry of Planetary Interiors I. (4) Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution.

225B. Physics and Chemistry of Planetary Interiors II. (4) Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidence of motion, remnant magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection.

C226. Advanced Igneous Petrology. (4) Lecture, three hours; laboratory, three hours; field trips. Required: course 103A. Designed for graduate students. Understanding the genesis of igneous rocks based on geochemical, tectonomophysical, and other geological evidence. Syllabus currently scheduled with course C126. Graduate students required to read more recommended references, make class presentations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

229. Planetary Atmospheres. (4) Lecture, three hours. Required: course 200B. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques.

230. X-Ray Crystallography. (4) Lecture, three hours; laboratory, three hours. Required: course 51B. Point, translation, and space group symmetry; diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis.

231. Crystal Chemistry and Structure of Minerals. (4) Lecture, three hours; laboratory, three hours. Required: course 51B. Bonding, interatomic configurations, polymorphic transformations, isotopy, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure.

234. Petrologic Phase Equilibria. (4) (Formerly numbered 234B.) Lecture, three hours. Required: course 51B. Chemistry 110B. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases). S/U or letter grading.

235A-235B. Current Research in Geochemistry (1 unit each). (4) Limited to graduate Earth and space sciences students. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

238. Metamorphic Petrology. (4) Lecture, three hours; laboratory, six hours. Preparation: one introductory petrology and petrography course, interpretation of metamorphic rocks in light of observation, theory, and experiment. Geologic relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, and their applications, use of piezobirefringent halos, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures.

240. Space Plasma Physics. (4) Lecture, three hours. Required: course 203 or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere/ionosphere coupling; ring current dynamics; and wave particle instabilities.

242. Sandstone Petrology. (4) Lecture, two hours; laboratory, four hours. Required or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions.

245A-245B. Stress and Deformation. (4-4) Lecture, three hours. Required: Mathematics 32A, 32B, Physics 1A or 2AH, 4AL. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr’s circle construction and other graphical methods; flow laws. S/U or letter grading.

248. Advanced Structural Geology. (4) Lecture, three hours; discussion, two hours. Required: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems.

251. Seminar: Mineralogy. (4) Seminar, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis.

252. Seminar: Geochemistry. (4) Seminar, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochemistry, and cosmochemistry.

253. Seminar: Petrology. (4) Seminar, three hours. Problems of igneous or metamorphic petrology; methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.
254. Seminar: Sedimentology. (4) Seminar, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutites; stratigraphy; paleoenvironmental studies.

255. Seminar: Structural Geology and Tectonics. (4) Seminar, three hours. Flow and fracture in Earth’s crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks.

257. Seminar: Paleontology. (4) Seminar/discussion, three hours. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiography, with emphasis on relations to other disciplines.

259. Seminar: Paleotectonics. (4) Seminar, two hours; discussion, two hours. Requisite: course 244. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western U.S.

260. Field Seminar. (2 to 6) (Formerly numbered 260.) Lecture, one to three hours; fieldwork, five to 20 days. Requisite: course 61. Field-based teaching and discussion forum which varies in focus from general geology through structure and tectonics, sedimentology, igneous and metamorphic petrology, volcanology, or other subdisciplines as prescribed. Concurrently scheduled with course C160. S/U or letter grading.

261. Topics in Magnetospheric Plasma Physics. (4) Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultraviolet frequency waves, and adiabatic particle motion in Earth’s radiation belts.

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. (4) Lecture, three hours. Principles, testing, and operation of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra.

M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each) (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geologic past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

282. Seminar: Geophysics. (4) Seminar, two hours; discussion, two hours. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit.

M285. Origin and Evolution of Solar System. (4) (Same as Astronomy M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

289. Seminar: Fluid Dynamics. (2) Formerly numbered 289A-289B-289C.) Seminar, one to two hours. Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

295A-295B-295C. Current Research in Earth and Space Sciences. (1-1-1) Limited to graduate Earth and space sciences students. Seminars presented by outside speakers, staff, and/or graduate students describing current research. Written reports required. May be repeated for credit. S/U grading.

296A-296B-296C. Research Topics in Earth and Space Sciences. (1 each) Discussion, one to three hours. Designed for graduate Earth and space sciences students. Advanced study and analysis of topics in Earth and space sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296A. Rock Deformation, Structural Geology, Tectonics.

296B. Volcanology and Geochemistry of Volcanic Rocks.

296C. Seismology and Solid Earth Physics.

296D. Thermal Evolution of Lithosphere.

296E. Sedimentation and Tectonics.

296F. Seismology.

296G. Planetary and Orbital Dynamics.

296H. Space Plasma Physics.

296I. Earthquakes.

296J. Metamorphic Petrology.

296K. Quantitative and Molecular Paleobiology.

296L. Paleobiology.

296M. Planetary Physics.

296N. Martian Surface and Atmosphere.

296O. Tectonics and Stratigraphy.

296P. Chemical Geodynamics.

296Q. Paleobiology.

296R. Planetary and Space Physics.

296S. Precambrian Paleobiology.

296T. Geophysical Fluid Dynamics.

296U. Geomorphology and Geological Physics.

296V. Cosmochemistry.

296W. Structural Geology, Tectonics.

296X. Earthquakes and Earth Structure.

298. Advanced Topics in Earth and Space Sciences. (2 to 4) Lecture, one hour; discussion, two hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. Special emphasis on integration of technology in classroom. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study and/or Research. (2 to 12) May be repeated. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) S/U grading.

posure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese or Korean, in which the emphasis is on the language and culture of China or Japan or Korea. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Courses for Nonmajors
The department offers the following courses in which knowledge of Asian languages is not required: Chinese 50, 150A, 150B, 151, 152, 160, 165, 175, 190, East Asian Languages and Cultures 60, 61, 161, 162, Indic 175, Japanese 50, 60, 90, 150, 151, 154, 155, 160, 161, 175, CM182, 188, Korean 50, 150, 151, 155, 160, 175, 177, 180A, 180B, 180C.

Buddhist Courses

Undergraduate Study
Grammar/Composition Courses
No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Chinese, Japanese, and Korean grammar and/or composition.

Chinese B.A.
Preparation for the Major
Required: Chinese 1, 2, 3, 4, 5, and 6, or 1A, 2A, 4A, and 5A; one civilization or literature course from 50, 150A, 150B, 151; one comparative civilizations course from East Asian Languages and Cultures 60, 61, Japanese 50, 60, Korean 50.

The Major
Required: Chinese 100A-100B-100C (required only for nonnative speakers), 110A-110B-110C, East Asian Languages and Cultures C197 or 199, and four upper division electives, at least three of which must be selected from the following departmental courses: Chinese 101A, 101B, 120, 130A, 130B, 140A, 140B, 140C, 150A, 150B, 151, 152, 160, 165, 170, 175, 190, 195, East Asian Languages and Cultures 161, 162. Courses 150A, 150B, and 151 may be selected only if not used to satisfy the preparation for the major requirements. Nondepartmental electives may be selected from Anthropology 175T, Art History C115D, C115E, C115F, Asian American Studies M132B, Ethnomusicology C156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, 159A, 159B, Sociology 151, M153, 188, Theater 102E; other courses may be substituted with approval of the undergraduate adviser.
Admission
Applicants to the M.A. program are expected to (1) meet general University requirements for the undergraduate major, (2) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA’s department, and (3) have taken a minimum of three quarter courses or the equivalent in classical Chinese for Chinese majors, classical Japanese for Japanese majors, or a minimum of three years of modern Korean for Korean majors. Applicants with a B.A. in another field or from a department whose requirements are less rigorous are admitted only if they meet the requisite standards within one year. Selection is based on (1) prior scholastic performance (at the junior, senior, and/or graduate levels), (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English. All materials must be complete before the application is considered. Students transferring from other departments must also fulfill the above requirements.

International applicants are required to take the Test of English as a Foreign Language (TOEFL), administered by the Educational Testing Service, unless this test is not offered in the country of residence. A test in translation from Chinese, Japanese, or Korean into English must be taken, either with the comprehensive examinations or earlier.

Areas of Study
The department recognizes three areas of specialization at the M.A. level: Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

Course Requirements
Nine courses are required for the degree, six of which must be graduate courses. Course 200 in the appropriate field is required for the Chinese, Japanese, or Korean major.

With the consent of the department, up to two courses taken outside the department (for which the grade of S/U is acceptable) may be applied toward the nine courses. No more than two courses in the 500 series may apply toward the divisional minimum of nine courses required for a master's degree, and only one of these two courses may be counted toward the minimum of six graduate courses required for the degree. Courses taken to meet the language requirements and admission standards do not apply toward the total course requirement. At least one seminar in each of the student’s comprehensive examination fields must be taken.

International students may also be required to take English as a Second Language 33A, 33B, 33C, 34, 36, or other ESL courses.

Comprehensive Examination Plan
The comprehensive examination consists of the submission of three seminar research papers (all two-quarter sequences) and evaluation of them by the ad hoc committee chaired by the principal adviser, and an oral examination based on those papers. A translation examination in the student’s area of specialization must also be taken. The evaluation of three seminar papers by the ad hoc committee and the oral examination based on the papers determines whether students are admitted to the Ph.D. program.

Thesis Plan
This plan is recommended for students intending to proceed to the Ph.D. Students who have completed at least one year of graduate work with excellence may petition to the department to present a thesis for the M.A. degree. If this plan is chosen, students must have a letter of support from a faculty member who intends to serve as thesis director. The remaining members of the thesis committee are selected in consultation with the graduate adviser. Final acceptance of the thesis plan is contingent on the approval of a thesis proposal. The thesis must be 40 to 60 pages in length and follow the rules and style set by the University. Information on these regulations is available from the Graduate Division. After acceptance of the thesis, there is an oral examination related to the thesis. Students are also required to take an examination in translation in their area of specialization.

Doctoral Degree
Admission
An M.A. degree in the field or in a related field is required for admission to the program leading to the Ph.D. degree in East Asian Languages and Cultures. Selection among qualified applicants from outside the department is based on (1) prior scholastic performance, (2) three letters of recommendation, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a recent research paper in English. Applicants with an M.A. in the department are judged on their M.A. record.

Students applying from foreign institutions are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

Major Fields or Subdisciplines
The department emphasizes six major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Korean language and literature with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature; (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism; (5) Japanese linguistics; and (6) cultural and comparative studies, which is designed to allow students with a primary focus on China, Japan, or Korea to incorporate comparative, interdisciplinary, and/or historical interests. In addition, a program in ancient Chinese civilization may be arranged by petition.

Course Requirements
Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department’s M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses (not including courses taken to meet the language requirements) beyond the M.A. degree is required for the Ph.D. In addition, if the student’s major field is Chinese, two years of modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Japanese studies in the student's field of study. If the student’s major field is Japanese, two years of modern Chinese, classical Chinese, or modern Korean must be taken with grades of S and a written examination which tests the ability to translate Chinese or Korean studies in the student's field of study. If the student's major field is Korean, two years of modern Chinese, classical Chinese, or modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Chinese or Japanese studies in the student's field of study. Those majoring in Buddhist studies are encouraged to take Sanskrit and/or Pali and Parsi with grades of B or better. Students in the comparative and cultural studies track must meet the language requirements for their primary are of interest and must also take East Asian Languages and Culture 210.

Written and Oral Qualifying Examinations
Students must take written examinations as follows:

For the major in Chinese literature: (1) a general examination in Chinese literature covering the following three fields: modern Chinese literature, traditional fiction and drama, and traditional Chinese poetry; (2) examinations in three approved fields which must be chosen from at least two groups as follows: (a) Chinese poetry, Chinese fiction and drama, and modern Chinese literature; (b) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion; (c) an outside field from within the department; or (d) a field offered in another department or interdepartmental program.

For the major in Japanese literature: (1) a general examination in Japanese literature; (2) examinations in two approved fields which cannot be from the same group, as follows: (a) ancient, medieval, early modern, or modern Japanese literature; (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics; (c) Chinese or Korean literature; or (d) a field offered in another department or interdepartmental program.
For the major in Korean literature: (1) a general examination in Korean literature; (2) examinations in three approved fields which must be chosen from at least two of the following groups: (a) Korean poetry, Korean fiction, modern Korean literature; (b) Korean Buddhism, Korean thought; (c) Chinese or Japanese literature; or (d) a field offered in another department or interdepartmental program.

For the major in Buddhist studies: (1) a general examination in the major field; (2) an examination in an approved subfield within the major field; (3) a general examination in another approved field inside or outside the department.

For the major in Japanese linguistics or the major by petition in ancient Chinese civilization: (1) an examination in the major language area; (2) a general examination in the major field; (3) an examination in an approved subfield within the major field; (4) a general examination in another approved field inside or outside the department.

For the major in cultural and comparative studies: examinations in four fields selected in consultation with the student's academic adviser, including at least two fields within the department and at least one with a comparative or theoretical focus. The four fields must be selected so that at least two are from the student's primary language area and two from a specific discipline.

Once all language and course requirements are satisfied, the qualifying examinations can be taken. All examinations must be completed within a four-week period. With the consent of the department, the examinations may be repeated only once. Students are required to take an examination in translation in their area of specialization.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as the student's dissertation adviser. Preferably within six months, but no more than a year after the written examinations, the student must pass the University Oral Qualifying Examination on the dissertation proposal. With the department's consent, the examination may be repeated only once.

## Chinese

### Lower Division Courses

1. **Elementary Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing.

2A. **Elementary Modern Chinese for Advanced Beginners.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: ability to speak and understand Mandarin or other Chinese dialects at elementary levels. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). Students who complete courses 1A and 2A fulfill one year of foreign language requirement. P/NP or letter grading.

2. **Elementary Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

3A. **Chinese Civilization.** (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

3B. **Introduction to Modern Chinese Society.** (4) Lecture, two hours; discussion, three hours. Preparation: course 1A. P/NP or letter grading.

4. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Outside study, seven hours. Preparation: fluent speaking and listening skills in Mandarin Chinese. Training in reading and writing skills at elementary level. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

5. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Outside study, seven hours. Preparation: course 2A. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at intermediate levels. Training in all four basic language skills (speaking, listening, reading, and writing). Students who complete courses 4A and 5A fulfill second year of foreign language requirement. P/NP or letter grading.

6A. **Intermediate Modern Chinese for Advanced Students.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

7. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3A. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

8. **Elementary Chinese: Intensive.** (12) Lecture, 10 hours; discussion, 10 hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing. Offered in summer only. Letter grading.

9. **Intermediate Modern Chinese: Intensive.** (12) Lecture, 10 hours; discussion, 10 hours. Offered to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 4. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

10. **Intermediate Modern Chinese: Intensive.** (12) Lecture, 10 hours; discussion, 10 hours. Offered to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Design to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

11. **Advanced Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Preparation: fluent speaking skills in Mandarin Chinese. Training in reading and writing skills at advanced levels. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

12. **Advanced Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Preparation: fluent speaking skills in Mandarin Chinese. Training in reading and writing skills at advanced levels. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

13. **Advanced Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Preparation: fluent speaking skills in Mandarin Chinese. Training in reading and writing skills at advanced levels. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

14. **Advanced Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Preparation: fluent speaking skills in Mandarin Chinese. Training in reading and writing skills at advanced levels. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

## Upper Division Courses

### 100A-100B-100C. Advanced Modern Chinese. (4-4-4) Lecture, two hours; discussion, two hours. Preparation: successful completion of the written examination in all four basic language skills — speaking, listening comprehension, reading, and writing. Students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Designed for students who already have certain listening and speaking skills in Mandarin or other Chinese dialects at elementary levels. Training in all four basic language skills (speaking, listening, reading, and writing). Students who complete courses 1A and 2A fulfill one year of foreign language requirement. P/NP or letter grading.

2. **Elementary Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

2A. **Elementary Modern Chinese for Advanced Beginners.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking and listening skills in Mandarin Chinese. Training in reading and writing skills at elementary level. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

3. **Elementary Modern Chinese.** (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

5. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking and listening skills in Mandarin Chinese. Training in reading and writing skills at elementary level. Students fulfill one-year foreign language requirement by completing this course. P/NP or letter grading.

6A. **Intermediate Modern Chinese for Advanced Students.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

7A. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3A. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

8A. **Intermediate Modern Chinese.** (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: fluent speaking skills in Mandarin Chinese. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar, vocabulary, and cultural studies.

### 101A-101B. Advanced Readings in Modern Chinese. (4-4) (Formerly numbered 101A-101B-101C.) Lecture, two hours; discussion, two hours; outside study, eight hours. Preparation: course 100C. Advanced readings and discussion for students planning to do advanced coursework or research on China. Topics from magazines, journals, and books related to humanities and social sciences. Letter grading.

2A. **Literature.** (4) Lecture, two hours; discussion, two hours; outside study, eight hours. Preparation: three years of college-level Chinese. Advanced course designed to develop speaking, listening, reading, and writing skills in modern Chinese in business-related contexts and to gain awareness of cultural concepts and values in Chinese business practices and behavior. P/NP or letter grading.

### 110A-110B-110C. Introduction to Classical Chinese. (4-4-4) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: course 100B. Readings: course 3. Grammar and readings in selected texts.

13. **Readings in Modern Chinese Literature.** (4-4) Readings/discussion, three hours. Preparation: course 100B. Readings and discussion of works of modern Chinese literature.

15A. **Lyrical Traditions.** (4) Lecture, three hours; outside study, nine hours. Readings in English translation from poetic, critical, and essayistic writings of traditional China, with emphasis on development of subjectivity and modes of address.

15B. **Traditional Narrative and Drama.** (4) Lecture, three hours; outside study, nine hours. Readings in English translation from narrative and dramatic writings of traditional China, with emphasis on self and society, growth of fictionality, subjectivity, and gender representation.

### 150. Chinese Civilization. (4) Lecture, three hours; discussion, one hour. Preparation: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to the present in English translation.

### 152. Topics in Contemporary Chinese Language and Culture. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Investigation of various topics in contemporary Chinese language and culture, including politics and poetry of Chinese post-modernism, nationalism, feminism, mass culture, and media.
M153. Chinese Immigrant Literature and Film. (4)
(Same as Asian American Studies M132B and Comparative Literature M171.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race and to inform thinking and discussion of relevant issues. P/NP or letter grading.

155. Topics in Chinese Cinema. (4) Lecture, three hours; film viewing, four hours; outside study, five hours. Critical understanding of films from Hong Kong, Taiwan, and China to be offered. Examination of questions of cultural identity, transnationalism, postmodernity, and intersections between politics and culture in the "Greater China" region. P/NP or letter grading.

160. Chinese Buddhism. (4) Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

165. Introduction to Chinese Buddhist Texts. (4) Lecture, three hours. Requisite: course 100A or 110C or Korean 100A or Japanese 100A. Readings in Buddhist texts written in literary Chinese and translated from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese. Exegesis of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor.

170. Readings in Chinese Philosophical Texts. (4) Lecture, three hours. Requisite: course 110C. May be repeated for credit with consent of instructor.

175. Introduction to Chinese Thought. (4) Lecture, three hours. Knowledge of Asian languages not required. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalism, influence of Buddhism, development of neo-Taoism and neo-Confucianism.

Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbiotic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative practice.

197. Life Writing in East Asia. (4) Seminar, three hours; outside study, nine hours. Readings of autobiography and biographies as elements of East Asian cultural traditions, with focus rotating between China, Japan, Korea, and Southeast Asia. Readings in English and relevant East Asian languages. Concurrently scheduled with course C297.

199. Special Studies in East Asian Languages and Cultures. (2 to 4) Preparation: advanced reading knowledge of Chinese or Japanese. Required of senior majors. Special individual studies. May be repeated once with consent of instructor.

Graduate Courses

200. Bibliography and Methods of Research in Chinese. (4) Required of all graduate students in Chinese. Lectures and discussion on research methodologies for dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.
210. Proseminar: Cultural and Comparative Studies. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Introduction to theoretical topics relevant to comparative study of East Asian cultures in the modern period. Readings include Western theoretical works balanced with texts taking congruent approaches to East Asian topics. S/U or letter grading.

220A-220B. Seminars: Topics in Cultural Studies (4 units each). (4) Seminar, three hours; outside study, nine hours. Complements course 210. Further investigation of methodology and materials of cultural studies in connection with specific topics selected by instructors. May be repeated for credit. In Progress and letter grading.

230A-230B. Seminars: Theoretical Topics in East Asian Literature. (4) Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Concerns of literary theory which are brought to the fore by reading of literature from or about East Asia. Readings from both Western and Eastern theorists; issues of translation, comparison, and categorization. In Progress grading.

240A-240B. Seminars: Topics in East Asian Literary History. (4-4) Seminar, three hours. Preparation: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. In Progress grading.

245A-245B. Seminars: Position of Modernity in East Asian Literature. (4-4) Seminar, three hours. Preparation: at least five years of an East Asian language. Designed for graduate students. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from European sources. In-class debate probes relevance of these readings for work as Asianists. Focus on Asian writings in course 245B. In Progress grading.

25SA-25SB. Seminars: Selected Topics in Buddhist Studies. (4-4) Seminar, three hours. Coverage varies. May be repeated for credit. In Progress grading.

C297. Life Writing in East Asia. (4) Seminar, three hours; outside study, nine hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C197. Additional readings and research required of graduate students.

399. Independent Study (2 to 6). Designed for graduate students. Guided research and writing of a research paper. May be repeated, but only four units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. S/U or letter grading.

301. Teaching an East Asian Language as a Foreign Language. (4) Lecture, four hours. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495C. Teaching Chinese at College Level. (2 to 4) Seminar, two hours; outside study, 10 hours. Preparation: Chinese language proficiency at advanced level. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

495J. Teaching Japanese at College Level. (2 to 4) Preparation: appointment as teaching assistant in Japanese. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

495K. Teaching Korean at College Level. (2 to 4) Preparation: appointment as teaching assistant in Korean. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

592. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

598. Research for and Preparation of M.A. Thesis. (4 to 8) Maximum of eight units may be applied toward M.A. degree requirements. S/U grading.

Indic Upper Division Courses

110A. Elementary Sanskrit. (4) Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages. S/U or letter grading.

110C. Advanced Sanskrit. (4) Lecture, three hours. Requisite: course 110B. Reading of entire Bhavagvata or comparable amount of other Sanskrit literature. S/U or letter grading.

Graduate Courses

M222A-M222B. Vedic. (4-4) (Same as Iranian M222A-M222B) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to course 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

230. Selected Readings in Sanskrit Texts. (4) Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

36A. Pali; 236B. Prakrits.

Japanese Lower Division Courses

1. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and written forms. Conversation drill based on material covered in class.

2. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

3. Elementary Modern Japanese. (4) Lecture, two hours; discussion, three hours. Continuation of course 2.

4. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, vocabulary building skills, language learning skills, and sociocultural knowledge. P/NP or letter grading.

5. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 4. Continuation of course 4. P/NP or letter grading.

6. Intermediate Modern Japanese. (4) Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 5. Continuation of course 5. P/NP or letter grading.

8. Elementary Japanese: Intensive. (12) Lecture, five hours; discussion, 15 hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Japanese, including pronunciation, grammar, and Japanese characters, with emphasis on all four basic language skills — speaking, listening, comprehension, reading, and writing. Offered in summer only. Letter grading.

10. Intermediate Modern Japanese: Intensive. (12) Lecture, 10 hours; discussion, 10 hours. Enforced requisites: courses 1, 2, 3. Intensive course equivalent to courses 4, 5, and 6. Readings in modern Japanese, with emphasis on comprehension and structural analysis. Offered in summer only. Letter grading.

15. Intermediate Reading and Writing for Japanese-Heritage Speakers. (4) Lecture, three hours; outside study, nine hours. Designed for intermediate-level Japanese-heritage learners or nonheritage learners who are fluent in daily spoken Japanese. Emphasis on building vocabulary knowledge of KANJI, reading and writing, and formal aspects of spoken Japanese (polite and honorific/humble forms). P/NP or letter grading.

CM182. Japanese Folklore. (4) (Formerly numbered 182.) (Same as Folklore CM182.) Lecture, three hours; discussion, one hour; outside study, eight hours. Knowledge of Japanese not required. Lectures on nature religion, beliefs and practices (fetishism), and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems. Concurrently scheduled with course CM282. Letter grading.

188. Personalities in Japanese Civilization. (4) (Formerly numbered C188.) Seminar, three hours; outside study, nine hours. Five weeks of introductory lectures and five weeks of student presentations based on instructor-guided student research.

195. Japanese Aesthetics and Hermeneutics. (4) (Formerly numbered 190.) Lecture, three hours; outside study, nine hours. Requisite: course 50 or 60 or 150 or 151. Introduction to field of modern and premodern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formation of aesthetic judgment. Concurrently scheduled with course C295. P/NP or letter grading.

197A. Undergraduate Seminar: Classical Japan. (4) Seminar, three hours; outside study, nine hours. Selected topics in classical Japanese literature and thought.

C197B. Seminar: Modern Japan. (4) (Formerly numbered 197B.) Seminar, three hours; outside study, nine hours. Selected topics on modern Japan. Concurrently scheduled with course C297B.

Graduate Courses

201A-201B. Introduction to Reading Japanese Academic Texts. (4) Lecture, three hours; outside study, nine hours. Requisite: course 100A. Course 201A is requisite to 201B. Designed for graduate students. Introduction to modern Japanese-language academic texts, both prewar and postwar, with focus only on reading; students who need to improve other skills should take additional courses. S/U or letter grading.

211. No and Kyogen. (4) Lecture, three hours. Preparation: one year of classical Japanese. Readings of selected No and Kyogen texts from Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor.

C223. Structure of Japanese II. (4) Lecture, three hours. Preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course CM123.

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives. (4) Seminar, three hours. Requisite: course CM122. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading.

226. Survey of Functional Linguistics. (4) Lecture, four hours; outside study, eight hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. S/U or letter grading.

CM228. Survey of Functional Linguistics. (4) Lecture, four hours; outside study, eight hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. S/U or letter grading.
241A-241B. Seminars: Japanese Classics. (4-4) Seminar, three hours. Prose and poetry from early times to 1668. May be repeated for credit with consent of instructor. In Progress grading.

C249. Introduction to Kambun and Other Literary Styles. (4) Lecture, three hours; outside study, nine hours. Requisite: course 140A or 140B. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Concurrently scheduled with course C149. Graduate students read additional texts and submit one additional written assignment.

C260. Japanese Buddhism. (4) Lecture, three hours; outside study, nine hours. Knowledge of Asian languages not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings. Concurrently scheduled with course C160. Graduate students read additional texts and submit one additional written assignment.

