**495A-495B-495C. Resident Seminars. (6-6-6)** Seminar, four hours; site-based fieldwork, two hours. Students meet in individual sessions with instructors and other field support faculty and in team and cluster cohorts for university-school partnership, in addition to regular seminars to debrief field experiences and continue study of curriculum, instruction, and assessment issues. Research opportunities, additional methods in content areas for CLAD/BCLAD, and preparation of M.Ed. portfolio and for M.Ed. defense included. Letter grading.

**498A-498B-498C. Directed Field Experience. (2 to 8 each)** Clinic, to be arranged. Field experiences designed to increase understanding of student fields of study. S/U or letter grading.

**499A-499B-499C. Advanced Directed Field Experience. (4 to 8 each)** May be repeated for credit.

**501. Cooperative Program in Special Education. (2 to 8)** Preparation: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Independent Study. (6 to 12)** Individual study or research for graduate students. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations. (6 to 12)** Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

**598. Thesis Research. (6 to 12)** Research for and preparation of master's thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Dissertation Research. (6 to 12)** Research for and preparation of doctoral dissertation. May be repeated for credit. S/U grading.

### Professors

Asad A. Abidi, Ph.D.  
Abeer A.H. Alwan, Ph.D.  
A.V. Balakrishnan, Ph.D.  
Elliott R. Brown, Ph.D.  
Frank M.C. Chang, Ph.D.  
Harold R. Fetterman, Ph.D.  
Michael P. Fitz, Ph.D.  
Warren S. Grundfest, M.D., FACS  
Tatsuo Itoh, Ph.D. (*TRW Professor of Electrical Engineering*)  
Stephen E. Jacobsen, Ph.D., *Associate Dean*  
Rajeev Jain, Ph.D.  
Bahram Jalali, Ph.D.  
Chandrashekhara J. Joshi, Ph.D.  
William J. Kaiser, Ph.D.  
Nhan N. Levan, Ph.D.  
Jia-Ming Liu, Ph.D.  
Warren B. Mori, Ph.D.  
Dee-Son Pan, Ph.D.  
C. Kumar N. Patel, Ph.D.  
Gregory J. Pottier, Ph.D.  
Yahya Rahmat-Samii, Ph.D.  
Behzad Razavi, Ph.D.  
Vwani P. Roychowdhury, Ph.D.  
Izhak Rubin, Ph.D.  
Henry Samueli, Ph.D.  
Ali H. Sayed, Ph.D.  
Oscar M. Stafsudd, Jr., Ph.D.  
John D. Villasenor, Ph.D.  
Chand R. Viswanathan, Ph.D.  
Kang L. Wang, Ph.D.  
Paul K.C. Wang, Ph.D.  
Alan N. Willson, Jr., Ph.D.  
Jason C.S. Woo, Ph.D.  
Ming C. Wu, Ph.D.  
Eli Yablonovitch, Ph.D.  
Kung Yao, Ph.D.

### Professors Emeriti

Frederick G. Allen, Ph.D.  
Francis F. Chen, Ph.D.  
Robert S. Elliott, Ph.D.  
Richard E. Mortensen, Ph.D.  
H.J. Orchard, M.Sc.  
Frederick W. Schott, Ph.D.  
Gabor C. Temes, Ph.D.  
Donald M. Wiberg, Ph.D.  
Jack Willis, B.Sc.

### Associate Professors

Babak Daneshrad, Ph.D.  
William H. Mangione-Smith, Ph.D.  
Fernando G. Paganini, Ph.D.  
Mani B. Srivastava, Ph.D.

Lieven Vandenberghe, Ph.D.  
Ingrid M. Verbauwhede, Ph.D.  
Richard D. Wesel, Ph.D.

#### Assistant Professors

Lei He, Ph.D.  
Jack W. Judy, Ph.D.  
Yuanxun (Ethan) Wang, Ph.D.  
C.-K. Ken Yang, Ph.D.

#### Adjunct Professors

Nicolaos G. Alexopoulos, Ph.D.  
Donald Arnush, Ph.D.  
Giorgio Franceschetti, Ph.D.  
Paul T. Greiling, Ph.D.  
Brian H. Kolner, Ph.D.  
Neville C. Luhmann, Jr., Ph.D.  
Joel Schulman, Ph.D.  
Pyotr Y. Ufimtsev, Ph.D.

#### Adjunct Associate Professors

Bijan Houshmand, Ph.D.  
Kenneth W. Iliff, Ph.D.

#### Adjunct Assistant Professors

Charles Chien, Ph.D.  
Robert J. Greenberg, Ph.D.

## Scope and Objectives

The Electrical Engineering Department emphasizes teaching and research in the fields of communications and telecommunications, control systems, electromagnetics, engineering optimization/operations research, integrated circuits and systems, photonics and optoelectronics, plasma electronics, signal processing, and solid-state electronics. In each of these fields, the department has state-of-the-art research programs exploring exciting new concepts and developments. Undergraduate students receive a B.S. degree in Electrical Engineering. Graduate research and training programs leading to the M.S. and Ph.D. degrees are also offered.

Laboratories are available for research in the following areas: analog and digital electronics, VLSI circuits, integrated semiconductor devices, microwave and millimeter wave electronics, solid-state electronics, fiber optics, lasers and quantum electronics, and plasma electronics. The department is associated with the Center for High-Frequency Electronics and the Plasma Science and Technology Institute, two research centers at UCLA.

## Undergraduate Study

### Electrical Engineering B.S.

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that students develop expertise in it.

#### The Major

Course requirements are as follows (190 minimum units required):

1. One engineering breadth course from Materials Science and Engineering 14, Me-

chanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A)

2. Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 115A, 115AL, 121B, 131A, 132A, 141, 161, 172, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A
3. Any five major field elective courses selected from those offered by the Electrical Engineering Department, including at minimum 4 units of laboratories and one design course. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments
4. Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31, 32; Electrical Engineering 1, 2; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing one course from Engineering 95 or 194 or 195, which may be applied toward either the humanities or social sciences section of the GE requirements

### Biomedical Engineering Option

Course requirements are as follows (201 minimum units required):

1. Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 114D, 115A, 115AL, 121B, 131A, 132A, 141, 161, Mathematics 113 or 132, Mechanical and Aerospace Engineering 103, M105A, 192A
2. Life Sciences 1 (satisfies HSSEAS GE life sciences requirement), 2, 3
3. Three technical electives, including one course selected from Electrical Engineering 115B, 115C, 142, 172; the remaining two courses may be selected from the above list and/or from Biomedical Engineering C101, CM102, CM103, Computer Science M196B, CM196L, Electrical Engineering 176
4. Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL; Computer Science 31; Electrical Engineering 1, 2; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing one course from Engineering 95 or 194 or 195, which may be applied toward either the humanities or

social sciences section of the GE requirements

### Computer Engineering Option

Course requirements are as follows (190 minimum units required):

1. One engineering breadth course from Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A)
2. Computer Science 111, 180, Electrical Engineering 10, M16 (or Computer Science M51A), 101, 102, 103, 110, 110L, 113, 115A, 115AL, 115C, M116C (or Computer Science M151B), M116D (or Computer Science M152B), M116L (or Computer Science M152A), 121B, 131A, Mathematics 113 or 132, Mechanical and Aerospace Engineering 192A
3. Four technical elective courses, one of which must be Electrical Engineering 132A or either Computer Science 118 or Electrical Engineering 132B. The remaining three courses must be upper division electrical engineering or computer science courses, and at least three of the four must be from the Electrical Engineering Department
4. Chemistry and Biochemistry 20A; Computer Science 31, 32, 33; Electrical Engineering 1, 2; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 4AL, 4BL
5. HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details. Electrical Engineering majors are also required to satisfy the ethics and professionalism requirement by completing one course from Engineering 95 or 194 or 195, which may be applied toward either the humanities or social sciences section of the GE requirements

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Electrical Engineering offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Electrical Engineering.

# Electrical Engineering

## Lower Division Courses

**1. Electrical Engineering Physics I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Mathematics 32A, 32B, Physics 1A, 1B. Introduction to modern physics and electromagnetism with an engineering orientation. Emphasis on mathematical tools necessary to express and solve Maxwell equations. Relation of these concepts to waves propagating in free space, including dielectrics and optical systems. Letter grading.

**2. Physics for Electrical Engineers. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 1. Introduction to modern physics necessary to understand solid-state devices, including elementary quantum theory, Fermi energies, and concept of electrons in solids. Derivation of electrical properties of holes and junctions. Letter grading.

**10. Circuit Analysis I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 1 or Physics 1C. Corequisite: Mathematics 33A. Introduction to linear circuit analysis. Resistive circuits, Kirchhoff laws, operational amplifiers, node and loop analysis, Thevenin and Norton theorem, capacitors and inductors, duality, first-order circuits, step response, second-order circuits, natural response, forced response. Letter grading.

**M16. Logic Design of Digital Systems. (4)** (Same as Computer Science M51A.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisite: Physics 1C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information. Letter grading.

## Upper Division Courses

**100. Electrical and Electronic Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 1 or Physics 1C, Mathematics 33A, 33B. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers. Letter grading.

**101. Engineering Electromagnetics. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 1 or Physics 1C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts, waves and phasors, transmission lines and Smith chart, transient responses, vector analysis, introduction to Maxwell equations, static and quasi-static electric and magnetic fields. Letter grading.

**102. Systems and Signals. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 1 or Physics 1C, Mathematics 33A, 33B. Elements of differential equations, first- and second-order equations, variation of parameters method and method of undetermined coefficients, existence and uniqueness. Systems: input/output description, linearity, time-invariance, and causality. Impulse response functions, superposition and convolution integrals. Laplace transforms and system functions. Fourier series and transforms. Frequency responses, responses of systems to periodic signals. Sampling theorem. Letter grading.

**103. Applied Numerical Computing. (4)** Lecture, three hours; discussion, one hour; outside study, 11 hours. Requisites: course 5C or Computer Science 31 or Civil Engineering 15 or Mechanical and Aerospace Engineering 20, Mathematics 33B. Introduction to numerical analysis and computing techniques: root finding, matrix computations for systems of linear equations, systems of nonlinear equations, numerical methods for ordinary differential equations, least squares, eigenvalue/eigenvector problem, applications to engineering problems. Letter grading.

**110. Circuit Analysis II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 10. Corequisite: course 102. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis. Letter grading.

**110L. Circuit Measurements Laboratory. (2)** Laboratory, four hours; outside study, two hours. Requisite: course 10 or 100. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm's law, voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles. Letter grading.

**113. Digital Signal Processing. (4)** Lecture, three hours; discussion, one hour; outside study, nine hours. Requisites: courses 102, 110. Relationship between continuous-time and discrete-time signals. Z-transform. Discrete Fourier transform. Fast Fourier transform. Structures for digital filtering. Introduction to digital filter design techniques. Letter grading.

**113L. Digital Signal Processing Laboratory. (2)** Laboratory, four hours; outside study, two hours. Requisite: course 113. Recommended: Computer Science M151B. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects. Letter grading.

**114D. Speech and Image Processing Systems Design. (4)** (Formerly numbered 114.) Lecture, three hours; discussion, one hour; laboratory, two hours; outside study, six hours. Requisite: course 113. Design principles of speech and image processing systems. Speech production, analysis, and modeling in first half of course; design techniques for image enhancement, filtering, and transformation in second half. Lectures supplemented by laboratory implementation of speech and image processing tasks. Letter grading.

**115A. Analog Electronic Circuits I. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 110. Review of physics and operation of diodes and bipolar and MOS transistors. Equivalent circuits and models of semiconductor devices. Analysis and design of single-stage amplifiers. DC biasing circuits. Small-signal analysis. Operational amplifier systems. Letter grading.

**115AL. Analog Electronics Laboratory I. (2)** Laboratory, four hours; outside study, two hours. Requisites: courses 110L, 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers. Letter grading.

**115B. Analog Electronic Circuits II. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 115A. Analysis and design of differential amplifiers in bipolar and CMOS technologies. Current mirrors and active loads. Frequency response of amplifiers. Feedback and its properties. Stability issues and frequency compensation. Letter grading.

**115BL. Analog Electronics Laboratory II. (4)** Laboratory, four hours; outside study, eight hours. Requisites: courses 115AL, 115B. Experimental and computer studies of multistage, wideband, tuned, and power amplifiers, and multiloop feedback amplifiers. Introduction to thick film hybrid techniques. Construction of amplifier using hybrid thick film techniques. Letter grading.

**115C. Digital Electronic Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 115A, Computer Science M51A. Recommended: courses 115B, 121A. Transistor-level digital circuit analysis and design. Modern logic families (TTL, ECL, NMOS, CMOS), integrated circuit (IC) layout, MSI digital circuits (flipflops, registers, counters, PLAs, etc.), computer-aided simulation of digital circuits. Letter grading.

**115D. Design Studies in Electronic Circuits. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 115B, 115C. Applications of distributed circuits. Operational amplifier applications and limitations. Power amplifiers. Feedback and stability. Precision analog circuits. Analysis and design of operational amplifiers. Noise in electronic circuits. Design of oscillators, phase-locked loops, and frequency synthesizers. Introduction to design of analog-to-digital and digital-to-analog converters. Letter grading.

**116B. VLSI System Design. (4)** Lecture, three hours; discussion, one hour; laboratory, four hours; outside study, four hours. Requisites: courses M16, 115C, and 113L or M116D. Familiarity with digital circuit, logic design, and computer architecture assumed. VLSI design from a systems perspective, with focus on (1) core VLSI architecture concepts such as datapath design, clocking, power, speed, area trade-off, input/output, packaging, etc. and (2) behavioral, register-transfer, logic, and physical-level structured VLSI design using CAD tools and hardware description languages such as VHDL. Letter grading.

**M116C. Computer Systems Architecture. (4)** (Same as Computer Science M151B.) Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: course M16 or Computer Science M51A, Computer Science 33. Recommended: course M116L or Computer Science M152A, Computer Science 111. Computer system organization and design, implementation of CPU datapath and control, instruction set design, memory hierarchy (caches, main memory, virtual memory) organization and management, input/output subsystems (bus structures, interrupts, DMA), performance evaluation, pipelined processors. Letter grading.

**M116D. Digital Design Project Laboratory. (4)** (Same as Computer Science M152B.) Laboratory, four hours; discussion, two hours; outside study, six hours. Requisite: course M116C or Computer Science M151B. Design and implementation of complex digital subsystems using field-programmable gate arrays (e.g., processors, special-purpose processors, device controllers, and input/output interfaces). Students work in teams to develop and implement designs and to document and give oral presentations of their work. Letter grading.

**M116L. Introductory Digital Design Laboratory. (2)** (Same as Computer Science M152A.) Laboratory, four hours; outside study, two hours. Requisite: course M16 or Computer Science M51A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects. Letter grading.

**121A. Physical Principles of Semiconductor Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 2 or Physics 1C, Materials Science 14. Introduction to physics of semiconductors; survey of equilibrium and nonequilibrium electronic processes in semiconductors; principles of operation and design of p-n junction devices. Fabrication of semiconductor devices. Letter grading.

**121B. Principles of Semiconductor Device Design. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 121A. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations. Letter grading.

**122AL. Semiconductor Devices Laboratory. (5)** Lecture, four hours; laboratory, four hours; outside study, seven hours. Requisites: courses 2, 121B (may be taken concurrently). Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography. Letter grading.

**123A. Fundamentals of Solid-State I. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 2 or Physics 1C. Limited to junior/senior engineering majors. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties. Letter grading.

**123B. Fundamentals of Solid-State II. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties. Letter grading.

**124. Semiconductor Physical Electronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 123A. Band structure of semiconductors, experimental probes of basic band structure parameters, statistics of carriers, carrier transport properties at low fields, excess carrier transport properties, carrier recombination mechanisms, heterojunction properties. Letter grading.

**129D. Semiconductor Processing and Device Design. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 121A, 121B. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool is based on PISCES; process integration tool is based on SUPREM. Course familiarizes students with the tools. Using CAD tools, a CMOS process integration to be designed. Letter grading.

**131A. Probability. (4)** Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisites: course 102, Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random events. Letter grading.

**131B. Introduction to Stochastic Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Introduction to concepts of stochastic processes, emphasizing continuous- and discrete-time stationary processes, correlation function and spectral density, linear transformation, and mean-square estimation. Applications to communication, control, and signal processing. Introduction to computer simulation and analysis of stochastic processes. Letter grading.

**132A. Introduction to Communication Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 102, 131A. Properties of signals and noise. Baseband pulse and digital signaling. Bandpass signaling techniques. Communication systems: digital transmission, frequency-division multiplexing and telephone systems, satellite communication systems. Performance of communication systems in presence of noise. Letter grading.

**132B. Data Communications and Telecommunication Networks. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Layered communications architectures. Queueing system modeling and analysis. Error control, flow and congestion control. Packet switching, circuit switching, and routing. Network performance analysis and design. Multiple-access communications: TDMA, FDMA, polling, random access. Local, metropolitan, wide area, integrated services networks. Letter grading.

**136. Introduction to Engineering Optimization Techniques. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 103, Mathematics 32A, 33A. Introduction to optimization techniques for engineering and science students. Minimization of unconstrained functions of several variables: steepest descent, Newton/Raphson, conjugate gradient, and quasi-Newton methods. Rates of convergence. Methods for constrained minimization: introduction to linear programming and gradient projection methods. Lagrangian methods. Students expected to use HSEASnet computers. Letter grading.

**141. Principles of Feedback Control. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 102. Mathematical modeling of physical control systems in form of differential equations and transfer functions. Design problems, system performance indices of feedback control systems via classical techniques, root-locus and frequency-domain methods. Computer-aided solution of design problems from real world. Letter grading.

**142. Linear Systems: State-Space Approach. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 102. State-space methods of linear system analysis and synthesis, with application to problems in networks, control, and system modeling. Letter grading.

**150DL. Photonic Sensor Design Laboratory. (4)** Lecture, two hours; laboratory, four hours; outside study, eight hours. Limited to seniors. Multidisciplinary course with lectures and laboratory experiments on optical sensors. Fundamentals of intensity and interference-based transducers, polarimeters, multiplexing and sensor networks, physical and biomedical sensors. Design and implementation of optical gyroscope, computer interfacing, and signal processing. Letter grading.

**M150L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (4)** (Formerly numbered 151A.) (Same as Biomedical Engineering M150L and Mechanical and Aerospace Engineering M180L.) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisites: course 1 or Physics 1C, Chemistry 20A. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce a variety of MEMS, including microstructures, micro-sensors, and microactuators. Students fabricate set of basic MEMS structures in hands-on microfabrication laboratory. Letter grading.

**151DL. Microelectromechanical Systems Design. (4)** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisites: courses 115A, 115B. Microelectromechanical systems design, combining lecture and laboratory instruction on microsensor and microactuator fundamental operating principles and high-resolution electronic measurement methods for transducers. Emphasis on design of transducers and interface systems using device and system-level tools. Letter grading.

**161. Electromagnetic Waves. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 101. Time-varying fields and Maxwell equations, plane wave propagation and interaction with media, energy flow and Poynting vector, guided waves in waveguides, phase and group velocity, radiation and antennas. Letter grading.

**162A. Wireless Communication Links and Antennas. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 161. Basic properties of transmitting and receiving antennas and antenna arrays. Array synthesis. Adaptive arrays. Friis transmission formula, radar equations. Cell-site and mobile antennas, bandwidth budget. Noise in communication systems (transmission lines, antennas, atmospheric, etc.). Cell-site and mobile antennas, cell coverage for signal and traffic, interference, multipath fading, ray bending, and other propagation phenomena. Letter grading.

**163A. Introductory Microwave Circuits. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 161. Transmission lines description of waveguides, impedance transformers, power dividers, directional couplers, filters, hybrid junctions, nonreciprocal devices. Letter grading.

**163B. Microwave and Millimeter Wave Active Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: courses 121A, 121B. MESFET, HEMT, HBT, IMPATT, Gunn, small signal models, noise model, large signal model, load-pull method, parameter extraction technique. Letter grading.

**163C. Active Microwave Circuits. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 115A, 161. Theory and design of microwave transistor amplifiers and oscillators; stability, noise, distortion. Letter grading.

**164AL. Microwave Wireless Laboratory I. (2)** Lecture, one hour; laboratory, three hours; outside study, three hours. Requisite: course 161. Measurement techniques and instrumentation for active and passive microwave components; cavity resonators, waveguides, wavemeters, slotted lines, directional couplers. Design, fabrication, and characterization of microwave circuits in microstrip and coaxial systems. Letter grading.

**164DL. Microwave Wireless Laboratory II. (2)** (Formerly numbered 164BL.) Lecture, one hour; laboratory, two hours; outside study, three hours. Requisite: course 161. Microwave integrated circuit design from a wireless system perspective, with focus on (1) use of microwave circuit simulation tools, (2) design of wireless frontend circuits including low noise amplifier, mixer, and power amplifier, (3) knowledge and skills required in wireless integrated circuit characterization and implementation. Letter grading.

**M171L. Data Communication Systems Laboratory. (2 to 4)** (Same as Computer Science M171L.) Laboratory, four to eight hours; outside study, two to four hours. Recommended preparation: course M116L, Computer Science 171. Limited to seniors. Interpretation of analog-signaling aspects of digital systems and data communications through experience in using contemporary test instruments to generate and display signals in relevant laboratory setups. Use of oscilloscopes, pulse and function generators, baseband spectrum analyzers, desktop computers, terminals, modems, PCs, and workstations in experiments on pulse transmission impairments, waveforms and their spectra, modem and terminal characteristics, and interfaces. Letter grading.

**172. Introduction to Lasers and Quantum Electronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Physical applications and principles of lasers, Gaussian optics, resonant cavities, atomic radiation, laser oscillation and amplification, cw and pulsed lasers. Letter grading.

**172L. Laser Laboratory. (4)** Laboratory, four hours; outside study, eight hours. Requisite or corequisite: course 172. Properties of lasers, including saturation, gain, mode structure. Laser applications, including optics, modulation, communication, holography, and interferometry. Letter grading.

**173. Photonic Devices. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Introduction to basic principles of photonic devices. Topics include crystal optics, dielectric optical waveguides, waveguide couplers, electro-optic devices, magneto-optic devices, acousto-optic devices, second-harmonic generation, optical Kerr effect, optical switching devices. Letter grading.

**173DL. Photonics and Communication Design Laboratory. (4)** (Formerly numbered 173L.) Laboratory, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 132A. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Modulation techniques, including A.M., F.M., phase and suppressed carrier methods. Letter grading.

**174. Semiconductor Optoelectronics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 172. Introduction to semiconductor optoelectronic devices for optical communications, interconnects, and signal processing. Basic optical properties of semiconductors, pin photodiodes, avalanche photodiode detectors (APD), light-emitting diodes (LED), semiconductor lasers, optical modulators and amplifiers, and typical photonic systems. Letter grading.

**175. Fourier Optics. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: courses 102, 161. Two-dimensional linear systems and Fourier transforms. Foundation of diffraction theory. Analysis of optical imaging systems. Spatial filtering and optical information processing. Wavefront reconstruction and holography. Letter grading.

**176. Lasers in Biomedical Applications. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 101. Study of different types of laser systems and their operation. Examination of their roles in current and projected biomedical applications. Specific capabilities of laser radiation to be related to each example. Letter grading.

**M185. Introduction to Plasma Electronics. (4)** (Same as Physics M122.) Lecture, three hours. Requisite: course 101 or Physics 110A. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

**190D. Systems Design. (4)** Lecture, two hours; discussion, two hours; outside study, eight hours. Limited to senior Electrical Engineering majors. Advanced systems design integrating communications, control, and signal processing subsystems. Different project to be assigned yearly in which student teams create high-performance designs that manage trade-offs among subsystems. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only 2 units may be applied toward degree; the 2 units must be approved by petition and can be used only as a replacement for a regular electrical engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree. Letter grading.

## Graduate Courses

**201A. VLSI Architectures and Design Methodologies. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M216A or Computer Science M258A. In-depth study of VLSI architectures and VLSI design methodologies for variety of applications in signal processing, communications, networking, embedded systems, etc. VLSI architectures choices range from ASICs, full custom approach, and special purpose processors to general purpose microprocessors. VLSI design methodologies take design specifications to implementation with aid of modern computer-aided design tools. Letter grading.

**202A. Embedded and Real-Time Systems. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. Methodologies and technologies for behavioral synthesis, system synthesis, and real-time issues in embedded systems. Topics include behavioral synthesis, hardware/software codesign, interface synthesis, scheduling, real-time constraints, real-time specification and modeling, transformation and estimations during synthesis and design optimization, concurrency, real-time OS, and embedded processors. Design for low power, verification, and debugging. Letter grading.

**204A. Advanced Compilers. (4)** Lecture, four hours; outside study, eight hours. Requisites: Computer Science 132, 251A. Designed for graduate computer science and electrical engineering students. Efficient allocating of shared resources (buses, function units, register files) is one of most important areas of research in modern computer architecture and compilation research. Consideration of instruction selection and scheduling, register assignment, and low-level transformation in context of concurrent microarchitecture (e.g., VLIW, superscalar, and most DSP). Topics include mapping to specific introprocessor communications buses, making effective use of hardware caches, and targeting special-purpose function units. Letter grading.

**206A. Mobile and Wireless Networked Computing Systems. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate computer science and electrical engineering students. Interdisciplinary course covering mobile computing, wireless networking, and multimedia processing techniques for computing systems capable of ubiquitous transport and processing of multimedia information. Topics include wireless and cellular fundamentals, network mobility management, low-power portable node architecture, mobile IP, wireless TCP, middleware and operating system issues, and context-aware adaptive applications. Letter grading.

**M208A. Analytical Methods of Engineering I. (4)** (Same as Mechanical and Aerospace Engineering M291A.) Lecture, four hours; outside study, eight hours. Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering. Letter grading.

**M208B. Analytical Methods of Engineering II. (4)** (Same as Mechanical and Aerospace Engineering M291B.) Lecture, four hours; outside study, eight hours. Requisite: course M208A or Mechanical and Aerospace Engineering M291A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems. Letter grading.

**208C. Semigroups of Linear Operators and Applications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M208B. Semigroups of linear operators over Hilbert spaces. Generator and resolvent, generation theorems, Laplace inversion formula. Dissipative operators and contraction semigroups. Analytic semigroups and spectral representation. Semigroups with compact resolvents. Parabolic and hyperbolic systems. Controllability and stabilizability. Applications. Letter grading.

**209S. Special Topics in Embedded Computing Systems. (4)** Lecture, four hours; outside study, eight hours. Current topics in embedded computing systems, including but not limited to processor and system architecture, real-time, low-power design. S/U or letter grading.

**210A. Adaptive Filtering. (4)** (Formerly numbered 210.) Lecture, four hours; outside study, eight hours. Requisites: courses 113, 131B, Mathematics 115A. Optimal filtering and estimation, Wiener filters, linear prediction. Steepest descent and stochastic gradient algorithms. Frequency-domain adaptive filters. Method of least squares, recursive least squares, fast fixed-order and order-recursive (lattice) filters. Misadjustment, convergence, and tracking analyses, stability issues, finite precision effects. Connections with Kalman filtering. Nonlinear adaptive filters. Letter grading.

**210B. Optimal Linear Estimation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 113, 131B, 210A, Mathematics 115A. Unified treatment of fundamental concepts and basic notions in adaptive filtering, Wiener filtering, Kalman filtering, and  $H_\infty$  filtering. Emphasis on geometric, equivalence, and duality arguments. Development of array methods and fast algorithms. Discussion of practical issues. Examples of applications from fields of signal processing, communications, biomedical engineering, finance, and control. Letter grading.

**211A. Digital Image Processing I. (4)** Lecture, three hours; laboratory, four hours; outside study, five hours. Preparation: computer programming experience. Requisite: course 113. Fundamentals of digital image processing theory and techniques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture applied in computer laboratory assignments. Letter grading.

**211B. Digital Image Processing II. (4)** Lecture, three hours; laboratory, four hours; outside study, five hours. Requisite: course 211A. Advanced digital image processing theory and techniques. Topics include modeling, restoration, still-frame and video image compression, tomographic imaging, and multiresolution analysis using wavelet transforms. Letter grading.

**212A. Theory and Design of Digital Filters. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 113. Approximation of filter specifications. Use of design charts. Structures for recursive digital filters. FIR filter design techniques. Comparison of IIR and FIR structures. Implementation of digital filters. Limit cycles. Overflow oscillations. Discrete random signals. Wave digital filters. Letter grading.

**212B. Multirate Systems and Filter Banks. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 212A. Fundamentals of multirate systems; polyphase representation; multistage implementations; applications of multirate systems; maximally decimated filter banks; perfect reconstruction systems; paraunitary filter banks; wavelet transform and its relation to multirate filter banks. Letter grading.

**213A. Advanced Digital Signal Processing Circuit Design. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 212A, M216A. Digital filter design and optimization tools, architectures for digital signal processing circuits; integrated circuit modules for digital signal processing; programmable signal processors; CAD tools and cell libraries for application-specific integrated circuit design; case studies of speech and image processing circuits. Letter grading.

**M214A. Digital Speech Processing. (4)** (Formerly numbered 214A.) (Same as Biomedical Engineering M214A.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 113. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter-bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids. Letter grading.

**214B. Advanced Topics in Speech Processing. (4)** Lecture, three hours; computer assignments, two hours; outside study, seven hours. Requisite: course M214A. Advanced techniques used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and psychoacoustics of human perception. Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and search algorithms. Aids for hearing impaired. Letter grading.

**215A. Analog Integrated Circuit Design. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 115B. Analysis and design of analog integrated circuits. MOS and bipolar device structures and models, single-stage and differential amplifiers, noise, feedback, operational amplifiers, offset and distortion, sampling devices and discrete-time circuits, bandgap references. Letter grading.

**215B. Advanced Digital Integrated Circuits. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 115C, M216A. Analysis and comparison of modern logic families (CMOS, bipolar, BiCMOS, GaAs). MSI digital circuits (flipflops, registers, counters, PLAs). VLSI memories (ROM, RAM, CCD, bubble memories, EPROM, EEPROM) and VLSI systems. Letter grading.

**215C. Analysis and Design of RF Circuits and Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 215A. Principles of RF circuit and system design, with emphasis on monolithic implementation in VLSI technologies. Basic concepts, communications background, transceiver architectures, low-noise amplifiers and mixers, oscillators, frequency synthesizers, power amplifiers. Letter grading.

**215D. Analog Microsystem Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 215A. Analysis and design of data conversion interfaces and filters. Sampling circuits and architectures, D/A conversion techniques, A/D converter architectures, building blocks, precision techniques, discrete- and continuous-time filters. Letter grading.

**215E. Signaling and Synchronization. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 215A, M216A. Analysis and design of circuits for synchronization and communication for VLSI systems. Use of both digital and analog design techniques to improve data rate of electronics between functional blocks, chips, and systems. Advanced clocking methodologies, phase-locked loop design for clock generation, and high-performance wire-line transmitters, receivers, and timing recovery circuits. Letter grading.

**M216A. LSI in Computer System Design. (4)** (Same as Computer Science M258A.) Lecture, four hours; laboratory, four hours. Limited to graduate computer science and electrical engineering students. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip. Letter grading.

**M216B-M216C. LSI in Computer System Design. (4-4)** (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Requisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress and S/U or letter grading.

**M217. Biomedical Imaging. (4)** (Same as Biomedical Engineering M217.) Lecture, three hours; laboratory, two hours; outside study, seven hours. Requisite: course 114D or 211A. Mathematical principles of medical imaging modalities: X-ray, computed tomography, positron emission tomography, single photon emission computed tomography, magnetic resonance imaging. Topics include basic principles of each imaging system, image reconstruction algorithms, system configurations and their effects on reconstruction algorithms, specialized imaging techniques for specific applications such as flow imaging. Letter grading.

**219A. Special Topics in Circuits and Signal Processing. (4)** Lecture, three hours; outside study, nine hours. Advanced treatment of topics selected from research areas in circuit theory, integrated circuits, or signal processing. Letter grading.

**221A. Physics of Semiconductor Devices I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Physical principles and design considerations of junction devices. Letter grading.

**221B. Physics of Semiconductor Devices II. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Principles and design considerations of field effect devices and charge-coupled devices. Letter grading.

**221C. Microwave Semiconductor Devices. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 121A. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors. Letter grading.

**222. Integrated Circuits Fabrication Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 2. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools. Letter grading.

**223. Solid-State Electronics I. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 124, 270. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Recombination mechanisms, transport properties. Letter grading.

**224. Solid-State Electronics II. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties. Letter grading.

**225. Superlattices and Quantum Wells. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, transistors, and detectors. Letter grading.

**229. Seminar: Advanced Topics in Solid-State Electronics. (4)** Seminar, four hours; outside study, eight hours. Requisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission. Letter grading.

**229S. Advanced Electrical Engineering Seminar. (2)** Seminar, two hours; outside study, six hours. Preparation: successful completion of Ph.D. major field examination. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. S/U grading.

**230A. Estimation and Detection in Communication and Radar Engineering. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Applications of estimation and detection concepts in communication and radar engineering; random signal and noise characterizations by analytical and simulation methods; mean square (MS) and maximum likelihood (ML) estimations and algorithms; detection under ML, Bayes, and Neyman/Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations. Letter grading.

**230B. Digital Communication Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 230A. Basic concepts of digital communication systems; representation of bandpass waveforms; signal space analysis and optimum receivers in Gaussian noise; comparison of digital modulation methods; synchronization and adaptive equalization; applications to modern communication systems. Letter grading.

**230C. Algorithms and Processing in Communication and Radar. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230A. Concepts and implementations of digital signal processing algorithms in communication and radar systems. Optimum dynamic range scaling for random data. Algorithms for fast convolution and transform. Spectral estimation algorithms. Parallel processing, VLSI algorithms, and systolic arrays. Letter grading.

**230D. Signal Processing in Communications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230C. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Optimization of dynamic range, quantization, and state constraints; DFT, convolution, FFT, NTT, Winograd DFT, systolic array; spectral analysis-windowing, AR, and ARMA; system applications. Letter grading.

**231A. Information Theory: Channel and Source Coding. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Fundamental limits on compression and transmission of information. Topics include limits and algorithms for lossless data compression, channel capacity, rate versus distortion in lossy compression, and information theory for multiple users. Letter grading.

**231E. Channel Coding Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Fundamentals of error control codes and decoding algorithms. Topics include block codes, convolutional codes, trellis codes, and turbo codes. Letter grading.

**232A. Stochastic Modeling with Applications to Telecommunication Systems. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisite: course 131A. Introduction to stochastic processes as applied to study of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queueing analysis of basic telecommunication system models. Letter grading.

**232B. Telecommunication Switching and Queueing Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, busy period, blocking, and stochastic process analysis for Markovian and non-Markovian models. Letter grading.

**232C. Telecommunication Architecture and Networks. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queueing networks; network protocol architectures; error control; routing, flow, and access control. Applications to local-area, packet-radio, satellite, and computer communication networks. Letter grading.

**232D. Telecommunication Networks and Multiple-Access Communications. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include architectures, multiplexing and multiple-access, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks. Letter grading.

**232E. Graphs and Network Flows. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 136. Solution to analysis and synthesis problems which may be formulated as flow problems in capacity constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transmission problems. Letter grading.

**233A. Wireless Communication Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230B. Discussion of theory of physical layer and medium access design for wireless communications. Topics include wireless signal propagation and channel modeling, information theoretic studies of wireless models, performance analysis, single carrier and spread spectrum modulation for wireless systems, diversity techniques, multiple-access schemes. Letter grading.

**233B. Wireless Communications Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 230B. Various aspects of physical layer and medium access design for wireless communications systems. Topics include wireless signal propagation and channel modeling, single carrier and spread spectrum modulation for wireless systems, diversity techniques, multiple-access schemes, transceiver design and effects of nonideal components, hardware partitioning issues. Case study highlights system level trade-offs. Letter grading.

**236A. Linear Programming. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear optimization. Geometry of linear programming. Duality. Simplex method. Interior-point methods. Decomposition and large-scale linear programming. Quadratic programming and complementary pivot theory. Engineering applications. Introduction to integer linear programming and computational complexity theory. Letter grading.

**236B. Nonlinear Programming. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 236A. Basic graduate course in nonlinear programming. Convex sets and functions. Engineering applications and convex optimization. Lagrange duality, optimality conditions, and theorems of alternatives. Unconstrained minimization methods. Convex optimization methods (interior-point methods, cutting-plane methods, ellipsoid algorithm). Lagrange multiplier methods and sequential quadratic programming. Letter grading.

**236C. Optimization Methods for Large-Scale Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 236B. Theory and computational procedures for decomposing large-scale optimization problems: cutting-plane methods, column generation, decomposition algorithms. Techniques for global continuous optimization: branch-and-bound methods, reverse convex programming, bilinear and biconvex optimization, genetic algorithms, simulated annealing. Introduction to combinatorial optimization. Letter grading.

**M237. Dynamic Programming. (4)** (Formerly numbered 237.) (Same as Mechanical and Aerospace Engineering M276.) Lecture, four hours; outside study, eight hours. Recommended requisite: course 232A or 236A or 236B. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Examples from inventory theory, finance, optimal control and estimation, Markov decision processes, combinatorial optimization, communications. Letter grading.

**239AS. Topics in Communication. (4)** Lecture, four hours; outside study, eight hours. Topics in one or more special aspects of communication systems, such as phase-coherent communication systems, optical channels, time-varying channels, feedback channels, broadcast channels, networks, coding and decoding techniques. May be repeated for credit with topic change. Letter grading.

**239BS. Topics in Operations Research. (4)** Lecture, four hours; outside study, eight hours. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change. Letter grading.

**M240A. Linear Dynamic Systems. (4)** (Same as Chemical Engineering M280A and Mechanical and Aerospace Engineering M270A.) Lecture, four hours; outside study, eight hours. Requisite: course 141 or Mechanical and Aerospace Engineering 171A. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**240B. Linear Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 141, M240A. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design. Letter grading.

**M240C. Optimal Control. (4)** (Same as Chemical Engineering M280C and Mechanical and Aerospace Engineering M270C.) Lecture, four hours; outside study, eight hours. Requisite: course 240B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**241A. Stochastic Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131B. Random process models: basic concepts, properties. Stationary random processes: covariance and spectrum. Response of linear systems to random inputs: discrete-time and continuous-time models. Time averages and ergodic principle. Sampling principle and interpolation. Simulation of random processes. Letter grading.

**241B. Kalman Filtering. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M240A, 241A. Review of state-space theory: Kalman signal generation model. Statistical estimation theory: maximum likelihood principle, optimum mean square estimation, conditional expectation, Wiener/Hopf equation, Gaussian signals and Grad/Schmidt orthogonalization, factorization, maximum unconditional likelihood. Kalman filter: basic theory, error propagation/steady state convergence theory, examples, applications to system parameter identification, Kalman filtering software. Kalman smoother algorithm. Nonlinear extensions, likelihood ratios for Gaussian signal. Letter grading.

**241C. Stochastic Control. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 240B, 241B. Linear quadratic Gaussian theory of optimal feedback control of stochastic systems; discrete-time state-space models; sigma algebra equivalence and separation principle; dynamic programming; compensator design for time invariant systems; feedforward control and servomechanisms, extensions to nonlinear systems; applications to interception guidance, gust alleviation. Letter grading.

**M242A. Nonlinear Dynamic Systems. (4)** (Same as Chemical Engineering M282A and Mechanical and Aerospace Engineering M272A.) Lecture, four hours; outside study, eight hours. Requisite: course M240A or Chemical Engineering M280A or Mechanical and Aerospace Engineering M270A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**243. Robust and Optimal Control by Convex Methods. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M240A. Multivariable robust control, including  $H_2$  and  $H_\infty$  optimal control and robust performance analysis and synthesis against structured uncertainty. Emphasis on convex methods for analysis and design, in particular linear matrix inequality (LMI) approach to control. Letter grading.

**M248S. Seminar: Systems, Dynamics, and Control Topics. (2)** (Same as Chemical Engineering M297 and Mechanical and Aerospace Engineering M299A.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

**249S. Topics in Control. (4)** Seminar, four hours; outside study, eight hours. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit with topic change. Letter grading.

**M250A. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Formerly numbered 250A.) (Same as Biomedical Engineering M250A and Mechanical and Aerospace Engineering M280.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M150L. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**M250B. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Formerly numbered 250B.) (Same as Biomedical Engineering M250B and Mechanical and Aerospace Engineering M282.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M250A. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**250C. Microsensors and Microinstruments. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisite: course M250B. Fundamentals of microelectromechanical systems (MEMS) microsensors and microinstruments. Measurement principles for MEMS transducers. Design methods and design constraints for sensitivity and stability. Implementation of control methods for improving measurement sensitivity, linearity, and reproducibility. Design project required, with emphasis on integration of sensors and actuators. Letter grading.

**259S. Seminar: Microelectromechanical Systems. (2)** Seminar, two hours; outside study, four hours. Seminar on microelectromechanical systems (MEMS). Letter grading.

**260A-260B. Advanced Engineering Electrodynamics. (4-4)** Lecture, four hours; outside study, eight hours. Requisites: courses 161, 162A. Advanced treatment of concepts in electrodynamics and their applications to modern engineering problems. Waves in anisotropic, inhomogeneous, and dispersive media. Guided waves in bounded and unbounded regions. Radiation and diffraction, including optical phenomena. Partially coherent waves, statistical media. Letter grading.

**261. Microwave and Millimeter Wave Circuits. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 163A. Rectangular and circular waveguides, microstrip, stripline, finline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits. Letter grading.

**262. Antenna Theory and Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 162A. Antenna patterns. Sum and difference patterns. Optimum designs for rectangular and circular apertures. Arbitrary side lobe topography. Discrete arrays. Mutual coupling. Design of feeding networks. Letter grading.

**263. Reflector Antennas Synthesis, Analysis, and Measurement. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 260A, 260B. Reflector pattern analysis techniques. Single and multireflector antenna configurations. Reflector synthesis techniques. Reflector feeds. Reflector tolerance studies, including systematic and random errors. Array-fed reflector antennas. Near-field measurement techniques. Compact range concepts. Microwave diagnostic techniques. Modern satellite and ground antenna applications. Letter grading.

**266. Computational Methods for Electromagnetics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas. Letter grading.

**270. Applied Quantum Mechanics. (4)** Lecture, four hours; outside study, eight hours. Preparation: modern physics (or course 123A), linear algebra, and ordinary differential equations courses. Principles of quantum mechanics for applications in lasers, solid-state physics, and nonlinear optics. Topics include eigenfunction expansions, observables, Schrödinger equation, uncertainty principle, central force problems, Hilbert spaces, WKB approximation, matrix mechanics, density matrix formalism, and radiation theory. Letter grading.

**271. Classical Laser Theory. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 172. Microscopic and macroscopic laser phenomena and propagation of optical pulses using classical formalism. Letter grading.

**272. Dynamics of Lasers. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271. Ultrashort laser pulse characteristics, generation, and measurement. Gain switching, Q switching, cavity dumping, active and passive mode locking. Pulse compression and soliton pulse formation. Nonlinear pulse generation: soliton laser, additive-pulse mode locking, and parametric oscillators. Pulse measurement techniques. Letter grading.

**273. Nonlinear Optics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 172, 270. Nonlinear optical susceptibilities. Coupled-wave formulation. Crystal optics, electro-optics, and magneto-optics. Sum- and difference-frequency generation. Harmonic and parametric generation. Stimulated Raman and Brillouin scattering. Four-wave mixing and phase conjugation. Field-induced index changes and self-phase modulation. Letter grading.

**274. Fiber Optic System Design. (4)** Lecture, three hours; outside study, nine hours. Requisites: courses 173DL and/or 174. Top-down introduction to physical layer design in fiber optic communication systems, including Telecom, Datacom, and CATV. Fundamentals of digital and analog optical communication systems, fiber transmission characteristics, and optical modulation techniques, including direct and external modulation and computer-aided design. Architectural-level design of fiber optic transceiver circuits, including preamplifier, quantizer, clock and data recovery, laser driver, and predistortion circuits. Letter grading.

**279S. Special Topics in Quantum Electronics. (4)** Lecture, four hours; outside study, eight hours. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, and lightwave technology. May be repeated for credit. Letter grading.

**285A. Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro-magnetic waves, drift waves. Rayleigh/Taylor, Kelvin/Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases. Letter grading.

**285B. Advanced Plasma Waves and Instabilities. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques. Letter grading.

**M287. Fusion Plasma Physics and Analysis. (4)** (Same as Mechanical and Aerospace Engineering M237B.) Lecture, four hours; outside study, eight hours. Requisite: course M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Letter grading.

**296. Seminar: Research Topics in Electrical Engineering. (2)** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate electrical engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**475C. Manufacturing Systems. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 475B. Modeling and analysis of manufacturing systems. Assembly and transfer lines. Facility layout and design. Group technology and flexible manufacturing systems. Planning and scheduling. Task management, machine setup, and operation sequencing. Manufacturing system models. Manufacturing information systems. Social, economic, environmental, and regulatory issues. Letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate electrical engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## ENGINEERING SCHOOLWIDE PROGRAMS

*Henry Samueli School of Engineering  
and Applied Science*

UCLA  
6426 Boelter Hall  
Box 951601  
Los Angeles, CA 90095-1601  
(310) 825-2826  
<http://www.engineer.ucla.edu>

### Professors Emeriti

Edward P. Coleman, Ph.D.  
Herbert B. Nottage, Ph.D.  
Allen B. Rosenstein, Ph.D.  
Bonham Spence-Campbell, E.E.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Henry Samueli School of Engineering and Applied Science offers the Master of Engineering (M.Engr.) degree (through the Engineering Executive Program) and Engineer (Engr.) degree as schoolwide degrees. A certificate of specialization is available in all areas of specialization, except computer science.

## Engineering

### Lower Division Courses

**95. Ethical and Professional Issues in Engineering and Computer Science. (4)** Lecture, four hours; discussion, one hour. Selected lectures, discussions, and oral and written reports related to profession of engineering. Lectures by practicing engineers, case studies, and small group projects on issues that involve conflicting demands on society. Letter grading.

**97. Introduction to Engineering Disciplines. (4)** Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as a professional opportunity for freshman students by exploring difference between engineering disciplines and functions engineers perform. Development of skills and techniques for academic excellence through the team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in the U.S. technological work force. P/NP grading.

## Upper Division Courses

**194. Power and Ethics in Engineering History. (4)** Lecture, two hours; discussion, one hour; outside study, seven hours. Limited to juniors/seniors. Rigorous framework for analyzing social constraints to technological change and use of ethical, economic, and historical frameworks, with emphasis on scientific, industrial, and military perspectives. Designed for engineering and computer science students as a humanities class for investigating strategic relationships among social power, moral responsibility, and technological change. Letter grading.

**195. Art of Engineering Endeavors. (4)** (Formerly numbered 98.) Lecture, four hours; discussion, one hour; outside study, 12 hours. Designed for seniors. Importance of group dynamics in engineering practice. Teamwork and effective group skills in engineering environments. Organization and control of multidisciplinary complex engineering projects. Forms of leadership and qualities and characteristics of effective leaders. How engineering, computer sciences, and technology relate to major ethical and social issues. Societal demands on practice of engineering. Letter grading.

## Graduate Courses

**200. Program Management Principles for Engineers and Professionals. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of necessary processes and procedures to successfully manage technology programs. Review of fundamentals of program planning, organizational structure, implementation, and performance tracking methods to provide program manager with necessary information to support decision-making process that provides high-quality products on time and within budget. Letter grading.

**201. Systems Engineering. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate students. Practical review of major elements of system engineering process. Coverage of key elements: system requirements and flow down, product development cycle, functional analysis, system synthesis and trade studies, budget allocations, risk management metrics, review and audit activities and documentation. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**470A-470D. The Engineer in the Technical Environment. (3 each)** Lecture, three hours. Limited to Engineering Executive Program students. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects. S/U or letter grading.

**471A-471B-471C. The Engineer in the General Environment. (3-3-1.5)** Lecture, three hours (courses 471A, 471B) and 90 minutes (course 471C). Limited to Engineering Executive Program students. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. S/U or letter grading (course 471A); In Progress and S/U or letter grading (courses 471B, 471C).

**472A-472D. The Engineer in the Business Environment. (3-3-3-1.5)** Lecture, three hours (courses 472A, 472B, 472C) and 90 minutes (course 472D). Limited to Engineering Executive Program students. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress and S/U or letter grading (credit to be given on completion of courses 472B and 472D).

**473A-473B. Analysis and Synthesis of a Large-Scale System. (3-3)** Lecture, two and one-half hours. Limited to Engineering Executive Program students. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

**495. Teaching Assistant Training Seminar. (4)** Seminar, four hours; outside study, eight hours. Preparation: appointment as a teaching assistant. Limited to graduate engineering students. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

Robert M. Maniquis, Ph.D.  
Claire E. McEachern, Ph.D.  
Kathleen A. McHugh, Ph.D.  
Rafael Perez-Torres, Ph.D.  
Kenneth Reinhard, Ph.D.  
Sonia Saldivar-Hull, Ph.D.  
Richard A. Yarbrough, Ph.D.

### Assistant Professors

Jennifer L. Fleissner, Ph.D.  
Yogita Goyal, Ph.D.  
Mark J. McGurl, Ph.D.  
Caroline A. Streeter, Ph.D.

### Senior Lecturers S.O.E.

Jerome Cushman, A.B., B.S.L.S., *Emeritus*  
David Stuart Rodes, Ph.D.

### Lecturers

Stephen J. Dickey, Ph.D.  
Christopher M. Mott, Ph.D.

### Adjunct Professors

Russell Leong, M.F.A.  
Murray Roston, Ph.D.  
Carolyn See, Ph.D.

## Scope and Objectives

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is the primary language, and to the study of the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on British, American, and world literary history and requires of its undergraduate majors a firsthand acquaintance with many of the more influential writers who have helped during the past millennium to make English a global language that possesses richly diverse and highly influential literary cultures. Within the department, students are able to pursue a variety of approaches to the study of literary culture beyond the strictly historical — literary criticism, for example, or those that draw on the resources of such disciplines as sociology, psychology, and philosophy. Within the B.A. degree in English, qualified students may elect a concentration either in creative writing or in world literature. The department also offers a Bachelor of Arts degree in American Literature and Culture. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the Classics Department.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

## Undergraduate Study

Students must have completed the Subject A requirement before taking any courses in English (other than English Composition A or 2). For further information regarding Subject A, see the Undergraduate Study section of this catalog.

### Extra-Departmental Requirement in Foreign Literature or Foreign Language

All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course list-

ings under Foreign Literature in Translation later in this chapter). Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high school level through the IGETC program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a P/NP grading basis.

## English B.A.

The Bachelor of Arts degree has concentrations in creative writing and in world literature. An international students program in English is also offered.

### Preparation for the Major

*Required:* English Composition 3, English 4W, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

### Transfer Students

To be admitted as English majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

### The Major

*Required:* Twelve upper division English courses, including 141A or 141B, 142A, 142B, 143, at least one course from each of the 150 and 180 series, one course from 160 through 164, and five additional courses of which three must be selected from 140A, 140B, 142C, or 150A through M197D.

Students are encouraged to choose additional electives from courses 140A through M197D. English 140A is especially recommended if they plan graduate work in literature. They may wish to select several courses in the relevant classical and postclassical foreign literatures and thought.

### Optional Concentrations and Special Programs

The department offers optional concentrations in creative writing and in world literature, as well as a special program for international students. For all programs, the regular Preparation for the Major sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students should consult the departmental counselor before selecting and declaring one of them as a concentration.

### Creative Writing Concentration

The creative writing concentration consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from 133 or 134, taken in a single genre (poetry or short story), three literature courses paralleling the creative

writing genre, and four electives selected from courses 140A through 190. Students may declare this program as a concentration only after they have completed three creative writing workshops in a single genre. Students may not enroll in more than one workshop (course 133, 134, or 135) per term or in more than two workshops with the same instructor. No student may take for credit more than three workshops in any one creative writing genre. Students planning to select this program should contact the departmental counselor for further details.

### World Literature Concentration

The world literature concentration consists of nine upper division courses in English or American literature and four upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine courses in English must include 141A, 141B, or 143; 142A and 142B; at least one course from the 150 series; and four electives selected from courses 140A through M197D (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

### International Students Program

The department offers a special program in English to bona fide international students whose native language is other than English. For this program, students must satisfy all requirements listed under Preparation for the Major; they may fulfill the departmental foreign language requirement with their own native language. The following 12 courses are required for the program itself: English as a Second Language 106, 108, 109; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from 140A through M197D. Students who complete this program and wish to pursue graduate study should consult the departmental counselor about programs of study and requirements for admission.

## American Literature and Culture B.A.

### Preparation for the Major

*Required:* English Composition 3, English 4W, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

### Transfer Students

To be admitted as American Literature and Culture majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one English composition course, one English critical reading and writing course, one year of English literature survey courses, and two years of one foreign language or a combination of foreign language and foreign literature courses.

## The Major

*Required:* Twelve upper division courses, including six in American literature selected from English 170A through 179, two of which must be devoted to literature written before 1900 (courses 170A, 170B, 171A, 171B, 173A, 174A); two courses from 142A, 142B, 143; one seminar from 187, 188, 189, or when treating American topics, 180X; one course from M101A, M101B, M102A, M102B, 103, M104A, M104B, M104C, M105A, M105B, 106, M107A (also M107C when treating American topics or figures), or 109; and two courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, both must usually come from one department or program and appear on a list of approved courses for the major).

## English/Greek B.A.

### Preparation for the Major

*Required:* English 4W, 10A, 10B, 10C, Greek 1, 2, 3.

### Transfer Students

To be admitted as English/Greek majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one English critical reading and writing course, one year of English literature survey courses, and one year of Greek.

### The Major

*Required:* (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

## English/Latin B.A.

### Preparation for the Major

*Required:* English 4W, 10A, 10B, 10C, Latin 1, 2, 3.

### Transfer Students

To be admitted as English/Latin majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one English critical reading and writing course, one year of English literature survey courses, and one year of Latin.

### The Major

*Required:* (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105A and 113, selected in consultation with an adviser in the Department of Classics (of these seven courses,

at least two must be in poetry and two in prose). Total courses required: 14.

## Honors Program

### Admission

The honors program is open to departmental majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Winter Quarter of the junior year. For application forms and further information, contact the departmental counselor.

### Requirements

All honors students are required to take English 140A or 140B during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In Spring Quarter of the junior year, they must take course 199HA. During Fall and Winter Quarters of the senior year, they take courses 199HB and 199HC, in which they write a thesis under the direction of a faculty member. The thesis determines whether they receive highest honors, honors, or no honors.

## Subject Matter Preparation Program for Single Subject Credential in English

Students interested in obtaining a single subject secondary school credential in English should consult with a departmental counselor regarding the requirements for a waiver from the English California Subject Examination for Teachers (CSET), which is required by the California Commission on Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible, because the program does require additional courses beyond the major requirements. Students interested in elementary school education are strongly urged to participate in the Diversified Liberal Arts Program (DLAP), administered by the Letters and Science Counseling Services, A316 Murphy Hall. For additional information on courses leading to the credential, consult the Department of Education at (310) 825-8328.

## English Minor

The English minor is designed for students who wish to enhance their major program with the benefits of intensive study of English language and literatures, including a better understanding and appreciation of literatures in English and improvement in critical thinking, reading, and writing skills.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed English 10A with a grade of C or better, and have satisfied the English Composition 3 requirement and completed English 4W. Students must file a petition to declare the

minor by meeting with a student affairs officer in the Undergraduate Counseling Office, 2222 Rolfe Hall, (310) 825-1389. This allows them priority enrollment in many upper division courses.

*Required Lower Division Courses (10 units):* English 10B and 10C, with grades of C or better.

*Required Upper Division Courses (21 to 25 units):* Five courses selected from English 100 through M197D, including course 142A and one other course that focuses on literature in English written before 1900. A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of English offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in English.

## English

### Lower Division Courses

**4HW. Critical Reading and Writing (Honors). (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 4H. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Letters and Science Writing II requirement. Letter grading.

**4W. Critical Reading and Writing. (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H or English as a Second Language 36. Not open for credit to students with credit for former course 4. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. Satisfies Letters and Science Writing II requirement. Letter grading.

**10A. English Literature to 1660. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**10B. English Literature, 1660 to 1832. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**10C. English Literature, 1832 to the Present. (5)** Lecture, three hours; discussion, one hour. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent. P/NP or letter grading.

**20. Introduction to Creative Writing. (4)** Preparation: submission of creative or expository writing samples to a screening committee. Enforced requisites: satisfaction of Subject A requirement, English Composition 3 or 3H. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

**M40. Structure of English Words. (5)** (Same as Linguistics M10.) Lecture, four hours; discussion, one hour. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation. P/NP or letter grading.

**70. Major British Authors before 1800. (4)** Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

**75. Major British Authors, 1800 to the Present. (4)** Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

**80. Major American Authors. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Introduction to the chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway. P/NP or letter grading.

**85. American Novel. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Special Topics in English. (5 each)** Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading. **88A.** Medieval Literature; **88B.** Renaissance Literature; **88C.** 17th-Century Literature; **88D.** 18th-Century Literature; **88E.** Romantic Literature; **88F.** Victorian Literature; **88G.** 20th-Century British Literature; **88H.** Colonial American Literature; **88I.** 19th-Century American Literature; **88J.** 20th-Century American Literature; **88K.** History of English Language; **88L.** Folklore and Mythology; **88M.** Literature and Society.

**90. Shakespeare. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement. P/NP or letter grading.

**95A. Introduction to Poetry. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of a selection of representative poems. P/NP or letter grading.

**95B. Introduction to Drama. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

**95C. Introduction to Fiction. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

**96. The Short Story in England and America. (4)** Enforced requisite: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

**97H. Honors Seminar for Freshmen and Sophomores. (4)** Seminar, three hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Special Topics and Genres. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of a particular topic, genre, or subgenre in literature such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

**M101A. Lesbian and Gay Literature before Stonewall. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101A and Women's Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

**M101B. Lesbian and Gay Literature after Stonewall. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M101B and Women's Studies M101B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

**M102A. Asian American Literature to 1980. (5)** (Same as Asian American Studies M112A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

**M102B. Asian American Literature since 1980. (5)** (Same as Asian American Studies M112B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

**103. Jewish American Fiction. (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of the fiction of Jewish writers in America, such as Bellow, Malamud, and Roth, focusing on encounter of Jewish ethical ideals and social values with the contemporary environment. P/NP or letter grading.

**M104A. Early Afro-American Literature. (5)** (Same as Afro-American Studies M104A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins. P/NP or letter grading.

**M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (5)** (Same as Afro-American Studies M104B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison. P/NP or letter grading.

**M104C. Afro-American Literature since the 1960s. (5)** (Same as Afro-American Studies M104C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

**M105A. Early Chicana/Chicano Literature. (5)** (Same as Chicana and Chicano Studies M105A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

**M105B. Recent Chicana/Chicano Literature. (5)** (Same as Chicana and Chicano Studies M105B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

**106. Native American Literary Studies. (5)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology). P/NP or letter grading.

**M107A. American Women Writers. (5)** (Same as Women's Studies M107A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women. P/NP or letter grading.

**M107B. British Women Writers. (5)** (Same as Women's Studies M107B.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women. P/NP or letter grading.

**M107C. Special Topics in Women and Literature. (5)** (Same as Women's Studies M107C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping. P/NP or letter grading.

**108A-108B. English Bible as Literature. (4-4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Principal literary monuments of the Old and New Testaments in King James Version. P/NP or letter grading. **108A.** Old Testament; **108B.** New Testament.

**108C. English Bible as Literature: Special Topics. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit. P/NP or letter grading.

**109. Interdisciplinary Approaches to Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit. P/NP or letter grading.

**110. Studies in Individual Authors. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit. P/NP or letter grading.

**111A. Oral Tradition. (4)** (Formerly numbered M111A.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples. P/NP or letter grading.

**111C. British Folklore and Mythology. (4)** (Formerly numbered M111C.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Designed for juniors/seniors. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences. P/NP or letter grading.

**111D. Celtic Mythology. (4)** (Formerly numbered M111D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales. P/NP or letter grading.

**111E. Survey of Medieval Celtic Literature. (4)** (Formerly numbered M111E.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century. P/NP or letter grading.

**111F. Celtic Folklore. (4)** (Formerly numbered M111F.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloric research. P/NP or letter grading.

**112. Children's Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography. P/NP or letter grading.

**113. Literature for Adolescents and Young Adults. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults. P/NP or letter grading.

**114. World Literatures in English. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit. P/NP or letter grading.

**115A. American Popular Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories. P/NP or letter grading.

**115B. British Popular Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. Examination of social functions of literature. P/NP or letter grading.

**116. Science Fiction. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of science fiction and speculative literatures. P/NP or letter grading.

**117. Detective Fiction. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of British and American detective fiction and the literature of detection. P/NP or letter grading.

**118. Film and Literature. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works. P/NP or letter grading.

**119. Literature of California and the American West. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S. P/NP or letter grading.

**121. History of the English Language. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present. P/NP or letter grading.

**122. Introduction to Structure of Present-Day English. (4)** Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English. P/NP or letter grading.

**133. Creative Writing: Poetry. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Weekly exercises in writing of poetry, with practice in standard forms and meters and study of techniques. Classroom discussion based on student use. Enrollment in more than one section per term not permitted. May be repeated for a total of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

**134. Creative Writing: Short Story. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Three average-length stories to be completed each term. Some stories may, with instructor's consent, be substantial revisions of other stories presented. Classroom discussion based on stories presented. Enrollment in more than one section per term not permitted. May be repeated for a total of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

**135. Creative Writing: Drama. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Exploration of capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Enrollment in more than one section per term not permitted. May be repeated for a total of 15 units. No more than 10 units may be completed with same instructor. P/NP or letter grading.

**137. Advanced Computer Techniques for Students of English. (5)** Lecture, four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught. P/NP or letter grading.

**140A. Criticism: History and Theory. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of some major historical documents and theoretical statements in history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T.S. Eliot, with emphasis on major critical positions posed and developed by these writers, basis of their theoretical positions, and practical consequences of those positions. Possible discussion of recent trends in criticism. P/NP or letter grading.

**140B. Criticism: Special Topics. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in *Schedule of Classes*. Some study of literary texts, to illuminate the value and practical application of the approach, may be required. P/NP or letter grading.

**141A. Chaucer: *The Canterbury Tales*. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *The Canterbury Tales*. Satisfies department's Chaucer requirement. P/NP or letter grading.

**141B. Chaucer: *Troilus and Criseyde* and Selected Minor Works. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Intensive study of *Troilus and Criseyde* and selected minor works of Chaucer, such as *The Book of the Duchess*, *The House of Fame*, *The Parliament of Fowls*, etc. Satisfies department's Chaucer requirement. P/NP or letter grading.

**142A. Shakespeare: Poems and Early Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*. P/NP or letter grading.

**142B. Shakespeare: Later Plays. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances. P/NP or letter grading.

**142C. Shakespeare: Selected Topics. (5)** Lecture, three or four hours. Requisites: courses 10A, 10B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors. P/NP or letter grading.

- 143. Milton. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works of Milton, with emphasis on *Paradise Lost*. P/NP or letter grading.
- 150A. Early Medieval Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Reading knowledge of Old English not required. Major prose and poetry of Anglo-Saxon England (600 to 1100), including epic, romance, history, saints' lives, and travel literature. Texts and topics include *Beowulf*, Vikings, poems on women, Bede, and King Alfred. P/NP or letter grading.
- 150B. Later Medieval Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Reading and historical explication of major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyrics). The more difficult texts read in modernized form. P/NP or letter grading.
- 151. Elizabethan Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of English literature of the 16th century, with special emphasis on development and interrelationships of poetry, prose, fiction, and literary theory and criticism during reign of Elizabeth I. P/NP or letter grading.
- 152A. Drama from Beginning to 1576. (5)** Lecture, four hours. Requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.
- 152B. Drama, 1567 to 1642. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Non-Shakespearean English drama from opening of first public playhouse to closing of the theaters. P/NP or letter grading.
- 153. Literature of Early 17th Century, 1600 to 1660. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of 17th-century thought. Work of Milton excluded. P/NP or letter grading.
- 154. Literature of Restoration and Earlier 18th Century, 1660 to 1730. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of the Restoration and earlier 18th-century thought. P/NP or letter grading.
- 155. Literature of Later 18th Century, 1730 to 1798. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought. P/NP or letter grading.
- 156. Drama, 1660 to 1842. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B. Survey of English drama from the Restoration to the Licensing Act. P/NP or letter grading.
- 157. The Novel to 1832. (5)** Lecture, four hours. Requisites: courses 10A, 10B. Survey of works of major English novelists from Defoe through Scott. P/NP or letter grading.
- 160. Earlier Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Blake, Wollstonecraft, W. Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Burke, Paine, Radcliffe, Edgeworth, Baillie, C. Smith, Burns, Southey, D. Wordsworth, Lamb, DeQuincey, and Scott. P/NP or letter grading.
- 161. Later Romantic Literature. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Aikin, Hemans, and Prince. P/NP or letter grading.
- 162. Earlier Victorian Poetry and Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of poetry and prose of the Victorian age from passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman. P/NP or letter grading.
- 163. Later Victorian Poetry and Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats. P/NP or letter grading.
- 164. The Novel, 1832 to 1900. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major English novelists from Dickens through Hardy. P/NP or letter grading.
- 165. 20th-Century British Poetry. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present. P/NP or letter grading.
- 166. 20th-Century British Fiction. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present. P/NP or letter grading.
- 167. Drama, 1842 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C (for Theater and Film and Television majors the 10A, 10B, 10C requisites are waived). Survey of British and American drama, with its principal continental influences, from 1842 through World War II. P/NP or letter grading.
- 168. Drama, 1945 to the Present. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II. P/NP or letter grading.
- 169. Special Topics in British Studies. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of particular themes, forms, or moments in British and/or Anglophone literature. Satisfies department's pre- or post-19th-century requirement, depending on date of subject matter. P/NP or letter grading.
- 170A. American Literature to 1775. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature through the Colonial period. P/NP or letter grading.
- 170B. American Literature, 1775 to 1832. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature during Revolutionary and early republic periods. P/NP or letter grading.
- 171A. American Literature, 1832 to 1865. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature from Jacksonian era to end of the Civil War. P/NP or letter grading.
- 171B. American Literature, 1866 to 1912. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature from end of the Civil War to founding of *Poetry* magazine. P/NP or letter grading.
- 172A. American Literature, 1912 to 1945. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Historical survey of American literature from founding of *Poetry* magazine to end of World War II. P/NP or letter grading.
- 172B. American Literature since 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.
- 173A. American Fiction to 1900. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American fiction (both novels and short stories) from its beginning to end of the 19th century. P/NP or letter grading.
- 173B. American Fiction, 1900 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American novels and short stories from beginning of the 20th century to end of World War II. P/NP or letter grading.
- 173C. American Fiction since 1945. (5)** Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Study of American novels and short stories since end of World War II. P/NP or letter grading.
- 174A. American Poetry to 1900. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry from Puritan period through end of the 19th century. P/NP or letter grading.
- 174B. American Poetry, 1900 to 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry from beginning of the 20th century to end of World War II. P/NP or letter grading.
- 174C. American Poetry since 1945. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American poetry since end of World War II. P/NP or letter grading.
- 175. American Nonfictional Prose. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American nonfictional prose (essays, autobiographies, travel narratives, and other). Particular genre and/or historical period vary with instructor. P/NP or letter grading.
- 176. American Drama. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of American drama from its beginning to the present day. Historical period may vary with instructor. P/NP or letter grading.
- 177. Special Topics in American Literature. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Focused study of some aspect or theme in American literature. May be repeated for credit. P/NP or letter grading.
- 178. Perspectives in Study of American Culture. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit. P/NP or letter grading.
- 179. American Literature in Comparative Context. (5)** Lecture, four hours. Requisites: courses 10A, 10B, 10C. Study of some aspect of American literature and its relationships to other national literature. P/NP or letter grading.
- 180. Specialized Studies in Medieval Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 180X. Specialized Studies in Literature. (5)** Seminar, four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 181. Specialized Studies in Renaissance Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 182. Specialized Studies in 17th-Century Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 183. Specialized Studies in 18th-Century Literature. (5)** Seminar, four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.
- 184. Specialized Studies in Romantic Literature. (5)** Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**185. Specialized Studies in Victorian Literature.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**186. Specialized Studies in 20th-Century British Literature.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**187. Specialized Studies in Colonial American Literature.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**188. Specialized Studies in 19th-Century American Literature.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**189. Specialized Studies in 20th-Century American Literature.** (5) Seminar, three or four hours. Requisites: courses 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. May be repeated for credit. P/NP or letter grading.

**190. Literature and Society.** (5) Lecture, four hours; discussion, one hour (when scheduled). Requisites: courses 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit. P/NP or letter grading.

**195. Postcolonial Literatures.** (5) Lecture, four hours. Requisites: courses 10A, 10B, 10C. Survey of how colonialism and decolonization have shaped and been shaped by literature in English. Study of new Englishes and literature that combines European and non-Western aesthetic forms to produce new literary traditions. May be repeated for credit. P/NP or letter grading.

**196. Interracial Encounters in Contemporary American Literature.** (5) Lecture, three or four hours. Enforced requisites: English Composition 3 or 3H, English 4W or 4HW. Study of recent literary and cinematic texts produced by people from different ethnic backgrounds living in the U.S. and providing comparative cultural perspectives on living in a multiethnic society. P/NP or letter grading.

**M197A. Topics in Afro-American Literature.** (5) (Same as Afro-American Studies M197A.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit. P/NP or letter grading.

**M197B. Topics in Chicana/Chicano Literature.** (5) (Same as Chicana and Chicano Studies M197B.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Chicana/Chicano literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

**M197C. Topics in Asian American Literature.** (5) (Same as Asian American Studies M197C.) Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

**M197D. Special Topics in Lesbian and Gay Literature.** (5) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M197D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on a particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in English. (2 to 4)** Intensive directed research project. To enroll or obtain information, see departmental counselor.

**199HA. Honors Seminar.** (5) Seminar, three hours. Requisite: course 140A. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts. Letter grading.

**199HB-199HC. Honors Tutorial. (5-5)** Tutorial, to be arranged. Requisite: course 199HA. Tutorial in which students write theses under direction of a faculty member. In Progress and letter grading.

**199I. Independent Studies for Internships. (2 to 4)** Independent studies course to be supervised jointly by Center for Experiential Education and Service Learning and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.

## Graduate Courses

**200. Approaches to Literary Research.** (4) Bibliographical tools of English and American literary scholarship; introduction to descriptive bibliography and basic methods of research. Periods covered vary.

**201A. Criticism and Interpretation from Classical Era to the Renaissance.** (4) Lecture, three hours. Examination of major texts in history of critical theory and interpretation from pre-Socratics to Descartes, including classical literary criticism (Plato, Aristotle, Horace, Longinus), biblical hermeneutics (Bible, Midrash, St. Paul, St. Augustine, St. Thomas Aquinas), and medieval and Renaissance theories of interpretation (Dante, Boccaccio, Sidney). S/U or letter grading.

**201B. Aesthetics and Criticism from the Enlightenment to Decadence.** (4) Lecture, three hours. Continuation of course 201A, proceeding from neoclassical and Enlightenment critical theory through Victorian and decadent aesthetic and literary criticism. Readings may include texts by Rousseau, Dryden, Pope, Hume, Kant, Schiller, the Schlegels, Coleridge, Hegel, Schelling, Arnold, Pater, Wilde, and Nietzsche. S/U or letter grading.

**201C. Developments and Issues in Modern Critical Thought.** (4) Lecture, three hours. Study of major figures and ideas in modern and contemporary critical theory. Readings vary from year to year but may include such figures as Freud, Durkheim, Saussure, Heidegger, Shkolovskii, Benjamin, Adorno, Levi-Strauss, Lacan, Barthes, Derrida, Deleuze, Fanon, Foucault, Irigaray, Lyotard, Bourdieu, and Bhabha. S/U or letter grading.

**202. Enumerative and Descriptive Bibliography.** (4) Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.

**203. Computers and Literary Research.** (4) Prior knowledge in this area not required. Practice in writing and using computer programs for analysis of literary style, content, and authorship.

**204. History of Rhetoric.** (4) Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-to-modern period in alternate years.

**M205A. Study of Oral Tradition: History and Methods.** (4) (Formerly numbered 205A.) (Same as Scandinavian M271.) Seminar, three hours. Exploration of scholarly and literary attempts to study, define, analyze, promote, and/or appropriate oral traditions, from Homer and ancient Greece to origins of vernacular literatures, European romantic (re)discovery of oral tradition, 20th-century heuristic models of oral composition, and modern-day electronic media and popular verbal genres, such as joking and rapping. S/U or letter grading.

**M205B. Collecting Oral Tradition.** (4) (Formerly numbered 205B.) (Same as Scandinavian M272.) Seminar, three hours. Description and evaluation of various modern approaches to collecting and documenting oral tradition as text, performance, and socio-cultural event. Consideration of approaches ranging from written transcription and textualization to audio and video presentation. S/U or letter grading.

**M205C. Studies in Oral Traditional Genres.** (4) (Formerly numbered 205C.) (Same as Scandinavian M273.) Seminar, three hours. Exploration in depth of variety and history of, and scholarship on, a particular oral traditional genre (e.g., ballad, song, epic, proverb, riddle, folktale, legend) or a set of closely related oral traditional genres. S/U or letter grading.

**210. History of the English Language.** (4) Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

**211. Old English.** (4) Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

**212. Middle English.** (4) Requisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry.

**213. Early Modern English.** (4) Detailed study of phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of changes in the language in relation to intellectual, political, and social characteristics of the period.

**214. Modern English.** (4) Description and analysis of modern English phonology, grammar, and vocabulary, using theory and techniques of contemporary linguistics. Survey of the evolution of American English and account of characteristic phonological and grammatical features of major regional varieties of English around the world.

**216A-216B. Old Irish.** (4) Studies in grammar. Readings in the glosses and other texts. Comparative considerations.

**217A-217B. Medieval Welsh.** (4) Studies in grammar. Readings in the Mabinogi and other texts. Comparative considerations.

**218. Celtic Linguistics.** (4) Survey of salient features of Celtic linguistic stock in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages.

**230. Workshop: Creative Writing. (2 to 4)** Preparation: submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of the nine courses required for first qualifying examination nor any of the five courses required for second qualifying examination.

**240. Studies in History of the English Language.** (4) Individual seminars dealing with any single historical period from Old English period to the present or development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. May be repeated for credit.

**241. Studies in Structure of the English Language.** (4) Topics in various aspects of structure of modern English, especially syntax and semantics. May be repeated for credit.

**242. Language and Literature. (4)** Application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. May be repeated for credit.

**244. Old and Medieval English Literature. (4)** Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. May be repeated for credit.

**245. Chaucer. (4)** May be repeated for credit.

**246. Renaissance Literature. (4)** Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. May be repeated for credit.

**247. Shakespeare. (4)** May be repeated for credit.

**248. Earlier 17th-Century Literature. (4)** Studies in poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. May be repeated for credit.

**249. Milton. (4)** Studies in poetry and prose of John Milton; limits of investigation set by individual instructor. May be repeated for credit.

**250. Restoration and 18th-Century Literature. (4)** Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. May be repeated for credit.

**251. Romantic Writers. (4)** May be repeated for credit.

**252. Victorian Literature. (4)** Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. May be repeated for credit.

**253. Contemporary British Literature. (4)** May be repeated for credit.

**254. American Literature to 1900. (4)** Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. May be repeated for credit.

**255. Contemporary American Literature. (4)** Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. May be repeated for credit.

**256. Studies in the Drama. (4)** Studies in drama as a genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

**257. Studies in Poetry. (4)** Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. May be repeated for credit.

**258. Studies in the Novel. (4)** Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. May be repeated for credit.

**259. Studies in Criticism. (4)** May be repeated for credit.

**260. Studies in Literature and Its Relationship to the Arts and Sciences. (4)** Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. May be repeated for credit.

**M260A. Topics in Asian American Literature. (4)** (Same as Asian American Studies M260.) Seminar, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. May be repeated for credit. S/U or letter grading.

**261. Studies in Chicana/Chicano Literature. (4)** Seminar, three hours. Intensive research and study of major themes, authors, and issues in Chicana/Chicano literature and culture. Examination of political, aesthetic, economic, and cultural context that emerges in Chicana/Chicano discourse; limits of investigation set by individual instructor. May be repeated for credit.

**M262. Studies in Afro-American Literature. (4)** (Same as Afro-American Studies M200E.) Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

**263. Celtic Literature. (4)** Lecture, three hours. Preparation: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. May be repeated for credit.

**264. Studies in Rhetoric. (4)** Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. May be repeated for credit.

**265. Postcolonial Literatures. (4)** Seminar, three hours. Study of aesthetic, historical, and social backgrounds to literatures of former British colonies that became independent after 1947. General issues related to way imperialism, colonialism, and postcolonialism have helped to shape and have been shaped by literature in English. May be repeated for credit.

**M266. Cultural World Views of Native America. (4)** (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

**M270. Seminar: Literary Theory. (5)** (Same as Comparative Literature M294, East Asian Languages M251, French M270, German M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

**272. Current Issues in Teaching English. (4)** Focus on one of a variety of topics of special current interest. May be repeated for credit.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4)** (Same as History M298.) Topics vary according to participating faculty. May be repeated for credit.

**M299. Interdisciplinary American Studies. (6)** (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U grading.

**495E. Teaching with Technology. (2 to 4)** Seminar, two hours. Enables graduate student instructors to approach challenges of teaching with technology on two fronts: by familiarizing them with range of possible applications and by carrying out a research project on a technology topic of their choice. S/U grading.

**496. Publishing the Academic Literary Article. (4)** Discussion, four hours. Structured as a writing workshop and divided into two parts: (1) determination of what a publishable article looks like while students revise work independently and (2) circulation of student papers to class in advance with the writing discussed in seminar room by whole class. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (2 to 4)** Limited to students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U grading.

**597. Preparation for Ph.D. Examinations. (4 to 12)** Limited to second-stage Ph.D. students preparing for second qualifying examination. S/U grading.

**598. M.A. Research and Thesis Preparation. (4 or 8)** Limited to graduate students. May not be applied toward any course requirement for degree. S/U grading.

**599. Ph.D. Dissertation Research. (4 or 8)** Limited to Ph.D. students unable to enroll in seminars in their fields or to students concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

## Yiddish

### Upper Division Courses

**101A. Elementary Yiddish. (4)** Lecture, four hours. Introduction to grammar; instruction in listening, speaking, reading, and writing skills. P/NP or letter grading.

**101B. Elementary Yiddish. (4)** Lecture, four hours. Requisite: course 101A. P/NP or letter grading.

**101C. Elementary Yiddish. (4)** Lecture, four hours. Requisite: course 101B. P/NP or letter grading.

**102A-102B. Accelerated Elementary Yiddish (6-6).** Lecture, five hours; laboratory, one hour. Covers material in courses 101A, 101B, 101C in two terms rather than three. P/NP or letter grading.

**104. Advanced Yiddish. (4)** Lecture, three hours. Requisite: course 101C or 102B. Grammatical exercises, reading and linguistic analysis of texts, conversation. P/NP or letter grading.

**121A. 20th-Century Yiddish Poetry in English Translation. (4)** Lecture, three hours. Designed for juniors/seniors. Readings in 20th-century Yiddish poetry and drama. P/NP or letter grading.

**121B. 20th-Century Yiddish Prose and Drama in English Translation. (4)** Lecture, three hours. Designed for juniors/seniors. Readings in 20th-century Yiddish prose. P/NP or letter grading.

**121C. Special Topics in Yiddish Literature in English Translation. (4)** Lecture, three hours. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

**131A. Modern Yiddish Poetry. (4)** Lecture, three hours. Requisite: course 104. Readings in modern Yiddish poetry. P/NP or letter grading.

**131B. Modern Yiddish Prose and Drama. (4)** Lecture, three hours. Requisite: course 104. Readings in modern Yiddish prose and drama. P/NP or letter grading.

**131C. Special Topics in Yiddish Literature. (4)** Lecture, three hours. Requisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. P/NP or letter grading.

**199. Special Studies in Yiddish. (2 to 4)** Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. P/NP or letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Yiddish. (4)** Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, this program offers a series of courses introducing the varieties of university discourse and providing instruction in basic to high-level skills. Be-

sides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, and language and composition courses for teachers. Special programs include the First-Year Intensive Program (FIPW) and the Transfer Intensive Program (TIP).

## Undergraduate Study

### Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, English Composition A or 2 (determined by performance on the Subject A Examination) or 2I (determined by performance on both the Subject A Examination and the English as a Second Language Placement Examination). For more information regarding Subject A, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

## English Composition

### Lower Division Courses

**A. Introduction to University Discourse. (No credit)** Lecture, five hours. Enforced requisite: appropriate score on Subject A Examination. Displaces 4 units on student's Study List but yields no credit toward a degree. First course in reading university-level texts and framing written responses that employ a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Completion of course with a grade of C or better or demonstration of minimum competence on Subject A Examination is requisite to course 2.

**2. Approaches to University Writing. (5)** Lecture, four hours. Enforced requisite: course A with a grade of C or better or appropriate score on Subject A Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of course with a grade of C or better satisfies Subject A requirement. Letter grading.

**2I. Approaches to University Writing. (5)** Lecture, six hours. Enforced requisite: appropriate scores on Subject A Examination and ESLPE. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on strategies for developing coherent and well-argued pieces of academic writing and for achieving effective and clear style in academic prose. Completion of course with a grade of C or better satisfies Subject A and ESL requirements. Letter grading.

**3. English Composition, Rhetoric, and Language. (5)** Lecture, three hours. Enforced requisites: satisfaction of Subject A requirement, course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of 20 pages of revised text. Completion of course with a grade of C or better satisfies Letters and Science Writing I requirement. Letter grading.

**3H. English Composition, Rhetoric, and Language (Honors). (5)** Lecture, three hours. Enforced requisites: satisfaction of Subject A requirement, course 2 or English as a Second Language 35 (C or better). Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of 20 pages of revised text. Completion of course with a grade of C or better satisfies Letters and Science Writing I requirement. Letter grading.

**30W. Intermediate Academic Writing: Various Topics. (5)** Lecture, four hours; discussion, one hour. Enforced requisite: course 3 or 3H. Theme-based interdisciplinary writing course. Assignments involve students in critical reading, application, and integration of sources. Minimum of 20 pages of revised text required. Satisfies Letters and Science Writing II requirement. Letter grading.

## Upper Division Courses

**100W. Interdisciplinary Academic Writing. (5)** Lecture, four hours. Requisite: course 3 or 3H. Designed for sophomores/juniors/seniors. Course in academic writing suitable for both lower and upper division students that helps them develop academic papers with a range of complexity and length. Focus on conventions of academic prose and genres across the disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay. Satisfies Letters and Science Writing II requirement. Letter grading.

**110. Writing Adjunct. (4)** Lecture, four hours. Requisites: satisfaction of Subject A requirement, course 3 or 3H. Students must be concurrently enrolled in a course offered in conjunction with course 110 (consult *Schedule of Classes* for courses so designated). Writing assignments use materials from adjunct course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

**120A. Language Study for Teachers: Elementary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature.

**120B. Language Study for Teachers of English: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Review of terminology of English grammar and survey of development of modern grammars. Introduction to basic concepts in bilingual and multilingual education, sociolinguistics, dialectology, and stylistics, especially as applied to analysis and evaluation of writing assigned in secondary school. P/NP or letter grading.

**120C. Language Study for Teachers of Subjects Other Than English: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

**123. Information Literacy and Research Skills. (1)** Lecture, one hour. Preparation: satisfaction of Letters and Science Writing I requirement. Designed to help students become information literate, so they know how to identify, locate, critically evaluate, and use print and electronic information effectively and ethically. Closely interwoven with Writing Programs courses that have information/research-related assignments. P/NP or letter grading.

**129A-129D. Academic Writing in the Disciplines. (4 each)** Lecture, four hours. Designed for juniors/seniors. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discursive forms, stylistic patterns, and research practices in the given discipline. Each course may be taken independently for credit. P/NP or letter grading. **129A.** Literature; **129B.** Social Sciences. Lecture, three hours; discussion, one hour; **129C.** Physical and Life Sciences; **129D.** Fine Arts.

**130A. Composition for Teachers: Elementary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Preparation for future elementary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in primary schools. Letter grading.

**130B. Composition for Teachers: Secondary School. (4)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Preparation for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in secondary schools.

**131A-131D. Specialized Writing. (4 each)** Lecture, four hours. Requisite: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical values of major professions and research areas. Each course may be taken independently for credit. P/NP or letter grading. **131A.** Law and Politics; **131B.** Business and Social Policy; **131C.** Medicine and Public Health; **131D.** Media and Communications.

**132A-132D. Topics in Rhetoric and Writing. (4 each)** Lecture, four hours; discussion, one hour. Requisite: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental requisites must take it for a letter grade. **132A.** Gender and Writing; **132B.** Autobiographical Writing; **132C.** Cultural Studies; **132D.** Variable Topics.

**136A-136B-136C. Practical Writing and Editing. (4-4-4)** Lecture, three hours. Preparation: one course from 131 series. Requisites: satisfaction of Subject A requirement, course 3. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.

**197F. Rhetoric in Modern American Culture. (4)** Seminar, three hours. Requisite: course 100W. One-term field studies course designed to provide students with academic background in and firsthand knowledge of media writing. P/NP or letter grading.

**199. Independent Studies in Writing. (2 to 4)** Tutorial, to be arranged. Requisites: satisfaction of Subject A requirement, course 3 or 3H. Independent studies course supervised by faculty member. Fieldwork and/or internship may also be supervised by Center for Experiential Education and Service Learning or organization offering internship. P/NP or letter grading.

**199I. Independent Studies for Internships. (2 or 4)** Tutorial, to be arranged. Requisites: course 3 or 3H, satisfaction of Letters and Science Writing II requirement. P/NP grading.

## Graduate Courses

**300. Teaching English. (4)** Lecture, four hours. Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school or college English curriculum. S/U or letter grading.

**495A. Supervised Teaching Preparation. (2)** Seminar, two hours. Required of all applicants for teaching assistantships in English. Introduction to teaching of literature intended to prepare teaching assistants for their first assignments in leading discussion sections. Practical concerns of creating assignments, grading papers, and holding conferences. S/U grading.

**495B. Supervised Teaching Preparation. (2)** Seminar, two hours. Course 495A is not requisite to 495B. Required of all teaching assistants who are assigned to English Composition 3 courses. Focus on composition pedagogy, writing course design, assessment of student writing, and specialized problems that may occur in teaching English Composition 3. S/U grading.

**495C. Supervised Teaching Preparation. (2)** Seminar, to be arranged. Requisites: courses 495A, 495B. Required of all teaching assistants in their initial quarter of teaching English Composition 3 or English 4W. Mentoring and group teaching assistant/mentor conferences. S/U grading.

## ENVIRONMENTAL HEALTH SCIENCES

*School of Public Health*

UCLA

Curtis D. Eckhart, Ph.D., Chair

### Professors

Richard F. Ambrose, Ph.D.  
Michael D. Collins, Ph.D.  
Climis A. Davos, Ph.D.  
Jared M. Diamond, Ph.D.  
Curtis D. Eckhart, Ph.D.  
John R. Froines, Ph.D.  
Jon Fukuto, Ph.D.  
William C. Hinds, Sc.D.  
Shane Que Hee, Ph.D.  
Jared M. Diamond, Ph.D.  
Linda Rosenstock, M.D., M.P.H., *Dean*  
Robert H. Schiestl, Ph.D.  
Irwin H. Suffet, Ph.D.  
Arthur M. Winer, Ph.D.  
Zuo-Feng Zhang, M.D., Ph.D.

### Professors Emeriti

Arthur K. Cho, Ph.D.  
Robert A. Mah, Ph.D.

### Associate Professors

Beate R. Ritz, M.D., Ph.D.  
Jane L. Valentine, Ph.D.

### Assistant Professor

Wendie A. Robbins, Ph.D., M.S.N.

### Adjunct Professor

Steve Colome, S.D.

### Adjunct Assistant Professors

Pablo Cicero-Fernandez, D.Env.  
Nola Kennedy, Ph.D.

Wen Chen Victor Liu, Ph.D., *in Residence*

### Field Program Supervisor

Paul Rosenfeld, Ph.D.

## Scope and Objectives

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, and physical hazards in the environment. Its graduates are highly trained scientists and professionals capable of identifying and measuring agents of environmental concern; evaluating the health, environmental, and all other impacts of such agents; developing means for their effective management; and evaluating alternative policies directed at improving and protecting environments. Such training is accomplished through several degree programs which offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences (see Public Health Schoolwide Programs). In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Environmental Health Sciences offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Environmental Health Sciences.

## Environmental Health Sciences

## Upper Division Courses

**100. Introduction to Environmental Health. (4)** Lecture, three hours; discussion, one hour. Preparation: one course each in chemistry and biology. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants. P/NP or letter grading.

**M166. Environmental Microbiology. (4)** (Same as Civil Engineering M166.) Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: Civil Engineering 153. Microbial cell and its metabolic capabilities, microbial genetics and its potentials, growth of microbes and kinetics of growth, microbial ecology and diversity, microbiology of wastewater treatment, probing of microbes, public health microbiology, pathogen control. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

## Graduate Courses

**200A-200B. Foundations of Environmental Health Sciences. (6-6)** Lecture, six hours. Multidisciplinary aspects of environmental health sciences in context of public health for environmental health majors. Letter grading. **200A.** Preparation: one year of undergraduate biology, calculus, chemistry, and physics. **200B.** Prerequisite: course 200A.

**200C. Environmental Health Sciences for Nursing Students. (3)** Lecture, three hours. Preparation: one year of undergraduate biology, calculus, chemistry, and physics. Limited to nursing students. Introduction to physical agents, including noise, thermal environment, ionizing radiation, and nonionizing radiation. Exploration of exposure assessment of air pollution in urban areas, occupational exposure assessment for epidemiological inferences, exposure characteristics, air pollution and excess mortality, assessment of exposure to mixture chemicals, multimedia and ecological exposure assessment. Letter grading.

**201. Seminar: Health Effects of Environmental Contaminants. (2)** Seminar, two hours. Prerequisites: courses 200A, 200B, 230. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit. S/U or letter grading.

**202. Seminar: Environmental Chemistry. (2)** Seminar, one hour. Prerequisites: courses 200A, 200B, 410A, 410B. Environmental chemistry aspects of environmental health sciences through multimedia analyses and biological and microbiological analyses. May be repeated for credit. Letter grading.

**203. Seminar: Ecotoxicology. (2)** Seminar, two hours. Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

**204. Seminar: Exposure Assessment. (2)** Seminar, two hours. Discussion of various topics in exposure assessment. Topics vary by term and include aspects of population activity, microenvironments, types of monitoring (outdoor, indoor, personal, biomarkers), and multimedia sources of exposure. S/U grading.

**205. Environmental Health Sciences Doctoral Seminar. (2)** Seminar, two hours. Limited to environmental health sciences doctoral students. Presentation of current research of environmental health sciences doctoral students. May be repeated for credit. S/U grading.

**206. Seminar: Applied Coastal Ecology. (2)** Seminar, two hours. Discussion of various topics in applied coastal ecology. Topics vary by term and include wetland ecology, restoration ecology, and ecology and management of coastal watersheds. May be repeated for credit. S/U grading.

**210. Public Health and Environmental Microbiology. (4)** Lecture, three hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Basic principles: cycling of matter, fates of natural and man-made compounds in the environment, wastewater and drinking water microorganisms and treatment, and public health microorganisms. S/U or letter grading.

**211. Science and Politics of Environmental Regulation: Coastal Pollution — Sources and Solutions. (4)** Lecture, three hours. Designed for graduate students. Overview of environmental regulations that protect coastal resources, regulatory agencies that have jurisdiction over coastal resources, past and current coastal pollution problems in the U.S., solving pollution problems through treatment, advocacy, enforcement, restoration, remediation, and watershed management. Letter grading.

**212. Applied Ecology. (4)** Lecture, four hours. Preparation: one ecology course. Application of ecological theory and principles to solve environmental problems, including conservation biology, assessment of environmental impacts, and restoration ecology and mitigation of environmental impacts. Letter grading.

**225. Atmospheric Transport and Transformations of Airborne Chemicals. (4)** Lecture, four hours. Preparation: one year of calculus, one course each in physics, organic chemistry, and physical chemistry. Designed for science, engineering, and public health students. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds. S/U or letter grading.

**230. Environmental Management. (4)** Lecture, four hours; discussion, one hour. Prerequisites: Economics 100, Mathematics M112, 115A, Political Science 140A, 142B. Introduction to foundations and principles of environmental management, decision making, and evaluation of environmental policies and programs. Letter grading.

**231. Environmental Decision Systems Analysis. (4)** Lecture, four hours; discussion, one hour. Prerequisite: course 230. Techniques and models of systems analysis and concepts of general system theory as applied to comprehensive study, planning, evaluation, and management of environmental decision systems. Experimentation with relevant computer programs. S/U or letter grading.

**232. Environmental Policy Decision Making. (4)** Lecture, four hours. Prerequisites: courses 230, 231. Foundations, principles, and modeling of environmental policy decision making. Critical analysis of normative and behavioral models of action choices for protection and enhancement of environmental health, and development of an alternative model. S/U or letter grading.

**234. Critical Readings in Environmental Policy for Scientists and Engineers. (4)** Lecture, one hour; discussion, three hours. Prerequisite: course 230 or 235. Designed for graduate science and engineering students. Critical analysis of environmental policies, regulations, and decisions and their scientific basis. Literature revision, classroom presentation, and research paper required. Letter grading.

**235. Quantitative Methods for Environmental Assessment. (4)** Lecture, four hours; discussion, one hour. Preparation: bachelor's degree in science, engineering, or public health, one term of statistics, one year of advanced mathematics. Introduction to quantitative methods for evaluating health effects and environmental impacts of human activities; concepts of environmental assessments and planning. Assignments include statistics analysis, risk assessment, economic methods. Examples from U.S. and California regulations, policy, project environmental assessments. Letter grading.

**M239. Pollution Prevention. (2)** (Same as Urban Planning M262C.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

**240. Fundamentals of Toxicology. (4)** Lecture, four hours. Preparation: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on the human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems. Letter grading.

**M242. Toxicodynamics. (4)** (Formerly numbered 242.) (Same as Molecular Toxicology M242.) Lecture, two hours; discussion, two hours. Prerequisite: course 240. Examination of biochemical, cellular, and molecular mechanisms by which chemicals induce toxicity in wide spectrum of organ systems and in a number of pathological conditions. Letter grading.

**243. Embryology and Teratology. (4)** Lecture, four hours. Prerequisite: course 240. Description of normal mammalian embryology at whole animal, cellular, and molecular levels and of biological, chemical, or physical perturbations of normal processes which produce congenital malformations. Letter grading.

**244. Reproductive and Developmental Toxicology. (4)** Lecture, four hours. Prerequisite: course 240. Introduction to current theory and research related to reproductive and developmental toxicology. Letter grading.

**M245. Laboratory in Toxicological Methods. (2)** (Same as Molecular Toxicology M245 and Pharmacology M234C.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

**M249. Toxics Reduction: Science, Engineering, and Policy Issues. (4)** (Same as Urban Planning M262A.) Lecture, three hours. Prerequisite: Urban Planning 260. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. Letter grading.

**250D. Industrial Hygiene Practice. (2)** Seminar, two hours. Prerequisites: courses 200A, 200B. Presentation of topics that are relevant to current practice of occupational health. Topics include discussions of regulatory framework, risk assessment and risk communication, new legislation, and emergent occupational health issues. S/U grading.

**251A-251B. Occupational Diseases: Recognition and Prevention. (1-1)** Seminar, one hour. Current topics in occupational medicine, with emphasis on disease manifestations and prevention. S/U grading.

**252D. Properties and Measurement of Airborne Particles. (4)** Lecture, four hours. Preparation: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems. S/U or letter grading.

**252E. Identification and Measurement of Gases and Vapors. (4)** Lecture, three hours; discussion, one hour; outside study, two hours. Preparation: one year each of chemistry, physics, and calculus. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors. Letter grading.

**252F. Industrial Hygiene Measurements Laboratory. (3)** Laboratory, three hours. Corequisites: courses 252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment. S/U or letter grading.

- 252G. Industrial and Environmental Hygiene Assessment.** (4) Lecture, one hour; discussion, two hours; laboratory, two hours; outside study, four hours. Requisites: courses 200A, 200B, 252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards. Letter grading.
- 253A. Physical Agents in Work Environment.** (2) (Formerly numbered 253.) Lecture, two hours. Preparation: one year of physics. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and heat in the workplace environment. S/U or letter grading.
- 253B. Physical Agents Laboratory.** (2) Laboratory, two hours. Requisite: course 253A. Hands-on experience in use of survey instruments for evaluation of worker exposure to various physical agents encountered in work environment. Letter grading.
- 254. Health Hazards of Industrial Processes.** (4) Lecture, two hours; four field trips. Requisite: course 255. Industrial processes and operations and occupational health hazards that arise from them. Letter grading.
- 255. Control of Airborne Contaminants in Industry.** (4) Lecture, two hours; laboratory, two hours. Preparation: one year of physics. Requisite: course 252D. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection. S/U or letter grading.
- 256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health.** (4) Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors. Letter grading.
- 257. Risk Assessment and Standard Setting.** (4) Seminar, four hours. Requisites: course 240, Epidemiology 100. Designed to provide students with opportunity to review scientific basis for association of selected occupational and environmental exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to interface of science and regulatory standards. S/U or letter grading.
- 258. Identification and Analysis of Hazardous Wastes.** (4) Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Requisites: course 252E, Biostatistics 100A. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides a critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes. Letter grading.
- 259A. Occupational Safety and Ergonomics.** (4) (Formerly numbered 259.) Lecture, four hours. Discussion of design and modification of products and industrial manufacturing processes to eliminate or control hazards arising out of mechanical, electrical, thermal, chemical, and other potential energy sources and ergonomic risk factors. Discussion of case studies in industrial manufacturing, construction, and agriculture. Letter grading.
- 259B. Occupational Ergonomics Laboratory.** (4) Laboratory, four hours. Requisite or corequisite: course 259A. Hands-on experience using typical instruments and analytical techniques utilized in professional practice and research in occupational ergonomics. Laboratory exercises cover anthropometry, force and strength measurements, biomechanical modeling and static prediction, energy expenditure prediction, posture and motion analysis, use of goniometer, and computer-aided workstation design. Letter grading.
- 259C. Seminar Series: Occupational Ergonomics.** (2) Seminar, two hours. Requisite: course 259A. Emphasis on research methodology as applied to prevention and control of worker-related musculoskeletal disorders. Topics include applied anthropometry, biomechanical modeling, strength measurement, postural analysis, fatigue, and medical surveillance of cumulative trauma disorders. S/U grading.
- 259E. Occupational Safety and Health Program Management.** (4) Lecture, four hours. Designed for graduate students. Introduction to application of management principles and techniques for management of safety and health and loss control programs. Letter grading.
- 259F. Accident Investigation and System Safety.** (4) Lecture, four hours. Requisite: course 259A. Introduction to retrospective and prospective safety hazard analysis, system safety, computer-aided hazard analysis, and methodology and process of accident investigation. Letter grading.
- 259G. Fire Prevention, Protection, and Facility Design.** (3) Lecture, three hours. Requisite: course 259A. Introduction to application of fire sciences, engineering, and management principles to prevention, suppression, and control of fires and explosions and protection of persons and property from fire or explosion damage and injury. Letter grading.
- M259H. Biomechanics of Traumatic Injury.** (4) (Formerly numbered 259H.) (Same as Biomedical Engineering M259H.) Lecture, four hours; outside study, eight hours. Designed for graduate students. Introduction to applied biomechanics of accidental injury causation and prevention; discussion of mechanisms of injury that result in bone and soft tissue trauma; discussion of mechanisms of healing for effective rehabilitation after traumatic injury. Letter grading.
- 261. Chemical Behavior of Aquatic Systems.** (4) Lecture, three hours. Requisites: courses 200A, 200B, Chemistry 20A, 20B, Mathematics 3A. Chemistry of ocean waters, rivers, groundwaters, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, plus applied problems. Letter grading.
- 264. Fate and Transport of Organic Chemicals in the Aquatic Environment.** (4) Lecture, four hours. Preparation: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes. S/U or letter grading.
- M266. Nonpoint Pollutant Sources and Transport Phenomena.** (2) (Same as Environmental Science M266.) Seminar, two hours. Critical analysis course with focus on advanced topics in origins, transport, and fate of nonpoint source pollutants, especially in runoff from urban watersheds. Basics of transport of humic substances, methods to identify sources of pollutants in urban runoff, analysis of urban activities as potential sources, and methods to estimate loadings from particular urban watersheds. S/U grading.
- 296A-296N. Seminars: Research Topics in Environmental Health Sciences.** (2 each) Seminar, two hours. Advanced study and analysis of current topics in environmental health sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:
- 296A.** Coastal Ecological Processes and Problems.
- 296B.** Teratogenesis.
- 296C.** Advances in Environmental Evaluation and Conflict Management.
- 296D.** Research Methods in Pollution Prevention Analysis.
- 296E.** Molecular Topics in Boron Biology.
- 296F.** Toxicology and Exposure Assessment of Toxic Chemicals.
- 296G.** Advances in Aerosol Technology.
- 296H.** Occupational Safety and Ergonomics.
- 296I.** Industrial and Environmental Hygiene.
- 296J.** Germ Cell Cytogenetic/Genetic Biomarkers.
- 296K.** Aquatic Chemistry.
- 296L.** Water Science and Health.
- 296M.** Experimental and Modeling Studies of Atmospheric Pollution.
- 296N.** Genetic Toxicology.
- 400. Field Studies in Environmental Health Sciences.** (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.
- 401. Environmental Measurements.** (4) Lecture, two hours; laboratory, four hours. Requisites: courses 200A, 200B, Chemistry 20A, 30AL. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation. Letter grading.
- 410A. Instrumental Methods in Environmental Sciences.** (4) Lecture, four hours; discussion, two hours; other, two hours. Preparation: one year each of physics, chemistry, and biology. Theory and principles of instrumental methods through lectures and group discussions. Letter grading.
- 410B. Instrumental Methods Laboratory in Environmental Health Sciences.** (4) Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Preparation: one year each of physics, chemistry, and mathematics. Requisites: courses 200A, 200B. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples. Letter grading.
- M411. Environmental Health Sciences Seminar.** (2) (Same as Environmental Science M411.) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.
- M412. Effective Technical Writing.** (2) (Same as Environmental Science and Engineering M412.) Lecture, one hour. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.
- 461. Water Quality and Health.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B, 401. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications. S/U or letter grading.
- 470. Environmental Hygiene Practices.** (2) Lecture, two hours. Requisites: courses 200A, 200B, 230, 401, Epidemiology 100. Field principles and practices of environmental sanitation as applicable to the sanitarian. Topics include theory, code enforcement, and inspection procedures for applicable environmental topic areas. S/U or letter grading.
- 495. Teacher Preparation in Environmental Health Sciences.** (2) Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

J.R. DeShazo, Ph.D. (*Policy Studies*)

### Field Program Supervisor

Paul Rosenfeld, Ph.D. (*Environmental Health Sciences*)

## Scope and Objectives

The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. As the program enters its third decade, Dr. Libby's vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 200 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and remediation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although many participating interdepartmental faculty members are from the College of Letters and Science and the Henry Samueli School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental

Health Sciences. No undergraduate major or master's degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a strong master's-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 24-month internship in an appropriate government agency, national laboratory, or private industry, during which in-depth study of an environmental problem leads to a dissertation.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degree

The Environmental Science and Engineering Program offers the Doctor of Environmental Science and Engineering (D.Env.) degree.

## Environmental Science and Engineering

### Graduate Courses

**M255. Introduction to Statistical Analysis of Environmental Data. (4)** (Same as Statistics CM255.) Lecture, three hours. Designed for graduate students. Routine intermediate applied statistics course, with emphasis on applications to environmental data and statistical computing with the language R. Statistical analysis and scientific report from real data required. S/U or letter grading.

**M266. Nonpoint Pollutant Sources and Transport Phenomena. (2)** (Same as Environmental Health Sciences M266.) Seminar, two hours. Critical analysis course with focus on advanced topics in origins, transport, and fate of nonpoint source pollutants, especially in runoff from urban watersheds. Basics of transport of humic substances, methods to identify sources of pollutants in urban runoff, analysis of urban activities as potential sources, and methods to estimate loadings from particular urban watersheds. S/U grading.

**400A. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Primarily designed for environmental science and engineering doctoral students. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400B. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Requisite: course 400A. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400C. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Requisite: course 400B. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. Letter grading.

**400D. Environmental Science and Engineering Problems Course. (8)** Discussion, eight hours. Preparation: successful completion of internship approved by doctoral committee and program director. Requisite: course 400C. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. S/U or letter grading.

**410A-410B-410C. Environmental Science and Engineering Workshops. (2-2-2)** Discussion, two hours. Primarily designed for environmental science and engineering doctoral students who are conducting problems courses. Development of multidisciplinary skills essential to solution of environmental problems studied within courses 400A through 400D. Development of presentation skills. S/U grading.

**M411. Environmental Health Sciences Seminar. (2)** (Same as Environmental Health Sciences M411.) Seminar, two hours. Required of graduate environmental health sciences students for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**M412. Effective Technical Writing. (2)** (Same as Environmental Health Sciences M412.) Lecture, one hour. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Supervised investigation of advanced environmental problems. S/U grading.

Roberta M. Malmgren, Ph.D.  
Lisa V. Smith, M.S., Dr.P.H.

### Visiting Professor

Robert J. Kim-Farley, M.D., Ph.D.

## Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology that includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study in-

volving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in Epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health Schoolwide Programs).

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Epidemiology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Epidemiology.

## Epidemiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Epidemiology. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in epidemiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

### Upper Division Courses

**100. Principles of Epidemiology. (4)** Lecture, two hours; discussion, four hours. Preparation: one full biological sciences course. Not open for credit to students with credit for course 200. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

### Graduate Courses

**200. Epidemiology I. (4)** Lecture, two hours; laboratory, four hours. Preparation: one full biological sciences course. Requisite: Biostatistics 100A (may be taken concurrently). Not open for credit to students with credit for course 100. Introduction to epidemiology, including factors governing health and disease in populations. Letter grading.

**201A-201B. Epidemiologic Methods I, II. (6-6)** Lecture, four hours; discussion, two hours; outside study, 12 hours. Preparation: at least two upper division biology or social sciences courses. Recommended preparation: course 100 or 200. Requisites: Biostatistics 100A, 100B. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health. Letter grading.

**202A. Epidemiology: Theory and Methodology. (4)** Lecture, four hours. Requisite: course 201B. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering and seasonality; measures of effect, sources of bias, regression to the mean, estimation and hypothesis testing in epidemiology; models for risk and rates; cohort analysis. S/U or letter grading.

**203. Topics in Theoretical Epidemiology. (2)** Lecture, two hours. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

**M204. Logic, Causation, and Probability. (4)** (Same as Statistics M243.) Lecture, four hours. Preparation: two terms of statistics or probability and statistics. Recommended prerequisite: course 201B. Principles of deductive logic and causal logic using counterfactuals. Principles of probability logic and probabilistic induction. Causal probability logic using directed acyclic graphs. S/U or letter grading.

**M211. Statistical Methods for Epidemiology. (4)** (Same as Biostatistics M211 and Statistics M250.) Lecture, four hours. Preparation: two terms of statistics (such as Biostatistics 100A, 100B). Requisites: courses 201A, 201B. Concepts and methods tailored for analysis of epidemiologic data, with emphasis on tabular and graphical techniques. Expansion of topics introduced in courses 201A and 201B and introduction of new topics, including principles of epidemiologic analysis, trend analysis, smoothing and sensitivity analysis. S/U or letter grading.

**M212. Statistical Modeling in Epidemiology. (4)** (Same as Biostatistics M209.) Lecture, four hours. Preparation: two terms of statistics (three terms recommended). Recommended: course M204 or M211. Principles of modeling, including meanings of models, a priori model specification, translation of models into explicit population assumptions, model selection, model diagnostics, hierarchical (multilevel) modeling. S/U or letter grading.

**M218. Questionnaire Design and Administration. (4)** (Same as Community Health Sciences M218.) Lecture, four hours. Requisites: courses 201A and 201B or Community Health Sciences 211A and 211B. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires. Letter grading.

**220. Principles of Infectious Disease Epidemiology. (4)** Lecture, three hours. Requisite: course 100 or 200. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles. S/U or letter grading.

**221. Prevalent and Emerging Infectious Diseases in the World. (4)** Lecture, four hours. Requisites: course 100 or 200, Biostatistics 100A, 100B. Designed for graduate students and medical doctors seeking broad knowledge and detail on prevalent and emerging infectious diseases, including influenza/acute respiratory infections, cholera/diarrheal disease, tuberculosis, hepatitis B, malaria, measles, neonatal tetanus, HIV/AIDS, pertussis (whooping cough). S/U or letter grading.

**222. Arthropods as Vectors of Human Diseases. (4)** Lecture, four hours. Requisites: courses 100 or 200, 220. Comprehensive overview of morphology, systematics, natural history, host/vector/pathogen relationships, and spectrum of diseases carried by arthropods for graduate students, public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases. Letter grading.

**223. Biology and Ecology of Human Parasitic Diseases. (4)** Lecture, four hours. Information on all aspects of parasitic organisms causing human disease, including their morphology, biology, means of diagnosis, and diseases they cause. From epidemiological perspective, special emphasis on way in which parasites maintain themselves in nature and manner in which organisms are transmitted to people. Letter grading.

**225. Role of Public Health Laboratory in Disease Control. (2)** Lecture, two hours. Requisite: course 100 or 200. Role of public health laboratory is to support testing needs of the programs. To successfully fulfill this role, laboratory must provide information based on most sensitive and specific technologies available. Coverage of common infectious disease agents of public health importance and definition of impact of molecular biology on disease detection and epidemiology in modern public health laboratory. S/U or letter grading.

**226. Public Health Responses to Bioterrorism. (4)** Lecture, four hours. Requisite: course 220 or 221. Mitigation of bioterrorism falls outside traditional public health programs and public health graduate education. Because of seriousness of such threats, it is important that individuals trained in public health understand problems and responses. Letter grading.

**227. AIDS: A Major Public Health Challenge. (4)** Lecture, four hours. Requisites: course 100 or 200, Biostatistics 100A or 110A. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

**228. Biology of HIV. (4)** (Formerly numbered M228.) Lecture, three hours. Preparation: two biology courses. Requisites: course 100, Biostatistics 100A. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory. Letter grading.

**229. Epidemiology of Foodborne Illnesses. (2)** Lecture, two hours. Requisites: course 100 or 200, Biostatistics 100A. Food poisoning is a significant cause of morbidity and mortality in both developed and developing world. Examination of etiologic agents of food poisoning and factors specific to foods that allow them to become agents of disease transmission. S/U or letter grading.

**230. Epidemiology of Sexually Transmitted Diseases. (4)** Lecture, four hours. Requisite: course 100 or 200. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

**231. Principles of Control of Infectious Diseases. (2)** Lecture, two hours. Requisites: courses 200, 220. Comprehensive study of tools for control of infectious diseases and application of these tools in public health programs to achieve epidemiologic impact on disease reduction, elimination, or eradication. Letter grading.

**240. Cardiovascular Epidemiology. (2)** Lecture, two hours. Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease. Letter grading.

**241. Issues in Cancer Prevention Research and Policy. (2)** Lecture, two hours. Development of more informed understanding of promise of preventive strategies for cancer and of philosophical, scientific, and practical challenges that these strategies entail. Designed to build on ideas that move from general to more specific topics. S/U grading.

**242. Cancer Epidemiology. (4)** Lecture, four hours. Requisite: course 100 or 200. Introduction to basic concepts of cancer and molecular and genetic epidemiology. Review of current epidemiologic research in cancer in recent medical and epidemiological literature. Research proposal on a cancer-related topic required. S/U or letter grading.

**243. Molecular Epidemiology of Cancer. (4)** Lecture, four hours. Requisite: course 242 or 295. Introduction to basic concepts and methodology of molecular epidemiology of cancer and review of current molecular epidemiologic research of cancer in recent medical and epidemiological literature. S/U or letter grading.

**244. Research Methods in Cancer Epidemiology. (2)** Lecture, two hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Biologic, quantitative, philosophical, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, and cancer control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding. S/U or letter grading.

**245. Epidemiological and Clinical Issues in Research on Aging. (2)** Lecture, two hours. Overview of concepts and current epidemiological and clinical issues in research on aging. Presentations by current epidemiological and clinical researchers at UCLA and coverage of range of current research topics on aging, with focus on conceptual and methodological issues related to each topic area. S/U or letter grading.

**246. Epidemiology of Aging. (2)** Lecture, two hours. Requisite: course 100 or 200. Epidemiologic methods of estimating present and future burdens of aging: morbidity, disability, and dependency. Epidemiology of major disabling conditions affecting the elderly. Evaluation of possible intervention strategies. Methodologic issues in geriatric epidemiology. S/U or letter grading.

**247. Epidemiology of Injuries in the Elderly. (2)** Lecture, two hours. Requisite: course 100. Description of frequency of, risk factors for, and possibilities of preventing injuries in the elderly populations. Comparison of injury outcomes (morbidity and mortality) in younger vs. older populations. Emphasis on methodologic issues of studying elderly people. S/U or letter grading.

**248. Psychiatric Epidemiology. (2)** Lecture, two hours. Requisite: course 100 or 200. Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders. Letter grading.

**249. Genetic Epidemiology I. (2)** Lecture, two hours. Preparation: at least one course in epidemiology, biostatistics, and genetics. Basic concepts in emerging field of genetic epidemiology, with principal focus on genetic study of complex diseases, determining genetic contributions to disease, identifying genes, and characterizing their main effects and interactions with environmental factors. Letter grading.

**250. Terrorism and Mass Destruction. (2)** Lecture, two hours. In wake of terrorist attacks in several American cities, public health students and practicing professionals need understanding and training to respond to disasters and acts of terrorism and mass destruction. Impacts of terrorism and disasters encompass health, psychological, social, political, and economic effects. Timing, location, and circumstances related to terrorist attack and disasters are also important elements. S/U or letter grading.

**251. Epidemiology of Nonintentional Injuries. (4)** Lecture, three hours; discussion, two hours. Requisites: course 100 or 200, Biostatistics 100A. Pertinent epidemiology methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, which focus on research approaches, data sources, analytical techniques. Substantive findings on related subproblem areas presented for critical review. Letter grading.

- 252. Epidemiology of Assault, Homicide, and Suicide.** (2) Lecture, two hours; discussion, one hour. Requisite: course 100 or 200. Presentation and evaluation of epidemiologic research approaches to study of violent injury, including description of incidence, study design, risk factor analysis, and control evaluation. S/U or letter grading.
- 253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures.** (2) Lecture, two hours; discussion, one hour. Requisites: course 100, Biostatistics 100A. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.
- M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries.** (2) (Same as Community Health Sciences M255.) Lecture, two hours. Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. Letter grading.
- 259. Disaster Epidemiology.** (2) Lecture, two hours. Requisites: course 100 or 200, Community Health Sciences 295. Introduction to epidemiologic methodology to study disasters and their health outcomes, including surveillance, loss estimation, risk factor assessment, intervention, and evaluation. Letter grading.
- 260. Environmental Epidemiology.** (2 or 4) Lecture, two hours; discussion, two hours. Requisite: course 100 or 200. Methodological problems and approaches of epidemiology for assessing health impact of major types of environmental exposure. S/U or letter grading.
- 261. Occupational Epidemiology.** (4) Lecture, two hours; discussion, two hours. Requisite: course 100 or 200. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments. S/U or letter grading.
- 262. Seminar: Environmental and Occupational Cancer Epidemiology.** (2) Seminar, two hours. Requisite: course 100 or 200. Discussion of examples of recent epidemiologic studies, with focus on environmental and occupational exposures, especially in areas where controversies have arisen such as for electromagnetic fields and childhood leukemia, and bladder cancer and trihalomethanes levels of drinking water. S/U or letter grading.
- 263. Exposure Assessment in Occupational and Environmental Epidemiology.** (2) Lecture, two hours. Requisite: course 100 or 200. Exposure assessment is often most challenging aspect of epidemiologic studies of occupational and environmental hazards. Focus on integration of industrial hygiene principles and epidemiologic methods to improve exposure assessment protocols and exposure analyses for occupational/environmental health studies. S/U or letter grading.
- 268. Introduction to Pharmacoepidemiology.** (2) Lecture, two hours. Requisite: course 200. Pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U or letter grading.
- 270. Epidemiology and Health Policy.** (2) Lecture, two hours. Requisites: courses 100, or 201A and 201B, Biostatistics 100B or 110B, Health Services 100. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators. S/U or letter grading.
- 271. Assessing Validity of Complementary and Alternative Healthcare Procedures.** (2) Lecture, two hours. Exploration of validity of alternative and complementary healthcare procedures, with special emphasis on disorders in field of neurology. Focus on methods of analyzing clinical and experimental research published in journals which provide support or refute claims made by practitioners of these procedures. Primary procedures include acupuncture, chiropractic, manipulation, massage, and herbal remedies. Letter grading.
- 280. Connecting Epidemiological, Medical, and Mathematical Aspects of Infectious Diseases.** (4) Lecture, four hours. Requisites: courses 200, 220. To deepen and further integrate knowledge on infectious diseases, focus on small number of them to enable in-depth study. Each to be presented and discussed from three viewpoints that facilitate greater understanding: epidemiology, immunology and molecular basis, and epidemiologic and mathematical analysis. Letter grading.
- 290. Seminar: Epidemiology — Infectious and Tropical Disease.** (2) Seminar, two hours. Review of research on specific diseases of public health importance. May be repeated for credit. S/U or letter grading.
- 291. Seminar: Epidemiology — Methodology.** (2) Seminar, two hours. Requisite: course 100 or 200. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.
- 292. Advanced Seminar: Epidemiology.** (2) Seminar, two hours. Requisite: course 201B. Current research in epidemiology. May be repeated for credit. S/U grading.
- 293. International HIV/AIDS Seminar.** (2) Seminar, two hours. Ongoing discussion of worldwide pandemic of HIV/AIDS, with emphasis on problems of surveillance, reporting, and intervention. Discussion of recent literature. Presentations by fellows from other countries. S/U grading.
- 294. Epidemiology and Policy of Occupational and Environmental Health Issues.** (2) Discussion, two hours. Requisites: courses 100 (or 200) and/or 260. Introduction to demands that go beyond "pure science," with focus on issues such as risk communication, potential influence (and ethics) of oversight panels and external review groups on presenting results and conclusions, and interest of government agencies. S/U or letter grading.
- 295. Seminar: Epidemiology — Cancer.** (2) Seminar, two hours. Requisite: course 100 or 200. Introduction of basic concepts of cancer epidemiology and review of current epidemiological research in cancer in recent medical and epidemiological literature. May be repeated for credit. S/U or letter grading.
- 400. Field Studies in Epidemiology.** (2 or 4) Fieldwork, to be arranged. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; 4 units may be applied toward 44-unit minimum total required for M.P.H. degree. Letter grading.
- 401. Database Theory and Practical Applications in Injury Epidemiology.** (2) Lecture, two hours. Requisite: course 201A. Exploration of theory and practical strategies for database construction and manipulation, selection, and use of desktop-computing database applications using a variety of examples from epidemiological research. Letter grading.
- 402. Advanced Data Analysis in Occupational and Environmental Epidemiology.** (4) Lecture, two hours; laboratory, two hours. Preparation: one data management course. Requisites: courses 201A and 201B, or 201A and 261. Development of strategies for analyzing data in occupational and environmental settings. Use of multivariate data analysis techniques typically used in occupational cohort studies, nested case-control studies, and ecologic studies in environmental epidemiology. S/U or letter grading.
- M403. Computer Management and Analysis of Health Data Using SAS.** (4) (Formerly numbered M403B.) (Same as Biostatistics M403B.) Lecture, two hours; laboratory, two hours. Requisites: Biostatistics 100A, 100B (100B may be taken concurrently). Introduction to practical issues in management and analysis of health data using SAS programming language. Cross-sectional and longitudinal population-based data sets to be used throughout to illustrate principles of data management and analysis for addressing biomedical and health-related hypotheses. Letter grading.
- 406. Preparing for Smallpox or Other Bioterrorist Events.** (2) Lecture, two hours. Major public health issue is massive effort to prepare for possible bioterrorist events. Practical application of principles of epidemiology and public health in preparing for smallpox or other bioterrorist events. Letter grading.
- 410. Management of Epidemiologic Data.** (2) (Formerly numbered 410B.) Lecture, two hours. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer. S/U or letter grading.
- 411. Research Resources in Epidemiology.** (2) Lecture, one hour; discussion, one hour. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication. Letter grading.
- 412. Public Health Surveillance.** (2) Lecture, two hours. Requisites: course 100 or 200, Biostatistics 100A. Overview of public health surveillance methodology, including (1) design, implementation, and evaluation of surveillance systems, (2) analysis and interpretation of surveillance data, and (3) application of surveillance methods to specific health-related outcomes. Letter grading.
- 414. Practical Epidemiologic Investigations.** (2 or 4) Lecture, one or two hours; laboratory, one or two hours. Requisite: course 100 or 200. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings. Letter grading.
- 415. Epidemiology for Developing Countries.** (4) Lecture, four hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings. Letter grading.
- 417. Injury Prevention Strategies and Countermeasures.** (2) Lecture, two hours. Requisite: course 100. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading.
- M418. Rapid Epidemiologic Surveys in Developing Countries.** (4) (Formerly numbered 418.) (Same as Community Health Sciences M418.) Lecture, four hours. Requisites: courses 100 and/or 200, Biostatistics 100A. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, including use of microcomputers to develop and test the questionnaire, select the sample, process and analyze data, and prepare final report. Letter grading.
- 419. Applications in Musculoskeletal Epidemiology.** (4) Lecture, two hours; laboratory, two hours. Requisites: course 100 or 200 (may be taken concurrently), Biostatistics 100A. Introduction to principles and practical issues of epidemiologic data analysis for addressing musculoskeletal-related hypotheses. Use of data sets from relevant components of National Health Interview Survey and from musculoskeletal-related epidemiologic studies. Use of SAS programming language, with applications in both UNIX and Windows. Letter grading.

**495. Teacher Preparation in Epidemiology. (2)** Seminar, two hours. Preparation: 18 units of cognate courses in area of specialization. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## ETHNOMUSICOLOGY

*School of the Arts and Architecture*

UCLA  
2539 Schoenberg Music Building  
Box 951657  
Los Angeles, CA 90095-1657

### Professors

Kenneth Burrell, B.A.  
Jacqueline C. Djedje, Ph.D.  
Roger Kendall, Ph.D.  
Steven J. Loza, Ph.D.  
Daniel M. Neuman, Ph.D.  
A. Jihad Racy, Ph.D.  
Timothy Rice, Ph.D.  
Hiromi Lorraine Sakata, Ph.D.  
Anthony Seeger, Ph.D.

### Professors Emeriti

Peter C. Crossley-Holland, M.A.  
Charlotte A. Heth, Ph.D.  
Mantle L. Hood, Ph.D.  
William R. Hutchinson, Ph.D.  
Nazir A. Jairazbhoy, Ph.D.  
J.H.K. Nketia, B.A.  
James W. Porter, M.A.

### Associate Professors

Tara C. Browner, Ph.D.  
Cheryl L. Keyes, Ph.D.  
Helen Rees, Ph.D.  
Roger Savage, Ph.D.

### Lecturers

Sherman Ferguson  
Jesus Guzman  
Shujaat Husain Khan

Charles Owens, B.A.

### Adjunct Professors

Ankica Petrovic, Ph.D.  
Benjamin Suchoff, Ed.D.

### Adjunct Assistant Professors

Francisco Aguabella  
George Bohanon  
Jeffrey Clayton, B.A.  
Jonathan Grasse, Ph.D.  
Abhiman Kaushal  
Donald Kim, B.A.  
Kobla Ladzekpo, M.A.  
Chi Li, B.A.  
Llew Matthews  
Roberto Miranda, M.M.  
Barbara Morrison, A.A.  
Ruth Price  
Thomas Ranier, B.A.  
James Roberson, M.B.A.  
Bobby Rodriguez, M.A.  
Michele Weir, M.A.  
I Nyoman Wenten, Ph.D.  
Anthony Wilson

### Adjunct Associate Professor

Gerald Wilson

### Visiting Associate Professor

Amy Catlin, Ph.D.

### Visiting Assistant Professors

Ivan Varimezov, B.A.  
Tzvetanka Varimezova, B.A.

## Scope and Objectives

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural analysis perspective. The undergraduate and graduate programs in ethnomusicology provide students with broad knowledge of world musics and methods currently used in their study.

The object of systematic musicology, a multidisciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

## Undergraduate Study

### Ethnomusicology B.A.

#### Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a video-

tape of musical performance, following departmental guidelines.

### Preparation for the Major

*Required:* Ethnomusicology 10A, 10B, 10C, 20A, 20B, 20C, and 12 units of performance organizations or private instruction in music (courses 91A through 91Z or 92).

### The Major

#### Ethnomusicology Concentration

*Required:* (1) Group A — Ethnomusicology 175 or 181, 180, 190; (2) group B — seven courses selected from 105 through 121, 128, M131 through 174, C176, C178, C179, C188, 196 through 199S; (3) group C — 12 units from courses 191A through 191Z or 192.

#### Jazz Studies Concentration

*Required:* Ethnomusicology M110A, M111, 120A or 120B, 127, 129A, 129B, 129C, 180 or 181, 186, 12 units of course 171, 12 units of course 177, Music History 150, and three elective courses from Ethnomusicology 105 through 121, 128, M131 through 174, C176, C178, C179, C188, 196 through 199S.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Ethnomusicology offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Ethnomusicology.

## Ethnomusicology

### Lower Division Courses

**10A-10B-10C. World Music Theory and Musicianship. (4-4-4)** Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to Ethnomusicology and World Arts and Cultures majors. Course 10A is requisite to 10B, which is requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition.

**15. American Life in Music. (4)** Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

**20A-20B-20C. Musical Cultures of the World. (4-4-4)** Lecture, four hours; discussion, one hour. Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards. **20A.** Europe and the Americas; **20B.** Near East and Africa; **20C.** South Asia, Southeast Asia, and the Far East.

**91A-91Z. World Music Performance Organizations. (2 each)** Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. **91A.** Music and Dance of the American Indians; **91B.** Music of Bali; **91C.** Music and Dance of the Balkans; **91D.** Music of China; **91E.** Music and Dance of Ghana; **91F.** Music of India; **91G.** Music of Japan; **91H.** Music of Java; **91J.** Music of Korea; **91K.** Music of Mexico; **91L.** Music of Persia; **91N.** Music of the Near East; **91P.** Music of African Americans; **91Z.** Open Ensemble.

**92. Private Instruction in Music. (2)** Studio, one hour. Limited to Ethnomusicology majors. Private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

## Upper Division Courses

**105. Music, Musicians, and Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for undergraduate nonmajors from wide array of backgrounds and interests. How music industry functions and how products are created, marketed, and consumed. Basic information on production of recordings and legal issues faced by musicians, students, and scholars who use music in their work. Letter grading.

**106A. Traditional North American Indian Music. (4)** Lecture, four hours. Native North American traditional music and its role in tribal societies. California, Southwest, Pacific Northwest, Northern and Southern Plains, Great Lakes/Eastern Woodlands, and South-eastern culture areas included. P/NP or letter grading.

**106B. Contemporary North American Indian Music. (4)** Lecture, three hours; discussion, one hour. Contemporary Native North American musical expression, including popular styles (folk, country, rock), intertribal Indian musical genres (powwow), syncretic religious music, and traditional/historic Pan-Indian music. P/NP or letter grading.

**107. South American Indian Music. (4)** Lecture, four hours; outside study, eight hours. Native South American traditional music and its role in indigenous societies. Topics include relationship between speech and song, use of music by shamans, musical structures, and use of indigenous music in creating nationalist and popular music styles. Letter grading.

**M108A-108B. Music of Latin America. (4-4)** Lecture, four hours; discussion, one hour. Course M108A is not requisite to 108B. Survey of traditional and contemporary musical culture. **M108A.** Mexico, Central America, and the Caribbean Isles. (Same as Chicana and Chicano Studies M108A.); **108B.** Latin South America.

**M109. Women in Jazz. (4)** (Same as Afro-American Studies M109 and Women's Studies M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

**M110A-M110B. African American Musical Heritage. (4-4)** (Same as Afro-American Studies M110A-M110B.) Lecture, four hours; discussion, one hour. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

**M111. Ellingtonia. (4)** (Same as Afro-American Studies M145.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

**CM112. African American Music in California. (4)** (Same as Afro-American Studies CM112A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM212. P/NP or letter grading.

**113. Music of Brazil. (4)** Lecture, three hours. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents.

**M115. Musical Aesthetics in Los Angeles. (4)** (Same as Chicana and Chicano Studies M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

**M116. Chicano/Latino Music in the U.S. (4)** (Same as Chicana and Chicano Studies M116.) Lecture, four hours; discussion, one hour. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of the U.S.

**117. American Popular Music. (4)** Lecture, four hours; discussion, one hour. Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music. P/NP or letter grading.

**118. Development of Rock. (4)** History of rock from the 1950s to the 1970s. In-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis.

**M119. Cultural History of Rap. (4)** (Same as Afro-American Studies M107.) Lecture, four hours; discussion, one hour. Introduction to development of rap music and allied forms, with emphasis on musical and verbal qualities, philosophical and political ideologies, gender representation, and influences on cinema and popular culture. P/NP or letter grading.

**120A-120B. Development of Jazz. (4-4)** Lecture, four hours; discussion, one hour. Introduction to jazz; its historical background and its development in the U.S.

**121. Cross-Cultural Perspectives in Jazz. (4)** Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social features which form the basis for new jazz-ethnic music blends.

**C122A-C122B-C122C. Jazz Styles and Analysis. (4-4-4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C222A-C222B-C222C. Letter grading. **C122A.** Early Jazz to Swing Era; **C122B.** Bebop to Avant-garde; **C122C.** Jazz since the Sixties.

**123. Music of Bebop. (4)** Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present.

**125A-125B-125C. Jazz Composition and Arranging. (2-2-2)** Lecture, two hours; outside study, four hours. Examination of various aspects of jazz composition. Differentiation between improvisation and notated composition, as well as between composition and arranging, and introduction to basic arranging concepts. Letter grading. **125A.** Early Jazz to Swing Era; **125B.** Bebop to Avant-garde; **125C.** Jazz since the Sixties.

**127. Jazz Keyboard Harmony. (1)** (Formerly numbered M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory. Letter grading.

**128. Folk Music of Eastern Europe. (4)** Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area.

**129A-129B-129C. Jazz Theory and Improvisation. (2-2-2)** (Formerly numbered M129A-M129B-M129C.) Lecture, four hours; outside study, eight hours. Elements of jazz theory and improvisation. Letter grading. **129A.** Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. **129B.** Requisite: course 129A with a grade of C or better. Medium-level jazz harmonic constructions. **129C.** Requisite: course 129B with a grade of C or better. Advanced-level jazz harmonic constructions.

**M131. Development of Latin Jazz. (4)** (Same as Music M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as "Latin jazz." P/NP or letter grading.

**C136A-C136B. Music of Africa. (4-4)** (Formerly numbered 136A-136B.) Concurrently scheduled with courses C236A-C236B. Letter grading. **C136A.** Lecture, four hours. Introduction to music of Africa through general discussion of select topics such as the continent and its peoples, function, the musician, instruments, musical structure and related arts, and contemporary music. **C136B.** Lecture, four hours; discussion, one hour. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music.

**146. Folk Music of South Asia. (4)** Lecture, three hours; laboratory, one hour. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence.

**147. Survey of Classical Music in India. (4)** Examination of melodic, metric, and formal structures of Indian classical music in context of religious, sociocultural, and historical background of the country.

**C150. Music and Politics in East Asia. (4)** Lecture, four hours. Limited to Ethnomusicology, Music, Music History, World Arts and Cultures, Chinese, Japanese, Korean, and East Asian Studies majors. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C250. Letter grading.

**C156A-156B. Music in China. (4-4)** Letter grading. **C156A.** Lecture, four hours. Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C256A. **156B.** Lecture, three hours; laboratory, two hours. Requisite: course C156A. Introduction to various notational systems. Analysis of representative styles.

**157. History of Chinese Opera. (4)** Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres.

**158A-158B-158C. Studies in Chinese Instrumental Music. (4-4-4)** Lecture, three hours; laboratory, one hour. **158A.** Study of literature, major sources, paleography, theory, and philosophy of the Ch'in, including transcription and analysis. **158B.** Study of literature, major sources, paleography, theory, and philosophy of the P'i P'a, including transcription and analysis. **158C.** Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society.

**C159. Music on China's Periphery. (4)** Lecture, four hours; outside study, eight hours. Designed for undergraduate Ethnomusicology, Music, Music History, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibe-to-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C259. P/NP or letter grading.

**160. Survey of Music in Japan. (4)** (Formerly numbered 160A.) Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms. P/NP or letter grading.

**C169. Music, Science, and Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for Ethnomusicology, Music, and Music History majors. Application of science and technology for both creation and dissemination of music. Introduction to tools and techniques such as CD mastering, digital sampling, recording, and music synthesis, as well as scientific principles underlying such technologies. Concurrently scheduled with course C269. Letter grading.

**170. Acoustics. (4)** Lecture, four hours; discussion, one hour. Interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities.

**171. Instruction in Advanced Jazz Performance. (2)** Laboratory, one hour. Preparation: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units.

**172A. Cognitive Psychology of Music. (4)** Lecture, four hours; discussion, one hour. Designed for nonmajors. Introduction to psychology of music; historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. P/NP or letter grading.

**174. Aesthetics of Music. (4)** Lecture, four hours; discussion, one hour. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples.

**175. Sociology of Music. (4)** Designed for Ethnomusicology, Music History, and Music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusicological inquiry, including study of popular music, ethnomusicology, and cultural politics of music. P/NP or letter grading.

**C176. Psychology of Film Music. (4)** Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C276. Letter grading.

**177. Jazz Combo. (2)** (Formerly numbered M177.) Activity, six hours. Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units. Letter grading.

**C178. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C204. Letter grading.

**C179. Empirical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of empirical approaches in systematic musicology. Exploration of theory and philosophy of science and empiricism, experimental semiotics and aesthetics, acoustics, musical learning theory, psychology of music, psycholinguistics, and related disciplines as applied to musical scholarship based on theory and model building. Concurrently scheduled with course C203. Letter grading.

**180. Analysis of Traditional Music. (4)** (Formerly numbered M180.) Lecture, four hours. Designed for Ethnomusicology, Music History, and Folklore majors. Intensive study of methods and techniques necessary to understand traditional music. P/NP or letter grading.

**181. Anthropology of Music. (4)** Designed for Ethnomusicology, Music History, and Anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure.

**186. Senior Recital or Research Paper. (No credit)** (Formerly numbered M186.) Tutorial. Preparation and performance of one-hour senior recital of jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

**C188. Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Music History majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in the 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course C288. Letter grading.

**190. Study of Ethnomusicology. (4)** Lecture, three hours. Prerequisites: courses 10A, 10B, 10C, 20A, 20B, 20C. Designed for Ethnomusicology majors. Introduction to history of the field, basic fieldwork and analysis methods, and current issues in research.

**191A-191Z. Advanced World Music Performance Organizations. (2 each)** Activity, three hours. Limited to Ethnomusicology majors. Advanced study of traditional vocal and instrumental world music. May be repeated for credit without limitation. **191A.** Music and Dance of the American Indians; **191B.** Music of Bali; **191C.** Music and Dance of the Balkans; **191D.** Music of China; **191E.** Music and Dance of Ghana; **191F.** Music of India; **191G.** Music of Japan; **191H.** Music of Java; **191J.** Music of Korea; **191K.** Music of Mexico; **191L.** Music of Persia; **191M.** Music of Thailand; **191N.** Music of the Near East; **191P.** Music of African Americans; **191Z.** Open Ensemble.

**192. Advanced Private Instruction in Music. (2)** Studio, one hour. Preparation: two years of courses 91A through 91Z or 92. Limited to Ethnomusicology majors. Advanced private or semiprivate music instruction with a distinguished community-based musician, which must be arranged by students and approved by course instructor. May be repeated for credit without limitation.

**196. World Music Teaching Practicum. (4)** Seminar, two hours; fieldwork, three hours; outside study, seven hours. Limited to junior/senior Ethnomusicology majors. Integration of academic work and hands-on training. Participation in theoretical discussions of world music education and application of these theories in elementary and secondary music and social studies classrooms. P/NP or letter grading.

**197. Special Topics in Ethnomusicology. (4)** Lecture/seminar, three hours. Selected topics in ethnomusicology. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. P/NP or letter grading.

**199E. Special Studies in Ethnomusicology. (2 to 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of 8 units.

**199S. Special Studies in Systematic Musicology. (2 to 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of 8 units.

## Graduate Courses

**201. History of Ethnomusicology. (4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Basic literature and schools of thought in field of ethnomusicology from the late 19th century to the 1980s. Letter grading.

**202. Current Issues in Ethnomusicology. (4)** Seminar, three hours; outside study, nine hours. Limited to graduate ethnomusicology students. Current issues, basic literature, and schools of thought in field of ethnomusicology from the 1980s to the present. Letter grading.

**C203. Empirical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of empirical approaches in systematic musicology. Exploration of theory and philosophy of science and empiricism, experimental semiotics and aesthetics, acoustics, musical learning theory, psychology of music, psycholinguistics, and related disciplines as applied to musical scholarship based on theory and model building. Concurrently scheduled with course C179. Letter grading.

**C204. Aesthetic and Philosophical Foundations in Systematic Musicology. (4)** Seminar, three hours; outside study, nine hours. Limited to Ethnomusicology majors. Comprehensive overview of critical approaches to aesthetics in systematic musicology. Exploration of aesthetics and philosophy of music, sociology of music, critical theory, hermeneutics, and music criticism. Concurrently scheduled with course C178. Letter grading.

**207. Seminar: North American Indian Music. (4)** Seminar, three hours. Prerequisite: course 106A or 106B or 106C. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analysis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts.

**208. Seminar: Latin American Music. (4)** Seminar, three hours. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression.

**M211. Seminar: African American Music. (4)** (Same as Afro-American Studies M211.) Seminar, three hours. Prerequisites: courses M110A, M110B. Designed for graduate students. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music.

**CM212. African American Music in California. (4)** (Same as Afro-American Studies CM212A.) Lecture, four hours. Historical and analytical examination of African American music in California, including history, migration patterns, and urbanism to determine their impact on development of African American music in California. Concurrently scheduled with course CM112. S/U or letter grading.

**C222A-C222B-C222C. Jazz Styles and Analysis. (4-4-4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Musicology majors. In-depth analysis of jazz styles and repertoire intended for students with music backgrounds. Concurrently scheduled with courses C122A-C122B-C122C. Letter grading. **C222A.** Early Jazz to Swing Era; **C222B.** Bebop to Avant-garde; **C222C.** Jazz since the Sixties.

**228. Seminar: Balkan Music. (4)** Seminar, three hours. Requisite: course 128. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology.

**233A-233B-233C. European Traditional and Popular Music. (0-0-4)** Discussion, one hour. Review of literature on European traditional and popular music, with special attention to modern issues and processes. May be repeated for credit. In Progress and letter grading.

**C236A-C236B. Music of Africa. (4-4)** Concurrently scheduled with courses C136A-C136B. Letter grading. **C236A.** Lecture, four hours. Designed for graduate students. Introduction to music of Africa through general discussion of select topics such as the continent and its peoples, function, the musician, instruments, musical structure and related arts, and contemporary music. **C236B.** (Formerly numbered C236.) Lecture, four hours; discussion, one hour. Introduction to music of various African cultures and regions. Through readings, lectures, viewing of films, and analysis of music, students gain greater understanding of diverse musical traditions found on African continent and become more cognizant of contributions that people of Africa have made to world music.

**237. Seminar: African Music. (4)** Seminar, three hours. Requisite: course C136A or C136B. Intensive investigation of musical style; historical, social, and cultural aspects of indigenous musical traditions and related art forms.

**240. Music of Arabic-Speaking Near East. (4)** Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required.

**241. Music of Iran and Other Non-Arabic-Speaking Communities. (4)** Lecture, three hours. Requisite: course 282 or course in ear training, analysis, and theory. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required.

**248. Classical Music of India. (4)** (Formerly numbered 248A-248B.) Lecture, three hours; outside study, nine hours. Requisite: course 146 or 147. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required. S/U or letter grading.

**C250. Music and Politics in East Asia. (4)** Lecture, four hours. Designed for graduate students. Political imperatives have long had a direct and often explicit impact on music sound and context in East Asia. Examination of interaction of ideology and musical practice in medieval Korea and in contemporary Korea, Japan, Taiwan, and China. Concurrently scheduled with course C150. Letter grading.

**251. Music of Indonesia. (4)** (Formerly numbered 250A-250B.) Lecture, three hours; outside study, nine hours. Requisite: course 20C. During first term, emphasis on music and related performing arts of Java. Focus on music and performing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indonesian performance group (course 91B or 91H) required. S/U or letter grading.

**252. Seminar: Music of Mainland Southeast Asia. (4)** Seminar, three hours. Requisite: course 20C. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology.

**C256A. Music in China. (4)** Requisite: course 20C. Limited to Ethnomusicology majors. Survey of traditional, popular, and Western-influenced musics currently widespread in China, including musical analysis of different genres; examination of contexts in which they exist. Investigation of profound effect of Confucian and Communist ideologies on music. Concurrently scheduled with course C156A.

**C259. Music on China's Periphery. (4)** Lecture, four hours; outside study, eight hours. Designed for graduate Ethnomusicology, Music, Musicology, and World Arts and Cultures majors. Survey of musics from China's border regions and neighboring countries: technical musical characteristics and important contextual issues related to traditional and modern styles from Mongolia, Uighurs of Xinjiang, Tibet, Tibeto-Burman peoples, Hmong, and indigenous peoples of Taiwan. Concurrently scheduled with course C159. S/U or letter grading.

**M261. Gender and Music in Cross-Cultural Perspective. (4)** (Same as Women's Studies M261.) Seminar, three hours. Designed to foster in-depth understanding of gender in study of music as culture. Topics range from ethnography of gender and sexuality, (de)codification of messages of resistance, and gender representation to gendered politics via musical production. S/U or letter grading.

**262. Musical Ethnography. (4)** Seminar, three hours; outside study, nine hours. Examination of selected book-length ethnographies, most published in last 10 years, as both literary genre and research procedure. S/U or letter grading.

**263. Perspectives in Popular Music Research. (4)** Seminar, three hours. Investigation of theoretical paradigms, issues, and research models of popular music, with emphasis on world music genres, local/global markets, mass mediation, appropriation and aesthetics of style, ethnographic methods, and impact of popular music studies on ethnomusicology. Letter grading.

**264. Urbanism and Music. (4)** Seminar, three hours; outside study, nine hours. Theoretical and methodological issues in study of the city as cultural entity that affects and is affected by music making and of strategies individuals and groups use to remain musically active in an urban area. S/U or letter grading.

**265. Religion and Music. (4)** Seminar, three hours; outside study, nine hours. Cross-cultural examination of role of musical expression as spiritual medium and as artistic expression in world's religions. S/U or letter grading.

**266. Charles Seeger's Life and Thought. (4)** Seminar, three hours; outside study, nine hours. Charles Seeger's (1886 to 1979) major writings and influence on three fields he helped to found (ethnomusicology, systematic musicology, historical musicology), as well as his interest in applied musicology and American composition in the 20th century. S/U or letter grading.

**267. Music and Ecstasy. (4)** Seminar, three hours; outside study, nine hours. Relationship between music and consciousness in different world cultures and role music plays in ecstatic experiences. Phenomena include trance, spirit possession, shamanism, religious ecstasy, mysticism, and artistic inspiration. S/U or letter grading.

**C269. Music, Science, and Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Designed for Ethnomusicology, Music, and Musicology majors. Application of science and technology for both creation and dissemination of music. Introduction to tools and techniques such as CD mastering, digital sampling, recording, and music synthesis, as well as scientific principles underlying such technologies. Concurrently scheduled with course C169. Letter grading.

**271. Seminar: Acoustics of Music. (6)** Seminar, three hours. Requisite: course 170. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western instruments, tuning systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit.

**273. Seminar: Psychology of Music. (6)** Seminar, three hours. Requisite: course 173. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit.

**275. Seminar: Aesthetics of Music. (6)** Seminar, three hours. Requisite: course 176. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit.

**C276. Psychology of Film Music. (4)** Lecture, four hours; outside study, eight hours. Exploration of music in film, animation, and dance through lens of cognitive psychology, with focus on interpretation of film music relative to model of musical meaning. Concurrently scheduled with course C176. Letter grading.

**279. Seminar: Systematic Musicology. (4)** Seminar, three hours. Requisite: course 170. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit.

**281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology. (6-6)** Seminar, three hours; laboratory, two hours. Requisites: courses 201A-201B. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects.

**282. Seminar: Analysis. (6)** Seminar, three hours. Requisite: course 180 or graduate ethnomusicology student. Intensive discussion of techniques used in ethnomusicological analysis, including transcription and notation, with emphasis on analysis of musical performance and music events.

**283. Seminar: Study of Musical Instruments (Organology). (6)** Seminar, three hours. Requisites: courses 201A-201B. Musical instruments studied in terms of their structures, performance contexts, cultural significance, and patterns of change.

**284. Seminar: Anthropology of Music. (4)** Requisites: courses 201A-201B. Analysis of current anthropological paradigms and issues that have major impact on ethnomusicology.

**285. Seminar: Comparative Music Theory. (6)** Seminar, three hours. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations.

**287. Seminar: Folk Music. (4)** (Formerly numbered M287.) Seminar, three hours.

**C288. Music Industry. (4)** Lecture, four hours; outside study, eight hours. Designed for Ethnomusicology, Music, and Musicology majors. Examination of influence of music industry on way music is created, performed, listened to, evaluated, and used today. Historical approach taken, beginning with music published in the 18th century and continuing through development of audio recordings to MTV and popular music today. Concurrently scheduled with course C188. Letter grading.

**289. Research Design and Grant Writing in Ethnomusicology.** (4) Seminar, three hours; outside study, nine hours. Design of dissertation research proposal, locating and applying for dissertation fieldwork grants, organizing and presenting advanced academic proposals with sophisticated methods and professional writing skills. S/U or letter grading.

**290. Seminar: Ethnomusicology.** (6) Seminar, three hours. Requisites: courses 20A, 20B, 20C, 200, 201A, 201B. May be repeated for credit.

**292A-292Z. Seminars: Special Topics in Ethnomusicology.** (4 each) Designed for graduate students. Utilization of special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

**375. Teaching Apprentice Practicum.** (1 to 4) Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A. Teaching Apprentice Practicum.** (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Ethnomusicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

**495B. Teaching with Technology.** (2) Seminar, three hours; outside study, three hours. Limited to graduate ethnomusicology students. Training in presentation, spreadsheet, web design, and digitization software, and its application in classroom and in preparation of an electronic teaching portfolio. S/U grading.

**596. Directed Individual Studies.** (2, 4, or 6) Only 4 units may be applied toward M.A. minimum course requirements.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations.** (2 or 4) May be repeated for credit. S/U grading.

**598. Guidance of M.A. Thesis.** (4, 8, or 12) May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation.** (4, 8, or 12) May be repeated for credit. S/U grading.

Robert M. Maniquis, Ph.D. (*English*)

Malina Stefanovska, Ph.D. (*French and Francophone Studies*)

## Scope and Objectives

The European Studies Program provides undergraduates with an opportunity to study Europe from the vantage points of several disciplines in the humanities and social sciences. Its primary goals are twofold: to enable students to cross the existing boundaries between and within the humanities and social sciences and to develop approaches to European society and culture consonant with the dramatic changes taking place in that region. Not only has the Cold War model of distinct eastern and western blocs lost the bulk of its explanatory power, but European culture, economy, and social structure have been transformed by immigration, unification, Americanization, and new developments in the intellectual and political realms.

The events of recent years make it clear that the University and its students require new academic approaches to the region. The demise of the Soviet Bloc, the increased ethnic conflict throughout the region, the migration of peoples

within Europe and from other parts of the world, the challenges of a rapidly evolving global economic system, and the uncertainties inherent in the process of unification — all these developments call into question the intellectual configurations that have long dominated our thinking. Today the regions of Europe provide a laboratory for examining — and finding solutions for — everything from efforts to integrate people of color to changes in the family and the status of women. They challenge us to consider new philosophical, artistic, and literary approaches and require us to come to grips with the collapse of socialist command economies in the East and the exhaustion of once-successful welfare states in the West.

To enable students to consider these questions, the European Studies major offers an interdisciplinary program leading to the Bachelor of Arts degree. Students are required to (1) study a European language other than English, (2) develop a historical perspective on European issues, (3) examine European culture, society, politics, and economy, and (4) acquire basic analytical and theoretical skills. Central to this effort are a series of core seminars and a senior essay to encourage majors to delve into a research topic of their choice.

## Undergraduate Study

### European Studies B.A.

The curriculum is designed to serve the needs of students who wish to (1) approach the study of Europe from a structured, interdisciplinary perspective, (2) pursue graduate work in disciplines permitting the study of Europe, (3) orient their professional life toward European affairs in fields such as law, business, diplomacy, journalism, and human services, and (4) acquire valuable skills in foreign languages and writing that will assist them in their careers.

### Admission

Interested students should meet with the program chair no later than the beginning of the sophomore year to discuss requirements and formulate their course of study. Students are expected to declare the major at the end of their sophomore year, following normal UCLA procedures, and must have a minimum grade-point average of 2.5 in all preparation courses. Transcripts and course plans demonstrating that they will have completed all lower division requirements by the end of their junior year must be presented.

### Foreign Language Requirement

Students must prepare for the major by studying a European language other than English. This language — the declared foreign language — helps to focus the major and determine options for the period of study abroad. Students are expected to fulfill the specific requisites of their selected language department (French, Germanic Languages, Italian, Slavic Languages and Literatures, Spanish and Portuguese) for entrance into upper division

Massimo Ciavolella, Ph.D.  
Patrick Coleman, Ph.D.  
Michael H. Heim, Ph.D.  
Andrew Hewitt, Ph.D.  
Gail Kligman, Ph.D.  
Geoffrey W. Symcox, Ph.D.  
Daniel S. Treisman, Ph.D.

### Affiliated Faculty

#### Professors

John A. Agnew, Ph.D. (*Geography*)  
Ehrhard Bahr, Ph.D. (*Germanic Languages*)

courses. Students who wish to study Latin or Greek are also required to demonstrate proficiency in a modern language. In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement (Spanish has slightly different course numbers and requirements). Students must complete the lower division foreign language requirement by the end of the sophomore year.

### Preparation for the Major

*Required:* (1) *Humanities and the arts* — one course from Philosophy 1, 2, 4, 5, 6, 7, 8, 21, or 22; one lower division introductory language department course in literature or civilization that focuses on the declared foreign language; one course from Art History 54, 57, Music History 2B, or 13 and (2) *social sciences* — Economics 1 or 5; two courses from History 1A, 1B, 1C; two courses from Geography 3, 5, Political Science 10, 20, 30, 50, Sociology 1, M18, Women's Studies 10.

By carefully selecting courses for the Preparation for the Major, students can fulfill some of their general education requirements.

### Transfer Students

To be admitted as European Studies majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of a foreign language other than English, one language department course in literature or civilization that focuses on the declared foreign language, one philosophy course, one art history or music history course, one semester or two quarters of history of Western civilization, one economics course, and two courses from geography, political science, sociology, or women's studies.

### The Major

*Required:* (1) At least one upper division course in the literature of the declared foreign language, with instruction and reading assignments in that language (see the list of approved courses below); (2) one course from History 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 127C, 128A, 128B, 128C, 129A, 129B, 129C, 130, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, or 141C; (3) European Studies 101 and 199; (4) at least eight electives selected from the list of approved courses, with a minimum of three courses from humanities and three from social sciences. Electives must either continue the regional focus, introduce a theoretical and methodological perspective, or introduce a rationally conceived comparative point of view (sample programs are on file in the program office).

During their senior year students must write an extended paper offering original research on a topic of interest to them. Topics must be approved by a faculty adviser selected by the student and endorsed by the program's executive committee.

Students must consult with the program chair to design their upper division coursework.

### Study in Europe

The program expects students to spend at least one term — and preferably a full academic year — studying in the European country most relevant to their work. This is normally done under the auspices of the University of California Education Abroad Program; however, alternative arrangements can be made at UCLA if students have financial or personal considerations that may prevent them from going overseas. To obtain UCLA credit after returning to campus, students must have their foreign transcripts evaluated by the program faculty and staff.

## European Studies

### Upper Division Courses

**101. Introduction to European Studies. (4)** Discussion, three hours. Limited to and required of European Studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural life, economic relations, nationalism, and international relations.

**102. Special Topics in European Studies. (4)** Discussion, three hours. Variable topics. May be repeated for credit.

**199. Independent Study for Thesis Writers. (4)** Tutorial, to be arranged. Limited to and required of senior European Studies majors. Independent study under supervision of sponsoring professor. Letter grading.

### Course List

All courses are not offered every academic year. Students should contact the individual departments or the European Studies staff for information about the availability of specific courses. Other appropriate courses may be taken by petition.

#### Anthropology

Appropriate courses may be taken by petition.

#### Art History

- 109C. European Art of the 18th Century
- 109D. Art and Architecture of Georgian England
- 110A. European Art of the 19th Century
- 110B. European Art of the 19th Century: Realism and Impressionism
- 110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism
- 150D. Selected Topics in Contemporary Art

#### Bulgarian (Slavic Languages)

- 154. Survey of Bulgarian Literature

#### Classics

Appropriate courses may be taken by petition.

#### Comparative Literature

- 159. Four Modern Dramatists
- C160. Topics in Literature and Visual Arts
- C161. Fiction and History
- C163. Crisis of Consciousness in Modern Literature
- C164. The Modern Continental Novel
- M165. The Holocaust in Literature
- CM170. Alternate Traditions: In Search of Female Voices in Contemporary Literature
- C172. The Postmodern Novel
- M174. Film and Literature of the Spanish-Speaking World

#### Czech (Slavic Languages)

- 155. Survey of Czech Literature from Middle Ages to the Present

#### Dutch (Germanic Languages)

- 100. Modern Dutch Culture and Society
- 113. Modern Dutch and Flemish Literature in Translation
- 120. Introduction to Dutch Studies
- 131. Introduction to Modern Dutch Literature

#### Economics

## Scope and Objectives

The Department of Family Medicine seeks to provide all students with a basic introduction to family-centered care in both the inpatient and ambulatory settings. During the basic clerkship, students develop (1) an appreciation of the breadth and scope of family medicine, (2) a basic knowledge in the broad content areas of

family medicine, and (3) fundamental clinical skills appropriate to family medicine. The overall goal is to provide students with the opportunity to gain an understanding and appreciation of the central role of the primary care physician in the health care system, and to offer advanced clinical training for those students interested in pursuing careers in family medicine. Further, the basic curriculum includes an overview of health care issues facing underserved and immigrant populations in urban America, as well as an introduction to health services research in family medicine.

Family medicine faculty members are active both in leadership roles in the doctoring curriculum and in the new Primary Care College. All first-year students are assigned to work with a family medicine preceptor once a month on a longitudinal basis for the entire year as part of the doctoring program. In the third and fourth (clinical) years, required and elective opportunities exist. All students take a required four-week clerkship in the third year, which is offered at over 10 teaching sites.

For further details on the Department of Family Medicine and a listing of the courses offered, see <http://fm.mednet.ucla.edu>.

## Scope and Objectives

The purpose of the Film, Television, and Digital Media Department is to develop in its students a scholarly, creative, and professional approach to film, television, and digital art forms. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

## Undergraduate Study

### Film and Television B.A.

The undergraduate Film and Television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 90 quarter units (60 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit two letters of recommendation and a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For more specific information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622, or see <http://www.tft.ucla.edu/filmtv/ftvhome.htm>.

## Preparation for the Major

*Required:* Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

## The Major

*Required:* Film and Television 100, 115, 130A, 130B, 150, 154, 155, 163, 185, 192; one critical studies elective (not previously taken as preparation for the major) from 106B, 106C, 107, 108, 112, 113, 114, M117; and a senior concentration (at least 20 units) from one of the following areas: (1) *film production* — courses 175A, 175B, 178, (2) *television and video production/narrative* — courses 165, 176A, 176B, 199, (3) *television and video production/documentary* — courses 176A, 176B, 186, 199, (4) *screenwriting* — courses 135A, 135B, 135C, 199, (4) *animation* — courses 181A, 181B, 181C, (5) *critical studies* — courses 106A, 106B, 106C, 107, 108, 110C, 112, 113, 114, 116, M117, 127, 199.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the *Schedule of Classes* for courses limited to majors only.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Film, Television, and Digital Media offers Master of Arts (M.A.), Master of Fine Arts (M.F.A.), and Doctor of Philosophy (Ph.D.) degrees in Film and Television.

## Film and Television

### Upper Division Courses

**100. Undergraduate Symposium. (1 or 2)** Laboratory, three hours. Limited to Film and Television majors. Structured forum in which undergraduate majors meet on a regular basis to discuss curricular issues, meet with faculty, and have exposure to an array of guest speakers from within the film industry. May be repeated for a maximum of 4 units. Letter grading.

**106A. History of the American Motion Picture. (6)** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

**106B. History of the European Motion Picture. (6)** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change. Letter grading.

**106C. History of African, Asian, and Latin American Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Critical, historical, aesthetic, and social study — together with exploration of ethnic significance — of Asian, African, Latin American, and Mexican films. Letter grading.

**107. Experimental Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

**108. History of Documentary Film. (6)** Lecture/screenings, eight hours; discussion, one hour. Philosophy of documentary approach in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films. Letter grading.

**110A. American Television History. (4)** Lecture/screenings, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting. Letter grading.

**110C. World Media Systems. (4)** Lecture/viewing, four hours; discussion, one hour. Requisite: course 110A. Designed for juniors/seniors. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.

**112. Film and Social Change. (6)** Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development. Letter grading.

**113. Film Authors. (6)** Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.

**114. Film Genres. (6)** Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

**115. Stylistic Studies for the Moving Image: Theory and Practice. (4)** Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kinesthetics, sound, narrative, discourse, and performance.

**116. Film Criticism. (4)** Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

**M117. Chicanos in Film/Video. (6)** (Same as Chicana and Chicano Studies M114.) Lecture/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent "greaser" films, social problem films, the Western, and the gang film — which are major genres that account for films "about" or "with" Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or "signify" on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

**126. Acting for Film and Television. (4)** Laboratory, six hours. Projects in acting for television, video, and film. May be repeated twice for credit.

**127. Problems and Ethical Issues in Film and Telecasting. (4)** Lecture, three hours; laboratory, eight to 10 hours. Relevant and highly interactive lecture/discussion/workshop. Student production teams create multimedia presentations designed to provide meaningful information, raise consciousness, stimulate discussion, and provoke debate about today's powerful media messages (i.e., news, advertising, violence, sex, minority representation).

**128. Media and Ethnicity. (4)** Utilizing the Asian American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.

**CM129. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM229.

**130A. Screenwriting Fundamentals. (2)** Lecture, one hour. Corequisite for graduate students enrolled in course 431. Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri.

**130B. Screenwriting Fundamentals Workshop. (4)** Discussion, three hours. Problems in film and television writing.

**131. Nontheatrical Screenwriting for Film and Television. (4 or 8)** Discussion, three hours. Research and writing of documentary, technical, educational, industrial, and propaganda scripts. May be repeated for a maximum of 12 units.

**135A-135B-135C. Advanced Screenwriting Workshops. (8-8-8)** Laboratory, three hours. Requisite: course 130B. Course 135A is requisite to 135B, which is requisite to 135C. Courses in film and television writing. First act of original screenplay to be developed in course 135A, followed by second act in course 135B, and third act in course 135C. Letter grading.

**140. Interactive Expression. (4)** Lecture, six hours. Introduction to history and practice of interactive media, with emphasis on uniqueness of computer-mediated expression. Letter grading.

**C142. Digital Imagery and Visualization. (4)** Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations. Concurrently scheduled with course C242. Letter grading.

**C143. Moving Digital Image. (4)** Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects. Concurrently scheduled with course C243. Letter grading.

**C144. Interactive Multimedia Authoring. (4)** Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C244. Letter grading.

**C145. Creative Authoring for World Wide Web. (4)** Lecture, three hours; laboratory, three hours. Exploration of creative aspects of World Wide Web as medium for personal/collective expression. Students produce Web works and serve them online. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences. May be repeated once for credit. Concurrently scheduled with course C245. Letter grading.

**C148. Advanced Digital Media Workgroup. (4)** Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment. May be repeated once for credit. Concurrently scheduled with course C248. Letter grading.

**150. Cinematography. (4)** Lecture, three hours; laboratory, three hours. Limited to Film and Television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.

**151. Introduction to Experimental Filmmaking. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Techniques of image manipulation, design, and art direction. Production and completion of an exercise (no longer than three minutes), using 16mm nonsync sound film. May be repeated twice for credit. Letter grading.

**152. Film and Television Sound Recording. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

**153. Motion Picture Lighting. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 150. Limited to Film and Television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Creative lighting techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity.

**154. Film Editing. (4)** Lecture, three hours; laboratory, to be arranged. Limited to Film and Television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound.

**155. Introduction to Digital Media and Tools. (4)** Lecture, six hours; laboratory, to be arranged. Limited to Film and Television majors. Instruction and exercises in basic concepts and software of virtual production environments and digital postproduction tools. Letter grading.

**163. Directing the Camera. (4)** Workshop, eight hours. Limited to Film and Television majors. Investigation of expressive potential of the image within and beyond the narrative from a directorial perspective. Experiments with working methodologies which stimulate visual creativity and positioning the image as the fundamental element of cinematic expression.

**164. Directing the Actor. (4)** Exercises in analysis of script and character for purpose of directing actors. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**165. Advanced Narrative Television Directing. (4)** Laboratory, six hours. Requisites: courses 130B, 185. Limited to Film and Television majors. Supervised exercises in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.

**C170A. Introduction to Digital Effects. (4)** Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C470A. Letter grading.

**175A-175B. Undergraduate Film Production. (8-4 to 8)** Limited to Film and Television majors. **175A.** Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for a short 16mm nonsync film. **175B.** Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of nonsync sound tracks) for short film begun in course 175A.

**176A-176B. Advanced Undergraduate Video Production (8-4 to 8).** Discussion, three hours; laboratory, to be arranged. Requisite: course 185. Limited to Film and Television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing.

**M177. Film and Television Acting Workshop. (2)** (Same as Theater M178.) Laboratory, four hours. Workshop providing opportunities for students to rehearse, perform, and evaluate scenes. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit. Letter grading.

**178. Film and Television Production Laboratory. (2 or 4)** Laboratory, to be arranged. Supervised laboratory experience in various aspects of film and television production. May be repeated for a maximum of 12 units, but only 8 units may be applied toward Film and Television major.

**181A. Animation Design in Film and Television. (4)** Lecture, three hours; laboratory, three hours. History and use of creative arts used in animation to form effective communication on film.

**181B. Writing for Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisite: course 181A. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.

**181C. Animation Workshop. (4 or 8)** Lecture, six hours; laboratory, to be arranged. Preparation: storyboard at first class meeting. Requisite: course 181A. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.

**185. Undergraduate Television and Video Production. (6)** Laboratory, six hours. Limited to Film and Television majors. Instruction and exercises in basic techniques of television and video production. Letter grading.

**186. Introduction to Documentary Video Production. (4)** Lecture, three hours; laboratory, three hours; fieldwork, 12 hours. Limited to Film and Television majors. Viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of a series of exercises from conceptualization through postproduction, culminating in production of short documentary.

**187A-187B-187C. Producing and Directing Remote Multicamera Production. (4-6-6)** Lecture/laboratory, three hours (additional hours to be arranged).

**187A.** Professionally oriented lecture/laboratory/field workshop course designed to provide disciplined planning, responsible leadership, and organizational and problem-solving skills required in deadline remote production. Emphasis on clarity of vision, storytelling, effective execution of pitch, preproduction, shoot, and editorial. **187B-187C.** Instruction and supervised productions of the remote experience, with focus on development and execution of concept. Experience closely patterned after professional experiences in working with talent, production venues, and production logistics of remote on-location video programs.

**192. Film and Television Internship. (4 to 8)** Field experience, to be arranged. Limited to senior Film and Television majors. Internship at film and television industry organizations. May be taken for a maximum of 8 units.

**193A. Film Curatorship. (4)** Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

**193B. Television Curatorship. (4)** Lecture, two hours; discussion, two hours; laboratory, four hours. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

**199. Special Studies in Film and Television. (2 to 8)** Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of 8 units.

## Graduate Courses

**200. Bibliography and Methods of Research in Film and Television. (6)** Discussion, three hours; laboratory, four to six hours (additional screenings and/or video laboratory work as required). Designed for graduate students. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, on-line database searching and retrieval and, when appropriate, use of computer/videodisc technology for research.

**203. Seminar: Film and Other Arts. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies in interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.

**206A. Seminar: European Film History. (6)** Seminar, three hours; film screenings, four to six hours. Requisite: course 106B. Designed for graduate students. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neo-realism, New Wave, etc. May be repeated twice for credit.

**206B. Selected Topics in American Film History. (6)** Seminar, three hours; film screenings, three hours. Recommended preparation: course 106A or 206C. Advanced critical seminar with focus on specific topic or period in U.S. film history. Letter grading.

**206C. Seminar: American Film History. (6)** Seminar, three hours; film screenings, four hours. Introduction to industrial, social, and aesthetic history of the American film. Letter grading.

**207. Seminar: Experimental Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video.

**208A. Seminar: Film Structure. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture. S/U or letter grading.

**208B. Seminar: Classical Film Theory. (6)** Seminar, three hours; film screenings, four hours. Study of principal topics and lines of inquiry that characterize theoretical writings of Arnheim, Eisenstein, Bazin, Kracauer, etc. Letter grading.

**208C. Seminar: Contemporary Film Theory. (6)** Seminar, three hours; film screenings, four to six hours. Requisite: course 208B. Designed for graduate students. Study of redefinition of aims and methods of film theory through contemporary writings. S/U or letter grading.

**209A. Seminar: Documentary Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Nonfictional film and its relation to contemporary culture.

**209B. Seminar: Fictional Film. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

**209D. Seminar: Animated Film. (4)** Seminar, three hours; laboratory, three hours. Designed for graduate students. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture.

**210. Seminar: Contemporary Broadcast Media. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Consideration of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable, and cartridge systems.

**211A. Seminar: Historiography. (4)** Seminar, three hours. Limited to Film and Television M.A. candidates. Beginning examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

**211B. Seminar: Historiography. (4)** Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media.

**215. Seminar: Theory and Method. (4)** Seminar, three hours. Limited to Film and Television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auteurism, semiology, psychoanalysis, sociology, etc.

**217A. Seminar: American Television History. (6)** (Formerly numbered 217.) Seminar, three hours; screenings, four hours. Critical survey of U.S. television industry from its inception to the present. Examination of programming and changes within the industry by considering range of technological, economic, aesthetic, social, and cultural dimensions. Letter grading.

**217B. Seminar: Selected Topics in Television History. (6)** Seminar, three hours; screenings, three hours. Advanced critical seminar, with focus on specific topic or area (historical period, industry, programming, genre, or social formation) in domestic or international television. Letter grading.

**218. Seminar: Culture, Media, and Society. (6)** Seminar, four hours; screenings/discussion, three hours. Emphasis on "discourse of the other(s)." The matization of the other is concerned with theories of "difference" rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered others; place of the cinematic apparatus in this process and how academization of others is positioned vis-à-vis mainstream critical discourse. Letter grading.

**219. Seminar: Film and Society. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

**220. Seminar: Television and Society. (6)** Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit. S/U or letter grading.

**221. Seminar: Film Authors. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

**222. Seminar: Film Genres. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

**223. Seminar: Visual Perception. (4)** Seminar, three hours; film screenings, two hours. Aesthetic, psychological, physiological, and phenomenological approaches to vision as they relate to ways in which viewers experience and "see" film, television, and digital media. Letter grading.

**224. Computer Applications for Film Study. (4)** Survey of computer applications relevant to film study, principally computer-videodisc systems and image capture technology.

**CM229. Contemporary Topics in Theater, Film, and Television. (2)** (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of 6 units. Concurrently scheduled with course CM129.

**C242. Digital Imagery and Visualization. (4)** (Formerly numbered 242.) Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations. Concurrently scheduled with course C142. Letter grading.

**C243. Moving Digital Image. (4)** (Formerly numbered 243.) Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects. Concurrently scheduled with course C143. Letter grading.

**C244. Interactive Multimedia Authoring. (4)** (Formerly numbered 244.) Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects. May be repeated once for credit. Concurrently scheduled with course C144. Letter grading.

**C245. Creative Authoring for World Wide Web. (4)** (Formerly numbered 245.) Lecture, three hours; laboratory, three hours. Exploration of creative aspects of World Wide Web as medium for personal/collective expression. Students produce Web works and serve them online. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences. May be repeated once for credit. Concurrently scheduled with course C145. Letter grading.

**246. Issues in Electronic Culture. (6)** Discussion, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools.

**247. Planning Independent Feature Production. (4)** Lecture, three hours. Analysis of procedure, problems, and budgets in planning feature-length script for film and television production, with emphasis on role of producer and creative organizational techniques of producing. Letter grading.

**C248. Advanced Digital Media Workgroup. (4)** (Formerly numbered 248.) Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment. May be repeated once for credit. Concurrently scheduled with course C148. Letter grading.

**249. Digital Revolution. (4)** Lecture, four hours; discussion, one hour; laboratory, one hour. Comprehensive survey to introduce students to emerging digital technologies, resulting new media, and their artistic, economic, and social implications. Topics include digital editing, digital previsualization, multimedia, World Wide Web, interactive television, and virtual reality.

**268. Seminar: Short Film. (4)** Seminar, two hours; discussion, two hours. Designed for graduate students. Study of problems presented by conceptualization of form and structure of the short film, with classical and student examples.

**270. Seminar: Film Criticism. (6)** Seminar, three hours; film screenings, four to six hours. Designed for graduate students. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit.

**271. Seminar: Television Criticism. (6)** Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit. S/U or letter grading.

**273. Seminar: Contemporary Film and Television Criticism. (6)** Seminar, three hours; film and television screenings, four to six hours. Limited to Film and Television Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television.

**274. Seminar: Research Design. (4)** Seminar, three hours. Designed for second-year Film and Television Ph.D. students. Examination of general principles that govern formulation of major research projects and preparation of a prospectus for Ph.D. dissertation.

**276. Seminar: Non-Western Films. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

**277. Seminar: Narrative Studies. (6)** Seminar, four hours; screenings/discussion, three hours. Designed for graduate students. Study of writings on theory of narrative structure and their significance for analysis of film forms. S/U or letter grading.

**289A-289B-289C. Current Business Practices in Film and Television. (4-4-4)** Requisite: course 247. Designed for graduate students. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

**291A-291B-291C. Role of Management in Entertainment Industry. (4-4-4)** Requisite: course 247. Designed for graduate students. Study of artistic, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

**292A-292B-292C. Network Television Management and Decision Making. (4-4-4)** Lecture, two hours; discussion, two hours. Requisite: course 247. Designed for graduate students. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only 8 units may be taken for credit.

**293. Seminar: Film and Television Curatorship. (4)** Seminar, three hours (additional hours as required). Designed for graduate students. Study and practice of issues in archival research and administration.

**298A-298B. Special Studies in Film and Television. (2 to 4 each)** Lecture/discussion. Designed for graduate students. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Film Image Design Laboratory. (4)** Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Conception and design of nonnarrative film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit.

**402A-402B. Advanced Narrative Directing Workshops. (4 or 8-8)** Limited to nine graduate film and television students. Production of a 10- to 15-minute fiction film or project. Letter grading. **402A.** Laboratory, six or 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Students budget and preproduce their projects by end of first term. **402B.** Laboratory, 12 hours; fieldwork, to be arranged. Requisite: course 402A. In second term students must complete photography on location and/or in studio.

**402C. Advanced Narrative Directing Workshop. (4)** Laboratory, four hours. Requisites: courses 402A, 402B. Completion of postproduction on projects started in courses 402A and 402B. Letter grading.

**403A-403B-403C. Advanced Documentary Workshops. (4 to 8 each)** Lecture/discussion/laboratory, 16 to 24 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to graduate film and television students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

**404A-404B. Advanced Abstract/Experimental Media Workshops. (8-8)** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 405, 409, 410A, 410B, 410C, 433. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

**404C. Advanced Abstract/Experimental Media Workshop. (8)** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Requisites: courses 404A, 404B. Completion of all stages of production and postproduction on projects started in courses 404A and 404B. Letter grading.

**405. Television Production Workshop. (8)** Laboratory, eight hours; other, to be arranged. Limited to graduate film and television students. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

**406. Experimental Video Workshop. (4)** Laboratory, six hours; other, to be arranged. Limited to graduate film and television students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

**407. Video Documentary Workshop. (8)** Laboratory, 12 hours. Limited to graduate film and television students. Exploration of documentary video, including screening a variety of international works and producing a short documentary project using single-camera field production techniques.

**408A-408B. Video Editing. (4-4)** Discussion, four hours; laboratory, to be arranged. Limited to graduate film and television students. Individual instruction in electronic editing. **408A.** Online Editing; **408B.** Offline Editing.

**409. Directing the Actor for the Camera Workshop. (4)** Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Limited to M.F.A. production program students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

**410A-410B-410C. Film Production Workshops. (8-12-8)** Lecture/discussion/laboratory, 24 hours; fieldwork, to be arranged. Requisites: courses 405, 409. Limited to and required of first-year M.F.A. production program students. Production workshop spanning three terms, designed to give hands-on experience in all aspects of film production (the tools and a practicum of the medium) as each student writes/directs/edits a six-minute film. Letter grading.

**411. Survey of Multimedia Production. (4)** Lecture, three hours; laboratory, three hours. Introduction to various methods of digital production, with focus on photo manipulation, desktop nonlinear postproduction, and distribution on World Wide Web. Letter grading.

**416. Intermediate Cinematography. (4)** Lecture, two hours; laboratory, four hours. Intermediate study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses. Letter grading.

**417. Lighting for Film and Television. (4)** Lecture, two hours; laboratory, six hours. Limited to graduate film and television students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit. Letter grading.

**418. Cinematography and Directing. (4)** Lecture, two hours; laboratory, six hours. Requisite: course 417. Limited to graduate film and television students. Supervised filming of short dramatic projects on sound stage and at exterior locations that explore complexity of process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects. Letter grading.

**419. Advanced Cinematography. (4)** Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 417, 418. Limited to graduate film and television students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.

**420. Digital Cinematography. (4)** Lecture, two hours; laboratory, four hours. Advanced study of principles of digital cinematography, with emphasis on electronic exposure control, lighting, formats, cameras, and lenses. Letter grading.

**423A. Direction of Actors for Film and Television. (4)** Lecture, four hours; workshop. Preparation: first film project. Limited to graduate film and television students. Required of all production majors shooting a fiction thesis. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**423B. Advanced Direction of Actors for Film and Television. (4)** Studio workshop, six hours. Requisite: course 423A. Limited to graduate film and television students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

**431. Introduction to Film and Television Screenwriting. (4)** Lecture, three hours. Limited to graduate film and television students. Introductory course in problems of film and television screenwriting.

**433. Writing the Short Screenplay. (4)** Lecture, three hours. Limited to and required of first-year M.F.A. production program students. Conception, development, and writing of a six-minute dramatic film script to be produced in courses 410A, 410B, 410C. Letter grading.

**434. Advanced Screenwriting. (8)** Discussion, three hours. Requisite: course 130A. Advanced problems in writing of original film and television screenplays. May be repeated twice for credit. Letter grading.

**435. Advanced Writing for Short Film and Television Screenplays. (4)** Discussion, three hours. Requisite: course 410C. Limited to graduate film and television students. Conception, development, and writing of dramatic film script to be produced as an advanced or thesis project. Letter grading.

**437. Nontheatrical Writing for Film and Television. (4)** Discussion, three hours. Limited to graduate film and television students. Advanced problems in the field of documentary and special feature programs, with emphasis on research and preproduction. May be repeated for a maximum of 16 units.

**451. Advanced Design for Film and Television. (4)** Laboratory, to be arranged. Limited to graduate film and television students. Advanced study and practice of techniques and methods of design for motion pictures. Art direction for advanced workshop productions. May be repeated for a maximum of 12 units.

**452A. Film and Television Sound Recording. (4)** Lecture, three hours; laboratory, four hours. Limited to graduate film and television students. Principles and practices of film and television sound recording, including supervised exercises.

**452B. Music Recording Workshop. (4)** Lecture, four hours; laboratory, eight hours. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.

**452C. Film and Television Sound Rerecording. (4)** Lecture, three hours; laboratory, three hours. Limited to graduate film and television students. Recording of sprocketed media: basics of mixing 16mm and 35mm film soundtracks to single stripe or three stripe magnetic film. Overview of prepping tracks for final mix. Fundamentals of Automatic Dialogue Replacement and Foley. Rerecording and video/audio postproduction of unsprocketed media: emphasis on multitrack tape and nonlinear disk-based recording and editing systems. Includes all track building approaches, from production sound electronic editing, Automatic Dialogue Replacement, Foley, backgrounds, hard FX and MX through final mix. Techniques of combining sprocketed and unsprocketed media in postproduction.

**454A-454B. Advanced Film Editing. (4-4)** Lecture, three hours; laboratory, to be arranged. Preparation: submission of a rough cut and/or copy of screenplay. Limited to film and television thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.

**459A-459B. Directing for Film and Television. (4-4)** Lecture, three hours. Limited to graduate film and television students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in theater, film, and television.

**464A-464B. Advanced Film Directing. (8-8)** Hours to be arranged. Limited to graduate film and television students. Special problems in direction of fictional and documentary films.

**465. Narrative Television Workshop. (8)** Laboratory, eight hours. Supervised exercises in television multicamera direction, with emphasis on creative use of composition and sound, and communication with those in front of and behind the camera. Letter grading.

**466A-466B. Advanced Professional Video Workshops. (8-8)** Lecture, three hours; laboratory, to be arranged. Requisites: courses 405, 410A, 410B, 410C, 423A. Limited to graduate film and television students. Hands-on problems in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.

**468. Creative Location Film Production. (8)** Lecture, four hours; discussion, four hours; laboratory, to be arranged. Requisites: courses 247, 405, 410A, 410B, 410C, 423A, 433. Limited to graduate directing or producer's program students. Problems of location, production, directing, and cinematography in various "real-life" practical locations. Practical application of solving problems and communication within limitations of production experience.

**C470A. Introduction to Digital Effects. (4)** Lecture, three hours; laboratory, to be arranged. Introductory study of digital effects production, with specific focus on motion graphics, compositing, effects processing, and title sequences. Concurrently scheduled with course C170A. Letter grading.

**475. Film I. (8)** Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of film production, including pre-production planning and production of a group short film.

**476. Video I. (8)** Discussion, three hours; laboratory, to be arranged. Designed for graduate students. Study of basic techniques of television and video production, including completion of one or more projects.

**478. Video II. (8)** Discussion, three hours; laboratory, to be arranged. Requisites: courses 185, and 405 or 476. Designed for graduate students. Group experience in video production with each member rotating on crew work in production of individual or collective projects.

**482A-482B. Advanced Animation Workshops. (4 or 8 each)** Lecture, three hours; laboratory, to be arranged. Requisites: courses 181A, 181B, 181C. Advanced organization and integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

**486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production. (2 to 4)** Preparation for thesis production, four to eight hours. Limited to M.F.A. production program students. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Should be taken term before student plans to advance to candidacy.

**487. Directed Individual Study: Postproduction Laboratory. (4)** Laboratory, eight hours. Limited to M.F.A. production program students. Completion of projects in final stages of postproduction. May not be repeated.

**488A. Interactive Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisites: courses 181A, 181C, 489A. Organization and integration of various creative arts used in animation and interactive media to form complete study of a selective interactive animation project. May be repeated for a maximum of 16 units.

**488B. Advanced Interactive Animation. (4 to 8)** Lecture, six hours; laboratory, to be arranged. Requisite: course 488A. Organization and integration of various creative arts used in animation and interactive animation to form completed project of a selected interactive topic. May be repeated for a maximum of 16 units.

**489A. Computer Animation in Film and Video. (4 to 8)** Lecture, six hours; laboratory, four to eight hours; other, to be arranged. Preparation: a completed animated film. Requisites: courses 181A, 181C. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units.

**489B. Production in Computer Animation. (4 to 8)** Lecture, six hours; laboratory, four to eight hours. Requisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.

**496. Practice of Teaching Film and Television. (2)** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

**498. Professional Internship in Film and Television. (4, 8, or 12)** Full- or part-time at a studio or on a professional project. Designed for M.F.A. program advanced students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program. (2 to 8)** Preparation: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production. (2 to 12)** Hours to be arranged. Limited to graduate students. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Film and Television. (2 to 12)** Hours to be arranged. May be taken for a maximum of 12 units. S/U grading.

**598. M.A. Thesis in Film and Television. (2 to 12)** Hours to be arranged. Preparation: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Ph.D. Dissertation in Film and Television. (2 to 12)** Hours to be arranged. Preparation: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated. S/U grading.

# FOREIGN LITERATURE IN TRANSLATION

## Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

## Foreign Literature in Translation

### Course List

#### Afrikaans (Germanic Languages)

40. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid to Postapartheid Era, in English Translation

#### Ancient Near East (Near Eastern Languages)

150A. Survey of Ancient Near Eastern Literatures in English: Mesopotamia

150B. Survey of Ancient Near Eastern Literatures in English: Egypt

150C. Survey of Ancient Near Eastern Literatures in English: Syria and Palestine

#### Arabic (Near Eastern Languages)

150. Classical Arabic Literature and Culture in English

151. Modern Arabic Literature in English

#### Armenian (Near Eastern Languages)

150A-150B. Survey of Armenian Literature in English

C152. Modern Armenian Drama as Vehicle for Social Critique

C153. Art, Politics, and Nationalism in Modern Armenian Literature

#### Bulgarian (Slavic Languages)

154. Survey of Bulgarian Literature

#### Chinese (East Asian Languages)

C150A. Lyrical Traditions

150B. Traditional Narrative and Drama

151. Chinese Literature in Translation: Modern Literature

152. Topics in Contemporary Chinese Literature and Culture

M153. Chinese Immigrant Literature and Film

#### Classics

40W. Reading Greek Literature: Writing-Intensive

41W. Reading Roman Literature: Writing-Intensive

140. Topics in History of Greek Literature

141. Topics in History of Latin Literature

142. Ancient Epic

143A. Ancient Tragedy

143B. Ancient Comedy

144. Topical Studies in Ancient Culture

#### Comparative Literature

All undergraduate courses

#### Czech (Slavic Languages)

155. Survey of Czech Literature from Middle Ages to the Present

#### Dutch (Germanic Languages)

113. Modern Dutch and Flemish Literature in Translation

#### East Asian Languages and Cultures

161. Buddhist Literature in Translation

#### English

108A-108B. English Bible as Literature

108C. English Bible as Literature: Special Topics

#### French (French and Francophone Studies)

162. Modern French Thought in Translation

164A-164B-164C. The French Novel in Translation  
 165. Topics in French Literature in Translation  
 166. French and Francophone Autobiography, in English

#### German (Germanic Languages)

50A. Great Works of German Literature in Translation: Medieval Period through Classicism  
 50B. Great Works of German Literature in Translation: Romanticism to the Present  
 106. The Faust Tradition from the Renaissance to the Modern Age  
 M108. Love and Sex in German Literary Tradition  
 112. Jewish Writing and Thought in German Culture from 1755 to the Present  
 116. Special Topics in Modern Literature and Culture

#### Hungarian (Slavic Languages)

121. Survey of Hungarian Literature in Translation

#### Iranian (Near Eastern Languages)

150A-150B. Survey of Persian Literature in English

#### Italian

42A-42B. Italy through the Ages in English  
 50A-50B. Masterpieces of Italian Literature in English  
 102A-102B-102C. Italian Cultural Experience in English  
 110. Dante in English  
 121. Literature and Film  
 122. Italian Theater  
 140. Italian Novella from Boccaccio to Basile  
 150. Modern Fiction in Translation  
 M158. Women in Italian Culture  
 230A-230B. Folk Tradition in Italian Literature  
 260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature

#### Japanese (East Asian Languages)

150. Japanese Literature in Translation: Classical  
 151. Japanese Literature in Translation: Modern  
 154. Postwar Japanese Culture through Literature  
 M156. Literature and Technology

#### Jewish Studies (Near Eastern Languages)

M150A-150B. Hebrew Literature in English  
 M151A-151B. Modern Jewish Literature in English  
 175. Modern Hebrew Novel as a Film

#### Korean (East Asian Languages)

150. Korean Literature in Translation: Classical  
 151. Korean Literature in Translation: Modern

#### Old Norse Studies (Germanic Languages)

40. Heroic Journey in Northern Myth, Legend, and Epic  
 C139. The Saga  
 C140. Viking Civilization and Literature

#### Polish (Slavic Languages)

152A-152B-152C. Survey of Polish Literature

#### Portuguese (Spanish and Portuguese)

40A-40B. Portuguese, Brazilian, and African Literature in Translation  
 46. Brazilian Culture and Civilization

#### Romanian (Slavic Languages)

152. Survey of Romanian Literature

#### Russian (Slavic Languages)

25. Russian Novel in Translation  
 25W. Russian Novel in Translation  
 118. Russian Literature of Middle Ages and Enlightenment  
 119. Golden Age and the Great Realists  
 120. Literature and Revolution  
 124C-124T. Studies in Russian Literature  
 125. The Russian Novel in Its European Setting  
 126. Survey of Russian Drama  
 M127. Women in Russian Literature  
 128. Russian Science Fiction  
 C170. Russian Folklore

#### Scandinavian

50. Introduction to Scandinavian Literatures and Cultures  
 50W. Introduction to Scandinavian Literatures and Cultures  
 141. Backgrounds of Scandinavian Literature  
 142. Scandinavian Literature of the 19th Century  
 143. Scandinavian Literature of the 20th Century  
 C144. Henrik Ibsen on the World Stage  
 C145. Getting Married: Strindberg and Battle of the Sexes  
 C146. Kierkegaard and Foundations of Existentialism  
 C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll  
 C180. Literature and Scandinavian Society  
 C182. Theory of the Scandinavian Novel  
 184. Hans Christian Andersen  
 CM186. Voices of Women in Scandinavian Literature  
 187. Scandinavian Film: Bergman and Others

#### Serbian/Croatian (Slavic Languages)

154. South Slavic Literature

#### Slavic (Slavic Languages)

125. Interwar Central European Prose  
 126. Postwar Central European Prose

#### Spanish (Spanish and Portuguese)

60A-60B-60C. Hispanic Literatures in Translation

#### Ukrainian (Slavic Languages)

152. Ukrainian Literature

#### Yiddish (English)

121A. 20th-Century Yiddish Poetry in English Translation  
 121B. 20th-Century Yiddish Prose and Drama in English Translation  
 121C. Special Topics in Yiddish Literature in English Translation

 Nicole I. Dufresne, Ph.D.  
 Kimberly Jansma, Ph.D.

## Scope and Objectives

The UCLA French and Francophone Studies Department is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French and Francophone studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The undergraduate lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The undergraduate upper division program is chiefly devoted to perfecting linguistic skills and to the study of French and Francophone culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French and Francophone literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program offers both M.A. and Ph.D. degrees and comprises training in the various fields of French and Francophone culture, literature, and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered.

## Undergraduate Study

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in French grammar and/or composition.

## French B.A./French and Linguistics B.A.

### Preparation for the Majors

*Required:* French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students who receive a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of the instructor. Students in Plan III must also take Linguistics 20.

### Transfer Students

To be admitted to the French majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of French and one French literature course. Students in Plan III must also complete an introduction to linguistics course.

### The Majors

Three plans are offered by the department:

#### Plan I: French/Francophone Studies in Literature and Culture

Plan I leads to the Bachelor of Arts in French. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French and Francophone literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

#### Plan II: Interdisciplinary French/Francophone Studies

Plan II, with emphasis on French and Francophone culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French and Francophone literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French and Francophone studies to be selected in or outside the department in consultation with the undergraduate adviser.

#### Plan III: French and Linguistics

Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. *Required:* Twelve upper division courses, including French 100, 101, 102; two courses from 105, 107, 108A, 108B, 109; two courses from

114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students' knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French and Francophone Studies Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French and Francophone Studies Department. Freshmen and sophomores may take up to two courses taught in English, selected from French 162 through 165, in fulfillment of major requirements (if taken in the junior or senior year, these courses count as electives). A maximum of 8 units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

### Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take courses 170A and 170B where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 30- to 35-page honors thesis (honors projects and the honors thesis are not to be confused). Courses 170A and 170B count as one course toward the requirements for the French majors.

Students may begin the honors program toward the end of their junior year or during their senior year. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

### French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* French 6 or equivalent and one course from 12, 14, or 15.

*Required Upper Division Courses (20 units):* French 100 or 101, and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of French and Francophone Studies offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in French and Francophone Studies.

## French

### Lower Division Courses

- 1. Elementary French. (4)** Lecture, five hours.
- 1G. Elementary French for Graduate Students. (3)** Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.
- 2. Elementary French. (4)** Lecture, five hours. Enforced requisite: course 1 with a grade of C- or better.

**2G. Elementary French for Graduate Students. (3)**

Enforced requisite: course 1G. Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading.

**3. Elementary French. (4)** Lecture, five hours. Enforced requisite: course 2 with a grade of C– or better.

**4. Intermediate French. (4)** Lecture, four hours. Enforced requisite: course 3 with a grade of C– or better. P/NP or letter grading.

**5. Intermediate French. (4)** Lecture, four hours. Enforced requisite: course 4 with a grade of C– or better. P/NP or letter grading.

**6. Intermediate French. (4)** Enforced requisite: course 5 with a grade of C– or better.

**8. Intensive First-Year French. (12)** Lecture, 15 hours. All-in-French intensive language program equivalent to first year of college French and designed to develop basic language skills. Additional work in language and media laboratory required. Offered in summer only. P/NP or letter grading.

**9. Intensive Second-Year French. (8)** Lecture, 10 hours; media laboratory, three hours. Enforced requisite: course 3. Intensive course equivalent to first two terms of intermediate French and designed to improve proficiency in reading, writing, and speaking. Offered in summer only. P/NP or letter grading.

**10A-10D. French Conversation. (2 each)** Discussion, three hours. Enforced requisite: course 3 with a grade of B or better.

**12. Introduction to Study of French and Francophone Literature. (5)** Lecture, two hours; discussion, one hour. Enforced requisite: course 6. Principles of literary analysis as applied to selected texts in poetry, theater, and prose by French and Francophone writers. P/NP or letter grading.

**14. Introduction to French Culture and Civilization, in English. (5)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 14W. Study of contemporary French institutions and issues in cultural, political, and socioeconomic realms. P/NP or letter grading.

**14W. Introduction to French Culture and Civilization, in English. (5)** Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 14. Study of contemporary French institutions and issues in cultural, political, and socioeconomic realms. Satisfies Letters and Science Writing II requirement. Letter grading.

**15. Theory and Correction of Diction. (4)** Enforced requisite: course 6. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.

**41. French Cinema and Culture. (5)** Lecture/screenings, five hours; discussion, one hour. Introduction to French culture and literature through study of films of cultural and literary significance. P/NP or letter grading.

**60. French and Francophone Novel. (5)** Lecture, three hours; discussion, one hour. Study of literary masterpieces produced by writers from France and Francophone world (Canada, Africa, Caribbean, etc.) from the 17th century to early 21st century. P/NP or letter grading.

## Upper Division Courses

**100. Written Expression: Techniques of Description. (4)** Lecture, three hours. Requisite: course 6. Writing assignments follow close analysis of relevant texts and study of related grammatical structures. P/NP or letter grading.

**101. Written Expression: Techniques of Narration. (4)** Lecture, three hours. Requisite: course 6. Writing assignments follow close analysis of relevant texts and study of related grammatical structures. P/NP or letter grading.

**102. Advanced Expository Writing: Techniques of Argumentation. (4)** Lecture, three hours. Requisites: courses 100, 101. Study of rhetorical devices and revision of related grammatical structures. Writing assignments follow analysis of relevant texts. P/NP or letter grading.

**105. Structure of French. (4)** Lecture, three hours. Requisite: course 15. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation.

**107. Advanced Oral Expression. (4)** Lecture, three hours. Requisite: course 100. Communicative and rhetorical strategies; techniques of oral exposition, argumentation, and analysis.

**108A-108B. Advanced Practical Translation. (4-4)** Lecture, three hours. P/NP or letter grading:

**108A.** Lecture, three hours. Requisite: course 101. Translation of journalistic texts, including biography and interview, formal and informal reporting, advertising and idiomatic language. Work in techniques of translation. P/NP or letter grading.

**108B.** Lecture, three hours. Requisite: course 102 or 108A. Translation of literary and sociocultural texts, including editorials, polemical issues, film subtitles. Comparative stylistics of translation. P/NP or letter grading.

**109. Language and Communication in Business French. (4)** Lecture, three hours. Requisite: course 6. Oral and written business communication in France, including commercial transactions, banking, job search, correspondence, and management. P/NP or letter grading.

**110. Culture of Business in France. (4)** Lecture, three hours. Requisite: course 100 or 109. Cultural issues in business French, including mentalities, practices and customs, marketing, and advertising strategies. P/NP or letter grading.

**112. Medieval Foundations of European Civilization. (4)** Lecture, three hours; discussion/film screenings, two hours. Medieval texts, culture, social structure, and political history as they lay bases of European modernity. P/NP or letter grading.

**114A-114B-114C. Survey of French Literature. (5-5-5)** Lecture, three hours. Requisite: course 12. Survey of French literature from the medieval period through the 20th century. P/NP or letter grading:

**114A.** Medieval and Renaissance Literature. (5) Lecture, three hours. Requisite: course 12. Masterpieces of medieval and Renaissance literature, including examples of epic (*La Chanson de Roland*), romance (Chrétien de Troyes' *Yvain*), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne). P/NP or letter grading.

**114B.** 17th and 18th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fayette, La Fontaine, Laclous, Diderot, Voltaire, and Rousseau. P/NP or letter grading.

**114C.** 19th and 20th Centuries. (5) Lecture, three hours. Requisite: course 12. Study of major literary movements and writers of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sartre, Robbe-Grillet, and Duras. P/NP or letter grading.

**115A-115B-115C. Medieval French Literature. (4-4-4)** Lecture, three hours. P/NP or letter grading:

**115A.** Invention of Love in the 12th Century. (4) Lecture, three hours. Selections from the broad range of lyric poetry and narrative romance in which is first elaborated "romantic" (sometimes called "courtly") love. Readings include works of the troubadours and *trouvères*, different versions of the Tristan-myth, a romance of Chrétien de Troyes, and first part of *Romance of the Rose*. P/NP or letter grading.

**115B.** Medieval Knight: Heroism and Its Social Problems. (4) Lecture, three hours. Readings in literature and history of medieval warfare and its ideals in relation to social structure of the time. Texts include *La Chanson de Roland*, *Raoul de Cambrai*, *La Mort le roi Artu*, crusade history, and Georges Duby's *Guerrillers et paysans*. P/NP or letter grading.

**115C.** Comic Structure and Social Class. (4) Lecture, three hours. Medieval comedy, to be studied in relation to class structures and their evolution in the Middle Ages, takes a number of forms. Often obscene in the *fabliaux*, it can turn parodic in the *Roman de Renart*, simultaneously satiric, fantastic, and religious in the bourgeois drama of Arras, and utterly charming in the unclassifiable *Aucassin et Nicolette*. P/NP or letter grading.

**116A-116B-116C. Renaissance. (4-4-4)** Lecture, three hours. P/NP or letter grading:

**116A.** La Pléiade and 16th-Century Poetry. (4) Lecture, three hours. Study of the linguistic and poetic "revolution" brought about by *Defence et illustration* (1549), including texts by Marot, Scève, Labé, Du Bellay, and Ronsard. P/NP or letter grading.

**116B.** The Novel and Other Early 16th-Century Prose. (4) Lecture, three hours. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin. P/NP or letter grading.

**116C.** Late French Humanism. (4) Lecture, three hours. Emphasis on Montaigne's *Essais*, with other texts from the Religious Wars period. P/NP or letter grading.

**117A-117B-117C. 17th Century. (4-4-4)** Lecture, three hours. P/NP or letter grading:

**117A.** Theater. (4) Lecture, three hours. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine. P/NP or letter grading.

**117B.** Prose. (4) Lecture, three hours. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine. P/NP or letter grading.

**117C.** Culture and Society. (4) Lecture, three hours. Study of 17th-century political, social, religious, and courtly aspects, including libertine and *salons milieuux*, la Fronde, and Versailles. P/NP or letter grading.

**118A-118B-118C. 18th Century. (4-4-4)** Lecture, three hours. P/NP or letter grading:

**118A.** Satire. (4) Lecture, three hours. Readings include Montesquieu's *Lettres persannes*, Diderot's *Neveu de Rameau* and *Rêve de d'Alembert*, and Voltaire's *Cortes*. P/NP or letter grading.

**118B.** The Novel. (4) Lecture, three hours. Readings include Prévost's *Manon Lescaut*, Diderot's *La Religieuse* and *Jacques le fataliste*, excerpts from Rousseau's *Julie*, and Laclous' *Les Liaisons dangereuses*. P/NP or letter grading.

**118C.** Theater. (4) Lecture, three hours. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau. P/NP or letter grading.

**119A-119D. 19th Century. (4 each)** Lecture, three hours. P/NP or letter grading:

**119A.** Romanticism. (4) Lecture, three hours. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vigny, Balzac, and Stendhal. P/NP or letter grading.

**119B.** Generation of 1848. (4) Lecture, three hours. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the *théâtre à thèse* and Parnassian poetry. P/NP or letter grading.

**119C.** Naturalism and Symbolism. (4) Lecture, three hours. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Becque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarmé. P/NP or letter grading.

**119D. Turn of the Century. (4)** Lecture, three hours. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Barrès, Alain-Fournier, Jarry, Rousset, France, and Romain-Roland. P/NP or letter grading.

**120A-120B-120C. 20th Century. (4-4-4)** Lecture, three hours. P/NP or letter grading:

**120A. Early 20th-Century Writers. (4)** Lecture, three hours. Readings of works by Claudel, Apollinaire, Valéry, Gide, and Proust. P/NP or letter grading.

**120B. Literature from 1918 to 1945. (4)** Lecture, three hours. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh. P/NP or letter grading.

**120C. Post-World War II Literature. (4)** Lecture, three hours. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras. P/NP or letter grading.

**121A-C121B. Contemporary Francophone Literature. (4-4)** Lecture, three hours. P/NP or letter grading:

**121A. Francophone African Literature. (4)** Lecture, three hours. Survey of literary works by Francophone writers from Maghreb and sub-Saharan Africa. P/NP or letter grading.

**C121B. (4)** Lecture, three hours. Study of Francophone African, Caribbean, Vietnamese, or Quebec literatures and cultures, with specific attention to issues of cultural contact, language, colonialism, anticolonialism, nationalism, resistance and dissidence, and postcolonial theory. Concurrently scheduled with course C203. P/NP or letter grading.

**124. The Short Story. (4)** Lecture, three hours. Survey of short fiction forms in France and the French-speaking world.

**125. Evolution of French Comedy. (4)** Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the theater of the absurd.

**130. Special Topics in French and Francophone Cultures. (4)** Lecture, three hours. Prerequisites: courses 6, 12. Study of French and Francophone cultures of Middle Ages, Renaissance, "Ancien Régime," and 19th and 20th centuries. Fourth hour may be required for viewing films and other laboratory activities. May be repeated for credit. Letter grading.

**132. Contemporary France. (4)** Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France.

**M140. Women's Studies in French Literature. (4)** (Same as Women's Studies M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/NP or letter grading.

**141. Cinema and Literature in France. (4)** Lecture, three hours (additional hours may be required for viewing films and other laboratory activities). Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects.

**142. Poetry and Music. (4)** Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the setting of poetical texts to music, from the troubadours to modern times.

**M143. Rhetoric of Rule. (4)** (Same as Communication Studies M117.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing past and present attempts to manipulate rulers' images in the "media" of their respective cultures. P/NP or letter grading.

**150. Studies in Medieval Literature. (4)** May be repeated once for credit with consent of major adviser.

**151. Studies in 16th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**152. Studies in 17th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**153. Studies in 18th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**154. Studies in 19th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**155. Studies in 20th-Century Literature. (4)** May be repeated once for credit with consent of major adviser.

**156. Studies in Contemporary French and Francophone Literature. (4)** Lecture, three hours. May be repeated once for credit with consent of major adviser. P/NP or letter grading.

**157. Studies in French Critical Theory and Philosophy. (4)** Lecture, three hours. Advanced study of major concepts in contemporary French thought, with attention to its influence on French literature and culture, and its application to literary and nonliterary texts.

**158. Studies in History of Ideas. (4)** Lecture, three hours. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major adviser.

**160. Francophone Cultures, in English. (4)** Lecture, three hours. Study of historical, anthropological, legal, literary, or filmic texts to provide students with broad view of some main issues in field of colonial and postcolonial Francophone studies. P/NP or letter grading.

**162. Modern French Thought in Translation. (4)** Lecture, three hours. Reading and discussion of contemporary works in translation. May be repeated for credit with consent of major adviser. P/NP or letter grading.

**164A-164B-164C. The French Novel in Translation. (4-4-4)** Lecture, three hours. Texts and authors to be studied announced in advance for each offering.

**165. Topics in French Literature in Translation. (4)** Lecture, three hours. Variable topics to be announced each term. May be repeated for credit with consent of major adviser. P/NP or letter grading.

**166. French and Francophone Autobiography, in English. (4)** Lecture, three hours. Genre of self-portrait covers writers from Montaigne and Rousseau to the 20th century. Focus on rhetoric of genre and its relation to broad questions of identity, gender, race, and class. P/NP or letter grading.

**170A-170B. Thesis Tutorial. (4-4)** Tutorial, to be arranged. Limited to senior French majors with 3.5 departmental and 3.25 overall grade-point averages. Letter grading. **170A. Research Methods.** Preparation: completion of one honors project or one seminar. Individual study of research techniques related to a topic leading to an honors thesis. Required work includes bibliography, outline, prospectus. **170B. Requisite: course 170A.** Individual study on a topic leading to an honors thesis of approximately 30 to 35 pages to be written under guidance of a faculty member.

**199. Special Studies in French. (2 to 8)** Preparation: consultation with undergraduate adviser. Limited to juniors/seniors. May be repeated once.

## Graduate Courses

**200. Contemporary French Theories. (4)** (Formerly numbered 203.) Lecture, three hours. Introductory study of French structuralist and poststructuralist thought in literature, linguistics, psychoanalysis, anthropology, philosophy, and feminism, which may include texts by Althusser, Barthes, Deleuze, Derrida, Foucault, Genette, Irigaray, Kristeva, Lacan, Lyotard, and others. S/U or letter grading.

**201. Techniques of Literary Analysis. (4)** (Formerly numbered 205.) Lecture, three hours. Practice in close analysis of literary texts, including *explication de texte*. S/U or letter grading.

**202. Cultural Studies. (4)** Lecture, three hours. Introduction to theoretical approaches to popular and mass culture, and to postcolonial and Francophone cultures. Topics include emergent disciplines and theories such as sociology and structuralism, the city, revolution, avant-garde strategies, media, diaspora during postwar modernization, Algerian War, May 68, and beyond. Theorists include Barthes, de Certeau, Bourdieu, Baudrillard, Lyotard, Ross, Rey Chow, Virilio. S/U or letter grading.

**C203. Contemporary Francophone Literature. (4)** (Formerly numbered C222.) Lecture, three hours. Study of Francophone African, Caribbean, Vietnamese, or Quebec literatures and cultures, with specific attention to issues of cultural contact, language, colonialism, anticolonialism, nationalism, resistance and dissidence, and postcolonial theory. Concurrently scheduled with course C121B. S/U or letter grading.

**204. Studies in Autobiography. (4)** Lecture, three hours. Introduction to theories of autobiography and subjectivity, and to genre of autobiography in literatures in French across centuries. Topics include early modern approaches to self-writing, Rousseau and emergence of modern self, women's autobiography in France and Francophone world. Theorists may include Georges Gusdorf, Philippe Lejeune, Paul de Man, Jacques Derrida, Helene Cixous, Michel Foucault, Pierre Bourdieu, Toril Moi. S/U or letter grading.

**205A-205B. Studies in Cinema and Literature. (4-4)** Lecture, three hours. Discussion of selected topics in French and Francophone cinema and literature. S/U or letter grading.

**206A-206B. Studies in Generative Anthropology. (4-4)** (Formerly numbered 241.) Lecture, three hours. Discussion of principles of generative anthropology and their application to given set of literary, philosophical, and scientific texts and/or other cultural phenomena. S/U or letter grading.

**207. Studies in History of Ideas. (4)** (Formerly numbered 260A-260B.) Seminar, three hours. Particular problems in French literature and ideas. May be repeated for credit. S/U or letter grading.

**214. Problematics of Medieval Language and Literature. (4)** Lecture, three hours. Requisite to courses 215A, 215B, 250A, 250B, 250C. Introduction to Old French and the problematics of medieval literature.

**215A-215B. Medieval Literature. (4-4)** Lecture, three hours. Requisite: course 214. Development of a vernacular culture in the Middle Ages. Exploration of social functions of texts designated as "literary" by modernity as part of social, economic, and political evolutions in which those texts played key roles. Letter grading. **215A. Medieval Subject; 215B. Narrative Types.**

**216. Renaissance. (4)** Lecture, three hours. French literature of the 16th century studied within historical, intellectual, and cultural contexts. Letter grading.

**217. 17th Century. (4)** Lecture, three hours. Readings in 17th-century literature studied within historical, cultural, and literary contexts. Letter grading.

**218. Enlightenment. (4)** Lecture, three hours. Readings in 18th-century French literature and thought: novels, satires, plays, and other key Enlightenment *philosophies*. Letter grading.

**219. 19th Century. (4)** Lecture, three hours. Readings in 19th-century literature, covering development of the novel, lyric poetry, and theater from Romantic period to *fin-de-siècle*. Letter grading.

**220. 20th Century. (4)** Lecture, three hours. Overview, both historical and analytical, of 20th-century French literature set in context of several key critical topics that interrogate canonical interpretation. Letter grading.

**242. Introduction to Study of Narrative. (4)** Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature.

**250A. Major Medieval Texts. (4)** Seminar, three hours. Requisite: course 214. Intensive study of individual texts from multiple perspectives, such as *La Chanson de Roland*, a romance of Chrétien de Troyes, *Le Roman de la rose*, or François Villon's *Grand Testament*. May be repeated for credit.

**250B. Structures of Medieval Literature. (4)** Seminar, three hours. Requisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures. May be repeated for credit.

**250C. Problems in Medieval Literature. (4)** Seminar, three hours. Prerequisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism. May be repeated for credit.

**251A-251B. Studies in the Renaissance. (4-4)** May be repeated for credit.

**253A-253B. Studies in the 17th Century. (4-4)** May be repeated for credit.

**254A-254B. Studies in the 18th Century. (4-4)** May be repeated for credit.

**255A-255B. Studies in the 19th Century. (4-4)** May be repeated for credit.

**256A-256B. Studies in Contemporary Literature. (4-4)** May be repeated for credit.

**257A-257B. Studies in French-African Literature. (4-4)** May be repeated for credit.

**258A-258B. Studies in Literary Criticism. (4-4)** May be repeated for credit.

**259A-259B. Studies in Philosophy and Literature. (4-4)** May be repeated for credit.

**M270. Seminar: Literary Theory. (5)** (Same as Comparative Literature M294, East Asian Languages M251, English M270, German M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

**M299. Research Resources for European Studies. (2)** (Same as German M299, Information Studies M299, Italian M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

**370. Teaching French in Secondary School. (4)** Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credential in French.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching French at College Level. (4)** Seminar, three hours; discussion, one hour. Designed for graduate students. Theory and practice of language teaching. S/U grading.

**596. Directed Individual Studies or Research. (2 to 4)** Tutorial, to be arranged.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8)** May be repeated for a maximum of 16 units. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 4)** Maximum of 4 units may be applied toward M.A. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** S/U grading.

## FRESHMAN GENERAL EDUCATION CLUSTERS

*College of Letters and Science*

UCLA  
A265 Murphy Hall  
Box 951571  
Los Angeles, CA 90095-1571

(310) 794-2018  
<http://www.college.ucla.edu/ge/clusters/>

### Scope and Objectives

Available to entering freshmen only, general education clusters are an option for satisfying general education requirements. Clusters are yearlong, collaboratively taught, interdisciplinary courses that focus on a topic of timely importance, such as the global environment or interracial dynamics. The courses are taught by some of UCLA's most distinguished faculty members and seasoned graduate students. During Fall and Winter Quarters, students attend lecture courses and small discussion sections and/or laboratories. In Spring Quarter, the same students enroll in one of a number of satellite seminars dealing with topics related to the cluster theme.

General education clusters are designed to strengthen the writing, quantitative reasoning, critical thinking, and information literacy skills that students need to excel at UCLA. At the conclusion of the entire yearlong cluster, students complete nearly a third of their general education course requirements, satisfy their general education seminar requirement, and fulfill the College of Letters and Science Writing II requirement. Cluster students are also guaranteed enrollment in an English Composition 3 (Writing I) class during Fall or Winter Quarter of their cluster year. They are eligible for three quarters of honors credit, with the Spring Quarter seminar providing Honors Collegium credit.

For the current cluster course offerings and general education credit, refer to <http://www.college.ucla.edu/ge/clusters/>.

### General Education Clusters

#### Lower Division Courses

**M1A-M1B-M1CW. Global Environment. (5-5-5)** (Same as Environment M1A-M1B-M1CW.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Letter grading. **M1A-M1B.** Multidisciplinary Perspective I, II. Lecture, three hours; discussion, two hours. Human effects on Earth's ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. **M1CW.** Special Topics. (Formerly numbered M1C.) Seminar, three hours. Enforced requisites: course M1B, and English Composition 3 or 3H. Not open for credit to students with credit for former course M1C. Examination of specialized environmental topics such as air and water, global warming, and feeding Earth's population. Satisfies Letters and Science Writing II requirement.

**20A-20B-20CW. Interracial Dynamics in American Culture, Society, and Literature. (5-5-5)** Course

20A is enforced requisite to 20B, which is enforced requisite to 20CW. Letter grading. **20A-20B.** Lecture, three hours; discussion, two hours. Examination of nature and meaning of race in American society through study of history, literature, and law. Consideration, among other topics, of construction of race as a social and cultural category among two or more groups and exploration of ways in which race has shaped understanding of American citizenship. **20CW.** Special Topics. (Formerly numbered 20C.) Seminar, three hours. Enforced requisites: course 20B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 20C. Consideration of how experience, debates, and issues of race are represented and understood in historical, legal, cinematic, and literary contexts. Satisfies Letters and Science Writing II requirement.

**21A-21B-21CW. History of Social Thought. (5-5-5)** Course 21A is enforced requisite to 21B, which is enforced requisite to 21CW. Letter grading. **21A-21B.** Lecture, three hours; discussion, two hours. Introduction to key issues in humanities and social sciences through reading of prominent social theories of past four centuries. Consideration of writers from Rousseau and Wollstonecraft to Foucault and Beauvoir in historical context and from perspectives of academic specialties for which their work is fundamental. **21CW.** Special Topics. (Formerly numbered 21C.) Seminar, three hours. Enforced requisites: course 21B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 21C. Examination of cross-section of classical and modern social theories and debates that shape them. Satisfies Letters and Science Writing II requirement.

**22A-22B-22CW. Toward World Economy: Perils and Promise of Globalization. (5-5-5)** Course 22A is enforced requisite to 22B, which is enforced requisite to 22CW. Letter grading. **22A-22B.** Lecture, three hours; discussion, two hours. Exploration of causes and mechanisms of globalization as well as its consequences. Critical examination of globalization theories, international institutions of trade, finance, governance, and overall impact of globalization on human society. **22CW.** Special Topics. (Formerly numbered 22C.) Seminar, three hours. Enforced requisites: course 22B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 22C. Topics may include global governance, development, and health. Satisfies Letters and Science Writing II requirement.

**23A-23B-23CW. Inside Performing Arts: Interdisciplinary Exploration of Performance in Society and Culture. (5-5-5)** Course 23A is enforced requisite to 23B, which is enforced requisite to 23CW. Open only to first-year freshmen. Letter grading. **23A-23B.** Lecture, four hours; discussion, two hours. Introduction to historical development and evolution of performing arts, aesthetic theories and practices, and political, social, and cultural contexts within which performance has evolved. **23CW.** Special Topics. (Formerly numbered 23.) Seminar, three hours. Enforced requisites: course 23B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 23C. Topics include origins and ideas of performance, art and performance, and music as cultural expression. Satisfies Letters and Science Writing II requirement.

**24A-24B-24CW. Work, Labor, and Social Justice in the U.S. (5-5-5)** Course 24A is enforced requisite to 24B, which is enforced requisite to 24CW. Open only to first-year freshmen. Letter grading. **24A-24B.** Lecture, three hours; discussion, two hours. Exploration of ways in which work has been transformed over the last century, impact of this transformation on working people, and role of labor movement as force for social justice. **24CW.** Special Topics. Seminar, three hours. Enforced requisites: course 24B, and English Composition 3 or 3H. Topics include labor law/history, gender, race, and workplace. Satisfies Letters and Science Writing II requirement.

**25A-25B-25CW. Politics, Society, and Urban Culture in East Asia. (5-5-5)** Course 25A is enforced requisite to 25B, which is enforced requisite to 25CW. Letter grading. **25A-25B.** Lecture, three hours; discussion, two hours. Comprehensive exploration of historical evolution of popular East Asian urban culture and interrelationship of East Asian politics, social life, and economic and urban cultural expression. **25CW.** Special Topics. Seminar, three hours. Enforced requisites: course 25B, and English Composition 3 or 3H. In-depth examination of issues in historical and contemporary East Asian popular culture. Satisfies Letters and Science Writing II requirement.

**50A-50B-50C. Perception and Illusion: Cognitive Psychology, Literature, and Art. (5-5-5)** Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Letter grading. **50A-50B.** Lecture, three hours; laboratory, two hours. Through study of cognitive psychology, literature, and visual arts, examination of nature of visual perception, optical illusion, and the many ways in which we use our senses to construct reality. **50C.** Special Topics. Seminar, three hours. Examination in depth of issues related to aesthetics of perception and cognition, computers and consciousness, and narrations of perception.

**60A-60B-60CW. The U.S., 1963 to 1974: Politics, Society, and Culture. (5-5-5)** Course 60A is enforced requisite to 60B, which is enforced requisite to 60CW. Letter grading. **60A-60B.** Lecture, three hours; discussion, two hours. Interdisciplinary exploration of U.S. society from assassination of Kennedy to resignation of Nixon. Topics include civil rights, Great Society, anti-Vietnam war movement, political and artistic countercultures, and changes in technology, law, and the media. **60CW.** Special Topics. (Formerly numbered 60C.) Seminar, three hours. Enforced requisites: course 60B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 60C. In-depth examination of political and cultural issues affecting U.S. society from 1963 to 1974. Satisfies Letters and Science Writing II requirement.

**70A-70B-70CW. Evolution of Cosmos and Life. (5-5-5)** Course 70A is enforced requisite to 70B, which is enforced requisite to 70CW. Letter grading. **70A-70B.** Lecture, three hours; discussion, two hours. Use of concept of evolution, as it applies to biological organisms, Earth, solar system, and the universe itself, to introduce students to both the life and physical sciences. Examination of evolution of the universe, galaxy, solar system, and Earth in course 70A; focus on evolution of life in course 70B. **70CW.** Special Topics. (Formerly numbered 70C.) Seminar, three hours. Enforced requisites: course 70B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 70C. Examination in depth of various issues of evolution. Topics may range from creation of California's physical landscape to debate between evolution and creationism. Satisfies Letters and Science Writing II requirement.

**71A-71B-71CW. Biotechnology and Society. (5-5-5)** Course 71A is enforced requisite to 71B, which is enforced requisite to 71CW. Letter grading. **71A-71B.** Lecture, three hours; discussion, two hours; laboratory, two hours. Exploration of methods, applications, and implications of biotechnology and of ethical, social, and political implications as well as biological underpinnings. **71CW.** Special Topics. Seminar, three hours. Enforced requisites: course 71B, and English Composition 3 or 3H. Topics include in-depth examination of ethics and human genetics, bioweapons and biodefense, sex and biotechnology. Satisfies Letters and Science Writing II requirement.

**80A-80B-80CW. Frontiers in Human Aging: Biomedical, Social, and Policy Perspectives. (5-5-5)** Course 80A is enforced requisite to 80B, which is enforced requisite to 80CW. Letter grading. **80A-80B.** Lecture, three hours; discussion, two hours; laboratory, two hours. Examination of aging process from vantage points of multiple disciplines, including biology, psychology, sociology, ethics, and public policy. Study of biomedical and biological aging and psychological, social, and ethical implications of the phenomena. **80CW.** Special Topics. (Formerly numbered 80C.) Seminar, three hours. Enforced requisites: course 80B, and English Composition 3 or 3H. Not open for credit to students with credit for former course 80C. In-depth examination of gender and aging, cellular aging, cancer, and aging of the brain. Satisfies Letters and Science Writing II requirement.

**97A-97Z. Cluster Colloquia. (1 each)** Seminar, one hour; reading period, two hours. Designed for students who have completed a GE cluster. Study, through small-group discussion and projects, of selected topics related to a cluster theme or topic. Consult *Schedule of Classes* for topics and instructors. May be repeated once for credit. P/NP grading:

**97A.** Reading the Cosmos. (1) Seminar, one hour; reading period, two hours. Further exploration of evolution of the cosmos and life through great writing, playwrights, poets, philosophers, scientists, and science journalists. P/NP grading.

Tom L. McKnight, Ph.D.  
Howard J. Nelson, Ph.D.  
Jonathan D. Sauer, Ph.D.  
Melissa Savage, Ph.D.  
Werner H. Terjung, Ph.D.  
Benjamin E. Thomas, Ph.D.  
Norman J.W. Thrower, Ph.D.

### Associate Professors

Marilyn N. Raphael, Ph.D.  
Laurence C. Smith, Ph.D.  
Yongkang Xue, Ph.D.

### Assistant Professors

Stephen A. Bell, Ph.D.

Thomas W. Gillespie, Ph.D.  
Michael E. Shin, Ph.D.  
Mary E. Thomas, Ph.D.

### Adjunct Assistant Professor

Douglas E. Alsdorf, Ph.D.

## Scope and Objectives

Geography is the study of the natural world and how humans have changed it. It examines the physical Earth and life on it, looking at the world's diverse cultures and economies and at the environmental problems they produce.

Geography addresses many issues about the contemporary world. Some are local, such as documenting the development of ethnic neighborhoods within Los Angeles. Others are regional, such as determining the best locations for nature reserves in California. Many are global, such as the study of greenhouse gases and how they affect climates, culture and resource issues in developing countries, and the impact of information technologies on people in different places.

The work of geographers often takes them out of the classroom into the field to collect information on topics that range from the settlement of new immigrants to the distribution of endangered species, the erosion of shorelines, and the location of high-tech businesses. On other occasions, geographers work in laboratories, using techniques such as the computer analysis of satellite photographs to look for changes in river courses and the computer modeling of shifts in global vegetation patterns and the distribution of human populations. Research is also conducted in libraries and archives, probing documentary sources on human interaction with the natural world and how that world is imagined.

Geography graduates have a wide variety of career opportunities because of their combination of geographical/environmental perspectives and technical skills. UCLA geography students have gone on to become university scholars, school teachers, members of governmental and nongovernmental planning, development, and conservation agencies, business executives, lawyers, and specialists in geographical information analysis for government and private business. Because of its sophisticated focus on the relationship of the global to the local, geography is particularly useful for those who wish to pursue careers with an international focus.

The department has one of the top programs in the U.S. and offers two undergraduate majors that lead to the Bachelor of Arts degree: Geography and Geography/Environmental Studies. The Geography major combines a broad background in the field with specific tracks. The Geography/Environmental Studies major focuses on the impact of humans on the natural environment.

The department also offers M.A. and Ph.D. degrees. Student research projects are conducted in collaboration with a faculty adviser and advi-

sory committee. Graduate students work in most major areas of geography and on projects around the world. Graduate alumni of the department have teaching positions at many leading universities in the U.S. and abroad.

## Undergraduate Study

### Geography B.A.

The Geography major allows students to combine a broad background in the field with more specific interests and career goals. Students can elect to concentrate in one of several areas of geography such as urban, economic, cultural, environmental, physical, or biogeography. They should consult with the undergraduate adviser to plan a program suitable to their personal objectives.

#### Preparation for the Major

*Required:* Three courses (15 units) as follows: Geography 1 or 2, 3 or 4, and M40. All courses must be taken for a letter grade.

#### Transfer Students

To be admitted as Geography majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one physical geography or biogeography course, one cultural geography or economic geography course, and one statistics course.

#### The Major

*Required:* Twelve upper division geography courses (48 units minimum) taken for a letter grade.

### Geography/Environmental Studies B.A.

The major in Geography/Environmental Studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

#### Preparation for the Major

*Required:* Geography 1, 2, 3, 4, 5, M40. All courses must be taken for a letter grade. Students are strongly advised to complete all requisites before beginning upper division work in the major.

#### Transfer Students

To be admitted as Geography/Environmental Studies majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one physical geography course, one biogeography course, one cultural geography course, one economic geography course, one people and ecosystems course, and one statistics course.

#### The Major

*Required:* Twelve upper division geography courses taken for a letter grade which must be distributed as follows: (1) *natural systems core* — two courses from 100, 103, 104, 105, 108, 112; (2) *human systems core* — two courses from 118, 133, 134, 140, 142, 148, 150; (3) *environmental studies cluster* — five courses from 106, M107, 110, 116, 120, 121, 122, 123, 124, 125, 126, M128, 129, 131, 132, 135, 136, M137; (4) *procedures* — two courses (8 units) from 100A (2 units), 105A (2 units), 163, 167 (6 units), 168, 169, 170, M171, 172; and (5) *regions* — one course from 122, 135, 136, M137, 152, 156, 180, 181, 182A, 183, 185, 186, 187, 191.

Geography/Environmental Studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

### Honors Program

The honors program is designed for Geography and Geography/Environmental Studies majors who are interested in completing a research project that culminates in an honors thesis.

To qualify for graduation with departmental honors, students must have a cumulative grade-point average of 3.5 or better in all upper division geography courses and a 3.0 overall GPA. They must enroll in Geography 199HA and 199HB, each with a different faculty sponsor, and earn grades of A– or better. Students are awarded highest honors, honors, or no honors based on an evaluation of the thesis by the faculty sponsors. Contact the undergraduate advising office for further information.

### Computing Specialization

Majors in Geography and Geography/Environmental Studies may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, M171. Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Geography Minor

The Geography minor is designed for students who wish to deepen and/or broaden their major program of study with a distinctive yet flexible program of courses encompassing the relationship between environment and society. The minor allows students to develop a coherent strategy for understanding and explaining the manner in which people and the Earth interact. Students have the opportunity to explore the origins, development, morphology, and processes of landscapes inherited from

nature, as well as those institutions and cultural, economic, political, and social patterns associated with the human development, occupancy, organization, perception, and use of these landscapes.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1254 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

*Required Lower Division Courses (10 units):* Two courses from Geography 1, 2, 3, 4. It is recommended that students take these courses before attempting upper division courses.

*Required Upper Division Courses (20 units):* Any five upper division geography courses.

No more than 8 units may be applied toward both the students' majors and this minor, and at least three of the five upper division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

### Geography/Environmental Studies Minor

The Geography/Environmental Studies minor is intended for students interested in environmental issues and emphasizes a systems approach to gaining a causal understanding of major environmental problems facing our society and the world at large. The uniqueness of the minor lies in its geographical perspective on the impact, at various geographical scales, of human activity on natural systems and on the implications of global environmental change on local, regional, and global human systems.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Geography Department Advising Office, 1254 Bunche Hall, (310) 825-1166. Courses should be selected in consultation with the departmental adviser.

*Required Lower Division Courses (10 units):* Geography 5 and one course from 1, 2, 3, or 4. It is recommended that students take these courses before attempting upper division courses.

*Required Upper Division Courses (20 units):* Three courses from the environmental studies cluster specified within the major and two geography courses from outside the environmental studies cluster.

No more than 8 units may be applied toward both the students' majors and this minor, and at least three of the five upper division courses must be taken in residence at UCLA. Transfer credit for any of the above is subject to departmental approval.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Geography offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Geography.

## Geography

### Lower Division Courses

**1. Earth's Physical Environment. (5)** Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to nature and distribution of landforms and climate and their significance to people. P/NP or letter grading.

**2. Biodiversity in a Changing World. (5)** Lecture, three hours; discussion, 90 minutes. Biogeographic exploration of plant and animal diversity and conservation issues on continents and islands around the world. Study of physical, biotic, and human factors responsible for evolution, persistence, and extinction of species and ecological communities. Analysis of effects of human activity. P/NP or letter grading.

**3. Cultural Geography. (5)** Lecture, three hours; discussion, two hours. Introduction to cultural geography of modern world, with examination of key concepts of space, place, and landscape as these have shaped and been shaped by connections between societies and their natural environments. Examples from variety of landscapes and places since 1800 and especially from Los Angeles region. P/NP or letter grading.

**4. Globalization: Regional Development and World Economy. (5)** Lecture, three hours; discussion, one hour. Economic geography explores spatial distribution of all forms of human productive activity at number of geographical scales — local, regional, national, and global. Key theme is impact of increasingly powerful global economic forces on organization of production. P/NP or letter grading.

**5. People and the Earth's Ecosystems. (5)** Lecture, three hours; laboratory, two hours. Exploration of ways in which human activity impacts natural environment and how modification of environment can eventually have significant consequences for human activity. Examination, using case studies, of real environmental problems that confront us today. P/NP or letter grading.

**M40. Introduction to Statistical Methods for Social Sciences. (5)** (Same as Anthropology M80, Sociology M18, and Statistics M12.) Lecture, four hours; discussion, one hour; laboratory, one hour. Not open for credit to students with credit for Statistics 10, 11, or 13 (or former Economics M40, Organismic Biology M22, Statistics M11, or M13). Elements of statistical analysis for social sciences. Presentation and interpretation of data, descriptive statistics, theory of probability and basic sampling distributions, statistical inference including principles of estimation and tests of hypotheses, introduction to regression and correlation. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Geography. (4 each)** Discussion, three hours; reading period, one hour. Seminars designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term. P/NP or letter grading.

### Upper Division Courses

**100. Principles of Geomorphology. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations.

**100A. Principles of Geomorphology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

**101. Coastal Geomorphology. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seacliffs, and coral reefs, together with coastal zone management. P/NP or letter grading.

**101A. Coastal Geomorphology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seacliffs, together with coastal zone management.

**103. Paleoclimatology and Ice-Age Environments. (4)** Lecture, three hours; discussion, one hour. Requisite: course 1. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

**104. Climatology. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

**105. Hydrology. (4)** Lecture, three hours; reading period, one hour. Recommended requisites: courses M40, 104. Designed for juniors/seniors. Role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. P/NP or letter grading.

**105A. Hydrology: Field and Laboratory. (2)** Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in laboratory and make hydrologic measurements in the field.

**106. Applied Climatology: Physical Principles and Practice. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Exploration of knowledge and tools to solve complex problems in contemporary applied climatology, including current practices, influence of climate on environment, and human influence on changing climates. P/NP or letter grading.

**M107. Soil and Water Conservation. (4)** (Formerly numbered 107.) (Same as Environment M114.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

**108. World Vegetation. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Characteristics, distribution, environmental and cultural relationships of world's principal vegetation patterns. P/NP or letter grading.

**109. Human Impact on Biophysical Environment: What Science Has Learned. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of history, mechanisms, and consequences of interactions between humans and environment. Exploration in depth of three thematic topics (deforestation, desertification, and greenhouse gas increase and ozone depletion) and four major subjects (soil, biodiversity, water, and landforms). P/NP or letter grading.

**110. Population and Natural Resources. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of debate about environmental change and ability of the planet to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading.

**111. Forest Ecosystems. (4)** Lecture, three hours; reading period, one hour; field trips. Requisites: course 2, Life Sciences 1. Designed for juniors/seniors. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of physical environment, biotic interactions, succession, disturbances, and long-term environmental change. P/NP or letter grading.

**112. Analytical Animal Geography. (4)** Lecture, three hours; reading period, one hour. Requisites: courses 1, 2 or Life Sciences 1, M40. Designed for juniors/seniors. Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading.

**113. Humid Tropics. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Examination of humid tropics, with emphasis on rainforests, their ecological principles, and forms of land use. Letter grading.

**114. Africa and African Diaspora in the Americas. (4)** Lecture, three hours. Designed for juniors/seniors. Analysis of cultural and ecological significance of African diaspora in making of the Americas. Letter grading.

**M115. Environmentalism: Past, Present, and Future. (4 to 6)** (Same as Urban Planning CM189.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. P/NP or letter grading.

**116. Biogeography of Plant and Animal Invasions. (4)** Lecture, three hours; reading period, one hour. Requisite: course 1 or 2 or 5. Examination of theories and examples of invasion of new environments by plants and animals introduced through natural processes or by human activity. P/NP or letter grading.

**118. Medical Geography. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of health care.

**120. Conservation of Resources: North America. (4)** Requisites: courses 1, 2. Designed for juniors/seniors. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada.

**121. Conservation of Resources: Underdeveloped World. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of principles and problems of conservation of natural resources of the underdeveloped world. P/NP or letter grading.

**122. Wildlife Conservation in Eastern and Southern Africa. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Analysis of tropical ecosystems of eastern Africa, including wildlife communities, vegetation, climate, and human impact. Discussion of national park systems and their natural and anthropogenic ecological dynamics. P/NP or letter grading.

**123. Bioresource Management. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 2, 5. Recommended: course M40. Designed for juniors/seniors. Theory and practice of management and conservation of bioresources. Introduction to wildlife management, endangered species conservation, and design and maintenance of National Parks and ecological reserves. P/NP or letter grading.

**124. Environmental Impact Analysis. (4)** Lecture, three hours; discussion, one hour. Preparation: two environmental studies cluster courses. Requisite: course M40. Introduction to interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for analysis of environmental impact. P/NP or letter grading.

**125. Health and the Global Environment. (4)** Lecture, three hours; reading period, one hour. Impact of the environment and lifestyle on individual health examined from a geographical perspective, with examples from both developed and developing countries. P/NP or letter grading.

**126. Geography of Extinction. (4)** Lecture, three hours; reading period, one hour. Requisite: course 5. Designed for juniors/seniors. Geographic and taxonomic survey and analysis of biotic extinctions over the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading.

**M127. Soils and Environment. (5)** (Same as Environment M127 and Organismic Biology M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**M128. Global Environment and Development: Problems and Issues. (4)** (Same as Urban Planning CM128.) Lecture, three hours; discussion, one hour. Requisite: course 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. P/NP or letter grading.

**129. Seminar: Environmental Studies. (4)** Seminar, three hours; reading period, two hours. Preparation: one course each from natural and human systems cores, three environmental studies cluster courses. Limited to seniors. Qualitative/quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others). P/NP or letter grading.

**130. Geographical Discovery and Exploration. (4)** Lecture, three hours; reading period, one hour. Requisites: courses 1, 3. Designed for juniors/seniors. Survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present.

**131. Environmental Change. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

**132. Food, Environment, and Agriculture. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Historical and thematic orientation to agriculture revolutions and their role in environmental and cultural transformations in human history. P/NP or letter grading.

**133. Cultural Geography of the Modern World. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors and graduate students. Historical and structural approach to cultural geography of modern world system, with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. P/NP or letter grading.

**134. Space, Place, and Nature in Western Thought. (4)** Lecture, three hours. Designed for juniors/seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading.

**135. African Ecology and Development. (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Overview of contemporary ecological and development issues in sub-Saharan Africa. P/NP or letter grading.

**136. Technology, Nature, and the American Landscape. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading.

**M137. Historical Geography of American Environment. (4)** (Formerly numbered 137.) (Same as Environment M137.) Lecture, three hours. Designed for juniors/seniors. Study of systematic changes of natural environment in the U.S. during historical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and landforms, and human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

**138. Place, Identity, and Networked World. (4)** Lecture, three hours; reading period, one hour. Communications technologies, such as personal computers and Internet, seem to be connected to dramatic changes in identities of people, groups, and places. Exploration of those changes and their implications for social institutions and human values and practices. P/NP or letter grading.

**140. Political Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Spatiality of political activity, spatial constitution of political power, control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

**142. Population Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. P/NP or letter grading.

**144. Ethnicity in the American City. (4)** Lecture, three hours; reading period, two hours. Recommended preparation: course 142. Designed for juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America, with focus specifically on nonwhite ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading.

**146. Gender, Race, and Geography of Employment in American Cities. (4)** Lecture, three hours; reading period, two hours. Designed for juniors/seniors. Geography of employment of men and women of different racial and ethnic backgrounds in American cities. Examination of interrelationships between space and division of labor, and spatial restructuring on employment of women and minorities. P/NP or letter grading.

**148. Economic Geography. (4)** Lecture, three hours; reading period, one hour. Requisite: course 4. Designed for juniors/seniors. Geographical aspects of economic production and growth. General theory of the space-economy. Land-use processes. Location of industry. Regional development. P/NP or letter grading.

**M149. Transportation Geography. (4)** (Same as Urban Planning M149.) Requisite: course 3 or 4. Designed for juniors/seniors. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**150. Urban Geography. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of development, functions, spatial patterns, and geographic problems of American cities. P/NP or letter grading.

**152. Cities of Europe. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe, growth of city systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

**155. Industrial Location and Regional Development. (4)** Lecture, three hours. Requisite: course 4 or Economics 1 or 2 or 5 or 11. Designed for juniors/seniors. Reexamination of industrial location theory in light of contemporary theories of industrial organization and local labor markets. Consideration of empirical patterns of industrialization and regional growth, with special reference to Frostbelt/Sunbelt shifts and offshore relocation. P/NP or letter grading.

**156. Metropolitan Los Angeles. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

**157. Models of Regional Growth and Change. (4)** Lecture, three hours; reading period, one hour. Requisite: course 4. Recommended: course M40. Examination of empirical and theoretical issues of regional growth and change. Introduction to supply and demand-based models of regional development.

**159A-159E. Problems in Geography. (4 each)** Discussion, three hours; reading period, one hour. Preparation: completion of three courses in a concentration. Limited to seniors. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading. **159A.** Urban and Regional Development Studies; **159B.** Spatial Demography and Social Processes in the City; **159C.** Culture and Environment in the Modern World; **159D.** Physical Geography; **159E.** Biogeography.

## Procedures

**163. Field Analysis in Biogeography. (4)** Fieldwork, eight hours. Requisites: courses 2, 5, 108, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

**166. Images of Earth: The World from Above. (4)** Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through the ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced the course of events. P/NP or letter grading.

**167. Cartography. (6)** Lecture, two hours; laboratory, six hours. Preparation: three courses from 1 through 5. Designed for juniors/seniors. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

**168. Introduction to Geographic Information Systems. (4)** Lecture, two hours; laboratory, two hours. Designed for juniors/seniors. Introduction to basic geographic information systems (GIS) concepts and spatial analysis. Data structures, topology, and attribute information. Laboratory exercises use database query, manipulation, and spatial analysis to address "real world" problems. P/NP or letter grading.

**169. Satellite Remote Sensing and Imaging Geographic Information Systems. (4)** Lecture, two hours; laboratory, one hour. Introduction to fast-growing field of environmental monitoring from space. Application of Landsat, radar, Global Positioning System (GPS), and Earth Observing System satellites to land-use change, oceanography, meteorology, and environmental monitoring. Introduction to digital image-processing and imaging geographic information system (GIS) software. P/NP or letter grading.

**170. Advanced Geographic Information Systems. (4)** Lecture, three hours; discussion, one hour. Requisite: course 168. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

**M171. Introduction to Spatial Statistics. (4)** (Formerly numbered 171.) (Same as Statistics M140.) Lecture, three hours; laboratory, one hour. Requisite: course M40. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

**172. Advanced Remote Sensing and Data Processing. (4)** Lecture, three hours; laboratory, one hour. Requisite: course 169. Digital processing methods for manipulating and analyzing image data. Topics include statistical description, geometric and radiometric correction, classification, image enhancement and filtering, and change detection schemes. Reinforcement of procedures presented in lecture with laboratory exercises and student project. P/NP or letter grading.

## Regions

**180. North America. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Delimitation and analysis of principal geographic regions of the U.S. and Canada. P/NP or letter grading.

**181. Mexico, Central America, Caribbean. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading.

**182A. Spanish South America. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of the individual Spanish-speaking countries. P/NP or letter grading.

**182B. Brazil. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary economic and cultural geography of Brazil. P/NP or letter grading.

**183. Europe. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Europe. P/NP or letter grading.

**185. South and Southeast Asia. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

**186. Contemporary China. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. Dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. P/NP or letter grading.

**187. Middle East. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

**191. California. (4)** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

## Special Studies

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to juniors with a B average in the major or seniors.

**199HA-199HB. Honors in Geography I, II. (4-4)** Tutorial, to be arranged. Preparation: 3.25 grade-point average overall, at least five upper division geography courses with a 3.5 grade-point average. **199HA.** Independent study course taught by team of two faculty members who assist student with bibliographic research and/or field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199HA entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199HB. If that work is determined to be of A quality, student is allowed to continue in honors program. If that work is graded B or below, credit is awarded, but student is not permitted to continue in honors program. **199HB.** Devoted to writing of substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If paper is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

**199I. Independent Studies for Internships. (2 to 4)** Independent studies course to be supervised jointly by Center for Experiential Education and Service Learning and faculty adviser. Further supervision to be provided by placement for which student is doing internship. May not be applied toward major requirements. P/NP grading.

## Graduate Courses

### Environment

**200. History and Paradigms of Geomorphology. (4)** Lecture, two hours; discussion, one hour; reading period, eight hours. Preparation: two courses from 101, 103, 105, M107. Requisite: course 100. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

**201. Coastal Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

**202. Fluvial Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

**203. Glacial Geomorphology Seminar. (4)** Discussion, three hours; reading period, five hours; fieldwork. Requisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

**204A-204B-204C. Advanced Climatology. (4)** Lecture, three hours; laboratory, one hour. Preparation: first year of calculus and acquaintance with FORTRAN IV. Requisite: course 104. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

**205. Seminar: Climatology. (4)** Discussion, three hours; reading period, one hour. Requisites: courses 204A, 204B, 204C. Selected topics. May be repeated for credit.

**206. Introduction to Biophysical Modeling of Land Surface Processes. (4)** Lecture, two hours; laboratory, one hour; reading period, one hour. Designed for graduate students. Presentation of introductory knowledge for graduate students to understand nature, principles, and scope of biophysical modeling of land surface processes, including ideal canopy model, radiation, heat and CO<sub>2</sub> fluxes transfer, and satellite data application. Laboratory sessions included. S/U or letter grading.

**208. Advanced Biogeography: Plants. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisites: courses 108, and 110 or 116. Intensive review and analysis of physical and cultural factors influencing plant distributions.

**212. Advanced Biogeography: Animals. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 112. Intensive review and analysis of biophysical and cultural factors influencing animal distributions. S/U or letter grading.

**213. Seminar: Biogeography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 208 or 212. Related research projects growing out of course 208 or 212. May be repeated for credit.

**215. Quaternary Studies: Physical Aspects. (4)** Discussion, three hours; reading period, two hours; fieldwork, three hours. Preparation: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. Analysis of the changing physical environment of the Quaternary period. May be repeated for credit.

**217. Quaternary Studies: Ecological Aspects. (4)** Discussion, three hours; reading period, two hours. Requisites: courses 202 or 204A, 204B, and 204C or 208 or 212 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit.

**218. Advanced Medical Geography. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 118. In-depth study of selected topics in medical geography and intense review of recent research.

**223. Seminar: Humid Tropics. (4)** Seminar, three hours; reading period, two hours. Designed for graduate students. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

**M229. Resource-Based Development. (4)** (Same as Urban Planning M234C.) Discussion, three hours. Recommended preparation: Urban Planning 234A. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development. Letter grading.

## Human Geography

**230. Political Ecology. (4)** Seminar, three hours; reading period, three hours. Designed for graduate students. Exploration of theoretical constructs and approaches to analyses of development and the environment associated with political ecology. Examination of relations between poverty, ecological degradation, and global restructuring. Case studies of changing production organization and ecology of land-use patterns within different and emergent economic and political contexts. S/U or letter grading.

**231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice. (4)** Discussion, three hours; reading period, three hours. Designed for graduate students. Deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

**232. Advanced Cultural Geography. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Requisite: course 133. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

**233. Seminar: Cultural Geography. (4)** Seminar, three hours; reading period, two hours. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. S/U or letter grading.

**234. Environment and Subsistence in Indigenous Cultures. (4)** Seminar, three hours. Discussion on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year.

**237. Seminar: Historical Geography. (4)** Seminar, three hours; reading period, two hours. Theory and practice of historical geography in North America and Europe. May be repeated for credit. S/U or letter grading.

**240. Advanced Political Geography: Geopolitics. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

**241. Seminar: Political Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 240. Related research projects growing out of course 240. May be repeated for credit.

**242. Advanced Population Geography. (4)** Lecture, three hours; reading period, one hour. Requisite: course 142. Study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.

**244. Topics in Spatial Demography. (4)** Discussion, three hours; reading period, two hours. Selected topics in migration and mobility, especially the nature of housing choice and neighborhood change. May be repeated for credit. S/U or letter grading.

**248. Location and Space Economy. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.

**249. Seminar: Economic Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 248. Related research projects growing out of course 248. May be repeated for credit.

**250. Urban Systems. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.

**251. Seminar: Urban Geography. (4)** Discussion, three hours; reading period, two hours. Requisite: course 250. Related research projects growing out of course 250. May be repeated for credit.

**254. Migration and Residential Mobility. (4)** Lecture, two hours; discussion, one hour; reading period, one hour. Description and modeling of national, regional, and intra-urban migration.

## Procedures

**260. Advanced Field and Laboratory Analysis in Geomorphology. (4)** Laboratory/fieldwork, 10 hours. Preparation: two courses from 200, 201, 202, 203, 215. Designed for graduate students. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

**262. Advanced Field Analysis: Biogeography. (8)** Fieldwork, 10 hours. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

**268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing. (4)** Discussion, one hour; laboratory, three hours. Recommended prerequisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presentation in publication-style format.

**269. Remote Sensing of Environment. (4)** Laboratory, three hours; independent study, two hours. Requisite: course 167. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex.

**M270A-M270B-M270C. Seminars: Climate Dynamics. (2 to 4 each)** (Same as Atmospheric Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Seminar, two hours. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**M272. Spatial Statistics. (4)** (Same as Statistics M222 and Urban Planning M215.) Lecture, three hours. Designed for graduate students. Survey of modern methods used in analysis of spatial data. Implementation of various techniques using real data sets from diverse fields, including neuroimaging, geography, seismology, demography, and environmental sciences. S/U or letter grading.

## Regions

**282. South America. (4)** Seminar, three hours; reading period, two hours. Introduction to main issues in geography of South America, with focus mainly on cultural/historical geographical perspectives on the national period; themes and periods can be adapted to individual interests. S/U or letter grading.

**283. Europe. (4)** Seminar, two hours; discussion, two hours. Requisite: course 183. May be repeated for credit. S/U or letter grading.

**286. Geography of Contemporary China. (4)** Seminar, three hours; reading period, two hours. Designed for graduate students. May be repeated for credit. S/U or letter grading.

**292. Advanced Regional Geography: Selected Regions. (4)** Lecture, three hours; discussion, one hour. Preparation: appropriate upper division regional course. Lecture series devoted to a specific region at discretion of instructor. May be repeated for credit.

## Seminars

**295. Seminar: Geographic Thought. (4)** Discussion, three hours; reading period, two hours. Designed for graduate students. Discussion and study of topics significant to growth of modern philosophy of geography.

**296A. Eos Seminar: Controversies in Earth System Science. (1)** Seminar, two hours. Biweekly seminar to discuss emerging issues and controversies in earth system science. Topics include oscillatory climate phenomena, biogeochemical cycling, biocomplexity, land/atmosphere interactions, paleoclimate, and human-induced environmental change. S/U grading.

**296B. Cultural Geography Methods Workshop. (1)** Seminar, two hours. Biweekly forum for presentation and discussion of new concepts, theories, and methods at juncture of geography, humanities, and environmental study. Principal focus on landscape, but scope of cultural study within geography also embraced. S/U grading.

## Core Courses

**298A. Philosophical Issues in Geographical Inquiry. (4)** Lecture, three hours. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry.

**298B. History of Modern Geography. (4)** Lecture, three hours; reading period, one hour. Evolution of the field of geography in the 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as a modern academic discipline.

**298C. Statistical Methods for Geographic Research. (4)** Lecture, three hours; laboratory, two hours. Requisite: course M171. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Geography. (2)** Seminar, one hour; laboratory, three hours. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** May be repeated for credit. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 8)** Independent study. May be repeated for credit. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (2 to 8)** Independent study. May be repeated for credit. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** Independent study.

## GERMANIC LANGUAGES

*College of Letters and Science*

UCLA

Andrew R. Hewitt, Ph.D., *Chair*

### Professors

Jesse L. Byock, Ph.D.  
Sue-Ellen Case, Ph.D.  
Saul P. Friedlander, Ph.D.  
Andrew R. Hewitt, Ph.D.  
Robert S. Kirsner, Ph.D.  
Kathleen L. Komar, Ph.D.  
John A. McCumber, Ph.D.  
Wolfgang Nehring, Ph.D.  
James A. Schultz, Ph.D.  
Hans Wagener, Ph.D.

### Professors Emeriti

Ehrhard Bahr, Ph.D.  
Franz H. Bäuml, Ph.D.  
Marianna D. Birnbaum, Ph.D.  
Kenneth Chapman, Ph.D.  
Carl W. Hagge, Ph.D.  
William J. Mulloy, Ph.D.  
Erik Wahlgren, Ph.D.  
Donald J. Ward, Ph.D.

### Associate Professors

Jill Anne Kowalik, Ph.D.  
Christopher M. Stevens, Ph.D.

### Assistant Professor

Todd Presner, Ph.D.

### Adjunct Associate Professor

Peter I. Tokofsky, Ph.D.

## Scope and Objectives

The Department of Germanic Languages offers an extraordinary array of courses in languages, literatures, and cultures. This broad range of studies offers training in specialized fields such as film, linguistics, folklore, and critical theory. Courses prepare students for a variety of careers, including law, business, international relations, academic professions, and publishing.

Undergraduate majors earn a Bachelor of Arts degree. The graduate program offers Master of Arts and Ph.D. degrees. Refer to the Scandinavian Section later in this catalog for information about the degrees in Scandinavian studies.

At all levels of study various specializations are possible. Language, literature, and culture

studies are available in Afrikaans, Dutch, Old Norse, and Icelandic, in addition to German. The program also provides opportunity for study, work-study, and internships in a German-speaking country or in a country related to the course of study.

## Undergraduate Study

### Grammar/Composition Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Afrikaans, Dutch, German, and Old Norse grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

## German B.A.

### Preparation for the Major

*Required:* German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed one year of college-level German language courses should enroll in course 4. Students who are in doubt as to their level of language proficiency or who are native speakers should consult the language program supervisor. Students in Plan C must also take Linguistics 20.

### Transfer Students

To be admitted as German majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of German.

### The Major

Three plans are offered by the department:

#### Plan A: Literature and Culture

Plan A is designed for students who are interested in studying German language and thought by selecting courses in literature, film, folklore, and contemporary culture studies.