CM282.) Lecture, three hours; discussion, one hour. Knowledge of Buddhist belief systems. Concurrently scheduled with special emphasis on artistic behavior. Discussion

C295. Japanese Aesthetics and Hermeneutics. (4-4) Lecture, three hours; outside study, nine hours. Selected topics in modern Japan. Graduate students to be assigned additional readings and write seminar papers based on research in their own disciplinary areas. Concurrently scheduled with course C195B.

Korean

Lower Division Courses

1. Elementary Modern Korean. (4) Lecture, two hours; discussion, three hours. Not open to students who, from whatever source, already know the language. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation.

2. Elementary Modern Korean. (4) Lecture, two hours; discussion, three hours. Continuation of course 1.

3. Elementary Korean for Korean-Heritage Speakers. (4) Lecture, two hours; discussion, three hours.

4. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours.

5. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours. Enforced requisite: course 3.

7. Intermediate Modern Korean. (4) Lecture, two hours; discussion, three hours. Concurrently scheduled with courses C101A-C101B-C101C.

8. Elementary Korean: Intensive. (12) Lecture, ten hours; discussion, ten hours. Not open to students who have learned, from whatever source, enough Korean to qualify for more advanced courses. Intensive course equivalent to courses 1, 2, and 3. Introduction to fundamentals of standard Korean, including pronunciation, grammar, and Korean characters, with emphasis on all four basic language skills—speaking, listening, comprehension, reading, and writing. Offered in sumer only. Letter grading.

10. Korean Civilization. (4) Lecture, three hours; discussion, one hour. Knowledge of Korean not required. General survey of development of Korean culture within context of political, social, and economic history.

Upper Division Courses

100A-100B-100C. Advanced Modern Korean. (4) Lecture, two hours; discussion, three hours. Requisite: course 6. Course 100A is requisite to 100B, which is requisite to 100C. Course 100B is requisite to 100C. Offered in summer only. Letter grading.

101A-101B-101C. Advanced Readings in Modern Korean. (4) Lecture, three hours. Requisite: course 100C. Course 101A is requisite to 101B, which is requisite to 101C. Offered in winter only. Letter grading.

102A-102B-102C. Advanced Korean Conversation. (3-3-3) Discussion, three hours; outside study, six hours. Requisite: course 102A, which is requisite to 102B, which is requisite to 102C. Courses 100A-100B-100C or 101A-101B-101C may be taken concurrently. Not open to students who have attended an elementary school in Korea for more than one year. Designed to further improve spoken proficiency. P/NP or letter grading.

105A-C105B-C105C. Reading Korean Academic Texts. (4-4) Lecture, three hours; discussion, three hours. Concurrently scheduled with courses C205A-C205B-C205C. P/NP or letter grading.

106A-106B-106C. Advanced Korean Literature. (4-4) Lecture, three hours; discussion, three hours. Concurrently scheduled with courses 201A-201B-201C. P/NP or letter grading.

107. Introduction to Korean Literature. (4) Lecture, three hours. Preparation: at least one year of Korean and some knowledge of linguistics. Critical reading and analysis of selected modern Korean literary texts. Offered in winter only. Letter grading.

108A-108B. Readings in Modern Korean Literature. (4-4) Lecture, three hours. Preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Offered in spring only. Letter grading.
150. Korean Literature in Translation: Classical. (4) Lecture, three hours. Requisite: English Composition 3 or one course from Comparative Literature 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the 19th century, with all readings from English translations.

155. Topics in Korean Cinema. (4) Lecture, three hours; film viewing, four hours; outside study, five hours. Historical and critical survey of Korean cinema, examining intersection between 20th-century Korean history, politics, and filmmaking. P/NP or letter grading.

165. Introduction to Korean Buddhist Texts. (4) Lecture, three hours. Requisites: course 100A and/or Chinese 110C. Introduction to reading Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings. Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor.

175. Introduction to Traditional Korean Thought. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. General survey of Korean thought from the earliest records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West.

176. Introduction to Korean Confucian Texts. (4) Lecture, three hours. Requisite: course 100C. Reading in Koryo and Choson texts on politics, society, and culture. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor.

177. Introduction to Modern Korean Thought. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Requisite: course 50. Survey of Korean thought in the 20th century, including religious thought, political thought, feminism, nationalism, and economic thinking and practice.

180A-180B-180C. Cultural History of Korea. (4) Lecture, three hours; discussion, one hour. Requisite: course 50. Examination of evolution of Korean culture and society within context of political and industrial industry. Consideration of both higher and popular culture. 180A. Through 1259; 180B. 1260 through 1876; 180C. Since 1876.

187. Popular and Folk Religion in Korea. (4) Lecture, three hours; outside study, nine hours. Introduction to history, forms, and scholarship concerning folk religion in Korea. Exploration of forms of popular and folk religion in Korea, including shamanism, ancestor worship, and contemporary religions. Consideration of fortune-telling, geomancy, and spirit belief. P/NP (undergraduates), SU (graduates), or letter grading.

197A. Seminar: Traditional Korea. (4) Seminar, three hours; outside study, nine hours. Selected issues of interpretation in Korean history from earliest times through the mid-19th century. Coverage varies from term to term and includes such topics as state formation, international relations, or “sprouts of capitalism” thesis.

197B. Seminar: Contemporary Korean Society and Culture. (4) Seminar, three hours; outside study, nine hours. Requisite: course 177 or 180C. Selected topics in modern Korean history.

Graduate Courses

200. Bibliography and Methods of Research in Korean. (4) Lecture, three hours. Preparation: reading knowledge of Korean and Chinese. Designed for graduate students. Review of basic Western and modern Korean reference books, with concentration on Korean literature and language, and survey of basic bibliographical material. In addition, introduction to most important primary sources in student’s field of specialization.

C205A-C205B-C205C. Reading Korean Academic Texts. (4-4-4) Lecture, three hours; outside study, nine hours. Requisite: course 101C. Intended to improve reading skills for students who have studied Korean to an advanced level, with coverage in Korean of materials on modern Korean history, culture, and society. Each course may be taken independently for credit. Concurrently scheduled with courses C105A-C105B-C105C. SU or letter grading.

210. Thought and Society in Korea. (4) Readings/discussion, three hours. Preparation: reading knowledge of Korean. Designed for graduate students. Readings in Korean intellectual history and its social, political, and economic background from the rise of neo-Confucianism in the 14th century to the 20th century.

211. Thought and Society in Modern Korea. (4) Discussion, three hours; outside study, nine hours. Preparation: reading knowledge of Korean. Designed for graduate students. Critical examination of list of books central to field of modern Korean history, including such topics as Korean capitalism and communism, intellectual history, social movements, and the Korean War.

215. Korean Literary History. (4) Seminar, three hours; outside study, nine hours. Designed for graduate students. Critical history of development of traditional Korean literature, with emphasis on the study of poetry and prose. At end of term, students expected to write a term paper, and to produce accurate and readable translations. May be repeated for credit with consent of instructor. In Progress grading.

220. Structure of Korean. (4) Lecture, three hours. Preparation: two years of Korean or one year of Korean and some knowledge of linguistics. Linguistic analysis of Korean for those who concentrate on Korean language. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals. Concurrency scheduled with course CM120.

CM227. Contrastive Analysis of Japanese and Korean. (4) (Same as Japanese Language CM227.) Lecture, three hours. Preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from the perspectives of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127.

230A-230B. Seminars: Literary Translation from Korean. (4) Seminar, three hours. Preparation: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. At end of term, students expected to produce publishable translations. May be repeated once with consent of instructor. In Progress grading.

265A-265B. Seminars: Topics in Traditional Korean Cultural History. (4-4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of Korean or literary Chinese. Discussion and research on major topics in Korean cultural history, such as Confucianization of Korean society, Practical Learning movement of late Choson dynasty, Korean reactions to the West in Eastern learning and enlightenment movements of the 19th century. May be repeated for credit in. In Progress grading.

266A-266B. Seminars: Topics in Modern Korean Cultural History. (4-4) Seminar, three hours; outside study, nine hours. Preparation: reading knowledge of Korean. Designed for graduate students. Graduate research seminar on selected topics in modern Korean history. In Progress grading.

Scope and Objectives
The East Asian Studies major is an area studies program of the East Asian region which is divided into three areas of concentration — China, Japan, and Korea. It offers a social science approach, combined with language study and work in the humanities.

Undergraduate Study
East Asian Studies B.A.

Two years of language and a total of 13 upper division courses, including courses in the social sciences, culture, and language, must be taken for graduation. Students must take a minimum of nine courses in the area of their choice. The remainder must be taken in another area of concentration within the major. No more than eight courses may be from a single department. Students should select the courses from the lists below. Courses on East Asia not listed below, offered only on a temporary basis, may also be applied toward the major. At the discretion of the adviser, students may be advised to take theory classes applicable to the major requirements. Courses marked with an asterisk are those on East Asia in general.

China Concentration
Preparation for the Major
Required: Chinese 1, 2, 3, 4, 5, 6, History 11A-11B, Sociology 1.

The Major
Required: A minimum of nine courses selected from Art History C115B, C115D, C115E, C115F, Chinese 150A, 150B, 151, 160, 175, 190, and up to three upper division language courses or equivalent, East Asian Languages and Cultures 161, 162, Economics *190, *191, *192, Ethnomusicology C156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, 159A, 159B, Sociology *188, and a 199 special studies course in Chinese or in any social sciences or humanities department.

Japan Concentration
Preparation for the Major
Required: History 9C, Japanese 1, 2, 3, 4, 5, 6, Sociology 1.

The Major

Korea Concentration
Preparation for the Major
Required: Korean 1, 2, 3, 4, 5, 6, 50, Sociology 1.

The Major
Required: A minimum of nine courses selected from Anthropology 175V, Art History 114E, East Asian Languages and Cultures 161, 162, Economics *190, *191, *192, Korean 150, 151, 160, 175, 180A, 180B, 180C, and three upper division language courses or equivalent, Sociology *188, Theater *102E, and a 199 special studies course in Korean or in any social sciences or humanities department.
ECONOMICS

College of Letters and Science

UCLA
2263 Bunche Hall
Box 951477
Los Angeles, CA 90095-1477
(310) 825-1011
http://www.econ.ucla.edu

The economics undergraduate program is designed for students who wish to gain a thorough understanding of both empirical and theoretical approaches to economics. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in Economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in economics, law, management, public administration, journalism, social welfare, architecture and urban planning, and education. The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students’ ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Undergraduate Study

Economics B.A.

Preeconomics Major

While students are completing the lower division preparation courses for the major, they may be classified as Preeconomics majors and are eligible to apply for the major once they have completed the preparation courses and at least one 12-unit term in residence at UCLA. Application for the major should be filed at the undergraduate counselor’s office in 2253 Bunche Hall by the time students attain 135 quarter units.

Preparation for the Major

Required: Economics 1, 2, 11, M40 (or Statistics M11); English 4 or English Composition 100 or 129B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade. A 2.0 (C) grade is required in each pre-major course. To enter the major, students must have a minimum 2.5 grade-point average in the economics and mathematics preparation courses and a GPA of at least 2.0 in any upper division courses taken for the major before applying.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Nine upper division courses in economics which must include Economics 101, 102, and one course from at least three different fields in economics selected from the major fields list below. All courses must be taken for a letter grade. Economics 100, 110, and 190 may not be included among the nine upper division courses. One or two of the nine courses may be selected from Management 120A, 120B, 130A, 130B, and/or 133.

To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with grades of C– or better in Economics 101 and 102. All upper division courses for the major must be taken for a letter grade. Transfer credit is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

Major Fields

Economic theory (courses 101, 102, 103A, 103Z, 104, 105AH, 105BH, 107); economic development (courses 111, 112); regional economics (course 120); public finance (courses 130, 133, M135, M136); statistics, mathematical economics, and econometrics (courses 142, 143, 144, 145, 146, 147A, 147B, 148); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176, 177); economic institutions (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

Economics B.A./Applied Economics M.S. Dual Program

An intercampus dual degree program has been established between UCLA and UC Santa Cruz which allows students to obtain a B.A. in Economics from UCLA and an M.S. in Applied Economics from UC Santa Cruz in five years. Consult the economics undergraduate counselor for additional information.

Business Economics B.A.

The B.A. program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see The Major).

Admission

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply, students must have completed at least 72 quarter units (but no more than 135 quarter units), one
12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major. In addition, they must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade in each preparation course, (3) have a 3.0 (B) overall average in all preparation courses except English, and (4) have a 2.0 (C) grade-point average in their upper division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

Note: The prerequisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration. Students must petition to enter the major at the undergraduate counselor’s office in 2250 Bunche Hall.

Prebusiness Economics Major
While students are completing the preparation courses for the major, they may be classified as Prebusiness Economics majors. (Transfer students who wish to enter UCLA as Prebusiness Economics majors must meet the admission screening requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.)

Preparation for the Major

Required: Economics 1, 2, 11, M40 (or Statistics M11), 101; English 4 or English Composition 100 or 129B; Management 1A-1B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval.

The Major

Required: Economics 102 and at least two courses from 104, 173, 174, 177, 184; four other upper division courses in economics in at least two different fields (no more than two may be taken in the government and industry field); four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127A, 130A, 130B, 133, 140, 175. Transfer credit for any of the major courses is subject to department approval. Consult the undergraduate counselor before enrolling in any courses for the major.

All upper division major courses must be taken for a letter grade. To graduate, students must have at least a 2.0 grade-point average in their upper division major courses, with at least a C– in each course. (Economics 101 applies on the preparation for the major, therefore requiring a minimum grade of C.)

Economics/International Area Studies B.A.
The B.A. program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Qualified students must apply for the major through the undergraduate counselor in 2253 Bunche Hall. To apply, students must have completed at least 72 quarter units (but no more than 135 units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major (except for the second year of foreign language). In addition, they must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 3.0 GPA in the economics and mathematics courses. Students must also have a 2.0 (C) grade-point average in their upper division courses taken for the major before applying. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 193. The program as a whole must be approved by the Economics Department counseloer before students are admitted to the major.

Preeconomics/International Area Studies Major

While students are completing the preparation courses for the major, they may be classified as Preeconomics/International Area Studies majors.

Preparation for the Major

Required: Economics 1, 2, 11, M40 (or Statistics M11), 101, 102; Mathematics 31A, and 31B or 31E. Students also must complete at least the first year (or equivalent) of the two required years of a modern foreign language which is spoken in the geographical area of their major concentration.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: A total of 12 upper division courses selected from economics and the approved noneconomics courses listed below for the concentration. Eight economics courses are required, including Economics 191, 192, 193, and five economics courses from at least two different fields (selected from the major fields listed under the Economics major). Economics 101 and 102 (which are required for the pre-major) cannot be used to satisfy this requirement. The four remaining upper division courses are social sciences courses related to the concentration and must be chosen from the approved courses listed below. Students are required to include selections from at least two different departments. Economics 193 must be completed in the last year before graduation and includes the preparation of a research paper on the economy of the country or region of the concentration. In addition, students must show two-year proficiency (or equivalent) in a modern foreign language related to their concentration. The noneconomics courses, the research paper, and the language learned must show consistency of purpose.

To graduate in the major, students must achieve a minimum 2.0 grade-point average for both economics and noneconomics courses, with a grade of C– or better in each course.

Major Concentrations

When students declare the major, they must also select a concentration that includes a geographical area where the foreign language they have taken is spoken. They must complete four of the approved noneconomics courses listed, including courses from at least two different departments. Students may not use courses that are not on their concentration list unless they have petitioned and received approval in advance. Consult the undergraduate counselor in 2253 Bunche Hall about the petition process.

East Asia
Languages: Chinese, Japanese, Korean

Europe
Languages: French, German, Italian, Portuguese, Spanish

Latin America
Languages: Portuguese, Spanish

Middle East
Languages: Arabic, Hebrew, Persian, Turkish
Approved Noneconomics Courses: Geography
187, History 106C, 107B, 108A, 110B, 111B,
Jewish Studies 142, Political Science 132A,
157, Sociology 187, Turkic Languages 180

Former Soviet Union
Languages: Armenian, Russian

Approved Noneconomics Courses: Geography
184, History 112A, 112B, 112C, 113, 124A,
124B, 131A through 131D, Political Science
128A, 128B, 156A, Turkic Languages 180

Individual Concentration
Language, geographical area, and noneco-
nomics courses to be approved in advance by
the economics/international area studies fac-
culty adviser

Mathematics/Economics
B.S.
See the Mathematics/Economics listing for a
description of the major.

Honors Program
The departmental honors program is open to
majors in Economics, Business Economics,
and Economics/International Area Studies who
have a cumulative grade-point average of at
least 3.5 in all courses taken at UCLA prior to
application.

To qualify for departmental honors at gradu-
ation, students must (1) select at least seven
of the required upper division economics courses
from the approved list designated for depart-
mental honors, (2) complete a senior thesis ac-
tetable to the departmental honors commit-
tee, (3) present the thesis in Economics 195H,
and (4) complete the major requirements with
at least a 3.5 grade-point average in the eco-
nomics courses. Highest honors are awarded
at the discretion of the departmental honors com-
mittee based on grade-point average and
quality of the senior thesis.

Economics 195H and 199, the courses used
for thesis preparation, may be counted as up-
ner division courses toward the field in which
the thesis is written (for purposes of satisfying
the requirements for the major). Further infor-
mation and application forms are available from
the undergraduate counselor in 2253 Bunche Hall.

Computing Specialization
Majors in Economics, Business Economics,
and Economics/International Area Studies
may select a specialization in Computing by (1)
satisfying all the requirements for a bachelor's
degree in the specified major, (2) completing
Program in Computing 10A, 10B, Mathematics
61, and two courses from Program in Comput-
ing 10C, 15, 30, 60, and (3) completing at least
two courses from Economics 104, 143, 144,
145, 146, 147A, 147B, 199, with the additional
 provision that the courses taken must make
substantial use of computers. A grade of C–
or better is required in each course, with a com-
combined grade-point average of at least 2.0. Stu-
dents graduate with a bachelor's degree in
their major and a specialization in Computing.

Graduate Study
The following constitutes introductory infor-
mation regarding graduate degree programs and
is based on the 1998-99 edition of Program
Requirements for UCLA Graduate Degrees.
Complete, annual editions of Program Re
quirements are available (listed under “Publica-
tions”) on the Graduate Division website at
http://www.gdnet.ucla.edu. Students are sub-
ject to the degree requirements as published in
Program Requirements for the year in which
they matriculate.

Master's Degree
Admission
The department does not accept students
whose sole objective is the Master of Arts de-
gree in Economics.

Areas of Study
Economic theory; econometrics; information
and uncertainty; mathematical economics;
monetary theory; economic history; public fi-
nance; labor economics; industrial organiza-
tion; international economics; and develop-
ment economics.

Course Requirements
The department requires nine upper division
and graduate-level courses in economics com-
pleted while in graduate status at UCLA for the
Master of Arts degree in Economics. At least
seven of the nine courses must be graduate-
level courses in the Economics Department,
one of which must be either Economics 207 or
241 or 242. Each course must be completed
with a grade of B or better.

With prior approval of the vice chair for grad-
uate affairs, students may offer a maximum of
two courses from outside the department. How-
ever, these may not substitute for the seven
graduate-level economics courses required.

With the prior approval of the vice chair for
graduate affairs, four units of Economics 596
may be applied toward the total course require-
ment and the minimum graduate course re
quirement.

Comprehensive Examination Plan
In addition to the course requirements, candi-
dates for the M.A. degree must satisfactorily
complete a written comprehensive examina-
tion requirement that involves passing two ex-
aminations. The requirement may be fulfilled by
one of the following:

(1) Master's-level (M) passes in compre-
   hensive examinations for the three first-year
   sequences and a grade of B or better in all
   three courses in the remaining sequence.

(2) Master's-level (M) passes in the compre-
   hensive examination for one of the three first-
   year sequences and in one doctoral field ex-
   amination.

(3) Master's-level (M) passes in two doctoral
   field examinations.

Examinations are graded H (Ph.D. honors
pass), P (Ph.D. pass), M (M.A. pass), or F
(fail).

Thesis Plan
None.

Doctoral Degree
Admission
Applicants to the program leading to the Ph.D.
degree in Economics must satisfy the Univer-
sity minimum requirements. It is strongly rec-
commended that applicants have undergradu-
ate training in economics, mathematics, and
statistics. Applicants must also submit a full
record of prior university experience, three let-
ters of reference, and scores on the Graduate
Record Examination (GRE) General Test. In-
ternational applicants must also submit scores
for the Test of English as a Foreign Language
(Toefl).

The department admits students only for the
Fall Quarter of each academic year. The dead-
line for submitting the Application for Graduate
Admission is December 15.

Major Fields or Subdisciplines
Economic theory; econometrics; information
and uncertainty; mathematical economics;
monetary theory; economic history; public fi-
nance; labor economics; industrial organiza-
tion; international economics; and develop-
ment economics.

Course Requirements
In order that the program can be tailored to an
individual student's background and interests,
there are no formal course requirements in the
Ph.D. program. In their first year however, stu-
dents normally enroll in the standard first-year
graduate core sequences in microeconomic
theory (Economics 201A-201B-201C), macro-
economic theory (Economics 202A-202B-
202C), and quantitative methods (Economics
203A, 203B, 203C).

Written and Oral Qualifying
Examinations
Written Examinations. All Ph.D. qualifying ex-
aminations are intended to determine compe-
tency in the overall field. While the courses of-
ffered are intended to prepare students for the
field examinations, and while the professors of
the courses are normally also the examiners,
the qualifying examination is not restricted
solely to the material explicitly presented in
course lectures or assigned exercises. Stu-
dents are assisted in acquiring knowledge of
the overall field by course reading lists that in-
clude recommended supplementary and com-
plementary readings.

The department offers written qualifying exa-
minations in the areas listed below (with prepara-
tory courses shown in parentheses):

Core Sequences. Microeconomic theory (Eco-

nomics 201A-201B-201C); macroeconomic

**Elective Doctoral Fields.** Econometrics (Economics 231A, 231B, M232A, 232B); information and uncertainty (Economics 211A-211B, 212A); mathematical economics (Economics 213A-213B, 214A); monetary economics (221A-221B); economic history (Economics 241, 242); public finance (Economics 251A, 251B, 252); labor economics (Economics 261A-261B); industrial organization (Economics 271A-271B, 271C); international economics (Economics 281A, 281B, 281C); development economics (Economics 286A, 286B, 287A, 287B).

Examinations are graded H (Ph.D. honors pass), P (Ph.D. pass), M (M.A. pass), or F (fail).

Students must pass (with a P or better) the qualifying examinations for two of the standard first-year core sequences — microeconomic theory, macroeconomic theory, or quantitative methods — by the end of Spring Quarter of their second year.

Students must satisfy an additional requirement in the remaining first-year core sequence that may be met by (1) earning a Ph.D. pass on the corresponding qualifying examination or (2) earning a grade of B or better in all three courses.

Students must pass (with a P or better) qualifying examinations in three doctoral elective fields (or two fields plus breadth option), usually by the end of the second year. The requirement must be satisfied by the end of the Spring Quarter of their third year.

Written qualifying examinations can be repeated, but students may sit for no more than seven in total.

Qualifying examinations in all core sequences are offered twice a year (September and June). Doctoral field qualifying examinations are offered at least once a year.

By employing the breadth option, students may substitute a field by coursework, defined as three graduate-level courses for one of the three elective fields. Courses used to satisfy the requirement cannot include any courses used in the core sequence requirements nor can they include courses preparatory for the written qualifying examinations which students are using for field requirements. The breadth option must include Economics 207 or 241 or 242. Students may apply courses at the graduate (200) level outside the Economics Department on written preapproval by the vice chair for graduate affairs. Only courses in which a minimum grade of B is earned may be used to satisfy this requirement.

**Paper Requirement.** A written paper must be completed by the end of the student's third year. The paper is to be read and evaluated by a member of the Economics Department faculty, who must certify in writing that it satisfied this requirement. The paper could be based on or be an extension of an optional or required paper for a course. Alternatively, the paper could be one presented in a workshop or an outgrowth of a research assistantship or independent study. Ideally, the paper would be related to the student's doctoral dissertation. The materials of the paper may be used as the basis for presentation in a departmental workshop, as well as the basis for the dissertation.

Before advancing to the University Oral Qualifying Examination, students are required to present a paper in a departmental workshop. It is recommended that this be completed by the end of the third year.

**Oral Qualifying Examination.** The University Oral Qualifying Examination, administered by the student's doctoral committee, is scheduled after successful completion of all written qualifying examinations, course requirements, the written paper and workshop requirements, and the submission of a written dissertation proposal. The proposal should be made available to the committee members at least two weeks prior to the date of the examination. The examination focuses on, but is not limited to, the dissertation proposal.

Normally, students should attempt the oral examination by the end of the Fall Quarter of the fourth year. The examination must be passed by the end of the Spring Quarter of the fifth year. In case of failure, students may repeat the oral qualifying examination once.

**Economics**

**Lower Division Courses**

1. **Principles of Economics.** (4) Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

2. **Principles of Economics.** (4) Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

3. **Introductory Economics.** (4) Lecture, three hours. Not open to students with credit for course 1, 2, or 100. Principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for Economics Department majors.

4. **Microeconomic Theory.** (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 1, 2; one course from Mathematics 31B, 31BH, 31E; 32A. Laws of demand, supply, returns, and costs; price and output determination in different market situations.

5. **Econometrics.** (4) Formerly numbered 40.) (Same as Statistics M11.) Lecture, three hours; discussion, one hour. Not open to students with credit for Mathematics M170A, 170B, 171, Statistics 10, 100A, or 100B. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. P/NP or letter grading.

6. **Theory and Practice of Econometrics.** (4) Formerly numbered 103C.) Lecture, three hours; discussion, one hour. Requisite: course M40 or Statistics 10. Introduction to theory and practice of econometrics to provide sufficient knowledge of statistical and econometric theory to make one an effective consumer and producer of empirical research in economics. Emphasis on intuitive understanding rather than rigorous argument and on applications. P/NP or letter grading.

**Upper Division Courses**

100. **Economic Principles and Problems.** (4) Lecture, three hours. Designed for juniors/seniors. Not open to students with credit for course 1, 2, or 5. Principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major.

101. **Microeconomic Theory.** (4) Lecture, three hours; discussion, one hour. Requisite: course 11. Theory of factor pricing and income distribution; general equilibrium; implications of pricing process for optimum allocation of resources; interest and capital.

103A-103Z. **Upper Division Research Seminars:** Applications of Economic Theory. (4) Seminar, three hours. Requisite: course 11. Limited enrollment seminars in which students usually write a research paper on a topic selected in consultation with instructor:

- **M103A.** Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Political Science M139A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

- **103B.** Economics of Energy. Requisite: course 102. Topics include pricing and taxation of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls, oil debt and balance of payments, energy conservation, and future technologies.