*Required:* German 130A, 130B, and 11 upper division German courses, at least three of which must be at the 150 level or above. Two of the 11 courses may be upper division courses in other departments. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Students may take up to two courses from the 120 series or below in satisfaction of major requirements. Two additional courses from the 120 series or below may be selected if students elect not to take courses in other departments. All courses must be taken for a letter grade.

#### Plan B: German Studies

Plan B is designed for students whose interests are primarily interdisciplinary in nature. Departmental majors receive credit not only for upper division courses in German literature, film, folklore, and contemporary culture, but for courses in related fields such as history, political science, philosophy, music, and others.

*Required:* German 130A, 130B, seven upper division German courses (at least two of which must be at the 150 level or above), and four upper division courses in a related field or fields selected in consultation with the undergraduate adviser. Students who enroll in any course taught in English translation in the department must sign a contract with the instructor that all texts authored in German are to be read in the original language. The contract must then be filed with the undergraduate adviser. Only two such contract courses may be applied toward the major. All courses must be taken for a letter grade.

#### Plan C: Germanic Languages/Linguistics

Plan C is intended for students interested in the study of languages and linguistics and allows students to study more than one Germanic language.

*Required:* German 130A, 130B, 150, 170, C172, and eight additional upper division courses as follows: three courses in one other Germanic language (Scandinavian languages taught in the Scandinavian Section may be applied by petition to the undergraduate adviser), three linguistics courses from outside the department (i.e., anthropology, applied linguistics, linguistics, sociology) selected in consultation with the undergraduate adviser, and two electives from department offerings (excluding German 100A, 100B, 100C, and courses taught in English translation). All courses must be taken for a letter grade.

## Honors Program

To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

## Single Subject Credential in German

Students desiring the single subject credential in German should consult the Department of Education, 1009 Moore Hall (310-825-8328), and the Department of Germanic Languages.

## German Minor

To enter the German minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* German 5 and 6 or equivalent.

*Required Upper Division Courses (20 units):* Any five German courses (excluding German literature in translation).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Germanic Languages Minor

To enter the Germanic Languages minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses (28 units):* Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in translation), Hungarian, Old Norse, Scandinavian languages, Yiddish.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Germanic Languages offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Germanic Languages and Master of Arts (M.A.) degree in Scandinavian (see Scandinavian Section).

## Afrikaans

### Lower Division Course

**40. From Oppressed to Oppressor and Beyond: Literature in Afrikaans from Preapartheid to Postapartheid Era, in English Translation.** (5) (Formerly numbered 114.) Lecture, four hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Development of all literature in Afrikaans, with special attention to authors and poets who protested apartheid — Brink, Breytenbach, Van Heerden, Jonker, Joubert, Krige, Krog, Leroux, Rabie, Small, and Willems. Additional readings by Coetzee, De Lange, Krog, and others on censorship, imprisonment, South African history, and postcolonial literary theory. P/NP or letter grading.

### Upper Division Courses

**105A. Elementary Afrikaans.** (4) Lecture, four hours; language laboratory. Introduction to a sister language of modern Dutch and a national language of South Africa. Grammar, practice in listening, speaking, reading, and writing. P/NP or letter grading.

**105B. Intermediate Afrikaans.** (4) Lecture, four hours; language laboratory. Requisite: course 105A. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources. P/NP or letter grading.

**135. Introduction to Afrikaans Literature.** (4) Discussion, three hours. Requisite: course 105B. Analysis of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brink, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach. P/NP or letter grading.

**199. Special Studies in Afrikaans.** (2 to 4) Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. Letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Afrikaans.** (4) Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** (4) Tutorial, to be arranged with instructor (see department for I.D. number). S/U grading.

## Dutch

### Upper Division Courses

**100. Modern Dutch Culture and Society.** (4) Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including 'Pillarization' — *verzuiling*), the two World Wars, housing policy, mass media, and rise of a multiracial society. Letter grading.

**103A-103B. Elementary Dutch.** (4-4) Lecture, four hours; language laboratory. Course 103A is requisite to 103B. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. P/NP or letter grading.

**103C. Intermediate Dutch.** (4) Lecture, four hours; language laboratory. Requisite: course 103B. Grammatical exercises, conversation, reading and analysis of simple texts. P/NP or letter grading.

**104A-104B. Accelerated Dutch.** (6-6) Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A, 103B, 103C in two terms rather than three. Letter grading.

**113. Modern Dutch and Flemish Literature in Translation.** (4) Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaïjen, and Vroman. Letter grading.

**120. Introduction to Dutch Studies.** (4) Lecture, three hours. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistiek. P/NP or letter grading.

**131. Introduction to Modern Dutch Literature.** (4) Discussion, three hours. Requisite: course 103B or 120. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist *Beweging van Tachtig* and the post-War *Beweging van Vijftig*. P/NP or letter grading.

**199. Special Studies in Dutch.** (2 to 4) Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. Letter grading.

## Graduate Courses

**596. Directed Individual Study or Research in Dutch.** (4) Tutorial, to be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** (4) Tutorial, to be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## German

### Lower Division Courses

**1. Elementary German.** (4) Lecture, five hours; laboratory, one hour. P/NP or letter grading.

**1G. Elementary German for graduate students.** (4) Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**2. Elementary German.** (4) Lecture, five hours; laboratory, one hour. Enforced requisite: course 1. P/NP or letter grading.

**2G. Elementary German for Graduate Students.** (4) Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**3. Elementary German.** (4) Lecture, five hours; laboratory, one hour. Enforced requisite: course 2. P/NP or letter grading.

**3G. German for Graduate Students.** (4) Reading and translation, three hours. Requisite: course 2G. Preparation for Graduate Division foreign language reading requirement. Intensive reading and translation of humanities and social sciences texts. May not be applied toward degree requirements. S/U grading.

**4. Intermediate German.** (4) Lecture, five hours; laboratory, one hour. Enforced requisite: course 3. P/NP or letter grading.

**5. Intermediate German.** (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 4. P/NP or letter grading.

**6. Intermediate German.** (4) Lecture, four hours; laboratory, one hour. Enforced requisite: course 5. P/NP or letter grading.

**8. Elementary German: Intensive.** (12) Lecture, 15 hours; laboratory, five hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.

**10. Intermediate German: Intensive.** (12) Lecture, 20 hours; laboratory, four hours. Enforced requisite: course 3. Intensive intermediate course in German equivalent to courses 4, 5, and 6. P/NP or letter grading.

**12. German Conversation.** (4) Discussion, three hours. Enforced requisite: course 3. Conversation course designed for intermediate and advanced students who wish to improve their spoken command of the language. Topics of current student interest to be used as basis for conversation. P/NP or letter grading.

**50A-50B. Great Works of German Literature in Translation.** (4-5) Lecture. May not be applied toward completion of the major in German. P/NP or letter grading:

**50A. Medieval Period through Classicism.** (4) Lecture, three hours. Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimmelshausen, Lessing, Schiller, and Goethe. P/NP or letter grading.

**50B. Romanticism to the Present.** (5) Lecture, three hours; discussion, one hour. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf. P/NP or letter grading.

**55. The City as Text: German Exile Culture in Los Angeles.** (4) Lecture, three hours. Not open for credit to students with credit for course 55W. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

**55W. German Exile Culture in Los Angeles. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 55. Reflection on history of German exile culture in Los Angeles (literature, film, music, architecture, philosophy) during the 1940s — on its significance from anthropological, philosophical, political, and historical perspectives. Satisfies Letters and Science Writing II requirement. Letter grading.

**56. Figures Who Changed the World. (5)** Lecture, three hours; discussion, one hour. Introduction to strains of German philosophy and political thought that resonated internationally. Use of version of “great man” model of history to move beyond such models in its understanding of how, exactly, intellectual currents actually ferment change in the world. P/NP or letter grading.

**57. Hollywood and Germany. (5)** Lecture/screenings, five hours; discussion, one hour. Examination of images of Germany generated by Hollywood, cultural/historical interface between Hollywood and Germany, and contemporary critiques of long-standing relationship between these cultural sites. Discussion of how and why cultural stereotypes are generated and maintained, and why film is a uniquely powerful tool in ideological discourse. P/NP or letter grading.

**58. Knights and Ladies, Sex and Power at Medieval Court. (5)** Lecture, three hours; discussion, one hour. Introduction to culture of high medieval court, one of great achievements of European Middle Ages. P/NP or letter grading.

**59. Holocaust in Film and Literature. (5)** Lecture/screenings, five hours; discussion, one hour. History of Holocaust and its present memory through examination of challenges and problems encountered in trying to imagine its horror through media of literature and film. P/NP or letter grading.

**60W. War. (5)** Lecture, three hours; discussion, two hours. Enforced requisite: English Composition 3 or 3H. Reflection on cultural history of war — on its significance from anthropological, cultural, and philosophical perspectives rather than from perspective of political and historical gains and losses. Emphasis on World War I, a war in which political and military confrontation seemed particularly attuned to a sense of confrontationalism and scandal in cultural life. Satisfies Letters and Science Writing II requirement. Letter grading.

**61A-61D. Transatlantic Culture: Modern City in Central Europe. (5 each)** Lecture, three hours; discussion, one hour. Historical exploration of major Central European cities and their cultures. P/NP or letter grading. **61A.** Berlin; **61B.** Weimar; **61C.** Vienna; **61D.** Prague.

**62W. Technoscience and German Culture. (5)** Seminar, four hours. Enforced requisite: English Composition 3 or 3H. Various responses in German culture to challenges presented by technology and science. From Romanticism to critical theory and postmodernism, from Schiller and Nietzsche to Habermas and Wolf, strands of German intellectual tradition provide illuminating contrasts to American context. Satisfies Letters and Science Writing II requirement. Letter grading.

**M70. Origin of Language. (5)** (Formerly numbered 70.) (Same as Communication Studies M70 and Indo-European Studies M70.) Lecture, three hours; discussion, one hour. Theoretical and methodological issues surrounding origin of language. Topics include evolutionary theory, evolution of man, how language is organized in the brain, and science of language, including physiology of speech, phonetics, and comparative reconstruction. Letter grading.

**88. Lower Division Seminar. (4)** Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

## Upper Division Courses

**100A. German History and Culture before 1500. (4)** Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society from the beginning to 1500 as represented in literature, art, and architecture. P/NP or letter grading.

**100B. German History and Culture from 1500 to 1914. (4)** Lecture, three hours; discussion, one hour. Lectures, discussions, and readings in English; knowledge of German not required. Study of German culture and society as represented in literature, art, music, and architecture from Reformation and invention of printing to start of World War I. P/NP or letter grading.

**100C. War, Politics, Art. (5)** Lecture, three hours; discussion, one hour. Analysis of interrelationship between politics, social conditions, and the arts with respect to war. World Wars I and II and German history to be used as model for principal questions of society and philosophical thinking. P/NP or letter grading.

**102A. German Film in Cultural Context: Early German Film. (4)** Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film between 1919 and 1945. Analysis of technological and stylistic development of film from silent Expressionist films to Nazi propaganda and entertainment films. Film discussions enhanced by interactive media. Letter grading.

**102B. German Film in Cultural Context: New German Film. (4)** Lecture, two hours; discussion, one hour. Lectures and texts in English; additional readings in German for majors. Survey of German film since 1960 in its thematic and stylistic diversity. Films authored by Werner Herzog, Fassbinder, and Margarethe von Trotta are juxtaposed with commercial comedies of the 1990s. Film discussions enhanced by interactive media. Letter grading.

**M104. Tristan, Isolde, and History of Heterosexuality. (4)** (Same as Women's Studies M119.) Lecture, three hours. German, French, and English versions of Tristan and Isolde story from Middle Ages to the 20th century. Particular attention to relation between representation of “heterosexual” love in each text and contemporaneous ideas about human sexuality. P/NP or letter grading.

**106. The Faust Tradition from the Renaissance to the Modern Age. (4)** Lecture, three hours. Readings and discussions of the Faust theme in European literature and intellectual history, including chapbook of *Doktor Faustus*, Marlowe's and Goethe's dramas, and Thomas Mann's and Bulgakow's novels. Letter grading.

**M108. Love and Sex in German Literary Tradition. (4)** (Formerly numbered 108.) (Same as Women's Studies M108.) Lecture, three hours. Study of major literary works that address issues of idealized desire, emotional/sexual boundaries, and development of sexual identity. Letter grading.

**110. Nietzsche and Critique of Western Culture. (4)** Lecture, two hours; discussion, one hour. Readings that focus on Nietzsche's critique of Christianity, master/slave dynamic, and reciprocal relation between poetry and philosophy. German majors required to complete all readings in German. Letter grading.

**112. Jewish Writing and Thought in German Culture from 1755 to the Present. (4)** Lecture, three hours. Analysis of works that represent process of Jewish assimilation, disenfranchisement, and extermination, including authors such as Mendelssohn, Heine, Kafka, Paul Celan, Nelly Sachs, Anne Frank, and others. Letter grading.

**114. German Exile Culture in Los Angeles. (4)** Lecture, three hours. Cultural and historical exploration of exile as site of creative activity for German writers and other artists during and after World War II. General questions of cultural migration and cultural transfer to be thematized. P/NP or letter grading.

**116. Special Topics in Modern Literature and Culture. (4)** Lecture, three hours. Content varies with instructor and may include works by authors such as Thomas Mann, Rilke, Kafka, Brecht, Christa Wolf, and others. May be repeated for credit. Letter grading.

**118. Feminist Issues in German Literature and Culture. (4)** Lecture, three hours. Analysis of major issues in German feminism today (e.g., status, creative work, and reception of women writers in various periods such as Romanticism, Fascism, and/or divided/unified Germanies). Letter grading.

**120. German Folklore. (4)** Lecture, three hours. Survey of various folklore genres in cultural context, including legends, proverbs, and cultural enactments such as carnival. Letter grading.

**122. Fairy Tales and the Fantastic. (5)** (Formerly numbered M122.) Lecture, three hours; discussion, one hour. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimm's tales. Interpretation of selected tales and their transformations and appropriation in literature, film, advertising, and pedagogy. P/NP or letter grading.

**130A-130B. Conversation and Composition on Contemporary German Culture and Society I, II. (4-4)** Lecture, three hours. Requisite: course 6. Course 130A is requisite to 130B. Structured around themes as they emerge in contemporary German texts ranging from news magazine articles to literature, with emphasis on speaking and writing proficiency. Presentation software featured. P/NP or letter grading.

**132. Business German. (4)** Lecture, three hours. Requisite: course 6. Specialized language course that teaches German business administration, practices, and correspondence, with attention to cultural nuances. Ongoing developments in European Union analyzed via newspaper articles and the Internet. P/NP or letter grading.

**134. Advanced German Language through Cultural History and Current Affairs. (4)** Lecture, three hours. Requisites: courses 130A, 130B. Advanced German language course that juxtaposes cultural history with current affairs to teach complex speaking and writing skills of interpretation, analysis, and criticism. Readings may include selections from Luther, Heine, Freud, and current authors. Students create their own interactive media presentations. Letter grading.

**136. Theory and Practice of Translation. (4)** Lecture, three hours. Requisite: course 130B with a grade of B or better. German/English and English/German translation of literary texts, popular press articles, and business documents, with attention to issues of style. Letter grading.

**140A. Introduction to German Poetry. (4)** Lecture, three hours. Close reading of representative examples of German lyric poetry from early as well as recent literary periods, including systematic consideration of poetic conventions and forms, diction, imagery, symbolism, and metrics. Letter grading.

**140B. Introduction to German Drama. (4)** Lecture, three hours. Analysis of selected dramatic genres (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, historical drama, etc.), including systematic review of dramatic forms, techniques, and theories. Texts selected from both contemporary and earlier periods. Letter grading.

**140C. Introduction to German Narrative Prose. (4)** Lecture, three hours. Analysis of narrative prose genres (e.g., short story, novella, fairy tales, etc.), including systematic review of narrative forms, techniques, and styles. Texts selected from both contemporary and earlier periods. Letter grading.

**142. Introduction to 18th-Century Studies. (4)** Lecture, three hours. Topics in Enlightenment literature, social history, and culture. Works by Goethe, Lessing, Schiller, Kant, Mozart, and others. Letter grading.

**144. Introduction to 19th-Century Studies. (4)** Lecture, three hours. Presentation of major texts from Romanticism to realism. Works by Kleist, Büchner, Heine, Fontane, and others. Letter grading.

**146. Introduction to Modern Literature.** (4) Lecture, three hours. Analysis of selected modern works written between 1890 and 1945, including texts by authors such as Thomas Mann, Kafka, Rilke, Brecht, and others. Letter grading.

**148. Introduction to Contemporary Literature.** (4) Lecture, three hours. Analysis and discussion of German, Austrian, Swiss, and ex-GDR literatures from 1945 to the present. Examination of writers such as Heinrich Böll, Günther Grass, Friedrich Dürrenmatt, Elfriede Jelinek, and Christa Wolf with a view to their specific political and cultural context. Letter grading.

**150. Language and Linguistics.** (4) Lecture, three hours. Requisite or corequisite: course 130A. Theories and methods of linguistics, with emphasis on structure of modern standard German, its phonology, morphology, syntax, semantics, and pragmatics. Other topics include diachronic, spatial, and social variation of German (i.e., its historical development, dialectology, and sociolinguistic dimensions). Letter grading.

**152. Studies in German Literature before 1750.** (4) Lecture, three hours. Requisite: course 140A. Readings and analysis of major works from the Middle Ages to the baroque. Letter grading.

**154. Goethe.** (4) Lecture, three hours. Requisite: course 130A. Reading and discussion of representative works (except *Faust*) from Goethe's early period through maturity and old age. Letter grading.

**156. Goethe's *Faust*.** (4) Lecture, three hours. Requisite: course 130A. Detailed interpretation of Goethe's major work, Parts I and II, together with general consideration of other treatments of the Faust theme in European literature. Letter grading.

**158. Romanticism.** (4) Lecture, three hours. Requisite: course 130A. Reading and analysis of major works by German Romantics, including Friedrich Schlegel, Novalis, E.T.A. Hoffman, and Eichendorff. Letter grading.

**160. Advanced Study of Modern Literature.** (4) Lecture, three hours. Requisite: course 130A. Naturalism, Expressionism, and other early 20th-century literary movements and works. Letter grading.

**162. Advanced Study of Contemporary Literature and Culture.** (4) Lecture, three hours. Requisite: course 130A. Literature after 1945 in German-speaking countries, including issues such as national borders, ethnic identity, gender relations, and commercialization of culture. Letter grading.

**170. Current Topics in Germanic Linguistics.** (4) Lecture, three hours. Requisite: course 130A. In-depth investigation of one topic in field of Germanic linguistics, such as phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), or history of German. Letter grading.

**C172. Linguistic Theory and Grammatical Description.** (4) Lecture, three hours. Requisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238. Letter grading.

**190. Undergraduate Seminar.** (4) Seminar, three hours. Required of all German majors who are candidates for general secondary instructional credential. Content varies by instructor and may include advanced work in folklore, film, and German studies. Letter grading.

**195. Senior Thesis Course.** (4) Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

**199. Independent Studies.** (2 to 4) Tutorial, to be arranged with faculty member who directs the study (course section to be identified using departmental code number — see department for appropriate faculty code). Course for students who desire more intensive or specialized investigation of material covered in a regular course. Letter grading.

## Graduate Courses

**201A. Bibliography, Research Methods, and Scholarly Writing.** (4) Lecture, three hours. Introduction to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and special attention to on-line resources. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers. Letter grading.

**201C. Theories of Literary Interpretation.** (4) Lecture, three hours. Advanced analysis and discussion of various models of literary interpretation and schools of thought such as hermeneutics, psychoanalytic criticism, social historical approaches, semiotics, structuralism, and post-structuralism. Topics vary with instructor. Letter grading.

**202A. Middle High German.** (4) Lecture, three hours. Introduction to Middle High German language, with particular emphasis on developing facility in reading. Study of grammar, syntax, and vocabulary combined with introduction to poetic forms and cultural context. Letter grading.

**202B. Readings in Middle High German Literature.** (4) Lecture, three hours. Introduction to medieval German literature and literary history and to use of contemporary theory in study of medieval texts. Continued practice in reading Middle High German, although most texts to be read in modern translation. Letter grading.

**204. Early Modern German Literature.** (4) Lecture, three hours. Selected readings from 1500 to 1700, with introduction to development of German as a modern literary language and to literary genres and cultural models. Impact of Thirty Years' War on German literary production and reception in German baroque. Letter grading.

**206. Studies in Enlightenment Literature and Culture.** (4) Lecture, three hours. Analysis of major 18th-century German texts from philosophic, social-historical, psychohistorical, and literary perspectives. Letter grading.

**207. Weimar Classicism.** (4) Lecture, three hours. Reading and interpretation of major works of German classicism. May include problems in reception of classicism by later authors and cultural theorists. Letter grading.

**208. Romanticism.** (4) Lecture, three hours. Analysis of selected works and theories of German Romantics such as Friedrich Schlegel, Novalis, and Hoffman, with attention to relationship between Romanticism and other periods. Letter grading.

**209A. 19th-Century Lyrics.** (4) Lecture, three hours. Discussion and analysis of lyric poetry from the classic/Romantic period through symbolism. Discussion of changes in genre, form, content, and social implication. Letter grading.

**209B. 19th-Century Drama.** (4) Lecture, three hours. Analysis of selected dramas and their reception from Kleist to Wagner. Discussion of historical drama, sociopolitical drama, *Volkstheater*, and other forms. Letter grading.

**209C. 19th-Century Narrative Prose.** (4) Lecture, three hours. Analysis of prose works between Romanticism and naturalism. Discussion of development of literary realism and form of the novella. Letter grading.

**210A. Naturalism, Symbolism, and Expressionism.** (4) Lecture, three hours. Analysis of selected works (poetry, drama, prose) of early modernism from Hauptmann to Kafka. Discussion of sociological spectra and pluralism of styles and forms. Letter grading.

**210B. 20th-Century Novel to 1945.** (4) Lecture, three hours. Prose works in first half of the 20th century as they express war experience, crisis of consciousness, and cultural conflicts between wars, as well as innovations in narrative technique. Letter grading.

**211. Postwar Literature.** (4) Lecture, three hours. Study of major works by German-speaking authors writing since World War II. Examination of issues such as identity crises, nationalism and the divided Germany, gender expectations, and social-political attitudes. Letter grading.

**212. Contemporary Literature and Culture.** (4) Lecture, three hours. Analysis of current cultural issues and their relation to literary production and interpretation. Topics may include areas such as feminism, postcolonialism, postmodernism, and contemporary theories of textuality. Letter grading.

**213. Topics in Literature and Film.** (4) Lecture, three hours. With focus on two different modes of cultural representation, examination of topics in German literature and film from Weimar Republic to the present. Study of media theory, feminist film theory, and interrelationships between film, literature, and social history. Letter grading.

**217. History of the German Language.** (4) Historical survey of development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, medieval period, Reformation, baroque period, and Enlightenment until its final codification at the end of the 19th century.

**230. Survey of Theory in Historical Linguistics.** (4) Lecture, three hours. Systematic overview of theories of historical linguistics. Letter grading.

**231. Gothic.** (4) Systematic study of phonology and grammar of the Gothic language, with readings in Wulfila's translation of the Bible and introduction to history of the Goths and their place in the development of modern Europe.

**232. Old High German.** (4) Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

**233. Old Saxon.** (4) Introduction to study of earliest documents in Old Low German. Readings in the *Heliand* and study of the *Old Saxon Genesis*.

**C238. Linguistic Theory and Grammatical Description.** (4) Lecture, three hours. Requisite: course 150 or Linguistics 20. Problems in structure of Dutch and German, considered from theoretical frameworks such as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C172. Graduate students meet as a group one additional hour each week and write research papers of greater length and depth. Letter grading.

**251. Seminar: Germanic Linguistics.** (4) Seminar, three hours. Current topics in synchronic or diachronic linguistics, such as specific issues in generative grammar, sociolinguistics and dialectology, or language contact. Letter grading.

**252. Seminar: Historical and Comparative Germanic Linguistics.** (4) Topics selected from the field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax).

**253. Seminar: Medieval Literature.** (4) Seminar, three hours. Investigation of a selected topic or particular theoretical issue that arises in study of medieval literature. Letter grading.

**256. Seminar: Enlightenment.** (4) Seminar, three hours. Selected problems in cultural, literary, and philosophic history. May include modern critiques of Enlightenment thought. Letter grading.

**257. Seminar: Age of Goethe.** (4) Seminar, three hours. Selected topics in literature and culture between 1775 and 1832, with special emphasis on work of Goethe and Schiller as it relates to philosophic texts such as Hegel's *Phänomenologie des Geistes* or as it relates to historical events such as the French and American Revolutions. Letter grading.

**258. Seminar: Romanticism. (4)** Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works.

**259. Seminar: 19th-Century Literature. (4)** Discussion of a specific author or topic of 19th-century literature, possibly in close connection with course 209A, 209B, or 209C. Critical review of secondary works.

**260. Seminar: Modern Period. (4)** Seminar, three hours. In-depth analysis of a particular issue in pre-1945 German literature and culture. Letter grading.

**261. Seminar: Contemporary Literature. (4)** Seminar, three hours. In-depth analysis of a particular issue in post-1945 German literature and culture. Letter grading.

**262. Seminar: Germanic Folklore. (4)** Seminar, three hours. Detailed investigation of individual aspects of Germanic folklore, with emphasis on problems of theory and method in analysis of folkloric material. Letter grading.

**263. Seminar: Literary Theory. (4)** Seminar, three hours. Special focus on particular theoretical school or interpretive paradigm. Content varies with instructor. Letter grading.

**M270. Seminar: Literary Theory. (5)** (Same as Comparative Literature M294, East Asian Languages M251, English M270, French M270, Italian M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

**M299. Research Resources for European Studies. (2)** (Same as French M299, Information Studies M299, Italian M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Approaches to Foreign Language Pedagogy. (4)** Seminar, one hour; discussion, two hours. Issues include development of current theories of second-language acquisition, effects of these theories on language teaching, psycholinguistics, sociolinguistics, assessment techniques, use of multimedia in foreign language pedagogy, and design of syllabi for basic foreign language courses. S/U grading.

**596. Directed Individual Study or Research. (4)** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be taken only once before and only once after M.A. degree, except for Ph.D. candidates with a formal minor field of studies who may take course twice after M.A., once in the major and once in the minor. Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4 to 12)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 12)** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated. S/U grading.

## Old Norse Studies

### Lower Division Course

**40. Heroic Journey in Northern Myth, Legend, and Epic. (4)** Comparison of the journeys of heroes. Readings in mythology, legend, folktale, and epic, including *Nibelungenlied*, *Volsunga saga*, *Eddas*, and *Beowulf*. Cultural and historic backgrounds to the texts. All readings in English.

### Upper Division Courses

**135. Vikings. (5)** Lecture, three hours; discussion, one hour. Survey of history, anthropology, and archaeology of Viking Age society. Readings draw on medieval sagas as well as secondary material, focus on impact of Vikings on northern Europe, and consider ways in which European and Scandinavian societies evolved in response to Viking incursions. P/NP or letter grading.

**C139. The Saga. (4)** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C268.

**C140. Viking Civilization and Literature. (4)** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C241.

**C145. Old Norse Literature and Society. (4)** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C272.

**151. Elementary Old Norse. (4)** Introduction to grammar and pronunciation of Old Norse. Selected readings from the sagas and *Prose Edda*.

**152. Intermediate Old Norse. (4)** Requisite: course 151. Continued grammar, pronunciation, and readings from the *Eddas* and sagas of Icelanders, Norwegian kings, and legendary heroes.

**153. Modern Icelandic. (4)** Requisite: course 152. Grammar, readings, and conversation.

**199. Special Studies in Old Norse. (2 or 4)** Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

### Graduate Courses

**221. Advanced Old Norse Prose. (4)** Requisite: course 152. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history.

**222. Advanced Old Norse Poetry. (4)** Requisite: course 152. Readings of mythological and heroic poems from *Poetic Edda*. Secondary sources used where appropriate.

**C241. Viking Civilization and Literature. (4)** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C140. Graduate students do additional readings and write more extensive research papers.

**245A. Germanic and Scandinavian Mythology. (4)** Seminar, three hours. Study of Northern myth and religion through close reading of Eddic texts and secondary sources.

**C268. The Saga. (4)** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C139. Graduate students do additional readings and write more extensive research papers.

**C272. Old Norse Literature and Society. (4)** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do additional readings and write more extensive research papers.

**596. Directed Individual Study or Research. (4)** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4)** To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

Larry L. Butcher, Ph.D., *Director*

### Faculty Advisory Committee

Larry L. Butcher, Ph.D., *Chair*  
Steven G. Clarke, Ph.D.  
Robert M. Emerson, Ph.D.  
Kathleen M. McGarry, Ph.D.  
Gary W. Small, M.D.

### Affiliated Faculty Professors

Emily K. Abel, Ph.D. (*Health Services*)  
Larry L. Butcher, Ph.D. (*Psychology*)  
Rita B. Effros, Ph.D., in *Residence (Pathology and Laboratory Medicine)*  
Robert M. Emerson, Ph.D. (*Sociology*)  
James E. Lubben, D.S.W. (*Social Welfare*)  
Donald G. MacKay, Ph.D. (*Psychology*)  
Arnold B. Scheibel, M.D. (*Neurobiology, Psychiatry and Biobehavioral Sciences*)  
Fernando M. Torres-Gil, Ph.D. (*Social Welfare*)  
Steven P. Wallace, Ph.D. (*Community Health Sciences*)  
F. Eugene Yates, M.D. (*Medicine*)

### Associate Professor

Kathleen M. McGarry, Ph.D. (*Economics*)

**Adjunct Associate Professor**JoAnn Damron-Rodriguez, Ph.D. (*Social Welfare*)**Scope and Objectives**

The explosive expansion of the older population in this country and the world — the “Age Revolution” — insures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in Gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families age.

**Undergraduate Study****Gerontology Minor**

To enter the Gerontology minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses (28 units):* Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M119X, M150, Community Health Sciences 90, Psychology M117J, 124G, 189, 193 (only 8 units may be applied toward the minor; fieldwork placements must be approved by the chair of the minor), Women’s Studies 185 (only when the special topic is women, health, and aging).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Gerontology****Upper Division Courses**

**M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4)** (Same as Social Welfare M104C and Women’s Studies M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

**M104D. Public Policy and Aging. (4)** (Same as Social Welfare M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

**M104E. Social Aspects of Aging. (4)** (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

**M119O. Psychology of Aging. (4)** (Same as Psychology M119O.) Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

**M119X. Biology and Behavioral Neuroscience of Aging. (4)** (Same as Psychology M119X.) Lecture, three hours. Designed for juniors/seniors. Biologic mechanisms of aging process and its terminal phase, death, have been increasingly studied in recent years. Establishment of what is known experimentally about biology and behavioral neuroscience of aging and evaluation of theories developed to account for this knowledge. P/NP or letter grading.

**M140. Introduction to Study of Aging. (4)** (Same as Psychology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**M141. Women, Health, and Aging: Policy Issues. (4)** (Same as Health Services CM141 and Women’s Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women’s aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

**M150. Sociology of Aging. (4)** (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

Thomas H. Rice, Ph.D., *Vice Chair*

**Professors**

Emily K. Abel, Ph.D.  
Ronald M. Andersen, Ph.D. (*Fred W. and Pamela K. Wasserman Professor of Health Services*)  
Roshan Bastani, Ph.D.  
Robert H. Brook, M.D., Sc.D.  
E. Richard Brown, Ph.D.  
William Comanor, Ph.D.  
Jonathan E. Fielding, M.D., M.P.H.  
Patricia A. Ganz, M.D.  
David Hayes-Bautista, Ph.D.  
Ronald Hays, Ph.D.  
Gerald F. Kominski, Ph.D.  
Charles E. Lewis, M.D., Sc.D.  
Marvin Marcus, D.D.S.  
Thomas H. Rice, Ph.D.  
Stuart O. Schweitzer, Ph.D.  
Martin Shapiro, M.D.

Paul R. Torrens, M.D., M.P.H.

**Professors Emeriti**

Lester Breslow, M.D., M.P.H.  
William Shonick, Ph.D.

**Associate Professors**

William E. Cunningham, M.D., M.P.H.  
Susan L. Ettner, Ph.D.  
Mark S. Litwin, M.D., M.P.H.  
John Peabody, M.D., Ph.D., *in Residence*  
Mark Schuster, M.D., Ph.D.  
Antronette Yancey, M.D., Ph.D.

**Assistant Professors**

Jeff Luck, Ph.D., M.B.A., *in Residence*  
Patricia Parkerton, Ph.D., *in Residence*  
Ninez Ponce, Ph.D., *in Residence*

**Lecturers**

Bruce W. Bennett, Ph.D.  
Alain Jourdir

**Adjunct Professors**

Ellen Alkon, M.D., M.P.H.  
Michael Bobrow, A.I.A.  
Arlene Fink, Ph.D.  
Emmett Keeler, Ph.D.  
Jacqueline B. Kosecoff, Ph.D.  
Eric McLaughlin, Ph.D., M.B.A.  
Thomas Priselac, M.P.H.  
Ruth J. Roemer, J.D., *Emerita*  
Iraj Tabibzadeh, M.D.

**Adjunct Associate Professors**

Barbara Berman, Ph.D.  
Stuart Bowne, M.D.  
Dana Goldman, Ph.D.  
Raymond D. Goodman, M.D., M.P.H.  
Nancy D. Harada, Ph.D.  
Antonio Legorreta, Ph.D.  
William McCarthy, Ph.D.  
Anthony Schiff, J.D.  
Richard Sinaiko, M.P.H.

**Adjunct Assistant Professors**

Pamela L. Davidson, Ph.D.  
Melissa Farmer, Ph.D.  
Brenda Freshman, Ph.D.  
F.A. Hagigi, Dr.P.H., M.B.A., C.M.C.  
Diana W. Hilberman, Dr.P.H.  
Nadereh Pourat, Ph.D.  
Jon Riddle, Ph.D.  
Louis Rubino, Ph.D.  
Amardeep Thind, M.D., Ph.D.  
Elizabeth M. Yano, Ph.D.

**Visiting Professors**

Lori Pelliccioni, Ph.D.  
Gregory Stock, Ph.D.  
Anthony Rodgers, M.P.H.  
Carol Volpe, Ph.D.

**Scope and Objectives**

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), in-

cludes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Health Services offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Health Services.

## Health Services

### Lower Division Courses

**88. Lower Division Seminar: Special Topics in Health Services.** (4) Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in health services approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

**98H. Public Health Law and Policy: Private Rights and Social Responsibility.** (5) Seminar, three hours. Enforced requisite: satisfaction of Subject A requirement. Examination of legal and policy issues affecting the U.S. health care system, including legal bases for governmental actions on health, limitations on governmental powers, legal regulation of health care resources, and equity and efficiency in health care. Specific issues include health insurance, reproductive rights, mental health and the law, legal aspects of AIDS, legislative strategies to promote healthful lifestyles, and legal/ethical issues in health care. Letter grading.

### Upper Division Courses

**100. Health Services Organization.** (4) Lecture, four hours; discussion, one hour. Preparation: 4 units of social sciences. Structure and function of American health care system; issues and forces shaping its future. P/NP or letter grading.

**M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems.** (4) (Same as Asian American Studies M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S. Letter grading.

**132. Financial and Managerial Accounting for Health Services Organizations.** (4) Lecture, four hours. Requisite: course 100. Introduction to financial and managerial accounting and its application to the health services industry. P/NP or letter grading.

**CM141. Women, Health, and Aging: Policy Issues.** (4) (Same as Gerontology M141 and Women's Studies M141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM241. Letter grading.

**199. Special Studies.** (2 to 4) Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

### Graduate Courses

**200A-200B. Health Systems Organization and Financing.** (4-4) Lecture, four hours; discussion, two hours. Limited to graduate health services students. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. S/U or letter grading.

**M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy.** (1-1-2) (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Requisites: course M236, Economics 201A, 201B, 201C. Limited to graduate public health and economics students. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress and S/U or letter grading.

**205. Pharmaceutical Policy.** (4) Lecture, three hours. Policy issues pertaining to pharmaceutical sector. Topics include determinants of expenditures on drugs, price setting in industry, health insurance coverage for pharmaceuticals, and research and development process. Letter grading.

**214. Measurements of Effectiveness and Outcomes of Health Care.** (4) Lecture, three hours. Requisites: courses 200A, 200B, M422, Biostatistics 100A. Historical perspective for development of health status measures and their utilization in assessment of outcomes and effectiveness in medical care. Review of current methods in context of current research and practice. Letter grading.

**220. Seminar: Cost Containment.** (4) Seminar, three hours. Through lectures and discussion of journal articles, analysis of success and failure of alternative methods of controlling U.S. health care costs. Examination of how other countries have controlled their costs. Letter grading.

**221. Tobacco: Prevention, Use, and Public Policy.** (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors and graduate students. Study of tobacco use and its health consequences, including interplay of historical, biological, sociocultural, political, and economic forces with knowledge, attitudes, and behavior choices of individuals. Introduction to prevention interventions, cessation interventions, anti-tobacco efforts in the U.S., and international trends in tobacco use. Letter grading.

**231. History of Public Health.** (4) Discussion, three hours. Designed for doctoral students. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health care providers, health care institutions, health care reform movements, public health activities, childbirth, and AIDS. S/U or letter grading.

**232. Governmental Health Services and Trends.** (4) Lecture, four hours. Preparation: two upper division social or behavioral sciences courses. Requisite: course 100. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions. S/U or letter grading.

**M233. Health Policy Analysis.** (4) (Same as Community Health Sciences M252.) Lecture, three hours. Requisites: courses 100 or 200A, M236, M287. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy. Letter grading.

**234. Health Services Organization and Management Theory.** (4) Lecture, four hours. Preparation: two upper division social sciences courses. Requisites: courses 100, 131. Application of contemporary organization and management theory to systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health services organizations. S/U or letter grading.

**235. Law, Social Change, and Health Service Policy.** (4) Lecture, four hours. Preparation: two upper division political science or sociology courses. Requisite: course 100. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs. S/U or letter grading.

**M236. Microeconomic Theory of Health Sector.** (4) (Same as Policy Studies M268.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

**237A-237B. Special Topics in Health Services Research Methodology.** (4-4) Lecture, one hour; discussion, three hours. Requisites: Biostatistics 100A, 100B. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critique of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data. Letter grading.

**237C. Issues in Health Services Methodologies.** (4) Lecture, four hours. Requisites: courses 237A, 237B. Designed for doctoral students. Intended to assist students in understanding the research process and its application in study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings. Letter grading.

**238. Politics of Health Care.** (4) Lecture, four hours. Requisite: course 100. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies. S/U or letter grading.

**239. Aging and Long-Term Care. (4)** Lecture, four hours. Requisites: courses 100, 238, Community Health Sciences 270A, 270B. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems. Letter grading.

**240. Health Care Issues in International Perspective. (4)** Lecture, four hours. Preparation: two health administration courses, two upper division social sciences courses. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries. S/U or letter grading.

**CM241. Women, Health, and Aging: Policy Issues. (4)** (Formerly numbered M241.) (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Concurrently scheduled with course CM141. Letter grading.

**M242. Determinants of Health. (4)** (Same as Community Health Sciences M232.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups. Letter grading.

**247. Research Topics in Health Economics. (4)** Lecture, four hours. Requisites: courses 100, M236, 446. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health programs. S/U or letter grading.

**249A-249Z. Special Topics in Health Services. (2 to 4 each)** Hours to be arranged. Requisites for each offering announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change:

**249D. Principles of Organization Leadership: Applications in Public Health and Welfare. (4)** Lecture, three hours; discussion, three hours. Designed for graduate students. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theories and empirical investigations of leadership qualities. Letter grading.

**M249E. Advanced Topics in Health Economics. (4)** (Same as Policy Studies M266.) Seminar, four hours. Requisites: courses 200A, 200B, M236. Advanced treatment of a number of topics in health economics, including mental health economics, pharmaceutical economics, and relationship between labor supply, welfare, and health. Letter grading.

**249F. Quality Assessment and Assurance. (4)** Seminar, four hours. Preparation: one health services or epidemiology course. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Fundamental issues in quality assessment, quality assurance, and measurement of health status. S/U or letter grading.

**249G. Decision Analysis and Cost-Effectiveness Analysis. (4)** Seminar, three hours. Requisites: courses 200A, 200B. Doctoral-level seminar focusing on techniques to assess a broad spectrum of medical technologies: therapeutic and diagnostic tests and procedures, clinical practice patterns, public health interventions, and pharmaceuticals. Demonstration of how decision analysis provides basic framework for conducting various economic evaluations. Letter grading.

**249H. Current Research Issues. (2 to 4)** Discussion, two hours. Designed for doctoral students. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

**249I. Seminar Series. (2 to 4)** Seminar, two hours. Designed for doctoral students. Presentation of proposed or ongoing research projects by faculty and students, with discussion to determine relevant methodological and policy issues, as well as to offer constructive criticism. S/U or letter grading.

**M249J. Mental Health Services. (4)** (Same as Psychiatry M251.) Lecture, three hours. Requisites: courses 200A, 200B. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

**249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes. (4)** Lecture, three hours. Requisites: courses 200A, 200B, M422, Biostatistics 100A, 100B. Designed for graduate students. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. Letter grading.

**M249L. Ethical Issues in Public Health. (4)** (Same as Community Health Sciences M249L.) Lecture, four hours. Requisites: courses 200A, 200B. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation. Letter grading.

**249M. Review of Current Health Services Management Literature. (2)** Lecture, two hours. Designed to help students remain current on recent developments in health services management and to place these current developments in proper context of academic research and theory. Letter grading.

**249N. Accessing, Analyzing, and Presenting Health Care Management Data. (2)** Lecture, two hours. Designed to provide first-year M.P.H. health professional students with basic skills, and acquisition and quantitative analysis of data for health care management, as well as written and oral presentation of those results. Letter grading.

**249O. Tobacco and Public Policy. (4)** Lecture, four hours. Information and analysis of principal issues in tobacco control. As administrators, researchers, and activists in field of tobacco control, professionals in all specialties of public health should be fully informed on strategies to combat worldwide tobacco epidemic. Letter grading.

**250. Evolution of Health Professions in the 20th Century. (4)** Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of "helping" professions. Review of forces responsible for these changes and description of processes by which lay persons are educated/socialized into major subgroups of health professions. Review of major social forces external to health care system that affect its composition. Letter grading.

**251. Process Improvement and Information Systems in Health Care Organizations. (4)** Lecture, four hours. Requisites: course 100, Biostatistics 100A. Introduction to concepts of health care quality measurement, process improvement, and information systems, as well as organizational aspects of implementing them. Letter grading.

**M252. Medicare Reform. (4)** (Same as Policy Studies M267.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

**M253. Advanced Topics in Health Services Research: Access to Care. (4)** (Same as Community Health Sciences M253.) Lecture, three hours. Requisites: courses 237A, 237B, and 237C, or Community Health Sciences 210, 270A, and 270B. Doctoral seminar designed to explore health services research regarding access to health care and policies to enhance access. Topics include conceptual frameworks, measurement issues, study designs, analytic approaches, and substantive findings and trends in access and access-related policies. Letter grading.

**254. Multidisciplinary Perspectives: Research Approaches to Managed Care. (4)** Seminar, three hours. Requisites: courses 100, or 200A and 200B. Exploration of perspectives and methodologies of nine academic disciplines relevant to health services research. Scholars in each discipline introduce their framework and discuss applications to current research in managed care. Letter grading.

**M255. Obesity, Physical Activity, and Nutrition Seminar. (4)** (Same as Community Health Sciences M234.) Seminar, three hours; outside study, one hour. Designed for graduate students. Multidisciplinary introduction at graduate level to epidemiology, physiology, and current state of preventive and therapeutic interventions for obesity in adults and children, including public health policy approaches to healthy nutrition and physical activity promotion. S/U or letter grading.

**260A-260B. World Health. (2-2)** Lecture, two hours. Designed for graduate students. Overview of world health, with emphasis on health care outside the U.S. Key areas include burden of infectious diseases, health economics, and impact of health care policy on health care delivery. In Progress and letter grading.

**265. Challenges in Clinical Health Services Research. (4)** Lecture, four hours. Requisites: courses 200A, 200B. Designed to prepare students for challenges involved in conducting health services research on clinical topics and populations. Topics include formulating appropriate questions, identifying sources, mechanism of conducting field studies, identifying funding sources, writing grants, and publishing findings. S/U or letter grading.

**M269. Health Care Policy and Finance. (4)** (Same as Policy Studies M269.) Seminar, three hours; outside study, nine hours. Exploration of demand for health insurance, policies for public insurance (Medicaid and Medicare), the uninsured, and health insurance reform. Examination of effects of managed care on health and costs, consumer protection movement, and rise of competitive health care markets. Letter grading.

**M287. Politics of Health Policy. (4)** (Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Requisites: courses 200A and 200B, or Community Health Sciences 210. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors. Letter grading.

**400. Field Studies in Health Services. (2 or 4)** Lecture, three hours. Preparation: summer internship. Required of all graduating M.P.H. students. Continuation of summer placement in organizations for delivery, financing, and evaluation of health services. Preparation of consulting report based on organizational problem or project from summer internship. Exposure to selected professional development issues. Letter grading.

**401. Public Health Informatics. (4)** Lecture, three hours. Preparation: general familiarity and understanding of basic information technologies. Recommended prerequisite: course 251. Introduction to field of public health informatics and examination of impact of information technology on practice of public health. Entire process, from systems conceptualization and design to project planning and development to system implementation and use. Letter grading.

**M411. Issues in Cancer Prevention and Control. (4)** (Same as Community Health Sciences M411.) Lecture, four hours. Designed for juniors/seniors and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes. Letter grading.

**M422. Practices of Evaluation in Health Services: Theory and Methodology. (4)** (Same as Sociology M402.) Lecture, four hours. Requisites: courses 200A, 200B. Introduction to evaluation of health services programs and policies. Exposure to basic theoretical concepts and specific evaluation methodologies and designs. Letter grading.

**427. Population-Based Health Planning. (4)** Lecture, four hours. Requisites: courses 200A, 200B, Biostatistics 100A. Introduction to techniques of forecasting health care needs, utilization, and expenditures using population-based planning. Letter grading.

**430. New Developments in E-Health and Internet. (4)** Lecture, four hours. Introduction of new technologies in health care e-commerce/Internet/new media area, with emphasis on general background, review of applications, and discussion of organizational and managerial issues dealing with successful use and implementation of technologies. S/U or letter grading.

**431. Managerial Processes in Health Services Organizations. (4)** Lecture, one hour; laboratory, three hours. Requisites: courses 100, 234. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health services organizations are stressed as applications are presented. Letter grading.

**432. Integrative Seminar: Health Services Management. (4)** Seminar, four hours. Requisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty. S/U or letter grading.

**433. Health Services Organization Policy and Strategy. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 200A, 200B, 234, M236, Biostatistics 100A, Management 403. Conceptual, analytical, and technical aspects of policy and strategy formulation in health services organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation. Letter grading.

**434. Employer/Employee Health Management. (4)** Lecture, two hours; discussion, two hours. Preparation: a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems. Requisite: course 100. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others. S/U or letter grading.

**436. Financial Management of Health Service Organizations. (4)** Lecture, four hours. Requisites: courses 131, 132, 234. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management. S/U or letter grading.

**437. Legal Environment of Health Services Management. (2)** Lecture, four hours. Requisite: course 131. General survey of legal aspects of health services management, including governance, agency, informed consent, medical malpractice, contracts, negligence, and case law related to health facility operations. S/U grading.

**438. Issues and Problems of Local Health Administration. (4)** Lecture, three hours. Preparation: one health services course. Requisites: course 100, Epidemiology 100. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions. Letter grading.

**439. Dental Care Administration. (4)** Lecture, three to four hours. Requisites or corequisites: Biostatistics 100A, Epidemiology 100. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms. Letter grading.

**440A. Health Information Systems: Organization and Management. (4)** Lecture, two hours; laboratory, three hours. Requisites: courses 200A, 200B. Principles of and systems related to organization and management of a health facility's health information system. Letter grading.

**440B. Health Information Systems: Organization and Management. (4)** Lecture, two hours; laboratory, three hours. Requisite: course 440A. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services. S/U or letter grading.

**441. Ambulatory Care in the U.S. (4)** Seminar, three hours. Requisites: courses 132, 200A, 200B, Management 403. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements. Letter grading.

**442A. Managed Health Care: Quality and Cost. (4)** Lecture, three hours. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PPOs, as well as discussion of managed care as a solution. Letter grading.

**443A. Biological and Social Bases of Prevention. (4)** Lecture, two hours; discussion, two hours. Requisites: courses 100 (or 200A and 200B), Biostatistics 100A, Epidemiology 100. Designed for graduate students. Development, current status, and potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues. Letter grading.

**444. Applied Methodology in Health Planning. (4)** Lecture, three hours; fieldwork, four hours. Requisites: courses 200A, 200B. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area. Letter grading.

**445. Health Care Marketing. (4)** Lecture, three hours. Requisites: courses 200A, 200B, Biostatistics 100A, 100B. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which students must prepare in advance, fieldwork group project. Letter grading.

**447. State Health Policy Issues. (4)** Seminar, three hours. Requisite: course 238. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships. S/U or letter grading.

**447E. Health Insurance Principles and Programs. (4)** Lecture, four hours. Preparation: one health services course. Requisites: courses 100, 232. Examination of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments. S/U or letter grading.

**M448. Health Policy Issues for Dental Professionals. (2)** (Same as Dentistry M422.) Lecture, two hours. Requisites: course 100, Biostatistics 100A, Epidemiology 100. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

**M448D. Case Studies in Dental Practice. (2)** (Same as Dentistry M433A.) Lecture, two hours. Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

**M449A-M449B. Child Health, Programs, and Policies. (4-4)** (Same as Community Health Sciences M436A-M436B.) Lecture, four hours. Requisite: course 100. Course M449A is requisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations. Letter grading.

**450. Financial Theory of Health Services Organizations. (4)** Lecture, four hours. Requisites: courses 200A, 200B. Study of health care financial management, including variables of cost of funds, availability of physicians to provide the necessary patients, efficiency of operations, and legal constraints. Letter grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. Individual guided studies under direct faculty supervision. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Limited to graduate students. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research. (2 to 8)** Tutorial, to be arranged. Only 4 units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research. (2 to 8)** Tutorial, to be arranged. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Edward A. Alpers, Ph.D.  
 Francis R. Anderson, B.A., *Acting*  
 Peter Baldwin, Ph.D.  
 Ivan T. Berend, Ph.D.  
 Kathryn Bernhardt, Ph.D.  
 Ruth H. Bloch, Ph.D.  
 Robert P. Brenner, Ph.D.  
 Brian P. Copenhaver, Ph.D.  
 Ellen C. DuBois, Ph.D.  
 Christopher Ehret, Ph.D.  
 Robert G. Frank, Jr., Ph.D.  
 Saul P. Friedlander, Ph.D. (*1939 Club Professor*)  
 Patrick Geary, Ph.D.  
 J. Arch Getty, Ph.D.  
 Carlo Ginzburg, Laurea in lettere (*Franklin D. Murphy Professor of Italian Renaissance Studies*)  
 Juan Gómez-Quiñones, Ph.D.  
 Robert A. Hill, M.Sc.  
 Thomas S. Hines, Ph.D.  
 Philip C. Huang, Ph.D.  
 Lynn A. Hunt, Ph.D. (*Eugen Weber Professor of Modern European History*)  
 Margaret C. Jacob, Ph.D.  
 Russell Jacoby, Ph.D., *in Residence*  
 Sanford M. Jacoby, Ph.D.  
 Maurice Kriegel, Ph.D., *Acting (Maurice Amado Professor of Sephardic Studies)*  
 Naomi R. Lamoreaux, Ph.D.  
 Ronald J. Mellor, Ph.D.  
 Eric H. Monkonen, Ph.D.  
 David N. Myers, Ph.D.  
 Fred G. Notehelfer, Ph.D.  
 Herman Ooms, Ph.D.  
 Anthony R. Pagden, Ph.D.  
 Theodore M. Porter, Ph.D.  
 Peter H. Reill, Ph.D.  
 Richard H. Rouse, Ph.D.  
 Teofilo F. Ruiz, Ph.D.  
 David Sabeau, Ph.D. (*Henry J. Bruman Professor of German History*)  
 Miriam R. Silverberg, Ph.D.  
 Debora L. Silverman, Ph.D.  
 Brenda Stevenson, Ph.D.  
 Geoffrey W. Symcox, Ph.D.  
 Richard von Glahn, Ph.D.  
 Scott L. Waugh, Ph.D.  
 Dora B. Weiner, Ph.D., *in Residence*  
 Richard Weiss, Ph.D.  
 James W. Wilkie, Ph.D.  
 Matthew Norton Wise, Ph.D.  
 Robert Wohl, Ph.D.  
 William H. Worger, Ph.D.

### Professors Emeriti

Joyce O. Appleby, Ph.D.  
 Kees W. Bolle, Ph.D.  
 Giorgio Buccellati, Ph.D.  
 Robert I. Burns, S.J., Ph.D.  
 Robert N. Burr, Ph.D.  
 Mortimer Chambers, Jr., Ph.D.  
 Claus-Peter Clasen, Ph.D.  
 Robert Dallek, Ph.D.  
 Benjamin A. Elman, Ph.D.  
 John S. Galbraith, Ph.D.  
 Frank O. Gatell, Ph.D.  
 Richard Hovannisian, Ph.D. (*Armenian Educational Foundation Professor Emeritus of Modern Armenian History*)  
 Daniel W. Howe, Ph.D.  
 Norris C. Hundley, Ph.D.  
 Nikki Keddie, Ph.D.  
 Barisa Krekić, Ph.D.

 James Lockhart, Ph.D.  
 Peter Loewenberg, Ph.D.  
 Afaf Marsot, D.Phil.  
 Lauro R. Martinez, Ph.D.  
 Gary B. Nash, Ph.D.  
 Merrick Posnansky, Ph.D.

Damodar R. SarDesai, Ph.D. (*Navin and Pratima Doshi Professor Emeritus of Indian History*)  
 Alexander P. Saxton, Ph.D.  
 Stanford J. Shaw, Ph.D.  
 Eugen J. Weber, M.Litt. (*Eugen Weber Professor Emeritus of Modern European History*)  
 Stanley A. Wolpert, Ph.D.

### Associate Professors

Stephen A. Aron, Ph.D.  
 Joel T. Braslow, M.D., Ph.D., *in Residence*  
 John Duncan, Ph.D.  
 Steven Frank, Ph.D.  
 James L. Gelvin, Ph.D.  
 Vinay Lal, Ph.D.  
 Valerie J. Matsumoto, Ph.D.  
 Muriel McClendon, Ph.D.  
 Melissa L. Meyer, Ph.D.  
 Michael G. Morony, Ph.D.  
 José C. Moya, Ph.D.  
 Kathryn Norberg, Ph.D.  
 Gabriel Piterberg, D. Phil.  
 Claudia Rapp, D.Phil.  
 Janice L. Reiff, Ph.D.  
 Geoffrey Robinson, Ph.D.  
 Michael Salman, Ph.D.  
 William R. Summerhill, Ph.D.  
 Kevin B. Terraciano, Ph.D.  
 Sharon J. Traweek, Ph.D.  
 Albion M. Urdank, Ph.D.  
 Jessica A. Wang, Ph.D.  
 Joan Waugh, Ph.D.  
 Mary A. Yeager, Ph.D.  
 Henry S.N. Yu, Ph.D.

### Assistant Professors

Eric R. Avila, Ph.D.  
 Scot D. Brown, Ph.D.  
 L. Robin Derby, Ph.D.  
 Ghislaine E. Lydon, Ph.D., *in Residence*  
 David D. Phillips, Ph.D.  
 Mary Terrall, Ph.D.

### Senior Lecturer S.O.E.

S. Scott Bartchy, Ph.D.

### Lecturer

Larry Lauerhass, Ph.D., *Emeritus*

### Adjunct Professors

Richard H. Popkin, Ph.D.  
 Robert C. Ritchie, Ph.D.

## Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, History is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a concurrent master's program with the Graduate School of Education and Information Studies. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

## Undergraduate Study

### History B.A.

The History Department's undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major). All courses must be taken for a letter grade.

### Preparation for the Premajor and Major

*Required for the Premajor:* Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and 99.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor's office in 6248 Bunche Hall.

*Required for the Major:* Three additional lower division history courses.

### Transfer Students

To be admitted as History majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one semester or two quarters of history of Western civilization or world history, one historical practice course, and three additional lower division history courses.

Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

### The Major

*Required:* At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 197.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

### Advanced Placement Credit in History

The College of Letters and Science allows 8 quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit for continuing and transfer students (effective Fall Quarter 2002) to the Preparation for the Major as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows 8 units of History 13A, 13B, 13C credit on the history preparation. The excess units may be applied only toward the degree.

Effective Fall Quarter 2002 for entering freshmen, no course credit is granted for any AP Test.

### Honors Program

The honors program is designed for History majors who are interested in completing a year-long research project that culminates in an honors thesis. A 3.5 departmental grade-point average is required for admission, but students with a lower GPA may petition the honors committee for admission. To graduate with departmental honors, students must have a cumulative or overall GPA of at least 3.0 in all University-level coursework and at least a 3.5 GPA in all coursework required for the major.

The honors thesis must be completed in three terms, on the basis of work carried out in either an upper division seminar (History 197) and courses 199HB and 199HC or in courses 199HA, 199HB, and 199HC. Students must register their intention to undertake an honors thesis with the undergraduate affairs vice chair no later than the end of the term in which they take their first honors course (either course 197 or 199HA).

When students register for honors, they must provide the undergraduate affairs vice chair with a two-paragraph description of their thesis project, which must be approved in writing by the faculty member who agrees to act as their adviser. The undergraduate affairs vice chair must also approve the proposed project in writing.

The faculty adviser is primarily responsible for guiding the thesis work to its completion and assigns grades for the honors courses after the thesis is complete. The honors thesis should be 40 to 60 pages in length and be based on primary source material. Determination of the level of honors awarded (no honors, honors, or highest honors) is made by the undergraduate affairs vice chair, acting in conjunction with the honors committee, at the end of the term in which the thesis is completed.

### Single Subject Credential in Social Science

For information on the single subject credential in social science, consult the Department of Education, 1009 Moore Hall, (310) 825-8328.

### History of Science and Medicine Minor

The History of Science and Medicine minor is designed for students who wish to augment their major, perhaps in one of the sciences, with a series of courses that analyze the historical growth, impact, and significance of science and medicine in Western and world culture. The minor consists of a choice of lower division courses that expose students to overviews of science and medicine in large time periods or to specific thematic concerns. Upper division courses offer more focused and often smaller classes that explore crucial episodes or areas with a more rigorous and sophisticated content and methodology.

To enter the minor, students must be in good academic standing (2.0 grade-point average), have completed 45 units and at least one lower division course in the history of science or medicine for a letter grade, and file a petition with the minor adviser in 6265 Bunche Hall.

*Required Lower Division Courses (12 units):* Three courses from History 2B, 2D, 3A through 3D, Philosophy 8.

*Required Upper Division Courses (20 units):* Five courses from Anthropology 182, 183, History 195A through 195E, any upper division Honors Collegium courses with history of science or history of medicine content, Neurobiology M168 (or Physiological Science M168), Philosophy 124.

Each year certain undergraduate seminars in the History 197 sequence are designated as applicable to the upper division minor requirements. Students may also petition to have other relevant courses, including those from other departments, applied toward the upper division requirements.

At least one upper division course, to be selected and approved in consultation with the undergraduate or faculty adviser, must involve writing a research or interpretative paper of significant length and intellectual content. Only one course applied toward the students' majors may also be applied toward this minor. Transfer credit for courses may be subject to departmental approval.

One course may be taken on a Passed/Not Passed basis; all other minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of History offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in History. A concurrent degree program (History M.A./Library and Information Science M.L.I.S.) is also offered.

### History

#### Lower Division Courses

**1A-1B-1C. Introduction to Western Civilization. (5-5-5)** Lecture, three hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. P/NP or letter grading. **1A.** Ancient Civilizations from Prehistory to Circa A.D. 843; **1B.** Circa A.D. 843 to Circa 1715; **1C.** Circa 1715 to the Present.

**1AH-1BH-1CH. Introduction to Western Civilization (Honors). (5-5-5)** Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 1A, 1B, 1C. P/NP or letter grading. **1AH.** Ancient Civilizations from Prehistory to Circa A.D. 843 (Honors); **1BH.** Circa A.D. 843 to Circa 1715 (Honors); **1CH.** Circa 1715 to the Present (Honors).

**2A. Power, Ethics, and Technological Change. (4)** Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, corporate power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historical case studies include Three Mile Island, Chernobyl, the DC-10, and Challenger Disaster. P/NP or letter grading.

**2B. Social Knowledge and Social Power. (5)** Lecture, three hours; discussion, two hours. History of social knowledge and social power in the 19th and 20th centuries. Everyday ideas and practices about human nature, common sense, and community and relation of those practices to social thought, social engineering, and social science. Themes include development of social knowledges through public activities and discourses; how social knowledge differs in agricultural, mercantile, industrial, and information-based political economies; and how social science addresses these issues. P/NP or letter grading.

**2C-2D. Religion, the Occult, and Science. (5-5)** Lecture, three hours; discussion, two hours. P/NP or letter grading:

**2C.** Mystics, Heretics, and Witches in Western Tradition, 1000 to 1600. (5) Lecture, three hours; discussion, two hours. Specific aspects of elite and popular culture in medieval and early modern Europe. Manner in which men and women sought to explain, order, and escape terrors of their lives by embracing transcendental religious experiences and dreaming of apocalypse and witchcraft. Examination of experiences in context of genesis of the state, birth of a new science, and economic and social change. P/NP or letter grading.

**2D.** Science, Magic, and Religion, 1600 to the Present. (5) Lecture, three hours; discussion, two hours. Science and religion as historical phenomena that have evolved over time. Examination of earlier mind-set before 1700 when into science fitted elements that came eventually to be seen as magical. How Western cosmologies became "disenchanted." Magical tradition transformed into modern mysticisms. Political implications of these movements; science in totalitarian settings as well as "big science" during the Cold War. Discussion of anti-science and cult movements. P/NP or letter grading.

**3A-3B-3C. Introduction to History of Science. (5-5-5)** Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements. P/NP or letter grading:

**3A.** Scientific Revolution. (5) Lecture, three hours; discussion, two hours. Survey of beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of natural world, rise of experimental science, and origin of scientific societies. P/NP or letter grading.

**3B.** History of Science from Newton to Darwin. (5) Lecture, three hours; discussion, two hours. In this period science became part of Enlightenment campaign for reason and of culture of an Industrial Revolution. New social science and evolutionary debates about science and religion demonstrate its rising intellectual and practical significance. P/NP or letter grading.

**3C.** History of Modern Science, Relativity to DNA. (5) Lecture, three hours; discussion, two hours. Ranging from startling new physics of relativity and the quantum, and of nuclear weapons, to molecular reductionism in biology and campaigns for statistical objectivity, examination of involvement of science in technological, military, intellectual, and political changes of the 20th century. P/NP or letter grading.

**3CH. Introduction to History of Science: History of Modern Science, Relativity to DNA (Honors).** (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 3C. P/NP or letter grading.

**3D. Themes in History of Medicine. (5)** Lecture, three hours; discussion, two hours. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emergence of surgery, epidemics, conception and treatment of insanity, and use of medical technology. P/NP or letter grading.

**4. Introduction to History of Religions. (5)** Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern history with its discoveries of religions of India, China, ancient Near East, etc., and problem of encounter of various religions in the 19th and 20th centuries. P/NP or letter grading.

**8A. Colonial Latin America. (5)** Lecture, three hours; discussion, two hours. General introduction to Latin American history from contact period to independence (1490s to 1820s), with emphasis on convergence of Native American, European, and African cultures in Latin America; issues of ethnicity and gender; development of colonial institutions and societies; and emergence of local and national identities. Readings focus on writings of Latin American men and women from the period studied. P/NP or letter grading.

**8AH. Colonial Latin America (Honors). (5)** Lecture, three hours; discussion, two hours. Honors course parallel to course 8A. P/NP or letter grading.

**8B. Political Economy of Latin American Underdevelopment, 1750 to 1930. (5)** Lecture, three hours; discussion, two hours. Interaction of precapitalist and modern modes of social organization in Latin American history, particularly during the "long" 19th century, by focusing on relationship between economic change, social and cultural structures, and politics in the region. P/NP or letter grading.

**8BH. Political Economy of Latin American Underdevelopment, 1750 to 1930 (Honors). (5)** Lecture, three hours; discussion, two hours. Honors course parallel to course 8B. P/NP or letter grading.

**8C. Latin American Social History. (5)** Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history. P/NP or letter grading.

**8CH. Latin American Social History (Honors). (5)** Lecture, three hours; discussion, two hours. Honors course parallel to course 8C. P/NP or letter grading.

**9A-9E. Introduction to Asian Civilizations. (5 each)** Lecture, three hours; discussion, two hours. P/NP or letter grading:

**9A.** History of India. (5) Lecture, three hours; discussion, two hours. Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indic civilization. P/NP or letter grading.

**9C.** History of Japan. (5) Lecture, three hours; discussion, two hours. Survey of Japanese history from earliest recorded time to the present, with emphasis on development of Japan as a cultural daughter of China. Attention to manner in which Chinese culture was Japanese and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japanese culture. P/NP or letter grading.

**9CH.** History of Japan (Honors). (5) Lecture, three hours; discussion, two hours. Honors course parallel to course 9C. P/NP or letter grading.

**9D.** History of the Near and Middle East. (5) Lecture, three hours; discussion, two hours. Introduction to history of Muslim world from advent of Islam to the present day. P/NP or letter grading.

**9E.** Southeast Asian Crossroads. (5) Lecture, three hours; discussion, two hours. Overview history of a region united by its wet tropical environment and divided by great religious, cultural, and political pluralism, with focus on Vietnamese, Thai, Filipino, Khmer, Burmese, and Malayo-Indonesian patterns. P/NP or letter grading.

**10A-10B. History of Africa. (5-5)** Lecture, three hours; discussion, two hours. P/NP or letter grading.

**10A.** To 1800. Exploration of development of African societies from earliest times to the late 18th century.

**10B.** 1800 to the Present. Not open for credit to students with credit for course 10BH or 10BW. Survey of social, economic, and political developments in Africa since 1800, with focus on slave trade, imperialism and colonialism, and nationalism and independence. Attention to different ideologies (nationalism, socialism, apartheid), rural/urban tensions, changing role of women.

**10BH. Introduction to Civilizations of Africa (Honors). (4)** Lecture, three hours; discussion, two hours. Not open for credit to students with credit for course 10B or 10BW. Honors course parallel to course 10B. P/NP or letter grading.

**10BW. Introduction to Civilizations of Africa since 1800. (5)** Lecture, three hours; discussion, two hours.

Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 10B or 10BH. Survey of social, economic, and political developments in Africa since 1800, with focus on slave trade, imperialism and colonialism, and nationalism and independence. Attention to different ideologies (nationalism, socialism, apartheid), rural/urban tensions, changing role of women. Four papers required. Satisfies Letters and Science Writing II requirement. Letter grading.

**11A-11B. History of China. (5-5)** Lecture, three hours; discussion, two hours. P/NP or letter grading.

**11A.** To 1000. Survey of early history of China — genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires. **11B.** 1000 to 1950. Survey of later history of China — evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in contemporary era.

**11AH-11BH. History of China (Honors). (5-5)** Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A, 11B. P/NP or letter grading. **11AH.** To 1000 (Honors); **11BH.** 1000 to 1950 (Honors).

**13A-13B-13C. History of the U.S. and Its Colonial Origins. (5-5-5)** Lecture, three hours; discussion, two hours. Strongly recommended for History majors planning to take more advanced courses in U.S. history. Cultural heritages, political institutions, economic developments, and social interactions which created contemporary society. P/NP or letter grading. **13A.** Colonial Origins and First Nation Building Acts; **13B.** 19th Century; **13C.** 20th Century.

**20. World History to A.D. 600. (5)** Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe — Mesopotamia, Egypt, Israel, India, China, Greece, and Rome — from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of society, nature of kingship, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/NP or letter grading.

**21. World History, Circa 600 to 1760. (5)** Lecture, three hours; discussion, two hours. Outline of world history from rise of Islam to start of Industrial Revolution, structured around a broad chronological narrative of salient developments. Use of thematic and comparative approaches, with certain recurring themes and institutions that modulate from culture to culture. Reading of variety of contemporary accounts to look at way people perceived cultures outside their own. P/NP or letter grading.

**22. Contemporary World History, 1760 to the Present. (5)** Lecture, three hours; discussion, two hours. Broad thematic survey of world history since the mid-18th century. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women's rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

**88A-88U. Lower Division Seminars. (5 each)** Seminar, three hours. Limited to 15 freshmen/sophomores. Open to nonhistory majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). Ten units may be taken for credit. **88A.** Ancient Greece; **88B.** Ancient Rome; **88C.** Medieval; **88D.** Early Modern Europe; **88E.** Modern Europe; **88F.** Russia/Eastern Europe; **88G.** Britain; **88H.** U.S.; **88I.** Latin America; **88J.** Near East; **88K.** India; **88L.** China; **88M.** Japan; **88N.** Africa; **88O.** Science/Technology; **88P.** History of Religions; **88Q.** Theory of History; **88R.** Jewish History; **88S.** Armenia and the Caucasus; **88T.** Southeast Asia; **88U.** Psychohistory.

**97H. Three Trials. (4)** Discussion, three hours. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial.

**99. Introduction to Historical Practice. (4)** Seminar, three hours. Discussion classes of no more than 15 students. Introduction to study of history, with emphasis on historical theory and research methods. P/NP or letter grading.

**99W. Introduction to Historical Practice. (5)** Seminar, three hours. Enforced requisite: English Composition 3 or 3H. Introduction to study of history, with emphasis on historical theory and research methods. Satisfies Letters and Science Writing II requirement. Letter grading.

## Upper Division Courses

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures.

Consult the quarterly *Schedule of Classes* to determine the offerings for each term.

**100. History and Historians. (4)** Lecture. Designed for juniors/seniors. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians. P/NP or letter grading.

**101. Topics in World History. (4)** Lecture. Designed for juniors/seniors. Examination of specific historical themes from world historical perspective. May be repeated for credit. P/NP or letter grading.

**102. Explorations in Psychoanalysis and History. (4)** Designed for juniors/seniors. Art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.

**M103A-M103B. Historical Archaeology. (4-4)** (Same as Anthropology M115A-M115B.) Lecture, three hours. Designed for juniors/seniors. P/NP or letter grading. **M103A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of the discipline both in the Old World and the Americas. **M103B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications.

**M104A-M104B. Ancient Egyptian Civilization. (4-4)** (Same as Ancient Near East M104A-M104B.) Lecture, three hours; discussion, one hour. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria. (4)** (Same as Ancient Near East M105.) Lecture, three hours. Designed for juniors/seniors. Political and cultural development of "Fertile Crescent," including Palestine, from Late Uruk to neo-Babylonian period. Letter grading.

**106A-106B-106C. Survey of the Middle East from 500 to the Present. (4-4-4)** Designed for juniors/seniors. Background and circumstances of rise of Islam, creation of the Islamic Empire, and its development. Rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development. **106A.** 500 to 1300; **106B.** 1300 to 1700; **106C.** 1700 to the Present.

**107. Premodern Islam. (4)** (Formerly numbered 107A.) Lecture. Designed for juniors/seniors. Examination of early development of Islam with special attention to doctrine of nature of God, human responsibility, guidance, revelation and religious authority, duties of believers, ritual, law, sectarian movements, mysticism, and popular religion. P/NP or letter grading.

**108. History of Islamic Iberia. (4)** (Formerly numbered 109C.) Lecture. Designed for juniors/seniors. Survey of political, social, economic, religious, artistic, and literary history of an Islamic culture in Western Europe. P/NP or letter grading.

**109. History of North Africa from Islamic Conquest. (4)** (Formerly numbered 109A.) Lecture. Designed for juniors/seniors. Survey of political, social, economic, and religious history of Islamic West (Maghrib) from Muslim conquest in the 7th and 8th centuries C.E. until 1578. P/NP or letter grading.

**112A-112B-112C. Armenian History. (4-4-4)** Designed for juniors/seniors. **112A.** Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century; **112B.** Armenia from Cilician Kingdom through Periods of Foreign Domination and National Struggles, 11th to 19th Centuries; **112C.** Armenia in Modern and Contemporary Times, 19th and 20th Centuries. Armenian question and genocide, national republic, Soviet Armenia, and the dispersion.

**C112D. Introduction to Armenian Oral History. (4)** Lecture/discussion, three hours. Designed for juniors/seniors. Uses and techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212.

**113. The Caucasus under Russian and Soviet Rule. (4)** Designed for juniors/seniors. Survey of political, economic, social, and cultural history of the Caucasus region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the nationality question and the Soviet national republics.

**114. Topics in Middle Eastern History. (4)** Designed for juniors/seniors. Examination of major issues in history of Middle East. P/NP or letter grading.

**115A-115B-115C. History of Ancient Mediterranean World. (4-4-4)** Designed for juniors/seniors. **115A.** Survey of history of the ancient East from earliest times to foundation of the Persian Empire. **115B.** History and institutions of the Greeks from their arrival to the death of Alexander. **115C.** History and institutions of Rome from founding of the city to the death of Constantine.

**115D. History and Monuments of Ancient Greece: Field Studies. (4)** (Formerly numbered 198G.) Field studies. Enforced corequisite: course 115B. Examination of history, art, and monuments of ancient Greece through daily lectures and field walks to museums and archaeological sites. Part of UCLA Summer Travel Program. P/NP or letter grading.

**115E. History and Monuments of Rome: Field Studies. (4)** (Formerly numbered 198N.) Field studies. Enforced corequisite: course 115C. Examination of history, art, and monuments of ancient Rome through daily lectures and field walks to museums and archaeological sites. Field trips outside Rome to Pompeii, Hadrian's Villa, and ancient Ostia. Some attention to monuments and churches of medieval and Renaissance Rome in their historical context. Part of UCLA Summer Travel Program. P/NP or letter grading.

**116A-116B. History of Ancient Greece. (4-4)** Designed for juniors/seniors. **116A.** Rise of the Greek City-State. Emphasis on archaic period and early classical age through the Persian Wars. **116B.** Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great.

**117A-117B-117C. History of Rome. (4-4-4)** Designed for juniors/seniors. P/NP or letter grading.

**117A.** To Death of Caesar. Emphasis on development of imperialism and on constitutional and social struggles of the late republic. **117B.** From Death of Caesar to the Time of Constantine. The early empire treated in more detail, supplemented by survey of social and economic changes in the 3rd century. **117C.** Transformation of the Classical World. Political, cultural, and religious history of the Mediterranean in late antiquity, from crisis of Roman Empire in the 3rd century to barbarian and Arab invasions and beginning of medieval states and societies in the 7th century.

**118. Topics in Ancient History. (4)** Designed for juniors/seniors. Introduction to topics in Greek and Roman history, including Roman law, ancient Greek and Roman slavery, world of Caesar Augustus, Greek democracy, and Alexander the Great. May be repeated for credit. P/NP or letter grading.

**C119A. Early Medieval Intellectual History: Thought, Literacy, and Religion Circa 400 to 1000. (4)** Lecture. Designed for juniors/seniors. Examination of ideas and means by which they were communicated in early Middle Ages. Concurrently scheduled with course C219A. P/NP or letter grading.

**C119B. Later Medieval Intellectual History: Thought, Literacy, and Religion Circa 1100 to 1500. (4)** Lecture. Designed for juniors/seniors. Examination of evolution of ideas and means by which they were communicated in later Middle Ages. Concurrently scheduled with course C219B. P/NP or letter grading.

**119M. The Christian Church, 100 to 1517. (4)** Lecture. Designed for juniors/seniors. Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. P/NP or letter grading.

**C120A. Interfaces: Transmission of Roman Literature. (4)** Discussion, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. Concurrently scheduled with course CM220A. P/NP or letter grading.

**120M. The Christian Religion, 100 to 1350. (4)** Lecture. Designed for juniors/seniors. Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders. P/NP or letter grading.

**121A-121B. Medieval Europe. (4-4)** Designed for juniors/seniors. Basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. **121A.** 400 to 1000; **121B.** 1000 to 1500.

**121C. Medieval Civilization: Mediterranean Heartlands. (4)** Designed for juniors/seniors. Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

**121D. Topics in Medieval History. (4)** Lecture. Designed for juniors/seniors. Special topics in history of Middle Ages, including religion in society, justice and law, politics of war and diplomacy, economic upheaval and renewal, and cultural representations. P/NP or letter grading.

**M122. Power and Imagination in Byzantium. (4)** (Same as Classics M170C.) Lecture, three hours. Requisites: courses M70, or 123A and 123B. Designed for juniors/seniors. Study of relations of authority and intelligentsia in highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform. Letter grading.

**123A-123B. Byzantine History. (4-4)** Designed for juniors/seniors. Political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. Reforms of Diocletian. Byzantium's relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks.

**124A-124B. East-Central Europe. (4-4)** Designed for juniors/seniors. **124A.** The Long 19th Century, 1780 to 1914. Analysis of characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and consequences of its partial failure in the economy, politics, and culture. **124B.** The Short 20th Century, 1918 to 1990. Analysis and interpretation of stormy history of crisis zone of Europe where wars, revolts and revolutions, different types of extremisms led to a historical detour: 70 years of departure from Western values and at last an effort to turn back to them.

**124C. East-Central Europe in Transition, 1988 to 1993. (4)** Designed for juniors/seniors. State-socialism and Soviet domination collapsed in East-Central Europe in 1989. Analysis of cause and consequence of the collapse, as well as the road of transformation in seven (now 12) countries of the region; international circumstances and domestic political, social, and economic processes. Ideology of transition versus reality of democratization, marketization, and privatization; free choice versus determinant factors. Scenarios for the future. P/NP or letter grading.

**124D. Film and History: Central and Eastern Europe, 1945 to 1989. (4)** Designed for juniors/seniors. Postwar history of central and eastern Europe (1945 to 1989), using eight Czech, Polish, and Hungarian films to explore life under state socialist "modernization dictatorship." P/NP or letter grading.

**125A-125F. History of Modern Europe. (4 each)** Lecture. Designed for juniors/seniors. P/NP or letter grading:

**125A.** Renaissance and Reformation, 1450 to 1660. (4) Lecture. Designed for juniors/seniors. Reorganization of power, new forms of representation, and discourses about rule and obedience in Europe from the mid-15th through 16th century; popular culture; peasant society; refashioning of religion and power; localization. P/NP or letter grading.

**125B.** Baroque Culture and Absolutist Politics, 1600 to 1715. (4) Lecture. Designed for juniors/seniors. Changing nature of state and social domination; redeployment of military violence; strategies of population discipline; absolutism and baroque culture; new forms of bureaucratic intervention; representation of the family, sexuality, and the body; witch persecutions. P/NP or letter grading.

**125C.** Old Regime and Revolutionary Era, 1715 to 1815. (4) Lecture. Designed for juniors/seniors. Enlightened absolutism and reform, challenge of new political and economic ideas, crisis of the Old Regime, impact of French Revolution and Napoleonic empire. P/NP or letter grading.

**125D.** Bourgeois Century, 1815 to 1914. (4) Lecture. Designed for juniors/seniors. Restoration politics, Industrial Revolution, uprisings of 1848, unification of Germany and Italy, imperialism, rise of socialism, population growth, changes in social structure, origins of World War I. P/NP or letter grading.

**125E.** Era of Total War, 1914 to 1945. (4) Lecture. Designed for juniors/seniors. World War I, interwar period, and World War II. Social, cultural, political, and economic aspects, with focus on strain between model of parliamentary democracy and dynamics of mass politics (e.g., Bolshevik Revolution, Italian Fascism, national socialism, and Spanish Civil War). P/NP or letter grading.

**125F.** World War II and Its Aftermath, 1939 to the Present. (4) Lecture. Designed for juniors/seniors. World War II, origins and persistence of the Cold War, reconstruction in the West, de-Stalinization, decolonization, crisis of the welfare state, background to and course of the 1989 revolutions, current political configuration. P/NP or letter grading.

**126A-126F. Cultural and Intellectual History of Modern Europe. (4 each)** Lecture. Designed for juniors/seniors. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context. P/NP or letter grading. **126A.** 15th Century. Renaissance cultural and intellectual history of Europe. Central themes include comparative history of ideas, theory and practice of art and architecture, civic and religious humanism, religious experience, and new cultural genres of history and philological scholarship. **126B.** 16th Century. **126C.** 17th Century. **126D.** 18th Century. **M126E.** Cultural and Intellectual History of Modern Europe: 19th Century. (Formerly numbered 126E.) (Same as Art History M110D.) **126F.** 20th Century.

**127A-127B-127C. War and Diplomacy in Europe. (4-4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **127A.** 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and growth of the state. **127B.** 1815 to 1945. Changing patterns of warfare and diplomatic attempts to contain Great Power rivalries; wars of national unification; imperialism; shifting balance of power and alliances; origins, course, and effects of two World Wars. **127C.** The Cold War. Relations of the West, Soviet Union, and the world from 1945 to 1991. Origins, development, and end of power-political, military, and ideological confrontations between the superpowers and their allies and clients in Europe, Asia, and Latin America.

**128A-128B-128C. History of France. (4-4-4)** Designed for juniors/seniors. **128A.** France, 1500 to 1715. Social history of 16th- and 17th-century France, including growth of monarchy, wars of religion, peasant uprisings, popular culture, Catholic resurgence, Louis XIV and achievements in arts and literature. **128B.** France, 1715 to 1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, collapse of the state, Napoleonic era, reconstruction of society through the monarchies and revolutions of the 19th century. **128C.** The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics.

**129A. Baroque and Enlightenment Germany. (4)** Designed for juniors/seniors. Development of state institutions, culture, and society in Central Europe from end of Thirty Years' War to end of Napoleonic Wars. Consideration of absolutism as a political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

**129B. Nationalism and Modernization in 19th-Century Germany. (4)** Designed for juniors/seniors. Problems of class society and state formation, emancipation, assimilation, growth of national consciousness, emergence of a "bourgeois public sphere," dynamics of gender in civil society and political life, post-Napoleonic tensions between reform and reaction, 1848, and national unification. P/NP or letter grading.

**129C. 20th-Century Germany. (4)** Designed for juniors/seniors. Transitions that Germany has faced during this century: two world wars, shift from monarchy to republic to national socialism to a "divided nation," and finally "reunification." Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

**129D. History of the Low Countries. (4)** Lecture. Designed for juniors/seniors. Examination of aspects of Dutch (and on occasion Belgian) history from medieval period to period after World War II, with emphasis on political and cultural history. Topics include Middle Ages, Dutch Republic in the 17th and 18th centuries, Low Countries from 1830 to 1918, Netherlands and Belgium in context of Europe after 1945. P/NP or letter grading.

**130. Europe in the Age of Revolution, Circa 1775 to 1815. (4)** Lecture. Designed for juniors/seniors. Period from revolt of the Thirteen Colonies to French Revolution of 1789, and Napoleonic regime, viewing social and political changes unleashed by these revolutionary movements in a comparative and transnational perspective. P/NP or letter grading.

**131A-131D. History of Russia. (4 each)** Lecture. Designed for juniors/seniors. P/NP or letter grading:

**131A.** From the Origins to the Rise of Muscovy. (4) Lecture. Designed for juniors/seniors. Kievan Russia and its culture, Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom. P/NP or letter grading.

**131B.** Imperial Russia from Peter the Great to Nicholas II. (4) Lecture. Designed for juniors/seniors. Westernization of state and society; centralization at home and expansion abroad; peasant problem; beginnings of industrialization; movements of political and social protest; non-Russian peoples; political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime. P/NP or letter grading.

**131C.** Revolutionary Russia and the Soviet Union. (4) Lecture. Designed for juniors/seniors. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability? P/NP or letter grading.

**131D.** Culture and Society in Imperial Russia. (4) Lecture. Designed for juniors/seniors. Recommended preparation: course 131B or Russian 99A or 119. Thematic examination of culture and society in Russia during era of state-sponsored Westernization (1689 to 1917). Topics include nobility, peasantry, and village life from serfdom to postemancipation era, urban society, working-class life and thought, women, clergy, religion, popular culture, accommodation, and resistance. P/NP or letter grading.

**132A-132B-132C. History of Italy. (4-4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **132A.** 1350 to 1559. Most important social, economic, political, and cultural developments in history of Italy during later Middle Ages and Renaissance. **132B.** 1559 to 1848. Counter-Reformation and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. **132C.** 1848 to the Present. Political, economic, social, diplomatic, and ideological developments.

**132BL. Italian Literature in Historical Context, 1559 to 1848. (1)** Seminar. Designed for juniors/seniors and to be taken in conjunction with course 132B. Reading of texts in Italian selected from works that relate directly to material covered in course 132B. P/NP or letter grading.

**133A-133B. Social History of Spain and Portugal. (4-4)** Designed for juniors/seniors. **133A.** Age of Silver in Spain and Portugal, 1479 to 1789. Development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history, gold routes, slave trade, history of women, and development of different types of collective violence. **133B.** Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

**134A. Southeastern Europe, 500 to 1500. (4)** Designed for juniors/seniors. Political, economic, and cultural survey of the independent Balkan states in the Middle Ages.

**134B. Southeastern Europe, 1500 to 1918. (4)** Designed for juniors/seniors. The Balkans under Ottoman rule, movements of national liberation, and formation of nation states.

**135A-135B. Marxist Theory and History. (4-4)** Course 135A is generally requisite to 135B. Designed for juniors/seniors. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading *Capital*; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises.

**136. Topics in European History. (4)** Designed for juniors/seniors. Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework. May be repeated for credit. P/NP or letter grading.

**137A-137B. History of Women in Europe. (4-4)** Lecture. Designed for juniors/seniors. History of social, political, and cultural roles of women in Western Europe from early Middle Ages to the present. P/NP or letter grading. **137A.** 800 to 1715; **137B.** 1715 to the Present.

**138A-138B. Topics in Medieval English History. (4-4)** Designed for juniors/seniors. Topics include the village community and economy, family and landholding, Church and society, war, politics, and feudal relations.

**139B-139C. Economic History of Europe. (4-4)**

Designed for juniors/seniors. P/NP or letter grading. **139B.** 1780 to 1914. Analysis of emergence of "European world economy," first Industrial Revolution, revolutionary changes in technology, demographic patterns, education, transportation, and interrelationship between Western core and European peripheries in process of industrialization. **139C.** 20th Century. Changing European economy after World War I and II and in the 1990s; impact of fourth and fifth Industrial Revolutions; Great Depressions of the century during the 1930s, 1970s, and 1980s; and changing modernization strategies; import-substituting industrialization in the peripheries; Soviet "modernization dictatorship" in East Central Europe and its collapse; integration process of second half of the century and rise of European Union; modernization model at end of the century.

**140A-140B-140C. Europe and the World. (4-4-4)**

Lecture. Designed for juniors/seniors. P/NP or letter grading. **140A.** Exploration and Conquest, 1400 to 1700. (4) Lecture. Designed for juniors/seniors. First phase of European expansion in the Americas, Africa, and Eurasia. Analysis of motives and methods of expansion, differing patterns of European settlement, including plantation economy, and development of new commercial networks, including Atlantic slave trade. P/NP or letter grading.

**140B.** Colonialism, Slavery, and Revolution, 1700 to 1870. (4) Lecture. Designed for juniors/seniors. Origins and gradual increase of European dominance of world trade, impact of European colonialism in New World, Africa, and Asia, influence of new revolutionary ideals that took shape in wake of Enlightenment of the 18th century, and beginnings of industrialization. P/NP or letter grading.

**140C.** Imperialism and Post-Colonialism, 1870 to the Present. (4) Lecture. Designed for juniors/seniors. Survey of major European events and trends and their impact on world in modern period. Interrelationship of European and world history, from partition of Africa to founding of India and Pakistan. Global consequences of Cold War and new place of Europe in the world. P/NP or letter grading.

**141A-141B-141C. History of Britain. (4-4-4)** Designed for juniors/seniors. Analysis of British economy, society, and polity, focusing on dynamics of both stability and change. P/NP or letter grading. **141A.** Tudor-Stuart Times, 1485 to 1715. Political, socioeconomic, religious, and cultural history of Britain under the Tudors and Stuarts. Topics include Reformation, transformation of the economy, establishment of overseas colonies, 17th-century political upheavals and their impact on political and socioeconomic structures. **141B.** Making of Modern Britain, 1715 to 1867. Social, economic, political, and cultural history of Britain from Hanovarian revolution in politics to advent of mass democracy in mid-Victorian era. Themes include social change under pressure of industrialization, emergence of first British Empire, loss of America, shifts in religious and social position. **141C.** Modern Britain since 1832.

**142A-142B. British Empire since 1783. (4-4)** Designed for juniors/seniors. Political and economic development of the British Empire, including evolution of colonial nationalism, development of the commonwealth idea, and changes in British colonial policy.

**143. History of Canada. (4)** Designed for juniors/seniors. Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

**144. History of Australasia. (4)** Designed for juniors/seniors. History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

**145A. Colonial America, 1600 to 1763. (4)** Designed for juniors/seniors. Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on interaction of three converging cultures: Western European, West African, and American Indian.

**145B. Revolutionary America, 1760 to 1800. (4)** Designed for juniors/seniors. Inquiry into origins and consequences of the American Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy. P/NP or letter grading.

**146. U.S. History, 1800 to 1850. (4)** Designed for juniors/seniors. Discussion of major social, political, economic, and cultural transformations of first half of the 19th century and how these changes helped to drive a wedge between the North and South. P/NP or letter grading.

**147A. U.S., Civil War and Reconstruction. (4)** Designed for juniors/seniors. Rise of sectionalism, anti-slavery crusade; formation of the Confederate States; war years; political and social reconstruction.

**147B. U.S., 1875 to 1900. (4)** Designed for juniors/seniors. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of government and responses to that alteration.

**147C. American South, 1877 to the Present. (4)** Designed for juniors/seniors. Analysis of political, economic, social, intellectual, and cultural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights movement.

**148A-148B. U.S., 20th Century. (4-4)** Lecture. Designed for juniors/seniors. Political, economic, intellectual, and cultural aspects of American democracy. P/NP or letter grading. **148A.** 1900 to 1928; **148B.** 1929 to 1960.

**148C. U.S. since 1960. (4)** Lecture. Designed for juniors/seniors. History of political, social, and diplomatic developments that have shaped the U.S. since 1960. P/NP or letter grading.

**149A-149B. American Economic History. (4-4)** Designed for juniors/seniors. **149A.** 1790 to 1910. Roles of economic forces, institutions, individuals, and groups in promoting or impeding effective change in the American economy, 1790 to 1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. **149B.** 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and world economy, 1910 to the present.

**150A-150B. Intellectual History of the U.S. (4-4)** Designed for juniors/seniors. Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought.

**150C. History of Religion in the U.S. (4)** Designed for juniors/seniors. Consideration of the religious dimension of people's experience in the U.S. Examination of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture.

**151A-151B. Constitutional History of the U.S. (4-4)** Designed for juniors/seniors. **151A.** Origins and Development of Constitutionalism in the U.S. Particular emphasis on framing of the Federal Constitution in 1787 and its subsequent interpretation. Judicial review, significance of the Marshall Court, and effects of slavery and the Civil War on the Constitution. **151B.** Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

**152A-152B. American Diplomatic History. (4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading. **152A.** Establishment of an independent foreign policy, territorial expansion of the U.S., and emergence of a world power. **152B.** Role of the U.S. in the 20th-Century World.

**152BH. American Diplomatic History (Honors). (4)** Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Role of the U.S. in the 20th-century world.

**M153. The U.S. and the Philippines. (4)** (Same as Asian American Studies M153.) Lecture, three hours. Recommended preparation: courses 190A, 190B, 190C. Designed for juniors/seniors. Examination of complex interrelationships between U.S. colonialism, Philippine nationalism, history or Filipino Americans, and Philippine diaspora in the 20th century.

**154A-154B. U.S. Urban History. (4-4)** Lecture. Designed for juniors/seniors. P/NP or letter grading.

**154A.** U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. **154B.** Topics in U.S. Urban History. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations.

**154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. (4-4)** Designed for juniors/seniors. Aspects of American cultural history as explored through architecture, urban planning, and allied arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and extent to which it has reflected their values and ways of living. **154C.** 1600 to 1890; **154D.** 1890 to the Present.

**155A-155B. American Working Class Movements. (4-4)** Designed for juniors/seniors. Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics.

**156A-156B. American Social History, 1750 to 1960. (4-4)** Designed for juniors/seniors. Historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. **156A.** 1750 to 1860; **156B.** 1860 to 1960.

**156C. History of Women in Colonial British America and Early U.S., 1600 to 1860. (4)** Lecture. Designed for juniors/seniors. Introduction to major themes in history of early American women from initial confrontation of English and American Indian cultures in the early 17th century to rise of women's rights movement in the mid-19th century. P/NP or letter grading.

**156D. History of Women in the U.S., 1860 to 1980. (4)** Lecture. Designed for juniors/seniors. Introduction to major themes in history of American women from abolition of slavery and Civil War to rise and consequences of second-wave feminism. P/NP or letter grading.

**156H. Medicine and Society in 19th-Century America. (4)** Designed for juniors/seniors. Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?

**157A-157B. North American Indian History. (4-4)** Designed for juniors/seniors. History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. **157A.** Precontact to 1830; **157B.** 1830 to the Present.

**M158A. Comparative Slavery Systems. (4)** (Same as Afro-American Studies M158A.) Designed for juniors/seniors. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

**M158B-M158C. Introduction to Afro-American History. (4-4)** (Same as Afro-American Studies M158B-M158C.) Designed for juniors/seniors. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu.

**M158D. Recent African American Urban History. (4)** (Formerly numbered 158D.) (Same as Afro-American Studies M158D.) Lecture. Designed for juniors/seniors. Examination of black social and political life in selected American urban settings from 1945 to the present, with emphasis on impact of recent social and political movements such as civil rights, black power, black feminism, and hip hop. Use of secondary historical literature as well as primary source materials from that period. P/NP or letter grading.

**M158E. African American Nationalism in First Half of the 20th Century. (4)** (Same as Afro-American Studies M158E.) Designed for juniors/seniors. Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

**M159A. History of the Chicano Peoples. (4)** (Same as Chicana and Chicano Studies M159A.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

**M159B. History of the Chicano Peoples. (4)** (Same as Chicana and Chicano Studies M159B.) Designed for juniors/seniors. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

**160A-160B. U.S. and Comparative Immigration History. (4-4)** Designed for juniors/seniors. Use of overlapping diaspora model which integrates North Atlantic (Europe), South Atlantic (Afro-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to the present. Special focus on Southern California in course 160B. P/NP or letter grading.

**161. Asians in American History. (4)** Designed for juniors/seniors. Study of the politically troubling question of entry into the U.S. of immigrants ineligible for citizenship and their citizen children in American history.

**162. American West. (4)** Designed for juniors/seniors. Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.

**163. History of California. (4)** Designed for juniors/seniors. Economic, social, intellectual, and political development of California from earliest times to the present. P/NP or letter grading.

**164. History of Los Angeles. (4)** Designed for juniors/seniors. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to the present. Emphasis on the diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles' place among American urban centers.

**165A. Early Latin America. (4)** Designed for juniors/seniors. Advanced survey of Latin American history from conquest to independence, with emphasis on society, culture, and ethnic aspects.

**165C. Indians of Colonial Mexico. (4)** Designed for juniors/seniors. Survey of social and cultural history of the Indians of Mexico, especially central Mexico, from time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.

**166. Latin America in the 19th Century. (4)** Designed for juniors/seniors. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.

**167A-167D. Latin America in the 20th Century. (4 each)** Designed for juniors/seniors. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" and "leftist" models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized.

**167A.** Haiti, Uruguay, Costa Rica, Cuba, Chile; **167B.** Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; **167C.** Panama, Colombia, Ecuador, Honduras, El Salvador; **167D.** Brazil, Guatemala, Peru, Nicaragua.

**168. History of Latin American International Relations. (4)** Designed for juniors/seniors. Emphasis on developing interests of Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.

**169. Latin American Elitology. (4)** Requisite: course 167A, 167B, 167C, or 171. Designed for juniors/seniors. Elitology (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and perceptual life history views) in contrast to folklore (followers' traditional or popular views). Elitology genres include oral history, literature, and cinema.

**170A. Latin American Cultural History. (4)** Designed for juniors/seniors. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions.

**170B. Classic Travel Accounts of Latin America since 1735. (4)** Designed for juniors/seniors. Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.

**170C. Issues in Latin America History. (4)** Designed for juniors/seniors. Examination of major issues in history of Latin America. P/NP or letter grading.

**171. Mexican Revolution since 1910. (4)** Designed for juniors/seniors. Examination of concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

**172. History of Argentina. (4)** Designed for juniors/seniors. History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present. Emphasis on 19th-century development of an agro-export economy and 20th-century formation of a mass society.

**173. Modern Brazil. (4)** Designed for juniors/seniors. Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement lectures.

**174. Brazil and Atlantic World, 1500 to 1822. (4)** Lecture. Designed for juniors/seniors. Exploration of development of colonial society in Brazil from discovery in 1500 to independence in 1822, placing it in context of Portugal's overseas expansion in Asia, Africa, and the Americas. Emphasis on Portuguese, indigenous, and African roots of modern Brazil. P/NP or letter grading.

**M175A-175Z. Topics in African History. (4 each)** Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis. P/NP or letter grading:

**M175A.** Prehistoric Africa — Technological and Cultural Traditions. (4) (Same as Anthropology M119.) Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

**175B.** Africa and the Slave Trade. (4) Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora. P/NP or letter grading.

**175C.** Africa in the Age of Imperialism. (4) Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Topics include penetration of precapitalist social formations by capital, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context. P/NP or letter grading.

**175D.** Africa and the Diaspora in Global and Comparative Perspective. (4) Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. Forced migration of Africans through overseas slave trade was formative event of the modern world. Exploration of that experience and its lasting consequences by placing it in its global context — African, American, European, Islamic, and Asian. P/NP or letter grading.

**175E.** Africa from 1945 to the Present. (4) Lecture. Preparation: one prior course in African history at UCLA. Designed for juniors/seniors. History of Africa south of the Sahara from end of World War II to the present. Last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation movements, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, experiments in national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957. P/NP or letter grading.

**176A-176B. History of West Africa. (4-4)** Designed for juniors/seniors. **176A.** West Africa from Earliest Times to 1800; **176B.** West Africa since 1800.

**176C. Social and Economic History of West Africa since 1600. (4)** Designed for juniors/seniors. Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s.

**177. History of Northeast Africa. (4)** Lecture. Designed for juniors/seniors. Survey of history of Ethiopia, Sudan, and Somalia in regional context of northeast Africa from earliest times to the present, with emphasis on economy and society, evolution of the state, and significance of Christianity and Islam. P/NP or letter grading.

**178A. History of East Africa. (4)** Lecture. Designed for juniors/seniors. Survey of cultural diversity of east Africa from earliest times to growth of complex societies, its place within wider Indian Ocean system, and colonial conquest to gaining of independence and postcolonial challenges. P/NP or letter grading.

**178B. History of Central Africa. (4)** Lecture. Designed for juniors/seniors. Survey of history of central Africa from earliest times, with emphasis on establishment of agriculture, growth of trade, rise of states, and incorporation of region into world economy. P/NP or letter grading.

**179A-179B. History of Southern Africa. (4-4)** Designed for juniors/seniors. Attention to social and economic as well as political aspects. P/NP or letter grading. **179A.** From the Origins to 1870. Origins of the South African peoples and their interactions to 1870. **179B.** Since 1870. Interactions between inhabitants of southern Africa since 1870.

**182A-182B. Thought and Society in China. (4-4)** Designed for juniors/seniors. **182A.** To 1000. Recommended preparation: course 11A. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in the classical legacy and their evolution under the impact of Buddhism to 1000. Emphasis on intersections between intellectual life and social, political, and economic conditions. **182B.** Since 1000. Recommended preparation: course 11B. Elite and popular expressions of Chinese cultural life from 1000 to the 20th century. Emphasis on social, political, and economic conditions within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought.

**183A. Culture and Power in Late Imperial China. (4)** Recommended preparation: courses 11A, 11B. Designed for juniors/seniors. Analysis of relations of power and cultural expressions of dominance and resistance in late imperial China (1000 to 1700), with emphasis on interplay of economic forces, ideas, and social and political institutions. Examination of institutions of state, family, school, and city; idioms of folk religion, death, and the afterlife; political, legal, and medical discourses of body, personhood, and social identity; love, sexuality, and private life. P/NP or letter grading.

**183B. Selected Topics in Chinese History from 1500. (4)** Recommended prerequisite: course 11B. Designed for juniors/seniors. Selected topics that may vary from year to year. Recent offerings include law, society, and culture; society and economy; and rural China. P/NP or letter grading.

**183C. History of Women in China, A.D. 1000 to the Present. (4)** Designed for juniors/seniors. Topics include women and the family, women in Confucian ideology, women in literati culture, feminist movement, and women and the communist revolution. P/NP or letter grading.

**184. 20th-Century China. (4)** Recommended preparation: course 11B. Designed for juniors/seniors. Political events and intellectual developments seen in context of social-economic trends; human agency, structural change, and historical conjunctures in the 20th century.

**185A. Japanese Popular Culture. (4)** (Formerly numbered 185.) Lecture. Designed for juniors/seniors. Topics in 18th-, 19th-, and 20th-century Japanese history, including legacy of premodern satire in postmodern comic books, American culture in 1930s' Japanese visual culture, gender in photography, and relationship of monster movies to postwar politics. P/NP or letter grading.

**185B. Women in 20th-Century Japan. (4)** Lecture. Designed for juniors/seniors. Japanese women in Japanese and world history through state documents, autobiographical voices, contemporary television, and other varying historical sources, including topics such as women and new political order (1900 to 1930), women, war, and empire (1930 to 1945), and women in consumer society (1980s to 1990s). P/NP or letter grading.

**186. Shinto, Buddhism, and Japanese Folk Religion. (4)** Designed for juniors/seniors. Social dimension of various "Ways," great and little: Shinto's connection with cultural nationalism, Buddhism's medieval "Reformation" and Zen's relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and millenarianism.

**187A-187B-187C. Japanese History. (4-4-4)** Designed for juniors/seniors. Political, economic, and cultural development of Japan from prehistory to the present. P/NP or letter grading. **187A.** Ancient, Prehistory to 1600; **187B.** Early Modern, 1600 to 1868; **187C.** Modern, 1868 to the Present.

**188A. Early History of India. (4)** Designed for juniors/seniors. Introduction to civilization and institutions of India. Survey of history and culture of the South Asian subcontinent from earliest times to founding of the Mughal Empire.

**188B-188C. History of British India I, II. (4-4)** Designed for juniors/seniors. **188B.** Examination of expansion of British rule, theories and practice of governance, constitution of India as an "oriental despotism," epistemological projects of the state, and other modes by which the British achieved the conquest of knowledge. **188C.** Political economy of imperialism and Britain's "civilizing mission." Encounter, especially in terms of race and gender, between the colonized and colonizers and to questions of resistance and nationalism.

**188D. Classical Age of Indian History, A.D. 300 to 1000. (4)** Lecture. Designed for juniors/seniors. Age of glory under Imperial Guptas and subsequent consolidation under Harsha (north India) and Vakatakas, Chalukya, Pallava, and Chola (central and south India); emergence of Sanskrit as Pan-Indian language; spread of Indian culture in central and Southeast Asia. P/NP or letter grading.

**188E. Bhakti Traditions in Indian History. (4)** Lecture. Designed for juniors/seniors. Study of Bhakti or devotional traditions of India as part of "Great Tradition" of classical Hinduism; involvement of women; emergence of Sikhism. P/NP or letter grading.

**189A. Cultural and Political History of Contemporary South Asia. (4)** Designed for juniors/seniors. Problem of modernity; partition of India and emergence of Pakistan; political, social, ecological, and women's movements; struggle for rights and conflicts of identity among Muslims, Hindus, and Sikhs; terrorism in Sri Lanka and Punjab; public culture, popular cinema, and street life. P/NP or letter grading.

**M189B. Indian Identity in the U.S. and the Diaspora. (4)** (Same as Asian American Studies M133.) Lecture, three hours. Designed for juniors/seniors. History of overseas Indian communities; transformations of Hinduism in diaspora; emergence of new diasporic art forms such as bhangra rap and chutney music; relations between Indians and other racial and ethnic groups; Indian women as embodiment of Indian culture; diasporic identities. P/NP or letter grading.

**189C. Special Topics in Contemporary Indian History. (4)** Designed for juniors/seniors. Treatment of major issues in history of contemporary India. P/NP or letter grading.

**190A-190B. History of Southeast Asia. (4-4)** Designed for juniors/seniors. **190A.** Early History of Southeast Asia. Political and cultural history of the peoples of Southeast Asia from earliest times to about 1815. **190B.** Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization.

**190C. Philippine History. (4)** Designed for juniors/seniors. Social, cultural, and political history of Philippine societies from the Spanish conquest through independence. Emphasis on questions of identity under colonialism, understanding the Revolutions of 1896 and 1898, and politics of Philippine nationalist discourse. Readings include introduction to major issues in Philippine historiography and literature. P/NP or letter grading.

**190D. Vietnam: Past and Present. (4)** Designed for juniors/seniors. Survey of history and culture of Vietnam from about 700 B.C. to the present, including political, social, and economic developments as well as international relations in post-1954 period. P/NP or letter grading.

**190E. Premodern Vietnamese History. (4)** Lecture. Designed for juniors/seniors. Overview of history of people of Vietnam to beginning of colonial period (circa 1880), covering political, social, economic, cultural, and religious developments. Consideration of impact of Vietnamese past on modern age. P/NP or letter grading.

**190Y. National Histories of Southeast Asia. (4)** Lecture. Designed for juniors/seniors. Variable topics with focus on history of one or more of Southeast Asia's nation-states: Indonesia, East Timor, Thailand, Cambodia, Burma, Laos, Malaysia, Singapore, Brunei, Philippines, Vietnam. P/NP or letter grading.

**190Z. Comparative Histories of Southeast Asia. (4)** Lecture. Designed for juniors/seniors. Variable topics with focus on history of Southeast Asia from thematic or comparative perspective. Topics may include history of human rights in Southeast Asia, gender and sexuality in island Southeast Asia, and economic history of Southeast Asia. P/NP or letter grading.

**M191A. Ancient Jewish History from Patriarchs to Rabbis. (4)** (Same as Jewish Studies M191A.) Lecture. Designed for juniors/seniors. Survey of social, political, and religious developments. P/NP or letter grading.

**M191B. Between Crescent and Cross: Jewish Middle Ages. (4)** (Same as Jewish Studies M191B.) Lecture. Designed for juniors/seniors. Exploration of unfolding of Jewish history from rise of Christianity to expulsion of Jews from Spain in 1492. P/NP or letter grading.

**M191C. Jewish History from Spanish Expulsion to 1881. (4)** (Same as Jewish Studies M191C.) Lecture. Designed for juniors/seniors. Survey of early modern Jewish history beginning with enormously repercussive expulsion of Jews from Spain in 1492, followed by transformations in Jewish society and identity over five centuries in Europe and Middle East, and concluding with nationalism. P/NP or letter grading.

**M191D. History of Anti-Semitism. (4)** (Same as Jewish Studies M191D.) Lecture. Designed for juniors/seniors. Survey of origins and historical development of anti-Semitism. P/NP or letter grading.

**191E-191F. The Third Reich and the Jews. (4-4)** Designed for juniors/seniors. **191E.** History of modern anti-Semitic ideologies and movements. Rise of national socialism in Germany. Development and execution of Nazi anti-Jewish policy to outbreak of World War II. **191F.** Second World War. Implementation of Nazi plans for extermination of Jews in Nazi-dominated Europe. Life in Nazi-imposed ghettos. Forms of Jewish resistance. Fate of Jewish populations in the occupied territories.

**M191G. European Jewry from 1881 to the Present.** (4) (Formerly numbered 191G.) (Same as Jewish Studies M191G.) Lecture. Designed for juniors/seniors. Survey of major social, economic, and political factors that shaped lives of Europe's Jews from outbreak of First World War to the present. Emphasis on diverse Jewish communities of interwar Europe, fate of Jews under Nazis, and character of postwar Jewish community. P/NP or letter grading.

**M191H. Jewish Civilization: Encounter with Great World Cultures.** (4) (Same as Jewish Studies M100.) Lecture. Designed for juniors/seniors. Exploration of dynamic and millennia-old interaction of Jews with great world cultures. Creative adaptations that have lent Jewish culture its distinct and various forms. P/NP or letter grading.

**M191I. American Jewish Experience.** (4) (Same as Jewish Studies M191I.) Lecture. Designed for juniors/seniors. Experience of Jews in America, both historical and contemporary. P/NP or letter grading.

**M191S. History of State of Israel from 1948 to the Present.** (4) (Same as Jewish Studies M191S.) Lecture. Designed for juniors/seniors. Examination of history of State of Israel from 1948 to the present. P/NP or letter grading.

**M192A-M192B. Jewish Intellectual History.** (4-4) (Same as Jewish Studies M192A-M192B.) Designed for juniors/seniors. **M192A.** Medieval Period. Examination of three intellectual worldviews that competed for hegemony in the medieval Jewish world — rabbinic Judaism, medieval rationalism as embodied in philosophy, and cabala; **M192B.** Modern Period. Exploration of some of most important currents and figures in Jewish intellectual history from the 18th century to the present.

**193A. History of Religions: Myth.** (4) Designed for juniors/seniors. Nature and function of myth in history of religion and culture. Examples selected from nonliterate as well as from other Asian and European traditions.

**193B. Religions of South and Southeast Asia.** (4) Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**193C. Religions of South and Southeast Asia.** (4) Requisite: course 4 or 193A. Designed for juniors/seniors. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**M193D. Religions of Ancient Near East.** (4) (Formerly numbered 193D.) (Same as Ancient Near East M193D.) Lecture. Designed for juniors/seniors. Main polytheistic systems of ancient Near East, with emphasis on Mesopotamia and Syria and with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct. P/NP or letter grading.

**193E. Special Topics in History of Religions.** (4) Designed for juniors/seniors. Topics announced in *Schedule of Classes* and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

**194A. History of Early Christians.** (4) Designed for juniors/seniors. Christian movement from its origins to circa 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement's encounters with its religious, social, and political world, and methods of research.

**194B. Religious Environment of Early Christians.** (4) Designed for juniors/seniors. Rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. as in context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship.

**194C. Jesus of Nazareth in Historical Research.** (4) Recommended preparation: course 194A. Designed for juniors/seniors. Stimulated by significant post-Enlightenment historical evaluations, students are led into firsthand knowledge (in translation) of various multilayered sources for reconstruction of the life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts.

**195A. History of Medicine: Historic Roots of Healing Arts.** (4) (Not the same as course 195A prior to Spring Quarter 2001.) Lecture. Designed for juniors/seniors. Introduction to traditions, practices, goals, and myths of Western healing professions from time of ancient Greeks to the Renaissance. Topics range from Hippocrates, Galen, and scholars at Alexandria to healing at Epidaurus and Salerno, contributions of medieval Muslim and Jewish doctors, rise of healing professions, medical faculties, nursing orders, and hospitals. P/NP or letter grading.

**195B. History of Medicine: Foundations of Modern Medicine.** (4) Lecture. Designed for juniors/seniors. Cultural, scientific, and social context that shaped modern medicine, from the Renaissance to Romantic era. Topics include establishment of anatomy, physiology, and modern clinical medicine, mapping of human body, medical approach to mental illness, rise of anatomic-clinical method at Paris School. P/NP or letter grading.

**195C. Historical Perspectives on Gender and Science.** (4) Lecture. Designed for juniors/seniors. Historical cases illustrating how gender enters practices and concepts of science. Topics include gendered conceptions of nature, persona of "man of science," role of women in scientific revolution, scientific investigations of women and the feminine. P/NP or letter grading.

**195D. Science and Technology in the 20th Century.** (4) Lecture. Designed for juniors/seniors. Development of science and technology and their impact on society. Industrialization, global scientific community, social Darwinism, atomic bomb and nuclear proliferation, Cold War and American science, environmentalism, molecular biology and genetic engineering. P/NP or letter grading.

**195E. Topics in History of Science.** (4) Lecture. Designed for juniors/seniors. Topics may include science and colonialism, science and religion, environmental history, science in Enlightenment, development of theory of evolution, science and public policy, public nature of science. P/NP or letter grading.

**196. Field Research Methods.** (4) Lecture, three hours. Designed for juniors/seniors. Provides opportunity for students to learn and practice field research, with particular emphasis on relationship between theory, field methodology, and research findings. P/NP or letter grading.

**197A-197O. Undergraduate Seminars.** (4 each) (Formerly numbered 197A-197N.) Seminar, three hours. Designed for juniors/seniors. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. May be repeated once for credit. P/NP or letter grading.

**197A.** Ancient History; **197B.** Medieval; **197C.** Europe; **197D.** U.S.; **197E.** Latin America; **197F.** Near East; **197G.** China; **197H.** Japan; **197I.** Science/Technology; **197J.** Africa; **197K.** Religion; **197L.** Jewish History; **197M.** Southeast Asia; **197N.** India; **197O.** World History.

**199. Special Studies in History.** (4) Designed for juniors/seniors. Intensive directed research program. Eight units may be applied toward major requirements.

**199HA. Directed Study for Honors.** (4) Tutorial, three hours. Student meetings with honors adviser to define research and preparation of honors project. Extensive reading and research in field of proposed honors thesis. Letter grading.

**199HB. Directed Study for Honors.** (4) Tutorial, three hours. Requisite: course 197 or 199HA. Independent study and research on honors project under supervision of honors adviser. In Progress grading (credit to be given only on completion of course 199HC).

**199HC. Directed Study for Honors.** (4) Tutorial, three hours. Requisite: course 199HB. Preparation of final version of honors thesis. Completed thesis must be submitted to honors committee by last day of Spring Quarter. Letter grading.

**199I. Independent Studies for Internships.** (4) Preparation: maintenance of 3.0 grade-point average in major. Independent studies course to be supervised jointly by Center for Experiential Education and Service Learning and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally, only 4 units of internship with History Department are allowed. P/NP grading.

## Graduate Courses

**200A-200U. Advanced Historiography.** (4 each) Seminar, three hours. May be repeated for credit. **200A.** Ancient Greece; **200B.** Ancient Rome; **200C.** Medieval; **200D.** Europe; **200H.** U.S.; **200I.** Latin America; **200J.** Near East; **200K.** India; **200L.** China; **200M.** Japan; **200N.** Africa; **200O.** Science/Technology; **200P.** History of Religions; **200Q.** Theory of History; **200R.** Jewish History; **200S.** Armenia and the Caucasus; **200T.** Southeast Asia; **200U.** Psychohistory.

**2000V. Advanced Historiography: Afro-American.** (4) (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

**M200W. Advanced Historiography: American Indian Peoples.** (4) (Same as American Indian Studies M200A.) Lecture, 90 minutes; seminar, 90 minutes. Introduction to culture-histories of North American Indians and review of Indian concepts of history. Stereotypical approach to content and methodologies related to the Indian past that is interdisciplinary and multicultural in its scope. Letter grading.

**200X. Advanced Historiography: Oral History.** (4) Seminar, three hours. Introduction to practice, method, and theory of oral history.

**200Y. Advanced Historiography: Application of Economics to History.** (4) Discussion, three hours.

**200Z. Advanced Historiography: Chicano.** (4) Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new methodological and theoretical approaches in the field.

**201A-201U. Topics in History.** (4 each) Seminar, three hours. Topic titles are same as for courses 200A through 200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor to enroll.

**202A-202B. Seminars: Comparative Modern Economic History.** (4-4) Seminar, three hours. Course 202A is requisite to 202B. Designed for graduate students. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M203A-M203B. Social Theory and Comparative History.** (4-4) (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**M203C. Theories in Cultural History.** (4) (Same as Sociology M296C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material. Letter grading.

**M207. Seminar: Ancient Mesopotamia.** (4) (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

**211A-211B. Seminars: Armenian History. (4-4)** Seminar, three hours. Course 211A is requisite to 211B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**C212. Methods in Armenian Oral History. (4)** Seminar, three hours. Preparation: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D.

**214. Topics in World History. (4)** Discussion, three hours. Graduate seminar utilizing world-historical perspective to examine variety of broad themes in human history. Topics vary annually. Letter grading.

**215A-215B. Seminars: Ancient History. (4-4)** Seminar, three hours. Course 215A is requisite to 215B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**216A-216B. Seminars: Byzantine History. (4-4)** Seminar, three hours. Course 216A is requisite to 216B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**217. Sources and Handbooks of Medieval History. (4)** Seminar, three hours. Preparation: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

**218A-218B. Paleography I, II. (4-4)** Seminar, three hours; discussion, three hours. Preparation: reading knowledge of Latin and German or French. S/U or letter grading. **218A.** History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading. **218B.** History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

**C219A. Early Medieval Intellectual History: Thought, Literacy, and Religion Circa 400 to 1000. (4)** Lecture, three hours. Examination of ideas and means by which they were communicated in early Middle Ages. Concurrently scheduled with course C119A. S/U or letter grading.

**C219B. Later Medieval Intellectual History: Thought, Literacy, and Religion Circa 1100 to 1500. (4)** Lecture, three hours. Examination of evolution of ideas and means by which they were communicated in later Middle Ages. Concurrently scheduled with course C119B. S/U or letter grading.

**CM220A. Interfaces: Transmission of Roman Literature. (4)** (Same as Classics M220A.) Discussion, three hours. Examination of transmission of Latin classical literature in late antiquity, Middle Ages, and Renaissance to understand processes by which Latin literature has been preserved. Concurrently scheduled with course C120A. S/U or letter grading.

**221A-221B. Seminars: Medieval History. (4-4)** Seminar, three hours. Course 221A is requisite to 221B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**222A-222B. Seminars: Medieval Intellectual History and History of Science. (4-4)** Seminar, three hours. Course 222A is requisite to 222B. Selected problems from medieval and early modern philosophy, science, political theory, theology. S/U (nonmajors) or letter (majors or nonmajors) grading.

**225. Colloquium for Entering Graduate Students in Modern European History. (4)** Seminar, three hours. Normally limited to and required of all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

**226A-226B. Seminars: Italian Renaissance. (4-4)** Seminar, three hours. Course 226A is requisite to 226B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**227A-227B. Seminars: Reformation. (4-4)** Seminar, three hours. Course 227A is requisite to 227B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**229A-229B. Seminars: Early Modern European History. (4-4)** Seminar, three hours. Course 229A is requisite to 229B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M230A-M230B. Seminars: Modern European History. (4-4)** (Same as Art History M241A-M241B.) Seminar, three hours. Course M230A is requisite to M230B. May be repeated for credit with consent of adviser. S/U (nonmajors) or letter (majors or nonmajors) grading.

**231A-231B. Seminars: Modern European Intellectual and Cultural History. (4-4)** Seminar, three hours. Course 231A is requisite to 231B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**232A-232B. Seminars: French History of the 19th and 20th Centuries. (4-4)** Seminar, three hours. Course 232A is requisite to 232B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**233A-233B. Seminars: Russian/Soviet History. (4-4)** Seminar, three hours. Course 233A is requisite to 233B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. (4-4)** Seminar, three hours. Course 234A is requisite to 234B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**235A-235B. Economic History of Europe, 1780 to 1939. (4-4)** Seminar, three hours. Course 235A is requisite to 235B. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M236A. Proseminar: Political Psychology. (4)** (Same as Political Science M261A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**236B-236C. Seminars: Psychohistory. (4-4)** Seminar, three hours. Course 236B is requisite to 236C. Exploration of individual and group psychological processes and their uses in historical research. S/U (nonmajors) or letter (majors or nonmajors) grading.

**239A-239B. Seminars: English History — Middle Ages. (4-4)** Seminar, three hours. Course 239A is requisite to 239B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**240A-240B. Seminars: English History — Modern History. (4-4)** Seminar, three hours. Course 240A is requisite to 240B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**241A-241B. Seminars: German History. (4-4)** Seminar, three hours. Course 241A is requisite to 241B. Designed for graduate students. S/U (nonmajors) or letter (majors or nonmajors) grading.

**242. Colloquium: European History. (2)** Designed for graduate students. Forum for critical discussion of work of students and invited scholars. Presentation of student dissertation prospectuses during their third or fourth year in residence. S/U grading for students presenting papers.

**244A-244B. Seminars: British Empire History. (4-4)** Seminar, three hours. Course 244A is requisite to 244B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**245. Colloquium: U.S. History. (4)** Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

**246A-246B-246C. Introduction to U.S. History. (4-4-4)** Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. **246A.** Colonial Period; **246B.** 1790 to 1900; **246C.** 20th Century.

**247A-247B. Seminars: Early American History. (4-4)** Seminar, three hours. Course 247A is requisite to 247B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**249A-249B. Seminars: Jacksonian America. (4-4)** Seminar, three hours. Course 249A is requisite to 249B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**250A-250B. Seminars: U.S. History of the Middle 19th Century. (4-4)** Seminar, three hours. Course 250A is requisite to 250B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**251A-251B. Collaborative Research Seminars: American History. (4-4)** Seminar, three hours. Research seminars taught jointly by two faculty members. S/U (nonmajors) or letter (majors or nonmajors) grading. **251A.** Common readings and development of individual research projects. **251B.** Requisite: course 251A. Research, writing, and critical discussion of draft papers.

**252A-252B. Seminars: Recent U.S. History to 1930. (4-4)** Seminar, three hours. Course 252A is requisite to 252B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**253A-253B. Seminars: Recent U.S. History since 1930. (4-4)** Seminar, three hours. Course 253A is requisite to 253B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**254A-254B. Seminars: U.S. Social and/or Intellectual History. (4-4)** Seminar, three hours. Course 254A is requisite to 254B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**255A-255B. Business Enterprise and American Culture. (4-4)** Seminar, three hours. Course 255A is requisite to 255B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**256A-256B. Seminars: American Diplomatic History. (4-4)** Seminar, three hours. Course 256A is requisite to 256B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**257A-257B. Seminars: U.S. Urban History. (4-4)** Seminar, three hours. Course 257A is requisite to 257B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**258A-258B. Seminars: Working Class History. (4-4)** Seminar, three hours. Course 258A is requisite to 258B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**259A-259B. History of Women. (4-4)** Seminar, three hours. Course 259A is requisite to 259B. History of women's social and political issues seen in a U.S. and comparative context. S/U (nonmajors) or letter (majors or nonmajors) grading.

**260A-260B. Seminars: Native American History. (4-4)** Seminar, three hours. Course 260A is requisite to 260B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M260C. Native American Revitalization Movements. (4)** (Same as Anthropology M238.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion. Letter grading.

**M260D. Native American Historical Demography. (4)** (Same as Anthropology M287Q.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence. Letter grading.

**261A-261B. Seminars: Afro-American History. (4-4)** Seminar, three hours. Course 261A is requisite to 261B. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white. S/U (nonmajors) or letter (majors or nonmajors) grading.

**262A-262B. Seminars: Chicano History. (4-4)** Seminar, three hours. Course 262A is requisite to 262B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**263A-263B. Seminars: History of American West. (4-4)** Seminar, three hours. Course 263A is requisite to 263B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M264. History of American Education. (4)** (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

**M265. Latin American Research Resources. (4)** (Same as Information Studies M225 and Latin American Studies M200.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**266A-266B. Seminars: Colonial Latin American History. (4-4)** Seminar, three hours. Course 266A is requisite to 266B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**267A-267B. Seminars: Latin American History, 19th and 20th Centuries. (4-4)** Seminar, three hours. Course 267A is requisite to 267B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M268A-M268B. Seminars: Recent Latin American History. (4-4)** (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. S/U (nonmajors) or letter (majors or nonmajors) grading.

**275A-275B-275C. Colloquia: African History. (4-4-4)** Seminar, three hours. Designed for all entering and continuing graduate students in African history. Source identification, research methodologies, historiographical traditions, historical interpretation, approaches to teaching, and research design. Forum for critical discussion of dissertation prospectuses and work in progress. Each course may be taken independently for credit. S/U or letter grading.