105AH. **Topics in Microeconomics (Honors).** (4) Lecture, three hours. Requisite: course 101. Designed for departmental honors program students. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of externalities, strategic pricing.

106. **Special Topics in Business Economics.** (4) Lecture, three hours. Requisite: course 101. Enrollment priority to business economics students. Application of economic analysis to contemporary business. Course may be organized around individual industries or topics of current relevance to business. Alternatively, course may examine problems in major fields of economics (e.g., international, macroeconomics, finance) and their implications for business. May be repeated for credit with topic change.
107. History of Economic Theory. (4) Lecture, three hours. Requisite: course 1 or 100. Survey of economic analysis from Grecian antiquity to the early 20th century; concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, marginalists, and Marshall.

110. Economic Problems of Underdeveloped Countries. (4) Lecture, three hours. Requisite: course 1 or 100. Limited to non-Economics Department majors. Not open for credit to students with credit for course 111. Survey of major issues in development economics. Economic structure of low-income countries and primary causes for their limited economic growth. Economic goals and policy alternatives open to their leaders. Possible roles of developed countries. May not be applied toward any Economics Department major.

111. Theories of Economic Growth and Development. (4) Lecture, three hours. Requisite: course 11. Growth models, theory of production under constraints, relative factor prices and their impact on choice of technology, investment criteria, role of the market, economic planning in less developed areas.

120. Introduction to Urban and Regional Economics. (4) Lecture, three hours. Requisite: course 11. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local government finance.

133. State and Local Finance. (4) Lecture, three hours. Requisite: courses 101, 130. Division of functions and revenues between state and local governments; revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems.

134. Environmental Economics. (4) Lecture, three hours. Requisites: courses 11, 101. Application of economic theory to natural and environmental resource problems. Topics include sustainability and natural resource scarcity, steady-state models for renewable resources (land and water, fisheries, forests), externalities and pollution (including use of incentives for pollution control), and nonrenewable resources (minerals). Letter grading.

M135. Economic Models of Public Choice. (4) (Same as Political Science M105.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: any lower division political science course. Enforced requisite: course 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

142. Probabilistic Microeconomics. (4) Lecture, three hours. Requisites: courses 11, 101. Combination of basic probability introduced in course 40 with microeconomic theory in course 11 and 101 in order to explain phenomena such as leisure, search, and stock market behavior. Optimal production and consumption under uncertainty. Review of probability and introduction to alternative measures of risk and risk aversion.

143. Applied Regression Analysis. (4) Lecture, three hours; discussion/computer tutorial, one hour. Requisite: course 40. Not open to students with credit for course 147A or 147B. Review of simple regression; assumptions of classical linear regression model; multiple regression, estimation, and inference; violations of assumptions of classical model (multicollinearity, heteroskedasticity, autocorrelation); autoregressive models, dummy variables. Emphasis on practical experience with regression analysis and interpretation; matrix algebra not required. P/NP or letter grading.

144. Introduction to Mathematical Methods in Economics. (4) Lecture, three hours. Requisite: course 101. Introduction to use of mathematics in economic analysis. Topics include partial differentiation, optimization, integration, and differential and difference equations, with applications to theory of the household and the firm, capital theory, and economic dynamics.

145. Topics in Mathematical Economics. (4) Lecture, three hours. Requisites: courses 101, 144. Possible topics include game theory: competitive equilibrium analysis; examination of market failure and role for market intervention.

146. Linear Models in Economics. (4) Lecture, three hours. Preparation: one linear or matrix algebra course. Not open for credit to students with credit for Mathematics 164 or Electrical Engineering 136. Possible topics include duality theory of linear programming and simplex algorithm, input/output analysis, and two-person zero-sum games.

147B. Applications of Econometrics. (4) Lecture, three hours. Requisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required.

151. Labor, Wages, and Income. (4) Lecture, three hours. Requisites: courses 101, 150. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

152. Trade Unions and Professional Associations. (4) Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.

M158. International Political Economy of Work and Gender. (4) (Same as Women's Studies M123.) Lecture, three hours; outside study, nine hours. Requisite: course 1 or 5 or 100. Analysis of women's economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence.

171. Behavioral Organization: Theory and Tactics. (4) Lecture, three hours. Requisite: course 11. Study of pricing and output decisions of firms under conditions of less than perfect competition or monoply; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance.

175. Economics of Transportation. (4) Lecture, three hours. Requisite: course 11. Economic characteristics of transport; functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; modern transport problem.

186. History of Enterprise and Entrepreneurship in the American Economy. (4) Lecture, three hours. Enrollment priority to Business Economics majors. Study of role of innovation in history of American entrepreneurship. Examination of specific episodes of salient entrepreneurial innovation, as well as general theoretical and empirical treatments.

M189. Asian Pacific Americans in the U.S. Economy. (4) (Same as Asian American Studies M123.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

190. International Economics. (4) Lecture, three hours. Requisite: course 1 or 100. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. General introduction to international economics, based on examination of theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major.

192. International Finance. (4) Lecture, three hours; discussion, one hour. Requisite: course 102. Not open to students with credit for course 190. Emphasis on interpretation of the balance of payments and adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. P/NP or letter grading.

193. Research in International Area Studies Seminar. (4) Seminar, three hours. Limited to senior Economics/International Area Studies majors. Students prepare research paper on economy of the country or region of specialization.

195H. Honors Thesis Seminar. (4) Seminar, three hours. Limited to senior departmental honors program students. Seminar in which students present results of their senior theses.

199. Special Studies in Economics. (2 or 4) Requisite: courses 11, 101. Limited to juniors/seniors. May be repeated but may be applied only once toward the major requirements.

Graduate Courses

Foundations of Economics

200. Mathematical Methods in Economics. (4) Lecture, three hours. Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamics and dynamic optimization. S/U grading.

201A-201B-201C. Microeconomics. (4-4-4) Lecture, three hours. S/U or letter grading.

202A-202B-202C. Macroeconomics. (4-4-4) Lecture, three hours.

203A. Probability and Statistics for Econometrics. (4) Lecture, three hours. Provides statistical tools necessary to understand econometric techniques. Random variables, distribution and density functions, sampling, estimators, estimation techniques, hypothesis testing, and statistical inference. Use of econometric problems and examples. S/U or letter grading.

204A-204Z. Applications of Economic Theory. (4 each) Lecture, three hours: M204L-M204M-M204N. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units). (Same as Health Services M204A-M204B-M204C.) Seminar, three hours every other week for three terms. Requisites: courses 201A-201B-201C, Health Services M236. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress and S/U or letter grading.

205. Economic Modeling. (4) Lecture, three hours. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariate constrained optimization. S/U or letter grading.

207. History of Economic Thought. (4) Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from the 1870s, including contributions of major figures of the marginalistic revolution, the socialist controversy, and history of welfare economics. S/U or letter grading.

Economic Theory

211A-211B. Economics of Uncertainty, Information, and Games. (4) Lecture, three hours. Preparation: introductory probability. Requisite: course 201C. Theory of individual decision making under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

212A-212Z. Topics in Advanced Theory. (4) Lecture, three hours. Current research in microeconomic theory. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

212B. Applied Game Theory. Preparation: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monopoly theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets.

213A-213B. General Equilibrium and Game Theory. (4) Lecture, three hours. Preparation: course 201C. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.
214A-214Z. Topics in Mathematical Economics. (4 each) Lecture, three hours. Requisites: course 213B. Current research in mathematical economics. Content varies. Ordinarily only two courses in this sequence given every year. May be repeated for credit. S/U or letter grading.

214A. General Equilibrium Theory. Requisite: course 201C. Core convergence theorems, cooperative and noncooperative approach to competitive equilibrium theory, perfectly competitive equilibria, the no-surplus condition, and applications to mechanism theory and incomplete market models.

M214B. Game Theory. (Same as Mathematics M261 and Political Science M208A.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs.

M215. Topics in Applied Game Theory. (4) (Same as Political Science M208B.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting behavior. UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U grading.

218A-218B-218C. Proseminars: Economic Theory. (4-4-4) Seminar, three hours. Quarterly seminars for predissertation and dissertation writers. Discussion of advanced topics and recent developments in game theory, information and uncertainty, and general equilibrium theory. Presentation of recent papers published and unpublished in economic theory as well as research of instructor and students. In-class presentation expected. S/U grading.

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

Monetary Economics

221A-221D. Monetary Economics I to IV. (4 each) Lecture, three hours. S/U or letter grading.

221B. Emphasis on theoretical, historical, and policy aspects of monetary economics. Financial intermediation, bank panics, asset price volatility, game theoretic models of policy, inflation, implication of monopolistic competition, search and coordination failures, central bank operations, and evolution of monetary institutions.

221D. Requisites: courses 202A-202B-202C. Emphasis on applied macroeconomics, with topic change each year. Students select a particular data set to study. Each week class studies an article from recent work in applied macroeconomics or applied econometrics which teaches a technique or suggests a theoretical restriction. Subgroups report back to class using the technique on their selected data set.

222A-222Z. Topics in Monetary Economics. (4 each) Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading.

M222A. Control and Coordination in Economics. (4) (Same as Computer Science M222.) Lecture, three hours. Recommended preparation: appropriate mathematics course. Designed for graduate economics and engineering students. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization; coordination in teams; certainty equivalence and separation theorems; stochastic learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

228A-228B-228C. Proseminars: Monetary Economics. (4-4-4) Seminar, three hours. Workshops for predissertation and dissertation writers. Literature surveys or research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U grading.

Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239X-239Y-239Z (finance workshops)

Econometrics

M232A. Bayesian Econometrics. (Same as Political Science M231A.) Subject: Bayesian learning, analysis, and interpretation of empirical results. Emphasis on decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism.

239A-239B-239C. Workshops: Econometrics. (4-4-4) Lecture, three hours. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Public Finance

251A. Theory and Policy of Taxation. (4) Lecture, three hours. Examination of influence of taxation on economic efficiency and incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rule, and alternative forms of taxation. Special tax provisions, tax incentives, and progressivity in taxation in second part of course. S/U or letter grading.

251B. Cost-Benefit Analysis of Public Projects and Programs. (4) Lecture, three hours. Requisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

252. Economics of Federalism. (4) Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

254A-254B-254C. Workshops: Public Economics. (4-4-4) Lecture, three hours. Designed for graduate students. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

Labor Economics

261A-261B. Labor Economics I, II. (4-4) Lecture, three hours. S/U or letter grading.

261B. Requisite: course 261A. Models of life-cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and experience of women.

262A-262Z. Topics in Labor Economics. (4 each) Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

268A-268B-268C. Proseminars: Labor and Population. (4-4-4) Seminar, three hours. Quarterly seminars for predissertation and dissertation writers working on empirical issues in areas of labor and population, broadly defined. Presentation of work-in-progress or background material for proposed thesis topics, to be discussed and critiqued by faculty and fellow students. Presentation or research paper required. S/U grading.

269A-269B-269C. Workshops: Labor Economics. (4-4-4) Lecture, three hours. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and critiqued by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.
Industrial Organization

271A. Major economic aspects of property rights system. The firm and the market compared from perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure.

271B. Requisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements.

272A-272Z. Topics in Industrial Organization. (4 each) Lecture, three hours. Current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

273A. Public Utility Regulation. (4) Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

Also see Management 262 (pricing policy)

International Economics

282A-282Z. Topics in International Economics. (4 each) Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

284. Soviet Economic Theory and Organization. (4) Lecture, three hours. Overall strategy of planning used by U.S.S.R. planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of the methods. S/U or letter grading.

Development Economics

286B. Cost-Benefit Analysis of Development Projects. (4) Lecture, three hours. Requisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

287A-287Z. Topics in Development Economics. (4 each) Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

287B. Economic Development in East Asia. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially with the U.S., in area’s economic development.

287C. Topics in Economic Development. Designed for graduate students. Topics in monetary and exchange rate policy in developing countries. Students expected to develop analytical tools and underlying policy issues.

Urban Economics
291A-291B. Urban Economics. (4-4) Lecture, three hours. Course 291A is requisite to 291B. Implications of urbanization for economic analysis. Development of theory in course 291A; emphasis on policy in 291B. Use of monocentric model of urban land use to introduce location and transportation costs. Examination of housing, transportation, and local public services.

293A-293Z. Topics in Urban Economics. (4 each) Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presentation of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

Special Studies
375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

485. Teaching College Economics. (2) Discussion, one hour; laboratory, three hours. Designed for graduate students. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Individual Study. (2 to 8) Directed individual study or research. S/U grading.

Education Studies Minor

The Education Studies minor is intended to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) help understand the complex interactions between the legal, social, political, and economic forces which influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

To enter the minor, students must have completed 32 units with a minimum overall 2.3 (C+) grade-point average and file an admission application with the education studies academic adviser in the Office of Student Services, 1009 Moore Hall. Applicants are expected to have a real commitment to inquiry into issues vital to education.

Required Lower Division Courses (eight units):
- Two policy and issues courses from Education 91A through 91E, with grades of C+ or better.

Required Upper Division Courses (20 units):
- Two behavioral and social sciences perspective courses from Education M102, 125A, M148; and one professional topics course from 197A through 197Z.

In addition to or in lieu of electives, students may select a concentration in community education leadership by completing three courses from Education 192A, 197E, 197K through 197N.

Students with a 3.0 grade-point average may, after acceptance of a separate application, also select a concentration in advanced studies by taking Education 197X and 199 in addition to the course requirements for the minor. All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master's Degrees

The Department of Education offers the Master of Arts (M.A.) degree in Education and the Master of Education (M.Ed) degree and participates in concurrent and articulated degree programs.

Master of Arts Admission

The M.A. in Education is an academic master's degree designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program. The department has an application form which must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

Law/Education

The Department of Education and the School of Law offer a concurrent degree program that allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. The program is not accepting applications for 1999-00.

Areas of Study

The Master of Arts emphases in divisions 2 through 5 are the following:

- Educational Psychology
  Counseling, developmental studies in education, learning and instruction

- Higher Education and Work
  Education training, public policy analysis, research in higher education, and teaching in higher education

- Social Research Methodology
  Applied statistics and psychometrics, quantitative and qualitative research, evaluation methodology, and economic analysis

- Social Sciences and Comparative Education
  Social sciences, comparative and international education

Curricular Divisions

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.
Division 1: Administration, Curriculum, and Teaching Studies

Division 2: Educational Psychology

Division 3: Higher Education and Work

Division 4: Social Research Methodology

Division 5: Social Sciences and Comparative Education

Teacher Education

Academic Interinstitutional Programs
Formal discontinuance pending.

Special Studies

Course Requirements
A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series; no more than two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two research methods courses approved by the faculty adviser must be selected. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser and division head. Courses must be completed with grades of C or better and with an overall grade-point average of at least 3.0.

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.

Comprehensive Examination Plan
The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems.

The comprehensive examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. Students may be passed, passed with honors, or failed on this examination. Students who fail are given a second opportunity to take the examination at the discretion of their adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is permitted.

Students who fail the comprehensive examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

Thesis Plan
Under this plan, students prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the Department of Education and the thesis committee chair.

The thesis committee must be formed and a petition for advancement to candidacy for the M.Ed. must be filed no later than one quarter prior to completion of course requirements for the degree.

The thesis and dissertation adviser and the Graduate Division publication, Regulations for Thesis and Dissertation Preparation, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Master of Education
Admission
The M.Ed. is a professional degree program designed for individuals preparing for mid-level professional positions in schooling or for advanced professional graduate study. Qualifications for admission to a program of study in education, in addition to the University requirements for admission are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

The following requirements are applicable in accordance with selected emphases:

Administrative and Policy Studies in Education
Possession of a valid instructional credential is preferred. Applicants with a demonstrated commitment to improving American schooling are sought for admission.

Bilingual/Cross-Cultural Education
Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience (as a teacher or aide) for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

Curriculum and the Study of Schooling
Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.

Teacher Education
This is a two-year program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Individuals with the highest qualifications in all subject areas, particularly mathematics, science, and the humanities, are sought. Experience in working with children is advantageous.

Certificate (Credential) Programs
The California Commission on Teacher Credentialing has authorized the Department of Education to offer professional programs that lead to the (1) Multiple Subject Instructional Credential with the Cross-Cultural Language and Academic Development (CLAD)/Bilingual Cross-Cultural Language and Academic Development (BCLAD) emphasis; (2) Single Subject Instructional Credential with the CLAD/BCLAD emphasis; and (3) Administrative Services Credential. Credential programs 1 and 2 are taken concurrently with the M.Ed. in teacher education; credential program 3 is taken with the M.Ed. in administrative program studies in education.

M.A. Latin American Studies/M.Ed
The Department of Education and the Latin American Studies Program offer an articulated degree program that allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum and general plan from the Department of Education and the Study of Schooling.

Certificate programs 1 and 2 are taken concurrently with the M.Ed. in teacher education; credential program 3 is taken with the M.Ed. in administrative program studies in education.

Education / 260
division courses are necessary. At least five courses (20 units) must be in the professional education (400) series. No 500-series courses may be applied toward the degree. Education 597 may be taken on an optional basis. A field experience minimally approximating one course is required for all M.Ed. emphases.

Information regarding specific course requirements in a selected M.Ed. emphasis may be obtained from the Office of Student Services.

Comprehensive Examination Plan

The comprehensive examination for the M.Ed. degree in administrative and policy studies in Education is offered three times per year (Fall, Spring, and Summer Quarters). The M.Ed. examination in curriculum and the study of schooling is offered in Fall and Spring Quarters. The M.Ed. examination in teacher education is offered only during the summer. The examination consists of:

1. A written examination designed to assess comprehension of professional knowledge basic to the selected field of emphasis, including key concepts and principles, major theoretical positions, and fundamental issues and understanding of the broad educational context in which the selected professional field resides.

2. A performance component for the M.Ed. in Curriculum and the study of schooling designed to assess competency in the solution of problems in the selected professional field and is a test of whether knowledge can be applied in a real or simulated professional setting.

Information regarding examination foci for any selected M.Ed. emphasis is available from the faculty adviser.

Students may be passed, passed with honors, or failed on the examination. Students who fail the examination, must do so at the next sitting.

Students who fail the doctoral screening examination are given a second opportunity to pass at the doctoral level; students who fail are given one further opportunity to pass at the master's level (the terminal master's), or failed. Students passed at the master's level are may be passed with honors, passed at the master's level only.

Doctoral Degrees

The Department of Education offers the Doctor of Philosophy degree in Education and the Doctor of Education degree.

Doctor of Philosophy

Admission

The Doctor of Philosophy (Ph.D.) in Education is a strongly research-oriented academic degree designed for individuals preparing for careers in basic research or college-level instruction. Major foci include theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

To be admitted to the Ph.D. program, students must have a bachelor's degree or equivalent. Applicants must also have demonstrated academic excellence and the potential for scholarly research. Students are admitted by a division and must formally apply for a change of division.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores on the quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program.

The department has an application form that must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

Law/Education

See the Admission section under Master of Arts for information on the concurrent degree program in law and education.

Joint Ph.D. Program in Special Education

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education; (2) improved preparation for potential teachers of exceptional individuals; and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Students seeking information regarding emphases and requirements should consult the joint doctoral adviser at UCLA (1029B Moore Hall) or the chair of the Department of Special Education at CSULA.

Major Fields or Subdisciplines

All divisions: administration, curriculum, and teaching; educational psychology; higher education and organizational change; social research methodology; social sciences and comparative education.

Course Requirements

A program of study for a Ph.D. student is determined by the student and the faculty adviser and must conform to division and department requirements. A minimum of 18 courses is required as indicated below. At least 10 of the total courses must be in the 200 series:

1. A sequential three-quarter research practicum (Education 299A-299B-299C) designed to provide an overview of research in the field of study. Students complete a research paper by the end of the sequence.

2. Five courses from offerings in the student's selected division.

3. Three upper division or graduate courses from other academic departments of the University related to the student's proposed area of research (the cognate).

4. Appropriate research methods courses to enable demonstration of intermediate/advanced level competence in at least one area of research methodology. The requirement is satisfied by completing three methodology courses as specified in the list approved by the department; the approved list is available in the Office of Student Services.

The remainder of the courses to complete the required total may be chosen by the student; such courses must be in compliance with the selected division's guidelines and must be approved by the student's faculty adviser. Divisional course requirements may be waived, under exceptional circumstances, by the division on petition by students and their advisers to the division head. Wherever additional academic background is needed, a faculty adviser may require other coursework.

Written and Oral Qualifying Examinations

Doctoral Screening Examination

A written examination is taken after completion of appropriate coursework determined by the division. The examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems.

Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for the examination, students may be passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master’s level only.

Students who fail the doctoral screening examination, but who have been allowed to retake the examination, must do so at the next sitting. They can take up to 12 units per quarter until...
they have successfully completed the examination. Of these 12 units only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

**Doctoral Written Qualifying Examination.** The written qualifying examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a research and theoretical orientation. Students may be passed, passed with honors, or failed on the examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of their adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who have been allowed to re-take it, may do so at any scheduled sitting with consent of the divisional faculty.

**University Oral Qualifying Examination.** The oral examination is conducted by the student’s doctoral committee, which selects topics from both education and the cognate discipline(s) that are related to the student’s written research proposal. On a majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

### Doctor of Education

**Admission**

The Doctor of Education (Ed.D.) is a professional degree designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major foci include practice, applied studies, and knowledge related to professional skills.

To be admitted into the Ed.D. program, applicants must have a bachelor's degree or equivalent; at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except the administration, curriculum, and teaching studies division which requires the experience as a prerequisite to admission); and demonstrated evidence of potential for professional leadership. Students are admitted by a division and must formally apply for a change of division.

**Law/Education**

See the Admission section under Master of Arts for information on the concurrent degree program in law and education.

### Major Fields or Subdisciplines

The Ed.D. is offered for emphases in divisions 1 through 4. Administration, curriculum, and teaching studies emphases are offered for school administrators, education policy analysts, curriculum developers and directors of curriculum, and teacher educators. Educational psychology emphases are offered for those interested in practical issues related to special education, educational technology, and computer-assisted instruction. Higher education and work emphases focus on administration in relation to corporate or proprietary education and training, community colleges, and continuing education. Social research methodology emphases are applied measurement and evaluation leadership.

### Course Requirements

A program of study for an Ed.D. student is determined by the student and faculty adviser and must meet division and department requirements. A minimum of 18 courses is required as indicated below:

1. Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.
2. Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.
3. Three supplemental courses selected from offerings in the department (outside the student's field of emphasis) or in another UCLA professional school or department.
4. A sequential three-quarter field practicum (Education 499A-499B-499C). Divisional course requirements may be waived, under exceptional circumstances, by the division on petition by students and their advisers to the division head. Whenever additional academic background is needed, a faculty adviser may require other coursework.

### Written and Oral Qualifying Examinations

**Doctoral Screening Examination.** A written examination is taken after the completion of appropriate coursework determined by the division. The examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems. Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for the examination, students may be passed, passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master's level only.

Students who fail the doctoral screening examination, but who have been allowed to re-take the examination, must do so at the next sitting. They can take up to 12 units per quarter until they have successfully completed the examination. Of these 12 units, only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

**Doctoral Written Qualifying Examination.** The written qualifying examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a professional orientation. Students may be passed, passed with honors, or failed on this examination. Students who fail are given a second opportunity to take the examination at the discretion of their adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who are allowed to re-take it, may do so at any scheduled sitting with consent of the divisional faculty.

**University Oral Qualifying Examination.** The oral examination is conducted by the student’s doctoral committee, which selects topics from both education and the cognate discipline(s) that are related to the student’s written research proposal. On a majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

### Education

**Lower Division Courses**

91A. Infant Care and Development. (4) (Using scientific methods to answer questions about how to raise children, educational researchers, psychologists, and anthropologists try to replace myths and anecdotes with a verifiable understanding of children’s development and problems that parents face in raising children.

91B. Child Care: Research, Practice, and Policy. (4) Examination of psychological research on influences of early child care on children's concurrent and subsequent development, with this research linked to basic research in developmental psychology and education. Discussion of influence of research on the policy process.

91C. Elementary and Secondary Education. (4) Designed for juniors/seniors. Social sciences overview of major policy issues in American public education. General introduction to social sciences research in analysis of educational policy issues and to methods for exploring major policy issues. Topics include school finance, equal educational opportunity, testing and evaluation, teacher compensation, and school law.

91D. The Teaching Profession. (4) Designed for juniors/seniors. Introduction to the field of education. Experts within Department of Education and experienced school personnel present a variety of topics in education and provide opportunity to visit diverse educational settings.
Upper Division Courses

M102. The Mexican American and the Schools. (4) (Same as Chicana and Chicano Studies M102.) Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicana youth and communities.

M108. Sociology of Education. (4) (Same as Sociology M175.) Requisite: Sociology 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

125A. Education of Exceptional Individuals. (4) Requisite: Psychology 10. Introduction to the field of special education, with emphasis on psychology of individual differences, learning characteristics of exceptional individuals, and application of research and theory to special education problems.

140. Time and Behavior in Educational Organizations. (4) (Formerly numbered 197M.) Designed for juniors/seniors. Overview of role that time plays in understanding behavior in school and social organizations, with specific emphasis on understanding management of change and issues of control. Exploration of behavioral issues such as gang membership, midlife crisis, school reform, teacher burnout, and student-at-risk behaviors.

M148. Women in Higher Education. (4) (Same as Women's Studies M148.) Designed for juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

180. Social Psychology of Higher Education. (4) Overview of significant studies in social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapersonal processes, with special emphasis on identifying and explaining effects of being a student in an educational context. Use of behaviorism and cognitive approaches to understanding behavior in college and university settings.

183A. Contextual Leadership for Education and Community Service. (4) (Formerly numbered 197M.) Conceptual, case study, and experiential investigation of leadership within educational environments and the community. Investigation of how context and environment influence leader effectiveness, what leadership effectiveness means, and how to become effective leaders.

183B. Problem Solving for Leadership and Change. (4) (Formerly numbered 197V.) Study of concepts and tools that contribute to creative problem solving and its relationship to leadership and change, drawing from both life and social sciences disciplines as well as professional studies of education and related fields.

183C. Strengths-Based Learning. (4) (Formerly numbered 197V.) Conceptual analysis of theories that point to improved learning and academic achievement. Relevant theory and research from cognitive psychology provide context. Practical applications of theory through classroom activities and experiential assignments.

C191A. Philosophy of Education: Ethics and Values. (4) Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D.

191B. Issues in Education: Historical Perspective. (4) Lecture, three hours; discussion, one hour. Exploration of such controversial issues in American education as poverty, race, class, curriculum, teacher empowerment, and role of popular media in historical perspective.

191C. Economics of Education. (4) Introductory course in microeconomic techniques applied to education. Methodologies illustrated in context of current issues in American education. Concurrently scheduled with course C244.

191D. Politics of Education. (4) Political dimensions of education institutions as organizations. Relationships between educational institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207.

191F. Educational Psychology. (4) Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives to teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability.

191G. Adolescent Psychosocial Development: Problems and Potentials. (4) (Formerly numbered 197Z.) Adolescence as developmental stage involving construction of personal identity, a narrative dialogue, mental social structure underlying meaning and direction, life choices, and integration of values and commitments. Current prevention approaches to youth deviance and dysfunction.

191H. Education and Law. (4) (Formerly numbered 197L.) Exploration of American legal system and how it influences education. Introduction to legal reasoning and analysis and examination of past and current controversies to discover patterns and synthesize policy implications.

192A. Theory and Practice of Teaching and Learning Function. (4) (Formerly numbered 192.) Lecture, three hours. Requisite: course 180. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student/teacher interaction, and outcomes of instruction. Application of theory and research to practice.

192C. Dynamics of Peer Teaching. (4) (Formerly numbered 197N.) Proficiency in learning principles and procedures relevant to peer teaching in a variety of circumstances provided and undergraduates trained to present College of Letters and Science academic support workshops to their peers with intent of enhancing academic and career perspectives.

192D. Development of Academic Workshops. (4) (Formerly numbered 197N.) Requisite: course 192C. Survey of issues in bilingualism and language assessment, study of language, linguistic competence/proficiency, bilateral, review of current language assessment instruments. Preparation and analysis of naturalistic data using concepts developed through readings and discussion.

192E. Evaluation of Peer Teaching. (4) (Formerly numbered 197N.) Requisite: course 192D. Continuation of course 192D. Study of issues in bilingualism and language access, didactic language, critical subject matter, cultural literacy, teacher empowerment, and role of popular media in historical perspective.

193A. Community Service Learning. (4) (Formerly numbered 197K.) Lecture, two hours; discussion, two hours; fieldwork, five hours. Based on experiential-education learning theory, course involves undergraduates in promoting academic achievement of high school and junior high school students through tutoring and curriculum development, addressing cognitive and affective learning theory and service learning.

193B. Academic Motivation. (4) (Formerly numbered 197L.) Study of critical theories of learning and motivation with applications to academic performance. Exploration of how to improve academic motivation through fieldwork observations and study of research on achievement motivation. Attribution theory, intrinsic motivation, generative learning, self-efficacy, locus of control, and learned helplessness.

194A. Language, Literacy, and Human Development. (6 to 9) Lecture, three hours; laboratory, two hours (optional); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and language. May be taken independently for credit. Letter grading.

194B. Culture, Gender, and Human Development. (6 to 10) Lecture, three hours; laboratory, two hours (optional); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and gender. May be taken independently for credit. Letter grading.

194C. Culture, Communications, and Human Development. (6 to 8) Lecture, three hours; laboratory, two hours (optional); field practicum, two hours. Provides opportunities to combine theory and practice in study of human development in educational contexts. Use of ethnographic methods to document learning. Focus on relationship between theories of development, culture, and technologies. May be taken independently for credit. Letter grading.

197A-197Z. Current Issues in Education. (4) Lecture, three to four hours. Limited to juniors/seniors. Variable topics course organized on selected current issues basis, integrating field observations and reading through seminar discussions. Consult Schedule of Classes for topics and instructors.

197F. Laboratory in Education of Exceptional Individuals. Lecture, one hour; laboratory, six to eight hours. Requisite: course 125A. Six to eight hours per week of observation, research, and teaching of children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

197G. Advanced Laboratory in Education of Exceptional Individuals. Lecture, one hour; laboratory, six to eight hours. Requisite: course 197F. Six to eight hours per week of research, teaching, and multidisciplinary team participation with children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

199. Special Studies. Limited to seniors. To be arranged with faculty member who directs the study.

Graduate Courses

200A. Historical Research and Writing. (4) Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest.

200C. Analysis of Survey Data in Education. (4) Lecture, three hours; laboratory, two hours. Requisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data.

M201C. History of American Education. (4) (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

202. Evaluation Theory. (4) Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation.

C203. Educational Anthropology. (4) Recommended preparation: Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C191E.

204A. Introduction to Education and the Social Sciences. (4) Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives.

204B. Introduction to Comparative Education. (4) Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

204C. Education and National Development. (4) Designed for graduate students. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of the world.

204D. Minority Education in Cross-Cultural Perspective. (4) Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education as applied to testing, focusing primarily on social, political, and economic systems.

204E. International Efforts in Education. (4) Designed for graduate students. Critical analysis of complex world of “development cooperation,” with particular reference to bilateral and multilateral efforts in education.

204F. Nonformal Education in Comparative Perspective. (4) Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

205. Computers in the Educational Process. (4) Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and thinking skills.

206A. Philosophy of Education: Introduction. (4) Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

206C. Introduction to Conceptual Analysis. (4) Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

206D. Philosophy of Education: Ethics and Values. (4) Study of ethics and value theory in teaching and learning, educational organization and policy, and curricular design and validation. Concurrently scheduled with course C191A.

C207. Politics of Education. (4) Preparation: one approved research methods course required for masters’ or doctoral students. Analysis of institutional dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formulation and implementation. Concurrently scheduled with course C191D.

208A. Perspectives on the Sociology of Education. (4) Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels.

208C. Explanation in the Social Sciences and Educational Research. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Overview of basic strategies and forms of explanation relevant to various social and behavioral sciences disciplines.

209A. History of Higher Education. (4) Examination of development of postsecondary education in the U.S., with attention to social context and to scope and variety of institutions.

209C. Problems in Research and Evaluation in Higher Education. (4) Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and problems, and to design and methodology of evaluative research.

209D. System of Higher Education. (4) Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions.

211A. Measurement of Educational Achievement and Aptitude. (4) Requisite: course 230A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; validity and reliability, S/U or letter grading.

211B. Measurement in Education: Underlying Theory. (4) Requisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.

211C. Item Response Theory. (4) Requisites: courses 211B, 230C. Item response theory, application to educational achievement tests, item bias, test information, test equating, computerized adaptive testing, S/U or letter grading.

212A. Learning and Education. (4) Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.

212C. Cognition and Creativity in Education. (4) Requisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.

213A. Counseling Psychology in School and Community. (4) Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation.

213B. Legal and Ethical Issues in Counseling Psychology. (4) Requisite: course 213A. Ethical and legal codes relevant to psychological services in schools and community; relation of value system and personal values in counseling situations.

213C. Group Counseling Theory and Process. (4) Lecture; required to those in counseling and student affairs activities. Emphasis on concepts of testing and measurement, applications of measurement theory, and contemporary issues that are significant in influencing assessment in student affairs programs.

214A. Counseling Theory and Practice. (4) Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectiveness of counseling, professional issues in counseling, and educational aspects of counseling.

214B. Advanced Counseling Theory and Practice. (4) Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures.

214D. Career Counseling. (4) Depth study of current theories, principles, problems, and practices of career counseling.

214E. Substance Abuse and Addiction. (4) Theoretical and practical prevention and intervention in substance abuse and addiction from perspective of counseling and educational practice.

214F. Student Problems: Social Context. (4) Designed to assist students in understanding the configuration of social forces that lead to student dysfunction. Consideration of a number of contemporary sociocultural problems that are of concern to school counselors, educators in general, and behavioral scientists.

M215. Personality, Motivation, and Attribution. (4) (Same as Psychology M229.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

M217A. Social Development and Education. (4) (Same as Psychology M242D.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

217B. Cognitive Development and Education. (4) Designed for graduate students. Critical review of theories and research in cognitive development, focusing on work of Piaget and Vygotsky, and relation of this work to issues in educational practice.

M217C. Personology Development and Education. (4) (Same as Psychology M245.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.
217C. Qualitative Data Reduction and Analysis. (4) Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectal issues.

217F. Human Development and the Educational Process. (4) Cognitive and social development; cultural, family, peer, and schooling influences on human development; application of developmental theory and research to educational practice.

219. Laboratory: Advanced Topics in Research Methodology. (4) Provides assistance in design of research and analysis of data; supervision of graduate students from other divisions. Coverage of special topics not included in other courses on research methods.

220A. Inquiry into Schooling: Organization and Change. (4) Critical analysis of issues in reconstituting of schooling; concepts of function and structure of schooling; organization theory; systems approach in analysis of organization development and change.

221. Computer Analyses of Empirical Data in Education. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 209C (section 1), 230A. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results. S/U or letter grading.

M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M228Q, Psychiatry M235, and Psychology M236.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

222B. Design Issues in Naturalistic Research. (4) Lecture, three hours; discussion, one hour. Requisite: course M222A. Issues in conceptualization and design of naturalistic research studies, particularly with in educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies.

222C. Qualitative Data Reduction and Analysis. (4) Lecture, two hours; discussion, two hours. Requisite: course M222A or 222B. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data.

222D. Qualitative Inquiry: Special Topics. (4) Lecture, four hours. Requisite: course M222A. Special topics course on some field or aspect of qualitative inquiry different from or covered in more depth than topics and techniques in courses M222A, 222B, and 222C. Topics may include classroom language ethnography, advanced ethnographic writing, discourse analysis, and microethnography. Letter grading.

223. Aesthetics and the Curriculum. (4) Lecture, two hours; discussion, two hours. Examination of various ideas and theories in aesthetics and application of these in school curricula and programs, and in educational research and theory.

224. Problems and Issues in Bilingual and Multicultural Education. (4) Introduction to development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness.

225A. Issues in Education of Exceptional Individuals. (4) Designed for graduate students. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals.

225B. Advanced Issues in Education of Exceptional Individuals. (4) Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education.

226. Seminar: Special Topics in Writing, Rhetoric, and Educational Methodology. (4) Special topics seminar in writing in education that could focus on history of writing about education, social and political dimensions of it, its theoretical and methodological underpinnings, and its uses in professional and public contexts.

227A. Research on Learning Characteristics of Exceptional Individuals. (4) Requisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice.

227B. Research on Cognitive and Language Characteristics of Exceptional Individuals. (4) Requisite: course 227A. Review of empirical and theoretical literature regarding language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition.

227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. (4) Requisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs.

228. Observation Methods and Longitudinal Studies. (4) Lecture, two hours; discussion, two hours. Requisite: course 230A. Design of observational and longitudinal studies. Formulation of study conclusions concerning influences on children’s development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations. S/U or letter grading.

229. Seminar: Special Topics in Urban Schooling. (4) Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues.

230B-230C. Linear Statistical Models in Social Science Research. (4-4) (Formerly numbered 210C-218A.) Lecture, four hours. Requisite: course 230A or passing score on screening examination. Integrates and unified approach to applications of linear statistical models in regression, analysis of variance, and experimental and quasi-experimental designs. In Progress and letter grading (credit to be given only on completion of course 230C).

231C. Analysis of Categorical and Other Nonnormal Data. (4) (Formerly numbered 218D.) Requisites: courses 230B-230C. Regression analysis with dichotomous and polytomous dependent variables, log-linear modeling, coefficients of association for categorical variables, factor analysis, and structural equation modeling.

231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis. (4) (Formerly numbered 210B.) Requisites: courses 230B-230C. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models.

231E. Structural Equation Modeling. (4) (Formerly numbered 218C.) Requisites: courses 231A, 231B. Explanatory models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations.

232. Instructional Analysis. (4) Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research.

233A. Professional Writing in Education. (4) Designed for first- and second-year doctoral students and intended to assist in professional development as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method.

233B. Professional Writing in Education. (4) Designed for students at proposal or dissertation stage, with focus on development, organization, and coherence of these scholarly documents, their conceptualization and method, and issues of audience and style.

234. Education and Social Stratification. (4) Relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of society.

237. Law and Urban Education. (4) (Formerly numbered 229.) Lecture, four hours. Examination of recent legal controversies that may impact ability of urban educators to meet needs of students in a multicultural society, with special emphasis on such equity-related issues as desegregation, school finance, standardized testing, and rights of language minority students. Letter grading.

238. Cross-National Analysis of Higher Education. (4) Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change.
239. Organization and Governance of Educational Systems. (4) Academic organizations, precollege and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision-making and policy-making.

241. Research Methodology in School Administration. (4) Examination of research problems and strategies in school administration.

C244. Economics of Education. (4) Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C191C.

246A. Decision Analysis and Advanced Computer Methods for Educational Policy and Planning. (4) Requisite: course 242. How information technology and decision analysis impact K-12 schooling, higher education, and technical training/workplace settings. With research paper, oral presentation, and two research briefs, students can pursue decision analysis areas of special interest to their professional and career objectives.

247. Special Topics in Law and Educational Policy. (4) Formerly numbered 447. Lecture, four hours. Policy-based inquiry with focus on specific law-related debates that inevitably influence both K-12 and higher education communities. Identification of strategies that have been successfully employed by those who have sought to use law to shape educational policy. Letter grading.

249B. Seminar: Institutional Research and Program Evaluation. (4) Critical review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interrelating this information to appraise overall institutional functioning and effectiveness.

250A. Organizations and Systems of Higher Education. (4) Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division, with emphasis on underlying social and political issues that shape higher education and organizational change.

250B. Topical Issues in Higher Education. (4) Designed for graduate students. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division, with emphasis on underlying social and political issues that shape higher education and organizational change.

250C. Theoretical Frameworks of Higher Education. (4) Formerly numbered 410C. Designed for graduate students. Overview of various social sciences theories used to analyze institutions and issues of contemporary higher education. Explanation of how theory and methodology affect research design and framing of research questions in studies of higher education.

251D. Seminar: Philosophy of Education, Problems in Ethics and Values. (4) Requisite: course C206D.

252A. Seminar: Educational Organizations. (4) Requisite: course 208A.

252B. Seminar: Education and Social Change. (4) Requisite: course 208A.

M252C. Human Resources and Economic Development. (4) (Same as Community Health Sciences M236.) Lecture, four hours. Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments. S/U or letter grading.

253B. Seminar: African Education. (4) Designed for graduate students. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education.

253D. Seminar: Latin American Education. (4) Seminar, four hours. S/U or letter grading.

253E. Seminar: European Education. (4) Seminar, four hours. S/U or letter grading.

253F. Seminar: Education in Revolutionary Societies. (4) Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations.

253G. Seminar: The Asian American and Education. (4) Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture question.

253H. Seminar: The Chicano/Hispanic and Education. (4) Basic issues and topics related to the Chicano and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling).

253I. Education and Social Change in the Middle East and Islamic World. (4) Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of the Middle East and Islamic world (including Pacific Rim, South, Central Asia).

255A-255B-255C. Seminars: Special Topics. (4) May be repeated for credit. 255A. Measurement; 255B. Design; 255C. Data Analysis.

256B. Seminar: Special Topics in Development. (4) Seminar, four hours. S/U or letter grading.

257. Seminar: Research in Counseling Psychology. (4) In-depth analysis of selected research approaches/areas in counseling psychology.

258A. Seminar: Problems in Instructional Research. (4) Seminar, four hours. S/U or letter grading.

258B. Seminar: Problems in Instructional Development. (4) Seminar, four hours. S/U or letter grading.

259A. Seminar: Research on Characteristics of Students. (4) Analysis of concepts, methodology, and conclusions or implications underlying and resulting from major research on student characteristics. Emphasis on differential impact of higher education on student and faculty development.

261F. Seminar: Cognitive and Personal Development of College Students. (4) Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills.

262B. Seminar: Reading. (4) Seminar, four hours. S/U or letter grading.

262F. Seminar: Research Topics in Bilingual/Multicultural Education. (4) Seminar, four hours. S/U or letter grading.

264. Seminar: Teacher Education. (4) Research, issues, and practices in preservice and in-service teacher preparation and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs.

265. Higher Education Policy. (4) Requisites: courses 250A, 250B. Understanding public policy for higher education requires understanding of both issues and policy process. Review of major topics on which the U.S. government is active, as well as key actors and their influence.

266. Feminist Theory and Social Sciences Research. (4) Examination of how diverse feminist theories of last quarter century have both challenged and strengthened conventional social sciences theories and their methodologies. Introduction especially to feminist standpoint theory, a distinctive critical theory methodology now widely used in social sciences.

268. Theorizing Reading: Rhetorics of Academic Discourse. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Introduction to theoretical approaches to reading, such as post-structuralist, feminist, deconstruction, reader reception, and semiotics, and to core ideas of some leading theorists of reading, such as Roland Barthes, Wolfgang Iser, Barbara Johnson, Stanley Fish, and Gayatri Spivak.

269. Representations of Education in Cinema. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Exploration of ways in which we draw on diverse “texts,” particularly films set in or around schools, to illuminate contemporary issues in American secondary education (e.g., issues pertaining to representation of teachers, students, parents, and administrators and curriculum in popular films about high school and adolescents).

270. Introduction to Cultural Studies. (4) Lecture, four hours. Investigation of current trends in cultural studies through examination of different methods of cultural interpretation, seminal texts in cultural studies, and practical criticism engaging popular artifacts of media culture. Emphasis on developing critical media literacy as a goal of cultural studies. Letter grading.

271A. Proseminar: Educational Psychology. (2) Introduction to a variety of research issues in the field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them. S/U grading.
272. Case-Study Research in Education Policy and Practice. (4) Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice.

273A. Structure and Dynamics of Educational System. (4) Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American and international educational, national, state, and local policy, school administration, curriculum theory and design, and teaching that are inextricably connected in the delivery of education.

273B. Social Foundations of Education. (4) Introduction to literature on multiculturalism and teaching for democratic citizenship by review of a diverse number of anthropological, sociological, educational curricula and literatures.

274. Science, Technology, and Social Research after Eurocentrism. (4) A philosophy of natural sciences for social scientists which examines challenges to conventional research assumptions raised by multicultural and postcolonial science and technology studies that have emerged since World War II. Focus on sciences and technologies in third-world development projects, comparative ethnocultural movements, and new theories of knowledge and how to do maximally objective research emerging from these literatures.

275. Race and Education. (4) Designed for graduate students. Examination of role of race in educational policy-making. Exploration of a broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis.

276. Contemporary Theories of Writing. (4) Review of current theories of writing and literacy research and examination of relationships among writing and literacy, culture, and human development. In particular, examination of history of writing research over last three decades as part of a broader intellectual history.

277. Language in the Classroom. (4) (Formerly numbered 424.C) Seminar/fieldwork. Survey of language and literacy theories and examination of relationship between literacy learning and social practice of classroom and sociopsychological development, and their relevance to school-based literacy.

280A. Seminar: Selected Topics in Special Education. (2 to 6) Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

280B. Seminar: Exceptional Individuals. (4) Limited to doctoral students.

282. Students at Risk: Reconsideration. (4) Designed for second-year graduate students. Notion of “at risk” has become standard element of biomedical/psychological studies, one hour; laboratory, one hour. Limited enrollment. Introduction to doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

290A. Methodologies for English Language Learners. (4) (Formerly numbered 309A.) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for English Language Learners involves the use of qualitative methods of inquiry and discourse analysis.

290B. Methodologies for English Language Learners. (4) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for English Language Learners involves the use of qualitative methods of inquiry and discourse analysis.

291. Organizational and Leadership Theory in Education. (4) Introduction to contemporary and historical conceptions of organization and leadership in context of formal schooling. Exploration of these conceptions through inquiry into school and college setting.

292. Curriculum Theory, Research, and Practice. (4) Survey of history of theories and perspectives shaping what is taught in schools, providing graduate students broad understanding of various values, beliefs, and power relations shaping K-12 curriculum in the U.S.

293. Teaching Studies: Research and Theory into Practice. (4) Exploration of historical, theoretical, and empirical perspectives that shape teaching within and after education, providing graduate students with broad overview of relevant literature and current issues shaping teaching profession in the U.S.

296A-296F. Seminars: Research Topics in Education. (2-2) Discussion, three hours. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

299A-299B-299C. Research Practicum: Education (4 to 8 each). May be repeated for credit.

300. Dissertation Writing Workshop: Interdisciplinary Seminar. (4) Seminar, one hour; discussion, two hours; laboratory, one hour. Limited enrollment. Introduction for doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

309A. Methodologies for English Language Learners. (4) (Formerly numbered 309A.) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for English Language Learners involves the use of qualitative methods of inquiry and discourse analysis.

309B. Methodologies for English Language Learners. (4) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for English Language Learners involves the use of qualitative methods of inquiry and discourse analysis.

309C. Methodologies for English Language Learners. (4) Lecture, two hours; discussion, two hours. Limited to credential program students. Pedagogy for English Language Learners involves the use of qualitative methods of inquiry and discourse analysis.

310. Professional Communication for Graduate Students in Education. (2) Writing workshop on students’ papers in progress to ensure professional standards. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

311. Principles and Methods of Computer Literacy and Classroom Application — K-12. (2) Lecture, one hour; laboratory, 30 minutes. Introduction to use of computers in educational environment. Discussion of issues on why and how to integrate computers into curriculum and hands-on practice which allows students to demonstrate skills discussed. S/U grading.

312. Basic Principles of Curriculum and Instruction. (4) Analysis and practice of basic principles and concepts for planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of a variety of instructional strategies and their application in elementary and secondary schools.

315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction. (2-2) Course 315A is requisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/curriculum/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

330A. Observation and Participation. (2 to 6) Site-based fieldwork, 10 to 15 hours. Students are assigned to school sites with racially, culturally, and linguistically diverse student populations. Throughout observation and participation period, students analyze effective strategies for achieving learning for all students, including sociocultural approaches and appropriate use of educational technology. S/U grading.

330B-330C. Student Teaching (2 to 6 each). (Not the same as courses 330B, 330C prior to Fall Quarter 1996.) Site-based fieldwork, 10 to 15 hours. Requisite: course 330A. Students are assigned to student teach in school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. S/U grading.

330D. Classroom Residency and Teaching. (8) Site-based fieldwork, 10 to 15 hours. Students are employed by local school districts to teach as residents in school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through the Teacher Education Program to initiate a change project in their local school and/or complete a case study on the project. S/U grading.

360A-360B-360C. Team Seminars (6-6-6) (Formerly numbered 360.) Seminar, four hours; laboratory, two hours. Analysis and practice of basic principles and concepts of planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of constructivist strategies and their application in elementary and secondary schools. Examination of different methods of computer literacy and teaching subject matter. Students conduct ethnographic inquiry of the local community of their demonstration school. S/U grading.
375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Foundations of Educational Policy Analysis. (4) Principles of decision making and policy formation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness of developmental delivery systems and programs, and complex nature of educational governance in contemporary America.

401. Structure and Functions of Schools as Complex Organizations. (4) Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform.

406A-406B-406C. Social Foundations and Cultural Diversity in American Education (2-2-2). Formerly numbered 100A-100B. Intensive consideration of American society, particularly its racial and cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, perspectives of cultural diversity, and impact on educational and classroom instruction.

409. Language Structure, Acquisition, and Development. (4) Formerly numbered 409A.) Lecture, four hours. Limited to credential program students. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide a framework for schooling of English language learners. Rationale for bilingual/English language acquisition and development programs. Historical and current theories and models of language. Letter grading.

410A-410B. Issues in Higher Education and K-12. (4) Two-course sequence providing overview of higher education systems. 410A. Designed to develop knowledge, understanding, and sensitivity to contemporary critical and emerging issues that impact higher education, with focus on both theory and practice. Study of relationships between issues in K-12 schooling and higher education. 410B. Exploration of issues that effect both higher education and K-12 schooling, including restructuring and reform, standards, access and accountability, and new technologies. Emphasis on both theory and practice.

411A. Introduction to Educational Evaluation. (4) Introduction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as means of improving quality of educationally relevant decisions.

411B. Procedural Problems in Evaluation. (4) Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing programs of evaluation and delivery systems, analyzing appropri- ate evaluation design strategies, coping with ethical considerations in evaluation, framing the decision context, and interpreting evaluation results.

412B. Intersecting Dimensions of Teaching and Testing. (4) Designed to develop acquisition of insights and skills based on symbolic relationship between assessment and instruction when high-stakes educational achievement tests are used.

413A. Methodology for Primary Language Instruction. (3) Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Consideration of models for developing cultural and language skills of home speakers of language of emphasis; practice in use of activities to develop student ability to use language for real-world and academic purposes, selection of learning experiences, organization of curriculum, and curriculum evaluation.

413B. Culture of Emphasis. (3) Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Conducted in Spanish and Korean. Discussion of commonalities of culture of emphasis in its home country or countries; major historical periods and events; values, belief systems, and expectations; migration and immigration; historical and contemporary demography.

414E. Administration of Student Affairs. (4) Overview of general knowledge and processes essential to effectively administer a program or service under student affairs. Examination of relationship between environmental factors and strategies for governing, planning, and managing student affairs programs and services.

415B. Advanced Assessment in Counseling Psychology. (4) Requisite: course 415A. Advanced course in assessment for counseling psychologists. Survey and demonstration of instruments of achievement, affective, and personality appraisal, with emphasis on testing and interplay between assessment and psychological functioning for reducing risks of failure in academic, personal, and social areas.

421A. Programs and Research in Early Childhood Education. (4) Preparation: one course from development series. Examination of child care programs and research in early childhood education, including review of research in developmental psychology. Emphasis on goals of early childhood education and day care.

421D. Parents and Community Agents in Child Development. (4) Preparation: one course from development series. Critical review of theoretical basis and effectiveness of training programs for parents of young and elementary school-aged children; relation of preschool parent programs to family development and role of programs in the community.

422. Inquiry into Schooling: Basic Issues. (4) Critical examination of basic issues and problems in organization and reconstruction of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society; school organization; schooling alternatives; problems in management of educational change.

424A. Social Studies in the Curriculum. (4) Advanced study in social studies curriculum development; problems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science; emphasis on emphasis on experimental study of instructional programs.

424B. Reading in the Curriculum. (4) Requisite: course 230A. Study of reading curricula and instructional procedures, with emphasis on rational and research underlying their development and research comparing their effectiveness. S/U or letter grading.

424G. Curriculum Design for Bilingual Education. (4) Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to bilingual learners; language assessment; development of instructional component; program evaluation.

431A. Administration in Higher Education. (4) Overview of college and university administration and introduction to policy research and analysis in post-secondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues relating to responsibility, authority, and participation in administrative decisions.

432. Seminar: Professional Topics in Higher Education. (4) Seminar, four hours. S/U or letter grading.

433A. Instructional Product Development. (4) Examination of procedures employed in systematic development of instructional programs. Students acquire competencies associated with these procedures.