**M281. China — Seminar: Classical Historiography and Readings in Classical Studies. (4)** (Same as Chinese M201.) Discussion, three hours. Preparation: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents. Letter grading.

**282A-282B. Seminars: Chinese History. (4-4)** Seminar, three hours. Course 282A is requisite to 282B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**285A-285B. Seminars: Japanese History. (4-4)** Seminar, three hours. Course 285A is requisite to 285B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M286. Japan in Age of Empire. (4)** (Same as Anthropology M276 and East Asian Languages M292.) Seminar, three hours. Designed for graduate students. Since the late 19th century, Japan expanded its empire into East and Southeast Asia. Coverage of that period and array of anthropological studies conducted in Japan's colonies and occupied areas in this hardly explored area of study of colonialism. S/U or letter grading.

**288A-288B. Seminars: South Asia. (4-4)** Seminar, three hours. Course 288A is requisite to 288B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**289A-289B. Seminars: Southeast Asia. (4-4)** Seminar, three hours. Course 289A is requisite to 289B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**291A-291B. Seminars: Jewish History. (4-4)** Seminar, three hours. Course 291A is requisite to 291B. Studies in intellectual and social history of Jewish people from ancient times to the modern period. S/U (nonmajors) or letter (majors or nonmajors) grading.

**293A-293B. Seminars: History of Religions. (4-4)** Seminar, three hours. Course 293A is requisite to 293B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**294A-294B. Western Science, Religion, and Political Economy, 1600 to 1830. (4-4)** Seminar, three hours. Study of science integrated within matrix of religious belief commonplace in early modern Europe and, to a lesser extent, in American colonies. Examination of relationship of both cultural matrices to political and economic change. S/U or letter grading.

**295. Theories of Scientific Change. (4)** Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyerabend, and others.

**M296. History of Statistics. (4)** (Same as Statistics M245.) Seminar, three hours. History of statistics ranges over vast and diverse territory. Development of mathematical methods; philosophical, political, and social issues that were linked to their emergence and use. S/U or letter grading.

**297A-297B. Seminars: History of Science. (4-4)** Seminar, three hours. Course 297A is requisite to 297B. S/U (nonmajors) or letter (majors or nonmajors) grading.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries. (4)** (Same as English M298.) Topics vary according to participating faculty. May be repeated for credit.

**M299. Interdisciplinary American Studies. (6)** (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**490. Writing Workshop for Graduate Students. (4)** Tutorial, three hours. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.

**495. Teaching History. (4)** Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Studies. (1 to 8)** Limited to graduate students. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

**597. Directed Studies for Graduate Examinations. (1 to 8)** Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

**599. Ph.D. Research and Writing. (1 to 8)** Preparation: advancement to Ph.D. candidacy. S/U grading.

## Scope and Objectives

The interdisciplinary major in History/Art History allows students to study the relationship between art history and the history of society, politics, and culture.

## Undergraduate Study

### History/Art History B.A.

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major. All courses must be taken for a letter grade.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the history/art history counselor at (310) 825-3480.

### Preparation for the Major

*Required:* History 1A, 1B, 1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

### Transfer Students

To be admitted as History/Art History majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one year of history of Western civilization, two art history courses in ancient, Renaissance and baroque, medieval, or modern art, and one non-Western art history course.

## The Major

*Required:* History 99 or 100; 197 or 199; and courses as indicated in the following groups:

Group A: Two non-European history courses from History M104A, M104B, M105, 106A, 106B, 106C, 107, 108, 109, 112A through C112D, 115A, M122, 123A, 123B, 143, 165A, 165C, 166, 167A through 167D, 168, 169, 170A, 170B, 171, 172, 173, 174, M175A, 175B, 175C, 175E, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, 182A, 182B, 183A, 183B, 183C, 184, 185A, 186, 187A, 187B, 187C, 188A, 188B, 188C, 190A, 190B, 193B, 193C, M193D

Group B: Two U.S. history courses from History 145A, 145B, 146, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A through 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E, M159A, M159B, 160A, 160B, 161, 162, 163, 164, M189B

Group C: Two European history courses from History 115B, 115C, 116A, 116B, 117A, 117B, 117C, 119M, 120M, 121A through 121D, 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 127C, 128A, 128B, 128C, 129A, 129B, 129C, 130, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 135A, 135B, 137A, 137B, 138A, 138B, 141A, 141B, 141C, 142A, 142B, 144, M191A through M191G, M192A, M192B, 194A, 194B, 194C, 195A, 195B, 195C

Group D: Three Western art history courses from Art History 101A, 101B, M102A through M102K, 106A through 106D, 108A, 108B, 108C, C109A through 109D, 110A, 110B, 110C, 110E through C110H, C112A through CM112D, C150A through 150D

Group E: Three non-Western art history courses from Art History 104A, 104B, C104C, 110G, 114A, 114C through 114F, C115A through C115F, C117A through C117D, 118A, 118C, 118D, 118E

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 100, C103A, C103B, C103C, 127, 197, 199 to meet this requirement

## Honors Program

The honors program is designed for History/Art History majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior History/Art History majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and (3) complete Art History 195A and 195B with grades of A– or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and (3) complete Art History 195A and 195B with grades of A.

### Faculty Advisory Committee

Blake Allmendinger, Ph.D. (*English*)  
C. Adolfo Bermeo, Ph.D. (*Academic Advancement Program*)  
Ruth H. Bloch, Ph.D. (*History*), *Chair*  
David B. Cline, Ph.D. (*Physics and Astronomy*)  
Robert B. Goldberg, Ph.D. (*Molecular, Cell, and Developmental Biology*)  
Patricia M. Greenfield, Ph.D. (*Psychology*)  
Gail Kligman, Ph.D. (*Sociology*)  
Jacqueline Leavitt, Ph.D. (*Urban Planning*)  
William M. Mason, Ph.D. (*Sociology*)  
Brian D. Walker, Ph.D. (*Political Science*)

## Scope and Objectives

The Honors Collegium is an unusual educational alternative, with an interdisciplinary emphasis. The collegium encourages animated discussion among students, as well as between students and professors. It seeks to promote scholarly exchange across the major disciplines in the University. And it offers small classes and individual attention.

## Undergraduate Study

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship and may include a variable number of guest lecturers and additional specialists in their fields. Many courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly interdisciplinary seminars, and the courses

vary each year. Refer to the *Schedule of Classes* for current course listings. An Honors Collegium brochure, which gives detailed course descriptions, is available at <http://www.college.ucla.edu/up/honors/>.

## Honors Collegium

### Lower Division Courses

**1. City on Edge: Fiction of Los Angeles. (5)** (Not the same as course 1 prior to Fall Quarter 2003.) Seminar, four hours. Study of city of Los Angeles through examination of important and representative novels (and occasionally other media) that take the city as their subject as well as their setting. P/NP or letter grading.

**2. Comparative Genocide. (4)** Lecture, four hours; discussion, one hour. Social comparative study of genocide, combining theoretical concepts with case studies (such as Armenia, the Holocaust, American Indians, Uganda under Amin and Obote, etc.). P/NP or letter grading.

**3. History and Visual Culture from Engraving to Film and Television. (5)** (Not the same as course 3 prior to Fall Quarter 2000.) Seminar, three hours. Interdisciplinary look at relationship between visual imagery and historical developments, tracing evolution of visual culture in relationship to forms of political, social, and cultural authority in media from 17th-century engravings to post-World War II television. P/NP or letter grading.

**4. Immigrants and American Dream. (5)** (Not the same as course 4 prior to Fall Quarter 2003.) Seminar, three hours. Study of process of attaining the "American Dream," including analysis of different perspectives on immigration and assessment of success based on such measures as occupational achievement, home ownership, and political participation. P/NP or letter grading.

**5. Representing Cleopatra: History, Drama, and Film. (5)** (Not the same as course 5 prior to Fall Quarter 2003.) Seminar, three hours. Examination of legendary queen of Egypt as seen by her contemporaries and study of origins of myths about her and ways in which subsequent cultures and eras have imagined her in literary, visual, and cinematic representations. P/NP or letter grading.

**6. Historical Construction of Reality. (4)** Seminar, three hours. Examination, through comparative analysis of various societies at various times, of phenomena that are taken for granted as natural but which are actually historically constructed, including perception (time and space) and hierarchy (race and gender). P/NP or letter grading.

**7A. Urban Poverty and Public Policy in the U.S. (4)** Lecture, four hours; discussion, one hour. Focus on social welfare in the U.S., providing historical overview of poverty and the social programs that have attempted to deal with it and addressing current debate on the subject. P/NP or letter grading.

**7B. Urban Poverty and Public Policy in the U.S. (4)** Optional fieldwork and tutorial. Enforced corequisite: course 7A. Field studies in social policy. P/NP or letter grading.

**8. Communication among Organisms. (4)** Lecture, three hours; discussion, two hours. Study of communication among a variety of taxonomic groups ranging from single-celled organisms to plants, whales, and nonhuman primates. P/NP or letter grading.

**10. Colonial Legacies: Childhood and Islam in Francophone Africa. (5)** (Not the same as course 10 prior to Fall Quarter 2003.) Seminar, three hours. Through broad range of novels and films from Guinea, Cameroon, Senegal, and Mali, study of cultures of Francophone sub-Saharan Africa, including colonialism, polygamy, education, female circumcision, and racism. P/NP or letter grading.

- 11. Reinventing African History. (5)** (Not the same as course 11 prior to Fall Quarter 2000.) Seminar, three hours. Critical evaluation of historical study of Africa, particularly of two schools defined by old Eurocentric stereotypes of Africa and new stereotypes arising from an Afrocentric model. P/NP or letter grading.
- 12. Sacred Form: Literature and Poetry in India from Bronze Age to Premodern Times. (4)** (Not the same as course 12 prior to Fall Quarter 2000.) Seminar, three hours. Exploration of cultural and literary development in India from early religious poetry (prior to 1000 B.C.) to broad range of literary styles and diverse religious and philosophical movements through classical, medieval, and premodern period. P/NP or letter grading.
- 13. Fantastic Voyage: From Homer to "2001." (5)** (Not the same as course 13 prior to Fall Quarter 2003.) Seminar, three hours. Study of phenomenon of fantastic or imaginary voyage from Homer's *Odyssey* to Stanley Kubrick's *2001: A Space Odyssey*. P/NP or letter grading.
- 14. Interaction of Science and Society. (4)** Seminar, three hours. Examination of interaction of science and society and effects of this interaction on history, development of societies, evolution of revolutionary ideas as modeled in Galileo, Darwin, and others, and selected contemporary issues such as genetic engineering and war against infectious diseases. P/NP or letter grading.
- 15. Acting Myth. (4)** (Not the same as course 15 prior to Fall Quarter 2000.) Seminar, three hours. Interdisciplinary approach to literature and acting through study of texts and mythologies from variety of Indo-European and Near Eastern sources; students learn acting techniques in directed scenes from the texts. P/NP or letter grading.
- 16. Contemporary Fiction and Psychology of the Self. (4)** Seminar, three hours. Examination of relationship between personal and interpersonal dynamics in literature as they are illuminated by Heinz Kohut's theories of self-psychology. P/NP or letter grading.
- 17. Civil Rights, Women's Rights, Human Rights. (5)** (Not the same as course 17 prior to Fall Quarter 2000.) Seminar, three hours. Investigation of lived history of rights, including context and implications of 14th Amendment, subsequent civil rights activism, women's rights, internationalization of these notions in politics of human rights, and current critiques of "rights talk." P/NP or letter grading.
- 18. Trial of Socrates. (5)** Seminar, three hours. Examination of life and times of Socrates and trial that led to his execution, including in-class staging. P/NP or letter grading.
- 19. Rhetoric on Trial: Legal Advocacy, Ancient and Modern. (4)** (Not the same as course 19 prior to Fall Quarter 2000.) Seminar, four hours. Examination of theory and practice of classical rhetoric through readings, discussions, and practical exercises, including field study of contemporary usage in political arena and courts. P/NP or letter grading.
- 20. What Is This Thing Called Science?: Nature of Modern Science. (5)** (Not the same as course 20 prior to Fall Quarter 2002.) Lecture, three hours; discussion, one hour. Exploration of difference between science and other systems of knowledge; study of history and philosophy of science and examination of its reliability as objective knowledge. P/NP or letter grading.
- 21W. Rise and Fall of Modernism. (6)** Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Study of early and middle 20th-century's attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. Satisfies Letters and Science Writing II requirement. Letter grading.
- 22. Short History of Science: Reading the Great Book of the Universe. (4)** (Not the same as course 22 prior to Fall Quarter 2000.) Seminar, four hours. Examination of key concepts of modern science through their historical development, including study of impact of scientific and industrial revolutions on art, economy, environment, religion, and structures of society. P/NP or letter grading.
- 23. Law and Political Economics of Property and Environment. (5)** (Not the same as course 23 prior to Fall Quarter 2003.) Seminar, three hours. Study of property rights, entitlements, public goods, and rational choice theory as applied to such property-policy issues as zoning land use, landlord-tenant relations, and environmental concerns. P/NP or letter grading.
- 26. Representing Medicine: Art, Literature, and Film. (5)** (Not the same as course 26 prior to Summer Quarter 2000.) Lecture/discussion, 10 hours. Limited to Freshman Summer Program students. Exploration of interdisciplinary dimensions of medical representation, with emphasis on cross-cultural 20th-century portrayals of the profession, including representations of doctor/patient relations, healthcare sites and circumstances, aging, alternative treatments, and mental health. Offered in summer only. P/NP or letter grading.
- 27. Theories of Exchange: Social Life of Gifts and Commodities. (4)** Seminar, three hours. Study of how creation, maintenance, and dissolution of social and political relations are modulated through exchange of gifts and/or commodities in different contexts and different societies. P/NP or letter grading.
- 28. Perils of Living in Space: Introduction to Space Weather. (5)** (Not the same as course 28 prior to Fall Quarter 2003.) Seminar, four hours. Preparation: high school calculus. Study of conditions in space that affect Earth and its systems, conditions that are consequences of behavior of sun, nature of Earth's magnetic field and atmosphere, and our location in solar system. P/NP or letter grading.
- 29. Critical Vision: History of Art as Social and Political Commentary. (4)** Seminar, three and one-half hours. Study of tradition of visual arts (painting, graphic art, photography, sculpture) as vehicles for social and political commentary. P/NP or letter grading.
- 30. Vietnam War and American Culture. (4)** Seminar, three hours. Cultural, social, and political implications of the Vietnam War on American society through examination of photography, journalism, personal narrative, political commentary, drama, and fiction. P/NP or letter grading.
- 31. Current Environmental Problems. (5)** Lecture/discussion, four hours. Examination of current pressing environmental issues, including overpopulation, greenhouse effect, loss of biodiversity, and toxic waste production and disposal. P/NP or letter grading.
- 32W. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences. (6)** Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Study of creative acts of artists, writers, social scientists, and scientists in relation to their societies, cultures, disciplines, conventions, and art forms. Satisfies Letters and Science Writing II requirement. Letter grading.
- 33W. Art of Engagement. (6)** Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Cross-curricular, cross-cultural examination of literature, art, and film as a way of discovering how writers and artists treat conflict between art as something inward and psychological and personal, and art as a vehicle of social and political import. Satisfies Letters and Science Writing II requirement. Letter grading.
- 35. Scientific Method: Critical Inquiry into Question of Extraterrestrial Life. (4)** Lecture, three hours; discussion, one hour. Course does not presume to answer question of whether or not there is intelligent life in the universe but rather uses this question as a pedagogic tool to introduce central ideas, techniques, and limitations of the scientific method — what questions would need to be asked, what scientific knowledge would be needed, and what obstacles would have to be overcome just to address this question. P/NP or letter grading.
- 36. Ethnicity and Social Class in America. (4)** Introduction to data analysis, quantitative method, and use of statistics in social sciences, using General Social Survey (GSS) and concentrating particularly on ethnicity and social class. Students conduct statistical research of their own. P/NP or letter grading.
- 37A. Ethnicity, Gender, and Social Class in the U.S. and Other Societies. (4)** Seminar, three hours. Study of the U.S. and other nations in terms of social class, gender, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through instructional software. P/NP or letter grading.
- 37B. Ethnicity, Social Class, and Social Mobility in Los Angeles. (4)** Seminar, three hours. Course 37A is not requisite to 37B. Study of Los Angeles in terms of social class, social mobility, ethnicity, and absorption of immigrants, with emphasis on manipulation and analysis of data sets from census and survey data provided through instructional software. P/NP or letter grading.
- 38W. Body-Mind Literacy. (6)** Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Study of history, philosophy, and science of relationship between body and mind, including writing, critical thinking, and practicum. Satisfies Letters and Science Writing II requirement. Letter grading.
- 39. Early Modern French Culture in Film. (5)** (Not the same as course 39 prior to Fall Quarter 2001.) Seminar, three hours. Using films and texts, study of development of courtly culture in France from the Renaissance to its demise in the Enlightenment and its replacement with new ideas of nature, education, and civic virtue. P/NP or letter grading.
- 40W. Transformations of Cultural Stories across Disciplines and Texts. (5)** Seminar, four hours. Enforced requisite: English Composition 3 or 3H. Tracing of writing and rewriting of traditional story types, specifically the adventure story as represented by Defoe's *Robinson Crusoe* and its remanifestations in Coetzee's *Foe* and the fairy tale as represented by *Cinderella* and its various cross-cultural remanifestations. Satisfies Letters and Science Writing II requirement. Letter grading.
- 41W. A Thousand Words: Literature of Renaissance Art. (6)** Seminar, three hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Examination of literary, social, religious, and cultural influences on Renaissance narrative art, particularly on art found in local museums such as the Getty, Norton Simon, and Los Angeles County Museum of Art. Satisfies Letters and Science Writing II requirement. Letter grading.
- 43. Male Identity and Sexuality in Ancient Rome. (4)** Seminar, three hours. Investigation of Roman cultural constructions of male identity and sexuality in context of political and social change in an emergent imperial ideology in the 1st century C.E.; examination of male "virtus," sexual stereotypes, and dynamics of sex and power in imperial politics. P/NP or letter grading.
- 44. Trail of Light. (4)** Lecture, three hours; discussion, two hours. Study of our understanding of light, colors, and vision: physics of light from Newton to Einstein; physics, chemistry, and biology of vision in relation to color; and appearance of light in art. P/NP or letter grading.

**45W. Writing about Life Sciences. (5)** Seminar, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Enforced corequisite: Life Sciences 2. Study and practice of writing in life sciences, including popular, literary, and scientific discourse. Satisfies Letters and Science Writing II requirement. Letter grading.

**46W. Literature of Testimony. (6)** Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Cross-cultural examination of 19th- and 20th-century literature of testimony functioning as acts of resistance, endorsement of inherited values, political activism, creation of knowledge, personal healing, and nation building. Satisfies Letters and Science Writing II requirement. Letter grading.

**47. Literature of Colonization and Colonization of Literature. (4)** Seminar, three hours. Examination of various facets of interaction between Western and non-Western cultures since period of high imperialism beginning in the mid-19th century, with focus on the novel as prism through which to observe cultural meeting and interchange and their consequences. P/NP or letter grading.

**48. Politics of Reproduction. (4)** Seminar, three hours. Examination of complex relations between individual, local, and global interests as they shape and reflect reproductive practices, public policy, and exercise of power. P/NP or letter grading.

**49. Evidence in Law, Science, History, and Journalism. (4)** Seminar, four hours. Rigorous study of ways in which lawyers, scientists, historians, and journalists handle evidence, with aim of advancing cross-disciplinary inquiry to produce a common vocabulary and set of concepts that allow for discussion of evidentiary issues in differing fields of inquiry. P/NP or letter grading.

**53. American Folk Music, Protest, and Identity. (5)** (Not the same as course 53 prior to Fall Quarter 2001.) Seminar, three hours. Study of American folk music as a prism to investigate more general relationships among cultural boundaries such as musical genres and social categories (race, ethnicity, nation, and generation). P/NP or letter grading.

**55. Culture and History of Utopias. (4)** Seminar, three hours. Study of major utopian writings from Thomas More's classical text to recent ecological and feminist utopian texts, with purpose of uncovering social, intellectual, and cultural landscapes underlying quest for a more perfect society. P/NP or letter grading.

**56. Language as a Window to the Mind. (4)** Lecture, four hours; discussion, one hour. Study of topics in language and the mind, including language acquisition in the child, language representation in the brain, relationship between language and other mental abilities, and autonomous nature of language as a system of knowledge. P/NP or letter grading.

**58. Slavery and Freedom in Greco-Roman Antiquity. (5)** (Not the same as course 58 prior to Fall Quarter 2002.) Seminar, three hours. Through study of diverse primary sources, exploration of paradox that Greco-Roman civilization, which first developed concept of humanity and humane values, accepted slavery without mounting any serious challenge to it. P/NP or letter grading.

**59W. Literature and Culture of the American South. (6)** Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Examination of historical imagination as it is expressed in such writers as William Faulkner, Allen Tate, Flannery O'Connor, Richard Wright, and Zora Neale Hurston; in Civil War and WPA/FSA photography; and in Southern rhetoric and political documentary. Satisfies Letters and Science Writing II requirement. Letter grading.

**60. Discovering and Explaining Anomalies of English. (5)** (Not the same as course 60 prior to Fall Quarter 2002.) Seminar, four hours. Study of linguistic anomalies, historical facts of English that brought about these irregularities, and artificiality of notion of "standard English." P/NP or letter grading.

**62. Community and Self-Interest in History of American Culture. (6)** Lecture, four hours; discussion, one hour. Exploration of historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in the autonomous individual. P/NP or letter grading.

**63. Civic Engagement and Public Use of Knowledge. (5)** (Not the same as course 63 prior to Fall Quarter 2002.) Seminar, four hours. Review and analysis of national discussion on role of citizens in modern-day democracy and balance or tension between personal gain and public good, including service learning component. P/NP or letter grading.

**64. Neuroscience and Psychology of Art and Biology of Aesthetics. (5)** (Not the same as course 64 prior to Fall Quarter 2001.) Seminar, three hours. Interdisciplinary approach to study of premise that beauty, whether of faces, art works, or other subjects, is processed by the brain and can be understood as a neurological and psychological phenomenon. P/NP or letter grading.

**65. Literature and Culture of Francophone World. (5)** (Not the same as course 65 prior to Fall Quarter 2001.) Seminar, three hours. Study of literary texts from North and sub-Saharan Africa, Guadeloupe, Haiti, Martinique, Vietnam, and France and examination of cultures of colonial and postcolonial Francophone world. P/NP or letter grading.

**67. Structure of Physical Reality. (4)** Lecture, three hours; discussion, one hour. No special mathematical knowledge required. Course in modern physics, including videos and practical demonstrations, Zen stories, and discussions of what Eastern and Western religions and philosophy in general have to say about forces of nature. Topics include quantum mechanics, microcosm of atoms, and elementary particle physics and philosophical implications. P/NP or letter grading.

**68. Systems Thinking: Exploring Order and Chaos in Everyday Life. (5)** (Formerly numbered 1.) Seminar, three hours; laboratory, one hour. Exploration of neural networks, genetic algorithms, and system languages as way of defining, measuring, exploring, and creating systems. P/NP or letter grading.

**69. Artificial Life and Evolutionary Design: Theory and Practice in Multiagent Modeling. (5)** (Not the same as course 69 prior to Fall Quarter 2001.) Seminar, five hours. No special mathematical or computer knowledge required. Study of artificial life, artificial intelligence, virtual environments, and evolutionary computation through both literature on simulations and practical engagement in simulations themselves. P/NP or letter grading.

**70. Genetic Engineering in Medicine and Agriculture. (4)** Lecture, 90 minutes; discussion, two hours. Overview of principles of cell and molecular biology and of technical details of genetic engineering. Discussion of benefits and detriments of new biotechnology in relation to medicine, agriculture, and general social issues. P/NP or letter grading.

**70A. Genetic Engineering in Medicine, Agriculture, and Law. (5)** Lecture, three hours; discussion, two hours. Not open to students with credit for Life Sciences 3 or 4 or Microbiology 7. Historical and scientific study of genetic engineering in medicine, agriculture, and law, including examination of social, ethical, and legal issues raised by new technology. P/NP or letter grading.

**70C. Culture, Ethnicity, Race, and Development: Multimedia and Multidisciplinary Approach. (5)** Lecture, four hours; discussion, one hour. Study of cultural apprenticeship, including evolution of cultural learning, ontogeny of cultural learning, changes in cultural learning over history, and conflicts between forms and goals of cultural learning in a multicultural society. P/NP or letter grading.

**71. Cultural Heritage and Virtual Reality. (5)** (Not the same as course 71 prior to Fall Quarter 2001.) Seminar, four hours. Study of application of virtual reality technology to field of cultural heritage, using three-dimensional computer models of such sites as Cathedral of Santiago de Compostela, Colosseum, and Second Temple in Jerusalem. P/NP or letter grading.

**72. From Genes to Cells: Simple Science with Complex Implications. (4)** Lecture/discussion, three hours. Discussion of recent advances in understanding of biology — from cellular function to genetics to ecology — with emphasis on ethical and social implications. Taught in conjunction with Kyoto University in Japan. P/NP or letter grading.

**73. Elementary Particles in the Universe. (4)** Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading.

**76. Thinking about Rights. (5)** (Not the same as course 76 prior to Fall Quarter 2002.) Seminar, three hours. Examination of character of rights, who is capable of exercising rights, and scope and content of rights as they have been debated and fought over in theoretical writings and political arenas for three centuries. P/NP or letter grading.

**77. Space Science: Active Sun and Its Effects on Earth. (4)** Lecture, 90 minutes. Study of consequences of solar magnetic storms on Earth, using latest NASA and ISAS tools for monitoring the sun and recording, through computer simulations, its effects. Joint course between Kyoto University, using distance learning technology. P/NP or letter grading.

**78. Community-Based Research: Theory and Practice. (5)** Seminar, three hours. Community-based research, in collaboration with community organizations, on theme of client rights: activism and advocacy. P/NP or letter grading.

**79. Genome: Blueprint, Controversy, Destiny. (5)** Lecture, three hours; laboratory, three hours. Not open to students with credit for Life Sciences 3 or 4. Laboratory-based exploration of topics related to Human Genome Project, including DNA coding, impact of Human Genome Project on society, use of DNA in forensic analysis, designer genes, and genomes as basis of new insights into evolution. P/NP or letter grading.

**80. Genomics and Boundaries of Self. (5)** Seminar, three hours. Study of impact that knowledge of entire human genome sequence has on our concepts of ourselves as individuals and our place in biological universe. P/NP or letter grading.

**81. Eastern Christianity in Comparative Perspective: History, Doctrine, Culture. (5)** Lecture, two hours; discussion, two hours. Exploration of philosophical and metaphysical beliefs of Eastern Christianity, comparing and contrasting Eastern churches to those that dominate in the West and examining how Eastern Orthodox outlook has developed within broader Judeo-Christian tradition. P/NP or letter grading.

**82. Community and Labor Development from Ground Up. (4)** Lecture, three hours; discussion, one hour. Introduction to practical applications of community development and outreach efforts in Los Angeles area, with projects from Community Outreach Partnership Center within School of Public Policy and Social Research. P/NP or letter grading.

**83W. Politics and Rhetoric of Literature. (6)** Seminar, four hours; writing laboratory, two hours. Enforced requisite: English Composition 3 or 3H. Examination of relationship among politics, rhetoric, and literature in study of literature from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly conflict between self and state, between ideology and the practical business of living. Satisfies Letters and Science Writing II requirement. Letter grading.

**88. Understanding Imperialism in Africa: Slave Trade Antecedents and Colonial Legacies.** (5) Seminar, three hours. Examination of nature of imperialism in Africa, its antecedents in African slave trade and in European exploration and missionary work, and its colonial and postcolonial legacy. P/NP or letter grading.

**92. Genes, Genomics, and Internet.** (4) Lecture, two hours; computer laboratory, three hours. New science of genomics (computer analysis of genetic information), dealing with issues related to basic genetics, medicine, biotechnology, evolution, information technology, and their societal impact. P/NP or letter grading.

**94. Historic Roots of Healing Arts.** (4) Seminar, four hours. Not open to students with credit for Psychiatry 98H. Introduction to traditions, practices, goals, and myths of healing professions in Western medicine. P/NP or letter grading.

**95. Art, Politics, and Social Change in 19th-Century England and France.** (4) Seminar, three hours. Exploration, through analysis of artists and intellectuals in 19th-century England and France, of social factors in cultural expression and way that national traditions and political and social conditions shape each set of literary and artistic innovations. P/NP or letter grading.

**97. Issues in American Foreign Policy: Methodology of Assessment.** (4) Lecture/debate, three hours; discussion, one hour. Exploration in debate format of wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading.

**98. Fiat Lux Seminar.** (1) Seminar, one hour. Discussion of and critical thinking about topics of current intellectual importance, taught by faculty members in their areas of expertise and illuminating many paths of discovery at UCLA. P/NP grading.

**99. Student Research.** (1 to 4) Tutorial (research or other scholarly work), five hours per week per unit. Entry-level research under guidance of a faculty mentor. Enrollment by contract. Students must be in good standing and enrolled in a minimum of 12 units (excluding this course). May be repeated; consult college/school adviser. P/NP grading.

## Upper Division Courses

**101A. Summer Research Forum.** (2) (Formerly numbered 101.) Lecture, one hour; workshop, two hours. Corequisite: course 99. Designed to promote broad and deep understanding of university research, including plenary lectures on research and workshops on grant writing, internet searches, research abstracts, and laws and regulations governing research. P/NP grading.

**101B. UCLA Undergraduate Science Journal.** (2) Seminar, two hours. For students on editorial board of annual *UCLA Undergraduate Science Journal*, including study of writing in the sciences and honing of editing and production skills. May be repeated once for credit. P/NP grading.

**101C. UCLA Undergraduate Journal for Humanities and Social Sciences.** (2) Seminar, two hours. For students on editorial board of annual *Westwind* journal of undergraduate research and writing, including study of writing in various disciplines and honing of editing and production skills. May be repeated once for credit. P/NP grading.

**101D. Counseling Multicultural Communities.** (2) Seminar, two hours. Study of issues of culture and identity in cross-cultural counseling, including development of working model. P/NP grading.

**M102. Culture, Media, and Los Angeles.** (6) (Same as Afro-American Studies M102 and Asian American Studies M197H.) Lecture, four hours; screenings, two hours. Designed for juniors/seniors. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

**103. Scientific Knowledge, Industrial Growth, and Social Policy.** (5) Lecture, three hours; laboratory, two hours. Examination, using nanotechnology, of both benefits and risks to economy and society when new technologies are in process of development. P/NP or letter grading.

**104. Trojan War: Antiquity and Afterlife.** (5) (Not the same as course 104 prior to Fall Quarter 2003.) Seminar, three hours. Focus on Troy as locale for ancient and modern imagination in poetry, archaeology, and historical fantasy. P/NP or letter grading.

**M106. Imaginary Women.** (4) (Same as Women's Studies M106.) Seminar, four hours. Designed for juniors/seniors. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

**107. Painful Birth: Rise of Modern Capitalism in Late Medieval Italy.** (4) Seminar, three hours. Through medieval texts and representations of the human figure in art, examination of rise of merchant and banking class in late medieval Italy, focusing on ideological and economic issues rooted in contempt for commerce, prohibition of usury, ideal of the nobility, and choice between Earth and sky. P/NP or letter grading.

**109. Language, Meaning, and the Making of Poetry.** (4) Seminar, three hours; workshop, one hour. In words of the august professor, "Semiological warfare against the purveyors of semantic entropy." In context of and comparison with contemporary speech, study of history of philosophic and poetic discourse on language and its potentials, including social and political implications. P/NP or letter grading.

**110. Marxist and Post-Marxist Approaches to Cultural Studies.** (4) Seminar, four hours. Examination of Marxist and post-Marxist approaches to study of culture, including classic texts, theoretical and empirical works, and the Marxist roots of postmodernism. P/NP or letter grading.

**111. Stress and Coping.** (4) Seminar, four hours. Examination of research and theory on stress and coping, with emphasis on physical and mental consequences of stress and moderators of both social support and personality in coping strategies. P/NP or letter grading.

**M112. Inner and Outer Worlds of Children: Social Policies.** (4) (Formerly numbered 112.) (Same as Education M112.) Seminar, four hours. Practices and analysis of social policies impacting on children. Topics include assessment, social justice and geographical space, temporal orientation, and classical theories of adolescent development. Letter grading.

**M116. Art Alive: Art and Improvisation in the Museum.** (4) (Same as Theater M193.) Seminar, four hours. Offered in collaboration with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogues, movement, and music. Research into history and art history and production of a creative performance piece required. P/NP or letter grading.

**117. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe.** (4) Seminar, three hours. Resistance is not a moral or philosophical issue, but a sociohistorical one. What makes resistance possible are specific historical circumstances and social relations that enable ordinary men and women to oppose their oppressors. Examination of this premise through analysis of organized resistance to Nazi occupation in Europe. P/NP or letter grading.

**117L. Resistance to Evil: Organized Resistance to Nazis in Occupied Europe.** (2) Seminar, two hours. Corequisite: course 117. Optional seminar with reading of texts in Dutch, Flemish, and some French selected from works that relate directly to material covered in course 117. P/NP or letter grading.

**M118. Roots of Patriarchy: Ancient Goddesses and Heroines.** (4) (Same as Women's Studies M128.) Lecture, three hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

**M119. Nuclear Weapons: Critical Decisions.** (4) (Same as Environment M165, Policy Studies M116, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

**122. Violence Against Women in Cross-Cultural Perspectives.** (4) Seminar, three hours. Exploration of sources of violent acts against women in different societies. Topics include wife beating, female sexual slavery, female infanticide, dowry deaths, female genital "circumcision," rape, and emerging global human rights responses to these issues. P/NP or letter grading.

**123. War and Peace in Africa.** (4) Seminar, four hours. Investigation into main causes and forms of warfare on African continent, including relationship between internal war and transborder conflict, historic ethnic antagonism, competition for control of natural resources, and hostilities precipitated by militarism. P/NP or letter grading.

**124. Midwives, Mothers, and Medicine: Perspectives on History of Childbirth.** (4) Seminar, three hours. Using examples from history and anthropology, examination of variety of practices associated with childbirth over time and across cultures, addressing such themes as shifting relations among birthing women, midwives, and medical men and cultural meanings of birth. P/NP or letter grading.

**125. Interpretations of Shakespeare in Theater and Film in the 20th Century.** (4) Seminar, three hours. Textual content of five Shakespearean dramas and their film and stage interpretations in the 20th century, including participation in rehearsals of production of *All's Well that Ends Well*. P/NP or letter grading.

**126. Making Citizens/Making Societies: Political Cultivation in Cross-Cultural Perspective.** (4) (Formerly numbered 31.) Seminar, three hours. Examination of how a society takes active concern in making sure that certain politically relevant dispositions, sensitivities, capacities, and skills are nourished in population at large, including models of both aristocratic and democratic cultivation and their political implications. P/NP or letter grading.

**127. Citizenship, Leadership, and Service.** (4) Seminar, three hours; fieldwork, three hours. Interactive participatory study of interactions between citizenship, leadership, and service, including both theoretical work in classroom and practical work in service organizations in the field. P/NP or letter grading.

**M128. Latinos and Literacy.** (5) (Formerly numbered 128.) (Same as Chicana and Chicano Studies M170.) Seminar, three hours; field project, three hours. Preparation: Spanish fluency or completion of two years of university-level Spanish. Study of theory and practice of teaching literacy, including field-based work in adult literacy centers in the city. P/NP or letter grading.

**M129. Cultural Construction of Gender and Sexuality: Homosexualities.** (4) (Formerly numbered 129.) (Same as Anthropology M134 and Lesbian, Gay, Bisexual, and Transgender Studies M134.) Seminar, three hours. Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

**130. How Cold War Was Played.** (4) Lecture/discussion, four hours. Examination of what prompted the Cold War, why it lasted so long, what its impact was on political and socioeconomic systems of two main protagonists, and what its legacy has become. P/NP or letter grading.

**131. Beating Time through Time: Language, Verse, and Culture.** (5) Seminar, three hours. Exploration of links among language change, demographic and cultural change, and changing modes of poetic composition in English from 10th-century alliterative tradition to contemporary rap lyrics. P/NP or letter grading.

**132. Bible as Political Theory.** (4) (Formerly numbered 26.) Seminar, four hours. The Bible treated as a political text, addressing the prepolitical condition, formation of a political community, the state, survival without a state, and messianism, with focus both on institutions and on intellectual history. P/NP or letter grading.

**134. Quest for Identity and the American Dream.** (5) Seminar, three hours. Exploration of concepts of equality, identity, individuality, and authenticity in American society through literary and legal texts and selected theory and films. P/NP or letter grading.

**M135. Narrative in Mass Communication.** (6) (Same as Communication Studies M135.) Seminar, four hours. Examination of narrative as a primary function of mass media, beginning with social, psychological, cultural, and rhetorical functions of storytelling and basic elements of narrative, then applying these to study of film, television, and print media. P/NP or letter grading.

**137. Political Satire: Offensive Art.** (5) Seminar, three hours. Study of political satire in several societies and variety of genres, including review of sociopolitical conditions that act to foster or constrain satire. P/NP or letter grading.

**138. Disease and Human Condition.** (5) Seminar, four hours. Exploration of scientific characteristics and historical manifestations of group of diseases that have shaped civilization; discussion of how historical manifestations of each disease are embedded in social and economic conditions of its time. P/NP or letter grading.

**139. African Americans and Africa in Perspective.** (5) Seminar, four hours. Study of saga of how African Americans have struggled to reattach their identity to Africa and Africans in both historical and contemporary perspectives. P/NP or letter grading.

**140. Dominants and Subordinates in Social Psychology of Privilege and Oppression in Public Education.** (6) Lecture, four hours; discussion, one hour; tutoring, three hours. Study of social arrangements and temporary inequalities in contemporary American public school, showing how such entrenched inequalities tend to become permanent. Field component included. P/NP or letter grading.

**142. Madness in the Enlightenment: Care and Cure of Mental Illness.** (5) (Formerly numbered 52.) Seminar, four hours. Not open for credit to students with credit for former course 52 or Psychiatry 98B. Study of physicians and reformers of the Enlightenment who treated the mentally ill, examined in context of social, intellectual, and cultural history of the time. P/NP or letter grading.

**M143. From Latin America to the U.S.: Immigration and Latino Identity.** (4) (Same as Chicana and Chicano Studies M124.) Lecture, three hours. Overview of immigration in the 20th century, examining social, political, and economic contexts out of which different waves of Latin American immigration to the U.S. has occurred. Letter grading.

**M145. Politics of Crisis: Migration, Identity, and Religion.** (4) (Same as Chicana and Chicano Studies M126.) Lecture, three hours. Examination of individual and collective religious response of Latin Americans and Latinas/Latinos in the U.S. to dislocations, displacements, and fragmentation produced by conquest, colonization, underdevelopment, globalization, and migration. Letter grading.

**147. Feminism Around the World: Past and Present.** (5) Seminar, three hours. Historical and global perspective on variety of feminist movements in the world, including their similarities and differences. P/NP or letter grading.

**M148. Simulating Society: Exploring Artificial Communities.** (5) (Formerly numbered M198A.) (Same as Sociology M118.) Seminar, three hours; computer laboratory, one hour. Examination of social behavior through computer simulations of behavior in artificial communities. P/NP or letter grading.

**149. Culture: What Makes It Work.** (5) Seminar, four hours. Examination of some basic questions that arise in study of what we mean by culture, including new theory and methods, using multiagent modeling, that allows us to do quasi-experimental research into nature of culture. P/NP or letter grading.

**M150. Models and Modeling in Anthropology.** (4) (Same as Anthropology M186.) Lecture, three hours. Modeling from both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples — decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models. Letter grading.

**151. American Jews and Israel in Mutual Perspective.** (4) Lecture, two hours; discussion, one hour. Examination of relationships between Israel and Jews in the U.S., with emphasis on locating the two communities in Jewish history and political impact of this relationship. Offered mutually with parallel course at Tel Aviv University, including shared bulletin board and chat room. P/NP or letter grading.

**152. Collapses of Past Societies and Their Lessons for Our Own Future.** (5) Lecture, two hours; discussion, one hour. Examination of several sets of preindustrial societies that met varying fates (Polynesians on Pacific islands, societies of Southwestern U.S., and Vikings on North Atlantic islands), as background to examination of how some modern societies are coping or failing to cope with their environmental impacts. P/NP or letter grading.

**153. International Hot Spots.** (5) Seminar, three hours. Debate-style seminar concentrating on explosive confrontation points in current international affairs, including North and South Korea, India and Pakistan, Israel and Palestinians, Iraq, Colombia, and Congo and Rwanda. P/NP or letter grading.

**M154. Interpreting Performance: Examination of Social, Historical, and Cultural Models for Performing Arts.** (5) (Same as Theater M112.) Lecture, two hours; discussion, two hours. Examination of nature of performance in theory and practice and of social, historical, and cultural contexts in which performance traditions have evolved. Attendance at approximately five designated performances/events required. P/NP or letter grading.

**155. The U.S. and World Post-9/11.** (5) Lecture, two hours; discussion, two hours; tutorial, 90 minutes every other week. Survey of major questions confronting American foreign policy in period since September 11, 2001, in course organized in conjunction with series of public lectures on this topic. P/NP or letter grading.

**199. Directed Honors Studies.** (4) Tutorial, two hours. Preparation: minimum of 4 units completed in Honors Collegium with a grade of B or better, overall UCLA grade-point average of 3.0 or better. Special research/writing tutorial with a director of one of the Honors Collegium courses in order to pursue in greater depth a significant topic from one of the collegium courses. P/NP or letter grading.

## HUMAN GENETICS

*David Geffen School of Medicine*

UCLA  
6506 Gonda Center  
Box 957088  
Los Angeles, CA 90095-7088

(310) 794-5423  
fax: (310) 794-5446  
<http://www.genetics.ucla.edu>

Kenneth L. Lange, M.D., Ph.D., *Interim Chair*

### Professors

Kenneth L. Lange, Ph.D.  
Leena Peltonen, M.D., Ph.D. (*Gordon and Virginia MacDonald Distinguished Professor of Human Genetics*)

### Associate Professors

Stanley F. Nelson, M.D., Ph.D.  
Janet Sinsheimer, Ph.D.

### Assistant Professors

Esteban Dell'Angelica, Ph.D.  
Gouping Fan, Ph.D.  
Stephan Horvath, Ph.D.  
York Marahrens, Ph.D.  
Chiara Sabatti, Ph.D.  
Eric J. N. Vilain, M.D., Ph.D.

### Adjunct Associate Professors

Rita Cantor, Ph.D.  
Eric Sobel, Ph.D.

### Adjunct Assistant Professors

Linda L. McCabe, Ph.D.  
Paivi Pajukanta, M.D., Ph.D.  
Jeanette Papp, Ph.D.  
N. Carolyn Schanen, M.D., Ph.D.

## Scope and Objectives

The graduate Human Genetics Program prepares students for careers as independent laboratory researchers with a firm grasp of the developments in biological and medical research. The rapidly evolving field of human genetics now incorporates genetic, biochemical, cell biological, and developmental studies of both humans and model organisms to tackle biomedical problems important for human health and disease. Areas of study include both Mendelian and non-Mendelian hereditary diseases, genomics and mapping, bioinformatics, developmental biology, neurogenetics, sex determination, cytogenetics, human malformation, and chromatin structure and function. Laboratory research is emphasized. Conceptual approaches to medically related biological problems are employed, frequently with the aid of automation and advanced imaging techniques, toward the goal of disease prevention, control, and eradication methods such as gene therapies. Coursework acquaints students with the most current literature and trains students in critical thinking, experimental design, and the ability to anticipate future developments.

Graduate study leading to a Ph.D. degree is emphasized. Under special circumstances, master's candidates are considered after consultation with faculty members and the chair.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Human Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Human Genetics. An M.D./Ph.D. program is also offered.

## Human Genetics

### Upper Division Courses

**C144. Genomic Technology. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Survey of key technologies that have led to successful application of genomics to biology, with focus on theory behind specific genome-wide technologies and their current applications. Concurrently scheduled with course C244. P/NP or letter grading.

**CM153G. Macromolecular Structure. (6)** (Same as Biological Chemistry CM153G and Chemistry CM153G.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253. Letter grading.

**CM156. Human Genetics. (4)** (Same as Microbiology CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**CM169. Cell Structure, Signaling, and Development. (6)** (Same as Biological Chemistry CM169 and Molecular, Cell, and Developmental Biology CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM267. Letter grading.

**CM178. Molecular Genetics. (6)** (Same as Biological Chemistry CM178, Microbiology CM178, and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**199. Special Studies in Human Genetics. (2 to 8)** Tutorial, to be arranged. Students select instructor among eligible research faculty and carry out independent research project under instructor supervision. P/NP or letter grading.

## Graduate Courses

**M203. Stochastic Models in Biology. (4)** (Same as Biomathematics M203.) Lecture, four hours. Requisite: Mathematics 170A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines. S/U or letter grading.

**M207A. Theoretical Genetic Modeling. (4)** (Same as Biomathematics M207A and Biostatistics M272.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 115A, 131A, Statistics 100B. Mathematical models in statistical genetics. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. S/U or letter grading.

**M207B. Applied Genetic Modeling. (4)** (Same as Biomathematics M207B and Biostatistics M237.) Lecture, three hours; laboratory, one hour. Requisites: Biostatistics 110A, 110B. Methods of computer-oriented genetic analysis. Topics may include segregation analysis, parametric and nonparametric linkage analysis, quantitative methods, and phylogenetics. Laboratory for hands-on computer analysis of genetic data; laboratory reports required. Course complements M207A; students may take either and are encouraged to take both. S/U or letter grading.

**220. Ethical Issues in Human Genetics. (2)** Discussion, two hours. Topics include consent for genetic research, privacy of genetic information, genetic discrimination, misattribution of parentage, DNA databases, presymptomatic genetic testing, newborn screening, genetic testing of children, preimplantation diagnosis, prenatal diagnosis, manipulation of embryos and cloning, gene therapy, and forensic use of genetic information. S/U or letter grading.

**236A. Advanced Human Genetics. (4)** (Formerly numbered 236.) Lecture, three hours. Requisites: courses CM248, CM253. Advanced topics in human genetics related to Mendelian disease, molecular genetics, and relevant technologies. Topics include cytogenetics, genomics, proteomics, positional cloning, bioinformatics, gene therapy, and developmental genetics. Reading materials include original research papers and reviews. Letter grading.

**236B. Advanced Human Genetics. (4)** Lecture, three hours. Requisites: courses 236A, CM248, CM253. Advanced topics in human genetics related to complex genetic traits and common diseases, with emphasis on biostatistics and mathematical modeling. Reading materials include original research papers and reviews. Letter grading.

**C244. Genomic Technology. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Survey of key technologies that have led to successful application of genomics to biology, with focus on theory behind specific genome-wide technologies and their current applications. Concurrently scheduled with course C144. S/U or letter grading.

**CM248. Molecular Genetics. (6)** (Same as Biological Chemistry CM248, Microbiology CM248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: course CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**M252. Seminar: Advanced Methods in Computational Biology. (2)** (Same as Chemistry M252.) Seminar, one hour; discussion, one hour. Designed for advanced graduate students. Examination of computational methodology in bioinformatics and computational biology through presentation of current research literature. How to select and apply methods from computational and mathematical disciplines to problems in bioinformatics and computational biology; development of novel methodologies. S/U or letter grading.

**CM253. Macromolecular Structure. (6)** (Same as Biological Chemistry CM253 and Chemistry CM253.) Lecture, five hours. Requisites: Chemistry 110A, 153A, 153B, 153C, 156. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G. Letter grading.

**CM256. Human Genetics. (4)** (Same as Microbiology CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**M260. Bioinformatics and Genomics. (4)** (Same as Chemistry CM260.) Lecture, three hours; discussion, one hour. Genomics and bioinformatics results and methodologies, with emphasis on concepts behind rapid development of these fields. Focus on how to think genomically via case studies showing how genomics questions map to computational problems and their solutions. S/U or letter grading.

**CM267. Cell Structure, Signaling, and Development. (6)** (Same as Biological Chemistry CM267, Chemistry M267, and Molecular, Cell, and Developmental Biology CM223.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: course CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

**596. Directed Individual Study and Research. (2 to 12)** Tutorial, to be arranged. Individual study or research for graduate students. May be repeated for credit. S/U grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. Individual study for M.S. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U or letter grading.

**598. M.S. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. Preparation of research data and writing of M.S. thesis. May be repeated for credit. S/U or letter grading.

**599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. Preparation of research data and writing of Ph.D. dissertation. May be repeated for credit. S/U grading.

## Affiliated Faculty

### Professors

Raimo A. Anttila, Ph.D. (*Linguistics*)  
Jesse L. Byock, Ph.D. (*Germanic Languages*)  
Robert K. Englund, Ph.D. (*Near Eastern Languages and Cultures*)  
Vyacheslav V. Ivanov, Ph.D. (*Slavic Languages and Literatures*)  
Joseph F. Nagy, Ph.D. (*English*)  
Brent H. Vine, Ph.D. (*Classics*)  
Stephanie W. Jamison-Watkins, Ph.D. (*East Asian Languages and Cultures*)

### Professors Emeriti

Henning Andersen, Ph.D. (*Slavic Languages and Literatures*)  
Bengt T.M. Löfstedt, Ph.D. (*Classics*)  
Jaan Puhvel, Ph.D. (*Classics*)  
Hartmut E. Scharfe, Ph.D. (*East Asian Languages and Cultures*)  
Hanns-Peter Schmidt, Ph.D. (*Near Eastern Languages and Cultures*)

### Associate Professor

Christopher M. Stevens, Ph.D. (*Germanic Languages*)

## Scope and Objectives

The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with two alternative major emphases: Indo-European linguistics and Indo-Iranian or other specialized language area studies.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degree

The Indo-European Studies Program offers the Doctor of Philosophy (Ph.D.) degree in Indo-European Studies.

## Indo-European Studies

### Lower Division Course

**M70. Origin of Language. (5)** (Same as Communication Studies M70 and German M70.) Lecture, three hours; discussion, one hour. Theoretical and methodological issues surrounding origin of language. Topics include evolutionary theory, evolution of man, how language is organized in the brain, and science of language, including physiology of speech, phonetics, and comparative reconstruction. Letter grading.

### Upper Division Courses

**131. European Archaeology from the Neolithic to Bronze Age. (4)** Lecture, four hours. Survey of European cultures from beginning of food-producing economy in the 7th millennium B.C. to beginning of Bronze Age in the 3rd millennium B.C. P/NP or letter grading.

**132. European Archaeology: Bronze Age. (4)** Requisite: course 131. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

**M150. Introduction to Indo-European Linguistics. (5)** (Same as Linguistics M150.) Lecture, four hours. Recommended prerequisite: Linguistics 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. P/NP or letter grading.

**C160. Indo-European Comparative Mythology and Poetics. (4)** Seminar, three hours. Preparation: familiarity with at least one ancient Indo-European language. Comparison of major Indo-European mythological and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with other traditions; literary continuations of mythopoetic material. Concurrently scheduled with course C260. P/NP or letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged.

## Graduate Courses

**200. Proseminar: Indo-European Studies. (2)** Seminar, two hours every other week. Required of graduate Indo-European studies students during first year. Introduction to graduate-level research in Indo-European studies. S/U grading.

**205. Indo-European Linguistics: Advanced Course I. (4)** Seminar, three hours. Preparation: one year of college-level study of either Greek or Latin, knowledge of at least one other ancient Indo-European language, reading knowledge of French, German, or Russian. Requisites: course M150, Linguistics 110. Comparative study of phonology and nominal morphology. Problems in analysis and reconstruction. S/U or letter grading.

**210. Indo-European Linguistics: Advanced Course II. (4)** Seminar, three hours. Requisite: course 205. Comparative study of verbal morphology, syntax, and lexicon. Problems in analysis and reconstruction. S/U or letter grading.

**250A-250B. European Archaeology. (4-4)** Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

**C260. Indo-European Comparative Mythology and Poetics. (4)** (Formerly numbered 260.) Seminar, three hours. Preparation: ability to read original sources in at least one ancient Indo-European language. Comparison of major Indo-European mythological and poetic traditions and reconstruction of their common sources. Topics include divinities and their names; symbolic systems in social context; myths, folk narratives, belief systems; relations with other traditions; literary continuations of mythopoetic material. Concurrently scheduled with course C160. S/U or letter grading.

**280A-280B. Seminars: Indo-European Linguistics. (4-4)** Seminar, three hours. Requisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. S/U or letter grading.

**596. Directed Individual Studies. (2 to 8)** Tutorial, to be arranged.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged.

## Related Courses

### Ancient Near East (Near Eastern Languages)

160A-160B. Introduction to Near Eastern Archaeology

161. Archaeology of Prehistoric Mesopotamia

260. Seminar: Ancient Near Eastern Archaeology

261. Practical Field Archaeology

### Anthropology

112. Old Stone Age Archaeology

C115R. Strategy of Archaeology

183. History of Archaeology

251A. Seminar: Classical Archaeology — Aegean Bronze Age

260. Topics in Ancient Religion

268. Seminar: Comparative Mythology

### English

111D. Celtic Mythology

111E. Survey of Medieval Celtic Literature

111F. Celtic Folklore

211. Old English

216A-216B. Old Irish

217A-217B. Medieval Welsh

218. Celtic Linguistics

263. Celtic Literature

### German (Germanic Languages)

230. Survey of Theory in Historical Linguistics

231. Gothic

232. Old High German

233. Old Saxon

252. Seminar: Historical and Comparative Germanic Linguistics

### Greek (Classics)

240A-240B. History of the Greek Language

242. Greek Dialects and Historical Grammar

243. Mycenaean Greek

**Indic (East Asian Languages)**

- 110A. Elementary Sanskrit  
 110B. Intermediate Sanskrit  
 110C. Advanced Sanskrit  
 115. Readings in Sanskrit  
 M222A-M222B. Vedic  
 230. Selected Readings in Sanskrit Texts  
 234A-234B. Introduction to Panini's Grammar  
 236A-236B. Pali and Prakrits

**Iranian (Near Eastern Languages)**

169. Civilization of Pre-Islamic Iran  
 170. Religion in Ancient Iran  
 190A-190B. Introduction to Modern Iranian Studies  
 M222A-M222B. Vedic  
 230A-230B. Old Iranian  
 231A-231B. Middle Iranian

**Latin (Classics)**

240. History of the Latin Language  
 242. Italic Dialects and Latin Historical Grammar

**Linguistics**

103. Introduction to General Phonetics  
 110. Introduction to Historical Linguistics  
 120A. Phonology I  
 120B. Syntax I

**Old Norse Studies (Germanic Languages)**

- C140. Viking Civilization and Literature  
 151. Elementary Old Norse  
 152. Intermediate Old Norse  
 245A. Germanic and Scandinavian Mythology

**Semitics (Near Eastern Languages)**

- 140A-140B. Elementary Akkadian  
 141. Advanced Akkadian  
 220A-220B. Ugaritic

**Slavic (Slavic Languages)**

179. Baltic and Slavic Folklore and Mythology  
 201. Introduction to Old Church Slavic  
 202. Introduction to Comparative Slavic Linguistics  
 241A-241B. Advanced Old Church Slavic  
 242. Comparative Slavic Linguistics  
 251. Introduction to Baltic Linguistics

 James M. Turner, Ph.D.

## Scope and Objectives

The Department of Information Studies has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, archives, preservation, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Students with master's degrees go on to careers as librarians, archivists, and information professionals in a variety of organizational settings. The Ph.D. focuses on the preparation of scholars in the field.

For information about the department and programs, see <http://is.gseis.ucla.edu/>.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Information Studies offers Master of Library and Information Science (M.L.I.S.) degree and the Doctoral of Philoso-

phy (Ph.D.) degree in Library and Information Science.

Two concurrent degree programs (Library and Information Science M.L.I.S./History M.A. and Library and Information Science M.L.I.S./Management M.B.A.) and an articulated degree program (Library and Information Science M.L.I.S./Latin American Studies M.A.) are also offered.

## Information Studies

### Upper Division Courses

**100. Perspectives on Literacy. (4)** Lecture, two hours; discussion, two hours. Designed for sophomores/juniors/seniors. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue. Letter grading.

**110. Information Resources and Libraries. (4)** Lecture, one hour; discussion, two hours; laboratory, one hour. Designed for sophomores/juniors/seniors. Not open for credit to M.L.I.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology). P/NP or letter grading.

**111A-M111E. Ethnic Groups and Their Bibliographies. (4 each)** Lecture, four hours. Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit. P/NP or letter grading. **111A.** American Indian History and Culture; **111B.** African American History and Culture; **M111C.** Latino History and Culture. (Formerly numbered 111C.) (Same as Chicana and Chicano Studies M112.); **111D.** Asian American History and Culture; **M111E.** Jewish History and Culture. (Same as Jewish Studies M111E.)

### Graduate Courses

**200. Information in Society. (4)** Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. Letter grading.

**202. History of Publishing and the Book Trade. (4)** (Formerly numbered 230.) Lecture, four hours. Requirement: course 200. Publishing and book trade history, with particular reference to libraries and book collecting, changing aspects of book production and distribution within the setting of cultural history. Letter grading.

**203. Seminar: Intellectual Freedom and Information Policy Issues. (4)** (Formerly numbered 271.) Seminar, four hours. Investigation of concept of intellectual freedom, information policy issues, civil liberties and civil rights, censorship, and other restraints on access to information. Letter grading.

**204. Electronic Publishing. (4)** (Not the same as course 204 prior to Fall Quarter 2001.) Discussion, four hours. Basic understanding of scholarly process and familiarity with World Wide Web and digital libraries assumed. Designed for master's and doctoral students in communication, education, English, information studies, management, and sociology. Survey of current issues in electronic publishing. Topics include history of publishing, digital libraries, scholarly communication, economics, perspective of publishers, universities, and librarians, uses and users of electronic documents, electronic books; new genres in electronic communication, visions of future. Letter grading.

**205. Cyberspace Law and Policy. (4)** (Formerly numbered 288.) Lecture, four hours. Legal and policy concerns of networked technologies from international perspective. Emphasis on jurisdictional issues, freedom of expression, intellectual property, privacy, security, equity, and electronic commerce in online environment. S/U or letter grading.

**207. International Issues and Comparative Research in Library and Information Science. (4)** Lecture, four hours. History and development of international organizations and programs in library and information science. Identification of key issues in international exchange of information. Introduction to comparative method as procedure for study and research. Letter grading.

**208. Scholarly Communication and Bibliometrics. (4)** (Formerly numbered 285.) Lecture, four hours. Preparation: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media. Letter grading.

**209. Seminar: Information Policy and Issues. (4)** (Formerly numbered 246.) Seminar, four hours. Analysis of social evolution of information-oriented societies. Historical factors and current trends explored through discussion of selected international and domestic issues. Implications for information policy. S/U or letter grading.

**220. Design of Library and Information Services. (4)** (Formerly numbered 203.) Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs. Letter grading.

**M225. Latin American Research Resources. (4)** (Same as History M265 and Latin American Studies M200.) Discussion, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. S/U or letter grading.

**227. Information Services in Culturally Diverse Communities. (4)** (Formerly numbered 289.) Lecture, four hours. Issues in provision of information services in a multiethnic and multilingual society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage. Letter grading.

**228. Measurement and Evaluation of Information Systems and Services. (4)** (Formerly numbered 241.) Lecture, two hours; discussion, two hours. Preparation: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description. S/U or letter grading.

**M229B. Africana Bibliography and Research Methods. (4)** (Same as African Studies M229B.) Discussion, four hours. Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases. S/U or letter grading.

**M229C. Introduction to Slavic Bibliography. (2)** (Same as Slavic M229.) Lecture, two hours. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of online databases; compilation of bibliographies. S/U grading.

**233. Records and Information Resources Management. (4)** (Formerly numbered 182.) Lecture, three hours. Introduction to records and information resources management in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, reprographics and image management technology, and litigation support. Letter grading.

**234. Contemporary Children's Literature. (4)** (Formerly numbered 253.) Lecture, four hours. Reading interests and correlative types of literature surveyed with reference to growth and development of children. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance. S/U or letter grading.

**236. Historical Bibliography. (4)** (Formerly numbered 260.) Lecture, four hours. Prerequisites: courses 200, 435. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including antiquarian, Anglo-American, and *histoire du livre* approaches. Letter grading.

**237. Analytical Bibliography. (4)** (Formerly numbered 261.) Lecture, four hours. The book as a physical object and its relationship to transmission of the text. History and methods of analytical bibliography, with particular emphasis on handpress books. Printing processes as related to bibliography and librarianship. Discussions, demonstrations, and experiments in design, composition, and presswork. Letter grading.

**240. Management of Digital Records. (4)** (Formerly numbered 282.) Lecture, three hours. Introduction to long-term management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic record-keeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development. Letter grading.

**245. Information Access. (4)** (Formerly numbered 220.) Lecture, four hours. Prerequisites: courses 200, 260. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources. Letter grading.

**246. Information-Seeking Behavior. (4)** (Formerly numbered 280.) Lecture, three hours; discussion, one hour. Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses. Letter grading.

**250. Techniques and Issues in Information Access. (4)** (Formerly numbered 226.) Lecture, four hours. Prerequisite: course 245. General reference materials (not specific to subject access), with advanced work in reference process and in cognitive and behavioral aspects of inquirers and expert reference librarians. Letter grading.

**251. Seminar: Specialized Literatures. (4)** Seminar, four hours. Prerequisite: course 245. Exposure to major literatures across spectrum of disciplines in three broad areas: (1) arts and humanities, (2) social sciences, (3) natural sciences and engineering. Students become familiar with knowledge structures; emphasis on reference and information sources for scholarly research. Letter grading.

**256. Information Resources for Business. (4)** (Formerly numbered 281.) Lecture, four hours. Prerequisite: course 245. Introduction to information needs of the business world. Business guides, encyclopedias, directories, yearbooks, indexes, loose-leaf services, government publications, databases, and other sources of business literature. Letter grading.

**258. Legal Information Resources and Libraries. (4)** (Formerly numbered 283.) Lecture, four hours. Introduction to information resources in law, with emphasis on primary authority and indexes to legal literature. Legal research skills. Law library services and management. Letter grading.

**259. Seminar: Information Access. (4)** (Formerly numbered 286.) Seminar, four hours. Prerequisite: course 245. Discussion of policies and issues related to basic and advanced reference materials, reference process, and psychological aspects of inquirers and expert reference librarians. Letter grading.

**260. Information Structures. (4)** (Formerly numbered 201.) Lecture, four hours; discussion, one hour. Required core course. Introduction to various systems and tools used to organize materials and provide access to them, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management. Letter grading.

**269. Seminar: Information Structures. (4)** (Formerly numbered 210.) Seminar, four hours. Prerequisites: course 260, one other information structures course. Specialized studies in selected areas of descriptive and bibliographical cataloging, subject vocabularies and classifications, and metadata. May be repeated once. Letter grading.

**270. Introduction to Information Technology. (4)** (Formerly numbered 204.) Lecture, four hours. Prerequisite: course 260. Introduction to theories and principles of information technologies. Topics include social issues of information technologies and design and development of information systems. Background for further studies in information retrieval and design and maintenance of information systems. S/U or letter grading.

**272. Human/Computer Interaction. (4)** (Formerly numbered 243.) Lecture, four hours. Preparation: one programming course, one inferential statistics course. Survey of social, behavioral, design, and evaluation issues in human/computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions. Recommended for students in any discipline involved in design or implementation of information technologies. Letter grading.

- 274. Database Management Systems. (4)** (Formerly numbered 245.) Lecture, three hours; laboratory, two hours. Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations. S/U or letter grading.
- 275. Development of Cultural Information Sources Using Digital Multimedia. (4)** (Formerly numbered 208.) Lecture, two hours; laboratory, two hours. Overview of technologies, techniques, and principles underlying development and packaging of cultural information resources into digital multimedia such as digital libraries, World Wide Web homepages, and CD-ROMs, as well as user, policy, presentation, motivation, and evaluation considerations. Letter grading.
- 276. Information Retrieval Systems: Structures and Algorithms. (4)** (Formerly numbered 242.) Lecture, four hours. Prerequisites: courses 245, 260. Survey of methods of file organization, retrieval techniques, and search strategies in control of information in computerized form. Letter grading.
- 277. Information Retrieval Systems: User-Centered Designs. (4)** (Formerly numbered 247.) Lecture, two hours; discussion, two hours. Prerequisites: courses 245, 260. Design implications of interaction between users and the features of automated information systems and interfaces that are specific to the information-seeking process. Emphasis on search strategy and subject access through use of thesauri and other vocabularies. Letter grading.
- 279. Seminar: Information Systems. (4)** (Formerly numbered 249.) Seminar, four hours. Preparation: at least one course from 246, 272, 276, 277, 455. Prerequisites: courses 200, 260. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services. Letter grading.
- 280. Social Science Research Methodology for Information Studies. (4)** (Formerly numbered 290.) Lecture, four hours. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques. S/U or letter grading.
- 281. Historical Methodology of Information Studies. (4)** (Formerly numbered 205.) Lecture, four hours. Prerequisite: course 200. Introduction to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in the field. Critical analysis of selected histories of various areas in the profession. Problem-oriented approach. Letter grading.
- 282. Principles of Information Systems Analysis and Design. (4)** (Formerly numbered 240.) Discussion, four hours. Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization. S/U or letter grading.
- 285. Introduction to Research Design and Methodology. (4)** (Formerly numbered 291.) Seminar, three hours. Designed for Ph.D. students. Introduction to research traditions in library and information science: quantitative/qualitative social science methods, ethnographic/field approaches, and historiography/critical approaches. Epistemological foundations of research, formulating research questions, and designing appropriate research studies. Letter grading.
- 289. Seminar: Special Issues in Information Studies. (2 to 4)** (Formerly numbered 287.) Seminar, two to four hours. Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include (but not limited to) expert systems, literacy, electronic networks, youth at risk, information literacy, historical bibliography, preservation of electronic media, etc. May be repeated with topic change. Letter grading.
- 290. Research Seminar: Information Studies. (1 to 2)** (Formerly numbered 272.) Seminar, one to two hours. Designed for Ph.D. students. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.
- 291A. Doctoral Seminar: Theoretical Traditions in Information Studies. (4)** Seminar, one hour; discussion, two hours. Introduction to multiple approaches historically taken in study of information (e.g., library and information science, archival theory, social informatics). Assessment of influence of cognate disciplines (e.g., linguistics, mathematics, philosophy, sociology). Evaluation of epistemological accounts of information sciences. Letter grading.
- 291B. Doctoral Seminar: Research Methods and Design. (4)** Seminar, one hour; discussion, two hours. Survey of quantitative, qualitative, and historical research designs. Ethical issues: conceptualization and measurement; indexes, scales, and sampling; experimental, survey, field, and evaluation research; data analysis. Letter grading.
- 293. Doctoral Seminar: Information Retrieval. (4)** (Formerly numbered 273.) Seminar, four hours. Designed for Ph.D. students. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use. S/U or letter grading.
- 294. Doctoral Seminar: Information Policy. (4)** (Formerly numbered 274.) Seminar, four hours. Designed for Ph.D. students. Examination of social, political, and economic influences in development of library and information science and management of information organizations and resources. S/U or letter grading.
- 295. Doctoral Seminar: Information Seeking. (4)** (Formerly numbered 275.) Seminar, four hours. Designed for Ph.D. students. Examination of behavioral and cognitive aspects of inquirer's information needs and uses, including inquirer's characteristics, information problems, psychological needs, and uses of information and information technologies, and aspects of question negotiation. S/U or letter grading.
- 297. Doctoral Seminar: Information Institutions and Professions. (4)** Seminar, four hours. Designed for Ph.D. students. Introduction to social theory and examination of several analytical frameworks that can be used to analyze social, cultural, and political roles of information institutions and professionals who direct them. Letter grading.
- M299. Research Resources for European Studies. (2)** (Same as French M299, German M299, Italian M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.
- 375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.
- 400. Professional Development and Portfolio Design. (2 to 4)** Lecture, two hours; discussion, two hours. Preparation: completion of information studies core courses. Drawing on literature from many fields, exploration of issues related to professional development, such as career planning, continuing education, mentoring, and reflective practice; students also engage in process of guided portfolio design for M.L.I.S. degree. S/U grading.
- 410. Management Theory and Practice for Information Professionals. (4)** (Formerly numbered 441.) Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information professionals work. Letter grading.
- 415. Library Personnel Management. (4)** (Formerly numbered 442.) Lecture, four hours. Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting. S/U or letter grading.
- 416. Interpersonal Communication Issues in Library Systems. (4)** (Formerly numbered 491.) Lecture, four hours. Examination of interpersonal communication patterns in library management and staff relations, in resource sharing, and in providing information services. Emphasis on relationships within an organizational environment and on effective communication styles in decision making, managing conflict, and implementing change. S/U grading.
- 421. Special Libraries and Information Centers. (4)** (Formerly numbered 470.) Lecture, four hours. Organization, administration, collections, facilities, finances, and problems of special libraries and of special collections within general libraries. Methods of handling nonbook materials. Current trends in documentation and mechanization. S/U or letter grading.
- 422. College, University, and Research Libraries. (4)** (Formerly numbered 461.) Lecture, four hours. Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars. S/U or letter grading.
- 423. Public Libraries. (4)** (Formerly numbered 463.) Lecture, four hours. Government, organization, and administration of municipal, county, and regional public libraries; developments in changing patterns of public library service. S/U or letter grading.
- 424. Storytelling. (4)** (Formerly numbered 466.) Lecture, two hours; demonstration, two hours. Theory and practice of telling stories to children and adults in public and school libraries. S/U grading.
- 425. Library Services and Programs for Children. (4)** (Formerly numbered 465.) Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service. Letter grading.
- 426. Library Services and Literature for Youth. (4)** (Formerly numbered 446.) Lecture, four hours. Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of the teenager. S/U or letter grading.
- 430. Collection Development and Acquisition of Library Materials. (4)** Lecture, four hours. Background of publishing and the book trade (new and antiquarian) pertinent to collection development in public, school, academic, and special libraries. Theory and practice of collection development and management. Organization and administration of acquisitions departments. Letter grading.
- 431. American Archives and Manuscripts. (4)** (Formerly numbered 485.) Lecture, four hours. Identification, description, subject analysis, and organization of records contained in archives and manuscript collections. Administration. User requirements. Problems of acquisition, legal title, literary property, preservation, accessibility, and use. S/U or letter grading.
- 432. Issues and Problems in Preservation of Heritage Materials. (4)** (Formerly numbered 486.) Lecture, six hours. Introduction to fields of library conservation and preservation, with emphasis on preservation administration. Letter grading.
- 435. Fundamentals of Bibliography. (4)** (Formerly numbered 402.) Lecture, four hours. Prerequisite: course 200. Organization, control, and elements of bibliographical apparatus, new techniques and tools, theory, methods, and trends in bibliographical research in relationship to librarianship. Development and fundamentals of several branches of bibliography: enumerative (or systematic), physical (analytical or critical, descriptive). Letter grading.

**438A. Seminar: Advanced Issues in Archival Science — Archival Appraisal. (4)** (Formerly numbered 438.) Seminar, four hours. Requisite: course 431. Evaluation and examination of contributions of key figures in development of archival appraisal theory; identification and evaluation of distinct movements in archival appraisal; identification of cultural, political, sociological, and technological movements that can have impact on appraisal methodologies. Letter grading.

**438B. Seminar: Advanced Issues in Archival Science — Archival Description and Access Systems. (4)** Seminar, four hours. Requisite: course 431. Exploration of history of archival description and access systems in the U.S. and their development since World War II; data collection; access tools and implications of these issues in development of online archival access systems. Letter grading.

**447. Computer-Based Information Resources (Online Searching). (4)** (Formerly numbered 425.) Lecture, four hours. Requisite: course 245. Emphasis on use of reference and resource databases and different vendor systems. File structure and hardware requirements. Analyses of information needs and investigation of databases addressing those needs. Letter grading.

**448. Information Literacy Instruction: Theory and Technique. (4)** (Formerly numbered 426.) Lecture, four hours. History, theory, methods, and materials of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources. S/U or letter grading.

**455. Government Information. (4)** (Formerly numbered 473.) Lecture, four hours. Introduction to nature and scope of government information promulgated by the federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach. S/U or letter grading.

**457. Health Sciences Librarianship. (4)** (Formerly numbered 471.) Lecture, four hours. Health sciences information resources and services, management of health sciences information resources and services, health sciences environment and policies, information systems and technology. Letter grading.

**461. Descriptive Cataloging. (4)** (Formerly numbered 410.) Lecture, four hours. Entry and description of library materials. Constitution, structure, and form of the library catalog. Cataloging services, tools, and procedures. Cataloging rules and their application. S/U or letter grading.

**462. Subject Cataloging and Classification. (4)** (Formerly numbered 411.) Lecture/discussion, four hours. Requisite: course 461. Overview of major alphabetic-subject and systematic indexing languages and their use in manual and online environments, including theory and application of Library of Congress subject headings and of Dewey decimal and Library of Congress classifications. S/U or letter grading.

**463. Indexing and Thesaurus Construction. (4)** (Formerly numbered 414.) Lecture, four hours. Principles of design and methods of construction of thesauri. Evaluation and overview of thesauri used in manual and online environments. Basic professional techniques for indexing a variety of types of materials and for preparing informative and indicative abstracts. Letter grading.

**464. Metadata. (4)** (Formerly numbered 412.) Lecture, four hours. Introduction to variety of metadata provided for digitized and other electronic information resources. Introductory theory and practice designing and applying metadata. S/U or letter grading.

**473. Information Technology and Libraries. (4)** (Formerly numbered 405.) Lecture, four hours. Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and online services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies. Letter grading.

**497. Fieldwork in Libraries or Information Organizations. (4 or 8)** Fieldwork, to be arranged. Supervised field experience in approved library or information organization. Concentration must be on managerial or other professional problems of the site. Students spend full time in the field for most of the period. S/U grading.

**498. Internship. (4)** Discussion, to be arranged. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

**597. Directed Studies for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**598. M.L.I.S. Thesis Research and Writing. (2 to 8)** Tutorial, to be arranged. Designed for graduate library and information science students. Supervised independent research for candidates in M.L.I.S. thesis option. S/U grading.

**599. Ph.D. Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## INSTITUTE OF THE ENVIRONMENT

*Center for Interdisciplinary Instruction*

UCLA  
1365 Hershey Hall  
Box 951496  
Los Angeles, CA 90095-1496

(310) 825-5008  
fax: (310) 825-9663

Arthur M. Winer, Ph.D. (*Environmental Health Sciences*)  
Benjamin M. Zuckerman, Ph.D. (*Physics and Astronomy*)

### Professors Emeriti

Samuel Aroni, Ph.D. (*Architecture and Urban Design*)  
Richard Schoen, M.Arch. (*Architecture and Urban Design*)

### Associate Professors

Peggy Fong, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
Robert G. Fovell, Ph.D. (*Atmospheric Sciences*)  
Anne Gilliland-Swetland, Ph.D. (*Information Studies*)  
David K. Jacobs, Ph.D. (*Organismic Biology, Ecology, and Evolution*)  
Suzanne E. Paulson, Ph.D. (*Atmospheric Sciences*)  
Marilyn N. Raphael, Ph.D. (*Geography*)  
Richard R. Vance, Ph.D. (*Organismic Biology, Ecology, and Evolution*)

### Assistant Professors

Charles J. Corbett, Ph.D. (*Management*)  
J.R. DeShazo, Ph.D. (*Policy Studies*)  
Noel Enyedy, Ph.D. (*Education*)  
Laurence C. Smith, Ph.D. (*Earth and Space Sciences, Geography*)

### Lecturers

Jeffrey K. Lew, Ph.D. (*Atmospheric Sciences*)  
Travis Longcore (*Geography*)

## Scope and Objectives

The UCLA Institute of the Environment (IoE) offers multidisciplinary academic programs that address the full complexity of current environmental problems. The IoE seeks to enhance the educational experience of students by introducing them to virtually every aspect of the environment. The mission is to explore environmental problems on local, regional, and global scales through innovative, integrative, multidisciplinary teaching, research, and outreach programs.

Los Angeles is often described as "the world in microcosm." As such, it provides an unparalleled laboratory in which to conduct detailed in-

vestigations of a host of complex socioenvironmental issues. The academic program is supported by faculty from a broad range of disciplines — the natural and social sciences, public policy, engineering, law, business, public health — who are collaborating to develop an interdisciplinary curriculum.

Students are able to augment their classroom experience with participation in the diverse research programs of the IoE, including fieldwork at facilities such as the UCLA Stunt Ranch Santa Monica Mountains Reserve and the Ocean Discovery Center. These opportunities provide valuable hands-on experience in land, air, and water research.

### General Education Cluster

The Institute of the Environment sponsors Environment/General Education Clusters M1A, M1B, M1CW on the global environment. The cluster format is a series of three integrated courses taught over the Fall, Winter, and Spring Quarters. The Fall and Winter Quarter courses consist of lectures and discussions. The Spring Quarter consists of seminars and activities in which students explore specialized environmental topics such as the history of environmental thought, environmental policy, and the impacts of human population. Each course in the sequence carries 5 units of academic credit. At the conclusion of the entire yearlong cluster, students complete a third of their general education course requirements, satisfy their general education seminar requirement, and fulfill the College of Letters and Science Writing II requirement.

### Environmental Systems and Society Minor

The Environmental Systems and Society minor is designed for students who wish to augment their major program of study with courses addressing the relationships between environmental science and associated social and political issues. The minor seeks to impart a deeper understanding of environmental systems related to air, land, and water resources, providing a basis for sound professional decision making.

To enter the minor, students must be in good academic standing (2.0 grade-point average) and file a petition at the Institute of the Environment, 1365 Hershey Hall, (310) 825-5008. All degree requirements, including the specific requirements for this minor, must be fulfilled within 216 units.

*Required Lower Division Courses (8 units):* Completion of at least two of the following courses with grades of C or better: Astronomy 3, Atmospheric Sciences 1, 2, 3, Earth and Space Sciences 1, 15, 16, 20, Environment M1A, M1B, Geography 1, 2, 5, Organismic Biology, Ecology, and Evolution 10, 13, 25. Other courses may be applied by petition.

*Required Upper Division Courses (20 units):* At least five course from Environment M111, 112, 113, 122, M133, M137, M153, M161.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program, and at least 16 units applied toward the minor must be taken in residence at UCLA. Transfer or substitution of credit for any of the above is subject to institute approval; consult an academic adviser at the institute before enrolling in any courses for the minor.

All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

## Environment

### Lower Division Courses

**M1A-M1B-M1CW. Global Environment. (5-5-5)** (Same as GE Clusters M1A-M1B-M1CW.) Course M1A is enforced requisite to M1B, which is enforced requisite to M1CW. Letter grading. **M1A-M1B.** Multidisciplinary Perspective I, II. Lecture, three hours; discussion, two hours. Human effects on Earth's ecosystem and social and technological solutions to environmental pollution and overpopulation. History and ecology in lectures; laboratory exercises included in discussions. **M1CW.** Special Topics. (Formerly numbered M1C.) Seminar, three hours. Enforced requisites: course M1B, and English Composition 3 or 3H. Not open for credit to students with credit for former course M1C. Examination of specialized environmental topics such as air and water, global warming, and feeding Earth's population. Satisfies Letters and Science Writing II requirement.

### Upper Division Courses

**M111. Earth and Its Environment. (4)** (Same as Atmospheric Sciences M100.) Lecture, three hours. Overview of Earth as system of distinct, yet intimately related, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Survey of history of Earth and of life on Earth, particularly in relation to evolution of physical world. Consideration of possibility of technological solutions to global environmental problems using knowledge gained during course. Letter grading.

**112. Science of the Environment. (4)** Lecture, three hours. Scientific principles of environmental issues, designed for upper division humanities and social sciences students. Use of case-study approach, covering urban and indoor air pollution, coastal and drinking water pollution, population dynamics, biodiversity, stratospheric ozone depletion, and global climate change. Letter grading.

**113. Los Angeles Watershed. (4)** Lecture, three hours; discussion, one hour. Overview of how varying scales of influence from atmosphere/climate, basin hydrology, runoff, sewage treatment, wetlands ecology and wetlands loss, coastal water circulation, and coastal biogeochemistry affect water resources in Los Angeles. Letter grading.

**M114. Soil and Water Conservation. (4)** (Same as Geography M107.) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

**122. International Integrated Coastal Management. (4)** Lecture, three hours. The coast is one of most complex and interesting environments because of interactions among several ecosystems. The coast is often densely populated, with high economic and population growth, therefore socioeconomic conflicts are common. Sewage and industrial pollution, overfishing, and poorly planned development often threaten health of environment. Integrated coastal management (ICM) offers framework for resolving the conflicts in manner that allows sustainable development. Focus on how ICM is being used in the U.S. and around the world to solve pressing ecological and socioeconomic problems. Letter grading.

**M127. Soils and Environment. (5)** (Same as Geography M127 and Organismic Biology M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**M133. Environmental Sociology. (4)** (Same as Sociology M115.) Lecture, three hours; discussion, one hour. Relationship between society and environment. Analysis in detail of interrelations between social factors (such as class, race, gender, and religion) and environmental factors (such as pollution, waste disposal, sustainability, and global warming). P/NP or letter grading.

**M137. Historical Geography of American Environment. (4)** (Same as Geography M137.) Lecture, three hours. Designed for juniors/seniors. Study of systematic changes of natural environment in the U.S. during historical time, with emphasis on interplay between and among natural factors of climate, soils, vegetation, and landforms, and human factors of settlement, economic activity, technology, and cultural traits. P/NP or letter grading.

**M153. Introduction to Sustainable Architecture and Community Planning. (4)** (Same as Architecture and Urban Design CM191.) Lecture, three hours. Relationship of built environment to natural environment through whole systems approach, with focus on sustainable design of buildings and planning of communities. Emphasis on energy efficiency, renewable energy, and appropriate use of resources, including materials, water, and land. Letter grading.

**M161. Global Environment and World Politics. (4)** (Formerly numbered 161.) (Same as Political Science M122B.) Lecture, three or four hours; discussion, one hour (when scheduled). Recommended requisite: Political Science 20. Politics and policy of major global environmental issues such as climate change, integrating law, policy, and political science perspectives. P/NP or letter grading.

**163. Management, Technology, and Environment. (4)** Lecture, four hours. Exploration of management of environmental issues by private companies in dynamic context of rapidly changing public expectations; specific focus on industrial ecology framework to evaluate effectiveness of firm-level efforts to moderate environmental impacts of economic activity. Letter grading.

**M165. Nuclear Weapons: Critical Decisions. (4)** (Same as Honors Collegium M119, Policy Studies M116, and Political Science M139B.) Lecture, three hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

**198. Basics of Satellite Oceanography. (4)** Lecture, two hours; discussion, one hour; computer laboratory, three hours. Remotely sensed data collected since the late 1970s provide oceanographers with large volume of information on state of surface of world ocean, including sea surface temperature measured by infrared sensors, anomalies of sea winds measured by scatterometers, and water color properties measured by optical sensors. Multidiscipline information enables comprehensive monitoring of both physical and biological properties of ecosystems in different ocean regions. P/NP or letter grading.

Mary A. Yeager, Ph.D. (*History*)

## Scope and Objectives

The undergraduate International Development Studies major aims to provide a liberal education in relation to the critical issues, experiences, and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international development in academia, public or private agencies, or nonprofit organizations.

## Undergraduate Study

### International Development Studies B.A.

#### Preparation for the Major

*Required:* Economics 1 or 2, one statistics course from Geography M40, Political Science 6, Sociology M18, or Statistics 10, and four courses from four different departments selected from Anthropology 9, Geography 3, 4, 5, History 8A, 8B, 8C, 9A, 9D, 9E, 10A, 10B, 10BW, 11B, 21, 22, Political Science 50, Sociology 1.

After satisfying the preparation for the major requirements, students must file a petition in the Undergraduate Advising Office, 10375 Bunche Hall, to declare the International Development Studies major.

#### Transfer Students

To be admitted as International Development Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one introductory economics course, one statistics course, and four courses selected from four of the following five fields: sociocultural anthropology, cultural or economic geography, world history, comparative politics, and sociology.

#### The Major

The major consists of five required parts (courses marked with an asterisk have requirements):

1. International Development Studies 100A, 100B, and one course from 190A through 190N
2. One research methodology course from Anthropology 139, \*180, M186, Community Health Sciences 196A, Geography \*124, 157, \*163, Honors Collegium M150, Sociology 104, 106A, 110, \*113, 116
3. Four social and critical theory courses, taken in three departments, from Anthropology \*150, 152, \*153P, \*161, Economics \*110, \*111, \*112, \*190, Environment M133, \*M161, Geography 121, \*M128, 133, 140, \*148, \*155, Political Science

116, \*M122B, \*124, \*167A, 168, Sociology 101, M115, 173, 182

4. Five regional and thematic elective courses, with four to be selected from the regional course lists below and divided equally between two of the world's developing regions; the fifth course may be selected from either the regional or thematic lists
5. Completion of six quarters (24 units) of any modern foreign language (a) at UCLA through level 6 or equivalent, (b) through the UCLA Education Abroad Program or another study abroad program, (c) through transfer of courses taken at another college, which may require certification from the equivalent language department at UCLA, or (d) through a placement test provided by the department of instruction at UCLA. The major requires proficiency through the intermediate level in speaking, reading, and writing of one modern foreign language. All modern foreign languages are allowed since the languages of developed nations (for example, French and German) are often used in the developing world and are useful in development work

## Honors Program

Majors who have completed International Development Studies 100A and 100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 195A, 195B, and 195C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 195A, 195B, 195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A, 195B, 195C) with a 3.75 GPA and who produce an exceptional thesis.

## International Development Studies

### Upper Division Courses

**100A-100B. Introduction to Development Studies. (4-4)** Lecture, three hours; discussion, one hour (when scheduled). Preparation: some beginning experience in social sciences at college level. Designed for juniors/seniors. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy. Letter grading. **100A.** Economic Development and Culture Change. **100B.** Political Economy of Development. (Formerly numbered M100B.)

**190A-190N. Senior Seminar: International Development. (4 each)** Seminar, three hours. Limited to 20 senior International Development Studies majors. Organized on a topics basis with readings, discussions, papers. May not be repeated for credit. Letter grading. **190A.** Development Theory; **190B.** Gender and Development; **190C.** Global Health Issues; **190D.** Human Rights and Development; **190E.** Globalization; **190F.** International Institutions; **190G.** Agriculture and Rural Development; **190H.** Colonialism and Postcolonialism; **190I.** War, Political Violence, and Development in Third World; **190J.** Environment and Development Issues; **190K.** Cultural Survival and Indigenous Minorities; **190L.** International Trade and Development; **190M.** Development and Cultural Production; **190N.** International Field Research Methods.

**195A-195B-195C. Directed Studies for Honors. (4-4-4)** Preparation: 3.5 grade-point average in courses offered for the major, formal application to honors program. Requisites: courses 100A, M100B. **195A.** Research, discussion, and planning of honors thesis. **195B-195C.** Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

**197. Special Topics in International Development. (4)** Seminar, three hours. Preparation: some beginning experience in social sciences at college level. Lecture/seminar format on selected topics in international development. Course either features visiting instructors in field of development studies or allows program's affiliated faculty to engage specific contemporary issues. May be repeated for credit with topic change.

**199. Special Studies in International Development Studies. (2 to 4)** Tutorial, to be arranged. Limited to juniors/seniors. Intensive directed research program in which students conduct interdisciplinary research with faculty sponsor from International Development Studies. Eight units may be applied toward major via petition. Letter grading.

## Course List

### Region 1: Sub-Saharan Africa

#### Anthropology

171. Sub-Saharan Africa

#### Art History

118C. Arts of Sub-Saharan Africa

#### Comparative Literature

169. Continental African Authors

#### Geography

\*122. Wildlife Conservation in Eastern and Southern Africa

135. African Ecology and Development

#### History

176B. History of West Africa since 1800

177. History of Northeast Africa

178A. History of East Africa

178B. History of Central Africa

179B. History of Southern Africa since 1870

#### Political Science

133. International Relations of Sub-Saharan Africa

151A. African Politics: Government and Politics of Africa

151B. African Politics: Political Economy of Africa

151C. African Politics: Special Topics in African Politics

### Region 2: Middle East and North Africa

#### Anthropology

176. Culture Area of the Middle East

#### Geography

187. Middle East

#### History

106B. Survey of the Middle East from 1300 to 1700

106C. Survey of the Middle East from 1700 to the Present

114. Topics in Middle Eastern History

#### Jewish Studies (Near Eastern Languages)

142. History and Institutions of State of Israel

#### Political Science

\*132A-132B. International Relations of the Middle East

157. Government and Politics in the Middle East

#### Sociology

\*187. Population and Society in the Middle East

### Region 3: East Asia and East Central Asia

#### Anthropology

\*175Q. Ideology and Social Change in Contemporary China

175T. Civilizations of East Asia

175V. Ethnology of Korea: Re-Presenting Lives in Contemporary South Korea

#### Art History

C115B. Advanced Chinese Art

C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906

C115F. Art and Material Culture of Late Imperial China, 906 to 1911

C140A. History of Korean Painting

C140B. History of Korean Ceramics

C140C. History of Korean Buddhist Art

C140D. Selected Topics in Korean Art

#### Chinese (East Asian Languages)

151. Chinese Literature in Translation: Modern Literature

152. Topics in Contemporary Chinese Literature and Culture

#### East Asian Languages and Cultures

163. Buddhism across Boundaries

#### Geography

186. Contemporary China

#### History

182B. Thought and Society in China since 1000

183B. Selected Topics in Chinese History from 1500

183C. History of Women in China, A.D. 1000 to the Present

184. 20th-Century China

#### Korean (East Asian Languages)

150. Korean Literature in Translation: Classical

151. Korean Literature in Translation: Modern

\*180B. Cultural History of Korea, 1260 through 1876

\*180C. Cultural History of Korea since 1876

#### Political Science

\*135. International Relations of China

159A. Government and Politics of China: Chinese Revolution and Age of Mao Zedong

159B. Government and Politics of China: China in Age of Reform

#### Sociology

188. Comparative East Asian Societies before World War II

191. Society and Politics in Korea

192. State and Society in China

193. Asian-Pacific Social Transformation since World War II

### Region 4: South and Southeast Asia and Pacific Islands

#### Anthropology

175U. Cultures of the Indonesian Archipelago

177. Cultures of the Pacific

**Art History**

- 114F. Arts of Southeast Asia
- C115A. Advanced Indian Art

**Comparative Literature**

- M175. Topics in Southeast Asian Literature

**Geography**

- 185. South and Southeast Asia

**History**

- 189A. Cultural and Political History of Contemporary South Asia
- 189C. Special Topics in Contemporary Indian History
- 190A. History of Southeast Asia: Early History of Southeast Asia
- 190B. History of Southeast Asia: Southeast Asia since 1815
- 190C. Philippine History
- 190D. Vietnam: Past and Present

**South and Southeast Asian Languages and Cultures (East Asian Languages)**

- M130. Topics in Southeast Asian Literature
- 155. Topics in Vietnamese Cinema and/or Literature
- 156A. Vietnam: History and Civilization to 1858
- 156B. Vietnam: History and Civilization, 1858 to the Present
- 170A-170B-170C. Topics in Southeast Asian Studies

**Region 5: Eastern Europe and West Central Asia**

**Anthropology**

- 175R. Societies of Central Asia

**Czech (Slavic Languages)**

- 155. Survey of Czech Literature from Middle Ages to the Present

**History**

- 112C. Armenian History: Armenia in Modern and Contemporary Times, 19th and 20th Centuries
- 113. The Caucasus under Russian and Soviet Rule
- 124A. East-Central Europe: The Long 19th Century, 1780 to 1914
- 124B. East-Central Europe: The Short 20th Century, 1918 to 1990
- 131B. History of Russia: Imperial Russia from Peter the Great to Nicholas II
- 131C. History of Russia: Revolutionary Russia and the Soviet Union

**Political Science**

- 128B. International Relations of Post-Communist Russia
- 156A. Government and Politics of Post-Communist States: Russia
- 156B. Government and Politics of Post-Communist States: Eastern Europe
- 156C. Government and Politics of Post-Communist States: Post-Soviet States
- 156D. Government and Politics of Post-Communist States: Political Economy of Post-Communist Reform

**Romanian (Slavic Languages)**

- 152. Survey of Romanian Literature

**Russian (Slavic Languages)**

- 119. Golden Age and the Great Realists
- 120. Literature and Revolution
- 124C. Studies in Russian Literature: Chekhov
- 124D. Studies in Russian Literature: Dostoevsky
- 124G. Studies in Russian Literature: Gogol
- C124N. Studies in Russian Literature: Nabokov
- 124P. Studies in Russian Literature: Pushkin
- 124T. Studies in Russian Literature: Tolstoy
- 126. Survey of Russian Drama
- M127. Women in Russian Literature
- C170. Russian Folklore

**Serbian/Croatian (Slavic Languages)**

- 154. South Slavic Literature

**Slavic (Slavic Languages)**

- 125. Interwar Central European Prose
- 126. Postwar Central European Prose

**Women's Studies**

- M127. Women in Russian Literature

**Region 6: Latin America and Caribbean Basin**

**Anthropology**

- 173Q. Latin American Communities
- 174P. Ethnography of South American Indians

**Art History**

- 110G. Art and Politics in the Contemporary Americas: Latin America
- C110H. Latin American Art of the 20th Century

**Community Health Sciences**

- 132. Health, Disease, and Health Services in Latin America

**Comparative Literature**

- M174. Film and Literature of the Spanish-Speaking World

**Geography**

- 181. Mexico, Central America, Caribbean
- 182A. Spanish South America
- 182B. Brazil

**History**

- 165C. Indians of Colonial Mexico
- 166. Latin America in the 19th Century
- 167C. Latin America in the 20th Century: Panama, Colombia, Ecuador, Honduras, El Salvador
- 168. History of Latin American International Relations
- 169. Latin American Elitology
- 170C. Issues in Latin American History
- 171. Mexican Revolution since 1910
- 173. Modern Brazil

**Latin American Studies**

- 197. Interdisciplinary Topics in Latin American Studies

**Political Science**

- 130. Politics of Latin American Economic Development
- 131. Latin American International Relations
- 154A. Government and Politics in Latin America: States of Middle America
- 154B. Government and Politics in Latin America: States of South America

**Sociology**

- 186. Latin American Societies

**Spanish (Spanish and Portuguese)**

- M161. Film and Literature of the Spanish-Speaking World

**Thematic Electives**

**Anthropology**

- 153. Evolution of Human Societies
- \*M154Q. Gender Systems: Global

**Comparative Literature**

- C173. Postmodernism and the Third World

**Economics**

- \*171. Industrial Organizations: Theory and Tactics
- \*191. International Trade Theory
- \*192. International Finance

**Education**

- \*M108. Sociology of Education
- \*C191E. Educational Anthropology

**Environment**

- 122. International Integrated Coastal Management

**Film and Television (Film, Television, and Digital Media)**

- 106C. History of African, Asian, and Latin American Film
- 112. Film and Social Change

**Political Science**

- 118. Political Violence
- \*123A-\*123B. International Law
- \*126. Peace and War
- 137A-137B. International Relations Theory

**Sociology**

- 156. Ethnic and Status Groups
- 157. Social Stratification
- \*183. Comparative and Historical Sociology
- 184. Social Change

**Women's Studies**

- \*M155Q. Women and Social Movements

**World Arts and Cultures**

- 100A. Art as Social Action

**INTERNATIONAL RELATIONS**

*College of Letters and Science*

UCLA

 Box 951472  
 Los Angeles, CA 90095-1472  
 (310) 825-3862  
 fax: (310) 825-0778  
<http://www.polisci.ucla.edu>

**Scope and Objectives**

The undergraduate specialization in International Relations can only be taken jointly with a major in Political Science, and all requirements for the Political Science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in Political Science and specialization in International Relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

## Undergraduate Study

### International Relations Specialization

#### Preparation for the Specialization

*Required:* Political Science 20, 50, and two courses from 10, 30, 40; Anthropology 9; Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A, 1B, and 1C, or any three courses from 8A, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B; Sociology 1.

#### Upper Division Requirements

The Political Science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I or III.

Other required social sciences courses include one course from Anthropology 161, 165, 167, 171, 173Q, 174P, 175R, 175T, 175U, 177, Sociology 182, 183, 186, 187, 188, 189, 190; two courses from Economics 110, 111, 112, 180, 181A, 181B, 190, 191, 192; one course from Geography 110, 121, 125, M128, 133, 140, 181, 182A, 182B, 183, 185, 186, 187; two courses from History 116A, 116B, 117A, 127A, 127B, 142A, 142B, 148C, 152A, 152B, 168.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under African Languages, East Asian Languages and Cultures, Germanic Languages, Italian, Near Eastern Languages and Cultures, and Portuguese. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

#### Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia.

For further information, contact the political science undergraduate counselor in the program office.

Ghislaine E. Lydon, Ph.D., *in Residence* (*History*)  
Steven D. Nelson, Ph.D. (*Art History*)

### Scope and Objectives

The interdepartmental degree program in Islamic Studies provides opportunities for study of the major languages, literatures, history, culture, and religious traditions of the populations of regions where Islamic-influenced civilizations have had, or continue to have, the greatest impact. Linguistics skills, historical knowledge, and cultural understanding are the foundation on which the disciplinary paradigms and methodologies of both the social sciences and humanities can be applied. Within this broad framework, students are encouraged to construct individualized curricula that will prepare them to carry out cutting-edge dissertation research leading to the Ph.D.

The program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an aca-

dem career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

The undergraduate major in this discipline is called Middle Eastern and North African Studies. For details, see the program by that name later in this section.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

#### Graduate Degrees

The Islamic Studies Program offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Islamic Studies. A concurrent degree program (Islamic Studies M.A./Public Health M.P.H.) is also offered.

## Islamic Studies

### Graduate Course

**200. Introduction to Islamic Studies. (4)** Seminar, three hours. Introduction to various disciplines and methods employed in study of Islamic histories, cultures, and societies, with special emphasis on methodologies and current theories and how they may be used and combined by Islamic studies students. Content varies each year. Letter grading.

### Course List

#### Anthropology

130. Study of Culture  
150. Study of Social Systems  
M154P. Gender Systems: North American  
M154Q. Gender Systems: Global  
156. Comparative Religion  
161. Development Anthropology  
167. Urban Anthropology  
215. Field Training in Archaeology  
230Q. Theories of Culture  
273. Cultures of the Middle East

#### Arabic (Near Eastern Languages)

102A-102B-102C. Intermediate Standard Arabic  
111A-111B-111C. Elementary Spoken Egyptian Arabic  
112A-112B-112C. Advanced Spoken Egyptian Arabic  
120. Islamic Texts  
130. Classical Arabic Texts  
132. Philosophical and Kalam Texts  
141. Modern Arabic Literature  
150. Classical Arabic Literature in English

199. Special Studies in Arabic  
 220. Seminar: Islamic Texts  
 240. Seminar: Arab Historians and Geographers  
 250. Seminar: Classical Arabic Literature  
 596. Directed Individual Study  
 597. Examination Preparation  
 599. Ph.D. Dissertation Research and Preparation

**Archaeology**

259. Fieldwork in Archaeology  
 596. Individual Studies for Graduate Students  
 597. Preparation for Ph.D. Qualifying Examinations

**Art History**

- 104A. Western Islamic Art  
 104B. Eastern Islamic Art  
 C104C. Problems in Islamic Art  
 105E. Byzantine Art  
 213. Advanced Studies in Islamic Art  
 C214. Problems in Islamic Art

**Ethnomusicology**

147. Survey of Classical Music in India  
 191N. Music of the Near East  
 240. Music of Arabic-Speaking Near East  
 241. Music of Iran and Other Non-Arabic-Speaking Communities  
 248. Classical Music of India

**French (French and Francophone Studies)**

- 121A. Contemporary Francophone Literature: Francophone African Literature  
 257A-257B. Studies in French-African Literature

**Geography**

187. Middle East

**History**

- 106A-106B-106C. Survey of the Middle East from 500 to the Present  
 107. Premodern Islam  
 108. History of Islamic Iberia  
 109. History of North Africa from Islamic Conquest  
 114. Topics in Middle Eastern History  
 123A-123B. Byzantine History  
 188B-188C. History of British India I, II  
 190A-190B. History of Southeast Asia  
 216A-216B. Seminars: Byzantine History  
 596. Directed Studies  
 597. Directed Studies for Graduate Examinations  
 599. Ph.D. Research and Writing

**Iranian (Near Eastern Languages)**

- 102A-102B-102C. Intermediate Persian  
 103A-103B-103C. Advanced Persian  
 140. Persian Belles Lettres (Adabiyât)  
 141. Persian Analytical Prose  
 150A-150B. Survey of Persian Literature in English  
 190A-190B. Introduction to Modern Iranian Studies  
 199. Special Studies in Iranian

 Elissa Togozi, Ph.D.

**Adjunct Assistant Professor**

Marco Codebo, Dottore in Lettere

## Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature and Comparative Literature.

## Undergraduate Study

### Italian B.A.

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is requisite to most upper division literature courses credited toward the major in Italian. The uniqueness of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46.

### Transfer Students

To be admitted as Italian majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and one Italian civilization or culture course.

### The Major

*Required:* Thirteen upper division Italian courses, including 100, 103A, 103B, 113, 114A or 114B, 116A or 116B; one course from 118 or 119; one course from 120 or 121; four courses from 114A through 197; 190. One upper division elective course in a field relevant to Italian studies from outside the department may be substituted with consent of the undergraduate adviser.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

## Italian and Special Fields B.A.

Students with special interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor.

### Transfer Students

To be admitted as Italian and Special Fields majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of Italian and related courses in civilization, culture, history, linguistics, literature, and closely related languages.

### Anthropology Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and 33.

#### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; five courses from Anthropology 111, 112, M115A, M115B, C115R, 130, 132, 133Q, 135A, 135B, 135C, 135S, 135T, 138, 139, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

### Art History Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Art History 50 or 51, 54, 57.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, C109A, 109C, 110A, 110B, 110F, 127, 150D selected in consultation with the undergraduate adviser.

### Classics Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40 or 41, and Greek 1, 2, 3 or Latin 1, 2, 3, or equivalent.

### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and two courses from 113 through 197 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197 (except 195), and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

### English Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; English Composition 3, English 4W, 10A, 10B, 10C.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; four courses from English 100, M101A through 119, 121, 140A through M197A selected in consultation with the undergraduate adviser.

### Film and Television Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, 46.

#### The Major

*Required:* Italian 100, 103A or 103B, 121, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

### French Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; French 1, 2, 3, 4, 5, 6, 12 or 14.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115A through 142 selected in consultation with the undergraduate adviser.

### History Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; one course from History 1A, 1B, 1C, 88B through 88E, 88Q, 88U.

#### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from History 100, 102, 119M through 121D, 125A through 127B, 132A, 132B, 135A through 137B selected in consultation with the undergraduate adviser.

### Linguistics Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

#### The Major

*Required:* Italian 100, 103A or 103B, 190 or 222A, 195, 222B, and two courses from 113 through 197 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

### Music History Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, Music History 2A, 2B, 26A, 26B, 26C. *Recommended:* Music 20A, 20B, 20C.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; five courses from Music History 126A through 127G, 135A, 135B, 135C, 156 selected in consultation with the undergraduate adviser.

### Philosophy Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 189 selected in consultation with the undergraduate adviser.

### Political Science Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

#### The Major

*Required:* Italian 100, 103A or 103B, 195, and four courses from 113 through 197 selected in consultation with the undergraduate adviser; six courses from Political Science M111A through 113, 116 through 119, 137A, 137B, 139, 153A, 155, 167A selected in consultation with the undergraduate adviser.

### Portuguese Field

#### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

#### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A

through 197 selected in consultation with the undergraduate adviser.

## Spanish Field

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

### The Major

*Required:* Italian 100, 103A or 103B, 190, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Spanish 120A or 120B and three courses from 122 through M161 selected in consultation with the undergraduate adviser.

## Theater Field

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

### The Major

*Required:* Italian 100, 103A or 103B, 122, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, 111B, 111C, Classics 143A, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

## Women's Studies Field

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 6, and one course from 42A, 42B, 46; Women's Studies 10.

### The Major

*Required:* Italian 100, 103A or 103B, M158, 195, and three courses from 113 through 197 selected in consultation with the undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

## Study in Italy

Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advantage of summer language workshops and study programs, including UCLA's own programs in Italy and Los Angeles. For additional information, contact the Education Abroad Program, 1333 Hershey Hall, or the Summer Sessions Office, 1147 Murphy Hall.

## Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requirements: Italian 102A, 102B, 102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses may not fall below A-. Applications should be made during the last term of the junior year.

## Italian Minor

To enter the Italian minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (12 units):* Italian 5, 6, and one course from 42A, 42B, 46, 50A, 50B.

*Required Upper Division Courses (20 units):* Italian 100 and four additional Italian courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Italian offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Italian.

## Italian

### Lower Division Courses

**1. Elementary Italian — Beginning. (4)** Lecture, five hours. P/NP or letter grading.

**1G. Special Reading Course. (4)** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

**2. Elementary Italian — Continued. (4)** Lecture, five hours. Enforced prerequisite: course 1. P/NP or letter grading.

**2G. Special Reading Course. (4)** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

**3. Elementary Italian — Continued. (4)** Lecture, five hours. Enforced prerequisite: course 2. P/NP or letter grading.

**4. Intermediate Italian. (4)** Lecture, five hours. Enforced prerequisite: course 3. P/NP or letter grading.

**5. Intermediate Italian. (4)** Lecture, five hours. Enforced prerequisite: course 4. P/NP or letter grading.

**6. Intermediate Italian. (4)** Lecture, five hours. Enforced prerequisite: course 5. Advanced grammar and composition course with readings from select literary works. P/NP or letter grading.

**8A-8B-8C. Italian Conversation. (2-2-2)** Discussion, three hours. Enforced prerequisite: course 2. Each course may be repeated once for credit. P/NP or letter grading.

**9. Intensive Italian. (12)** (Formerly numbered 1A.) Lecture, 20 hours. Intensive language program equivalent to first year of college Italian (courses 1, 2, 3) and designed to develop basic language skills. Offered in summer only. P/NP or letter grading.

**42A-42B. Italy through the Ages in English. (5-5)** Lecture, three hours; discussion, one hour. P/NP or letter grading. **42A.** Holy Roman Empire to Sack of Rome. Survey of Italy's unique contribution to Western civilization in history, politics, philosophy, arts, and popular culture from time of Charlemagne to High Renaissance. **42B.** Late Renaissance to Postmodern Period. Influence and effects of baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, terrorism, and cinema.

**46. Italian Cinema and Culture in English. (5)** Lecture/screenings, five hours; discussion, one hour. Special topics in Italian culture as reflected and reinforced by the nation's prime artform, stressing aesthetics and ideology of films, contemporary Italian history, and politics. Rotating topics include sex and politics, comedy, integration, family networks, and neorealism. P/NP or letter grading.

**50A-50B. Masterpieces of Italian Literature in English. (5-5)** Lecture, four hours; discussion, one hour. P/NP or letter grading. **50A.** Middle Ages to Baroque. Leading philosophical, religious, and sociopolitical issues in Europe, examined in authors such as St. Francis, Dante, Boccaccio, Petrarca, Lorenzo de' Medici, Machiavelli, Castiglione, Ariosto, and Tasso. **50B.** Enlightenment to Postmodernity. Comparative study of major literary texts and their adaptations into different forms of public spectacle, including theater, opera, and film. Works by Goldoni, Gozzi, Mascagni, Verga, Puccini, Pirandello, Calvino, Ortese, Zavattini, de Sica, and Taviani Brothers. Emphasis on development of ideas of spectacle.

## Upper Division Courses

**100. Composition and Style. (4)** Lecture, three hours. Requisite: course 6. Development of writing techniques and proficiency in composition and style, with emphasis on editing for grammar and style. P/NP or letter grading.

**102A-102B-102C. Italian Cultural Experience in English. (4-4-4)** Lecture, three hours. Study of cultural development of Italy. P/NP or letter grading. **102A.** Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio, Giotto, rise of Italian merchant class. **102B.** Renaissance discovery of human genius; crucial period between Machiavelli and Galileo, leading Italy and Europe to scientific revolution. **102C.** Birth of Italian nation from wars of independence to foundation of modern republic, delineated through narrative and cinema in historical context.

**103A-103B-103C. Introduction to Italian Literature and Literary Analysis. (4-4-4)** Lecture, three hours. Requisite: course 100. Italian literature from 1150 to the present, with emphasis on methods of interpreting literary form and meaning in poetry, drama, epic, and novel. P/NP or letter grading:

**103A.** Knights, Saints, and Lovers. (4) Lecture, three hours. Requisite: course 100. Beginning with generation dominated by St. Francis, love poets of court of Frederick II to three classic writers of Italian literature: Dante, Petrarch, and Boccaccio. Renaissance rediscovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Castiglione. P/NP or letter grading.

**103B.** Power and Beauty. (4) Lecture, three hours. Requisite: course 100. Classics of High Renaissance in theater, epic, and lyric poetry, followed by surprising developments of baroque period, Counter-Reformation, and Enlightenment. Artists and writers include Leonardo da Vinci, Michelangelo, Machiavelli, Ariosto, Tasso, Bruno, and Vico. P/NP or letter grading.

**103C. Romanticism, Politics, and Disillusionment.** (4) Lecture, three hours. Requisite: course 100. Great poetry and dialogues of Giacomo Leopardi; patriotic literature accompanying rise of modern Italian state; futurism, surrealism, neorealism, and postmodernism. Authors may include Foscolo, Manzoni, Verga, Pirandello, Calvino, and Dario Fo. P/NP or letter grading.

**110. Dante, in English.** (4) Lecture, three hours. Close study of one of world's greatest literary geniuses, particularly of his masterpiece, *Divine Comedy*, the archetypal medieval journey through the afterworld. P/NP or letter grading.

**113. Dante's *La Divina Commedia*.** (4) Lecture, three hours. Requisite: course 100. Study of medieval philosophy, religion, and politics in *La Divina Commedia*, greatest literary achievement of the age. P/NP or letter grading.

**114A-114B. Middle Ages.** (4-4) Lecture, three hours. Requisite: course 100. P/NP or letter grading. **114A.** Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, *Dolce Stil Novo* poets, and Petrarca) caught between courtly and religious codes. **114B.** Medieval Humor, Moralism, and Society. Novelty of Boccaccio's witty and comic masterpiece, *Decameron*, analyzed within context of moral and social codes of culture of the time.

**116A-116B. Italian Renaissance.** (4-4) Lecture, three hours. Requisite: course 100. P/NP or letter grading. **116A.** Renewal of Art and Thought. Study of the *Quattrocento* and its representatives in the arts and humanistic thought (i.e., Mantegna, Botticelli, Pico, Valla, and Ficino). **116B.** Power and Imagination in the Renaissance. Study of artistic world of Leonardo, Raffaello, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in world molded by powerful political forces, such as the Roman Papacy and Medici, Gonzaga, and D'Este courts.

**118. Age of Enlightenment.** (4) Lecture, three hours. Requisite: course 100. Study of philosophical and political prose, satiric poetry, and drama, unveiling birth of modern spirit through writings of Vico, Metastasio, Parini, and Alfieri. P/NP or letter grading.

**119. Italian *Ottocento*.** (4) Lecture, three hours. Requisite: course 100. Study of the *Ottocento*, the rich period of Italian history and culture from Romanticism to decadentism when philosophical and political issues affected not only the mind but also the heart. Emergence of unique brand of individualism through poetry and prose writings of Foscolo, Leopardi, Manzoni, Nievo, and Verga. P/NP or letter grading.

**120. Literature in the 20th Century.** (4) Lecture, three hours. Requisite: course 100. Analysis of novel, poetry, and drama of the 20th century in connection with modern thought and culture. Authors may include D'Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.

**121. Literature and Film.** (4) Lecture, three hours; discussion, one hour. Comparative study of specific literary works and their translation into film and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.

**122. Italian Theater.** (4) Lecture, three hours; discussion, one hour. Study of dramatic works from the Renaissance to the present and their theatrical presentation. P/NP or letter grading.

**131. Reading and Reciting.** (4) Lecture, three hours. Preparation: sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

**140. Italian Novella from Boccaccio to Basile.** (4) (Formerly numbered M140.) Lecture, three hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

**150. Modern Fiction in Translation.** (4) Lecture, three hours. Select issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco's *The Name of the Rose*, Pasolini's *The Ragazzi*, Pirandello's *The Late Mattia Pascal*, and Calvino's *The Cosmicomics*. P/NP or letter grading.

**M158. Women in Italian Culture.** (4) (Same as Women's Studies M158.) Lecture, three hours; discussion, one hour. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

**190. History of the Italian Language.** (4) Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

**195. Special Fields Research.** (4) Limited to senior Italian and Special Fields majors. Unscheduled tutorial in which paper (20 to 25 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge. P/NP or letter grading.

**197. Variable Topics in Italian Studies.** (4) Seminar, three hours. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental undergraduate courses. May be repeated for credit. P/NP or letter grading.

**199. Special Studies.** (2 to 4) Course of independent studies for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

## Graduate Courses

**201. Bibliography and Methods of Research.** (4) Lecture, three hours.

**205A-205B. Studies in Criticism.** (4-4) Lecture, three hours. History, theory, and practice of criticism. S/U or letter grading. **205A.** Brief History of Literary Criticism. Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. **205B.** Discussion of Modern Critical Approaches. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

**210. Studies in Early Italian Literature.** (4) Lecture, three hours. Topics include origins of Italian language and study of early texts, *Scuola Siciliana* and early poetry of Central and Northern Italy, and *Dolce Stil Nova*. S/U or letter grading.

**214A-214F. Studies in Medieval Literature.** (4 each) Lecture, three hours. S/U or letter grading:

**214A.** *La Divina Commedia*. (4) Lecture, three hours. S/U or letter grading.

**214B.** Dante's Other Works. (4) Lecture, three hours. S/U or letter grading.

**214C.** Petrarca's *Canzoniere*. (4) Lecture, three hours. S/U or letter grading.

**214D.** Boccaccio's *Decameron*. (4) Lecture, three hours. S/U or letter grading.

**214E.** Boccaccio's Other Works. (4) Lecture, three hours. S/U or letter grading.

**214F.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of medieval literature, with coverage of authors such as St. Francis of Assisi or Jacopone de Todi. S/U or letter grading.

**215A-215B. Studies in 15th-Century Literature.** (4-4) Lecture, three hours. S/U or letter grading. **215A.** Variable Topics. Variable-content seminar on themes and issues of 15th-century literature, with coverage of authors such as Pulci or Poliziano. **215B.** Age of Lorenzo de' Medici and Poliziano.

**216A-216E. Studies in the Renaissance.** (4 each) Lecture, three hours. S/U or letter grading:

**216A.** Machiavelli and Renaissance Political Thought. (4) Lecture, three hours. S/U or letter grading.

**216B.** Ariosto and Renaissance Epic. (4) Lecture, three hours. S/U or letter grading.

**216C.** Tasso. (4) Lecture, three hours. S/U or letter grading.

**216D.** Renaissance Theater. (4) Lecture, three hours. S/U or letter grading.

**216E.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto. S/U or letter grading.

**217. Studies in 17th-Century Literature.** (4) Lecture, three hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Battista Marino, and baroque poetry. S/U or letter grading.

**218A-218D. Studies in 18th-Century Literature.** (4 each) Lecture, three hours. S/U or letter grading:

**218A.** Vico. (4) Lecture, three hours. S/U or letter grading.

**218B.** Alfieri. (4) Lecture, three hours. S/U or letter grading.

**218C.** Goldoni. (4) Lecture, three hours. S/U or letter grading.

**218D.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico. S/U or letter grading.

**219A-219D. Studies in 19th-Century Literature.** (4 each) Lecture, three hours. S/U or letter grading:

**219A.** Foscolo. (4) Lecture, three hours. S/U or letter grading.

**219B.** Leopardi. (4) Lecture, three hours. S/U or letter grading.

**219C.** Manzoni. (4) Lecture, three hours. S/U or letter grading.

**219D.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaseo, or Nievo. S/U or letter grading.

**220. Studies in Turn-of-the-Century Literature.** (4) Lecture, three hours. Topics include Verga and *Verismo*, poetry, prose, and theater of D'Annunzio, and poetry of Carducci and Pascoli. S/U or letter grading.

**221A-221E. Studies in 20th-Century Literature.** (4 each) Lecture, three hours. S/U or letter grading:

**221A.** Variable Topics. (4) Lecture, three hours. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D'Annunzio, Verga, Marinetti, and Pirandello. S/U or letter grading.

**221B.** Contemporary Poetry. (4) Lecture, three hours. Analysis of legacy of two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s. S/U or letter grading.

**221C.** 20th-Century Narrative to World War II. (4) Lecture, three hours. Assessment of turn-of-the-century narrative pattern (Gabriele D'Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marinetti, etc. S/U or letter grading.

**221D.** 20th-Century Narrative since World War II. (4) Lecture, three hours. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the neo-avant-garde. S/U or letter grading.

**221E.** Pirandello and Contemporary Theater. (4) Lecture, three hours. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Strehler, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance. S/U or letter grading.

**M222A-M222B. Comparative Romance Historical Grammar. (4-4)** (Same as Romance Linguistics M202A-M202B.) Lecture, three hours. Each course may be taken independently for credit. S/U or letter grading. **M222A.** Phonology. Principal sound changes from late Latin to main Romance dialects. **M222B.** Morphology and Syntax. Prime morpho-syntactic changes occurring between late Latin and main Romance dialects.

**223. Structures of Modern Italian. (4)** (Formerly numbered 222B.) Lecture, three hours. Descriptive analysis of basic features of standard Italian from synchronic, typologic vantage. Topical emphasis may vary annually, but core progression departs from phonology (e.g., syllable types, prosodic patterns, phrasal phonetics), moves through morphologic constituents, passing to sentence sequences (coordination, ellipses, etc.). S/U or letter grading.

**224. Italo-Romance Dialectology. (4)** (Formerly numbered 222C.) Lecture, three hours. Differentiation of late spoken Latin into myriad varieties spoken in Italy. Attention to discrete language types (e.g., Sardinian, Ladin, Friulan, and Franco-Provençal). Consideration of present-day sociolinguistic pressures. S/U or letter grading.

**225. Cultural History of Italian Language. (4)** (Formerly numbered 222A.) Lecture, three hours. Historical survey of development of Italian language from medieval times to unification of the country in 1861. *Questione della lingua*, general acceptance of Florentine speech, and its evolution into the national language. S/U or letter grading.

**230A-230B. Folk Tradition in Italian Literature. (4-4)** (Formerly numbered M230A-M230B.) Lecture, two hours.

**250A-250D. Seminars: Dante. (4 each)** Seminar, three hours.

**251. Seminar: Petrarch. (4)** Seminar, three hours.

**252. Seminar: Boccaccio. (4)** Seminar, three hours.

**253A-253B-253C. Seminars: Chivalric Poetry in Italy. (4-4-4)** Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso.

**254. Seminar: Machiavelli. (4)** Seminar, three hours.

**255A-255B. Seminars: Baroque. (4-4)** Seminar, three hours.

**256A-256B. Seminars: 18th Century. (4-4)** Seminar, three hours.

**257A-257B. Seminars: Romanticism. (4-4)** Seminar, three hours.

**258A-258B. Seminars: Contemporary Italian Literature. (4-4)** Seminar, three hours.

**260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature. (4)** (Formerly numbered M260A.) Lecture, three hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

**260B. Women in Italian Culture. (4)** Lecture, three hours. Designed for graduate students. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

**260C. Studies in Italian Cinema. (4)** Lecture, three hours. Designed for graduate students. Italian cinema compared with other European countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

**M270. Seminar: Literary Theory. (5)** (Same as Comparative Literature M294, East Asian Languages M251, English M270, French M270, German M270, Scandinavian M270, and Spanish M294.) Seminar, three hours. Advanced interdisciplinary seminar to explore philosophical, historical, and critical foundations of literary theory as well as current issues in literary and cultural studies. S/U or letter grading.

**298. Variable Topics in Italian Studies. (4)** Lecture, three hours; discussion, one hour. Designed for graduate students. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

**M299. Research Resources for European Studies. (2)** (Same as French M299, German M299, Information Studies M299, Slavic M299, and Spanish M299.) Lecture, two hours. Essentials of library research strategy and effective searching in key print and online resources for European and Russian studies. Through combination of lecture, online demonstration, and hands-on activities in and outside class, students understand how to efficiently use library and databases. S/U grading.

**370. Problems and Methods in Teaching Italian. (4)** Lecture, two hours.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A-495B-495C. Teaching Italian at College Level. (2 to 4 each)** Seminar, to be arranged. S/U grading. **495A.** Study methods in preparation for teaching Italian at college level, with emphasis on teaching proficiency-oriented instruction. May not be applied toward M.A. course requirements. **495B.** Continuation of course 495A; study of contemporary issues in Italian language pedagogy. **495C.** Effective uses of technology in foreign language classroom. Project-based seminar in which students develop materials for classroom instruction as well as an electronic teaching portfolio.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies. (2 to 12)** May be repeated twice for credit. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** S/U grading.

**599. Ph.D. Research and Writing. (2 to 12)** May be repeated. S/U grading.

## Scope and Objectives

The Labor and Workplace Studies minor offers an opportunity to learn about the workplace and the social, political, and economic forces that influence it. The program emphasizes the institutions of the labor market, public policy, employment relations, unions, and working class movements. It also explores issues of race, class, and gender in the workplace. The interdisciplinary approach gives students exposure to disciplines in addition to their own majors; students should plan to take courses from multiple departments, as disciplinary breadth is encouraged.

The program is intended for students who wish to gain in-depth understanding of aspects of the broad array of issues related to labor and the workplace. Students are encouraged to

plan, with the faculty adviser and student affairs counselor, either a coherent integration of courses according to some thematic or sub-topical investigation or, alternatively, a comprehensive survey of some of the main issues involved in the study of the workplace. The program prepares students for a wide variety of careers, including but not limited to, labor relations, human resource management, business, law, domestic and international government work, and economic forecasting.

## Undergraduate Study

### Labor and Workplace Studies Minor

The Labor and Workplace Studies minor augments study in a traditional field. Students are required to complete both a departmental major and this minor. The faculty adviser certifies completion of the program.

To enter the minor, students must be in good academic standing (2.0 grade-point average or better), have completed 45 units, and file a petition and meet with the student affairs counselor at the UCLA Institute of Industrial Relations, 2405 Hershey Hall, (310) 267-4351. Students are encouraged to meet early with the student affairs counselor to declare the minor and design a coherent program of coursework.

*Required Courses (28 units minimum):* Seven courses, with no more than two lower division courses, selected from Chicana and Chicano Studies 127, 128, Economics 151, 152, M158, General Education Clusters 24A, 24B, 24CW, History 155A, 155B, Management 98B, 98D, 197, Policy Studies 141, C142, C144, 145, Political Science 116, 142C, Psychology M137E, Sociology 157, M163, 171, 173, Women's Studies M123, M137E, M163. Students may petition, prior to enrollment in the course, to apply other topical courses with substantial labor and workplace studies content.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in any other department or program. No more than three of the upper division courses may be taken from any one department.

All minor courses must be taken for a letter grade, with a minimum grade of C (2.0) in each and an overall C average. Successful completion of the minor is indicated on the transcript and diploma.

 Susan C. Schaffer, Ph.D. (*Spanish and Portuguese*)

#### Adjunct Assistant Professors

Liliana De León Torsiello, M.A. (*World Arts and Cultures*)  
 Bonnie Taub, Ph.D. (*Community Health Sciences*)

## Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Education and Information Studies, Management, Public Health, and Public Policy and Social Research provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

## Undergraduate Study

### Latin American Studies B.A.

Undergraduate studies of the Latin American region are designed to serve the needs of students (1) desiring a general education focused on the Latin American cultural region, (2) planning to enter business, government, or international agency service, (3) preparing to teach social sciences or language, and (4) preparing for advanced academic study of Latin America.

Students must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

#### Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, students may take Portuguese 102A and 102B which are designed for those with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

#### Transfer Students

To be admitted as Latin American Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: advanced Spanish and one year of elementary Portuguese, or advanced Portuguese and intermediate Spanish, two Latin American history courses, and additional coursework in the area of concentration.