433B. Technological Development in Educational Media. (4) Requisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for instructional applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research.

440C. Administration of the Instructional Program. (4) Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs.
441A. Instructional Supervision A. (4) Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners.

441B. Instructional Supervision B. (4) Requisite: course 441A. Basic techniques of script-tapping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evoking teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction.

442B. Legal Aspects of Educational Management and Practice. (4) Examination of structures and kinds of law governing educational systems in the U.S.: constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.

443. Policy Analysis in Education. (4) Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subordinates in policy-making process).

444B. Equality of Educational Opportunity through Desegregation and Finance Case Law. (4) Requisite: course 444B. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

448A. Urban School Leadership. (4) Analysis of problems of urban school leadership. Emphasis on changing nature of the urban principalship, with considerable attention to role of other school and community agencies that interact with the urban school leader.

448B. Urban Leadership Laboratory. (4) Analysis of opportunity to practice human and technical skills required for urban school leadership. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics.

462. Seminar: Community College. (4) Topics include problems and practices in community college formation, instruction, student flow, administration, and/or evaluation.

470A. Seminar: Large Systems and Individual Schools. (4) Seminar: Large Systems and Individual Schools.

481. Knowledge and Inquiry in the Classroom. (4) Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations.

489. Instructional Strategies in Education. (4) Methods for academic instruction, including research and active participation in the advisory approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12.

490A. Instructional Decision Making. (4) Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies.

491A. Curricular Decision Making. (4) Examination of alternative solutions for practical problems that classroom teachers face in making curricular decisions. Analysis of the influence of psychological, societal, and institutional factors in curricular decisions.

493A-499B. Directed Field Experience. (4 to 8 each). May be repeated for credit.

501. Cooperative Program in Special Education (2 to 8). Preparation: consent of UCLA academic advisor and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

506. Directed Independent Study. (6 to 12) Individual study or research for graduate students. May be repeated for credit.

509. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations. (6 to 12) Individual study for mast er's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

hybrid integrated circuits, integrated semiconductor devices, microwave and millimeter wave electronics, solid-state electronics, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is associated with the Center for High-Frequency Electronics and the Institute of Plasma and Fusion Research, two research centers at UCLA.

**Undergraduate Study**

**Electrical Engineering B.S.**

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that students develop expertise in it.

**The Major**

Course requirements are as follows (188 minimum units required):

1. One engineering breadth course from Civil and Environmental Engineering 108, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A).

2. Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 113, 115A, 121A, 131A, 132A, 141, 142, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A.

3. Any five major field elective courses selected from those offered by the Electrical Engineering Department, including at minimum four units of laboratories and one design course. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments.

4. Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 32; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL.

5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

**Computer Engineering Option**

Course requirements are as follows (189 minimum units required):

1. One engineering breadth course from Civil and Environmental Engineering 108, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A).

2. Computer Science 111, 180, Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 113, 115A, 115C, 116B, M116C (or Computer Science M151B), M116D (or Computer Science M152B), M116L (or Computer Science M152A), 121A, 131A, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A.

3. Three technical elective courses, with at least one from item a and one from item b: (a) Electrical Engineering 132A, either Computer Science 118 or Electrical Engineering 132B; (b) Electrical Engineering 114, 115B, 115D, 141, 142.

4. Chemistry and Biochemistry 20A; Computer Science 32, 33; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL.

5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

**Biomedical Engineering Option**

Course requirements are as follows (195 minimum units required):

2. Life Sciences 1 (satisfies SEAS GE life sciences requirement), 2, 3.

3. Four technical elective courses, including two bioengineering courses selected from the Electrical Engineering Department or other departments in the school and two courses selected from Electrical Engineering 114, 115B, 115C, 142, 172.

4. Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L; Electrical Engineering 1, 2, 5C (or Computer Science 31); Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL.

5. SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**

The Department of Electrical Engineering offers the Master of Science (M.S.) degree in Chemical Engineering.

**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the M.S. program are required to take the General Test of the Graduate Record Examination (GRE).

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.ee.ucla.edu. Forms are also available by writing to the Electrical Engineering Department, 56-125B Engineering IV, Box 951594, Los Angeles, CA 90095-2647, or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

**Areas of Study**

**Communications and Telecommunications**

Communication and telecommunication principles and engineering applications; channel and source coding; spread spectrum communication; cryptography; estimation and detection; algorithms and processing in communication and radar; satellite communication systems; stochastic modeling in telecommunication engineering; mobile radio engineering; telecommunications switching, queuing system, communication networks, local-area, metropolitan-area, and wide-area computer communication networks.

**Control Systems**

State-space theory of linear systems, optimal control of deterministic linear and nonlinear systems, stochastic control, Kalman filtering, stability theory of linear and nonlinear feedback control systems, and computer-aided design of control systems.

**Electromagnetics**

Electromagnetic theory; propagation and scattering; antenna theory measurement and design; microwave and millimeter wave circuits; printed circuit antennas; integrated and fiber optics; holography; electromechanics.

**Integrated Circuits and Systems**

Analysis and design of analog and digital integrated circuits; architecture and layout of large-scale integrated processors; high-speed ana-
log and digital integrated circuit design; implementations of signal processing algorithms; device and circuit intersections; computer aids for VLSI design and synthesis.

**Operations Research**
Continuous and combinatorial optimization theory, including linear and nonlinear programming, network flows, graphs, and integer programming, and applications to problems of engineering design; applied stochastic processes, including renewal theory, Markov processes, fluctuation theory, stochastic dynamic programming, and applications to telecommunication and computer networks.

**Photonics and Optoelectronics**
Laser principles including saturation, power, pulse evolution in amplifiers and oscillators, resonator modes, beam propagation, coherence phenomena, specific laser systems, and typical applications, and optical logic circuits.

Optoelectronic principles including electro-optics, magneto-optics, acousto-optics, nonlinear optics, opto-optics, modulation, deflection, detection, holography, Brillouin scattering and Raman scattering.

**Plasma Electronics**
Fundamental plasma waves and instability; interaction of microwaves and laser radiation with plasmas; plasma diagnostics; controlled nuclear fusion.

**Signal Processing**
Digital signal processing theory; analysis and design of digital filters; digital speech processing; digital image processing; multirate digital signal processing; adaptive filtering; neural networks; communications signal processing.

**Solid-State Electronics**
Solid-state physical electronics; semiconductor device physics and design.

**Course Requirements**
At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. A majority of the courses must be in or related to electrical engineering and belong to one of the following specialized major fields described below.

Note: The following undergraduate courses are required for the B.S. degree in Electrical Engineering and cannot be used for the master's degree: Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161.

**Undergraduate Courses.** No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

**Communications and Telecommunications**
Requisite. B.S. degree in Engineering or equivalent.

**Minimum Course Requirements.** Nine four-unit courses, of which at least six must be graduate courses.

**Thesis Plan.** Electrical Engineering 230A, 232A; two additional 200-level electrical engineering courses in the communications and telecommunications engineering area; three or more courses, of which at least two must be 200-level electrical engineering courses, subject to the approval of the student's adviser. Eight units (two courses) of Electrical Engineering 598 must be taken to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses.

**Comprehensive Examination Plan.** Electrical Engineering 230A, 232A; two additional 200-level electrical engineering courses in the communications and telecommunications engineering area; five or more courses, of which at least two must be 200-level electrical engineering courses, subject to the approval of the student's adviser.

**Control Systems**
Requisite. A B.S. degree in Electrical Engineering or equivalent.

**Thesis Plan.** Seven graduate-level courses, of which at least five must be chosen from the list of courses covering the control systems fundamentals, and a thesis. The remaining courses are subject to the approval of the student's adviser. In addition, eight units (two courses) of Electrical Engineering 598 must be taken to cover the research work and thesis preparation.

**Comprehensive Examination Plan.** Nine courses, of which seven must be graduate level, and at least five must be chosen from the following list of courses covering the control systems fundamentals. The remaining courses are subject to the approval of the student's adviser.

**Electromagnetics**
Requisite. B.S. degree in Electrical Engineering or equivalent.

**Thesis Plan.** Eight units (two courses) of Electrical Engineering 598 must be offered to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses, but only one can count toward the requirement of five graduate-level courses. A minimum of four graduate courses is to be selected from the Group II list.

The remaining courses may, subject to the approval of the student's adviser, be chosen as free electives from the 100 or 200 series in order to meet the overall requirements given above.

**Comprehensive Examination Plan.** At least seven courses must be chosen from those listed below in Groups I and II, and at least four of the seven courses must be chosen from Group II.

The remaining two courses may, subject to the approval of the student's adviser, be chosen as free electives from the 100 or 200 series in order to meet the overall requirements given above.

**Group I:** Electrical Engineering 162A, 162B, 163A, 163B, 163C, 172, M185.

**Group II:** Electrical Engineering 221C, 260A, 260B, 261, 262, 270.

**Integrated Circuits and Systems**
Requisite. B.S. degree in Electrical Engineering containing courses in electronics and integrated circuits equivalent to Electrical Engineering 115B, 115C, and 121A. A written qualifying examination may be used to verify the background of beginning M.S. students who have not taken the courses. Those not passing the examination must take the 100-level courses before proceeding with graduate-level courses.

**Minimum Course Requirements.** Nine courses, of which at least five must be at the graduate level. A thesis must be completed under the direction of a faculty adviser.

**Thesis Plan.** All of the courses listed in Group I must be completed. In addition, three courses must be chosen from Groups II and III with, at most, one taken from Group III. The remaining two are free electives.

**Group I:** Electrical Engineering 215A, 215B, M216A.

**Group II:** Electrical Engineering 115D, 212A, 213A, 215D, 221A, 221B.

**Group III:** Computer Science 251A, 252A, 258D.

**Free Electives.** With some exceptions, all 100- and 200-level courses are acceptable as free electives subject to the approval of the faculty adviser. However, it is strongly recommended that courses from the fields of signal processing, solid-state, or communications be used as the free electives. Undergraduate School of Engineering and Applied Science core courses and Electrical Engineering 10, 110, 115A, 121A, 141, and 161 may not be used as free electives.

The normal course load approved by a faculty adviser is such that it requires a full-time presence on campus and, as a rule, precludes part-time off-campus employment. The M.S.
Operations Research

Minimum Course Requirements. At least nine courses, of which at least five must be at the graduate level. For the requisite structure, consult the department.

In consultation with an adviser, students may elect the thesis plan or the comprehensive examination plan. M.S. students in either plan must take at least three courses from Group I and at least two courses from Group II.

Group I: Optimization (Mathematical Programming): Electrical Engineering 232E, 236A, 236B, 236C.

Thesis Plan. Under the thesis plan, students offer eight units (two courses) of Electrical Engineering 598 to represent thesis preparation and research. Only four of these units may be used to satisfy the graduate course requirement; however, the eight units can be used to satisfy the total course requirement.

Comprehensive Examination Plan. Under the comprehensive examination plan, students may not apply any 500-level courses toward the course requirements.

Photonics and Optoelectronics

Requisite. A B.S. degree in Engineering or Physics or equivalent.

Thesis Plan. Electrical Engineering 270, 271, either 272 or 273, 598 (twice), and four additional courses, of which at least one must be a 200-level course.

Comprehensive Examination Plan. Electrical Engineering 270, 271, either 272 or 273, and six additional courses, of which at least two must be 200-level courses.

Additional Courses. With a few exceptions, all 100- and 200-level courses in the UCLA General Catalog are acceptable, subject to the approval of the adviser. The exceptions are the following courses (which are not acceptable for any M.S. program in Electrical Engineering): (1) all school undergraduate core courses and (2) all department undergraduate core courses. Consult the departmental adviser for lists of the courses.

Plasma Electronics

Requisite. A B.S. degree in Engineering or Physics or equivalent.

Thesis Plan. Electrical Engineering M185, 285A, 285B, 598 (twice), and four additional courses from the list below. Of these, at least two must be 200-series courses, of which at least one must be in electrical engineering. If Electrical Engineering M185 was taken as an undergraduate, it may be replaced by any engineering course on the list below.

Comprehensive Examination Plan. Electrical Engineering M185, 285A, 285B, and six additional courses from the list below. Of these, at least three must be in the 200 series and at least one must be in electrical engineering. Of the remainder, at least one other course must be in engineering. If Electrical Engineering M185 was taken as an undergraduate, it may be replaced by any course on the list below. Other courses may be substituted with the consent of the department adviser.

Signal Processing

Requisite. B.S. degree in Electrical Engineering.

Course Requirements. Nine four-unit courses, of which at least seven must be at the graduate level (200 series). A thesis must also be completed under the direction of a faculty adviser. Eight units (two courses) of Electrical Engineering 598 can be used to cover the research work and preparation of the thesis. Both Electrical Engineering 598 courses count toward the minimum of nine courses, but only one can count toward the seven graduate-level courses that are required. All four courses listed in Group I must be completed. At least two courses must be chosen from Group II. The two courses from Group II may be substituted by other 200-level electrical engineering courses with the approval of the student's faculty adviser. The remaining courses may be chosen as free electives and/or Electrical Engineering 598.

Group I: Electrical Engineering 210, 211A, 212A, 214A.

Group II: Electrical Engineering 211B, 212B, 213A, 214B, M216A.

Free Electives. All 100- and 200-level courses in the UCLA General Catalog are acceptable with the exception of undergraduate core courses in the School of Engineering and Applied Science and undergraduate Electrical Engineering Department core courses. The choice of free electives must be approved by the faculty adviser.

Solid-State Electronics

Requisite. B.S. degree in Engineering or equivalent.

Minimum Course Requirements. Nine courses, of which at least five must be at the graduate level. The program must include all core courses listed below with the remaining courses chosen from the options list. Additional options may be used with the consent of the adviser.

Eight units (two courses) of Electrical Engineering 598 must be included to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses, but only one can count toward the five required graduate-level courses.

Solid-State Physical Electronics Requirements. Core: Electrical Engineering 123B, 124, and 223. Options: at least two courses from Electrical Engineering 221A, 221B, 221C, 224, and 225, with the remaining courses from graduate courses and those upper division courses that are not required for the B.S. degree in Electrical Engineering, on approval of the graduate adviser.

Semiconductor Device Physics and Design Requirements. Core: Electrical Engineering 232B, 232C, 124, 221B, 221C. Options: At least two courses from Electrical Engineering 221C, 222, 223, 224, 225, and 298 (in solid-state electronics), with the remaining courses from graduate courses and those upper division courses that are not required for the B.S. degree in Electrical Engineering, on approval of the graduate adviser.

Comprehensive Examination Plan

Communications and Telecommunications

A written comprehensive examination is administered by the communications and telecommunications field committee. In case of failure, students may be reexamined once with the consent of the graduate adviser. The examination may be given as part of the written Ph.D. preliminary examination in the communications and telecommunications field.

Control Systems

A written comprehensive examination administered by a three-person committee, which is chaired by a member of the controls field committee, must be taken during the last quarter of study toward the M.S. degree. In case of failure, students may be reexamined once with the consent of the graduate adviser.

Electromagnetics

A common six- to eight-hour comprehensive examination is offered once every quarter to students in this M.S. program. The examination must be taken during the quarter at the end of which students are expected to graduate. In case of failure, students may be reexamined once with the consent of the graduate adviser.

Integrated Circuits and Systems

The comprehensive examination plan is not offered.

Operations Research

Students take a common written examination during their last quarter of coursework. This examination is normally offered at the end of the Fall and Spring Quarters. In case of failure, students may be reexamined once with the consent of the graduate adviser.

Photonics and Optoelectronics

Consult the department. In case of failure of the comprehensive examination, students may be reexamined once with the consent of the graduate adviser.
Plasma Electronics
Consult the department. The majority of M.S. candidates proceed to the Ph.D. The Ph.D. qualifying examination may be taken to satisfy the M.S. comprehensive examination requirement.

Signal Processing
The comprehensive examination plan is not offered.

Solid-State Electronics
The comprehensive examination plan is not offered.

Thesis Plan
Consult the department for information on the thesis plan for the areas of communications and telecommunications, control systems, electromagnetics, operations research, photonics and optoelectronics, and plasma electronics.

Integrated Circuits and Systems
Students are expected to find a faculty adviser to direct a research project which culminates in an M.S. thesis. The thesis research must be conducted in the Integrated Circuits and Systems Laboratory concurrently with the coursework.

Signal Processing
A thesis must be completed under the direction of a faculty adviser.

Solid-State Electronics
A thesis is required. Consult the department for details.

Doctoral Degree
Admission
In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree in Electrical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Students entering the Engineer or Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

Application forms, including a departmental supplement to the application, may be obtained at http://www.ee.ucla.edu. Forms are also available by writing to the Electrical Engineering Department, 56-125B Engineering IV, Box 951594, Los Angeles, CA 90095-1594, or the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601. Students are encouraged to apply online.

Major Fields or Subdisciplines
Communications and telecommunications; control systems; electromagnetics; integrated circuits and systems; operations research; photonics and optoelectronics; plasma electronics; signal processing; solid-state electronics.

Course Requirements
There is no formal course requirement for the Ph.D. degree, and students may theoretically substitute coursework by examinations. Normally, however, students take courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. A detailed syllabus describing each major field can be obtained in the department office. The major field has a scope corresponding to a body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. Each major field named above is described in a Ph.D. major field syllabus. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B– or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If students fail to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are usually chosen to support the major field and are usually subsets of other major fields.

Written and Oral Qualifying Examinations
The written qualifying examination is known as the Ph.D. preliminary examination in the School of Engineering and Applied Science. After mastering the body of knowledge defined in the major field, students take a preliminary examination in the major field. The examination typically consists of both a written part and an oral part, and students pass the entire examination and not in parts. The oral part does not exceed two hours, and in some major fields is not required at all. Students who fail the examination may repeat it once only, subject to the approval of the major field committee. The major field examination, together with the three courses in each of the two minor fields, should be completed within six quarters after admission to the Ph.D. program.

After passing the written qualifying examination described above, students are ready to take the University Oral Qualifying Examination, which should occur within three quarters after completing the written examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Note: Doctoral Committees. A doctoral committee consists of a minimum of four members. Three members, including the chair, are “inside” members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The “outside” member must be a UCLA faculty member outside the student's major department.

Electrical Engineering
Lower Division Courses
1. Physics for Electrical Engineers. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisites: Mathematics 32B, 33B, Physics 1A, 1B. Introduction to modern physics and electromagnetism with an engineering orientation. Emphasis on mathematical tools necessary to express and solve Maxwell equations. Relation of these concepts to waves propagating in free space, including dielectrics and optical systems. Letter grading.
2. Physics for Electrical Engineers. (4) (Not the same as course 2 prior to Winter Quarter 1999.) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 1. Introduction to modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concept of electrons in solids. Derivation of electrical properties of holes and junctions. Letter grading.
3. Principles and Advances in Electrical Engineering. (4) (Formerly numbered 2.) Lecture, three hours; outside study, nine hours. Open to freshmen and sophomores outside the School of Engineering and Applied Science. Designed to meet general education requirements of nonengineering students. Particularly intended for humanities and arts students. Topics include elementary treatment of fundamental concepts and advances in electrical engineering. Letter grading.

5C. Introduction to UNIX and C. (4) Lecture, three hours; recitation, one hour; laboratory, five hours; outside study, three hours. Introduction to UNIX environment and C programming language. UNIX basics: file structure and manipulation, Technical document preparation. C-shell programming. Elementary C language concepts: input/output, variable types, operators, statements, arrays, and functions. Letter grading.

Upper Division Courses

100. Electrical and Electronic Circuits. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisites: course 1 or Physics 1C, Mathematics 33A, 33B. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers. Letter grading.

101. Engineering Electromagnetics. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: course 1 or Physics 1C, Mathematics 32A and 32B, or 33A and 33B. Electromagnet- ic field concepts, waves and phasors, transmission lines and Smith chart; transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

103. Applied Numerical Computing. (4) Lecture, three hours; recitation, one hour; outside study, 11 hours. Requisites: course 5C or Computer Science 31 or Civil Engineering 15 or Mechanical and Aero- space Engineering 20, Mathematics 33B. Introduction to numerical analysis and computing techniques: root finding, matrix computations for systems of linear equations, systems of nonlinear equations, numerical methods for ordinary differential equations, least squares, eigenvalue/eigenvector problems; applications to engineering problems. Letter grading.

110. Circuit Analysis II. (6) Lecture, three hours; recitation, one hour; laboratory, four hours; outside study, 10 hours. Requisite: course 10. Corequisite: course 102. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Introduction to use of measuring instruments in laboratory sessions, enabling experimental verification of circuit laws. Letter grading.

110L. Circuit Measurements Laboratory. (2) Labora- tory, four hours; outside study, two hours. Requisite: course 10 or 100. Experiments with basic circuits containing resistors, capacitors, inductors, and op- amps. Ohm's law, voltage and current division, Thévenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Letter grading.

113L. Digital Signal Processing Laboratory. (2) Laboratory, four hours; outside study, two hours. Requisite: course 113. Recommended: Computer Science 115B. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Letter grading.

114. Introduction to Speech and Image Processing. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 113. Basic principles of data acquisition, feature extraction, transforms. Acoustic theory of speech production, speech analysis techniques, and modeling perceptual mechanisms in first half of course; image processing techniques in second half. Lecture supplemented by computer laboratory assignments. Letter grading.

115A. Analog Electronic Circuits I. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 110. Recommended: course 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, feedback on single-stage amplifiers. Letter grading.

115B. Analog Electronic Circuits II. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 115A. Electron device/cur- renvironment interactions, with emphasis on multi- stage amplifiers. Tuned amplifier considerations. Non- linear situations requiring graphical method of solution. Emphasis on design techniques, including economics, reliability, and realization of performance specifications. Letter grading.

115C. Digital Electronic Circuits. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisites: course 115A, Computer Science 515A. Recommended: courses 115B, 121A, 118B. Experimental and computer studies of multistage, broadband, tuned, and power amplifiers, and multilook feedback amplifiers. Introduction to thick film hybrid techniques. Construction of amplifier using hybrid thick film techniques. Letter grading.

116B. VLSI System Design. (4) Lecture, three hours; recitation, one hour; laboratory, four hours; outside study, four hours. Requisites: courses 115C, M116C (or Computer Science M151B), M116D (or Computer Science M152B). Familiarity with digital cir- cuit, logic design, and computer architecture as- sumed. VLSI design from a system perspective, with focus on (1) core VLSI architecture concepts such as datapath design, clocking, power, speed, area trade- off, input/output packaging, etc. and (2) behavioral, register-transfer, logic, and physical-level structured VLSI design using CAD tools and hardware descrip- tion languages such as VHDL. Letter grading.

116C. Computer Systems Architecture. (4) Form- erly number 1182. Computer Science 7151B. Lecture, four hours; recitation, two hours; outside study, six hours. Requisites: course M16 or Computer Science M51A, Computer Science 33. Recommended: course M118L or Computer Science M152A. Machine organization and design, formal de- scriptions, comparative study of machine instruction sets and formats, data representation and floating-point addressing, instruction sets, instruction set architec- ture, instruction set design, assembly language, microprogramming, input/output (I/O) processing and interrupts, and reliability aspects. Letter grading.

M116D. Digital Design Project Laboratory. (4) (Same as Computer Science M152B.) Laboratory, four hours; recitation, two hours; outside study, six hours. Requisite: course M116C or Computer Science M151B. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement de- signs and to document and give oral presentations of their work. Letter grading.

M116L. Introductory Digital Design Laboratory. (2) (Same as Computer Science M152A.) Laboratory, four hours; outside study, two hours. Requisite: course M16 or Computer Science M51A. Hands-on design, implementation, and debugging of digital logic simulation tools, use of computer-aided design tools for sche- matic capture and simulation, implementation of com- plex circuits using programmed array logic, design projects. Letter grading.

121A. Physical Principles of Semiconductor De- vices. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisites: course 2 or Physics 1C, Materials Science 14. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

121B. Principles of Semiconductor Device De- sign. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 121A. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

121AL. Analog Electronic Circuits Laboratory. (4) Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 121A, 121B may be taken concurrently. Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Letter grading.

122A. Semiconductor Physical Electronics. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 2 or Physics 1C. Limited to junior/senior engineering majors. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties. Letter grading.

122B. Fundamentals of Solid-State II. (4) Lecture, three hours; outside study, nine hours. Requisite: course 123A. Discussion of solid-state properties, lat- tice vibrations, thermal properties, dielectric, magnet- ic, and superconducting properties. Letter grading.

124. Semiconductor Physical Electronics. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Requisite: course 123A. Bland structure of semiconductors, experimental probes of basic band structure parameters, statistics of carriers, carrier transport properties at low fields, excess carrier transport properties, carrier recombination mecha- nisms, heterojunction properties. Letter grading.

129D. Semiconductor Processing and Device De- sign. (4) Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 121A, 121B. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool is based on PISCES; process inte- gration tool is based on SUPREM. Course familiariz- es students with the tools. Using CAD tools, a CMOS process integration to be designed. Letter grading.

131A. Probability. (4) Lecture, four hours; recitation, one hour; outside study, 10 hours. Requisites: course 102, Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal process- ing. Introduction to computer simulation and genera- tion of random events. Letter grading.
131B. Introduction to Stochastic Processes. (5) Lecture, four hours; outside study, 11 hours. Required: course 131A. Introduction to concepts of stochastic processes, emphasizing continuous- and discrete-time stationary processes, correlation function and spectral density, linear transformation, and mean-square estimation. Applications to communication, control, and signal processing. Introduction to computer simulation and analysis of stochastic processes. Letter grading.

141. Principles of Feedback Control. (4) Lecture, three hours; recitation, one hour; laboratory, one hour; outside study, eight hours. Limited to seniors. Multidisciplinary course with lectures and laboratory experiments on optical sensors. Fundamentals of intensity and interference-based transducers, polarimeters, multiplexing and sensor networks, physical and biomedical sensors. Design and implementation of optical system, computer interfacing, and signal processing. Letter grading.

150DL. Photonic Sensor Design Laboratory. (4) Lecture, two hours; laboratory, four hours; outside study, eight hours. Limited to seniors. Multidisciplinary course with lectures and laboratory experiments on optical sensors. Fundamentals of intensity and interference-based transducers, polarimeters, multiplexing and sensor networks, physical and biomedical sensors. Design and implementation of optical system, computer interfacing, and signal processing. Letter grading.

151A. Micromachining and Design of Microelectromechanical Systems. (4) Lecture, three hours; laboratory, four hours; outside study, five hours. Required: Chemistry 10B or 20B, Physics 6C or 8C. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Different methods of micromachining and how these methods can be used to produce a variety of MEMS, including microsensors and microactuators. Students fabricate a variety of MEMS in a microfabrication laboratory. Letter grading.