#### Course Limitations

Students may not take more than 8 units of Latin American Studies 199 for letter-grade credit nor more than 8 units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall grade-point average of 3.0, or senior standing.

#### Double Majors

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., Latin American Studies and History). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the student affairs counselor in Latin American Studies.

#### Study in Latin America

Students are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. For information on studying in Mexico, Costa Rica, Chile, or Brazil, contact the Education Abroad Program, 1105 Hershey Hall, (310) 794-9820.

#### Core Areas for the Major

Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

## Core I: Arts and Humanities

#### Preparation

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55B or Ethnomusicology 91K and World Arts and Cultures 6 or 8.

#### Core Area

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list within the arts and humanities core area may be applied toward the core concentration
2. *Theory and Methods:* One course from theory and methods within the core concentration field
3. *Internal Breadth:* Four additional courses from the arts and humanities core area but outside the core concentration field. No more than two of these may be electives

#### External Breadth

*Required:* From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

#### Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

#### (1) Literature and Folklore Field

##### History

169. Latin American Elitlore

##### Portuguese (Spanish and Portuguese)

130A-130B. Brazilian Literature and Identity: Introduction

C132. 19th-Century Brazilian Literature and Culture

C133. Machado de Assis

C134. Brazilian Modernism

C135. 20th-Century Brazilian Literature

141. Brazilian Film and Literature

##### Spanish (Spanish and Portuguese)

120A-120D. Literature in the Hispanic World

137. Literature of Colonial Spanish America

139. Romanticism and Realism in Spanish-American Literature

140. *Modernismo*

142. 20th-Century Spanish-American Literature: Fiction and the Essay

143. 20th-Century Spanish-American Literature: Poetry and Drama  
 144. Mexican Literature  
 149. Folk Literature of the Hispanic World  
 151B. Women in Hispanic Literature: Spanish America  
 M161. Film and Literature of the Spanish-Speaking World  
 170. Senior Honors Tutorial  
 197A. Studies in Hispanic Culture and Civilization

### Theory and Methods

#### Portuguese (Spanish and Portuguese)

199. Special Studies

#### Spanish (Spanish and Portuguese)

- \*119A. Introduction to Study of Literature: Prose  
 \*119B. Introduction to Study of Literature: Poetry  
 \*119C. Introduction to Study of Literature: Drama  
 199. Special Studies

#### World Arts and Cultures

122. Introduction to Folklore

### (2) Fine Arts Field

#### Art History

- \*110F. Selected Topics in Modern Art: Latin America  
 \*110G. Art and Politics in the Contemporary Americas: Latin America  
 \*C110H. Latin American Art of the 20th Century  
 C117A. Pre-Columbian Art of Mexico  
 C117B. Pre-Columbian Art of the Maya  
 C117C. Pre-Columbian Art of the Andes  
 C117D. Aztec Art  
 118A. Arts of Oceania

#### Ethnomusicology

107. South American Indian Music  
 M108A-108B. Music of Latin America  
 113. Music of Brazil  
 M115. Musical Aesthetics in Los Angeles  
 M131. Development of Latin Jazz  
 191K. Advanced Music of Mexico

#### Film and Television (Film, Television, and Digital Media)

- 106C. History of African, Asian, and Latin American Film

#### World Arts and Cultures

- 108B. Dance in Latin American Cultures  
 120. Selected Topics in Cultural Studies: Latin America  
 M125A, M125B, M125C. Beyond the Mexican Mural  
 C139. Afro-Caribbean Ritual Arts: Vodou and Sante-ria  
 \*CM140. Women Healers, Ritual, and Transformation: Latin America

### Theory and Methods

#### Art History

- \*199. Special Studies in Art

#### Ethnomusicology

- \*180. Analysis of Traditional Music  
 \*190. Study of Ethnomusicology  
 \*199E. Special Studies in Ethnomusicology

#### Film and Television (Film, Television, and Digital Media)

199. Special Studies in Film and Television

#### World Arts and Cultures

- \*199. Special Studies in World Arts and Cultures

### (3) Linguistics Field

#### Portuguese (Spanish and Portuguese)

- 100A. Phonology and Morphology  
 \*100B. Syntax

- \*M118A. History of Portuguese and Spanish: Phonology  
 \*M118B. History of Portuguese and Spanish: Morphology and Syntax

#### Spanish (Spanish and Portuguese)

- \*100A. Introduction to Study of Spanish Grammar: Phonology and Morphology  
 \*100B. Introduction to Study of Spanish Grammar: Syntax  
 \*115. Applied Linguistics  
 \*M118A. History of Portuguese and Spanish: Phonology  
 \*M118B. History of Portuguese and Spanish: Morphology and Syntax  
 \*119A. Introduction to Study of Literature: Prose  
 \*119B. Introduction to Study of Literature: Poetry  
 \*119C. Introduction to Study of Literature: Drama  
 \*170. Senior Honors Tutorial

### Theory and Methods

#### Linguistics

- \*103. Introduction to General Phonetics  
 \*110. Introduction to Historical Linguistics  
 \*120A. Phonology I  
 \*120B. Syntax I  
 M146. Language in Culture  
 \*165A. Phonology II  
 \*165B. Syntax II  
 \*170. Language and Society: Introduction to Sociolinguistics  
 \*199. Special Studies in Linguistics

#### Portuguese (Spanish and Portuguese)

- \*199. Special Studies

#### Spanish (Spanish and Portuguese)

- \*199. Special Studies

### (4) Arts and Humanities Electives

#### Ethnomusicology

- \*M110A-M110B. African American Musical Heritage

#### Film and Television (Film, Television, and Digital Media)

112. Film and Social Change

#### Latin American Studies

197. Interdisciplinary Topics in Latin American Studies  
 199. Special Studies in Latin American Studies

#### Theater

- M103C. Origins and Evolution of Chicano Theater

#### World Arts and Cultures

- \*131. Folk Art and Aesthetics

### Core II: Social Sciences

#### Preparation

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Sociology M18 or Statistics 10.

#### Core Area

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list within the social sciences core area may be applied toward the core concentration

2. *Theory and Methods:* One course from theory and methods within the core concentration field
3. *Internal Breadth:* Four additional courses from the social sciences core area but outside the core concentration field. No more than two of these may be electives

### External Breadth

*Required:* From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

### Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

### (1) Anthropology and Sociology Field

#### Anthropology

- 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)  
 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)  
 114R. Ancient Civilizations of Andean South America  
 173Q. Latin American Communities  
 174P. Ethnography of South American Indians

#### Sociology

186. Latin American Societies

### Theory and Methods

#### Anthropology

- C114S. Comparative Study of Ancient States: Latin America  
 \*115P. Archaeological Field Training  
 \*C115R. Strategy of Archaeology  
 \*136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques  
 \*138. Methods and Techniques of Ethnohistory  
 \*139. Field Methods in Cultural Anthropology  
 M140. Language in Culture  
 \*180. Quantitative Methods in Anthropology  
 \*M186. Models and Modeling in Anthropology  
 \*199. Special Studies in Anthropology

#### Sociology

- \*104. Introduction to Sociological Research Methods  
 \*C112. Introduction to Mathematical Sociology  
 \*199. Special Studies

### (2) Economics Field

#### Economics

- \*110. Economic Problems of Underdeveloped Countries  
 \*111. Theories of Economic Growth and Development  
 \*112. Policies for Economic Development  
 \*190. International Economics  
 \*191. International Trade Theory  
 \*192. International Finance

**Theory and Methods****Economics**

- \*M135. Economic Models of Public Choice
- \*188C-188Z. Upper Division Research Seminars: Applications of Economic Theory
- \*199. Special Studies in Economics

**Management**

- \*197. Special Topics in Management

**(3) History Field****History**

- 165A. Early Latin America
- 165C. Indians of Colonial Mexico
- 166. Latin America in the 19th Century
- 167A-167D. Latin America in the 20th Century
- 168. History of Latin American International Relations
- 169. Latin American Elitology
- 170A. Latin American Cultural History
- 170B. Classic Travel Accounts of Latin America since 1735
- 170C. Issues in Latin American History
- 171. Mexican Revolution since 1910
- 172. History of Argentina
- 173. Modern Brazil
- 174. Brazil and Atlantic World, 1500 to 1822
- 197E. Undergraduate Seminar: Latin America

**Theory and Methods****History**

- 197E. Undergraduate Seminar: Latin America
- \*199. Special Studies in History

**Information Studies**

- M111C. Ethnic Groups and Their Bibliographies: Latino History and Culture

**(4) Political Science Field****Political Science**

- 130. Politics of Latin American Economic Development
- 131. Latin American International Relations
- \*139. Special Studies in International Relations: Latin America
- \*149. Special Topics in American Government and Politics
- 154A-154B. Government and Politics in Latin America
- \*169. Special Studies in Comparative Politics: Latin America
- 199. Readings in Political Science: Latin America

**Theory and Methods****Political Science**

- \*102. Statistical Analysis of Political Data
- \*104A-104B. Introduction to Survey Research
- \*M105. Economic Models of Public Choice
- \*113. Problems in 20th-Century Political Theory
- \*119. Special Studies in Political Theory
- \*137A-137B. International Relations Theory
- \*168. Comparative Political Analysis

**(5) Geography Field****Geography**

- 121. Conservation of Resources: Underdeveloped World
- \*126. Geography of Extinction
- \*M128. Global Environment and Development: Problems and Issues
- 133. Cultural Geography of the Modern World
- \*142. Population Geography
- 181. Mexico, Central America, Caribbean
- 182A. Spanish South America
- 182B. Brazil
- \*199. Special Studies

**Theory and Methods****Geography**

- \*M171. Introduction to Spatial Statistics

**(6) Social Sciences Electives****Anthropology**

- \*153. Evolution of Human Societies
- \*M154Q. Gender Systems: Global
- \*161. Development Anthropology
- \*167. Urban Anthropology
- \*M168. Culture, Illness, and Healing

**Chicana and Chicano Studies**

- \*142. Mesoamerican Literatures
- \*169. Representations of Indigenous Peoples in the Americas

**Economics**

- \*120. Introduction to Urban and Regional Economics
- \*180. Comparative Systems: Transformation of Socialist Economies

**Geography**

- \*108. World Vegetation
- \*111. Forest Ecosystems
- \*M115. Environmentalism: Past, Present, and Future
- \*129. Seminar: Environmental Studies
- \*140. Political Geography

**History**

- M159A, M159B. History of the Chicano Peoples

**Latin American Studies**

- 197. Interdisciplinary Topics in Latin American Studies
- 199. Special Studies in Latin American Studies

**Political Science**

- \*M122B. Global Environment and World Politics
- \*124. International Political Economy
- 144A. Ethnic Politics: Chicano/Latino Politics
- \*167A. Ideology and Development in World Politics
- \*167B. Comparative Development and Administration
- \*168. Comparative Political Analysis

**Sociology**

- \*116. Social Demography
- \*154. Race and Ethnicity: International Perspectives
- \*157. Social Stratification
- \*182. Political Sociology
- 184. Social Change

**Core III: Ecology and Environment****Preparation**

*Required:* Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 10.

**Core Area**

*Required:* Ten upper division courses from the approved list of Latin American courses distributed as follows:

1. *Core Concentration:* Five courses as listed below in geography. Only one course from the electives list within the ecology and environment core area may be applied toward the core concentration
2. *Theory and Methods:* One course from theory and methods within the core concentration field
3. *Internal Breadth:* Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives

**External Breadth**

*Required:* From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in social sciences (e.g., history). The two additional courses required may be from either arts and humanities or social sciences. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

**Community Health Sciences**

- 132. Health, Disease, and Health Services in Latin America

**Geography**

- 121. Conservation of Resources: Underdeveloped World
- \*M128. Global Environment and Development: Problems and Issues
- 133. Cultural Geography of the Modern World
- \*142. Population Geography
- 181. Mexico, Central America, Caribbean
- 182A. Spanish South America
- 182B. Brazil
- \*199. Special Studies

**Theory and Methods****Anthropology**

- \*180. Quantitative Methods in Anthropology
- \*M186. Models and Modeling in Anthropology

**Geography**

- \*M171. Introduction to Spatial Statistics

**Electives****Anthropology**

- \*153. Evolution of Human Societies
- \*167. Urban Anthropology
- M168. Culture, Illness, and Healing

**Community Health Sciences**

- \*130. Nutrition and Health

**Economics**

- \*120. Introduction to Urban and Regional Economics

**Geography**

- \*108. World Vegetation
- \*111. Forest Ecosystems
- \*M115. Environmentalism: Past, Present, and Future
- \*126. Geography of Extinction
- \*M128. Global Environment and Development: Problems and Issues
- \*129. Seminar: Environmental Studies
- \*132. Food, Environment, and Agriculture
- \*140. Political Geography

**Latin American Studies**

- 197. Interdisciplinary Topics in Latin American Studies
- 199. Special Studies in Latin American Studies

**Sociology**

- \*116. Social Demography

## Latin American Studies Minor

The interdisciplinary program leading to the Latin American Studies minor allows students to choose from a broad range of course offerings in various departments to develop professional and methodological skills with area expertise.

To enter the minor, students must have an overall grade-point average of 2.0 or better and have completed 45 units. For further information, contact Carolyn Ramirez-La Faso at (310) 206-6571.

*Required Lower Division Courses (8 units):* History 8A or 8B or 8C or Latin American Studies 99, Spanish 25 or Portuguese 25.

*Required Upper Division Courses (20 units):* Five courses selected from the approved list of Latin American studies courses in at least two of the following fields: (1) arts and humanities (art history, ethnomusicology, folklore, Spanish and Portuguese), (2) ecology and environment (geography, public health), (3) social sciences (anthropology, economics, history, political science, sociology). If the social sciences field is selected, at least two courses must be taken in that field. No more than 4 units of course 199 may be applied toward the minor, and at least three upper division courses (12 units) must be taken in residence at UCLA.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Latin American Studies Program offers the Master of Arts (M.A.) degree in Latin American Studies.

Three articulated degree programs (Latin American Studies M.A./Education M.Ed., Latin American Studies M.A./Library and Information Science M.L.I.S., and Latin American Studies M.A./Public Health M.P.H.) and two concurrent degree programs (Latin American Studies M.A./Management M.B.A. and Latin American Studies M.A./Urban Planning M.A.) are also offered.

## Latin American Studies

### Lower Division Course

**99. Introduction to Latin American Problems. (4)** Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

### Upper Division Courses

**197. Interdisciplinary Topics in Latin American Studies. (4)** Lecture, two hours; discussion, two hours. Advanced interdisciplinary course for juniors/seniors. May be repeated for credit with topic change. P/NP or letter grading.

**199. Special Studies in Latin American Studies. (4 or 8)** Limited to juniors/seniors. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

### Graduate Courses

**M200. Latin American Research Resources. (4)** (Same as History M265 and Information Studies M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**205. Latin Americanist Scholarship. (4)** Lecture, three hours. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

**M250A. Indians of South America. (4)** (Same as Anthropology M272.) Lecture, three hours. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

**250B. Interdisciplinary Seminar: Latin American Studies. (4)** Seminar, three hours. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

**250C. Interdisciplinary Topics in Latin American Studies. (4)** Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

**M260. Health and Culture in the Americas. (4)** (Same as Anthropology M266 and Community Health Sciences M260.) Lecture, three hours; discussion, one hour. Preparation: bilingual skills (English/Spanish) for Spanish discussion section. Recommended requisite: Community Health Sciences 132. Health issues throughout the Americas, especially indigenous/Mestizo Latin American populations. Holistic approach covering politics, economics, history, geography, human rights, maternal/child health, culture. Letter grading.

**M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness. (4)** (Same as Anthropology M264 and Community Health Sciences M264.) Lecture, three hours. Recommended preparation: Community Health Sciences 132, bilingual English/Spanish skills. Examination of role of traditional medicine and shamanism in Latin America and exploration of how indigenous and mestizo groups diagnose and treat folk illness and Western-defined diseases with a variety of health-seeking methods. Examination of art, music, and ritual and case examples of religion and healing practices via lecture, film, and audiotape. Letter grading.

**M268A-M268B. Seminars: Recent Latin American History. (4)** (Same as History M268A-M268B.) Seminar, three hours. Course M268A is requisite to M268B. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. S/U or letter grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. May be repeated, but only 4 units may be applied toward the minimum graduate course requirement. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination. (4)** Tutorial, to be arranged. Ordinarily taken only during term in which student is being examined. S/U grading.

**598. Research for and Preparation of M.A. Thesis. (4)** Tutorial, to be arranged. Only 4 units may be applied toward minimum graduate course requirement. S/U grading.

## Course List

### Approved Graduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

### Fine Arts

#### Art History

- \*201. Topics in Historiography of Art History
- C218A. Pre-Columbian Art of Mexico
- C218B. Pre-Columbian Art of the Maya
- C218C. Pre-Columbian Art of the Andes
- C218D. Aztec Art
- 219B. Pre-Columbian Art
- 220. Oceanic, Pre-Columbian, African, and Native North American Art
- C254. Latin American Art of the 20th Century
- 596. Directed Individual Study or Research

#### Ethnomusicology

- 201. History of Ethnomusicology
- 208. Seminar: Latin American Music
- \*290. Seminar: Ethnomusicology
- 596. Directed Individual Studies

#### Film and Television (Film, Television, and Digital Media)

- 276. Seminar: Non-Western Films — Mexican Cinema
- \*298A-298B. Special Studies in Film and Television

#### Theater

- \*210. Topics in World Theater and Drama

#### World Arts and Cultures

- \*281A-281B. Advanced Studies in Dance Ethnology

## Languages

### Indigenous Languages of the Americas (Linguistics)

- \*18A-18B-18C. Elementary Quechua
- Portuguese (Spanish and Portuguese)**

- \*1. Elementary Portuguese
- 2. Elementary Portuguese
- 3. Intermediate Portuguese

- 25. Advanced Portuguese
- 102A-102B. Intensive Portuguese

- \*105. Advanced Composition and Style

**Spanish (Spanish and Portuguese)**

- \*1. Elementary Spanish
- \*1G. Reading Course for Graduate Students
- 2. Elementary Spanish
- 2G. Reading Course for Graduate Students
- 3. Elementary Spanish
- 4. Intermediate Spanish
- 5. Intermediate Spanish
- 25. Advanced Spanish and Composition
- \*105. Spanish Composition

**Linguistics****Anthropology**

- 204. Core Seminar: Linguistic Anthropology

**Linguistics**

- \*210A. Field Methods I
- \*210B. Field Methods II
- \*220. Linguistic Areas
- \*225. Linguistic Structures
- M246C. Topics in Linguistic Anthropology

**Portuguese (Spanish and Portuguese)**

- \*202. Synchronic Morphology and Phonology
- \*204A-204B. Generative Grammar
- \*M205A-M205B. Development of Portuguese and Spanish Languages

**Spanish (Spanish and Portuguese)**

- \*202A. Phonology
- \*202B. Morphology
- \*204A-204B. Generative Syntax and Semantics
- \*M205A-M205B. Development of Portuguese and Spanish Languages
- \*209. Dialectology
- \*256A-256B. Studies in Spanish Linguistics
- \*257. Studies in Dialectology

**Literature****Portuguese (Spanish and Portuguese)**

- C231. Colonial Brazilian Literature and Culture
- C232. 19th-Century Brazilian Literature and Culture
- C233. Machado de Assis
- C234. Brazilian Modernism
- C235. 20th-Century Brazilian Literature
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 254. Studies in Early Brazilian Literature
- 255. Studies in Modern Brazilian Literature

**Spanish (Spanish and Portuguese)**

- 237. Literature of the Spanish Conquest
- 238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature
- 239. Romanticism and Realism in Spanish-American Literature
- 240. Major Currents in Modern Spanish-American Literature
- 241A-241B. Contemporary Spanish-American Short Story
- 243A-243B. Contemporary Spanish-American Poetry
- 244A-244B. Contemporary Spanish-American Novel
- 245. Contemporary Spanish-American Essay
- 246. Contemporary Spanish-American Drama
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 277A-277B. Studies in Colonial Spanish-American Literature
- 278A-278B. Studies in 19th-Century Spanish-American Literature
- 280A-280B. Studies in Contemporary Spanish-American Literature
- \*286A-286B. Studies in Hispanic Folk Literature
- 290. Special Topics: Latin American Literature

**Professional****Community Health Sciences**

- 200. Global Health Problems
- 210. Community Health Sciences
- M216. Qualitative Research Methodology
- \*231. Maternal and Child Nutrition
- M232. Determinants of Health
- M239. Race and Ethnicity as a Concept in Practice and Research
- M260. Health and Culture in the Americas
- M264. Latin America: Traditional Medicine, Shamanism, and Folk Illness
- 282. Communication in Health Promotion and Education

**Education**

- \*C203. Educational Anthropology
- \*204B. Introduction to Comparative Education
- \*204C. Education and National Development
- 204D. Minority Education in Cross-Cultural Perspective
- 204E. International Efforts in Education
- 204F. Nonformal Education in Comparative Perspective
- \*C207. Politics of Education
- 229. Seminar: Special Topics in Urban Schooling
- \*238. Cross-National Analysis of Higher Education
- \*252B. Seminar: Education and Social Change
- \*253A. Seminar: Current Problems in Comparative Education
- 253D. Seminar: Latin American Education
- \*253F. Seminar: Education in Revolutionary Societies
- \*253H. Seminar: The Chicano/Hispanic and Education
- 262F. Seminar: Research Topics in Bilingual/Multicultural Education
- \*596. Directed Independent Study

**Engineering**

## Scope and Objectives

The School of Law, one of two academic units at UCLA that operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles that are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

## Professional Study

The School of Law offers the Juris Doctor (J.D.), Doctor of Juridical Science (S.J.D.), and Master of Laws (LL.M.) degrees.

Eight concurrent degree programs (Law J.D./ Afro-American Studies M.A., Law J.D./ American Indian Studies M.A., Law J.D./ Education M.Ed, M.A., Ed.D., or Ph.D., Law J.D./ Management M.B.A., Law J.D./ Public Policy M.P.P., Law J.D./ Public Health M.P.H., Law J.D./ Social Welfare M.S.W., and Law J.D./ Urban Planning M.A.) are also offered.

### Scope and Objectives

Although lesbian, gay, bisexual, and transgender studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to "cure" the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato's *Symposium* looked back to Achilles and Patroclus; women-loving-women in early twentieth-century Paris remembered Sappho.

After the birth of the modern gay liberation movement in 1969, this underground knowledge came out of the closet and found a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities and genders. This challenge led to a dramatic increase in research on same-sex desire and cross-gender phenomena, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, bisexual, and transgender studies, which, over the last decade, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, bisexual, and transgender studies is usually on minority sexualities and genders, it is impossible to study them in any meaningful way without raising questions about sexuality and gender in general. And those questions cannot be responsibly answered without considering class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, bisexual, and transgender studies, which may at first seem to concern the private practices of a small number of people, in-

evitably leads to the much larger study of sexuality, gender, and culture. It represents an important vantage point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, bisexual, and transgender studies is the site of some of the most exciting work being done today on the relation of culture, gender, and sexuality.

UCLA's minor in Lesbian, Gay, Bisexual, and Transgender Studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course each in the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality and gender. They should be acquainted with some of the many different ways sexuality and gender have been organized in the past and are organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual and gender diversity of the world in which they live and of the complex ways in which sexuality and gender intersect with other categories of identity and practice.

### Undergraduate Study

#### Lesbian, Gay, Bisexual, and Transgender Studies Minor

To enter the Lesbian, Gay, Bisexual, and Transgender Studies minor, students must have an overall grade-point average of 2.0 or better.

#### *Required Upper Division Courses (32 units):*

Lesbian, Gay, Bisexual, and Transgender Studies M114, 196, and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, bisexual, or transgender issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

# Lesbian, Gay, Bisexual, and Transgender Studies

## Upper Division Courses

**M101A. Lesbian and Gay Literature before Stonewall.** (5) (Same as English M101A and Women's Studies M101A.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

**M101B. Lesbian and Gay Literature after Stonewall.** (5) (Same as English M101B and Women's Studies M101B.) Lecture, four hours. Requisite: English Composition 3 or 3H. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

**M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies.** (5) (Same as Women's Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

**M115. Topics in Study of Sexual and Gender Orientation.** (4) (Same as Women's Studies M115.) Lecture/discussion, three hours. Requisite: course M114 or Women's Studies 10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit. Letter grading.

**M116. Sexuality and the City: Queer Los Angeles.** (4) (Same as Women's Studies M116.) Lecture, three hours. Requisite: course M114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles. Letter grading.

**M118. Queering American History.** (4) (Same as Women's Studies M118.) Lecture, four hours. History of sexual and gender minorities in the U.S. Topics include changing norms, romantic friendships, medical discourse, liberation politics, post-Stonewall culture, AIDS, transgender movement, queer theory and politics. P/NP or letter grading.

**M133. Chicana Lesbian Literature.** (4) (Same as Chicana and Chicano Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies. Letter grading.

**M134. Cultural Construction of Gender and Sexuality: Homosexualities.** (4) (Same as Anthropology M134 and Honors Collegium M129.) Seminar, three hours. Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

**M137. Gay and Lesbian Perspectives in Pop Music.** (5) (Same as Music History M137.) Lecture, four hours; discussion, one hour. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

**M147A. Psychology of Lesbian Experience.** (4) (Same as Psychology M147A and Women's Studies M147A.) Lecture, two hours; discussion, one hour. Requisite: course M114 or Psychology 10 or Women's Studies 10. Designed for juniors/seniors. Review of research and theory in psychology and women's studies to examine various aspects of lesbian experience, impact of heterosexism/stigma, gender role socialization, minority status of women and lesbians, identity development within a multicultural society, changes in psychological theories about lesbians in sociohistorical context. P/NP or letter grading.

**150. Speaking Out: Public Speaking on Lesbian, Gay, Bisexual, and Transgender Issues.** (1) Discussion, two hours. Interdisciplinary course designed to teach leadership and public speaking skills on lesbian, gay, bisexual, and transgender issues. Sexual identity development, personal growth, and lesbian, gay, bisexual, and transgender history intersect with public speaking and leadership skills. Topics include sexual identities, family, leadership, and public speaking performance. P/NP or letter grading.

**M167. Contested Sexualities.** (4) (Same as Sociology M167 and Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

**196. Senior Internship Seminar: Lesbian, Gay, Bisexual, and Transgender Studies.** (4) Seminar, three hours. Preparation: completion of four courses toward the minor. Requisite: course M114. Limited to seniors. Internship in a lesbian, gay, bisexual, or transgender community organization coupled with a weekly seminar. Consideration of theoretical and political issues involved in such work and relation of those issues to ideas explored in minor courses already taken.

**197. Selected Topics in Lesbian, Gay, Bisexual, and Transgender Studies.** (4) Study of selected topics in lesbian, gay, bisexual, and transgender studies. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor.

**M197D. Special Topics in Lesbian and Gay Literature.** (5) (Same as English M197D.) Lecture, four hours. Enforced requisite: English Composition 3 or 3H. Variable specialized studies course in lesbian and gay literature. Topics focus on a particular problem or issue in terms of its relationship to lesbian and gay culture and writing. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in Lesbian, Gay, Bisexual, and Transgender Studies.** (2 to 4) Requisite: course M114. Directed program of independent study or research on a specific topic within lesbian, gay, bisexual, and transgender studies.

Plant Biology (Organismic Biology, Ecology, and Evolution Department), Microbiology, Immunology, and Molecular Genetics (Microbiology, Immunology, and Molecular Genetics Department), Molecular, Cell, and Developmental Biology (Molecular, Cell, and Developmental Biology Department), Neuroscience (Neuroscience Interdepartmental Program), Physiological Science (Physiological Science Department), and Psychobiology (Psychology Department). This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses that forms the foundation for any study of life sciences and that is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the life sciences core curriculum, see <http://www.lscore.ucla.edu>.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the nine majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The Marine Biology and Psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

## Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

## Transfer Students

Transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester

## LIFE SCIENCES

College of Letters and Science

UCLA  
2305 Life Sciences  
Box 951606  
Los Angeles, CA 90095-1606  
(310) 825-6614  
<http://www.lscore.ucla.edu>

## Scope and Objectives

Students who wish to study life sciences have a choice of nine majors, all of which lead to a Bachelor of Science degree: Biology, Ecology, Behavior, and Evolution, Marine Biology, and

of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

### Undergraduate Research Consortium in Functional Genomics

The Undergraduate Research Consortium in Functional Genomics (URCFG) offers a sequence of laboratory-intensive courses designed for undergraduate students committed to pursuing research. The innovative partnership between UCLA and the Howard Hughes Medical Institute (HHMI) was formed through a major award to Professor Utpal Banerjee. The HHMI Professors Program seeks to engage leading scientists in transmitting the excitement and values of scientific research to undergraduate education. The goal of the URCFG is to emphasize the importance for academia and industry of research in the fields of medicine and biotechnology.

Sponsored by the Life Sciences Core, the URCFG provides undergraduates from any UCLA major with the opportunity to learn biological research techniques early in their educational careers and within a structured institutional environment. Undergraduates devote between one and four terms to the study of biological research in genetics, bioinformatics, and functional genomics. The training emphasizes research concepts in basic science such as the model organism and in advanced research techniques such as electron microscopy.

Students participate in one structured lower division course — Life Sciences 10H — which is limited to 30 students per term and is offered every term. After satisfactorily completing course 10H and with instructor consent, students may participate in up to three terms of upper division research in genes, genetics, and genomics. The upper division courses — Life Sciences 100HA, 100HB, 100HC — do not involve preexisting laboratory experiments. Syllabi for the courses are instead based on individual research projects whose outcomes students discover through the course of their studies. It is anticipated that only about one third of the students who complete course 10H will subsequently enroll in course 100HA, and students are advised that they can benefit significantly from course 10H alone.

Each course must be taken for a letter grade. Under special circumstances, one course may be waived for students who have prior research experience in fields covered by the courses. Students who complete the required courses receive a certificate of merit indicating their completion of the consortium.

To participate, students must be accepted into the Undergraduate Research Consortium in Functional Genomics. Interested students should contact the URCFG coordinator in the Molecular, Cell, and Developmental Biology Student Affairs Office, 2124 Life Sciences, (310) 825-7109, for information regarding ad-

mission and an application. Applications are due no later than Friday of the fourth week of the term prior to the term in which students plan to enroll in course 10H.

## Life Sciences

### Lower Division Courses

**1. Evolution, Ecology, and Biodiversity. (5)** Lecture, three hours; laboratory, two hours; one field trip. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships. P/NP or letter grading.

**2. Cells, Tissues, and Organs. (5)** Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Enforced prerequisite: Chemistry 14A or 20A. Not open for credit to students with credit for course 2W. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Letter grading.

**2W. Cells, Tissues, and Organs. (6)** Lecture, four hours; discussion/laboratory, three hours (alternate weeks). Enforced prerequisites: Chemistry 14A or 20A, English Composition 3 or 3H. Not open for credit to students with credit for course 2. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems. Satisfies Letters and Science Writing II requirement. Letter grading.

**3. Introduction to Molecular Biology. (5)** Lecture, three hours; discussion/laboratory, three hours (alternate weeks). Enforced prerequisites: course 2 or 2W, Chemistry 14C or 30A or former course 30. Introduction to basic principles of biochemistry and molecular biology. Letter grading.

**3H. Introduction to Molecular Biology (Honors). (5)** Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced prerequisites: course 2 or 2W, Chemistry 14C or 30A or former course 30. Honors course parallel to course 3, but at a more advanced level. Letter grading.

**4. Genetics. (5)** Lecture, three hours; discussion, two hours. Enforced prerequisite: course 3. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations. Letter grading.

**10H. Research Training in Genes, Genetics, and Genomics. (6)** Lecture, 90 minutes; laboratory, six hours; computer laboratory, 90 minutes. Limited to 30 students. Basic training in biological research, including techniques in genetics, model organism, bioinformatics, functional genomics, electron microscopy. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

**15. Life, Concepts, and Issues. (5)** Lecture, three hours; discussion, two hours. Introduction to important concepts and issues in the field for non-life sciences majors. Topics include chemistry of life, genetics, physiology, evolution, and ecology — all explored in lecture and debates, with a writing component. P/NP or letter grading.

## Upper Division Courses

**100HA-100HB-100HC. Advanced Research in Genes, Genetics, and Genomics. (4-4-4)** Lecture, two hours; laboratory, 10 hours. Requisite: course 10H. Course 100HA is requisite to 100HB, which is requisite to 100HC. Designed for undergraduates who are committed to pursuing research. Advanced research training in genetics, cell and developmental biology, bioinformatics, functional genomics. Techniques include electron microscopy, other light microscopies, immunohistochemistry. Part of Undergraduate Research Consortium in Functional Genomics sponsored by Howard Hughes Medical Institute Professors Program. Letter grading.

**130. Science Classroom Observation and Participation. (1 to 2)** Seminar, one hour; classroom observation and participation, two hours. Observation, participation, or tutoring in science classes at middle school and secondary levels, offered for 1 unit in Fall and Winter Quarters and for 2 units in Spring Quarter (project required). May be repeated for credit. P/NP grading.

**194. Teaching Practicum in Life Sciences. (2 or 4)** Lecture, two hours; discussion, three hours; laboratory, three or six hours. Training and supervised practicum for advanced undergraduates in teaching courses related to life sciences. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Life Sciences Core Curriculum Office for further information. Letter grading.

## LINGUISTICS

*College of Letters and Science*

UCLA

Edward L. Keenan, Ph.D., *Chair*

### Professors

Raimo A. Anttila, Ph.D.  
Susan R. Curtiss, Ph.D.  
Bruce P. Hayes, Ph.D.  
Thomas J. Hinnebusch, Ph.D.  
Nina M. Hyams, Ph.D.  
Patricia A. Keating, Ph.D.  
Edward L. Keenan, Ph.D.  
Hilda J. Koopman, Ph.D.  
Anoop K. Mahajan, Ph.D.  
Pamela L. Munro, Ph.D.  
Russell G. Schuh, Ph.D.  
Dominique L. Sportiche, Ph.D.  
Edward P. Stabler, Ph.D.  
Timothy A. Stowell, Ph.D.

### Professors Emeriti

George D. Bedell, Ph.D.  
William O. Bright, Ph.D.  
Mazisi R. Kunene, Ph.D.  
Peter N. Ladefoged, Ph.D.  
Paul M. Schachter, Ph.D.  
Robert P. Stockwell, Ph.D.

### Associate Professor

Sun-Ah Jun, Ph.D.

### Assistant Professors

Daniel Büring, Ph.D.  
Marcus A. Kracht, Ph.D., *Acting*  
Philippe D. Schlenker, Ph.D.  
Carson T. Schütze, Ph.D.  
Colin C. Wilson, Ph.D.

Kie Ross Zuraw, Ph.D.

### Adjunct Professors

Lynne Bernstein, Ph.D.

Kathleen R. Dahlgren, Ph.D.

## Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

## Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

## Linguistics B.A.

The B.A. degree program is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables undergraduates to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

### Preparation for the Major

*Required:* Linguistics 20; two of the following: Philosophy 31, Psychology 10 or 100A, one cultural anthropology course; completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are requisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

### Transfer Students

To be admitted as Linguistics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two courses from symbolic logic, introductory psychology or psychological statistics, or cultural anthropology, and two years of one foreign language and one year of a second foreign language (at least one year must be in a language other than those in the Romance, Slavic, or Germanic families).

### The Major

*Required:* Eleven upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, C130 or C132, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining four courses are electives, three of which must be linguistics courses (no more than one course from 195, 196A, and 199 may be applied toward the major). The other course may be in linguistics or in another field as follows: Anthropology 143, Classics 180, English 121, 122, Philosophy 127A, 127B, 172, Psychology 120A, 124E, 133C, or an upper division course in a foreign language beyond the sixth term. Nonlinguistics courses not on the list may be used as electives only in consultation with an adviser.

Linguistics 195, or 196A and 196B, are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

## Linguistics and Anthropology B.A.

### Preparation for the Major

*Required:* Linguistics 20, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language (at least three terms must be in a language other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

### Transfer Students

To be admitted as Linguistics and Anthropology majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course and two years of one foreign language and one year of a second foreign language (at least one year must be in a language other than those in the Romance, Slavic, or Germanic families). One cultural and communication course is strongly recommended.

### The Major

*Required:* Eleven upper division courses as follows: Linguistics 103, 110, 120A, 120B or 127; two courses from 114, 125, 170; Anthropology M140 and either C144 or M145; one course from Anthropology 141, 142A, 143, or Sociology CM124A; and two upper division electives from Anthropology 141, 142A, 143, C144, M145, the 130 series (one course only), the 170 series (one course only), Sociology CM124A, CM124B. Linguistics 165A and 165B (or 200A and 200B with grades of A in 120A and 120B respectively and consent of instructor) are recommended for students planning to pursue graduate work in linguistics.

## Linguistics and Computer Science B.A.

### Preparation for the Major

*Required:* Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language or the third term in each of two foreign languages. Mathematics 61 is recommended.

### Transfer Students

To be admitted as Linguistics and Computer Science majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two calculus courses, one symbolic logic course, four computer programming courses, and two years of one foreign lan-

guage or one year in each of two foreign languages. One discrete structures course is recommended.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165A or 165B, C180, C185A, Computer Science 131, 132, 161 or 163, 181, and one upper division elective in linguistics or computer science. Linguistics 104 and C185B are strongly recommended.

## Linguistics and East Asian Languages and Cultures B.A.

### Preparation for the Major

*Required:* Completion of the sixth term in either Chinese, Japanese, or Korean; Linguistics 20; one cultural anthropology course; either Chinese 50, Japanese 50, or Korean 50, as appropriate; completion of the equivalent of the third term of a second foreign language.

#### Transfer Students

To be admitted as Linguistics and East Asian Languages and Cultures majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Chinese, Japanese, or Korean, one introduction to linguistics course, one cultural anthropology course, one Chinese, Japanese, or Korean civilization course, and one year of a second foreign language.

### The Major

*Required:* Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A, 100B, CM122, 140A, 140B, 140C, C149; for the modern Japanese track: Japanese 100A, 100B, 100C, M120, CM122, CM123 or CM127, 130B; for the classical Chinese track: Chinese 110A, 110B, 110C, four courses from 140A, 140B, 140C, 165, 170, 195; for the modern Chinese track: Chinese 100A, 100B, 100C, 101A, 101B, 130A, 130B; for the Korean track: Korean 100A, 100B, 100C, CM120, three courses from 101A, 101B, 101C, CM127, 130A, 130B.

## Linguistics and English B.A.

### Preparation for the Major

*Required:* Linguistics 20, English 4W or 4HW, 10A, 10B, 10C, Philosophy 31, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

#### Transfer Students

To be admitted as Linguistics and English majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course,

one critical reading and writing course, one year of English literature survey courses, one symbolic logic course, and two years of one foreign language and one year of a second foreign language.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, English 121, 122 (or Applied Linguistics and Teaching English as a Second Language C116), 140A, and three electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

## Linguistics and French B.A.

### Preparation for the Major

*Required:* Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the equivalent of the third term of a second foreign language.

#### Transfer Students

To be admitted as Linguistics and French majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of French, one introduction to linguistics course, one French literature course, one French diction course, and one year of a second foreign language.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, French 100, 101, 102, 105, 107, and one elective upper division French literature course.

## Linguistics and Italian B.A.

### Preparation for the Major

*Required:* Linguistics 20, Italian 1, 2, 3, 4, 5, 6, Latin 1, 2, 3, one cultural anthropology course.

#### Transfer Students

To be admitted as Linguistics and Italian majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Italian, one year of Latin, one introduction to linguistics course, and one cultural anthropology course.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

## Linguistics and Philosophy B.A.

### Preparation for the Major

*Required:* Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language.

#### Transfer Students

To be admitted as Linguistics and Philosophy majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, two symbolic logic courses and two courses from Western philosophy, political philosophy, philosophy of mind, or skepticism and rationality, and two years of one foreign language and one year of a second foreign language.

### The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165B (or 200B with a grade of A in 120B and consent of instructor), two upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

## Linguistics and Psychology B.A.

### Preparation for the Major

*Required:* Linguistics 20, Psychology 10, 85, 100A, 100B, completion of the equivalent of the sixth term of one foreign language and the third term of a second foreign language. Program in Computing 10A is strongly recommended.

#### Transfer Students

To be admitted as Linguistics and Psychology majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course, one introduction to psychology course, one introduction to cognitive science course, one psychological statistics course, one psychology research methods course, and two years of one foreign language and one year of a second foreign language. One introduction to programming course is strongly recommended.

### The Major

*Required:* Eleven upper division courses (six in linguistics and five in psychology) as follows: Linguistics 103, 120A, 120B, C130, C132, and one upper division elective in linguistics (multiple-listed courses may not be applied). Linguistics C135 or 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) is strongly recommended. Also required are Psychology 120A, 121, 133B, and two electives to be selected from 115, 116, M117C, 118, M119L,

124A, 124B, 124C, 124E, 130, 133C, 133E, 133F, 186A, 186B.

## Linguistics and Scandinavian Languages B.A.

### Preparation for the Major

*Required:* Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the equivalent of the third term of a second foreign language.

### Transfer Students

To be admitted as Linguistics and Scandinavian Languages majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of either Swedish, Norwegian, or Danish, one introduction to linguistics course, and one year of a second foreign language.

### The Major

*Required:* Eleven upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics, two courses from Scandinavian 105, 110, 115 (or one of these courses twice), 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

## Linguistics and Spanish B.A.

### Preparation for the Major

*Required:* Linguistics 20, Spanish 1, 2, 3, 4, 5, 6, 25 or 27, M42, M44, completion of the equivalent of the third term of a second foreign language.

### Transfer Students

To be admitted as Linguistics and Spanish majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of Spanish, one Spanish composition course, one Spanish civilization course, one Spanish American civilization course, one introduction to linguistics course, and one year of a second foreign language.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one additional upper division course in linguistics, Spanish 100A, 100B, 115 or M118A, two courses from 119A, 119B, 119C, and one additional upper division Spanish course.

## African Languages B.A.

### Preparation for the Major

*Required:* Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

### Transfer Students

To be admitted as African Languages majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one introduction to linguistics course and two years of one language and one year of one other language.

### The Major

*Required:* A minimum of 13 upper division courses, including three courses in an African language; African Languages M190, Linguistics 103; two courses from Film and Television 106C, Folklore M155, French 121A, Theater 102E, or one or more special 4-unit African Languages 199 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology C136A, C136B, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, C140, M146, 170, Political Science 151A, 151B, 151C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

## Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or in 196A and 196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

## Computing Specialization

Students in any of the linguistics majors (except Linguistics and Computer Science) may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Linguistics Minor

The Linguistics minor is designed for students where training in linguistic analysis could be an enhancement to their major programs and to students who are interested in language(s) but do not have time in their undergraduate programs to pursue multi-quarter language sequences. In addition, the minor provides students with a way to design "custom" joint de-

grees with linguistics where the Linguistics Department does not have an existing joint degree program combining linguistics and another field.

To enter the minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Course (5 units):* Linguistics 20.

*Required Upper Division Courses (27 to 30 units):* Six courses, which must include Linguistics 103, 120A, 120B, two elective courses selected from 104 through C185B, and an additional elective linguistics course, which may be upper or lower division.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Linguistics offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Linguistics.

## African Languages

### Lower Division Courses

**1A-1B-1C. Elementary Swahili. (4-4-4)** Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania. P/NP or letter grading.

**2A-2B-2C. Intermediate Swahili. (4-4-4)** Lecture, four hours. Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C. P/NP or letter grading.

**7A-7B-7C. Elementary Zulu. (4-4-4)** Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. P/NP or letter grading.

**8A-8B-8C. Intermediate Zulu. (4-4-4)** Lecture, four hours. Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C. P/NP or letter grading.

**11A-11B-11C. Elementary Yoruba. (4-4-4)** Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of western Nigeria. P/NP or letter grading.

**12A-12B-12C. Intermediate Yoruba. (4-4-4)** Lecture, four hours. Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C. P/NP or letter grading.

**15. Intensive Elementary Swahili. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 1A, 1B, 1C) in Swahili, major language of East Africa, particularly Tanzania. Letter grading.

**16. Intensive Intermediate Swahili. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 1C or 15. Intensive instruction (equivalent to courses 2A, 2B, 2C) in Swahili, major language of East Africa, particularly Tanzania. Letter grading.

**17. Intensive Elementary Zulu. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A, 7B, 7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

**18. Intensive Intermediate Zulu. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A, 8B, 8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Letter grading.

**25. Intensive Elementary Yoruba. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 11A, 11B, 11C) in Yoruba, major language of western Nigeria. Letter grading.

**26. Intensive Intermediate Yoruba. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 11C or 25. Intensive instruction (equivalent to courses 12A, 12B, 12C) in Yoruba, major language of western Nigeria. Letter grading.

**31A-31B-31C. Elementary Bambara. (4-4-4)** Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. P/NP or letter grading.

**32A-32B-32C. Intermediate Bambara. (4-4-4)** Lecture, four hours. Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C. P/NP or letter grading.

**35. Intensive Elementary Bambara. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 31A, 31B, 31C) in Bambara, major language of Mali and contiguous areas. Letter grading.

**36. Intensive Intermediate Bambara. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 31C or 35. Intensive instruction (equivalent to courses 32A, 32B, 32C) in Bambara, major language of Mali and contiguous areas. Letter grading.

**41A-41B-41C. Elementary Hausa. (4-4-4)** Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of northern Nigeria and adjacent areas. P/NP or letter grading.

**42A-42B-42C. Intermediate Hausa. (4-4-4)** Lecture, four hours. Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C. P/NP or letter grading.

**45. Intensive Elementary Hausa. (12)** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 41A, 41B, 41C) in Hausa, major language of northern Nigeria and adjacent areas. Letter grading.

**46. Intensive Intermediate Hausa. (12)** Lecture, 20 hours (eight weeks). Enforced requisite: course 41C or 45. Intensive instruction (equivalent to courses 42A, 42B, 42C) in Hausa, major language of northern Nigeria and adjacent areas. Letter grading.

**51A-51B-51C. Elementary Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

**52A-52B-52C. Intermediate Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

**55. Intensive Elementary Tigrinya. (12)** Lecture, 20 hours. Intensive instruction in Tigrinya, major language of Eritrea and Tigray, province of Ethiopia. Letter grading.

**61A-61B-61C. Elementary Wolof. (4-4-4)** Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia. P/NP or letter grading.

**62A-62B-62C. Intermediate Wolof. (4-4-4)** Lecture, four hours. Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

**75. Intensive Elementary Chichewa. (12)** Lecture, 20 hours. Intensive instruction in Chichewa (ChiNyanja), major language of Malawi and adjacent areas of Zimbabwe, Mozambique, Zambia, and Tanzania. Letter grading.

**85. Intensive Elementary Setswana. (12)** Lecture, 20 hours. Intensive instruction in Setswana, primary language of Botswana and adjacent areas of South Africa. Letter grading.

**97. Elementary and Intermediate Studies in African Languages. (1 to 6)** Seminar, to be arranged. Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa. Letter grading.

## Upper Division Courses

**103A-103B-103C. Advanced Swahili. (4-4-4)** Lecture, four hours. Requisite: course 2C. Course 103A is requisite to 103B, which is requisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. P/NP or letter grading.

**109A-109B-109C. Advanced Zulu. (4-4-4)** Lecture, five hours. Requisite: course 8C. Course 109A is requisite to 109B, which is requisite to 109C. Readings in Zulu literature and the contemporary press. Discussions mainly in Zulu. P/NP or letter grading.

**123A-123B-123C. Advanced Yoruba. (4-4-4)** Lecture, four hours. Requisite: course 12C. Course 123A is requisite to 123B, which is requisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba. P/NP or letter grading.

**133A-133B-133C. Advanced Bambara. (4-4-4)** Lecture, four hours. Requisite: course 32C. Course 133A is requisite to 133B, which is requisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. P/NP or letter grading.

**143A-143B-143C. Advanced Hausa. (4-4-4)** Lecture, four hours. Requisite: course 42C. Course 143A is requisite to 143B, which is requisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. P/NP or letter grading.

**150A-150B. African Literature in English Translation. (4-4)** Lecture, four hours. Narrative and didactic prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. P/NP or letter grading.

**153A-153B-153C. Advanced Amharic. (4-4-4)** Lecture, five hours (15 hours for intensive course). Requisite: course 52C. Course 153A is requisite to 153B, which is requisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

**170. South African Literatures and Cinema. (4)** Lecture/screenings, six hours. South African apartheid and postapartheid written literatures and cinema, including lectures and discussion of written texts and films in English. P/NP or letter grading.

**M190. Survey of African Languages. (4)** (Same as Linguistics M115.) Lecture, four hours. Requisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages. P/NP or letter grading.

**199. Special Studies in African Languages. (1 to 6)** Tutorial, to be arranged. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available. P/NP or letter grading.

## Graduate Courses

**202A-202B-202C. Comparative Bantu. (4-4-4)** Lecture, four hours. Requisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu. S/U or letter grading.

**596. Directed Studies. (1 to 8)** Tutorial, to be arranged. Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Indigenous Languages of the Americas

### Lower Division Courses

**17. Intensive Elementary Quechua. (12)** Lecture, 15 hours; laboratory, five hours. Intensive course equivalent to courses 18A, 18B, 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America. Offered in summer only. Letter grading.

**18A-18B-18C. Elementary Quechua. (4-4-4)** Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

### Upper Division Courses

**119A-119B-119C. Advanced Quechua. (4-4-4)** Requisite: course 18C. Course 119A is requisite to 119B, which is requisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua.

## Graduate Course

**596. Directed Studies in Quechua. (1 to 8)** Requisites: courses 119A, 119B, 119C. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Linguistics

### Lower Division Courses

**1. Introduction to Study of Language. (5)** Lecture, three hours; discussion, one hour. Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge. P/NP or letter grading.

**2. Language in the U.S. (5)** Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrival languages) and social and political aspects of American language use. P/NP or letter grading.

**3. American Sign Language: Structure and Culture. (4)** Lecture, four hours; discussion, one hour. Knowledge of American Sign Language (ASL) not required. Introduction to principles of linguistics through study of structure of American Sign Language and culture of deaf Americans. Phonology, morphology, syntax of ASL, historical change, signed language universals, education, identity, and ASL literature. P/NP or letter grading.

**4. Language and Evolution. (5)** Lecture, four hours; discussion, one hour. Basic concepts and tools of evolutionary theory and linguistics relevant to how organisms with linguistic abilities could evolve, and how particular languages, as cultural artifacts, survive and change so rapidly. P/NP or letter grading.

**M10. Structure of English Words. (5)** (Formerly numbered 10.) (Same as English M40.) Lecture, four hours; discussion, one hour. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation. P/NP or letter grading.

**20. Introduction to Linguistics. (5)** Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar. P/NP or letter grading.

**88. Lower Division Seminar. (4)** Seminar, three hours. Limited to freshmen/sophomores. Variable topics; consult *Schedule of Classes*, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit. P/NP or letter grading.

**99. Special Studies in Linguistics. (2 to 4)** Supervised research or training. May be repeated for credit. P/NP or letter grading.

## Upper Division Courses

**103. Introduction to General Phonetics. (5)** Lecture, four hours; discussion, one hour. Preparation: one prior linguistics course or course 20 concurrently. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena. P/NP or letter grading.

**104. Experimental Phonetics. (5)** Lecture, four hours; discussion, one hour. Requisite: course 103. Survey of principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena. P/NP or letter grading.

**110. Introduction to Historical Linguistics. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change. P/NP or letter grading.

**C111. Intonation. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C211.

**114. American Indian Linguistics. (5)** Lecture, four hours; discussion, one hour. Strongly recommended preparation: course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail. P/NP or letter grading.

**M115. Survey of African Languages. (4)** (Same as African Languages M190.) Requisite: course 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

**M116. Introduction to Japanese Linguistics. (4)** (Same as Japanese M120.) Lecture, three hours; discussion, one hour. Enforced requisite: Japanese 3 or Japanese placement test. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics. Letter grading.

**120A. Phonology I. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 103. Introduction to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets. P/NP or letter grading.

**120B. Syntax I. (5)** Lecture, four hours; discussion, one hour. Requisite: course 20. Course 120A is not requisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization. P/NP or letter grading.

**125. Semantics. (5)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning. P/NP or letter grading.

**127. Syntactic Typology and Universals. (5)** Lecture, four hours; discussion, one hour. Requisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed. P/NP or letter grading.

**C128A-C128B. Romance Syntax: French. (4-4)** Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: course 120B. Course C128A is requisite to C128B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses CM228A-CM228B. P/NP or letter grading.

**C130. Language Development. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C233. P/NP or letter grading.

**C132. Language Processing. (5)** Lecture, four hours; laboratory, one hour. Requisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production. Concurrently scheduled with course C232. P/NP or letter grading.

**C135. Neurolinguistics. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235. P/NP or letter grading.

**C140. Bilingualism and Second Language Acquisition. (5)** (Formerly numbered 140.) Lecture, four hours; discussion, one hour. Requisites: courses 120A, 120B, C130. Introduction to study of childhood bilingualism and adult and child second language (L2) acquisition, with focus on understanding nature of L2 grammar and grammatical processes underlying L2/bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C244. P/NP or letter grading.

**M146. Language in Culture. (5)** (Same as Anthropology M140.) Lecture, three hours; discussion, one hour; fieldwork, two hours. Requisite: course 20 or Anthropology 33. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. P/NP or letter grading.

**M150. Introduction to Indo-European Linguistics. (5)** (Same as Indo-European Studies M150.) Lecture, four hours. Recommended requisite: course 1 or 20. Indo-European languages (ancient and modern), including their relationships, chief characteristics, writing systems, and sociolinguistic contexts; nature of reconstructed Indo-European proto-language and proto-culture. One or more Indo-European languages may be investigated in detail. P/NP or letter grading.

**160. Field Methods. (6)** Discussion, four hours; individual or group sessions, one to two hours. Requisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

**165A. Phonology II. (5)** Lecture, four hours; discussion, one hour. Requisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar. P/NP or letter grading.

**165B. Syntax II. (5)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics. P/NP or letter grading.

**170. Language and Society: Introduction to Sociolinguistics. (4)** Requisite: course 20. Study of patterned covariation of language and society; social dialects and social styles in language; problems of multilingual societies.

**175. Linguistic Change in English. (5)** Lecture, four hours. Requisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax. P/NP or letter grading.

**M176A. Structure of Japanese I. (4)** (Same as Japanese CM122.) Lecture, three hours. Recommended preparation: two years of Japanese. Requisite: Japanese M120. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Letter grading.

**M176B. Structure of Japanese II. (4)** (Same as Japanese CM123.) Lecture, three hours. Recommended preparation: two or more years of Japanese language study. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — grammatical constructions; (3) discourse level — point of view, ellipsis, topicalization. Letter grading.

**M177. Structure of Korean. (4)** (Same as Korean CM120.) Lecture, three hours. Recommended preparation: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Letter grading.

**M178. Contrastive Analysis of Japanese and Korean. (4)** (Same as Japanese CM127 and Korean CM127.) Lecture, three hours. Recommended preparation: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Letter grading.

**C180. Mathematical Structures in Language I. (5)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended: Philosophy 31. Prior mathematics knowledge not assumed. Mathematical introduction to phonology, syntax, and semantics. Elementary material on logic, sets, functions, relations, and trees. Concurrently scheduled with course C208. P/NP or letter grading.

**C185A. Computational Linguistics I. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C209A. P/NP or letter grading.

**C185B. Computational Linguistics II. (5)** Lecture, four hours; discussion, one hour. Requisite: course C185A or C209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B. P/NP or letter grading.

**195. Senior Essay. (4)** Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

**196A. Honors Essay. (4)** Preparation: 3.5 grade-point average. Requisite or corequisite: course 165A (or 200A) or 165B (or 200B). Recommended: completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 196A is taken. Draft of extended piece of writing on a linguistic topic selected by the student is prepared under supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

**196B. Honors Essay. (2)** Requisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.

**197. Special Topics in Linguistics. (4)** Requisite: course 1 or 20. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

**199. Special Studies in Linguistics. (2 to 4)** Requisites: courses 120A, 120B. May be repeated for credit.

## Graduate Courses

**200A. Phonological Theory I. (4)** Preparation: graduate linguistics student or grade of A in course 120A or equivalent course in phonology. Courses 200A and 201 form two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress.

**200B. Syntactic Theory I. (4)** Preparation: graduate linguistics student or grade of A in course 120B or equivalent course in syntax. In-depth introduction to selected topics in theory of constituent structure and syntax of predicates, arguments, and grammatical relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, grammatical function-changing rules, head-complement relations.

**200C. Semantic Theory I. (4)** Lecture, four hours. Requisite: course C180 or C208. Overview of current results and research methods in linguistic semantics. Topics include generalized quantifiers and semantic universals, predicate argument structures, variable binding and pronominalization, formal semantic interpretation, syntax and LF, tense, ellipsis, and focus. Letter grading.

**201. Phonological Theory II. (4)** Requisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology.

**202. Language Change. (4)** Requisites: courses 110, 200A, 200B. Survey of current theories and research problems in language change.

**203. Phonetic Theory. (4)** Requisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.

**204. Experimental Phonetics. (4)** Requisite: course 103. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

**205. Morphological Theory. (4)** Requisites: courses 200A, 200B. Survey of current theories and research problems in morphology. Nature of morphological structure; derivational and inflectional morphology; relation of morphology to phonology, syntax, and the lexicon.

**206. Syntactic Theory II. (4)** Requisite: course 200B. In-depth introduction to selected topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subadjacency and other constraints on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter.

**207. Semantic Theory II. (4)** Lecture, four hours. Requisites: courses C180 or C208, 200C. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Approaches include generalized categorial grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form. Letter grading.

**C208. Mathematical Structures in Language I. (5)** Lecture, four hours; discussion, one hour. Requisite: course 120B. Recommended: Philosophy 31. Prior mathematics knowledge not assumed. Mathematical introduction to phonology, syntax, and semantics. Elementary material on logic, sets, functions, relations, and trees. Concurrently scheduled with course C180. Graduate students expected to complete additional problem sets. S/U or letter grading.

**C209A. Computational Linguistics I. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C185A. S/U or letter grading.

**C209B. Computational Linguistics II. (5)** Lecture, four hours; discussion, one hour. Requisite: course C185A or C209A. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C185B. S/U or letter grading.

**210A. Field Methods I. (4)** Lecture, four hours. Preparation: grade of B or better in course 103 or examination on practical phonetics. Requisites: courses 200A, 200B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change. S/U or letter grading.

**210B. Field Methods II. (4)** Lecture, four hours. Requisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change. S/U or letter grading.

**C211. Intonation. (4)** Lecture, two hours; laboratory, two hours. Requisites: courses 20, 103, 120A or 120B. Recommended: course 104 or 204. Survey of intonational theory for English and other languages, with particular emphasis on phonological models of intonation. Laboratory equipment used for recording and analyzing intonation, and students learn to transcribe intonational elements. Concurrently scheduled with course C111.

**212. Learnability Theory. (4)** Requisite: course C180 or C208. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment.

**213A. Grammatical Development. (4)** Requisites: courses 200A, 200B. Recommended: course C130 or C233. Survey of theoretical perspectives and contemporary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

**213B. Brain Bases for Language. (4)** Requisites: courses 200A, 200B. Recommended: course C135 or C235. Survey of theoretical perspectives and contemporary empirical research in neurological and cognitive bases for language, language development, and language breakdown.

**213C. Linguistic Processing. (4)** Requisites: courses 165B and/or 200B. Recommended: courses C132 or C232, 206. Survey of theoretical perspectives and contemporary empirical research in human processing of language (comprehension and/or production), with emphasis on syntactic processing, ambiguity resolution, effects of memory load, and relationship between grammar and processor.

**214. Survey of Current Syntactic Theories. (4)** Requisite: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power.

**215. Syntactic Typology. (4)** Requisite: course 200B. Current results in word-order universals; genetic classification of the world's languages; cross-language properties of specific construction types, including relative clauses, passives, positive and negative coreference systems, agreement systems, deixis systems, and types of sentence complements.

**216. Syntactic Theory III. (4)** Requisite: course 206. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complex quantifier structures.

**217. Experimental Phonology. (4)** Lecture, four hours. Requisite: course 200A. Survey of experimental work that bears on claims about speakers' knowledge of phonology, including theories of lexicon, relation between perception and phonology, and universal markedness relations. Letter grading.

**218. Mathematical Structures in Language II. (4)** Lecture, four hours. Requisite: course C180 or C208. In-depth study of generalized quantifier theory; selected topics from distinctive feature theory, formal syntax, partial orders and lattices, formal language theory, variable binding operators. May be repeated for credit with consent of instructor. S/U or letter grading.

**220. Linguistic Areas. (4)** Requisites: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

**225. Linguistic Structures. (4)** Requisites: courses 120A, and 120B or 127. Recommended: courses 165A or 200A, 165B or 200B. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

**CM228A-CM228B. Romance Syntax: French. (4-4)** (Same as Romance Linguistics M204A-M204B.) Lecture, four hours. Preparation: some knowledge of French (or a Romance language). Requisite: course 120B. Course CM228A is requisite to CM228B. Aspects of structure of French language, with emphasis on properties of construction not found in English. Concurrently scheduled with courses C128A-C128B. S/U or letter grading.

**230. History of Linguistics. (4)** Requisites: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

**C232. Language Processing. (5)** Lecture, four hours; laboratory, one hour. Requisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production. Concurrently scheduled with course C132. Graduate students expected to read more advanced literature and produce research papers of greater depth. S/U or letter grading.

**C233. Language Development. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 20, 120A, 120B. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C130. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth. S/U or letter grading.

**C235. Neurolinguistics. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C135. Graduate students expected to read more advanced neurolinguistic literature and produce research papers of greater depth. S/U or letter grading.

**236. Computational Phonology. (4)** Lecture, four hours. Introduction to computational models of phonology and phonological acquisition. Topics include finite state machines, probabilistic automata, over-constrained models, dynamic programming methods. Letter grading.

**237. Linguistic Methods Laboratory. (4)** Laboratory, four hours. Variable content, with topics such as computer implementation of linguistic models, corpus studies, experimental methods for linguistic data collection, statistical analysis of results. May be repeated for credit. Letter grading.

**C244. Bilingualism and Second Language Acquisition. (5)** Lecture, four hours; discussion, one hour. Requisites: courses 120A, 120B, C130. Introduction to study of childhood bilingualism and adult and child second language (L2) acquisition, with focus on understanding nature of L2 grammar and grammatical processes underlying L2/bilingual acquisition. Discussion of neurolinguistic and social aspects of bilingualism. Concurrently scheduled with course C140. Graduate students expected to read more advanced literature, do in-class presentation, and submit graduate-level term paper. S/U or letter grading.

**M246C. Topics in Linguistic Anthropology. (4)** (Same as Anthropology M241.) Problems in relations of language, culture, and society. May be repeated for credit.

**251A. Topics in Phonetics and Phonology. (4)** Lecture, four hours. Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. Meets with course 251B. May be repeated for credit.

**251B. Topics in Phonetics and Phonology. (2)** Lecture, four hours. Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 251A. May be repeated for credit. S/U grading.

**252A. Topics in Syntax and Semantics. (4)** Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. Meets with course 252B. May be repeated for credit.

**252B. Topics in Syntax and Semantics. (2)** Lecture, four hours. Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 252A. May be repeated for credit. S/U grading.

**253A. Topics in Language Variation. (4)** Requisite: course 110. Course 202 may be required. Specialized topics in language variation. Meets with course 253B. May be repeated for credit.

**253B. Topics in Language Variation. (2)** Requisite: course 110. Course 202 may be required. Specialized topics in language variation. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 253A. May be repeated for credit. S/U grading.

**254A. Topics in Linguistics. (4)** Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. Meets with course 254B. May be repeated for credit.

**254B. Topics in Linguistics. (2)** Lecture, four hours. Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 213C, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements. Meets with course 254A. May be repeated for credit. S/U grading.

**256A. Topics in Phonetics and Phonology II: Proseminar. (4)** Requisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

**256B. Topics in Phonetics and Phonology II: Proseminar. (2)** Requisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

**257A. Topics in Syntax and Semantics II: Proseminar. (4)** Requisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

**257B. Topics in Syntax and Semantics II: Proseminar. (2)** Requisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

**258A. Topics in Language Variation II: Proseminar. (4)** Requisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

**258B. Topics in Language Variation II: Proseminar. (2)** Requisite: course 258A. Specialized topics in language variation. May be repeated for credit.

**259A. Topics in Linguistics II: Proseminar. (4)** Requisites: courses 200A, 200B. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259B).

**259B. Topics in Linguistics II: Proseminar. (2)** Requisite: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

**260A-260B-260C. Seminars: Phonetics. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**261A-261B-261C. Seminars: Phonology. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**262A-262B-262C. Seminars: Syntax and Semantics. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**263A-263B-263C. Seminars: Language Variation. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**264A-264B-264C. Seminars: Special Topics in Linguistic Theory. (2 or 4 each)** Discussion, three hours. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for 2 units. May be repeated for credit. S/U grading.

**275. Linguistics Colloquium. (4)** Preparation: completion of M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

**276. Linguistics Colloquium. (No credit)** Designed for graduate students. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**403. Practical Phonetics Training.** (1) Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently scheduled with practical sections of course 103. S/U grading.

**411A-411B. Research Orientation.** (2-2) Designed for graduate students. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**422. Practicum: Phonetic Data Analysis.** (2) Designed for graduate students. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**444. M.A. Thesis Preparation Seminar.** (4) Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**495. College Teaching of Linguistics.** (2) Seminar, to be arranged. Designed for graduate students. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**501. Cooperative Program.** (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Studies.** (1 to 8) Preparation: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**596B. Directed Linguistic Analysis.** (1 to 8) Preparation: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

**597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations.** (1 to 8) Preparation: at least six graduate linguistics courses. May be taken only in terms in which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**598. Research for M.A. Thesis.** (1 to 8) Research and preparation of M.A. thesis. May not be applied toward M.A. course requirements. May be repeated for a maximum of 8 units. S/U grading.

**599. Research for Ph.D. Dissertation.** (1 to 16) Preparation: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

Victor C. Tabbush, Ph.D.

S. William Yost, D.B.A.

### Adjunct Associate Professor

Robert F. Foster, M.B.A.

## Scope and Objectives

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging

managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in Accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

## Undergraduate Study

### Accounting Minor

Admission to the Accounting minor is competitive and based on a 3.0 grade-point average in the lower division preparation courses. Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the minor. Transfer credit for any of the courses is subject to department approval and is considered only for requisite coursework. Decisions on admission to the minor are made by the Anderson School. The requisite grade-point average and completion of the preparation courses do not guarantee admission to the program. For further information, see [http://www.anderson.ucla.edu/acad\\_unit/accounting/undergradprogram.html](http://www.anderson.ucla.edu/acad_unit/accounting/undergradprogram.html).

*Required Lower Division Courses (28 units):* Economics 1, 2, M40 (or Statistics 10 as a substitute for course M40); Management 1A, 1B; Mathematics 3A, 3B (higher-level courses and/or Advanced Placement Test credit may be substituted).

*Required Upper Division Courses (28 units):* Management 120A, 120B, 122, 127A, and three courses from 108, 123, 124, 127B, 128.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The John E. Anderson Graduate School of Management offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Management and the Master of Business Administration (M.B.A.) degree. The school also offers the Executive M.B.A. Program (EMBA) and the M.B.A. for the Fully Employed (FEMBA).

Eight concurrent degree programs (Management M.B.A./Computer Science M.S., Management M.B.A./Latin American Studies M.A., Management M.B.A./Law J.D., Management M.B.A./Library and Information Science M.L.I.S., Management M.B.A./Medicine M.D., Management M.B.A./Nursing M.S.N., Management M.B.A./Public Health M.P.H., and Management M.B.A./Urban Planning M.A.) are also offered.

## Management

### Lower Division Courses

**1A-1B. Elementary Accounting. (4-4)** Lecture, three hours. Not open to freshmen. P/NP or letter grading. **1A.** Introduction to accounting theory and practice. Recording, analyzing, and summarizing procedures used in preparing financial statements, asset side of balance sheet, current liabilities, payroll accounting. **1B.** Requisite: course 1A. Partnership and corporation accounting, statement of cash flows, financial statement analysis, cost and managerial accounting.

**88. Lower Division Seminar: Special Topics in Management. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

**98. Management Strategies in a Changing World. (4)** Seminar, three hours. Enforced requisites: satisfaction of Subject A requirement, Economics 1. Environment in which managers function has become far more complex. Identification of challenges to management as we approach the 21st century, using case method approach to investigate how social sciences disciplines have provided managers with theories and insights that lead toward successful management strategies. Letter grading.

**98B. Personal Freedom at Work. (4)** Seminar, three hours. Enforced requisite: satisfaction of Subject A requirement. Study of forces which lead to compromise at work, often without awareness of the people involved. Most people enter the work scene convinced they will never compromise values. They want work that is meaningful, opportunity to deliver their skills with excellence, and fair gain in exchange. However, freedom-constricting forces are at play, and even the most intelligent and best motivated can be led astray. Letter grading.

**98D. Employee Participation: Labor/Management Cooperation. (4)** Seminar, three hours. Enforced requisite: satisfaction of Subject A requirement. Overview of change in the workplace from perspective of cooperative efforts between labor and management in decision-making process. Roles of unions, companies, and government; societal implications. P/NP or letter grading.

### Upper Division Courses

**107. Business Communications. (4)** Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/NP or letter grading.

**108. Business Law. (4)** Lecture, three hours. Not open to freshmen. Essentials of contracts, agency, partnerships, corporations, and other select areas of law in a business environment. P/NP or letter grading.

**120A. Intermediate Financial Accounting I. (4)** Requisite: course 1B. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of asset valuation and income measurement. Measurement and reporting of current and long-term assets, including cash and marketable securities, inventories, plant assets and depreciation, and intangibles.

**120B. Intermediate Financial Accounting II. (4)** Requisite: course 120A. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices.

**122. Management Accounting. (4)** Requisites: course 1B, Economics M40. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

**123. Auditing. (4)** Lecture, three hours. Requisite: course 120B. Comprehensive study of procedures used in verification of financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

**124. Advanced Accounting. (4)** Lecture, three hours. Requisite: course 120B. Specialized accounting topics in business combinations, consolidated financial statements, branch accounting, leveraged buyouts, Securities and Exchange Commission, foreign currency transactions, translation of foreign financial statements, partnership ownership changes and liquidations, governmental accounting, and bankruptcy. P/NP or letter grading.

**125. Special Applications in Accounting. (4)** Requisite: course 120B. Recommended: course 122. Designed for seniors. Use of "Strategic Management," a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line margin analysis, issuing debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/NP or letter grading.

**126. Financial Statement Analysis. (4)** Lecture, three hours. Requisite: course 120B. Not open to students with credit for course 197 when offered as this topic. Comprehensive study of concepts and procedures used to interpret and analyze financial statements effectively, including asset, liability, and equity analysis; revenue and expense evaluation; financial ratios, credit analysis, and distress prediction; valuation theory and implementation; business strategy analysis; mergers and acquisitions. P/NP or letter grading.

**127A. Tax Principles and Policy. (4)** Requisite: course 1B. Study of fundamental income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

**127B. Corporate and Partnership Taxation. (4)** Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

**128. Special Topics in Accounting. (4)** Selected topics in public accounting, including mergers and acquisitions, public-company status and the going-public process, role of the partner, serving an entrepreneurial client, and fund accounting. Discussion of a case study of current interest in the accounting profession. Business plan preparation. P/NP or letter grading.

**130A. Basic Managerial Finance. (4)** Lecture, three hours. Requisites: course 120A or 120B, Economics M40. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

**130B. Advanced Managerial Finance. (4)** Lecture, three hours. Requisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and lease contracts. Management of financial risk using options, futures, and forward contracts. Study of merger and acquisition processes and reorganization under bankruptcy laws. P/NP or letter grading.

**133. Investment Principles and Policies. (4)** Lecture, three hours. Requisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

**140. Elements of Production and Operations Research. (4)** Lecture, four hours. Requisites: Mathematics 3A, 3B, 3C, Statistics 11. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design. P/NP or letter grading.

**150. Elements of Industrial Relations. (4)** Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

**175. Elements of Real Estate and Urban Land Economics. (4)** Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

**182. Leadership Principles and Practice. (4)** Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

**190. Management Theory and Policy. (4)** Lecture, three hours. Requisite: course 130A. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Management issues in areas of planning, organizing, staffing, directing, and controlling. P/NP or letter grading.

**197. Special Topics in Management. (4)** Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

**199. Special Studies in Management. (2 to 8)** Discussion: three hours. Designed for juniors/seniors. Undergraduate individual investigation of selected research topic to be arranged with a faculty member. P/NP or letter grading.

## Graduate Courses

**200. Advanced Microeconomics. (4)** Seminar, three hours. Prerequisite: course 405. Economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence.

**201A. Business Forecasting: Turning Numbers into Knowledge. (4)** Discussion, three hours. Preparation: familiarity with linear regression. Examination of one approach to analytical thinking — forcing numerical and textual data into carefully formulated alternative models. Data studied include macroeconomic variables (growth, inflation, unemployment, interest rates, and exchange rates), industry data, and firm data. Letter grading.

**201B. Econometrics and Business Forecasting. (4)** Lecture, three hours. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

**202A. Regulation. (4)** Lecture, three hours. Prerequisite: course 405. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process.

**202B. Analytics of Competitive Strategy. (4)** Discussion, three hours. Prerequisites: courses 402, 405. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

**203A. Economics of Decision. (4)** Discussion, three hours. Preparation: basic probability theory. Basics of single-person decision theory and introduction to noncooperative game theory. Examination in some detail of von Neumann/Morgenstern expected utility theory. Other topics in decision theory include subjective expected utility theory and departures from expected utility behavior. S/U or letter grading.

**203B. Economics of Information. (4)** Discussion, three hours. Preparation: rudiments of economic theory of the firm, calculus, probability, and statistics. Prerequisite: course 203A. Optimal decision and information rules. Amount, cost, and value of information. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment.

**205A. International Business Economics. (4)** Prerequisite: course 405. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their influence on organization and operation of the international corporation.

**205B. Comparative Market Structure and Competition. (4)** Prerequisite: course 205A. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.

**205C. Business Forecasting for Foreign Economies. (4)** Prerequisite: course 201A. Forecasting changes in business activity, population, industrial structure, productivity, Gross Domestic Product and its components for selected countries. S/U or letter grading.

**207. Resource Administration of Nonmarket Activities. (4)** Seminar, three hours. Prerequisite: course 405. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

**208. Public Services and Private Functions. (4)** Prerequisites: courses 405, 406. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

**209. Selected Topics in Business Economics. (4)** Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

**210A. Mathematical Programming. (4)** Discussion, three hours. Preparation: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of areas. S/U or letter grading.

**210B. Applied Stochastic Processes. (4)** Discussion, three hours. Preparation: probability theory at level of Electrical Engineering 131A or Mathematics 170A or Statistics 100A. Topics include Poisson processes, renewal theory, Markov chains, and Markov decision processes, with emphasis on problem formulation, decision making, and characterization of optimal policies. Specific applications include traditional operations research topics (inventory, queueing, maintenance, reliability), as well as several in microeconomics (search and research and development). S/U or letter grading.

**210C. Network Flows and Integer Programming. (4)** Discussion, three hours. Preparation: linear programming. Survey course to (1) lay foundations for more advanced study of graphs, network flow models, and integer programming models and their applications, (2) establish connections between these technical foundations and real problems drawn from many areas of management, and (3) build professional skills needed to apply these tools. S/U or letter grading.

**211A. Nonlinear Mathematical Programming. (4)** Discussion, three hours. Prerequisites: course 210A, Mathematics 32A. Theory, methods, and applications of optimization for situations where models must be nonlinear, with special emphasis on case of "convexity." Topics include classical approaches to optimization, theory of optimality and duality, main computational approaches, and survey of currently available computer software. S/U or letter grading.

**211B. Large-Scale Mathematical Programming. (4)** Discussion, three hours. Prerequisite: course 210A. Theory, methods, and applications of optimization for situations where models are large and have special structure, as is often the case in real applications. Focus on ways of exploiting special structures with combinatorial, multidivisional, and stochastic aspects in pursuit of computational tractability. S/U or letter grading.

**212A. Decision Sciences Models I. (4)** Lecture, four hours. Prerequisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. S/U or letter grading.

**212B. Decision Sciences Models II. (4)** Lecture, four hours. Prerequisites: courses 402, 407. Broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

**213A. Intermediate Probability and Statistics. (4)** Discussion, three hours. Preparation: working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels. S/U or letter grading.

**213B. Statistical Methods in Management. (4)** Discussion, three hours. Prerequisite: course 402. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies. S/U or letter grading.

**213C. Introduction to Multivariate Analysis. (4)** Discussion, three hours. Preparation: working knowledge of differential and integral calculus of several variables, basic probability theory, and univariate mathematical statistics. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models). S/U or letter grading.

**214B. Behavioral Science Models. (4)** Discussion, three hours. Presentation of variety of models having specifically interdisciplinary flavor, with emphasis on their use in helping to understand human processes in variety of contexts. Special topics include everyday decision making, problem solving, learning, group behavior, persuasive communication, conformity and independence, and variety of topics in mass behavior. Emphasis is complementary to economics and often draws on ideas of game theory and probability theory. S/U or letter grading.

**215. Negotiations Analysis. (4)** Discussion, three hours. Series of negotiation exercises to foster development of students' negotiation skills and experience. Use of economic and game-theoretic concepts in debrief to gain insight and develop framework for finding the broad negotiation principles applicable. S/U or letter grading.

**215D. Time-Series Analysis. (4)** Discussion, three hours. Prerequisite: course 213B. Univariate Box-Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models, Granger causality, multiple time-series analysis. Numerous computer applications in modeling and forecasting. S/U or letter grading.

**216A. Simulation of Modeling and Analysis. (4)** Discussion, three hours. Preparation: probability theory, mathematical statistics, analytical modeling. Development of computer simulation models for managerial decision making under uncertainty or complex dynamics, with emphasis on simulation methodology such as design, validation, operating procedures, and interpretation of results. Application areas include finance, marketing, and production. S/U or letter grading.

**217A. Decision Analysis. (4)** Lecture, three hours. Prerequisite: course 402. Managerial decision making occurs in presence of uncertainty which can be about events over which no individual has any control or it can be about what other individuals will do. Framework provided for structuring and analyzing such decisions, with application of framework to such scenarios as product development, litigation, business of treasure hunting, and bidding. S/U or letter grading.

**217B. Game Theory. (4)** Discussion, three hours. Prerequisites: courses 402, 405. Theory of games plays increasingly important role as source of clear language and concepts for analysis of policy problems in every area. Introduction to subject, with emphasis on interpretation and application of ideas to variety of practical issues in management and public policy, and in practical questions of ethics, fairness, and bargaining. S/U or letter grading.

**218A. Selected Topics in Decisions, Operations, and Technology Management. (1 to 4)** Discussion, three hours. Newly developing topics of interest to Ph.D. students. Topics have included reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit. S/U or letter grading.

**218C. Selected Topics in Statistics. (1 to 4)** Discussion, three hours. Newly developing topics in statistics of interest to Ph.D. students. Important new statistical methods continue to emerge that go well beyond familiar topics encountered in introductory statistics in flexibility and power and in empirical techniques for prediction. These methods provide new tools for analysis of complex and nonlinear relationships and for handling difficult data sets. Description of most important of new methods, including non-parametric regression, clustering, recursive partitioning, and methods for analysis of similarity data, with emphasis on how to use them and interpret their results. Access to relevant software and hands-on practice. May be repeated for credit. S/U or letter grading.

**218X-218Y-218Z. Current Issues in Decisions, Operations, and Technology Management. (1 to 4 each)** Lecture, one hour; discussion, three hours. Series of seminars and field trips to (1) acquaint students with recent work not covered in regular curriculum and (2) help students build their personal professional networks through introduction to people from other organizations. In Progress and S/U grading.

**220. Corporate Financial Reporting. (4)** (Formerly numbered 220A, 220B.) Lecture, three hours. Requisite: course 403. In-depth treatment of significant corporate financial reporting issues to enhance understanding of financial statements and student ability to interpret and use information contained in these disclosures. Emphasis on economic substance of transactions. S/U or letter grading.

**222. Management Accounting. (4)** Lecture, three hours. Requisite: course 403. Nature and use of accounting data for management decisions. Economic rationale for management accounting techniques and limitations of such techniques. Topics include product costing, budgeting, cost control, forecasting, incentives, and performance evaluation. S/U or letter grading.

**224. Topics in Business Law. (4)** Lecture, three hours. Requisite: course 403. Topics-oriented course covering wide range of current legal issues that confront entrepreneurs and corporate managers. Topics include venture capital, business formation and integration, contracts, property rights, product marketing, employment, creditor claims, and bankruptcy. S/U or letter grading.

**226. Special Advanced Topics in Accounting. (4)** (Not the same as course 226 prior to Fall Quarter 2001.) Lecture, three hours. Requisite: course 403. Examination of advanced topics in accounting that arise in business combinations and international accounting practices, including principles underlying consolidated financial statements, treatment of unconsolidated subsidiaries and affiliate investments, translation of foreign exchange, and valuation of derivatives for hedging exchange risk. S/U or letter grading.

**227. Taxation and Management Decisions. (4)** (Formerly numbered 227A, 227B.) Lecture, three hours. Requisite: course 403. Examination of impact of taxes on decisions of businesses and investors. Effects of taxes on investment decisions, mergers and acquisitions, capital structure, dividend policies, and employee compensation. S/U or letter grading.

**228. Financial Statement Analysis. (4)** Lecture, three hours. Requisite: course 403. Examination of role of information contained in financial statements for assessing firm performance and estimating firm value. Consideration given to earnings manipulation, market efficiency, and evidence of anomalous pricing. S/U or letter grading.

**229A. Special Topics in Accounting. (4)** Lecture, three hours. Designed for Ph.D. students. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

**229B. Empirical Research in Accounting. (4)** Lecture, three hours. Preparation: training in econometrics. Designed for Ph.D. students. Introduction to empirical accounting literature, focusing on role that accounting information plays in formation of capital market prices.

**229X-229Y-229Z. Accounting Workshops. (1-1-2)** Discussion, two hours. Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U grading.

**230. Theory of Finance. (4)** Lecture, three hours. Requisite: course 408. Primary focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

**231A. Topics in Corporate Finance. (4)** Discussion, three hours. Requisite: course 230. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion. S/U or letter grading.

**231B. Nonprofit Sector Financial Policy. (4)** Discussion, three hours. Requisite: course 408. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organizations. Use of cases.

**231D. Takeovers, Restructuring, and Corporate Governance. (4)** Lecture, three hours. Requisite: course 230. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of the firm. S/U or letter grading.

**231E. Managing Finance and Financing the Emerging Enterprise. (4)** Requisites: courses 230, 403, 408. Designed for second-year graduate students. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to securing organizations' money requirements.

**232A. Security Analysis and Investment Management. (4)** Lecture, three hours. Requisite: course 230. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

**232B. Fixed-Income Markets. (4)** Lecture, three hours. Preparation: demonstrable training in statistics. Requisites: courses 230, 233A. Introduction to fixed-income markets: institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

**232D. Option Markets. (4)** Requisite: course 230. Organization and role of organized derivative markets, including listed and OTC options and futures: arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their strategies. S/U or letter grading.

**233A. Money and Capital Markets. (4)** Requisite: course 230. Application of interest theory and flow funds analysis to price determination process in markets for bonds, mortgages, stocks, and other financial instruments. Study of funds flow from credit markets. Analysis of costs of capital in individual industries.

**233B. Financial Institutions. (4)** Lecture, three hours. Requisite: course 230. Theory and practice of financial institutions and stock exchanges. Main topics include deposit insurance and regulation, international banking, market microstructure, and investment banking. S/U or letter grading.

**234A. International Financial Markets. (4)** Lecture, three hours. Requisites: courses 205A, 230. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

**234B. Financial Management of Multinational Corporations. (4)** Lecture, three hours. Requisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control.

**238. Special Topics in Finance. (4)** Requisite: course 230. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

**239A. Theory of Exchanges under Uncertainty. (4)** Requisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of exchange developed as introduction to theoretical literature on pricing of capital assets.

**239B. Theory of Investment under Uncertainty. (4)** Requisites: courses 230, 239A. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency.

**239C. Empirical Research in Finance. (4)** Discussion, three hours. Preparation: training in econometrics. Requisite: course 230. Primarily designed for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. In-depth study of empirical research in the field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. S/U or letter grading.

**239D. Ph.D. Seminar: Corporate Finance. (4)** Preparation: courses in 239 series. Requisite: course 230. Designed for Ph.D. students. Advanced topics in corporate finance theory and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

**239X-239Y-239Z. Finance Workshops. (1-1-2)** Discussion, 90 minutes. Designed for Ph.D. students. Intended to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**240A. Managing Service Operations. (4)** Discussion, three hours. Requisite: course 410. Design, management, improvement, and measurement of service and loyalty initiatives in variety of industries and organizations, with emphasis on understanding service and loyalty opportunities, their operating problems, and successful resolution. Extensive employment of cases. S/U or letter grading.

**240B. Operations Planning, Scheduling, and Control. (4)** Discussion, three hours. Requisite: course 407. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems. S/U or letter grading.

**240C. Design of Operational Systems. (4)** Discussion, three hours. Requisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs. S/U or letter grading.

**240D. Operations Strategy: Theory and Practicum. (4)** Discussion, three hours. Requisite: course 410. Definition and scope of operations strategy. Integrated framework for assuring crucial fit between operational strategies and corporation's strategic positioning. Cases used to illuminate strategic issues in both manufacturing and nonmanufacturing situations. Object of practicum, or applied strategy aspect of course, to provide students with skill in identifying operationally appropriate business processes and metrics required to implement enterprise's strategic position. S/U or letter grading.

**240E. Managing Entrepreneurial Operations. (4)** Lecture, three hours. Requisite: course 410. Designed for second-year graduate students. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodologies, principles, and concepts provided in requisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operations. S/U or letter grading.

**240F. Supply Chain Management. (4)** Lecture, three hours. Requisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid technological change, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries competition has moved from firm level to supply chain level. Provides understanding of strategic, tactical, and operational issues in supply chain management, with generous attention to emerging digital economy. S/U or letter grading.

**240G. Global Operations Strategy. (4)** Lecture, three hours. Requisite: course 410. Study of challenges of operating globally in range of industries, including software, consulting, automotive, and textile. Several opportunities for hands-on quantitative methods, with strategic perspective throughout. S/U or letter grading.

**241A. Technology Management. (4)** Discussion, three hours. Requisites: courses 410, 411. Management of high-technology firm, including acquisition, creation, and utilization of technology and knowledge assets. Research and product development, product and process technologies, technology regimes, high-technology markets, competition, and technology strategies. Case examples from sectors such as computing, telecommunications, e-business, medical devices, nanotechnology, advanced transportation systems, and electronics. S/U or letter grading.

**241B. Project Management. (4)** Discussion, three hours. Requisite: course 407. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions. S/U or letter grading.

**242A. Models for Operations Planning, Scheduling, and Control. (4)** Discussion, three hours. Designed for Ph.D. students with some knowledge of mathematical programming and stochastic processes. Foundations of operations planning, scheduling, and control, with emphasis on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed operations scheduling and control. S/U or letter grading.

**242B. Models for Operations Systems Design. (4)** Discussion, three hours. Requisite: course 210C. Designed for Ph.D. students. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational economies, capacity, location, facilities, processes/technology, work, and work structures. S/U or letter grading.

**243A. Planning for Facilities Systems. (4)** Discussion, three hours. Requisite: course 242B. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems. S/U or letter grading.

**243B. Inventory Theory. (4)** Discussion, three hours. Requisite: course 210B. General discussion of inventory models, with emphasis on characterizing form of optimal policies and efficient computational methods. Deterministic, stochastic, discrete-time, and continuous-time models. S/U or letter grading.

**243C. Scheduling Models for Intermittent Systems. (4)** Discussion, three hours. Requisite: course 242A. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man/machine interaction. S/U or letter grading.

**243X-243Y-243Z. Seminars: Decisions, Operations, and Technology Management Systems. (1-1-2)** Seminar, 90 minutes to three hours. Required of all Ph.D. students in decisions, operations, and technology management. Student, faculty, and guest speaker presentations of ongoing research. May be repeated for credit. S/U or letter grading.

**244X-244Y-244Z. Research in Decisions, Operations, and Technology Management. (1-1-2)** Lecture, three hours. Designed for first- and second-year Ph.D. students in decisions, operations, and technology management. Survey of research literature in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change. S/U or letter grading.

**245. Special Topics in Decisions, Operations, and Technology Management. (4)** Lecture, three hours. Designed for M.B.A. and Ph.D. students. Studies of advanced subjects of current interest in decisions, operations, and technology management. Emphasis on recent developments and application of specialized knowledge. Topics vary each term and have included strategy for information intensive industries, empirical research in operations management, analytical methods of operation research, introduction to management in information economy, and models for medical management. May be repeated for credit with topic change. S/U or letter grading.

**246C. Management in Public and Private Nonprofit Sectors. (4)** Designed for graduate students. Examination of roles and management systems of the three sectors of U.S. society; unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

**247A. Environment of the Art World. (4)** Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

**247B. Role of Management in Artistic Decision Making. (4)** Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**248A. Strategic Management in the Entertainment Industry. (4)** Discussion, three hours. Requisites: courses 403, 405, 406, 408, 420. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary markets (pay TV, videocassettes, syndication).

**249A. Special Topics in Public and Private Nonprofit Management. (4)** Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topic change.

**249B. Special Topics in Arts Management. (4)** Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

**M250A. Labor Relations: Process and Law. (4)** (Same as Policy Studies M232.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

**250B. Human Resource Management: Process and Law. (4)** Requisite: course M250A. Systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer/employee relations.

**250C. Behavioral Foundations of Human Resource Management. (4)** Requisite: course 250B. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

**251. Managing Human Resources. (4)** Management of people in organizations, designed for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

**252. Systems of Employee/Management Participation. (4)** Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

**M255. Comparative Industrial Relations. (4)** (Same as Policy Studies CM231.) Lecture, three hours; outside study, nine hours. Requisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

**257. Human Resource Management in Creative and Nonprofit Sectors. (4)** Designed for graduate students. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

**258. Selected Topics in Industrial Relations. (1 to 4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**259A. Individuals and Groups in Human Systems. (4)** Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, and small group studies. Variety of methods represented, including clinical and cross-cultural approaches. S/U or letter grading.

**259B. Advanced Studies in Human Resource Management. (4)** Lecture, three hours. Designed for graduate students. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

**M259C. Labor Markets and Public Policy. (4)** (Same as Policy Studies CM230.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. S/U or letter grading.

**260A. Market Assessment. (4)** Lecture, four hours. Requisite: course 411. Decision-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies. Letter grading.

**260B. Marketing Strategy and Planning. (4)** Lecture, three hours. Requisite: course 411. Development of a framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing process.

**261A. Management in the Distribution Channel. (4)** Lecture, three hours. Requisite: course 411. Examination of decisions in the distribution channel. Issues of power in the distribution channel and trade-offs between alternative channel systems.

**261B. Global Marketing Management. (4)** Lecture, three hours. Requisite: course 411. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

**262. Price Policies. (4)** Lecture, three hours. Requisites: courses 405, 411. Consideration of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

**263A. Consumer Behavior. (4)** Requisite: course 411. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

**264A. Marketing Research: Design and Evaluation. (4)** Lecture, three hours. Requisite: course 411. Designed for prospective users of research results rather than for specialists in research. Marketing research is an aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

**264B. Marketing Models and Market Response Analysis. (4)** Discussion, three hours. Requisite: course 411. Advanced topics in marketing research, with emphasis on quantitative tools to aid marketing decision making. Topics include demand and market share forecasting, conjoint analysis, market segmentation and cluster analysis, brand positioning and competitive market structures, and assessing market response to price, advertising, promotion, distribution, and sales force. Letter grading.

**265A. Brand Management. (4)** Lecture, three hours. Requisite: course 411. Introduction to considerations in development, implementation, and management of brands. Discussion of challenges to creating and maintaining strong brands. Topics include building brand knowledge and identities, marketing mix and brands, brand architectures, and brand equity. Letter grading.

**266A. Product Management. (4)** Lecture, three hours. Requisite: course 411. Investigation of process of developing new products and management of mature brands in existing markets. Regarding new product development, focus on concept screening, designing new products, and test marketing. Tactical management of marketing mix with currently available data emphasized in managing mature brands.

**266B. Advertising and Marketing Communications. (4)** Lecture, three hours. Requisite: course 411. Detailed review of use of communication tools in marketing. Critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies.

**268. Selected Topics in Marketing. (4)** Lecture, three hours. Requisite: course 411. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

**269A. Theory in Marketing. (4)** Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

**269B. Research in Marketing Management. (4)** Discussion, three hours. Designed for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

**269C. Quantitative Research in Marketing. (4)** Designed for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research.

**269D. Behavioral Research in Marketing. (4)** Designed for Ph.D. students who are conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives.

**269E. Special Research Topics in Marketing. (4)** Designed for Ph.D. students. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

**269X-269Y-269Z. Workshops: Marketing. (1-1-2)** Designed for Ph.D. students. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

**270A. Information Systems Applications. (4)** Lecture, three hours. Requisite: course 404. Fundamental concepts and uses of information systems in organizations. Systems for intraorganizational and interorganizational transaction, coordination, and control. Information technology for reengineering of business processes. Analysis and evaluation of systems and their impacts. S/U or letter grading.

**270B. Decision Support Systems. (4)** Lecture, three hours. Requisite: course 404. Systems for support of individual and group decision making and collaborative work. Expert and other knowledge-based systems and their applications. Fundamentals of human/computer interaction. S/U or letter grading.

**270C. Application Frontiers in Information Systems. (4)** Lecture, three hours. Requisite: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**271A. Information Systems Technology. (4)** Lecture, three hours. Requisite: course 404. Computing and communication platform specification, configuration, sizing, and selection for business applications — from hand-helds to workstations to mainframes. Open and proprietary architectures. Client/server. Comparative performance and cost analyses. Industry trends. S/U or letter grading.

**271B. Networks for Information Systems. (4)** Lecture, three hours. Requisite: course 404. Telecommunications technology. Design, implementation, and management of local and wide area networks for the firm. Security; protocols and standards; commercial value-added and public-access networks; Internet. Industry trends. S/U or letter grading.

**271C. Emergent Technologies in Information Systems. (4)** Discussion, three hours. Requisite: course 404. Special topics in new and emergent technologies such as multimedia, digital imaging, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**272A. Information Systems Development. (4)** Discussion, three hours. Methods and tools for information systems design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Classic and alternative approaches, such as rapid prototyping. System integration. Automated support. S/U or letter grading.

**273A. Information Systems Management. (4)** Discussion, three hours. Requisite: course 404. Managing information systems function within the enterprise. Role of chief information officer. Centralized and decentralized organizational designs. Outsourcing and other vendor relationships. Costing and pricing of services. Strategic planning. Management of information systems professionals. S/U or letter grading.

**274A. Special Topics in Information Systems. (4)** Discussion, three hours. Designed primarily for Ph.D. students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**274B. Workshop: Information Systems Research. (4)** Discussion, three hours. Designed for Ph.D. students. New developments in information systems theory, practice, and empirical research. In-depth consideration of research designs and methods. Presentation of student work-in-progress. May be repeated for credit. S/U or letter grading.

**274X-274Y-274Z. Current Research in Information Systems.** (1-1-2) Discussion, two hours. Designed for Ph.D. students. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U grading.

**278A. Urban Real Estate Financing and Investing.** (4) Discussion, three hours. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

**278B. Sources, Uses, and Flows of Real Estate Capital.** (4) Discussion, three hours. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

**279A. Special Studies in Urban Land Economics.** (4) Limited to master's or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit.

**279B. Selected Topics in Urban Land Economics.** (4) Discussion, laboratory, and fieldwork. Designed for second-year graduate students. Intended for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

**280A. Studies, Research Philosophies, and Methodology in Human Systems.** (4) Discussion, three hours. Designed for Ph.D. students. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

**280B. Personal and Professional Development.** (4) Discussion, three hours. Designed for Ph.D. students. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

**280C. Research Design in Human Systems Studies.** (4) Discussion, three hours. Designed for Ph.D. students. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and Ph.D. dissertations. May be repeated for credit. S/U or letter grading.

**281A. Sociotechnical Systems.** (4) Designed for graduate students. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

**281B. People in Organizations.** (4) Designed for graduate students. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

**282. Task Group Processes.** (4) Lecture, three hours. Requisite: course 281A or 281B. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Imparts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

**284A. Organization Design.** (4) Lecture, three hours. Requisite: course 281A or 281B. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on sociotechnical and differentiation/integration models. S/U or letter grading.

**284B. Organization Development.** (4) Discussion, three hours. Designed for graduate students. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

**284C. Managing Entrepreneurial Organizations.** (4) (Formerly numbered 295E.) Lecture, three hours. Issues involved in developing and managing entrepreneurial organizations. Topics include organizational growth, managerial tools, strategic planning, organizational design, management development, control systems, leadership, and cultural management. Examination of transitions that individuals must make as organizations grow. S/U or letter grading.

**285A. Leadership, Motivation, and Power.** (4) Discussion, three hours. Designed for graduate students. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles. S/U or letter grading.

**285B. Managerial Interpersonal Communication.** (4) Discussion, three hours. Designed for graduate students. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication styles and skills, considering verbal, nonverbal perceptual, and cross-cultural aspects. S/U or letter grading.

**286. Negotiations Behavior.** (4) Discussion, three hours. Presentation of theoretical principles and concepts from psychology, sociology, and economics through lectures and readings, with focus primarily on improving practical negotiating skills through experiential learning (i.e., negotiations simulations). Participants learn not only to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for most effective application of these skills. S/U or letter grading.

**287. Groups and Their Facilitation.** (4) Discussion, three hours. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including "sensitivity"/basic groups, group counseling, self-help groups, small groups, and committees in managerial decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

**288A. Selected Topics in Behavioral Science.** (4) Discussion, three hours. Designed for graduate students. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretic positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

**288B. Current Issues in Sociotechnical Systems and Organization Design.** (4) Discussion, three hours. Designed for graduate students. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

**288C. Selected Topics in Human Systems Studies and Organizational Behavior.** (4) Discussion, three hours. Designed for graduate students. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

**288D. Current Issues in Human Systems Change and Development through Consulting.** (4) Discussion, three hours. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosing, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

**288E. Proseminar: Behavioral and Organizational Sciences Colloquium.** (4) Discussion, three hours. Designed for graduate students. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

**290. Organization Theory.** (4) Lecture, three hours. Analysis of theory and practice of managerial function of planning and control. Implementation of objectives through policy formulation, decision making, and control. Individual projects and reports. S/U or letter grading.

**M292A. Research and Development Policy.** (4) (Formerly numbered 292A.) (Same as Policy Studies M280A.) Lecture, three hours. Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of and forecasting technological futures. S/U or letter grading.

**M292B. Growth, Science, and Technology.** (4) (Formerly numbered M202C.) (Same as Policy Studies M280B.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

**292C. Comprehensive Planning in Public Sector.** (4) Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

**293A. Political Environment of American Business.** (4) Lecture, three hours. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

**M293B. Morality of Capitalism.** (4) (Same as Political Science M211.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**293C. Ethical Considerations in Business. (4)** Lecture, three hours. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

**295A. Entrepreneurship and Venture Initiation. (4)** Exploration in entrepreneurship particularly concerned with formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

**295B. Small Business Management. (4)** Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their solution.

**295C. Corporate Entrepreneurship. (4)** Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

**295D. Business Plan Development. (4)** Lecture, three hours. Fundamentals of developing effective written business plans. Basic principles of developing plans for sales, marketing, product or service, operations, financials, and management and staffing functions of new startup businesses. S/U or letter grading.

**296A. International Business Management. (4)** Discussion, three hours. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociological, cultural, legal, political, and economic environmental characteristics on planning, structuring of organizational relationships, and coordination and control in multinational firms. S/U or letter grading.

**296B. International Comparative Management Research. (4)** Designed for Ph.D. students. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

**297A. Comparative and International Management. (4)** Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory. S/U or letter grading.

**297B. International Business Strategy. (4)** Discussion, three hours. Analysis of key strategic problems encountered by multinational corporations entering foreign markets. Application of concepts and theories acquired in other courses to series of complex cases on international business or by use of a complex simulation of competition in global markets. Letter grading.

**297C. International Business Law. (4)** Requisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

**297D. International Business Negotiations. (4)** Requisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

**297E. Business and Economics in Emerging Markets. (4)** Lecture, three hours. Requisite: course 205A or 405. Analysis of changing economic, political, demographic, and sociocultural conditions in developing countries as they affect the business environment. Process of economic growth, market-oriented reforms, and creation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

**298A. Special Topics in Management Theory. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298B. Special Topics in International and Comparative Management. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298C. Special Topics in Sociotechnical Systems. (4)** Designed for Ph.D. students. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298D. Special Topics in Management. (1 to 4)** Lecture, three hours. Designed for graduate students. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

**298X-298Y-298Z. Management Strategy and Policy Workshops. (1-1-2)** Discussion, three hours. Designed for Ph.D. students. Intended to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**299M. Ph.D. Seminar: Research Methodology. (4)** Discussion, three hours. Designed for Ph.D. students. Methodological issues in management research. Emphasis on identification of research opportunities and formulation and evaluation of a research proposal. Alternative goals, settings, and designs. Hypothesis development and testing. Measurement. Implementation considerations.

**299R. Research Methods in Management. (4)** Designed for Ph.D. students. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Mathematics for Management. (4)** Designed for graduate students. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and decision making in business firms. S/U grading.

**401A-401B. Managerial Problem Solving. (3-3)** Discussion, three hours. Use of international business simulation and series of complex multifaceted cases to learn to apply M.B.A. core disciplines in real-world globally focused business problems. In Progress and letter grading.

**402. Data Analysis, Statistics, and Decision Making. (4)** Lecture, four hours. Topics include probabilities, random variables (expectation, variance, covariance, normal random variables), decision trees, estimation, hypothesis testing, and multiple regression models. Emphasis on actual business problems and data. S/U or letter grading.

**403. Financial Accounting. (4)** Designed for graduate students. Introduction to fundamental financial accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of "the language of business" — accounting. S/U or letter grading.

**404. Information Systems. (4)** Lecture, three hours. Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.

**405. Managerial Economics. (4)** Lecture, four hours; discussion, one hour (when scheduled). Designed for graduate students. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on competition, market power, and externalities.

**406. Global Economy. (4)** Requisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in world economy affect economic growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments.

**407. Managerial Model Building. (4)** Lecture, three hours. Requisite: course 402. Introduction to uses of analytical methods for making strategic, tactical, and operational decisions arising from accounting, finance, marketing, and production, with focus on three key areas in problem solving: formal problem definition, computer model formulation, alternatives evaluation. Letter grading.

**408. Managerial Finance. (4)** Requisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of organization's resources.

**409. Managing Human Resources in Organizations. (4)** Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizational units as they influence the managerial process and development of prospective general managers.

**410. Operations Technology Management. (4)** Lecture, four hours. Requisites: courses 402, 403. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations. S/U or letter grading.

**411. Elements of Marketing. (4)** Requisites: courses 402, 403, 405. Principles of market-driven managerial decision making: consumer, competitor, and company analysis, market segmentation, definition of target markets, and product positioning. Management of marketing function: product and pricing decisions, channels of distribution, marketing communications. S/U or letter grading.

**412. Management of Organizations. (4)** Lecture, three hours. Preparation: completion of first-year core program. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce.

**413A. Personal Computing for Managers. (4)** Lecture, three hours. Designed for graduate students. Personal computing in support of strategic analysis, decision making, and management communication. Use of personal productivity tools and network resources. Accessing publicly available information. Emphasis on hands-on exercises. S/U or letter grading.

**413B. Advanced Topics in Managerial Computing. (4)** Lecture, three hours. Designed for graduate students. New information technology for personal computing by managers. In-depth study of a specific new technology. Extensive hands-on assignments. S/U or letter grading.

**420. Business Strategy. (4)** Lecture, four hours. Evaluation and formulation of organization's overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management's role in managing the policy process. S/U or letter grading.

**421A. Management Communications I. (1)** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.

**421B. Management Communications II. (1)** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective preparation of group writing assignments in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.

**422. Analysis and Communications. (4)** Discussion, three hours. Designed for graduate students. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organized around writing and speaking exercises. Personal attention to students' written communications and oral presentations.

**444A-444B. Management Field Study: Two-Quarter Plan. (4-4)** Fieldwork, four hours. Must be taken in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. In Progress and S/U or letter grading.

**445. Management Field Study: One-Quarter Plan. (8)** Fieldwork, eight hours. Must be taken in second year (or its equivalent for part-time students) and be based on client need and adviser approval. Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. Letter grading.

**451. Fieldwork in Organizational Development. (2 to 12)** Fieldwork, to be arranged. Prerequisite: course 2B4B. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings. S/U or letter grading.

**452. Fieldwork in Technical Assistance for Minority Business Enterprise. (1 to 4)** Preparation: completion of first year of master's program. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

**453. Fieldwork in Arts Management. (4 to 12)** Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

**454. Fieldwork in Organizations. (4)** Fieldwork, to be arranged. Preparation: completion of two terms of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal coursework. May not be repeated for credit. S/U grading.

**457. Fieldwork in Investment Management. (4)** Discussion, three hours. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Research in Management. (1 to 8)** Directed individual study or research. May be repeated. S/U or letter grading.

**597. Preparation for Qualifying Examinations. (4 or 12)** Preparation for master's comprehensive examination or Ph.D. qualifying examinations.

**598. Thesis Research in Management. (4 or 12)** Research for and preparation of master's thesis. May be repeated. S/U grading.

**599. Ph.D. Dissertation Research in Management. (4 or 12)** Research for and preparation of Ph.D. dissertation.

## Executive M.B.A. Program

**461. Managerial Problem Solving. (2)** Limited to Executive M.B.A. Program students. Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual's diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progress, working with others, and shaping the work culture.

**462. Economic Analysis for Managers. (4)** Limited to Executive M.B.A. Program students. Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm's optimal response to regulation.

**463. Data Analysis and Management Decisions under Uncertainty. (4)** Limited to Executive M.B.A. Program students. Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.

**464. Managerial Accounting. (4)** Limited to Executive M.B.A. Program students. Familiarizes the manager with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for internal planning and control.

**465. Quantitative Methods for Managers. (4)** Limited to Executive M.B.A. Program students. Survey of modeling approaches to managerial planning and decisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.

**466A-466B. Financial Policy for Managers. (4-2)** Limited to Executive M.B.A. Program students. Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework.

**467. Management Issues in Information Systems. (2)** Limited to Executive M.B.A. Program students. Growing role of information systems in the corporation and how they change ways of doing business. Examples from airlines, health, computer, communications, distribution, and publishing industries. Strategic, organizational, and societal implications.

**468. Economic Forecasting. (2)** Limited to Executive M.B.A. Program students. Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions.

**469. Management of Human Resources. (4)** Limited to Executive M.B.A. Program students. Introduction to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

**470A. Introduction to Action Research and Policy Analysis. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Provides methods of organizational and strategic analysis to determine relationship of the organization with its environment. In Progress grading (credit to be given only on completion of course 470D).

**470B. Strategic Overview. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Preparation of a strategic overview of a selected international company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys. In Progress grading (credit to be given only on completion of course 470D).

**470C. Action Research Project. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B). In Progress grading (credit to be given only on completion of course 470D).

**470D. Seminar: Policy Analysis. (2)** Lecture, two hours. Limited to Executive M.B.A. Program students. Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel. S/U or letter grading.

**472. Marketing Strategy and Policy. (4)** Limited to Executive M.B.A. Program students. Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

**473A. Managerial and Organizational Processes.** (2) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Macroanalytic issues, including intergroup relations, design and functioning of organizations, and relationships of organizations to their environment. S/U or letter grading.

**473B. Customer Information Strategy.** (2) Lecture, four hours every other week for 13 weeks. Limited to Executive M.B.A. Program students. Development of a customer orientation as a necessity for success in the highly competitive global marketplace, including principles of customer orientation, information as a strategic asset, customer equity, market forecasting, measuring effects of marketing investments, and customer response-based strategy. S/U or letter grading.

**474. Operations and Technology Management: Systems, Strategies, and Policies.** (4) Lecture, three hours. Limited to Executive M.B.A. Program students. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

**475. International Managerial Policies and Strategies.** (4) Limited to Executive M.B.A. Program students. Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies.

**476. Competitive Strategy and Business Policy.** (4) Limited to Executive M.B.A. Program students. Study of general management task of forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changing environments on business strategy.

**477. The Manager and Business/Society Relationships.** (4) Limited to Executive M.B.A. Program students. While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

**478. Selected Topics in Management.** (2 to 4) Seminar, 90 minutes to three hours. Limited to Executive M.B.A. Program students. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

Yang Yang, Ph.D.

#### Professors Emeriti

David L. Douglass, Ph.D.  
William Klement, Jr., Ph.D.  
John D. Mackenzie, Ph.D. (*Nippon Sheet Glass Company Professor Emeritus of Materials Science*)  
Aly H. Shabaik, Ph.D.  
George H. Sines, Ph.D.  
Christian N.J. Wagner, Dr.rer.nat.  
Alfred S. Yue, Ph.D.

#### Assistant Professors

Vidvuds Ozolins, Ph.D.  
Benjamin Wu, D.D.S., Ph.D.

#### Adjunct Professors

Harry Patton Gillis, Ph.D.  
John J. Gilman, Ph.D.  
Marek A. Przystupa, Ph.D.

#### Adjunct Assistant Professor

Eric P. Bescher, Ph.D.

## Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials that must simultaneously fulfill dimensional, property, quality control, and economic requirements.

The department also has a program in electronic materials that provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's Materials Engineering major. A joint major field, Chemistry/Materials Science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science).

The graduate program allows for specialization in one of the following fields: ceramics and ceramic processing, electronic and optical materials, and structural materials.

## Undergraduate Study

### Materials Engineering B.S.

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

#### The Major

Course requirements are as follows (182 or 183 minimum units required):

- Five core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102
- Materials Science and Engineering 88 (2 units), 110, 110L, 120, 130, 131, 131L, 132, 143A, 150, 160, 161L, 190, 191L; Mechanical and Aerospace Engineering 191A or 192A
- Three elective courses from Chemical Engineering C114, Civil and Environmental Engineering 130, 130F, 135A, Electrical Engineering 2, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C
- One course from Electrical Engineering 131A or Mathematics 170A or Statistics 100A, plus 8 additional units from Chemistry and Biochemistry 30A, 30AL, Materials Science and Engineering 197, or by petition, upper division courses from engineering, intermediate or advanced foreign language, mathematics, or physical or life sciences. Intermediate foreign language courses may be lower division
- Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15 or Computer Science 31 or Mechanical and Aerospace Engineering 20; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C (or Electrical Engineering 1)
- HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details

#### Electronic Materials Option

Course requirements are as follows (194 or 195 minimum units required):

- Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 10, 101, Materials Science and Engineer-

  - Four elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 131A, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 172L
  - Chemistry and Biochemistry 20A, 20B, 20L; Computer Science 31; Materials Science and Engineering 90L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C (or Electrical Engineering 1)
  - HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Materials Science and Engineering offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Materials Science and Engineering.

# Materials Science and Engineering

## Lower Division Courses

- 14. Science of Engineering Materials. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: Chemistry 20A, 20B, 20L, Physics 1A, 1B. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering. Letter grading.
- 88. Freshman Seminar: New Materials. (2)** Seminar, two hours; outside study, four hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics. Letter grading.
- 90L. Physical Measurement in Materials Engineering. (2)** Laboratory, four hours; outside study, two hours. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques. Letter grading.

## Upper Division Courses

- 110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Material). (4)** Lecture, three hours; laboratory, two hours. Requisite: course 14. Modern methods of materials characterization; fundamentals of crystallography, properties of X rays, X-ray diffraction; powder method, Laue method; determination of crystal structures; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures. Letter grading.
- 110L. Introduction to Materials Characterization A Laboratory. (2)** Laboratory, two hours; outside study, four hours. Requisite: course 14. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, lane method, crystal structure determination, and special projects. Letter grading.
- 111. Introduction to Materials Characterization B (Electron Microscopy). (4)** Lecture, three hours; laboratory, two hours. Requisites: courses 14, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments. Letter grading.
- 120. Physics of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 14, 110 (or Chemistry 113A). Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, dielectrical properties, and p-n junctions. Letter grading.
- 121. Materials Science of Semiconductors. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications. Letter grading.
- 121L. Materials Science of Semiconductors Laboratory. (2)** Lecture, 30 minutes; discussion, 30 minutes; laboratory, two hours; outside study, three hours. Corequisite: course 121. Experiments conducted on materials characterization, including measurements of contact resistance, dielectric constant, and thin film biaxial modulus and CTE. Letter grading.
- 122. Principles of Electronic Materials Processing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 14. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics. Letter grading.
- 123. Electronic Packaging and Interconnection. (2)** Lecture, two hours; outside study, six hours. Various electronic packaging methods and interconnection technologies. Design, fabrication, and testing of complex microelectronic components, interconnections, and assemblies. Letter grading.
- 130. Phase Relations in Solids. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 14, and Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions. Letter grading.

**131. Diffusion and Diffusion-Controlled Reactions. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth. Letter grading.

**131L. Diffusion and Diffusion-Controlled Reactions Laboratory. (2)** Laboratory, two hours; outside study, four hours. Corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory. Letter grading.

**132. Structure and Properties of Metallic Alloys. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness improvement. Grain boundary segregation. Letter grading.

**143A. Mechanical Behavior of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 14. Recommended: Civil Engineering 108. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications. Letter grading.

**150. Introduction to Polymers. (4)** Lecture, three hours; laboratory, two hours. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication. Letter grading.

**151. Structure and Properties of Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: at least two courses from 132, 143A, 150, 160. Requisite: course 14. Relationship between structure and mechanical properties of composite materials with fiber and particulate reinforcement. Properties of fiber, matrix, and interfaces. Selection of macrostructures and material systems. Letter grading.

**160. Introduction to Ceramics and Glasses. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 14, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering. Letter grading.

**161. Processing of Ceramics and Glasses. (4)** Lecture, four hours; discussion, one hour. Requisite: course 160. Study of processes used in fabrication of ceramics and glasses for structural applications, optics, and electronics. Processing operations, including modern techniques of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties relations in ceramics. Fracture analysis and design with ceramics. Letter grading.

**161L. Laboratory in Ceramics. (2)** Laboratory, four hours. Requisite: course 160. Recommended corequisite: course 161. Processing of common ceramics and glasses. Attainment of specific properties through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Glass melting and fabrication. Determination of chemical and physical properties. Letter grading.

**162. Electronic Ceramics. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 14, Electrical Engineering 100. Utilization of ceramics in microelectronics; thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and designs. Letter grading.

**CM180. Introduction to Biomaterials. (4)** (Formerly numbered M180.) (Same as Biomedical Engineering CM180.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: course 14, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM280. Letter grading.

**190. Materials Selection and Engineering Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 132, 150, 160. Explicit guidance among the myriad materials available for design in engineering. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials, coatings. Materials selection, treatment, and serviceability emphasized as part of successful design. Design projects. Letter grading.

**191L. Computer Methods and Instrumentation in Materials Science. (2)** Lecture, two hours; outside study, four hours. Preparation: knowledge of BASIC or C or assembly language. Limited to junior/senior Materials Science and Engineering majors. Interface and control techniques, real-time data acquisition and processing, computer-aided testing. Letter grading.

**197. Seminar: Technical Writing for Materials Engineers. (2)** Seminar, two hours; outside study, four hours. Corequisite: course 132 or 190 or 598 or 599. Types of technical documents and basic document patterns. Document planning, paragraph and sentence structures. Illustration and references. Reports, theses, and proposals. Oral presentation. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**200. Principles of Materials Science I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Lattice dynamics and thermal properties of solids, classical and quantized free electron theory, electrons in a periodic potential, transport in semiconductors, dielectric and magnetic properties of solids. Letter grading.

**201. Principles of Materials Science II. (4)** Lecture, three hours; outside study, nine hours. Requisite: course 131. Kinetics of diffusional transformations in solids. Precipitation in solids. Nucleation theory. Theory of precipitate growth. Ostwald ripening. Spinodal decomposition. Cellular reactions. Letter grading.

**221. Science of Electronic Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 120. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization. Letter grading.

**222. Growth and Processing of Electronic Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 120, 130, 131. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation. Letter grading.

**223. Materials Science of Thin Films. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 120, 131. Fabrication, structure, and property correlations of thin films used in microelectronics for data and information processing. Topics include film deposition, interfacial properties, stress and strain, electromigration, phase changes and kinetics, reliability. Letter grading.

**224. Deposition Technologies and Their Applications. (4)** Lecture, three hours; outside study, nine hours. Designed for graduate engineering students. Deposition methods used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-assisted vapor deposition processes, plasma spray, electrodeposition. Applications in semiconductor, chemical, optical, mechanical, and metallurgical industries. Letter grading.

**225. Materials Science of Surfaces. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 120, Chemistry 113A. Introduction to atomic and electronic structure of surfaces. Survey of methods for determining composition and structure of surfaces and near-surface layers of solid-state materials. Emphasis on scanning probe microscopy, Auger electron spectroscopy, X-ray photoelectron spectroscopy, ultraviolet photoelectron spectroscopy, secondary ion mass spectrometry, ion scattering spectroscopy, and Rutherford backscattering spectrometry. Applications in microelectronics, optoelectronics, metallurgy, polymers, biological and biocompatible materials, and catalysis. Letter grading.

**243A. Fracture of Structural Materials. (4)** Lecture, four hours; laboratory, two hours; outside study, four hours. Requisite: course 143A. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design. Letter grading.

**243C. Dislocations and Strengthening Mechanisms in Solids. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 143A or Mechanical and Aerospace Engineering 156B. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening. Letter grading.

**244. Electron Microscopy. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 111. Essential features of electron microscopy, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moiré fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory. Letter grading.

**245C. Diffraction Methods in Science of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 110. Theory of diffraction of waves (X rays, electrons, and neutrons) in crystalline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, solid-state transformations, arrangements of atoms in liquids and amorphous solids. Letter grading.

**246A. Mechanical Properties of Nonmetallic Crystalline Solids. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Material and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties. Letter grading.

**246B. Structure and Properties of Glass. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Structure of amorphous solids and glasses. Conditions of glass formation and theories of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure. Letter grading.

**246D. Electronic and Optical Properties of Ceramics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 160. Principles governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure on these properties. Electronic conduction, ferroelectricity, and photochromism. Magnetic ceramics. Infrared, visible, and ultraviolet transmission. Unique application of ceramics. Letter grading.

**250A. Analysis and Design of Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: one course from 143A, Electrical Engineering 175, Mechanical and Aerospace Engineering 156A, or 156B. Requisite: course 151. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composite analysis and design. Letter grading.

**250B. Advanced Composite Materials. (4)** Lecture, four hours; outside study, eight hours. Preparation: B.S. in Materials Science and Engineering. Requisite: course 151. Fabrication methods, structure and properties of advanced composite materials. Fibers; resin-, metal-, and ceramic-matrix composites. Physical, mechanical, and nondestructive characterization techniques. Letter grading.

**CM280. Introduction to Biomaterials. (4)** (Same as Biomedical Engineering CM280.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: course 14, or Chemistry 20A, 20B, and 20L. Engineering materials used in medicine and dentistry for repair and/or restoration of damaged natural tissues. Topics include relationships between material properties, suitability to task, surface chemistry, processing and treatment methods, and biocompatibility. Concurrently scheduled with course CM180. Letter grading.

**296. Seminar: Advanced Topics in Materials Science and Engineering. (2)** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in materials science and engineering. Discussion of current research and literature in research specialty of faculty members teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate materials science and engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474A. Advanced Transportation Systems. (4)** Lecture, four hours; outside study, eight hours. Survey of aerospace and advanced ground transportation systems, materials, structures, propulsion systems, control systems, communication systems, and infrastructure support. Letter grading.

**475A. Manufacturing Processes. (4)** Lecture, four hours; outside study, eight hours. Manufacturing properties of materials, thermomechanical processes, chemical and physical processes, material removal processes, packaging, fastening, joining and assembly, tooling and fixtures. Letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate materials science and engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

## Scope and Objectives

Gauss has called mathematics the “Queen of the Sciences.” It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

## Undergraduate Study

### Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C– in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the Mathematics Department majors.

### Preliminary Examination in Mathematics

If students wish to enroll in Mathematics 1, 3A, or 31A, they must pass the Mathematics Diagnostic Test.

The examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It is also given several times during the academic year. For specific dates and test locations, refer to the *Schedule of Classes* or the departmental website at <http://www.math.ucla.edu/undergrad/diagnostic.html>, or contact the Mathematics Student Services Office, 6356 Math Sciences.

### Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 4 or 5 receive 4 units of credit and Mathematics 31A equivalency; those with a score of 3 receive 4 units of calculus and analytic geometry credit. They may petition for 31A equivalency, or they may take course 31A at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students who take the BC Test and obtain a score of 4 or 5 receive 8 units of credit and Mathematics 31A, 31B equivalency; those

with a score of 3 receive 8 units of calculus and analytic geometry credit. They may petition for 31A, 31B equivalency, or they may take courses 31A, 31B at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 3 on the AB or BC examination should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA.

### Credit Limitations

Credit is given for at most one course in each of the following groups: (1) 3A, 31A; (2) 3B, 31B, 31E; (3) 3C, 32A; (4) 110A, 117.

Courses from only one of the following statistics sequences may be applied toward any mathematics major: (1) Statistics 100A (or Mathematics 170A), 100B, 100C or (2) Statistics 110A, 110B.

Mathematics 170A and Statistics 100A are not open for credit to students with credit for Electrical Engineering 131A.

Mathematics 2, 38A, 38B, and Statistics 10 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A and 151B are not open for credit to students with credit for Electrical Engineering 103.

Students may not take or repeat a mathematics course for credit if it is a requisite for a more advanced course for which they already have credit. This applies in particular to the repetition of courses (e.g., if students wish to repeat Mathematics 31B, they must do so before completing course 32A).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 131A and 131AH).

### Mathematics Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 142, 151A, and 164 are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

### Program in Computing Courses

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation, but who have no prior experience in computing.

Courses 10A, 10B, and 10C provide an extensive introduction to programming, using the C++ language. Courses 15, 20A, 20B, 20C, 30, 40A, 40B, and 60 are of interest to Letters and Science majors who are completing a specialization in Computing or who are planning to take upper division coursework in computer

science. These students should seek the advice of their major department.

### Undergraduate Majors

The department offers five majors: Mathematics, Applied Mathematics, Mathematics of Computation, Mathematics/Applied Science, and General Mathematics. The department also participates with the Economics Department in the Mathematics/Economics Interdepartmental Program, which offers a Mathematics/Economics major.

The Mathematics major is designed for students whose basic interest is mathematics; the Applied Mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the Mathematics of Computation major for individuals interested in the mathematical theory and the applications of computing; the Mathematics/Applied Science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the General Mathematics major for students planning to teach mathematics at the high school level. As part of the Mathematics/Applied Science major, the department offers programs for students interested in the fields of actuarial science, management/accounting, mathematics/history of science, medical and life sciences, and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

### Mathematics B.S.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, and two courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Life Sciences 1, Philosophy 31, 32, Physics 1B, 1C, 6B, 6C. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

#### Transfer Students

To be admitted as Mathematics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one calculus-based physics (mechanics) course, one C++ programming course, and two courses from general chemistry for majors, economics, symbolic logic, and calculus-based physics.

#### The Major

*Required:* Mathematics 110A, 110B, 115A, 120A, 131A, 131B, 132, and at least five elective courses from 106 through 199 and Statistics 100A through CM120B. The 12 courses must be passed with a minimum overall grade-point average of 2.0.

### Applied Mathematics B.S.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

#### Transfer Students

To be admitted as Applied Mathematics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, two calculus-based physics courses, one C++ programming course, and one course from general chemistry for majors or calculus-based physics.

#### The Major

*Required:* Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: *numerical analysis* — courses 151A and 151B, *probability and statistics* — courses 170A and 170B, or Statistics 100A and 100B, or 110A and 110B, *differential equations* — courses 135A and 135B; four courses from 106 through 199 and Statistics 100A through CM120B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall grade-point average of 2.0.

### Mathematics of Computation B.S.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C, Physics 1A, 1B, and one course from Chemistry and Biochemistry 20A, 20B, Physics 1C. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

#### Transfer Students

To be admitted as Mathematics of Computation majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, two calculus-based physics courses, three programming courses, and one course from general chemistry for majors or calculus-based physics.

#### The Major

*Required:* Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A, 151B, and six courses from 106 through 199 and Statistics 100A through CM120B; three upper division com-

puter science courses (12 units). The 14 courses must be passed with a minimum overall grade-point average of 2.0.

## Mathematics/Applied Science B.S.

The Mathematics/Applied Science major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial plan, management/accounting plan, mathematics/history of science plan, medical and life sciences plan, or operations research plan. In the past, Mathematics/Applied Science majors have combined the study of mathematics with fields such as atmospheric sciences, biochemistry, biology, chemistry, economics, geography, physics, psychology, and statistics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

### Transfer Students

To be admitted as Mathematics/Applied Science majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors and one C++ programming course. Additional courses are required for each concentration plan.

### The Major

*Required:* Fourteen courses, seven in the Mathematics Department selected from Mathematics 106 through 199 and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall grade-point average of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students are not admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

## Actuarial Plan

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1, 2, 11.

### The Major

*Required:* Seven mathematics/statistics courses, including Mathematics 115A, 151A, 164, 170A and 170B or Statistics 100A and 100B or 110A and 110B, and two courses from Mathematics 106 through 199 and Statistics 100C through CM120A; six outside courses, including Economics 101, 102, 160, one course from Economics 141A through 148, and two courses from Economics 103 through 199 and English Composition 131A through 131D.

## Management/Accounting Plan

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Management 1A, 1B.

### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 131A, 164, 170A or Statistics 100A or 110A, Mathematics 170B or Statistics 100B or 110B, and two courses from Mathematics 106 through 199 and Statistics 100C; seven management courses, including Management 120A, 120B, 122, 140, 212A, 212B, and one additional course from 108 through 190.

## Mathematics/History of Science Plan

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, and three courses from History 2B, 2D, 3A through 3D.

### The Major

*Required:* Eight Mathematics Department courses, including Mathematics 106, 115A, 131A, 135A, 170A, and three courses from 110A through 199; six outside courses to be selected from History 195A through 195E, Philosophy 124, Physiological Science M168, and any upper division Honors Collegium course with history of science/medicine content.

## Medical and Life Sciences Plan

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Chemistry and Biochemistry 20A, 20B, 20L, 30A, 30AL, Life Sciences 1, 2, 3, 4, Physics 1A, 1B.

### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 135A, 151A, 170A, 170B, and two courses from 110A through 199 and Statistics 100B through CM120B; six outside courses, including Physiological Science 111A, 111B, and 111C or M180A, M180B, and M180C, and three

courses from Biomathematics 110, Computer Science M196B, Physiological Science C100, C135 (appropriate courses from other departments may be substituted for some of the courses provided departmental consent is given before such courses are taken).

## Operations Research Plan

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 11, 100, Management 1A, Program in Computing 10A.

### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 115A, 131A, 151A, 151B, 170A or Statistics 100A or 110A, Statistics 100B or 110B, and one course from Mathematics 110A, 113, 117, 164, 167, 170B, 171, Statistics 100C; six outside courses, including Economics 101, Management 140, 212A, 212B, and two courses from Management 201A, 203A, 210A, 210B, 210C, 211A, 213A, 213C, 217A, 217B, 240B, 240C.

## General Mathematics B.S.

The General Mathematics major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the Mathematics, Applied Mathematics, or Mathematics of Computation major.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 1 or 6 sequence, Chemistry and Biochemistry 20A, 20B, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C–, and students must have a minimum overall grade-point average of 2.0 for the courses.

### Transfer Students

To be admitted as General Mathematics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one discrete structures course, one C++ programming course, and three courses from calculus-based physics, general chemistry for majors, and computing.

### The Major

*Required:* Mathematics 110A or 117, 115A, 120A or 123, 170A or Statistics 100A or 110A, one course from 131A through 136, one course from 142 through 167, and six elective courses from 105A through 199 and Statistics 100B, 100C, CM120A, CM120B.

## Honors

### Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

### Honors Program

Students majoring in Mathematics, Applied Mathematics, and Mathematics of Computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall grade-point average of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

## Computing Specialization

Majors in Mathematics, Applied Mathematics, Mathematics/Applied Science, or General Mathematics may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, two courses from 10C, 15, 20A, 20B, 30, 40, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C– in each course and a combined grade-point average of at least 2.0. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Subject Matter Preparation Program for Single Subject Credential in Mathematics

Students interested in obtaining a single subject secondary school credential in mathematics should consult with a departmental counselor regarding the requirements for a waiver from the Mathematics California Subject Examination for Teachers (CSET), which is required by the California Commission on

Teacher Credentialing. Students should meet with a departmental counselor as early in their undergraduate careers as possible because the program does require additional courses beyond the major requirements. For additional information on teaching credential requirements, consult the Department of Education at (310) 825-8328.

## Mathematics Minor

The Mathematics minor is designed to provide students with the opportunity to widen their background and general comprehension of the role of mathematics in various disciplines.

To enter the minor, students must have an overall grade-point average of 2.0 or better and meet with the undergraduate mathematics adviser in the Student Services Office, 6356 Math Sciences.

*Required Lower Division Courses (12 units):* Mathematics 32A, 33A, 33B.

*Required Upper Division Courses (20 units):* At least five courses (20 units) selected from Mathematics 106 through 199.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Mathematics offers the Masters of Arts in Teaching (M.A.T.) degree and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Mathematics.

## Mathematics

### Lower Division Courses

**1. Precalculus. (4)** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Requisite: successful completion of Mathematics Diagnostic Test. Function concept. Linear and polynomial functions and their graphs, applications to optimization. Inverse, exponential, and logarithmic functions. Trigonometric functions. P/NP or letter grading.

**2. Finite Mathematics. (4)** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Finite mathematics consisting of matrices, Gauss/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains. P/NP or letter grading.

**3A. Calculus for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 with a grade of C– or better. Not open for credit to students with credit in another calculus sequence. Techniques and applications of differential calculus. Introduction to the integral. P/NP or letter grading.

**3B. Calculus for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 3A with a grade of C– or better. Techniques and applications of integral calculus, introduction to differential equations and vector calculus. P/NP or letter grading.

**3C. Calculus and Probability for Life Sciences Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 3B with a grade of C– or better. Elementary probability, calculus-based probability, matrix algebra, and systems of differential equations. P/NP or letter grading.

**5. Mathematics and Science Scholars Excellence through Collaboration for Efficient Learners Workshop. (1)** Discussion, four hours. Corequisite: associated mathematics/science course such as Mathematics 31A, 32B, etc. Preferential enrollment to students admitted to Mathematics and Science Scholars Program. Development of intuition and problem-solving skills in collaborative learning environment. Students must fulfill total of 30 hours to receive credit. May be repeated for credit with topic and/or instructor change. P/NP grading.

**31A. Calculus and Analytic Geometry. (4)** Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 with a grade of C– or better. Differential calculus and applications; introduction to integration.

**31B. Calculus and Analytic Geometry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31A with a grade of C– or better. Transcendental functions; methods and applications of integration.

**31BH. Calculus and Analytic Geometry (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 31B.

**31E. Calculus for Economics Students. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31A with a grade of C– or better. Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus for applications to economics. Partial differentiation, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained optimization. P/NP or letter grading.

**32A. Calculus of Several Variables. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31B with a grade of C– or better. Introduction to differential calculus of several variables, vector field theory. P/NP or letter grading.

**32AH-32BH. Calculus of Several Variables (Honors). (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 31B with a grade of B or better. Honors sequence parallel to courses 32A, 32B.

**32B. Calculus of Several Variables. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C– or better. Introduction to integral calculus of several variables, line and surface integrals. P/NP or letter grading.

**33A. Linear Algebra and Applications. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C– or better. Introduction to linear algebra: linear maps, inner product spaces, determinants, eigenvalues, eigenvectors, systems. P/NP or letter grading.

**33AH. Matrices and Differential Equations (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 33A. P/NP or letter grading.

**33B. Infinite Series and Differential Equations. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32A with a grade of C- or better. Infinite sequences and series; applications; solving first-order, highest-order constant coefficients; linear systems of differential equations. P/NP or letter grading.

**33BH. Infinite Series (Honors). (4)** (Formerly numbered 31CH.) Lecture, three hours; discussion, one hour. Honors course parallel to course 33B. P/NP or letter grading.

**35AH-35BH-35CH. Intermediate Calculus (Honors). (4-4-4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 31B. Introduction to matrix theory, differential equations, and systems of differential equations. Differential calculus of several variables. Integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

**38A-38B-38C. Concepts of Elementary School Mathematics. (4-4-4)** (Course 38C is formally numbered 104.) Lecture, four hours. Not open to freshmen. Courses 38A, 38B, and 38C form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. Counting numbers and other subsystems of real numbers, arithmetic operations and algorithms, place value; algebraic thinking, function concept; geometry of basic figures in plane and in space, measurement, symmetry; elementary probability and data analysis. Emphasis on problem solving, mathematics reasoning, and sense-making procedures. P/NP or letter grading.

**61. Introduction to Discrete Structures. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, Program in Computing 10A. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras. P/NP or letter grading.

**99. Mathematics and Science Scholars Seminar. (2 to 4)** (Formerly numbered 98.) Lecture, two hours; discussion, eight hours. Exploration of careers in mathematics and physical sciences; problem-solving techniques through collaboration. May not be applied toward Letters and Science general education requirements. P/NP grading.

## Upper Division Courses

### General and Teacher Training

**105A-105B. Teaching of Mathematics. (4-4)** Lecture, four hours. Designed for senior Mathematics Department majors. Course 105A is requisite to 105B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. P/NP or letter grading.

**106. History of Mathematics. (4)** Requisite: course 3A or 31A. Roots of modern mathematics in ancient Babylonia and Greece, development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus, selected topics in modern mathematics. P/NP or letter grading.

### Algebra, Number Theory, and Logic

**110A-110B. Algebra. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. **110A.** Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups.

**110AH-110BH. Algebra (Honors). (4-4)** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A, 110B.

**110C. Algebra. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 110A, 110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

**111. Theory of Numbers. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

**M112. Introduction to Set Theory. (4)** (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 31B or Philosophy 32. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**113. Combinatorics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

**114A-114B. Logic and Computability. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; Herbrand expansions. Effectively computable, Turing computable, and recursive functions; thesis of Church. Universal functions; unsolvability results. Recursive and recursively enumerable sets; recursive enumerability of valid sentences. Formal number theory; definability of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. P/NP or letter grading.

**115A-115B. Linear Algebra. (4-4)** Lecture, three hours; discussion, one hour. P/NP or letter grading.

**115A.** Requisite: course 33A. Abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigenvector theory. **115B.** Requisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation. Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

**115AH. Linear Algebra (Honors). (4)** Lecture, three hours; discussion, one hour. Honors course parallel to course 115A.

**116. Mathematical Cryptology. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Program in Computing 130. Introduction to mathematical cryptology using methods of number theory, algebra, probability. Topics include symmetric and public-key cryptosystems, one-way functions, signatures, key exchange, groups, primes, pseudoprimes, primality tests, quadratic reciprocity, factoring, rho method, RSA, discrete logs. P/NP or letter grading.

**117. Algebra for Applications. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

## Geometry and Topology

**120A-120B. Differential Geometry. (4-4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature, Gaussian curvature, congruence of curves and surfaces, intrinsic geometry of surfaces, isometries, geodesics, Gauss/Bonnet theorem. P/NP or letter grading.

**121. Introduction to Topology. (4)** Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

**123. Foundations of Geometry. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

## Analysis

**131A-131B. Analysis. (4-4)** Lecture, three hours; discussion, one hour. **131A.** Requisites: courses 32B, 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity. **131B.** Requisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

**131AH-131BH. Analysis (Honors). (4-4)** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A, 131B.

**131AX. Analysis Techniques. (1)** Lecture, one hour. Requisite: course 33B. Corequisite: course 131A. Review of elementary techniques of mathematics and their applications to topics in analysis, such as geometric and algebraic constructions, least upper bound axiom, etc. P/NP or letter grading.

**131C. Topics in Analysis. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 131A, 131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

**132. Complex Analysis for Applications. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

**133. Introduction to Fourier Analysis. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Fourier series, Fourier transform in one and several variables, finite Fourier transform. Applications, in particular, to solving differential equations. Fourier inversion formula, Plancherel theorem, convergence of Fourier series, convolution. P/NP or letter grading.

**135A-135B. Ordinary Differential Equations. (4-4)** Lecture, three hours; discussion, one hour. P/NP or letter grading. **135A.** Requisites: courses 33A, 33B. Basic procedures and techniques for solving differential equations; linearity, basis of solutions, variation of parameters, Green's function; systems of equations; constant coefficient equations, matrix differential equations, method of eigenvalues and eigenvectors. **135B.** Requisite: course 135A. Laplace transform method; existence and uniqueness results; series solutions at regular singular points; Sturm/Liouville problems, orthogonal series, eigenfunction expansions; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions; selected applications.

**136. Partial Differential Equations. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables, eigenfunction expansions; selected topics, as method of characteristics for nonlinear equations.

## Applied Mathematics

**142. Mathematical Modeling. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physical sciences, biology, economics, and traffic dynamics.

**143. Analytic Mechanics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass; related topics in applied mathematics.

**146. Methods of Applied Mathematics. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

**149. Mathematics of Computer Graphics. (4)** Lecture, three hours; discussion, one hour. Requisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

**151A-151B. Applied Numerical Methods. (4-4)** Lecture, three hours; discussion, one hour. Introduction to numerical methods with emphasis on algorithms, analysis of algorithms, and computer implementation issues. Letter grading. **151A.** Requisites: courses 32B, 33B, 115A, Program in Computing 10A. Solution of nonlinear equations. Numerical differentiation, integration, and interpolation. Direct methods for solving linear systems. **151B.** Requisite: course 151A. Numerical solution of differential equations. Approximation theory, iterative solutions of linear equations, solution of nonlinear systems, two-point boundary value problems, optimization.

**153. Numerical Methods for Partial Differential Equations. (4)** Lecture, three hours; discussion, one hour. Requisites: courses 151A, 151B. Introduction to first- and second-order linear partial differential equations. Finite difference and finite element solution of elliptic, hyperbolic, and parabolic equations. Method of lines and Rayleigh/Ritz procedures. Concepts of stability and accuracy. Letter grading.

**157. Software Techniques for Scientific Computation. (4)** Lecture, three hours; discussion, one hour. Requisites: course 151A, Program in Computing 10C. Software structures, concepts, and conventions that support object-oriented programming. Identification of class structure, problem partitioning, and abstraction. Design and implementation of computer applications requiring scientific computation, visualization, and GUI components. Interlanguage interfacing. P/NP or letter grading.

**164. Optimization. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Electrical Engineering 136. Fundamentals of optimization. Linear programming: basic solutions, simplex method, duality theory. Unconstrained optimization, Newton method for minimization. Nonlinear programming, optimality conditions for constrained problems. Additional topics from linear and nonlinear programming. P/NP or letter grading.

**167. Mathematical Game Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 115A. Quantitative modeling of strategic interaction. Topics include extensive and normal form games, background probability, lotteries, mixed strategies, pure and mixed Nash equilibria and refinements, bargaining; emphasis on economic examples. Optional topics include repeated games and evolutionary game theory. P/NP or letter grading.

## Probability

**170A. Probability Theory. (4)** (Formerly numbered M170A.) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Not open to students with credit for Electrical Engineering 131A or Statistics 100A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

**170B. Probability Theory. (4)** Lecture, three hours; discussion, one hour. Requisite: course 170A or Statistics 100A. Convergence in distribution, normal approximation, laws of large numbers, Poisson processes, random walks. P/NP or letter grading.

**171. Stochastic Processes. (4)** Lecture, three hours; discussion, one hour. Requisite: course 170A or Statistics 100A. Discrete Markov chains, continuous-time Markov chains, renewal theory. P/NP or letter grading.

**172A-172B. Actuarial Mathematics. (4-4)** Lecture, four hours. Letter grading. **172A.** Requisite: course 170A or Statistics 100A or 110A. Annuities, amortization, life annuities, pension applications. **172B.** Requisite: course 172A. Multiple life functions, applications to life insurance, pensions, and health insurance.

**181. Mathematics of Finance. (4)** Lecture, three hours; discussion, one hour. Requisites: course 33A, Economics 11, and Statistics 110A or equivalent background in calculus-based probability. Modeling, mathematics, and computation for financial securities. Price of risk. Random walk models for stocks and interest rates. No-arbitrage theory for pricing derivative securities; Black/Scholes theory. European and American options. Monte Carlo, trees, finite difference methods. P/NP or letter grading.

## Special Studies

**190. Honors Mathematics Seminar. (4)** Seminar, three hours. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

**192. Problem Solving. (4)** Lecture, three hours; discussion, one hour. Requisite: course 33B with a grade of C- or better. Problem-solving techniques and mathematical topics useful as preparation for Putnam Examination and similar competitions. Continued fractions, inequalities, modular arithmetic, closed form evaluation of sums and products, problems in geometry, rational functions and polynomials, other nonroutine problems. Participants expected to take Putnam Examination. Letter grading.

**197. Advanced Topics in Mathematics. (4)** Lecture, three hours. Variable topics course in mathematics that covers material not covered in regular mathematics upper division curriculum. May be repeated for credit with topic and/or instructor change. P/NP or letter grading.

**199. Special Studies in Mathematics. (1 to 4)** At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

## Graduate Courses

### Teacher Preparation

**201A-201B-201C. Topics in Algebra and Analysis. (4-4-4)** Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

**202A-202B. Mathematical Models and Applications. (4-4)** Preparation: bachelor's degree in mathematics. Designed for mathematics/education program students. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

### Number Theory

**205A-205B-205C. Number Theory. (4-4-4)** Lecture, three hours. Requisites: courses 210A, 246A. Algebraic number theory, including ideal theory, valuations, local fields, cyclotomic fields. Introduction to class-field theory, analytic number theory, L-functions and class number formulas, and modular forms. S/U or letter grading.

**206A-206B. Combinatorial Theory. (4-4)** Generating functions. Probabilistic methods. Polya theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

**207A-207B-207C. Topics in Number Theory. (4-4-4)** Lecture, three hours. Requisites: courses 205A, 205B, 205C. Adelic analysis on  $GL(1)$  and  $GL(2)$ , especially Tate thesis and Hecke theory, automorphic representations. Special values of L-functions and p-adic L-functions, arithmetic theory of modular forms, advanced topics in analytic number theory. Arithmetic geometry, especially of modular curves. S/U or letter grading.

**208A-208B. Topics in Applied Number Theory. (4-4)** Lecture, three hours. Basic number theory, including congruences and prime numbers. Cryptography: public-key and discrete log cryptosystems. Attacks on cryptosystems. Primality testing and factorization methods. Elliptic curve methods. Topics from coding theory: Hamming codes, cyclic codes, Gilbert/Varshamov bounds, Shannon theorem. S/U or letter grading.

## Algebra

**210A-210B-210C. Algebra. (4-4-4)** Requisites: courses 110A, 110B, 110C. Students with credit for courses 110B and/or 110C cannot receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

**211. Structure of Rings. (4)** Requisite: course 210A. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

**212. Homological Algebra. (4)** Requisite: course 210A. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

**213A-213B. Theory of Groups. (4-4)** Requisite: course 210A. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

**214A-214B. Introduction to Algebraic Geometry. (4-4)** Requisite: course 210A. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

**215A-215B. Commutative Algebra. (4-4)** Requisite: course 210A. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

**216. Further Topics in Algebraic Geometry. (4)** Requisites: courses 214A, 214B. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

**M217. Geometry and Physics. (4)** (Same as Physics M236.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

## Logic and Foundations

**220A-220B-220C. Mathematical Logic and Set Theory. (4-4-4)** Lecture, three hours. Requisite: course M112. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing. S/U or letter grading.

**222A-222B. Lattice Theory and Algebraic Systems. (4-4)** Lecture, three hours. Requisite: course 210A. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

**223A. Model Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

**223B. Set Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

**223C. Recursion Theory. (4)** Requisites: courses 220A, 220B, 220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

**223D. Descriptive Set Theory. (4)** Requisites: courses 220A, 220B, 220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

## Geometry and Topology

**225A. Differentiable Manifolds. (4)** Lecture, three hours. Requisites: courses 121, 131A, 131B. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes theorem on manifolds.

**225B. Introduction to Algebraic Topology. (4)** Lecture, three hours. Requisite: course 225A. Elementary concepts of homotopy theory; covering spaces and fundamental group. Singular homology theory, axioms of homology, Mayer/Vietoris sequence, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

**225C. Further Topics in Geometry and Topology. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Topics may include cohomology (singular, cellular, de Rham), duality theorems, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

**226A-226B-226C. Differential Geometry. (4-4-4)** Lecture, three hours. Requisite: course 225A. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

**227A-227B. Algebraic Topology. (4-4)** Lecture, three hours. Requisite: course 225B. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

**229A-229B-229C. Lie Groups and Lie Algebras. (4-4-4)** Preparation: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell/Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Semi-simple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl character formula.

**233. Partial Differential Equations on Manifolds. (4)** Lecture, three hours. Requisites: courses 226A, 251A. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

**234. Topics in Differential Geometry. (4)** Lecture, three hours. Requisites: courses 226A, 226B. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

**235. Topics in Manifold Theory. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

**236. Topics in Geometric Topology. (4)** Lecture, three hours. Requisites: courses 225A, 225B. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

**237. Topics in Algebraic Topology. (4)** Lecture, three hours. Requisites: courses 227A, 227B. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

**238A-238B. Dynamical Systems. (4-4)** Lecture, three hours. Recommended preparation: first-year analysis courses. Topics include qualitative theory of differential equations, bifurcation theory, and Hamiltonian systems; differential dynamics, including hyperbolic theory and quasiperiodic dynamics; ergodic theory; low-dimensional dynamics. S/U or letter grading.

## Analysis and Differential Equations

**240. Methods of Set Theory. (4)** Lecture, three hours. Requisites: courses 110A, 110B, 121, 131A, 131B. Naive, axiomatic set theory, axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, Stone representation theorem. Applications to analysis and topology: Cantor/Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet theorem.

**245A-245B-245C. Real Analysis. (4-4-4)** Lecture, three hours. Requisites: courses 121, 131A, 131B. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ .

**246A-246B-246C. Complex Analysis. (4-4-4)** Requisites: courses 131A, 131B. Students with credit for course 132 cannot receive M.A. degree credit for course 246A. Cauchy/Riemann equations. Cauchy theorem. Cauchy integral formula and residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. Classical transcendental functions. Elliptic functions.

**247A-247B. Classical Fourier Analysis. (4-4)** Lecture, three hours. Requisites: courses 245A, 245B, 246A. Distribution on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ . Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on  $\mathbb{R}^n$ . Distributions with compact or one-sided supports and their complex Fourier transforms.

**250A. Ordinary Differential Equations. (4)** Requisite: course 246A. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and nth order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

**250B. Nonlinear Ordinary Differential Equations. (4)** Requisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. Poincaré/Bendixson theory.

**250C. Advanced Topics in Ordinary Differential Equations. (4)** Requisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

**251A. Introductory Partial Differential Equations. (4)** Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

**251B-251C. Topics in Partial Differential Equations. (4-4)** In-depth introduction to topics of current interest in partial differential equations or their applications.

**252A-252B. Topics in Complex Analysis. (4-4)** Lecture, three hours. Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasi-conformal mappings. Topics vary from year to year. S/U or letter grading.

**253A-253B. Several Complex Variables. (4-4)** Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Introduction to analytic functions of several complex variables. The d-bar problem, Cousin problems, domains of holomorphy, complex manifolds.

**254A-254B. Topics in Real Analysis. (4-4)** Requisites: courses 245A, 245B, 245C, 246A, 246B, 246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

## Functional Analysis

**255A. Functional Analysis. (4)** Requisites: courses 245A and 245B, or 265A and 265B, and 246A. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and  $C(X)$ .

**255B-255C. Topics in Functional Analysis. (4-4)** Requisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

**256A-256B. Topological Groups and Their Representations. (4-4)** Lecture, three hours. Requisite: course 255A. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups. S/U or letter grading.

**259A-259B. Operator Algebras in Hilbert Space. (4-4)** Requisites: courses 255A, 255B, 255C. Selected topics from theories of  $C^*$  and von Neumann algebras. Applications.

## Applied Mathematics

**260. Introduction to Applied Mathematics. (4)** Requisite: course 142. Construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

**M261. Game Theory. (4)** (Same as Economics M214B and Political Science M208A.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

**264. Applied Complex Analysis. (4)** Requisite: course 246A. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

**265A-265B. Real Analysis for Applications. (4-4)** Requisites: courses 131A, 131B. Not open for credit to students with credit for courses 245A, 245B, 245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation,  $L^2$ - and  $L^p$ - spaces. Fourier series. General measure and integrations, Fubini and Radon/Nikodym theorems, representation of functionals, Fourier integrals.

**266A. Applied Ordinary Differential Equations. (4)** Lecture, three hours. Requisites: courses 131A, 131B, 132, and 135A and 135B, or 146. Spectral theory of regular boundary value problems and examples of singular Sturm/Liouville problems, related integral equations, phase/plane analysis of nonlinear equations. S/U or letter grading.

**266B-266C. Applied Partial Differential Equations. (4-4)** Requisite: course 266A. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

**266D-266E. Applied Differential Equations. (4-4)** Requisites: courses 266A, 266B, 266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

**268A. Applied Functional Analysis. (4)** Lecture, three hours. Requisites: courses 115A, 115B, 131A, 131B, 132. Topics may include Hilbert spaces, distributions, Fourier transforms,  $L^2$ -space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint and unitary operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

**268B-268C. Topics in Applied Functional Analysis. (4-4)** Requisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

**269A-269B-269C. Advanced Numerical Analysis. (4-4-4)** Lecture, three hours. Requisites: courses 115A, 135A, 151A, 151B. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra. S/U or letter grading.

**270A-270F. Mathematical Aspects of Scientific Computing. (4 each)** Lecture, three hours. Requisites: courses 115A, 151A, 151B, Program in Computing 10A. S/U or letter grading:

**270A.** Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

**270B-270C.** Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

**270D-270E.** Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudo-spectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

**270F.** Parallel Numerical Algorithms. Requisites: courses 270B, 270C. Recommended: courses 270A, 270D, 270E. Design, analysis, and implementation of numerical algorithms on modern vector and parallel computers. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

**271A. Tensor Analysis. (4)** Requisite: course 131A. Algebra and calculus of tensors on  $n$ -dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

**271B. Analytical Mechanics. (4)** Preparation: prior knowledge of mechanics. Requisite: course 271A. Newtonian and Lagrangian equations. Hamilton principle. Principle of least action. Holonomic and non-holonomic systems. Hamilton canonical equations, contact transformations, applications.

**271C. Introduction to Relativity. (4)** Preparation: prior knowledge of mechanics. Requisite: course 271A. Restricted theory of relativity. Extensions to general theory. Relativistic theory of gravitation.

**271D. Wave Mechanics. (4)** General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

**272A. Foundations of Continuum Mechanics. (4)** Lecture, three hours. Kinematic preliminaries, conservation laws for mass, momentum and energy, entropy production, constitutive laws. Linear elasticity, inviscid fluid, viscous fluid. Basic theorems of fluid mechanics. Simple solutions. Low Reynolds number flow, Stokes drag. High Reynolds number flow, boundary layers. Two-dimensional potential flow, simple aerofoil. Compressible flow, shocks.

**272B. Mathematical Aspects of Fluid Mechanics. (4)** Lecture, three hours. Requisite: course 272A. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

**272C. Magnetohydrodynamics. (4)** Lecture, three hours. Requisite: course 272A. Basic electromagnetism. Steady flows, Hartmann layers. Alfvén theorem and waves. Compressible media. Magnetostatic equilibria and stability.

**272D. Rotating Fluids and Geophysical Fluid Dynamics. (4)** Lecture, three hours. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem, Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up. Shallow-water theory, wind-driven ocean circulation. Effects of stratification, Bénard convection. Baroclinic instability, Eady model. S/U or letter grading.

**273. Optimization, Calculus of Variations, and Control Theory. (4)** Application of abstract mathematical theory to optimization problems of calculus of variations and control theory. Abstract nonlinear programming and applications to control systems described by ordinary differential equations, partial differential equations, and functional differential equations. Dynamic programming.

**274A. Asymptotic Methods. (4)** Lecture, three hours. Requisite: course 132. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. S/U or letter grading.

**274B-274C. Perturbation Methods. (4-4)** Lecture, three hours. Requisite: course 266A. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

## Probability and Statistics

**275A-275B. Probability Theory. (4-4)** Requisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

**275C. Stochastic Processes. (4)** Lecture, three hours. Requisite: course 275B. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

**275D. Stochastic Calculus. (4)** Lecture, three hours. Requisite: course 275C. Stochastic integration, stochastic differential equations, Ito formula and its applications. S/U or letter grading.

**275E. Stochastic Particle Systems. (4)** Lecture, three hours. Requisite: course 275C. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading.

**M282A-M282B. Applied Probability. (4-4)** (Same as Statistics M220A-M220B.) Lecture, three hours. Requisite: course 170A or Statistics 100A. S/U or letter grading. **M282A.** Conditioning, Markov chains, Poisson process, Brownian motion, stationary processes, applications. **M282B.** Simulation, renewal theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology.

## Special Studies

**285A-285N. Seminars. (4 each)** Seminar, three hours. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading:

**285A.** History and Development of Mathematics.

**285B.** Number Theory.

**285C.** Algebra.

**285D.** Logic.

**285E.** Geometry.

**285F.** Topology.

**285G.** Analysis.

**285H.** Differential Equations.

**285I.** Functional Analysis.

**285J.** Applied Mathematics.

**285K.** Probability.

**285N.** Dynamical Systems.

**290. Seminar: Current Literature. (4)** Designed for Ph.D. students. Readings and presentations of papers in mathematical literature under supervision of a staff member.

**296A-296N. Participating Seminars. (1 to 4 each)** Seminars and discussion by staff and students. S/U grading:

**296A.** History and Development of Mathematics.

**296B.** Number Theory.

**296C.** Algebra.

**296D.** Logic.

**296E.** Geometry.

**296F.** Topology.

**296G.** Analysis.

**296H.** Differential Equations.

**296I.** Functional Analysis.

**296J.** Applied Mathematics.

**296K.** Probability.

**296M.** Mathematics.

**296N.** Dynamical Systems.

**330. Observation and Participation: Mathematics and Science Instruction. (1 to 2)** Seminar, one hour; classroom observation and participation, two hours. Observation, participation, or tutoring in mathematics and science classes at middle school and secondary levels. May be repeated for credit. P/NP (undergraduates) or S/U (graduates) grading.

**370A-370B. Teaching of Mathematics. (4-4)** Lecture, three hours; discussion, one hour. Requisite: course 33B. Limited to senior Mathematics Department majors. Course 370A is requisite to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from a problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Mathematics. (2)** Seminar, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new Ph.D. students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

**495B. Technology and Teaching. (2 to 4)** Seminar, two hours; laboratory, one hour (when scheduled). Requisite: course 495. Focus on undergraduate mathematics instruction. Web-based electronic communication, using technology for class organization, use of presentation software packages, and creation of electronic teaching portfolio. Provides mechanics of technology and forum for evaluation and comparison of technology in undergraduate mathematics teaching. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (8 units) may be applied toward M.A. degree unless departmental consent is obtained. S/U or letter grading.

**599. Research in Mathematics. (2 to 12)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Study and research for Ph.D. dissertation. May be repeated for credit. S/U grading.

## Program in Computing

### Lower Division Courses

**1. Introduction to Computers and Computing. (4)** Lecture, three hours; laboratory, one hour. Not open for credit to students with credit for course 1S or 10A; may not be taken concurrently with course 1S or 10A. Fundamentals of computers and computing; editors, spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/NP or letter grading.

**1S. Software Tools for Information Management. (1)** Lecture, one hour; laboratory, two hours. Preparation: some familiarity with computers. Not open for credit to students with credit for course 1; may not be taken concurrently with course 1. May be taken by students with credit for more advanced courses. Introduction to spreadsheets and databases in a laboratory setting. P/NP grading.

**10A. Introduction to Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended requisite for students with no prior computing experience: course 1. No prior programming experience assumed. Basic principles of programming, using C++; algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

**10B. Intermediate Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Abstract data types and their implementation using the C++ class mechanism; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications; object-oriented programming and software reuse; recursion; algorithms for sorting and searching.

**10C. Advanced Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. More advanced algorithms and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms.

**15. Introduction to LISP and Symbolic Computation. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

**20A. Principles of Java Language with Applications. (5)** (Formerly numbered 20.) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Introduction to Java computer language. Class and interface hierarchies; graphics components and graphical user interfaces; streams; multithreading; event and exception handling. Issues in class design and design of interactive Web pages. P/NP or letter grading.

**20B. Advanced Aspects of Java Language with Applications. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 20A. Further aspects of use of classes, graphics components, exception handling, multithreading, and multimedia. Additional topics may include networking, servlets, database connectivity, and JavaBeans. P/NP or letter grading.

**20C. Seminar: Enterprise Computing with Java. (5)** Lecture, three hours; discussion, two hours; laboratory, five hours. Enforced requisite: course 20B. Overview of Enterprise Java APIs: remote method invocation, database access with SQL, servlets, and JSP. Issues in implementation of server-side Java applications. Use of Java in conjunction with XML. Individual or group projects and presentations. P/NP or letter grading.

**30. Machine Organization and Assembly Language Programming. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10B. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, input/output (I/O) processing and interrupts.

**40A. Introduction to Programming for Internet. (5)** (Formerly numbered 40.) Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 10A. Recommended: course 10B. Introduction to core technologies of Internet, with focus on client-side Web programming. Fundamental protocols, static Web pages, Perl language, Common Gateway Interface, XML. P/NP or letter grading.

**40B. Advanced Topics in Programming for Internet. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced requisite: course 40A. Study of advanced topics in Web programming, with focus on server-side technologies. P/NP or letter grading.

**60. Data Structures and Algorithms. (4)** Lecture, three hours; discussion, one hour; laboratory, five hours. Enforced requisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

**97. Special Topics in Programming. (1 to 4)** Lecture, one to three hours; discussion, zero to one hour. Enforced requisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Upper Division Courses

**110. Parallel and Distributed Computing. (5)** Lecture, three hours; discussion, two hours; laboratory, eight hours. Requisite: course 10B or equivalent familiarity with programming in C or C++ language. Introduction to programming of parallel computers. Shared and distributed memory parallel architectures; currently available parallel machines; parallel algorithms and program development; estimation of algorithmic performance; distributed computing; selected advanced topics.

**130. Cryptography. (4)** Lecture, three hours; discussion, one hour; laboratory, three hours. Requisites: course 10B, Mathematics 115A. Design and analysis of cryptosystems for confidentiality and authentication. Classical cryptosystems and their security, modern private-key cryptosystems and applications, public-key cryptography and applications; generating prime numbers, factoring integers, discrete logarithms, digital signatures, perfect secrecy. P/NP or letter grading.

**197. Advanced Topics in Programming. (4)** Lecture, three hours; discussion, one hour. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Graduate Courses

**285C-285L. Seminars. (4 each)** Considered equivalent to Mathematics 285A through 285N for purposes of degree requirements. Topics in various computational fields by means of lectures and informal conferences with staff members. S/U or letter grading:

**285C.** Computational Algebra.

**285D.** Logic and Theory of Computation.

**285J.** Scientific Computation.

**285K.** Randomness and Computation.

**285L.** Computational Statistics.

**296. Participating Seminar: Logic and Theory of Computation. (1 to 4)** Seminar and discussion by staff and students. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Robert F. Brown, Ph.D., *Chair*

### Faculty Advisory Committee

#### Professors

Kirby A. Baker, Ph.D. (*Mathematics*)  
 Robert F. Brown, Ph.D. (*Mathematics*)  
 Bryan C. Ellickson, Ph.D. (*Economics*)  
 Jonathan D. Rogawski, Ph.D. (*Mathematics*)  
 William R. Zame, Ph.D. (*Economics*)

## Scope and Objectives

In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated. Mathematically competent economists, with bachelor's degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require strong undergraduate preparation in mathematics for admission.

The Mathematics/Economics B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and the parts of economics that emphasize the use of mathematics and statistics.

## Undergraduate Study

### Mathematics/Economics B.S.

#### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

#### Transfer Students

To be admitted as Mathematics/Economics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two years of calculus for majors, one introduction to discrete structures course, two principles of economics courses, one micro-economic theory course, and one C++ programming course.

#### The Major

*Required:* Seven mathematics/statistics courses, including Mathematics 115A, 131A, 170A or Statistics 100A, 170B or Statistics 100B, two courses from Mathematics 110A (or 117), 164, and 181, and one additional course from Mathematics 110B through 199 and Statistics 100C, CM120A, and CM120B; six economics courses, including Economics 101, 102, one additional course from 106A through 199, and one three-term sequence or group of

courses from the following: (1) option A (mathematical finance) — courses 141A, 141B, 141C, (2) option B (econometrics/regression analysis) — courses 103, 143, 147A, or (3) option C (general mathematics/economics) — three courses from Economics 141A through 148 and Mathematics 181.

Mathematics 181 may not be applied toward both the option C requirement and the mathematics course requirements; Economics 141A or the 141A/141B sequence may be applied toward option C.

The 13 courses must be passed with a minimum overall grade-point average of 2.0.

## Honors Program

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses with an overall grade-point average of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110B or 131B, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 195H, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

## Computing Specialization

Students may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major and (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, two courses from 10C, 15, 20A, 20B, 30, 40, 60, and at least two courses from Mathematics 149 through 159, with a minimum grade of C- in each course and a combined grade-point average of at least 2.0. Students must petition for admission to the program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office). Students graduate with a bachelor's degree in mathematics/economics and a specialization in Computing.

Robert T. M'Closkey, Ph.D.  
 Xiang Zhang, Ph.D.

#### Assistant Professor

Laurent Pilon, Ph.D.

#### Lecturer

Ravnech C. Amar, Ph.D.

#### Adjunct Professors

Leslie M. Lackman, Ph.D.  
 Neil B. Morley, Ph.D.

## Scope and Objectives

The Mechanical and Aerospace Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on both the undergraduate and graduate levels. The Gourman Report ranked UCLA's mechanical engineering program tenth in the nation for undergraduate programs.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, aeromechanics, and dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity of helicopters and jet engine blades, computational transonic aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize design and manufacturing, dynamics and control, or fluids and thermal engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering and in Aerospace Engineering. An M.S. in Manufacturing Engineering is also offered.

## Undergraduate Study

### Aerospace Engineering B.S.

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of

spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

### The Major

Course requirements are as follows (191 minimum units required):

1. Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A
2. Twelve aerospace engineering core courses: Electrical Engineering 102, Mechanical and Aerospace Engineering 150A, 150B, 150P, 154A, 154B, 154S, 157A, 161A or 169A, 166A, 171A, and one mathematics elective from Mechanical and Aerospace Engineering 191A, 192B, 192C, Electrical Engineering 103, 131A
3. Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical and Aerospace Engineering 131A, 131AL, 132A, 133A, 133AL, 150C (heat and mass transfer, thermodynamics, combustion/propulsion); 153A (acoustics); 155, 163A, 169A (unless taken as part of the core), 171B, Civil and Environmental Engineering 137L, Electrical Engineering 142 (dynamics and control); Mechanical and Aerospace Engineering 156B, 166C, 168, 193, Civil and Environmental Engineering 130F (structural and solid mechanics); Mechanical and Aerospace Engineering 150R, 161A (unless taken as part of the core), 161B, 161C, 161D (space technology); 162A, 162C (design and mechanisms); Materials Science and Engineering 143A
4. Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details

### Mechanical Engineering B.S.

The ABET-accredited mechanical engineering program is designed to provide basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical de-

sign, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with options in design and manufacturing, dynamics and control, and fluids and thermal engineering.

### The Major

Course requirements are as follows (193 minimum units required):

1. Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A
2. Eleven mechanical engineering core courses: Electrical Engineering 110L, Mechanical and Aerospace Engineering 94, 131A, 133A, 156A, 162A, 162B, 162M, 169A, 171A, 193
3. Twenty technical elective units, to be selected from the three subject areas listed below, of which at least 12 units (including at least 4 laboratory units) should be from a single subject area:
  - a. *Design and Manufacturing:* Materials Science and Engineering 143A, Mathematics 120A, Mechanical and Aerospace Engineering CM140, 155, 163A, 166C, 168, 171B, 174; laboratory courses: Mechanical and Aerospace Engineering 162C, 172, M180L, 194, 195
  - b. *Dynamics and Control:* Electrical Engineering 102, 103, 131A, 131B, Materials Science and Engineering 143A, Mathematics 115A, 115B, 131A, 131B, Mechanical and Aerospace Engineering CM140, 155, 156B, 163A, 168, 171B, 174, 191A; laboratory courses: Civil and Environmental Engineering 130F, 137L, Mechanical and Aerospace Engineering 162C, 172
  - c. *Fluids and Thermal Engineering:* Electrical Engineering 103, Mechanical and Aerospace Engineering 132A, 134, 136, 150A, 150B, 150C, 150P, 150R, 153A, 161A, 161B, 174, 192B, 192C; laboratory courses: Mechanical and Aerospace Engineering 131AL, 133AL, 157A
4. Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 1A, 1B, 1C, 4AL, 4BL
5. HSSEAS general education (GE) requirements. See the College and Schools section of this catalog for details
6. Four free technical elective units selected from upper division courses offered by the department; students are strongly encouraged to consult their adviser

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In

many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Mechanical and Aerospace Engineering offers the Master of Science (M.S.) degree in Manufacturing Engineering, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Aerospace Engineering, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Mechanical Engineering.

## Mechanical and Aerospace Engineering

### Lower Division Courses

**15. Technical Communication for Engineers. (2)** Lecture, two hours; outside study, four hours. Requisite: English Composition 3. Understanding writing process. Determining the purpose. Prewriting. Principles of organizing technical information. Eliminating unnecessary words, structuring paragraphs clearly, structuring effective sentences. Writing abstracts, introductions, and conclusions. Drafting and revising coherent documents. Writing collaboratively. Letter grading.

**20. Programming with Numerical Methods Applications. (4)** Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Mathematics 31A, 31B. Introduction to programming with MATLAB. Applications to numerical methods used in engineering. Letter grading.

**94. Introduction to Computer-Aided Design and Drafting. (4)** Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects. Letter grading.

### Upper Division Courses

**102. Mechanics of Particles and Rigid Bodies. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 33A, Physics 1A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications. Letter grading.

**103. Elementary Fluid Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 32B, 33A, Physics 1B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids. Letter grading.

**M105A. Introduction to Engineering Thermodynamics. (4)** (Same as Chemical Engineering M105A.) Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Chemistry 20B, Mathematics 32B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems. Letter grading.

**105D. Transport Phenomena. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: courses 103, M105A, Mathematics 32B, 33A. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control. Letter grading.

**131A. Intermediate Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 105D, 192A. Steady conduction: two-sided, two-ended, tapered, and circular fins; buried cylinders, thick fins. Transient conduction: slabs, cylinders, products. Convection: transpiration, laminar pipe flow, film condensation, boundary layers, dimensional analysis, working correlation, surface radiation. Two-stream heat exchangers. Elements of thermal design. Letter grading.

**131AL. Thermodynamics and Heat Transfer Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 131A, 157. Experimental study of physical phenomena and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena. Letter grading.

**132A. Mass Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 131A. Principles of mass transfer by diffusion and convection. Simultaneous heat and mass transfer. Analysis of evaporative and transpiration cooling, combustion, and catalysis. Mass exchangers, including automobile catalytic converters, precipitators, filters, scrubbers, humidifiers, and cooling towers. Letter grading.

**133A. Engineering Thermodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive fluid flow systems. Letter grading.

**133AL. Power Conversion Thermodynamics Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 133A, 157. Experimental study of power conversion and heat transfer systems using state-of-the-art plant process instrumentation and equipment. Experiments include studies of thermodynamic operating characteristics of an actual Brayton cycle, Rankine cycle, compressive refrigeration unit, and absorption refrigeration unit. Letter grading.

**134. Design and Operation of Thermal Hydraulic Power Systems. (4)** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems. Letter grading.

**136. Thermal Hydraulic Design of Nuclear and Other Power Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Designed for seniors. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, overall plant design, steady state and transient operation. Letter grading.

**CM140. Introduction to Biomechanics. (4)** (Formerly numbered M140.) (Same as Biomedical Engineering CM140.) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Civil Engineering 108), 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM240. Letter grading.

**150A. Intermediate Fluid Mechanics. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 20, 103, 192A. Basic equations governing fluid motion. Fundamental solutions of Navier/Stokes equations. Lubrication theory. Elementary potential flow theory. Boundary layers. Turbulent flow in pipes and boundary layers. Compressible flow: normal shocks, channel flow with friction or heat addition. Letter grading.

**150B. Aerodynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, 150A. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils ( $C_l$ ,  $C_m$ ) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow. Letter grading.

**150C. Combustion Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Chemical thermodynamics of ideal gas mixtures, premixed and diffusion flames, explosions and detonations, combustion chemistry, high explosives. Combustion processes in rocket, turbine, and internal combustion engines; heating applications. Letter grading.

**150P. Aircraft Propulsion Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 103, M105A. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics. Letter grading.

**150R. Rocket Propulsion Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Rocket propulsion concepts, including chemical rockets (liquid, gas, and solid propellants), hybrid rocket engines, electric (ion, plasma) rockets, nuclear rockets, and solar-powered vehicles. Current issues in launch vehicle technologies. Letter grading.

**153A. Engineering Acoustics. (4)** Lecture, four hours; outside study, eight hours. Designed for junior/senior engineering majors. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aspects. Letter grading.

**154A. Preliminary Design of Aircraft. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of a low-speed aircraft. Letter grading.

**154B. Design of Aerospace Structures. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 154A, 166A. Design of aircraft, helicopter, spacecraft, and related structures. External loads, internal stresses. Applied theory of thin-walled structures. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies. Letter grading.

**154S. Flight Mechanics, Stability, and Control of Aircraft. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives. Letter grading.

**155. Intermediate Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Axioms of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles; central force motion; kinematics and dynamics of a rigid body. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthogonality relations. Letter grading.

**156A. Strength of Materials. (4)** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: course 192A, Civil Engineering 108. Concepts of stress, strain, and material behavior. Stresses in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in pressure vessels, press-fit and shrink-fit problems, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability. Letter grading.

**156B. Introduction to Elasticity. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 156A, 192A. Kinematics of deformation, strain displacement relations. Balance laws, stress tensor, principal stresses, equilibrium equations. Conservation of energy, strain energy function. Generalized Hooke's law, thermoplasticity and viscoelasticity. Stress calculation in cylinders and spheres. Plane elasticity, Airy's stress function. Stress concentration problems at holes, corners, and crack tips. Letter grading.

**157. Basic Mechanical Engineering Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 103, M105A, 105D, Civil Engineering 108, Electrical Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis. Letter grading.

**157A. Fluid Mechanics and Aerodynamics Laboratory. (4)** Laboratory, eight hours. Requisites: courses 150A, 150B, 157. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field. Letter grading.

**161A. Introduction to Astronautics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 192A. Space environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three bodies, elementary perturbation theory, influence of Earth's oblateness. Letter grading.

**161B. Introduction to Space Technology. (4)** Lecture, four hours; outside study, eight hours. Recommended preparation: courses 102, 105D, 150P, 161A. Propulsion requirements for typical space missions, thermochemistry of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability. Electric propulsion. Multistage rockets, separation dynamics. Satellite structures and materials, loads and vibrations. Thermal control of spacecraft. Letter grading.

**161C. Spacecraft Design. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 161B. Coverage of preliminary design, by students, of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, lifetime, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole. Letter grading.

**161D. Space Technology Hardware Design. (4)** Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended requisite or corequisite: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by HSEAS professional machine shop and tested by the students. New project carried out each year. Letter grading.

**162A. Introduction to Mechanisms and Mechanical Systems. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: courses 20, 102. Analysis and synthesis of mechanisms and mechanical systems. Kinematics, dynamics, and mechanical advantages of machinery. Displacement velocity and acceleration analyses of linkages. Fundamental law of gearing and various gear trains. Computer-aided mechanism design and analysis. Letter grading.

**162B. Mechanical Product Design. (4)** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 193, Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project. Letter grading.

**162C. Electromechanical System Design Laboratory. (4)** Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite: course 162B. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. Assembled machine is instrumented and monitored for operational characteristics. Letter grading.

**162M. Senior Mechanical Engineering Design. (4)** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 131A, 133A, 162B, 169A, 171A. Must be taken in last two academic terms of students' programs. Analytical course of a large engineering system. Design factors include functionality, efficiency, economy, safety, reliability, aesthetics, and social impact. Final report of engineering specifications and drawings to be presented by design teams. Letter grading.

**163A. Introduction to Computer-Controlled Machines. (4)** Lecture, four hours; outside study, eight hours. Requisite or corequisite: course 171A. Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electromechanical systems. Motion and command generation, servo-controller design, and computer/machine interfacing. Letter grading.

**166A. Analysis of Flight Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; elements of plate theory; buckling of columns. Letter grading.

**166C. Design of Composite Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites. Letter grading.

**168. Introduction to Finite Element Technology. (4)** Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 20, Civil Engineering 108, Mathematics 33A. Recommended: courses 94 or 194, 166A. Introduction to finite element method (FEM) and its matrix formulation of computer implementation of FEM concepts; practical use of FEM codes. Preprocessing and postprocessing techniques; graphics display capabilities; geometric and analysis modeling; interactive engineering systems; links with computer-aided design. Recent trends in FEM technology; design optimization. Term projects using FEM computer codes. Letter grading.

**169A. Introduction to Mechanical Vibrations. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 102, 192A, Civil Engineering 108. Recommended: Electrical Engineering 102. Fundamentals of vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping. Normal modes, coupling, and normal coordinates. Vibration isolation devices, vibrations of continuous systems. Letter grading.

**171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 191A or 192A or Electrical Engineering 102. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and other fields; transform methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design. Letter grading.

**171B. Digital Control of Physical Systems. (4)** (Formerly numbered 164.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. Analysis and design of digital control systems. Sampling theory. Z-transformation. Discrete-time system representation. Design using classical methods: performance specifications, root locus, frequency response, loop-shaping compensation. Design using state-space methods: state feedback, state estimator, state estimator feedback control. Simulation of sampled data systems and practical aspects: roundoff errors, sampling rate selection, computation delay. Letter grading.

**172. Control System Design Laboratory. (4)** Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Successful controller design requires students to formulate performance measures for control problem, experimentally identify mechanical systems, and develop uncertainty descriptions for design models. Exploration of issues concerning model uncertainty and sensor/actuator placement. Students implement control designs on flexible structures, rate gyroscope, and inverted pendulum. Detailed reports required. Letter grading.

**174. Probability and Its Applications to Risk, Reliability, and Quality Control. (4)** Lecture, four hours; outside study, eight hours. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling. Letter grading.

**M180L. Introduction to Micromachining and Microelectromechanical Systems Laboratory. (4)** (Formerly numbered 180.) (Same as Biomedical Engineering M150L and Electrical Engineering M150L.) Lecture, three hours; laboratory, four hours; outside study, five hours. Requisites: Electrical Engineering 1 or Physics 1C, Chemistry 20A. Introduction to micromachining technologies and microelectromechanical systems (MEMS). Methods of micromachining and how these methods can be used to produce a variety of MEMS, including microstructures, microsensors, and microactuators. Students fabricate set of basic MEMS structures in hands-on microfabrication laboratory. Letter grading.

**191A. Complex Analysis and Integral Transforms. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 192A. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform: properties, convolution, inversion; Fourier transform: properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction. Letter grading.

**192A. Mathematics of Engineering. (4)** Lecture, four hours; discussion, two hours; outside study, six hours. Requisites: Mathematics 33A, 33B. Methods of solving ordinary differential equations in engineering. Review of matrix algebra. Solutions of systems of first- and second-order ordinary differential equations. Introduction to Laplace transforms and their application to ordinary differential equations. Introduction to boundary value problems. Letter grading.

**192B. Mathematics of Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 192A. Analytical methods for solving partial differential equations arising in engineering. Separation of variables, eigenvalue problems, Sturm/Liouville theory. Development and use of special functions. Representation by means of orthonormal functions; Galerkin method. Use of Green's function and transform methods. Letter grading.

**192C. Numerical Methods for Engineering Applications. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 192A. Recommended: Electrical Engineering 103. Basic topics from numerical analysis having wide application in solution of practical engineering problems, computer arithmetic, and errors. Solution of linear and nonlinear systems. Algebraic eigenvalue problem. Least-square methods, numerical quadrature, and finite difference approximations. Numerical solution of initial and boundary value problems for ordinary and partial differential equations. Letter grading.

**193. Introduction to Manufacturing Processes. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 14. Mechanical behavior of materials. Manufacturing properties of metals. Surfaces of materials. Metal cutting, deformation processes, and casting. Joining and fastening. Nonconventional material-removal processes. Polymers, ceramics, and composites. Letter grading.

**194. Introduction to Geometry Modeling. (4)** Laboratory, eight hours; outside study, four hours. Requisites: courses 20, 94. Fundamentals in parametric curve and surface modeling, parametric spaces, blending functions, conics, splines and Bezier curve, coordinate transformations, algebraic and geometric form of surfaces, analytical properties of curve and surface, hands-on experience with CAD/CAM systems design and implementation. Letter grading.

**195. Computer Numerical Control and Applications. (4)** Laboratory, eight hours; outside study, four hours. Designed for juniors/seniors. Fundamentals of numerical control (NC) technology. Programming of computer numerical control (CNC) machines in NC codes and APT language and with CAD/CAM systems. NC postprocessors and distributed numerical control. Operation of CNC lathe and milling machines. Programming and machining of complex engineering parts. Letter grading.

**198. Special Studies in Mechanical and Aerospace Engineering. (2 to 4)** Lecture, two to four hours; outside study, four to eight hours. Study of selected topics in mechanical and aerospace engineering taught by resident and visiting faculty members. P/NP or letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Limited to seniors. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit. Letter grading.

## Graduate Courses

**231A. Convective Heat Transfer Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 192B. Recommended: course 250A. Conservation equations for flow of real fluids. Analysis of heat transfer in laminar and turbulent, incompressible and compressible flows. Internal and external flows; free convection. Variable wall temperature; effects of variable fluid properties. Analogies among convective transfer processes. Letter grading.

**231B. Radiation Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 105D. Radiative properties of materials and radiative energy transfer. Emphasis on fundamental concepts, including energy levels and electromagnetic waves as well as analytical methods for calculating radiative properties and radiation transfer in absorbing, emitting, and scattering media. Applications cover laser-material interactions in addition to traditional areas such as combustion and thermal insulation. Letter grading.

**231C. Boiling and Condensation. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Phenomenological theories of boiling. Hydrodynamic instability of liquid-vapor interfaces and their application to predict maximum and minimum heat fluxes. Forced flow boiling and boiling crisis in pipes. Pool and forced flow boiling of liquid metals. Film and dropwise condensation. Letter grading.

**231D. Application of Numerical Methods to Transport Phenomena. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 132A. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields. Letter grading.

**231E. Two-Phase Flow Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Generalized constitutive equations for various two-phase flow regimes. Interfacial heat and mass transfer. Equilibrium and nonequilibrium flow models. Two-phase flow instability. One-dimensional wave propagation. Two-phase heat transfer applications: convective boiling, pressure drop, critical and oscillatory flows. Letter grading.

**231F. Advanced Heat Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport. Letter grading.

**231G. Microscopic Energy Transport. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 105D. Heat carriers (photons, electrons, phonons, molecules) and their energy characteristics, statistical properties of heat carriers, scattering and propagation of heat carriers, Boltzmann transport equations, derivation of classical laws from Boltzmann transport equations, deviation from classical laws at small scale. Letter grading.

**232B. Advanced Mass Transfer. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration cooling, combustion. Letter grading.

**235A. Nuclear Reactor Theory. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 135, 192A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory. Letter grading.

**M237B. Fusion Plasma Physics and Analysis. (4)** (Same as Electrical Engineering M287.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts. Letter grading.

**237D. Fusion Engineering and Design. (4)** Lecture, four hours; outside study, eight hours. Fusion reactions and fuel cycles. Principles of inertial and magnetic fusion. Plasma requirements for controlled fusion. Plasma-surface interactions. Fusion reactor concepts and technological components. Analysis and design of high heat flux components, energy conversion and tritium breeding components, radiation shielding, magnets, and heating. Letter grading.

**239B. Seminar: Current Topics in Transport Phenomena. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

**239D. Seminar: Current Topics in Nuclear Engineering. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

**239F. Special Topics in Transport Phenomena. (2 to 4)** Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.

**239G. Special Topics in Nuclear Engineering. (2 to 4)** Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

**239H. Special Topics in Fusion Physics, Engineering, and Technology. (2 to 4)** Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced treatment of subjects selected from research areas in fusion science and engineering, such as instabilities in burning plasmas, alternate fusion confinement concepts, inertial confinement fusion, fission-fusion hybrid systems, and fusion reactor safety. May be repeated for credit with topic change. S/U grading.

**CM240. Introduction to Biomechanics. (4)** (Same as Biomedical Engineering CM240.) Lecture, four hours; outside study, eight hours. Requisites: courses 102 (or Civil Engineering 108), 156A. Introduction to mechanical functions of human body; skeletal adaptations to optimize load transfer, mobility, and function. Dynamics and kinematics. Fluid mechanics applications. Heat and mass transfer. Power generation. Laboratory simulations and tests. Concurrently scheduled with course CM140. Letter grading.

**250A. Foundations of Fluid Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Corequisite: course 192B. Development and application of fundamental principles of fluid mechanics at graduate level, with emphasis on incompressible flow. Flow kinematics, basic equations, constitutive relations, exact solutions on the Navier/Stokes equations, vorticity dynamics, decomposition of flow fields, potential flow. Letter grading.

**250B. Viscous and Turbulent Flows. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows. Letter grading.

**250C. Compressible Flows. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Effects of compressibility in viscous and inviscid flows. Steady and unsteady inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics. Letter grading.

**250D. Computational Aerodynamics. (4)** Lecture, eight hours. Requisites: courses 150A, 150B, 192C. Introduction to useful methods for computation of aerodynamic flow fields. Coverage of potential, Euler, and Navier/Stokes equations for subsonic to hypersonic speeds. Letter grading.

**250E. Spectral Methods in Fluid Dynamics. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 192A, 192B, 192C, 250A, 250B. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on techniques of solving unsteady three-dimensional Navier/Stokes equations. Topics include spectral representation of functions, discrete Fourier transform, etc. Letter grading.

**250F. Hypersonic and High-Temperature Gas Dynamics.** (4) Lecture, four hours; outside study, eight hours. Recommended prerequisite: course 250C. Molecular and chemical description of equilibrium and nonequilibrium hypersonic and high-temperature gas flows, chemical thermodynamics and statistical thermodynamics for calculation gas properties, equilibrium flows of real gases, vibrational and chemical rate processes, nonequilibrium flows of real gases, and computational fluid dynamics methods for nonequilibrium hypersonic flows. Letter grading.

**251A. Stratified and Rotating Fluids.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical, or technical importance. Linear and finite amplitude wave motion. Flow past bodies; blocking phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents. Letter grading.

**252A. Stability of Fluid Motion.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Non-linear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence. Letter grading.

**252B. Statistical Theory of Turbulence.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, kinematics of turbulence, energy decay. Kolmogorov similarity, analytical theories, and origins of Reynolds stress. Letter grading.

**252C. Fluid Mechanics of Combustion Systems.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B. Recommended: course 250C. Review of fluid mechanics and chemical thermodynamics applied to reactive systems, laminar diffusion flames, premixed laminar flames, stability, ignition, turbulent combustion, supersonic combustion. Letter grading.

**252D. Combustion Rate Processes.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 252C. Basic concepts in chemical kinetics: molecular collisions, distribution functions and averaging, semiempirical and ab initio potential surfaces, trajectory calculations, statistical reaction rate theories. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements, etc. Letter grading.

**253A. Advanced Engineering Acoustics.** (4) Lecture, four hours; outside study, eight hours. Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids. Letter grading.

**253B. Fundamentals of Aeroacoustics.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 150A. Detailed discussion of plane waves, point sources. Nonlinearity, layered and moving media, multiple reflections. Inhomogeneous wave equation. Monopole, dipole, quadrupole source fields from scattering inhomogeneities and turbulence; Lighthill theory; moving sources. Similarity methods. Selected detailed applications. Letter grading.

**254A. Special Topics in Aerodynamics.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 150B, 192A, 192B, 192C. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics. Letter grading.

**255A. Advanced Dynamics.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 155, 169A. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; precession and nutation of spinning bodies. Letter grading.

**255B. Mathematical Methods in Dynamics.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems. Letter grading.

**M256A. Mechanics of Deformable Solids.** (4) (Formerly numbered 256A.) (Same as Civil Engineering M230A.) Lecture, four hours; outside study, eight hours. Requisite: course 156A. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations: general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems. Letter grading.

**M256B. Elasticity.** (4) (Same as Civil Engineering M230B.) Lecture, four hours; outside study, eight hours. Requisite: course M256A. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy's stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations. Letter grading.

**M256C. Plasticity.** (4) (Same as Civil Engineering M239.) Lecture, four hours; outside study, eight hours. Requisites: courses M256A, M256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvant/Lions types of viscoplasticity. Thermoplasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations. Letter grading.

**256F. Analytical Fracture Mechanics.** (4) Lecture, four hours; outside study, eight hours. Requisites: course 156A, 156B, or 166A, and Materials Science 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells. Letter grading.

**M257A. Elastodynamics.** (4) (Same as Earth and Space Sciences M224A.) Lecture, four hours; outside study, eight hours. Requisites: courses M256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, non-destructive evaluation (NDE), and mechanics of earthquakes. Letter grading.

**259A. Seminar: Advanced Topics in Fluid Mechanics.** (4) Seminar, four hours; outside study, eight hours. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers). Letter grading.

**259B. Seminar: Advanced Topics in Solid Mechanics.** (4) Seminar, four hours; outside study, eight hours. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids. Letter grading.

**260. Current Topics in Mechanical Engineering.** (2 to 4) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U grading.

**261A. Energy and Variational Principles in Structural Mechanics.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 156A or 156B or 166A. Theory of linear elasticity. Calculus of variations. Principles of minimum potential energy and complementary energy. Stationary variational principles. Energy theorems. Matrix methods of structural analysis, with application to truss and frame problems. Variational principles as basis of finite element methods. Letter grading.

**261B. Methods of Computational Mechanics I.** (4) Lecture, four hours; outside study, eight hours. Requisites: courses 168, 261A. Weighted residual methods, weak forms, local trial and test functions, primal finite element method, multifield finite elements, high-performance elements and avoidance of locking, integral equation and field boundary element methods, finite volume methods, meshless methods, term projects using digital computers. Applications to aerospace and mechanical engineering structural and solid mechanics, incompressible fluid flow, and heat transfer. Letter grading.

**262. Mechanics of Intelligent Material Systems.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 156B. Recommended: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bimorph. Letter grading.

**263A. Analytical Foundations of Motion Controllers.** (4) Lecture, four hours; outside study, eight hours. Recommended prerequisites: courses 163A, 294. Theory of motion control for modern computer-controlled machines; multi-axis computer-controlled machines; machine kinematics and dynamics; multi-axis motion coordination; coordinated motion with desired speed and acceleration; jerk analysis; motion command generation; theory and design of controller interpolators; motion trajectory design and analysis; geometry-speed-sampling time relationships. Letter grading.

**263B. Spacecraft Dynamics.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended: course 255B. Modeling, dynamics, and stability of spacecraft; spinning and dual-spin spacecraft dynamics; spinup through resonance, spinning rocket dynamics; environmental torques in space, modeling and model reduction of flexible space structures. Letter grading.

**263C. Mechanics and Trajectory Planning of Industrial Robots.** (4) Lecture, four hours; outside study, eight hours. Requisite: course 163A. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student study projects. Letter grading.

**263D. Advanced Robotics.** (4) Lecture, four hours; outside study, eight hours. Recommended preparation: courses 155, 163C, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multi-axes coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, motion planning of manipulators in space, obstacle avoidance. Letter grading.

**M267A. Optimum Structural Design.** (4) (Same as Civil Engineering M240.) Lecture, four hours; outside study, eight hours. Requisite: course 261A or Civil Engineering 235A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures. Letter grading.

**268B. Failure of Structural Systems.** (4) Lecture, four hours; outside study, eight hours. Requisite: Civil Engineering 135B. Exploration of a current area of research in depth. Letter grading.

**M269A. Dynamics of Structures. (4)** (Same as Civil Engineering M237A.) Lecture, four hours; outside study, eight hours. Requisite: course 169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation. Letter grading.

**269B. Advanced Dynamics of Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M269A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations. Letter grading.

**269D. Aeroelastic Effects in Structures. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow induced instability and response of structural systems. Letter grading.

**M270A. Linear Dynamic Systems. (4)** (Same as Chemical Engineering M280A and Electrical Engineering M240A.) Lecture, four hours; outside study, eight hours. Requisite: course 171A or Electrical Engineering 141. State-space description of linear time-invariant (LTI) and time-varying (LTV) systems in continuous and discrete time. Linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; solution of state equations; stability, controllability, observability, realizability, and minimality. Stabilization design via state feedback and observers; separation principle. Connections with transfer function techniques. Letter grading.

**270B. Linear Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisite: course M270A or Electrical Engineering M240A. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control; algebraic and differential Riccati equations; implications of controllability, stabilizability, observability, and detectability solutions. Letter grading.

**M270C. Optimal Control. (4)** (Same as Chemical Engineering M280C and Electrical Engineering M240C.) Lecture, four hours; outside study, eight hours. Requisite: course 270B. Applications of variational methods, Pontryagin maximum principle, Hamilton/Jacobi/Bellman equation (dynamic programming) to optimal control of dynamic systems modeled by nonlinear ordinary differential equations. Letter grading.

**271A. Stochastic Processes in Dynamical Systems. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 171A, 174. Probability space, random variables, stochastic processes, Brownian motion, Markov processes, stochastic integrals and differential equations, power spectral density, and Kolmogorov equations. Letter grading.

**271B. Stochastic Estimation. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators. Letter grading.

**271C. Stochastic Optimal Control. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 271B. Stochastic dynamic programming, certainty equivalence principle, separation theorem, information statistics; linear-quadratic-Gaussian problem, linear-exponential-Gaussian problem. Relationship between stochastic control and robust control. Letter grading.

**271D. Seminar: Special Topics in Dynamic Systems Control. (4)** Seminar, four hours; outside study, eight hours. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc. Letter grading.

**M272A. Nonlinear Dynamic Systems. (4)** (Same as Chemical Engineering M282A and Electrical Engineering M242A.) Lecture, four hours; outside study, eight hours. Requisite: course M270A or Chemical Engineering M280A or Electrical Engineering M240A. State-space techniques for studying solutions of time-invariant and time-varying nonlinear dynamic systems with emphasis on stability. Liapunov theory (including converse theorems), invariance, center manifold theorem, input-to-state stability and small-gain theorem. Letter grading.

**273A. Robust Control System Analysis and Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 171A, M270A. Graduate-level introduction to analysis and design of multivariable control systems. Multivariable loop-shaping, performance requirements, model uncertainty representations, and robustness covered in detail from frequency domain perspective. Structured singular value and its application to controller synthesis. Letter grading.

**275A. System Identification. (4)** Lecture, four hours; outside study, eight hours. Methods for identification of dynamical systems from input/output data, with emphasis on identification of discrete-time (digital) models of sampled-data systems. Coverage of conversion to continuous-time models. Models identified include transfer functions and state-space models. Discussion of applications in mechanical and aerospace engineering, including identification of flexible structures, microelectromechanical systems (MEMS) devices, and acoustic ducts. Letter grading.

**M276. Dynamic Programming. (4)** (Same as Electrical Engineering M237.) Lecture, four hours; outside study, eight hours. Recommended requisite: Electrical Engineering 232A or 236A or 236B. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Examples from inventory theory, finance, optimal control and estimation, Markov decision processes, combinatorial optimization, communications. Letter grading.

**M280. Microelectromechanical Systems (MEMS) Fabrication. (4)** (Formerly numbered 280.) (Same as Biomedical Engineering M250A and Electrical Engineering M250A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M180L. Advanced discussion of micromachining processes used to construct MEMS. Coverage of many lithographic, deposition, and etching processes, as well as their combination in process integration. Materials issues such as chemical resistance, corrosion, mechanical properties, and residual/intrinsic stress. Letter grading.

**280L. Microelectromechanical Systems (MEMS) Laboratory. (4)** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisite: course 180. Hands-on micromachining. Mask layout, clean room procedure, lithography, oxidation, LPCVD coatings, evaporation, wet etchings (both isotropic and anisotropic), dry etchings, process monitoring. Students fabricate simple micromechanical devices by both surface and bulk micromachining and test and characterize them. Letter grading.

**281. Microsciences. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices. Letter grading.

**M282. Microelectromechanical Systems (MEMS) Device Physics and Design. (4)** (Same as Biomedical Engineering M250B and Electrical Engineering M250B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M280. Introduction to MEMS design. Design methods, design rules, sensing and actuation mechanisms, microsensors, and microactuators. Designing MEMS to be produced with both foundry and nonfoundry processes. Computer-aided design for MEMS. Design project required. Letter grading.

**283. Experimental Mechanics for Microelectromechanical Systems (MEMS). (4)** Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/fracture/fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties. Letter grading.

**284. Sensors, Actuators, and Signal Processing. (4)** Lecture, four hours; outside study, eight hours. Principles and performance of micro transducers. Applications of using unique properties of micro transducers for distributed and real-time control of engineering problems. Associated signal processing requirements for these applications. Letter grading.

**286. Molecular Dynamics Simulation. (4)** (Formerly numbered 282.) Lecture, four hours; outside study, eight hours. Preparation: computer programming experience. Requisites: courses 192A, 192C. Introduction to basic concepts and methodologies of molecular dynamics simulation. Advantages and disadvantages of this approach for various situations. Emphasis on systems of engineering interest, especially microscale fluid mechanics, heat transfer, and solid mechanics problems. Letter grading.

**287. Advanced Microelectromechanical Systems (MEMS). (4)** Lecture, four hours; outside study, eight hours. Requisite: course M280 or Electrical Engineering M250A. Silicon micromachining, nonsilicon micromachining, nonlithographic processes. Mechanical issues of MEMS structures. Driving mechanisms for microactuators, including electrostatic, electromagnetic, thermal, and fluidic actuation. Applications to mechanical and aerospace areas. Studies of MEMS products and state-of-the-art research. Letter grading.

**288. Laser Microfabrication. (4)** Lecture, four hours; outside study, eight hours. Requisites: Materials Science 14, Physics 17. Science and engineering of laser microscopic fabrication of advanced materials, including semiconductors, metals, and insulators. Topics include fundamentals in laser interactions with advanced materials, transport issues (thermal, mass, chemical, carrier, etc.) in laser microfabrication, state-of-the-art optics and instrumentation for laser microfabrication, applications such as rapid prototyping, surface modifications (physical/chemical), micromachines for three-dimensional MEMS (microelectromechanical systems) and data storage, up-to-date research activities. Student term projects. Letter grading.

**M291A. Analytical Methods of Engineering I. (4)** (Same as Electrical Engineering M208A.) Lecture, four hours; outside study, eight hours. Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering. Letter grading.

**M291B. Analytical Methods of Engineering II. (4)** (Same as Electrical Engineering M208B.) Lecture, four hours; outside study, eight hours. Requisite: course M291A or Electrical Engineering M208A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems. Letter grading.

**291C. Integral Equations in Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Mathematics 250B. Introduction to generalized function theory and Green's functions. Conversion of partial equations to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert/Schmidt theory. Letter grading.

**293. Quality Engineering in Design and Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 174. Quality engineering concepts and approaches. Taguchi methods of robust technology development and off-line control. Quality loss function, signal-to-noise ratio, and orthogonal arrays. Parametric design of products and production processes. Tolerance design. Online quality control systems. Decision making in quality engineering. Letter grading.

**294. Computational Geometry for Design and Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 194. Computational geometry for design and manufacturing, with special emphasis on curve and surface theory, geometric modeling of curves and surfaces, B-splines and NURBS, composite curves and surfaces, computing methods for surface design and manufacture, and current research topics in computational geometry for CAD/CAM systems. Letter grading.

**295. Computer-Aided Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Preparation: one course from 163A, 163C, 195. Requisite: course 94. Concepts, methods, and elements of computer-aided manufacturing. Planning and control of manufacturing systems. Group technology and computer-aided process planning. Design and modeling of flexible manufacturing systems. Computer-aided manufacturing. Letter grading.

**296A. Damage and Failure of Materials in Mechanical Design. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 156A, Materials Science 143A. Role of failure prevention in mechanical design and case studies. Mechanics and physics of material imperfections: voids, dislocations, cracks, and inclusions. Statistical and deterministic design methods. Plastic, fatigue, and creep damage. Letter grading.

**296B. Thermochemical Processing of Materials. (4)** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 193. Thermodynamics, heat and mass transfer, principles of material processing: phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces and heat sources, natural convection, nucleation and growth of microstructure, etc. Applications with chemical vapor deposition, infiltration, etc. Letter grading.

**297. Composites Manufacturing. (4)** Lecture, four hours; outside study, eight hours. Requisites: course 166C, Materials Science 151. Matrix materials, fibers, fiber preforms, elements of processing, autoclave/compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, metal and ceramic matrix composites, quality assurance. Letter grading.

**298. Seminar: Engineering. (2 to 4)** Seminar, to be arranged. Limited to graduate mechanical and aerospace engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change. Letter grading.

**M299A. Seminar: Systems, Dynamics, and Control Topics. (2)** (Same as Chemical Engineering M297 and Electrical Engineering M248S.) Seminar, two hours; outside study, six hours. Limited to graduate engineering students. Presentations of research topics by leading academic researchers from fields of systems, dynamics, and control. Students who work in these fields present their papers and results. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474B. Concurrent Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 474A. Product design, CAD/CAM, engineering analysis integration, project management. Letter grading.

**474C. Total Quality Engineering. (4)** Lecture, four hours; outside study, eight hours. Requisite: course 474B. Total quality management, statistics, probability, off-line quality control, online quality control, quality inspection. Letter grading.

**475B. Automation. (4)** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 475A. Automatic control of single devices and processes for manufacturing automation. Integrated automation design. Introduction to control, digital control, and rule-based systems. Sensors and actuators used in manufacturing processes. Robotics and multi-axis machine tools. Integration of computer-controlled systems and control hardware. Letter grading.

**476. Integrated Manufacturing Engineering (IME) Seminar Series. (1)** Lecture, one hour. Lectures by engineers in executive positions to provide management perspectives in manufacturing enterprises. Current manufacturing techniques and integrated product development efforts by industry experts. S/U grading.

**478. Integrated Manufacturing Engineering (IME) Group Project Studies. (1 to 12)** Lecture, one hour; group projects, one to 12 hours. Teams of students perform detailed analyses to address problems presented and implement manufacturing solutions within industrial settings. S/U grading.

**497A-497B. Field Project in Manufacturing Engineering. (4-4)** Lecture, two hours. Teams of students perform detailed system analysis and plan design of manufacturing engineering systems at various manufacturing plants. In Progress and S/U or letter grading.

**596. Directed Individual or Tutorial Studies. (2 to 8)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination. (2 to 12)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis. (2 to 12)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 16)** Tutorial, to be arranged. Limited to graduate mechanical and aerospace engineering students. Usually taken after students have been advanced to candidacy. S/U grading.

Dennis J. Slamon, M.D. (*Bowyer Professor of Medical Oncology*), *Executive Vice Chair, Research*  
Robert M. Strieter, M.D., *Vice Chair, Hospitalist Program*

## Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught *information acquisition* through history taking, physical examination, and laboratory evaluation; *information synthesis* through achieving a differential diagnosis and evaluative plan; and *medical decision making* for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see <http://www.med.ucla.edu>.

## Medicine

### Lower Division Course

**98. Cultural Aspects of Medicine. (4)** Seminar, four hours. Enforced requisite: satisfaction of Subject A requirement. Introduction to issues related to interpreting and cultural diversity in hospital setting. Through interactive discussions, faculty presentations, and visiting hospital patients, students learn about different cultures and how specific cultural customs and/or cultural beliefs can impact patient's health and health care. Focus on teaching proper ways to communicate with patients from different cultures. Letter grading.

## Upper Division Courses

**190A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (4)** (Formerly numbered M190A.) Lecture, four hours; possible field observations. First in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, with field visits. P/NP or letter grading.

**190B. Field Studies Seminar: Health Outreach Issues and Interventions. (4)** (Formerly numbered M190B.) Seminar, two hours; discussion, two hours. Requisite: course 190A. Second in series of courses to explore prevention of disease in at-risk populations, clinical services and referrals for disadvantaged, and effects of low socioeconomic status on academic achievement, career, and family. Lectures by faculty and practitioners, discussion groups, and field activities including health education. P/NP or letter grading.

**190C. Health Outreach and Education to At-Risk Populations. (4)** Discussion, two hours; fieldwork, six to eight hours. Requisites: courses 190A, 190B. Processes involved with designing, delivering, and assessing community health education programs, under supervision of professional staff. P/NP or letter grading.

**M196B. Computational Systems Biology: Modeling and Simulation of Biological Systems. (5)** (Same as Biomedical Engineering M196B, Computer Science M196B, and Cybernetics M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours. Requisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating bi-modeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory. Letter grading.

**199. Special Studies. (2 to 8)** Individual projects carried out under direction of a faculty member. Special studies in medicine with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

## Graduate Courses

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Pathology M215 and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**M260A-M260B. Methodology in Clinical Research I, II. (6-6)** (Same as Biomathematics M260A-M260B.) Lecture, three hours; discussion, two hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M260C. Methodology in Clinical Research III. (4)** (Same as Biomathematics M260C.) Discussion, four hours. Recommended preparation: M.D., Ph.D., or dental degree. Presentation of principles and practices of major disciplines underlying clinical research methodology, such as biostatistics, epidemiology, pharmacokinetics. S/U or letter grading.

**M261. Ethics in Patient-Oriented Research. (2)** (Same as Biomathematics M261.) Lecture, two hours; discussion, two hours. Discussion of current issues in responsible conduct of clinical research, including reporting of research, basis for authorship, issues in genetic research, principles and practice of research on humans, conflicts of interest, Institutional Review Board (IRB), and related topics. S/U or letter grading.

**M263. Clinical Pharmacology. (2)** (Same as Biomathematics M263 and Psychiatry M263.) Lecture, two hours. Preparation: completion of professional health sciences degree (M.D., D.D.S., D.N.Sc., or Ph.D.). Overview of principles of clinical pharmacology, especially as they relate to clinical and translational medicine and to advances in contemporary medicine such as targeting, gene therapy, and genomics. Letter grading.

**M270C. Advanced Modeling Methodology for Dynamic Biomedical Systems. (4)** (Same as Biomedical Engineering M296A and Computer Science M296A.) Lecture, four hours; outside study, eight hours. Requisite: Electrical Engineering 141 or 142 or Mathematics 115A or Mechanical and Aerospace Engineering 171A. Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems. Control system, multicompartamental, noncompartmental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory. Letter grading.

**M270D. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (4)** (Same as Biomathematics M270, Biomedical Engineering M296B, and Computer Science M296B.) Lecture, four hours; outside study, eight hours. Requisite: course M270C or Biomathematics 220. Estimation methodology and model parameter estimation algorithms for fitting dynamic system models to biomedical data. Model discrimination methods. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on optimal sampling schedule design for kinetic models. Exploration of PC software for model building and optimal experiment design via applications in physiology and pharmacology. Letter grading.

**M270E. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (4)** (Same as Biomedical Engineering M296C and Computer Science M296C.) Lecture, four hours; outside study, eight hours. Requisite: course M270C. Recommended: course M270D. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training. Letter grading.

**M290A-M290B. Child Abuse and Neglect. (2-2)** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Nursing M290A-M290B-M290C, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M290A is requisite to M290B. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

## Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, immunology,

genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in Microbiology, Immunology, and Molecular Genetics prepare for careers in biomedical research, medicine, dentistry, or other health professions, biotechnology and genetic engineering, industrial microbiology, agricultural or environmental sciences, public health, and law or bioethics, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology, immunology, and molecular genetics at the undergraduate level and depth and training in independent study and research for graduate students.

## Undergraduate Study

### Microbiology, Immunology, and Molecular Genetics B.S.

#### Premicrobiology, Immunology, and Molecular Genetics Major

While students are completing the preparation courses for the major, they are classified as Premicrobiology, Immunology, and Molecular Genetics majors.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

##### Transfer Students

To be admitted as Microbiology, Immunology, and Molecular Genetics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with

laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Students intending to major in Microbiology, Immunology, and Molecular Genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602A Molecular Sciences.

#### The Major

*Required:* Microbiology, Immunology, and Molecular Genetics 101, 101L, 102, 102L, C159, 185A; Chemistry and Biochemistry 153A, 153C, 153L; one course from Chemistry and Biochemistry 153B, Microbiology, Immunology, and Molecular Genetics C106, CM156, and C168; and 16 additional upper division elective units from the departmental list (available in the Student Affairs Office and at <http://www.mimg.ucla.edu>) or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 grade-point average in the major. A maximum of 4 units of Microbiology, Immunology, and Molecular Genetics 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

## Honors Program

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty adviser from the department. The core of the program consists of three terms (minimum) of Microbiology, Immunology, and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, students are awarded the bachelor's degree with departmental honors. The department also offers an honors seminar course each Winter Quarter which is required for the honors program. For further information, contact the Student Affairs Office, 1602A Molecular Sciences.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Microbiology, Immunology, and Molecular Genetics offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.)

degrees in Microbiology, Immunology, and Molecular Genetics.

## Microbiology, Immunology, and Molecular Genetics

### Lower Division Courses

**6. Introduction to Microbiology. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 101 or Life Sciences 2. Designed for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs. P/NP or letter grading.

**7. Developments in Biotechnology. (4)** Lecture, three hours; demonstration/laboratory, one hour. Recommended preparation: course 6 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

**12. Biological Threats to Society: Bioterrorism and Emerging Infections. (4)** Lecture, four hours. Examination of biological threats to American society. Coverage of biological weapons going back to first attempts to use microbes or toxins as weapons, and of emerging infections. Introduction to basic biology to understand infectious disease. P/NP or letter grading.

### Upper Division Courses

**101. Introductory Microbiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 153A, Life Sciences 3, 4. Corequisite: course 101L. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology. Letter grading.

**101L. Microbiology Laboratory. (3)** Lecture, one hour; laboratory, five hours. Requisites: Chemistry 153A, Life Sciences 3, 4. Corequisite: course 101 (or 101 with a grade of C or better if previously taken). General laboratory techniques and theory in microbiology and molecular genetics, including isolation and identification of bacterial species from nature, transformation of *Escherichia coli*, Ames test, analysis of auxotrophic mutants. Letter grading.

**102. Introductory Virology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4, with grades of C or better. Recommended: Chemistry 153A. Recommended corequisite: course 102L. Biological properties of bacterial and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts. Letter grading.

**102L. Virology Laboratory. (2)** Discussion, one hour; laboratory, four hours. Requisites: Life Sciences 3, 4, with grades of C or better. Corequisite: course 102 (or 102 with a grade of C or better if previously taken). General laboratory techniques and theory in virology, including complementation, recombination, transduction, experiments in animal virology using tissue culture. Letter grading.

**C106. Molecular and Genetic Basis of Bacterial Infections. (4)** Lecture, three hours; discussion, one hour. Requisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206. Letter grading.

**C107. Viral Pathogenesis. (2)** Lecture, two hours; discussion, one hour three times per quarter. Requisite: course 185A. Strongly recommended: course 102, Chemistry 153B. Viral pathogens that infect mammals. Viral entry into and replication in host cells. Host response and host/virus interaction. Pathogenic manifestations exhibited during viral infections. Concurrently scheduled with course C207. Letter grading.

**C120. Advanced Techniques in Microbiology. (4)** (Formerly numbered 120.) Lecture, one hour; laboratory, six hours. Requisite: course 101L or 102L, with a grade of B or better. Introduction to current recombinant techniques. Experiments include PCR, cloning, and other recombinant techniques. DNA binding recombinant protein is purified from *Escherichia coli* and its ability to bind to DNA studied using gelshift assay. Introduction to protein/protein interaction using yeast two-hybrid system and to tissue culture techniques and transfection and expression of genes for human light and heavy chain antibody. Concurrently scheduled with course C220. Letter grading.

**C132. Cell Biology of Nucleus. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Cell biology of eukaryotic nucleus, including principles of chromosome structure, transcription, RNA processing, nuclear-cytoplasmic transport, and cell cycle control. Concurrently scheduled with course C232. Letter grading.

**C133. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered CM133.) Lecture, three hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course C233. P/NP or letter grading.

**C134. Ethics and Accountability in Biomedical Research. (2)** Seminar, two hours. Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course C234. P/NP grading.

**CM156. Human Genetics. (4)** (Same as Human Genetics CM156 and Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**C159. Advanced Molecular Genetics. (5)** Lecture, three hours; discussion, two hours. Requisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C259. Letter grading.

**C168. Molecular Parasitology. (4)** (Formerly numbered CM168.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course C268. Letter grading.

**C174. Advanced Topics in Molecular Parasitology. (2)** (Formerly numbered Molecular, Cell, and Developmental Biology C174F.) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C274. Letter grading.

**CM176. Advanced Topics in Animal Virus/Host Interaction. (4)** (Formerly numbered M176.) (Same as Molecular, Cell, and Developmental Biology CM176.) Lecture, four hours; discussion, one hour. Requisites: Life Sciences 3, 4. Recommended: course 102 or Chemistry 153B or Molecular, Cell, and Developmental Biology 144. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. Concurrently scheduled with course CM276. P/NP or letter grading.

**CM178. Molecular Genetics. (6)** (Same as Biological Chemistry CM178, Human Genetics CM178, and Molecular, Cell, and Developmental Biology CM178.) Lecture, five hours. Requisites: Chemistry 153A, 153B, Life Sciences 3, 4, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**185A. Immunology. (5)** (Formerly numbered M185A.) Lecture, three hours; discussion, 90 minutes. Requisites: Life Sciences 3, 4. Recommended requisites or corequisites: Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Not open for credit to students with credit for course M261 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions. Letter grading.

**C185B. Intermediate Immunology. (4)** (Formerly numbered CM185B.) Lecture, three hours; discussion, one hour. Requisite: course 185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course 185A. Concurrently scheduled with course C285. Letter grading.

**192. Teaching Practicum in Microbiology, Immunology, and Molecular Genetics. (1 to 4)** Tutorial, to be arranged. Limited to junior/senior Microbiology, Immunology, and Molecular Genetics majors. Training and supervised practicum for advanced undergraduates in teaching courses related to microbiology, immunology, and molecular genetics. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. P/NP or letter grading.

**195. Proseminar. (2)** Seminar, two hours. Designed for seniors. Discussion by small groups of students and instructor on current research literature. Topics vary each year. May be taken only once for credit in the major but may be repeated for University credit. P/NP or letter grading.

**199. Special Studies in Microbiology, Immunology, and Molecular Genetics. (2 to 8)** Tutorial, to be arranged. Preparation: minimum 3.0 grade-point average in premajor and major. Requisites: Chemistry 153A, 153L. Limited to junior/senior Microbiology, Immunology, and Molecular Genetics majors. Individual research project under direct supervision of departmental faculty member. Copy of report describing the research must be filed with Student Affairs Office by end of term. First 4 units must be taken P/NP; 12 additional units, 4 of which may be applied toward the major, may be taken for a letter grade.

**199H. Honors Thesis. (4 or 8)** Tutorial, to be arranged. Limited to microbiology, immunology, and molecular genetics honors program students. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of 4 units may be applied toward the major, with balance applied toward B.S. degree requirements. P/NP or letter grading.

## Graduate Courses

**201. Microbiology and Immunology. (10)** (Formerly numbered Microbiology and Immunology 201.) Lecture, six hours; laboratory, nine hours. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis. S/U or letter grading.

**C206. Molecular and Genetic Basis of Bacterial Infections. (4)** Lecture, three hours; discussion, one hour. Requisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C106. Letter grading.

**C207. Viral Pathogenesis. (2)** Lecture, two hours; discussion, one hour three times per quarter. Requisite: course 185A. Strongly recommended: course 102, Chemistry 153B. Viral pathogens that infect mammals. Viral entry into and replication in host cells. Host response and host/virus interaction. Pathogenic manifestations exhibited during viral infections. Concurrently scheduled with course C107. Letter grading.

**M208. Molecular Biology of Animal Viruses. (4)** (Formerly numbered Microbiology and Immunology M208.) (Same as Molecular, Cell, and Developmental Biology CM279.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Letter grading.

**M217. Basic Science and Strategies of Gene Therapy. (2)** (Same as Molecular, Cell, and Developmental Biology M217.) Seminar, two hours. Preparation: basic knowledge of virology. Basic science and viral vector systems utilized for gene therapy. S/U grading.

**C220. Advanced Techniques in Microbiology. (4)** Lecture, one hour; laboratory, six hours. Prerequisite: course 101L or 102L, with a grade of B or better. Introduction to current recombinant techniques. Experiments include PCR, cloning, and other recombinant techniques. DNA binding recombinant protein is purified from *Escherichia coli* and its ability to bind to DNA studied using gelshift assay. Introduction to protein/protein interaction using yeast two-hybrid system and to tissue culture techniques and transfection and expression of genes for human light and heavy chain antibody. Concurrently scheduled with course C120. Letter grading.

**223. Membrane Research Seminar. (2)** (Formerly numbered M223.) Seminar, two hours. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit. S/U or letter grading.

**M229. Cellular Biology of Host/Pathogen Interactions. (6)** (Same as Molecular, Cell, and Developmental Biology M229.) Lecture, four hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and host. Letter grading.

**C232. Cell Biology of Nucleus. (4)** Lecture, three hours; discussion, one hour. Prerequisite: Life Sciences 4. Cell biology of eukaryotic nucleus, including principles of chromosome structure, transcription, RNA processing, nuclear-cytoplasmic transport, and cell cycle control. Concurrently scheduled with course C132. Letter grading.

**C233. Principles, Practices, and Policies in Biotechnology. (2)** (Formerly numbered CM233.) Lecture, three hours. Prerequisites: Chemistry 153A and 153B, or Life Sciences 3 and 4, with grades of B or better. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course C133. S/U or letter grading.

**C234. Ethics and Accountability in Biomedical Research. (2)** (Formerly numbered CM234.) Seminar, two hours. Designed for graduate students and undergraduates who have credit for a life sciences or biomedical individual studies 199 course. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. Concurrently scheduled with course C134. S/U or letter grading.

**M240. Cytokines and Reproductive Biology. (2)** (Same as Molecular, Cell, and Developmental Biology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

**242. Seminar: Microbial Molecular Genetics. (2)** Seminar, two hours. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

**CM248. Molecular Genetics. (6)** (Formerly numbered M248.) (Same as Biological Chemistry CM248, Human Genetics CM248, and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Prerequisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**250. Seminar: Microbial Metabolism. (2)** Seminar, two hours. Discussion and student presentations of recent work in areas of genetic regulation and physiology of bacterial metabolism. S/U or letter grading.

**251. Seminar: Regulation and Differentiation. (2)** Seminar, one hour. S/U or letter grading.

**254. Pre-mRNA Processing in Cellular Metabolism and Differentiation. (2)** Seminar, three hours. Designed for graduate students. Reading and discussion of papers dealing with mRNA metabolism and posttranscriptional control of gene expression. From detailed RNA chemistry and autocatalytic reactions to more recently described and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

**CM256. Human Genetics. (4)** (Same as Human Genetics CM256 and Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, two hours. Prerequisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**C259. Advanced Molecular Genetics. (5)** Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 153A, Life Sciences 4. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C159. Letter grading.

**M261. Molecular and Cellular Immunology. (6)** (Same as Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

**262A. Seminar: Current Topics in Immunobiology of Cancer. (2)** (Formerly numbered M262A.) Seminar, two hours. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

**262D. Selected Topics in Immunology. (2)** (Formerly numbered M262D.) Seminar, two hours. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

**266. Genetic Mechanisms Seminar. (2)** Seminar, three hours. Designed for students in Predoctoral Training Program in Genetic Mechanisms. Current research topics in genetics. May be repeated for credit. S/U or letter grading.

**C268. Molecular Parasitology. (4)** (Formerly numbered CM268.) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 3, 4. Survey of parasitic protozoa not only as parasites which interact with a host, but also as model systems for analysis of basic biological phenomena such as gene regulation, molecular development, cell-cell interactions, molecular evolution, and novel biochemical pathways. Concurrently scheduled with course C168. Letter grading.

**270. Seminar: Molecular Virology. (2)** Seminar, two hours. Designed for graduate students. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U or letter grading.

**C274. Advanced Topics in Molecular Parasitology. (2)** (Formerly numbered C222.) Lecture, two hours. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Concurrently scheduled with course C174. Letter grading.

**CM276. Advanced Topics in Animal Virus/Host Interaction. (4)** (Formerly numbered CM258.) (Same as Molecular, Cell, and Developmental Biology CM258 and Pharmacology M276.) Lecture, four hours; discussion, one hour. Recommended prerequisite: course 102 or Chemistry 153B or Molecular, Cell, and Developmental Biology 144. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. Concurrently scheduled with course CM176. S/U or letter grading.

**C285. Intermediate Immunology. (4)** (Formerly numbered CM285.) Lecture, three hours; discussion, one hour. Prerequisite: course 185A or Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course 185A. Concurrently scheduled with course C185B. Letter grading.

**290. Seminar: Molecular Genetics. (2)** Seminar, one hour; discussion, one hour. Designed for graduate students. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U or letter grading.

**296A-296Z. Seminars: Research Topics in Microbiology, Immunology, and Molecular Genetics. (1 to 4 each)** Seminar, three hours. Advanced study and analysis of current topics in microbiology, immunology, and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U or letter grading:

**296A.** Eukaryotic Transcription Control.

**296B.** Regulation of Pre-mRNA Splicing.

**296D.** *Escherichia coli* Physiological Research.

**296E.** Archaeobacterial Research.

**296F.** Molecular Biology of Microbial Diversity.

**296G.** Structure and Function of Membrane Transport Proteins.

**296H.** Genetics of Common Diseases.

**296J.** Microbial Pathogenesis.

**296K.** Advanced Topics in Immunology.

**296L.** Molecular Biology of Bacterial Growth.

**296M.** Immune Regulation and Autoimmune Disease.

**296N.** RNA and Protein Structure and Function.

**296O.** Cell Growth and Signal Transduction.

**296P.** Bacterial Toxins and Human Cytokines.

**296Q.** Mechanisms of Hematopoietic Development.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Microbiology in Higher Education. (2)** Seminar/discussion/laboratory, two hours. Designed for graduate students. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

**596. Directed Individual Research. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 6)** (Formerly numbered Microbiology and Immunology 597.) Tutorial, to be arranged. S/U grading.

**598. Research for M.S. Thesis. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 12)** Tutorial, to be arranged. S/U grading.

## MIDDLE EASTERN AND NORTH AFRICAN STUDIES

*Interdepartmental Program  
College of Letters and Science*

A. Jihad Racy, Ph.D. (*Ethnomusicology*)  
Yona Sabar, Ph.D. (*Near Eastern Languages and Cultures*)  
Hossein Ziai, Ph.D. (*Near Eastern Languages and Cultures*)

### Professors Emeriti

Richard Hovannisian, Ph.D. (*History*)  
Nikki Keddie, Ph.D. (*History*)

Afaf Marsot, D.Phil. (*History*)  
Stanford J. Shaw, Ph.D. (*History*)

### Associate Professors

Ali Behdad, Ph.D. (*Comparative Literature, English*)  
Irene A. Bierman, Ph.D. (*Art History*)  
Michael D. Cooperson, Ph.D. (*Near Eastern Languages and Cultures*)  
James L. Gelvin, Ph.D. (*History*)  
Michael G. Morony, Ph.D. (*History*)  
Aamir R. Mufti, Ph.D. (*Comparative Literature*)  
Gabriel Piterberg, D. Phil. (*History*)  
Claudia Rapp, D.Phil. (*History*)  
William M. Schniedewind, Ph.D. (*Near Eastern Languages and Cultures*)

### Assistant Professors

Aziza Khazzoom, Ph.D. (*Sociology*)  
Ghislaine E. Lydon, Ph.D., in *Residence* (*History*)  
Willemina Z. Wendrich, Ph.D. (*Near Eastern Languages and Cultures*)

## Scope and Objectives

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this geographic area from the medieval to the modern period, (2) those who plan to live and work in the Middle East and North Africa whose careers can be aided by a knowledge of the peoples, languages, history, and institutions of the region, (3) those who seek background knowledge because they intend to work with people of Middle Eastern and North African heritage in the U.S., and (4) students preparing for academic study at the graduate level in the various disciplines pertaining to the Middle East and North Africa.

The Middle Eastern and North African Studies (MENAS) Program focuses on the history and culture of the region from circa 300 C.E. to the present day. It includes the study of the peoples with cultural and personal roots in the region, especially those who immigrated to the U.S. The program offers a B.A. degree and a minor in Middle Eastern and North African Studies and is by its nature defined as an area studies program with a regional focus.

The graduate major in this discipline is called Islamic Studies. For details, see the program by that name earlier in this section.

## Undergraduate Study

### Middle Eastern and North African Studies B.A.

#### Preparation for the Major

*Required:* The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish, or the equivalent level of proficiency as determined by admission into a second-year language course (other languages may be substituted by petition); History 9D; and three lower division courses (at least 12 units) with Middle Eastern or North African content selected from Anthropology 8, 9, Comparative Literature 1A, 1B, 1C, 1D, Economics 1, 2, Ethnomusicology 20B, 91L, 91N, Geography 3, History 20, 21, 22, Near Eastern Languages 50A, 50B, 50C, Political Science 20, 50, Sociology 1. Other

courses may be substituted by petition, but only with advance approval.

To enter the major, students must be in good academic standing (minimum overall 2.0 grade-point average), have completed 45 units and the requirements for the Preparation for the Major, and attend a mandatory counseling session and file a petition with the student affairs officer, 10375 Bunche Hall, (310) 206-2806.

### Transfer Students

To be admitted as Middle Eastern and North African Studies majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one course in Middle Eastern and North African history and three additional courses with relevant content (eligibility of courses to be determined at the introductory counseling meeting).

### The Major

*Required:* At least 11 upper division courses as follows: (1) three courses at the intermediate or advanced level or the equivalent in the Middle Eastern language taken in lower division, or the equivalent level of proficiency as determined by a departmentally administered examination, (2) History 106A, 106B, 106C, and (3) five elective courses, including courses in three different departments and two courses in a single department, to be selected from Anthropology 176, Art History 104A, 104B, C104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 191L, 191N, French 121A, 160, Geography 135, 187, History, 109, 123A, 123B, 175B, 175C, 177, any upper division Near Eastern Languages and Cultures nonlanguage course, Political Science 132A, 132B, 157, 165, Sociology 187.

Students may petition for the following preapproved courses to fulfill upper division elective requirements for the major: (1) any one special topics course with substantial Middle Eastern or North African content and focus on the period after 300 C.E. and (2) one relevant methodology course such as Political Science 102, Psychology 142H, or Sociology C112. Other courses may be substituted by petition, but only with advance approval.

No more than 32 of the 44 units required for the major may be in one department, and at least 22 upper division units must be in departments that offer a major in the College of Letters and Science. No more than 20 units applied toward this major may fulfill the requirements for a major or minor in another department or program. All courses must be completed with grades of C (2.0) or better.

Students are encouraged to gain overseas experience by study abroad through the Education Abroad Program in Egypt, Israel, or Turkey.

For further information, contact the student affairs officer at (310) 206-2806.

## Middle Eastern and North African Studies Minor

The Middle Eastern and North African Studies minor allows students to select from a broad range of courses in various departments to develop professional and methodological skills with area expertise. The minor enables students with an interest in the region to add dimension to their programs.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed 45 units, and file a petition and seek counseling with the student affairs officer, 10375 Bunche Hall, (310) 206-2806.

**Required Lower Division Courses (8 units):** History 9D and one course selected from Anthropology 8, 9, Comparative Literature 1A, 1B, 1C, 1D, Economics 1, 2, Ethnomusicology 20B, 91L, 91N, Geography 3, History 20, 21, 22, Near Eastern Languages 50A, 50B, 50C, Political Science 20, 50, Sociology 1.

**Required Upper Division Courses (20 units):** Three social sciences or humanities courses (one course from History 106A, 106B, 106C, 109, 123A, 123B, 175B, 175C, or 177 must be included) and two courses with specific Middle Eastern or North African content. Courses must be selected from Anthropology 176, Art History 104A, 104B, C104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 191L, 191N, French 121A, 160, Geography 135, 187, History, 109, 123A, 123B, 175B, 175C, 177, any upper division Near Eastern Languages and Cultures nonlanguage course, Political Science 132A, 132B, 157, 165, Sociology 187.

Other courses may be substituted by petition, but only with advance approval.

A minimum of 20 units applied toward the minor requirements must be in addition to units applied toward major or minor requirements in another department or program.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Scope and Objectives

The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts integrative teaching and research programs that begin with molecular interactions and extend to

studies of diseases and their treatment in humans. Departmental investigators study the biochemistry and pharmacology of drugs, gene expression and its regulation, signal transduction processes, cell-to-cell communication, viral replication and pathogenesis, autoimmune disease, neuronal development and plasticity, and integrated organ functions using techniques of chemistry and structural biology, DNA microarrays, molecular and cell biology, transgenic and chimeric mice, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Molecular Imaging, Ahmanson Biological Imaging Clinic, and UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Molecular and Medical Pharmacology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Molecular and Medical Pharmacology.

The department also offers two M.D./Ph.D. programs concurrently with the School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP

by the School of Medicine in order to qualify. The second is the Specialty Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

Note: There is no degree program in pharmacy at UCLA.

## Molecular and Medical Pharmacology

### Upper Division Courses

**M110A. Drugs: Mechanisms, Uses, and Misuse. (4)** (Formerly numbered 110A.) (Same as Molecular Toxicology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Life Sciences 2, 3. Course M110A is requisite to 110B. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents. Letter grading.

**110B. Drugs: Mechanisms, Uses, and Misuse. (4)** Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: course M110A, Life Sciences 2, 3. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse. Letter grading.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students. P/NP or letter grading.

### Graduate Courses

**200. Introduction to Laboratory Research. (4 to 6)** Laboratory, eight to 16 or 16 to 20 hours. Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

**203. Medical Pharmacology. (2)** Lecture, zero to two hours; discussion, zero to two hours. Requisites: courses 211A, 211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs. S/U or letter grading.

**211A-211B. Principles of Pharmacology. (4-2)** Lecture, three to eight hours; discussion, zero to nine hours. Preparation: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine. S/U or letter grading.

**212A-212B. Graduate Commentary: Medical Pharmacology. (2-2)** Preparation: mammalian physiology, biochemistry. Supplementation of topics covered in course 203. Primarily for graduate students. S/U or letter grading.

**234A-234B. Experimental Methods in Pharmacology. (2-2)** Laboratory, three hours. Survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds. S/U or letter grading.

**M234C. Laboratory in Toxicological Methods. (2)** (Same as Environmental Health Sciences M245 and Molecular Toxicology M245.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

**237. Research Frontiers in Cellular and Molecular Pharmacology. (8)** (Formerly numbered 237A-237B-237C.) Lecture, 10 hours; laboratory, 30 hours total. Detailed examination of principles of pharmacology and mechanisms of drug action at organismal, tissue, cellular, and molecular levels, with emphasis on receptors, receptor/effector coupling, neurotransmitters, cardiovascular pharmacology, autonomic and central nervous system pharmacology. S/U or letter grading.

**M241. Introduction to Chemical Pharmacology and Toxicology. (6)** (Formerly numbered 241.) (Same as Molecular Toxicology M241.) Lecture, six hours. Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. S/U or letter grading.

**M248. Introduction to Biological Imaging. (4)** (Same as Biomedical Engineering M248 and Biomedical Physics M248.) Lecture, three hours; laboratory, one hour; outside study, seven hours. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories. Letter grading.

**251. Seminar: Pharmacology. (2)** Seminar presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

**M255. Biological Catalysis. (4)** (Same as Biological Chemistry M255, Chemistry CM255, and Molecular, Cell, and Developmental Biology CM252.) Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Letter grading.

**M257. Introduction to Toxicology. (4)** (Same as Pathology M257.) Requisite: course M241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems. S/U or letter grading.

**M258. Pathologic Changes in Toxicology. (4)** (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system). S/U or letter grading.

**M276. Advanced Topics in Animal Virus/Host Interaction. (4)** (Same as Microbiology CM276 and Molecular, Cell, and Developmental Biology CM258.) Lecture, four hours; discussion, one hour. Recommended requisite: Chemistry 153B or Microbiology 102 or Molecular, Cell, and Developmental Biology 144. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. S/U or letter grading.

**288. Gene Therapy. (4)** Lecture, three hours; discussion, one hour. Introduction to basic concepts of gene therapy, wherein treatment of human disease is based on transfer of genetic material into an individual. Discussion of molecular basis of disease, gene delivery vectors, and animal models. Letter grading.

**291. Special Topics in Pharmacology. (2 to 4)** Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates and faculty. S/U or letter grading.

**293. Nitric Oxide Chemistry, Biochemistry, and Physiology. (2 or 4)** Lecture, two or four hours. Basic chemistry, biochemistry, and physiology of nitric oxide and related species, with emphasis on understanding novel mechanisms of nitrogen oxide function as both a physiological and pathophysiological agent/messenger. S/U or letter grading.

**298. Seminar: Current Topics in Molecular and Medical Pharmacology. (2)** Limited to pharmacology, ACCESS program, and interdepartmental Molecular Biology Ph.D. program students. Students conduct or participate in discussions on assigned topics. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Research in Pharmacology. (4 to 12)** Tutorial, to be arranged. S/U or letter grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 12)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology and neurobiology; nucleic acid biochemistry; gene regulation; immunobiology; microbiology/virology and pathogenesis; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein and enzyme structure and function; genomics; bioinformatics; and structural biology.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degree

The Molecular Biology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Biology.

## Molecular Biology

### Graduate Courses

**297. Seminar: Molecular and Cellular Life Sciences. (2)** In-depth surveys of recent developments in specific fields of life sciences research. By reading and presenting primary research articles, students learn to critically evaluate research papers and organize and present a seminar on a specific research topic. S/U or letter grading.

**298. Current Topics in Molecular Biology. (2)** Student presentation/seminar, two hours. Students present oral critiques and participate in discussions on assigned topics. S/U grading.

## Related Courses

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

### Biological Chemistry

M234. Genetic Control of Development  
 CM248. Molecular Genetics  
 251A. Seminar: Transcriptional Regulation  
 CM253. Macromolecular Structure  
 M263. Metabolism and Its Regulation  
 M266A-M266B-M266C. Seminars: Molecular Embryology  
 CM267. Cell Structure, Signaling, and Development

### Chemistry and Biochemistry

M230B. Structural Molecular Biology  
 M230D. Structural Molecular Biology Laboratory  
 CM253. Macromolecular Structure  
 256A-256V. Seminars: Research in Biochemistry  
 CM260. Bioinformatics and Genomics  
 M263. Metabolism and Its Regulation  
 M267. Cell Structure, Signaling, and Development

### Microbiology, Immunology, and Molecular Genetics

M229. Cellular Biology of Host/Pathogen Interactions  
 242. Seminar: Microbial Molecular Genetics  
 CM248. Molecular Genetics  
 250. Seminar: Microbial Metabolism  
 251. Seminar: Regulation and Differentiation  
 CM256. Human Genetics  
 M261. Molecular and Cellular Immunology  
 290. Seminar: Molecular Genetics

### Molecular, Cell, and Developmental Biology

CM223. Cell Structure, Signaling, and Development  
 M229. Cellular Biology of Host/Pathogen Interactions  
 M230B. Structural Molecular Biology  
 M230D. Structural Molecular Biology Laboratory  
 M234. Genetic Control of Development  
 CM248. Molecular Genetics

Utpal Banerjee, Ph.D., *Chair*

### Professors

Utpal Banerjee, Ph.D.  
 Robert B. Goldberg, Ph.D.  
 Volker Hartenstein, Ph.D.  
 Ann M. Hirsch, Ph.D.  
 Harumi Kasamatsu, Ph.D.  
 James A. Lake, Ph.D.  
 Judith A. Lengyel, Ph.D.  
 John R. Merriam, Ph.D.  
 Elaine M. Tobin, Ph.D.

### Professors Emeriti

William R. Clark, Ph.D.  
 John H. Fessler, Ph.D.  
 George G. Laties, Ph.D.  
 Bernard O. Phinney  
 Winston A. Salsler, Ph.D.  
 Fritiof S. Sjostrand, Ph.D.  
 Clara M. Szego, Ph.D.

### Associate Professors

Renato J. Aguilera, Ph.D.  
 Luisa M. Iruela-Arispe, Ph.D.  
 Frank A. Laski, Ph.D.  
 Chentao Lin, Ph.D.  
 Shuo Lin, Ph.D.  
 Karen M. Lyons, Ph.D.  
 Paul H. O'Lague, Ph.D.

### Assistant Professors

Jau-Nian Chen, Ph.D.  
 Sioux K. Christensen, Ph.D.  
 Stephen E. Jacobsen, Ph.D.

### Lecturers

Roger E. Bohman, Ph.D.  
 Jeanne Perry, Ph.D.

### Adjunct Professors

Lutz Birnbaumer, Ph.D.  
 Richard B. Flavell, Ph.D.

### Adjunct Assistant Professor

Robert I. Pennell, Ph.D.

## Scope and Objectives

The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The Plant Technology B.S. degree is designed to prepare students for careers in biotechnology; students are trained in plant biology as well as in concepts and tech-

niques in molecular biology. The M.A. and Ph.D. degrees provide opportunities for advanced concentrated study and require independent and innovative research that ultimately results in publishable thesis and dissertation materials.

## Undergraduate Study

### Molecular, Cell, and Developmental Biology B.S.

The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4A, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C- or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Molecular, Cell, and Developmental Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

### The Major

*Required Courses:* Chemistry and Biochemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140 or 165, 104, 138 or C141, 144.

*Electives:* At least 20 upper division elective units, of which at least 10 must be in courses offered by the department. Any upper division departmental course, except Molecular, Cell, and Developmental Biology 193A, 193B, or 199, is acceptable. The following courses outside the department may be taken to satisfy a

maximum of 10 units in this category: Biological Chemistry CM153G, Biomathematics 160 or Statistics 100A, Chemistry and Biochemistry 153C, 156, CM159A, CM159B, C160, Life Sciences 100HA or 100HB or 100HC, Microbiology, Immunology, and Molecular Genetics 101, 102, C106, C159, C168, C174, 185A, Organismic Biology, Ecology, and Evolution 110, 121, 146, 157, 162, M166, Physiological Science 126.

**Laboratory:** At least 4 units of upper division laboratory experience selected from Chemistry and Biochemistry 154, Life Sciences 100HA or 100HB or 100HC, Microbiology, Immunology, and Molecular Genetics 101 and 101L (both courses must be taken), 102 and 102L (both courses must be taken), Molecular, Cell, and Developmental Biology 120, 155, 190A through 190D, 190HA through 190HD, 199, Organismic Biology, Ecology, and Evolution M158, 162, M166.

A maximum of 12 units of Molecular, Cell, and Developmental Biology 190 and no more than one course from 190C, 190HC, or 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

Any single course may be applied toward only one category within the major (e.g., course C141 may be applied toward the required or elective category but not toward both).

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Plant Biotechnology B.S.

The Plant Biotechnology major is designed to prepare students for careers in biotechnology or for entrance into graduate school. Industries, particularly those that have traditionally dealt with agricultural products, are increasingly turning to biotechnology to improve the production as well as the nutritional value of food. These emerging industries are also developing products to lessen the dependence on nonrenewable resources and to restore soil and water quality. Students are trained in plant biology as well as in concepts and techniques in molecular biology. These skills should enable students who successfully complete the curriculum to find challenging careers in the diverse biotechnology arena, academics, industry, or government.

### Preparation for the Major

#### Life Sciences Core Curriculum

**Required:** Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Statistics 13.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Plant Biotechnology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

**Required:** A minimum of 10 courses as follows:

Group 1: Chemistry and Biochemistry C160, Molecular, Cell, and Developmental Biology 104, 120, C141 or C150, Organismic Biology, Ecology, and Evolution 162, and 4 units of plant biology laboratory internship (Molecular, Cell, and Developmental Biology 190A and 190B, or 190HA and 190HB, or 199).

Group 2: Four additional courses selected from Chemical Engineering C115, C125, Chemistry and Biochemistry 110A, 156, Microbiology, Immunology, and Molecular Genetics 101 and 101L (counts as one course), 102 and 102L (counts as one course), C120, C133 (counts as a half course), Molecular, Cell, and Developmental Biology 144 or Organismic Biology, Ecology, and Evolution 121, and any courses in Group 1 not applied toward Group 1.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Majors must earn a C– or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Honors Program

### Admission

The honors program provides exceptional Molecular, Cell, and Developmental Biology and Plant Biotechnology majors with the opportunity to do research culminating in an honors thesis. Junior and senior majors who have completed all university-level coursework, including all preparation courses and requirements for the major with an overall grade-point average of 3.0 or better and a 3.5 GPA or better in the required major courses, may apply for admission to the honors program. Students must have the sponsorship of an approved faculty adviser; those intending to pursue highest honors must have faculty sponsorship from within the department.

For further information and application forms, students should consult the Student Affairs Of-

fice, 2124 Life Sciences, early in their educational planning. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program.

### Requirements

The core of the program consists of at least one undergraduate seminar selected from Molecular, Cell, and Developmental Biology C174A through C174D and three research courses (12 units minimum) from 190HA, 190HB, and 190HC, culminating in a thesis.

To qualify for graduation with honors, students must satisfactorily complete all requirements for the honors program and the major and obtain at least an overall 3.0 grade-point average and a 3.5 GPA or better in coursework required for the major. On recommendation by the faculty sponsor and with approval of the thesis by the departmental honors committee, students are awarded no honors, departmental honors, or highest departmental honors.

At the discretion of the departmental honors committee, students who have (1) a GPA of 3.6 or better, both overall and in the major, (2) research sponsorship from a faculty adviser within the department, and (3) demonstrated exceptional accomplishment on the research thesis are awarded highest departmental honors.

## Computing Specialization

Majors in Molecular, Cell, and Developmental Biology and Plant Biotechnology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B or Organismic Biology, Ecology, and Evolution C159. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Student Affairs Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Molecular, Cell, and Developmental Biology offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Molecular, Cell, and Developmental Biology.

# Molecular, Cell, and Developmental Biology

## Lower Division Courses

**30. Biology of Cancer. (5)** Lecture, five and one-half hours; experiential service learning, 30 minutes. Introduction to molecular, cellular, and clinical aspects of cancer and consideration of sociological and psychological impacts of cancer on the individual and society. P/NP or letter grading.

**40. AIDS and Other Sexually Transmitted Diseases. (5)** Lecture, five and one-half hours; experiential service learning, 30 minutes. Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

**70. Genetic Engineering and Society. (4)** Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

**80. The Green World: Plant Biology for Now and the Future. (5)** Lecture, two and one half hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable "clean" energy, reclamation of deforested and nutritionally depleted soils, and "biological factories" to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

**88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective. (4)** Seminar, three hours. Limited to freshmen who have not completed Life Sciences 3. Designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that uses gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.

**88D. Lower Division Seminar: Genetics and Society. (4)** Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritance in order to understand scientific methods and science teaching.

**88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications. (4)** Seminar, three hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific/genetic basis underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.

**88F. Lower Division Seminar: Science and Scientists — Expectations and Realities. (2)** Examination of change from when science was done by individuals as an avocation without societal goals to contemporary science which is done by professionals and is driven by societal needs and pressures. P/NP or letter grading.

**M88H. Lower Division Seminar: Limits of Biological Design through Physical Principles. (4)** (Same as Physics M88.) Seminar, three hours. Enforced requisites: Chemistry 20A, 20B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Cell Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4. Not open for credit to students with credit for course C139 or M140. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics. Letter grading.

**104. Cell and Molecular Biology Laboratory. (6)** Lecture, 90 minutes; discussion, one hour; laboratory, eight hours. Requisites: Life Sciences 3, 4. Introduction to methods in molecular biology. Topics include purification, manipulation and analysis of DNA, RNA, and protein. Emphasis on computer sequence analysis and use of current literature. May not be repeated for credit. Letter grading.

**120. Introduction to Plant Biology. (6)** Lecture, 90 minutes; discussion, one hour; laboratory, eight hours. Requisites: Life Sciences 3, 4. Introduction to plant biology, as well as to concepts and techniques in molecular biology and genetics. Students gain hands-on experience in laboratory section in doing experiments and hone their powers of observation. May not be repeated for credit. Letter grading.

**138. Developmental Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Cellular and molecular basis of animal embryology. Letter grading.

**C139. Molecular, Cellular, and Developmental Neurobiology. (6)** Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. Concurrently scheduled with course CM220. Letter grading.

**M140. Cell Biology: Cell Cycle. (5)** (Same as Biological Chemistry M140.) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, and 20L, Life Sciences 3, 4. Not open for credit to students with credit for course 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion. Letter grading.

**C141. Molecular Basis of Plant Differentiation and Development. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239. Letter grading.

**142. Seminar: Topics in Developmental Biology. (2)** Requisite: course 138. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

**144. Molecular Biology. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for Chemistry 153B or Organismic Biology 121. Structure of genes and chromosomes; prokaryotic and eukaryotic replication and transcription; repair and recombination; RNA processing. Letter grading.

**C150. Plant Chemical and Molecular Communication. (4)** Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C250.

**155. Molecular Genetic Methods. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours. Recommended preparation: course 104. Designed for and limited to Molecular, Cell, and Developmental Biology majors for priority pass and first pass. Gene mapping and detection and analysis of gene variants by means of inheritance patterns. Letter grading.

**CM156. Human Genetics. (4)** (Same as Human Genetics CM156 and Microbiology CM156.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256. Letter grading.

**CM160. Biological Catalysis. (4)** (Same as Chemistry CM155.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM252.

**165. Biology of the Cell. (5)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14 or 20 series, Life Sciences 3, 4. Methods to study cell. Structural, functional, and molecular aspects of cell membrane, mitochondria, chloroplasts, peroxisomes, lysosomes, Golgi, endoplasmic reticulum, and nucleus. Cell cycle regulation. Cell-cell and cell-matrix interactions. Cell motility. Cellular alterations during differentiation programs, tissue architecture, and organogenesis. Pathological alterations in response to cellular transformation, oncogenes, and anti-oncogenes. Letter grading.

**CM169. Cell Structure, Signaling, and Development. (6)** (Same as Biological Chemistry CM169 and Human Genetics CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM223. Letter grading.

**M170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (2 to 4)** (Same as Chemistry CM170.) Lecture, two to three hours; discussion, zero to two hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3, and Chemistry 153L. Recommended: Chemistry 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. P/NP or letter grading.

**171. Principles of Neurobiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, Organismic Biology M166. Strongly recommended: course 100 or C139 or M140. Introduction to basic principles of neurobiology, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transduction and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of nervous system.

**C174A-C174D. Advanced Topics in Cell and Molecular Biology. (2 each)** (Formerly numbered C174A-C174G.) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C222A-C222D. Letter grading:

**C174A. Molecular Evolution. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Letter grading.

**C174B. Molecular Biology of Cell Nucleus. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Letter grading.

**C174D. Molecular Biology of Extracellular Matrix. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Letter grading.

**M175A-M175B-M175C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Neuroscience M101A-M101B-M101C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M175A. Cellular and Systems Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M175B. Molecular and Developmental Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisites: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M175C. Behavioral and Cognitive Neuroscience. (5)** Lecture, four hours; discussion, 90 minutes. Requisite: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**CM176. Advanced Topics in Animal Virus/Host Interaction. (4)** (Formerly numbered M176.) (Same as Microbiology CM176.) Lecture, four hours; discussion, one hour. Requisites: Life Sciences 3, 4. Recommended: course 144 or Chemistry 153B or Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. Concurrently scheduled with course CM258. P/NP or letter grading.

**C177. Molecular Biology of Animal Viruses. (4)** Lecture, three hours. Requisites: Chemistry 153B, Life Sciences 3. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course CM279. Letter grading.

**CM178. Molecular Genetics. (6)** (Same as Biological Chemistry CM178, Human Genetics CM178, and Microbiology CM178.) Lecture, five hours. Requisites: course 100 or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248. Letter grading.

**C180. Molecular and Cellular Immunology. (6)** Lecture, four and one-half hours; discussion, 90 minutes. Requisites: course 100 or C139 or M140, Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for former course M185A. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course CM261. Letter grading.

**188. Research Topics in Molecular, Cell, and Developmental Biology. (1)** Seminar, two hours. Limited to Molecular, Cell, and Developmental Biology majors who are concurrently enrolled in molecular, cell, and developmental biology research courses with departmental faculty members. Study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated once for credit. Letter grading.

**189. Seminar: Social Implications of Current Biological Research. (2)** Seminar, two hours. Discussions about how current research in biology, particularly in areas of molecular, cell, and developmental biology, affects social issues and policy. May be repeated once for credit; however, only 2 units of this course or Organismic Biology 188 may be applied toward either the Biology or Molecular, Cell, and Developmental Biology major. Letter grading.

**190A-190D. Research in Molecular, Cell, and Developmental Biology. (2 to 4 each)** Seminar, to be arranged. Limited to seniors. Individual research designed to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken with Molecular, Cell, and Developmental Biology Department faculty for at least two terms and for a total of at least 8 units. In Progress and letter grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken.

**190HA-190HD. Honors Research in Molecular, Cell, and Developmental Biology. (4 each)** (Formerly numbered 190A-190D.) Laboratory, 16 hours. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Individual honors research project under direct supervision of approved faculty member to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken for at least three terms and for a total of 12 units. In Progress and letter grading (credit to be given only on completion of course 190HB). A report on progress must be presented to undergraduate adviser each term a 190H course is taken. Letter grading (courses 190HC-190HD).

**M191. Biological Bases of Psychiatric Disorders. (4)** (Same as Neuroscience M130, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**193A. Teaching Practicum in Molecular, Cell, and Developmental Biology. (4)** (Formerly numbered 193.) Lecture, three hours; discussion, two hours. Limited to junior/senior Molecular, Cell, and Developmental Biology majors. Training and supervised practicum for advanced undergraduates in teaching courses related to molecular, cell, and developmental biology. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. P/NP or letter grading.

**193B. Teaching Practicum: CityLab. (2)** Lecture, two hours; laboratory, four hours. Limited to juniors/seniors in any life sciences major. Training and supervised practicum for advanced undergraduates in teaching courses related to CityLab. Introduction to teaching ideology and practice, molecular genetics and DNA fingerprinting techniques, and laboratory teaching under guidance of department faculty members. May not be applied toward course requirements for Molecular, Cell, and Developmental Biology major. P/NP or letter grading.

**M194. Undergraduate Seminar: Current Topics in Biomedical Sciences. (2)** (Same as Organismic Biology M194 and Physiological Science M194.) Seminar, two hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**197. Undergraduate Seminar: Current Topics in Molecular, Cell, and Developmental Biology. (2)** Seminar, two hours. Designed for juniors/seniors. Intended for students with strong commitment to pursue graduate studies in molecular, biochemical, physiological, and biomedical fields. Weekly variable topics course with presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**199. Special Studies. (2 to 16)** Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than 8 units of course 199 in any one term must obtain authorization from department chair and appropriate dean.

## Graduate Courses

**M217. Basic Science and Strategies of Gene Therapy. (2)** (Same as Microbiology M217.) Seminar, two hours. Preparation: basic knowledge of virology. Basic science and viral vector systems utilized for gene therapy. S/U grading.