151DL. Microelectromechanical Systems Design. (4) Formerly numbered 151D.) Lecture, two hours; laboratory, two hours; outside study, eight hours. Required: courses 115A, 115B. Microelectromechanical systems design, combining lecture and laboratory instruction on microsensor and microactuator fundamental operating principles and high-resolution electronic measurement methods and transducers. Emphasis on design of transducers and interface systems using device and system-level tools. Letter grading.

161. Electromagnetic Waves. (4) Lecture, four hours; recitation, one hour; outside study, seven hours. Required: course 101. Time-varying fields and Maxwell equations, plane wave propagation and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

163A. Introductory Microwave Circuits. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: course 161. Transmission lines description of waveguides, impedance transformers, power dividers, directional couplers, filters, hybrid junctions, nonreciprocal devices. Letter grading.

163B. Microwave and Millimeter Wave Active Devices. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Required: courses 121A, 121B, MESFET, HEMT, HBT, IMPATT, Gunn, small signal models, noise model, large signal model, load-pull method, parameter extraction technique. Letter grading.

163C. Active Microwave Circuits. (4) Lecture, three hours; outside study, nine hours. Required: courses 115A, 116. Theory and design of microwave transistors and amplifiers and oscillators; stability, noise, distortion. Letter grading.

164AL. Microwave Measurements Laboratory. (2) Lecture, one hour; laboratory, two hours; outside study, three hours. Required: course 161. Measurement techniques and instrumentation for active and passive microwave components; cavity resonators, waveguides, wave meters, slotted lines, directional couplers. Design, fabrication, and characterization of microwave circuits in microstrip and coaxial systems. Letter grading.

164BL. Active Microwave Circuit Design Laboratory. (2) Lecture, one hour; laboratory, two hours; outside study, three hours. Required: course 161. Application of contemporary analytic design techniques to development of microwave amplifiers and oscillators incorporating state-of-the-art commercially available microwave courses (silicon bipolar and GaAs MESFET). Letter grading.

172. Introduction to Lasers and Quantum Electronics. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: course 101. Physical applications and principles of lasers, Gaussian optics, resonant cavities, atomic radiation, laser oscillation and amplification, cw and pulsed lasers. Letter grading.

172L. Laser Laboratory. (4) Laboratory, four hours; outside study, eight hours. Required or corequisite: course 172. Properties of lasers, including saturation, mode-locking, and relaxation effects. Laser applications, including optics, modulation, communication, holography, interferometry, and nonlinear effects. Letter grading.

173. Photonic Devices. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: course 101. Introduction to basic principles of photonic devices. Topics include crystal optics, dielectric optical waveguides, waveguide couplers, electro-optic devices, magneto-optic devices, acousto-optic devices, second-harmonic generation, optical Kerr effect, optical switching devices. Letter grading.

173L. Photonics and Communication Laboratory. (4) Laboratory, four hours; outside study, eight hours. Required: course 102. Recommended: course 132A. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Modulation techniques, including A.M., F.M., phase and suppressed carrier methods. Letter grading.

174. Semiconductor Optoelectronics. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: course 172. Introduction to semiconductor optoelectronic devices for optical communications, interconnects, and signal processing. Basic optical properties of semiconductors, pin photodiodes, avalanche photodiode detectors (APD), light-emitting diodes (LED), semiconductor lasers, optical modulators and amplifiers, and typical photonic systems. Letter grading.

175. Fourier Optics. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: courses 102, 161. Two-dimensional linear systems and Fourier transforms. Foundation of diffraction theory. Analysis of optical imaging systems. Spatial filtering and optical information processing. Wavefront reconstruction and holography. Letter grading.

176. Lasers in Biomedical Applications. (4) Lecture, three hours; recitation, one hour; outside study, eight hours. Required: course 101. Study of different types of laser systems and their operation. Examination of their roles in current and projected biomedical applications. Specific capabilities of laser radiation to be related to each example. Letter grading.

M185. Introduction to Plasma Electronics. (4) (Same as Physics M122.) Lecture, three hours; outside study, nine hours. Required: course 101 or Physics 110A. Senior-level introductory course on electro-dynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

190D. Systems Design. (4) Lecture, two hours; laboratory, two hours; outside study, eight hours. Required: courses 113, 132A, 141. Advanced systems design integrating communications, control, and signal processing subsystems. Different project to be assigned yearly in which student teams create high-performance designs that manage trade-offs among sub-systems. Letter grading.

199. Special Studies (2 to 8 units). Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only two units may be applied toward degree; the two units must be approved by petition and can be used only as a replacement for a regular electrical engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree. Letter grading.
Graduate Courses

211B. Digital Image Processing II. (4) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisite: course 211A. Advanced digital image processing theory and techniques. Topics include modeling, restoration, still-frame and video image compression, tomographic imaging, and multisolution analysis using wavelet transforms. Letter grading.

212B. Multirate Systems and Filter Banks. (4) Lecture, three hours; outside study, nine hours. Requisite: course 212A. Fundamentals of multirate systems, polyphase representation; multistage implementations; applications of multirate systems; maximally decimated filter banks; perfect reconstruction systems; paraunitary filter banks; wavelet transform and its relation to multirate filter banks. Letter grading.

213A. Advanced Digital Signal Processing Circuit Design. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 212A, M216A. Digital filter design and optimization tools, architectures for digital signal processing circuits; integrated circuit modules for digital signal processing; programmable signal processors; CAD tools and cell libraries for application-specific integrated circuit designs; case studies of speech and image processing circuits. Letter grading.

214A. Digital Speech Processing. (4) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 113. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms; speech analysis/synthesis. Techniques include linear prediction, filter bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

214B. Advanced Topics in Speech Processing. (4) Lecture, three hours; outside study, seven hours. Requisite: course 214A. Advanced techniques used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and psychoacoustics of human perception. Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and speech algorithms. AIDS for hearing impaired. Letter grading.

215A. Analog Integrated Circuit Design. (4) Lecture, four hours; outside study, eight hours. Requisite: course 115B. Analysis and design of analog integrated circuits. MOS and bipolar device structures and models, single-stage and differential amplifiers, noise, feedback, operational amplifiers, offset and distortion, sampling devices and discrete-time circuits, bandgap references. Letter grading.

215B. Advanced Digital Integrated Circuits. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 115C, M216A. Analysis and comparison of modern logic families (CMOS, bipolar, BiCMOS, GaAs). MSI digital circuits (flipflops, registers, counters, PLAs). VLSI memories (ROM, RAM, CCD, bubble memories, EEPROM, EEPROM) and VLSI systems. Letter grading.

215C. Analysis and Design of RF Circuits and Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 215A. Principles of RF circuit and system design, with emphasis on mono- and bipolar transistor circuits. Basic concepts, communications background, transceiver architectures, low-noise amplifiers and mixers, oscillators, frequency synthesizers, power amplifiers. Letter grading.

216A. LSI in Computer System Design. (4) (Same as Computer Science M226A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. S/U or letter grading.

M216B-M216C. LSI in Computer System Design. (4-4) (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Requisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

M217. Biomedical Imaging. (4) (Formerly numbered 217.) (Same as Biomedical Engineering M217.) Lecture, four hours; laboratory, two hours; outside study, seven hours. Requisite: course 114 or 211A. Mathematical principles of medical imaging modalities: X-ray, computed tomography, positron emission tomography, single photon emission computed tomography, magnetic resonance imaging. Topics include basic principles of each imaging system, image reconstruction algorithms, system configurations and their effects on reconstruction algorithms, specialized imaging techniques for specific applications such as flow imaging. Letter grading.

219A. Special Topics in Circuits and Signal Processing. (4) Lecture, three hours; outside study, nine hours. Advanced treatment of topics selected from research areas in circuit theory, integrated circuits, or signal processing. Letter grading.

221A. Physics of Semiconductor Devices I. (4) Lecture, four hours; outside study, eight hours. Requisite: course 121A. Physical principles and design considerations of field effect devices and charge-coupled devices. S/U or letter grading.

221B. Physics of Semiconductor Devices II. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 118, 121A. Principles of integrated circuit fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools. S/U or letter grading.

222. Integrated Circuits Fabrication Processes. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 118, 121A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools. S/U or letter grading.

224. Solid-State Electronics II. (4) Lecture, four hours; outside study, eight hours. Requisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties. Letter grading.

225. Superlattices and Quantum Wells. (4) Lecture, four hours; outside study, eight hours. Requisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, transistors, and detectors. S/U or letter grading.

229. Seminar: Advanced Topics in Solid-State Electronics. (4) Seminar, four hours; outside study, eight hours. Requisites: courses 222, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission. S/U or letter grading.

229S. Advanced Electrical Engineering Seminar. (2) Seminar, two hours; outside study, six hours. Preparation: successful completion of Ph.D. major field examination. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. S/U grading.
230A. Estimation and Detection in Communication and Radar Engineering. (4) Lecture, four hours; outside study, eight hours. Requisite: course 131A. Applications of estimation and detection concepts in communication and radar engineering; random signal and noise characterization by analytical and simulation methods; mean square (MS) and maximum likelihood (ML) estimation; re-estimations and arithmetics; detection under ML, Bayes, and Neyman-Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations. S/U or letter grading.

230B. Digital Communication Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: courses 132A, 230A. Basic concepts of digital communication systems; representation of bandpass waveforms; signal space analysis and optimum receivers in Gaussian noise; comparison of digital modulation methods; synchronization and adaptive equalization; applications to modern communication systems. S/U or letter grading.

230D. Signal Processing in Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 230C. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Optimization of dynamic range, quantization, and state constraints; DFT, convolution, FFT, NTT, Winograd DFT, systolic array, spectral analysis-windowing, AR, and ARMA; system applications. S/U or letter grading.

231A. Information Theory: Channel and Source Coding. (4) Lecture, four hours; outside study, eight hours. Requisite: course 230A. Fundamental concepts of information theory with applications to digital communications. Entropy, information, and data compression; noisy compression (rate distortion theory); channel capacity; block and convolutional codes and decoding algorithms. Letter grading.

231D. Spread Spectrum Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 231A. Spread spectrum digital communication for personal communication systems. Review of digital modulation, channel coding; fading channels and diversity techniques; direct sequence and frequency-hopped spread spectrum systems; multiple-access schemes; application to cellular radio. Letter grading.

231E. Channel Coding Theory. (4) Lecture, four hours; outside study, eight hours. Requisite: course 231A. Fundamentals of linear codes and decoding algorithms based on theory of finite fields such as Bose-Chaudhuri-Hocquenghem and Reed-Solomon codes; introduction to combined coding and modulation such as lattice codes and trellis coded modulation; constellation shaping; applications. Letter grading.

232A. Stochastic Modeling with Applications to Telecommunication Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 231A. Introduction to stochastic processes as applied to study of telecommunication systems and traffic engineering. Renewal theory: discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queueing analysis of basic telecommunication system models. S/U or letter grading.

232B. Telecommunication Switching and Queueing Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 232A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, busy period, blocking, and stochastic process analysis for Markovian and non-Markovian models. S/U or letter grading.

232D. Telecommunication Networks and Multiple-Access Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include architectures, multiplexing and multiple-access, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks. S/U or letter grading.

232E. Graphs and Network Flows. (4) Lecture, four hours; outside study, eight hours. Requisite: course 136. Solution to analysis and synthesis problems which may be formulated as flow problems in capacities constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transmission problems. S/U or letter grading.

233B. Systems and Hardware Design for Wireless Communications. (4) Lecture, four hours; outside study, eight hours. Requisite: courses 113, M216A, M216B. Multidisciplinary course bringing together aspects of wireless data communications, signal processing, and baseband hardware design. Topics include wireless signal propagation and channel modeling, antenna array, signal processing, windowing, AR, and ARIA; system applications. S/U or letter grading.

234. Mobile Multimedia Information Systems. (4) Lecture, four hours; outside study, eight hours. Requisite: course 232C. Computer Science 218. Interdisciplinary course covering 5G wireless networked computing, wireless communication, and multimedia processing for systems capable of ubiquitous transport and processing of multimedia information. Topics include radio propagation, wireless networks, cellular systems, network mobility management, low-power portable node architecture, middleware, OS, and applications. Letter grading.

236A. Linear Programming. (4) Lecture, four hours; outside study, eight hours. Requisite: course 232C, Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley-Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

239BS. Topics in Operations Research. (4) Lecture, four hours; outside study, eight hours. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change. S/U or letter grading.

240A. Linear Dynamic Systems. (4) (Formerly numbered 240A.) (Same as Chemical Engineering M290A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: course 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley-Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

240B. Linear Optimal Control. (4) Lecture, four hours; outside study, eight hours. Requisites: courses 141, M240A. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design. S/U or letter grading.

240C. Optimal Control. (4) (Formerly numbered 240C.) (Same as Chemical Engineering M280C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: course 240B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

241C. Stochastic Control. (4) Lecture, four hours; outside study, eight hours. Requires: courses 240B, 241B. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kalman filtering. S/U or letter grading.

M242A. Nonlinear Dynamic Systems. (4) (Formerly numbered 242.) (Same as Chemical Engineering M282A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requires: course M240A or Chemical Engineering M280A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability, Liapunov theory (including converse theorems), invariance, center manifold, input-to-state stability and small-gain theorem. Letter grading.

243. Robust and Optimal Control by Convex Methods. (4) Lecture, four hours; outside study, eight hours. Requires: course 240B. Multivariable robust control, including H2 and H-infinity optimal control and robust performance analysis and synthesis against structured uncertainty. Emphasis on convex methods for analysis and design, in particular linear matrix inequality (LMI) approach to control. Letter grading.

249S. Topics in Control. (4) Seminar, four hours; outside study, eight hours. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control; nuclear reactor control; biomedical problems. May be repeated for credit with topic change. S/U or letter grading.

250A. MEMS Device Physics and Fabrication. (4) Lecture, three hours; discussion, one hour; outside study, one hour; four hours. Recommended preparation: integrated circuit processing knowledge. Introduction to physics and fabrication of microelectromechanical systems (MEMS) components. Surface, bulk, and other silicon micrograining principles. Material deposition and etching methods. Electronic, mechanical, and thermal properties of materials for MEMS. Fundamental transducer and actuator principles. Letter grading.

259S. Seminar: Microelectromechanical Systems. (2) Seminar, two hours; outside study, four hours. Seminar on microelectromechanical systems (MEMS). Letter grading.

266. Computational Methods for Electromagnetics. (4) Lecture, four hours; outside study, eight hours. Requires: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas. S/U or letter grading.

275. Special Topics in Quantum Electronics. (4) Lecture, four hours; outside study, eight hours. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrastar phenomena, fiber optics, and lightwave technology. May be repeated for credit. S/U or letter grading.

285A. Plasma Waves and Instabilities. (4) Lecture, four hours; outside study, eight hours. Requires: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro- and neumagnetic waves, drift waves, Rayleigh/Taylor, Kelvin/Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases. Letter grading.

296. Seminar: Research Topics in Electrical Engineering. (2) Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

298. Seminar: Engineering. (2 to 4) Seminar, to be arranged. Limited to graduate electrical engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies. (2 to 8 units) Tutorial, to be arranged. Limited to graduate electrical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination. (2 to 12 units) Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16 units) Tutorial, to be arranged. Limited to graduate electrical engineering students. S/U grading.
597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

**ENGINEERING SCHOOLWIDE PROGRAMS**

*School of Engineering and Applied Science*

UCLA
6426 Boelter Hall
Box 951601
Los Angeles, CA 90095-1601
(310) 825-2826
http://www.seas.ucla.edu/

**Professors Emeriti**
Edward P. Coleman, Ph.D.
J. Morley English, Ph.D.
Alfred C. Ingersoll, Ph.D.
Herbert B. Nottage, Ph.D.
Allen B. Rosenstein, Ph.D.
Bonham Spence-Campbell, E.E.

**Graduate Study**
The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Master’s Degree**
The Engineering Executive Program offers the Master of Engineering (M.Engr.) degree.

**Admission**
The Engineering Executive Program enrolls a limited number of students in a two-year study program. It is specifically designed for experienced professionals who intend to go on to high-level executive positions in industry and government.

In addition to the University minimum requirements, the following are required: (1) five years of responsible full-time professional experience in engineering; (2) some formal study in statistics; (3) the Graduate Record Examination (GRE) General Test and Subject Test in Engineering, Mathematics, Business, or a related field. A screening interview with the coordinator of the Engineering Executive Program is required.

More information can be obtained from the Office of Academic and Student Affairs, 6426 Boelter Hall, School of Engineering and Applied Science, (310) 825-1704.

**Areas of Study**
Engineering management.

**Course Requirements**
A total of 12 graduate courses are required for the Master of Engineering degree: Engineering 470A-470B-470C, 471A-471B-471C, 472A through 472D, 473A-473B.

**Undergraduate Courses**
No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science M152A, M152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 110L, M116D, M116L, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Students should consult with the graduate adviser on departmental requirements and restrictions.

**Comprehensive Examination Plan**
Consult the department.

**Thesis Plan**
None.

**Engineer Degree**
The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

**Admission**
For information on admission to the program, see the Admission section for the corresponding departmental doctoral program.

**Areas of Study**
Consult the department.

**Course Requirements**
Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that students in the Ph.D. program may either exit with an Engineer degree or earn the Engineer degree enroute to one of the Ph.D. degrees offered by the school. Similarly, students in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs applies toward the minimum residence requirements and to the time limitation for the other program.

**Written and Oral Qualifying Examinations**
Requirements for the Engineer degree are identical to those of the Ph.D. in Engineering up to and including the oral preliminary examination, except that the Engineer degree is based on coursework.

**Graduate Certificate of Specialization**
A certificate of specialization is available in all areas of specialization offered by the School of Engineering and Applied Science, except computer science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five courses, at least two of which must be at the 200 level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three quarters of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master's or doctoral degrees.

**Engineering**

**Lower Division Courses**
95. Ethical and Professional Issues in Engineering and Computer Science. (4) Lecture, four hours; outside study, eight hours. Selected lectures, discussion, and oral and written reports related to profession of engineering. Lectures by practicing engineers, case studies, and small group projects on issues that involve conflicting demands on society. Letter grading.
Graduate Courses

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

470A-470D. The Engineer in the Technical Environment. (3-3-3-3) Lecture, three hours. Limited to Engineering Executive Program students. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects. S/U or letter grading.

471A-471B-471C. The Engineer in the General Environment. (3-3-1.5) Lecture, three hours (courses 471A-471B)/90 minutes (course 471C). Limited to Engineering Executive Program students. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter grading (course 471A); In Progress and S/U or letter grading (courses 471B-471C).

472A-472B. The Engineer in the Business Environment. (3-3-3-1.5) Lecture, three hours (courses 472A-472B)/75 minutes (course 472C). Limited to Engineering Executive Program students. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress and S/U or letter grading (credit to be given on completion of courses 472B and 472C).

473A-473B. Analysis and Synthesis of a Large Scale System. (3-3-3) Lecture, two and one-half hours. Limited to Engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

495. Teaching Assistant Training Seminar. (4) Seminar, four hours; outside study, eight hours. Preparation: appointment as a teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Scope and Objectives

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is the primary language, and to the study of the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on British, American, and world literary history and requires of its undergraduate majors a firsthand acquaintance with many of the more influential writers who have helped during the past millennium to make English a global language that possesses richly diverse and highly influential literary cultures. Within the department, students are able to pursue a variety of courses on the study of literary culture beyond the strictly historical — literary criticism, for example, or those that draw on the resources of such disciplines as sociology, psychology, and philosophy. Within the B.A. degree in English, qualified students may elect a concentration either in creative writing or in world literature. The department also offers a Bachelor of Arts degree in American Literature and Culture.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program...
may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Undergraduate Study

Admission to Courses in English

Students must have completed the Subject A requirement before taking any courses in English (other than English Composition A or 2). For further information regarding Subject A, see the Undergraduate Study section of this catalog.

Extra-Departmental Requirement in Foreign Literature or Foreign Language

All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course listings under Foreign Literature in Translation later in this chapter). Italian 46 may not be applied. Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high school level through the IGETC program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a P/NP grading basis.

English B.A.

The Bachelor of Arts degree has concentrations in creative writing and in world literature. An international students program in English is also offered.

Preparation for the Major

Required: English Composition 3, English 4, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

The Major

Required: Twelve upper division English courses, including 141A or 141B, 142A, 142B, 143, at least one course from each of the 150 and 180 series, one course from 160 through 164, and five additional courses of which three must be selected from 140A, 140B, 142C, or 150A through M109D.

Students are encouraged to choose additional electives from courses 140A through M109D. English 140A is especially recommended if they plan graduate work in literature. They may wish to select several courses in the relevant classical and postclassical foreign literatures and thought.

Optional Concentrations and Special Programs

The department offers optional concentrations in creative writing and in world literature, as well as a special program for international students planning to select this program should consult the departmental counselor for further details.

World Literature Concentration

The world literature concentration consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 141A, 141B, or 143; 142A and 142B; at least one course from the 150 series; and four electives selected from courses 140A through 190 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

International Students Program

The department offers a special program in English to bona fide international students whose native language is other than English. For this program, students must satisfy all requirements listed under Preparation for the Major; they may fulfill the departmental foreign language requirement with their own native language. The following 12 courses are required for the program itself: English as a Second Language 103, 106, 109; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from 140A through M109D. Students who complete this program and wish to pursue graduate study should consult the departmental counselor about programs of study and requirements for admission.

American Literature and Culture B.A.

Preparation for the Major

Required: English Composition 3, English 4, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

The Major

Required: Thirteen upper division courses, including six in American literature selected from English 170A through 179, two of which must be devoted to literature written before 1900 (courses 170A, 170B, 171A, 171B, 173A, 174A); two courses from 142A, 142B, 143; one seminar from 187, 188, 189, or when treating American topics, 180X; one course from M102A, M102B, 103, M104A, M104B, M104C, M105A, M105B, 106, M107A (also M107C when treating American topics or figures), or 109; and three courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, all three must usually come from one department or program and appear on a list of approved courses for the major).

Honors Program

Admission

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Winter Quarter of the junior year. For application forms and further information, contact the departmental counselor.

Requirements

All honors students are required to take English 140A during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In Spring Quarter of the junior year, they must take course 199HA. During Fall and Winter Quarters of the senior year, they take courses 199HB and 199HC, in which they write a thesis under the direction of a faculty member. The thesis determines whether they receive high honors, honors, or no honors.

Waiver for Instructional Credential in English

Students interested in obtaining a single subject secondary school credential in English should consult with a departmental counselor regarding the requirements for a waiver from the English Single Subject Assessment Test (SSAT) and the Praxis Examination, both of which are required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible, because the program does require additional courses beyond the major requirements. Students interested in elementary school education are strongly urged to participate in the Diversified Liberal Arts Program (DLAP), administered by the College Counseling Service,
Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under "Publications") on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

Admission

The department does not accept students whose sole objective is the Master of Arts (M.A.) degree in English.

Areas of Study

Literatures in English. See Course Requirements below.

Course Requirements

All graduate students in the M.A. program are required to take a minimum of 12 units or three courses per quarter.

Though all students are admitted directly into the Ph.D. program, students can decide to leave the program with an M.A. if they complete an acceptable thesis. Nine letter-graded English courses are required for the M.A. degree; these courses must be at the graduate level (200 or above).

All students at any stage of the program may take courses for S/U grades, but such courses cannot be used to satisfy any requirements for a degree. The work required for an S must be agreed on in advance with the instructor of the course.

Comprehensive Examination Plan

Students in the Ph.D. program receive the M.A. after they have satisfied one foreign language requirement and passed the first qualifying examination (see Written and Oral Qualifying Examinations under Doctoral Degree below).

Thesis Plan

Students elect the thesis plan for the M.A. after a maximum of two years in the program. They must request a committee from the vice chair a minimum of two quarters before completion of the program. The committee consists of three faculty members who meet as a group with the student to consider the thesis proposal. The thesis must not be less than 40 pages (10,000 words) nor more than 60 pages (15,000 words) in length.

Doctoral Degree

Admission

All students who are admitted into the graduate program of the Department of English at UCLA enter the first phase of the doctoral program, successful completion of which results in the Master of Arts degree in English. Those who enter UCLA with the master’s degree may waive certain course requirements but must pass the first qualifying examination (which also grants admission into the second phase of the doctoral program). Those who decide they want a terminal Master of Arts degree from UCLA must write a thesis.

Admission to the program leading to the Ph.D. degree in English is based on a thorough review of the applicant’s academic record. Ordinarily, holders of the B.A. are expected to meet these minimum requirements: an undergraduate major or program that prepares one for advanced study of literature; a grade-point average in English courses and in the junior and senior years of at least 3.5; and a score on the Graduate Record Examination (GRE) within the last five years of above 600 on both the verbal section of the General Test and the Literature in English Subject Test, or a combined score of 1,300. Applicants who hold the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and a correspondingly higher score on the Subject Test. Applicants must submit a minimum of three letters of recommendation attesting to their ability to succeed in graduate study. A writing sample is also required. Care should be taken with the statement of purpose and the writing sample, since the quality of thought and argument these exhibit, as well as their style, weigh significantly in admissions decisions. For an application, write to the department.

Major Fields or Subdisciplines

Literatures in English.

Course Requirements

Fourteen letter-graded courses are required. The courses must be at the graduate level (200 or better). With the approval of the vice chair, Ph.D. students may take up to three of the courses in departments other than English (such as literature in another language, history, art history, Afro-American studies, film). English 201A and 201B are highly recommended.

Students take the first qualifying examination and to pursue the doctorate take English 596 each quarter, either under an individual professor or the vice chair. Students who elect to write an M.A. thesis take English 598 each quarter.

Breadth. Of the 14 letter-graded courses for the Ph.D., students are required to take a minimum of three courses in periods before 1800 and three in periods after 1800. Courses that straddle this chronological break, such as most of those in Romanticism, may satisfy either the pre- or the post-1800 requirement, but not both. (Classes in literary theory do not ordinarily satisfy the breadth requirement.)

Philo. All Ph.D. students must take English 210 or any two courses from 211, 212, or 213. When offered, either English 214 or 240 may be substituted for 210.

All students at any stage of the program may take courses for S/U grades, but such courses cannot be used to satisfy any requirements for a degree. The work required for an S must be agreed on in advance with the instructor of the course.

Written and Oral Qualifying Examinations

First Stage Evaluation. At the beginning of the second year in the program, the graduate committee reviews students’ files, which include the faculty’s written reports on coursework as well as grades, and instructs the vice chair to advise students as to their progress in the program. Students who entered the program with an M.A. may petition the committee to grant credit toward the 14 course requirement for graduate courses taken elsewhere; at the committee’s discretion, a maximum of six such courses may be credited toward the UCLA degree.