**CM220. Molecular, Cellular, and Developmental Neurobiology. (6)** (Same as Neurobiology M200B, Neuroscience M201, and Physiology M209A.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. Concurrently scheduled with course C139. Letter grading.

**C222A-C222D. Advanced Topics in Cell and Molecular Biology. (2 each)** (Formerly numbered C222A-C222G.) Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C174A-C174D. Letter grading:

**C222A. Molecular Evolution. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Original research proposal required. Letter grading.

**C222B. Molecular Biology of Cell Nucleus. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Original research proposal required. Letter grading.

**C222D. Molecular Biology of Extracellular Matrix. (2)** Lecture, two hours. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Original research proposal required. Letter grading.

**CM223. Cell Structure, Signaling, and Development. (6)** (Same as Biological Chemistry CM267, Chemistry M267, and Human Genetics CM267.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle regulation; chromosomes and DNA repair; protein trafficking and endocytosis; extracellular matrix, cell to cell communication and signal transduction; cell transformation and apoptosis; molecular aspects of development, differentiation, and cancer. Concurrently scheduled with course CM169. Letter grading.

**228. Prokaryotic and Eukaryotic Gene Systems. (2)** Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation.

**M229. Cellular Biology of Host/Pathogen Interactions. (6)** (Same as Microbiology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts. Letter grading.

**M230B. Structural Molecular Biology. (4)** (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

**M230D. Structural Molecular Biology Laboratory. (2)** (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

**M234. Genetic Control of Development. (4)** (Same as Biological Chemistry M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

**M237. Introduction to Cellular Physiology and Biophysics. (6)** (Same as Physiological Science M212 and Physiology M212.) Lecture, five hours. Requisite: Physiological Science 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**C239. Molecular Basis of Plant Differentiation and Development. (5)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students. Letter grading.

**M240. Cytokines and Reproductive Biology. (2)** (Same as Microbiology M240.) Lecture, 90 minutes; discussion, one hour. Overview of current progress on research in cytokines and other immune system molecules in reproductive biology. S/U or letter grading.

**242. Topics in Neurobiology. (4)** Lecture, three hours. Requisite: course 171. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

**CM248. Molecular Genetics. (6)** (Same as Biological Chemistry CM248, Human Genetics CM248, and Microbiology CM248.) Lecture, five hours. Requisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178. Letter grading.

**C250. Plant Chemical and Molecular Communication. (4)** Lecture, three hours; discussion, one hour. Designed for graduate students. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C150.

**CM252. Biological Catalysis. (4)** (Same as Biological Chemistry M255, Chemistry CM255, and Pharmacology M255.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM160. Graduate students required to write research paper and present oral report on it. Letter grading.

**254. Seminar: Plant Morphogenesis. (2)** Seminar, two hours. S/U or letter grading.

**255. RNA Editing. (4)** Lecture, two hours; discussion, one hour. Preparation: knowledge of molecular biology and molecular genetics. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of editing in trypanosome mitochondria, C to U substitution editing in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena.

**CM256. Human Genetics. (4)** (Same as Human Genetics CM256 and Microbiology CM256.) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students. Letter grading.

**CM258. Advanced Topics in Animal Virus/Host Interaction. (4)** (Same as Microbiology CM276 and Pharmacology M276.) Lecture, four hours; discussion, one hour. Recommended requisite: course 144 or Chemistry 153B or Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. Concurrently scheduled with course CM176. S/U or letter grading.

**CM261. Molecular and Cellular Immunology. (6)** (Same as Microbiology M261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course C180. Oral presentation required of graduate students. S/U or letter grading.

**M266A-M266B-M266C. Seminars: Molecular Embryology. (2-2-2)** (Same as Biological Chemistry M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

**276. Seminar: Molecular Genetics. (2)** Topics vary each term.

**277. Seminar: Genetics. (2)** Seminar, two hours. S/U or letter grading.

**278. Seminar: Molecular Genetics of Development. (2)** Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

**CM279. Molecular Biology of Animal Viruses. (4)** (Same as Microbiology M208.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course C177. Letter grading.

**281. Seminar: Molecular Biology. (2)** Seminar, two hours. S/U or letter grading.

**283. Seminar: Topics in Cell Biology. (2)** Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

**284. Seminar: Structural Macromolecules. (2)** Seminar, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology.

**286. Seminar: Plant Development. (2)** Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

**289. Current Topics in Plant Molecular Biology. (2)** Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

**292. Seminar: Molecular Evolution. (2)** Discussion, three hours. Detailed analysis of current understanding of evolution of molecular sequences and structures.

**295. Seminar: Molecular, Cell, and Developmental Biology. (2)** Seminar, two hours. In-depth surveys of recent developments in molecular, cell, and developmental biology research. Reading and presentation of primary research articles to learn to critically evaluate research papers and to organize and present seminars on specific research topics. S/U or letter grading.

**296. Advanced Topics in Molecular, Cellular, and Developmental Biology. (2)** Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**297. Advances in Molecular Analysis of Plant Development and Plant/Microbe Interactions. (2)** Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe interactions. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Molecular, Cell, and Developmental Biology in Higher Education. (2)** Seminar, two hours. Designed for graduate students. Study of problems and methodologies in teaching molecular, cell, and developmental biology, including workshops, seminars, apprentice teaching, and peer observation. S/U grading.

**596. Directed Individual (or Tutorial) Studies. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**598. M.A. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

Physiology is the study of the functional processes that collectively constitute life. The studies usually employ quantitative analyses of normal life processes, of pathological defects in normal life processes, of model systems to clarify and test basic physiological principles, and of functional specializations of organisms that have evolved under the influence of differing selective forces. Thus, physiology contributes importantly to advances in knowledge both in the basic biological sciences and in biomedical sciences and provides an essential foundation for the practice of medicine.

The primary objective of the interdepartmental Molecular, Cellular, and Integrative Physiology Program is to train a new generation of physiologists who apply modern knowledge in molecular and cellular biology and systems physiology to important questions in organismic function. Students learn to conceptualize physiological questions across several levels of organization and to understand how research strategies incorporating each of the levels of analysis can be formulated. This approach to physiology education is responsive to the need for physiologists who can intellectually and

technically span disciplines related to physiology that are typically separated.

Coursework consists of formal instruction in the most current information in molecular biology, cell biology, and the molecular and cellular foundations of physiology. In addition, students identify an area of emphasis in biophysics, cellular and molecular biology, or integrative/comparative physiology in which additional studies are pursued. The heart of the program, however, is the research that leads to the dissertation, which is performed under the guidance of a faculty mentor. The program faculty includes more than 40 professors in the David Geffen School of Medicine and College of Letters and Science. Collectively they have been recently ranked by the National Research Council in the top five in the U.S. for their quality as an academic faculty.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degree

The Molecular, Cellular, and Integrative Physiology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular, Cellular, and Integrative Physiology.

## Molecular, Cellular, and Integrative Physiology

### Graduate Courses

**296. Research Seminar. (2)** Seminar, to be arranged. Review of literature, discussion of original research, and analysis of current topics in molecular, cellular, and integrative physiology. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research. (2 to 10)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 10)** Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 10)** Tutorial, to be arranged. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

## Scope and Objectives

Faculty from a variety of departments and schools at UCLA, including Biological Chemistry, Chemistry and Biochemistry, Environmental Health Sciences, Epidemiology, Medicine, Molecular and Medical Pharmacology, and Pathology and Laboratory Medicine, have joined forces to create an interdisciplinary Ph.D. pro-

gram in Molecular Toxicology, which is administered through the School of Public Health.

Specialties within the program include, but are not limited to, neurotoxicology, immunotoxicology, reproductive and developmental toxicology, genetic toxicology, toxicokinetics and metabolism, genetics and molecular biology, carcinogenesis, and environmental toxicology. There is a particular emphasis on mechanisms of toxicity, since it is now widely accepted that understanding mechanisms will provide the means for accurately determining risk.

New chemicals have been the basis for most of the technological developments during the past century, and there is no question that society has reaped enormous benefits from the creation and growth of the chemical industry. However, major health and environmental problems have also been the legacy of the synthesis of new chemical species. The discipline of toxicology, which seeks to characterize and elucidate the mechanisms of the problems related to exposure of chemical agents, has also developed from a purely descriptive to a mechanistic science whose objective is to understand the basis of toxin action, predict the toxicity of new chemical entities, and protect organisms from them. Toxicology has used the basic disciplines of chemistry, biochemistry, and cell biology to advance understanding of toxicological phenomena, and the growth of the sophistication of toxicology has paralleled the increase in knowledge derived from the basic chemical and biological sciences.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degree

The Molecular Toxicology Program offers the Doctor of Philosophy (Ph.D.) degree in Molecular Toxicology.

## Molecular Toxicology

### Upper Division Courses

**M110A. Drugs: Mechanisms, Uses, and Misuse. (4)** (Same as Pharmacology M110A.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Prerequisites: Life Sciences 2, 3. Introduction to pharmacology and toxicology for undergraduate students, emphasizing drug development and mechanisms of action of drugs and toxic agents. Letter grading.

**199. Special Studies. (2 to 4)** Tutorial, to be arranged. Preparation: submission of written proposal outlining course of study. Limited to seniors. Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only 4 units may be taken each term. Letter grading.

## Graduate Courses

**211A-211B-211C. Molecular Toxicology Seminars. (1-1-1)** Seminar, one hour twice per month. Seminar series which alternately features outside speakers and members of UCLA molecular toxicology community (students, postdoctoral fellows, and faculty) and deals with topics relevant to molecular toxicology. In Progress and S/U grading.

**M241. Introduction to Chemical Pharmacology and Toxicology. (6)** (Same as Pharmacology M241.) Lecture, six hours. Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology students. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action. S/U or letter grading.

**M242. Toxicodynamics. (4)** (Same as Environmental Health Sciences M242.) Lecture, two hours; discussion, two hours. Requisite: Environmental Health Sciences 240. Examination of biochemical, cellular, and molecular mechanisms by which chemicals induce toxicity in wide spectrum of organ systems and in a number of pathological conditions. Letter grading.

**M245. Laboratory in Toxicological Methods. (2)** (Same as Environmental Health Sciences M245 and Pharmacology M234C.) Lecture, one hour; laboratory, four to five hours. Survey of experimental techniques used in study of toxic substances. Experiments conducted within known toxin to demonstrate its effects at molecular, cellular, and tissue levels. Presentation of principles of techniques and methods of data analysis at discussion session prior to laboratory. Letter grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. Individual guided studies under direct faculty supervision. May not be applied toward degree course requirements. May be repeated for credit. Letter grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.

**599. Ph.D. Dissertation Research. (8 to 12)** Tutorial, to be arranged. May not be applied toward degree course requirements. May be repeated for credit. S/U grading.

### Lecturer

Lisa Kernan, Ph.D.

### Visiting Professors

Elizabeth Cohen, Ph.D. (*Information Studies*)  
Jan-Christopher Horak, Ph.D.

## Scope and Objectives

The Moving Image Archive Studies M.A. is an interdepartmental degree program hosted by the Information Studies Department, Film, Television, and Digital Media Department, and UCLA Film and Television Archive. The program is an intensive, specialized two-year course of study consisting of graduate seminars, directed studies, and an extensive internship program, as well as special topic screenings, guest lectures, and technical demonstrations.

The goal of the program is not merely training, but a broad education grounded in historical, critical, and theoretical study. The subject matter encompasses the aesthetics and history of film and television, the cultural responsibilities of selection and curatorship, access and programming for the public, collection management, cataloging and documentation, and technical aspects of preservation and restoration. Graduate seminars, directed studies, and internships are taught by a unique combination of UCLA faculty members, academic scholars, top-level preservationists, technical experts, and other archive specialists, supplemented by guest lecturers from outside the University.

The program recognizes that traditional models of archival work have been redefined in recent years to emphasize moving image preservation as an ongoing process of activities along a continuum that includes curatorship, laboratory preservation, storage management, cataloging, and access. The inseparability of preservation from access, for example, is now well established both within modern archival practice and scholarly research, as is the promise of new digital technologies for both restoration and documentation purposes. As such, the program encourages familiarity with

all these closely related archival functions and provides opportunities for specialization within them. The general orientation of the program also recognizes the realities of a field that includes both large, national-level archives with a specialized staff as well as one- or two-person operations with local and regional mandates. It recognizes, for example, that the contemporary archival field is challenged by issues across the entire range of possible moving image collections from classical, feature-length, and commercial narrative fiction films to experimental, alternative format, independent, and/or personal productions.

A key goal is to link theory with practice. The program embraces hands-on activities in the UCLA Film and Television Archive and internships in the Los Angeles area at other archives, libraries, studios, and laboratories. The program also utilizes the superb facilities at the Film and Television Archive, the Film, Television, and Digital Media Department, and the Information Studies Department.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degree

The Moving Image Archive Studies Program offers the Master of Arts (M.A.) degree in Moving Image Archive Studies.

## Moving Image Archive Studies

### Course List

#### Film and Television (Film, Television, and Digital Media)

200. Bibliography and Methods of Research in Film and Television
203. Seminar: Film and Other Arts
- 206A. Seminar: European Film History
- 206C. Seminar: American Film History
207. Seminar: Experimental Film
- 208C. Seminar: Contemporary Film Theory
- 209A. Seminar: Documentary Film
- 209B. Seminar: Fictional Film
- 209D. Seminar: Animated Film
210. Seminar: Contemporary Broadcast Media
- 211A. Seminar: Historiography
- 217A. Seminar: American Television History
- 217B. Seminar: Selected Topics in Television History
218. Seminar: Culture, Media, and Society
219. Seminar: Film and Society
220. Seminar: Television and Society
221. Seminar: Film Authors
222. Seminar: Film Genres
224. Computer Applications for Film Study
246. Issues in Electronic Culture
270. Seminar: Film Criticism

271. Seminar: Television Criticism  
 276. Seminar: Non-Western Films  
 277. Seminar: Narrative Studies  
 498. Professional Internship in Film and Television
- Information Studies**
200. Information in Society  
 203. Seminar: Intellectual Freedom and Information Policy Issues  
 M225. Latin American Research Resources  
 228. Measurement and Evaluation of Information Systems and Services  
 M229B. Africana Bibliography and Research Methods  
 240. Management of Digital Records  
 245. Information Access  
 246. Information-Seeking Behavior  
 260. Information Structures  
 270. Introduction to Information Technology  
 275. Development of Cultural Information Sources Using Digital Multimedia  
 276. Information Retrieval Systems: Structures and Algorithms  
 277. Information Retrieval Systems: User-Centered Designs  
 280. Social Science Research Methodology for Information Studies  
 281. Historical Methodology of Information Studies  
 282. Principles of Information Systems Analysis and Design  
 410. Management Theory and Practice for Information Professionals  
 431. American Archives and Manuscripts  
 432. Issues and Problems in Preservation of Heritage Materials  
 438A. Seminar: Advanced Issues in Archival Science — Archival Appraisal  
 438B. Seminar: Advanced Issues in Archival Science — Archival Description and Access Systems  
 461. Descriptive Cataloging  
 462. Subject Cataloging and Classification  
 463. Indexing and Thesaurus Construction  
 464. Metadata  
 498. Internship

 Walter Ponc , D.M.A.  
 Paul V. Reale, Ph.D.  
 Jon Robertson, D.M.A.

Robert S. Winter, Ph.D. (*Presidential Professor of Music and Interactive Arts*)

### Professors Emeriti

Elaine R. Barkin, Ph.D.  
 Paul E. Des Marais, M.A.  
 Maurice Gerow, Ph.D.  
 Frederick F. Hammond, Ph.D.  
 Thomas F. Harmon, Ph.D.  
 Henri Lazarof, M.F.A.  
 Roy E. Travis, M.A.

### Associate Professors

Frank Heuser, Ph.D.  
 David S. Lefkowitz, Ph.D.

### Assistant Professor

Vicki Lind, Ph.D.

### Senior Lecturers S.O.E.

John L. Hall, M.M.  
 Sheridan W. Stokes

### Senior Lecturers Emeriti

Maureen D. Hooper, Ed.D.  
 Bess Karp, M.A.  
 Samuel Krachmalnick

### Lecturers

Paul Chihara, Ph.D.  
 Lou Anne Neill, M.A.  
 Mitchell T. Peters, M.M.

### Adjunct Professors

Tommy Johnson, B.M.  
 Christopher Hanulik, B.M.

### Adjunct Associate Professors

William Booth, M.M.  
 William Vendice, B.A.

### Adjunct Assistant Professors

Mark Carlson, Ph.D.  
 Charles A. Coker, M.M.  
 Judith Hansen, B.A.  
 Jennifer Judkins, Ph.D.  
 Marion Kuszyk, M.M.  
 Douglas Masek, D.M.A.  
 Brian O'Connor, B.M.  
 Peter Yates, D.M.A.

### Visiting Professors

Heinz Blankenburg  
 Christoph Bull, D.M.A.

### Visiting Associate Professor

Alan Chapman

### Visiting Assistant Professors

Rosemarie Krovoza, M.M.  
 Jennifer Snow, D.M.A.

## Scope and Objectives

Students interested in a concentration in music history and literature should consider the majors in Music History and Musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in Ethnomusicology offered through the School of the Arts and Architecture.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an aca-

demically or professional career and affords valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

## Undergraduate Study

### Music B.A.

#### Admission

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

#### Preparation for the Major

*Required:* Music 20A, 20B, 20C; 12 units from courses 60A through 65; 12 units of performance organizations (courses C90A through 90N) for nonkeyboard instrumentalists and vocalists for a letter grade (8 units required for keyboard instrumentalists); Music History 26A, 26B, 26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N. Students must participate in a minimum of two different organizations over the course of their stay at UCLA. In addition, they are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

#### The Major

*Required (for all concentrations except composition and performance keyboard instrumentalists):* A minimum of 48 upper division units, including Music 120A, 120B, 120C, Music History 126A, 126B, 126C, and courses selected from one of the concentrations listed below.

*Composition:* A minimum of 65 upper division units, including Music 104A or 104B, 106A, 106B, 116, 120A, 120B, 120C (accelerated sections), 123A, 123B, 123C, 124A or 124B or 124C, C176, and at least 8 elective units selected from courses 104A or 104B (if not already taken), 117, 118A, 118B, additional terms of 123A, 123B, 123C, 124A or 124B or 124C (if not already taken), 199, Ethnomusicology 117, 128, C136A, C136B, 146, C156A, 156B, 157, 158A, 158B, 158C, 160, 170, 181. A senior recital, to include at least 30 minutes of original music, is also required (exceptions by petition only).

*Music Education:* Music 100A, 100B, 100C, 116, 117, 8 units from courses 115A through 115E. Students are encouraged to take additional coursework from 118A, 118B, 199, Ethnomusicology 170, 174 as their schedules allow. They are required to enroll in the type of

performance organizations (courses C90A through 90N; 90M may be used in Fall Quarter only) that they plan to teach. In addition, if they intend to teach instrumental music, they are encouraged to select three terms of choral organizations (courses C90A, 90B, or 90C); if they intend to teach general music, they are encouraged to elect three terms of ethnomusicology performance organizations (Ethnomusicology 91A through 91Z).

**Performance:** Twelve units in performance instruction from Music 160A through 165 (including junior and senior recital requirements); 4 units of chamber ensembles (Music C175) for nonkeyboard instrumentalists and vocalists (8 units for keyboard instrumentalists, including a minimum of one collaboration with a vocalist, one with a string player, and a third with another nonkeyboard instrumentalist); 4 units of elective courses from 106B, 116, 117, 118A, 118B, 199, Music History 127A through 127G, 130, 133, 134, 135A, 135B, 135C, 139, Ethnomusicology M108A, 108B, 120A, 120B, 121, 170; and one upper division elective course in music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N.

**Theory:** Music 120C and six courses selected in consultation with a faculty adviser.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Music offers the Master of Music (M.M.) degree, Doctor of Musical Arts (D.M.A.) degree, and Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Music.

## Music

### Lower Division Courses

**1A-1B. Fundamentals of Music. (4-4)** Lecture, three hours; discussion, two hours. Designed for non-music majors. P/NP or letter grading. **1A.** Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. **1B.** Requisite: course 1A. Diatonic harmony; four-part writing, including inversions, sevenths, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

**3. Preparatory Music Theory for Music Majors. (4)** Lecture, four hours; laboratory, one hour. Limited to Music majors. Course for Music majors in music fundamentals, including musicianship, theory, and terminology. Letter grading.

**4A-4B-4C. Basic Musicianship. (2-2-2)** Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

**7. Understanding Movie Music. (4)** Lecture, four hours; outside study, eight hours. Musical experience helpful, but not required. Brief historical survey of film music, with strong emphasis on recent development: Japanese animation, advertising, and MTV, as well as computer tools and digital scoring methods. Designed to inspire and inform those interested in movie music. Offered in summer only. P/NP or letter grading.

**8G. Graduate Piano Sight-Reading. (2)** Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

**10. Computer-Assisted Sight-Singing Laboratory. (2)** Lecture, two hours; laboratory, one hour. Requisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

**15. Art of Listening. (5)** Lecture, three hours; discussion, one hour; outside study, 11 hours. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice. P/NP or letter grading.

**19. Hollywood Musical and the American Dream. (4)** Lecture, three hours; discussion, one hour. Examination of composers, writers, and filmmakers whose creative efforts changed how the world came to view the American dream. Full features and music clips illustrate American life as seen through the Hollywood musical. P/NP or letter grading.

**20A. Music Theory I. (4)** Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfège of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

**20B. Music Theory II. (4)** Lecture, four hours; discussion, four hours. Requisite: course 20A with a grade of C or better. Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

**20C. Music Theory III. (4)** Lecture, four hours; discussion, four hours. Requisite: course 20B with a grade of C or better. Theory: chromatic harmony including development of tonality, 1800 to 1850; appropriate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dictation; keyboard harmony (harmonic sequences in major and minor keys); reading in open score of four homophonic parts in four clefs.

**23. Composition Workshop. (2)** Requisites: courses 20A, 20B, 20C. Introductory composition course which provides compositional experiences at a basic level. May be repeated once for credit.

**60A-65. Undergraduate Instruction in Performance. (2 each)** Limited to Music majors (all freshman/sophomore majors, and junior/senior majors not in performance specialization). Individual instruction of one hour per week. Students must perform in a practicum once during academic year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **60A.** Violin; **60B.** Viola; **60C.** Cello; **60D.** String Bass; **60E.** Harp; **60F.** Classical Guitar; **60G.** Viola da gamba; **60K.** Lute; **61A.** Flute; **61B.** Oboe; **61C.** Clarinet; **61D.** Bassoon; **61E.** Saxophone; **62A.** Trumpet; **62B.** French Horn; **62C.** Trombone; **62D.** Tuba; **63.** Percussion. **64A.** Piano; **64B.** Organ; **64C.** Harpsichord; **65.** Voice.

**80A. Beginning Keyboard. (4)** Laboratory, five hours; preparation/practice, seven hours. Simple keyboard skills together with basic aspects of music theory and its practical application to keyboard: sight-reading, tonality, chords, scales, cadences, simple compositions, and improvisations. Offered in summer only. P/NP or letter grading.

**80F. Beginning Guitar Class. (4)** Laboratory, five hours; preparation/practice, seven hours. Introduction to guitar techniques, accompanying, and arranging for the instrument; coverage of note reading and tablature. Offered in summer only. P/NP or letter grading.

**C90A. UCLA Chorale. (2)** Activity, four hours. Preparation: audition. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C480. P/NP or letter grading.

**90B. Collegiate Chorus. (2)** Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of "Choral Union," a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

**90C. Chamber Singers. (2)** Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

**90D. Opera Workshop. (2)** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

**C90E. Symphony Orchestra. (2)** Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

**90F. Symphonic Band. (2)** Preparation: audition. Group performance of instrumental music scored for band. May be repeated for credit without limitation. P/NP or letter grading.

**C90G. Wind Ensemble. (2)** Activity, four hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C482. P/NP or letter grading.

**90L. Music Theater Workshop. (2)** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete musical theater productions, including repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading.

**90M. Marching and Varsity Bands. (2)** Activity, four hours. Preparation: audition. Group performance of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

**90N. Jazz Ensemble. (2)** Activity, three hours. Preparation: audition. Group performance of jazz and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

**90P. Alexander Technique. (2)** Activity, two hours; outside preparation and practice, four hours. Limited to Music majors. Introduction to principles of Alexander technique. Study of musician's postural attitude at the instrument. Designed to help instrumentalists and vocalists prevent injuries and performance anxiety. May be repeated with consent of instructor. P/NP grading.

## Upper Division Courses

**100A-100B-100C. Music in American Education. (4-4-4)** Lecture, four hours; laboratory, one hour. Requisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C, Music History 26A, 26B, 26C. Critical study and analysis of philosophy, history, organization, curriculum, and literature of music programs for elementary and secondary schools in American education. Each course may be taken independently for credit. Letter grading. **100A.** General Music; **100B.** Choral Music; **100C.** Instrumental Music.

**104A. Modal Counterpoint. (3)** Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of styles and techniques of counterpoint of 15th and 16th centuries through writing and analysis of important forms of the period, including species, canon, free counterpoint, cantus, firmus, point of imitation, motet, ricercare, etc. Letter grading.

**104B. Special Topics in Counterpoint. (3)** Lecture, three hours. Requisite: course 120C (accelerated section). In-depth exploration of polyphonic styles and textures since 1750, with emphasis on late-19th- and 20th-century modes of expression, through writing and analysis. Letter grading.

**105. Introduction to Composition. (4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Designed for Music majors in specializations other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

**106A. Orchestration I. (4)** Discussion, three hours. Requisites: courses 120C (accelerated section), 123C. Ranges and characteristics of instruments, with exercises in scoring. P/NP or letter grading.

**106B. Orchestration II. (4)** Discussion, three hours. Requisites: courses 106A, 120C (accelerated section), 123C. Scoring and analysis for ensembles and full orchestra. P/NP or letter grading.

**109A-109B-109C. Composition for Motion Pictures and Television. (2-2-2)** Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 109A is requisite to 109B, which is requisite to 109C. Composition of music for dramatic and documentary film in cinema and television. Techniques used in recording and editing.

**113A-113B. Music Literature for Children. (4-4)** Lecture, three hours; laboratory, one hour. Requisites: course 1A, Music History 2A. Course 113A is not requisite to 113B. Designed for nonmusic majors, particularly elementary education students. Study of music literature applicable to elementary school programs. **113A.** Emphasis on listening analysis, movement, and improvisation. **113B.** Emphasis on class performance — music reading, singing, and folk instruments.

**115A-115E. Study of Instrumental and Vocal Techniques. (1 each)** Laboratory, three hours. Requisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 115A through 115D may be repeated once for credit. Letter grading. **115A.** Strings; **115B.** Woodwinds; **115C.** Brass; **115D.** Percussion; **115E.** Voice.

**115F. Technology in Music Education I. (1)** Laboratory, three hours. Requisite or corequisite: course 20A. Provides music educators with tools and knowledge necessary to use appropriate computer hardware and software for purposes of music sequencing, arranging, and scoring, with emphasis on applications that are appropriate for use in public and/or private schools for levels K-12 and higher education. Activities include familiarization with computer systems and software, computer-assisted music notation and publication, and development of basis sequencing techniques. Letter grading.

**115G. Technology in Music Education II. (1)** Laboratory, three hours. Requisite: course 115F. Introduction to instructional uses of computers in music classrooms, with emphasis on practical information necessary to intelligently purchase and implement microcomputers in schools, including training in arranging, multimedia production, and classroom instruction techniques. Additional topics include teacher-based administrative functions (grading, communications, research, databases, financial management). Letter grading.

**116. Introduction to Conducting. (2)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

**117. Study and Conducting of Instrumental and Choral Literature. (2)** Lecture, three hours. Requisite: course 116. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

**118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature. (2-2)** Lecture, one hour; laboratory, two hours. Requisites: courses 116, 117. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. **118A.** Choral; **118B.** Instrumental.

**120A. Music Theory IV. (4)** Lecture, four hours; discussion, four hours. Preparation: passing score on departmental first-year examination. Requisite: course 20C with a grade of C (2.0) or better. Theory: baroque counterpoint including chorale prelude; two-part invention; exposition and first modulation of a three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

**120B. Music Theory V. (4)** Lecture, four hours; discussion, four hours. Requisite: course 120A with a grade of C (2.0) or better. Theory: advanced chromatic harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination.

**120C. Music Theory VI. (4)** Lecture, four hours; discussion, two hours; listening, two hours. Requisite: course 120B with a grade of C (2.0) or better. 20th-century harmonic language, including nonfunctional harmony, polytonality, free atonality, serialism, and minimalism.

**121. Special Topics in 20th-Century Music. (4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit.

**C122. Speculative Music Theory. (4)** Discussion, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

**123A-123B-123C. Composition. (4-4-4)** Lecture, three hours. Requisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is requisite to 123B, which is requisite to 123C. Designed for composition students. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

**124A. Scoring for Symphony Orchestra. (4)** Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical applications in scoring for symphony orchestra. Preparation and production of parts and full scores. At least one reading by UCLA Philharmonia Orchestra scheduled. Letter grading.

**124B. Scoring for Wind Ensemble. (4)** Discussion, three hours. Requisites: courses 106B, 120C (accelerated section), 123C. Practical applications in scoring for large wind ensembles. Preparation and production of score and parts. May include percussion. At least one reading by UCLA Wind Ensemble scheduled. Letter grading.

**124C. Scoring and Arranging for Choral Ensemble. (4)** Discussion, three hours. Requisites: 106B, 120C (accelerated section), 123C. Practical applications in scoring and arranging for choral ensembles, including a capella as well as chorus with instruments. Preparation and production of score and parts. At least one reading by UCLA Chorale or other choral group scheduled. Letter grading.

**M131. Development of Latin Jazz. (4)** (Same as Ethnomusicology M131.) Lecture, four hours; discussion, one hour. Survey of historical and stylistic development of musical style referred to today as "Latin jazz." P/NP or letter grading.

**136A-136B-136C. Historical Survey of Music Theater. (4-4-4)** Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/NP or letter grading. **136A.** Early Forms to 1900; **136B.** 1900 to 1945; **136C.** 1945 to 1975.

**160A-165. Undergraduate Instruction in Performance for the Performance Specialist. (2 each)** Limited to junior/senior Music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **160A.** Violin; **160B.** Viola; **160C.** Cello; **160D.** String Bass; **160E.** Harp; **160F.** Classical Guitar; **160G.** Viola da gamba; **160K.** Lute; **161A.** Flute; **161B.** Oboe; **161C.** Clarinet; **161D.** Bassoon; **161E.** Saxophone; **162A.** Trumpet; **162B.** French Horn; **162C.** Trombone; **162D.** Tuba; **163.** Percussion; **164A.** Piano; **164B.** Organ; **164C.** Harpsichord; **165.** Voice.

**C167. Selected Topics in Keyboard Literature. (4)** Lecture, three hours. Corequisite: course 164A or 164B or 164C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C267.

**174A-174B-174C. Language of Song. (2-2-2)** Designed for Music majors. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student's current vocal repertoire. Background in the language is encouraged. **174A.** German; **174B.** French; **174C.** Italian.

**C175. Chamber Ensembles. (2)** Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C485. P/NP or letter grading.

**C176. Electronic Music Composition. (4)** Lecture, three hours; studio, three hours. Preparation: advanced experience and accomplishment in serious composition (art music). Requisite: course 156. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition at least five minutes in duration. May be concurrently scheduled with course C226.

**C185. Historical and Philosophical Foundations of Music Education. (4)** Lecture, three hours. Preparation: completion of undergraduate music education specialization. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225.

**199. Special Studies in Music. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in music resulting in research project. May be repeated for a maximum of 8 units.

## Graduate Courses

**202. Analysis for Performers. (4)** Lecture, three hours. Designed for graduate students. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles.

**203. Musical Terminology. (4)** Lecture, three hours. Designed for graduate music students. Survey of musical terminology intended to clarify the performance and interpretation of vocal and instrumental music in the European tradition. Coverage of terms in Italian, French, and German.

**204. Music Bibliography for Performers. (4)** Lecture, three hours. Designed for graduate music performance students. Survey of general bibliographic techniques in music, with emphasis on materials for the performing musician.

**C222. Speculative Music Theory. (4)** Discussion, three hours. Designed for graduate music students. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C122.

**C225. Historical and Philosophical Foundations of Music Education. (4)** Lecture, three hours. Designed for graduate students. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C185. Additional assignments, as well as evidence of greater depth of study, required of graduate students.

**C226. Electronic Music Composition. (4)** Lecture, three hours; studio, three hours. Preparation: advanced experience and accomplishment in serious composition (art music). Requisite: course 156. Designed for graduate students. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176.

**251A-251D. Seminars: Special Topics in Composition and Theory. (4 each)** Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. **251A.** Orchestration; **251B.** Specific Media; **251C.** Specific Styles; **251D.** Compositional Analysis.

**252A-252B-252C. Seminars: Composition. (6-6-6)** Seminar, three hours. Requisites: courses 106B, 123C. Course 252A is requisite to 252B, which is requisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit.

**261A-261F. Problems in Performance Practices. (4 each)** Seminar, three hours; outside study, nine hours. Limited to graduate performance students. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. S/U or letter grading. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**266A-266B. Seminars: Music of the 20th Century. (4-4)** Seminar, three hours. Designed for graduate music students. Discussion and analysis of major works of the 20th century, with emphasis on study of groups of works written at the same time in history. **266A.** 1900 to 1949; **266B.** 1950 to the Present.

**C267. Selected Topics in Keyboard Literature. (4)** Lecture, three hours. Corequisite: course 464A or 464B or 464C. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

**270A-270G. Seminars: Music Education. (6 each)** Seminar, three hours. May be repeated for credit. **270A.** History; **270B.** Non-Western Musics; **270C.** Curriculum Innovations; **270D.** Tests and Measurements; **270E.** Choral Literature; **270F.** Instrumental Literature; **270G.** General Topics.

**271. Music and Electronic Technology. (4)** Lecture, four hours; media laboratory, one hour. Designed for graduate music performance students. Survey of music and its place in emerging digital world of the arts, including training in arranging and multimedia production.

**330. Introduction to Orff Schulwerk. (2)** Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Intended for teachers of music, church musicians, and music therapists who have had little or no previous experience with Orff Schulwerk. Introduction to Orff Schulwerk, including history, philosophy, and teaching processes of this approach to music instruction for children. Offered in summer only. S/U or letter grading.

**S331A-S331B-S331C. Orff Schulwerk Training Courses. (4-4-4)** Lecture, 10 hours; discussion, five hours; laboratory, 15 hours. Requisite: course 330. Course S331A is requisite to S331B, which is requisite to S331C. In-depth courses in teaching of Orff Schulwerk approach to music instruction for children. Students who successfully complete each course are eligible for certification at that level through the American Orff Schulwerk Association. Offered in summer only. S/U or letter grading. **S331A.** Level I (Beginning); **S331B.** Level II (Intermediate); **S331C.** Level III (Advanced).

**S341. Conducting for High School and College Band/Wind Ensemble Teachers. (2)** Lecture, 25 hours. Comprehensive view of current trends in band/wind ensemble programs, including nonverbal communication, conducting, and rehearsal techniques. Study of new and recently published literature and discussions of administration of a band/wind ensemble program. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**S342. Contemporary Marching Band. (1)** Lecture, 12 hours. Innovative approaches to marching band programs for high school and college teachers, including creative approaches to charging and drill design and use of microcomputers. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**343. Effective and Creative String Teaching. (2)** Lecture, 24 hours. Comprehensive course for teachers of string classes and string orchestras at elementary, junior high, and high school levels. Topics include development of instructional techniques for violin, viola, cello, and bass; critical examination of current pedagogical materials; and reading sessions of recently published music for string orchestra. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**343L. Effective and Creative String Teaching Laboratory. (1)** Laboratory, 12 hours. Exploration of string orchestra, ensemble, and chamber music literature appropriate for elementary, junior high, and high schools. Examination of this literature in reading and discussion sessions. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**S345. Symposium on Art of Choral Music. (2)** Lecture, 25 hours. Symposium for college, high school, and junior high school choral directors on development of practical techniques for solving real challenges in choral conducting and teaching. Topics include innovative choral methods, choral conducting, vocal pedagogy, voice classification, and survey of standard and current choral literature. Offered in summer only. S/U or letter grading.

**350A. Introduction to Computer-Assisted Instruction of Music. (2)** Lecture, three hours; laboratory, two hours. Introduction to instructional uses of computers in music classroom, with emphasis on practical information necessary to intelligently purchase and implement microcomputers in schools. Courseware to be experienced and reviewed, jargon defined and illustrated, and practical hands-on experience obtained. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**350B. Exploration of MIDI Computer Resources: Keyboards and Synthesizers. (2)** Lecture, two hours; laboratory, three hours. Creative use of MIDI-based synthesizers under computer control. Exploration of available hardware resources allied with various software sequencing packages. Use of software for computer-based music printing. Hands-on experience. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**351. World Music in the Classroom: Implementation through Orff Schulwerk. (3)** Lecture, 36 hours. From Orff Schulwerk perspective, presentation of current visual and aural materials from various world cultures and methods for teaching world musics in the classroom. Discussions of problems — practical and philosophical — of incorporating world musics into curriculum. May be repeated for credit without limitation. Offered in summer only. S/U or letter grading.

**370. Music in General Education. (2)** Designed for Graduate School of Education and Information Studies teacher training program students (all music students must take course 370 concurrently with Education 100A, 100B, 112, 312, 315A, 315B, and supervised teaching). Critical discussions related to supervised teaching in progress. May be repeated twice for credit.

**371. The Marching Band in Secondary Education. (2)** Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. New Music Forum. (2)** Tutorial/laboratory. Preparation: one year of graduate study in music at UCLA. Interactive course in preparation and performance of a premiere work especially composed for a graduate performer or performers by a graduate composer at UCLA.

**460A-465. Graduate Instruction in Performance.** (6 each) Studio, one hour; performance laboratory/outside study, 17 hours. Limited to graduate performance students. Individual instruction. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. Letter grading. **460A.** Violin; **460B.** Viola; **460C.** Cello; **460D.** String Bass; **460E.** Harp; **460F.** Classical Guitar; **460G.** Viola da gamba; **460K.** Lute; **461A.** Flute; **461B.** Oboe; **461C.** Clarinet; **461D.** Bassoon; **461E.** Saxophone; **462A.** Trumpet; **462B.** French Horn; **462C.** Trombone; **462D.** Tuba; **463.** Percussion; **464A.** Piano; **464B.** Organ; **464C.** Harpsichord; **464D.** Fortepiano; **465.** Voice.

**469. Instrumental Pedagogy.** (4) Lecture, three hours; outside study and preparation, nine hours. Preparation: advanced proficiency on a musical instrument. Designed for graduate music students. Study of art of teaching a musical instrument, including discussions of philosophy of teaching, learning process itself, and teaching of musical interpretation. Individualized study of various considerations, such as physical/technical aspects and pedagogical repertoire, peculiar to teaching student's primary instrument. Letter grading.

**470. Opera Studio for Graduate Students.** (4) Laboratory, six hours. Designed for graduate students. Performance techniques and repertoire for graduate students in opera.

**471. Vocal Pedagogy.** (4) Lecture, three hours; discussion, one hour. Preparation: advanced proficiency in voice. Designed for graduate music students. Study of teaching techniques for voice, including thorough investigation of the vocal mechanism and its use, plus study of noted teachers of the past and present. Further emphasis on practical teaching experience in class.

**472. Master Class in Opera.** (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of opera literature. May be repeated for credit. S/U or letter grading.

**475. Master Class in Conducting.** (6) Studio, three hours; outside study, 15 hours. Limited to graduate performance students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit. S/U or letter grading.

**C480. UCLA Chorale.** (2) Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A.

**C481. Symphony Orchestra.** (2) Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. S/U or letter grading.

**C482. Wind Ensemble.** (2) Activity, four hours. Preparation: audition. Designed for M.M. and D.M.A. students. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C90G.

**C485. Chamber Ensembles.** (2) Preparation: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. S/U or letter grading.

**495. Introductory Practicum for Teaching Apprentices in Music.** (2) Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**496. Technology Seminar.** (2) Seminar, two hours; laboratory, one hour; outside study, three hours. Introduction to departmental and campuswide technology resources, exploration of applications of technology in education, and development of means of using technology to assess and document teaching competence. S/U grading.

**595A. Preparation of Master's Recital.** (6) Tutorial, three hours. Limited to graduate master's program in performance students. Intensive study and preparation of final master's recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**595B. Preparation of Final Doctoral Recital.** (6) Tutorial, three hours. Preparation: advancement to candidacy for D.M.A. degree. Intensive study and preparation of final D.M.A. recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**596A. Directed Individual Studies in Orchestration and Composition.** (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**596C. Directed Individual Studies in Music Education.** (2, 4, or 6) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**596D. Directed Individual Studies in Performance Practices.** (2 to 12) Tutorial, to be arranged. Only 4 units may be applied toward M.A. or M.M. degree requirements. May be repeated for credit. S/U or letter grading.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations.** (2 or 4) Tutorial, to be arranged. S/U grading.

**598. Guidance of M.A. Thesis.** (4, 8, or 12) Tutorial, to be arranged. Only 4 units may be applied toward degree requirements. May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. or D.M.A. Dissertation.** (4, 8, or 12) Tutorial, to be arranged. May be repeated for credit. S/U grading.

Mitchell B. Morris, Ph.D.  
Elizabeth R. Upton, Ph.D.

## Scope and Objectives

The Department of Musicology provides students with a broad understanding of the history of the music of Europe and North America. Courses cover virtually every period, style, and genre, including jazz and other popular musics.

Music history appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The undergraduate program prepares students for graduate programs in music and related fields and offers training within the broader context of the humanities.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for qualified students.

## Undergraduate Study

### Music History B.A.

#### Admission

The Music History program assumes that students have some musical background before entering UCLA. Although auditions are not required, prospective majors should be sufficiently competent on an instrument or in voice to participate in a performance group, as required by the program.

#### Preparation for the Major

*Required:* Music 20A, 20B, 20C, Music History 26A, 26B, 26C, and 6 units (three terms) of performance organizations selected from Ethnomusicology 91A through 91Z or Music C90A through 90M. Enrollment in Music 20A requires either a minimum score on the Music Theory Placement Examination administered by the Music Department or successful completion of Music 3 (or a comparable year-long college-level music theory sequence). Students with limited musicianship skills may find it useful to enroll in Music 4A, 4B, 4C concur-

rently with Music 20A, 20B, 20C. Transfer applicants may petition to waive courses 20A, 20B, 20C if they have completed equivalent work prior to enrolling at UCLA.

### Transfer Students

To be admitted as Music History majors, transfer students with 90 or more units must complete the following courses prior to admission to UCLA: one year of music theory and one year of music history and analysis. Experience in music performance is strongly recommended.

### The Major

*Required:* Music 120A, 120B, 120C, Music History 101, 126A, 126B, 126C; three courses from Music History 127A through 127G; two additional upper division music history courses (8 units) or, via petition, lower division courses with additional work as specified by the instructor; and three upper division ethnomusicology courses (12 units), each from a different geographical or cultural area. Students may petition to substitute theory courses in ethnomusicology or music history for one or more of Music 120A, 120B, 120C, as appropriate. Students may enroll in lessons from the Music Department, if instructors are available.

### Honors Program

The honors program is designed for Music History majors who wish to carry out an independent research project that culminates in a departmental honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior Music History majors who have completed a minimum of four upper division music history courses with a departmental grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Normally, the thesis must be completed during Fall Quarter of the senior year.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete at least one quarter of Music History 195 with a grade of A– or better on the resulting thesis.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete at least one quarter of Music History 195 with a grade of A or better on the resulting thesis.

### Music History Minor

The Music History minor provides undergraduates with an overview of music history and the study of music. Beyond the required introduc-

tory course, students may select from a wide variety of undergraduate courses that range through the history of European and American music.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition with the department in 2443 Schoenberg Music Building. Any departmental undergraduate course is available for the minor, although some require substantial background in music. For further information, contact the department at (310) 206-5187.

*Required Lower Division Courses (12 units):* Music History 1 and two other courses, with grades of C or better.

*Required Upper Division Courses (20 units):* Five courses, of which one should be either from the Music History 127 series or a course in which students participate in an honors discussion group.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Musicology offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Musicology.

### Music History

#### Lower Division Courses

**1. Introduction to Music History. (4)** (Formerly numbered 1A.) Lecture, four hours. Designed for Music History minors. Survey of issues and methods of music history and criticism for nonmajors. Letter grading.

**2A-2B. Introduction to Literature of Music. (4-4)** Lecture, four hours; laboratory, one hour. Course 2A is not requisite to 2B. Limited to undergraduate students. Designed for nonmusic majors. P/NP or letter grading. **2A.** Technical and formal principles of music literature through the mid-18th century. **2B.** Music literature from the mid-18th century to the present.

**3. Introduction to Classical Music. (5)** Lecture, four hours; discussion, one hour. Survey of music of Western classical tradition from its putative origins in ancient Greece to the present, with emphasis on historical context, musical meanings, and creation of the tradition itself. P/NP or letter grading.

**4. The Beatles. (5)** Lecture, four hours. Examination of life and music of the Beatles within social and historical context of the 1960s. P/NP or letter grading.

**5. History of Rock and Roll. (5)** Lecture, four hours. Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to the present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes. Letter grading.

**6GA-6GB. Musicianship for Musicology Graduate Students. (2-2)** Seminar/laboratory, three hours. Designed to help entering graduate students remedy entrance deficiencies. S/U grading.

**7. Film and Music. (4)** Lecture, four hours. History of music and cinema, particularly ways music is used to produce meanings in conjunction with the visual image. P/NP or letter grading.

**8. History of Electronic Dance Music. (5)** (Formerly numbered 138.) Lecture, four hours. Survey of groove-based electrified dance music from its origins in 1960s' pop and soul to the present, covering disco, house, techno, ambient, rave, and jungle. Emphasis on interaction of technology, musical structures, psychoactive drugs, and club cultures to induce "altered states" of musical consciousness; promise (versus reality of) political and spiritual transformation; electronic dance music as a new "art" music. P/NP or letter grading.

**10. Music Now. (4)** Lecture, four hours. Guided interactive tour of contemporary musical landscape. Current events in historical perspective, with special attention to questions of culture, taste, and value hierarchies. Discussion and evaluation of representative works and practices from avant-garde, mainstream, world, and popular spheres. Letter grading.

**12W. Writing about Music. (5)** (Formerly numbered 110.) Lecture, two hours; laboratory, two hours. Preparation: ability to read music. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 110. Emphasis on learning specific skills, incorporating technical description, historical contextualization, subjective reaction, and certain stylistic conventions necessary in writing about music. Satisfies Letters and Science Writing II requirement. Letter grading.

**13. 20th-Century Music of the Western World. (4)** Lecture, four hours. Survey of main trends in 20th-century music, with emphasis on representative works from avant-garde, mainstream, and popular traditions. P/NP or letter grading.

**26A-26B-26C. History and Analysis of Music I. (4-4-4)** Lecture, four hours; laboratory, one hour. Enforced requisite for course 26A: Music 20C. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. Students must receive a grade of C– or better to proceed to next course in sequence. History and literature of music from ancient world to 1815, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

**28A-28B-28C. Collegium Musicum. (2-2-2)** Lecture, three hours. Preparation: ability to read music. Group performance of Western vocal and instrumental music. Some coordination with content of courses 26A, 26B, 26C. P/NP or letter grading. **28A.** Medieval Period; **28B.** Renaissance Period; **28C.** 17th and 18th Centuries.

**45. American Musical. (5)** (Formerly numbered 145.) Lecture, four hours; discussion, 90 minutes. Survey of American musical in the 20th century, beginning with its roots in operetta, vaudeville, and Gilbert and Sullivan, and focusing on its connections to politics, technology, film, opera, and a variety of popular musical styles, including Tin Pan Alley, jazz, and rock. P/NP or letter grading.

**66. Getting Medieval. (5)** Lecture, four hours; discussion, one hour. Exploration of idea of medievalism in music and culture from Wagner to video games. Music covered includes film scores, opera, Gregorian chant, early music revival, folk songs, progressive rock, and Goth. Letter grading.

### Upper Division Courses

**101. Issues and Methods in Music History. (4)** Lecture, four hours. Requisite: course 26C. Introduction to principles, problems, and methods of music history and criticism through examination of selected issues. Letter grading.

**126A-126B-126C. History and Analysis of Music II. (4-4-4)** Lecture, four hours; laboratory, one hour. Requisites: course 26C, Music 20A, 20B, 20C. Course 126A is requisite to 126B, which is requisite to 126C. Students must receive a grade of C– or better to proceed to next course in sequence. History and literature of music from 1815 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition. Letter grading.

**127A-127G. Selected Topics in History of Music. (4 each)** Discussion, three hours. Requisites: courses 26A, 26B, 26C. Designed as proseminars for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. P/NP or letter grading. **127A.** Middle Ages; **127B.** Renaissance; **127C.** Baroque; **127D.** Classic; **127E.** Romantic; **127F.** 20th Century; **127G.** Other Topics.

**130. Music of the U.S. (4)** Lecture, four hours. Survey of music in the U.S. from Colonial times to the present. P/NP or letter grading.

**131. American Popular Song. (4)** Lecture, four hours. Survey of American popular music from Colonial times to advent of rock and roll in the 1950s, with special emphasis on song tradition of Tin Pan Alley. P/NP or letter grading.

**132. Mozart. (5)** Lecture, four hours; discussion, one hour. Designed for students who do not read music. Life, works, and mythology of Wolfgang Amadeus Mozart, in context of both his age and our own. P/NP or letter grading.

**133. Bach. (4)** Lecture, four hours. Designed for undergraduate students. Life and works of Johann Sebastian Bach. P/NP or letter grading.

**134. Beethoven. (5)** Lecture, four hours; discussion, one hour. Designed for undergraduate students. Life and works of Ludwig van Beethoven. P/NP or letter grading.

**135A-135B-135C. History of Opera. (5-5-5)** Lecture, four hours; discussion, one hour. Designed for undergraduate students. P/NP or letter grading.

**135A.** Baroque and Classical Periods; **135B.** Romantic Period; **135C.** 20th Century.

**M136. Music and Gender. (5)** (Same as Women's Studies M136.) Lecture, four hours; discussion, one hour. Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism. Letter grading.

**M137. Gay and Lesbian Perspectives in Pop Music. (5)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M137.) Lecture, four hours; discussion, one hour. Survey of English-language popular music in the 20th century, with focus on lesbians, gay men, and members of other sexual minorities as creators, performers, and audience members. Letter grading.

**139. History and Literature of Church Music. (4)** Lecture, four hours. Study of forms and liturgies of Western church music. P/NP or letter grading.

**140. Music, Media, and Consumer Society. (4)** Lecture, four hours. Consideration of impact of recording technologies (gramophone, tape recorder, Walkman, sampler), broadcast media (radio, television, MTV, Internet), and global capitalism (record labels, advertising, Muzak) on way we consume and are consumed by music. How music functions and malfunctions on records, under movies, behind ads, and in semiotic fabric of everyday life. Letter grading.

**150. History of Jazz. (5)** Lecture, four hours; discussion, one hour. Designed for Music History, Music, and Ethnomusicology majors, and other students with some background in musical performance and theory. History and analysis of variety of jazz styles, from late 19th-century forerunners to the present, with emphasis on social meanings of musical practices. Letter grading.

**156. Studies in Musical Genres. (4)** Lecture, four hours. Survey of musical genres, with emphasis on analysis of structural organization. P/NP or letter grading.

**188. Topics in Music History. (4)** Lecture, three hours; laboratory, one hour. Variable topics selected from several outstanding composers in Western art music. Consult *Schedule of Classes* for topics to be offered. Letter grading.

**189A-189B. The Symphony. (4-4)** Lecture, four hours. Designed for undergraduate students. Survey of symphonic literature from Haydn through the 20th century. Letter grading.

**195. Honors Course. (4)** Tutorial, two hours. Preparation: completion of minimum of four upper division music history courses with departmental grade-point average of 3.5 or better and an overall GPA of 3.0. Limited to junior/senior Music History majors. One- to two-term independent research study project under supervision of an appropriate faculty member, culminating in department honors thesis of approximately 25 pages. P/NP or letter grading.

**199. Special Studies in Musicology. (2 or 4)** Tutorial, to be arranged. Preparation: 3.0 grade-point average. Limited to seniors. Individual studies in musicology resulting in a research project. May be repeated for a maximum of 8 units. P/NP or letter grading.

## Musicology

### Graduate Courses

**200A. Research Methods and Bibliography. (6)** Lecture, three hours. Designed for graduate musicology students. Survey of general bibliographic material in music and introduction to discipline. Letter grading.

**200B. Historiography. (6)** Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Critical examination of principles and procedures which inform historical study of music, with emphasis on impact of recent cultural theory.

**200C. Contemporary Music Criticism. (6)** Seminar, three hours. Designed for graduate musicology, ethnomusicology, and music students. Introduction to recent developments in the field of musicology, focusing on problems of how music operates as a cultural practice and how musical meanings can most effectively be analyzed and written about.

**210. Medieval Notation. (6)** Lecture, three hours. Vocal and instrumental notation; paleography of the period.

**211. Renaissance Notation. (6)** Lecture, three hours. Vocal and instrumental notation; paleography of the period.

**250A-250B. Seminars: History of Music Theory. (6-6)** Seminar, three hours. Requisite: course 200A. Course 250A is not requisite to 250B. **250A.** Investigation of principal theoretical writings concerning music from antiquity through Zarlino. **250B.** Investigation of principal theoretical writings concerning music from Rameau to the present.

**254. Structure and Interpretation of Music. (4)** Seminar, three hours. Requisite: course 200C. Critical survey of recent music theory and its analytical methods for musicologists. Questions of analysis and value judgment, formalism and autonomy, popular and vernacular musics, cultural versus musical theory, hermeneutic risks and (im)proprieties. Individual students work practically and in depth on specific analytical problems most relevant to their interests. Letter grading.

**256. Seminar: Musical Form. (6)** Seminar, three hours. Requisites: courses 126A, 126B, 126C. Analysis of structural organizations in music. Specific topics vary from year to year.

**257. Music of the U.S. (6)** Discussion, three hours. Designed for graduate students. Examination of principal figures and trends in music of the U.S. since the 18th century.

**260A-260F. Seminars: Historical Musicology. (6 each)** Seminar, three hours. Requisite or corequisite: course 200A. Specific topics vary from year to year. May be repeated for credit. Letter grading. **260A.** Medieval; **260B.** Renaissance; **260C.** Baroque; **260D.** Classical; **260E.** Romantic; **260F.** 20th Century.

**261A-261F. Performance Practices. (4 each)** Lecture, three hours. Designed for graduate students. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. Letter grading. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**262. Contemporary Popular Music Studies. (4)** Seminar, three hours. Designed for graduate students. Critical exploration of methodologies of interdisciplinary field of popular music studies. Analysis of how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race.

**263. History of Performance. (4)** Seminar, three hours. Designed for graduate students. Survey of role of performers and performance in Western music history. Critical understanding of (and set of tools for addressing) frequent invisibility or "transparency" of performance and performers in histories of music. Letter grading.

**264. Seminar: Topics in Musicology. (6)** Seminar, three hours. Designed for graduate students. Specific topics vary from term to term. May be repeated for credit.

**265. Ideal of Authenticity in Performance: 1827 to the Present. (4)** Seminar, three hours. Preparation: ability to read musical notation and knowledge of musical history equivalent to successful completion of courses 126A, 126B, 126C. Not a course in performance, but intellectual history of performance and interpretation from solidification of classical canon to disintegration. Letter grading.

**296. Research Topics in Musicology. (2)** Seminar, two hours. Preparation: consultation with instructor. Designed for musicology graduate students. Advanced study and analysis of current topics in musicology. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Research Methods. (2)** Seminar, two hours. Limited to second-year musicology graduate students and students with master's degrees. Development of advanced knowledge and bibliographic control in three historically separate areas of musicological specialization. May be repeated for credit. S/U grading.

**299. Seminar: Musicological Research. (2)** Seminar, two hours. Preparation: advancement to Ph.D. candidacy. Research, critique, and comparison of advanced research methods in musicology. Presentation of ongoing research by graduate students. Analysis and discussion of presentations. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Musicology. (2)** Eight weekly two-hour seminar sessions, plus intensive training session during Fall Quarter registration week. Preparation: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies in Musicology. (2, 4, or 6)** Tutorial, to be arranged. Limited to graduate students. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 or 4)** Preparation: completion of all M.A. or Ph.D. course and language requirements. Limited to graduate students. S/U grading.

**599. Guidance of Ph.D. Dissertation. (4, 8, or 12)**  
Preparation: advancement to Ph.D. candidacy. Limited to graduate students. May be repeated for credit. S/U grading.

Nancy Ezer, Ph.D.  
Michael Fishbein, Ph.D.  
Latifeh E. Hagigi, M.A.  
Gayané Hagopian, Ph.D.  
Anahid Keshishian, Ph.D.  
Michael Rosenbaum, Ph.D.

### Adjunct Assistant Professor

David G. Hirsch, M.A.

## Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area that was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and

present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in Ancient Near Eastern Civilizations, Arabic, Hebrew, Iranian Studies, and Jewish Studies. Master's and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

## Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the requisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

## Ancient Near Eastern Civilizations B.A.

There are four options for a major in Ancient Near Eastern Civilizations: (1) Mesopotamia, (2) Egypt, (3) Near Eastern archaeology and cultures, and (4) biblical studies.

### Preparation for the Major

Requisite for all options: Near Eastern Languages 50A; requisites for options 1, 2, and 3: German 1, 2, 3 (French 1, 2, 3 may be substituted); requisites for option 4: Hebrew 1A, 1B, 1C. Majors in all four fields are encouraged to continue their language study beyond the requisite levels.

### Transfer Students

To be admitted as Ancient Near Eastern Civilizations majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one civilization course for all options, one year of German or French for the options in Mesopotamia, Egypt, and Near Eastern archaeology and cultures, and one year of Hebrew for the biblical studies option.

### The Major

Majors in all four options are required to take 14 upper division courses selected in consultation with the program adviser.

Majors selecting option 1 (Mesopotamia) are required to take 14 courses as follows: four language courses (Semitics 140A, 140B, 141, 142) and two literature and history courses

(Ancient Near East M105, 150A). The remaining eight courses are to be selected from Ancient Near East M104A, M104B, 130, 140A, 140B, 140C, 145, 150B, 150C, 160A, 160B, 161, 162, 163, 164A, 164B, 164C, 170, Iranian 169, Jewish Studies M150A. One course must be in research methodology (such as Anthropology C115R, 130, 150, English 140A, or Linguistics 110) taken preferably in another department with the consent of the adviser.

Majors selecting option 2 (Egypt) are required to take 14 courses as follows: four language courses (Ancient Near East 120A, 120B, 120C, 121A) and three literature and history courses (Ancient Near East M104A, M104B, 150B). The remaining seven courses are to be selected from Ancient Near East M105, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160A, 160B, 161, 162, 163, 164A, 164B, 164C, 170, Art History 101A, 101B, Iranian 169, Jewish Studies M150A, M191A. One course must be in research methodology (such as Anthropology C115R, 130, 150, English 140A, or Linguistics 110) taken preferably in another department with the consent of the adviser.

Majors selecting option 3 (Near Eastern archaeology and cultures) are required to take 14 courses as follows: three upper division courses in any Near Eastern language (Akkadian, Arabic, Egyptian, Hebrew) and two courses in research methodology (such as Anthropology 111, M115A, C115R, 117, 130, 150). The remaining nine courses are to be selected from Ancient Near East M104A, M104B, M105, 120A, 120B, 120C, 121A, 121B, 121C, 123A, 123B, 124, 130, 150A, 150B, 150C, 160A, 160B, 161, 162, 163, 164A, 164B, 164C, 165, Art History 101A, 101B, M102A, M102B, Classics 168, Jewish Studies M150A, 170, M191A, Semitics 140A, 140B, 141, 142.

Majors selecting option 4 (biblical studies) are required to take 14 courses as follows: four language courses (Hebrew 102A, 102B, 102C, 120) and three history and literature courses (Jewish Studies M150A, M191A, English 108B). The remaining seven courses are to be selected from Ancient Near East M104A, M104B, M105, 130, 150A, 150B, 160A, 160B, 161, 162, 163, 164A, 164B, 164C, 165, 170, English 108A, 108C, Greek 130, Hebrew 125, 130, 135, History 194A, 194B, 194C, Jewish Studies 150B, 170, Latin 120, Semitics 130.

## Study Abroad

Students are encouraged to spend time abroad either to (1) study with an education abroad program or (2) work on a UCLA-affiliated archaeological excavation in the broader Middle East. For information on studying abroad, contact the Education Abroad Program, 1119 Hershey Hall, (310) 825-4995; for UCLA-affiliated excavations, contact the departmental student affairs officer at (310) 825-4165.

## Arabic B.A.

### Preparation for the Major

*Required:* Arabic 1A, 1B, 1C.

### Transfer Students

To be admitted as Arabic majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Arabic.

### The Major

*Required:* Fourteen courses, including seven from Arabic 102A, 102B, 102C, 103A, 103B, 103C, 120, 130, 132, 141, 142; three literature and culture courses from Arabic 150, 151, Islamics 110, 130, 151; and two history courses from History 106A, 106B, 106C, 107, 108. The remaining two courses may be selected from Arabic 111A, 111B, 111C, 112A, 112B, 112C, Art History 104A, Geography 187, History 106A, 106B, 106C, 107, 108, Political Science 132A, 132B, 157, 165, Sociology 187. No more than two of the 14 courses may be credited through a proficiency test administered by the department.

## Hebrew B.A.

### Preparation for the Major

*Required:* Hebrew 1A, 1B, 1C, or equivalent.

### Transfer Students

To be admitted as Hebrew majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Hebrew.

### The Major

*Required:* Fourteen courses, including Hebrew 102A, 102B, 102C, 103A, 103B, 103C; one term of Hebrew 120 or 125; and one term of Hebrew C140. The remaining six courses may be selected from Hebrew 101, 130, 135, C140, 160, 170, 190A, 190B, 199, Jewish Studies M150A, 150B, 175, M191A, M191B, Semitics 110, 115, 130, 140A, 140B. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Hebrew 199 courses (8 units total) may be applied toward the major.

## Iranian Studies B.A.

Students majoring in Iranian Studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

### Preparation for the Major

*Required:* Iranian 1A, 1B, 1C, or equivalent.

### Transfer Students

To be admitted as Iranian Studies majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of Persian.

## The Major

*Required:* Fourteen courses, including at least six from Iranian 102A, 102B, 102C, 103A, 103B, 103C, 140, 141, 142, 180A, 180B and at least five courses from Ancient Near East 150A, 150B, 163, Arabic 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 106A, 106B, 106C, Iranian 120, 169, 170, 190A, 190B, 197A, 199, 220A, 220B, 231A, 250, Political Science 157. The remaining three courses may be selected from any of the above. No more than two of the 14 courses may be credited through a proficiency test administered by the department. A maximum of two Iranian 199 courses (8 units total) may be applied toward the major.

## Jewish Studies B.A.

Students must select one of five tracks: (1) Jewish history, (2) Jewish religions, (3) Jewish literature and culture, (4) American Jewish literature and culture, or (5) Israeli studies.

### Preparation for the Major

*Required:* Jewish Studies 10.

### Transfer Students

To be admitted as Jewish Studies majors, transfer students with 90 or more units must complete the following introductory course prior to admission to UCLA: one social, cultural, and religious institutions of Judaism course.

### The Major

Majors in all five tracks are required to take 14 upper division courses selected in consultation with the program adviser, including seven required core courses, five courses within the selected track, and two electives to be chosen from Hebrew, Jewish studies, or any courses listed under any track.

Core requirements include Jewish Studies M100 (or History M191H); one year of upper division Hebrew (either Hebrew 102A, 102B, and 102C, or Hebrew 103A, 103B, and 103C); two terms of the Jewish history sequence selected from Jewish Studies M191A through M191D; and one course on the Hebrew Bible selected from English 108A, Hebrew 120, or Jewish Studies M150A, 150B.

A third year of Hebrew or one year of Yiddish or another Jewish language is strongly recommended but not required.

Students are encouraged to take a research tutorial within Jewish Studies 199. A maximum of two 199 courses (8 units total) may be applied toward the major.

A course may be applied toward only one category within the major (i.e., core requirement, track requirement, or electives). No more than 20 units applied toward the Jewish Studies major may count toward fulfilling the requirements for a major or minor in another department or program.

For the Jewish history track, students are required to complete the remaining two courses

from Jewish Studies M191A through M191D and three courses from the following list, in addition to the core courses for the major: Ancient Near East 162, History 191E, 191F, M191G, 194A, 197A, 199, Jewish Studies 140A, 140B, 170, M191G, M191S, M192A, M192B, 199.

For the Jewish religion track, students are required to complete Jewish Studies 150B and four of the following courses, in addition to the core courses for the major: Ancient Near East 162, English 108A, 108C, 199, Hebrew 120, 125, 130, History 194A, Jewish Studies 130, 135, M150A, M151A, 155, 170, M187, M191A, M191B, 199.

For the Jewish literature and culture track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to the core courses for the major: English 103, 108A, 108C, 189, German 112, Hebrew 111A, 111B, 111C, 120, 125, 130, 140, Iranian 131, Jewish Studies 135, 143, M150A, 150B, M151A, 151B, 155, 170, 175, M187, 197A through 197Z, 199.

For the American Jewish studies track, students are required to complete Sociology 159 and four of the following courses, in addition to the core courses for the major: English 103, 189, 199, History 199, Jewish Studies 135, 140A, 140B, M151A, M191I, M192B, 197A, 199, Yiddish 101A, 101B, 101C, 102A, 102B, 104.

For the Israeli studies track, students are required to complete Hebrew 103A, 103B, 103C, and two of the following courses, in addition to the core courses for the major: Hebrew 111A, 111B, 111C, C140, History 191F, 199, Jewish Studies 142, 151B, 175, M191B, M191S, 199, Political Science 121, 132A, 132B, 139, 164, 199.

## Study in Israel

Students are encouraged to spend up to one year in Israel either to (1) study with an education abroad program or (2) study at an Israeli university. For information on studying in Israel, contact the Education Abroad Program, 1115 Hershey Hall, (310) 825-4889.

## Arabic and Islamic Studies Minor

The Arabic and Islamic Studies minor is designed for students who wish to augment their major program with a group of related courses that provide a systematic introduction to the study of Arabic language and literature and Islam.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Arabic 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses in Arabic or Islamics; 199 courses may not be applied. With approval of

the undergraduate adviser, two of the seven courses may be taken outside the department. Courses recommended as electives for the major in Arabic (Art History 104A, Geography 187, History 106A, 106B, 106C, 107, 108, Political Science 132A, 132B, 157) may be applied. Other courses may be applied as extra-departmental courses with approval of the adviser.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Armenian Studies Minor

The Armenian Studies minor is designed for students who wish to augment their major program with a group of courses that provide a systematic introduction to the study of Armenian culture.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed Armenian 101A, 101B, 101C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses from the Armenian section of the department; 199 courses may not be applied. At least one course from each of the three disciplines of language, literature, and history must be selected. Eligible language courses begin in the fourth quarter of study (i.e., course 102A for Western Armenian, course 105A for Eastern Armenian). With approval of the undergraduate adviser, two of the seven courses may be taken outside the department. Ordinarily, courses listed as Related Courses under the Armenian section in the *UCLA General Catalog* may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Hebrew and Jewish Studies Minor

To enter the Hebrew and Jewish Studies minor, students must have an overall grade-point average of 2.0 or better, have completed Hebrew 1A, 1B, 1C, or the equivalent as determined by the department, and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses from the Hebrew or Jewish studies section of the department; 199 courses may not be applied. With approval of the undergraduate adviser and based on course content, two of the seven courses may be taken outside the department.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Near Eastern Languages and Cultures Minor

The Near Eastern Languages and Cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 376 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses (28 units):* Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied. With approval of the undergraduate adviser, two of the seven courses may be taken outside the department, provided the content of the courses bears a direct relation to the culture of the Near East.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Near Eastern Languages and Cultures offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Near Eastern Languages and Cultures.

## Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

## Lower Division Course

**10W. Jerusalem: The Holy City. (5)** (Formerly numbered 10.) Lecture, three hours; discussion, one hour. Enforced prerequisite: English Composition 3 or 3H. Not open for credit to students with credit for former course 10. Survey of religious, political, and cultural history of Jerusalem over three millennia as a symbolic focus of three faiths: Judaism, Christianity, and Islam. Transformation of sacred space as reflected by literary and archaeological evidence through examination of testimony of artifacts, architecture, and iconography in relation to the written word. Study of creation of the mythic Jerusalem through event and experience. Satisfies Letters and Science Writing II requirement. Letter grading.

## Upper Division Courses

**M104A-M104B. Ancient Egyptian Civilization. (4-4)** (Same as History M104A-M104B.) Lecture, three hours; discussion, one hour. Course M104A is not requisite to M104B. Designed for juniors/seniors. Political and cultural institutions of ancient Egypt and ideas on which they were based. P/NP or letter grading. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria. (4)** (Same as History M105.) Lecture, three hours. Designed for juniors/seniors. Political and cultural development of "Fertile Crescent," including Palestine, from Late Uruk to neo-Babylonian period. Letter grading.

**120A-120B-120C. Elementary Ancient Egyptian. (5-5-5)** Lecture, three hours; laboratory, two hours. Course 120A is requisite to 120B, which is requisite to 120C. Grammar and texts. P/NP or letter grading.

**121A-121B-121C. Intermediate Ancient Egyptian. (5-5-5)** Lecture, three hours. Requisite: course 120C. Course 121A is requisite to 121B, which is requisite to 121C. Readings in ancient Egyptian literature. P/NP or letter grading.

**123A-123B. Coptic. (5-5)** Lecture, three hours. Course 123A is requisite to 123B. Introduction to Coptic grammar and reading of Coptic texts. P/NP or letter grading.

**124. Middle Egyptian Technical Literature. (4)** Lecture, three hours. Requisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included. P/NP or letter grading.

**130. Ancient Egyptian Religion. (5)** Lecture, three hours; discussion, one hour. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religious institutions such as divine kingship and pious foundations. P/NP or letter grading.

**140A-140B-140C. Elementary Sumerian. (4-4-4)** Lecture, three hours. Requisites: Semitics 140A, 140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period. P/NP or letter grading.

**145. Sumerian Literary Texts. (4)** Lecture, three hours. Requisites: courses 140A, 140B. Reading and interpretation of selected Sumerian literary texts. P/NP or letter grading.

**150A-150B-150C. Survey of Ancient Near Eastern Literatures in English. (4-4-4)** Lecture, three hours. Each course may be taken independently for credit. P/NP or letter grading. **150A.** Mesopotamia; **150B.** Egypt; **150C.** Syria and Palestine, Asia Minor, Persia.

**160A-160B. Introduction to Near Eastern Archaeology. (4-4)** Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology. P/NP or letter grading.

**161. Archaeology of Prehistoric Mesopotamia. (4)** (Formerly numbered 161A.) Lecture, three hours. Survey of prehistoric archaeological periods in Mesopotamia. P/NP or letter grading.

**162. Archaeology and Religion of Israel. (4)** Lecture, three hours. Survey of archaeology of Palestine from Bronze Age to destruction of Jerusalem in A.D. 70, with emphasis on religious development of ancient Israel. P/NP or letter grading.

**163. Archaeology of Iran. (4)** (Formerly numbered 163A-163B.) Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. P/NP or letter grading.

**164A. Sumerians. (4)** Lecture, three hours. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. P/NP or letter grading.

**164B. Assyrians. (4)** Lecture, three hours. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. P/NP or letter grading.

**164C. Babylonians. (4)** Lecture, three hours. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. P/NP or letter grading.

**165. Archaeology of Pharaonic Egypt. (4)** Lecture, three hours. Requisites: courses M104A, M104B. Selected topics on archaeology of Pharaonic Egypt, with emphasis on material culture as source for political, social, and economic history of ancient Egypt. P/NP or letter grading.

**170. Introduction to Biblical Studies. (4)** Lecture, two hours. Knowledge of original languages not required. The Bible (Old and New Testaments) as a book. Canon, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present. P/NP or letter grading.

**M193D. Religions of Ancient Near East. (4)** (Same as History M193D.) Lecture. Designed for juniors/seniors. Main polytheistic systems of ancient Near East, with emphasis on Mesopotamia and Syria and with reference to religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct. P/NP or letter grading.

**199. Special Studies in the Ancient Near East. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**210. Late Egyptian. (4)** Lecture, three hours. Requisites: courses 121A, 121B, 121C. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit. S/U or letter grading.

**211A-211B. Egyptian Texts of the Greco-Roman Period. (4-4)** Lecture, three hours. Requisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types. Letter grading.

**220. Seminar: Ancient Egypt. (4)** Seminar, three hours. May be repeated for credit. S/U or letter grading.

**221A-221B. Demotic. (4-4)** Lecture, three hours. Requisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres. S/U or letter grading.

**230. Seminar: Ancient Syria/Palestine. (4)** Seminar, three hours. Examination of selected topics on political, social, and intellectual history of ancient Israel. Exploration of how historical, social, and political contexts shaped and influenced interpretation and use of biblical texts. S/U or letter grading.

**240A-240B-240C. Seminars: Sumerian Language and Literature. (4-4-4)** Seminar, two hours. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history. S/U or letter grading.

**M250. Seminar: Ancient Mesopotamia. (4)** (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit. S/U or letter grading.

**250X. Seminar: Ancient Mesopotamia. (1)** Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading.

**260. Seminar: Ancient Near Eastern Archaeology. (2 to 4)** Seminar, two hours. May be repeated for credit. S/U or letter grading.

**261. Practical Field Archaeology. (2 to 8)** Field-work, two hours. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated for credit. S/U or letter grading.

**262. Seminar: Object Archaeology. (4)** Seminar, two hours; laboratory, one hour. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heeramanek Collection of Los Angeles County Museum of Art. S/U or letter grading.

**263. Seminar: Egyptian Monuments. (4)** Seminar, two hours. Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated. S/U or letter grading.

**M265. Depositional History and Stratigraphic Analysis. (4)** (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

**272. Semitic Background of the New Testament. (4)** Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C, Semitics 130, Greek 1, 2. Study of Semitic elements in the Greek New Testament: traditions transmitted in Aramaic, relations to the Old Testament and to post-Biblical literature, and Palestinian Judaism. S/U or letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Arabic

### Lower Division Courses

**1A-1B-1C. Elementary Standard Arabic. (5-5-5)** Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Introduction to formal Arabic (modern standard Arabic), including listening, speaking, reading, and writing. P/NP or letter grading.

### Upper Division Courses

**102A-102B-102C. Intermediate Standard Arabic. (5-5-5)** Lecture, six hours. Requisite: course 1C. Course 102A is requisite to 102B, which is requisite to 102C. Intermediate formal Arabic, including listening, speaking, reading, and writing. P/NP or letter grading.

**103A-103B-103C. Advanced Arabic. (4-4-4)** Lecture, four hours. Requisites: courses 102A, 102B, 102C. Advanced formal Arabic, including grammar, composition, and readings from classical and modern texts. Letter grading.

**110. Parallel Readings in Arabic Sources. (1)** Discussion, one hour. Preparation: one year of Arabic or equivalent. Reading of short passages from original Arabic texts related to content course in another department; preparation of readings and final translation assignment. P/NP or letter grading.

**111A-111B-111C. Elementary Spoken Egyptian Arabic. (4-4-4)** Lecture, three hours. Knowledge of Arabic not required; not suitable for heritage speakers. Introduction to Egyptian colloquial Arabic. P/NP or letter grading.

**112A-112B-112C. Advanced Spoken Egyptian Arabic. (4-4-4)** Lecture, three hours. Study of Egyptian colloquial Arabic for heritage speakers or students who have completed courses 1A, 1B, 1C. P/NP or letter grading.

**120. Islamic Texts. (4)** Lecture, four hours. Requisite: course 103C. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit. Letter grading.

**130. Classical Arabic Texts. (4)** Lecture, four hours. Requisite: course 103C. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit. Letter grading.

**132. Philosophical and Kalam Texts. (4)** Lecture, three hours. Requisite: course 120. Readings in medieval and Kalam texts. May be repeated for credit. P/NP or letter grading.

**141. Modern Arabic Literature. (4)** Lecture, four hours. Requisite: course 103C. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit. Letter grading.

**142. Arabic Media. (4)** Lecture, four hours. Requisite: course 103A. Development of facility with language of Arabic press and broadcasting. Activities include monitoring current materials via Internet; transcribing, translating, and summarizing; writing original reports in Arabic; and oral presentations and discussions. May be repeated for credit. P/NP or letter grading.

**150. Classical Arabic Literature in English. (4)** Lecture, three hours. Readings in English; knowledge of Arabic not required. Culture of Arabic-speaking peoples through their literature. Texts range from pre-Islamic to early modern, along with works in history and anthropology, to place these writings in social context. P/NP or letter grading.

**151. Modern Arabic Literature in English. (4)** Lecture, three hours. Readings of selected texts covering basic literary trends from middle of the 19th century to the present. Letter grading.

**180. Linguistic Analysis of Arabic. (4)** Lecture, four hours. Requisite: course 102C. Linguistic description of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phonology, morphology, and syntax and to linguists' approaches to specific problems posed by Arabic grammar and dialectology. Letter grading.

**199. Special Studies in Arabic. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**220. Seminar: Islamic Texts. (4)** Seminar, three hours. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units. S/U or letter grading.

**240. Seminar: Arab Historians and Geographers. (4)** Seminar, three hours. Selected readings from works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units. S/U or letter grading.

**250. Seminar: Classical Arabic Literature. (4)** Seminar, two hours. Selected topics from classical Arabic prose and poetry. May be repeated for a maximum of 24 units. S/U or letter grading.

**251. Seminar: Modern Arabic Literature. (4)** Seminar, three hours. Requisite: course 141. Studies of specific problems and trends in Arabic prose and/or poetry in the 20th century. May be repeated for credit. Letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

## Armenian

### Upper Division Courses

**101A-101B-101C. Elementary Modern Western Armenian. (5-5-5)** Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Armenian grammar, conversation, and exercises. P/NP or letter grading.

**102A-102B-102C. Intermediate Modern Western Armenian. (5-5-5)** Lecture, five hours. Requisite: course 101C. Course 102A is requisite to 102B, which is requisite to 102C. Reading of selected texts, composition, and conversation. P/NP or letter grading.

**103A-103B-103C. Advanced Modern Western Armenian. (4-4-4)** (Formerly numbered 103.) Lecture, four hours. Requisite: course 102C. Designed for students with speaking fluency and reading abilities in Armenian. Exploration of advanced Western Armenian in following areas of competency: fluency, literacy, accuracy, and proficiency. Use of language to engage literary themes and cultural issues of historical and contemporary significance for Armenian speakers. P/NP or letter grading.

**104A-104B-104C. Elementary Modern Eastern Armenian. (5-5-5)** Lecture, five hours. Course 104A is requisite to 104B, which is requisite to 104C. Designed for students with little or no previous knowledge of Eastern Armenian, official idiom of Republic of Armenia. Introduction to basics of grammar and conversation. P/NP or letter grading.

**105A-105B-105C. Intermediate Modern Eastern Armenian. (5-5-5)** Lecture, five hours. Requisite: course 104C. Course 105A is requisite to 105B, which is requisite to 105C. Continuing introduction to Armenian grammar, with greater attention to readings from short stories and simple newspaper articles and film viewing on video. Emphasis on improving students' self expression in the idiom, both orally and in written form. P/NP or letter grading.

**106A-106B-106C. Advanced Modern Eastern Armenian. (4-4-4)** Lecture, four hours. Requisite: course 105C. Discussion of contemporary Armenian social and cultural issues through readings from critical essays, editorials, short stories, and poems written since World War II and film showings. Emphasis on enhancing students' self expression orally and in written form. Letter grading.

**130. Armenian Civilization under Bagratid Dynasty, 884 to 1064. (4)** Lecture, four hours. Interdisciplinary investigation of interface between sociopolitical and economic factors in creation of works of art (literature, art, architecture, etc.) and social function these works performed in this important period of Armenian history. Letter grading.

**131. Armenian Civilization in Cilician Period, 1080 to 1375. (4)** Lecture, four hours. Interdisciplinary investigation of rise and fall of unique form of Armenian polity established outside the homeland and examination of degree to which its social structure and cultural and aesthetic norms were impacted by those of the West (Byzantium, Western Europe) and East (Crusader states, Seljuqs, Mamluks, Mongols). Letter grading.

**150A-150B. Survey of Armenian Literature in English. (4-4)** Lecture, three hours. Knowledge of Armenian not required. Each course may be taken independently for credit. P/NP or letter grading.

**C151. Armenian Literature and Canon Formation. (4)** (Formerly numbered 151.) Lecture, four hours. Discussion of fundamental themes and genres around which Armenian literary tradition evolved and modalities by which this has been transformed in course of last two centuries as a result of exposure to European thought and expressive forms. Concurrently scheduled with course C251. P/NP or letter grading.

**C152. Modern Armenian Drama as Vehicle for Social Critique. (4)** (Formerly numbered 152.) Lecture, four hours. Readings of selected plays from 1668 to 1992 from three main genres of tragedy, comedy, and serious drama and featuring works by most significant Armenian playwrights, with focus on their role as commentators on contemporary mores and as agents for social reform. Concurrently scheduled with course C252. Letter grading.

**C153. Art, Politics, and Nationalism in Modern Armenian Literature. (4)** (Formerly numbered 153.) Lecture, four hours. Examination of role of literature in modern Armenian society in service to a cause or causes, as propaganda for various ideologies, as art for art's sake, etc. Exploration of contrasting aesthetics implicit in these differing interpretations. Concurrently scheduled with course C253. P/NP or letter grading.

**C155. Issues in Armenian American Literature and Culture. (4)** (Formerly numbered 155.) Lecture, four hours. Preparation: reading knowledge of modern Eastern and Western Armenian. Theoretically informed exploration of some of most salient questions related to Armenian American community as reflected in its literature and other cultural artifacts in interaction with its pluralistic American ambience. Concurrently scheduled with course C255. Letter grading.

**160A-160B. Armenian Literature of the 19th and 20th Centuries. (4-4)** Lecture, three hours. Requisites: courses 102A, 102B, 102C. Reading of texts and discussion of various genres of modern Armenian literature within context of the Armenian cultural renaissance. P/NP or letter grading.

**C166. Armenian Film and Culture. (5)** Lecture, six hours. Requisite: course 101C or 104C. Overview of development of Armenian cinematography from first talkie to the present, with focus on work of most seminal directors from Armenian Republic, as well as various voices from worldwide diaspora. Concurrently scheduled with course C266. P/NP or letter grading.

**199. Special Studies in Armenian Language and Literature. (2 to 8)** Tutorial, to be arranged. P/NP or letter grading.

## Graduate Courses

**207. Armenian Intellectual History. (4)** Lecture, three hours. Intellectual and cultural trends reflected in Armenian literature, historiography, religious and philosophical thought. S/U or letter grading.

**210. History of the Armenian Language. (4)** Lecture, three hours. Development of the Armenian language in its various stages: classical, middle, and modern. S/U or letter grading.

**220. Armenian Literature of the Golden Age (A.D. 5th Century). (4)** Lecture, three hours. Readings of texts and discussion of literary genres; original works and those translated from Greek and Syriac. S/U or letter grading.

**230A-230B-230C. Elementary Classical Armenian. (4-4-4)** Lecture, three hours. Course 230A is requisite to 230B, which is requisite to 230C. Introduction to grammar of the classical literary language (5th to mid-19th century) and guided readings in narrative prose texts. Letter grading.

**231A-231B-231C. Intermediate Classical Armenian. (4-4-4)** Lecture, three hours. Requisite: course 230C. Intensive review of grammar and reading of select prose and poetic texts. Each course may be taken independently for credit. Letter grading.

**232A-232B-232C. Advanced Classical Armenian. (4-4-4)** Lecture, three hours. Requisite: course 231A or 231B or 231C. In-depth reading and linguistic analysis of texts related to the Philhellene School of the 6th to 8th century and related works up to the 19th century. Each course may be taken independently for credit. Letter grading.

**250A-250B. Seminars: Armenian Literature. (4-4)** Seminar, three hours. Selected topics from various periods of Armenian literature. May be repeated for credit. S/U or letter grading.

**C251. Armenian Literature and Canon Formation. (4)** Lecture, four hours. Discussion of fundamental themes and genres around which Armenian literary tradition evolved and modalities by which this has been transformed in course of last two centuries as a result of exposure to European thought and expressive forms. Concurrently scheduled with course C151. S/U or letter grading.

**C252. Modern Armenian Drama as Vehicle for Social Critique. (4)** Lecture, four hours. Readings of selected plays from 1668 to 1992 from three main genres of tragedy, comedy, and serious drama and featuring works by most significant Armenian playwrights, with focus on their role as commentators on contemporary mores and as agents for social reform. Concurrently scheduled with course C152. Letter grading.

**C253. Art, Politics, and Nationalism in Modern Armenian Literature. (4)** Lecture, four hours. Examination of role of literature in modern Armenian society in service to a cause or causes, as propaganda for various ideologies, as art for art's sake, etc. Exploration of contrasting aesthetics implicit in these differing interpretations. Concurrently scheduled with course C153. S/U or letter grading.

**C255. Issues in Armenian American Literature and Culture. (4)** Lecture, four hours. Preparation: reading knowledge of modern Eastern and Western Armenian. Theoretically informed exploration of some of most salient questions related to Armenian American community as reflected in its literature and other cultural artifacts in interaction with its pluralistic American ambience. Concurrently scheduled with course C155. Letter grading.

**C266. Armenian Film and Culture. (5)** Lecture, six hours. Requisite: course 101C or 104C. Overview of development of Armenian cinematography from first talkie to the present, with focus on work of most seminal directors from Armenian Republic, as well as various voices from worldwide diaspora. Concurrently scheduled with course C166. S/U or letter grading.

**290. Seminar: Armenian Paleography. (4)** Seminar, three hours. Discussion of a variety of Armenian scripts and training in use of manuscripts. S/U or letter grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit. S/U or letter grading.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Iranian

### Lower Division Courses

**1A-1B-1C. Elementary Persian. (5-5-5)** Lecture, six hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian. P/NP or letter grading.

**10A-10B-10C. Persian Conversation. (2-2-2)** Lecture, three hours. Systematic and structured Persian conversation.

**20A-20B-20C. Accelerated Elementary Persian. (6-6-6)** Lecture, four hours; discussion two hours; laboratory, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose compositions. P/NP or letter grading.

### Upper Division Courses

**102A-102B-102C. Intermediate Persian. (5-5-5)** Lecture, six hours. Requisite: course 1C or 20C. Course 102A is requisite to 102B, which is requisite to 102C. P/NP or letter grading.

**103A-103B-103C. Advanced Persian. (4-4-4)** Lecture, three hours. Requisite: course 102C. Students who successfully complete courses 20A, 20B, 20C with grades of A may be permitted to enroll. Each course may be taken independently for credit. **103A.** Introduction to Classical Persian Poetry; **103B.** Introduction to Classical Persian Prose; **103C.** Introduction to Contemporary Persian Poetry and Prose.

**104. Philosophical Texts. (4)** Lecture, three hours. Readings in English. Introduction to wide selection of philosophical texts in translation. Identification of major philosophical themes in ontology, epistemology, psychology, and cosmology through texts, with study in detail. P/NP or letter grading.

**111A-111B-111C. Elementary Kurdish. (4-4-4)** Lecture, three hours; laboratory, two hours. Proficiency-based course in basic grammar of literary Kurdish (Sorani). Graded readings, translation, composition (level one), conversation (levels one and two).

**120. Comparative Study of Six Major Persian Poets. (4)** Lecture, two hours; discussion, one hour. Preparation: knowledge of Persian. Lectures in Persian, readings in English and Persian. Comparative study of six major Persian poets from the 10th to 14th century who shaped the sense of Persian identity and delineated chief distinguishing characteristics of Persian thought and culture. P/NP or letter grading.

**130. Intellectual History of Jews of Persia. (4)** Lecture, three hours. Readings in English. Introduction to intellectual history of Jews in Persia by highlighting select areas of Judeo-Persian studies and focusing on various authors and their work. P/NP or letter grading.

**131. Introduction to Judeo-Persian: Language and Culture. (4)** Lecture, three hours. Preparation: knowledge of Persian equivalent to course 102C. Introduction to history of Judeo-Persian literature and culture to prepare students to read Judeo-Persian texts. P/NP or letter grading.

**140. Persian Belles Lettres (*Adabiyât*). (4)** Lecture, three hours. Requisite: course 103A. Study of major Persian poets and prose writers: prose — Sohravardi, Hamadâni, Nasafi, Irâqi, and others; poetry — Hâfez, Sa'di, Rûmi, Bahâr, Dehkoda, and others. May be repeated for credit with consent of instructor. P/NP or letter grading.

**141. Persian Analytical Prose. (4)** Lecture, three hours. Requisite: course 102C. Study of selected analytical and expository prose texts, with emphasis on philosophy, sciences, literary criticism, and history. May be repeated for credit with consent of instructor. P/NP or letter grading.

**142. Persian Popular Ethics. (4)** Lecture, three hours. Requisite: course 102C. Study of major Persian works on popular ethics which have helped shape normative social, cultural, and political values in Iranian civilization. May be repeated for credit with consent of instructor. P/NP or letter grading.

**150A-150B. Survey of Persian Literature in English. (4-4)** Lecture, three hours. Knowledge of Persian not required. Each course may be taken independently for credit.

**169. Civilization of Pre-Islamic Iran. (4)** Survey of Iranian culture from the beginning through Sasanian period.

**170. Religion in Ancient Iran. (4)** History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichaeism, Mazdakism.

**180A-180B. Iranian Civilization. (4-4)** Lecture, three hours; discussion, one hour. Cultural and social history of the Iranian world, with emphasis on legacy of Persian language and literature. Letter (majors) or P/NP or letter (nonmajors) grading.

**190A-190B. Introduction to Modern Iranian Studies. (4-4)** Lecture, three hours. Requisites: courses 1A, 1B, 1C. Survey of Iranian languages. Comparative and historical grammar.

**197A-197Z. Variable Topics in Iranian Studies. (4 each)** Lecture, three hours. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**199. Special Studies in Iranian. (2 to 8)** Tutorial, to be arranged.

## Graduate Courses

**220A-220B. Classical Persian Texts. (4)** Lecture, three hours. Requisites: courses 103A, 103B, 103C. Study of selected classical Persian texts. Each course may be taken independently for credit.

**221. Rumi, Mystic Poet of Islam. (4)** Seminar, three hours. Requisite: course 220A or 220B. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

**M222A-M222B. Vedic. (4-4)** (Same as Indic M222A-M222B.) Lecture, three hours. Preparation: knowledge of Sanskrit equivalent to Indic 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

**230A-230B. Old Iranian. (4-4)** Studies in grammars and texts of Old Persian and Avestan. Comparative considerations. Only course 230B may be repeated for credit.

**231A-231B. Middle Iranian. (4-4)** Studies in grammars and texts of such Middle Iranian languages as best serve students' needs (e.g., Pahlavi, Sogdian, Sakian). Only course 231B may be repeated for credit.

**250. Seminar: Classical Persian Literature. (4)** Seminar, three hours. Requisites: courses 103A, 103B, 103C, 199. May be repeated twice for credit.

**251. Seminar: Contemporary Persian Literature. (4)** Seminar, three hours. Requisite: course 140. Studies in specific problems and trends in Persian poetry and prose in the 20th century. May be repeated twice for credit.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**50C. Modern Middle Eastern Cultures. (5)** Lecture, three hours; discussion, one hour. Survey of modern Middle Eastern cultures through readings and films from Arab countries, Iran, Turkey, and Israel. Letter grading.

### Graduate Courses

**200. Bibliography and Method of Near Eastern Languages and Literatures. (4)** Lecture, two hours. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

**210. Survey of Afro-Asiatic Languages. (4)** Lecture, three hours. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family.

**241. Folklore and Mythology of Near East. (4)** (Formerly numbered M241.) S/U or letter grading.

**290. Seminar: Paleography. (4)** Seminar, three hours. Provides students with ability to cope with varieties of manuscripts.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Semitics

### Upper Division Courses

**110. Neo-Aramaic. (4)** Lecture, three hours. Grammar and reading of selected texts (folktales, homilies, songs) in modern Aramaic dialects of the Jews and Christians of Kurdistan.

**115. Syriac. (4)** Lecture, two hours. Morphology and syntax of Syriac language, introductory reading.

**130. Biblical Aramaic. (4)** Lecture, three hours. Requisites: Hebrew 102A, 102B, 102C. Grammar of biblical Aramaic and reading of texts.

**140A-140B. Elementary Akkadian. (4-4)** Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.

**141. Advanced Akkadian. (4)** Lecture, three hours. Old Babylonian syntax; reading of basic Old Babylonian texts.

**142. Akkadian Literary Texts. (4)** Lecture, three hours. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

**199. Special Studies in Semitics. (2 to 8)** Tutorial, to be arranged.

### Graduate Courses

**210. Ancient Aramaic Dialects. (4)** Lecture, three hours. Requisite: course 130. Reading of surviving inscriptions and papyri. Texts include Old Aramaic inscriptions, Egyptian Aramaic texts, Qumran Aramaic, and Targumic Aramaic. May be repeated for credit. S/U or letter grading.

**215B. Syriac. (4)** Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit.

**220A-220B. Ugaritic. (4-4)** Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C. Study of Ugaritic language and literature. Only course 220B may be repeated for credit.

**225. Phoenician. (4)** Lecture, two hours. Requisites: Hebrew 102A, 102B, 102C. Study of Phoenician language and inscriptions. May be repeated for credit.

**230. Seminar: Northwest Semitic Languages and Literatures. (4)** Seminar, two hours. May be repeated for credit.

**240. Seminar: Akkadian Language. (4)** Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

**240X. Seminar: Akkadian Language. (1)** Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

**241. Seminar: Akkadian Literature. (4)** Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

**241X. Seminar: Akkadian Literature. (1)** Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

**280A-280B-280C. Seminars: Comparative Semitics. (4-4-4)** Seminar, two hours.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Turkic Languages

### Upper Division Courses

**101A-101B-101C. Elementary Turkish. (5-5-5)** Lecture, five hours. Course 101A is requisite to 101B, which is requisite to 101C. Grammar, reading, conversation, and elementary composition drills. P/NP or letter grading.

**102A-102B-102C. Advanced Turkish. (4-4-4)** Lecture, five hours. Requisites: courses 101A, 101B, 101C. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts.

**111A-111B-111C. Elementary Uzbek. (4-4-4)** Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.

**112A-112B-112C. Advanced Uzbek. (4-4-4)** Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

**114A-114B-114C. Bashkir. (4-4-4)** Lecture, three hours. Requisite: course 102A. Grammar, reading of literary and folkloric texts.

**115A-115B-115C. Elementary Azeri. (4-4-4)** Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill.

**116A-116B-116C. Advanced Azeri. (4-4-4)** Preparation: placement test. Proficiency-based course in descriptive Azeri grammar. Reading and analysis of Azeri literary and folkloric texts in new writing system. High-style composition and conversation.

**120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A, 102B, and 102C, or 111A, 111B, and 111C, or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, paremiology, and lexicology analyzed on today's native material.

**160. Turkish Tradition. (4)** Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

**165. Islamic Literary Heritage of Central Asia. (4)** Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

**170. Turco-Mongolian Nomadic Empires. (4)** Lecture, three hours. Required of students in Turkic program. Survey of history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, T'u-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite).

**180. Modern Turkic Languages and Peoples. (4)** Lecture, three hours. Required of students in Turkic program and recommended for students in Soviet studies. Ethnic and linguistic survey of the Turkic peoples.

**199. Special Studies in Turkic Languages. (2 to 8)** Tutorial, to be arranged.

## Graduate Courses

**210A-210B-210C. Introduction to Ottoman. (4-4-4)** Lecture, three hours. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

**211. Ottoman Diplomatics. (4)** Lecture, three hours. Requisites: courses 210A, 210B, 210C. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research.

**220A-220B-220C. Classical Uzbek (Chagatay). (4-4-4)** Lecture, three hours. Requisites: courses 101A, 101B, and 101C, or 111A, 111B, and 111C, or Iranian 102A, 102B, and 102C, or Arabic 102A, 102B, and 102C, or Hebrew 102A, 102B, and 102C. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills.

**225A-225B-225C. Old Turkic: Turk and Uygur. (4-4-4)** Lecture, three hours. Requisite: course 180. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works.

**230A-230B-230C. Historical and Comparative Survey of Turkic Languages. (4-4-4)** Lecture, three hours. Requisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis.

**235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. (4-4)** Lecture, three hours. Requisite: course 180. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

**240A-240B-240C. Advanced Ottoman. (4-4-4)** Lecture, three hours. Requisites: courses 210A, 210B, 210C. Emphasis on different genres of Ottoman writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

**250A-250B-250C. Islamic Texts in Chagatay. (4-4-4)** Lecture, three hours. Requisites: courses 220A, 220B, 220C. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

**280A-280B. Seminars: Modern Turkish Literature. (4-4)** Seminar, two hours. Requisite: course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

**290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri. (4-4)** Seminar, two hours. Requisites: courses 210A, 210B, and 210C, and/or 220A, 220B, and 220C. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

**596. Directed Individual Study. (2 to 8)** Tutorial, to be arranged. May be repeated for credit.

**597. Examination Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

## Scope and Objectives

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Graduates can anticipate an academic career at the college or university level or as a basic science researcher at a research institute or biotechnology company. In accord with this the department strives to produce graduates soundly qualified both for teaching at the college or university level and for the conduct of original research in neurobiology.

The overall objective of the Ph.D. program is to provide a strong theoretical and practical foundation in the area of cellular and systems neu-

robiology, with the goal to develop a better understanding of normal and pathological brain function and behavior. The graduate program provides (1) basic and advanced instruction in the fundamentals of neuroscience, (2) advanced independent research training in the areas of cellular, structural, and systems neurobiology, and (3) teaching experience in undergraduate, graduate, and professional (dental and medical) courses in neuroscience. The program is targeted toward highly qualified and self-motivated doctoral students who take advantage of a flexible curriculum characterized by extensive informal and formal interactions with faculty in small groups and on an individual tutorial basis. The curriculum is structured to allow students extensive opportunities for critical examination of contemporary neuroscience literature and research and for the development of oral and written communication skills.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Neurobiology offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Neurobiology.

## Medical History

### Upper Division Courses

**107A-107B. Historical Development of Medical Sciences. (4-4)** Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. P/NP or letter grading. **107A.** Contributions of medicine and medical personalities from earliest times through 1650. **107B.** Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

**120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions. (4)** Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

**135. Popular Beliefs and Medicine. (4)** Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

**M169. History of Neurosciences. (4)** (Formerly numbered M246.) (Same as Neurobiology M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

## Graduate Courses

**240A-240B. History of Medical Sciences. (2-2)** Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present. S/U or letter grading.

**250. History of Medical Psychology. (2)** Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues. S/U or letter grading.

**596. Directed Individual Studies in Medical History. (2 to 12)** Tutorial, to be arranged. Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences. S/U or letter grading.

## Neurobiology

### Lower Division Courses

**88. Lower Division Seminar: Special Topics in Neurobiology. (4)** Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

**98B. Mind, Brain, and Culture. (4)** Seminar, three hours. Enforced requisite: satisfaction of Subject A requirement. Overview of structure, function, and role of the human brain: its development through time, people's struggle to understand their brain, techniques they use and some facts they have generated in this pursuit, its role as the central element in human culture, and its probable continuing change as a result of that evolving culture. Lecture, laboratory, and discussion of the brain and its role in human achievement. Letter grading.

### Upper Division Courses

**104. Histology and Cell Biology. (6)** Lecture, four hours; laboratory, six hours. Designed for dental students. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included. P/NP or letter grading.

**106. Functional Neuroanatomy. (4)** Lecture/laboratory, three two-hour sessions. Designed for dental students. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system. P/NP or letter grading.

**M168. Ideas and Experiments in History of Physiology. (4)** (Same as Physiological Science M168.) Lecture, three hours. Interaction of concepts and experimental techniques in physiology from the early 19th to latter 20th centuries, including heart and circulation, hormones, nutrition and vitamins, the brain, spinal cord, and peripheral nervous system, as well as development of physiology as scientific discipline. Discussion of weekly readings and presentations by students. Letter grading.

**M169. History of Neurosciences. (4)** (Formerly numbered M246.) (Same as Medical History M169.) Lecture, one hour; discussion, two hours. Development of neurosciences, especially neuroanatomy and neurophysiology, from Enlightenment era through latter 20th century. Emphasis on fundamental nerve functions, cell communication, and technological, conceptual, and cultural influences that have shaped understanding of brain and nervous system. P/NP or letter grading.

**199. Individual Special Studies. (2 to 8)** Tutorial, to be arranged. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. P/NP or letter grading.

## Graduate Courses

**M200A. Synapses, Cells, and Circuits. (4)** (Same as Neuroscience M244.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

**M200B. Molecular, Cellular, and Developmental Neurobiology. (6)** (Formerly numbered M209A.) (Same as Molecular, Cell, and Developmental Biology CM220, Neuroscience M201, and Physiology M209A.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotropic factors. Letter grading.

**200C. Sensory Systems Neurobiology. (3)** Lecture, one hour; discussion, one hour; laboratory, one hour. Fundamental topics in sensory systems neurobiology, including sensory transduction, taste and olfaction, audition, vision, and somatosensory system. Letter grading.

**200D. Motor Systems Neurobiology. (3)** Lecture, one hour; discussion, one hour; laboratory, one hour. Fundamental topics in motor systems neurobiology, including muscle, motor units, and motoneuron pools, spinal motor control, reflexes, locomotion, basal ganglia, cerebellum, and eye movements. Letter grading.

**200E. Regulatory, Behavioral, and Cognitive Neurobiology. (6)** Lecture, two hours; discussion, two hours; laboratory, two hours. Topics include hypothalamus, cardiovascular system, breathing, food intake and metabolism, water intake and body fluids, neuroendocrine systems, circadian timing, sleep and dreaming, psychosocial development, motivation, reward and addiction, cognitive development, object, face, and spatial recognition, learning and memory, language and communication, and thinking and problem solving. Letter grading.

**M200F. Cellular Neurophysiology. (4)** (Same as Neuroscience M202 and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

**M200G. Biology of Learning and Memory. (4)** (Same as Neuroscience M220.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

**201. Microscopic Anatomy and Cell Biology. (7)** Lecture/laboratory, two to three three-hour sessions (16-week semester). Designed for medical students. Microscopic study of structure and function of tissues and cells, with special reference to the human body. Letter grading.

**M203A-M203B. Neuroscience. (4-4)** (Same as Physiology M203A-M203B.) Lecture/laboratory, two to three hours. Designed for medical and qualified graduate program students. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.

**211. Cellular Basis of Learned Behavior. (2)** Lecture/discussion, one two-hour session; laboratory, to be arranged. Preparation: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory. S/U or letter grading.

**M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4)** (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis. Letter grading.

**M229. Oral Embryology and Histology. (4)** (Same as Oral Biology M203.) Lecture, four hours. Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues. Letter grading.

**M234. Seminar: Developmental Neuroendocrine-immunology. (2)** (Same as Oral Biology M234.) Seminar, two hours. Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**251. Problems in Developmental and Comparative Immunology. (2)** Lecture/discussion, two hours. Review of current literature emphasizing early development and evolution of immune competence. S/U or letter grading.

**252. Evolution as a Complex Process. (2)** Lecture, two hours. Designed for graduate students. Study and examination of biological evolution as a fundamental complex process. S/U or letter grading.

**254. Structure and Function of Cells and Tissues. (2)** Lecture, one hour; discussion, one hour. Prerequisite or corequisite: course 104. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

**M255. Seminar: Neural and Behavioral Endocrinology. (2)** (Same as Physiological Science M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function. Letter grading.

**258. Seminar: Neuroscience. (2)** Seminar, two hours. Preparation: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit. S/U or letter grading.

**259. Current Topics in Neurobiology. (2)** Discussion, two hours. Review and discussion of current research literature in varying areas of neurobiology. S/U grading.

**265. Evolution of Cancer. (2)** Lecture, two hours. Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint. S/U or letter grading.

**270A-270B-270C. Cell, Molecular, and Integrative Biology Seminars. (1-1-1)** (Formerly numbered M270A-M270B-M270C.) Seminar, one hour. Formal lectures on current research topics in neuroscience by speakers from national, international, and local neuroscience communities. S/U grading.

**290. Tutorials in Anatomy. (2)** Tutorial, one hour. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

**295. Culture of Neurobiology. (2)** Discussion, one hour. Outside readings, classroom discussions, short write-ups, and student presentations on current issues in neurobiology. Topics include networking, mentoring, publishing, grant system, authorship, and career opportunities. S/U grading.

**296. Research Seminar and Journal Club. (1)** Seminar, one hour. Seminar and journal club with focus on current research topics and activities occurring within department. S/U grading.

**298A-298B-298C. Advanced Topics in Neurobiology. (2-2-2)** Seminar, one hour; discussion, one hour. Advanced seminar courses in neurobiology to be offered by different departmental faculty members. Topics are grouped thematically. S/U grading. **298A.** Molecular, Cellular, and Developmental Neurobiology; **298B.** Sensory and Motor Systems Neurobiology; **298C.** Regulatory, Behavioral, and Cognitive Neurobiology.

**390A-390B. Peer Review System. (2-2)** Discussion, two hours. Preparation: advancement to candidacy in integrative or systems biology. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

**495A-495F. Preparation for Teaching in Anatomical Sciences. (2 to 4 each)** Seminar, to be arranged. Designed for graduate students. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**598. Thesis Research for M.S. Candidates. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Dissertation Research for Ph.D. Candidates. (2 to 12)** Tutorial, to be arranged. S/U grading.

## Chairs

John C. Mazziotta, M.D., Ph.D. (*Frances Stark Professor of Neurology*), *Chair*  
 Jeffrey L. Cummings, M.D. (*Augustus S. Rose Professor of Neurology*), *Vice Chair*  
 Christopher M. DeGiorgio, M.D., *Vice Chair*  
 Mark A. Goldberg, M.D., Ph.D., *Vice Chair; Harbor-UCLA*  
 Claude G. Wasterlain, M.D., *Vice Chair; VA Southern California*

## Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see <http://www.neurology.ucla.edu>.

## Neurology

### Upper Division Course

**199. Special Studies. (2 to 8)** Discussion, one to two hours; laboratory, four to six hours. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students.

 Harley I. Kornblum, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
 Sally J. Krasne, Ph.D. (*Physiology*)  
 Nigel T. Maidment, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 William P. Melega, Ph.D. (*Molecular and Medical Pharmacology*)  
 Karen A. Miotto, M.D. (*Psychiatry and Biobehavioral Sciences*)  
 Thomas J. O'Dell, Ph.D. (*Physiology*)  
 Paul H. O'Lague, Ph.D. (*Molecular, Cell, and Developmental Biology*)  
 Patricia E. Phelps, Ph.D. (*Physiological Science*)  
 Helen Raybould, Ph.D., *in Residence (Medicine)*  
 Stanley J. Schein, M.D., Ph.D. (*Psychology*)  
 Barney A. Schlinger, Ph.D. (*Physiological Science*)  
 Igor Spigelman, Ph.D. (*Dentistry*)  
 Alexander van der Blik, Ph.D. (*Biological Chemistry*)  
 James A. Waschek, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Joseph B. Watson, Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Nancy L. Wayne, Ph.D. (*Physiology*)  
 Cui-Wei Xie, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*

**Assistant Professors**

Mark G. Barad, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Ana Maria Correa, Ph.D., *in Residence (Anesthesiology)*  
 Daniel H. Geschwind, M.D., Ph.D. (*Neurology*)  
 Marco Iacoboni, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Linda M. Liao, M.D., Ph.D. (*Surgery*)  
 Xin Liu, M.D., Ph.D. (*Molecular and Medical Pharmacology, Pathology and Laboratory Medicine*)  
 Kelsey C. Martin, M.D., Ph.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Gary W. Mathern, M.D., *in Residence (Surgery)*  
 John D. McCann, M.D., Ph.D. (*Ophthalmology*)  
 Michael S. Mega, M.D., Ph.D., *in Residence (Neurology)*  
 Sheila Nirenberg, Ph.D. (*Neurobiology*)  
 Thomas Otis, Ph.D. (*Neurobiology*)  
 Uma Rao, M.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Sanjaya Saxena, M.D., *in Residence (Psychiatry and Biobehavioral Sciences)*  
 Felix E. Schweizer, Ph.D. (*Neurobiology*)

**Adjunct Professors**

Charles L. Wilson, Ph.D. (*Neurology*)  
 Dahlia Zaidel, Ph.D. (*Psychology*)

**Adjunct Associate Professors**

Larry F. Hoffman, Ph.D. (*Surgery*)  
 Jen Yu Wei, Ph.D. *in Residence (Medicine/Digestive Diseases)*

**Scope and Objectives**

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

**Undergraduate Study****Neuroscience B.S.****Preparation for the Major****Life Sciences Core Curriculum**

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; one course from Statistics 10 or 13 or, by petition, Biostatistics 100A or 110A.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the College general education requirements, students are encouraged to select courses that complement the major; Psychology 10 is recommended.

**Transfer Students**

To be admitted as Neuroscience majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, one semester of organic chemistry with laboratory, and one statistics course. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

**The Major**

The following 12 courses are required for the Neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 1: Neuroscience M101A, M101B, M101C, 102, Chemistry and Biochemistry 153A, 153L

Group 2: Three electives (one from each area) as follows:

Area 2A: One *behavioral and cognitive neuroscience* course from Neuroscience M119L, M130, C172, 197A, Physiological Science C144, Psychology 110, 112A, 112B, 118, 119A, 119B, 119D, 119E, 119M, 119P, 120A, 120B, 124A

Area 2B: One *systems and integrative neuroscience* course from Neuroscience M119N, M130, M145, 197B, Organismic Biology, Ecology, and Evolution M173, Physiological Science C125, 126, 138, C144, 147, Psychology 112B, 119A, 119B, 119M, 119P, 120B

Area 2C: One *molecular, cell, and developmental neuroscience* course from Molecular, Cell, and Developmental Biology C139, Neuroscience M130, M145, M148, 151, 197C, Physiological Science 126, 147, 192

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms) or 199HA and 199HB (one term in each course) or Psychology M181A and M181B (with approval of the neuroscience curriculum committee before start of project; one term in each course). All majors who elect to do two terms (one term applies toward Group 3 and one toward Group 4) of Neuroscience 199 or 199HA and 199HB or Psychology M181A and M181B must do one term of Honors Collegium 99 in the same laboratory. In addition, they must submit a poster to the neuroscience undergraduate poster session or the curriculum committee prior to graduation

Group 4: Two additional elective courses from the Group 2 or 3 list or from Neurobiology/Medical History M169 or Physiological Science C135. Students who select two terms of Neuroscience 199 or 199HA and 199HB or Psychology M181A and M181B must select only one additional elective to satisfy Group 4

Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted.

No more than eight courses may be from any one department. A maximum of 8 units of Neuroscience 199 or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

## Honors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office,

1506D Gonda Center. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

## Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.

To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A.

Non-science majors wishing to minor in Neuroscience should be aware that preparation courses in chemistry, life sciences, and physics are requisites to the upper division course requirements.

*Required Upper Division Courses (approximately 31 units):* Neuroscience M101A, M101B, M101C (5 units each) and four elective courses selected from 102 and from Groups 2, 3, and 4 as listed under the Neuroscience major.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. A maximum two-course overlap is allowed between students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

## Neuroscience

See the Neuroscience Interdepartmental Graduate Program for the graduate course offerings.

## Upper Division Courses

**M101A-M101B-M101C. Neuroscience: From Molecules to Mind. (5-5-5)** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, 90 minutes. P/NP or letter grading:

**M101A. Cellular and Systems Neuroscience.** (5) Lecture, four hours; discussion, 90 minutes. Requisites: Chemistry 14C or 30A or former course 30 (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. For Physiological Science majors only, a grade of C- or better is required to proceed to Physiological Science 111B. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

**M101B. Molecular and Developmental Neuroscience.** (5) Lecture, four hours; discussion, 90 minutes. Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

**M101C. Behavioral and Cognitive Neuroscience.** (5) Lecture, four hours; discussion, 90 minutes. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

**101L. Neuroscience Laboratory.** (4) Lecture, two hours; laboratory, three hours. Requisites: courses M101A, M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experience with important methodology and experimental approaches in neuroscience.

**102. Introduction to Functional Anatomy of Central Nervous System.** (4) (Formerly numbered M102.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

**M119L. Human Neuropsychology.** (4) (Same as Psychology M119L.) Lecture, three hours. Requisites: courses M101A and M101C (or Psychology 115), Psychology 120A or 120B. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

**M119N. The Visual System.** (4) (Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**M130. Biological Bases of Psychiatric Disorders.** (4) (Same as Molecular, Cell, and Developmental Biology M191, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric symptoms and neurological disorders, including schizophrenia, depression, bipolar disorder, obsessive/compulsive disorder. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments. P/NP or letter grading.

**M145. Neural Mechanisms Controlling Movement.** (5) (Same as Physiological Science CM145.) Lecture, four hours. Requisite: course M101A or Physiological Science 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Letter grading.

**M148. Molecular and Cellular Physiology of Neurons.** (4) (Same as Physiological Science M148.) Lecture, three hours. Requisite: course M101A or Physiological Science 111A or M180A. Advanced treatment of selected topics in cellular neurophysiology. Letter grading.

**151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disease.** (4) Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to understand more about role of genes in normal development of brain and in disease. Required student participation in discussions.

**C172. Neuroimaging and Brain Mapping.** (4) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. Strongly recommended: course M102. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Concurrently scheduled with course CM272. Letter grading.

**194. Independent Study of Neuroscience Literature.** (2) Library research, six hours minimum. Requisite: course M101A. Directed independent library research with a faculty member. Written proposal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

**196H. Honors in Neuroscience.** (4) Lecture, one hour; discussion, two hours. Preparation: one statistics course (Statistics 10 or equivalent). Limited to neuroscience honors program students. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA and 199HB. Letter grading.

**197A-197B-197C. Special Topics in Neuroscience.** (4-4-4) Lecture, four hours. Requisite: course M101A or Physiological Science 111A. Topics on one or more aspects of neuroscience. May be applied as an elective only in the specific area of group 2. Each course may be repeated once for credit. P/NP or letter grading. **197A.** Behavioral and Cognitive Neuroscience; **197B.** Systems and Integrative Neuroscience; **197C.** Molecular, Cell, and Developmental Neuroscience.

**199. Independent Research in Neuroscience.** (4) Laboratory, 12 hours minimum. Requisites: course M101A, Honors Collegium 99. Limited to seniors and juniors with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. Letter grading.

**199HA. Honors Thesis in Neuroscience.** (4) Laboratory, 12 hours minimum. Requisites: course M101A, Honors Collegium 99. Limited to neuroscience honors program students. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on completion of course 199HB).

**199HB. Honors Thesis in Neuroscience.** (4) Laboratory, 12 hours minimum. Requisite: course 199HA. Continued reading and research that culminate in honors thesis. For departmental honors, students must also take course 196H. Maximum of 8 units of courses 199, 199HA, 199HB may be applied toward the major. Letter grading.

## Course List

### Molecular, Cell, and Developmental Biology

C139. Molecular, Cellular, and Developmental Neurobiology

### Neurobiology/Medical History

M169. History of Neurosciences

### Organismic Biology, Ecology, and Evolution

M173. Anatomy and Physiology of Sense Organs

### Physiological Science

C125. Comparative Endocrinology: Molecular to Behavioral

126. Biological Clocks

C135. Dynamical Systems Modeling of Physiological Processes

138. Neuromuscular Physiology and Adaptation

C144. Neural Control of Physiological Systems

147. Neurobiology of Learning and Memory

192. Intracellular Calcium Regulation

### Psychology

110. Fundamentals of Learning

112A. Basic Processes of Motivated Behavior

112B. Psychobiology of Fear and Anxiety

118. Comparative Psychobiology

119A. Neuropsychopharmacology

119B. Human Neurophysiology

119D. Behavioral Pharmacology

119E. Stress and Bodily Disease

119M. Physiological Psychology of Learning

119P. Mapping Mind through Its Molecules

120A. Cognitive Psychology

120B. Sensation and Perception

124A. Advanced Topics in Sensation and Perception

M181A-M181B. Research in Contemporary Problems in Mental Retardation

 Desmond Smith, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
 Yi Sun, Ph.D., in *Residence (Psychiatry and Biobehavioral Sciences)*  
 Eric Vilain, M.D., Ph.D. (*Human Genetics*)  
 Stephanie A. White, Ph.D. (*Physiological Science*)  
 Xianjie Yang, Ph.D., in *Residence (Ophthalmology)*  
 X. William Yang, M.D., Ph.D., in *Residence (Psychiatry and Biobehavioral Sciences)*

## Scope and Objectives

The interdepartmental Neuroscience Ph.D. Program prepares students for careers in neuroscience research and education. The hallmark of the program is an integrated approach to study of the nervous system, using the multi-level analytical tools of molecular, cellular, systems, and/or behavioral biology, as well as quantitative approaches from the fields of mathematics, physics, and engineering. Students working at one or two analytical levels nevertheless learn to appreciate the methods and advantages of other levels of analysis. Emphasis is both on mechanisms of neural function and the biological basis of disease. Students select their research mentor from the list of all neuroscience faculty at UCLA.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degree

The Neuroscience Program offers the Doctor of Philosophy (Ph.D.) degree in Neuroscience.

## Neuroscience

### Graduate Courses

**M201. Molecular, Cellular, and Developmental Neurobiology. (6)** (Same as Molecular, Cell, and Developmental Biology CM220, Neurobiology M200B, and Physiology M209A.) Lecture, two hours; discussion, two hours; laboratory, two hours. Fundamental topics concerning molecular, cellular, and developmental neurobiology, including intracellular signaling, cell-cell communication, neurogenesis and migration, synapse formation and elimination, programmed neuronal death, and neurotrophic factors. Letter grading.

**M202. Cellular Neurophysiology. (4)** (Same as Neurobiology M200F and Physiological Science M202.) Lecture, three hours; discussion, two hours. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. And membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction. Letter grading.

**M203A-M203B. Organization of Neural Systems. (4-4)** (Formerly numbered 203A-203B.) (Same as Biomedical Engineering M263A-M263B.) Lecture, three hours; discussion/laboratory, three hours. Integration of neuroanatomical and systems-level functional analysis of neural circuits leading to appreciation of their emergent properties. Discussion of organization of vertebrate central and peripheral nervous system based on cellular histological and regional analysis, highlighting contemporary experimental approaches. Topics include sensory processing, motor systems, physiological regulation, drive, learning, and neural basis of cognition. In Progress and letter grading.

**205. Systems Neuroscience. (4)** Lecture/discussion, four hours. Introduction to fundamentals of systems neuroscience, with emphasis on integration of molecular mechanisms, cellular processes, anatomical circuits, and behavioral analysis to understand function of neural systems. Letter grading.

**M206. Neuroengineering. (4)** (Same as Biomedical Engineering M260.) Lecture, four hours; laboratory, three hours. Requisites: Mathematics 32A, Molecular, Cell, and Developmental Biology 100, 171. Introduction to principles and technologies of neural recording and stimulation. Neurophysiology; clinical electrophysiology (EEG, evoked potentials, inverse problem, preoperative brain recording), extracellular microelectrodes and recording (field potentials and single units), chronic recording with extracellular electrodes; electrode biocompatibility, tissue damage, electrode and cable survival; intracellular recording and glass pipettes electrodes, iontophoresis; imaging neural activity (Ca imaging, voltage-sensitive dyes), intrinsic optical imaging; MRI, fMRI. Letter grading.

**207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2)** Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

**210A-210B-210C. Introduction to Current Literature in Neuroscience. (2-2-2)** Critical discussion of current research literature related to topics of the five core courses in neuroscience graduate curriculum. S/U grading. **210A.** Requisites: courses M201, M202, M203. **210B.** Corequisite: course M204. **210C.** Corequisite: course M205.

**211A-211B-211C. Evaluation of Research Literature in Neuroscience. (2-2-2)** Requisites: courses M201, M202, M203, M204, M205. Advanced critical analysis of current research in neuroscience. S/U grading.

**M212A-M212B-M212C. Evaluation of Research Literature in Neuroengineering. (2-2-2)** (Same as Biomedical Engineering M261A-M261B-M261C.) Discussion, two hours. Critical discussion and analysis of current literature related to neuroengineering research. S/U grading.

**M220. Biology of Learning and Memory. (4)** (Same as Neurobiology M200G.) Lecture, four hours. Molecular, cellular, circuit, systems, neuroanatomy, theory, and models of learning and memory. Cross-disciplinary focus on learning and memory to provide integrative view of subject that emphasizes emerging findings that take advantage of novel groundbreaking models. Letter grading.

**M230. Molecular and Cellular Mechanisms of Neural Integration. (5)** (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour. Requisite: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M233. Mechanisms and Relief of Pain. (2)** (Same as Oral Biology M204.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**M244. Synapses, Cells, and Circuits. (4)** (Same as Neurobiology M200A.) Lecture, three hours; laboratory, two hours. Fundamental topics concerning subcellular, cellular, and structural organization of nervous system. Specific topic areas include neuronal ultrastructure, cellular neurobiology, neuroanatomy, neural circuitry, and imaging. Letter grading.

**M255. Functional Organization of Behavior. (2)** (Same as Psychiatry M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

**M260. Neuromuscular Factors in Movement Regulation. (4)** (Same as Physiological Science M260.) Requisite: Physiological Science 138. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

**M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4)** (Same as Physiological Science M263.) Requisite: Physiological Science CM145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

**M266A-M266B-M266C. Seminars: Cellular Neuroscience. (2 to 4 each)** (Same as Physiological Science M295A-M295B-M295C.) Seminar, two to four hours. Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar. S/U or letter grading.

**M267. Advanced Magnetic Resonance Imaging. (4)** (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

**CM272. Neuroimaging and Brain Mapping. (4)** (Formerly numbered M272.) (Same as Physiological Science M272 and Psychology M213.) Lecture, three hours. Requisites: courses M201, M202. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging. Concurrently scheduled with course C172. Letter grading.

**M273. Neural Basis of Memory. (4)** (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

**274. Computational Neuroscience. (4)** Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

**275. Advanced Techniques in Neurobiology. (2)** Lecture, one hour; laboratory, one hour. Preparation: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Methods in Neuroscience Public Education. (2)** Seminar, one hour; fieldwork, six hours. Designed for juniors/seniors and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

**596. Directed Individual Study or Research. (2 to 12)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Dissertation Research for Ph.D. Candidates. (2 to 12)** Tutorial, to be arranged. Designed for students requiring special instruction or time to work on dissertation. S/U grading.

### Professors

Lina K. Badr, R.N., D.N.Sc., F.A.A.N.  
Chandice Y. Covington, R.N., Ph.D.  
Marie J. Cowan, R.N., Ph.D., F.A.A.N.  
Deborah Koniak-Griffin, R.N., Ed.D., F.A.A.N.  
Mary A. Lewis, R.N., Dr.P.H., F.A.A.N.  
Adeline M. Nyamathi, A.N.P., Ph.D., F.A.A.N.  
Linda P. Sarna, R.N., D.N.Sc., F.A.A.N.  
Gwen M. van Servellen, R.N., Ph.D., F.A.A.N.  
Donna L. Vredevoe, Ph.D.

### Professors Emeriti

Nancy L.R. Anderson, R.N., Ph.D., F.A.A.N.  
Olive Y. Burner, R.N., Ph.D.  
Betty L. Chang, R.N., D.N.Sc., F.A.A.N.  
Barbara A. Davis, R.N., Ed.D.  
Jacquelyn H. Flaskerud, R.N., Ph.D., F.A.A.N.  
Charles E. Lewis, M.D., Sc.D.  
Harriet C. Moidel, R.N., M.A.  
Sharon J. Reeder, R.N., Ph.D., F.A.A.N.  
Maria W. Seraydarian, Ph.D.  
Donna F. Ver Steeg, R.N., Ph.D., F.A.A.N.  
Frances M. Wiley, R.N., M.N.  
Anne K. Wuerker, R.N., Ph.D.