First Qualifying Examination. After students satisfy the 14-course requirement (including the breadth requirement and the philology requirement), ordinarily sometime early in their
Third year, they take the first qualifying examination. In anticipation of the oral portion of this examination, students are asked to designate the three fields in which they are examined. At least two of these fields must be historical, chosen in most cases from among the following: Anglo-Saxon, Middle English, Renaissance, earlier 17th century, Restoration and 18th century, Romantic, Victorian, 20th-century British, earlier American, 19th-century American, 20th-century American. If students wish, the third field may be a genre or a special field: novel, drama, poetry, literary criticism, folklore/ mythology, Celtic studies, African American literature, women’s writing, history of the language, rhetoric, Asian American literature. The graduate committee also considers petitions for third fields designed by students themselves and not specified on this list.

Taking into account the fields designated, the vice chair appoints three faculty members to serve as the examining committee. Before it is appointed, students, without giving an explanation, may exempt one person from the committee. Students are told the names of their committee members approximately two weeks before the examination. At that time, students submit to them the written work from any two seminars that they feel best reflect their performance. In most cases, this means two substantial seminar papers. The committee’s review of these papers constitutes the first stage of the examination. A two-hour oral examination in the three fields designated constitutes the second stage of this examination. On the basis of overall performance, the committee decides whether students passed the examination as a whole and submits the results to the graduate committee. Students may retake the examination once, but before any failed examination is retaken, the graduate committee reviews the record as a whole and offers, through the vice chair, advice on how students should proceed.

There are no fixed reading lists for the oral examination; the department believes that part of students’ intellectual maturity at this stage should be the capacity to determine what needs to be read in a particular field. Students need to remember that an oral examination can move readily from texts that they have not read to ones that they have. For general guidance, however, the department does provide extensive lists of suggested works in each field, doing so in full recognition that most students are not able to “master” the entire lists, and that they may well use the oral examination to demonstrate knowledge of works that do not appear on the lists at all.

Second Stage. As soon as possible after successful completion of the first qualifying examination, students select a dissertation director and begin to prepare the dissertation prospectus. Once students advance to this stage, they may take up to eight units of English 597 either under an individual professor or the vice chair, so that they can concentrate on the prospectus. Students are also encouraged to take any seminars that might prove useful.

Second Qualifying Examination. After students pass the second language requirement, and they and their dissertation director conclude that they are sufficiently prepared (but no later than three quarters after they have passed the first qualifying examination), they take the second qualifying examination (also called the University Oral Qualifying Examination). The examination is administered by a committee of four, consisting of a chair and two other members from the English Department and one member from outside the department, nominated and appointed according to the regulations governing doctoral committees. The departmental members may but need not be the same as those on the first qualifying examination committee.

At least two weeks before the examination, students must submit their prospectus to each member of the committee. The prospectus must be a substantially researched overview of the proposed dissertation. The second qualifying examination, which normally lasts for about two hours, focuses on the issues raised by the proposed dissertation and attempts to ascertain both the feasibility of the project and students’ preparation for it. Though this examination concentrates on the prospectus, students should be prepared to discuss a wide range of works that bear on the proposed dissertation. Students are encouraged to consult their committee in advance of the examination. The grading on the examination is pass or fail. Candidates may, at the discretion of the committee, repeat the examination, but only one repetition is allowed.

Third Stage. When students pass the second qualifying examination, they may advance to candidacy and receive the Candidate in Philosophy (C.Phil.) degree. Students now proceed with the writing of the dissertation and enroll each quarter in English 599. Students are encouraged to enroll in seminars in their field whenever they are offered. All course requirements (oral reports and term papers) may be satisfied through work connected with the dissertation.

English

Lower Division Courses

4. Critical Reading and Writing. (4) Lecture, four hours. Enforced requisite: English Composition 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. P/NP or letter grading.

4H. Critical Reading and Writing (Honors). (4) Enforced requisite: English Composition 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays.

10A. English Literature to 1660. (5) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Enforced requisite: English Composition 3, English 4. Study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent.

10B. English Literature, 1660 to 1832. (5) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Enforced requisite: English Composition 3, English 4. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent.

10C. English Literature, 1832 to the Present. (5) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Enforced requisite: English Composition 3, English 4. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent.

20. Introduction to Creative Writing. Preparation: satisfaction of Subject A requirement, submission of creative or expository writing samples to a screening committee. Enforced requisite: English Composition 3. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

70. Major British Authors before 1800. Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

75. Major British Authors, 1800 to the Present. (4) Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

80. Major American Authors. (4) Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Introduction to the chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway.

85. The American Novel. (4) Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any 170-series courses. Development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

88A-88Z. Lower Division Seminars: Special Topics in English. (4 each) Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading.

90. Shakespeare. (4) Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare’s plays, including comedies, tragedies, and histories, selected to represent Shakespeare’s breadth, artistic progress, and total dramatic achievement.
95A. Introduction to Poetry. (4) Preparation: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of a selection of representative poems. P/NP or letter grading.

95B. Introduction to Drama. (4) Preparation: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

95C. Introduction to Fiction. (4) Preparation: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

96. The Short Story in England and America. (4) Preparation: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

97H. Honors Seminar for Freshmen and Sophomores. (4) Seminar, three hours. Enforced requisites: English Composition 3, English 4. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information.

Upper Division Courses

100. Introduction to Special Topics and Genres. (4) Preparation: satisfaction of Subject A requirement. Study of a particular topic, genre, or subgenre in literature such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

M102A. Asian American Literature since 1900. (4) (Formerly numbered M102.) (Same as Asian American Studies M112A.) Preparation: satisfaction of Subject A requirement. Survey of Asian American literature from early period of formation to cultural nationalism. Topics. (4) (Same as Asian American Studies M112B.) Preparation: satisfaction of Subject A requirement. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Henry Hwang, and Jessica Hagedorn included. P/NP or letter grading.

M102B. Asian American Literature since 1980. (4) (Formerly numbered M102.) (Same as Asian American Studies M112B.) Preparation: satisfaction of Subject A requirement. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Betsy Ann Maladud, and Roth, focusing on encounters of Jewish ethical ideals and social values with the contemporary environment.

M104A. Early Afro-American Literature. (4) (Same as Afro-American Studies M104A.) Preparation: satisfaction of Subject A requirement. Introduction to survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons, fiction, poetry, essays), by authors such as Phillips Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnutt, Booker T. Washington, and Pauline Hopkins.

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (4) (Same as Afro-American Studies M104B.) Preparation: satisfaction of Subject A requirement. Introduction to survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

M104C. Afro-American Literature since the 1960s. (4) (Same as Afro-American Studies M104C.) Preparation: satisfaction of Subject A requirement. Introduction to survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

M105A. Early Chicana/Chicana Literature. (4) (Formerly numbered M105A.) (Same as Chicana and Chicano Studies M105A.) Preparation: satisfaction of Subject A requirement. Survey of Chicana and Chicano literature from the 17th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

M105B. Recent Chicana/Chicana Literature. (4) (Formerly numbered M105B.) (Same as Chicana and Chicano Studies M105B.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicana literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicana Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherríe Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

106. Native American Literary Studies. (4) Preparation: satisfaction of Subject A requirement. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology).

M107A. American Women Writers. (4) (Same as Women's Studies M107A.) Preparation: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

M107B. British Women Writers. (4) (Same as Women's Studies M107B.) Preparation: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

M107C. Special Topics in Women and Literature. (4) (Same as Women's Studies M107C.) Preparation: satisfaction of Subject A requirement. Variable special studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

108C. The English Bible as Literature: Special Topics. (4) Preparation: satisfaction of Subject A requirement. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit.

110. Interdisciplinary Approaches to Literature. (4) Preparation: satisfaction of Subject A requirement. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit.

111A. Literature of Myth and Oral Tradition. (4) (Same as Folklore M111.) Preparation: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

111B. Anglo-American Folk Song. (4) (Same as Ethnomusicology M124 and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

111C. British Folklore and Mythology. (4) (Same as Folklore M121.) Preparation: satisfaction of Subject A requirement. Designed for juniors/seniors. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

111D. Celtic Mythology. (4) (Same as Folklore M121.) Preparation: satisfaction of Subject A requirement. Study of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

111E. Survey of Medieval Celtic Literature. (4) (Same as Folklore M112.) Preparation: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

111F. Celtic Folklore. (4) (Same as Folklore M127.) Preparation: Folklore 101. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

112. Women's Literature. (4) Preparation: satisfaction of Subject A requirement. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography.

113. Literature for Adolescents and Young Adults. (4) Preparation: satisfaction of Subject A requirement. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults.
114. World Literatures in English. (4) Preparatory: satisfaction of Subject A requirement. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit.

115A. American Popular Literature. (4) Preparation: satisfaction of Subject A requirement. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories.

115B. British Popular Literature. (4) Preparation: satisfaction of Subject A requirement. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. Examination of social functions of literature.

118. Film and Literature. (4) Preparation: satisfaction of Subject A requirement. Study of interdisciplinarity relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works.

119. Literature of California and the American West. (4) Preparation: satisfaction of Subject A requirement. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S.

121. History of the English Language. (4) Preparation: satisfaction of Subject A requirement. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present.

122. Introduction to Structure of Present-Day English. (4) Preparation: satisfaction of Subject A requirement. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English.

133. Creative Writing: Poetry. (4) Preparation: satisfaction of Subject A requirement. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present.

134. Creative Writing: Short Story. (4) Preparation: satisfaction of Subject A requirement. Submission of writing samples. Requisites: English Composition 3, English 4. Three average-length stories to be completed each term. Some stories may, with instructor's consent, be submitted as partial fulfillment of other courses. Classroom discussion based on stories presented. Enroll in more than one section per term not permitted. May be repeated for a total of 12 units. No more than eight units may be completed with same instructor. P/NP or letter grading.

135. Creative Writing: Drama. (4) Preparation: satisfaction of Subject A requirement. Submission of writing samples. Requisites: English Composition 3, English 4. Exploration of capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Enroll in more than one section per term not permitted. May be repeated for a total of 12 units. No more than eight units may be completed with same instructor. P/NP or letter grading.

137. Advanced Computer Techniques for Students of English. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Preparation in Computing 1, 10A. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. Basic is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught.

140A. Criticism: History and Theory. (4) Requisites: courses 10A, 10B. Study of some major historical documents and theoretical statements in history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T. S. Eliot, with emphasis on major critical positions posed and developed by these writers, basis of their theoretical positions, and practical consequences of those positions. Possible discussion of recent trends in criticism.

140B. Criticism: Special Topics. (4) Requisites: courses 10A, 10B. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in Schedule of Classes. Some study of literary criticism to illuminate the value and practical application of the approach, may be required.

141A. Chaucer: The Canterbury Tales. (4) Requisites: courses 10A, 10B. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, The Canterbury Tales. Satisfies department's Chaucer requirement.

141B. Chaucer: Troilus and Criseyde and Selected Minor Works. (4) Requisites: courses 10A, 10B. Intensive study of Troilus and Criseyde and selected minor works of Chaucer, such as The Book of the Duchess, The House of Fame, The Parliament of Fowls, etc. Satisfies department's Chaucer requirement.

142A. Shakespeare: Poems and Early Plays. (4) Lecture, four hours; discussion, one hour. Requisites: courses 10A, 10B. Intensive study of selected poems and representative comedies, histories, and tragedies through Hamlet.

142B. Shakespeare: Later Plays. (4) Lecture, four hours; discussion, one hour. Requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances.

142C. Shakespeare: Selected Topics. (4) Requisites: courses 10A, 10B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors.

150A. Early Medieval Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B. Reading Knowledge of Old English not required. Major prose and poetry of Anglo-Saxon England (600 to 1100), including epic, romance, history, saints' lives, and travel literature. Texts and topics include Beowulf, Vingis, poems on women, Bede, and King Alfred. P/NP or letter grading.

150B. Later Medieval Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: courses 10A, 10B. Reading and historical exposition of major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prophecy, and lyrics). The more difficult texts read in modernized form.

151. Elizabethan Literature. (4) Requisites: courses 10A, 10B. Study of English literature of the 16th century, with special emphasis on development and interrelationships of poetry, fiction, and literary theory and criticism during reign of Elizabeth I.

152A. Drama from the Beginning to 1576. (4) Requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

152B. Drama, 1576 to 1642. (4) Requisites: courses 10A, 10B. Non-Shakespearian English drama from opening of first public playhouse to closing of the theaters. P/NP or letter grading.

154. Literature of the Restoration and Earlier 18th Century, 1660 to 1720. (4) Requisites: courses 10A, 10B. Study of major works as literary documents and as products of the Restoration and earlier 18th-century thought.

155. Literature of the Later 18th Century, 1730 to 1798. (4) Requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought.

157. The Novel to 1832. (4) Requisites: courses 10A, 10B. Survey of works of major English novelists from Defoe through Scott.

161. Later Romantic Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Akin, Hemans, and Prince.

162. Earlier Victorian Poetry and Prose. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Study of poetry and prose of the Victorian age from passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman.

163. Earlier Victorian Poetry and Prose. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Study of poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats.

164. The Novel, 1832 to 1900. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Survey of major English novelists from Dickens through Hardy.

165. 20th-Century British Poetry. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present.

166. 20th-Century British Fiction. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.

167. Drama, 1842 to 1945. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. The study of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.
168. Drama, 1945 to the Present. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II.

170A. American Literature to 1775. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Study of American literature from colonial period to the present. P/NP or letter grading.

170B. American Literature, 1775 to 1832. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Historical survey of American literature through Revolutionary and early republic periods. P/NP or letter grading.

171A. American Literature, 1832 to 1885. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Historical survey of American literature from Jacksonian era to end of the Civil War. P/NP or letter grading.

171B. American Literature, 1866 to 1912. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Historical survey of American literature from end of the Civil War to founding of Poetry magazine. P/NP or letter grading.

172A. American Literature, 1912 to 1945. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.

172B. American Literature since 1945. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.

176. American Drama. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Study of American drama, with its principal continental influences, since World War II.

177. Special Topics in American Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Focused study of some aspect or theme in American literature. May be repeated for credit. P/NP or letter grading.

178. Perspectives in Study of American Culture. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit.

180. Specialized Studies in Medieval Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

180X. Specialized Studies in Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

181. Specialized Studies in Renaissance Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

182. Specialized Studies in 17th-Century Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

183. Specialized Studies in 18th-Century Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

184. Specialized Studies in Romantic Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

185. Specialized Studies in Victorian Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

186. Specialized Studies in 20th-Century British Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

187. Specialized Studies in Colonial American Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

188. Specialized Studies in 19th-Century American Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

189. Specialized Studies in 20th-Century American Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit.

190. Literature and Society. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit. P/NP or letter grading.

196. Inter racial Encounters in Contemporary American Literature. (4) Preparation: satisfaction of Subject A requirement. Requisites: English Composition 3, English 4, 10A, 10B, 10C. Consult Schedule of Classes for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
Graduate Courses

201A. Criticism and Interpretation from Classical Era to the Renaissance. (4) Lecture, three hours. Examination of major texts in history of critical theory and interpretation from pre-Socratics to Descartes, including classical literary criticism (Plato, Aristotle, Horace, Longinus), biblical hermeneutics (Bible, Midrash, St. Paul, Augustine, St. Thomas Aquinas), and medieval and Renaissance theories of interpretation (Dante, Boccaccio, Sidney).

201B. Aesthetics and Criticism from the Enlightenment to Decadence. (4) Lecture, three hours. Continuation of course 201A, proceeding from neo-classical and Enlightenment critical theory through Victorian and decadent aesthetic and literary criticism. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. Letter grading.

201C. Developments and Issues in Modern Critical Thought. (4) Lecture, three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings vary from year to year but may include such figures as Freud, Durkheim, Saussure, Heidegger, Skolovski, Benjamin, Adorno, Levi-Strauss, Lacan, Barthes, Derrida, Deleuze, Fanon, Foucault, Irigaray, Lyotard, Bourdieu, and Bhabha. S/U or letter grading.

202. Enumerative and Descriptive Bibliography. (4) Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.

203. Computers and Literary Research. (4) Lecture, three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. Letter grading.

204. History of Rhetoric. (4) Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-to-modern period in alternate years.

M205. Perspectives in American Folklore Research. (4) (Same as Folklore CM205.) Lecture, three hours. Requisite: Folklore 101. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society.

210. History of the English Language. (4) Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

211. Old English. (4) Study of Old English grammar, lexicography, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

212. Middle English. (4) Requisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry.

213. Early Modern English. (4) Detailed study of phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of changes in the language in relation to intellectual, political, and social characteristics of the period.

218. Celtic Linguistics. (4) Survey of salient features of Celtic linguistic stock in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages.

220. Workshop: Creative Writing. (2 to 4) Preparation for submission of written work in specified genre (poetry, fiction, or drama). May be repeated but may not not more than one of the nine courses required for first qualifying examination nor any of the five courses required for second qualifying examination.

240. Studies in the Novel. (4) Individual seminars dealing with a single historical period from Old English period to the present or development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. May be repeated for credit.

241. Studies in English Literature. (4) Topics in various aspects of structure of modern English, especially syntax and semantics. May be repeated for credit.

242. Language and Literature. (4) Application of linguistic theories to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. May be repeated for credit.

M243A. The Ballad. (4) (Same as Folklore M243A.) Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues. May be repeated for credit.

M243B. Problems in Ballad Scholarship. (4) (Same as Folklore M243B.) Requisite: course M243A. Intensive investigation of a problem or problems in study of the popular ballad. May be repeated for credit.

244. Old and Medieval English Literature. (4) Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit.

245. Chaucer. (4) May be repeated for credit.

246. Renaissance Literature. (4) Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit.

247. Shakespeare. (4) May be repeated for credit.

248. Earlier 17th-Century Literature. (4) Studies in poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. May be repeated for credit.

M249. Milton. (4) (Same as American Studies M249.) Study of poetry and prose of John Milton; limits of investigation set by individual instructor. May be repeated for credit.

250. Restoration and 18th-Century Literature. (4) Studies in poetry and prose of 18th-century English literature; limits of investigation set by individual instructor. May be repeated for credit.

251. Romantic Writers. (4) May be repeated for credit.

252. Victorian Literature. (4) Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. May be repeated for credit.

253. Contemporary British Literature. (4) May be repeated for credit.

254. American Literature to 1900. (4) Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. May be repeated for credit.

255. Contemporary American Literature. (4) Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. May be repeated for credit.

256. Studies in the Drama. (4) Studies in drama as a genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

257. Studies in Poetry. (4) Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. May be repeated for credit.

258. Studies in the Novel. (4) Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

259. Studies in Criticism. (4) May be repeated for credit.

260. Studies in Literature and Its Relationship to the Arts and Sciences. (4) Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. May be repeated for credit.

M260A. Topics in Asian American Literature. (4) (Same as Asian American Studies M260A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit.

261. Studies in Chicana/Chicano Literature. (4) Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerged in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit.

M262. Studies in Afro-American Literature. (4) (Same as Afro-American Studies M262.) Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

263. Celtic Literature. (4) Lecture, three hours. Preparation: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. May be repeated for credit.

264. Studies in Rhetoric. (4) Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. May be repeated for credit.

265. Postcolonial Literatures. (4) Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to the idea of imperialism, colonialism, and postcolonialism have helped to shape and have been shaped by literature in English. May be repeated for credit.

M266. Cultural World Views of Native America. (4) (Same as American Indian Studies M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

272. Current Issues in Teaching English. (4) Focus on one of a variety of topics of special current interest. May be repeated for credit.

M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4) (Same as History H298.) Topics vary according to participating faculty. May be repeated for credit.

M299. Interdisciplinary American Studies. (6) (Same as History H299.) Discussion, four hours. Readings, discussion, and papers on a common theme, taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.
Yiddish

Upper Division Courses

101A. Elementary Yiddish. (4) Lecture, four hours. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

102A-102B. Accelerated Elementary Yiddish (6-8). Lecture, five hours; laboratory, one hour. Covers material in courses 101A, 101B, 101C in two terms rather than three. P/NP or letter grading.

121C. Special Topics in Yiddish Literature in English Translation. (4) Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

131C. Special Topics in Yiddish Literature. (4) Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

199. Special Studies in Yiddish. (2 to 4) Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. P/NP or letter grading.

Graduate Courses

596. Directed Individual Study or Research in Yiddish. (4) Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research. (4 or 8) Limited to Ph.D. students unable to enroll in seminars in their fields or to students concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, this program offers a series of courses introducing the varieties of university discourse and providing instruction in basic to high-level skills. Besides courses which satisfy the University’s Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, and language and composition courses for teachers. Special programs include the First-Year Intensive Program (FIPW) and the Transfer Intensive Program (TIP).

Undergraduate Study

Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, either English Composition A or 2. Placement in these courses is determined by performance on the Subject A Examination. For more information regarding Subject A, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

ENGLISH COMPOSITION (WRITING PROGRAMS)

College of Letters and Science

UCLA

Cheryl Giuliano, Ph.D., Director
Bruce Beiderwell, Ph.D., Assistant Director

Lecturers

Kathleen Balgley, Ph.D.
Bruce Beiderwell, Ph.D.
Teddi Chichester Bonca, Ph.D.
William Creasy, Ph.D.
Lisa Gerrard, Ph.D.
Janette Lewis, Ph.D.

Rhetorical techniques and skillful argument. Analytical
1. Introduction to University Writing. (4) Lecture, three hours. Preparation: satisfaction of Subject A requirement. Enforced requisite: course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement. P/NP or letter grading.

2. Approaches to University Writing. (4) Lecture, three hours. Preparation: satisfaction of Subject A requirement. Enforced requisite: course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement. P/NP or letter grading.

3. English Composition, Rhetoric, and Language. (4) Lecture, three hours. Preparation: satisfaction of Subject A requirement. Enforced requisite: course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement. P/NP or letter grading.
Upper Division Courses

100. Interdisciplinary Academic Writing. (4) Preparation: satisfaction of Subject A and English Composition requirements. Designed for sophomores/juniors/seniors. Course in academic writing suitable for both lower and upper division students that helps them develop academic papers with a range of complexity and length. Focus on conventions of academic prose and genres across the disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay.

110W. Writing Adjunct. (4) Preparation: satisfaction of Subject A and English Composition requirements. Students must be concurrently enrolled in a course offered in conjunction with course 110W (consult Schedule of Classes for courses so designated). Writing assignments use materials from adjunct course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

120A. Language Study for Teachers: Elementary School. (4) Preparation: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature.

120C. Language Study for Teachers of Subjects Other Than English: Secondary School. (4) Preparation: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

129A-129D. Academic Writing in the Disciplines. (4) Preparation: satisfaction of Subject A and English Composition requirements. Designed for junior/senior. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discursive forms, stylistic patterns, and research practices in the given discipline. Each course may be taken independently for credit. P/NP or letter grading. 129A. Literature; 129B. Social Sciences. Lecture, three hours; discussion, one hour; 129C. Physical and Life Sciences; 129D. Fine Arts.

132A-132D. Topics in Rhetoric and Writing. (4-4-4) Preparation: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental prerequisites must take it for a letter grade. 132A. Gender and Writing; 132B. Autobiographical Writing; 132C. Cultural Studies; 132D. Variable Topics.

136A-136B. Practical Writing and Editing. (4-4) Lecture, three hours. Preparation: satisfaction of Subject A requirement, one course from 131 series. Requisite: course 3. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.

197F. Rhetoric in Modern American Culture. (4) Seminar, three hours. Requisite: course 100. One-term field studies course designed to provide students with academic background in and firsthand knowledge of media writing. P/NP or letter grading.

199W. Independent Studies in Writing. (2 to 4) Independent studies course supervised by faculty member. Fieldwork and/or internship may also be supervised by Field Studies Office or organization offering internship.

Graduate Courses

300. Teaching English. (4) Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school English curriculum. 495A-495B. Supervised Teacher Preparation (2-2). Seminar, one hour; laboratory, 30 minutes. Progress and S/U grading. 495A. Required of all applicants for a teaching assistantship in English. Practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English Composition 3 classes. 495B. Must be taken concurrently with first teaching assignment. Examination of specialized problems which occur in teaching English Composition 3 and introduction to techniques for teaching English Composition 2 and ESL. 495C. Supervised Teacher Preparation. (2) Requires: courses 495A-495B. S/U grading.
Master’s Degree
The Department of Environmental Health Sciences offers the Master of Science (M.S.) degree in Environmental Health Sciences. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission
Applicants to the M.S. program should have a bachelor’s (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

Additional admission requirements for the M.S. in Environmental Health Sciences are the same as for the M.P.H. See the M.P.H. admissions section under Public Health Schoolwide Programs.

Areas of Study
Consult the graduate adviser.

Course Requirements
Students must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Mandatory schoolwide core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived for students who have taken a similar course elsewhere and can pass the waiver examination.

Mandatory departmental core courses include Environmental Health Sciences 200A, 200B, 201, 210, 410A, 410B, M411, and 598 (a minimum of one course may be applied toward the minimum total course requirement). In addition, elective courses should be selected in the student’s area of specialization (e.g., air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, water quality). Each core course may be waived for students who have taken a similar college-level course elsewhere and can pass the waiver examination.

Only courses in which a grade of C– or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

In addition to the above course requirements, students must complete a thesis (Plan I) or a project and a comprehensive examination (Plan II).

Comprehensive Examination Plan
If the comprehensive examination/report option (Plan II) is approved, candidates complete a research activity (Environmental Health Sciences 596) of at least eight units in addition to the course requirements and prepare an in-depth written report which must be approved by the adviser and one other faculty member. A written comprehensive examination on the major area of study must be passed. The examination is prepared by a committee of at least three faculty members. If the examination is failed, students may be reexamined once.

Thesis Plan
If the thesis option (Plan I) is approved, a thesis committee of three faculty members is established. The committee approves the thesis prospectus before the students file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree
Admission
In addition to the University minimum requirements, the department requires for the Ph.D. degree in Environmental Health Sciences (1) a bachelor’s degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathemastics through calculus; (2) a master's degree in a related field with a grade-point average of at least 3.5 for graduate studies; (3) satisfactory performance on the Graduate Record Examination (GRE); and (4) a score of at least 580 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

Alternatively, for students who do not have a master's degree and wish to pursue a doctoral degree, the department requires (1) a junior/senior grade-point average of 3.25 (or other evidence of exceptional scholarship); (2) satisfactory performance on the Graduate Record Examination (GRE); (3) acceptance by a doctoral adviser in the department subsequent to filing the application for admission; and (4) a score of at least 580 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

Examinations
For students who do not have a master's degree in the field of public health, the minimum course requirements also include a full course in epidemiology, two full courses in biostatistics, and Environmental Health Sciences 200A and 200B.

Written and Oral Qualifying Examinations
Before advancement to candidacy, students must pass a written examination in the major field and the University Oral Qualifying Examination. Normally no more than one reexamination is allowed. Students must also complete the requirements in the minor field set forth by the offering department.

A doctoral committee, consisting of at least four faculty members who hold professorial appointments at UCLA, is nominated when students are ready to take the University Oral Qualifying Examination. Two of the faculty must be tenured. Three of the four must hold appointments in the Department of Environmental Health Sciences; one must be an outside member who holds an appointment in another department at UCLA; one of the four must be from the minor field.

At least two members of the doctoral committee (one from the Department of Environmental Health Sciences and one from another department) must hold the Ph.D. degree. The doctoral committee administers the oral qualifying examination after students have successfully completed the written examination, advises students on the course of study and reviews the dissertation.

After passing the University Oral Qualifying Examination, students may be advanced to candidacy and commence work on a dissertation in the principal field of study. The doctoral committee guides progress toward completion of the dissertation.

Environmental Health Sciences
Upper Division Courses
100. Introduction to Environmental Health. (4) Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants. P/NP or letter grading.
200H. Foundations of Environmental Health Sciences: Air Pollution. (1) Lecture, one hour. Preparation: one year of undergraduate biology, calculus, chemistry, and physics. Introduction to air pollution system, structure, properties, and composition of atmosphere, indoor air pollution, atmospheric lifetimes and fates of airborne chemicals, photochemical smog, greenhouse effect, stratosphere chemistry and ozone depletion. Letter grading.

200K. Foundations of Environmental Health Sciences: Water Quality. (1) Lecture, one hour. Preparation: one year of undergraduate biology, calculus, chemistry, and physics. Introduction to water cycle, hazardous and nuisance chemicals in aquatic environment, eutrophication, biodegradation in streams and lakes, water treatment, waste treatment and water reuse, and fate of hazardous chemicals in environment. Letter grading.

200N. Foundations of Environmental Health Sciences: Risk Assessment. (1) Lecture, one hour. Preparation: one year of undergraduate biology, calculus, chemistry, and physics. Use of multidisciplinary and interdisciplinary case histories to integrate information provided in courses 200C through 200N, including environmental management and policy, environmental chemistry, physical agents, microbiology, physiology, pathology, toxicology, exposure assessment, occupational health, air pollution, water quality, and risk assessment. Letter grading.

203. Seminar: Ecotoxicology. (2) Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

204. Seminar: Exposure Assessment. (2) Seminar, two hours. Discussion of various topics in exposure assessment. Topics vary by term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

205. Environmental Health Sciences Doctoral Seminar. (2) Seminar, one hour. Interaction for environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

206. Environmental Health Sciences Doctoral Seminar. (2) Seminar, one hour. Interaction for environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

207. Environmental Health Sciences Doctoral Seminar. (2) Seminar, one hour. Interaction for environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

208. Environmental Health Sciences Doctoral Seminar. (2) Seminar, one hour. Interaction for environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

209. Environmental Health Sciences Doctoral Seminar. (2) Seminar, one hour. Interaction for environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

211. Science and Politics of Environmental Regulation: Coastal Pollution — Sources and Solutions. (4) Lecture, three hours. Designed for graduate students. Overview of environmental regulations that protect coastal activities and ecosystems in areas of high human population density. Letter grading.

214. Atmospheric Transport and Transformations of Airborne Chemicals. (4) Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. S/U or letter grading.

216. Environmental Decision Systems Analysis. (4) Lecture, four hours; discussion, one hour. Requisite: course 230. Techniques and models of systems analysis and one-year of general system theory applied to comprehensive study, planning, evaluation, and management of environmental decision systems. Letter grading.

218. Critical Readings in Environmental Policy for Scientists and Engineers. (4) Lecture, one hour; discussion, three hours. Requisite: course 235. Readings from various topics in environmental policy and decision making, with emphasis on application to the environmental sciences. Letter grading.

219. Quantitative Methods for Environmental Assessment. (4) Lecture, four hours; discussion, one hour. Preparation: bachelor's degree in science, engineering, or public health, one term of statistics, one year of advanced mathematics. Introduction to quantitative methods for evaluating health effects and environmental impacts of human activities; concepts of environmental assessments and planning. Assignments include statistics analysis, risk assessment, economic methods, examples from U.S. and California regulations, policy, project environmental assessments. Letter grading.
M239. Pollution Prevention. (2) (Same as Urban Planning M262C.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. Letter grading.

240. Fundamentals of Toxicology. (4) Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on the human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Letter grading.

242. Toxicodynamics. (4) (Formerly numbered 298C.) Lecture, two hours; discussion, two hours. Requisite: course 240. Examination of biochemical, cellular, and molecular mechanisms by which chemicals induce toxicity in a wide spectrum of organ systems and in a number of pathological conditions. Letter grading.

243. Embryology and Teratology. (4) Lecture, four hours. Requisite: course 240. Description of normal mammalian embryology at whole animal, cellular, and molecular levels and of biological, chemical, or physical perturbations of normal processes which produce congenital malformations. Letter grading.

250. Introduction to Occupational Safety and Health. (4) Lecture, four hours. Scientific, legal policy, and historical issues in occupational health. Introduction to various related disciplines (e.g., occupational medicine, nursing, industrial hygiene, toxicology, epidemiology, health education). S/U or letter grading.

252D. Properties and Measurement of Airborne Particles. (4) Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. S/U or letter grading.

252E. Identification and Measurement of Gases and Vapors. (4) Lecture, three hours; discussion, one hour; other, two hours. Preparation: one year each of chemistry, physics, and calculus. Requisite: course 250. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors. Letter grading.

252F. Industrial Hygiene Measurements Laboratory. (3) Laboratory, three hours. Corequisites: courses 252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

252G. Industrial and Environmental Hygiene Assessment. (4) Lecture, one hour; discussion, two hours; laboratory, two hours; other, four hours. Requisites: courses 250, 252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.

254. Health Hazards of Industrial Processes. (4) Lecture, two hours; four field trips. Requisites: courses 250, 255. Industrial processes and operations and occupational health hazards that arise from them. S/U or letter grading.

255. Control of Airborne Contaminants in Industry. (4) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisites: courses 250, 252D. Principles and applications of control technology, including general and local exhaust ventilation, equipment, and respiratory protection. S/U or letter grading.

256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health. (4) Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.

257. Critical Review of Scientific Basis of Occupational Standards. (4) Seminar, four hours. Requisites: courses 240, 250, 251, Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to interface of science and regulatory standards. S/U or letter grading.

258. Identification and Analysis of Hazardous Wastes. (4) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisites: courses 250, 252E, Biostatistics 100A. Designed to define, identify, label, and quantify hazardous wastes and to introduce students to the problems and potential of hazardous waste utilization. Letter grading.

259D. Occupational Safety. (3) Lecture, three hours. Designed for graduate students. Design and modification of products and industrial manufacturing processes to eliminate or control hazards arising out of mechanical, electrical, thermal, chemical, and potential energy sources. Discussion of case studies in industries that may affect human health. Letter grading.

259E. Occupational Safety and Health Program Management. (4) Lecture, four hours. Designed for graduate students. Introduction to application of management principles and techniques for management of safety and health and loss control programs. Letter grading.

262. Environmental Microbiology. (4) Lecture, three hours. Preparation: one course each in microbiology and biochemistry. Basic concepts of eutrophication, indicator species, introduction to biodegradation of organic pollutants, include environmental microbiology. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. S/U or letter grading.

400. Field Studies in Environmental Health Sciences. (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.

410A. Instrumental Methods in Environmental Sciences. (4) Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.

410B. Instrumental Methods Laboratory in Environmental Health Sciences. (4) Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Preparation: one year each of physics, chemistry, and mathematics. Requisites: courses 200A, 200B. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples. Letter grading.

M411. Environmental Health Sciences Seminar. (2) (Same as Environmental Science M411.) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

461. Water Quality and Health. (4) Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B, 401. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. S/U or letter grading.

470. Environmental Hygiene Practices. (2) Lecture, two hours. Requisites: courses 200A, 200B, 230, 401. Field principles and practices of environmental sanitation as applicable to the sanitary. Topics include theory, code enforcement, and inspection procedures for applicable environmental topics areas. S/U or letter grading.

495. Teacher Preparation in Environmental Health Sciences. (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and campus director, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

506. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

507. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8) Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

508. Master's Thesis Research. (2 to 8) Tutorial, to be arranged. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

509. Doctoral Dissertation Research. (2 to 8) Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**Scope and Objectives**

The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. As the program enters its third decade, Dr. Libby’s vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 170 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and remediation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although many participating interdepartmental faculty members are from the College of Letters and Science and the School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental Health Sciences. No undergraduate major or master’s degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a strong master’s-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 24-month internship in an appropriate government agency, national laboratory, or private industry, during which in-depth study of an environmental problem leads to a dissertation.

**Graduate Study**

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

**Doctoral Degree Admission**

In addition to meeting University minimum standards, applicants to the program leading to the Doctor of Environmental Science and Engineering (D.Env.) degree must have an excellent scholastic record and must be acceptable to the admissions committee. Generally, applicants must have achieved a grade-point average of at least 3.0 in undergraduate work and 3.5 in graduate work. The overall academic record, including Graduate Record Examination (GRE) scores and Test of English as a Foreign Language (TOEFL) scores when applicable, must reflect exceptional verbal and quantitative skills and drive toward academic achievement. The program is also interested in special qualities, awards, and achievements not reflected in the student’s academic record. All applicants must file a narrative statement indicating how their professional goals can be met through the D.Env. program and submit three letters of recommendation.

In general, students entering the D.Env. program should have received a master's degree in some field of the sciences or engineering. Generalist master's degrees in such areas as environmental sciences or public health and master's degrees in the social sciences, or medical degrees may be accepted for admission if the applicant presents a record with appropriate courses in the sciences and mathe-
Environmental Science (seven courses). Courses which describe the characteristics of terrestrial, air, and water environments; the biota; the geological, biological, chemical, hydrological, and atmospheric processes of the environment; and the interrelationships between these compartments. Minimum requirements are as follows: Environmental Health Sciences 212, 225, 240, 264, an elective in environmental biology, microbiology, or ecology, an elective in environmental geology, and an elective in atmospheric sciences.

Environmental Engineering (five courses). Courses in engineering, mathematics, and the applied physical and life sciences covering topics such as modeling of environmental systems, fate and effects of environmental contaminants, design and evaluation of pollution control systems, plus courses which describe the tools and methods needed to address environmental problems, such as field and laboratory analytical methods, statistics, computer science, and advanced applied mathematics. Minimum requirements are as follows: Civil and Environmental Engineering 150, 155, and three electives.

Environmental Management, Law, and Policy (four courses). Courses which relate to the social and institutional factors relevant to environmental problem solving such as the development and implementation of regulations; dynamics of public participation; and socioeconomic analysis of current and historical trends in environmental and energy policy. Minimum requirements are as follows: Environmental Health Sciences 235, Urban Planning M264, and two electives.

Credit for Prior Work. Entering environmental science and engineering students may already have completed some of the required courses in their undergraduate and graduate work. One of the 16 required courses (including electives) can be waived based on prior coursework. Any other course requirement satisfied by previous work must be replaced with an elective in any field of environmental science and engineering that is pertinent to the goals of the student. Thus, a minimum of 15 courses must be completed after admission to the program. A minimum of 12 courses must be taken at UCLA or another University of California campus.

Environmental Science and Engineering Seminar and Effective Technical Writing Course. While completing core and breadth requirements, full-time students normally enroll in 18 units per quarter, including Environmental Science and Engineering M411 (seminar) which is required for two quarters each academic year. All students enroll in Environmental Science and Engineering 412 during the first year.

Problems Courses. Problems courses constitute intensive multidisciplinary applied team research directed toward the solution of current environmental problems. Students are required to quantify and measure necessary parameters, perform critical evaluations, edit and process technical and socioeconomic information, meet deadlines, and communicate through a final report to the competent lay person as well as to the technical specialist. Usually two or three faculty from different academic disciplines oversee a team of student researchers. Before proceeding to the problems courses, students must have completed all but six of the required courses, successfully passed all core courses taken (with grades of B– or better), and maintained a cumulative GPA of 3.0 for all classes taken after entering the program. Twenty-four quarter units of the combined Environmental Science and Engineering 400 and 410 series courses must be completed during the three quarters prior to advancement to candidacy. The requirement may be met by completing three consecutive quarters (eight units per quarter) on a single theme, or as a minimum, at least two consecutive quarters devoted to a single theme plus one quarter participation or activity approved by the faculty. Enrollment in more than one problems course per quarter is not allowed. No more than eight units of other coursework may be taken when enrolled in a problems course.

Normally, problems course credit is only earned through courses offered by the program. However, students may petition the faculty for permission to earn problems course credit through multidisciplinary environmental projects offered in other departments at UCLA.

Written and Oral Qualifying Examinations

A two-tiered examination sequence, consisting of written and oral examinations, is required for advancement to candidacy for the D.Env. degree. The examinations must be successfully completed before the internship can begin. The purpose of the examinations is to test the student’s understanding of the core and breadth areas, the master’s field, current issues in the environmental field, and subjects covered in students’ problems course experience. The written examination is administered by the core faculty of the program. The written examination may be repeated once. The University Oral Qualifying Examination is administered by the doctoral committee, a four-person faculty committee that guides students through the remainder of the program. Generally, the doctoral committee is appointed during the second year of the student’s tenure at UCLA. The oral examination may be repeated once.

Internship. After advancement to candidacy, students begin an internship in their field of interest at an outside institution. Arrangements for the internship are the students’ responsibility but program faculty assist. The institution and the nature of the appointment must be approved by the doctoral committee and the Environmental Science and Engineering Program director. Supervision during the field training experience is by the doctoral committee and the field program supervisor. A letter of agreement between UCLA and the institution is required. During each long session quarter of internship, students must register at UCLA for eight units of Environmental Health Sciences 599.

No later than nine months after advancement to candidacy, at the beginning of the internship, candidates are required to present a written
prospects of the dissertation and defend it before the doctoral committee.

Environmental Science and Engineering

Graduate Courses

400A. Environmental Science and Engineering Problems Course. (6) Discussion, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

400B. Environmental Science and Engineering Problems Course. (6) Discussion, eight hours. Required: course 400A. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

400C. Environmental Science and Engineering Problems Course. (6) Discussion, eight hours. Required: course 400A. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

400D. Environmental Science and Engineering Problems Course. (6) Discussion, eight hours. Preparation: successful completion of internship approved by doctoral committee and program director. Required: course 400C. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

410A-410B-410C. Environmental Science and Engineering Problems Course. (6) Discussion, two hours. Primarily designed for environmental science and engineering doctoral students who are conducting problems courses. Development of multidisciplinary skills essential to solution of environmental problems studied within courses 400A through 400D. Development of presentation skills. S/U grading.

M411. Environmental Health Sciences Seminar. (2-2-2) Discussion, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

412. Effective Technical Writing. (2) (Formerly numbered 298.) Lecture, one hour. Designed for environmental science and engineering doctoral students. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology which includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health Schoolwide Programs).

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of Program Requirements for UCLA Graduate Degrees. Complete, annual editions of Program Requirements are available (listed under “Publications”) on the Graduate Division website at http://www.gdbnet.ucla.edu. Students are subject to the degree requirements as published in Program Requirements for the year in which they matriculate.

Master’s Degree

The Department of Epidemiology offers the Master of Science (M.S.) degree in Epidemiology. For information on the Master of Public Health (M.P.H.) degree, see Public Health Schoolwide Programs.

Admission

Admission requirements for the M.S. in Epidemiology are the same as for the M.P.H. See the M.P.H. admission section under Public Health Schoolwide Programs.

Areas of Study

Consult the graduate adviser.
Course Requirements
Students must complete at least one year of graduate residence at the University of California and a minimum of 56 units: 38 units of core courses and 18 units of elective courses. At least 20 units must be in the 200 or 500 series. A maximum of one seminar from Epidemiology 290 (two units) or 291 (two units), and one 596 course (four units) may be applied toward the total course requirements. If students intend to write a thesis, four units of Epidemiology 598 (thesis research) may also be applied toward the 18-unit elective requirement.

Mandatory core courses are Epidemiology 200, 201A-201B, 220, 290 or 291, Biostatistics 100A or 110A, 100B or 110B; one additional statistics course (four units) in regression or multivariate methods that is approved by the Department of Epidemiology; and Biostatistics 403A or Epidemiology 410A and 410B or equivalent. Equivalent courses must be approved by the department. Each core course may be waived if a similar course has been taken elsewhere and students pass the waiver examination. A waiver course does not reduce the unit requirements. Elective courses include all those offered by the department with the exception of those stated above.

All courses included for advancement to candidacy, except Epidemiology 290 or 291, must be taken for a letter grade (not S/U). Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California. In addition, students must maintain an average of no less than 3.0 (B) in Epidemiology 200, 201A, 201B, and 220.

Comprehensive Examination Plan
If the comprehensive examination option is approved, a guidance committee of three Department of Epidemiology faculty members is appointed. A comprehensive examination on the major area of study must be passed. If failed, the examination may be repeated once.

Thesis Plan
If the thesis option is approved, a thesis committee of three faculty members is appointed by the dean of the Graduate Division on recommendation of the department. The chair of the committee and at least one other member must hold academic appointments in the Department of Epidemiology. The committee approves the thesis prospectus before students file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree Admission
In addition to the University minimum requirements, the department requires for the Ph.D. degree in Epidemiology (1) satisfactory performance on the Graduate Record Examination (GRE); (2) at least a 3.0 junior/senior grade-point average and at least a 3.5 grade-point average in graduate studies; and (3) approval by the department admissions committee, an academic adviser, and the department chair.

Major Fields or Subdisciplines
Consult the graduate adviser.

Course Requirements
Students must fulfill the course requirements for the M.S. degree in Epidemiology with an average of no less than 3.3 (B+) in Epidemiology 200, 201A-201B, and 220. Equivalent courses taken at other institutions may be used to fulfill these requirements subject to approval by the department. Continuation in the doctoral program is contingent on satisfying the 3.3 (B+) average grade-point requirement in the four core courses or their equivalent. Students must also take Epidemiology 202A, M212 or one additional statistics course beyond the M.S. requirements (four units), one course on pathobiology (four units), and at least three quarters of Epidemiology 292. The statistics and pathobiology courses must be approved by the department. In addition, students must take at least 12 units of graduate-level courses (excluding 500-level courses) outside the department, which must be selected with the approval of the academic adviser. Students with prior postbaccalaureate coursework may petition for substitution of part or all of the 12-unit requirement. Recommendation for the degree is based on the attainments of the candidate rather than on the completion of specific courses.

Written and Oral Qualifying Examinations
Before advancement to candidacy, students must pass the written doctoral examination of the Department of Epidemiology and the University of California Oral Qualifying Examination. Normally for the written doctoral examination no more than one reexamination is allowed. A doctoral committee, consisting of at least four faculty members who hold professorial appointments at UCLA, is nominated to the dean of the Graduate Division and, if approved, administers the oral qualifying examination after successful completion of the written examination. Two of the faculty must be tenured. Three of the four must hold appointments in the Department of Epidemiology; at least one must hold an appointment in another department at UCLA. After completing the course requirements and passing both the written doctoral examination and the oral qualifying examination, students may be advanced to candidacy and complete work on a dissertation in the principal field of study.

Epidemiology
Lower Division Course
88. Lower Division Seminar: Special Topics in Epidemiology. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfactory performance on Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in epidemiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

Upper Division Courses
100. Principles of Epidemiology. (4) Lecture, two hours; discussion, four hours. Preparation: one full biological sciences course. Not open for credit to students with credit for course 200. Introduction to epidemiology, including factors governing health and disease in populations. P/NP or letter grading.

199. Special Studies. (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term. P/NP or letter grading.

Graduate Courses
200. Epidemiology I. (4) Lecture, two hours; laboratory, four hours. Preparation: one full biological sciences course. Requisite: Biostatistics 100A (may be taken concurrently). Not open for credit to students with credit for course 100. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

201A-201B. Epidemiologic Methods I, II. (6-6) Lecture, four hours; discussion, two hours; outside study, 12 hours. Preparation: at least two upper division biology or social sciences courses. Recommended preparation: course 100 or 200. Requisites: Biostatistics 100A, 100B. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health. Letter grading.

202A. Epidemiology: Theory and Methodology. (4) Lecture, four hours. Requisite: course 201B. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering and seasonality; measures of effect, sources of bias, regression to the mean, estimation and hypothesis testing in epidemiology; models for risk and rates; cohort analysis. S/U or letter grading.

203. Topics in Theoretical Epidemiology. (2) Lecture, two hours. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, models specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

201. Public Health Research Using Available Data. (2) Lecture, one hour; discussion, one hour. Required: courses 100, 410A or Biostatistics 403, Biostatistics 100A. Presentations and discussions of availability, concepts, content, and usefulness of already collected data in public health research. Major emphasis on public data such as National Center for Health Statistics surveys, vital statistics, censuses, etc. S/U or letter grading.

M211. Statistics for Epidemiology. (4) (Same as Biostatistics M211.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Required: courses 201A-201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 201A-201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

M212. Statistical Modeling in Epidemiology. (4) (Formerly numbered 202B.) (Same as Biostatistics M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course 204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

220. Principles of Infectious Disease Epidemiology. (4) Lecture, three hours. Required: course 100 or 200. Ascertainment of infection, transmission, and degenerative epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. S/U or letter grading.

221. Prevalent and Emerging Infectious Diseases in the World. (4) Lecture, four hours. Required: course 100 or 200, Biostatistics 100A, 100B. Designed for graduate students and medical doctors seeking broad knowledge and detail on prevalent and emerging infectious diseases, including influenza, acute respiratory infections, choriomeningitis, tuberculosis, hepatitis B, malaria, measles, neonatal tetanus, HIV/AIDS, pertussis (whooping cough). S/U or letter grading.

222. Arthropods as Vectors of Human Diseases. (4) Lecture, four hours. Required: courses 100 or 200, 220. Comprehensive overview of morphology, systematics, natural history, host/vector/pathogen relationships, and spectrum of diseases carried by arthropods for graduate students, public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases. Letter grading.

223A. Protozoal Diseases of Man. (4) Lecture, four hours. May be taken concurrently with course 223B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of protozoa parasitic in man and animals. S/U or letter grading.

223B. Protozoal Diseases of Man. (2) Laboratory, four hours. Required: or corequisite: course 223A. Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Intestinal protozoa and organisms occurring in blood and tissues of their hosts and pathology associated with these infections. S/U or letter grading.

224A. Helminthic Diseases of Man. (4) Lecture, four hours. May be taken concurrently with course 224B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections. S/U or letter grading.

224B. Helminthic Diseases of Man. (2) Laboratory, four hours. Diagnosis and practical microscopic recognition of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections. S/U or letter grading.

M228. Biology of HIV. (4) (Same as Microbiology and Immunology M275.) Lecture, three hours. Preparation: two biology courses. Required: course 100, Biostatistics 100A. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. Letter grading.

230. Epidemiology of Sexually Transmitted Diseases. (4) Lecture, four hours. Required: course 100 or 200. Sexually transmitted diseases; medical/biologic aspects, epidemiology and control in developing and developed countries. S/U or letter grading.

240. Cardiovascular Epidemiology. (2) Lecture, two hours. Topics include definitions, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

241. Epidemiology of Neurologic Disease. (2) Lecture, two hours. Required: course 100 or 200. Epidemiologic characteristics of selected chronic neurologic diseases, with particular emphasis on etiology and possible control. S/U or letter grading.

248. Psychiatric Epidemiology. (4) Lecture, four hours. Required: course 100 or 200. Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders. Letter grading.

251. Epidemiology of Nonintentional Injuries. (4) Lecture, three hours; discussion, two hours. Required: course 100 or 200. Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders. Letter grading.

252. Epidemiology of Assault, Homicide, and Suicide. (2) Lecture, two hours; discussion, one hour. Required: course 100 or 200. Presentation and evaluation of epidemiologic research approaches to study of violent injury, including description of incidence, study design, risk factor analysis, and control evaluation. S/U or letter grading.

253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures. (2) Lecture, two hours; discussion, one hour. Required: course 100, Biostatistics 100A. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries. (2) (Same as Community Health Sciences M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.

259. Disaster Epidemiology. (2) Lecture, two hours. Required: course 100 or 200, Community Health Sciences 295. Introduction to epidemiologic methodology to study disasters and their health outcomes, including surveillance, loss estimation, risk factor assessment, intervention, and evaluation. Letter grading.

261. Occupational Epidemiology. (4) Lecture, two hours; discussion, two hours. Required: course 100 or 200. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. S/U or letter grading.

262. Seminar: Environmental and Occupational Cancer Epidemiology. (2) Seminar, two hours. Required: course 100 or 200. Discussion of examples of recent epidemiologic studies, with focus on environmental and occupational exposures, especially in areas where controversies have arisen such as for electromagnetic fields and childhood leukemia, and bladder cancer and trihalomethanes levels of drinking water. S/U or letter grading.

268. Introduction to Pharmacoeconomics. (2) Lecture, two hours. Required: course 200. Pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U or letter grading.

270. Epidemiology and Health Policy. (2) Lecture, two hours. Required: courses 100 or 201A-201B, Biostatistics 100B or 110B, Health Services 100. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators. S/U or letter grading.

280. Parasitic Diseases and Global Health. (4) Lecture, four hours. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and intervention strategies for their control. S/U or letter grading.

290. Seminar: Epidemiology — Infectious and Tropical Disease. (2) Seminar, two hours. Review of research on specific diseases of public health importance. May be repeated for credit. S/U or letter grading.

291. Seminar: Epidemiology — Methodology. (2) Seminar, two hours. Required: course 100 or 200. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

294. Epidemiology and Policy of Occupational and Environmental Health Issues. (2) Seminar, two hours. Requisite: course 100 or any other epidemiology course. Introduction to demands that go beyond "pure science," with focus on issues such as risk communication, potential influence (and ethics) of oversight panels and external review groups on presentations results and conclusions, and interest of government agencies. S/U grading.

295. Seminar: Epidemiology — Cancer. (2) Seminar, two hours. Requisite: course 100 or 200. Introduction to basic concepts of cancer epidemiology and review of current epidemiological research in cancer in recent medical and epidemiological literature. May be repeated for credit. S/U or letter grading.