### Associate Professors

Lynn V. Doering, R.N., D.N.Sc.  
Donna K. McNeese-Smith, R.N., Ed.D.  
Mary A. Woo, R.N., D.N.Sc., F.A.A.N.

### Assistant Professors

Jill P. Berg, R.N., Ph.D.  
Teresita L. Briones, R.N., Ph.D.  
Margaret A. Compton, R.N., Ph.D.  
David Elashoff, Ph.D.  
Lorraine S. Evangelista, R.N., Ph.D.  
Marie N. Fongwa, R.N., Ph.D.  
Karen H. Gylis, R.N., Ph.D.  
MarySue V. Heilemann, R.N., Ph.D.  
Janet C. Mentis, R.N., Ph.D.  
Robert K. Oka, R.N., D.N.Sc.  
Wendie A. Robbins, R.N., Ph.D.  
Valda Upenieks, R.N., Ph.D.  
Dorothy J. Wiley, R.N., Ph.D., *in Residence*

### Lecturers

Nancy J. Bush, R.N., M.N., M.A.  
Mary M. Canobbio, R.N., M.N., F.A.A.N.  
Shelly R. Cote, R.N., M.N.  
Lori A. Cutler, R.N., M.N.  
Jan M. Fredrickson, R.N., M.N.  
Young Kee Markham, R.N., M.N.  
Nancy E. McGrath, R.N., M.S.N.  
Susan M. Mortensen, R.N., M.N.  
Josephine D. Ortiz, R.N., M.S.N.  
Dale R. Perry, R.N., M.S.N.  
Deborah A. Rice, R.N., M.N.

### Adjunct Associate Professors

Mary P. Cadogan, R.N., Dr.P.H.  
Anna Gawliński, R.N., D.N.Sc.  
Colleen K. Keenan, R.N.C., Ph.D.

### Adjunct Assistant Professors

Suzette Cardin, R.N., D.N.Sc., F.A.A.N.  
Joan E. Hahn, R.N., D.N.Sc.

## Scope and Objectives

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office,

## NURSING

*School of Nursing*

UCLA  
2-200 Factor Building  
Box 951702  
Los Angeles, CA 90095-1702  
(310) 825-7181  
fax: (310) 206-7433

School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702, or by calling (310) 825-7181 Tuesday through Thursday.

## History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in Nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1969. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The B.S. degree curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's clinical nurse specialist, nurse practitioner, and nurse-midwifery programs have Board of Registered Nursing approval. In 2001, the Commission on Collegiate Nursing Education accredited the baccalaureate and master's degree programs for a term of 10 years.

## Undergraduate Study

### Nursing B.S.

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

### Admission

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on licensure as a registered nurse and a minimum of one year of full-time experience as

an R.N. within the past five years, completion of requisite courses, scholarship, and attainment of a passing score on four Excelsior College Examinations. Students must have grades of C or better in requisite courses and an overall grade-point average of 3.0 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service that reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In addition to the regular *UC Application for Undergraduate Admission and Scholarships* which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

### Degree Requirements

Students must complete 180 quarter units of college work and satisfy the general University requirements as follows:

1. Completion of all required general education courses as specified for completion both prior to admission and/or at UCLA: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), English composition (two courses), mathematics (one course), introductory or general microbiology with laboratory (one course), human nutrition (one course), introductory physics (one course or one year of high school physics with laboratory with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course), and electives as needed
2. Completion of a block of 30 units of credit by examination administered by the Excelsior College Examination Service in Adult Nursing, Fundamentals of Nursing, Maternal and Child Nursing-AD, and Psychiatric/Mental Health Nursing (this unit credit applies to the Nursing major only)
3. Completion of 76 to 88 units of lower and upper division coursework in residence, including Biostatistics 100A, Chemistry and Biochemistry 14A, 14B, 14C, Epidemiology 100, Life Sciences 2, 3, Nursing 102, 104, 190, 192, 193, 195, 196, 200, 220, and one or more courses from 213A,

214F, 216F, 237A, and three 4-unit electives

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

All required nursing courses in the school must be completed with a grade of C or better in each course.

### Study Lists

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

## Honors

### Dean's Honors

To receive Dean's Honors in the School of Nursing, undergraduate students must have at least 12 graded units per term with a grade-point average of 3.75. The honor is posted on the transcript for the appropriate term. Students are not eligible for Dean's Honors in any given term if they receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

### Latin Honors

Latin honors are awarded at graduation to undergraduate students with superior overall grade-point averages. The levels of honors and the requirements for each level are: *summa cum laude*, an overall average of 3.847; *magna cum laude*, 3.748; *cum laude*, 3.598. To be eligible students must have completed at least 98 University of California units for a letter grade. See the *Schedule of Classes* for the most current calculations of Latin honors.

### School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree and the Doctor of Philosophy (Ph.D.) degree in Nursing. A concurrent degree program (Nursing M.S.N./Management M.B.A.) is also offered.

## Nursing

### Upper Division Courses

**102. Professional Nursing in Culturally Diverse Communities.** (5) Lecture, four hours; community experience, one hour. Introductory course to assist registered nurses in transition to professional nursing in context of a complex and dynamic health care system. Analyses include individual and population-based approaches to health care in dynamic multicultural communities. Letter grading.

**104. Theoretical Foundations for Examination of Health Issues in Culturally Diverse Community-Based Settings.** (4) Lecture, three hours; discussion, one hour. Requisite: course 102. Examination of selected theories related to health and illness from a biobehavioral and health systems framework. Current theoretical perspectives as they relate to issues among culturally diverse populations in community-based settings. Focus on relevance and application of each theory and related research for selected culturally diverse groups. Letter grading.

**105. Human Physiology.** (4) Lecture, three hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. P/NP or letter grading.

**M158. Culture, Illness, and Healing.** (4) (Same as Anthropology M168.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

**190. Community Health Nursing.** (8) Lecture, three hours; clinical, 15 hours; clinical conference, 30 minutes. Clinical concentration in multicultural community health nurse settings: public health, rehabilitation, mental health centers, home health, occupational health, and schools. Theoretical content focuses on the community as a context for understanding relationship between health status of individuals and groups with psychosociophysical environment. Letter grading.

**192. Physical Assessment.** (4) Lecture, three hours; laboratory, three hours. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

**193. Introduction to Research.** (4) Lecture, four hours. Introduction to planning a research project based on a simple question. Specific components of research activities analyzed: specific aims and study purposes, variable definition, sample selection, data collection tools, data analyses, and ethical conduct in research studies. Critique of research reports. P/NP or letter grading.

**195. Nursing Management.** (3) Lecture, two hours; field study, three hours. Requisites: courses 102, 104. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in organizational structures and community health care settings. Letter grading.

**196. Issues in Providing Health Care to Culturally Diverse Populations.** (4) Lecture, three hours; discussion, one hour. Open to non-nursing students with consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings. P/NP or letter grading.

**199. Special Studies in Nursing.** (2 to 16) Tutorial, to be arranged. Limited to seniors. Individual study of a problem in the field of nursing. May be repeated for credit, but only 4 units may be applied toward degree requirements. P/NP or letter grading.

### Graduate Courses

**200. Biobehavioral Foundations of Health Assessment.** (4) (Formerly numbered 200A.) Lecture, three hours; field experience. Requisite: course 192 or approved physical assessment course. Theories of health behaviors in relation to assessment of epidemiological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. Letter grading.

**201. Health-Related Quality of Life.** (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

**202. Philosophical Foundations of Science of Nursing.** (4) Lecture, four hours. Designed for Ph.D. students. Intended to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice. S/U or letter grading.

**203. History of Nursing Thought.** (2) Lecture, two hours. Analysis and evaluation of contextual forces which influenced development of discipline of nursing. Examination of nursing's historical influence on socio-political environment. Letter grading.

**204. Research Design and Critique.** (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 193 or equivalent upper division basic research methodology course. Complex research designs and analysis of multiple variables, and research utilization. Emphasis on techniques for control of variables, data analysis, and interpretation of results. Analysis in depth of interrelationship of theoretical frameworks, design, sample selection, data collection instruments, and data analysis techniques. Content discussed in terms of clinical nursing research problems and how these apply to clinical settings. Letter grading.

**205. Advanced Research Methods.** (4) Lecture, four hours. Preparation: one statistics course. Requisites: courses 193, 204. Research process and development of research proposals, including quantitative and qualitative approach to designs. Students encouraged to develop research proposal for clinical or basic research problem related to nursing care or variables affecting such care. Letter grading.

**206A-206B. Nursing Theory Development.** (4-4) Seminar, three hours. Preparation: 4 units of nursing theory. Requisite or corequisite: course 202 or philosophy of science course. Focus on major issues involved in development of nursing knowledge, including content and methods of developing nursing theory. In Progress and S/U or letter grading.

**207. Research in Nursing: Measurement of Clinical Variables.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 204, 205. Introduction to wide array of research designs and measurement techniques for testing clinical nursing phenomena. Emphasis on dynamic interaction between research process and theory, as well as on comparative analyses of various designs, content analysis, use of appropriate controls, sources of error, and sensitivity problems. Letter grading.

**208. Research in Nursing: Measurement of Outcomes.** (4) Lecture/discussion, three hours. Requisites: courses 206A, 207. Measurement theories, including topics related to scaling and tool development. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project. S/U or letter grading.

**209. Human Diversity in Health and Illness.** (2) Lecture, two hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

**211. Theoretical Foundations of Women's Health Care.** (2) Lecture, two hours. Critical evaluation and application of women's health, gynecological and family planning theory, and research and practice guidelines. Health promotion in diverse populations of women integrated within context of management of common health care problems, needs, and deficits. Letter grading.

**211F. Theoretical Foundations of Women's Health Care.** (4) (Formerly numbered C211F.) Lecture, three hours; discussion, one hour. Critical evaluation and application of women's health, gynecological and family planning theory, and research and practice guidelines. Health promotion in diverse populations of women integrated within context of management of common health care problems, needs, and deficits. Letter grading.

**212. Health-Related Family Theory.** (2) (Formerly numbered C212.) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Family is defined broadly to include nontraditional families; consideration of cross-cultural views of families as well. Identification of limitations of current theory and research related to family study and applicability of current knowledge to various problems encountered in care of families. Letter grading.

**213A. Occupational Health Nursing Role and Theory.** (4) (Formerly numbered C213A.) Lecture, four hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Letter grading.

**213B. Health Assessment, Research, and Health Promotion in Occupational Health.** (3) (Formerly numbered 213C.) Lecture, three hours. Requisite: course 213A. Clinical practice issues in occupational health nursing, including adult workforce health issues, adult workforce health assessment, and special populations at risk. Health promotion and research in occupational health. Letter grading.

**214. Human Responses to Cancer.** (2) Lecture, two hours. Synthesis of cancer-related research and theory of principles of cancer, cancer prevention, screening, diagnosis, staging, treatment, symptom management, rehabilitation, and quality of life, with application to advanced oncology nursing practice. Assessment and evaluation of selected clinical oncology resources in community. Development of research-based clinical paper. Letter grading.

**214F. Human Responses to Cancer.** (4) (Formerly numbered C214F.) Lecture, three hours; selected field experiences. Synthesis of cancer-related research and theory of principles of cancer, cancer prevention, screening, diagnosis, staging, treatment, symptom management, rehabilitation, and quality of life, with application to advanced oncology nursing practice. Assessment and evaluation of selected clinical oncology resources in community. Development of research-based clinical paper. Letter grading.

**215. Human Responses to Cancer.** (2) Lecture, three hours. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention, screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Letter grading.

- 215F. Human Responses to Cancer. (4)** (Formerly numbered C215F.) Lecture, three hours; selected field experiences. Requisite: course 214F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention, screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Letter grading.
- 216. Human Responses to Critical Illness. (2)** Lecture, two hours. Biobehavioral theories and research of acute and critical illness. Nursing aspects of selected dysfunctions and implications for acute care advanced practice nurses. Letter grading.
- 216F. Human Responses to Critical Illness. (4)** (Formerly numbered C216F.) Lecture, three hours; discussion, one hour. Biobehavioral theories and research of acute and critical illness. Nursing aspects of selected dysfunctions and implications for acute care advanced practice nurses. Letter grading.
- 217. Human Responses to Critical Illness. (2)** Lecture, two hours. Requisite: course 216. Builds on pathophysiologic concepts and nursing management of acutely and critically ill adults presented in course 216. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for acute care advanced practice nurses. Letter grading.
- 217F. Human Responses to Critical Illness. (4)** (Formerly numbered C217F.) Lecture, three hours; discussion, one hour. Requisite: course 216F. Builds on pathophysiologic concepts and nursing management of acutely and critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for acute care advanced practice nurses. Letter grading.
- 218A. Nursing Administration Theory. (4)** Lecture, four hours. Requisites: courses 219A, 219B. Synthesis and evaluation of organizational theory in leadership and management of health care organizations, with emphasis on organizational structure, processes, and outcomes. Letter grading.
- 218B. Nursing Administration Theory. (4)** Lecture, four hours. Requisite: course 218A. Focus on synthesizing organizational and management theories in relation to strategic planning and management, changing care delivery systems, human and financial resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.
- 218C. Nursing Administration Theory. (4)** Lecture, four hours. Requisite: course 218B. Project management, organizational communication, governance, development and change, diverse relationships within the organization, risk management, liability, and ethics of administration decision making. Emphasis on issues affecting local, national, and international health care management. Letter grading.
- 218D. Nursing Administration Theory. (4)** Lecture, four hours. Requisite: course 218C. Community health care needs, political action and health care policy, marketing, and media. Planning for future continuous personal and professional growth. Emphasis on issues affecting local, national, and international health care management and policy development. Letter grading.
- 219A. Essentials of Accounting and Budgeting in Health Care Organizations. (4)** Lecture, four hours. Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on definition of terms and concepts, followed by practical applications within a variety of health care settings. Letter grading.
- 219B. Operations Planning and Control for Nursing Administrators. (4)** Lecture, four hours. Requisite: course 219A. Concepts, issues, and analytic techniques of budget formulation, decision making, variance analysis, financing in health care, models for forecasting productivity determinations, and program planning and evaluation for nurse administrators. Emphasis on practical methods and techniques within wide variety of health care situations. Letter grading.
- 220. Theories of Instruction and Learning in Nursing. (3)** (Formerly numbered C220.) Lecture, two hours; computer practice, one hour. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Examination of educator role of advanced practice nurse in variety of settings and with diverse cultural and socioeconomic groups. Opportunities provided for skill development in use of computer-based information systems and development of instructional aids. Letter grading.
- 222. Immunosuppression and Patient Care. (2)** Lecture, two hours. Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on physiologic and pathophysiologic mechanisms of immunosuppression as a basis for information used in patient education and clinical decisions, and supportive treatments and modifiers. Letter grading.
- 223. Childhood Development: Research and Application to Nursing. (2)** (Formerly numbered C223.) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Letter grading.
- 224. Health-Related Problems of Vulnerable Populations. (2)** Lecture, two hours. Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S. Letter grading.
- 225. Pharmacology for Advanced Practice Nurses. (4)** Lecture, four hours. Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions. Letter grading.
- 226. Theory Development for Biological Sciences. (4)** Lecture, four hours. Requisites: courses 206A, 206B. Survey course to explore ways in which physiologic theory (including systems, genetics, genetic toxicity, infection, immune and autonomic responses, cellular injury and death, and signal transduction theory) informs nursing investigations. Exemplars of nurse scientists who reformulate physiologic theory to address nursing research questions and nursing interpretations of physiologic theory. Letter grading.
- 229. Biologic/Psychologic Interface in Health and Illness. (2)** Lecture, two hours. Interaction of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of gender, ethnicity, and culture. Letter grading.
- 230. Advanced Pathophysiology. (4)** (Formerly numbered C230.) Lecture, four hours. Requisite: course 105 or equivalent taken within past five years. In-depth examination of pathophysiological processes that underlie human illness and disease, with detailed study of these in major body systems. Examination of manifestations of and responses to processes of cellular and molecular pathology at extracellular, system, and human levels. Letter grading.
- 231. Special Topics in Cellular Physiology. (2)** Lecture, two hours. Requisite: course 230. Designed for graduate nursing students. Functional organization and genetic control of human cell. Letter grading.
- 232. Human Responses to Aging and Chronic Illness. (2)** Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of older adults who are healthy or who have disability and/or chronic illness. Nursing aspects of selected dysfunctions and implications for advanced practice in gerontological nursing. Letter grading.
- 232F. Human Responses to Aging and Chronic Illness. (4)** (Formerly numbered C232F.) Lecture/discussion, four hours. Pathophysiologic concepts and nursing management of older adults who are healthy or who have disability and/or chronic illness. Nursing aspects of selected dysfunctions and implications for advanced practice in gerontological nursing. Letter grading.
- 233. Human Responses to Aging and Chronic Illness. (2)** Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiologic aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.
- 233F. Human Responses to Aging and Chronic Illness. (4)** Lecture/discussion, four hours. Biopsychosocial concepts and nursing management of healthy, disabled, and/or chronically ill older adults, addressing pathophysiologic aspects of common health problems. Implications for advanced practice in gerontological nursing. Letter grading.
- 235. Reproductive Endocrinology. (2)** Lecture, two hours. Requisite: course 105. Recommended: course 230. Current theory and research related to systematic evaluation of normal reproductive physiology. Highlights human growth and development, sexual differentiation, menstrual cycle, hormonal aspects of puberty, male and female reproduction, placenta, parturition, postpartum period, lactation, and menopause. Letter grading.
- 237A. Primary Care of Women: Antepartum Management. (4)** (Formerly numbered C237A.) Lecture, four hours. Presentation of theory and research on assessment and management of women during pregnancy, with emphasis on current nursing models of primary and independent/collaborative care of women/families during antepartum period. Review of management of normal pregnancy and health and social complications. Letter grading.
- 237B. Primary Care of Women: Intrapartum and Postpartum Management. (4)** (Formerly numbered 237C.) Lecture, four hours. Requisite: course 237A. Biologic and behavioral issues pertinent to care of women during labor, birth, and postpartum, including analysis of relevant research and critical thinking/decision making in clinical management. Presentation of content as outlined in ACNM Core Competencies, "Care of Childbearing Family," Sections IIC and D. Letter grading.
- 237C. Theoretical Foundations of Health Assessment of Women: Primary Care. (4)** (Formerly numbered 237B.) Lecture, four hours. Requisite: course 237B. Application of current theory, research, and knowledge relevant to assessment and management of common health problems in women, with emphasis on physiologic, psychosocial, and behavioral factors and on nurse-midwifery management process. Systematic evaluation of current nursing conceptual models in independent and collaborative primary care of women. Letter grading.
- 237D. Primary Care of Women: Advanced Nurse-Midwifery Management. (4)** Lecture, four hours. Requisites: courses 237A, 237B, 237C, 238A (2 units). Builds on previous core and nurse-midwifery coursework, with focus on management of complex antepartum, intrapartum, and postpartum situations and on comanagement or referral as necessary. Basic theory of obstetric ultrasonography and appropriate use of ultrasound information in pregnancy and parturition. Exploration of nurse-midwifery professional issues at local, state, and national levels in accordance with professional organization guidelines. Letter grading.
- 238A. Theoretical Foundations of Nursing of Children: Assessment and Health Guidance. (2 or 4)** Lecture, four hours. Requisite: course 200. Theory and research emphasize interaction among developmental level, family characteristics, and environmental milieu as it affects child well-being. Advanced science base for assessment and anticipatory guidance for children and families to promote child wellness and diagnose common childhood illnesses. Letter grading.

**238B. Theoretical Foundations of Nursing of Children: Common Illnesses and Problems. (2 or 4)** Lecture, four hours. Requisite: course 238A. Theory and research emphasize physiological and psychological basis for common childhood illnesses and problems; evaluation of alternative therapies in research literature also emphasized. Advanced science base for assessment, diagnosis, and management of common childhood illnesses and problems. Letter grading.

**238C. Theoretical Foundations of Nursing of Children: Complex Health Problems. (4)** Lecture, four hours. Requisite: course 238B. Advanced science base for assessment, diagnosis, and ambulatory management of complex chronic and acute childhood illnesses. Theory and research emphasize physiological basis for complex disease entities; evaluation of alternative therapies in research literature also emphasized. Letter grading.

**239A. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 230. Organ systems approach to acuity and chronicity in syndromes related to respiratory, cardiovascular, dermatologic, and genitourinary organ systems and selected content in oncology. First of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**239B. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 239A. Organ systems approach to acuity and chronicity in syndromes related to endocrine, gastrointestinal, and neurological systems and selected content in oncology. Second of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**239C. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4)** Lecture, four hours. Requisite: course 239B. Organ systems approach to acuity and chronicity in syndromes related to musculoskeletal and hematological disorders, HIV/AIDS, and vestibular system. Third of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by advanced practice nurses and nurse practitioners in variety of clinical settings. Letter grading.

**241. Biobehavioral Foundations of Neuropsychiatric Assessment. (2)** Lecture, two hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application of neuropsychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

**241F. Biobehavioral Foundations of Neuropsychiatric Assessment. (4)** Lecture, four hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application of neuropsychiatric assessment and diagnosis. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a behavioral nursing approach. Letter grading.

**242. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (2)** Lecture, two hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

**242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4)** Lecture, four hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a biobehavioral nursing approach. Letter grading.

**243. Theoretical Foundations of Complementary Health Care I. (2)** Lecture, two hours. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

**243F. Theoretical Foundations of Complementary Health Care I. (4)** Lecture, four hours. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

**244. Theoretical Foundations of Complementary Health Care II. (2)** Lecture, two hours. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

**244F. Theoretical Foundations of Complementary Health Care II. (4)** Lecture, four hours. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

**245. Theoretical Foundations of Clinical Nurse Specialist Practice. (4)** Lecture/discussion, four hours. Theoretical foundations of clinical nurse specialist practice, including systems theory, behavioral theories, consultation theory, change theory, and models of research utilization. Emphasis on application of relevant theories to clinical nurse specialty practice roles in health care systems through case-study analysis, with focus on application to clinical practice settings which include culturally diverse populations. Letter grading.

**264. Professional Issues in Nursing. (3)** Lecture, three hours. Requisite: course 418A or 437A or 438A or 439A. Assessment of organizational, legal, ethical, and health care policy issues in relation to delivery of health care services by advanced practice nurses in evolving health care system. Letter grading.

**M273. Advanced Seminar: Medical Anthropology. (2 to 4)** (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

**M290A-M290B-M290C. Child Abuse and Neglect. (2-2-1)** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300A-M300B-M300C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Social Welfare M203F-M203G-M203H.) Lecture, two hours. Course M290A is requisite to M290B, which is requisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. Letter grading.

**299A. Nursing Research Seminar. (4)** Seminar, three hours. Requisites: courses 206A, 206B, 207, 208. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights practical experience of faculty in assuring scientific integrity while conducting research, culminating in communication and dissemination of their research. S/U grading.

**299B-299C. Nursing Research/Laboratory Experiences. (4-4)** Seminar/discussion, one hour; research/laboratory, three hours. Requisites: courses 202, 206A, 206B. Seminars and research/laboratory-based experiences to assist students to prepare for careers as scientists, with focus on research methodology and mentorship. S/U grading.

**299D. Nursing Education Seminar. (1 to 4)** Seminar, one hour; discussion, one to four hours. Requisites: courses 206A, 206B, 207, 208, 220. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**418A. Nursing Administration Practicum. (3 or 4)** Clinic practicum, eight or 11 hours; clinical conference, one hour. Requisites: courses 219A, 219B. Synthesis, evaluation, and practical application of organizational theory in practice setting, with emphasis on content presented in course 218A, including organizational structure, processes, and outcomes. Letter grading.

**418B. Nursing Administration Practicum. (3 or 4)** Clinic practicum, eight or 11 hours; clinical conference, one hour. Requisites: courses 218A, 418A. Experience in organizational setting for synthesizing content from course 218B, including strategic planning and management, care delivery systems, resource management, decision making, management information systems, professional practice, and meeting accreditation and legal standards. Letter grading.

**418C. Nursing Administration Practicum. (3 or 4)** Clinic practicum, eight or 11 hours; clinical conference, one hour. Requisites: courses 218B, 418B. Experience in organizational setting for synthesizing and evaluating content from course 218C, including processes of project management, organizational communication, governance, development and change, diverse relationships within organization, risk management, liability, and ethics of administration decision making. Letter grading.

**418D. Nursing Administration Residency. (12)** Clinic practicum, 33 hours; clinical conference, one hour. Requisites: courses 218C, 418C. Experience in organization setting as students assume leadership role in planning, managing, and evaluating an administrative project. Synthesizing of content from course 218D, including assessing community health care needs, marketing, media, and political action and health care policy. Letter grading.

**434. Nurse-Midwifery Clinical Practicum. (4)** Clinic, 12 hours. Requisite: course 237C. Building on previous core and nurse-midwifery coursework, focus on application of principles of health assessment and primary care of women, with emphasis on physiologic, psychosocial, and behavioral factors and on clinical components of nurse-midwifery process. Use of critical analysis in data collection, assessment, diagnosis, treatment, and counseling in clinical settings. Letter grading.

**437A. Nurse-Midwifery Clinical Management I. (2)** Clinic, five hours; clinical conference, one hour. Preparation: completion of physical assessment course. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on counseling and screening for prevention and early detection of common risk conditions that may complicate prenatal period. Letter grading.

**437B. Nurse-Midwifery Clinical Management II. (4)** (Formerly numbered 437C.) Clinic, 12 hours. Corequisite: course 237B. Application of current theory, research, and knowledge relevant to nurse-midwifery management of childbearing family during intrapartum and postpartum periods and continued practice of previous clinical content. Clinical practice of intrapartum, postpartum, and professional competencies as outlined in ACNM Core Competencies. Letter grading.

**437C. Nurse-Midwifery Clinical Management III. (4)** (Formerly numbered 437B.) Clinic, 12 hours. Corequisite: course 237C. Synthesis of previous course and clinical work and continued practice of assessment and management of childbearing family and newborn. Emphasis on development of expanded skills in comprehensive assessment of health problems, including elements of primary care that focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

**437D. Nurse-Midwifery Clinical Management IV. (6)** Clinic, 18 hours. Requisite: course 437C. Corequisite: course 237D. Synthesizing previous course and clinical work, students continue to practice assessment and management of childbearing family. Emphasis on management of complications in antepartal, intrapartum, and postpartum periods, interpretation and utilization of ultrasonography in clinical settings, and performance of limited third-trimester ultrasound examinations. Letter grading.

**437E. Nurse-Midwifery Clinical Management V. (4)** Clinic, 11 hours; clinical conference, one hour. Corequisite: course 211F. Primary care for gynecology, family planning, sexually transmitted diseases, and premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling applied in clinical experiences, case studies, and skills laboratories. Letter grading.

**437F. Nurse-Midwifery Integration. (8)** Clinic, 24 hours. Requisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the childbearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant). Letter grading.

**438A. Advanced Practice Nursing in Care of Children: Wellness Care. (4)** Clinic practicum, 12 hours. Corequisite: course 238A. Development of expanded skills in comprehensive assessment and provision of anticipatory guidance for children and families to promote child wellness. Application of theory and research in provision of wellness care throughout childhood years. Letter grading.

**438B. Advanced Practice Nursing in Care of Children: Management of Common Illnesses. (6)** Clinic practicum, 18 hours. Corequisite: course 238B. Development of expanded skills in comprehensive assessment and management of common childhood illnesses and problems; students continue to gain skills in promoting child wellness. Application of theory and research in care of common illnesses throughout childhood years. Letter grading.

**438C. Advanced Practice Nursing in Care of Children: Management of Complex Health Problems. (6)** Clinic practicum, 18 hours. Corequisite: course 238C. Development of expanded skills in assessment and ambulatory management of complex acute and chronic childhood illnesses. Application of theory and research in provision of care for complex acute and chronic illnesses throughout childhood years. Letter grading.

**438D. Pediatric Primary Care: Residency. (8)** Clinic practicum, 24 hours. Requisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems. Letter grading.

**439A. Advanced Practice Nursing: Clinical Practicum. (4)** Clinic practicum, 12 hours. Corequisite: course 239A. Advanced practice nursing in acute care, family, gerontology, occupational and environmental health, and oncology. Nursing management and evaluation of health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

**439B. Advanced Practice Nursing: Clinical Practicum. (6)** Clinic practicum, 18 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

**439C. Advanced Practice Nursing: Clinical Practicum. (6)** Clinic practicum, 18 hours. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms and complex patient/family presentations. Analysis, evaluation, and integration of current theory and research to provide basis for development of interventions and treatment for acute and chronic problems across life span. Letter grading.

**439D. Advanced Practice Nursing: Residency. (8)** Clinic practicum, 24 hours. Requisites: courses 239C, 439C. Residency in advanced practice role where students assume primary responsibility for planning, managing, and evaluating care of clients in specialty setting. Emphasis on application and integration of theory, research, and clinical knowledge in advanced practice role. Letter grading.

**440. Advanced Assessment and Clinical Diagnosis Practicum. (2)** Laboratory/clinic practicum, six hours. Practice foundations for advanced physical assessment and clinical diagnostic reasoning. Students conduct individualized patient- and symptom-focused assessments of health problems representative of diverse client populations. Emphasis on comprehensive and integrated critical analysis of symptom and focused history data, physical examination, selected laboratory data, and clinical diagnoses. Letter grading.

**441. Neuropsychiatric Subspecialty Clinical Seminar. (1)** Clinical seminar, one hour; self-study, two hours. Requisites: courses 241F, 242F. Designed for advanced practice nurses in any nurse practitioner specialty. Neuropsychiatric assessment, treatment, and case presentations in selected populations with addictive, affective, and cognitive dysfunctions in relation to neurophysiology and pathology and to family, social, and cultural structures. S/U grading.

**442. Neuropsychiatric Subspecialty Clinical Seminar. (1)** Clinical seminar, one hour; self-study, two hours. Requisite: course 441. Designed for advanced practice nurses in any nurse practitioner specialty. Continuation of course 441. S/U grading.

**445. Advanced Practice Nursing: Clinical Nurse Specialty Practicum. (4 or 8)** Clinic practicum, 12 or 24 hours. Requisite: course 245. Practicum/residency in clinical nurse specialty role where students gain experience in expert clinical practice, consultation, education, leadership/change management, and research/research utilization. Emphasis on application and integration of theory, research, and clinical knowledge to goals of multidisciplinary health care systems. Letter grading.

**501. Cooperative Program. (2 to 8)** Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than 8 units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated for credit, but only 4 units may be applied toward graduate degree requirements. S/U grading.

**597. Individual Study for Comprehensive Examination. (4 to 8)** Tutorial, to be arranged. Opportunity for individual graduate nursing students to prepare for comprehensive examination. May be repeated once for credit, but only 4 units may be applied toward M.S.N. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student's chair. May be repeated for credit, but only 8 units may be applied toward Ph.D. degree requirements. S/U grading.

## OBSTETRICS AND GYNECOLOGY

David Geffen School of Medicine

UCLA  
27-117A Center for the Health Sciences  
Box 951740  
Los Angeles, CA 90095-1740

(310) 794-1918  
<http://www.obgyn.mednet.ucla.edu>

### Chairs

Gautam A. Chaudhuri, M.D., Ph.D., *Executive Chair*  
Jonathan S. Berek, M.D., M.M.Sc., *Executive Vice Chair*  
Teichiro Fukushima, M.D., *Vice Chair, King/Drew*  
Howard L. Judd, M.D., *Vice Chair, Olive View-UCLA*  
Ricardo Aziz, M.D., *Vice Chair, Cedars-Sinai*  
Michael G. Ross, M.D., *Vice Chair, Harbor-UCLA*

### Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see <http://www.obgyn.medsch.ucla.edu>.

## OPHTHALMOLOGY

David Geffen School of Medicine

UCLA  
2-142 Jules Stein Eye Institute  
Box 957000  
Los Angeles CA 90095-7000  
(310) 825-5053

### Chairs

Bartly J. Mondino, M.D. (*Bradley R. Straatsma, M.D. Endowed Professor of Ophthalmology*), *Chair*  
Sherwin J. Isenberg, M.D. (*Grace and Walter Lantz Endowed Professor*), *Vice Chair, Harbor-UCLA*  
Arthur L. Rosenbaum, M.D., *Vice Chair*

## Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see <http://www.jsei.org/Education/index.htm>.

Jacob Fleischmann, M.D.  
Susan A. Haake, D.M.D., M.D.S., Ph.D.  
Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.  
Wenyuan Shi, Ph.D.  
Igor Spigelman, Ph.D.

### Assistant Professors

George Huang, D.D.S., M.S.D., D.Sc.  
Anahid Jewett, M.P.H., Ph.D.

### Adjunct Professors

Carol A. Bibb, Ph.D., D.D.S.  
Bernard G. Sarnat, M.D., M.S., D.D.S.

### Adjunct Associate Professor

Diana Messadi, D.D.S., Ph.D.

### Adjunct Assistant Professor

Shen Pang, Ph.D.

## Scope and Objectives

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Section of Oral Biology in the School of Dentistry offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Oral Biology. A combined D.D.S./Oral Biology M.S. or Ph.D. or advanced certificate training/Oral Biology M.S. or Ph.D. is also offered.

## Oral Biology

### Graduate Courses

**201A-201B-201C. Advanced Oral Biology. (3-2-3)**  
Lecture, three hours/two hours/three hours:

**201A.** Ontogenesis. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans. S/U or letter grading.

**201B.** Homeostasis in Oral Systems. (2) Lecture, two hours. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonspecific salivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face. Letter grading.

**201C.** Pathobiology. (3) Lecture, three hours. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

**M203. Oral Embryology and Histology. (4)** (Same as Neurobiology M229.) Lecture, four hours. Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues. Letter grading.

**M204. Mechanisms and Relief of Pain. (2)** (Same as Neuroscience M233.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**205. Methodology in Research Design and Data Analysis. (4)** Lecture, two hours; discussion, one hour; computer laboratory, one hour. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their Ph.D. research.

**206. Current Topics in Oral Immunology. (1)** Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc.

**209. Scientific Ethics. (2)** Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

**211. Biology of the Temporomandibular Joint. (2)** Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

**215. Fundamentals of Immunology. (2)** Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmunity, cancer, and immunodeficiency syndromes.

**226A-226B. Craniofacial Growth and Development. (2-2)** Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

**227. Dental Embryology and Histology. (2)** Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

**228. Dental Pharmacology and Therapeutics. (2)** Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

**M234. Seminar: Developmental Neuroendocrine-immunology. (2)** (Same as Neurobiology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**260. Oral Biology Seminar. (2)** Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

**273. Research in Clinical Immunology and Lymphology. (2)** Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

**275. Molecular and Cell Biology for Oral Biology Graduate Students. (3)** Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research.

**596. Directed Individual Study or Research. (2 to 8)** Tutorial, to be arranged. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations. (4 to 8)** Tutorial, to be arranged. S/U grading.

**598. Thesis Research and Preparation. (2 to 8)** Tutorial, to be arranged. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation. (4 to 8)** Tutorial, to be arranged. S/U grading.

Albert A. Barber, Ph.D.  
George A. Bartholomew, Ph.D.  
Joseph Cascarano, Ph.D.  
Nicholas E. Collias, Ph.D.  
Wilbur T. Ebersold, Ph.D.  
Eric B. Edney, Ph.D.  
Franz Engelmann, Ph.D.  
Thomas R. Howell, Ph.D.  
J. Lee Kavanau, Ph.D.  
F. Harlan Lewis, Ph.D.  
O. Raynal Lunt, Ph.D.  
Austin J. MacInnis, Ph.D.  
Leonard Muscatine, Ph.D.  
Richard W. Siegel, Ph.D.  
Henry J. Thompson, Ph.D.  
Peter P. Vaughn, Ph.D.

### Associate Professors

Peggy M. Fong, Ph.D.  
David K. Jacobs, Ph.D.  
Peter N. Nonacs, Ph.D.  
Richard R. Vance, Ph.D.

### Assistant Professors

Daniel T. Blumstein, Ph.D.  
Gregory F. Grether, Ph.D.  
Nicolas Gruber, Ph.D.  
Jonathan M. Levine, Ph.D.  
Rebecca F. Shipe, Ph.D.

### Adjunct Professor

Jon E. Keeley, Ph.D.

### Adjunct Associate Professors

John E. Heyning, Ph.D.  
Joel W. Martin, Ph.D.

### Adjunct Assistant Professors

David A. Kizirian, Ph.D.  
Raymond M. Sauvajot, Ph.D.

## Scope and Objectives

Organismic biology touches every aspect of modern life, and understanding how living organisms are adapted to their environments is the major challenge of the discipline. To meet this challenge, the Department of Organismic Biology, Ecology, and Evolution offers undergraduate and graduate instruction at all levels of biology — from regulatory and physiological processes within organisms through the natural ecology and behavior of living organisms and to the population and community dynamics of multiple species. All of these subject areas address practical problems facing the world today, and all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

## Undergraduate Study

Students may earn a Bachelor of Science degree in one of four different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; Marine Biology; and Plant Biology. The majors build on similar lower division introductory courses and differ primarily in the upper division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects and for students who later seek admission to health sciences-related professional schools. The remaining three majors — Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

## Biology B.S.

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* Two morphology and systematics/ecology, behavior, and evolution courses (Mi-

crobiology, Immunology, and Molecular Genetics 101, 101L, Organismic Biology, Ecology, and Evolution 103, 105, 110, 116, 120, 122, C126, 129, 130, C135, 136); two developmental and molecular biology/physiology courses (Molecular, Cell, and Developmental Biology 138, C141, 144, 171, Organismic Biology, Ecology, and Evolution 121, 128, C134A or 134B, 146, M158, 162, M166, 167, 179); two additional upper division courses in molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193) or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192); Chemistry and Biochemistry 153A, 153L; three additional upper division courses in atmospheric sciences (one course from Atmospheric Sciences 101, 102, 104, or 130), chemistry, mathematics (except Mathematics 106), microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I), physics, physiological science (except Physiological Science 193, 195A, 195B, 196), or from Biomathematics 110, Biostatistics 100B, Earth and Space Sciences 116, Geography 112, Psychology 115. Courses selected must include two laboratory courses (Organismic Biology, Ecology, and Evolution 101, 103, 105, 110, 136, M158, 162, M166, 167, 181).

A maximum of 8 units of the Organismic Biology, Ecology, and Evolution 190 series or 4 units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Ecology, Behavior, and Evolution B.S.

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or

31A, 31B, and 32A (31A, 31B, and 32A must be taken to satisfy the calculus requirement); Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Ecology, Behavior, and Evolution majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* One morphology and systematics course (Organismic Biology, Ecology, and Evolution 103, 105, 110, or 130); one physiology course (Organismic Biology, Ecology, and Evolution 146, 162, M166, or 167); one additional laboratory course (Organismic Biology, Ecology, and Evolution 103, 105, 110, 136, 146, 162, M166, 167, or 181); three ecology, behavior, and evolution courses (Organismic Biology, Ecology, and Evolution C119, 120, 122, 129, C135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; Chemistry and Biochemistry 153A, 153L; two or more upper division courses in chemistry, geography, geology, mathematics (except Mathematics 106), microbiology, organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I), or physics (recommended: taxon-oriented courses such as Organismic Biology, Ecology, and Evolution 111, 112, 113A, 114, C115, 152; other courses in ecological, behavioral, and evolutionary processes such as Organismic Biology, Ecology, and Evolution 116, 117, 122, M127, 128, C134A, in addition to courses listed above).

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a high grade-point average.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in

each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As prerequisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109 or C215 prior to applying for the Marine Biology Quarter.

## Marine Biology B.S.

The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for post-graduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Earth and Space Sciences 15 or Atmospheric Sciences 6 or 6A; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Marine Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

#### The Major

*Required:* Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution C109; one laboratory course (Organismic Biology, Ecology, and Evolution 110, M158, or

181); one marine organismic biology course (Organismic Biology, Ecology, and Evolution 101, 105, 112, or 137); one physiology course (Organismic Biology, Ecology, and Evolution 128, 162, M166, 167, or 179); one ecology, behavior, and evolution course (Organismic Biology, Ecology, and Evolution 116, C119, 120, 122, 129, C135, or 136); one field quarter consisting of four courses from the Marine Biology Quarter (MBQ) or equivalent field studies given elsewhere (for a 16-unit equivalent, see undergraduate adviser); two physical, chemical, or geological oceanography courses from Atmospheric Sciences 102, 103, 104, 130, Chemistry and Biochemistry 103, Earth and Space Sciences 100, 116, 119, 153, Geography 100, 101, 103, 123, 130, Mechanical and Aerospace Engineering 103 (strongly recommended), 150A.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109 or C215 prior to applying for the Marine Biology Quarter.

## Plant Biology B.S.

The Plant Biology major prepares students for postgraduate programs and careers in plant biology, including environmental biology, ecology, agricultural sciences, plant physiology, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to participate in individual supervised research projects using plants as experimental organisms.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Organismic Biology, Ecology, and Evolution M22.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade below C– in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### Transfer Students

To be admitted as Plant Biology majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

### The Major

*Required:* Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution 146 or 162; one laboratory course (Organismic Biology, Ecology, and Evolution 101, 103, 105, 110, M158, 162, M166, or 167); one plant morphology or anatomy course (Organismic Biology, Ecology, and Evolution 101, 103, or 152); two molecular or cellular plant biology courses (Molecular, Cell, and Developmental Biology C141, C150, M170, Organismic Biology, Ecology, and Evolution 121); one ecology or evolution course (Organismic Biology, Ecology, and Evolution 120, 122, 128, or 130); one field quarter course involving research in plant biology (Organismic Biology, Ecology, and Evolution 118, 124, 128, or 148) or a laboratory internship (Organismic Biology, Ecology, and Evolution 190 series or 199) which requires a written paper on some aspect of plant research; two additional upper division courses in chemistry, computer science, geography, microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I).

A maximum of 8 units of the Organismic Biology, Ecology, and Evolution 190 series or 4 units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Plant Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

### Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some

combination of Organismic Biology, Ecology, and Evolution 103, 113B, 114, C115, 118, 124, C125, C126, 131, 132, and 134B. The Marine Biology Quarter occurs during Fall Quarter and includes some combination of Organismic Biology, Ecology, and Evolution 102, C104, 106, 123, 147, 148, 163, 164, and 165. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Fall or Winter Quarter. Information and applications are available in the Undergraduate Advising Office.

### Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Organismic Biology, Ecology, and Evolution 190A and 190B.

### Computing Specialization

Majors in Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B, Geography 168, Organismic Biology, Ecology, and Evolution C159, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

### Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Organismic Biology, Ecology, and Evolution offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Biology.

# Organismic Biology, Ecology, and Evolution

## Lower Division Courses

**10. Plants and Civilization. (4)** Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history. P/NP or letter grading.

**11. Biomedical Research Issues in Minority Communities. (5)** Discussion, four hours. Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

**12. Biodiversity and Extinction: Crisis and Conservation. (4)** Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

**13. Evolution of Life. (4)** Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes. P/NP or letter grading.

**21. Field Biology. (4)** Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: Life Sciences 15. Not open for credit to students with credit for course 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals. P/NP or letter grading.

**25. Marine Biology. (5)** Lecture, three hours; discussion, two hours; field trips, two hours. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms. P/NP or letter grading.

**50. Desert Life. (4)** Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

**97. Selected Topics in Organismic Biology, Ecology, and Evolution. (1 to 4)** Seminar, one to three hours. Current issues in research in organismic biology, ecology, and evolution. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

## Upper Division Courses

**100. Introduction to Ecology and Behavior. (5)** Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1. Not open for credit to students with credit for course 118, 119, 122 through C126, 129, 131 through 134B, 136, C151A, C151B, 154, CM189A, or CM189B. Introduction to methods and topics in ecology and behavior. Growth and regulation of populations, organization of communities and ecosystems, biogeography, and behaviors animals use to find food, choose mates, and interact in social groups. Understanding scientific method, critical evaluation of research papers, and development of scientific writing skills. Letter grading.

**101. Marine Botany. (6)** (Formerly numbered 101A.) Lecture, four hours; laboratory, six hours; three to four field trips. Requisite: Life Sciences 1. Introduction to biology and ecology of marine plants, including algae, sea grasses, and mangroves, with focus on form and function of marine plants and their ecological role in different marine habitats and ecosystems. Letter grading.

**102. Biology of Marine Invertebrates. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates. Given off campus at a marine science center.

**103. Plant Evolution and Systematics. (5)** Lecture, three hours; laboratory, three hours; field trip. Requisites: Life Sciences 1, 2, 3, 4. Evolution, systematics, morphology, principles of taxonomy, phytogeography, phylogenetic analysis, speciation, and natural history of plants. P/NP or letter grading.

**C104. Experimental Invertebrate Zoology. (6)** Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

**105. Biology of Invertebrates. (6)** Lecture, three hours; laboratory/field trips, six hours. Requisite: Life Sciences 1. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

**106. Experimental Marine Invertebrate Biology. (4 or 6)** Lecture, two hours; laboratory, 12 hours. Requisites: courses 105, and M166 or 167 (either may be taken concurrently). Offered either as a 6-unit quarter-long course or as a 4-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

**C107. Evolution, Development, and Function of Invertebrate Animals. (6)** Lecture, three hours; laboratory, three hours; three weekend field trips. Requisite: course 105 or completion of Marine Biology Quarter. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and form and function as they relate to marine invertebrates. Concurrently scheduled with course C207. Letter grading.

**C109. Introduction to Marine Science. (4)** Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

**110. Vertebrate Morphology. (6)** Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, 3, 4. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

**111. Biology of Vertebrates. (5)** Lecture, three hours; laboratory, three hours; four one- to two-day field trips. Requisite: Life Sciences 1. Adaptations, behavior, and ecology of vertebrates. Letter grading.

**112. Ichthyology. (6)** Lecture, three hours; laboratory, six hours; field trips. Requisite: Life Sciences 1. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams. Letter grading.

**113A. Herpetology. (5)** Lecture, three hours; laboratory, three hours; field trips, three and one half days per term. Requisite: Life Sciences 1. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering current systematics, ecology, behavior, morphology, and physiology of these animals. Letter grading.

**113B. Field Herpetology. (8)** Requisite: Life Sciences 1. Recommended: course 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

**114. Ornithology. (5)** Lecture, three hours; laboratory/field trips, three hours. Requisite: course 111. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds. P/NP or letter grading.

**C115. Mammalogy. (5)** Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C213. Letter grading.

**116. Conservation Biology. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues.

**117. Evolution of Vertebrates. (5)** Lecture, three hours; laboratory, three hours. Requisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods. P/NP or letter grading.

**118. Plant Adaptations. (8)** Lecture, one hour; field trip, 10 hours. Preparation: completion of preparation for the major courses. *Five-week course offered only as part of Field Biology Quarter*. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration.

**C119. Mathematical Ecology. (4)** Lecture, three hours. Requisite: Mathematics 32A. Analytical and numerical exploration of differential equation models to study properties and dynamics of individual organisms, single-species populations, multispecies communities, and integrated ecosystems in natural and disturbed environments. Concurrently scheduled with course C219. Letter grading.

**C119L. Mathematical Ecology Laboratory. (2)** Laboratory, two hours. Corequisite: course C119. Formal instruction in Mathematica software used to provide powerful and versatile tool to solve diverse quantitative problems in ecology and life and physical sciences. Concurrently scheduled with course C219L. Letter grading.

**120. Evolution. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Recommended: Life Sciences 4. Designed for departmental majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

**121. Molecular Biology and Evolution. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution. Letter grading.

**122. Ecology. (4)** Lecture, three hours; discussion, two hours. Requisites: course 100, Life Sciences 1, Mathematics 3B or 31A. Highly recommended: Mathematics 31B, 32A. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems. P/NP or letter grading.

**123. Marine Ecology. (4 or 8)** Lecture, five hours; laboratory, 15 hours. Recommended requisite: course 122. *Offered either as an 8-unit quarter-long course or as a 4-unit five-week intensive course given off campus as part of Marine Biology Quarter.* Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required.

**124. Field Ecology. (4 or 8)** Lecture, two hours; laboratory or field trip, 10 hours. Requisite: Life Sciences 1. Recommended: courses 111, 120, 122. *Offered either as a 4-unit quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of Field Biology Quarter, it is 8 units and lasts for five weeks.* Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies.

**C125. Tropical Animal Communication. (4 or 8)** Requisite: Life Sciences 1. *Offered either as a 4-unit quarter-long course or as an 8-unit Field Biology Quarter course.* Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C225.

**C126. Behavioral Ecology. (4 or 8)** Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. *Offered either as a 4-unit quarter-long course or as an 8-unit Field Biology Quarter course.* Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

**M127. Soils and Environment. (5)** (Same as Environment M127 and Geography M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

**128. Plant Physiological Ecology. (5)** Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1, Physics 1C and 4BL, or 6C or 6CH. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Letter grading.

**129. Animal Behavior. (4)** Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 4. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

**130. Principles of Systematic Biology. (4)** Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1. Recommended: courses 120, C135. Concepts, principles, and methods of comparative biology as they apply to the inference of evolutionary relationships among organisms. Principles and application of biological nomenclature.

**131. Insect Ecology. (4 or 8)** Lecture, two hours; laboratory or field trip, eight hours. Requisite: Life Sciences 1. Recommended: courses 120, 122. *Offered either as a 4-unit quarter-long course with weekend field trips or as an 8-unit Field Biology Quarter course with amount of fieldwork increased accordingly.* Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

**132. Field Behavioral Ecology. (8)** Lecture, two hours; laboratory/field trip, 10 hours. Requisite: Life Sciences 1. Recommended: course 129. *Five-week course offered only as part of Field Biology Quarter.* Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

**C134A. Physiological Ecology of Desert Animals. (5)** Lecture, three hours; laboratory, two hours; two two-day field trips per term. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C214. Letter grading.

**134B. Field Physiological Ecology of Desert Animals. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of *Field Biology Quarter*. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

**C135. Population Genetics. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C235. Letter grading.

**136. Ecology, Behavior, and Evolution Laboratory. (6)** Lecture, four hours; laboratory, eight hours; field trips, six and one half days per term. Requisites: course 120 or 122 or 129 (may be taken concurrently), Life Sciences 1, 4, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Strongly recommended: course 122. Designed for Ecology, Behavior, and Evolution majors. Laboratory and field exercises on population genetics, growth, and regulation; competition and predation; behavioral interactions; species' diversity and distribution. Methodological aspects from theoretical models and computer simulations to laboratory and garden experiments to fieldwork. Mandatory field trips, including two weekend trips. Letter grading.

**137. Chemical Communication. (4)** Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL, Life Sciences 1, 2, 3. Chemical signals are most important means by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthetic approach, with emphasis on applications to cell biology, physiology, and ecology. P/NP or letter grading.

**M139. Introduction to Chemical Oceanography. (4)** (Same as Atmospheric Sciences M105.) Lecture, three hours. Introductory course for physical sciences, life sciences, and engineering majors interested in oceanic environment. Chemical composition of oceans and nature of physical, chemical, and biological processes governing this composition in the past and present. Cycles of major and minor oceanic constituents, with focus on those that are most important for life (i.e., carbon, nitrogen, phosphorus, silicon, and oxygen). Investigation of primary production, export production, remineralization, diagenesis, air-sea gas exchange processes. Letter grading.

**CM145. Advanced Paleontology. (4)** (Same as Earth and Space Sciences CM118.) Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM245. P/NP or letter grading.

**146. Physicochemical Biology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3, Physics 1C and 4BL, or 6C or 6CH. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction. Letter grading.

**147. Biological Oceanography (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux. Letter grading.

**148. Biology of Marine Plants. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at a marine science center. Letter grading.

**C151A. Tropical Ecology. (4)** Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C221A. P/NP or letter grading.

**C151B. Field Tropical Ecology. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C221B.

**152. Functional Plant Anatomy. (5)** Lecture, three hours; laboratory, three hours. Requisites: Life Sciences 1, 2, 3, 4. Structure and functional significance of various cell and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits. P/NP or letter grading.

**154. California Ecosystems. (5)** Lecture, three hours; laboratory or field trip, four hours. Requisite: Life Sciences 1. Introduction to structure, biodiversity, and dynamics of California ecosystems, with focus on Southern California, and impact of human activities on these systems. P/NP or letter grading.

**157. Functional Integrated Histology. (6)** Lecture, three hours; laboratory, four hours. Requisites: Chemistry 14CL or 30BL, 153A, Life Sciences 1, 2, 3, 4, Mathematics 3C or 32A, Physics 1C and 4BL, or 6C or 6CH. Structure and function of cell and extracellular matrix as basic building blocks of tissues and organs, structural specializations of cells and their interactions in forming four basic tissues, how cells and tissues are structurally and functionally linked in organs. Letter grading.

**M158. Cell Biology. (6)** (Same as Physiological Science M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

**C159. Computational Biology. (4)** Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connections to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C275.

**162. Plant Physiology. (6)** Lecture, four hours; laboratory, four hours. Requisites: Life Sciences 1, 2, 3. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

**163. Biology of Marine Tetrapods. (4)** Five-week intensive course. Lecture, five hours; laboratory and fieldwork, 15 hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 3. Highly recommended: course 111. Survey of "higher" vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at a marine science center. Letter grading.

**164. Field Biology of Marine Fishes. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Recommended: Mathematics 3A, 3B, 3C. Selected aspects of natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at a marine science center.

**165. Ecological Physiology of Marine Vertebrates. (4)** Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14B and 14BL, or 20B and 30AL, Life Sciences 1, 3. Recommended: Mathematics 3C or 32A, Physics 1C and 4BL, or 6C or 6CH. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in the oceans of the world and to major marine habitats. Given off campus at a marine science center. Letter grading.

**M166. Animal Physiology. (6)** (Same as Physiological Science M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14B and 14BL, or 20B and 30AL, 153A, Life Sciences 1, 2, 3, Physics 1C and 4BL, or 6C or 6CH. Not open for credit to students with credit for course 167 or 170 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

**167. Regulatory Physiology. (6)** Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A, 14B, and 14BL, or 20A, 20B, 20L, and 30AL, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course M166 or 170 or to Physiological Science majors. Introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems. Letter grading.

**168. Marine Phytoplankton Physiology. (4)** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2. Key physiological processes, with emphasis on photosynthesis, carbon and nutrient uptake, mineralization, and toxin production of key components of marine phytoplankton, such as cyanobacteria, diatoms, dinoflagellates, and coccolithophores. Letter grading.

**170. Animal Environmental Physiology. (6)** Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14D, or 30B and 30BL, Life Sciences 1, 2, 3, 4, Mathematics 3C or 32A, Physics 1C and 4BL, or 6C or 6CH. Not open for credit to students with credit for course M166 or 167. Designed for Ecology, Behavior, and Evolution majors. Introduction to physiology (function) of animals' organs and organ systems, with emphasis on environmental interactions and ecological adaptations. Letter grading.

**M173. Anatomy and Physiology of Sense Organs. (4)** (Same as Physiological Science M173.) Lecture, three hours; discussion, one hour. Requisites: Molecular, Cell, and Developmental Biology 171 (or Physiological Science 111A) or M175A and M175B (or Physiological Science M180A and M180B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

**179. Comparative Endocrinology. (4)** Lecture, three hours; discussion, two hours. Recommended requisite: course M166 or 170 or Molecular, Cell, and Developmental Biology 138. In-depth treatment of basic principles of endocrinology, with emphasis on physiological endocrinology. Examples from both invertebrates and vertebrate animals. Letter grading.

**181. Parasitology. (6)** Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 1, 3. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Letter grading.

**182. Field Community and Population Ecology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 183, 184, 199. Introduction to experimental field research, with emphasis on investigating communities and populations of native plants and animals to reveal their structures, their relationships to individual members, and environmental factors in their success and limitation. Given off campus as part of UC Environmental Biology Supercourse.

**183. Applied Conservation Biology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 182, 184, 199. Introduction to complexities and realities of natural resource exploitation and preservation, with emphasis on trade-offs between economic benefits and ecosystem stability and sustainability. Given off campus as part of UC Environmental Biology Supercourse.

**184. Physiological Ecology. (4)** Lecture, five hours; field study, seven hours. Corequisites: courses 182, 183, 199. Examination of functional means by which animals and plants cope with their environments, and physiological limits determining boundary conditions of ecological niches. Emphasis on unifying principles describing regulatory features of animals and plants, and responses of species in extreme environments. Given off campus as part of UC Environmental Biology Supercourse.

**188. Seminar: Biology and Society. (2)** Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

**CM189A-CM189B. Theoretical Behavioral Ecology. (4-4)** (Same as Anthropology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM295A-CM295B.

**190A-190D. Honors Research in Organismic Biology, Ecology, and Evolution. (2 to 4 each)** Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Organismic Biology, Ecology, and Evolution Department faculty for at least two terms and for a total of at least 8 units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C and 190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. Eight units may be applied toward departmental majors.

**192. Teaching Practicum in Organismic Biology, Ecology, and Evolution. (1 to 4)** Tutorial, to be arranged. Limited to junior/senior departmental majors. Training and supervised practicum for advanced undergraduates in teaching courses related to biology. Students assist in preparation of materials and development of innovative programs under guidance of faculty and teaching assistants. Consult Undergraduate Office for further information. May not be applied toward course requirements for departmental majors. May be repeated for credit. P/NP or letter grading.

**M194. Undergraduate Seminar: Current Topics in Biomedical Sciences. (2)** (Same as Molecular, Cell, and Developmental Biology M194 and Physiological Science M194.) Seminar, two hours. Designed for juniors/seniors in research traineeships or those who have strong commitment to pursue graduate studies in molecular, biochemical, physiological, or biomedical fields. Weekly presentation and discussion of a paper selected from current literature. May be repeated for credit. P/NP or letter grading.

**195. Independent Studies in Application of Biology. (1 to 8)** (Formerly numbered 199L.) Discussion, one hour; fieldwork, four to 20 hours. Independent studies course to be supervised by Center for Experiential Education and Service Learning, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May not be applied toward requirements for departmental majors. May be repeated for a maximum of 8 units. Each repetition must have its own analytical focus or show progression of research. P/NP grading.

**197. Selected Topics in Organismic Biology, Ecology, and Evolution. (1 to 4)** Seminar, one to three hours. Current issues in research in organismic biology, ecology, and evolution. Consult *Schedule of Classes* for topics and instructors. If content is approved in advance by Undergraduate Advising Office, undergraduate departmental majors may petition to use course to satisfy or partially satisfy an elective requirement. May be repeated for credit with consent of instructor. P/NP or letter grading.

**199. Special Studies. (2 to 16)** Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than 8 units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward departmental majors.

## Graduate Courses

**M200A. Evolutionary Biology. (4)** (Same as Earth and Space Sciences M216.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

**200B. Ecology, Behavior, and Functional Ecology. (4)** Lecture, two hours; discussion, two hours. Principles and current topics in ecology, behavioral biology, and plant and animal physiology. Topics may include island biogeography, habitat selection, community structure, disturbance ecology, life history evolution, social behavior, sexual selection, foraging theory, energetics, photosynthesis, water relations, chemical ecology, endocrinology, physiological ecology, and adaptational biology. S/U or letter grading.

**203. Marine Botany and Physiology. (4)** Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at a marine science center.

**204. Advanced Biology of Algae. (4)** Lecture, four hours; discussion, one hour. Consideration of current research in experimental phyecology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

**205. Marine Invertebrate Biology. (4)** Lecture, four hours; laboratory, eight hours. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given off campus at a marine science center.

**206. Advanced Ichthyology. (4)** Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

**C207. Evolution, Development, and Function of Invertebrate Animals. (6)** Lecture, three hours; laboratory, three hours; three weekend field trips. Requisite: course 105 or completion of Marine Biology Quarter. Advanced invertebrate biology course exploring evolutionary relationship of animal groups and evolution of marine species, comparative development and developmental genetics of invertebrate form, and form and function as they relate to marine invertebrates. Concurrently scheduled with course C107. Letter grading.

**208. Advanced Vertebrate Morphology. (4)** Lecture, two hours; laboratory, eight hours. Requisite: course 110. Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

**209. Behavior of Arthropods. (4)** Lecture, three hours; discussion, one hour. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. S/U or letter grading.

**210. Advanced Ornithology. (4)** Lecture, two hours; laboratory, two hours; fieldwork, two hours. Requisite: course 114. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

**C212. Experimental Invertebrate Zoology. (6)** Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

**C213. Mammalogy. (5)** Lecture, three hours; laboratory, three hours. Requisite: Life Sciences 1. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C115. Letter grading.

**C214. Physiological Ecology of Desert Animals. (5)** Lecture, three hours; laboratory, two hours; two-day field trips per term. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134A. Letter grading.

**C215. Introduction to Marine Science. (4)** Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C109.

**M216. Statistical Methods for Life Sciences. (4)** (Same as Statistics M251.) Lecture, three hours. Requisite: Statistics 13. Fundamentals of statistics as applied in life sciences, including statistical inferences for continuous and categorical data (estimation, testing of means and proportions, ANOVA) study design, linear regression, and introduction to principle components analysis. Methods to be implemented on computer with SAS. S/U or letter grading.

**217. Marine Ecology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at a marine science center.

**218. Oceanology. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

**C219. Mathematical Ecology. (4)** Lecture, three hours. Requisite: Mathematics 32A. Analytical and numerical exploration of differential equation models to study properties and dynamics of individual organisms, single-species populations, multispecies communities, and integrated ecosystems in natural and disturbed environments. Concurrently scheduled with course C119. Letter grading.

**C219L. Mathematical Ecology Laboratory. (2)** Laboratory, two hours. Corequisite: course C219. Formal instruction in Mathematica software used to provide powerful and versatile tool to solve diverse quantitative problems in ecology and life and physical sciences. Concurrently scheduled with course C119L. Letter grading.

**C221A. Tropical Ecology. (4)** Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C151A. S/U or letter grading.

**C221B. Field Tropical Ecology. (8)** Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C151B.

**224. Marine Molecular Biology. (8)** Lecture, three hours; laboratory, eight hours. Preparation: background in marine sciences, basic cell biology and biochemistry. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at a marine science center.

**C225. Tropical Animal Communication. (4 or 8)** Requisite: Life Sciences 1. Offered either as a 4-unit quarter-long course or as an 8-unit *Field Biology Quarter* course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C125. S/U or letter grading.

**C227. Behavioral Ecology. (4 or 8)** Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a 4-unit quarter-long course or as an 8-unit *Field Biology Quarter* course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C126. S/U grading.

**M231. Molecular Evolution. (4)** (Same as Earth and Space Sciences M217.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

**232. Advanced Ecology. (4)** Lecture, three hours; discussion, one hour; field trip, three hours. Requisite: course 122. Concepts and topics in ecology, evolutionary or behavioral ecology, or theoretical ecology. Topics vary from year to year and may include island biogeography, tropical biology, biodiversity, modeling in ecology, habitat selection, community structure and organization, and ecology and evolution of reproductive rates. May be repeated for credit. S/U or letter grading.

**C235. Population Genetics. (4)** Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C135. Letter grading.

**236. Seminar: Marine Molecular Biology. (4)** Discussion, 10 hours. Requisite: course 224. Seminar on current issues and work in marine molecular biology. Given off campus at a marine science center.

**M238. Ocean Biogeochemical Dynamics and Climate. (4)** (Same as Atmospheric Sciences M235.) Lecture, three hours. Interaction of ocean biogeochemical cycles with physical climate system. Biogeochemical processes controlling carbon dioxide and oxygen in oceans and atmosphere over time-scales from a few million years to a few years. Anthropogenic perturbation of global carbon cycle and climate. Response of ocean ecosystems to past and future global changes. Use of isotopes to study ocean biogeochemical cycles and climate. Interactions between biogeochemical cycles on land and in ocean. S/U or letter grading.

**240. Physiology of Marine Animals. (4)** Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at a marine science center.

**243. Animal Communication. (4)** Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3C or 32A, and Physics 1C and 4BL, or 6C or 6CH. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information. S/U or letter grading.

**244. Advanced Insect Physiology. (4)** Lecture, two hours; laboratory, five hours. Detailed discussion of current problems in insect physiology, with advanced laboratory. S/U or letter grading.

**CM245. Advanced Paleontology. (4)** (Same as Earth and Space Sciences CM218.) Lecture, three hours. Prerequisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM145. S/U or letter grading.

**247. Advanced Plant Biology. (4)** Lecture, three hours; discussion, two hours. Prerequisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

**251. Seminar: Systematics. (2)** Discussion, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit.

**253. Seminar: Plant Structure. (2)** Seminar, two hours. S/U or letter grading.

**255. Seminar: Invertebrate Zoology. (2)** Seminar, two hours. S/U or letter grading.

**259. Seminar: Herpetology. (2)** Discussion, three hours. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology.

**260. Seminar: Biology of Terrestrial Vertebrates. (2)** Seminar, two hours. S/U or letter grading.

**263. Seminar: Population Genetics. (2 or 4)** Discussion, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.

**264. Seminar: Stomatal Function. (4)** Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations.

**265. Seminar: Biophysical Plant Ecology. (2)** Seminar, two hours. S/U or letter grading.

**267. Seminar: Current Topics in Evolutionary Ecology. (2)** Seminar, two hours. S/U or letter grading.

**268. Seminar: Population Biology. (2)** Seminar, two hours. S/U or letter grading.

**269. Seminar: Animal Ecology. (2)** Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

**270. Seminar: Environmental Physiology. (2)** S/U grading.

**271. Seminar: Phycology and Mycology. (2)** Seminar, two hours. Prerequisite: course 101. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts. S/U or letter grading.

**272. Seminar: Marine Biology. (2)** Seminar, two hours. S/U or letter grading.

**273. Seminar: Entomology. (2)** Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

**274. Seminar: Behavioral Ecology. (2)** Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

**C275. Computational Biology. (4)** Lecture, three hours; laboratory, one hour. Prerequisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connection to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C159.

**279. Seminar: Evolutionary Biology. (2)** Seminar, two hours. Prerequisite: course M231. Emphasis on a particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

**282. Seminar: Ichthyology. (2)** Prerequisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.

**M286. Seminar: Statistical Problem Solving for Population Biology. (2)** (Same as Statistics M286.) Seminar, two hours. Designed for graduate students. Statistical solutions to complex data analysis and/or experimental design problems encountered by biology graduate students in their own research. S/U or letter grading.

**288. Seminar: Plant Cell Biology. (2)** Recommended preparation: course 162.

**M290. Seminar: Comparative Physiology. (2)** (Same as Physiological Science M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

**291. Seminar: Physiology and Biochemistry of Arthropods. (2)** Seminar, two hours. S/U or letter grading.

**CM295A-CM295B. Theoretical Behavioral Ecology. (4-4)** (Same as Anthropology CM289A-CM289B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM295A is requisite to CM295B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B.

**296. Seminar: Integrative Biology — Cellular, Organismic, and Population. (1 to 4)** Discussion, three hours. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**297. Selected Topics in Organismic Biology, Ecology, and Evolution. (1 to 4)** Seminar, one to three hours. Advanced study and analysis of variable research topics in research issues in organismic biology, ecology, and evolution. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. S/U or letter grading.

**299. Seminar: Parasitology. (2)** Seminar, two hours. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Biology in Higher Education. (2)** Seminar, to be arranged. Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

**496. Preparation for Teaching Biology in Higher Education. (2)** Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

**596. Directed Individual (or Tutorial) Studies. (2 to 12)** Tutorial, to be arranged. Letter grading.

**596F. Directed Individual (or Tutorial) Studies. (2 to 8)** Tutorial, to be arranged. Given off campus at a marine science center.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12)** Tutorial, to be arranged. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**598. M.A. Thesis Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

**599. Ph.D. Dissertation Research and Writing. (2 to 12)** Tutorial, to be arranged. S/U grading.

## ORGANIZATIONAL STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
4269A Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472

(310) 825-3862  
fax: (310) 825-0778  
<http://www.polisci.ucla.edu>

Eric H. Monkkonen, Ph.D., *Chair*

### Faculty Advisory Committee

Bryan C. Ellickson, Ph.D. (*Economics*)  
Oscar Grusky, Ph.D. (*Sociology*)  
Eric H. Monkkonen, Ph.D. (*History*), *Chair*

## Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Organizational Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

## Undergraduate Study

### Organizational Studies Specialization

Students may elect to combine the Organizational Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in Organizational Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or M18 and 104 or equivalent.

## Upper Division Requirements

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

For further information, contact the political science undergraduate counselor in the program office.

## ORTHOPAEDIC SURGERY

*David Geffen School of Medicine*

### Chair

Gerald A.M. Finerman, M.D.

## Scope and Objectives

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses of-

ferred, contact the chair's office at (310) 794-7930.

Sunita M. Bhuta, M.D.

#### Adjunct Assistant Professor

Robert Trelease, Ph.D.

## Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Cellular and Molecular Pathology.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Pathology and Laboratory Medicine offers Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Cellular and Molecular Pathology.

# Pathology and Laboratory Medicine

## Upper Division Courses

**102. Gross Anatomy of the Human Body. (8)** (Formerly numbered Orthopaedic Surgery 102.) Lecture, three hours; laboratory, nine hours. Designed for dental and graduate students. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

**199. Special Studies. (2 to 6)** Supervised laboratory research, 10 hours minimum. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

## Graduate Courses

**200A. Dental Pathology. (3)** Lecture, 90 minutes; laboratory, three hours. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

**205A-205B. Gross and Developmental Anatomy for Medical Students. (5-5)** (Formerly numbered Orthopaedic Surgery 205A-205B.) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Designed for medical students. Open to non-medical students with consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. S/U or letter grading. **205A.** Limbs, Thorax, and Abdomen (first eight weeks); **205B.** Pelvis, Head, and Neck.

**207. Gross and Developmental Anatomy for Graduate Students. (12)** (Formerly numbered Orthopaedic Surgery 207.) Lecture/laboratory, three four-hour sessions (16-week semester). Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck. Letter grading.

**M215. Interdepartmental Course: Tropical Medicine. (2)** (Same as Medicine M215 and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**231A. Pathological Anatomy and Physiology. (6)** Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology.

**231B-231C. Pathophysiology of Disease. (6-6)** Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Requirement: course 200A. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

**M237. Molecular and Cellular Foundations of Disease. (4)** (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

**238. Histology and Pathology for Graduate Students. (2)** Laboratory, two hours. Designed for UCLA ACCESS or Cellular and Molecular Pathology Ph.D. students. Basic introductory knowledge of normal tissue, pathologic processes, and animal models as observed by light microscopy. Letter grading.

**255. Mapping the Human Genome. (3)** Lecture, 90 minutes; discussion, 90 minutes. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

**256. Seminar: Viral Oncology. (2)** (Formerly numbered M256.) Seminar, two hours. Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation. S/U or letter grading.

**M257. Introduction to Toxicology. (4)** (Same as Pharmacology M257.) Requisite: Pharmacology M241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

**M258. Pathologic Changes in Toxicology. (4)** (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

**294. Molecular Basis of Cancer. (4)** (Formerly numbered M294.) Lecture, three hours. Requisites: Biological Chemistry CM253, CM267, Microbiology M229, Neurobiology M200B. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer. Letter grading.

**294L. Cancer Histopathology Laboratory. (2)** (Formerly numbered M294L.) Lecture, one hour; laboratory, two hours. Requisites: course 294, Biological Chemistry CM253, CM267, and Microbiology M229 or Neurobiology M200B. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma *in situ*, and frankly invasive and metastatic neoplasia. Letter grading.

**298A-298D. Current Research in Disease Mechanisms. (2 each)** (Formerly numbered 298A-298B-298C.) Lecture, 90 minutes. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Designed for graduate experimental pathology students. Current research in disease mechanisms, with strong emphasis on experimental approach in pathology. Topics include genetic and metabolic disorders, thyroid disease, immunology, atherosclerosis, infectious diseases, and Alzheimer's disease. S/U or letter grading.

**596. Directed Individual Study or Research. (4 to 12)** Tutorial, to be arranged. Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

**597. Preparation for Qualifying Examinations. (2 to 8)** Tutorial, to be arranged. Preparation: one year of pathology coursework. Individual study for qualifying examinations. S/U grading.

**599. Preparation of Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Preparation: completion of qualifying examinations and majority of Ph.D. research. Writing and completion of dissertation. S/U grading.

## PEDIATRICS

David Geffen School of Medicine

UCLA  
12-335 Davies Children's Center  
Box 951752  
Los Angeles, CA 90095-1752  
(310) 825-4128  
fax: (310) 794-5200  
<http://www.pediatrics.medsch.ucla.edu>

### Chairs

Edward R.B. McCabe, M.D., Ph.D., *Executive Chair*  
Stephen A. Feig, M.D., *Executive Vice Chair*  
Sherin Devaskar, M.D., *Vice Chair, Research*  
Robert B. Ettenger, M.D., *Vice Chair, Clinical Affairs*  
Thomas S. Klitzner, M.D., Ph.D., *Vice Chair, Academic Affairs*  
Stuart Slavin, M.D., *Vice Chair, Medical Education*  
Adam J. Jonas, M.D., *Chair, Harbor-UCLA*  
Mohammed Malekzadeh, M.D., *Chair, Olive View-UCLA*  
David L. Rimoin, M.D., Ph.D., *Chair, Cedars-Sinai*  
Betti Jo Warren, M.D., *Interim Chair, King/Drew*

### Scope and Objectives

The Department of Pediatrics encompasses five teaching hospitals: Mattel Children's Hospital at UCLA and Olive View-UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken in any of the four programs (Mattel/Olive View-UCLA, Cedars-Sinai, Harbor-UCLA, King/Drew). In-depth electives in the Department of Pediatrics are listed in the *School of Medicine Handbook of Clinical Courses*, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see <http://www.peds.medsch.ucla.edu>.

## Pediatrics

### Lower Division Courses

**88. Lower Division Seminar: Special Topics in Pediatrics.** (4) Seminar, three hours; outside study, nine hours. Requisite: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member. Letter grading.

**98. Ethics, Art, and Science of Medicine.** (4) Seminar, three hours. Enforced requisite: satisfaction of Subject A requirement. Exploration, in a series of seminars modeled on the Socratic method, of philosophical and medical literature pertaining to interrelationship of ethics, conduct, and medicine. Actual case histories encountered by instructor exemplify dilemmas in question. Letter grading.

## Graduate Course

**M215. Interdepartmental Course: Tropical Medicine.** (2) (Same as Medicine M215 and Pathology M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

Sean A. Kelsey, Ph.D.  
Abraham S. Roth, Ph.D.  
Michael A. Thau, Ph.D.

### Adjunct Professor

Richard Popkin, Ph.D.

### Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

"Philosopher," translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

## Undergraduate Study

### Philosophy B.A.

#### Preparation for the Major

*Required:* Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

#### Transfer Students

To be admitted as Philosophy majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: one philosophy of mind or skepticism and rationality course, one ethical theory course, one symbolic logic course, and one additional philosophy course.

#### The Major

*Required:* Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of 8 units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

## Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (8 units) in philosophy with an average GPA of 3.5.

## Philosophy Minor

To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses (8 units):* Philosophy 7 or 21, and 22 or 31.

*Required Upper Division Courses (24 units):* Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Philosophy offers Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in Philosophy.

## Philosophy

### Lower Division Courses

**1. Beginnings of Western Philosophy.** (5) Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks. P/NP or letter grading.

**2. Introduction to Philosophy of Religion.** (4) Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

**4. Philosophical Analysis of Contemporary Moral Issues.** (5) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women. P/NP or letter grading.

**5. Philosophy in Literature.** (5) (Formerly numbered 5A.) Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition. P/NP or letter grading.

**6. Introduction to Political Philosophy.** (5) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

**7. Introduction to Philosophy of Mind.** (5) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge. P/NP or letter grading.

**8. Introduction to Philosophy of Science.** (5) Lecture, three hours; discussion, one hour. Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at non-technical level of episodes from history of science. P/NP or letter grading.

**9. Principles of Critical Reasoning.** (4) Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

**21. Skepticism and Rationality.** (4) Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

**22. Introduction to Ethical Theory.** (5) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 22W. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc. P/NP or letter grading.

**22W. Introduction to Ethical Theory.** (5) Lecture, three hours; discussion, one hour. Enforced requisite: English Composition 3 or 3H. Not open for credit to students with credit for course 22. Introduction to major ethical theories in Western thought. Examination of works of Plato, Aristotle, Hume, Kant, and Mill. Topics include ideas of virtue, obligation, egoism, relativism, and foundations of morals. Four papers required. Satisfies Letters and Science Writing II requirement. Letter grading.

**31. Logic, First Course.** (4) Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language.

**32. Logic, Second Course.** (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions.

**97. Freshman Seminar.** (4) Variable topics; consult *Schedule of Classes* or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

## Upper Division Courses

**100A. History of Greek Philosophy.** (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

**100B. Medieval and Early Modern Philosophy.** (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

**100C. History of Modern Philosophy, 1650 to 1800.** (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended requisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

### Group I: History of Philosophy

**M101A. Plato — Earlier Dialogues.** (4) (Same as Classics M146A.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

**M101B. Plato — Later Dialogues.** (4) (Same as Classics M146B.) Lecture, three hours; discussion, one hour. Requisite: course M101A. Study of selected topics in middle and later dialogues of Plato.

**M102. Aristotle.** (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Study of selected works of Aristotle.

**M103A. Ancient Greek and Roman Philosophy.** (4) (Same as Classics M145A.) Lecture, three hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

**M103B. Later Ancient Greek Philosophy.** (4) (Same as Classics M145B.) Lecture, three hours. Preparation: one course from 1, 100A, M101B, M102, M103A. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

**104. Topics in Islamic Philosophy.** (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

**105. Medieval Philosophy from Augustine to Maimonides. (4)** Preparation: one philosophy course. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

**106. Later Medieval Philosophy. (4)** Preparation: one philosophy course. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

**107. Topics in Medieval Philosophy. (4)** Preparation: one philosophy course. Recommended requisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

**C108. Hobbes. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

**C109. Descartes. (4)** Requisites: course 21 or two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

**C110. Spinoza. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C111. Leibniz. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C112. Locke and Berkeley. (4)** Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

**C114. Hume. (4)** Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

**115. Kant. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

**116. 19th-Century Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in 19th-century thought.

**117. Late 19th- and Early 20th-Century Philosophy. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

**118. Kierkegaard. (4)** Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

**C119. Topics in Modern Philosophy. (4)** Preparation: one philosophy course. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

## Group II: Logic, Semantics, and Philosophy of Science

**124. Philosophy of Science: Historical. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

**125. Philosophy of Science: Contemporary. (4)** Lecture, three hours; discussion, one hour. Requisite: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

**126. Philosophy of Science: Social Sciences. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

**127A. Philosophy of Language. (4)** Requisite: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

**127B. Philosophy of Language. (4)** Requisite: course 31. Course 127A is not requisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor.

**128A. Philosophy of Mathematics. (4)** Requisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).

**128B. Philosophy of Mathematics. (4)** Requisite: course 128A. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.

**129. Philosophy of Psychology. (4)** Lecture, three hours; discussion, one hour. Preparation: one 4-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**130. Philosophy of Space and Time. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relativist views of space and time, philosophical impact of relativity theory.

**131. Science and Metaphysics. (4)** Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

**132. Philosophy of Biology. (4)** Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

**133. Topics in Logic and Semantics. (4)** Requisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

**M134. Introduction to Set Theory. (4)** (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Requisite: course 32 or Mathematics 31B. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**135A. Metatheory of Sentential Logic. (4)** Lecture, three hours; discussion, one hour. Requisite: course 32. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

**135B. Metatheory of Predicate Logic. (4)** Lecture, three hours; discussion, one hour. Requisite: course 135A. Classical first-order logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.

**136. Modal Logic. (4)** Requisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.

## Group III: Ethics and Value Theory

**150. Society and Morals. (4)** Lecture, three hours; discussion, one hour. Requisite: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

**151A-C151B-151C. History of Ethics. (4-4-4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Each course may be taken independently for credit. P/NP or letter grading. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **C151B.** Modern. (Formerly numbered 151B.) Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C245; **151C.** Selected Classics of Medieval Ethics.

**153A. Topics in Ethical Theory: Normative Ethics. (4)** Requisite: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

**153B. Topics in Ethical Theory: Metaethics. (4)** Requisite: course 22. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

**154. Topics in Value Theory: Rationality and Action. (4)** Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

**155. Medical Ethics. (4)** Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

**C156. Topics in Political Philosophy. (4)** Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C247. P/NP or letter grading.

**157A-157B. History of Political Philosophy. (4-4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

**161. Topics in Aesthetic Theory. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

**166. Philosophy of Law. (4)** Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

### Group IV: Metaphysics and Epistemology

**170. Philosophy of Mind. (4)** Lecture, three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

**172. Philosophy of Language and Communication. (4)** Preparation: two relevant philosophy or linguistics courses. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

**175. Topics in Philosophy of Religion. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

**176. Metaphysics of Modality. (4)** Requisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of modal theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) "Haecceitism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

**177A. Existentialism. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

**177B. Historical Studies in Existentialism. (4)** Preparation: one philosophy course. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

**178. Phenomenology. (4)** Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

**179. Oriental Philosophy: Buddhism. (4)** Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

**182. Elements of Metaphysics. (4)** Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenism, materialism, dualism).

**183. Theory of Knowledge. (4)** Requisite: course 21. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor.

**184. Topics in Metaphysics. (4)** Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

**186. Topics in Theory of Knowledge. (4)** Requisite: course 182 or 183. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

**187. Philosophy of Action. (4)** Preparation: two philosophy courses. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

**188. Philosophy of Perception. (4)** Preparation: two philosophy courses. Critical study of main philosophical theories of perception and arguments used to establish them.

**189. Major Philosophers of the 20th Century. (4)** Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

### Special Studies

**M192. Philosophical Analysis of Issues in Feminist Theory. (4)** (Same as Women's Studies M192.) Lecture, three hours. Requisite for Women's Studies majors: Women's Studies 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor. Letter grading.

**193. Christian Ethical Thought. (4)** Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

**195. 19th- and 20th-Century Religious Thought. (4)** Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

**196. Undergraduate Seminar: Philosophy. (4)** Seminar, one hour; discussion, three hours. Variable topics; consult *Schedule of Classes* or "Department Announcements" for topic to be offered in a specific term. May be repeated for credit with consent of instructor.

**199. Special Studies. (2 to 8)** Tutorial, to be arranged. Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

## Graduate Courses

**200A-200B-200C. Seminar for First-Year Graduate Students. (4-4-4)** Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

### Group I. History of Philosophy

**201. Plato. (4)** Study of later dialogues.

**202. Aristotle. (4)** Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

**203. Seminar: History of Ancient Philosophy. (4)** Selected problems and philosophers. May be repeated for credit with consent of instructor.

**206. Topics in Medieval Philosophy. (4)** Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

**207. Seminar: History of Medieval and Renaissance Philosophy. (4)** Selected problems and philosophers. May be repeated for credit with consent of instructor.

**C208. Hobbes. (4)** Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

**C209. Descartes. (4)** Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

**C210. Spinoza. (4)** Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C211. Leibniz. (4)** Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C212. Locke and Berkeley. (4)** Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

**C214. Hume. (4)** Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.

**215. Kant. (4)** Intensive study of selected writings of Immanuel Kant.

**216. 19th-Century Philosophy. (4)** Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

**C219. Topics in Modern Philosophy. (4)** Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

**220. Seminar: Topics in History of Philosophy. (4)** Seminar, three hours. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

## Group II. Logic, Semantics, and Philosophy of Science

**221A. Topics in Set Theory. (4)** Lecture, three hours. Requisite: Mathematics M112. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor. S/U or letter grading.

**221B. History of Set Theory. (4)** Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

### 222A-222B-222C. Gödel Theory. (4-4-4) 222A.

Preparation: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222B.** Requisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222C.** Requisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series.

**224. Philosophy of Physics. (4)** Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

**225. Probability and Inductive Logic. (4)** Lecture, three hours. Requisite: course M134 or Mathematics M112. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning. S/U or letter grading.

**226. Topics in Mathematical Logic. (4)** Content varies from term to term. May be repeated for credit with consent of instructor.

**227. Philosophy of Social Science. (4)** Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

**230. Seminar: Logic. (4)** May be repeated for credit with consent of instructor.

**231. Seminar: Intensional Logic. (4)** Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor.

**232. Philosophy of Science. (4)** Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

**233. Seminar: Philosophy of Physics. (4)** May be repeated for credit with consent of instructor.

## Group III. Ethics and Value Theory

**241. Topics in Political Philosophy. (4)** Requisites: course 150 or C156 or 157A or 157B or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

**C245. History of Ethics: Modern. (4)** (Formerly numbered 245.) Lecture, three hours; discussion, one hour. Intensive study of Kant's ethical theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C151B. S/U or letter grading.

**246. Seminar: Ethical Theory. (4)** Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

**C247. Topics in Political Philosophy. (4)** Lecture, three hours; discussion, one hour. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

**248. Problems in Moral Philosophy. (4)** Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

**255. Seminar: Aesthetic Theory. (4)** Selected topics. May be repeated for credit with consent of instructor.

**M256. Topics in Legal Philosophy. (4)** (Same as Law M217.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

**M257. Seminar: Philosophy of Law. (4)** (Same as Law M524.) Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

## Group IV. Metaphysics and Epistemology

**271. Seminar: Topics in Metaphysics and Epistemology. (4)** Discussion, three hours. May be repeated for credit with consent of instructor.

**275. Human Action. (4)** Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

**280. 20th-Century Continental Philosophy. (4)** Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

**281. Seminar: Philosophy of Mind. (4)** May be repeated for credit with consent of instructor.

**282. Seminar: Metaphysics. (4)** May be repeated for credit with consent of instructor.

**283. Seminar: Theory of Knowledge. (4)** May be repeated for credit with consent of instructor.

**284. Seminar: Philosophy of Perception. (4)** May be repeated for credit with consent of instructor.

**285. Philosophy of Psychoanalysis. (4)** Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.

**286. Philosophy of Psychology. (4)** Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**287. Seminar: Philosophy of Language. (4)** May be repeated for credit with consent of instructor.

**288. Seminar: Wittgenstein. (4)** Seminar, three hours. May be repeated for credit with consent of instructor.

**289. Seminar: Philosophy of Religion. (4)** May be repeated for credit with consent of instructor.

**290. Workshop: Philosophy of Language. (4)** Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

**291. Workshop: Philosophy of Mathematics. (4)** Seminar, three hours. Ongoing discussion of current issues in philosophy of mathematics based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor. S/U or letter grading.

**299. Seminar: Philosophical Research. (4)** Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

## Special Studies

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Philosophy. (2 to 4)** Seminar, to be arranged. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

**501. Cooperative Program. (2 to 8)** Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies. (2 to 8)** Tutorial, to be arranged. Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

**597. Directed Studies for Graduate Examinations. (2 to 8)** Tutorial, to be arranged. Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

**599. Research for Ph.D. Dissertation. (2 to 8)** Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

## PHYSICS AND ASTRONOMY

*College of Letters and Science*

UCLA  
3-174 Knudsen Hall  
Box 951547  
Los Angeles, CA 90095-1547  
(310) 825-3440  
fax: (310) 206-5668

 George J. Igo, Ph.D.  
 Leon Knopoff, Ph.D.  
 Richard E. Norton, Ph.D.  
 Mirek Plavec, Ph.D.  
 David S. Saxon, Ph.D. (*University President Emeritus*)  
 Eugene Y. Wong, Ph.D.  
 Byron T. Wright, Ph.D.

**Associate Professors**

Huan Huang, Ph.D.  
 James E. Larkin, Ph.D.  
 Chetan Nayak, Ph.D.  
 David Saltzberg, Ph.D.

**Assistant Professors**

Troy A. Carter, Ph.D.  
 Michael Gutperle, Ph.D.  
 Bradley M. Hansen, Ph.D.  
 Per J. Kraus, Ph.D.  
 Alexander Kusenko, Ph.D.  
 Giovanni Zocchi, Ph.D.

**Lecturer S.O.E.**

Arthur Huffman, Ph.D.

**Lecturer**

William J. Layton, M.Ed.

**Adjunct Professors**

Viktor Decyk, Ph.D.  
 Phillip Pritchett, Ph.D.

**Scope and Objectives**

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton's discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein's general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions which existed when the universe's expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe's matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-undiscovered exotic particles which are predicted by the most advanced theories of elementary particle physics.

Department of Physics and Astronomy faculty members and students are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.

**Undergraduate Study**

The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for the majors must be taken for a letter grade.

**Astronomy Courses**

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A and 2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A and 2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in Astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31 and 32 series).

Students of junior and senior standing in Physics or related sciences are invited to select any of these courses: Astronomy 115, 117, 127, 140, 180.

**Physics Courses**

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1Q is intended for entering freshman Physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 1A, 1B, and 1C, or 1AH, 1BH, and 1CH form sequences of courses in general physics for majors in Physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also

serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Physics 10 is a one-term, nonlaboratory course that surveys the whole field of physics. Any two or more courses from Physics 1A, 6A, and 10 are limited to 6 units credit.

## Astrophysics B.S.

### Preparation for the Major

*Required:* Astronomy 81, 82; Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 10A or demonstrated ability to program. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year. *Recommended:* Astronomy 3H, Chemistry and Biochemistry 20A.

### Transfer Students

To be admitted as Astrophysics majors, transfer students with 90 or more units must complete as many of the following introductory courses as possible prior to admission to UCLA: two astrophysics courses, two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one programming course.

### The Major

*Required:* Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 115C, 131. *Recommended:* Physics 108, M122, 124, 132, 140A, 140B.

### Honors Program

Senior majors in Astrophysics with a 3.5 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.5 and 3.75 or better, respectively, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

## Physics B.S.

The Physics major should be taken if students intend to continue toward the Ph.D. in Physics.

### Preparation for the Major

*Required:* Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

### Transfer Students

To be admitted as Physics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

### The Major

*Required:* Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 115C, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior year; (3) there must be three additional upper division courses in the plan, preferably selected from Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, 140B; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 117, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

### Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

## General Physics B.A.

The General Physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

### Preparation for the Major

*Required:* Physics 1A or 1AH, 1B or 1BH, 1C or 1CH, 4AL, 4BL, 17, 18L; Chemistry and Biochemistry 20A; Mathematics 31A, 31B, 32A,

32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

### Transfer Students

To be admitted as General Physics majors, transfer students with 90 or more units must complete the following introductory courses prior to admission to UCLA: two years of calculus, one and one half years of calculus-based physics with laboratory for majors, and one general chemistry course for majors.

### The Major

*Required:* Physics 105A, 110A, 110B, 112, 115A, 115B, 131, one course from the 180 series, two upper division physics electives (excluding C185 and 199), and four upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

## Single Subject Credentials

Students may earn credentials for secondary science teaching in the following subject areas: biological science, chemistry, physics, and geoscience. Completion of the single subject credential program in the Teacher Education Program is required. Consult the Department of Education, 1009 Moore Hall, (310) 825-8328, for information.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

### Graduate Degrees

The Department of Physics and Astronomy offers the Master of Arts in Teaching (M.A.T.) degree in Astronomy, Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Astronomy, Master of Arts in Teaching (M.A.T.) degree in Physics, and Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Physics.

## Astronomy

### Lower Division Courses

**2A-2B. Introduction to the Physical Universe. (4-4)** Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. P/NP or letter grading. **2A.** Planets and Stars; **2B.** Galaxies and Cosmology. Enforced prerequisite: course 2A with a grade of C or better.

**3. Nature of the Universe. (5)** Lecture, three hours; discussion, two hours. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments. P/NP or letter grading.

**3H. Introductory Astronomy and Astrophysics. (4)** Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in Astrophysics or in physical and mathematical sciences. P/NP or letter grading.

**4. Universe of Stars and Stellar Systems. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies. P/NP or letter grading.

**5. Life in the Universe. (4)** Lecture, four hours; discussion, one hour. Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. P/NP or letter grading.

**6. Cosmology: Our Changing Concepts of the Universe. (4)** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Exposition of our ideas about the structure and evolution of the universe and its contents. Special and general relativity; black holes, neutron stars, and other endpoints of stellar evolution. Expanding universe, cosmic microwave background radiation, dark matter. Big Bang and inflation. P/NP or letter grading.

**7. Astronomy and the Media. (4)** Lecture, three hours; discussion, one hour; laboratory, one hour. Enforced requisite: course 3. Designed to help nonmajors develop skills to continually learn about science through media. Detailed study of research currently in the media, including meteor impacts, greenhouse effect, NASA, cosmology, and extraterrestrial life. Investigation of forces that influence science reporting. P/NP or letter grading.

**8A-8B. Astronomy with Physics: Exploring the Universe. (5-5)** Lecture, three hours; discussion, one hour; laboratory, two hours. Course 8A is enforced requisite to 8B. Not open to students with credit for course 3 or Physics 10. Two-quarter integrated course in conceptual physics and astronomy to introduce broad range of topics in both fields, including visits to UCLA Planetarium and telescope, as well as optional field trips to dark sky sites. Laboratories offer both hands-on and computer experience. P/NP or letter grading.

**81. Astrophysics I: Stars and Nebulae. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae. P/NP or letter grading.

**82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, and Physics 1A or 1AH. Recommended: course 81, Physics 1B and 1C (or 1BH and 1CH). Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and earliest moments of the universe. P/NP or letter grading.

**88A-88Z. Lower Division Seminars. (2 each)** Seminar, two hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**88A. Cosmic Evolution. (2)** Seminar, two hours. Limited to freshmen. Varied astronomical and physical processes of evolution; discussion of how, over billions of years, basic mechanisms of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life. P/NP or letter grading.

## Upper Division Courses

**115. Statistical Mechanics and Its Application to Astrophysics. (4)** Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33A, 33B, Physics 1A, 1B, and 1C (or 1AH, 1BH, and 1CH). Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium. P/NP or letter grading.

**117. Radiation and Fluids in Astrophysics. (4)** Lecture, three hours. Requisite: course 115. Designed for junior/senior Astrophysics and Physics majors. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe. P/NP or letter grading.

**127. Stellar Atmospheres, Interiors, and Evolution. (4)** Lecture, three hours. Recommended requisites: courses 115, 117. Designed for senior Astrophysics and Physics majors. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres. P/NP or letter grading.

**140. Stellar Systems and Cosmology. (4)** Lecture, three hours. Designed for senior Astrophysics and Physics majors. Properties of star clusters and galaxies, with particular emphasis on Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang. P/NP or letter grading.

**180. Astrophysics Laboratory. (4)** Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in Astrophysics, Physics, or a related field. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images. P/NP or letter grading.

**199. Special Studies. (2 or 4)** Tutorial, to be arranged. Limited to senior Astrophysics and Physics majors (with an outstanding record). Special studies with an individual faculty member. P/NP or letter grading.

## Graduate Courses

**270. Fundamentals I: Fluids and Dynamics. (4)** Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, winds, and accretion. The Jeans, Kelvin/Helmholtz, and Rayleigh/Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction. Letter grading.

**271. Fundamentals II: Radiation. (4)** Lecture, three hours. Radiative transitions in molecules, atoms, and nuclei. Sources of continuous and line radiation. Transition probabilities for spontaneous and stimulated emission and for absorption. Source function and equation of radiative transfer, with applications. Curve of growth and abundance determinations. Scattering processes, polarized light, masers. Letter grading.

**272. Stellar Structure and Evolution. (4)** Lecture, three hours. Structure and evolution of stars, stellar energy sources and problems of nucleosynthesis, theory of variable stars, structure of the sun from helioseismology and neutrinos. Supernova processes. Binary systems. Letter grading.

**273. Stellar Photospheres. (4)** Lecture, three hours. Physics of stellar photospheres. Radiative transfer under stellar atmosphere conditions. Continuous and line spectra of stars. Chemical abundances in stars. Stellar winds and stars with extended atmospheres. Letter grading.

**274. Galaxies. (4)** Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei. Letter grading.

**275. Cosmology. (4)** Lecture, three hours. Requisite: course 274. Thermal and physical history of the universe. Interaction of matter and cosmic microwave background radiation. Study of inhomogeneities in the universe from inflationary epoch to the current large-scale structure. Letter grading.

**276. Instrumentation and Observational Techniques. (4)** Lecture, three hours. Telescopes, optical principles, cameras, and spectrographs. Optical detectors; photomultiplier tubes, CCDs. Infrared detectors and arrays. Radio detectors. X-ray and gamma-ray detectors. Interferometry and aperture synthesis. Data analysis techniques. Statistical methods. Letter grading.

**277A-277B. Astronomy Research Project. (6-6)** Tutorial, to be arranged. Designed for second-year graduate astronomy students. Two-term research project planned in conjunction with a faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

**278. Special Topics in Astronomy. (2 or 4)** Seminar, to be arranged. Informal course with lecture/seminar format, focusing on one of a set of specific topics in astronomy. S/U (2-unit course) or letter (4-unit course) grading.

**279. Seminar: Current Astronomical Research. (2)** Seminar, one hour. Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

**281. Quantum Mechanics for Astrophysics. (4)** Lecture, four hours. Designed for departmental graduate students. Quantum mechanical topics in areas of interest for astrophysics applications. Hydrogen atom, radiative transitions, complex atoms, molecular spectroscopy including electronic, vibrational, and rotational transition, nuclear reaction theory. Letter grading.

**M285. Origin and Evolution of Solar System. (4)** (Same as Earth and Space Sciences M285.) Lecture, four hours. Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

**296. Research Topics in Astronomy. (2)** Discussion, two hours. Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics. (2 or 4)** (Same as Physics M297.) Tutorial, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596A. Directed Individual Studies. (4 to 10)** Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

**596L. Advanced Study and Research at Lick Observatory. (4 to 12)** Tutorial, to be arranged. Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department. S/U grading.

**599. Ph.D. Research and Writing. (10 to 12)** Tutorial, to be arranged. May be repeated at discretion of department. S/U grading.

## Physics

### Lower Division Courses

**1A. Physics for Scientists and Engineers: Mechanics. (5)** Lecture/demonstration, four hours; discussion, one hour. Recommended preparation: high school physics, one year of high school calculus or Mathematics 31A and 31B. Enforced prerequisite: Mathematics 31A. Enforced corequisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. P/NP or letter grading.

**1AH. Physics for Scientists and Engineers: Mechanics (Honors). (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisite: Mathematics 31A. Enforced corequisite: Mathematics 31B. Recommended corequisite: Mathematics 32A. Enriched preparation for upper division physics courses. Same material as course 1A but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields. (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: course 1A, Mathematics 31B. Enforced corequisite: Mathematics 32A. Recommended corequisite: Mathematics 32B. Damped and driven oscillators, mechanical and acoustic waves. Electrostatics: electric field and potential, capacitors, and dielectrics. Currents and DC circuits. Magnetic field. P/NP or letter grading.

**1BH. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields (Honors). (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: course 1AH or 1A, Mathematics 31B. Enforced corequisite: Mathematics 32A. Recommended corequisite: Mathematics 32B. Enriched preparation for upper division physics courses. Same material as course 1B but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity. (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: courses 1A, 1B, Mathematics 32A. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Ampere law, Faraday law, inductance, and LRC circuits. Maxwell equations in integral and differential form. Electromagnetic waves. Light, geometrical, and physical optics. Special relativity. P/NP or letter grading.

**1CH. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity (Honors). (5)** Lecture/demonstration, four hours; discussion, one hour. Enforced prerequisites: courses 1AH or 1A, 1BH or 1B, Mathematics 32A. Enforced corequisite: Mathematics 32B. Recommended corequisite: Mathematics 33A. Enriched preparation for upper division physics courses. Same material as course 1C but in greater depth; recommended for Physics majors and other students desiring such coverage. P/NP or letter grading.

**1Q. Contemporary Physics. (2)** Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

**4AL. Physics Laboratory for Scientists and Engineers: Mechanics. (2)** Laboratory, three hours. Enforced prerequisite: course 1A or 1AH. Enforced corequisite: course 1B or 1BH. Experiments on measuring gravity, accelerated motion, kinetic and potential energy, impulse and momentum, damped and driven oscillators, resonance and vibrating strings. Computer data acquisition and analysis. Introduction to error analysis, including distributions and least-squares fitting procedures. Letter grading.

**4BL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism. (2)** Laboratory, three hours. Enforced prerequisite: course 1A or 1AH. Enforced corequisite: course 1B or 1BH. Experiments on electric forces, fields, and potentials. Magnetic fields. Linear and nonlinear devices. Resistors, capacitors, and inductors. Modern circuits. Geometrical and physical optics. Letter grading.

**6A. Physics for Life Sciences Majors: Mechanics. (5)** (Not the same as course 6A prior to Fall Quarter 2002.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisites: Mathematics 3A, 3B. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6AH. Motion, Newton laws, energy, linear and angular momentum, rotation, equilibrium, gravity, biological applications. P/NP or letter grading.

**6AH. Physics for Life Sciences Majors: Statics and Dynamics (Honors). (5)** (Formerly numbered 6A.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisites: Mathematics 3A, 3B. Enforced corequisite: Mathematics 3C. Not open for credit to students with credit for course 6A. Statics and dynamics of forces, energy, and momentum, with applications to biological and biochemical systems. Physics of states of matter (solids, liquids, and gases) and of surfaces and interfaces as they apply to biological organisms. P/NP or letter grading.

**6B. Physics for Life Sciences Majors: Waves, Electricity, and Magnetism. (5)** (Not the same as course 6B prior to Fall Quarter 2002.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6A or 6AH. Not open for credit to students with credit for course 6BH. Mechanical waves, sound, electricity and magnetism, electromagnetic waves, biological applications. P/NP or letter grading.

**6BH. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics (Honors). (5)** (Formerly numbered 6B.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6A or 6AH. Not open for credit to students with credit for course 6B. Sound and electromagnetic waves, interference, diffraction, radioactivity, and hydrodynamics, with applications to biological and biochemical systems. P/NP or letter grading.

**6C. Physics for Life Sciences Majors: Light, Fluids, Thermodynamics, Modern Physics. (5)** (Not the same as course 6C prior to Fall Quarter 2002.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6B. Not open for credit to students with credit for course 6CH. Geometrical and physical optics, fluid statics and dynamics, thermodynamics. Selected topics from foundations of quantum mechanics; atomic, nuclear and particle physics; relativity; medical detectors; biological applications. P/NP or letter grading.

**6CH. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport (Honors). (5)** (Formerly numbered 6C.) Lecture, three hours; discussion, one hour; laboratory, two hours. Enforced prerequisite: course 6BH. Not open for credit to students with credit for course 6C. Electrostatics in vacuum and in water. Electric current with applications to electrophysiology. Magnetism, especially NMR. Diffusion and heat flow, with applications to biological and biochemical systems. P/NP or letter grading.

**10. Physics. (4)** Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 1A, 1AH, 6A, or 6AH. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas placed in cultural and historical perspective. P/NP or letter grading.

**17. Light, Atomic Nature of Matter, and Special Relativity. (4)** Lecture, three hours; discussion, one hour. Enforced prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32A, 32B. Enforced corequisite: Mathematics 33A. Electromagnetic waves, geometrical and physical optics, photons, photoelectric effect, blackbody radiation. Atomic spectra, Bohr atom, wave-particle duality, kinetic theory of gases, solids, and liquids. Nature of space and time: special relativity. P/NP or letter grading.

**18L. Modern Physics Laboratory. (4)** Lecture, one hour; laboratory, six hours. Enforced prerequisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 4AL, 4BL, 17. Experiments on superconductivity, radioactivity, polarization; measurement of speed of light, fine structure constant, Boltzmann constant, Planck constant. Letter grading.

**88. Lower Division Seminar: Current Topics in Physics. (2)** Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**M88. Limits of Biological Design through Physical Principles. (4)** (Same as Molecular, Cell, and Developmental Biology M88H.) Seminar, three hours. Enforced prerequisites: courses 1A, 1B, and 1C, or 1AH, 1BH, and 1CH, or 6A, 6B, and 6C, Chemistry 20A, 20B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. P/NP or letter grading.

**91A-91B-91C. Physics Workshops for Scientists and Engineers.** (1-1-1) Discussion, four hours. Enforced corequisite for course 91A: course 1A; for 91B: course 1B; for 91C: course 1C. Workshops with focus on developing physical intuition and problem-solving skills in peer-group collaborative learning environment. Students must fulfill total of 30 hours to receive credit. P/NP grading.

**96A-96B-96C. Physics Workshops for Life Sciences Majors.** (1-1-1) Discussion, four hours. Enforced corequisite for course 96A: course 6A; for 96B: course 6B; for 96C: course 6C. Workshops with focus on developing physical intuition and problem-solving skills in peer-group collaborative learning environment. Students must fulfill total of 30 hours to receive credit. P/NP grading.

## Upper Division Courses

**105A. Analytic Mechanics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A. Corequisite: Mathematics 33B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations. P/NP or letter grading.

**105B. Analytic Mechanics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation. P/NP or letter grading.

**108. Optical Physics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest. P/NP or letter grading.

**110A. Electricity and Magnetism.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131, Mathematics 32B, 33A, 33B. Electrostatics and magnetostatics. P/NP or letter grading.

**110B. Electricity and Magnetism.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, Mathematics 32B, 33A, 33B. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. Special theory of relativity. P/NP or letter grading.

**112. Thermodynamics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115B. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. P/NP or letter grading.

**114. Mechanics of Wave Motion and Sound.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, Mathematics 32B, 33A, 33B. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics. P/NP or letter grading.

**115A. Quantum Mechanics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 33A, 33B. Corequisite: course 105B. Classical background. Basic ideas of quantum nature of light, wave-particle duality, Heisenberg uncertainty principle, Bohr atom, physical operators. Schrödinger equation. One-dimensional square well and harmonic oscillator problems. Boundary values. Classical correspondences. Letter grading.

**115B. Quantum Mechanics.** (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 115A, 131. Formal theory: commutator algebra, Hermitian operators, generalized uncertainty principle, Ehrenfest relations. Three-dimensional problems. Central potentials. Angular momentum. Hydrogen atom. Identical particles and Pauli exclusion principle. Electrons in an electromagnetic field. Letter grading.

**115C. Quantum Mechanics.** (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 115B. Matrix mechanics. Addition of angular momentum. Time-independent and time-dependent perturbation theory. Fermi Golden Rule. Applications. Scattering theory. Letter grading.

**116. Electronics.** (4) Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission line circuits, transistor and IC circuits to generate, modify, and detect electrical signals, introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

**117. Electronics for Physics Measurement.** (4) Lecture, three hours; laboratory, two hours. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. P/NP or letter grading.

**M122. Introduction to Plasma Electronics.** (4) (Same as Electrical Engineering M185.) Lecture, three hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

**123. Atomic Structure.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Theory of atomic structure. Interaction of radiation with matter. P/NP or letter grading.

**124. Nuclear Physics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

**126. Elementary Particle Physics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Corequisite: course 115C. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

**131. Mathematical Methods of Physics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), Mathematics 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. P/NP or letter grading.

**132. Mathematical Methods of Physics.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 131, Mathematics 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

**140A. Introduction to Solid-State Physics.** (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 115C. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

**140B. Properties of Solids.** (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 140A. Elementary discussion of properties of solids. Use of theory of electrons and the lattice to examine properties of semiconductors, metals, and superconductors, together with magnetic and dielectric properties of materials. Properties of noncrystalline solids. Letter grading.

**150. Physics of Charged-Particle and Laser Beams.** (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 110A, 110B, 115A, 115B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, acceleration mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser resonators, and advanced topics and applications. P/NP or letter grading.

**160. Numerical Analysis Techniques and Particle Simulations.** (4) Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (FORTRAN). Requisites: courses 1A, 1B, and 1C (or 1AH, 1BH, and 1CH), 105A, 105B, 110A, 110B. Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

**180A. Nuclear Physics Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**180B. Physical Optics and Spectroscopy Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**180C. Solid-State Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**180D. Acoustics Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**180E. Plasma Physics Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**180F. Elementary Particle Laboratory.** (4) Laboratory, four hours. P/NP or letter grading.

**C185. Foundations of Physics.** (4) Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C285. Letter grading.

**199. Special Studies in Physics.** (2 to 4) Tutorial, to be arranged. May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

## Graduate Courses

**201Q. Modern Physics Research Areas.** (2) Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

**210A. Electromagnetic Theory.** (4) Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell equations and conservation laws. Wave guides and resonators; simple radiating systems.

**210B. Electromagnetic Theory.** (4) Electromagnetic potentials and Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges.

**213A. Advanced Atomic Structure.** (4) Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

- 213B. Advanced Atomic Structure. (4)** N-j symbols, continuous groups, fractional parentage coefficients, n electron systems.
- 213C. Molecular Structure. (4)** Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.
- 214A. Advanced Acoustics. (4)** Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.
- 214B. Advanced Acoustics. (4)** Propagation in non-homogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.
- 215A. Statistical Physics. (4)** Thermodynamics and statistical mechanics with applications.
- 215B. Nonequilibrium Statistical Mechanics. (4)** Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman/Enskog method, transport coefficients, fluctuation/dissipation theorems, density matrix, H-theorems.
- 215C. Quantum Statistical Mechanics and the Many Body Problem. (4)** Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.
- M215D. Nonequilibrium Statistical Mechanics and Molecular Biophysics. (4)** (Same as Chemistry M223C.) Lecture, three hours. Requisites: course 215A, or Chemistry C215B and C223B. Fundamentals of nonequilibrium thermodynamics and statistical mechanics applied to molecular biophysics. Letter grading.
- 220. Classical Mechanics. (4)** Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.
- 221A-221B-221C. Quantum Mechanics. (4-4-4)** Lecture, three hours. **221A.** Fundamentals of quantum mechanics, operators and state vectors, equations of motion. **221B.** Requisite: course 221A. Rotations and other symmetry operations, perturbation theory. **221C.** Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.
- 222A-222B-222C. Plasma Physics. (4-4-4)** Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.
- 223. Advanced Classical Mechanics. (4)** Requisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.
- 224. Introduction to the Strong Interaction. (4)** Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.
- 225A-225B. Advanced Nuclear Physics. (4-4)** Requisites: courses 221A, 221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.
- 226A-226B-226C. Elementary Particle Physics. (6-6-6)** Lecture, four hours. Requisites: courses 221A, 221B, 221C, 230A, 230B (230A, 230B may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking,  $SU(2) \times U(1)$  electroweak interactions of leptons, quarks,  $W$ s,  $Z^0$  and  $\gamma$ , quark theory of hadrons and quantum chromodynamics.
- 226D. Beyond the Standard Model. (4)** Lecture, three hours. Requisites: courses 226A, 226B, 226C, 230A, 230B, 230C. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.
- 226E. Particle Astrophysics: Exploring Earliest and Extreme Universe. (4)** Lecture, three and one half hours. Requisites: courses 210A, 210B, 221A, 221B. Recommended: course 226A. Introduction to high-energy astrophysics and discussion of latest developments in both experimentation and theory. Special emphasis on unified picture of universe that emerges from particle physics, astronomy, and cosmology. S/U or letter grading.
- 230A-230B-230C. Relativistic Quantum Theory. (6-6-6)** Lecture, four hours. Requisites: courses 221A, 221B, 221C. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.
- 231A. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.
- 231B. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.
- 231C. Methods of Mathematical Physics. (4)** Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.
- 232A-232B. Relativity. (4-4)** Special and general theories, with applications to elementary particles and astrophysics.
- 232C. Special Topics in General Relativity. (4)** Lecture, four hours. S/U or letter grading.
- 233. Introduction to High-Energy Astrophysics. (4)** Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.
- 235. Group Theory and Quantum Mechanics. (4)** Requisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.
- M236. Geometry and Physics. (4)** (Same as Mathematics M217.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.
- 241A. Solid-State Physics. (4)** Lecture, four hours. Requisites: courses 140A, 140B, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties. Letter grading.
- 241B. Solid-State Physics. (4)** Requisite: course 241A. Transport theory with applications, electron/electron interactions.
- 241C. Solid-State Physics. (4)** Requisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.
- 242A-242B. Advanced Solid-State Theory. (4-4)** Requisites: courses 241A, 241B, 241C (may be taken concurrently). Many body methods in solid-state physics.
- 243A-243K. Special Topics in Solid-State Physics. (4 each)** Lecture, three hours. P/NP or letter grading. **243A.** Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.
- M243L. Condensed Matter Physics of the Cell. (4)** (Same as Biomathematics M243.) Seminar, four hours. Designed for graduate students. Basic paradigms of condensed matter physics and applications to biophysical modeling. Letter grading.
- 250. Introduction to Acceleration of Charged Particles. (4)** Lecture, three hours. Requisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.
- 260. Seminar: Problems in Plasma Physics. (4)** Seminar, four hours. S/U or letter grading.
- 261. Seminar: Special Problems in Theoretical Physics. (4)** Seminar, four hours. S/U or letter grading.
- 262. Seminar: Physics of the Solid State. (2 to 4)** Seminar, three hours. S/U or letter grading.
- 264. Seminar: Advanced Physical Acoustics. (4)** Seminar, four hours. S/U or letter grading.
- 266. Seminar: Propagation of Waves in Fluids. (2 to 4)** Seminar, three hours. S/U or letter grading.
- 268. Seminar: Spectroscopy. (2 to 4)** Seminar, three hours. S/U or letter grading.
- 269A. Seminar: Nuclear Physics. (2 to 4)** Seminar, three hours. S/U or letter grading.
- 269B. Seminar: Elementary Particle Physics. (2 to 4)** Seminar, three hours. S/U or letter grading.
- 269C. Seminar: Accelerator Physics. (2 to 4)** Seminar, three hours. Physics principles governing design and performance analysis of particle accelerators, using existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.
- 280E. Advanced Plasma Laboratory. (4)** Lecture, two hours; laboratory, four hours. Requisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.
- C285. Foundations of Physics. (4)** Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C185.
- 290. Research Tutorial: Plasma Physics. (2 or 4)** Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.
- 291. Research Tutorial: Elementary Particle Theory. (2 or 4)** Requisites: courses 226A, 230A, 230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.
- 292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4)** Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

**293. Research Tutorial: Current Topics in Physics. (2)** Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

**294. Research Tutorial: Accelerator Physics. (2 or 4)** Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

**295. Research Tutorial: Solid Earth Physics. (2 or 4)** Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

**296. Research Topics in Physics. (2)** Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics. (2 or 4)** (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4)** Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

**299. Research Tutorial: Nuclear Physics. (2 or 4)** Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

**M370A. Integrated Science Instruction Methods. (4)** (Formerly numbered 370.) (Same as Chemistry M370A and Earth and Space Sciences M370A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Preparation: one introductory lower division year (including laboratory) each of chemistry, life sciences, and physics and at least two Earth science courses, preferably one with field experience. Classroom management, lesson design, assessment, history of science education. S/U or letter grading.

**M370B. Integrated Science Instruction Methods. (4)** (Same as Chemistry M370B and Earth and Space Sciences M370B.) Lecture, two hours; discussion, one hour; laboratory, one hour. Requisite: course M370A (or former course 370) or Chemistry M370A or Earth and Space Sciences M370A. Application of learning theory to science instruction and classroom management, including use of technology, collaborative learning, laboratory safety, ethical issues, field experiences, and professional development. S/U or letter grading.

**375. Teaching Apprentice Practicum. (1 to 4)** Seminar, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Physics. (2)** Seminar/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

**596. Directed Individual Studies. (2 to 12)** Tutorial, to be arranged. May be repeated for credit. S/U grading.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4)** Tutorial, to be arranged. May be repeated twice for credit. S/U grading.

**598. Master's Thesis Research and Writing. (4)** Tutorial, to be arranged. May be repeated twice for credit.

**599. Ph.D. Research and Writing. (8 or 12)** Tutorial, to be arranged. May be repeated for a maximum of 18 units. S/U grading.

## PHYSIOLOGICAL SCIENCE

*College of Letters and Science*

UCLA  
2317 Life Sciences  
Box 951606  
Los Angeles, CA 90095-1606

Camille Brown, Ed.D.  
Bryant J. Cratty, Ed.D.  
Glen H. Egstrom, Ph.D.  
Gerald W. Gardner, Ph.D.  
Margaret E. Haberland, Ph.D.  
Valerie V. Hunt, Ed.D.  
Jack F. Keogh, Ed.D.  
Marjorie E. Latchaw, Ph.D.  
Wayne W. Massey, Ph.D.  
Ben W. Miller, Ph.D.  
Norman P. Miller, Ed.D.

### Associate Professors

Alan Garfinkel, Ph.D.  
Fernando Gómez-Pinilla, Ph.D.  
Patricia E. Phelps, Ph.D.  
Walter H. Metzner, Ph.D.

### Assistant Professors

Rachelle H. Crosbie, Ph.D.  
Stephanie A. White, Ph.D.

### Adjunct Professor

Larry Faller, Ph.D.

### Adjunct Associate Professors

Nasser A. Farahbaksh, Ph.D.  
Marc Klein, Ph.D.  
William C. Whiting, Ph.D.

## Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including developmental neurobiology, gene regulation/neural development, cellular neurobiology, molecular neurobiology, neuromuscular physiology, neuroendocrine physiology, cardiac physiology, diet and degenerative disease, auditory and visual behavior, biomechanics of rehabilitative medicine, muscle cell biology, inflammatory cell biology, vascular biology, cardiac electrophysiology, neuromotor control, and social control of neuronal plasticity.

Applicants interested in pursuing graduate study may apply directly to the interdepartmental Molecular, Cellular, and Integrative Physiology Ph.D. Program (<http://www.mcip.ucla.edu>) or the interdepartmental Neuroscience Ph.D. Program (<http://www.neuroscience.ucla.edu>).

## Undergraduate Study

### Physiological Science B.S.

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B, 14BL, 14C, 14CL, and 14D, or 20A, 20B, 20L, 30A, 30AL, 30B, and 30BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C, or 6AH, 6BH, and 6CH.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

To be admitted as Physiological Science majors, transfer students with 90 or more quarter units must complete the following introductory courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory for majors, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to

prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

## The Major

*Required:* Physiological Science 107, 111A (or M180A), 111B, 111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Either three units of course 199 and one letter-graded unit of course 189 OR four units of course 190 may be applied toward the elective requirement. Courses C191, 193, 195H, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major. Additionally, a grade of C– or better in each of the core courses (Physiological Science 107, 111A or M180A, 111B, 111C) is required to enroll in the next course in the series.

## Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

## Graduate Study

Official, specific degree requirements are detailed in *Program Requirements for UCLA Graduate Degrees*, available at the Graduate Division website, <http://www.gdnet.ucla.edu>. In many cases, more detailed guidelines may be outlined in announcements, other publications, and websites of the schools, departments, and programs.

## Graduate Degrees

The Department of Physiological Science offers the Master of Science (M.S.) degree in Physiological Science.

## Physiological Science

### Lower Division Courses

**3. Introduction to Human Physiology.** (4) Lecture, three hours; demonstration, 30 minutes. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

**5. Issues in Human Physiology: Diet and Exercise.** (5) Lecture, three hours; laboratory, 90 minutes. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

**6. The Human Machine: Physiological Processes.** (4) Not open to Physiological Science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

**13. Introduction to Human Anatomy.** (5) Lecture, four hours; laboratory, three hours. Not open to Physiological Science majors. Structural survey of human body, including skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

**90. Introduction to Physiological Science.** (2) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

### Upper Division Courses

**C100. Experimental Statistics.** (4) Lecture, four hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course CM200. P/NP or letter grading.

**CM102. Basic Human Biology for Biomedical Engineers I.** (4) (Formerly numbered M102.) (Same as Biomedical Engineering CM102.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Broad overview of basic biological activities and organization of human body in system (organ/tissue) to system basis, with particular emphasis on molecular basis. Modeling/simulation of functional aspect of biological system included. Actual demonstration of biomedical instruments, as well as visits to biomedical facilities. Concurrently scheduled with course CM204. Letter grading.

**CM103. Basic Human Biology for Biomedical Engineers II.** (4) (Formerly numbered M103.) (Same as Biomedical Engineering CM103.) Lecture, three hours; laboratory, two hours. Preparation: human molecular biology, biochemistry, and cell biology. Not open for credit to Physiological Science majors. Molecular-level understanding of human anatomy and physiology in selected organ systems (digestive, skin, musculoskeletal, endocrine, immune, urinary, reproductive). System-specific modeling/simulations (immune regulation, wound healing, muscle mechanics and energetics, acid-base balance, excretion). Functional basis of biomedical instrumentation (dialysis, artificial skin, pathogen detectors, ultrasound, birth-control drug delivery). Concurrently scheduled with course CM203. Letter grading.

**107. Systems Anatomy.** (5) Lecture, four hours; laboratory, three hours; tutorial, two hours. Requisites: Life Sciences 2, Physics 1A or 6A or 6AH. Students must receive a grade of C– or better to proceed to next course in series. Systems anatomy focused primarily on human anatomy. Topics include cardiorespiratory, reproductive, nervous, and skeletomuscular systems, with introduction to biomechanical principles. Letter grading.

**111A-111B-111C. Foundations in Physiological Science.** (6-6-6) Lecture, four hours; laboratory, two hours. Letter grading. **111A.** Requisites: course 107, Chemistry 14C or 30A, Life Sciences 1, 2, 3, 4, Physics 1B or 6B or 6CH. Not open for credit to students with credit for course M180A. Students must receive a grade of C– or better to proceed to next course in series. Introduction to principles of neurophysiology: cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. **111B.** Requisites: course 111A or M180A, Chemistry 14D or 30B. Students must receive a grade of C– or better to proceed to next course in series. Principles of muscular, cardiovascular, and pulmonary physiology. **111C.** Requisites: course 111A or M180A, Chemistry 153A. Students must receive a grade of C– or better to proceed to next course in series. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

**111L. Physiological Science Laboratory.** (3) Laboratory, four hours. Requisites: courses 111A, 111B, 111C (111C may be taken concurrently). Required of Physiological Science majors. Designed to illustrate physiological principles studied in courses 111A, 111B, 111C. Letter grading.

**C125. Comparative Endocrinology: Molecular to Behavioral.** (4) Lecture, two hours; discussion, two hours. Requisite: course 111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM225.

**126. Biological Clocks.** (4) Lecture, three hours; discussion, one hour. Requisite: course 111A or M180A. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within the organisms and are called circadian rhythms. Exploration of molecular, cellular, and system-level organization of these timing systems.

**133. Exercise Physiology.** (5) Lecture, three hours; laboratory, two hours. Requisite: course 111B. Physiological responses and adaptations to acute and chronic exercise. Letter grading.

**C135. Dynamical Systems Modeling of Physiological Processes.** (5) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

**136. Exercise and Cardiovascular Function.** (5) Lecture, four hours. Requisite: course 111B. Consideration of acute and chronic effects of exercise in diagnosis, prevention, and treatment of cardiovascular disorders.

**C137. Growth and Adaptation in Cardiovascular System.** (4) Requisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C237.

**138. Neuromuscular Physiology and Adaptation.** (4) Requisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system.

**142. Sensorimotor Physiology.** (5) Lecture, three hours; laboratory, two hours. Requisite: course 111A or M180A. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices.

**C143. Neuromotor Control of Posture and Movement.** (5) Lecture, four hours. Requisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C243.

**C144. Neural Control of Physiological Systems.** (5) Lecture, four hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244.

**CM145. Neural Mechanisms Controlling Movement.** (5) (Same as Neuroscience M145.) Lecture, four hours. Requisite: course 111A or M180A or Neuroscience M101A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C245. Letter grading.

**146. Principles of Nervous System Development.** (4) Lecture, four hours. Requisites: courses 107 (or Neuroscience 102) and 111A (or M180A or Neuroscience M101A). Examination of construction of vertebrate nervous system as series of steps beginning with several embryonic cells and culminating as complex highly ordered system. Topics include neurulation, regionalization, neurogenesis, migration, axonal outgrowth, and synapse formation. Letter grading.

**147. Neurobiology of Learning and Memory.** (5) Lecture, four hours; research demonstration, one hour. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

**M148. Molecular and Cellular Physiology of Neurons.** (4) (Same as Neuroscience M148.) Lecture, three hours. Requisite: course 111A or M180A or Neuroscience M101A. Advanced treatment of selected topics in cellular neurophysiology. Letter grading.

**C150. Musculoskeletal Mechanics.** (5) (Formerly numbered 150.) Lecture, three hours. Requisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatics, biodynamics, and modeling. Concurrently scheduled with course C250B. Letter grading.

**151. Limb Dynamics.** (5) Lecture, three hours; laboratory, two hours. Requisite: course C150. Biomechanical analysis of human movement, with special emphasis on control of limb movements.

**C152. Musculoskeletal Anatomy, Physiology, and Biomechanics.** (5) Lecture, three hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C252.

**153. Dissection Anatomy.** (4) Lecture, two hours; laboratory, six hours. Requisite: course 111B. Departmental application required. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.
